⁵⁶ For the purposes of the Federal IDR process, the Departments in guidance interpreted a bundled payment arrangement to be an arrangement under which: (1) a provider, facility, or provider of air ambulance services bills for multiple items or services under a single service code; or (2) a plan or issuer makes an initial payment or denial of payment to a provider, facility, or provider of air ambulance services under a single service code that represents multiple items or services (e.g., a DRG). See U.S. Department of Health and Human Services, U.S. Department of Labor, and U.S. Department of Treasury, Federal Independent Dispute Resolution (IDR) Process Technical Assistance for Certified IDR Entities, August 2022, available at <https://www.cms.gov/files/document/TA-certified-independent-dispute-resolution-entities-August-2022.pdf>. These rules, discussed in section II.A. of this preamble, propose to codify that definition in the regulations.

⁵⁹ 87 FR 52622.

⁶⁰ 87 FR 52622–52623.

⁶¹ 87 FR 52628.

⁶² 87 FR 52626.

determines best represents the value of the qualified IDR item or service.

Additionally, the August 2022 final rules provided that when considering the additional information under 26 CFR 54.9816–8(c)(4)(iii), 29 CFR 2590.716–8(c)(4)(iii), and 45 CFR 149.510(c)(4)(iii), the certified IDR entity should evaluate the information and should not give weight to that information if it is already accounted for by any of the other information submitted by the parties, to avoid weighting the same information twice.

For the written decision, the August 2022 final rules require the certified IDR entity to include what information the certified IDR entity used to determine that the offer selected as the out-of-network rate is the offer that best represents the value of the qualified IDR item or service, including the weight given to the QPA and any additional credible information submitted in accordance with the rules. The August 2022 final rules required that if the certified IDR entity relied on additional information in selecting an offer, its written decision must include an explanation of why the certified IDR entity concluded that this information was not already reflected in the QPA.

F. Litigation Regarding the August 2022 Final Rules

On September 22, 2022, the Texas Medical Association, Tyler Regional Hospital, a Texas physician, LifeNet, Inc., Air Methods Corporation, Rocky Mountain Holdings, LLC, and East Texas Air One, LLC filed a lawsuit against the Departments (*TMA II*),⁶³ asserting that certain provisions of the August 2022 final rules relating to the certified IDR entities' consideration of the QPA, as well as additional factors, should be vacated. Plaintiffs argued that the August 2022 final rules unlawfully conflict with the No Surprises Act in the same manner as the vacated provisions of the October 2021 interim final rules—that is, such rules improperly restrict arbitrators' discretion and unlawfully tilt the arbitration process in favor of the QPA. On February 6, 2023, the District Court issued a memorandum opinion and order that vacated portions of the August 2022 final rules related to the certified IDR entity's consideration of the statutory factors when making a payment determination under the Federal IDR process at 26 CFR 54.9816–8(c)(4)(iii)–(iv) and 54.9817–2(b)(3), 29

CFR 2590.716–8(c)(4)(iii)–(iv) and 2590.717–2(b)(3), and 45 CFR 149.510(c)(4)(iii)–(iv) and 149.520(b)(3) and part of the provision related to the certified IDR entity's written decision at 26 CFR 54.9816–8(c)(4)(vi)(B), 29 CFR 2590.716–8(c)(4)(vi)(B), and 45 CFR 149.510(c)(4)(vi)(B). The vacated portions of the rules include: (1) the requirement that certified IDR entities consider the QPA and then the additional statutory factors under 26 CFR 54.9816–8(c)(4)(iii)(B)(1)–(5) and 54.9817–2(b)(3), 29 CFR 2590.716–8(c)(4)(iii)(B)(1)–(5) and 2590.717–2(b)(3), and 45 CFR 149.510(c)(4)(iii)(B)(1)–(5) and 149.520(b)(3); (2) the provision that a certified IDR entity should evaluate whether the information submitted under 26 CFR 54.9816–8(c)(4)(iii)(B)–(D) and 54.9817–2(b)(3), 29 CFR 2590.716–8(c)(4)(iii)(B)–(D) and 2590.717–2(b)(3), and 45 CFR 149.510(c)(4)(iii)(B)–(D) and 149.520(b)(3) is credible and relates to the offer submitted by either party for the payment amount for the qualified IDR item or service that is the subject of the payment determination, and the certified IDR entity should not give weight to information to the extent it is not credible, it does not relate to either party's offer for the payment amount for the qualified IDR item or service, or it is already accounted for by the QPA or another factor; (3) the dispute resolution examples; and (4) the requirement that, if the certified IDR entity relies on additional information in selecting an offer, its written decision must include an explanation of why the certified IDR entity concluded that this information was not already reflected in the QPA.

As a result of the *TMA II* order, on February 10, 2023, the Departments instructed certified IDR entities to hold all payment determinations until the Departments updated Federal IDR process guidance, systems, and related documents to make them consistent with the *TMA II* order.⁶⁴ Subsequently, the Departments directed certified IDR entities to resume making payment determinations on February 27, 2023, for disputes involving an item or service furnished before October 25, 2022 (the effective date of the August 2022 Final Rules).⁶⁵ On March 17, 2023, the

Departments released updated guidance⁶⁶ to reflect the *TMA II* order and directed certified IDR entities to resume making payment determinations in accordance with the guidance for disputes involving items or services furnished on or after October 25, 2022.

On April 6, 2023, the Departments filed a notice of appeal to the United States Court of Appeals for the Fifth Circuit from the District Court's order granting summary judgement to the plaintiffs and denying summary judgment to the Departments.

G. Federal IDR Process Administrative Fee and Certified IDR Entity Fee Ranges 2023 Proposed Rules

In light of *TMA IV* and to promote transparency in the administrative fee calculation, the Departments published the IDR Process Fees proposed rules on September 26, 2023. The IDR Process Fees proposed rules propose to amend the October 2021 interim final rules to provide that the administrative fee would be set in notice and comment rulemaking rather than annual guidance, propose an administrative fee amount that, if finalized, would apply for disputes initiated on or after the later of the effective date of the IDR Process Fees proposed rules or January 1, 2024, and propose a methodology that the Departments would use to calculate the administrative fee in the future. Additionally, the IDR Process Fees proposed rules would propose to amend the October 2021 interim final rules to provide that the certified IDR entity fee ranges for single and batched determinations would be set in notice and comment rulemaking rather than annual guidance, propose the certified IDR entity fee ranges for single and batched determinations, including a fixed tiered fee for batched disputes, and propose the considerations that the Departments would use to calculate the certified IDR entity fee ranges in the future. If finalized, the proposed certified IDR entity fee ranges and fixed tiered fees would apply for disputes initiated on or after the later of the effective date of the IDR Process Fees proposed rules or January 1, 2024. If finalized, the proposed administrative fee and certified IDR entity fee ranges would remain in effect until changed by subsequent rulemaking.

H. The Federal IDR Process to Date

On April 15, 2022, the Departments launched the Federal IDR portal to accept disputes regarding the appropriate out-of-network rate for claims subject to the surprise billing protections of the No Surprises Act. From April 15, 2022 to July 1, 2023, disputing parties submitted over 489,000 disputes. In the first year of operations, disputing parties submitted 14 times the number of disputes that the Departments had expected to receive in an entire calendar year.⁶⁷ Due to this unexpectedly high volume, the limited number of certified IDR entities,⁶⁹ the complexity of determining disputes' eligibility for the Federal IDR process, and a large number of ineligible disputes submitted, it is taking certified IDR entities longer than the timeframes established under the No Surprises Act and the October 2021 interim final rules to process payment disputes. Further, the District Court's successive orders have resulted in multiple temporary closures of the Federal IDR portal, requiring the Departments to alter guidance, implement significant system updates, and communicate changes to disputing parties and certified IDR entities to comply with the orders. These interruptions to the Federal IDR process have exacerbated delays and required certified IDR entities and disputing parties to rapidly adjust to changing operations and guidance. Accordingly, a large number of disputes still await payment determinations.

Several factors are likely contributing to the high volume of initiated disputes. First, providers, facilities, and providers of air ambulance services⁷⁰ have alleged that plans' and issuers' QPA calculations are sometimes artificially low and are even at times lower than Medicare rates. Providers, facilities, and providers of air ambulance services further allege that plans and issuers are making initial payments based on these artificially low QPAs, which incentivizes providers, facilities, and

providers of air ambulance services to use the Federal IDR process for a larger number of items and services than they otherwise would.

A second factor contributing to the high volume of disputes is that the disputing parties are not yet able to predict how disputes will be resolved by certified IDR entities. As the Departments stated in the preamble to the October 2021 interim final rules, a Federal IDR process with predictable outcomes will reduce the use of the Federal IDR process over time because, if outcomes are predictable in advance, parties will generally prefer to reach an agreement in line with the predicted outcome outside of the Federal IDR process to avoid the administrative costs of utilizing the process.

Third, disputing parties are failing to engage in meaningful open negotiations. Parties representing providers, facilities, providers of air ambulance services, plans, and issuers have all asserted that they experience challenges in negotiating with other parties during the 30-business-day open negotiation period, resulting in low levels of engagement during open negotiation. This lack of engagement has resulted in relatively few disputes being settled outside of the Federal IDR process, contributing to a higher-than-expected volume of disputes being initiated in the Federal IDR process. As discussed later in this section, interested parties also shared that the lack of meaningful engagement in open negotiation contributes to inefficiencies within the Federal IDR process, because disputing parties that fail to engage in open negotiation may not exchange information that would facilitate the Federal IDR process, such as contact information and other required disclosures, or may exchange only incomplete information.

Fourth, the District Court's successive rulings have necessitated multiple temporary shutdowns of the Federal IDR process to comply with the District Court's orders. Each shutdown has halted parts, or all, of the Federal IDR process, interrupting the advancement of ongoing disputes through the process and preventing new disputes from being submitted. Reopening the Federal IDR portal each time has required the Departments to draft new guidance, engage in new rulemaking, implement significant system updates, and communicate changes to disputing parties and certified IDR entities. These interruptions to the Federal IDR process have exacerbated delays and required certified IDR entities and disputing parties to rapidly adjust to changing operations and guidance, which causes

confusion regarding the current state of the process while certified IDR entities and disputing parties adapt to new or different processes, such as those discussed in section I.D. of this preamble related to the *TMA III* order.

Finally, initiating parties are submitting a large number of disputes that are not eligible for the Federal IDR process, leading to both a high volume of dispute submissions and slow processing of disputes. Certified IDR entities have indicated to the Departments that determining the eligibility of disputes for the Federal IDR process is more time-consuming and burdensome than they expected. In fact, certified IDR entities report spending 50 to 80 percent of their time working on eligibility determinations. From April 15, 2022 to July 1, 2023, non-initiating parties challenged the eligibility of 190,465 disputes for the Federal IDR process, and certified IDR entities found 59,604 disputes ineligible. A dispute is not eligible for the Federal IDR process unless it concerns an item or service that meets the definition of a qualified IDR item or service.⁷¹ Ineligible disputes often involve an item or service that is not a qualified IDR item or service because it is covered by a health plan or coverage that is not subject to the surprise billing protections of the No Surprises Act, such as Medicare or Medicaid, or because the item or service is subject to a specified State law or an All-Payer Model Agreement. Additionally, many batched disputes were found ineligible due to the initiating party incorrectly batching items or services in a manner that did not comply with the regulations, such as batching claims paid by different plans or issuers.⁷² Certified IDR entities have similarly reported encountering incorrectly bundled disputes for which providers are attempting to submit, for example, an emergency room facility code as a bundled code with various item and service codes included as line items, rather than properly submitting a single service code (for example, a Diagnosis-Related Group (DRG) code under which a provider, facility, or provider of air ambulance services can bill for multiple items or services).⁷³ Disputes are also ineligible when the disputing parties have failed to satisfy the 30-business-day open negotiation period requirements specified under 26 CFR

⁶⁷ Federal Independent Dispute Resolution Process—Status update. Available at: <https://www.cms.gov/files/document/federal-idr-processstatus-update-april-2023.pdf>.

⁶⁸ In the regulatory impact analysis of the October 2021 interim final rules, the Departments estimated that 17,333 disputes involving non-air ambulance services and 4,899 disputes involving air ambulance services would be submitted to the Federal IDR process during the first year of implementation.

⁶⁹ <https://www.cms.gov/nosurprises/help-resolve-payment-disputes/certified-idre-list>.

⁷⁰ For purposes of these proposed rules, unless otherwise stated, whenever the Departments are referring to providers, facilities, and providers of air ambulance services, the Departments are referring to nonparticipating providers, facilities, and providers of air ambulance services.

⁷¹ 26 CFR 54.9816–8T(a)(2)(xi), 29 CFR 2590.716–8(a)(2)(xi), and 45 CFR 149.510 (a)(2)(xi).

⁷² 26 CFR 54.9816–8T(c)(3)(i)(B), 29 CFR 2590.716–8(c)(3)(i)(B), and 45 CFR 149.510(c)(3)(i)(B).

⁷³ 26 CFR 54.9816–8T(c)(3)(ii), 29 CFR 2590.716–8(c)(3)(ii), and 45 CFR 149.510(c)(3)(ii).

54.9816–8T(b)(1), 29 CFR 2590.716–8(b)(1), and 45 CFR 149.510(b)(1) or have failed to initiate the Federal IDR process within 4 business days after the end of the 30-business-day open negotiation period as specified under 26 CFR 54.9816–8T(b)(2)(i), 29 CFR 2590.716–8(b)(2)(i), and 45 CFR 149.510(b)(2)(i).

The Departments' review of the disputes submitted to date and feedback received from interested parties and certified IDR entities via letters, email communication and listening sessions shows a pattern of initiating parties submitting ineligible disputes to the Federal IDR process due to miscommunication or a lack of communication between the disputing parties. The Departments intended that sufficient information would be communicated through the disclosures that plans and issuers are required to provide with their initial payment or notice of denial of payment or would be subsequently communicated during the required 30-business-day open negotiation period to identify whether the item(s) or service(s) involved in the dispute is a qualified IDR item(s) or service(s). Plans and issuers assert that providers, facilities, and providers of air ambulance services submit overwhelming numbers of ineligible disputes that overload the plans' and issuers' ability to identify and respond to dispute initiations, while providers, facilities, and providers of air ambulance services assert that plans and issuers do not provide required contact information and disclosures in a clear and convenient manner and fail to respond to their notices initiating open negotiation.

Although plans and issuers are required to provide disclosures with the initial payment or notice of denial of payment containing information related to the QPA and contact information to initiate open negotiations, providers, facilities, and providers of air ambulance services have reported difficulty locating this information. The inability of providers, facilities, and providers of air ambulance services to locate required disclosures has led to confusion about how they should contact and engage in open negotiations with the plan or issuer and ultimately submit the dispute to the Federal IDR process. If disputing parties fail to share the required information, or if they provide inaccurate information, certified IDR entities will have incomplete or inaccurate information when making eligibility determinations. As a result, certified IDR entities must dedicate additional resources and conduct outreach to determine

eligibility. Many interested parties have stated that the exchange of key information in a more standardized fashion, such as through the inclusion of the information on electronic remittance advice (ERA) transactions, discussed in greater detail in section II.B. of this preamble, would ensure that disputing parties have timely access to complete and accurate information and therefore help reduce the number of ineligible disputes submitted to the Federal IDR process. This is primarily because disputing parties would have timely access to the information they need to determine whether (1) an item or service is a qualified IDR item or service and (2) it is in their interest to initiate the Federal IDR process regarding such item or service. The Departments are of the view that timely access to that type of information would help reduce the overall number of ineligible disputes, resulting in more manageable workloads for certified IDR entities and more efficient dispute processing overall.

Additionally, providers and facilities have raised concerns that the existing disclosure rules do not require plans and issuers to provide information necessary for determining whether the item or service is subject to a specified State law, an All-Payer Model Agreement, or the Federal IDR process for determining the out-of-network rate. In particular, providers, facilities, and providers of air ambulance services have identified significant challenges in determining whether a claim involves a plan that is a self-insured group health plan subject to ERISA (and, if the claim involves an item or service covered by the No Surprises Act, is therefore generally subject to the Federal IDR process) or a fully-insured plan to which a specified State law or All-Payer Model Agreement may apply.⁷⁴ The Departments also are aware that there are further challenges in identifying whether a plan subject to ERISA has opted into a specified State law and, separately, whether a specific item or

service, or specific provider, facility, or provider of air ambulance services, is subject to a given specified State law or All-Payer Model Agreement. Additionally, providers, facilities, and providers of air ambulance services have identified difficulties in determining the correct legal business name of the plan or issuer. As a result, when initiating the Federal IDR process, providers, facilities, and providers of air ambulance services may initiate their dispute against the wrong party or may incorrectly batch claims that were paid by different plans or issuers.

To address the high volume of disputes submitted to the Federal IDR process and the growing backlog of cases, the Departments have provided ongoing technical assistance to certified IDR entities and disputing parties by issuing guidance as well as performing research and outreach on dispute eligibility determinations.⁷⁵ In addition, the Departments have implemented Federal IDR portal system enhancements. These system enhancements, such as enabling non-initiating parties to submit supporting documentation to contest dispute eligibility within their response to the notice of IDR initiation, allow the Departments to collect information regarding dispute eligibility earlier in the process to identify whether the eligibility requirements are met. However, despite the efforts to date, the Departments and certified IDR entities continue to experience challenges related to determining eligibility for the Federal IDR process, such as delays due to necessary outreach by the certified IDR entities to the disputing parties to obtain or verify information regarding the eligibility of a dispute.

I. Scope and Purpose of Rulemaking

This proposed rulemaking is intended to address specific issues that are critical to ensuring the timely rendering of payment determinations and to address feedback from interested parties and certified IDR entities to improve the functioning of the Federal IDR process.

These proposed rules are intended to address some of the common communication issues between disputing parties, including those stemming from a lack of clarity as to whether items and services are qualified IDR items and services covered by the

⁷⁴ The July 2021 interim final rules allow self-insured group health plans, including self-insured non-Federal governmental plans, to voluntarily opt in to a State law that provides for a method for determining the total amount payable under such a plan, where a State has chosen to expand access to such plans, to satisfy their obligations under section 9816(a)–(d) of the Code, section 716(a)–(d) of ERISA, and section 2799A–1(a)–(d) of the PHS Act. A self-insured plan that has chosen to opt-in to a State law must prominently display in its plan materials describing the coverage of out-of-network services a statement that the plan has opted in to a specified State law, identify the relevant State (or States), and include a general description of the items and services provided by nonparticipating facilities, providers, and providers of air ambulance services that are covered by the specified State law.

⁷⁵ U.S. Department of Health and Human Services, U.S. Department of Labor, and U.S. Department of the Treasury, Federal Independent Dispute Resolution (IDR) Process Technical Assistance for Certified IDR Entities, August 2022, available at <https://www.cms.gov/files/document/TA-certified-independent-dispute-resolution-entities-August-2022.pdf>.

No Surprises Act. These proposed rules would impose requirements and create incentives for parties to engage with one another during the open negotiation period, which would help reduce the volume of ineligible disputes being submitted. Specifically, these proposed rules would make changes to the information that plans, issuers, providers, facilities, and providers of air ambulance services must share before initiating the Federal IDR process by including proposals at 26 CFR 54.9816–6A, 29 CFR 2590.716–6A, and 45 CFR 149.100 to require plans and issuers to provide claim adjustment reason codes (CARCs) and remittance advice remark codes (RARCs) when providing any paper or electronic remittance advice in response to a claim for payment for health care items or services furnished by an entity with which it does not have a direct or indirect contractual relationship. Additionally, the Departments propose amendments at 26 CFR 54.9816–6, 29 CFR 2590.716–6, and 45 CFR 149.140 to the information that must be disclosed about the QPA. These proposed rules would also establish new requirements at 26 CFR 54.9816–9, 29 CFR 2590.716–9, and 45 CFR 149.530, which would require plans and issuers to register with the Federal IDR portal to better enable a provider, facility, or provider of air ambulance services to identify the appropriate plan or issuer with which it has a dispute and determine whether its coverage of an item or service that is the subject of the dispute is subject to a specified State law, an All-Payer Model Agreement, or the Federal IDR process for determining the out-of-network rate.

To further facilitate communication and improve open negotiations, these proposed rules would amend the open negotiation process that precedes the Federal IDR process. Specifically, at 26 CFR 54.9816–8(b)(1), 29 CFR 2590.716–8(b)(1), and 45 CFR 149.510(b)(1), these proposed rules would amend the content requirements of the standard open negotiation notice, would establish requirements related to an open negotiation response notice, and would clarify the timing for when the open negotiation period begins. These proposed rules would also amend the process for initiating the Federal IDR process. Specifically, at 26 CFR 54.9816–8(b)(2), 29 CFR 2590.716–8(b)(2), and 45 CFR 149.510(b)(2), these proposed rules would amend the content of the notice of IDR initiation and establish new requirements for a

notice of IDR initiation response from the non-initiating party. At 26 CFR 54.9816–8T(b)(3), 29 CFR 2590.716–8(b)(3), and 45 CFR 149.510(b)(3) these proposed rules would also establish a new manner for providing notices to the other party and the Departments.

These proposed rules would also provide additional clarity regarding timeframes within the Federal IDR process. The No Surprises Act includes timeframes by which certain steps of the Federal IDR process must be completed. For example, the parties to a dispute must jointly select a certified IDR entity not later than the last day of the 3-business-day period following the date of the initiation of the Federal IDR process, and if the parties fail to jointly select a certified IDR entity, the Departments must select a certified IDR entity not later than 6 business days after the date of IDR initiation.⁷⁶ While the No Surprises Act also provides detailed timeframes for certain other steps in the process, the steps that must be conducted before a payment determination can be issued are not as clearly defined, such as when a certified IDR entity must conduct a conflict-of-interest review and must determine whether an item or service is a qualified IDR item or service, as defined in 26 CFR 54.9816–8T(a)(2)(xi), 29 CFR 2590.716–8(a)(2)(xi), and 45 CFR 149.510(a)(2)(xi), and eligible for the Federal IDR process. Therefore, the provisions in these proposed rules would adjust certain steps and establish associated timeframes (see Table 1). This includes proposed provisions related to establishing a process for the preliminary selection of the certified IDR entity and the final selection of the certified IDR entity as set out in 26 CFR 54.9816–8(c)(1), 29 CFR 2590.716–8(c)(1), and 45 CFR 149.510(c)(1), in order to account for the time it takes certified IDR entities to confirm that they do not have a conflict of interest with either party. To allow more time for certified IDR entities to conduct eligibility reviews, these proposed rules would include proposed amendments to the Federal IDR process eligibility review proposed in 26 CFR 54.9816–8T(c)(2), 29 CFR 2590.716–8(c)(2), and 45 CFR 149.510(c)(2). As discussed in section I.H. of this preamble, eligibility reviews have proven to be complex and time consuming. In extenuating circumstances, such as when dispute volume is high, it may be more appropriate for the Departments, rather than certified IDR entities, to conduct

eligibility reviews to facilitate quicker dispute processing. Therefore, these proposed rules would establish a departmental eligibility review process in proposed paragraph 26 CFR 54.9816–8(c)(2)(ii), 29 CFR 2590.716–8(c)(2)(ii), and 45 CFR 149.510(c)(2)(ii). Further, to support eligibility determinations, conflict-of-interest reviews, or payment determinations, the Departments propose requirements for the submission of additional information from the disputing parties at 26 CFR 54.9816–8(c)(2)(iii), 29 CFR 2590.716–8(c)(2)(iii), and 45 CFR 149.510(c)(2)(iii). To clarify and establish a standard process for disputes to be withdrawn from the Federal IDR process, the Departments propose four conditions in which a dispute may be withdrawn at 26 CFR 54.9816–8(c)(3)(i), 29 CFR 2590.716–8(c)(3)(i), and 45 CFR 149.510(c)(3)(ii). To further adjust timeframes and processes associated with the Federal IDR process, these proposed rules would include proposed amendments related to submission of offers and payment determination and notification at 26 CFR 54.9816–8(c)(5), 29 CFR 2590.716–8(c)(5), and 45 CFR 149.510(c)(5); the collection of the certified IDR entity fee at 26 CFR 54.9816–8(d)(1), 29 CFR 2590.716–8(d)(1), and 45 CFR 149.510(d)(1); and the collection of the administrative fee, including a process for setting a reduced administrative fee for low-dollar amount disputes and for non-initiating parties in cases of ineligible disputes, at 26 CFR 54.9816–8(d)(2), 29 CFR 2590.716–8(d)(2), and 45 CFR 149.510(d)(2). These proposed rules also include provisions to expand upon situations in which Federal IDR process timeframes may be waived due to extenuating circumstances at 26 CFR 54.9816–8T(g), 29 CFR 2590.716–8(g), and 45 CFR 149.510(g).

Lastly, to address concerns regarding the vacated batching provision at 26 CFR 54.9816–8T(c)(3)(i)(C), 29 CFR 2590.716–8(c)(3)(i)(C), and 45 CFR 149.510(c)(3)(i)(C) and to create more efficiencies in the process, these proposed rules at 26 CFR 54.9816–8(c)(4), 29 CFR 2590.716–8(c)(4), and 45 CFR 149.510(c)(4) would include provisions that would allow for more flexibility in batching multiple items or services in a single dispute.

It is the Departments' intention that the implementation of the proposed provisions in these proposed rules, if finalized, would lead to a more efficient

⁷⁶ Section 9816(c)(4)(F) of the Code, section 716(c)(4)(F) of ERISA, and section 2799A–1(c)(4)(F) of the PHS Act.

Federal IDR process and more timely payment determinations.

BILLING CODE 6325-63-P; 4830-01-P; 4510-29-P; 4120-01-P

TABLE 1: The Federal IDR Process Under These Proposed Rules⁷⁷

Steps Preceding the Federal IDR Process	
Timeframe	Summary of Steps
Start	A furnished item or service results in a charge for emergency items or services from a nonparticipating provider or nonparticipating emergency facility, for non-emergency items or services from a nonparticipating provider at a participating health care facility, or for air ambulance services from a nonparticipating provider of air ambulance services.
Within 30 calendar days after the bill for the services is transmitted	Initial Payment or Notice of Denial of Payment The plan or issuer determines whether the services are covered, and if the services are covered, sends to the provider, facility, or provider of air ambulance services an initial payment or notice of denial of payment no later than 30 calendar days after a bill is transmitted.
30 business days after the provider, facility, or provider of air ambulance services receives an initial payment or notice of denial of payment	Initiation of Open Negotiation Period An open negotiation period must be initiated within 30 business days beginning on the day the provider, facility, or provider of air ambulance services receives either an initial payment or a notice of denial of payment for the item or service from the plan or issuer. To initiate the open negotiation period, a party must submit a written open negotiation notice and supporting documentation to the other party and to the Departments via the Federal IDR portal.
30 business days	Open Negotiation Period Parties must exhaust a 30-business-day open negotiation period before either party may initiate the Federal IDR process.
Within the first 15 business days of the open negotiation period	Open Negotiation Response Notice The party in receipt of the open negotiation notice must provide to the other party and to the Departments as soon as practicable, but no later than the 15 th business day of the 30-business-day open negotiation period, a written notice and supporting documentation in response to the open negotiation notice (open negotiation response notice).
Federal IDR Process Overview	
Timeframe	Summary of Steps
4 business days after the close of the open negotiation period	Initiation of Federal IDR Process Either party can initiate the Federal IDR process by submitting a notice of IDR initiation to the non-initiating party and to the Departments within the 4-business-day period beginning on the 1 st business day after the close of the open negotiation period. The notice must include the initiating party's preferred certified IDR entity.
3 business days after IDR initiation	Notice of IDR Initiation Response Within 3 business days of receipt of the notice of IDR initiation, the non-initiating party must submit the notice of IDR initiation response form, attesting to whether the Federal IDR process applies to the item(s) or service(s) included in the notice of IDR initiation. The non-

	initiating party must agree or object to the preferred certified IDR entity identified in the notice of IDR initiation by indicating its agreement or objection in the notice of IDR initiation response. If the non-initiating party objects to the preferred certified IDR entity identified in the notice of IDR initiation, the non-initiating party must designate an alternative preferred certified IDR entity.
3-6 business days after IDR initiation	Preliminary Selection of the Certified IDR Entity The date of the preliminary selection of the certified IDR entity will be 3 business days after the date of IDR initiation if the parties are considered to have jointly selected a certified IDR entity. The date of preliminary selection of the certified IDR entity will be 6 business days after the date of IDR initiation if the parties are considered to have failed to jointly select a certified IDR entity.
2 business days after preliminary selection of the certified IDR entity	Administrative Fee Collection from the Initiating Party The initiating party must pay the administrative fee directly to the Departments within 2 business days of the date of preliminary selection of the certified IDR entity. If the initiating party fails to pay its administrative fee, the dispute will be closed.
3 business days after preliminary selection of the certified IDR entity	Certified IDR Entity Conflict-of-Interest Review and Attestation Once preliminarily selected, the certified IDR entity has 3 business days to submit an attestation that it does not have a conflict of interest. If a preliminarily selected certified IDR entity notifies the Departments that it does not meet the conflict-of-interest requirements or does not respond within 3 business days of being preliminarily selected, the Departments will randomly preliminarily select another certified IDR entity. Random selection will occur no later than the first business day after notification from the certified IDR entity or if the preliminary selection of the certified IDR entity fails to respond, no later than one business day after the end of the 3-business-day period.
1 business day after conflict-of-interest attestation	Final Selection of the Certified IDR Entity The date of final selection of the certified IDR entity is the date that the Departments provide notice to the parties that the preliminarily selected certified IDR entity does not have a conflict of interest. This date will be no later than 1 business day after the conflict-of-interest attestation.
5 business days after final selection of the certified IDR entity	Eligibility Review The certified IDR entity that was finally selected must review the information in the notice of IDR initiation, notice of IDR initiation response, and any additional information and determine whether the item or service is a qualified IDR item or service that is eligible for the Federal IDR process. The certified IDR entity must notify the Departments and both parties of its determination within 5 business days after the date of final selection of the certified IDR entity.

2 business days after eligibility determination	Administrative Fee Collection from the Non-Initiating Party The non-initiating party must pay the administrative fee directly to the Departments within 2 business days of an eligibility determination.
10 business days after final selection of the certified IDR entity	Submission of Offers and Payment of Certified IDR Entity Fee Parties must submit their offers to the certified IDR entity not later than 10 business days after the date of final selection of the certified IDR entity. Each party must pay the certified IDR entity fee (which the certified IDR entity will hold in a trust or an escrow account) no later than the date a disputing party submits its offer. If a party fails to pay the certified IDR entity fee, the party's offer will not be considered received.
30 business days after final selection of the certified IDR entity	Selection of Offer A certified IDR entity has 30 business days from the date of final selection of the certified IDR entity to determine the payment amount and notify the parties and the Departments of its decision. The certified IDR entity must select one of the offers submitted.
30 calendar days after payment determination	Payments Between Parties of Payment Determination Amount Any amount due from one party to the other party must be paid not later than 30 calendar days after the payment determination by the certified IDR entity.
30 business days after the payment determination	Refunding the Certified IDR Entity Fee to the Prevailing Party The certified IDR entity must refund the prevailing party's certified IDR entity fee within 30 business days after the payment determination.

BILLING CODE 6325–63–C; 4830–01–C; 4510–29–C; 4120–01–C

II. Overview of the Proposed Rules—Departments of the Treasury, Labor, and HHS

A. Definition of Bundled Payment Arrangement

Section 9816(c)(3)(B) of the Code, section 716(c)(3)(B) of ERISA, and section 2799A–1(c)(3)(B) of the PHS Act state that the Departments shall provide that, in the case of items and services which are included by a provider or facility as part of a bundled payment, such items and services included in such bundled payment may be part of a single determination. The October 2021 interim final rules specify that in the case of qualified IDR items and services billed by a provider, facility, or provider of air ambulance services as part of a bundled payment arrangement, or if a plan or issuer makes or denies an initial payment as a bundled payment, the qualified IDR items and services may be submitted as part of one payment determination and are subject to the rules for batched determinations and the certified IDR entity fee for single

determinations.⁷⁸ The preamble to the October 2021 interim final rules describes a bundled payment arrangement as an instance in which a group health plan or health insurance issuer pays a provider, facility, or provider of air ambulance services a single payment for multiple items or services furnished during an episode of care to a single patient.⁷⁹ To clarify how certified IDR entities can identify a dispute that includes a bundled payment arrangement, the Departments provided a definition for a bundled payment arrangement in the *August 2022 Technical Assistance for Certified IDR Entities*.⁸⁰ In that guidance, the

⁷⁷ For a chart outlining the Federal IDR Process under the current regulations, see the Federal IDR Process Guidance for Disputing Parties at <https://www.cms.gov/files/document/federal-idr-guidance-disputing-parties-march-2023.pdf>.

⁷⁸ 86 FR 55994.

⁷⁹ Id.

⁸⁰ U.S. Department of Health and Human Services, U.S. Department of Labor, and U.S. Department of the Treasury. (August 2022). *Technical Assistance for Certified IDR Entities*. <https://www.cms.gov/files/document/TA-certified-independent-dispute-resolution-entities-August-2022.pdf>.

Departments clarified that a single payment to one provider, facility, or provider of air ambulance services for multiple items or services must be made at the service code level for the entire bundle in order to be considered a bundled payment and therefore be treated as a single payment determination for the multiple items and services under the Federal IDR process. The Departments defined a bundled payment arrangement at the service code level because service codes are the principal mechanism by which health care services and supplies are identified and reimbursed. These rules propose to codify the clarification set forth in the *August 2022 Technical Assistance for Certified IDR Entities*. Specifically, the Departments propose to amend 26 CFR 54.9816–3T, 29 CFR 2590.716–3, and 45 CFR 149.30 by defining the term “bundled payment arrangement” as an arrangement under which: (1) a provider, facility, or provider of air ambulance services bills for multiple items or services furnished to a single patient under a single service code that represents multiple items or services (for example, a DRG code); or

(2) a plan or issuer makes an initial payment or notice of denial of payment to a provider, facility, or provider of air ambulance services under a single service code that represents multiple items or services furnished to a single patient (for example, a DRG code).

For example, the *August 2022 Technical Assistance for Certified IDR Entities, the National Correct Coding Initiative (NCCI) Policy Manual*⁸¹ explains that if a physician performs bilateral mammography, the provider shall report (or for the purpose of the Federal IDR process, the provider shall bill) Current Procedural Terminology (CPT) code 77066 (*Diagnostic mammography . . . bilateral*). The provider should not submit CPT code 77065 (*Diagnostic mammography . . . unilateral*) with 2 UOS or CPT code 77065 LT (*unilateral left breast mammography*) plus CPT code 77065 RT (*unilateral right breast mammography*). Under this example, the provider performed multiple services, and therefore, if the services are billed or reimbursed under one service code (CPT code 77066), all services performed under that service code (CPT codes 77065 LT and 77065 RT) may be considered a bundled payment arrangement for purposes of the Federal IDR process.

Further, under current rules at 26 CFR 54.9816–8T(c)(3)(ii), 29 CFR 2590.716–8(c)(3)(ii), and 45 CFR 149.510(c)(3)(ii), bundled payment arrangements can be submitted as a single dispute and are subject to certified IDR entity fees for a single dispute rather than the higher fees for batched disputes (which may include multiple items or services from different claims between the same provider and plan but reflect the same service code or a similar code under a different procedural coding system).

To further clarify the process for resolving IDR disputes for bundled payment arrangements, the Departments propose an amendment that would remove the language in the October 2021 interim final rules stating that a bundled payment arrangement is subject to the rules for batched determinations. While a bundled payment arrangement by definition is billed by the same provider or group of providers, facility, or same provider of air ambulance services and paid by the same group

health plan or health insurance issuer, not all requirements for batched determinations⁸² apply to bundled payment arrangements.

The Departments solicit comment on the definition and treatment of bundled payment arrangements. The Departments also solicit comment on examples of service or procedural codes other than DRGs that would meet the proposed definition of a bundled payment arrangement.

B. Use of CARCs and RARCs

1. Existing Payment Communication Practice and Requirements

As described in section I.E. of this preamble, plans and issuers are currently required to disclose certain information to providers, facilities, and providers of air ambulance services when making an initial payment or notice of denial of payment when the recognized amount is the QPA.⁸³ The Health Insurance Portability and Accountability Act of 1996 (HIPAA) mandated the adoption of electronic standards for certain health care transactions, including health care payment and remittance advice. Under HIPAA and regulations implementing the electronic transaction standards, these disclosures, when transmitted from a plan or issuer to a provider, facility, or provider of air ambulance services,⁸⁴ meet the definition of a

health care remittance advice transaction.⁸⁵ Therefore, plans and issuers must comply with the Accredited Standards Committee (ASC) X12 implementation guide adopted at 45 CFR 162.1602 when electronically transmitting the QPA disclosures required under 26 CFR 54.9816–6T(d), 29 CFR 2590.716–6(d), and 45 CFR 149.140(d) to a provider, facility, or provider of air ambulance services.⁸⁶ Further, plans and issuers are required to send remittance information electronically upon the request of a provider, facility, or provider of air ambulance services, regardless of whether the requesting individual or entity is in the plan's or issuer's network or otherwise affiliated with the plan or issuer.⁸⁷ When remittance advice is transmitted electronically, it is commonly referred to as an ERA.

An ERA explains how a plan or issuer has adjusted claim charges based on factors like contract agreements, secondary payers, benefits coverage, and expected cost sharing.⁸⁸ As noted earlier in this preamble section with reference to QPA disclosures, all ERAs must

plan" under 45 CFR 160.103 and are not subject to HIPAA requirements.

⁸⁵ 45 CFR 162.1601 ("The health care electronic funds transfers (EFT) and remittance advice transaction is the transmission of either of the following for health care: (a) The transmission of any of the following from a health plan to a health care provider: (1) Payment. (2) Information about the transfer of funds. (3) Payment processing information. (b) The transmission of either of the following from a health plan to a health care provider: (1) Explanation of benefits. (2) Remittance advice.").

⁸⁶ The ASC X12N 835 Version 5010 (835 transaction) is the current HIPAA standard that plans and issuers must use to electronically transmit explanation of benefits or remittance advice information to providers and facilities. As discussed later in this section II.B. of this preamble, the current ASC X12 standards predate, and therefore do not address, the No Surprises Act requirements.

⁸⁷ 45 CFR 162.925(a)(1). See also Gerhardt, C. (March 22, 2022). *Guidance on health plans' payment of health care claims using Virtual Credit Cards (VCCs) and adopted HIPAA standards for Health Care Electronic Funds Transfers (EFT) and Electronic Remittance Advice (ERA) transactions*. Centers for Medicare & Medicaid Services. <https://www.cms.gov/files/document/guidance-letter-vcc-eft-era.pdf>. HIPAA regulations require that a covered entity conduct a transaction as a standard transaction when using electronic media to transmit a transaction for which the Secretary has adopted a standard (see 45 CFR 162.923(a)). HIPAA regulations also require a health plan to conduct transactions as standard transactions when requested to do so (see 45 CFR 162.925(a)(1)). HIPAA does not, however, obligate a health plan to conduct a transaction(s) that it would not otherwise conduct.

⁸⁸ Centers for Medicare & Medicaid Services. (June 16, 2022). *Health Care Payment and Remittance Advice and Electronic Funds Transfer*. <https://www.cms.gov/Regulations-and-Guidance/Administrative-Simplification/Transactions/HealthCarePaymentandRemittanceAdviceandElectronicFundsTransfer>.

⁸¹ The NCCI, developed by the Centers for Medicare & Medicaid Services, promotes correct national coding methodologies. Although created for the purpose of reducing improper Medicare Part B payments, the NCCI policy manual is also used by commercial payers. CMS. (Feb. 28, 2023). *Medicare National Correct Coding Initiative (NCCI) Edits*. <https://www.cms.gov/medicare-medicare-coordination/national-correct-coding-initiative-nci/nci-medicare-medicare-nci-policy-manual>.

⁸² 26 CFR 54.9816–8T(c)(3), 29 CFR 2590.716–8(c)(3), and 45 CFR 149.510(c)(3).

⁸³ 26 CFR 54.9816–6T(d), 29 CFR 2590.716–6(d), and 45 CFR 149.140(d). As explained in section II.C. of this preamble, the Departments are proposing the following amendments to 26 CFR 54.9816–6T(d), 29 CFR 2590.716–6(d), and 45 CFR 149.140(d) to reflect that the concept of the recognized amount is not applicable to providers of air ambulance services: (1) requiring plans and issuers to disclose the QPA and certain information about the QPA when cost sharing is calculated using the QPA for an air ambulance service; and (2) requiring plans and issuers to provide these disclosures when the recognized amount (or with respect to air ambulance services, the amount on which cost sharing is based) is the QPA or the amount billed by the provider, facility, or provider of air ambulance services.

⁸⁴ HIPAA requirements related to health care remittance advice transactions apply to "covered entities," including "health plans" (which generally include plans and issuers) and "health care providers" (which include providers, facilities, and providers of air ambulance services that transmit any health information in electronic form in connection with an electronic transaction for which a standard has been adopted under HIPAA). 45 CFR 160.102 and 45 CFR 160.103. For purposes of continuity with the rest of this preamble, this section uses the terms "plan" and "issuer" to refer to entities that are subject to HIPAA requirements that apply to "health plans" and the term "providers, facilities, and providers of air ambulance services" to refer to entities that are subject to HIPAA requirements that apply to "health care providers." However, self-administered group health plans with fewer than 50 participants are excluded from the term "health

comply with the ASC X12 835 transaction standard adopted by HHS under 45 CFR 162.1602. The X12 835 implementation guide mandates the use of CARCs and RARCs to communicate remittance information (as opposed to any other code systems, such as proprietary codes developed by individual plans and issuers).⁸⁹ The terms “CARC” and “RARC” are not defined in Federal statute but are described in the ASC X12 835 implementation guide and the Council for Affordable Quality Healthcare Committee on Operating Rule for Information Exchange (CAQH CORE) operating rule adopted at 45 CFR 162.1603(a)(4). CARCs explain why a claim or service line was paid differently than it was billed.⁹⁰ RARCs provide additional explanations for an adjustment already described by a CARC or convey information about remittance processing. RARCs are either “supplemental,” meaning that they provide additional explanation for an adjustment already described by a CARC, or “informational,” meaning they convey information about remittance processing and are never related to a specific adjustment or CARC.⁹¹ The lists of approved CARCs and RARCs are maintained by separate committees (the CARC Committee and the RARC Committee) designated by HHS to review requests to add, remove, or modify existing CARCs and RARCs. The HIPAA operating rule adopted at 45 CFR 162.1603(a)(4) requires plans and issuers to use a uniform set of CARCs and RARCs for defined business scenarios. Updated lists of approved CARCs and RARCs, along with an updated list of approved code combinations and business scenarios, are published three times each year.⁹²

The RARC Committee has approved a set of specific RARCs that convey information related to the No Surprises Act, including which of the No Surprises Act provisions apply to a claim, how cost sharing was calculated under the No Surprises Act, and whether a payment for a claim was an initial or final payment calculated in

accordance with the No Surprises Act.⁹³ These RARCs are currently available for use by plans and issuers, although the existing No Surprises Act-specific RARCs do not address all required QPA disclosures. The current standards and operating rules that govern ERA transactions under HIPAA were adopted prior to the enactment of the No Surprises Act and do not include specific requirements that dictate which combinations of CARCs and RARCs must be used to communicate claim adjudication information in business scenarios anticipated by the No Surprises Act.⁹⁴

Plans and issuers consequently convey the disclosures required under the No Surprises Act to providers, facilities, and providers of air ambulances through a variety of methods, including electronic and paper remittance advice. These disclosures, if more effectively communicated, would provide providers, facilities, and providers of air ambulance services with more accessible information to determine whether they may initiate open negotiation and the Federal IDR process. However, in part because plans and issuers are not able to transmit all of the required disclosures through standard transactions,⁹⁵ such as the ASC X12 835 transaction, providers, facilities, and providers of air ambulance services have reported to the Departments that they are not always aware of, or cannot understand, the disclosures even when the plan or issuer claims to have met the disclosure requirements.⁹⁶ Moreover, the

Departments’ ability to assess how often CARCs and RARCs are used to convey information related to the No Surprises Act is limited due to the minimal available data on uptake and the absence of guidance, standards, or operational rules specifying how these codes must be used. Informal feedback from providers, facilities, and providers of air ambulance services and plans and issuers suggests that some plans and issuers are using some of these codes, including when providing paper remittance advice, but there is not yet widespread usage.

2. Proposal To Require CARCs and RARCs To Improve Communication Between Plans and Issuers and Providers, Facilities, and Providers of Air Ambulance Services

Gaps in communication between plans and issuers and providers, facilities, and providers of air ambulance services contribute to inefficiencies in resolving disputes in the Federal IDR process. The Departments have identified the following areas of confusion, reported by plans, issuers, providers, facilities, providers of air ambulance services, and certified IDR entities, which are also consistent with the Departments’ experience administering the Federal IDR process: (1) whether the consumer protections against balance billing and out-of-network cost sharing under the No Surprises Act apply to an item or service; (2) how cost sharing and the out-of-network rates are determined (that is, through an All-Payer Model Agreement, specified State law, or the Federal rules); (3) how and with whom to initiate open negotiations; and (4) which items or services eligible for the Federal IDR process can be batched or bundled into one dispute.

To address communication challenges described in section II.B.1. of this preamble, the Departments propose new disclosure rules at 26 CFR 54.9816–6A, 29 CFR 2590.716–6A, and 45 CFR 149.100. These proposed provisions would require plans and issuers to use CARCs and RARCs, as specified in guidance issued by the Departments (and discussed elsewhere in this section II.B. of this preamble), or as required under any applicable adopted standards and operating rules under 45 CFR part 162, to communicate information related to whether a claim for an item or service furnished by an entity that does not have a direct or indirect

⁸⁹ CARCs and RARCs are required by the ASC X12 835 transaction standard and are not currently required to be used on paper remittance advice.

(March 1, 2022). *Remittance Advice Remark Codes Related to the No Surprises Act*. (unofficial reference list of No Surprises Act-specific RARC codes).

⁹⁴ The ASC X12 835 transaction standard requires health plans to convey information about the adjudication of a claim using CARCS and RARCS. The Phase III 360 CORE Uniform Use of CARCs and RARCs (835) Rule, adopted at 45 CFR 162.1603 requires plans to use specified combinations of CARCs and RARCs in certain business scenarios. CAQH CORE. (August 2022). *CAQH CORE Payment and Remittance (835) Uniform Use of CARCs and RARCs Rule, Version PR.1.1*. <https://www.caqh.org/sites/default/files/core/Payment-Remittance-CARCS-RARCS-Rule.pdf>.

⁹⁵ “Standard transaction” means a transaction that complies with an applicable standard and associated operating rules adopted under the HIPAA Administrative Simplification requirements at 45 CFR part 162. 45 CFR 162.103.

⁹⁶ For example, the Departments are aware of some cases where providers, facilities, and providers of air ambulance services used third parties to process remittances and did not realize the process for viewing the remittances through those third parties was filtering out information related to the No Surprises Act. Similarly, some

providers, facilities, and providers of air ambulance services may view electronic remittance advice without realizing plans and issuers provided the QPA and related information on paper remittance advice.

contractual relationship with the plan or issuer with respect to the furnishing of such item or service under the plan or coverage is subject to the provisions of 26 CFR 54.9816 and 54.9817; 29 CFR 2590.716 and 2590.717; or 45 CFR part 149, subparts B, E, or F. To improve the functioning of the Federal IDR process and ensure timely rendering of payment determinations, the Departments are of the view that providers, facilities, and providers of air ambulance services need information to understand not only when items and services are subject to the No Surprises Act, but also when they are not, to avoid submission of ineligible disputes to the Federal IDR process.

The Departments have the authority under section 9816(a)(2)(B)(ii) of the Code, section 716(a)(2)(B) of ERISA, and section 2799A–1(a)(2)(B)(ii) of the PHS Act to establish through rulemaking the information that a plan or issuer must share with a provider or facility when making a determination of the QPA, including the form and manner of such disclosures.⁹⁷ The Departments also have authority under section 9833 of the Code, section 734 of ERISA, and section 2792 of the PHS Act to issue such regulations as may be necessary and appropriate to carry out the provisions of chapter 100 of the Code, part 7 of ERISA, and title XXVII of the PHS Act, including the provisions directing the Departments to establish the Federal IDR process.

Under these authorities, the Departments propose to require plans and issuers to use CARCs and RARCs to convey specific information about the No Surprises Act when a plan or issuer provides a paper or electronic remittance advice to any entity with which it does not have a direct or indirect contractual relationship with respect to the furnishing of an item or service under the plan or coverage.

Specifically, under these proposed rules, a plan or issuer would be required to use CARCs and RARCs in accordance with guidance issued by the Departments when, with respect to an entity with which it does not have a direct or indirect contractual relationship, the plan or issuer provides a paper or electronic remittance advice to a provider, facility, or provider of air ambulance services for an initial payment, notice of denial of payment, or total plan or coverage payment required under the No Surprises Act.

These proposed requirements would also apply to plans and issuers when sending remittance advice to entities with which they do not have a direct or indirect contractual relationship with respect to items and services to which the No Surprises Act surprise billing requirements do not apply, in order to convey that the No Surprises Act does not apply.

Requiring plans and issuers to use approved CARCs and RARCs to convey information related to the No Surprises Act on both electronic and paper remittance advice would better facilitate the flow of information between plans and issuers and providers, facilities, and providers of air ambulance services and increase efficiencies in the processing of claims subject to the No Surprises Act's surprise billing protections. This requirement would also assist providers, facilities, and providers of air ambulance services in identifying items and services that are not eligible for the Federal IDR process as early as the initial payment or notice of denial of payment, thereby reducing the submission of ineligible payment disputes to the Federal IDR process. This would decrease the need for outreach by certified IDR entities and allow them to concentrate resources on making payment determinations for eligible disputes.

In addition, the Departments anticipate that the proposed requirement to use CARCs and RARCs would provide valuable information to certified IDR entities in determining whether disputing parties agree on the eligibility of a dispute for the Federal IDR process after it has been submitted. As described in section II.D.1. of this preamble, the Departments propose to require that the open negotiation notice include a copy of the initial payment or notice of denial of payment, which would, under the proposal described in this section of this preamble, include CARCs and RARCs related to the No Surprises Act. The Departments also propose, as described in section II.D.1. of this preamble, to require the open negotiation notice be submitted to the

Departments through the Federal IDR portal. This would help ensure that, even if a plan or issuer does not respond to a notice of IDR initiation, the certified IDR entity has access to certain information regarding whether the plan or issuer believes the dispute could be eligible for the Federal IDR process, thereby avoiding unnecessary or duplicative outreach to the parties when possible.

As discussed in section V.D. of this preamble, requiring the use of CARCs and RARCs as described in these proposed rules would result in an increase in burden for plans (or their third party administrators (TPAs)) and issuers, as they would need to implement and automate the use of new CARCs and RARCs. However, because all plans and issuers that provide ERA transactions subject to the HIPAA Administrative Simplification requirements already are required to use CARCs and RARCs, the Departments anticipate that most plans and issuers would generally have the capacity to provide No Surprises Act-specific CARCs and RARCs. The Departments seek comment on any circumstances in which it would not be possible for a plan or issuer to determine whether an item or service included on a remittance advice is, or is not, subject to the Federal IDR process at the time the remittance advice is issued to a provider, facility, or provider of air ambulance services. The Departments also seek comment on the technical and operational steps that would be necessary to initially implement new No Surprises Act-specific CARCs and RARCs, including for plans and issuers that do not currently use CARCs and RARCs, or that are currently able to accommodate only one CARC and RARC combination per line item.

The Departments propose that certain procedural aspects of this proposal would be implemented through guidance issued by the Departments.⁹⁸ Should the proposal described in this section of the preamble be finalized, the Departments would be authorized to require plans and issuers to use CARCs and RARCs to communicate information related to whether a claim for an out-of-network item or service is or is not subject to the surprise billing provisions of the No Surprises Act. The guidance issued under this authority would identify specific CARCs and RARCs and describe the specific circumstances in

⁹⁷ The No Surprises Act does not include the same language addressing disclosures to providers of air ambulance services. However, the July 2021 interim final rules implemented the statute's cost-sharing requirements for air ambulance services by requiring that plans and issuers base any coinsurance and deductible for air ambulance services furnished by a nonparticipating provider of air ambulance services on the lesser of the QPA or the billed amount for the services. 86 FR 36884. Therefore, the July 2021 interim final rules also applied the requirement to make disclosures regarding the QPA with respect to providers of air ambulance services. As stated in the preamble to the July 2021 interim final rules, the Departments recognize that providers of air ambulance services subject to the surprise billing rules (as well as providers and emergency facilities) need transparency regarding how the QPA was calculated in order to inform the open negotiation process and the decision whether to initiate the Federal IDR process and what offer to submit. 86 FR 36898.

⁹⁸ This proposal would not alter HHS' authority under HIPAA to implement future guidance with respect to electronic remittance advice or to adopt new or modified standards or operating rules in accordance with Title XI Part C—Administrative Simplification of the Social Security Act.

which the identified CARCs and RARCs must be used. As discussed in section II.B.1. of this preamble, this approach also mirrors the existing framework under HIPAA, in which required CARC and RARC code combinations are issued through guidance, as authorized by regulation. This would provide the Departments with the flexibility to specify the use of CARCs and RARCs, including new No Surprises Act-specific RARCs that may be developed in the future, while the Departments work to address communication challenges affecting the surprise billing provisions of the No Surprises Act. It would also provide flexibility for the Departments to discontinue the use of certain CARCs and RARCs should the information communicated using those CARCs and RARCs become readily available to providers, facilities, or providers of air ambulance services through a different mechanism or otherwise become unnecessary. As discussed in more detail in section II.H.1. of this preamble, the Departments propose that plans and issuers would have a period of time following the issuance of guidance to implement the use of CARCs and RARCs in accordance with the guidance.

HHS is not proposing changes to the HIPAA transaction standards (such as the X12 835 standard) or operating rules in these proposed rules. HHS continues to monitor the implementation of the No Surprises Act in order to determine whether future changes to the HIPAA transaction standards and operating rules, in accordance with the mandated HIPAA standards and operating rules development and adoption processes,⁹⁹ might provide a long-term mechanism for facilitating communication related to the No Surprises Act between plans and issuers and providers, facilities, and providers of air ambulance services.

The Departments are of the view that it would be beneficial to standardize No Surprises Act-related communications between plans and issuers and providers, facilities, and providers of air ambulance services, regardless of whether the information is transmitted using HIPAA standard transactions. Therefore, under this proposal, the Departments would issue guidance regarding the use of CARCs and RARCs in both electronic transactions as well as formats outside the purview of the HIPAA transaction standards, including paper remittance advice. While CARCs and RARCs have not been widely used to transmit information outside of ERA transactions, the Departments

understand that some plans and issuers routinely communicate with providers, facilities, and providers of air ambulance services using paper remittance advice and other formats outside the purview of the HIPAA transaction standards.

In addition to the RARCs related to the No Surprises Act described previously in this section of the preamble that have been approved for use, the Departments are assessing whether additional CARCs or RARCs could be helpful for improving communication between parties about how out-of-network claims are being processed in relation to the No Surprises Act. For example, the Departments are considering whether it would be beneficial to require the use of CARCs and RARCs when plans and issuers have insufficient information to determine coverage for a claim from a nonparticipating provider of air ambulance services.¹⁰⁰ The Departments are also considering whether it would be beneficial to require the use of RARCs that could be used to provide any of the information required to be disclosed about the QPA under 26 CFR 54.9816–6T(d), 26 CFR 54.9816–6(d), 29 CFR 2590.716–6(d), and 45 CFR 149.140(d). It also may be helpful to have a RARC that specifies that the No Surprises Act surprise billing protections do not apply. In addition, a large proportion of the disputes determined ineligible for the Federal IDR process by certified IDR entities involve items or services that providers, facilities, or providers of air ambulance services batched improperly because they did not realize that a TPA was administering coverage for multiple self-insured plans rather than a single issuer or group health plan, and the items and services were thus ineligible to be batched.¹⁰¹ Certified IDR entities have determined that other disputes are ineligible for the Federal IDR process because the self-insured plan involved in the dispute had voluntarily opted in

to a specified State law.¹⁰² A RARC that could clearly identify a payer as a self-insured plan may reduce the number of disputes that are initiated and determined ineligible on the basis of a batching or jurisdictional error. The Departments solicit comment on whether and what information not conveyed in the existing RARCs would be helpful to convey through the creation of additional RARCs related to the No Surprises Act's surprise billing provisions.

The Departments are aware that some States require issuers to use CARCs and RARCs to communicate information about State surprise billing laws. The Departments seek comment regarding experience with these requirements, including whether such requirements have been effective, and any challenges related to implementing such requirements. Should these proposed rules be finalized, the Departments note that nothing in these proposed rules would prevent a State from requiring that issuers use specific CARCs or RARCs in addition to those specified in the No Surprises Act-specific Federal guidance that the Departments would be authorized to issue; nor would a State or other entity be prevented from engaging with the relevant committees to request the creation or use of a CARC or RARC in addition to those specified in such guidance.

Prior to the enactment of the No Surprises Act, out-of-network providers, facilities, and providers of air ambulance services commonly sought reimbursement directly from patients rather than from a plan or issuer, requiring a participant, beneficiary, or enrollee to then seek reimbursement for all or part of the cost of the out-of-network service directly from their plan or issuer. Because the No Surprises Act prohibits nonparticipating providers, facilities, and providers of air ambulance services from billing or holding liable a participant, beneficiary, or enrollee for an amount greater than the applicable in-network cost-sharing requirement for items and services subject to the No Surprises Act, direct billing of patients is now largely limited to items and services to which surprise billing protections in the No Surprises Act do not apply. The Departments understand that requiring the plan or issuer to convey CARC or RARC information related to eligibility for such processes to a participant,

¹⁰⁰ In *TMA III*, the District Court vacated the language in 26 CFR 54.9817–1T(b)(4)(i), 29 CFR 2590.717–1(b)(4)(i), and 45 CFR 149.130(b)(4)(i), that stated with respect to air ambulance services, “For purposes of this paragraph (b)(4)(i), the 30-calendar-day period begins on the date the plan or issuer receives the information necessary to decide a claim for payment for the services.” See Memorandum Opinion and Order, *Tex. Med. Ass’n, et al. v. U.S. Dep’t of Health and Hum. Servs.*, No. 6:22–cv–00450–JDK (E.D. Tex. August 24, 2023). Because a plan or issuer may not have the information necessary to decide a claim for payment within the 30-calendar-day period, the Departments are considering whether CARCs and RARCs may be useful in such circumstances.

¹⁰¹ 26 CFR 54.9816–8T(c)(3)(i)(B), 29 CFR 2590.716–8(c)(3)(i)(B), and 45 CFR 149.510(c)(3)(i)(B).

¹⁰² See discussion in section I.H. of this preamble related to the provisions of the July 2021 interim final rules that allow self-insured group health plans, including self-insured non-Federal governmental plans, to voluntarily opt into a specified State law.

⁹⁹ Sections 1172 and 1173 of the Social Security Act and 45 CFR 162.910.

beneficiary, or enrollee in this circumstance would represent an administrative burden on the plan or issuer without any clear benefit to the participant, beneficiary, or enrollee. In addition, such a requirement would not further the aims of these proposed rules to facilitate timely rendering of payment determinations and to improve the functioning of the Federal IDR process, in which a participant, beneficiary, or enrollee cannot participate as a party. Therefore, the requirement to use CARCs and RARCs under these proposed rules would not apply for out-of-network items and services for which the plan or issuer makes payment directly to the participant, beneficiary, or enrollee. The Departments seek comment on whether a plan or issuer should generate a remittance advice that can be obtained upon request by the provider, facility, or provider of air ambulance services when the plan or issuer makes a payment directly to a participant, beneficiary, or enrollee, and whether the requirement to use CARCs and RARCs to convey No Surprises Act-specific information as proposed in these rules should apply in these circumstances.

While the proposal refers to any paper or electronic remittance advice,¹⁰³ the Departments seek comment on whether a more general term, such as “any remittance advice,” would be helpful in characterizing the types of communications accompanying payments for items and services. The Departments also seek comment on this proposal generally.

C. Information To Be Shared About the QPA

As described in sections I.B. and I.E. of this preamble, the July 2021 interim final rules and August 2022 final rules provide that if the recognized amount with respect to an item or service is the QPA, plans and issuers must make certain disclosures about the QPA with each initial payment or notice of denial of payment and must also provide certain additional information upon request.¹⁰⁴ This information must be provided in writing, either on paper or electronically, to a provider, facility, or provider of air ambulance services, as applicable.¹⁰⁵

¹⁰³ The Departments are aware that different terms are sometimes used, such as paper remittance advice or explanation of payment, when referring to the paper communication that accompanies a payment or notice of denial of payment to a provider or facility for a claim and provides additional information about the adjudication of the claim for which payment is being made.

¹⁰⁴ 86 FR 36898; 87 FR 52633.

¹⁰⁵ 26 CFR 54.9816–6T(d) and 54.9816–6(d), 29 CFR 2590.716–6(d), and 45 CFR 149.140(d).

While these requirements were intended to ensure the disclosure of information about the QPA in any instance in which an item or service would be eligible for the Federal IDR process, the text of the current regulation directs plans and issuers to make these disclosures only if the recognized amount with respect to an item or service furnished by a provider, facility, or provider of air ambulance services is the QPA. The Departments propose a change to reflect that the term “recognized amount” is not used in the statute or regulations for purposes of determining cost sharing with respect to air ambulance services furnished by nonparticipating providers of air ambulance services. Rather, under the July 2021 interim final rules, plans and issuers must calculate the cost-sharing amount for air ambulance services furnished by a nonparticipating provider of air ambulance services as if the total amount that would have been charged were equal to the lesser of the QPA or the billed amount for the services.¹⁰⁶ Therefore, the Departments propose to amend the regulations to specify that plans and issuers must, in the case of air ambulance services, disclose the QPA and certain information about the QPA when cost sharing is calculated using the QPA. In addition, the Departments propose to require plans and issuers to make the same disclosures when the recognized amount (or with respect to air ambulance services, the amount on which cost sharing is based) is the amount billed by the provider, facility, or provider of air ambulance services, and not only when the recognized amount (or with respect to air ambulance services, the amount on which cost sharing is based) is the QPA, as these items and services would also be eligible for the Federal IDR process (provided all other eligibility criteria are satisfied).

Under 26 CFR 54.9816–6T(d)(1)(iv), 29 CFR 2590.716–6(d)(1)(iv), and 45 CFR 149.140(d)(1)(iv), a plan or issuer making disclosures about the QPA must include a statement that if the provider or facility wishes to initiate a 30-day open negotiation period for purposes of determining the amount of total payment, the provider or facility may contact the appropriate person or office to initiate open negotiation, and if the 30-day open negotiation period does not result in a determination, generally the provider or facility may initiate the Federal IDR process 4 days after the end of the open negotiation period. Under 26 CFR 54.9816–6T(d)(2), 29 CFR

¹⁰⁶ 86 FR 36884.

2590.716–6(d)(2), and 45 CFR 149.140(d)(2), plans and issuers are required to disclose additional information in a timely manner upon the request of the provider or facility.

The Departments propose technical and conforming amendments to align these requirements with the October 2021 interim final rules¹⁰⁷ and current practice. First, the Departments acknowledge that 26 CFR 54.9816–6T(d), 29 CFR 2590.716–6(d), and 45 CFR 149.140(d) do not consistently include references to providers of air ambulance services when referring to providers and facilities, and propose amendments to clarify that these disclosure requirements apply with respect to providers of air ambulance services (in addition to providers and facilities). Specifically, in 26 CFR 54.9816–6T, 29 CFR 2590.716–6, and 45 CFR 149.140, the Departments propose to amend the introductory language in paragraph (d), paragraph (d)(1)(iv), and the introductory language of paragraph (d)(2) to clarify the applicability with respect to disclosures to providers of air ambulance services.¹⁰⁸ Second, the Departments propose to align the timeframes described in the disclosure with the timeframes established in the October 2021 interim final rules,¹⁰⁹ by specifying that days are counted using business days (rather than calendar days), where applicable. The Departments also propose an amendment to align the language in 26 CFR 54.9816–6T(d)(1)(iv), 29 CFR 2590.716–6(d)(1)(iv), and 45 CFR 149.140(d)(1)(iv) with the same requirements established in the October 2021 interim final rules by replacing the phrase “amount of total payment” with the term “out-of-network rate,” as defined in 26 CFR 54.9816–3T, 29 CFR 2590.716–3, and 45 CFR 149.30, and by describing an unsuccessful open negotiation period as not resulting in an “agreement on the amount of payment” rather than a “determination.”

The Departments further propose to require that the statement also explain that the provider, facility, or provider of air ambulance services must notify the Departments as described under proposed 26 CFR 54.9816–8(b)(1)(i), 29 CFR 2590.716–8(b)(1)(i), and 45 CFR 149.510(b)(1)(i), as applicable, to initiate

¹⁰⁷ 86 FR 55980.

¹⁰⁸ The Departments anticipate finalizing additional corrections to address this issue when finalizing the remainder of the July 2021 interim final rules.

¹⁰⁹ 26 CFR 54.9816–8T(b)(1)(i), 29 CFR 2590.716–8(b)(1)(i), and 45 CFR 149.510(b)(1)(i).

open negotiation.¹¹⁰ The Departments propose that plans and issuers include this explanation as part of the disclosure once the open negotiation notice can be submitted through the Federal IDR portal.

As stated in the preamble to the July 2021 interim final rules¹¹¹ and the August 2022 final rules,¹¹² the Departments seek to ensure transparent and meaningful disclosure of information relating to the calculation of the QPA for providers, facilities, and providers of air ambulance services, while at the same time minimizing administrative burdens on plans and issuers and on the Federal IDR process. The Departments are now of the view that additional disclosure of information with the QPA is critical to ensuring that all parties have the information necessary to determine whether a payment dispute is eligible for the Federal IDR process. The Departments therefore propose to amend 26 CFR 54.9816–6T, 29 CFR 2590.716–6, and 45 CFR 149.140 by re-designating paragraph (d)(1)(v) as (d)(1)(vi) and adding a new paragraph (d)(1)(v) that would require plans and issuers to disclose the legal business name of the plan (if any) or issuer; the legal business name of the plan sponsor (if applicable); and the registration number assigned under proposed 26 CFR 54.9816–9, 29 CFR 2590.716–9, or 45 CFR 149.530, as applicable, if the plan or issuer is registered with the Federal IDR registry.¹¹³ The Departments seek comment on the specific technical and operational steps that would be necessary for plans and issuers to disclose this additional information when providing an initial payment or notice of denial of payment. Further, the Departments are seeking comment on the appropriate implementation period that would allow plans and issuers to complete these steps to comply with these proposed rules, if finalized. As noted in section II.B. of this preamble, the Departments are also seeking comment on whether any of the additional proposed disclosures should be required to be communicated using a CARC or RARC specified in guidance issued by the Departments.

¹¹⁰ For a discussion of the proposed requirement to notify the Departments when initiating open negotiation, see section II.D.1.c. of this preamble.

¹¹¹ 86 FR 36898.

¹¹² 87 FR 52625.

¹¹³ For a discussion of the proposal to establish a Federal IDR registry and assign a registration number to each plan and issuer, see section II.F. of this preamble.

D. Open Negotiation and Initiation of the Federal IDR Process

Section 9816(c)(1)(A) of the Code, section 716(c)(1)(A) of ERISA, section 2799A–1(c)(1)(A) of the PHS Act, and the October 2021 interim final rules establish that, when the out-of-network rate is not determined by reference to an All-Payer Model Agreement under section 1115A of the Social Security Act or specified State law as defined in 26 CFR 54.9816–3T, 29 CFR 2590.716–3, and 45 CFR 149.30, the plan or issuer or provider or facility may engage in open negotiations to determine the total out-of-network rate (inclusive of any cost sharing).¹¹⁴ If the parties fail to reach an agreement through open negotiation, they may initiate the Federal IDR process. Section 9817(b) of the Code, section 717(b) of ERISA, and section 2799A–2(b) of the PHS Act provide that out-of-network rates for air ambulance services may be determined through open negotiation or an IDR process that is largely identical to the process provided for in section 9816(c) of the Code, section 716(c) of ERISA, and section 2799A–1(c) of the PHS Act. Thus, the preamble and regulatory text describing open negotiations and the Federal IDR process generally apply to providers of air ambulance services, unless otherwise specified.

1. Open Negotiation

The Departments propose to amend the open negotiation provisions of 26 CFR 54.9816–8T(b)(1)(i) and (ii), 29 CFR 2590.716–8(b)(1)(i) and (ii), and 45 CFR 149.510(b)(1)(i) and (ii) to establish additional requirements for initiating open negotiation and to revise the open negotiation period start date. In addition, the Departments propose to add a new paragraph at 26 CFR 54.9816–8(b)(1)(iii), 29 CFR 2590.716–8(b)(1)(iii), and 45 CFR 149.510(b)(1)(iii) that would establish a requirement that in response to a party's written notice of its intent to negotiate (open negotiation notice), the party in receipt of the notice must provide a written open negotiation response notice. In these proposed rules, the Departments propose amendments to the content requirements for the open negotiation notice. The Departments also propose to require an open negotiation response notice from non-initiating parties, including specific content requirements.

Section 9816(c)(1)(A) of the Code, section 716(c)(1)(A) of ERISA, section 2799A–1(c)(1)(A) of the PHS Act, and the October 2021 interim final rules establish that the open negotiation

period may be initiated by either party during the 30-business-day period beginning on the day the provider, facility, or provider of air ambulance services receives either an initial payment or a notice of denial of payment for an item or service.¹¹⁵ The October 2021 interim final rules provide that in order for a plan, issuer, provider, facility, or provider of air ambulance services to know when it is a party to an open negotiation period and the item or service for which the payment is the subject of open negotiation, the party initiating open negotiation must provide to the other party a written open negotiation notice.¹¹⁶ Under 26 CFR 54.9816–8T(b)(1)(ii)(A), 29 CFR 2590.716–8(b)(1)(ii)(A), and 45 CFR 149.510(b)(1)(ii)(A), an open negotiation notice must include information sufficient to identify the item(s) and service(s) (including the date(s) the item(s) or service(s) were furnished, the service code, and the initial amount, if applicable, an offer of an out-of-network rate, and contact information for the party sending the open negotiation notice). The day on which the open negotiation notice is first sent by the party is the date that the 30-business-day open negotiation period begins. Consistent with the October 2021 interim final rules, negotiation during the open negotiation period occurs without the involvement of the Departments or a certified IDR entity.¹¹⁷ Furthermore, the requirement to complete a 30-business-day open negotiation period before initiating the Federal IDR process does not preclude the parties from reaching an agreement in fewer than 30 business days. However, in the event the parties do not reach an agreement, they still must exhaust the 30-business-day open negotiation period before either party may initiate the Federal IDR process. The Departments encourage disputing parties to negotiate in good faith during this time period to reach an agreement on the out-of-network rate. The Departments expect parties to make a genuine effort to exchange information with one another at reasonable times and intervals with the goal of reaching a solution satisfactory to both parties. To the extent parties reach an agreement during the open negotiation period, they can avoid the administrative fee and

¹¹⁵ As clarified in the July 2021 interim final rules, the initial payment should be an amount that the plan or issuer reasonably intends to be payment in full based on the relevant facts and circumstances, prior to the beginning of any open negotiations or initiation of the Federal IDR process. (86 FR 36900 through 36901).

¹¹⁶ 86 FR 55990.

¹¹⁷ See 86 FR 55991.

¹¹⁴ 86 FR 55990.

other costs associated with the Federal IDR process.

The preamble to the October 2021 interim final rules explained that, given that the parties already would have made initial contact (namely, the provider, facility, or provider of air ambulance services transmitted a bill to the plan or issuer, and the plan or issuer sent an initial payment or notice of denial of payment to the provider, facility, or provider of air ambulance services), the Departments expected the parties to provide effective notice and encouraged the parties to take reasonable measures to confirm the other party's contact information and confirm electronic receipt through approaches such as read receipts, especially if a party does not initially respond to an open negotiation notice.¹¹⁸ Further, the Departments contemplated that issues related to eligibility and jurisdiction would be resolved through the disclosures that plans and issuers are required to provide with their initial payment or notice of denial of payment or, through the required 30-business-day open negotiation period. However, disputing parties and certified IDR entities have reported that disputing parties are sometimes not actively negotiating with each other during the required period as expected by the Departments. In addition, non-initiating parties and certified IDR entities continue to express concern that initiating parties sometimes do not properly initiate or complete the open negotiation period before initiating the Federal IDR process. Plans and issuers also have expressed concern with the Departments and the certified IDR entities, that providers, facilities, and providers of air ambulance services overwhelm them with requests to negotiate items or services that are ineligible for the Federal IDR process. At the same time, providers, facilities, and providers of air ambulance services assert that plans and issuers rarely respond to their notices initiating open negotiation or provide inadequate information to determine whether the Federal IDR process applies during the open negotiation period.

a. Determination of Payment Amount Through Open Negotiation

To improve communication and information exchange between disputing parties and promote efficiencies in the Federal IDR process, the Departments propose to amend the open negotiation provisions of 26 CFR 54.9816-8(b), 29 CFR 2590.716-8(b),

and 45 CFR 149.510(b)(1) to impose new information exchange requirements and processes and to establish a process for tracking open negotiations through the Federal IDR portal in anticipation of initiation of a Federal IDR dispute.

First, the Departments propose to amend paragraph 26 CFR 9816-8(b)(1)(i), 29 CFR 2590.716-8(b)(1)(i), and 45 CFR 149.510(b)(1)(i) to establish a requirement that a party must provide a written open negotiation notice to the other party and to the Departments through the Federal IDR portal to initiate the open negotiation period.¹¹⁹ Requiring a party to submit the open negotiation notice to the Departments in addition to the other party would provide a record of whether and when the open negotiation period was properly initiated, which is essential in determining eligibility for the Federal IDR process, and would create greater transparency among parties engaged in open negotiation, the Departments, and certified IDR entities.

Second, the Departments propose to amend 26 CFR 54.9816-8(b)(1)(i), 29 CFR 2590.716-8(b)(1)(i), and 45 CFR 149.510(b)(1)(i) to specify that the 30-business-day open negotiation period begins on the day a party first submits the open negotiation notice and a copy of the initial payment, notice of denial of payment, or other remittance advice, as specified at proposed 26 CFR 54.9816-8(b)(1)(ii)(A)(12), 29 CFR 2590.716-8(b)(1)(ii)(A)(12), and 45 CFR 149.510(b)(1)(ii)(A)(12), to the other party and the Departments through the Federal IDR portal. This amendment would not change the timeframe for engaging in open negotiations but would provide greater clarity for parties engaged in open negotiation and improve the shared understanding of deadlines related to the open negotiation period. The Departments seek comment on these proposed amendments.

b. Open Negotiation Response Notice

To have a meaningful open negotiation, the Departments are of the view that both parties must be active and responsive participants. The Departments' experience and feedback from disputing parties and certified IDR entities indicate that the Federal IDR process is less efficient overall when disputing parties are not engaging with each other during the open negotiation period. Therefore, the Departments propose at 26 CFR 54.9816-8(b)(1)(iii), 29 CFR 2590.716-8(b)(1)(iii), and 45 CFR 149.510(b)(1)(iii) to require that the

party in receipt of the open negotiation notice provide a written notice and supporting documentation in response to the open negotiation notice (open negotiation response notice) to the other party and the Departments through the Federal IDR portal as soon as practicable, but no later than the 15th business day of the 30-business-day open negotiation period. Requiring the party in receipt of the open negotiation notice to submit an open negotiation response notice to both the other party and the Departments through the Federal IDR portal would help ensure that parties are responding to open negotiation notices and engaging with one another during the open negotiation period. To better inform the parties' negotiations, the Departments are proposing this 15-business-day timeframe to give the party in receipt of the open negotiation notice sufficient time to review and respond to the open negotiation notice. This would also allow the party that submitted the open negotiation notice to consider, at its discretion, the information included in the open negotiation response notice during (at a minimum) the remaining 15 business days in the 30-business-day open negotiation period.

These deadlines are intended to encourage meaningful participation in open negotiations and allow both parties time to consider offers and raise eligibility concerns prior to initiating the Federal IDR process. If a party were to fail to furnish an open negotiation response notice containing all required information to the other party and the Departments, the Departments would review and determine whether enforcement actions may be appropriate. However, failure to timely furnish an open negotiation response notice in any specific open negotiation would not extend the open negotiation period, delay the timeframe for initiation of the Federal IDR process, or affect either party's ability to initiate the Federal IDR process.

The Departments solicit comment on the proposed modifications to the requirements for submitting the open negotiation notice and the newly proposed open negotiation response notice. Specifically, the Departments seek comment on whether the party in receipt of the open negotiation notice should be required to furnish the open negotiation response notice to the other party and the Departments earlier than proposed to allow additional time for the party submitting the open negotiation notice to review the open negotiation response notice. The Departments also seek comment on imposing a deadline for the open

¹¹⁸ 86 FR 55990.

¹¹⁹ 26 CFR 9816-8T(b)(3), 29 CFR 2590.716-8(b)(3), and 45 CFR 149.510(b)(3).

negotiation response notice later than the proposed deadline, including by the 20th business day or up to the last day of the 30-business-day open negotiation period. A longer response timeframe may be necessary for a party in receipt of open negotiation notice to review and respond if the party receives a high number of open negotiation notices within a short time period. However, submission of the open negotiation response notice at the end of the open negotiation period would not provide the party that submitted the open negotiation notice sufficient time to review, consider, and engage with the party submitting the open negotiation response notice in a meaningful manner prior to the deadline for initiation of the Federal IDR process. Additionally, the Departments seek comment on allowing the certified IDR entities, as a means of incentivizing participation in the proposed exchange of notices, to take into consideration a party's compliance with the 15-business-day deadline for the open negotiation response notice when making their payment determinations.

c. Open Negotiation Notice Content

The Departments propose to amend 26 CFR 54.9816–8(b)(1)(ii)(A), 29 CFR 2590.716–8(b)(1)(ii)(A), and 45 CFR 149.510(b)(1)(ii)(A) and add 26 CFR 54.9816–8(b)(1)(ii)(A)(1) through (12), 29 CFR 2590.716–8(b)(1)(ii)(A)(1) through (12), and 45 CFR 149.510(b)(1)(ii)(A)(1) through (12) to require that the open negotiation notice include additional information regarding the item or service under dispute and the party sending the open negotiation notice. The proposed amendments would add new elements and expand the information required on the open negotiation notice.

Under these proposed rules, the content elements to identify the item or service on the open negotiation notice would align with those that the Departments propose to require in the notice of IDR initiation to identify an item or service under dispute as specified in 26 CFR 54.9816–8(b)(2)(iii)(A), 29 CFR 2590.716–8(b)(2)(iii)(A), and 45 CFR 149.510(b)(2)(iii)(A) and would encourage consistency between open negotiation and the Federal IDR process. The Departments are of the view that requiring the additional elements as part of the open negotiation notice would help parties identify the item or service, the reasons for the denial of payment or initial payment amount, and whether the Federal IDR process applies. Each proposed new or amended element on the open negotiation notice is described

in this section, and the Departments' reasoning for the proposed change is explained.

Under current rules, the open negotiation notice must include contact information for the party sending the notice. At proposed paragraphs 26 CFR 54.9816–8(b)(2)(iii)(A)(1) through (3), 29 CFR 2590.716–8(b)(2)(iii)(A)(1) through (3), and 45 CFR 149.510(b)(1)(ii)(A)(1) through (3), the Departments would require specific contact information sufficient to identify the provider, facility, or provider of air ambulance services, the plan or issuer, and any third party representing the parties in the open negotiation. This contact information would include legal business name, email address, phone number, and mailing address, as provided with the claim form submitted by the provider, facility, or air ambulance provider to the plan or issuer, which would encourage open negotiation initiation between the correct parties and effective communication of the required information.

In addition to the proposed standard contact information elements, parties would also be required to include the National Provider Identification (NPI) number to identify the provider, facility, or provider of air ambulance services and the IDR registration number, assigned under proposed 26 CFR 54.9816–9, 29 CFR 2590.716–9, and 45 CFR 149.530, to identify the plan or issuer (described further in section II.F. of this preamble).

Providers, facilities, and providers of air ambulance services would obtain the IDR registration number from the plan or issuer when the plan or issuer provides it with the initial payment or notice of denial of payment. The proposed registration number would help the provider, facility, or provider of air ambulance services to accurately identify the plan and issuer with which to initiate open negotiation, and the contact and plan information necessary to initiate open negotiation, particularly if the plan or issuer fails to clearly disclose such information. Including this element on the open negotiation notice would streamline the process of submitting the open negotiation notice by providing a validated source of plan and issuer business and contact information, which providers, facilities, and providers of air ambulance services often struggle to identify on documentation provided with the initial payment or the notice of denial of payment and would promote greater consistency and accuracy in initiating open negotiation with the correct plan or issuer.

The Departments acknowledge, as described in section II.F. of this preamble, that the plan or issuer may not be registered in the IDR registry at the time the provider, facility, or provider of air ambulance services initiates the open negotiation period. In these circumstances, the party submitting the open negotiation notice would attest that the party receiving the open negotiation notice was not registered prior to the date the party submitted its open negotiation notice and the registration number would not be required to be included in the notice. The submitting party would use the contact information currently required by the disclosure requirements established in sections 26 CFR 54.9816–6T(d)(1), 29 CFR 2590.716–6(d)(1), and 45 CFR 149.140(d)(1) with the initial payment or notice of denial of payment to complete the open negotiation notice. Finally, if the party submitting the open negotiation notice is a plan or issuer, the plan or issuer would be required to include the plan type. It is the Departments' view that the plan or issuer is best positioned to provide this information and that this information is necessary in assessing applicability of the Federal IDR process. If the plan or issuer is not the party initiating open negotiation, the plan or issuer would be required to include this information on the open negotiation response notice form, as discussed in section II.D.1.d. of this preamble.

Under the current regulations, the open negotiation notice must include information sufficient to identify the item(s) and service(s) furnished by the provider, facility, or provider of air ambulance services. These include the date(s) the item(s) or service(s) were furnished, the service code, and initial payment amount, if applicable, an offer of an out-of-network rate, and contact information for the party sending the open negotiation notice. If finalized, these proposed rules would add to this list of elements considered information sufficient to identify the item or service and, therefore, required to be included in the open negotiation notice at proposed paragraphs 26 CFR 54.9816–8(b)(1)(ii)(A)(4), 29 CFR 2590.716–8(b)(1)(ii)(A)(4), and 45 CFR 149.510(b)(1)(ii)(A)(4). The proposed additions include information to identify the location where the item or service was furnished (such as place of service code or bill type code¹²⁰), type of item or service, the State where the item or service was furnished, and the

¹²⁰ Bill type code is the code relevant for billing by facilities (as opposed to place of service code for providers).

claim number. The place of service code is a two-digit code on health care professional claims that indicates the setting in which a service was furnished.¹²¹ Place of service code information is often needed to determine the acceptability of direct billing of Medicare, Medicaid, and private insurance services furnished by a given provider.¹²² Further, these proposed rules would require the open negotiation notice to include the type of item or service, including whether the item or service is an emergency service or a non-emergency service; whether the item or service is an air ambulance service as defined in 26 CFR 54.9816–3T, 29 CFR 2590.716–3, and 45 CFR 149.510(b)(1)(ii)(A)(7); and whether any service is a professional service or a facility-based service. Parties engaged in open negotiations may use place of service code and information on the type of item or service to analyze the appropriateness of the payment for the item or service and the applicability of the Federal IDR process. The place of service code and type of item or service along with the proposed requirement to include the State where the item or service was furnished would help the parties assess whether a specified State law or an All-Payer Model Agreement might apply. In some States, a specified State law or All-Payer Model Agreement may apply only to certain items or services or with respect to services furnished by certain out-of-network providers or at certain locations (“bifurcated States”).¹²³

The combination of these requirements would help parties identify whether the Federal IDR process applies or whether an applicable specified State law or All-Payer Model Agreement governs the out-of-network payment amount. The Departments are of the view that requiring parties to provide this information on the open negotiation notice would improve communication between parties and help identify and resolve differences in their understanding of the items or services that are the subject of open negotiation.

Further, the Departments expect that as the Federal IDR portal continues to evolve, this information may also be helpful in providing automatic verifications upon a party’s initiation of the open negotiation period of eligibility for the Federal IDR process, which may result in a reduction in submission of ineligible items and services.¹²⁴

Plans and issuers have expressed concern that it is often difficult to identify the item or service subject to the dispute within their billing systems without the associated claim number provided by the provider, facility, or provider of air ambulance services. Therefore, the Departments amended the standard open negotiation notice to include the claim number, as it is necessary to identify the item or service that is subject of the dispute.¹²⁵ Under these proposed rules, the Departments are proposing to codify the requirement to include the associated claim number in the open negotiation notice.

At proposed paragraph 26 CFR 54.9816–8(b)(1)(ii)(A)(5), 29 CFR 2590.716–8(b)(1)(ii)(A)(5), and 45 CFR 149.510(b)(1)(ii)(A)(5), the Departments would specify that the open negotiation notice must include the initial payment amount (including \$0 if, for example, the payment is denied) of the item or service subject to the open negotiation. The initial payment amount is an existing requirement of the open negotiation notice, and this proposed amendment relocates it to 26 CFR 54.9816–8(b)(1)(ii)(A)(5), 29 CFR 2590.716–8(b)(1)(ii)(A)(5), and 45 CFR 149.510(b)(1)(ii)(A)(5) in the regulatory text and clarifies that the plan or issuer must specify \$0 if payment is denied.

The Departments propose to add paragraph 26 CFR 54.9816–8(b)(1)(ii)(A)(6), 29 CFR 2590.716–8(b)(1)(ii)(A)(6), and 45 CFR 149.510(b)(1)(ii)(A)(6) to require a party initiating open negotiations to provide the QPA for the item or service that is the subject of the negotiation if it has been provided on the initial payment or notice of denial of payment or if the party submitting the open negotiation notice is a plan or issuer. Similarly, by

requiring the QPA to be disclosed on the open negotiation notice, the Departments intend to facilitate better communication between parties in identifying whether there may be a mistake in the identified QPA, such as a typographical error or the incorrect use of the cost sharing amount rather than the QPA, so the information can be rectified before initiating the Federal IDR process, if applicable.

At proposed paragraph 26 CFR 54.9816–8(b)(1)(ii)(A)(7), 29 CFR 2590.716–8(b)(1)(ii)(A)(7), and 45 CFR 149.510(b)(1)(ii)(A)(7) the Departments would specify that the open negotiation notice must include an offer of an out-of-network rate for each item or service that is the subject of the open negotiation. The offer of an out-of-network-rate is an existing requirement of the open negotiation notice, and this proposed amendment relocates it to new paragraph (b)(1)(ii)(A)(7) in the regulatory text.

Under proposed 26 CFR 54.9816–8(b)(1)(ii)(A)(8), 29 CFR 2590.716–8(b)(1)(ii)(A)(8), and 45 CFR 149.510(b)(1)(ii)(A)(8) the Departments propose to require that if the party submitting the open negotiation notice is a plan or issuer, it must include the amount of cost sharing imposed for the item or service, if any. The Departments are of the view that the plan or issuer is in the best position to provide this information since non-participating providers, facilities, or providers of air ambulance services generally would not have access to this information. Because the amount of cost sharing for a qualified IDR item or service would be determined by the QPA amount, requiring the amount of cost sharing paid or owed by the participant, beneficiary, or enrollee could help parties better inform their offers while negotiating. The amount of cost sharing paid or owed by the participant, beneficiary, or enrollee would be used, along with the prevailing offer to calculate the final payment amount, should a party choose to initiate the Federal IDR process for the item or service in question. Having a shared understanding of this value and its impact on payment during open negotiations would support the parties’ ability to negotiate with one another in good faith.

A non-emergency item or service is ineligible for the Federal IDR process if the patient was properly provided notice and consented to waive their protections from balance billing under

¹²¹ See Centers for Medicare & Medicaid Services. (December 1, 2021). *Place of Service Codes*. <https://www.cms.gov/Medicare/Coding/place-of-service-codes#:~:text=Place%20of%20Service%20Codes%20are,throughout%20the%20health%20care%20industry.>

¹²² *Id.*

¹²³ There are currently 21 bifurcated States: California, Colorado, Connecticut, Delaware, Florida, Georgia, Illinois, Maine, Maryland, Michigan, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, Ohio, Texas, Virginia, and Washington. See <https://www.cms.gov/files/document/applicability-federal-idr-bifurcated-states.pdf>.

¹²⁴ The Departments note that while this information may assist parties in preliminarily assessing eligibility based on the location of service, it would not eliminate the need for the certified IDR entity or the Departments to determine whether a specified State law applies to the specific item or service and provider at issue.

¹²⁵ U.S. Department of Health and Human Services, U.S. Department of Labor, and U.S. Department of Treasury. (expiration Nov. 30, 2025). *Open Negotiation Notice*. (OMB Control No. 1210–0169). <https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/laws/no-surprises-act/surprise-billing-part-ii-information-collection-documents-attachment-2.pdf>.

the No Surprises Act.¹²⁶ To reduce the number of Federal IDR process disputes initiated for items or services that are ineligible for this reason, the Departments propose to require at new 26 CFR 54.9816–8(b)(1)(ii)(A)(9), 29 CFR 2590.716–8(b)(1)(ii)(A)(9), and 45 CFR 149.510(b)(1)(ii)(A)(9) that if the party submitting the open negotiation notice is a provider or facility, that party must provide a statement that the items and services do not qualify for the notice and consent exception described at 45 CFR 149.410(b) or 149.420(c) through (i), either because the items and services are subject to the prohibition on balance billing without exception or because the provider or facility did not provide notice and receive consent.

To further reduce the number of Federal IDR disputes initiated for ineligible items or services, the Departments propose at 26 CFR 54.9816–8(b)(1)(ii)(A)(10), 29 CFR 2590.716–8(b)(1)(ii)(A)(10), and 45 CFR 149.510(b)(1)(ii)(A)(10) to require that the party submitting the open negotiation notice provide a statement that the provider, facility, or provider of air ambulance services was a nonparticipating provider, facility, or provider of air ambulance services on the date the item or service was furnished. Identification of this eligibility factor at open negotiation may decrease the number of ineligible disputes initiated by drawing the attention of the parties to the statutory eligibility standards underlying the Federal IDR process.

Currently, the standard form¹²⁷ for the open negotiation notice provided by the Departments contains general information including a description of the open negotiation period, what happens at the end of the open

negotiation period, and the Federal IDR process. The Departments propose at 26 CFR 54.9816–8(b)(1)(ii)(A)(11), 29 CFR 2590.716–8(b)(1)(ii)(A)(11), and 45 CFR 149.510(b)(1)(ii)(A)(11) to align the general information requirements for the open negotiation notice with existing requirements under the October 2021 interim final rules regarding the notice of IDR initiation, which specify that the notice of IDR initiation must include a statement describing the Federal IDR process and general information to help ensure that the non-initiating party is informed about the process and is familiar with the next steps.¹²⁸

To support the identification of items or services ineligible for the Federal IDR process, the Departments propose to require the party submitting the open negotiation notice to provide a copy of the initial payment or notice of denial of payment or other remittance advice that is required to include the proposed CARC and RARC disclosures described in section II.B. of this preamble at proposed 26 CFR 54.9816–8(b)(1)(ii)(A)(12), 29 CFR 2590.716–8(b)(1)(ii)(A)(12), and 45 CFR 149.510(b)(1)(ii)(A)(12). The remittance advice containing the proposed CARC and RARC disclosures would provide information as to whether the plan or issuer believes the claim is eligible for the Federal IDR process and ensure that a provider initiating open negotiation understands the position of the plan or issuer regarding the eligibility of an item or service, even in situations in which a plan or issuer in receipt of an open negotiation notice is not otherwise responsive.

The Departments seek comment on the addition of these proposed required elements to the open negotiation notice. The Departments also solicit comment on whether the party submitting the open negotiation notice should be required to provide a statement describing why the party is initiating the open negotiation period, including any considerations that serve as the basis for the initiation of open negotiation for the item or service, such as any of the considerations currently described in 26 CFR 54.9816–8T(c)(4)(iii) and 54.9817–2T(b)(2), 29 CFR 2590.716–8(c)(4)(iii) and 2590.717–2(b)(2), and 45 CFR 149.510(c)(4)(iii) and 149.520(b)(2).

d. Open Negotiation Response Notice Content

The Departments propose to establish requirements for an open negotiation response notice at 26 CFR 54.9816–8(b)(1)(iii)(A), 29 CFR 2590.716–

8(b)(1)(iii)(A), and 45 CFR 149.510(b)(1)(iii)(A). Specifically, the Departments propose to require that the party receiving an open negotiation notice must provide a response to the open negotiation notice, which would include the same information specified in proposed 26 CFR 54.9816–8(b)(1)(ii)(A)(1) through (3), 29 CFR 2590.716–8(b)(1)(ii)(A)(1) through (3), and 45 CFR 149.510(b)(1)(ii)(A)(1) through (3) related to the requirements to provide contact information sufficient to identify the provider, facility, or provider of air ambulance services, the plan or issuer that are parties to the open negotiation, and any third party representing a party in the open negotiation. The Departments further propose that the open negotiation response notice would include the following additional information under proposed 26 CFR 54.9816–8(b)(1)(iii)(A)(4) through (11), 29 CFR 2590.716–8(b)(1)(iii)(A)(4) through (11), and 45 CFR 149.510(b)(1)(iii)(A)(4) through (11): (4) information sufficient to identify the item or service included in the open negotiation notice, including the date(s) the item or service was furnished, the claim number, and if the party in receipt of the open negotiation notice is a provider, facility, or provider of air ambulance services, the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for such item or service from the plan or issuer; (5) if the party in receipt of the open negotiation notice is a plan or issuer, a statement as to whether it agrees that the initial payment amount (including \$0 if, for example, payment is denied) and the QPA reflected in the open negotiation notice accurately reflects the initial payment amount and QPA disclosed with the initial payment for the item or service, and if not, the initial payment amount (including \$0 if, for example, payment is denied) and/or the QPA it believes to be correct and documentation to support the statement (for example, the remittance advice confirming the QPA amount); (6) if the party in receipt of the open negotiation notice is a plan or issuer, the amount of cost sharing imposed for the item or service, if any; (7) a counteroffer of an out-of-network rate for each item or service or an acceptance of the other party's offer; (8) if the party in receipt of the open negotiation notice is a provider or facility, a statement that the items and services do not qualify for the notice and consent exception described at 45 CFR 149.410(b) or 149.420(c) through (i); (9) with respect to each item

¹²⁶ The notice and consent exception does not apply to ancillary services, which include items and services related to emergency medicine, anesthesiology, pathology, radiology, and neonatology, whether furnished by a physician or non-physician practitioner; items and services furnished by assistant surgeons, hospitalists, and intensivists; diagnostic services, including radiology and laboratory services; and items and services furnished by a nonparticipating provider, if there is no participating provider who can furnish such item or service at such facility. Additionally, as specified in PHS Act section 2799B–2(c), the notice and consent exception does not apply to items or services furnished as a result of unforeseen, urgent medical needs that arise at the time an item or service is furnished for which a nonparticipating provider satisfied the notice and consent criteria.

¹²⁷ See U.S. Department of Health and Human Services, U.S. Department of Labor, and U.S. Department of the Treasury. (expiration Nov. 30, 2025). *Open Negotiation Notice*. (OMB Control No. 1210–0169). <https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/laws/no-surprises-act/surprise-billing-part-ii-information-collection-documents-attachment-2.pdf>.

¹²⁸ 86 FR 55991.

or service, a statement and supporting documentation that explains why the item or service is ineligible for the Federal IDR process or a statement agreeing that the item or service is eligible for the Federal IDR process; (10) a statement as to whether any of the information provided in the open negotiation notice is inaccurate and the basis for the statement, as well as supporting documentation; and (11) a statement confirming that the initial payment or notice of denial of payment or other remittance advice provided by the party submitting the open negotiation notice is accurate, and if inaccurate, a copy of the accurate initial payment or notice of denial of payment or other remittance advice that is required to include the disclosures under 26 CFR 54.9816–6T(d)(1), 26 CFR 54.9816–6(d)(1), 29 CFR 2590.716–6(d)(1), and 45 CFR 149.140(d)(1), with respect to the item or service.

Based on feedback from the certified IDR entities, non-initiating parties often do not object to the applicability of the Federal IDR process or to the accuracy of the QPA until after the certified IDR entity has been selected, including at the time of offer submission. Also, at times, disputing parties disagree about the accuracy of information relevant to the claim under dispute. In these cases, the initiating party is unaware of the non-initiating party's statement because this information is sent to the certified IDR entity and not to the initiating party well after the open negotiation period has ended. This significantly slows down the processing of disputes, as the certified IDR entity then must contact both parties to determine the appropriate QPA or solicit information necessary to confirm the Federal IDR process applies. To implement an efficient Federal IDR process, both parties must be active participants in the process. For this reason, and to minimize communication challenges between parties, the Departments are of the view that the party in receipt of the open negotiation notice should provide the proposed content elements to the party sending the open negotiation notice and to the Departments. All of the proposed open negotiation response notice content requirements are also included in the proposed open negotiation notice content requirements, except for: (1) a statement that explains why the item or service is not subject to the Federal IDR process or a statement agreeing that the item or service is subject to the Federal IDR process; (2) a statement as to whether the QPA reflected in the open negotiation notice is accurate for the item or service, and

if not, a statement providing the QPA it believes to be correct and documentation to support the statement (for example, the remittance advice confirming the QPA amount); and (3) a statement confirming the accuracy of the initial payment, notice of denial of payment, or other remittance advice provided by the party submitting the open negotiation notice, and a copy of an accurate initial payment, notice of denial of payment or other remittance advice if inaccurate. By restating information on both the open negotiation notice and open negotiation response notice, parties would have an opportunity to confirm or update information necessary to negotiate and identify any information discrepancies which could impact eligibility and decisions to negotiate or participate in the Federal IDR process. With respect to the three proposed open negotiation response notice content requirements not included in the open negotiation notice, this proposal, if finalized, would make the party submitting the open negotiation notice aware of any objection that the party in receipt of the open negotiation notice has to the dispute's eligibility for the Federal IDR process or its objection to the QPA or remittance advice accuracy. Additionally, this proposal would require the party in receipt of the open negotiation notice to provide an explanation and documentation to support its statement(s).

The Departments are of the view that this proposed method of exchanging information would facilitate communication and understanding between the parties as to the eligibility of an item or service for the Federal IDR process. The Departments seek comment on the content elements of the open negotiation response notice. The Departments also seek comment on the requirement to submit a counteroffer for an out-of-network rate for the item or service or a statement accepting the other party's offer on the open negotiation response notice. Specifically, the Departments seek comment on whether it would hinder meaningful negotiation between the parties outside the Federal IDR portal, or whether it would promote negotiation among parties that might otherwise not negotiate.

e. Technical Amendments

The Departments propose several technical amendments to the open negotiation regulatory text. These proposed changes correct or remove regulatory text that is being updated by the open negotiation proposals in these proposed rules. First, the Departments

propose a technical correction for the cross reference at 26 CFR 54.9816–8T(b)(1)(i), 29 CFR 2590.716–8(b)(1)(i), and 45 CFR 149.510(b)(1)(i) which directs readers to the definition of a qualified IDR item or service at paragraph (a)(2)(xii)(A), but should instead reference paragraph (a)(2)(xi)(A) for the appropriate cross reference to the definition of a qualified IDR item or service.

Second, the Departments propose to remove the current regulatory text that describes the manner in which the open negotiation notice must be provided. The requirements for submitting the open negotiation notice described in paragraphs 26 CFR 54.9816–8T(b)(1)(ii)(B), 29 CFR 2590.716–8(b)(1)(ii)(B), and 45 CFR 149.510(b)(1)(ii)(B) would be removed because they would no longer apply under the proposed changes to the open negotiation notice, and the removal of this paragraph aligns with the proposal described at section II.D.3. of this preamble, which would establish uniform standards for submitting notices for both open negotiations and the IDR initiation through the Federal IDR portal.

f. Implementation of Open Negotiation Through the Federal IDR Portal

As discussed in section II.D.3. of this preamble, to implement the proposed modifications to the requirements for submitting the open negotiation notice and the newly proposed open negotiation response notice, the Departments would need to modify the Federal IDR portal to allow parties to send the open negotiation notice and open negotiation response notice to the other party and the Departments through the Federal IDR portal. While some plans or issuers have created their own proprietary portals to facilitate open negotiations, providers, facilities, and providers of air ambulance services are not required to use them. Accordingly, providers and facilities are not considered to have failed to provide an open negotiation notice or open negotiation response notice solely because they did not use a plan's or issuer's proprietary portal. The Departments are of the view that having one central location where plans, issuers, providers, facilities, and providers of air ambulance services could initiate open negotiations would increase efficiency. Plans, issuers, providers, facilities, providers of air ambulance services, and certified IDR entities have also requested that the Departments amend the rules to require parties to send the open negotiation notice through the Federal IDR portal to

streamline the process and create a centralized platform where parties can better track their open disputes. The Departments note that though these rules propose to require the open negotiation notice and the open negotiation response notice to be submitted through the Federal IDR portal, parties would not be required to conduct negotiations within the Federal IDR portal.

The Federal IDR portal would facilitate transmittal of the open negotiation notice to the appropriate party. Specifically, if the party receiving the open negotiation notice is a provider, facility, or provider of air ambulance services, the Federal IDR portal would transmit the notice to the party based on the contact information provided in the open negotiation notice. However, if the party in receipt of the open negotiation notice is a plan or issuer, the Federal IDR portal would transmit the notice to the party based on the contact information provided through the IDR registry. As discussed in sections II.D.1.c. and II.F. of these proposed rules, it is possible that a plan or issuer would not have submitted their information to the registry by the time a party submits an open negotiation notice to them. If, at the time the open negotiation notice is submitted there is not a registration number for the plan or issuer, the Federal IDR portal would transmit the notice to the party based on the contact information provided in the open negotiation notice.

The Departments seek comment on whether the disputing parties should be required to use the Federal IDR portal for further communication related to open negotiations beyond the initiation of open negotiation and the submission of the open negotiation response notice. The Departments seek comment on what modes of correspondence might be useful to the parties during the open negotiation period (for example, the submission of additional documentation to the other party, live chat, or message exchange, etc.) and if the content of those communications should be accessible to the certified IDR entities if a dispute is initiated on the relevant item or service. Lastly, the Departments solicit comment on whether there are any additional challenges preventing the parties from, or clarifications needed to assist the parties in, fully engaging in meaningful negotiations during the open negotiation period.

2. Changes to the Initiation of the Federal IDR Process

Section 9816(c)(1)(B) of the Code, section 716(c)(1)(B) of ERISA, section

2799A–1(c)(1)(B) of the PHS Act, and the October 2021 interim final rules establish that, with respect to items or services that are the subject of an open negotiation period, if the parties have not agreed upon an amount for the out-of-network rate by the last day of the open negotiation period, either party may initiate the Federal IDR process during the 4-business-day period beginning on the 31st business day after the start of the open negotiation period.¹²⁹

a. Notice of IDR Initiation

As discussed in section II.D.1. of this preamble, an efficient and transparent Federal IDR process requires both parties to be active participants. Therefore, the Departments propose to amend the IDR initiation provisions of 26 CFR 54.9816–8(b)(2), 29 CFR 2590.716–8(b)(2), and 45 CFR 149.510(b)(2) to improve communication between parties, accelerate dispute processing, and reduce the burden on certified IDR entities when determining whether a case is eligible for the Federal IDR process. Specifically, these proposed rules would require the initiating party to include additional information in the notice of IDR initiation and would require non-initiating parties to provide a response to the notice of IDR initiation (notice of IDR initiation response) to the Departments and to the initiating party through the Federal IDR portal within 3 business days of receipt of the notice of IDR initiation. Section II.D.3. of this preamble describes how the parties would provide both the notice of IDR initiation and notice of IDR initiation response to the other party and the Departments.

The Departments propose to amend the content of the notice of IDR initiation and redesignate proposed 26 CFR 54.9816–8(b)(2)(iii)(A), 29 CFR 2590.716–8(b)(2)(iii)(A), and 45 CFR 149.510(b)(2)(iii)(A) as 26 CFR 54.9816–8(b)(2)(ii)(A), 29 CFR 2590.716–8(b)(2)(ii)(A), and 45 CFR 149.510(b)(2)(ii)(A). As described in section II.D.1.c. of this preamble, under these proposed rules several of the content elements in the notice of IDR initiation would be required in the open negotiation notice and open negotiation response notice.¹³⁰ As discussed in

¹²⁹ 86 FR 55991.

¹³⁰ See proposed regulations for the open negotiation notice content at: 26 CFR 54.9816–8(b)(1)(ii)(A)(1)–(6) and (9)–(12); 29 CFR 2590.716–8(b)(1)(ii)(A)(1)–(6) and (9)–(12); and 45 CFR 149.510(b)(1)(ii)(A)(1)–(6) and (9)–(12). See proposed regulations for the open negotiation response content at: 26 CFR 54.9816–8(b)(1)(iii)(A)(1)–(4), (8), and (11); 29 CFR

section II.D.1.d. of this preamble, by restating information on the notices, parties would have an opportunity to confirm or update information necessary to continue negotiations and identify any information discrepancies that could impact eligibility for the Federal IDR process. Further, the open negotiation notice and notice of IDR initiation would often not be identical since disputing parties do not always decide to initiate the Federal IDR process for all items and services included in the open negotiation notice. The Departments anticipate that the Federal IDR portal would be able to prepopulate information included in the open negotiation notices and open negotiation response notices, which would mitigate additional burden on the disputing parties and would provide the certified IDR entity (or the Departments in the event the departmental eligibility review applies as described in section II.E.1.b.ii. of these proposed rules) sufficient information with respect to the item or service and dispute in a single document.

Under current rules, the notice of IDR initiation must include contact information for the parties to the dispute. The proposed rules under 26 CFR 54.9816–8(b)(2)(ii)(A)(1) through (3), 29 CFR 2590.716–8(b)(2)(ii)(A)(1) through (3), and 45 CFR 149.510(b)(2)(ii)(A)(1) through (3), would require specific contact information depending on whether the initiating party is a provider, facility, or provider of air ambulance services, or the plan or issuer, as well as any third party representing the initiating party in the dispute. This contact information would include the legal business name, email address, phone number, mailing address, and Tax Identification Number (TIN). The initiating party would also be required to include the NPI to identify the provider, facility, or provider of air ambulance services and the plan or issuer IDR registration number, assigned under proposed 26 CFR 54.9816–9, 29 CFR 2590.716–9, and 45 CFR 149.530 to identify the plan or issuer, if the plan or issuer is registered, or an attestation from the initiating party that the plan or issuer was not registered prior to the date of the notice (described further in section II.F. of this preamble). Further, if there is any third party representing the initiating party, the notice of IDR initiation would be required to include an attestation that the third party has the authority to act on behalf of the

2590.716–8(b)(1)(iii)(A)(1)–(4), (8), and (11); and 45 CFR 149.510(b)(1)(iii)(A)(1)–(4), (8) and (11).

party it represents in the Federal IDR process.¹³¹

Under current rules, the notice of IDR initiation must also include information sufficient to identify the items or services that are the subject of the dispute. These proposed rules would amend these requirements to include whether the dispute being initiated includes batched or bundled qualified IDR items or services¹³² (described in section II.E.2. of this preamble); the date(s) the qualified IDR item or service was furnished; if the initiating party is a provider, facility, or provider of air ambulance services, the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for such item or service from the plan or issuer; the date the open negotiation period began; the type of item or service; the State where the item or service was furnished; the claim number; the service code; and information to identify the location the item or service was furnished (including the place of service code or bill type code).¹³³ The proposed rule requiring plans and issuers to provide the claim number in the notice of IDR initiation would codify existing content requirements in the notice of IDR initiation. The claim number is an element on the notice of IDR initiation that is currently approved for use by the initiating party, as it is information that is necessary to identify the item or service under dispute, as currently required by 26 CFR 54.9816–8T(b)(2)(iii)(A)(1), 29 CFR 2590.716–8(b)(2)(iii)(A)(1), and 45 CFR 149.510(b)(2)(iii)(A)(1). The Departments also propose requiring the initiating party to submit its TIN in the notice of IDR initiation in order to facilitate the Departments' ability to collect the administrative fees directly, as described in section II.E.3.d. of this preamble.¹³⁴ The TIN would also facilitate debt collection from parties that fail to pay their administrative fees and generally streamline the collection process by serving as a unique identifier for disputing parties.

Under current rules, the notice of IDR initiation requires the initiating party to provide the initial payment amount, the QPA, and if the initiating party is a provider or facility, a statement that the items and services do not qualify for the notice and consent exception described at 45 CFR 149.410(b) or 149.420(c) through (i). This information would still be required under these proposed rules at paragraphs 26 CFR 54.9816–8(b)(2)(ii)(A)(6) through (8), 29 CFR 2590.716–8(b)(2)(ii)(A)(6) through (8), and 45 CFR 149.510(b)(2)(ii)(A)(6) through (8), but would require the QPA only if provided with the initial payment of notice of denial or payment or if the initiating party is a plan or issuer. These proposed rules would also require that the initiating party provide the initial payment amount, including \$0, if the payment was denied.

Further, these proposed rules would require a statement that the provider, facility, or provider of air ambulance services was a nonparticipating provider, nonparticipating emergency facility, or nonparticipating provider of air ambulance services on the date the item or service was furnished.¹³⁵ As discussed in section II.D.1.c. of this preamble, identification of this eligibility factor at the time of initiating the Federal IDR process may decrease the number of ineligible disputes initiated by drawing the attention of the parties to the statutory eligibility standards underlying the Federal IDR process.

Under current rules, the notice of IDR initiation requires the initiating party to provide an attestation that the item or service under dispute is a qualified IDR item or service, and the basis for the attestation; general information listed in the standard notice of IDR initiation developed by the Departments describing the Federal IDR process (including a description of the purpose of the Federal IDR process and key deadlines in the Federal IDR process); and the preferred certified IDR entity. Each of these content requirements would still be required under these proposed rules.¹³⁶

To improve communications between the parties to a dispute, these proposed rules would also require the initiating party to include a copy of the initial payment or notice of denial of payment or other remittance advice that is required to include the disclosures

under 26 CFR 54.9816–6T(d)(1), 26 CFR 54.9816–6(d)(1), 29 CFR 2590.716–6(d)(1), and 45 CFR 149.140(d)(1), with respect to the item or service;¹³⁷ and a statement describing the key aspects of the claim discussed by the parties during open negotiation that relate to the payment for the disputed claim, whether the reasons for initiating the Federal IDR process are different from those aspects discussed during the open negotiation period, and an explanation of why the party is initiating the Federal IDR process, including any of the considerations currently described in 26 CFR 54.9816–8(c)(4)(iii) and 54.9817–2(b)(2), 29 CFR 2590.716–8(c)(4)(iii) and 2590.717–2(b)(2), and 45 CFR 149.510(c)(4)(iii) and 149.520(b)(2) that serve as the party's basis for initiating the Federal IDR process.¹³⁸ The Departments have received feedback that plans and issuers are often unaware of the reasons why the provider, facility, or provider of air ambulance services is initiating the Federal IDR process, despite engaging in the 30-business-day open negotiation period. Further, plans and issuers have stated that providers, facilities, and providers of air ambulance services often raise different reasons in the notice of offer submission than the reasons they presented during the open negotiation period. Plans and issuers have also stated that if they knew earlier of a provider's, facility's, or provider of air ambulance services' reasoning for initiating the Federal IDR process, they may have a more accurate basis for making an alternative out-of-network payment amount that may better align with the provider's, facility's, or provider of air ambulance services' requested total payment amount. Thus, the Departments are of the view that requiring this information would result in the non-initiating party providing a more informed offer or help the disputing parties reach a settlement before the certified IDR entity makes a payment determination.

Requiring the initiating party to attest that the item or service under dispute is a qualified IDR item or service and to identify the basis for the attestation may reduce the number of ineligible disputes submitted because it would require the initiating party to actively evaluate eligibility before initiating the Federal IDR process. This would help reduce the time certified IDR entities spend conducting outreach to confirm whether

¹³¹ Proposed 26 CFR 54.9816–8(b)(2)(ii)(A)(3), 29 CFR 2590.716–8(b)(2)(ii)(A)(3), and 45 CFR 149.510(b)(2)(ii)(A)(3).

¹³² Proposed 26 CFR 54.9816–8(b)(2)(ii)(A)(4), 29 CFR 2590.716–8(b)(2)(ii)(A)(4), and 45 CFR 149.510(b)(2)(ii)(A)(4).

¹³³ Proposed 26 CFR 54.9816–8(b)(2)(ii)(A)(5), 29 CFR 2590.716–8(b)(2)(ii)(A)(5), and 45 CFR 149.510(b)(2)(ii)(A)(5).

¹³⁴ Currently, the administrative fee is paid to the selected certified IDR entity and then remitted to the Departments. 26 CFR 54.9816–8T(d)(2)(i) and (e)(2)(ix), 29 CFR 2590.716–8(d)(2)(i) and (e)(2)(ix), and 45 CFR 149.510(d)(2)(i) and (e)(2)(ix).

¹³⁵ Proposed 26 CFR 54.9816–8(b)(2)(ii)(A)(9), 29 CFR 2590.716–8(b)(2)(ii)(A)(9), and 45 CFR 149.510(b)(2)(ii)(A)(9).

¹³⁶ Proposed 26 CFR 54.9816–8(b)(2)(ii)(A)(10) through (11) and (13), 29 CFR 2590.716–8(b)(2)(ii)(A)(10) through (11) and (13), and 45 CFR 149.510(b)(2)(ii)(A)(10) through (11) and (13).

¹³⁷ Proposed 26 CFR 54.9816–8(b)(2)(ii)(A)(12), 29 CFR 2590.716–8(b)(2)(ii)(A)(12), and 45 CFR 149.510(b)(2)(ii)(A)(12).

¹³⁸ Proposed 26 CFR 54.9816–8(b)(2)(ii)(A)(14), 29 CFR 2590.716–8(b)(2)(ii)(A)(14), and 45 CFR 149.510(b)(2)(ii)(A)(14).

the item or service is eligible for the Federal IDR process.

Lastly, the Departments propose to remove paragraphs 26 CFR 54.9816–8T(b)(2)(iii)(B) and (C), 29 CFR 2590.716–8(b)(2)(iii)(B) and (C), and 45 CFR 149.510(b)(2)(iii)(B) and (C), which specify the manner in which the notice of IDR initiation must be provided to the other party and the Departments. The Departments propose to establish paragraphs 26 CFR 54.9816–8(b)(3), 29 CFR 2590.716–8(b)(3), and 45 CFR 149.510(b)(3) to require use of the Federal IDR portal for transmission of notices of IDR initiation in the same manner as would be required for the transmission of notices related to open negotiation discussed in section II.D.3. of this preamble.

The Departments seek comment on these proposals. Specifically, the Departments seek comment on the new content elements for the notice of IDR initiation and whether additional elements should be required to facilitate the exchange of information necessary to initiate the Federal IDR process. Further, the Departments solicit comment on the proposed requirement for the initiating party to include in the notice of IDR initiation a statement describing any key aspects of the claim discussed by the parties during open negotiation, whether the considerations for initiating the Federal IDR process are different from the key aspects of the claim discussed during the open negotiation period, and an explanation of why the party is initiating the Federal IDR process, including any of the permissible considerations described at 26 CFR 54.9816–8(c)(4)(iii) and 54.9817–2(b)(2), 29 CFR 2590.716–8(c)(4)(iii) and 2590.717–2(b)(2), and 45 CFR 149.510(c)(4)(iii) and 149.520(b)(2).

b. Notice of IDR Initiation Response

The Departments propose to amend 26 CFR 54.9816–8(b)(2)(i), 29 CFR 2590.716–8(b)(2)(i), and 45 CFR 149.510(b)(2)(i) to require that the non-initiating party provide a written notice and supporting documentation in response to the notice of IDR initiation to the initiating party and the Departments within 3 business days after the date of IDR initiation. As described in section II.D.2.a. of this preamble, the initiating party must submit the notice of IDR initiation through the Federal IDR portal. Upon proper submission of the notice of IDR initiation by the initiating party, the Federal IDR portal would facilitate transmittal of the notice of IDR initiation to the non-initiating party. The non-initiating party would also

receive the notice of IDR initiation. The Departments are of the view that it is critical to require the non-initiating party to provide a response to the notice of IDR initiation (including any objections regarding preferred certified IDR entity selection and notice of any objection to Federal IDR process eligibility) in order to increase transparency and improve efficiencies in the Federal IDR process.

The Departments propose to add 26 CFR 54.9816–8(b)(2)(iii)(A), 29 CFR 2590.716–8(b)(2)(iii)(A), and 45 CFR 149.510(b)(2)(iii)(A), to provide that the notice of IDR initiation response must include information sufficient to identify the non-initiating party. Under the proposed rules, the notice of IDR initiation response must include the legal business name, email address, phone number, mailing address, the TIN, the NPI, and the plan's or issuer's registration number, as required under proposed 26 CFR 54.9816–9, 29 CFR 2590.716–9, and 45 CFR 149.530. These proposed rules would also require the notice to include the name and contact information (including the legal business name, email address, phone number, and mailing address) for any third party representing the non-initiating party, and an attestation that the third party has the authority to act on behalf of the party it represents in the Federal IDR process.

The Departments also propose that the notice must include information sufficient to identify each item or service included in the notice of IDR initiation (including the date(s) the item or service was furnished. If the non-initiating party is a provider, facility, or provider of air ambulance services, the notice must include the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for such item or service from the plan or issuer and the claim number). If the non-initiating party is a plan or issuer, the proposed rules would require a statement as to whether the non-initiating party agrees that the initial payment (including \$0 if, for example, payment is denied) and the QPA reflected in the notice of IDR initiation was the initial payment amount and/or the QPA disclosed with the initial payment or notice of denial of payment for the item or service that is the subject of the dispute, and if not, the initial payment amount (including \$0 if, for example, payment is denied) and/or QPA it believes to be correct, and documentation to support the statement

(for example, the remittance advice confirming the QPA). If the non-initiating party is a plan or issuer, the notice must include the amount of cost sharing imposed for the item or service, if any. If the non-initiating party is a provider or facility, the notice must include a statement that the items and services do not qualify for the notice and consent exception described at § 149.410(b) or § 149.420(c) through (i).

With respect to each item or service that is the subject of the dispute, the notice must also include an attestation that the item or service is a qualified IDR item or service, or for each item or service that the non-initiating party asserts is not a qualified IDR item or service, an explanation and documentation to support the statement; a statement confirming that the initial payment or notice of denial of payment or other remittance advice provided by the initiating party under paragraph (b)(2)(ii)(A)(12) is accurate, and if inaccurate, a copy of the accurate initial payment or notice of denial of payment or other remittance advice required to include the disclosures under 26 CFR 54.9816–6T(d)(1), 26 CFR 54.9816–6(d)(1), 29 CFR 2590.716–6(d)(1), and 45 CFR 149.140(d)(1), with respect to the item or service; a statement as to whether any of the information provided in the notice of IDR initiation is inaccurate, the basis for the statement, and any supporting documentation; and a statement as to whether the non-initiating party agrees or objects to the initiating party's preferred certified IDR entity. If the non-initiating party objects to the initiating party's preferred certified IDR entity, the notice of IDR initiation response must include the name of an alternative preferred certified IDR entity and, if applicable, an explanation of any conflict of interest with the initiating party's preferred certified IDR entity.

Most of the proposed notice of IDR initiation response content requirements are included in the proposed open negotiation notice, open negotiation response notice, and notice of IDR initiation content requirements.¹³⁹ As

¹³⁹ See proposed regulations for the open negotiation notice content at: 26 CFR 54.9816–8(b)(1)(ii)(A)(1)–(6), (8)–(9), and (12); 29 CFR 2590.716–8(b)(1)(ii)(A)(1)–(6), (8)–(9), and (12); and 45 CFR 149.510(b)(1)(ii)(A)(1)–(6), (8)–(9), and (12). See proposed regulations for the open negotiation response content at: 26 CFR 54.9816–8(b)(1)(iii)(A)(1)–(6), (8)–(9), and (11); 29 CFR 2590.716–8(b)(1)(iii)(A)(1)–(6), (8)–(9), and (11); and 45 CFR 149.510(b)(1)(iii)(A)(1)–(6), (8)–(9), and (11). See proposed regulations for the notice of IDR initiation content at: 26 CFR 54.9816–8(b)(2)(ii)(A)(1)–(3), (5)–(8), (10), and (12); 29 CFR 2590.716–8(b)(2)(ii)(A)(1)–(3), (5)–(8), (10), and (12); and 45 CFR 149.510(b)(2)(ii)(A)(1)–(3), (5)–(8), (10), and (12).

discussed in sections II.D.1.d. and II.D.2.a., by restating information on the notices, parties would have an opportunity to confirm or update information necessary to continue negotiations and identify any information discrepancies which could impact eligibility. Further, by requiring this information at IDR initiation, it would reduce the likelihood that additional outreach would be necessary to make eligibility determinations, improving IDR dispute processing. As discussed in section II.D.2.a. of this preamble, the Departments anticipate that the Federal IDR portal would be able to prepopulate information included in the open negotiation notice, open negotiation response notice, and the notice of IDR initiation notice, which would mitigate additional burden on the disputing parties.

The proposed rules also include additional content requirements for the notice of IDR initiation response that require a statement as to whether the non-initiating party agrees or objects to the initiating party's preferred certified IDR entity and, if the non-initiating party objects to the initiating party's preferred certified IDR entity, the name of an alternative preferred certified IDR entity. This proposed requirement is to meet the statutory requirement under Code section 9816(c)(4)(F), ERISA section 716(c)(4)(F), and PHS Act section 2799A–1(c)(4)(F) that the Departments must provide a method for the plan or issuer and the provider, facility, or provider of air ambulance services that are parties to a determination subject to the Federal IDR process to jointly select a certified IDR entity no later than 3 business days following the date of the IDR initiation. Section II.E.1.a. of this preamble further describes the selection of the certified IDR entity process and the proposed amendments to the certified IDR entity selection process.

The Departments anticipate updating the Federal IDR portal to create parameters to ensure information is submitted for each of the required fields for the notice of IDR initiation and notice of IDR initiation response. However, failure to timely furnish a notice of IDR initiation response would not delay the timeframe for initiation of the Federal IDR process (because the Federal IDR process has been initiated once a notice of IDR initiation has timely been submitted to the non-initiating party and the Departments) or delay any subsequent timeframes under the Federal IDR process. As discussed in section II.D.1.b. of this preamble, if a party were to fail to furnish a notice of IDR initiation response to the other

party and the Departments or fail to fill out all of the required information in good faith (for example, intentional omission of detail with the intent to advance the process without providing sufficient content), the Departments would review and determine whether enforcement actions may be warranted.

The Departments seek comment on these proposals, including any administrative burden associated with the additional disclosure requirements.

3. Manner of Notices

The October 2021 interim final rules generally require a party to initiate open negotiations and initiate the Federal IDR process by providing written notice to the other party.¹⁴⁰ The party initiating the Federal IDR process must also furnish the notice of IDR initiation to the Departments through the Federal IDR portal. In both cases, notice to the other party may be provided electronically if the following two conditions are satisfied: (1) the party sending the open negotiation notice has a good faith belief that the electronic method is readily accessible to the other party; and (2) the notice is provided in paper form free of charge upon request.¹⁴¹ As mentioned in section II.D.1. and II.D.2. of this preamble, the Departments are proposing to remove the regulatory text at 26 CFR 54.9816–8T(b)(1)(ii)(B), (b)(2)(iii)(B), and (b)(2)(iii)(C), 29 CFR 2590.716–8(b)(1)(ii)(B), (b)(2)(iii)(B), and (b)(2)(iii)(C), and 45 CFR 149.510(b)(1)(ii)(B), (b)(2)(iii)(B), and (b)(2)(iii)(C) and instead include new requirements related to the manner of submission of open negotiation notices and notices of IDR initiation to the Departments and the other party at 26 CFR 54.9816–8(b)(3), 29 CFR 2590.716–8(b)(3), and 45 CFR 149.510(b)(3). The Departments propose that these new requirements would also apply to the open negotiation response notice and the notice of IDR initiation response. Specifically, the Departments propose that a party must furnish to the other party and the Departments the notices and supporting documentation described in proposed paragraphs (b)(1)(ii) (open negotiation notice), (b)(1)(iii) (open negotiation response notice), (b)(2)(ii) (notice of IDR initiation), and (b)(2)(iii) (notice of IDR initiation response) through the Federal IDR portal, using the standard forms developed by the Departments.

¹⁴⁰ 86 FR 55990.

¹⁴¹ 26 CFR 54.9816–8T(b)(1)(ii)(B), (b)(2)(iii)(B), and (b)(2)(iii)(C), 29 CFR 2590.716–8(b)(1)(ii)(B), (b)(2)(iii)(B), and (b)(2)(iii)(C), and 45 CFR 149.510(b)(1)(ii)(B), (b)(2)(iii)(B) and (b)(2)(iii)(C).

Under the current regulations, the open negotiation notice between parties has taken place outside of the Federal IDR portal and has led to challenges for the Departments and certified IDR entities to confirm that all requirements related to the open negotiation notice and open negotiation period have been satisfied for each initiated dispute. Requiring a party to submit the open negotiation notice to the Departments and the other party through the Federal IDR portal would provide a record of whether and when the initiating party began open negotiations, which would help inform whether the item or service that is the subject of negotiation is eligible for the Federal IDR process. The Departments expect that this would decrease the amount of time and resources the Departments and certified IDR entities spend seeking information from the disputing parties to determine whether the open negotiation period was initiated and exhausted, which would ultimately provide certified IDR entities more time to review eligible disputes.

As specified in the October 2021 interim final rules and set forth in these proposed rules, the Departments are of the view that it is important for a party receiving a notice to be furnished the notice on the same day as it is submitted to the Departments, because many of the timeframes required in the October 2021 interim final rules and proposed in these proposed rules are triggered upon receipt of a notice.¹⁴² Currently, when an initiating party submits the notice of IDR initiation to the Federal IDR portal, the non-initiating party receives a notice from the Departments on the same day the Departments receive the notice of IDR initiation. This notice from the Departments to the non-initiating party provides information contained in the notice of IDR initiation. However, it does not include any of the supporting documentation that the initiating party may have provided with the notice of IDR initiation. While the initiating party is required to directly furnish the notice of IDR initiation to the other party, non-initiating parties report that, at times, the initiating party provides the notice after the period for IDR initiation has expired, although it submits the notice to the Departments within the applicable notice period.

If these proposed rules are finalized, the Departments would enhance the Federal IDR portal to allow the parties to transmit notices, including supporting documentation, through the Federal IDR portal so that the party sending the notice can notify the

¹⁴² 86 FR 55990 through 55991.

Departments and the other party at the same time. Further, as discussed in sections II.D.1.c. and II.D.2.a. of this preamble, the Departments are proposing to require similar content requirements in the open negotiation notice and notice of IDR initiation. By streamlining the submission of these notices, the Departments would be able to use information that was submitted for one notice to pre-populate subsequent notices, reducing the burden of providing duplicative information. For instance, if a party decides to initiate the Federal IDR process after submitting the open negotiation notice through the Federal IDR portal and completing the 30-business-day open negotiation period, the Departments intend that the Federal IDR portal would pre-populate the fields in the notice of IDR initiation and notice of IDR initiation response with the same information that was provided in the open negotiation notice and open negotiation response notice, as applicable. The Departments solicit comment on these proposals.

E. Federal IDR Process Following Initiation

1. Certified IDR Entity Selection and Eligibility Determinations

a. Certified IDR Entity Selection

Section 9816(c)(4)(F) of the Code, section 716(c)(4)(F) of ERISA, section 2799A–1(c)(4)(F) of the PHS Act, and the October 2021 interim final rules¹⁴³ provide parties to a dispute 3 business days after the initiation date of the Federal IDR process to jointly select a certified IDR entity. If parties to a dispute fail to jointly agree and select a certified IDR entity within the required timeframe, the Departments must select the certified IDR entity no later than 6 business days after the initiation date of the Federal IDR process. More specifically, under the current rules, the non-initiating party may agree or object to the preferred certified IDR entity that the initiating party identifies in its notice of IDR initiation. If the non-initiating party fails to object within 3 business days after the date of IDR initiation, the preferred certified IDR entity identified in the notice of IDR initiation will be selected and will be treated as jointly agreed to by the parties. In this case, the initiating party's preferred certified IDR entity becomes the certified IDR entity for the dispute, provided that the certified IDR entity does not have a conflict of interest. If the non-initiating party objects to the initiating party's preferred

certified IDR entity, it must notify the initiating party of the objection and propose an alternative preferred certified IDR entity within 3 business days after the date of IDR initiation. The initiating party must then agree or object to the alternative preferred certified IDR entity within 3 business days after the date of IDR initiation. If the initiating party fails to agree or object to the alternative preferred certified IDR entity within that timeframe, the alternative preferred certified IDR entity selected by the non-initiating party will be selected and will be treated as jointly agreed to by the parties. If the parties fail to jointly agree on a certified IDR entity within 3 business days after the date of IDR initiation, the Departments select a certified IDR entity through random selection.¹⁴⁴

Further, under the current rules, upon the joint selection of a certified IDR entity the initiating party must provide a notice of certified IDR entity selection to the Departments indicating whether the parties have jointly agreed or failed to agree on the selection of a certified IDR entity, as soon as practicable but no later than 1 business day after selection.¹⁴⁵ The notification must include an attestation by both parties, or by the initiating party if the non-initiating party fails to object to the selection of the certified IDR entity, that the selected certified IDR entity does not have a conflict of interest as specified in 26 CFR 54.9816–8(c)(1)(ii), 29 CFR 2590.716–8(c)(1)(iii), and 45 CFR 149.510(c)(1)(ii).¹⁴⁶ Under the current rules, after the selection of the certified IDR entity by the parties (including when the initiating party selects a certified IDR entity and the non-initiating party does not object), or by the Departments when the parties fail to select a certified IDR entity, the certified IDR entity must review the selection and attest that it meets these conflict-of-interest requirements.¹⁴⁷ If the certified IDR entity is unable to attest that it meets the conflict-of-interest requirements within 3 business days of selection, the parties, upon notification, must select another certified IDR entity. In such circumstances, the date of the notification sent by the certified IDR entity informing the parties that it cannot attest that it meets the conflict-

of-interest requirements is treated as the date of IDR initiation for the purposes of selecting a new certified IDR entity.

Since implementation of the Federal IDR process, the Departments have identified potential areas to improve upon and provide additional clarity with respect to the process for selecting a certified IDR entity. First, in the Departments' experience implementing these rules, when a non-initiating party waits until the third business day after the date of IDR initiation to select an alternative preferred certified IDR entity, the initiating party lacks sufficient time to agree or object to the alternative preferred certified IDR entity. As a result, the alternative preferred certified IDR entity will be "jointly" selected by default. The Departments are of the view that in order for a certified IDR entity to be "jointly" selected, the parties must agree on, or be given the opportunity to object to that certified IDR entity. Therefore, the Departments propose to amend the process for selecting a certified IDR entity when the parties fail to jointly agree on a certified IDR entity under section 9816(c)(4)(F)(i) of the Code, section 716(c)(4)(F)(i) of ERISA, and section 2799A–1(c)(4)(F)(i) of the PHS Act.

Second, as part of the current operations, the Federal IDR portal automates the process for selecting the certified IDR entity such that the initiating party and the non-initiating party communicate directly through the Federal IDR portal when selecting, agreeing to, or objecting to a certified IDR entity. Therefore, the Departments are notified automatically through the Federal IDR portal if both parties have jointly agreed on a certified IDR entity. Similarly, when the Departments select a certified IDR entity, the disputing parties are notified automatically, provided the selected certified IDR entity attests to having no conflicts of interest. As described in section II.D. of this preamble, if finalized, these proposed rules would collect information regarding the applicability of the Federal IDR process from both parties as part of the proposed notice of IDR initiation and notice of IDR initiation response requirements. Because this information is automated through the Federal IDR portal or would be collected at other points of the IDR initiation process, the Departments propose to amend the notice of certified IDR entity selection requirements of 26 CFR 54.9816–8(c)(1)(iii), 29 CFR 2590.716–8(c)(1)(iii), and 45 CFR 149.510(c)(1)(iii) and establish at 26 CFR 54.9816–8(c)(1)(i)(D), 29 CFR 2590.716–8(c)(1)(i)(D), and 45 CFR

¹⁴⁴ 26 CFR 54.9816–8T(c)(1)(iv), 29 CFR 2590.716–8(c)(1)(iv), and 45 CFR 149.510(c)(1)(iv).

¹⁴⁵ 26 CFR 54.9816–8T(c)(1)(iii)–(iv), 29 CFR 2590.716–8(c)(1)(iii)–(iv), and 45 CFR 149.510(c)(1)(iii)–(iv).

¹⁴⁶ 26 CFR 54.9816–8T(c)(1)(iii)(A)(3), 29 CFR 2590.716–8(c)(1)(iii)(A)(3), and 45 CFR 149.510(c)(1)(iii)(A)(3).

¹⁴⁷ 26 CFR 54.9816–8T(c)(1)(v), 29 CFR 2590.716–8(c)(1)(v), and 45 CFR 149.510(c)(1)(v).

¹⁴³ 87 FR 55991 through 55992.

149.510(c)(1)(i)(D) the mechanism for parties to agree or object and select another alternative preferred certified IDR entity after the non-initiating party submits the notice of IDR initiation response form and before the deadline for parties to jointly select a certified IDR entity, which is within 3 business days after the date of IDR initiation.

Lastly, to provide clarity on the Federal IDR process timeframes, in the *Federal IDR Process Guidance for Certified IDR Entities* and the *Federal IDR Process Guidance for Disputing Parties*, the Departments clarified that the certified IDR entity is “preliminarily” selected until it attests that it does not have a conflict of interest and determines whether the Federal IDR Process is applicable, thereby finalizing the selection.¹⁴⁸ The guidance further clarifies that the certified IDR entities must submit their conflict-of-interest attestation within 3 business days of being contingently selected, and that the parties must submit their offers for an out-of-network payment amount, as specified in 26 CFR 54.9816–8(c)(4)(i), 29 CFR 2590.716–8(c)(4)(i), and 45 CFR 149.510(c)(4)(i) no later than 10 business days after final selection of the certified IDR entity. To provide further clarity and to codify the process and timeframes for selecting a certified IDR entity, the certified IDR entity’s conflict-of-interest review, and the date the certified IDR entity selection is considered finally selected, the Departments propose to amend 26 CFR 54.9816–8(c)(1), 29 CFR 2590.716–8(c)(1), and 45 CFR 149.510(c)(1) to establish a process that includes both preliminary selection of the certified IDR entity and final selection of the certified IDR entity.

i. Preliminary Selection of the Certified IDR Entity

The Departments propose to amend 26 CFR 54.9816–8T(c)(1)(i), 29 CFR 2590.716–8(c)(1)(i), and 45 CFR 149.510(c)(1)(i) to establish the preliminary selection of the certified IDR entity in accordance with the statutory requirement at section 9816(c)(4)(F) of the Code, section 716(c)(4)(F) of ERISA, and section 2799A–1(c)(4)(F) of the PHS Act. Under the process for preliminary selection of the certified IDR entity proposed in these rules, the non-initiating party would be required to agree or object to the preferred certified IDR entity in the notice of IDR initiation response within

3 business days after the date of IDR initiation as discussed in section II.D.2.b of this preamble. Under these proposed rules, if the non-initiating party agrees, or fails to object, to the selection of the initiating party’s preferred certified IDR entity in the notice of IDR initiation response within the 3-business-day timeframe after the date of IDR initiation, the initiating party’s preferred certified IDR entity would be considered jointly selected by the parties on the third business day after the date of IDR initiation. If the non-initiating party objects to the selection of the initiating party’s preferred certified IDR entity by designating an alternative preferred certified IDR entity in the notice of IDR initiation response within the 3-business-day timeframe after the date of IDR initiation, the initiating party would be required to agree or object to the alternative preferred certified IDR entity using the notice of certified IDR entity selection. Under these proposed rules, if the initiating party agrees to the alternative preferred certified IDR entity within 3 business days after the date of IDR initiation, or if the non-initiating party submits the notice of IDR initiation response on or before the second business day after the date of IDR initiation and the initiating party fails to respond within 3 business days after the date of IDR initiation, the alternative preferred certified IDR entity would be considered jointly selected by the parties. If the non-initiating party submits the notice of IDR initiation response on the third business day after the date of IDR initiation and the initiating party does not agree on the same day, the parties would have failed to jointly select a certified IDR entity.

Additionally, these proposed rules would amend the process for the initiating and non-initiating parties to go back-and-forth in selecting and responding to a selection of an alternative preferred certified IDR entity after the non-initiating party submits a notice of IDR initiation response within the 3-business-day period after IDR initiation. Specifically, if a certified IDR entity is not jointly selected because the initiating party submits a notice of certified IDR entity selection objecting to the non-initiating party’s alternative preferred certified IDR entity reflected in the notice of IDR initiation response, the non-initiating party may agree to the alternative preferred certified IDR entity selected in the initiating party’s notice of certified IDR entity selection or select another alternative preferred certified IDR entity by submitting a notice of certified IDR entity selection to the initiating party and to the Departments.

This back-and-forth may continue until the earlier of the date that the parties agree on an alternative preferred certified IDR entity or the deadline for joint selection, which is 3 business days after the date of IDR initiation. However, if either the notice of IDR initiation response or the notice of certified IDR entity selection is submitted on the third business day after the date of IDR initiation, the party last in receipt of the applicable notice would not be allowed to select another alternative preferred certified IDR entity, as discussed later in this section of the preamble. Once a party submits a notice of certified IDR entity selection, it may not submit another notice of IDR entity selection until after it receives a responding notice of certified IDR entity selection from the other party.

If a party submits a notice of certified IDR entity selection to the other party on the first or second day after the date of IDR initiation and the party in receipt of the notice agrees or fails to object to the alternative preferred certified IDR entity by the third business day after the date of IDR initiation, the alternative preferred certified IDR entity would be considered jointly selected by the parties. If a party submits a notice of certified IDR entity selection to the other party on the third business day after the date of IDR initiation and the party last in receipt of the notice agrees to the alternative preferred certified IDR entity on the same day, the alternative preferred certified IDR entity will be considered jointly selected by the parties. If a party submits a notice of certified IDR entity selection to the other party on the third business day after the date of IDR initiation and the party last in receipt of the notice does not agree to the alternative preferred certified IDR entity on the same day, the parties would have failed to jointly select a certified IDR entity.

Under these proposed rules at 26 CFR 54.9816–8(c)(1)(i)(D), 29 CFR 2590.716–8(c)(1)(i)(D), and 45 CFR 149.510(c)(1)(i)(D), to notify the Departments and the other party of any subsequent agreement or objection to an alternative preferred certified IDR entity after the non-initiating party submits the notice of IDR initiation response, a party must submit a notice of certified IDR entity selection. The party must furnish the notice of certified IDR entity selection using the standard form developed by the Departments through the Federal IDR portal within 3 business days after the date of IDR initiation.

The Departments propose to amend the existing content of the notice of certified IDR entity selection and specify that the notice must include a

¹⁴⁸ See <https://www.cms.gov/files/document/federal-idr-guidance-idr-entities-march-2023.pdf> and <https://www.cms.gov/files/document/federal-idr-guidance-disputing-parties-march-2023.pdf>.

statement indicating the party's agreement with or objection to the other party's alternative preferred certified IDR entity and, if applicable, an explanation of any conflict of interest with the other party's alternative preferred certified IDR entity. If the party in receipt of a notice of certified IDR entity selection objects to the other party's alternative preferred certified IDR entity and the party submits a notice of certified IDR entity selection by the end of the third business day after the date of IDR initiation, that party's notice of certified IDR entity selection reflecting the objection must include the name of another alternative preferred certified IDR entity.

The Departments propose to amend 26 CFR 54.9816–8(c)(1)(iv), 29 CFR 2590.716–8(c)(1)(iv), and 45 CFR 149.510(c)(1)(iv), which describe the certified IDR entity selection process when the disputing parties fail to jointly select a certified IDR entity, and redesignate the paragraphs as amended 26 CFR 54.9816–8(c)(1)(ii), 29 CFR 2590.716–8(c)(1)(ii), and 45 CFR 149.510(c)(1)(ii). If the parties fail to jointly select a certified IDR entity within 3 business days after the date of IDR initiation, the Departments would select a certified IDR entity. The parties would have failed to jointly select a certified IDR entity if, by the end of the third business day after the date of IDR initiation, the party last in receipt of the notice of IDR initiation response or the notice of certified IDR entity selection has objected to the other party's alternative preferred certified IDR entity, or if the notice of IDR initiation response or the notice of certified IDR entity selection is submitted to the other party on the third business day after the date of IDR initiation and the party in receipt of the notice does not agree to the alternative preferred certified IDR entity within 3 business days after the date of IDR initiation.

As part of the Departments' process to select a certified IDR entity when the parties do not jointly select one,¹⁴⁹ under these proposed rules, the Departments would first confirm whether a party submitted the notice of IDR initiation response or notice of certified IDR entity selection with an alternative preferred certified IDR entity on the third business day after the date of IDR initiation without the other party's agreement to the selection. If either notice was provided on the third business day after the date of IDR initiation without the other party's

agreement to the alternative preferred certified IDR entity by the end of third business day after the date of IDR initiation, the Departments would provide the party last in receipt of the applicable notice 2 additional business days to either agree or object to the other party's alternative preferred certified IDR entity selection. In these circumstances, under these proposed rules, if a party last in receipt of the notice of IDR initiation response or the notice of certified IDR entity selection agrees with the other party's alternative preferred certified IDR entity and notifies the Departments of the agreement or fails to notify the Departments of its objection in the Federal IDR portal by the fifth business day after the date of IDR initiation, the Departments would select the final alternative preferred certified IDR entity selected in the applicable notice. In disputes where the applicable notice was submitted on the third business day after the date of IDR initiation, the party last in receipt of the notice would not be allowed to select another alternative preferred certified IDR entity. If the party last in receipt of the notice notifies the Departments of its objection to the alternative preferred certified IDR entity by the fifth business day after the date of IDR initiation, the Departments would proceed with the random selection of the certified IDR entity from among the certified IDR entities (other than the preferred certified IDR entity and any alternative preferred certified IDR entity previously selected in such dispute by a party, unless there is no other certified IDR entity available to select) that charge a fee within the allowed range of certified IDR entity fees on the sixth business day after the date of IDR initiation. If there are insufficient certified IDR entities that charge a fee within the allowed range of certified IDR entity fees available to arbitrate the dispute, the Departments would select a certified IDR entity that has received approval, as described in paragraph 26 CFR 54.9816–8T(e)(2)(vii)(B), 29 CFR 2590.716–8(e)(2)(vii)(B), and 45 CFR 149.510(e)(2)(vii)(B), to charge a fee outside of the allowed range of certified IDR entity fees. In either case, the Departments would notify the parties of the preliminarily selected certified IDR entity not later than 6 business days after the date of IDR initiation. The Departments are of the view that this proposed requirement would give each party a reasonable opportunity to review the other party's alternative preferred selected certified IDR entity and to notify the other party and the

Departments whether the party agrees or disagrees with the selection. Consistent with section 9816(c)(4)(F) of the Code, section 716(c)(4)(F) of ERISA, and section 2799A–1(c)(4)(F) of the PHS Act, these requirements would ensure that the certified IDR entity selection timeframe occurs within 6 business days after the date of Federal IDR initiation, when the parties do not jointly select the certified IDR entity.

The Departments also propose to amend 26 CFR 54.9816–8T(c)(1)(iii), 29 CFR 2590.716–8(c)(1)(iii), and 45 CFR 149.510(c)(1)(iii) to provide that the date of preliminary selection of the certified IDR entity is 3 business days after the date of IDR initiation if the parties jointly selected a certified IDR entity, or 6 business days after the date of IDR initiation if the parties fail to jointly select a certified IDR entity and the Departments instead select the certified IDR entity.

The Departments seek comment on these proposals.

ii. Final Selection of the Certified IDR Entity and Certified IDR Entity Conflict-of-Interest Review

The Departments propose to add 26 CFR 54.9816–8(c)(1)(iv), 29 CFR 2590.716–8(c)(1)(iv), and 45 CFR 149.510(c)(1)(iv) to establish the process for finalizing certified IDR entity selection. Under the proposed rules, the date of final selection of the certified IDR entity would be the date that triggers the timeframes for the requirement to issue payment determinations (not later than 30 business days after the date of final selection of the certified IDR entity) and the submission of offers from both parties (not later than 10 business days after the date of final selection of the certified IDR entity) under section 9816(c)(5)(A) and (B) of the Code, section 716(c)(5)(A) and (B) of ERISA, and section 2799A–1(c)(5)(A) and (B) of the PHS Act.

The statute provides that a certified IDR entity must meet certain conflict-of-interest standards before being selected as a certified IDR entity assigned to make a payment determination. However, the statute is silent on the specific timeframe or process for the selected certified IDR entity to review the parties' (or the Departments') selection to ensure that a conflict of interest does not exist. Based on feedback from interested parties and the Departments' experience with implementation of the Federal IDR process, the Departments are of the view that it is important to implement a timeframe that permits a meaningful opportunity for conflict-of-interest

¹⁴⁹ Section 9816(c)(4)(F)(ii) of the Code, section 716(c)(4)(F)(ii) of ERISA, and section 2799A–1(c)(4)(F)(ii) of the PHS Act.

review by the certified IDR entity while ensuring that it does not limit the time periods for either disputing parties to submit their offers or for the certified IDR entity to make a payment determination. To streamline this process, the Departments are of the view that permitting the certified IDR entity to be considered preliminarily selected until the certified IDR entity confirms that it has no conflict of interest with either party, would increase the efficiency of the process while balancing the need to ensure that certified IDR entities are free of conflict.

After the certified IDR entity is preliminarily selected pursuant to 26 CFR 54.9816–8(c)(1)(iii), 29 CFR 2590.716–8(c)(1)(iii), and 45 CFR 149.510(c)(1)(iii), the Departments propose that the preliminarily selected certified IDR entity would review the selection and attest to the Departments whether it meets the conflict-of-interest requirements as outlined in proposed 26 CFR 54.9816–8(c)(1)(iv)(A)(1) through (3), 29 CFR 2590.716–8(c)(1)(iv)(A)(1) through (3), and 45 CFR 149.510(c)(1)(iv)(A)(1) through (3). The Departments are not proposing new conflict-of-interest requirements, however, the Departments are proposing to make non-substantive amendments to improve clarity and align with the structure of the reorganized provisions as follows: (1) the certified IDR entity does not have a conflict of interest as defined in paragraphs 26 CFR 54.9816–8(a)(2)(iv), 29 CFR 2590.716–8(a)(2)(iv), and 45 CFR 149.510(a)(2)(iv); (2) the certified IDR entity will only assign personnel to a dispute and make decisions regarding hiring, compensation, termination, promotion, or other similar matters related to personnel assigned to the dispute in a manner that is not based upon the likelihood that the assigned personnel will support a particular party to the dispute; and (3) the certified IDR entity will not assign any personnel to a dispute who would have any conflicts of interest, as defined in paragraphs 26 CFR 54.9816–8(a)(2)(iv), 29 CFR 2590.716–8(a)(2)(iv), and 45 CFR 149.510(a)(2)(iv), regarding any party to the dispute or whose relationship with a party within the 1 year immediately preceding the assignment to the dispute would violate the restrictions on aiding or advising a former employer or principal in a manner similar to the restrictions set forth in 18 U.S.C. 207(b).

Under 26 CFR 54.9816–8(c)(1)(iv)(B), 29 CFR 2590.716–8(c)(1)(iv)(B), and 45 CFR 149.510(c)(1)(iv)(B), the Departments also propose that if the certified IDR entity notifies the Departments within 3 business days of

the date of preliminary selection of the certified IDR entity that it does not meet the conflict-of-interest requirements or does not respond within 3 business days after the date of preliminary selection of the certified IDR entity, the Departments would randomly select another certified IDR entity. The Departments would notify the parties of the new randomly preliminarily selected certified IDR entity no later than 1 business day after the previously selected certified IDR entity notifies the Departments that it has a conflict of interest, or if the previously selected certified IDR entity fails to respond within 3 business days after the date of preliminary selection of the certified IDR entity, no later than 1 business day after the end of the 3-business-day period.

These proposed rules would streamline the process for certified IDR entity selection when the preliminarily selected certified IDR entity fails to timely respond or notifies the Departments that it cannot meet the conflict-of-interest requirements in proposed 26 CFR 54.9816–8(c)(1)(iv)(A), 29 CFR 2590.716–8(c)(1)(iv)(A), and 45 CFR 149.510(c)(1)(iv)(A). Under the October 2021 interim final rules, when a selected certified IDR entity is unable to attest that it has no conflict of interest within 3 business days of certified IDR entity selection, the parties to the dispute are given another opportunity to jointly agree on a certified IDR entity, and the end of the 3-business-day period is treated as the date of initiation of the Federal IDR process. Under these proposed rules, when a preliminarily selected certified IDR entity provides notice of a conflict of interest, the Departments would select another certified IDR entity through random selection, as opposed to allowing the parties additional opportunities to jointly select a different certified IDR entity, in order to create operational efficiencies and minimize delays in processing disputes. Additionally, if the certified IDR entity does not respond to the conflict-of-interest review by the end of the 3-business-day period after preliminary selection of the certified IDR entity, the Departments would randomly select another certified IDR entity. If a certified IDR entity cannot review and provide a response related to a conflict of interest within a 3-business-day period, the dispute would move to a different certified IDR entity that may have the capacity to review the dispute in a timelier manner, which would improve the overall timeliness of dispute processing.

Under 26 CFR 54.9816–8(c)(1)(iv)(C), 29 CFR 2590.716–8(c)(1)(iv)(C), and 45 CFR 149.510(c)(1)(iv)(C) of these

proposed rules, if the certified IDR entity that has been preliminarily selected attests within 3 business days that it meets the conflict-of-interest requirements, the Departments would notify the parties of the final selection of that certified IDR entity no later than 1 business day after the certified IDR entity attests that it meets the conflict-of-interest requirements. The date of final selection of the certified IDR entity is the date that the Departments provide this notice to the parties.

Lastly, the Departments also propose to remove 26 CFR 54.9816–8T(c)(1)(v), 29 CFR 2590.716–8(c)(1)(v), and 45 CFR 149.510(c)(1)(v), as these requirements regarding certified IDR entity conflict of interest and Federal IDR process eligibility review would be required under the paragraphs at 26 CFR 9816–8(c)(1)(iv)(A), 29 CFR 2590.716–8(c)(1)(iv)(A), and 45 CFR 149.510(c)(1)(iv)(A) and 26 CFR 9816–8(c)(2), 29 CFR 2590.716–8(c)(2), and 45 CFR 149.510(c)(2), respectively.

The Departments seek comment on these proposals.

b. Federal IDR Process Eligibility Review

i. Federal IDR Process Eligibility Determination by Certified IDR Entity

The No Surprises Act does not specify a timeframe or process for which the Departments or certified IDR entities must assess a dispute's eligibility for the Federal IDR process. Under the October 2021 interim final rules, certified IDR entities are required to review the information in the notice of IDR initiation and notice of certified IDR entity selection to determine whether the Federal IDR process applies and if not, to notify the Departments within 3 business days of making that determination.¹⁵⁰ The Departments further clarified in the *Federal IDR Process Guidance for Certified IDR Entities*¹⁵¹ that certified IDR entities must make this eligibility determination within 3 business days after they are selected, which is before the parties must submit an offer of an out-of-network rate (not later than 10 business days after the date of selection of the certified IDR entity) and before the certified IDR entity must make a

¹⁵⁰ 26 CFR 54.9816–8T(c)(1)(v), 29 CFR 2590.716–8(c)(1)(v), and 45 CFR 149.510(c)(1)(v).

¹⁵¹ U.S. Department of Health and Human Services, U.S. Department of Labor, and U.S. Department of the Treasury. (Oct. 2022). *Federal Independent Dispute Resolution (IDR) Process Guidance for Certified IDR Entities*. <https://www.cms.gov/CCIIO/Resources/Regulations-and-Guidance/Downloads/Federal-Independent-Dispute-Resolution-Process-Guidance-for-Certified-IDR-Entities.pdf>.

payment determination (30 business days after the date of selection of the certified IDR entity).

To provide certified IDR entities additional time to conduct eligibility reviews before the parties must submit their offers, the Departments propose to remove 26 CFR 54.9816–8T(c)(1)(v), 29 CFR 2590.716–8(c)(1)(v), and 45 CFR 149.510(c)(1)(v), and add proposed 26 CFR 54.9816–8(c)(2)(i), 29 CFR 2590.716–8(c)(2)(i), and 45 CFR 149.510(c)(2)(i), which would allow certified IDR entities 5 business days after the date of final selection of the certified IDR entity to make an eligibility determination. Under these proposed rules, unless the departmental eligibility review described in section II.E.1.b.ii. of this preamble applies, the selected certified IDR entity would be required to review the information in the notice of IDR initiation, the notice of IDR initiation response, and any additional information as discussed in proposed 26 CFR 54.9816–8(c)(2)(iii), 29 CFR 2590.716–8(c)(2)(iii), and 45 CFR 149.510(c)(2)(iii), and make a final determination as to whether the item or service is a qualified IDR item or service that is eligible for the Federal IDR process. The certified IDR entity would be required to make this eligibility determination and notify the Departments and both parties no later than 5 business days after the date of final selection of the certified IDR entity. If the certified IDR entity determines that the item or service is not a qualified IDR item or service, the dispute would be closed, and the selected certified IDR entity would not take any action with regard to the dispute.

The Departments propose to provide 2 additional business days for certified IDR entities to review the notices and make an eligibility determination. This proposal would provide additional time while meeting the statutory requirement that the submission of offers be submitted no later than 10 days after the date of certified IDR entity selection.¹⁵² More specifically, under these proposed rules, the certified IDR entity would be required to determine whether a dispute was eligible for the Federal IDR process not later than 5 business days after the date of final selection of the certified IDR entity and if eligible, the parties to the dispute would be required to submit their offers not later than 10 business days after the final selection of the certified IDR entity (which would be at least 5 business days after the eligibility

determination). Although currently eligibility reviews are generally taking certified IDR entities longer than 5 business days, these proposed rules are intended to facilitate more efficient processing of eligibility reviews, and the Departments therefore expect that 5 business days would be sufficient for this purpose if these proposed rules are finalized. Further, these proposed rules intend to balance the time certified IDR entities have to conduct eligibility reviews with the time parties are given to submit their final offers. Because the No Surprises Act provides only 10 days from the date of certified IDR entity selection for the parties to submit their offers, these proposed rules would provide equal time for eligibility review and for the parties to submit their offers after the eligibility review.

A non-initiating party's attestation that a dispute is ineligible for the Federal IDR process, alone, would be insufficient to substantiate a determination of ineligibility. The certified IDR entity (or the Departments, if conducting eligibility reviews as described in section II.E.1.b.ii. of this preamble) would review disputes for eligibility in all instances.

The Departments seek comment on these proposals, including the appropriate amount of time certified IDR entities should be provided to conduct eligibility reviews.

ii. Departmental Eligibility Review for Federal IDR Process Eligibility Determinations

Even if the proposals in these proposed rules are finalized and the intended results of a more efficient eligibility review process and fewer ineligible initiated disputes are realized, circumstances may still arise where the Departments would need to take actions to facilitate more timely dispute processing, such as when the volume of disputes outpaces the capacity of certified IDR entities to timely process eligibility determinations. To address such circumstances, and provide for such flexibility, the Departments propose adding 26 CFR 54.9816–8(c)(2)(ii), 29 CFR 2590.716–8(c)(2)(ii), and 45 CFR 149.510(c)(2)(ii), which would establish an eligibility review process whereby, when the conditions set forth in 26 CFR 54.9816–8(c)(2)(ii)(A), 29 CFR 2590.716–8(c)(2)(ii)(A), and 45 CFR 149.510(c)(2)(ii)(A) are met, as described in section II.E.1.b.ii. of this preamble, the Departments would conduct the eligibility review and make the eligibility determination on behalf of the certified IDR entity (departmental eligibility review).

Under these proposed rules, if the Departments determine that an item or service is not a qualified IDR item or service, the dispute would be closed, and the preliminarily selected certified IDR entity would not take any action regarding the dispute. If the dispute were found to be eligible, the Departments would inform the preliminarily selected certified IDR entity of eligibility so that it may conduct its conflict-of-interest assessment, and the dispute would otherwise continue through the Federal IDR process, including notification of the eligibility determination to the disputing parties by the preliminarily selected certified IDR entity.

From the disputing parties' perspectives, Federal IDR process operations during departmental eligibility reviews would largely be unchanged. Timeframes and processes to initiate the Federal IDR process, conduct certified IDR entity selection, and submit offers would be the same. The noticeable differences for disputing parties would be that correspondence related to a dispute's eligibility, including any related information requests, would come from the Departments, rather than one of the certified IDR entities, and the potential impact departmental eligibility reviews may have on the administrative fee as outlined in section II.E.3.a. of this preamble. Additionally, depending on dispute volume and other factors impacting the Departments' decision to conduct eligibility reviews, the Departments may choose to exercise their authority to extend time periods for extenuating circumstances as discussed in section II.E.5. of this preamble to allow more time for the Departments to conduct eligibility reviews. This proposed approach is similar to what is currently occurring under the technical assistance provided to certified IDR entities that was announced in November 2022.¹⁵³ The principal difference is that under these proposed rules, when departmental eligibility review is in effect, the Departments would be able to close a case after determining it is ineligible, rather than forwarding the Departments' eligibility recommendation to the certified IDR entity to make the final eligibility determination.

For certified IDR entities, the Federal IDR process operations under the proposed departmental eligibility reviews would also function similarly to current operations except that, to

¹⁵² Section 9816(c)(5)(B) of the Code, section 716(c)(4)(B) of ERISA, and section 2799A–1(c)(4)(B) of the PHS Act.

¹⁵³ See <https://www.cms.gov/files/document/idre-eligibility-support-guidance-11212022-final-updated.pdf>.

prevent certified IDR entities from conducting duplicative eligibility screenings, a certified IDR entity would not be notified of their selection for the purposes of their conflict-of-interest review until after eligibility has been determined by the Departments. The Departments are proposing the departmental eligibility review under certain circumstances to relieve the burden on certified IDR entities and to ensure that they can focus their time and resources on payment determinations in accordance with statutory timeframes. For the reasons discussed in section I.H. of this preamble, eligibility determinations have proven to be complex and time-consuming for certified IDR entities, and certified IDR entities are not compensated for the time and effort expended in assessing dispute eligibility when a dispute is determined ineligible for the Federal IDR process. This is because the statute provides that certified IDR entities may only retain their fees from the non-prevailing party to a dispute (unless the dispute is withdrawn or settled as discussed in section II.E.1.d. of this preamble). Moreover, some certified IDR entities have been unable to accept new disputes because they are overburdened with making eligibility determinations. Certified IDR entities have informally reported to the Departments during regular communications that they spend 50–80 percent of their time on making eligibility determinations and a few certified IDR entities have had to temporarily suspend accepting new disputes to manage their backlogs. When they are focused on eligibility challenges, certified IDR entities have less time and fewer resources to devote to making timely payment determinations.

Ultimately, the certified IDR entities' participation in the Federal IDR process is voluntary and must be financially sustainable. Furthermore, the No Surprises Act directs the Departments to administer the Federal IDR process in a manner that ensures participation by a sufficient number of certified IDR entities.¹⁵⁴ If certified IDR entities decline to participate because it is not economically viable to do so, the directive of the statute is defeated. Thus, the ability for certified IDR entities to obtain fair compensation for the work conducted is critical to the success of the Federal IDR process, and the Departments are therefore of the view that it is in the best interests of all

parties to reduce the burden of eligibility determinations when feasible.

The Departments intend for their role in conducting eligibility determinations to be temporary. The Departments are of the view that when eligibility determinations are less burdensome and the volume of disputes is manageable, certified IDR entities are better equipped to conduct eligibility determinations. Further, the Departments do not possess the staff or resources to carry out the eligibility determinations in the long term and must retain contract support to carry out the eligibility determinations in the short term. The Departments acknowledge that any increased expenditures related to conducting final eligibility determinations would be reflected in the non-refundable Federal IDR administrative fees because these fees must reflect the amount of expenditures estimated to be made by the Departments for the year in carrying out the Federal IDR process.¹⁵⁵ Therefore, the Departments would not intend to continue this role if the other proposed policies in these rules, along with ongoing Federal IDR portal improvements, are successful in improving dispute processing and reducing the volume of ineligible disputes.

iii. Application of the Departmental Eligibility Review

The departmental eligibility review would apply when the Departments determine that extenuating circumstances under proposed 26 CFR 54.9816–8(g)(1), 29 CFR 2590.716–8(g)(1), and 45 CFR 149.510(g)(1) require application of the departmental eligibility review to facilitate timely payment determinations or the effective processing of disputes under the Federal IDR process.

iv. Notification Regarding Applicability of the Departmental Eligibility Review

Before invoking the application of the departmental eligibility review, the Departments propose to post advance public notification of the date on which the departmental eligibility review would take effect, and the reasons for invoking the application of the departmental eligibility review. Before ending the application of the departmental eligibility review, the Secretary will post advance public notification of the date on which the departmental eligibility review would no longer be in effect and the reasons for ending the application of the

departmental eligibility review, as applicable.

The Departments seek comment on these proposals, including whether the departmental eligibility reviews, when they are applicable, should be applied to all certified IDR entities or if the Departments should apply these proposed rules to only the certified IDR entities with significant dispute backlogs.

c. Request for Additional Information

Based on the Departments' experience operating the Federal IDR process, disputing parties have not consistently submitted all information necessary for a certified IDR entity to make an eligibility determination, a conflict-of-interest assessment, or a payment determination. Certified IDR entities frequently must reach out to the disputing parties, sometimes multiple times, to obtain the required information. Such outreach is time intensive, inefficient, and costly. Even as the Departments propose other methods to promote information submission by disputing parties throughout the Federal IDR process (as described throughout this preamble), certified IDR entities and the Departments likely will still need to collect additional information to make accurate determinations in a timely fashion. Thus, using the general rulemaking authority granted to the Departments to establish the Federal IDR process under section 9816(c)(2)(A) of the Code, section 716(c)(2)(A) of ERISA, and section 2799A–1(c)(2)(A) of the PHS Act, the Departments are proposing in new 26 CFR 54.9816–8(c)(2)(iii), 29 CFR 2590.716–8(c)(2)(iii), and 45 CFR 149.510(c)(2)(iii) to establish that the Departments and the certified IDR entity may request additional information from either party to a dispute at any time, including for the purpose of assessing whether a conflict of interest exists, conducting an eligibility determination, or making a payment determination. Under this proposal, a party must submit the requested additional information within 5 business days to the Departments or the selected certified IDR entity, as applicable, through the Federal IDR portal. Following a request for additional information, under these proposed rules, the time period for the applicable stage of the Federal IDR process would be tolled until the earlier of the date either all of the requested information is provided or the 5-business-day period expires, and each subsequent timeframe in the Federal IDR process would be determined based on the date of completion of the stage

¹⁵⁴ Section 9816(c)(4)(E) of the Code, section 716(c)(4)(E) of ERISA, and section 2799A–1(c)(4)(E) of the PHS Act.

¹⁵⁵ Section 9816(c)(8) of the Code, section 716(c)(8) of ERISA, and section 2799A–1(c)(8) of the PHS Act. *Also see* IDR Process Fees proposed rules at 88 FR 65893 (Sept. 26, 2023).

of the Federal IDR process that was tolled for provision of the requested information.

However, under the statute, the timeframe for parties making payment after the payment determination cannot be extended. Therefore, payments required as a result of a payment determination must be provided within 30 calendar days of that payment determination. If a party fails to submit the additional information as required, the related determination, including the eligibility determination, conflict-of-interest review, or payment determination will be made without the requested information unless a good-cause extension of the 5-business-day period, as specified in 26 CFR 54.9816–8(g)(1)(i), 29 CFR 2590.716–8(g)(1)(i), and 45 CFR 149.510(g)(1)(i) has been provided, and the party subsequently submits the additional information requested within the extended period.

The Departments are of the view that a 5-business-day period is sufficient for a response without unduly delaying the Federal IDR process. This 5-business-day period is consistent with the 5-business-day outreach period set forth in the *August 2022 Technical Assistance for Certified IDR Entities*.¹⁵⁶ The Departments anticipate that this deadline would incentivize parties to submit information promptly, and that tolling any applicable time periods would give the Departments and certified IDR entities sufficient time to make such additional information requests without encroaching on other timeframes.

The Departments seek comment on these proposals, including whether certified IDR entities should still be required to make a payment determination and provide notification of the payment determination to the parties not later than 30 business days after the date of final selection of the certified IDR entity, after a preceding timeframe in the process has been tolled, such as for an eligibility determination.

d. Authority To Continue Negotiations or Withdraw

i. Authority To Continue To Negotiate

To correct an omission, HHS is proposing a non-substantive change to 45 CFR 149.510(c)(3)(i) to add the term “enrollee” to references to participants

and beneficiaries. HHS is proposing to add the term “enrollee” to account for individuals who are enrolled in the individual health insurance market when referencing whose cost sharing must be considered as part of the total out-of-network rate agreed upon by both parties and to clarify who may not be billed for additional payments if the agreed upon out-of-network rate exceeds the QPA.

ii. Withdrawals

The Departments propose to add 26 CFR 54.9816–8(c)(3)(ii), 29 CFR 2590.716–8(c)(3)(ii), and 45 CFR 149.510(c)(3)(ii) to establish a process for disputes to be withdrawn from the Federal IDR process. Under these proposed rules, a dispute may be withdrawn from the Federal IDR process by the initiating party, the Departments, or the certified IDR entity before a payment determination is made if any one of the following four conditions is met. Under the proposed new 26 CFR 54.9816–8(c)(3)(ii)(A), 29 CFR 2590.716–8(c)(3)(ii)(A), and 45 CFR 149.510(c)(3)(ii)(A), the first condition would allow for withdrawal when the initiating party provides notification through the Federal IDR portal to the Departments and the certified IDR entity (if selected) that both parties to the dispute agree to withdraw the dispute from the Federal IDR process without agreement on an out-of-network rate. An initiating party generally should not be able to unilaterally withdraw a dispute once it is initiated because the non-initiating party may not wish to withdraw the dispute. Therefore, under these proposed rules, the notification must include the dispute number, a statement about both parties’ agreement to withdraw and authorized signatures from both parties. A withdrawal that is agreed to by both parties would remove disputes from the system in the most efficient manner without the need for additional outreach.

The Departments also propose to add 26 CFR 54.9816–8(c)(3)(ii)(B), 29 CFR 2590.716–8(c)(3)(ii)(B), and 45 CFR 149.510(c)(3)(ii)(B), to allow for withdrawal when the initiating party provides a standard withdrawal request notice through the Federal IDR portal to the Departments, the certified IDR entity (if selected), and the non-initiating party of its request to withdraw the dispute from the Federal IDR process, and the non-initiating party notifies the Departments, certified IDR entity (if selected), and the initiating party through the Federal IDR portal of its agreement to withdraw from the Federal IDR process within 5 business days of the initiating party’s request. If the non-

initiating party fails to respond within 5 business days of the initiating party’s request, the non-initiating party would be considered to have agreed to the withdrawal, and the dispute would be withdrawn. The Departments propose adding withdrawal of a dispute in this situation to address circumstances in which the non-initiating party fails to respond because they are not engaging in the process. Permitting withdrawal of a dispute in such cases would decrease the number of payment determinations the certified IDR entity is required to adjudicate. These proposals strike a balance between fairness to the disputing parties and efficiency of the Federal IDR process by generally requiring mutual agreement by the disputing parties to withdraw the dispute but providing that the dispute would be withdrawn in the event the non-initiating party is nonresponsive within the specified timeframe.

Under proposed new 26 CFR 54.9816–8(c)(3)(ii)(C), 29 CFR 2590.716–8(c)(3)(ii)(C), and 45 CFR 149.510(c)(3)(ii)(C), the third condition under which a dispute may be withdrawn is when a certified IDR entity or the Departments cannot determine eligibility because both parties are unresponsive to a request for additional information as described in proposed 26 CFR 54.9816–8(c)(2)(iii), 29 CFR 2590.716–8(c)(2)(iii) and 45 CFR 149.510(c)(2)(iii). In situations where neither party responds to the requested information, the Departments believe it appropriate for the dispute to be withdrawn because the certified IDR entity lacks the appropriate information to make the required eligibility determination properly and the parties are failing to engage in the process.

Under proposed new 26 CFR 54.9816–8(c)(3)(ii)(D), 29 CFR 2590.716–8(c)(3)(ii)(D), and 45 CFR 149.510(c)(3)(ii)(D), the fourth condition under which a dispute may be withdrawn is when the certified IDR entity cannot make a payment determination because both parties have failed to submit an offer as described in proposed 26 CFR 54.9816–8(c)(5)(i), 29 CFR 2590.716–8(c)(5)(i) and 45 CFR 149.510(c)(5)(i). The Departments are of the view that such disputes should be withdrawn from the Federal IDR process because under the statute, parties have ceased to participate in the Federal IDR process and failed to submit an offer that the certified IDR entity must select as the out-of-network payment amount. In addition, if neither party has submitted an offer, there is nothing from

¹⁵⁶ U.S. Department of Health and Human Services, U.S. Department of Labor, and U.S. Department of the Treasury. (Oct. 2022) (Federal Independent Dispute Resolution (IDR) Process Technical Assistance for Certified IDR Entities. August 2022, available at: <https://www.cms.gov/files/document/TA-certified-independent-dispute-resolution-entities-August-2022.pdf>.

which the certified IDR entity may select.¹⁵⁷

In addition to the proposals described in this section of the preamble, the Departments also propose technical revisions to the existing requirements for the authority to continue negotiations, which are currently set forth at 26 CFR 54.9816–8T(c)(2), 29 CFR 2590.716–8(c)(2), and 45 CFR 149.510(c)(2). These proposed rules would redesignate paragraph (c)(2) as (c)(3) and amend the title at current paragraph (c)(2) by adding to the end of it “or withdraw”.

The Departments seek comment on these proposals, including if there are other circumstances for which the Departments should consider a dispute withdrawn.

2. Treatment of Batched Items and Services and Bundled Payment Arrangements

The Departments propose revisions to the requirements for the treatment of batched items and services which are currently set forth at 26 CFR 54.9816–8T(c)(3)(i), 29 CFR 2590.716–8(c)(3)(i), and 45 CFR 149.510(c)(3)(i). However, as discussed in section I.D. of this preamble, the requirements at 26 CFR 54.9816–8T(c)(3)(i)(C), 29 CFR 2590.716–8(c)(3)(i)(C), and 45 CFR 149.510(c)(3)(i)(C) have been vacated by the District Court in *TMA IV* order. The Departments also propose technical changes to the treatment of bundled payment arrangements, currently set forth at 26 CFR 54.9816–8T(c)(3)(ii), 29 CFR 2590.716–8(c)(3)(ii), and 45 CFR 149.510(c)(3)(ii). The batching and bundling payment proposals are informed by the Departments’ experience implementing the regulatory requirements on the batching of items and services related to the treatment of a similar condition and relevant feedback from interested parties, including comments submitted in response to the October 2021 interim final rules.

a. Treatment of Batched Items and Services and Bundled Payment Arrangements Under Current and Vacated Rules

Under the October 2021 interim final rules, multiple qualified IDR items and services were required to meet four conditions to be batched and considered as part of a single payment determination. First, the qualified IDR items and services must be billed by the same provider or group of providers, the

same facility, or same provider of air ambulance services, which means the items and services must be billed under the same NPI or TIN.

Second, the initial payment (or notice of denial of payment) for the items and services must be made by the same group health plan or health insurance issuer. The Departments clarified in *August 2022 Technical Assistance for Certified IDR Entities* that qualified IDR items or services can be batched if payment is made by the same issuer even if the qualified IDR items and services relate to claims from different fully-insured group or individual health plan coverage offered by the issuer; and that for self-insured group health plans, qualified IDR items or services can be batched only if payment is made by the same plan, even if the same TPA administers multiple self-insured plans.

Third, the October 2021 interim final rules established that qualified IDR items and services were related to the treatment of a similar condition if the qualified IDR items and services were the same or similar items or services, meaning that those items and services are billed under the same service code with modifiers (if applicable), or billed under a comparable service code with modifiers (if applicable) under a different procedural code system.¹⁵⁸ However, as discussed in section I.D. of this preamble, on August 3, 2023, the District Court vacated this provision on the grounds that it violated the notice-and-comment requirement of the Administrative Procedure Act. The *TMA IV* order vacated the parts of the *August 2022 Technical Assistance for Certified IDR Entities* that stated that multiple qualified IDR items or services may be batched in a single dispute if the qualified IDR items or services were billed under the same service code with modifiers, or billed under comparable codes with modifiers under different procedural code systems. Further, as discussed in section I.D. of this preamble, on August 24, 2023, the District Court vacated that portion of the *August 2022 Technical Assistance for Certified IDR Entities* on the basis that the guidance prohibits a single air ambulance transport, which is billed under two service codes (one for the base rate and one for the mileage rate), to be submitted as a single dispute, and instead required two separate disputes

to be submitted. The District Court vacated this provision as a violation of the statute which defines each air ambulance transport as a single service.¹⁵⁹

Fourth, all the qualified IDR items and services must have been furnished within the same 30-business-day period or the 90-calendar-day suspension period (also referred to as the “cooling-off period”) under 26 CFR 54.9816–8T(c)(5)(vii)(B), 29 CFR 2590.716–8(c)(5)(vii)(B), and 45 CFR 149.510(c)(5)(vii)(B).¹⁶⁰ As stated in the preamble to the October 2021 interim final rules, for claims for an item or service for which the end of the open negotiation period occurs during the 90-calendar-day suspension period, after the end of the 90-calendar-day suspension period, either party may initiate the Federal IDR process for any item or service affected by the suspension. For these items or services, the initiating party must submit the notice of IDR initiation within 30 business days following the end of the 90-calendar-day suspension period, as opposed to the standard 4-business-day period following the end of the open negotiation period. The 30-business-day period begins on the day after the last day of the 90-calendar-day suspension period.

Section 9816(c)(3)(B) of the Code, section 716(c)(3)(B) of ERISA, and section 2799A–1(c)(3)(B) of the PHS Act direct the Departments, as part of specifying criteria for batched disputes, to provide that qualified IDR items and services included by a provider or facility as part of a bundled payment may be part of a single determination. The October 2021 interim final rules specify that items and services may be submitted as a bundled payment arrangement when qualified IDR items and services are billed by a provider, facility, or provider of air ambulance services as part of a bundled payment arrangement, or where a plan or issuer makes or denies an initial payment as a bundled payment. The *August 2022 Technical Assistance for Certified IDR Entities* clarified that for the purposes of the Federal IDR process, a bundled arrangement is an arrangement under which: (1) a provider, facility, or provider of air ambulance services bills

¹⁵⁹ 42 U.S.C. 300gg–112(b)(1)(B), (c)(1).

¹⁶⁰ The Departments propose a non-substantive amendment to 26 CFR 54.9816–8(c)(4)(i)(D), 29 CFR 2590.716–8(c)(4)(i)(D), and 45 CFR 149.510(c)(4)(i)(D) to correct the cross-reference to the cooling-off period from 26 CFR 54.9816–8T(c)(4)(vi)(B), 29 CFR 2590.716–8(c)(4)(vi)(B), and 45 CFR 149.510(c)(4)(vi)(B) to 26 CFR 54.9816–8T(c)(5)(vii)(B), 29 CFR 2590.716–8(c)(5)(vii)(B), and 45 CFR 149.510(c)(5)(vii)(B).

¹⁵⁷ Section 9816(c)(5)(A)(i) of the Code, section 716(c)(5)(A)(i) of ERISA, and section 2799A–1(c)(5)(A)(i) of the PHS Act.

¹⁵⁸ In the July 2021 interim final rule (86 FR 36890), the Departments defined the service code as the code that describes an item or service using the Current Procedural Terminology (CPT), Healthcare Common Procedure Coding System (HCPCS), and the Diagnosis-Related Group (DRG) codes. *See also* 26 CFR 54.9816–6T(a)(14), 29 CFR 2590.716–6(a)(14), and 45 CFR 149.140(a)(14).

for multiple items or services under a single service code; or (2) a plan or issuer makes an initial payment or notice of denial of payment to a provider, facility, or provider of air ambulance services under a single service code that represents multiple items or services (for example, a DRG).¹⁶¹ The Departments also specified that bundled payment arrangements submitted under 26 CFR 54.9816–8T(c)(3)(ii), 29 CFR 2590.716–8(c)(3)(ii), and 45 CFR 149.510(c)(3)(ii) are subject to the rules for batched determinations and the certified IDR entity fee for single determinations.

b. Feedback From Interested Parties on Current Batching Rules

Since the publication of the October 2021 interim final rules, the Departments have reviewed comments in response to the rules and continue to engage interested parties to identify opportunities for improvements in the Federal IDR process. In particular, the Departments have received substantial feedback from interested parties on the batching criteria that specifies how multiple qualified IDR items or services that relate to the treatment of a similar condition may be batched. Specifically, some providers of air ambulance services have expressed that the now-vacated batching rule finalized in the October 2021 interim final rules was burdensome because it prohibited a single air ambulance transport service from being the subject of a single dispute (for example, charges for fuel and mileage are two separate codes and could not be batched under the vacated batching rule). They highlighted that this essentially doubled their costs to dispute an out-of-network payment through the Federal IDR process. Some radiologists asserted that the vacated batching rule prohibited them from batching radiology items and services for multiple body parts for a single patient (for example, lumbar and thoracic spine) because these items and services are billed under different service codes, even though they may relate to a similar condition. They further asserted that, absent the ability to batch, radiologists are effectively denied access to the Federal IDR process because the reimbursements for most individual radiology codes are low-dollar and therefore are not cost-effective to dispute individually. The

Departments received similar feedback from other specialty providers, including laboratory and pathology physicians. Emergency physicians have stated that the nature of emergency care makes it difficult for them to batch claims under the vacated batching rule. For example, emergency physicians note that emergency care is characterized by a range of severity that patients present with, and a corresponding range of diagnostic, therapeutic, and decision-making intensity, which is different from scheduled surgery or office visits where the patient's diagnosis or condition is most often explicitly known. For this reason, emergency physicians recommend that for the purpose of emergency physicians, the "condition" should be defined as "emergency medical care" or "EMTALA-related care"¹⁶² and that limiting batching to individual "conditions" would result in a high number of disputes in the Federal IDR process, expense, and administrative burden.

Anesthesiologists have recommended two different mechanisms by which claims for services should be able to be batched. First, anesthesiologists have stated that anesthesia services should be batched based on anesthesia code families. Anesthesia services are classified in a distinct code set in which CPT codes are grouped according to body parts (for example, head, neck, thorax, etc.). Anesthesiologists have highlighted that if they are not permitted to batch claims for services within a related body-part code group, they will be confronted with unique and significant administrative burdens in the Federal IDR process. Second, anesthesiologists have raised that they should be able to batch all claims with the same anesthesia conversion factor because this reflects industry practice. The conversion factor is the basis for their negotiations with payers for in-network services; a payer generally contracts with an anesthesiologist or their group for payment for the full range of anesthesia services based upon a single, common anesthesia conversion factor (expressed in dollars per unit). Whether the anesthesia service is for a surgical procedure on the head, shoulder, arm, or leg, the anesthesia

conversion factor for each service is the same¹⁶³ and the assigned base units vary based on the procedure and the time units vary as determined by actual time.

The Departments also have received feedback from certified IDR entities regarding the batching rules and potential impacts of expanding batching. Certified IDR entities have indicated that disputes involving batched items and services under the current and now-vacated rules are more administratively burdensome than non-batched disputes, often due to the extra time and resources they must expend in verifying that the items and services are properly batched and eligible for the Federal IDR process. Further, certified IDR entities have stated that a substantial portion of the time and expense related to resolving disputes is spent on these administrative and eligibility-related tasks; and once the dispute reaches the certified IDR entities, they are able to make the substantive payment determinations relatively efficiently. However, in providing feedback to the Departments on ways to improve batching in the Federal IDR process, certified IDR entities signaled that processing batched disputes would become substantially more difficult if broad categories of items and services could be submitted to the Federal IDR process in a single batched dispute. This is because, in addition to adding further complexity to the eligibility review process, certified IDR entities would also need to closely review the potentially unique factual circumstances of each item and service contained within the batch in making the payment determination. This could include differing evidence of the additional circumstances described in section 9816(c)(5)(C) of the Code, section 716(c)(5)(C) of ERISA, and section 2799A–1(c)(5)(C) of the PHS Act for each batched item and service.

Certified IDR entities recommended implementing a cap on the number of qualified IDR items and services (or "line items") included in batched disputes in order to ensure that they can resolve payment determinations within the 30-business-day requirement. Specifically, many certified IDR entities

¹⁶¹ U.S. Department of Health and Human Services, U.S. Department of Labor, and U.S. Department of the Treasury. (August 2022). *Technical Assistance for Certified IDR Entities*. <https://www.cms.gov/files/document/TA-certified-independent-dispute-resolution-entities-August-2022.pdf>.

¹⁶² An emergency medical condition is defined in the Emergency Medical Treatment and Active Labor Act (EMTALA) in part as: "a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that the absence of immediate medical attention could reasonably be expected to result in placing the individual's health [or the health of an unborn child] in serious jeopardy, serious impairment to bodily functions, or serious dysfunction of bodily organs." 42 U.S.C. 1395dd(e)(1).

¹⁶³ In the *August 2022 Technical Assistance for Certified IDR Entities*, the Departments noted that plans and issuers generally calculate payment amounts for anesthesia services by multiplying the rate for the anesthesia conversion factor by (1) the base unit for the anesthesia service code, (2) the time unit, and (3) the physical status modifier unit. The base unit, time unit, and physical status modifier unit are specific to the individual receiving the anesthesia services. These base units are assigned to the services codes for anesthesia services, specifically CPT codes 00100 to 01999.

suggested imposing a 25-line-item cap on the number of items and services that could be submitted in a batched dispute, to the extent factual circumstances among them differed. Some certified IDR entities mentioned that the necessary line-item cap would depend on how the parties would be permitted to batch items and services; however, certified IDR entities generally indicated that in any circumstance, it would not be feasible to resolve disputes in excess of 100 items and services within the 30-business-day period for making payment determinations. Certified IDR entities indicated they could manage batched claims containing a larger number of items and services (for example, 25 to 50) to the extent they involved the same type of claim and when the relevant facts are identical across the items or services in the batch. For example, some certified IDR entities stated that batching items and services from a single patient encounter and claim would be manageable and create efficiencies. However, certified IDR entities maintained that once the line items included in a batch reach a certain number, efficiencies are lost, and the batched dispute becomes unmanageable.

Plans and issuers have also indicated that the relatively frequent submission of incorrectly batched items and services as a single dispute by providers and facilities poses a substantial administrative burden for them. This is because the initiating party may need to resubmit the dispute, which, under the current rules, could also result in the non-initiating party paying the applicable administrative fee, potentially multiple times. Such interested parties urged the Departments to avoid adding further complexity or ambiguity with respect to the ability to batch items and services.

c. Proposals To Improve Batching in the Federal IDR Process

After considering comments and feedback from interested parties (including certified IDR entities, plans and issuers, providers, facilities, and providers of air ambulance services), and the Departments' general experience with operationalizing the Federal IDR process to date, the Departments are of the view that, under some circumstances, allowing multiple qualified IDR items and services that treat a similar condition to be batched together in a single payment determination proceeding, in accordance with the requirements of 26 CFR 54.9816–8T(c)(3)(i), 29 CFR 2590.716–8(c)(3)(i), and 45 CFR

149.510(c)(3)(i), encourages efficiency and can result in cost savings for disputing parties.¹⁶⁴

In these proposed rules, the Departments are proposing new batching provisions that are intended to achieve a balance among several important objectives, including ensuring the batching rules do not unreasonably impede parties' access to the Federal IDR process considering relative costs and administrative burden, and simplifying Federal IDR process operations while avoiding new operational complexities that could create or exacerbate dispute backlogs. The Departments are of the view that the proposed provisions would help ensure that qualified IDR items and services included in batched determinations have clear definitional principles that would yield logical payment determinations across certified IDR entities, including determinations of whether items or services are properly submitted as batched determinations. The Departments are also of the view that these proposals would reduce potential risk that large and complicated batches would extend the time needed for certified IDR entities to make eligibility and payment determinations.¹⁶⁵ In addition to these proposals, the Departments are considering altering current guidance on the resubmission of incorrectly batched disputes. In the *August 2022 Technical Assistance for Certified IDR Entities*, the Departments stated that inappropriately batched or bundled disputes may be re-submitted as properly batched or single disputes if the qualified IDR items and services that are subject to the disputes meet all other applicable requirements, including requirements for timely initiation of the Federal IDR process. The Departments are considering removing this flexibility 90 business days after the proposed batching provisions, as finalized, would become applicable. This would allow parties time to adjust to the new proposed batching rules, if finalized.

¹⁶⁴ Section 9816(c)(3)(A)(iv) of the Code, section 716(c)(3)(A)(iv) of ERISA, and section 2799A–1(c)(3)(A)(iv) of the PHS Act.

¹⁶⁵ Under this notice of proposed rulemaking, the Departments propose new requirements related to the treatment of batched items and services and bundled payment arrangements. While the Departments consider and discuss feedback from interested parties in the context of these new proposals, they do not specifically address all public comments on batching and bundling received in response to the October 2021 interim final rule.

i. Treatment of Batched Items and Services

The Departments first propose to redesignate paragraph (c)(3) as paragraph (c)(4) under 26 CFR 54.9816–8, 29 CFR 2590.716–8, and 45 CFR 149.510. Newly redesignated paragraph (c)(4)(i) of these sections would provide that up to 25 qualified IDR items and services may be batched and considered jointly as part of one payment determination only if all requirements under paragraphs (c)(4)(i)(A) through (D) are met.

A. Line-Item Limit for Batched Items and Services

The Departments propose to limit batched determinations to 25 line items in a single dispute. Without such a limit, the additional batching provisions in these proposed rules could increase the time and level of effort certified IDR entities spend on resolving payment determinations, which, in turn, would hinder their ability to make timely payment determinations. The Departments must ensure that the Federal IDR process operates efficiently, as section 9816(c)(3)(A) of the Code, section 716(c)(3)(A) of ERISA, and section 2799A–1(c)(3)(A) of the PHS Act direct the Departments to “specify criteria under which multiple qualified IDR dispute items and services are permitted to be considered jointly as part of a single determination by an entity for purposes of encouraging the efficiency (including minimizing costs) of the IDR process.” The Departments, therefore, and in line with the feedback from certified IDR entities discussed in section II.E.2.b of the preamble, propose a 25-line-item limit as a reasonable cap to ensure that large and complicated batches do not extend the timeframe needed for certified IDR entities to make eligibility and payment determinations. Further, a 25-line-item limit is intended to help ensure that certified IDR entities are able to reasonably forecast and cover their costs through the fees they set for batched disputes and to process batched disputes in a more timely manner.

The Departments seek comment on the proposed limit on the number of qualified IDR items and services in a batched determination and whether an alternative line-item limit that is higher or lower than 25 line items would be more appropriate to promote efficiencies and cost savings in the Federal IDR process. The Departments are considering whether a 50-line-item limit is a more reasonable cap to encourage efficiencies for disputing parties, while still allowing certified IDR entities sufficient time to review the

eligibility of batched disputes and make payment determinations within the 30-business-day requirement. The Departments also solicit comment on whether the line-item limit should vary depending on the type of batched dispute. For example, there could be a 25-line-item limit for items and services furnished to a single patient on the same or consecutive dates of service and billed on the same claim, and a 50-line-item limit for items and services furnished to one or more patients under the same service code.

The Departments also seek comment on whether a line-item limit should be imposed and whether and how such a provision could increase efficiency and process disputes in a more timely manner. The Departments also solicit comment on whether the certified IDR entity fee structure for batched determinations should be adjusted given the proposed changes to the batching rules.

B. Batched Items and Services Must Be Billed by the Same Provider, Facility, or Provider of Air Ambulance Services

The Departments propose to redesignate 26 CFR 54.9816–8(c)(3)(i)(A), 29 CFR 2590.716–8(c)(3)(i)(A), and 45 CFR 149.510(c)(3)(i)(A) as 26 CFR 54.9816–8(c)(4)(i)(A), 29 CFR 2590.716–8(c)(4)(i)(A), and 45 CFR 149.510(c)(4)(i)(A), respectively. The Departments propose no substantive changes to this provision, which provides that qualified IDR items and services may be considered as part of a single batched determination only where they were billed by the same provider or group of providers, the same facility, or the same provider of air ambulance services. The provision also provides that qualified IDR items and services are billed by the same provider or group of providers, the same facility, or the same provider of air ambulance services if the items or services are billed with the same NPI or TIN. This provision reflects the first of four statutory requirements that must be satisfied for a qualified IDR item or service to be considered as part of a batched determination.¹⁶⁶

C. Batched Items and Services Must Be Paid by the Same Plan or Issuer

Under proposed 26 CFR 54.9816–8(c)(4)(i)(B), 29 CFR 2590.716–8(c)(4)(i)(B), and 45 CFR 149.510(c)(4)(i)(B), the Departments propose that qualified IDR items and

services may be batched and considered jointly as part of one payment determination if payment for the qualified IDR items and services is made by the same group health plan or health insurance issuer. Because the Departments have received questions about how to batch for claims involving group health plans that are fully-insured versus self-insured, the proposed rules specify that this requirement would be satisfied if the same issuer is required to make payment for the qualified IDR items and services, even if the qualified IDR items and services relate to claims from different group health plans or individual market policies. For self-insured group health plans, this requirement would be satisfied if the same self-insured group health plan is required to make payment for the qualified IDR items and services, including when the plan makes payments through a TPA: the requirement would not be satisfied if multiple self-insured group health plans are required to make payments for the qualified IDR items and services, even if those group health plans make payments through the same third party administrator. While a given TPA may administer multiple self-insured plans, the self-insured group health plan generally is the responsible party for payment or reimbursement of the qualified IDR items and services.

D. Batched Items and Services Must Be Related to the Treatment of a Similar Condition

The Departments propose to add 26 CFR 54.9816–8(c)(4)(i)(C), 29 CFR 2590.716–8(c)(4)(i)(C), and 45 CFR 149.510(c)(4)(i)(C) to permit initiating parties to batch qualified IDR items and services in specific circumstances, so long as the items and services relate to the treatment of a similar condition and the batching of the items and services would encourage efficiency (including minimizing costs) in the Federal IDR process. As the Departments explained earlier in section II.E.2. of this preamble, the Departments are proposing new batching criteria for multiple qualified IDR items and services that relate to the treatment of a similar condition in an effort to ensure the Federal IDR process is efficient and economically feasible for providers, facilities, providers of air ambulance services, plans, and issuers. The Departments must also ensure that the Federal IDR process operates efficiently, as section 9816(c)(3)(A) of the Code, section 716(c)(3)(A) of ERISA, and section 2799A–1(c)(3)(A) of the PHS Act directs the Departments to “specify criteria under which multiple qualified IDR dispute items and services are

permitted to be considered jointly as part of a single determination by an entity for purposes of encouraging the efficiency (including minimizing costs) of the IDR process.” However, there is a threshold number of items and services in a single batch at which that batch becomes so large that no efficiencies are gained, and an additional burden is imposed on the certified IDR entity, as discussed in section II.E.2.i.A. of this preamble (regarding line-item limits). Therefore, the Departments do not intend for the additional flexibility proposed under these rules to be unlimited or available in circumstances that would not promote efficiency in the Federal IDR process. The Departments propose four circumstances under which qualified IDR items and services would be considered to relate to the treatment of a similar condition such that a certified IDR entity’s consideration of the items and services in a single payment determination would promote efficiency in the Federal IDR process.

Under new 26 CFR 54.9816–8(c)(4)(i)(C)(1), 29 CFR 2590.716–8(c)(4)(i)(C)(1), and 45 CFR 149.510(c)(4)(i)(C)(1), the Departments propose that qualified IDR items and services would be considered to relate to the treatment of a similar condition and encourage efficiency in the Federal IDR process when they were furnished to a single patient during the same patient encounter. For purposes of these proposed regulations, the Departments propose to define a single patient encounter as a patient encounter on one or more consecutive days during which the qualified IDR items or services were furnished to the same patient and billed on the same claim form.

The Departments understand from engagement with providers, medical coding professionals, and certified IDR entities that while there may be some instances where a patient is treated for two or more unrelated or dissimilar conditions during a single patient encounter, in general, items and services furnished during a patient encounter and billed by the same provider, facility, or provider of air ambulance services on one claim form tend to relate to the treatment of the same or similar condition. The Departments are of the view that the proposed definition of a single patient encounter would promote efficiency by avoiding the requirement that an initiating party file separate disputes to obtain payment determinations for each of the items and services that were part of a single claim and patient encounter.

Allowing qualified IDR items or services to be included in a batched

¹⁶⁶ Section 9816(c)(3)(A) of the Code, section 716(c)(3)(A) of ERISA, and section 2799A–1(c)(3)(A) of the PHS Act.

determination when they were furnished to the same patient on one or more consecutive days and billed on the same claim form would simplify and encourage efficiency of the Federal IDR process. For example, evidence of the additional circumstances described in section 9816(c)(5)(C) of the Code, section 716(c)(5)(C) of ERISA, and section 2799A–1(c)(5)(C) of the PHS Act would generally be identical for each qualified IDR item and service furnished during a single patient encounter. This would limit the burden on certified IDR entities considering such additional circumstances and making a payment determination for the batch. In addition, permitting batching of items and services furnished to a single patient during the same patient encounter would help the non-initiating party more readily identify the claims involved since the dispute submitted by the initiating party to the Federal IDR process would relate to a single claim form in the non-initiating party's records, as opposed to having to locate and review multiple claim forms.

The Departments note that the proposed requirement to permit batching by patient encounter would increase procedural efficiency compared to the vacated batching provision for providers of air ambulance services by allowing them to submit a single dispute for a patient's air ambulance transport (provided the other batching requirements are met). This approach is consistent with the *TMA III* order and opinion, which vacated provisions of the *August 2022 Technical Assistance for Certified IDR Entities* that in effect required each air ambulance service code to be submitted as a single dispute, requiring two separate IDR disputes for a single air ambulance transport. Under these proposed rules, mileage and base rates, as well as any other item or service furnished during a single air transport and billed for on the same claim form, could be batched in a single payment determination. The Departments request comment on this proposal, including any data or other information that supports or contradicts the Departments' understanding underlying this proposal.

At new 26 CFR 54.9816–8(c)(4)(i)(C)(2), 29 CFR 2590.716–8(c)(4)(i)(C)(2), and 45 CFR 149.510(c)(4)(i)(C)(2), the Departments would reestablish the provision that qualified IDR items and services also would be considered to relate to the treatment of a similar condition and encourage efficiency when they were furnished to one or more patients during different patient encounters and were billed under the same service code or a

comparable code under a different procedural code system, such as CPT codes with modifiers, if applicable, Healthcare Common Procedure Coding System (HCPCS) with modifiers, if applicable, or DRG codes with modifiers, if applicable. As discussed in section I.D. of this preamble, in *TMA IV*, the District Court's decision vacated this previously established provision only on the grounds that it violated the notice-and-comment requirement under the Administrative Procedure Act and did not address whether this criterion is a reasonable interpretation of the No Surprises Act.

Qualified IDR items or services billed under the same code or under comparable codes of different coding systems would be considered to generally relate to treatment of a similar condition because they essentially would be the same item or service. For example, CPT code 93000 and HCPCS code G0403 both correspond to a routine electrocardiogram (with 12 leads). The proposal would simplify and encourage the efficiency of the Federal IDR process by retaining a clearly defined methodology for disputing parties and certified IDR entities to determine whether qualified IDR items and services are appropriately batched, which would contribute to the efficiency and consistency of such determinations across certified IDR entities. However, the Departments request comment on whether there are circumstances in which a single provider, facility, or provider of air ambulance services—as a practical matter—would bill for the same qualified IDR item or service using different code sets or whether the proposed flexibility could potentially incentivize billing practices specifically intended to circumvent these batching rules or other requirements of the Federal IDR process. The Departments request comment on this proposal, including any data or other information that supports or contradicts the Departments' understanding underlying this proposal.

Some interested parties have suggested that the Departments should deem all qualified IDR items and services within the same major CPT Category I codes or “family” to relate to the treatment of similar conditions. These sub-categories include Evaluation and Management, Anesthesia, Surgery, Radiology/Diagnostic Radiology/Diagnostic Ultrasound, Pathology and Laboratory/Proprietary Laboratory Analysis, and Medicine. The Departments seek to balance the breadth of the interpretation of the statutory requirement that batched items and

services relate to the treatment of a “similar condition” with the goal of efficiency. The Departments have heard from certified IDR entities that significant variability among items or services in a batched claim often leads to payment determinations that are significantly more time-intensive and burdensome to review than claims for items and services that are significantly similar. Efficiency in making eligibility and payment determinations is affected by several factors including the payer, the provider, the circumstances of each patient's treatment, and the QPA for the items and services under dispute. Grouping larger numbers of items and services together into a single batch can lower costs to the extent that it minimizes effort on the part of the certified IDR entity in evaluating factors related to the dispute or disputing parties, such as eligibility for the Federal IDR process. However, larger batches of services with greater variability can also increase review time and costs of certified IDR entities, because larger batches that include disparate services and patient circumstances associated with different supporting information submitted by disputing parties, require certified IDR entities to analyze more information, often taking longer to review. For example, if the Departments permitted batching across the entirety of the Category I CPT code subcategory for radiology, an individual dispute could contain an X-ray of the eye for detection of a foreign body (CPT code 70030), a bilateral screening mammography (CPT code 77067), and simple intensity modulated radiation treatment (IMRT) delivery (CPT code 77385). These services would have different circumstances for the treatment of the patient and would result in the certified IDR entity evaluating a unique set of factors and supporting documentation for each of these services, thus reducing the ability of the certified IDR entity to make timely payment determinations for such disputes.

The Departments are of the view that the variability of the conditions represented within the CPT Category I sub-categories would reduce, rather than promote greater efficiency of the Federal IDR process and would be less likely to relate to the treatment of a similar condition. Thus, the Departments propose to specify in guidance ranges of CPT codes within sub-categories of CPT Category I codes that may be batched, in order to promote efficiency in the Federal IDR process. Specifically, the Departments propose at 26 CFR 54.9816–

8(c)(4)(i)(C)(3), 29 CFR 2590.716–8(c)(4)(i)(C)(3), and 45 CFR 149.510(c)(4)(i)(C)(3) that for anesthesiology, radiology, pathology, and laboratory qualified IDR items and services, items and services would be considered to relate to the treatment of similar conditions when they are furnished to one or more patients and were billed under service codes belonging to the same Category I CPT code ranges, which would be specified in guidance published by the Departments.

The Departments propose to divide Category I CPT codes into ranges based on the Departments' characterization of those codes as being related to the treatment of a similar condition. In Tables 2 through 4, the Departments detail proposed ranges of Category I CPT sub-categories for anesthesiology, radiology, pathology, and laboratory items or services that an initiating party may batch together within a single dispute (provided the other batching requirements are met). Under this proposal, the Departments would permit batching only of codes within these ranges for anesthesiology, radiology,

pathology, and laboratory qualified IDR items and services. By allowing for the more narrowly defined Category I CPT code spans for batched determinations indicated in Tables 2 through 4, the Departments could increase the probability that the items or services in a dispute both relate to the treatment of a similar condition and increase the efficiency of the Federal IDR process, since the associated items or services would share the clinical commonality of pertaining to patients who require diagnostic imaging, radiation oncology, similar laboratory tests, etc.

If these proposed rules are finalized, the Departments would establish descriptions of each sub-category of CPT codes, and update periodically as necessary the allowable ranges of service codes belonging to the same CPT sub-category for purposes of batching under proposed 26 CFR 54.9816–8(c)(4)(i)(C)(3), 29 CFR 2590.716–8(c)(4)(i)(C)(3), and 45 CFR 149.510(c)(4)(i)(C)(3) in guidance. CPT codes are defined in the American Medical Association's (AMA's) "CPT Manual," which is updated and published annually. The AMA releases

the CPT manual in the fall of each year to precede their January 1st effective date. The Departments would review the modifications made to the CPT manual once available and determine if the modifications necessitate updates to the Category I CPT code spans for batched determinations based on the Departments' interpretation of the pre-existing descriptive categories with which a new Category I CPT code most closely aligns. For example, if a new CPT manual established a new Category I CPT code for diagnostic radiology (imaging) that would fall outside of CPT code spans 70010–71555, the Departments would need to release updated guidance for batched determinations to advise parties of which pre-existing descriptive categories of CPT code spans most closely align with the new code, and, thus, with which it can be batched. In such circumstances, the Category I CPT code spans for batched determinations most recently established by the Departments would stand until the publication of further guidance.

	01951 – 01953	Burn Excisions or Debridement
	01958 – 01969	Obstetric
	01990 – 01999	Other Procedures

BILLING CODE 6325–63–C; 4830–01–C; 4510–29–C; 4120–01–C;

Another goal of this proposal is to ensure that the batching rules facilitate access to the Federal IDR process considering the relative costs and administrative burden associated with participating. Consistent with feedback from interested parties, this proposal would also allow providers of lower-dollar qualified IDR items and services, such as providers of radiology, pathology, and laboratory items or services, to batch more services than was permitted under the October 2021 interim final rules, because such qualified IDR items and services may not be cost-effective to dispute individually.

As discussed earlier in section II.E.2.c of this preamble, the Departments are proposing new batching provisions to ensure the batching rules do not unreasonably impede the parties' access to the Federal IDR process considering relative costs and administrative burden. The Departments intend these provisions to improve the efficiency of the Federal IDR process while avoiding

new operational complexities that could create or exacerbate dispute backlogs. The proposed rule would provide new flexibility in two ways: first, it would allow initiating parties to batch all items and services related to a single patient encounter; second, it would allow batching of certain items and services within the same Category I CPT code sub-sections. For the purposes of this proposal, the Departments are primarily focusing on provider specialties that have been involved in a majority of disputes under the Federal IDR process, with one exception (emergency medicine, discussed in further detail below). The Departments solicit comment on whether there are other Category I CPT code subsections (for example, Medicine and Surgery) that would satisfy the statutory requirements that batched items and services relate to the treatment of a similar condition and encourage efficiency of the Federal IDR process. Although batching of items and services within the same Category I CPT code subsection is not available for all medical specialties, the Departments are

of the view that the proposed batching provisions that would allow batching for a single patient encounter would improve efficiency of the Federal IDR process for medical, surgical, and emergency providers.

As discussed in section II.E.2.b. of this preamble, emergency providers have recommended that the Departments permit batching of the most common evaluation and management CPT codes (99281–99285) for items and services furnished in emergency departments. After considering this feedback, the Departments are concerned that the variability of the conditions that are represented across the emergency medicine evaluation and management CPT codes would increase the likelihood for dissimilar conditions and patient acuties to be batched, which would be inefficient and highly burdensome for certified IDR entities. For instance, if these five different emergency medicine evaluation and management codes could be batched together, the conditions represented in

one batched dispute could include such diverse situations as a patient evaluated for an insect bite and one patient treated for a heart attack. The Departments seek comment on whether there are ways to provide additional batching flexibility for emergency department services in a way that mitigates the Departments' concerns that such flexibility would increase the likelihood that claims for treatment of dissimilar conditions would be batched and promotes the efficiency of the IDR process, for example, data or estimates related to a potential decrease in the number of disputes involving emergency department services that would be realized if emergency department providers were permitted to batch items and services across the five evaluation and management Level I CPT codes, without a commensurate increase in the diversity of documentation that certified IDR entities would need to review to evaluate disputes related to different, but similar conditions.

The Departments seek comment on the proposal to permit anesthesiology, radiology, pathology, and laboratory qualified IDR items and services that were furnished under service codes belonging to the same Category I CPT code section, as specified in guidance published by the Departments, including the proposed Category I CPT code spans for batched determinations, and whether there are any items and services similar to pathology, radiology, and laboratory qualified IDR items and services to which this policy should apply. For example, the Departments seek comment on whether additional batching flexibility, consistent with the statutory requirements, is necessary or appropriate for providers of lower-dollar items or services other than laboratory, pathology, or radiology services, to remove impediments and promote reasonable access to the Federal IDR process. The Departments also request comment on the proposed pathology and laboratory Category I CPT code spans for batched determinations. Specifically, the Departments solicit comment on whether Organ or Disease Oriented Panels, Urinalysis, and Chemistry Category I CPT codes should be combined for batched determinations. The Departments understand that these are frequently billed codes, and that such high volume would be a reason to not combine these three code-span ranges together. The Departments seek comment on this assumption, including any data or other information that supports or contradicts the Departments' understanding, such as if the volume of these codes for out-

of-network services would be substantially less.

Further, consistent with feedback from anesthesiologists, this proposal would allow anesthesiologists to batch items and services within a related body-part code group, which would align with the established framework in the field. Anesthesiologists have expressed to the Departments that while an anesthesia service for one spinal procedure may be related to multiple different medical conditions, the anesthesia administration itself is substantially similar. For example, for spinal procedures, the anesthesia service may be related to different spinal conditions such as stenosis or discectomy. Since the anesthesia administration itself is substantially similar for these different conditions, the Departments are of the view that these conditions could be considered similar and that the payment considerations a certified IDR entity would evaluate are similar.

As discussed in section II.E.2.b. of this preamble, anesthesiologists have requested that claims be batched by the same conversion factor, since contracting practices for anesthesiology items and service focus on conversion factor rates, and not traditional codes like CPT codes. The Departments have not identified a basis upon which such conversion factor rates would satisfy the statutory requirement that batched items and services relate to a similar condition at section 9816(c)(3)(A)(iii) of the Code, section 716(c)(3)(A)(iii) of ERISA, and section 2799A-1(c)(3)(A)(iii) or how conversion factors are a meaningful method of encouraging efficiency. It is the Departments' understanding that because conversion factors would be identical for every out-of-network service furnished by an anesthesiologist provider or provider group, use of the "same conversion factor" for batching would result in the provider or provider group being able to batch every out-of-network service it furnishes that otherwise satisfies the remaining batching factors. Instead, the Departments are of the view that batching based on CPT code categories would lead to greater efficiency, would more closely align with the statutory requirement that batched items and services relate to the treatment of a similar condition, and would lead to less variability among the items and services and factual circumstances that certified IDR entities must consider.

The Departments request comment on the proposal that would govern whether anesthesiology qualified IDR items and services are considered to relate to the treatment of similar conditions.

Specifically, the Departments solicit comment on whether and how items and services that share the same anesthesia conversion factor could be considered to relate to the treatment of similar conditions and could meaningfully encourage efficiency in the Federal IDR process. The Departments request comment on these proposals, including any data or other information that supports or contradicts the Departments' understanding underlying this proposal.

E. Batched Items and Services Must Have Been Furnished Within the Same Time Period

Finally, the Departments propose at 26 CFR 54.9816-8(c)(4)(i)(D), 29 CFR 2590.716-8(c)(4)(i)(D), and 45 CFR 149.510(c)(4)(i)(D) that batched qualified IDR items and services must have been furnished within the same 30-business-day period following the date on which the first item or service included in the batched determination was furnished and have been the subjects of a 30-business-day open negotiation period that ended within 4 business days of IDR initiation, except as provided in proposed 26 CFR 54.9816-8(c)(5)(vii)(B), 29 CFR 2590.716-8(c)(5)(vii)(B), and 45 CFR 149.510(c)(5)(vii)(B), which refer to the 90-calendar-day "cooling off" period. This is consistent with section 9816(c)(3)(B) of the Code, section 716(c)(3)(B) of ERISA, and section 2799A-1(c)(3)(B) of the PHS Act and is in effect the same as the current regulations at 26 CFR 54.9816-8T(c)(3)(i)(D), 29 CFR 2590.716-8(c)(3)(i)(D), and 45 CFR 149.510(c)(3)(i)(D). The Departments are also proposing a non-substantive amendment at 26 CFR 54.9816-8(c)(4)(i)(D), 29 CFR 2590.716-8(c)(4)(i)(D), and 45 CFR 149.510(c)(4)(i)(D) to both remove the redundant language on the 90-calendar-day "cooling off" period and correct the cross-reference to paragraph 26 CFR 54.9816-8T(c)(5)(vii)(B), 29 CFR 2590.716-8(c)(5)(vii)(B), and 45 CFR 149.510(c)(5)(vii)(B). The Departments do not propose any alternative time periods for batched determinations, as the Departments are of the view that the batching rules proposed in these rules are sufficient to encourage procedural efficiency and minimize administrative costs for the disputing parties.

The Departments solicit comment on the application of the cooling off period after a determination on a dispute consisting of multiple items and services batched by patient encounter or CPT code ranges. For example, if provider X submitted a notice of IDR

initiation that included as part of a batched determination a single view x-ray of the abdomen (CPT code 74018) to payer Y and the certified IDR entity made a determination on the dispute, should provider X be allowed to submit another dispute, such as a batched patient encounter dispute, within the 90-day period following such determination that involves a single view x-ray of the abdomen (CPT code 74018) to payer Y? It is the Departments' understanding that under these proposed batching rules, the 90-calendar-day cooling off period could result in operational challenges and barriers both to disputing parties submitting subsequent IDR disputes and certified IDR entities' review. In the example of provider X that submitted a batched dispute with an x-ray of the abdomen (CPT code 74018) to payer Y, and for which a certified IDR entity had made a determination, provider X under the proposed rules would have to ensure to not include an x-ray of the abdomen (CPT code 74018) in any subsequent notices of IDR initiation to payer Y within the 90-calendar-day period following such determination. Where subsequent disputes involve larger numbers of items or services, such as batched disputes based on patient encounters or CPT code ranges, this could result in additional time a party must spend excluding the specific item or service subject to the cooling off period from the batch and could also present additional burdens on certified IDR entities in assessing whether the cooling off period applies to one item or service within a batch and therefore whether the batched dispute is eligible for initiation of the Federal IDR process. In addition, the Departments have heard from some providers that since cooling off periods are allowed to overlap, and with each new written determination issued the current cooling off period is extended before it has ended, there are certain high-volume payers with which providers may be required to wait multiple years before the Federal IDR process could be initiated again. Batches for single patient encounters may exacerbate this situation.

Under section 9816(c)(9) of the Code, section 716(c)(9) of ERISA, and section 2799A-1(c)(9) of the PHS Act, the time periods required under the No Surprises Act and 26 CFR 54.9816-8T, 26 CFR 54.9816-8, 29 CFR 2590.716-8, and 45 CFR 149.510 (other than the timing of the payments to prevailing parties) may be modified at the Departments' discretion to ensure that all claims that occur during a 90-day period following a payment determination for which a

notification is not permitted to be submitted during such period by reason of the cooling-off-period requirements are eligible for the IDR process. If the proposed batching provisions are finalized, the Departments are considering using this statutory waiver authority under section 9816(c)(9) of the Code, section 716(c)(9) of ERISA, and section 2799A-1(c)(9) of the PHS Act, to shorten the 90-day cooling off time period with respect to qualified IDR items and services for which a certified IDR entity makes a payment determination as part of a batched dispute. This would increase the efficiency of processing subsequently submitted batched disputes and ensure that claims that occur during the cooling off period are eligible for the Federal IDR process. The Departments seek comment on this exception and alternative time periods the Departments should consider for the cooling off period in this circumstance. The Departments are considering shortening the cooling off period for batched disputes to between 1 to 30 business days, if the batching proposals are finalized. As discussed in this section of the preamble, the Departments are of the view that the interaction of the 90-day cooling off period with the proposed batching provisions would reduce inefficiencies for the disputing parties, certified IDR entities, and the Federal IDR process. Further, as discussed in section II.E.2.c. of this preamble, section 9816(c)(3)(A) of the Code, section 716(c)(3)(A) of ERISA, and section 2799A-1(c)(3)(A) of the PHS Act directs the Departments to ensure that the Federal IDR process operates efficiently. Thus, the Departments are of the view that to encourage the efficiency of the Federal IDR process (including minimizing costs), the Departments should exercise their waiver authority to reduce the length of the cooling off period to be as short as 1 business day. Under these proposed rules, disputing parties would not be able to realize the efficiencies of batching by patient encounter if both parties may have to wait 90 business days before submitting a subsequent dispute. For example, it is the Departments understanding that it is highly likely that provider X could have multiple patient encounter batched disputes that involve payer Y where at least one common item or service would overlap in each of those disputes. The Departments are also aware of concerns that due to throughput issues, when payment determinations are made, and the inability to submit disputes either because they could not be submitted as

batched disputes under the vacated batching rules or because the cooling off period applied, the Federal IDR process has not been economically feasible for all providers. The Departments are of the view that markedly reducing the cooling off period, in combination with the other proposed provisions in these rules, would help make the Federal IDR process both more economically feasible and efficient for disputing parties. The Departments have also heard from some payers that they are inundated with multiple open negotiation notices and disputes from certain providers making it difficult to meet the deadlines for each dispute. For this reason, the Departments are considering as much as 30 business days for the duration of the cooling off period for batched disputes as it may help ensure parties are not inundated with disputes and provide parties sufficient time to meet the different time-period requirements of the Federal IDR process. The Departments solicit comment on this proposal, including specific alternative time periods the Departments should consider for the cooling off period. The Departments request any data or other information that supports or contradicts the Departments' understanding.

The Departments request comment on these proposals, including whether there are different or additional ways to encourage procedural efficiency and minimize administrative costs through the batching rules.

ii. Treatment of Bundled Payment Arrangements

The Departments propose at 26 CFR 54.9816-8(c)(4)(ii), 29 CFR 2590.716-8(c)(4)(ii), and 45 CFR 149.510(c)(4)(ii) that qualified IDR items and services that meet the definition of a bundled payment arrangement at proposed 26 CFR 54.9816-3, 29 CFR 2590.716-3, and 45 CFR 149.30 may be submitted and considered as a single payment determination for which the certified IDR entity must make one payment determination for the multiple items and services included in the bundled payment arrangement. The Departments further propose that bundled payment arrangements submitted under paragraph (c)(4)(ii) would continue to be subject to the certified IDR entity fee for single determinations as described at 26 CFR 54.9816-8T(e)(2)(vii), 29 CFR 2590.716-8(e)(2)(vii), and 45 CFR 149.510(e)(2)(vii). These proposed technical amendments to 26 CFR 54.9816-8(c)(4)(ii), 29 CFR 2590.716-8(c)(4)(ii), and 45 CFR 149.510(c)(4)(ii) would include a reference to the definition of "bundled payment

arrangement,”¹⁶⁷ a correction that the certified IDR entity must make one payment determination for the multiple qualified IDR items and services included in the bundled payment arrangement, removal of the language that bundled payment arrangements are subject to the rules for batched determinations, and an updated cross reference to paragraph (c)(4)(ii).

3. Administrative and Certified IDR Entity Fee Collection

The Departments propose to amend the administrative and certified IDR entity fee provisions of 26 CFR 54.9816–8(d), 29 CFR 2590.716–8(d), and 45 CFR 149.510(d) to adjust the timing of collection of the administrative fee and make changes to the administrative fee structure to ensure that the financial costs to the Departments to administer the Federal IDR process align with the assessed administrative fees, to encourage disputing parties to engage in meaningful open negotiations, to accelerate dispute processing, and to reduce the burden on certified IDR entities.

a. Establishment of the Administrative Fee Amount

Under section 9816(c)(8)(A) of the Code, section 716(c)(8)(A) of ERISA, section 2799A–1(c)(8)(A) of the PHS Act, and the October 2021 interim final rules,¹⁶⁸ each party to a determination must pay an administrative fee for participating in the Federal IDR process. Under section 9816(c)(8)(B) of the Code, section 716(c)(8)(B) of ERISA, section 2799A–1(c)(8)(B) of the PHS Act, and the October 2021 interim final rules,¹⁶⁹ the administrative fee is established annually in a manner so that the total administrative fees paid for a year are estimated to be equal to the amount of expenditures estimated to be made by the Departments to carry out the Federal IDR process for that year.

On September 26, 2023, the Departments issued the IDR Process Fees proposed rules,¹⁷⁰ proposing to amend the language at 26 CFR 54.9816–8(d)(2)(ii), 29 CFR 2590.716–8(d)(2)(ii), and 45 CFR 149.510(d)(2)(ii) to establish the Federal IDR process administrative fee amount through notice and comment rulemaking, rather than in guidance.¹⁷¹

¹⁶⁷ As discussed in section II.A. of the preamble, the Departments propose to amend 26 CFR 54.9816–3, 29 CFR 2590.716–3, and 45 CFR 149.30 to define the term “bundled payment arrangement.”

¹⁶⁸ 26 CFR 54.9816–8T(d)(2)(i), 29 CFR 2590.716–8(d)(2)(i), and 45 CFR 149.510(d)(2)(i).

¹⁶⁹ 26 CFR 54.9816–8T(d)(2)(ii), 29 CFR 2590.716–8(d)(2)(ii), and 45 CFR 149.510(d)(2)(ii).

¹⁷⁰ 88 FR 65888 (September 26, 2023).

¹⁷¹ In *TMA IV*, the District Court issued an opinion and order holding that the process by

In the IDR Process Fees proposed rules, the Departments proposed the methodology to calculate the administrative fee amount for disputes initiated on or after the later of the effective date of the IDR Process Fees proposed rules or on January 1, 2024, by projecting the amount of expenditures to be made by the Departments in carrying out the Federal IDR process and dividing this by the projected number of administrative fees to be paid by the parties. Using this methodology, the Departments proposed an administrative fee of \$150 per party per dispute. Additionally, the Departments proposed that the administrative fee amount specified in rulemaking would remain in effect until a new administrative fee amount is specified in subsequent rulemaking. Furthermore, in the IDR Process Fees proposed rules, the Departments proposed to remove the requirement to set the administrative fee amount annually, allowing the Departments the flexibility to update the administrative fee amount more or less frequently than annually to increase the Departments’ ability to respond to changes in expenditures or collections that would require a new administrative fee amount. The comment deadline on the IDR Process Fees proposed rules is October 26, 2023. The Departments will review all public comments received on the IDR Process Fees proposed rules.

The Departments note that a number of the proposed provisions in these proposed rules would impact the collection of administrative fees, including the time of collection of the administrative fee discussed in section II.E.3.b. of this preamble, the proposed reduced administrative fee for both parties in low-dollar disputes discussed in section II.E.3.e. of this preamble, and the proposed reduced administrative fee for non-initiating parties in ineligible disputes discussed in section II.E.3.f. of this preamble and would therefore impact the methodology that the Departments use to determine the administrative fee. Accordingly, in these proposed rules, the Departments propose to adjust the methodology for

which the Departments amended the December 2022 fee guidance to increase the administrative fee for the Federal IDR process from \$50 to \$350 per party for disputes initiated during the calendar year beginning January 1, 2023, was a violation of the Departments’ obligation under the Administrative Procedure Act to give affected parties notice of and an opportunity to comment on the administrative fee. In light of the District Court’s opinion and order, as well as the Departments’ reassessment regarding the practicability of establishing the administrative fee through notice and comment rulemaking, the Departments proposed in the IDR Process Fees proposed rules to establish the amount of the administrative fee through notice and comment rulemaking.

calculating the administrative fee amount that was proposed in the IDR Process Fees proposed rules. As discussed in greater detail below, while in the IDR Process Fees proposed rules the Departments proposed to calculate the projected number of administrative fees to be paid using the total volume of disputes to be closed, in these proposed rules, the Departments propose to instead use the total volume of disputes to be initiated, due to the proposal to collect the administrative fee earlier in the Federal IDR process, as discussed further in section II.E.3.b. of this preamble.

In addition, the Departments are proposing other policies in these proposed rules that, if finalized, would impact the Departments’ expenditures in carrying out the Federal IDR process, including the proposed departmental eligibility review discussed in section II.E.1.b.ii. of this preamble, the direct collection of the administrative fee by the Departments discussed in section II.E.3.c. of this preamble, and the proposed Federal IDR process registry discussed in section II.F. of this preamble, which would impact the inputs under the methodology used to calculate the administrative fee amount.

The Departments note that, using the base methodology as proposed in the IDR Process Fees proposed rules, and taking into account the additional proposed policies in these rules and their impact on the inputs under the administrative fee methodology proposed in the IDR Process Fees proposed rules, the administrative fee amount would continue to be \$150 per party per dispute.

In light of the proposals in these rules, the Departments project the annual expenditures to carry out the Federal IDR process, if the proposals in these rules are finalized, to be approximately \$100.2 million. The proposed expenditures upon which the administrative fee amount in these rules is based include contract costs and Federal resources associated with:

- Maintaining the Federal IDR portal, including the proposed Federal IDR process registry discussed in section II.F. of this preamble, which is intended to make the parties’ and certified IDR entities’ experiences using the portal more efficient, clear, and streamlined;
- Certifying IDR entities and collecting data from them, which is intended to increase the number of certified IDR entities, improve the speed of eligibility and payment determinations, and assist the Departments in understanding where efficiencies may still be gained in the process;

- Conducting program integrity activities, such as QPA audits and IDR decision audits, which are intended to ensure the program integrity by reducing and preventing errors in the Federal IDR process;
- Investigating relevant complaints, which is intended to ensure compliance with the Federal IDR process requirements;
- Providing outreach to parties and technical assistance to certified IDR entities, which is intended to streamline the experience and further improve the speed and integrity of eligibility and payment determinations;
- Collecting administrative fees directly from disputing parties, which is intended to reduce burden on certified IDR entities, increasing capacity of certified IDR entities to perform other required functions;
- Conducting eligibility determinations when any of the extenuating circumstances described in proposed 26 CFR 54.9816–8(g), 29 CFR 2590.716–8(g), and 45 CFR 149.510(g) require application of the departmental eligibility review to facilitate timely payment determinations or the effective processing of disputes under the Federal IDR process; and
- Retaining and making available Federal personnel dedicated to carrying out Federal IDR process activities.

Further, as described above, estimates for these expenditures assume that the Departments would determine that extenuating circumstances exist to invoke the departmental eligibility review, as discussed in sections II.E.1.b.ii. through iv. of this preamble and as proposed in 26 CFR 54.9816–8(c)(2)(ii), 29 CFR 2590.716–8(c)(2)(ii), and 45 CFR 149.510(c)(2)(ii). The Departments began conducting pre-eligibility reviews in 2023 to allow the certified IDR entities to complete their eligibility determinations more efficiently. As discussed in section II.E.1.b.ii. of this preamble, the departmental eligibility review proposed in these proposed rules contemplates a similar process except that the Departments would make eligibility determinations, rather than eligibility recommendations, to certified IDR entities.

With respect to the Departments' projected number of administrative fees to be paid, in the IDR Process Fees proposed rules, the Departments proposed to base this number on the total volume of disputes that were projected to be *closed*. However, in these proposed rules, the Departments propose to project the number of administrative fees to be paid based on the total volume of disputes projected to

be initiated. In the IDR Process Fee proposed rules, the Departments proposed to use the total volume of disputes projected to be closed, rather than the total volume of disputes projected to be initiated, because the total volume of closed disputes would be more indicative of the total volume of disputes for which fees are paid under the Departments' current collections process.¹⁷² In these proposed rules, the Departments propose to instead use the total volume of disputes projected to be initiated because the proposed operational changes in these proposed rules, if finalized, would result in the Departments' collection of administrative fees closer to a dispute's date of initiation, and therefore, the total volume of initiated disputes would be indicative of the total volume of disputes for which fees would be paid.

Additionally, in projecting the administrative fees to be paid, the Departments consider that, if the proposed policies described in sections II.E.3.e. and II.E.3.f. of this preamble are finalized, the initiating and non-initiating parties in ineligible and low-dollar disputes may pay a reduced administrative fee, which would be percentages of the full administrative fee amount. To arrive at the proposed reduced administrative fee percentages, the Departments analyzed historical trends of low-dollar and ineligible disputes and include further discussion of the calculation of these percentages in sections II.E.3.e. and II.E.3.f. of this preamble. As with the full administrative fee amount, the Departments propose at 26 CFR 54.9816–8(d)(2)(iii), 29 CFR 2590.716–8(d)(2)(iii), and 45 CFR 149.510(d)(2)(iii) that the reduced administrative fee amounts would remain in effect until changed by subsequent rulemaking. Accordingly, the total amount of projected administrative fees paid is calculated to reflect that the Departments would not collect a full administrative fee from both parties on a portion of disputes.

To determine the administrative fees to be paid, the Departments project approximately 420,000 disputes will be initiated annually. This projection is based on the most recent 6-month period of continuous Federal IDR process data before Federal IDR process operations were temporarily paused on August 3, 2023.¹⁷³ Using this projected

volume of disputes, the Departments assume a prospective reduction of approximately 25 percent in the volume of initiated disputes because of the anticipated impact of the proposed batching policies in these proposed rules, if finalized. As previously explained, to calculate the number of administrative fees to be paid from the projected volume of disputes initiated, the Departments consider that non-initiating and initiating parties may pay a reduced administrative fee in low-dollar and ineligible disputes if the proposed policies described in sections II.E.3.e. and II.E.3.f. of this preamble are finalized. Additionally, the Departments consider the proposals in these rules pertaining to open negotiation, initiation, batching, registration, and the other administrative fee policies, if finalized, in calculating the number of disputes initiated and this administrative fee amount.

Therefore, the Departments estimate that 420,000 initiated disputes, which include low-dollar and ineligible disputes with reduced administrative fees, would translate to an amount approximately equal to 691,000 full administrative fees paid. This estimate reflects that both parties to a dispute pay an administrative fee. Further, based on Federal IDR process data, the Departments estimate that 20 percent of initiated disputes would qualify as low-dollar disputes and 22 percent of initiated disputes would be ineligible. As described in Table 5, the Departments estimate that low-dollar and ineligible disputes will overlap such that some low-dollar disputes are determined to be ineligible. As explained further in sections II.E.3.e. and II.E.3.f. of this preamble, non-initiating parties would pay 20 percent of the full administrative fee in ineligible disputes and both initiating and non-initiating parties would pay 50 percent of the full administrative fee in low-dollar disputes.

Using the proposed methodology and inputs discussed above, the administrative fee for disputes initiated on or after January 1, 2025, and continuing until changed by subsequent rulemaking, would be calculated by dividing the projected annual expenditures of approximately \$100.2 million to be made by the Departments in carrying out the Federal IDR process by the projected annual number of administrative fees to be paid by the disputing parties of 691,000. This results in a full administrative fee amount of \$150 per party per dispute, which is the same amount as the Departments proposed in the IDR Process Fees proposed rules. However,

¹⁷² 88 FR 65888, 65893.

¹⁷³ The Departments applied the approximate 25 percent reduction described in these rules to the average monthly volume and multiplied this number by 12 to project the annual volume of initiated disputes.

as described in this preamble section, the methodology and inputs for calculating the administrative fee in these proposed rules differ from those in the IDR Process Fees proposed rules. In the IDR Process Fees proposed rules, the Departments calculated the proposed administrative fee by dividing projected annual expenditures of \$70 million by approximately 450,000 full administrative fees paid on 225,000 closed disputes.

As discussed further in sections II.E.3.e. and II.E.3.f. of these rules, the reduced administrative fee for both parties in low-dollar disputes would be 50 percent of the full administrative fee

(or \$75) per party per dispute, and the reduced administrative fee for non-initiating parties in ineligible disputes would be 20 percent of the full administrative fee (or \$30) per party per dispute. These fee estimates, as set forth in Table 5, are based on the best available data, the Departments' projected expenditures as of the publication of these proposed rules, and the assumptions that the administrative fee of \$150 per party per dispute in the IDR Process Fees proposed rules is finalized and applicable starting January 1, 2024. These projections may change between the publication of the proposed and final rules based on more recent

data available at that time; thus, the Departments propose to finalize an administrative fee amount that follows the methodology proposed here, as finalized, using the updated data, if applicable. In the event one or more of the policies proposed in these rules are not finalized or the departmental eligibility review is not anticipated to be invoked, the Departments would recalculate the proposed administrative fee amount to reflect relevant changes to the proposed policies when finalizing the administrative fee amount.

BILLING CODE 6325–63–P; 4830–01–P; 4510–29–P; 4120–01–P

TABLE 5: Proposed Administrative Fee Amounts for Disputes Initiated On or After January 1, 2025

Type of Dispute	Proposed Fee Charged per Party per Dispute	
Standard Dispute, Eligible for Federal IDR Process <i>Initiating party does not attest that the highest offer (or aggregate offers for the dispute, whether the dispute is for one item or service, a bundled arrangement, or multiple items and services submitted as part of a batched dispute) made during open negotiation for such dispute by either party was less than the amount of the standard administrative fee and the dispute is determined eligible for the Federal IDR process</i>	Initiating Party	100 percent of the administrative fee; anticipated to be \$150
	Non-initiating Party	100 percent of the administrative fee; anticipated to be \$150
Standard Dispute, Ineligible for Federal IDR Process <i>Initiating party does not attest that the highest offer (or aggregate offers for the dispute, whether the dispute is for one item or service, a bundled arrangement, or multiple items and services submitted as part of a batched dispute) made during open negotiation for such dispute by either party was less than the amount of the standard administrative fee and the dispute is determined ineligible for the Federal IDR process</i>	Initiating Party	100 percent of the administrative fee; anticipated to be \$150
	Non-initiating Party	20 percent of the administrative fee; anticipated to be \$30
Low-Dollar Dispute, Eligible for Federal IDR Process <i>Initiating party attests that the highest offer (or aggregate offers for the dispute, whether the dispute is for one item or service, a bundled arrangement, or multiple items and services submitted as part of a batched dispute) made during open negotiation for such dispute by either party was less than the amount of the standard administrative fee and the dispute is determined eligible for the Federal IDR process</i>	Initiating Party	50 percent of the administrative fee; anticipated to be \$75
	Non-initiating Party	50 percent of the administrative fee; anticipated to be \$75
Low-Dollar Dispute, Ineligible for Federal IDR Process <i>Initiating party attests that the highest offer (or aggregate offers for the dispute, whether the dispute is for one item or service, a bundled arrangement, or multiple items and services submitted as part of a batched dispute) made during open negotiation for such dispute by either party was less than the amount of the standard administrative fee and the dispute is determined ineligible for the Federal IDR process</i>	Initiating Party	50 percent of the administrative fee; anticipated to be \$75
	Non-initiating Party	20 percent of the administrative fee; anticipated to be \$30

and proposed administrative fee amounts, including the reduced administrative fee amounts, as well as the proposed implementation date of the proposed administrative fee.

b. Time of Collection of Certified IDR Entity Fee and Administrative Fee

i. Time of Collection of Certified IDR Entity Fee

The Departments propose to amend 26 CFR 54.9816–8(d)(1)(i), 29 CFR 2590.716–8(d)(1)(i), and 45 CFR 149.510(d)(1)(i) to reflect that each party to a dispute that either the certified IDR entity or the Departments determine is eligible for the Federal IDR process must pay to the certified IDR entity the predetermined certified IDR entity fee no later than the time the parties submit their offers, as described in proposed 26 CFR 54.9816–8(c)(5)(i), 29 CFR 2590.716–8(c)(5)(i), and 45 CFR 149.510(c)(5)(i).

The Departments also propose to codify in 26 CFR 54.9816–8(d)(1)(iii), 29 CFR 2590.716–8(d)(1)(iii), and 45 CFR 149.510(d)(1)(iii) the current practice established in section 10.2 of the Federal IDR Process Guidance for Certified IDR Entities¹⁷⁴ that the certified IDR entity must retain the certified IDR entity fee described in 26 CFR 54.9816–8(d)(1)(i), 29 CFR 2590.716–8(d)(1)(i), and 45 CFR 149.510(d)(1)(i) paid by the party whose offer was not selected (the non-prevailing party, as defined in proposed 26 CFR 54.9816–8(c)(5)(ii)(A)(2), 29 CFR 2590.716–8(c)(5)(ii)(A)(2), and 45 CFR 149.510(c)(5)(ii)(A)(2)), consistent with the No Surprises Act.¹⁷⁵ The Departments further propose to move the existing requirement in current paragraph 26 CFR 54.9816–8T(d)(1)(ii), 29 CFR 2590.716–8(d)(1)(ii), and 45 CFR 149.510(d)(1)(ii), which requires the certified IDR entity to return the fee paid by the prevailing party within 30 business days following the date of the certified IDR entity's payment determination, to 26 CFR 54.9816–8(d)(1)(iii), 29 CFR 2590.716–8(d)(1)(iii), and 45 CFR 149.510(d)(1)(iii). Further, the Departments propose that in the event of a batched dispute in which each party prevails in an equal number of determinations, the certified IDR entity fee would be split evenly between the parties. In that case, the certified IDR entity would be required to return

half of the fee paid by each party within 30 business days following the date of the certified IDR entity's payment determination.

Additionally, the Departments propose to add 26 CFR 54.9816–8(d)(1)(iv), 29 CFR 2590.716–8(d)(1)(iv), and 45 CFR 149.510(d)(1)(iv) to provide that when the parties reach an agreement on an out-of-network rate for qualified IDR items or services, as described in proposed 26 CFR 54.9816–8(c)(3)(i), 29 CFR 2590.716–8(c)(3)(i), and 45 CFR 149.510(c)(3)(i), or agree to withdraw a dispute under the circumstances set forth at proposed 26 CFR 54.9816–8(c)(3)(ii), 29 CFR 2590.716–8(c)(3)(ii), and 45 CFR 149.510(c)(3)(ii), for a dispute that has already been assigned to a certified IDR entity and determined eligible for the Federal IDR process but for which the certified IDR entity has not made a payment determination, the certified IDR entity must return half of each party's certified IDR entity fee within 30 business days of the agreement or withdrawal, unless directed otherwise by both parties. This proposed new paragraph would relocate the similar requirement when parties reach an agreement, currently captured in 26 CFR 54.9816–8T(c)(2)(ii) and (e)(2)(viii), 29 CFR 2590.716–8(c)(2)(ii) and (e)(2)(viii), and 45 CFR 149.510(c)(2)(ii) and (e)(2)(viii), which require the certified IDR entity to return half of each party's certified IDR entity fee within 30 business days of an agreement, and codifies the Departments' interpretation that a withdrawal of a dispute should be treated similarly to a settlement. Similar to when parties settle prior to an eligibility determination and therefore do not need to pay the certified IDR entity fee because the certified IDR entity did not make an eligibility and/or payment determination, when a dispute is withdrawn prior to an eligibility determination, the Departments are of the view that the parties similarly should not be required to pay the fee because the certified IDR entity again did not make an eligibility and/or payment determination. Accordingly, because the certified IDR entity fee is only assessed for disputes that are determined eligible for the Federal IDR process, the Departments clarify that the certified IDR entity fee would not be assessed for a dispute that is withdrawn or settled before the Departments or the certified IDR entity, as applicable, make a determination on the eligibility of the dispute for the Federal IDR process. However, because the obligation to pay the certified IDR entity fee applies to all eligible disputes,

both parties would still be required to pay the certified IDR entity fee if the dispute is withdrawn or settled after the dispute is determined eligible but before the certified IDR entity makes a payment determination.

Finally, the Departments propose to add 26 CFR 54.9816–8(d)(1)(v), 29 CFR 2590.716–8(d)(1)(v), and 45 CFR 149.510(d)(1)(v) to provide that when the parties reach an agreement on an out-of-network rate or agree to withdraw the dispute for which there is a final selection of the certified IDR entity but that has not yet had a final eligibility determination, unless directed otherwise by both parties, the certified IDR entity would be required to return each party's full certified IDR entity fee within 30 business days of the date both parties notify the certified IDR entity that they have agreed on an out-of-network rate or agreed to withdraw the dispute. The purpose of this proposal is to codify the responsibilities of the parties and certified IDR entities when the parties agree to settle or withdraw the dispute, but the dispute has not yet been determined eligible for the Federal IDR process. Similar to the proposal regarding settlements and withdrawals for eligible disputes, because the certified IDR entity fee is only assessed for disputes that are determined eligible for the Federal IDR process, the certified IDR entity fee would not be assessed for a dispute that is withdrawn or settled before the Departments or the certified IDR entity, as applicable, determine the eligibility of the dispute for the Federal IDR process.

The Departments seek comment on these proposals including the treatment of a withdrawal of a dispute similar to a settlement.

ii. Time of Collection of Administrative Fee

The Departments are also proposing multiple changes to the timing of the collection of the administrative fee in proposed 26 CFR 54.9816–8(d)(2)(i)(A), 29 CFR 2590.716–8(d)(2)(i)(A), and 45 CFR 149.510(d)(2)(i)(A). The Departments propose to require the initiating party to pay the administrative fee within 2 business days of the date of preliminary selection of the certified IDR entity pursuant to proposed 26 CFR 54.9816–8(c)(1)(iii), 29 CFR 2590.716–8(c)(1)(iii), and 45 CFR 149.510(c)(1)(iii). The Departments further propose that the non-initiating party must pay the administrative fee within 2 business days of the date of notice that an eligibility determination for the Federal IDR process has been reached by either the certified IDR entity or the Departments, if the

¹⁷⁴ Centers for Medicare & Medicaid Services (Mar. 2023). *Federal Independent Dispute Resolution (IDR) Process Guidance for Certified IDR Entities*. <https://www.cms.gov/files/document/federal-idr-guidance-idr-entities-march-2023.pdf>.

¹⁷⁵ Section 9816(c)(5)(F)(i) of the Code, section 716(c)(5)(F)(i) of ERISA, and section 2799A–1(c)(5)(F)(i) of the PHS Act.

departmental eligibility review applies as proposed in 26 CFR 54.9816–8(c)(2)(ii), 29 CFR 2590.716–8(c)(2)(ii), and 45 CFR 149.510(c)(2)(ii).

As discussed in section II.E.3.f. of this preamble, the Departments propose that the non-initiating party would pay a reduced administrative fee for disputes that are determined ineligible for the Federal IDR process; therefore, eligibility would need to be determined before the non-initiating party is charged the administrative fee. The Departments are of the view that 2 business days to pay the administrative fee would be an appropriate amount of time from the date of preliminary selection of the certified IDR entity (for initiating parties) and from the date of notice of an eligibility determination (for non-initiating parties), because it balances the need for the parties to have adequate notice of the fee being due and adequate time to pay the fee with the need to continue to move the Federal IDR process forward and provide parties with timelier payment determinations.

Although the Departments considered requiring both parties to pay the administrative fee within the same 2-business-day period, failure of the initiating party to pay the administrative fee would result in dispute dismissal as discussed in section II.E.3.d. of this preamble, and neither party would owe the administrative fee for such a dispute. Additionally, the Departments are of the view that it is appropriate to align the non-initiating party's deadline to pay the administrative fee with the date of the eligibility determination because, as proposed in these rules and described in section II.E.3.f. of this preamble, the non-initiating party's administrative fee amount would be determined based on the eligibility of the dispute.

The Departments are of the view that this timing would better ensure that the financial costs to the Departments to administer the Federal IDR process align with the assessed administrative fees. Specifically, as explained in section II.E.3.f. of this preamble, the Departments are of the view that requiring non-initiating parties to pay a reduced administrative fee if the dispute is ineligible would be appropriate because it would take into account the benefits that non-initiating parties receive from having access to the Federal IDR process. Currently, for administrative efficiency, the Departments' guidance allows certified IDR entities the discretion to delay collection of the administrative fee until

a party submits its offer,¹⁷⁶ which is the same time that each party is required to pay the certified IDR entity fee described in 26 CFR 54.9816–8T(d)(1), 29 CFR 2590.716–8(d)(1), and 45 CFR 149.510(d)(1). Amending the timing for administrative fee collection would accelerate dispute processing and ensure that the costs of using the Federal IDR process are being allocated to all parties accessing the process, regardless of whether their disputes are eligible or ineligible.

Furthermore, the Departments propose at 26 CFR 54.9816–8(d)(2)(i)(B), 29 CFR 2590.716–8(d)(2)(i)(B), and 45 CFR 149.510(d)(2)(i)(B) that when the parties reach an agreement on an out-of-network rate for qualified IDR items or services or agree to withdraw the dispute after the dispute is initiated, the administrative fee would not be returned to the parties if preliminary selection of the certified IDR entity has occurred, as described in 26 CFR 54.9816–8(c)(1)(i), 29 CFR 2590.716–8(c)(1)(i), and 45 CFR 149.510(c)(1)(i). This new paragraph would relocate the similar requirement when parties reach an agreement, currently captured in 26 CFR 54.9816–8T(c)(2)(ii), 29 CFR 2590.716–8(c)(2)(ii), and 45 CFR 149.510(c)(2)(ii), which provides that the administrative fee will not be returned to the parties in the event of an agreement, and extends those requirements in the event of a dispute withdrawal. The Departments are of the view that these proposed policies would help ensure that disputing parties are appropriately incentivized to settle disputes through open negotiation before initiating the Federal IDR process. The Departments expect that submission of ineligible disputes would decrease because of this financial incentive combined with the proposed changes to open negotiation, discussed in section II.D. of this preamble, requiring the initiating party to attest that the item or service under dispute is a qualified IDR item or service and to identify the basis for the attestation, which would necessitate the initiating party actively evaluating eligibility before initiating the Federal IDR process.

The Departments also propose in this paragraph that the administrative fee would still be required to be paid if the parties have not yet paid it at the time of settlement or withdrawal, unless the

dispute is closed for nonpayment of the administrative fee by the initiating party 2 business days after preliminary selection of the certified IDR entity. This proposal aligns with the current regulation at 26 CFR 54.9816–8T(d)(2)(i), 29 CFR 2590.716–8(d)(2)(i), and 45 CFR 149.510(d)(2)(i) providing that the administrative fee is non-refundable, as discussed in the October 2021 interim final rules.¹⁷⁷ As stated in the October 2021 interim final rules, the Departments will have incurred expenditures to administer the Federal IDR process even in instances in which the parties reach an agreement before the certified IDR entity makes a payment determination. Thus, the Departments are proposing to codify the requirement that parties must pay the administrative fee for these disputes.

Requiring the initiating party to pay the administrative fee within 2 business days of the date the certified IDR entity is preliminarily selected, which would occur before a dispute's eligibility determination is made, would provide an incentive to initiating parties to reduce the number of ineligible disputes submitted and ensure that the financial burden for administering the Federal IDR process is shared across the parties accessing the process. Consequently, the Departments anticipate that fewer ineligible disputes would be submitted, and all disputes in which a certified IDR entity is preliminarily selected would contribute to the funds available to administer the Federal IDR process, regardless of eligibility. The Departments are of the view that this would improve overall efficiency in the Federal IDR process and potentially enable the Departments to lower the administrative fee at a future date in notice and comment rulemaking, as the costs of carrying out the Federal IDR process would be more equally allocated across a larger proportion of submitted disputes.

The Departments seek comment on these proposals.

c. Manner of Administrative Fee Collection

The Departments propose to amend 26 CFR 54.9816–8(d)(2)(i), 29 CFR 2590.716–8(d)(2)(i), and 45 CFR 149.510(d)(2)(i) to require each party participating in the Federal IDR process to pay the administrative fee directly to the Departments, instead of to the certified IDR entity for remittance to the Departments, as is currently required. The purpose of this proposal would be to improve dispute processing times and reduce certified IDR entities'

¹⁷⁶ See U.S. Department of Health and Human Services, U.S. Department of Labor, and U.S. Department of the Treasury. (Oct. 2022). *Federal Independent Dispute Resolution (IDR) Process Guidance for Certified IDR Entities*. <https://www.cms.gov/files/document/federal-independent-dispute-resolution-guidance-disputing-parties.pdf>.

¹⁷⁷ 86 FR 56001.

administrative burden. To support the transition to this proposed approach of directly collecting the administrative fee and to improve the operation of current processes, the Departments also propose to make conforming amendments to 26 CFR 54.9816–8(e)(2)(vi) and (ix), 29 CFR 2590.716–8(e)(2)(vi) and (ix), and 45 CFR 149.510(e)(2)(vi) and (ix) to reflect that certified IDR entities must maintain appropriate safeguards, controls, and procedures for any administrative fees they may be in possession of before the effective date of the proposed change to the manner of administrative fee collection, if finalized.

The October 2021 interim final rules established that each disputing party's administrative fee was due upon selection of the certified IDR entity and payable to the certified IDR entity.¹⁷⁸ The Departments explained that allowing the certified IDR entity to collect the administrative fee on behalf of the Departments could increase efficiency, streamline the Federal IDR process, and allow for more convenient payment for the disputing parties and the Departments.¹⁷⁹ However, there are many disputes in the Federal IDR process for which no fee has been collected for the work associated with processing the dispute, and the Departments are now of the view that collection of the administrative fee by the Departments directly rather than the certified IDR entities would be more efficient. The Departments are also of the view that, in light of the proposal to collect the administrative fee earlier in the process as proposed in these rules, collection of the administrative fee by the Departments would significantly reduce the burden on certified IDR entities because they would not have to collect fees at two different points in time, track collection of both fees, and then remit payment of the administrative fee to the Departments, as would be required if the proposal to change the administrative fee timing was finalized but the manner of collection was unchanged. Additionally, enabling the Departments to directly collect the administrative fee from the disputing parties may improve collection of the fee, in part through Federal debt collection mechanisms as outlined in section II.E.3.d. of this preamble. Finally, since these proposed rules would require parties to submit open negotiation notices, open negotiation notice responses, notices of initiation, and notice of initiation responses through the Federal IDR portal, as discussed in section II.D. of

this preamble, the Departments would be in the best position to determine the appropriate time to bill and collect the administrative fee from the parties given the Departments' access to this information.

The Departments seek comment on this proposal. Additionally, the Departments seek comment on restricting the manner of payment of administrative and certified IDR entity fees to only electronic payments, including electronic funds transferred from a bank account, rather than allowing payment by check.

d. Application of Federal IDR Process Requirements in Circumstances Involving a Failure To Pay Certified IDR Entity Fees or Administrative Fees

To further streamline dispute processing, these proposed rules outline certain consequences that would apply for failure to timely pay the certified IDR entity fee, the administrative fee, or both fees. Specifically, the Departments propose in paragraph 26 CFR 54.9816–8(d)(1)(ii), 29 CFR 2590.716–8(d)(1)(ii), and 45 CFR 149.510(d)(1)(ii) that if either party fails to pay the certified IDR entity fee by the time the offer is due, that party's offer would not be considered received. The Departments also propose that if a party fails to submit an offer or a party's offer is not considered received due to nonpayment of the certified IDR entity fee, the non-prevailing party would continue to be responsible for payment of the certified IDR entity fee. This means that a certified IDR entity would be able to take all steps consistent with applicable law to collect any certified IDR entity fee owed to it.

The Departments do not propose to change the requirement that each party to a dispute for which a certified IDR entity is selected must pay a non-refundable administrative fee to participate in the Federal IDR process.¹⁸⁰ Further, the Departments do not propose to change the requirement that the party whose offer is not selected by the certified IDR entity is ultimately responsible for payment of the certified IDR entity fee.¹⁸¹

Additionally, the Departments propose to add new proposed paragraph 26 CFR 54.9816–8(d)(2)(i)(C), 29 CFR 2590.716–8(d)(2)(i)(C), and 45 CFR 149.510(d)(2)(i)(C) setting forth that if the initiating party fails to pay the administrative fee within 2 business days of the date of preliminary selection of the certified IDR entity under

paragraph (c)(1)(iii), the dispute would be closed due to nonpayment and neither party would be responsible for the administrative fee. If a dispute is closed for nonpayment of the administrative fee by the initiating party, the Departments would not impose an obligation to pay the administrative fee on either party, since the dispute was terminated before substantial work was undertaken to process it. The Departments also propose in new paragraph (d)(2)(i)(C) that if the non-initiating party fails to pay the administrative fee within 2 business days of an eligibility determination, that party's offer would not be considered received. Even if the non-initiating party fails to submit an offer or the non-initiating party's offer is not considered received due to nonpayment of the administrative fee in accordance with paragraph (d)(2)(i)(A), the non-initiating party would continue to be responsible for payment of the administrative fee. In addition, if the dispute is determined to be ineligible for the Federal IDR process, the non-initiating party would continue to be responsible for payment of the reduced administrative fees discussed in section II.E.3. of this preamble.

Further, the Departments propose to provide in 26 CFR 54.9816–8(d)(2)(i)(D), 29 CFR 2590.716–8(d)(2)(i)(D), and 45 CFR 149.510(d)(2)(i)(D) that any party that fails to timely pay the administrative fee owed in accordance with paragraph (d)(2)(i)(A) of this section is still obligated to pay the administrative fee otherwise due and owing, and that failure to pay the administrative fee would result in a debt owed to the Federal Government, after netting any amounts owed by the Federal Government in accordance with 45 CFR 156.1215, as applicable.¹⁸² The debt would then be collected pursuant to applicable debt collection authorities, including those that prescribe government-wide standards for administrative collection, compromise, disclosure of debt information to credit reporting agencies, referral of claims to private collection contractors for resolution, and referral to the Department of Justice for litigation.

¹⁸² HHS intends to propose in notice and comment rulemaking in the near future to amend 45 CFR 156.1215 to provide that administrative fees for utilizing the No Surprises Act Federal IDR process for health insurance issuers that participate in financial programs under the ACA would be subject to netting as part of HHS' integrated monthly payment and collections cycle. The netting proposals at 45 CFR 156.1215 would only apply to those issuers and their affiliates operating under the same TIN that participate in the financial programs under the ACA.

¹⁸⁰ See 26 CFR 54.9816–8T(d)(2)(i), 29 CFR 2590.716–8(d)(2)(i), and 45 CFR 149.510(d)(2)(i).

¹⁸¹ See *id.*

Additionally, the Departments propose that the party to the dispute that incurs the debt would be determined by the TIN or NPI associated with the plan, issuer, provider, facility, or provider of air ambulance services that is a party to the dispute, which may not be the entity that filed the dispute. This means that when a plan that is a party to a dispute utilizes a TPA or other representative, it is the plan that would incur the administrative fee debt, not the TPA or representative. Similarly, if a provider or facility engages a revenue cycle management company or other representative, the provider or facility would be responsible for the administrative fee debt, not the revenue cycle management company or other representative. A TPA, revenue cycle management company, or other representative would still be allowed to manage or initiate the Federal IDR process on behalf of a disputing party, including remitting the administrative fee amount on behalf of the party to the dispute.

The Departments are of the view that codifying the consequences of failure to pay the certified IDR entity fees and administrative fees would increase transparency and reduce the incidence of nonpayment. The Departments seek comment on these proposals.

e. Administrative Fee Structure for Disputing Parties in Low-Dollar Disputes

The Departments are proposing a framework to reduce the administrative fee for parties in low-dollar disputes to promote equitable access across the spectrum of parties seeking to initiate the Federal IDR process, such as providers in rural communities, small practices, specialties that regularly bill for services that have low-dollar costs, and issuers with a smaller pool of claims to absorb the impact of a standard administrative fee assessed for low-dollar disputes.

The Departments propose to add 26 CFR 54.9816–8(d)(2)(iii)(A) through (C), 29 CFR 2590.716–8(d)(2)(iii)(A) through (C), and 45 CFR 149.510(d)(2)(iii)(A) through (C) to establish a framework for reducing the administrative fee in certain situations. The Departments propose in 26 CFR 54.9816–8(d)(2)(iii)(A), 29 CFR 2590.716–8(d)(2)(iii)(A), and 45 CFR 149.510(d)(2)(iii)(A) to charge both parties a reduced administrative fee when the initiating party attests that the highest offer made during open negotiation by either party was less than the predetermined threshold proposed in these rules. The Departments propose that in order for both parties to be

charged a reduced administrative fee for a dispute, the highest offer (or aggregate offers for a dispute, whether the dispute is for one item or service, a bundled payment arrangement, or multiple items and services submitted as part of a batched dispute) made during open negotiation for such dispute by either party must be less than the amount of the full administrative fee. As such, the Departments propose that the threshold that would apply for disputes initiated on or after January 1, 2025 would equal the amount of the standard administrative fee as proposed in section II.E.3.a. of this preamble, which is proposed to be \$150 for disputes initiated on or after January 1, 2025.

Further, the Departments propose in 26 CFR 54.9816–8(d)(2)(iii)(A), 29 CFR 2590.716–8(d)(2)(iii)(A), and 45 CFR 149.510(d)(2)(iii)(A) that the reduced administrative fee amount for these low-dollar disputes would be 50 percent of the administrative fee amount, equating to \$75 per party per dispute for disputes initiated on or after January 1, 2025, if the proposed administrative fee amount of \$150 per party per dispute is finalized. To determine the amount of the reduced administrative fee, the Departments evaluated various factors pertaining to low-dollar disputes. This discussion appears in section II.E.3.f. of this preamble.

As discussed in section II.E.2. of this preamble, interested parties have expressed concerns that disputes over relatively low-dollar claims, such as radiology claims, are being priced out of the Federal IDR process due to difficulties with batching items and services of sufficient value to make the Federal IDR process feasible. While the Departments anticipate that the new batching provisions proposed in these rules and discussed in section II.E.2. of this preamble would make the Federal IDR process more accessible to many parties, the Departments also want to consider other mechanisms to ensure that the Federal IDR process is financially accessible to a greater number of parties, including parties from rural communities, smaller organizations, and parties disputing services related to specialties that bill for low-dollar services. These parties may have more claims for low-dollar services than other types of parties due to the nature of their practice, which may result in fewer disputes that meet the batching requirements, making batching claims impractical for such parties. Even though the Departments recognize that disputes vary in complexity, resolving a dispute generally costs the Departments the same amount regardless of whether the

dispute involves low-dollar or high-dollar items or services. Accordingly, the Departments are proposing this administrative fee structure to further the goal of financial accessibility while ensuring that the Departments can collect sufficient funds to cover the costs of carrying out the Federal IDR process. If either or both parties to the dispute attest to satisfying the requirements for a reduced administrative fee but the Departments determine that either or both parties did not act in good faith in their submissions or responses, the Departments may decline to charge a reduced administrative fee. The Departments solicit comments on situations in which it would be appropriate for the Departments to decline to charge a party the reduced administrative fee, such as if the initiating party incorrectly attests that no offer submitted during open negotiation exceeded the threshold, and the Departments also solicit comments on additional approaches the Departments should consider to mitigate potential abuse of the proposed reduced administrative fee structure.

Under these proposed rules, a party initiating a dispute in the Federal IDR portal using the notice of IDR initiation form discussed in section II.D.2.a. of this preamble would be required to attest in the Federal IDR portal that the highest offer (including the cumulative total of all line items for batched disputes) made during open negotiation by either party was less than the predetermined threshold, which the Departments propose would equal the amount of the full administrative fee (\$150 per party for disputes initiated on or after January 1, 2025, as discussed in section II.E.3.a. of this preamble). If the initiating party attests that the highest offer made during open negotiation by either party was less than the threshold, the administrative fee amount charged to both parties may be the reduced administrative fee for low-dollar disputes of 50 percent of the administrative fee. If the initiating party does not attest that the highest offer (or aggregate offers for a dispute, whether the dispute is for one item or service, a bundled payment arrangement, or multiple items and services submitted as part of a batched dispute) made during open negotiation by either party was less than the threshold, both parties may be charged the full amount of the proposed administrative fee.

The Departments seek comment on the proposed administrative fee structure for low-dollar disputes, including any guardrails that may be necessary to prevent potential abuse.

Specifically, the Departments seek comment on capping the offers of parties to a low-dollar dispute when the reduced administrative fee for low-dollar disputes applies, such that these parties would be prevented from submitting an offer above the low-dollar dispute threshold amount to ensure that parties requesting to pay the reduced administrative fee actually have disputes that are considered to be low-dollar. The Departments also seek comment on whether the offer cap should be set at the same value as the threshold, or whether the offer cap should be higher than the threshold to allow for some increase between offers made during open negotiation and offers made during the Federal IDR process.

f. Administrative Fee Structure for Non-Initiating Parties in Ineligible Disputes

The Departments are proposing a framework to more equitably allocate costs between disputing parties while also incentivizing non-initiating parties to be responsive throughout the Federal IDR process, especially with respect to challenging the eligibility of a dispute. The Departments propose in 26 CFR 54.9816–8(d)(2)(iii)(B), 29 CFR 2590.716–8(d)(2)(iii)(B), and 45 CFR 149.510(d)(2)(iii)(B) to charge a non-initiating party a reduced administrative fee when either the certified IDR entity or the Departments determine the entire dispute is ineligible for the Federal IDR process. The Departments also propose in 26 CFR 54.9816–8(d)(2)(iii)(B), 29 CFR 2590.716–8(d)(2)(iii)(B), and 45 CFR 149.510(d)(2)(iii)(B) that the reduced administrative fee amount for non-initiating parties in ineligible disputes would be 20 percent of the full administrative fee amount (proposed in section II.E.3.a. of this preamble), equating to \$30 per non-initiating party per dispute if the administrative fee is finalized as proposed.

For the reasons discussed in section II.D.1. of this preamble, implementing an efficient Federal IDR process requires both parties to be active participants in the process. As described in the “Contested Dispute Eligibility” section of the *Initial Report on the Federal Independent Dispute Resolution (IDR) Process, April 15–September 30, 2022*,¹⁸³ submission of ineligible and incomplete disputes delays processing of disputes. The Departments are of the view that charging a reduced

administrative fee to the non-initiating party for an ineligible dispute would more fairly allocate the costs to the Departments associated with ineligible disputes by assigning the majority of those costs to the party best suited to prevent submission of such disputes—the initiating party. If the Departments determine either or both parties have not acted in good faith in their submissions or responses, the Departments may decline to charge a reduced administrative fee. The Departments solicit comments on situations in which the Departments should decline to charge the non-initiating party a reduced administrative fee for an ineligible dispute, such as if the Departments obtain evidence that the non-initiating party withheld key information during open negotiation or initiation that the dispute was ineligible, and the Departments also solicit comments on additional approaches the Departments should consider to mitigate potential abuse of the proposed reduced administrative fee structure.

Additionally, the No Surprises Act requires the administrative fee to be assessed to each party, but does not require the fee amount assessed to each party to be equal.¹⁸⁴ While the non-initiating party did not actively choose to bring the dispute to the Federal IDR process, it would nonetheless utilize the features of the Federal IDR process proposed in these proposed rules, such as open negotiation and the Federal IDR Registry. However, the Departments are of the view that payment of a reduced administrative fee amount for non-initiating parties is appropriate when disputes are not eligible for the Federal IDR process.

The Departments propose that this reduction would only be applied when the entire dispute is determined ineligible for the Federal IDR process. For example, if a batched dispute were determined to be partially ineligible (that is, some line items were eligible and some were ineligible), the non-initiating party may still be required to pay the full administrative fee amount, because the eligible line item(s) of the dispute would continue to move through the Federal IDR process.

To develop the proposed administrative fee amounts for low-dollar disputes and ineligible disputes, the Departments considered several factors. Specifically, compared to ineligible disputes, the Departments are of the view that charging a higher

reduced administrative fee amount for both parties in low-dollar disputes would be appropriate because low-dollar disputes generally proceed further in the Federal IDR process and result in either a payment determination or a negotiated settlement, and the additional Federal IDR process steps utilized by the parties incur additional expenses. However, non-initiating parties in ineligible disputes utilize fewer Federal IDR process steps because the dispute is closed before reaching a payment determination. In the event a low-dollar dispute is ineligible, the non-initiating party may be assessed the lower of the reduced administrative fee amounts, which would be the ineligible dispute reduced administrative fee amount. The Departments are of the view that this would be an equitable structure for both initiating and non-initiating parties and would help the Departments ensure that the total amount of administrative fees for each year is estimated to be equal to the amount of expenditures estimated to be made by the Departments to carry out the Federal IDR process, in compliance with the requirements of the No Surprises Act.

To determine the projected amounts of the reduced administrative fees, the Departments evaluated various factors based on the data available to the Departments on both ineligible and low-dollar disputes, including:

- Reduction of follow-up required for ineligible disputes;
- Lower utilization of the Federal IDR portal for disputes that are closed as ineligible before a payment determination; and
- The proportion of total disputes that are ineligible or low-dollar.

After evaluating these factors, the Departments balanced the need to collect an administrative fee from all parties to disputes that utilize the Federal IDR portal with the need to equitably allocate burden across the parties, as well as the need to enable greater access to the Federal IDR process, and determined that assessing a reduced administrative fee amount of 50 percent of the full administrative fee for both parties in a low-dollar dispute and 20 percent of the full administrative fee for the non-initiating party in an ineligible dispute would be appropriate.

The Departments seek comment on this proposal, including whether the amount of the reduced administrative fee for non-initiating parties in ineligible disputes should be the same as the amount of the reduced administrative fee for both parties in low-dollar disputes discussed in section II.E.3.e. of this preamble.

¹⁸³ See U.S. Department of Health and Human Services, U.S. Department of Labor, and U.S. Department of the Treasury, *Initial Report on the Federal Independent Dispute Resolution (IDR) Process, April 15–September 30, 2022*, <https://www.cms.gov/files/document/initial-report-idr-april-15-september-30-2022.pdf>.

¹⁸⁴ See section 9816(c)(8)(A) of the Code, section 716(c)(8)(A) of ERISA, and section 2799A–1(c)(8)(A) of the PHS Act.

4. Payment Determination

a. Submission of Offers Deadline

Sections 9816(c)(5)(B) and 9817(b)(5)(B) of the Code, sections 716(c)(5)(B) and 717(b)(5)(B) of ERISA, and sections 2799A–1(c)(5)(B) and 2799A–2(b)(5)(B) of the PHS Act set forth that not later than 10 days after the date of selection of the certified IDR entity with respect to a determination for a qualified IDR item or service, the plan or issuer and the provider, facility, or provider of air ambulance services must each submit to the certified IDR entity an offer for a payment amount for such qualified IDR item or service. Under the October 2021 interim final rules, the Departments established that the offer must be submitted not later than 10 business days after the selection of the certified IDR entity. The Departments specified that parties to the Federal IDR process must also submit information requested by the certified IDR entity relating to the offer.

To establish that the submission of offer is due from the provider, facility, or provider of air ambulance services and plan or issuer not later than 10 business days after the date of final selection of the certified IDR entity, as discussed in section II.E.1.a.ii. of this preamble, the Departments propose to redesignate 26 CFR 54.9816–8(c)(4), 29 CFR 2590.716–8(c)(4), and 45 CFR 149.510(c)(4) as 26 CFR 54.9816–8(c)(5), 29 CFR 2590.716–8(c)(5), and 45 CFR 149.510(c)(5) and amend redesignated 26 CFR 54.9816–8(c)(5)(i), 29 CFR 2590.716–8(c)(5)(i), and 45 CFR 149.510(c)(5)(i). This proposed amendment would establish that the time period for submission of offers would commence when the Departments notify the parties that the certified IDR entity has attested it has no conflicts of interest, or if the Departments have granted an extension to the eligibility determination timeframe described at proposed 26 CFR 54.9816–8(g)(1)(ii)(A), 29 CFR 2590.716–8(g)(1)(ii)(A), and 45 CFR 149.510(g)(1)(ii)(A) due to extenuating circumstances, when an eligibility determination has been made.

b. Payment Determination and Notification Deadline

Sections 9816(c)(5)(A) and 9817(b)(5)(A) of the Code, sections 716(c)(5)(A) and 717(b)(5)(A) of ERISA, and sections 2799A–1(c)(5)(A) and 2799A–2(b)(5)(B) of the PHS Act set forth that not later than 30 days after the date of selection of the certified IDR entity with respect to a determination for a qualified IDR item or service, the certified IDR entity will select one of the

submitted offers to be the amount of payment for such item or service and will notify the provider or facility and the plan or issuer of the offer selected. Under the October 2021 interim final rules, the Departments established that the certified IDR entity must select an offer no later than 30 business days after the selection of the certified IDR entity and set forth other requirements for certified IDR entities when rendering payment determinations.

These rules propose to redesignate 26 CFR 54.9816–8(c)(4), 29 CFR 2590.716–8(c)(4), and 45 CFR 149.510(c)(4) as 26 CFR 54.9816–8(c)(5), 29 CFR 2590.716–8(c)(5), and 45 CFR 149.510(c)(5), respectively, and the proposal described in this section reflects that redesignation. With regard to the requirements for payment determination and notification, at redesignated 26 CFR 54.9816–8(c)(5)(ii), 29 CFR 2590.716–8(c)(5)(ii), and 45 CFR 149.510(c)(5)(ii), the Departments propose several amendments to align with other proposed updates to regulatory text, to make technical amendments, and to codify existing subregulatory guidance. The Departments propose to amend the regulatory text at 26 CFR 54.9816–8(c)(5)(ii), 29 CFR 2590.716–8(c)(5)(ii), and 45 CFR 149.510(c)(5)(ii) to reflect that the payment determination and notification deadline would be based on the date of final selection of the certified IDR entity, under proposed paragraph 26 CFR 54.9816–8(c)(1)(iv)(C), 29 CFR 2590.716–8(c)(1)(iv)(C), and 5 CFR 149.510(c)(1)(iv)(C), which is described further in section II.E.1.a.ii. of this preamble. Similar to the proposed amendment to the submission of offers deadline, this proposed amendment would align the sections of regulatory text and specify that these time periods would not commence at the date of preliminary selection of the certified IDR entity (before the certified IDR entity attests it has no conflicts of interest), but rather would be based on the date of final selection of the certified IDR entity. Additionally, if the Departments grant an extension to the eligibility determination timeframe described at proposed 26 CFR 54.9816–8(g)(1)(ii)(A), 29 CFR 2590.716–8(g)(1)(ii)(A), and 45 CFR 149.510(g)(1)(ii)(A) for extenuating circumstances, the submission of offers deadline would be based on the date of eligibility determination. This would create consistency across the timeframes for the Federal IDR process described in these rules and improve implementation of the Federal IDR process.

Further, the Departments propose technical amendments to update the cross references in paragraphs 26 CFR

54.9816–8(c)(5)(ii)(A) and (B), 29 CFR 2590.716–8(c)(5)(ii)(A) and (B), and 45 CFR 149.510(c)(5)(ii)(A) and (B) to reflect the proposed redesignation of paragraph 26 CFR 54.9816–8(c)(5), 29 CFR 2590.716–8(c)(5), and 45 CFR 149.510(c)(5). Within these paragraphs, reference to paragraphs (c)(4)(i) and (c)(4)(iii) would be updated to paragraphs (c)(5)(i) and (c)(5)(iii), respectively, and reference to paragraphs (c)(4)(ii)(A) and (c)(4)(vi) would be updated to paragraphs (c)(5)(ii)(A) and (c)(5)(vi), respectively.

Finally, the Departments propose to codify definitions for the prevailing and non-prevailing parties, which were described in the Calendar Year 2022 Fee Guidance for the Independent Dispute Resolution Process and in the October 2021 interim final rules. The Departments propose to add paragraphs 26 CFR 54.9816–8(c)(5)(ii)(A)(1) and (2), 29 CFR 2590.716–8(c)(5)(ii)(A)(1) and (2), and 45 CFR 149.510(c)(5)(ii)(A)(1) and (2), which would establish the definitions of prevailing and non-prevailing party in the case of single determinations or batched determinations. The Departments propose that a prevailing party, in the case of single determinations, would be the party whose offer is selected by the certified IDR entity. In the case of batched determinations, the prevailing party would be the party with the most determinations in its favor. The Departments propose that the non-prevailing party, in the case of single determinations, would be the party whose offer is not selected by the certified IDR entity and would be responsible for paying the certified IDR entity fee. In the case of batched determinations, the party with the fewest determinations in its favor is considered the non-prevailing party and would be responsible for paying the certified IDR entity fee. Codifying these definitions, already used by the certified IDR entities, would increase the clarity and consistency of regulatory requirements related to payment determinations and improve the parties' understanding of certified IDR entity determinations.

The Departments solicit comment on the proposals related to payment determination and notification.

5. Extension of Time Periods for Extenuating Circumstances

Under section 9816(c)(9) of the Code, section 716(c)(9) of ERISA, and section 2799A–1(c)(9) of the PHS Act, and as explained in the October 2021 interim final rules and subregulatory guidance issued by the Departments, the time periods required under the No Surprises

Act and 26 CFR 54.9816–8T, 29 CFR 2590.716–8, and 45 CFR 149.510 (other than the timing of the payments to prevailing parties) may be modified in the case of extenuating circumstances at the Departments' discretion.

Under current regulations,¹⁸⁵ the Departments may extend time periods on a case-by-case basis if the extension is necessary to address delays due to matters beyond the control of the parties or for good cause, such as due to a natural disaster that prevents certified IDR entities, providers, facilities, providers of air ambulance services, plans, or issuers from complying with an applicable time period. In addition, the parties must attest that prompt action will be taken to ensure that a payment determination is made as soon as administratively practicable under the circumstances. As the October 2021 interim final rules explain, parties may request an extension by submitting a Request for Extension due to Extenuating Circumstances through the Federal IDR portal, including an explanation about the extenuating circumstances and why the extension is needed.¹⁸⁶ However, requesting an extension does not toll any of the Federal IDR process timeframes unless and until an extension is granted.

Therefore, under this authority, the Departments propose, in accordance with sections 9816(c)(9) of the Code, section 716(c)(9) of ERISA, and section 2799A–1(c)(9) of the PHS Act, to amend and add new provisions to 26 CFR 54.9816–8(g), 29 CFR 2590.716–8(g), and 45 CFR 149.510(g). The Departments are proposing to amend 26 CFR 54.9816–8T(g), 29 CFR 2590.716–8(g), and 45 CFR 149.510(g) to combine the information in existing paragraphs (g)(1)(i) and (g)(1)(ii) into paragraph (g)(1)(i) and to establish at paragraph (g)(1)(i) that the Departments, or at the request of a certified IDR entity or a party, would determine whether an extension is necessary because the parties or certified IDR entity cannot meet applicable timeframes due to matters beyond the control of the certified IDR entity or one or both parties, or for other good cause. Under these proposed rules, the Departments would provide an extension of the time periods if they identify unforeseen or good cause delays on a case-by-case basis, as opposed to solely relying on one of the parties to submit an extension request. The Departments may detect these issues before either party would and could immediately grant the

necessary extension without having to wait for the submission of a formal request. Further, these proposed changes would create greater flexibility for certified IDR entities. For example, a certified IDR entity may receive a high volume of disputes that could lead to the certified IDR entity being unable to resolve payment determinations within the 30-business-day period. With the proposed changes to 26 CFR 54.9816–8(g)(1)(i), 29 CFR 2590.716–8(g)(1)(i), and 45 CFR 149.510(g)(1)(i), the certified IDR entity could submit an extension request for the Departments' consideration. Often, the certified IDR entity may be best positioned to identify issues that warrant such an extension on a case-by-case basis.

The Departments also propose to establish at 26 CFR 54.9816–8(g)(1)(ii), 29 CFR 2590.716–8(g)(1)(ii), and 45 CFR 149.510(g)(1)(ii) a generally applicable extension of time periods when the Departments determine that such extension is necessary due to extenuating circumstances that contribute to systematic delays in processing disputes under the Federal IDR process, such as a high volume of disputes or Federal IDR portal system failures. The Departments would post a public notice about any generally applicable extensions of time periods. For example, this proposed flexibility would be used, in addition to the generally applicable permission to toll timeframes during pending requests for additional information, to provide extensions when the volume of disputes initiated exceeds the certified IDR entities' capacity to complete eligibility determinations within the 5-business-day timeframe proposed in these rules, and to provide extensions when systematic failures within the Federal IDR portal impact the parties' and or certified IDR entities' ability to comply with any of the required timeframes in the Federal IDR process.

Under extenuating circumstances caused by an unforeseen high volume of disputes, the Departments would grant certified IDR entities an extension of the eligibility determination timeframe. The amount of time provided in such an extension would be determined by the Departments based on the volume of disputes and the number of active certified IDR entities at the time the extension is granted. An extension of the eligibility determination deadline, if granted by the Departments, would not alter the length of the subsequent timeframes in the Federal IDR process. Rather, the extended eligibility deadline would be a starting point for the other established IDR deadlines. Accordingly, the submission of an offer would be due

10 business days after the extended eligibility determination timeframe and the payment determination would be due 30 business days after the extended eligibility determination timeframe, in accordance with the requirements established in statute and regulation.

For example, if while monitoring IDR initiation data, the Departments detect a high volume of disputes initiated during the month of June and anticipate that the volume increase would prevent the certified IDR entities from reaching a payment determination within 30 business days of final selection of the certified IDR entity, as required by regulation, the Departments would post a public notice indicating a 30-business-day extension of the eligibility timeframe for all disputes in which the certified IDR entity was selected on June 1 through July 1. Rather than the 5-business-day eligibility determination deadline, certified IDR entities would have 30 business days to review eligibility on disputes initiated within this time period. In this example, a certified IDR entity was selected for a dispute on June 5 and attested to having no conflict of interest with respect to the dispute on June 6. The Departments would provide notice to the disputing parties that the certified IDR entity was selected on June 7, which would be the date of final selection of the certified IDR entity. The certified IDR entity would timely communicate the eligibility determination for the dispute by June 20, under the extension granted by the Departments. The date of eligibility determination (June 20) would become day 0 for calculating the remaining deadlines in the timeframe for the IDR process. As such, the submission of offer would be due from the disputing parties 10 business days (July 5) after the eligibility determination, and the payment determination would be due from the certified IDR entity 30 business days (August 2) after the eligibility determination.

Under a second scenario, when a systematic failure of the Federal IDR portal impacts parties' or certified IDR entities' ability to comply with one or more of the required Federal IDR process timeframes, the Departments would grant the parties and/or the certified IDR entities an extension to the timeframe(s) which the Departments determine relevant. An extension under these circumstances would not alter the duration of the subsequent timeframes within the Federal IDR process, but, similar to the extension of eligibility determinations, would update the start dates of the subsequent timeframes. For example, if a systems failure crashed the

¹⁸⁵ 26 CFR 54.9816–8T(g)(1), 29 CFR 2590.716–8(g)(1), and 45 CFR 149.510(g)(1).

¹⁸⁶ 86 FR 56009 through 56010.

Federal IDR portal on June 1 and 2, the Departments could grant a general extension across all the Federal IDR process timeframes and apply an additional 2 business days to each relevant deadline on active disputes in the portal. In this example, if a non-initiating party's deadline to submit the notice of IDR initiation response occurred during the portal outage, they would receive a 2-business-day extension beginning the day that the systems failure is rectified. The party's new deadline for submitting the notice of IDR initiation response would be June 6.

Under these proposed changes the Departments would extend the time periods under the Federal IDR process without requiring a case-by-case analysis of individual extension requests. The Departments are of the view that granting certain extensions in this manner would provide protection for parties engaged in the Federal IDR process from the impact of systematic processing delays and ensure that unforeseen circumstances do not unfairly disadvantage a party or hinder its ability to comply with the Federal IDR process timeframes. This would also provide more transparency into the timing it would take for a dispute to be processed.

The Departments seek comment on these proposals.

F. Federal IDR Process Registration of Group Health Plans, Health Insurance Issuers, and Federal Employees Health Benefits Carriers

The proposed addition of 26 CFR 54.9816–9, 29 CFR 2590.716–9, and 45 CFR 149.530 would require that plans and issuers subject to the Federal IDR process submit certain information to the Departments through a registry. As explained later in section IV., OPM's regulations at 5 CFR 890.114 would require Federal Employees Health Benefits (FEHB) Program carriers to submit certain information through this registry. Upon submission of this information, each plan, issuer, or FEHB carrier would receive an IDR registration number ("registration number"). This registration number would make it easier for parties initiating disputes to acquire the information needed to ensure those disputes are eligible for the Federal IDR process. The registration number would help parties distinguish between different types of coverage (such as distinguishing between insurance coverage offered by an issuer, a self-insured group health plan for which an issuer serves as a TPA, or coverage offered by a FEHB carrier). The registry would be searchable, and

parties would have access to the relevant registration number through the disclosure described in proposed 26 CFR 54.9816–6(d), 29 CFR 2590.716–6(d), and 45 CFR 149.140(d), the notice described in proposed 26 CFR 54.9816–8(b)(1)(ii), 29 CFR 2590.716–8(b)(1)(ii), and 45 CFR 149.510(b)(1)(ii), and the response notice in proposed 26 CFR 54.9816–8(b)(1)(iii), 29 CFR 2590.716–8(b)(1)(iii), and 45 CFR 149.510(b)(1)(iii). Specifically, plans, issuers, and FEHB carriers would be required to provide the following information upon registration: (1) the legal business name (if any) of the group health plan, issuer, or FEHB carrier and, if applicable, the legal business name of the group health plan sponsor; (2) whether the plan or coverage is a self- or fully-insured group health plan subject to ERISA, individual health insurance coverage, a plan offered by a FEHB carrier, a self- or fully-insured non-Federal governmental plan, or a self- or fully-insured church plan; (3) the State(s) in which the plan or coverage is subject to a specified State law for any items or services to which the protections against balance billing apply; (4) the State(s) in which the plan or coverage is subject to an All Payer Model Agreement under section 1115A of the Social Security Act for any items or services to which the protections against balance billing apply; (5) for self-insured group health plans not otherwise subject to State law, any State(s) in which the group health plan has properly effectuated an election to opt in to a specified State law, if that State allows a plan not otherwise subject to the State law to opt in; and, for FEHB plans that adopt a specified State law pursuant to their FEHB carrier's contract terms, any State(s) in which they have made such an adoption; (6) contact information, including a telephone number and email address, for the appropriate person or office to initiate open negotiations for purposes of determining an amount of payment (including cost sharing) for such item or service; (7) the 14-digit Health Insurance Oversight System (HIOS) identifier, or, if the 14-digit HIOS identifier has not been assigned, the 5-digit HIOS identifier, or if no HIOS identifier is available, the plan's or the plan sponsor's Employer Identification Number (EIN) and the plan's plan number (PN), if a PN is available; or for FEHB carriers, the applicable contract number(s) and plan code(s); (8) any additional information needed to identify the plan or issuer and the applicable Federal and State requirements for determining

appropriate out-of-network payment rates for items or services to which the protections against balance billing apply, as specified by the Departments in guidance, or such additional information needed with respect to FEHB carriers as specified by OPM in guidance; and (9) any additional information needed for purposes of administrative fee collection, as specified by the Departments in guidance, or such additional information needed with respect to FEHB carriers as specified by OPM in guidance.

The Departments would gather the registration information in a centralized IDR registry, which the Departments would make available through the Federal IDR portal to parties seeking to initiate an open negotiation or a dispute. The Departments solicit comment on whether to also make the registry available to the public.

Plans and issuers with coverage subject to the Federal IDR process on the effective date of the final rules would be required to register within 30 business days after the effective date of the final rules, if finalized, while plans and issuers that begin offering coverage subject to the Federal IDR process after the effective date of the final rules, if finalized, would be required to complete their initial registration on the date that they begin offering such coverage. In the event that the registry becomes available after the effective date of the final rule, plans and issuers would be required to register 30 business days after the registry becomes available. Registered plans and issuers would be required to update the information associated with their Federal IDR registration number through the Federal IDR portal within 30 business days of any change to the information reported in the registry and to confirm accuracy annually during the fourth quarter of each calendar year. A group health plan's or health insurance issuer's initial registration and subsequent updates to its registration information could be completed and submitted by a third party with authority to act on behalf of the group health plan or health insurance issuer. However, if a group health plan or health insurance issuer chooses to enter into such an agreement with a third party, the plan or issuer would retain responsibility for compliance with the proposed registration requirements.

The Departments solicit comment on whether plans and issuers with coverage subject to the Federal IDR process on the effective date of the final rules would be able to register by 30 business days after the effective date of the final

rules or would need additional time to register. The Departments also solicit comment on the potential impact on providers, facilities, and providers of air ambulance services if plans and issuers are permitted additional time to register.

In addition, the Departments are aware that plans and issuers often engage TPAs or other service providers to manage payment disputes subject to the Federal IDR process on their behalf. Accordingly, to reflect this existing industry practice, the Departments propose that the aforementioned requirements with respect to the registry under proposed 26 CFR 54.9816–9(b)(1)–(3), 29 CFR 2590.716–9(b)(1)–(3), and 45 CFR 149.530(b)(1)–(3) may be performed by a TPA or service provider with authority to act on behalf of the group health plan or health insurance issuer offering group or individual health insurance coverage subject to the Federal IDR process. The Departments propose that if the registration requirements are performed by such TPA or service provider, the group health plan or health insurance issuer offering group or individual health insurance coverage must require that such TPA or service provider clearly delineate each group health plan or health insurance issuer offering group or individual health insurance coverage for which the TPA or service provider has authority to act. Even where a third party performs the registration requirements, these proposed rules would still require that each group health plan or health insurance issuer offering group or individual health insurance coverage subject to the Federal IDR process be assigned a unique registration number. The Departments also propose to make clear that if such third party fails to provide the information in compliance with proposed 26 CFR 54.9816–9(b)(1)–(3), 29 CFR 2590.716–9(b)(1)–(3), and 45 CFR 149.530(b)(1)–(3), the plan or issuer would be in violation of the requirements of this section. The Departments solicit comments on this approach and whether there are any additional clarifications or flexibilities needed to ensure that the registry includes all relevant information for all parties that engage in the Federal IDR process.

Proposed 26 CFR 54.9816–9, 29 CFR 2590.716–9, and 45 CFR 149.530 are intended to address concerns that providers, facilities, and providers of air ambulance services shared with the Departments about initiating both open negotiation and the Federal IDR process. Initiating parties, particularly those that are providers, facilities, and providers of air ambulance services, report that they

are often missing or cannot locate key information needed for open negotiation and the Federal IDR process despite the disclosure requirements established in sections 26 CFR 54.9816–6T(d)(1), 29 CFR 2590.716–6(d)(1), and 45 CFR 149.140(d)(1). First, the parties report difficulty finding the appropriate contact information to initiate open negotiation and the Federal IDR process. Second, they report difficulty determining whether the out-of-network rate for applicable items or services is governed by State or Federal law, including whether a self-insured plan has opted into a specified State law in States that allow these opt-ins. Third, they assert that it can be difficult to differentiate between multiple group health plans offered by the same plan sponsor, as well as between a fully-insured plan offered by an issuer versus a self-insured group health plan administered by that issuer in its capacity as a TPA. Likewise, issuers and group health plan sponsors expressed concerns to the Departments that providers, facilities, and providers of air ambulance services sometimes initiate open negotiations or the Federal IDR process using incorrect contact information, or even initiate negotiations against the wrong plan or issuer. These communication difficulties present problems related to: (1) initiating open negotiation and the Federal IDR process with the correct party; (2) determining whether the items or services are eligible for the Federal IDR process; and (3) initiating correctly batched and bundled disputes that group together only items and services paid by the same plan or issuer.

Given these concerns, the Departments are proposing to create a single registry of plans and issuers subject to the Federal IDR process to foster better communication between disputing parties. These changes would benefit all parties by reducing the need for time-consuming and expensive follow-up by disputing parties, certified IDR entities, and the Departments to obtain necessary information.

The Departments recognize that plans and issuers have expressed concern about the burden of additional required disclosures. However, while plans and issuers would incur some additional administrative burden from providing plan and contact information through mandatory registration, the Departments are of the view that this approach also mitigates some administrative burden if the registry reduces the number of incorrectly submitted or incorrectly batched disputes.

The Departments seek to minimize the burden and ease compliance for plans

and issuers by avoiding the issuance of duplicate registration numbers for the same plan or a single registration number for multiple plans. OPM similarly seeks to resolve concerns as discussed above, minimize burden and ease compliance for FEHB carriers. To that end, the Departments seek comment on the best way to separately identify multiple group health plans offered by the same plan sponsor, or multiple FEHB plans offered by the same FEHB carrier, and whether plans, issuers, or FEHB carriers would need to register multiple points of contact in their submissions to the IDR registry.

To further minimize the reporting burden on plans, issuers, and FEHB carriers, the Departments are considering and solicit comment on whether to require plans, issuers, and FEHB carriers to register only after submitting or receiving their first open negotiation notice or only after receiving a certain number of disputes in a calendar year (for example, five disputes). Many group health plans are party to few, or no surprise billing disputes annually; excepting such parties from the registration requirement may minimize the regulatory burden on group health plans that receive few or no surprise billing disputes in a given year and could keep the registry size manageable. However, if registration is not universal, providers, facilities, and providers of air ambulance services may still experience difficulty accessing all information needed to initiate open negotiation and engage in the Federal IDR process with the subset of plans and issuers that would not be required to register.

The Departments expect that providers, facilities, and providers of air ambulance services would make decisions about how and whether to initiate batched disputes based on the information submitted to the registry. The Departments, therefore, are considering and solicit comment on appropriate measures to address circumstances in which a provider or facility initiates a batched dispute in good faith based on information submitted by a plan or issuer as part of its registration and this dispute is later determined to be incorrectly batched.

Finally, the Departments seek comment on this registration policy and what approaches should be adopted to ensure its accuracy, as well as whether submission of the offer as described in newly redesignated 26 CFR 54.9816–8(c)(5)(i), 29 CFR 2590.716–8(c)(5)(i), and 45 CFR 149.510(c)(5)(i) should be restricted until completion of the proposed registration.

G. Transparency Regarding In-Network and Out-of-Network Deductibles and Out-of-Pocket Limitation

In addition to the challenges discussed previously, some interested parties have stated that it is difficult to know at the point of care whether a patient's plan or coverage is subject to Federal or State surprise billing protections. In general, section 9816(e) of the Code, section 716(e) of ERISA, and section 2799A–1(e) of the PHS Act, as added by section 107 of division BB of the CAA, require a group health plan or a health insurance issuer offering group or individual health insurance coverage and providing or covering any benefit with respect to items or services to include, in clear writing, on any physical or electronic plan or insurance ID card issued to participants, beneficiaries, or enrollees, any applicable deductibles, any applicable out-of-pocket maximum limitations, and a telephone number and website address for individuals to seek consumer assistance information, such as information related to in-network hospitals and urgent care facilities. The Departments are considering, under the general rulemaking authority granted to the Departments to establish the Federal IDR process under section 9816(c)(2)(A) of the Code, section 716(c)(2)(A) of ERISA, and section 2799A–1(c)(2)(A) of the PHS Act, whether requiring that each plan or insurance card include information about whether the individual's plan or coverage is subject to Federal or State surprise billing protections would facilitate information sharing with respect to the Federal IDR process. The Departments acknowledge that the ID cards may not be able to clarify the applicability of the Federal IDR process in all contexts, because in some States the Federal protections will apply for some items, services, and providers, while the State protections will apply for others. The Departments seek comment on this potential approach, including whether ID cards should display the plan or coverage type (such as, self-insured or fully-insured ERISA plan, non-Federal governmental plan, church plan, FEHB plan, or individual health insurance coverage), as well as whether a symbol or code could be included on cards that would indicate the applicable regulatory authority of the plan or coverage (that is, State or Federal entity, or both).

H. Applicability

1. Applicability Dates

These proposed rules would modify and add to certain provisions of the July 2021 and October 2021 interim final

rules. Those interim final rules generally became applicable for plan years (in the individual market, policy years) beginning on or after January 1, 2022.

The provision proposed in 26 CFR 54.9816–3, 29 CFR 2590.716–3, and 45 CFR 149.30 to add the definition of bundled payment arrangement would apply beginning on the effective date of the final rules. These proposed rules would codify the existing definition set forth in guidance and would not require providers, facilities, providers of air ambulance services, plans, issuers, or certified IDR entities to modify existing processes or their own portals or systems to align with the proposed definition. Therefore, it would be appropriate for this definition to become applicable immediately upon the effective date of the final rules, if finalized.

The provision in proposed new 26 CFR 54.9816–6A, 29 CFR 2590.716–6A, and 45 CFR 149.100 that plans and issuers communicate information using CARCs and RARCs, as specified in guidance, would apply beginning on the effective date of the final rules, if finalized. The Departments would issue future guidance on the use of CARCs and RARCs in both electronic transactions and formats outside the purview of the HIPAA transaction standards, including paper remittance advice, to implement this proposed regulatory requirement. Should this proposal be finalized, the Departments recognize that plans and issuers would need time to make systems changes and other modifications to operationalize the use of CARCs and RARCs and are considering an approach under which the final rules would establish the implementation timeframe for the use of CARCs and RARCs following the issuance of guidance. For example, the final rules could specify that the requirement to use a specified CARC or RARC applies beginning on the date that is a certain timeframe, such as 6 months or 1 year, after the issuance of guidance. Alternatively, the final rules could provide that guidance issued by the Departments would establish an interval of not less than, for example, 6 months between when guidance is issued and when plans and issuers must begin using a specified CARC or RARC. This would balance plans' and issuers' interest in certainty in a minimum implementation timeframe while allowing for flexibility where the Departments determine necessary. The Departments seek comments on these potential approaches, including what timeframe would provide plans and issuers sufficient time to comply.

The proposed modifications to the regulations at 26 CFR 54.9816–6(d), 29 CFR 2590.716–6(d), and 45 CFR 149.140(d) addressing information to be shared about the QPA would apply to disclosures required to be provided on or after the effective date of the final rules, if finalized. The Departments note that many of these proposed changes are simply corrections or clarifications that would not substantially affect current plan or issuer operations. While these disclosures would be required to include some new content—namely a statement that a provider, facility, or provider of air ambulance services must notify the Departments when initiating open negotiation, the legal business name of the plan and plan sponsor (if applicable) and issuer, and the registration number assigned under these proposed rules—the Departments do not anticipate significant operational burden for plans and issuers to modify existing processes to include this information. The proposed regulatory text makes clear that plans and issuers would not be required to include a statement about notifying the Departments to initiate open negotiation until the open negotiation notice can be submitted through the Federal IDR portal. Further, plans and issuers would not be required to include their assigned registration number until the Federal IDR registry becomes available and the plan or issuer is registered.

The proposed modifications to the Federal IDR process that would apply to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the final rules, if finalized, include:

- The requirements for batched qualified IDR items and services in 26 CFR 54.9816–8(a)(2)(i), 29 CFR 2590.716–8(a)(2)(i) and 45 CFR 149.510(a)(2)(i);
- The provisions regarding the open negotiation notice, open negotiation response notice, notice of IDR initiation, and notice of IDR initiation response in 26 CFR 54.9816–8(b), 29 CFR 2590.716–8(b) and 45 CFR 149.510(b);
- The proposed rules governing the selection of a certified IDR entity, the Federal IDR process eligibility review, the authority to continue negotiations or withdraw, and the treatment of batched and bundled qualified IDR items and services in 26 CFR 54.9816–8(b) and (c)(1) through (c)(4), 29 CFR 2590.716–8(b) and (c)(1) through (c)(4), and 45 CFR 149.510(b) and (c)(1) through (c)(4); and
- Modifications made to the deadline for the submission of offers and payment determination and notification

in 26 CFR 54.9816–8(c)(5)(i) and (ii), 29 CFR 2590.716–8(c)(5)(i) and (ii), and 45 CFR 149.510(c)(5)(i) and (ii); and

- Modifications made to the suspension of certain subsequent IDR requests and subsequent submission of requests submitted in 26 CFR 54.9816–8(c)(5)(vii)(B) and (C), 29 CFR 2590.716–8(c)(5)(vii)(B) and (C), and 45 CFR 149.510(c)(5)(vii)(B) and (C).

The Departments recognize that each of these proposed changes would require providers, facilities, providers of air ambulance services, plans, issuers, and certified IDR entities to modify existing processes and their own portals or systems to align with the proposed requirements. For example, some certified IDR entities may need to update their own proprietary portals used to facilitate their eligibility and payment determinations to align with the new batching requirements. Further, the Departments would need to design and implement system changes to the Federal IDR portal, such as allowing the disputing parties to submit new and updated notices through the Federal IDR portal and updating the system's collection of newly permissible batched disputes. This proposed applicability date is intended to ensure the Departments, disputing parties, and certified IDR entities have sufficient time to understand the proposed changes to the Federal IDR process and modify current operations.

The proposed modifications to the regulations at 26 CFR 54.9816–8(d), 29 CFR 2590.716–8(d), and 45 CFR 149.510(d) addressing the time and manner of payment and collection of the administrative and certified IDR entity fees, the procedures in the event that either party fails to timely pay the administrative or certified IDR entity fee, and the framework for establishing the administrative and certified IDR entity fee structures would apply to disputes initiated on or after January 1, 2025. Similar to the proposed open negotiation, IDR initiation, and batched determination requirements, the Departments would need sufficient time to modify current operations so that the Departments could charge and collect the administrative fees directly from the parties, which are currently collected by the certified IDR entities and subsequently remitted to the Departments. The Departments would also need to update their payment systems and the Federal IDR portal to implement the proposed consequences when either party fails to pay the certified IDR entity fee or the administrative fee, such as the proposals to close a dispute when the initiating party fails to pay the administrative fee

on time and to prohibit the non-initiating party from submitting an offer when the non-initiating party fails to pay the administrative fee or certified IDR entity fee in accordance with the proposed timeframes.

The proposed changes at 26 CFR 54.9816–8(e)(2)(vi), (viii), and (ix), 29 CFR 2590.716–8(e)(2)(vi), (viii), and (ix), and 45 CFR 149.510(e)(2)(vi), (viii), and (ix) regarding the certified IDR entity's controls to prevent and detect improper financial activities, and procedures to retain the certified IDR entity fee and administrative fee are minor in nature, and therefore these proposed rules would be applicable upon the effective date of the final rules, if finalized.

The proposed changes at 26 CFR 54.9816–8(g), 29 CFR 2590.716–8(g), and 45 CFR 149.510(g) regarding the extension of time periods for extenuating circumstances would be applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the final rules, if finalized.

Until the relevant applicability date for the requirements of 26 CFR 54.9816–8, 29 CFR 2590.716–8, and 45 CFR 149.510, plans, issuers, providers, facilities, providers of air ambulance services, and certified IDR entities are required to continue to comply with the corresponding section of 26 CFR 54.9816–8, 29 CFR 2590.716–8, and 45 CFR 149.510, contained in the CFR as of October 25, 2022. In order to ensure compliance with these proposed requirements, the Departments would generally use existing processes for enforcing the relevant provisions of the Code, ERISA, and PHS Act that apply to group health plans and health insurance issuers, including the provisions added by the No Surprises Act.¹⁸⁷ The Departments intend to monitor for non-compliance with these proposed requirements when applicable, if finalized.

Finally, provisions that would establish the Federal IDR registry, and the associated requirements at proposed 26 CFR 54.9816–9, 29 CFR 2590.716–9,

¹⁸⁷ See Section 504 of ERISA (providing DOL with authority to determine whether any person has violated or is about to violate any provision of ERISA or any regulation or order thereunder, including with regard to group health plans); section 2723 of the PHS Act and 45 CFR 150.101 *et seq.* (setting forth HHS's enforcement procedures related to the provisions of title XXVII of the PHS Act, including bases for initiating investigations and performing market conduct examinations). For an overview of applicable enforcement mechanisms, see also Staman, Jennifer (2020). "Federal Private Health Insurance Market Reforms: Legal Framework and Enforcement," Congressional Research Service, available at <https://crsreports.congress.gov/product/pdf/R/R46637>.

and 45 CFR 145.530 would become applicable on the effective date of the final rules, if finalized. Pursuant to the establishment of the registry, the requirements in proposed new 26 CFR 54.9816–9, 29 CFR 2590.716–9, and 45 CFR 145.530 would require that each plan or issuer subject to the Federal IDR process complete its initial registration in the newly established Federal IDR registry by the later of the date that is 30 business days after the registry becomes available or the date the group health plan or health insurance issuer begins offering group or individual health insurance coverage.

The Departments seek comment on whether disputing parties and certified IDR entities would need additional time to implement the proposed modifications after the final rules are published, if finalized.

2. Applicability of Surprise Billing Protections to Ground Ambulance Services

The Departments have received questions about how the surprise billing protections under the No Surprises Act apply to ground ambulance services. In particular, the Departments understand that some plans and issuers have construed a statement in the preamble to the July 2021 interim final rules addressing when a participant, beneficiary, or enrollee is in a condition to receive notice and provide consent to waive surprise billing protections for post-stabilization services¹⁸⁸ to mean that the No Surprises Act surprise billing protections apply to post-stabilization inter-facility ground ambulance transports. The Departments do not interpret the No Surprises Act's surprise billing provisions to apply to emergency or non-emergency ground ambulance services.¹⁸⁹ This includes transport by ground ambulance after a participant, beneficiary, or enrollee has been stabilized and needs to be

¹⁸⁸ The preamble to the July 2021 interim final rules states, "In contrast to situations where a participant, beneficiary, or enrollee is able to travel using nonmedical transportation or nonemergency medical transportation following stabilization, in the event that the individual requires medical transportation to travel, including transportation by either ground or air ambulance vehicle, the individual is not in a condition to receive notice or provide consent. Therefore, the surprise billing protections continue to apply to post-stabilization services provided in connection with the visit for which the individual received emergency services." 86 FR 36872, 36881 (July 13, 2021).

¹⁸⁹ Beginning in 2025, the President's Fiscal Year 2024 budget proposal extends surprise billing protections to ground ambulance services across the commercial market. See U.S. Department of Health and Human Services, Fiscal Year 2024 Budget in Brief, (2023), p.99, available at <https://www.hhs.gov/sites/default/files/fy-2024-budget-in-brief.pdf>.

transferred to another facility for continued observation or treatment.¹⁹⁰ Instead, Congress enacted section 117 of the No Surprises Act, which requires the Departments to establish and convene an advisory committee for the purpose of reviewing options to improve the disclosure of charges and fees for ground ambulance services, better inform consumers of insurance options for such services, and protect consumers from balance billing. The advisory committee must submit a report that includes recommendations for the disclosure of charges and fees for ground ambulance services and insurance coverage, consumer protections and enforcement authorities of the Departments and States, and the prevention of balance billing to consumers.¹⁹¹

III. Severability

It is the Departments' intent that if any provision of these proposed rules, if finalized, is held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, these rules shall be construed so as to continue to give maximum effect to these rules as permitted by law, unless the holding shall be one of utter invalidity or unenforceability. In the event a provision is found to be utterly invalid or unenforceable, the provision shall be severable from these proposed rules as finalized, as well as the interim final rules and final rules they amend and shall not affect the remainder thereof or the application of the provision to persons not similarly situated or to dissimilar circumstances.

According to the statute,¹⁹² the Departments must establish a Federal IDR process that plans and issuers and nonparticipating providers and facilities may utilize to resolve certain disputes regarding out-of-network rates under section 9816 of the Code, section 716 of ERISA, and section 2799A-1 of the PHS Act, including the time, manner, and

amount each party to a determination must pay to participate in the Federal IDR process. Further, under section 9816(a)(2)(B)(ii) of the Code, section 716(a)(2)(B)(ii) of ERISA, and section 2799A-1(a)(2)(B)(ii) of the PHS Act, the Departments have authority to establish through rulemaking the information that a plan or issuer must share with a provider or facility when determining the QPA, including the form and manner of such disclosures. Under section 9816(c)(9) of the Code, section 716(c)(9) of ERISA, and section 2799A-1(c)(9) of the PHS Act, the Departments also may, at their discretion, modify any deadline or other timing requirement of the Federal IDR process (except for the timing of payment following a payment determination) in cases of extenuating circumstances, as specified by the Departments, or to ensure that all claims that are subject to the 90-calendar-day cooling-off period submitted to the Federal IDR process are in fact eligible for the Federal IDR process.

For the reasons described in section II. of this preamble, the Departments are of the view that their authority to implement each of these aspects in the proposed regulation is well-supported in law and practice and should be upheld in any legal challenge. The Departments are also of the view that the exercise of their authority reflects sound policy. However, if any portion of these proposed rules is declared invalid, the Departments intend that the various aspects related to the Federal IDR process be severable. For example, if a court were to find unlawful (1) the requirement to use CARC and RARCs, (2) the standards for the open negotiation period, (3) the provision for the treatment of batched determinations, (4) the provision for departmental eligibility review, (5) the administrative fee requirements, or (6) the provision of extensions of timeframes under extenuating circumstances, or some combination thereof, the Departments still would intend the remaining features of the policy to stand. Further, the Departments also intend for parts of certain provisions in these rules to be severable. For example, if a court were to find unlawful (1) the policy of batching qualified IDR items and services furnished to a single patient on the same or consecutive dates of service and billed on the same claim form (single patient encounter), (2) the policy of batching qualified IDR items and services billed under the same service code or a comparable code under a different procedural coding system, or (3) the policy of batching anesthesiology, radiology, pathology,

and laboratory qualified IDR items and services under service codes belonging to the same Category I CPT code section, or some combination thereof, the Departments still would intend the remaining features of the policy to stand.

While the proposed policies in combination in these proposed rules would ameliorate different difficulties in the Federal IDR process and result in a more efficient and transparent process for the disputing parties and certified IDR entities, the Departments intend for each of the proposed policies to function independently and be severable from another. The Departments have added severability clauses to these proposed rules to emphasize the Departments' intent that, to the extent a reviewing court holds that any provision of the final rules is unlawful, the remaining rules should take effect and be given the maximum effect permitted by law. The Departments have also added severability clauses to these proposed rules to emphasize the Departments' intent that the provisions in 26 CFR 54.9816-6A, 54.9816-6, 54.9816-8, and 54.9816-9; 29 CFR 2590.716-6A, 2590.716-6, 2590.716-8, and 2590.716-9; and 45 CFR 149.100, 149.140, 149.510 and 149.530 are intended to be severable from one another.

The proposed severability provisions in these rules, if finalized, would not conflict with the proposed severability provisions in the IDR Process Fees proposed rules, if those provisions are finalized. In the IDR Process Fees proposed rules the Departments proposed severability provisions in new proposed paragraphs 26 CFR 54.9816-8(d)(3)(i) and (ii), 29 CFR 2590.716-8(d)(3)(i) and (ii), and 45 CFR 149.510(d)(3)(i) and (ii). Those proposed paragraphs state that if any of the administrative fee or certified IDR entity fee proposals in the IDR Process Fees proposed rules, as finalized, are held to be unlawful by a court, the remaining rules should take effect and be given the maximum effect permitted by law.

If the severability provisions proposed in the IDR Process Fees proposed rules are finalized and subsequently, the severability provisions proposed in these rules in new proposed paragraphs 26 CFR 54.9816-8(i)(1) and (2), 29 CFR 2590.716-8(i)(1) and (2), and 45 CFR 149.510(i)(1) and (2) are also finalized, the Departments would remove the severability provisions proposed in the IDR Process Fees proposed rules at 26 CFR 54.9816-8(d)(3)(i) and (ii), 29 CFR 2590.716-8(d)(3)(i) and (ii), and 45 CFR 149.510(d)(3)(i) and (ii). The purpose for this proposed approach would be to

¹⁹⁰ In contrast, if a plan or issuer provides or covers benefits for air ambulance services (such as inter-facility air ambulance transports), those services are subject to the No Surprises Act surprise billing protections. See FAQs about Affordable Care Act and Consolidated Appropriations Act, 2021 Implementation Part 55, Q7 (Aug. 19, 2022), available at <https://www.dol.gov/sites/dolgov/files/EBSA/about-ehsa/our-activities/resource-center/faqs/aca-part-55.pdf> and <https://www.cms.gov/files/document/faqs-part-55.pdf>.

¹⁹¹ For more information about the Advisory Committee on Ground Ambulance and Patient Billing, see <https://www.cms.gov/regulations-guidance/advisory-committees/advisory-committee-ground-ambulance-and-patient-billing-gapb>.

¹⁹² Sections 9816(c)(2)(A) and 9817(b)(2)(A) of the Code, sections 716(c)(2)(A) and 717(b)(2)(A) of ERISA, and sections 2799A-1(c)(2)(A) and 2799A-2(b)(2)(A) of the PHS Act.

simplify the Federal IDR process regulations and have one regulation section for the severability provisions applicable to the entire Federal IDR process, as proposed 26 CFR 54.9816–8(i)(1) and (2), 29 CFR 2590.716–8(i)(1) and (2), and 45 CFR 149.510(i)(1) and (2).

IV. Overview of the Proposed Rules—Office of Personnel Management

OPM proposes to amend existing 5 CFR 890.114(a) to include references to the Departments' regulations.¹⁹³ OPM has the responsibility of administering the Federal Employees Health Benefits (FEHB) Program. This responsibility includes maintaining oversight and enforcement authority for FEHB plans, which are Federal governmental plans. In the July and October 2021 interim final rules, OPM adopted the Departments' regulations that implement the sections of the Code, ERISA, and the PHS Act that are referenced in 5 U.S.C. 8902(p). Generally, under 5 U.S.C. 8902(p), each FEHB contract must require a carrier to comply with requirements described in the Code, ERISA, and PHS Act in the same manner as they apply to a group health plan or health insurance issuer.

Subject to OPM regulations and contract provisions, FEHB carriers must comply with the specified provisions of the Departments' regulations. The proposed amendments to 5 CFR 890.114 would allow for continued conformity, oversight, and enforcement. Specifically, through 5 CFR 890.114 and its proposed amendments, FEHB carriers and their plans would be required to comply with all provisions of these proposed rules. Among other things, FEHB carriers would be required to:

- Comply with the proposed rules' new requirements relating to the disclosure of information that FEHB carriers must include along with the initial payment or notice of denial of payment for certain items and services subject to the surprise billing protections in the No Surprises Act;
- Communicate information by using CARCs and RARCs when providing any paper or electronic remittance advice to an entity that does not have a contractual relationship with the FEHB carrier;

- Comply with amended requirements related to the open negotiation period preceding the Federal IDR process, the initiation of the Federal IDR process, the Federal IDR dispute eligibility review, and the payment and collection of administrative fees;

- Comply with amended requirements related to the extension of timeframes due to extenuating circumstances, batched items and services, and bundled payment arrangements; and

- Register in the Federal IDR portal established by the Departments and provide the required data elements as applicable to FEHB carriers.

V. Economic Impact and Paperwork Burden

A. Summary—Departments of Health and Human Services and Labor

These proposed rules would add new 26 CFR 54.9816–6A, 29 CFR 2590.716–6A, and 45 CFR 149.100 requiring plans and issuers to use CARCs and RARCs, as specified in guidance issued by the Departments, or as required under any applicable, adopted standards and operating rules under 45 CFR part 162, on both electronic and paper remittance advice, to communicate information related to whether a claim for an item or service furnished by an entity that does not have a direct or indirect contractual relationship with the plan or issuer for the furnishing of such item or service under the plan or coverage is subject to the provisions of 26 CFR 54.9816 and 54.9817; 29 CFR 2590.716 and 2590.717; or 45 CFR part 149, subpart B, E, or F. The Departments further propose amendments to existing regulations to specify that plans and issuers must, in the case of air ambulance services, disclose the QPA and certain information about the QPA when cost sharing is calculated using the QPA. These proposed changes would reflect that the term “recognized amount” is not used with respect to air ambulance services and make technical corrections to address omissions where providers of air ambulances were not listed alongside other providers and facilities in the current regulatory text.

The Departments also propose to revise the regulation addressing information to be shared about the QPA to make clear these disclosures are required when the recognized amount (or for air ambulance services, the amount on which cost sharing is based) is the QPA or the amount billed by the provider, facility, or provider of air ambulance services.

The Departments also propose amendments to the content of the statement required under the regulations regarding the information to be shared about the QPA. Specifically, the Departments propose that the required statement specify that the 30-day period for open negotiation is 30 business days; reference providers of air ambulance services (in addition to providers and facilities); specify that a party wishing to initiate open negotiation must provide the required notice within 30 business days of receiving an initial payment or notice of denial of payment; and include language notifying the provider, facility, or provider of air ambulance services that they must notify the Departments and the plan or issuer to initiate the open negotiation period.¹⁹⁴ The Departments also propose to require plans and issuers to disclose the legal business name of the plan (if any) or issuer; the legal business name of the plan sponsor (if applicable); and the registration number assigned under proposed 26 CFR 54.9816–9, 29 CFR 2590.716–9, or 45 CFR 149.530, as applicable, if the plan or issuer is registered with the Federal IDR registry.

These proposed rules also would require the party initiating open negotiations to provide an open negotiation notice and supporting documentation to the other party and the Departments via the Federal IDR portal to initiate the open negotiation period. The Departments also propose to require several new content requirements for the open negotiation notice. Furthermore, these proposed rules would require the party in receipt of the open negotiation notice to provide a response to the open negotiation notice, with specified content, and supporting documentation to the other party and the Departments no later than the 15th business day of the 30-business-day open negotiation period.

In addition, the Departments propose to amend the notice of IDR initiation content requirements to require the initiating party to submit certain additional information in the notice of IDR initiation. The Departments also propose that the non-initiating party must submit a written response to the notice of IDR initiation to the initiating party and to the Departments within 3 business days after the date of IDR initiation. These proposed rules would require the notice of IDR initiation

¹⁹³ OPM also proposes a technical correction in 5 CFR 890.114 that would add a cross-reference to 26 CFR 54.9817–2, which concerns the independent dispute resolution process for air ambulance services. The addition of this cross-reference is necessary because 5 CFR 890.114 also cites to parallel provisions at 29 CFR 2590.717–2 and 45 CFR 149.520.

¹⁹⁴ For a description of the proposal to require parties to notify the Departments when they initiate open negotiation, see section II.D.1. of this preamble.

response to include an attestation that the item or service that is the subject of the dispute is a qualified IDR item or service or an assertion that the item or service is not a qualified IDR item or service, and an explanation and documentation to support the assertion. Furthermore, the Departments propose that the non-initiating party would also be required to indicate in the notice of IDR initiation response whether they agree or object to the initiating party's preferred certified IDR entity and provide a statement designating an alternative preferred certified IDR entity if the non-initiating party objects to the initiating party's preferred certified IDR entity.

These proposed rules would require parties furnishing the open negotiation notice, open negotiation response notice, notice of IDR initiation, and notice of IDR initiation response to provide the notices and supporting documentation to the other party and the Departments on the same day via the Federal IDR portal.

The Departments propose that if the party last in receipt of either the notice of IDR initiation response or the notice of certified IDR entity selection received the notice on the third business day after the date of IDR initiation, the Departments would provide the party 2 additional business days to agree or object to other party's alternative preferred certified IDR entity selection. The Departments propose that if the party agrees with the other party's alternative preferred certified IDR entity and notifies the Departments of such agreement, or if the party fails to notify the Departments of its objection by the fifth business day after the date of IDR initiation, the Departments would select the alternative preferred certified IDR entity as the certified IDR entity for the dispute. The Departments propose that if the party notifies the Departments of its objection to the alternative preferred certified IDR entity by the fifth business day after the date of IDR initiation, the Departments would proceed with random selection of the certified IDR entity.

Furthermore, the Departments propose to specify that the date of preliminary selection of the certified IDR entity would be 3 business days after the date of IDR initiation if the parties jointly selected a certified IDR entity, or 6 business days after the date of IDR initiation if the parties fail to agree and jointly select a certified IDR entity, and the Departments randomly select a certified IDR entity. These proposed rules would establish that if a selected certified IDR entity attests to having a conflict of interest, the

Departments would randomly select another certified IDR entity, and the date of final selection of the certified IDR entity would be the date the Departments provide notice to the parties that the new certified IDR entity has attested that it meets the conflict-of-interest requirements.

The Departments propose to establish several requirements regarding eligibility determinations. Specifically, the Departments propose that after the selected certified IDR entity attests that it meets the conflict-of-interest requirements, the selected certified IDR entity must review the information provided in the notice of IDR initiation and notice of IDR initiation response, as well as any additional information requested and received, and make an eligibility determination no later than 5 business days after the date of final selection of the certified IDR entity.

These proposed rules would also establish a departmental eligibility review when the Departments, in their discretion, determine that application of the departmental eligibility review is necessary to facilitate timely payment determinations or the effective processing of disputes under the Federal IDR process. When the departmental eligibility review is in effect, the Departments would make eligibility determinations, as opposed to the certified IDR entities. The Departments propose to provide reasonable notice before the Departments invoke the departmental eligibility review and before ceasing to use the departmental eligibility review.

The Departments further propose to establish a process for disputes to be withdrawn from the Federal IDR process. Specifically, the Departments propose that a dispute may be withdrawn from the Federal IDR process if: (1) the initiating party provides notification through the Federal IDR portal to the Secretary and the certified IDR entity (if selected) that both parties agree to withdraw the dispute from the Federal IDR process, with signatures from authorized signatories for both parties; (2) the initiating party provides a standard withdrawal request notice to the Departments, the certified IDR entity (if selected), and the non-initiating party and the non-initiating party notifies the Secretary, certified IDR entity (if selected), and initiating party of its agreement to withdraw the dispute within 5 business days of the initiating party's request (or the non-initiating party fails to respond within 5 business days of the initiating party's request); (3) the certified IDR entity or the Departments cannot determine eligibility because both parties are

unresponsive to any requests for additional information to determine eligibility; or (4) the certified IDR entity cannot make a payment determination because both parties have failed to submit an offer as described in section II.E.4. of this preamble.

The Departments also propose to amend the batching policies for the Federal IDR process to increase efficiency and create a workable framework for disputing parties and certified IDR entities. Specifically, the Departments propose to allow qualified IDR items and services to be batched if: (1) the items and services were furnished to a single patient during a patient encounter on one or more consecutive dates of service and billed on the same claim form (single patient encounter); (2) the items and services were furnished to one or more patients and were billed under the same service code, or a comparable code under a different procedural code system; or (3) anesthesiology, radiology, pathology, and laboratory qualified IDR items and services were furnished under service codes belonging to the same Category I CPT code range, as specified in guidance by the Departments. These proposed rules would also require that no more than 25 qualified IDR items and services may be considered jointly as part of one payment determination for the purposes of batched determinations.

The Departments further propose several changes to the collection of the administrative fee. First, in addition to proposing new administrative fee amounts and a revised methodology for calculating such amounts, the Departments propose that the initiating party must pay the administrative fee within 2 business days of the date of preliminary selection of the certified IDR entity. The Departments also propose that the non-initiating party must pay the administrative fee within 2 business days of notice of an eligibility determination by either the certified IDR entity or the Departments, as applicable. Third, the Departments propose to collect the administrative fee directly from the disputing parties. Fourth, the Departments propose to clarify how the Federal IDR process applies when either party fails to timely pay the fees associated with the Federal IDR process. Finally, the Departments propose to charge the disputing parties a reduced administrative fee for low-dollar disputes and to charge the non-initiating party a reduced administrative fee when either the certified IDR entity or the Departments determine the dispute is not eligible for the Federal IDR process.

The Departments also propose to clarify the extenuating circumstances in which the time periods, other than under current 26 CFR 54.9816–8T(c)(4)(ix), 29 CFR 2590.716–8(c)(4)(ix), and 45 CFR 149.510(c)(4)(ix), may be extended. Specifically, the Departments propose that such extenuating circumstances include circumstances that contribute to systematic delays in processing disputes under the Federal IDR process, such as an unforeseen volume of disputes or Federal IDR portal system failures. The Departments also propose that when the Departments determine that the parties or certified IDR entities cannot meet applicable timeframes due to systemic delays in processing disputes, the Departments would post a public notice regarding any extension of time periods due to such extenuating circumstances. These proposed rules would also establish that such extenuating circumstances would include, for a specific dispute, when the Departments determine that the parties or certified IDR entity cannot meet applicable timeframes due to matters beyond the control of one or both parties or the certified IDR entity, or for other good cause. Further, the Departments propose that a certified IDR entity may submit a request for an extension due to extenuating circumstances to the Departments through the Federal IDR portal.

Finally, the Departments propose requiring plans and issuers that are subject to the Federal IDR process to register with the Federal IDR portal and submit certain information to the Departments. Under these proposed rules, initial registration would be required to be completed by the later of 30 business days after the effective date of the final rule or if plans and issuers begin offering coverage subject to the Federal IDR process after the effective date of the final rule, they would be required to complete their initial registration on the date the plan or issuer begins offering coverage subject to the Federal IDR process.

The Departments have examined the effects of these proposed rules as required by Executive Order 13563 (76 FR 3821, January 21, 2011, Improving Regulation and Regulatory Review); Executive Order 12866 (58 FR 51735, October 4, 1993, Regulatory Planning and Review); the Regulatory Flexibility Act (Pub. L. 96–354, enacted September 19, 1980, Pub. L. 96–354); section 1102(b) of the Social Security Act (42 U.S.C. 1302(b)); section 202 of the Unfunded Mandates Reform Act of 1995 (March 22, 1995, Pub. L. 104–4); and

Executive Order 13132 (64 FR 43255, August 10, 1999, Federalism).

B. Executive Orders 12866, 13563, and 14094—Departments of Health and Human Services and Labor

Executive Orders 12866, 13563, and 14094 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 14094 entitled “Modernizing Regulatory Review” amends section 3(f)(1) of Executive Order 12866 (Regulatory Planning and Review). The amended section 3(f) of Executive Order 12866 defines a “significant regulatory action” as an action that is likely to result in a rule: (1) having an annual effect on the economy of \$200 million or more in any 1 year (adjusted every 3 years by the Administrator of OMB’s Office of Information and Regulatory Affairs (OIRA) for changes in gross domestic product), or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, territorial, or tribal governments or communities; (2) creating a serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising legal or policy issues for which centralized review would meaningfully further the President’s priorities or the principles set forth in this Executive Order, as specifically authorized in a timely manner by the Administrator of OIRA in each case.

A regulatory impact analysis (RIA) must be prepared for rules deemed significant under section 3(f)(1). Based on the Departments’ estimates, OMB’s OIRA has determined these rules are significant under section 3(f)(1). Therefore, the Departments have prepared an RIA that to the best of their ability presents the costs and benefits of these rules. OMB has reviewed these proposed regulations, and the Departments have provided the following assessment of their impact.

C. Need for Regulatory Action—Departments of Health and Human Services and Labor

As discussed in section II.B. of this preamble, gaps in communication between plans and issuers and

providers, facilities, and providers of air ambulance services have resulted in confusion around issues such as whether an item or service is eligible for resolution in the Federal IDR process; how cost sharing and out-of-network rates must be determined (that is, through an All-Payer Model Agreement, specified State law, or Federal rules); how and with whom to initiate open negotiations; and which eligible items and services can be batched or bundled into one dispute. Additionally, a higher-than-expected number of disputes have been submitted to the Federal IDR process for resolution, with many found to be ineligible,¹⁹⁵ contributing to inefficiencies in resolving disputes in the Federal IDR process.

These proposed rules would require plans and issuers to use CARCs and RARCs, as specified in guidance issued by the Departments, or as required under any applicable, adopted standards and operating rules under 45 CFR part 162, to communicate information related to whether a claim for an item or service furnished by an entity that does not have a direct or indirect contractual relationship with the plan or issuer for the furnishing of the item or service under the plan or coverage is subject to the provisions of 26 CFR 54.9816 and 54.9817; 29 CFR 2590.716 and 2590.717; or 45 CFR part 149, subparts B, E, or F.

The July 2021 interim final rules require plans and issuers to disclose the QPA and certain other information regarding the QPA for an item or service furnished by a provider, facility, or provider of air ambulance services, and specific information regarding the initiation of the Federal IDR process. These requirements were later amended by the August 2022 final rules. As discussed in section II.C. of this preamble, the Departments propose to amend regulations at 26 CFR 54.9816–6T(d), 29 CFR 2590.716–6(d), and 45 CFR 149.140(d) to specify that plans and issuers must disclose the QPA and certain information about the QPA not only when the recognized amount (or for air ambulance services, the amount on which cost sharing is based) is the QPA but also when the recognized amount is the amount billed by the provider, facility, or provider of air ambulance services as these items and

¹⁹⁵ In the first full year of Federal IDR process operations, approximately 37 percent of disputes were determined ineligible for the Federal IDR process. See U.S. Department of Health and Human Services, U.S. Department of Labor, and U.S. Department of the Treasury, *Federal Independent Dispute Resolution Process—Status Update*, April 27, 2023. <https://www.cms.gov/files/document/federal-idr-processstatus-update-april-2023.pdf>.

services would also be eligible for the Federal IDR process (provided all other eligibility criteria are satisfied).

In addition, the Departments propose amendments to the statement required to be provided by plans and issuers regarding the initiation of open negotiation and availability of the Federal IDR process. The Departments also propose amendments to the content of the statement to refer to providers of air ambulance services (as well as providers and facilities), and to specify that the open negotiation period is counted in business days and that a party wishing to initiate open negotiation must provide the required notice within 30 business days of receiving an initial payment or notice of denial of payment. Furthermore, the Departments propose that the statement must also note that the provider, facility, or provider of air ambulance services must notify the Departments, as applicable, to initiate open negotiations. To ensure payment disputes are directed to the correct parties, the Departments propose requiring plans and issuers to disclose the legal business name of the plan (if any) or issuer; the legal business name of the plan sponsor (if applicable); and the registration number to be assigned under 26 CFR 54.9816–9, 29 CFR 2590.716–9, or 45 CFR 149.530, as applicable, if the plan or issuer is registered with the Federal IDR registry.

As discussed in section II.D.1. of this preamble, interested parties generally report that disputing parties are not negotiating with each other during the required open negotiation period to the extent expected by the Departments. To encourage effective use of the open negotiation period, the Departments propose to require the party initiating open negotiations to use a standardized open negotiation notice form, which includes an enumerated list of information, and to send supporting documentation to the other party and the Departments to initiate the open negotiation period. Furthermore, the party in receipt of the open negotiation notice would be required to provide a response to the open negotiation notice to the other party and the Departments no later than the 15th business day of the 30-business-day open negotiation period. The Departments are of the view that this proposal would create more certainty regarding whether and when the initiating party began open negotiations by ensuring that start and end dates are documented in the Federal IDR portal. This proposal also may reduce the number of ineligible disputes initiated by requiring the

exchange of eligibility information during open negotiation.

As discussed in section II.D.2. of this preamble, to accelerate dispute processing and reduce the burden on certified IDR entities, the Departments propose to require the initiating party to provide an enumerated list of additional information in the notice of IDR initiation, including the claim number, an attestation that the item or service under dispute is a qualified IDR item or service and the basis on which the party believes it is so, and a statement describing the elements of the claim that serve as the basis for initiating the Federal IDR process. Similarly, the Departments propose to require the non-initiating party to provide a response to the notice of IDR initiation that must also include an enumerated list of information, including an agreement to the preferred certified IDR entity identified in the notice of IDR initiation or an alternate preferred certified IDR entity selection, an attestation that the item or service under dispute is a qualified IDR item or service, and for each item or service that the non-initiating party asserts is not a qualified IDR item or service, an explanation and documentation to support the assertion. The Departments are of the view that these additional elements would assist in determining if the item or service is a qualified IDR item or service that is eligible for the Federal IDR process, allow for a streamlined process to track the initiation of the Federal IDR process, enhance communication among the parties, and facilitate a more efficient Federal IDR process.

As discussed in section II.E.1.a. of this preamble, since the implementation of the Federal IDR process, the Departments have identified potential areas to improve upon and provide additional clarity with respect to the process for selecting a certified IDR entity. In the Departments' experience implementing this process, when a non-initiating party waits until the third business day after the date of IDR initiation to select an alternative preferred certified IDR entity, the initiating party lacks sufficient time to agree or object to the alternative preferred certified IDR entity. To provide the parties sufficient opportunity to agree or object to the alternative preferred certified IDR entity, the Departments propose to amend the process for selecting a certified IDR entity when the parties fail to jointly agree on a certified IDR entity. Specifically, the Departments propose that if the party last in receipt of either the notice of IDR initiation response or the notice of certified IDR entity

selection received the notice on the third business day after the date of IDR initiation and did not agree to the other party's alternative preferred certified IDR entity by the end of third business day after the date of IDR initiation, the Departments would provide the party 2 additional business days to agree or object to other party's preferred certified IDR entity selection.

To provide clarity and to codify the process and timeframes for selecting a certified IDR entity, the certified IDR entity's conflict-of-interest review, and the date the certified IDR entity selection is considered finally selected, the Departments propose to establish a process that includes both preliminary selection of the certified IDR entity and final selection of the certified IDR entity. The Departments are of the view that the conflict-of-interest review by the certified IDR entity should not cut into the time periods for either the disputing parties to submit their offers or for the certified IDR entity to make a payment determination. For this reason, the Departments propose requirements that would provide for a certified IDR entity conflict-of-interest review process that must be conducted before a preliminary selection of the certified IDR entity is considered to be a final selected certified IDR entity. Under these proposed rules, final selection of the certified IDR entity would trigger the timeframes for conducting an eligibility review, accepting offers of an out-of-network payment amount, and making a payment determination.

As discussed in section II.E.1.b. of this preamble, eligibility determinations have proven to be complex, time-consuming, resource-intensive, and often uncompensated activities that impede timely payment determinations. To support eligibility determinations during a period of systemic delay or other extenuating circumstances, the Departments propose to implement a departmental eligibility review. When this departmental eligibility review is in effect, the Departments would make eligibility determinations instead of the certified IDR entities. The Departments are of the view that these changes are necessary to ensure certified IDR entities are able to spend the majority of their time and resources on making payment determinations for eligible IDR items and services, prevent certified IDR entities from temporarily suspending their acceptance of new disputes, ensure participation in the Federal IDR process remains financially sustainable for certified IDR entities, and prevent disparate outcomes.

As discussed in section II.E.1.d.ii. of this preamble, the Departments have identified potential areas to improve upon and provide additional clarity with respect to the process for disputes to be withdrawn from the Federal IDR process. Currently, there is no clear uniform process for parties, the certified IDR entity, or the Departments to withdraw a dispute from the Federal IDR process. To establish a process for withdrawals, the Departments propose four conditions in which a dispute may be withdrawn from the Federal IDR process by the initiating party, the Departments, or the certified IDR entity before a payment determination is made. Specifically, the Departments propose that a dispute may be withdrawn from the Federal IDR process if: (1) the initiating party provides notification through the Federal IDR portal to the Departments and the certified IDR entity (if selected) that both parties agree to withdraw the dispute from the Federal IDR process, with signatures from authorized signatories for both parties; (2) the initiating party provides a standard withdrawal request notice to the Departments, the certified IDR entity (if selected), and the non-initiating party, and the non-initiating party notifies the Secretary, certified IDR entity (if selected), and initiating party of its agreement to withdraw within 5 business days of the initiating party's request (or the non-initiating party fails to respond within 5 business days of the initiating party's request); (3) the certified IDR entity or the Departments cannot determine eligibility because both parties to the dispute are unresponsive to any requests for additional information to determine eligibility; or (4) the certified IDR entity cannot make a payment determination because both parties to the dispute have failed to submit an offer as described in section II.E.4. of this preamble. The Departments are of the view that these proposals would strike a balance between fairness to the disputing parties and efficiency of the Federal IDR process by generally requiring mutual agreement by the disputing parties to withdraw the dispute and providing that a dispute would be withdrawn in the event the parties are nonresponsive within the required timeframes.

As discussed in section II.E.2. of this preamble, in response to the Departments' experiences with batched determinations and operationalizing the Federal IDR process, as well as consideration of interested parties' feedback, the Departments propose batching policies for the Federal IDR

process to increase efficiency and create a workable framework for disputing parties and certified IDR entities. The Departments propose to implement batching provisions that would allow parties the flexibility to batch qualified IDR items and services (or "line items") that relate to the treatment of similar conditions, with necessary limitations to encourage efficiency. Specifically, the policy would allow all qualified IDR items and services within the following groupings to be batched together: (1) the items and services were furnished to a single patient during a patient encounter on one or more consecutive dates of service and billed on the same claim form (single patient encounter); (2) the items and services were furnished to one or more patients and billed under the same service code, or a comparable code under a different procedural code system; or (3) anesthesiology, radiology, pathology, and laboratory qualified IDR items and services were furnished under service codes belonging to the same Category I CPT code range, as specified in guidance by the Departments. The Departments are of the view that this approach would appropriately balance several objectives of the Federal IDR process, including: encouraging efficiency (including minimizing costs) within the Federal IDR process without unreasonably impeding payers' or providers' access to the Federal IDR process and considering relative costs and administrative burden; providing a framework to expedite processing of the backlog of Federal IDR disputes by simplifying the Federal IDR process while avoiding creating new operational complexities; and ensuring that items and services included in batched determinations have a clear organizing principle that makes for logical and consistent payment determinations across certified IDR entities in order to reduce the chance of disparate outcomes. The Departments also propose to codify the definition of a bundled payment arrangement, as currently set forth in guidance, at proposed 26 CFR 54.9816-3, 29 CFR 2590.716-3, and 45 CFR 149.30.

As discussed in section II.E.3. of this preamble, to implement a fair and efficient Federal IDR process, the Departments propose to amend the certified IDR entity and administrative fee provisions of the Federal IDR process to align financial incentives for disputing parties with the efforts associated with administering the Federal IDR process. The Departments propose to amend the provisions related to the time and manner of fee collection,

such that an initiating party would be required to pay the non-refundable administrative fee within 2 business days of the date of preliminary selection of the certified IDR entity, and a non-initiating party would be required to pay the non-refundable administrative fee within 2 business days of being notified of an eligibility determination. The Departments also propose to add flexibility to the process by removing the requirement that certified IDR entities, rather than the Departments, must collect the administrative fee, and propose to directly collect the administrative fee from the parties. The Departments further propose to revise how the Federal IDR process applies when either party fails to timely pay the fees associated with the Federal IDR process. The Departments also propose charging the disputing parties a reduced administrative fee for low-dollar disputes and charging a non-initiating party a reduced administrative fee when either the certified IDR entity or the Departments determine the dispute is not eligible for the Federal IDR process. The Departments are of the view that these fee collection changes would ensure that disputing parties pay an administrative fee to participate in the Federal IDR process even if the dispute is determined to be ineligible, remove the operational burden from certified IDR entities of processing administrative fees and remitting them to the Departments, improve accessibility of the Federal IDR process for certain types of parties, more fairly allocate the costs associated with ineligible disputes, and help reduce the need for future increases to the administrative fee.

As discussed in section II.E.5. of this preamble, the Departments are proposing to codify a generally applicable extension of time periods when the Departments determine that such extension is necessary due to extenuating circumstances that contribute to systematic delays in processing disputes under the Federal IDR process, such as a high volume of disputes or Federal IDR portal system failures. This would allow the Departments to extend the time periods under the Federal IDR process without requiring a case-by-case analysis of individual extension requests. The Departments are of the view that granting certain extensions in this manner would provide protection for parties engaged in the Federal IDR process from the impact of systematic processing delays and ensure that unforeseen circumstances do not unfairly disadvantage a party or hinder its ability to comply with the Federal

IDR process timeframes. This would also provide more transparency into the timing it would take for a dispute to be processed.

As discussed in section II.F. of this preamble, the Departments propose requiring plans and issuers subject to the Federal IDR process to register with the Departments and provide general information on the application of the Federal IDR process to items or services covered by the plan or coverage. Providers, facilities, and providers of air ambulance services report that when they initiate open negotiations prior to initiating the Federal IDR process, it is often difficult to identify the plan or issuer with which they are seeking to initiate a dispute, determine the correct

contact information for initiating open negotiation or a dispute, and delineate between different group health plans offered by the same plan sponsor. To address these issues, the Departments propose to make available a registry containing this information, which would help providers, facilities, and providers of air ambulance services initiate open negotiations and the Federal IDR process with all required information by resolving the aforementioned information-sharing issues between parties.

D. Summary of Impacts and Accounting Table—Departments of Health and Human Services and Labor

The expected benefits and costs of these proposed rules are summarized in

Table 6 and discussed in this section of the preamble. In accordance with OMB Circular A–4, Table 6 depicts an accounting statement summarizing the Departments' assessment of the benefits and costs associated with this regulatory action. The Departments are unable to quantify all benefits and costs of these proposed rules but have sought, where possible, to describe these non-quantified impacts. The effects in Table 6 reflect non-quantified impacts and estimated direct monetary costs resulting from the provisions of these proposed rules.

BILLING CODE 6325–63–P; 4830–01–P; 4510–29–P; 4120–01–P

TABLE 6: Accounting Table

Accounting Statement				
Benefits:				
Non-Quantified:				
• Reduce wasted effort on inappropriately initiated disputes for certified IDR entities as well as both initiating and non-initiating parties by providing information necessary for dispute initiation in a centralized registry, thus minimizing: (1) open negotiations and/or disputes initiated against the wrong party; (2) disputes over items or services that are actually subject to a specified State law or All-Payer Model Agreement; and (3) incorrectly batched disputes. • Increase efficiency (including minimizing costs) within the Federal IDR process without unreasonably impeding payers' or providers' access to the Federal IDR process considering potential administrative burden by revising the batching policies in order to reduce the chance of disparate outcomes.				
Costs:	Estimate	Year Dollar	Discount Rate	Period Covered
Annualized	\$205.01 million	2023	7 percent	2024-2028
Monetized (\$/Year)	\$206.83 million	2023	3 percent	2024-2028
Quantified Costs:				
• Costs to issuers and TPAs of approximately \$1,549,606 to make annual changes, beginning in 2024, to their information technology (IT) systems to accommodate the use of CARCs and RARCs related to the No Surprises Act in accordance with guidance issued by the Departments or as required under any applicable adopted standards and operating rules under 45 CFR part 162. • Costs to issuers and TPAs of approximately \$505,567 to make a one-time change in 2024 to their IT systems to change the currently required QPA notification to incorporate the proposed information described in the proposed new 26 CFR 54.9816-6T(d)(1)(v), 29 CFR 2590.716-6(d)(1)(v), and 45 CFR 149.140(d)(1)(v). • Costs to providers, facilities, and providers of air ambulance services of approximately \$22,039,500 in 2024 and \$44,079,000 annually beginning in 2025 to submit additional information in the open negotiation notice to the Departments and the other party for an estimated 560,000 disputes entering open negotiations annually. • Costs to issuers and TPAs of approximately \$22,039,500 in 2024 and \$44,079,000 annually beginning in 2025 to create and submit open negotiation notice responses to the Departments and the other party for an estimated 560,000 disputes entering open negotiations annually. • Costs to providers, facilities, and providers of air ambulance services of approximately \$16,529,625 in 2024 and \$33,059,250 annually beginning in 2025 to submit more information through notices of IDR initiation to the Departments and the other party for an estimated 420,000 disputes initiated annually. • Costs to issuers and TPAs of approximately \$16,529,623 in 2024 and \$33,059,250 annually beginning in 2025 to submit notice of IDR initiation responses to the Departments and the other party for an estimated 420,000 disputes initiated annually. • Costs to the Departments of approximately \$11,000,000 for a one-time system build in the Federal IDR portal in 2024 to operationalize the proposals in these rules related to submission and exchange of open negotiation, initiation, and certified IDR entity selection notices and information between parties, and the departmental eligibility review. • Increase in costs of \$418,621 annually beginning in 2025 for plans, issuers, providers, and facilities to submit the notice of certified IDR entity selection form. • If the departmental eligibility review is in effect, ongoing operations and maintenance costs of \$463,320 annually beginning in 2025. • If the departmental eligibility review is in effect, costs to the Departments of approximately \$17,199,000 in 2024 and \$41,277,600 per year beginning in 2025 for regulatory analysis, outreach, quality assurance, administrative activities, and close coordination among multiple parties related to making eligibility determinations. • Costs to initiating parties of approximately \$372,120 in 2024 and \$744,240 annually beginning in 2025 associated with submitting notices of withdrawal request. • Costs to non-initiating parties of approximately \$83,076 in 2024 and \$166,152 annually beginning in 2025 associated with submitting notices of withdrawal response.				

- Costs to the Departments of approximately \$3,000,000 for system and operations development related to administrative fee collection in fiscal year (FY) 2024, and ongoing operations and maintenance costs of approximately \$2,500,000 in FY 2025, \$1,250,000 in FY 2026, \$1,000,000 in FY 2027, and \$1,000,000 in FY 2028.

- Annual reduction of \$9,257 in reporting and administrative fee processing costs for certified IDR entities associated with collection of the administrative fee by the Departments in lieu of the certified IDR entities beginning in 2025.

- Costs to the parties of approximately \$36,198,000 annually beginning in 2025 associated with the administrative fee proposals in these proposed rules.

- Costs to certified IDR entities of approximately \$99 in 2024 and \$198 annually beginning in 2025 associated with submitting requests for extensions.

- Costs to the Departments of approximately \$3,000,000 in 2024 and \$150,000 annually beginning in 2025 for system and operations development related to the Federal IDR registry.

- One-time costs to issuers and TPAs in 2024 of approximately \$1,575,693 to submit information to register for a permanent IDR registration number, and annual costs beginning in 2025 of approximately \$94,252 to update this information in a timely manner.

- Costs to interested parties of \$3,307,080 to review and interpret these rules in 2024.

Not Quantified:

- The use of CARCs and RARCs, in accordance with guidance issued by the Departments or as required under any applicable adopted standards and operating rules under 45 CFR part 162, would potentially reduce costs to certified IDR entities by reducing the number of ineligible payment disputes submitted to the Federal IDR process, and would also potentially reduce administrative costs incurred by parties related to initiating and responding to ineligible payment disputes.

- If the departmental eligibility review is in effect, the Departments would be making eligibility determinations for disputes that are ineligible for the Federal IDR process, which would incur a higher level of burden than if the departmental eligibility review is not in effect.

- The broader batching rules would increase the costs to the Departments in 2024 to implement the necessary system updates.

Intermediate effects, leading to benefits and costs:

- Provide standardized information, via CARCs and RARCs, to providers, facilities, and providers of air ambulance services to increase their understanding of whether and how the No Surprises Act applies to claims for out-of-network items and services and determine whether disputes are eligible for the Federal IDR process or are subject to a specified State law or an All-Payer Model Agreement that determines the out-of-network payment amount.

- Improve information sharing among the disputing parties and the Departments and create increased certainty regarding when open negotiations and Federal IDR process initiation begin by: (1) requiring a disputing party to provide an open negotiation notice and supporting documentation to the other party and the Departments to initiate the open negotiation period; (2) requiring a response from the party in receipt of the open negotiation notice; and (3) requiring the non-initiating party to furnish a response to the notice of IDR initiation.

- Increase access to the Federal IDR process and increase equity across the parties using the Federal IDR process, regardless of eligibility, by requiring payment of the administrative fee by the initiating party within 2 business days of the date of preliminary selection of the certified IDR entity and by the non-initiating party within 2 business days of notice of an eligibility determination.

- Streamline the process and increase transparency by clarifying how the Federal IDR process applies when either party fails to timely pay the fees associated with the Federal IDR process.

- Improve accessibility to the Federal IDR process for some disputing parties by reducing the administrative fee for low-dollar disputes.

- Provide a framework to expedite processing of the backlog of Federal IDR disputes by simplifying the Federal IDR process, and ensure items and services included in batched determinations have a clear organizing principle that makes for logical and consistent payment determinations across certified IDR entities by revising the batching policies in order to reduce the chance of disparate outcomes.

- Reduction in the number of ineligible disputes by approximately 50 to 75 percent due to the provisions in these proposed rules.

1. Benefits

These rules seek to maximize benefits to providers, facilities, providers of air

ambulance services, plans, and issuers and to reduce burdens on certified IDR entities. The Departments invite comment regarding the assumptions

made in this section and any additional benefits that would be associated with the proposals in these rules. The Departments also seek comment from individuals from minority and underserved communities, and providers who serve these individuals, to help address the benefits that would be associated with these proposed rules related to these communities specifically.

a. Use of Claim Adjustment Reason Codes and Remittance Advice Remark Codes

The proposed new 26 CFR 54.9816–6A, 29 CFR 2590.716–6A, and 45 CFR 149.100, which would require plans and issuers to use CARCs and RARCs to convey information related to the No Surprises Act as specified in guidance issued by the Departments or as required under any applicable adopted standards and operating rules under 45 CFR part 162, on electronic and paper remittance advice, would help to ensure plans and issuers provide information to providers, facilities, and providers of air ambulance services in a standardized manner and in standardized language so that they may understand whether and how the No Surprises Act applies to claims for out-of-network items and services and determine whether disputes are eligible for the Federal IDR process or subject to a specified State law or All-Payer Model Agreement for purposes of determining the out-of-network rate. Additionally, the use of CARCs and RARCs would further reduce the potential for the communication issues discussed in section II.B. of this preamble, and would help providers, facilities, and providers of air ambulance services identify items and services that are not subject to the No Surprises Act's balance billing protections and thus identify items and services that are not eligible for the Federal IDR process.

By ensuring that a plan or issuer communicates information related to whether a claim for an item or service furnished by an entity that does not have a direct or indirect contractual relationship with the plan or issuer for the furnishing of the item or service under the plan or coverage is subject to the prohibitions on balance billing in the No Surprises Act, the proposed CARC and RARC requirements would reduce the number of ineligible payment disputes submitted to the Federal IDR process, as further described in section V.D.1.l. of this preamble. The potential reduction in ineligible Federal IDR disputes could result in faster payment determinations, which in turn would result in providers,

facilities, and providers of air ambulance services receiving reimbursements sooner.

b. Information To Be Shared About the QPA (26 CFR 54.9816–6T, 29 CFR 2590.716–6, and 45 CFR 149.140)

These proposed rules would revise 26 CFR 54.9816–6T(d), 29 CFR 2590.716–6(d), and 45 CFR 149.140(d) to specify that plans and issuers must disclose the QPA and certain information about the QPA when cost sharing is calculated using the QPA or the billed amount (including for air ambulance services, for which the term “recognized amount” is inapplicable). These proposed revisions would provide greater clarity regarding when these disclosures must be provided.

Further, the proposed amendments at 26 CFR 54.9816–6, 29 CFR 2590.716–6, and 45 CFR 149.140 would require plans and issuers to disclose the legal business name (if any) of the plan or issuer; the legal business name of the plan sponsor (if applicable); the registration number assigned under 26 CFR 54.9816–9, 29 CFR 2590.716–9, or 45 CFR 149.530, as applicable, if the plan or issuer is registered with the Federal IDR registry. The proposed amendments would help ensure that payment disputes are directed to the appropriate parties, facilitate more productive open negotiations, and reduce the number of ineligible disputes ultimately submitted to the Federal IDR process (as further described in section V.D.1.l. of this preamble). Additionally, the required disclosure of the legal business name (if any) of the plan or issuer, the legal business name of the plan sponsor (if applicable), and the registration number would help providers, facilities, and providers of air ambulance services look up plans, plan sponsors, and issuers in the Federal IDR registry that would be established under these proposed rules.

c. Open Negotiation

The Departments propose to amend the open negotiation provisions at 26 CFR 54.9816–8(b)(1), 29 CFR 2590.716–8(b)(1), and 45 CFR 149.510(b)(1) to require the party initiating open negotiations to provide an open negotiation notice and supporting documentation to the other party and the Departments through the Federal IDR portal to initiate the open negotiation period. The Departments also propose to expand the required information on the open negotiation notice to include new elements. Furthermore, the Departments propose that the party in receipt of the open negotiation notice would be required to

provide a response to the open negotiation notice and supporting documentation to the other party and the Departments no later than the 15th business day of the 30-business-day open negotiation period. Both of these notice provisions require the parties to provide specific information detailed in the proposed regulatory text.

The Departments propose these changes to improve information sharing among the parties and the Departments. The Departments are of the view that this proposal would create more certainty regarding whether and when a party began open negotiations by recording start and end dates. Furthermore, this proposal may allow the parties to focus negotiations on items or services they believe would ultimately be eligible for the Federal IDR process. This proposal would also create an additional exchange of eligibility-related disclosures between the parties that may reduce the number of ineligible disputes submitted to the Federal IDR process, as further described in section V.D.1.l. of this preamble. While the Departments have issued guidance to clarify that the use of an issuer's proprietary open negotiation portal is not required by the parties, many issuers currently maintain their own open negotiation portals and encourage parties to submit notices through them. This proposal would benefit providers, facilities, and providers of air ambulance services by creating a centralized location in which they can exchange information for open negotiation, as opposed to using different portals and systems depending on the plan or issuer. These proposed requirements would reduce the number of platforms or vehicles the party submitting the open negotiation notice currently use to furnish the notices and supporting documentation to both the Departments and the other party.

d. Initiating the Federal IDR Process and Notice of IDR Initiation

The Departments propose changes to 26 CFR 54.9816–8(b)(2), 29 CFR 2590.716–8(b)(2), and 45 CFR 149.510(b)(2). Specifically, the Departments propose to require the initiating party to provide additional elements on the notice of IDR initiation, including expanded information to identify the disputing parties (as well as any third party representing a party) and additional information to identify the item or service subject to the dispute.

Similarly, the Departments propose to require the non-initiating party to provide a response to the notice of IDR initiation that must include an enumerated list of information with

additional disclosures, such as either a statement agreeing to the preferred certified IDR entity or an alternative preferred certified IDR entity, and an attestation as to the eligibility of the item or service that is the subject of the dispute. The Departments are of the view that these additional elements would assist in determining whether the item or services is eligible for the Federal IDR process, allow for a streamlined process to track dispute initiation, enhance communication among the parties, and facilitate a more efficient process of IDR initiation. Information about why the non-initiating party believes the dispute is ineligible for the Federal IDR process would assist the Departments or the certified IDR entity in its review of dispute eligibility, thereby streamlining the eligibility review process.

Additionally, by streamlining the submission of these notices through the Federal IDR portal, including the open negotiation notice and open negotiation response notice, the Departments may be able to use information that was submitted for one notice to pre-populate subsequent notices, reducing the burden of providing duplicative information. For instance, if a party that submitted the open negotiation notice through the Federal IDR portal decides to initiate the Federal IDR process after the open negotiation period has ended, the Departments anticipate that the Federal IDR portal may be able to pre-populate the fields in the notice of IDR initiation with the same information that was provided in the open negotiation notice. Furthermore, these proposed requirements would reduce the number of platforms or vehicles the initiating party must use in order to furnish the notice of IDR initiation and supporting documentation to both the Departments and the other party. This administrative streamlining would simplify the burden on initiating parties and would create greater efficiency.

e. Certified IDR Entity Selection

The Departments propose amending 26 CFR 54.9816–8(c)(1), 29 CFR 2590.716–8(c)(1), and 45 CFR 149.510(c)(1) regarding the process for certified IDR entity selection and submission of the notice of certified IDR entity selection. In the Departments' experience implementing the Federal IDR process, when a non-initiating party waits until the third business day after the date of IDR initiation to select an alternative preferred certified IDR entity, the initiating party lacks sufficient time to agree or object to the alternative preferred certified IDR entity. To provide the parties sufficient

opportunity to agree or object to an alternative preferred certified IDR entity, the Departments propose that if the party last in receipt of either the notice of IDR initiation response or the notice of certified IDR entity selection received the notice on the third business day after the date of IDR initiation and did not agree to the other party's alternative preferred certified IDR entity by the end of third business day after the date of IDR initiation, the Departments would provide the party 2 additional business days to agree or object to other party's alternative preferred certified IDR entity selection. Further, to provide clarity and to codify the process and timeframes for selecting a certified IDR entity, the certified IDR entity's conflict-of-interest review, and the date the certified IDR entity selection is considered finally selected, the Departments propose to establish a process that includes both preliminary selection of the certified IDR entity and final selection of the certified IDR entity. The Departments are of the view that the conflict-of-interest review by the certified IDR entity should not cut into the time periods for either the disputing parties to submit their offers or for the certified IDR entity to make a payment determination. For this reason, the Departments propose requirements that would provide for a certified IDR entity conflict-of-interest review process that must be conducted before a preliminary selection of the certified IDR entity is considered a final selected certified IDR entity. Under these proposed rules, the final selection of the certified IDR entity would trigger the timeframes for conducting an eligibility review, accepting offers of an out-of-network payment amount, and making a payment determination. The Departments are of the view that this proposal would streamline the exchange of information between parties, provide clarity on the dates that trigger the timeframes for offer submission and payment determinations, and relieve the time constraints on certified IDR entities by not having the conflict-of-interest review cut into the timeframe for payment determinations.

f. Federal IDR Process Eligibility Determinations

The Departments propose amending 26 CFR 54.9816–8(c), 29 CFR 2590.716–8(c), and 45 CFR 149.510(c) to make Federal IDR process eligibility determinations the responsibility of the Departments in certain circumstances. Under this proposal, when certain criteria are met as discussed in section II.E.1.b. of this preamble, the Departments would determine whether

the dispute is eligible and make the eligibility determination for the Federal IDR process (that is, departmental eligibility review). If the dispute is found to be eligible, the Departments would send it to the certified IDR entity to continue the Federal IDR process. If the dispute is found to be ineligible for the Federal IDR process, it would be closed.

When the Departments are conducting eligibility determinations, it would relieve the burden on certified IDR entities of this responsibility and help ensure that they can focus their time and resources on payment determinations in accordance with statutory timeframes.

g. Withdrawals

The Departments propose to add 26 CFR 54.9816–8(c)(3)(ii), 29 CFR 2590.716–8(c)(3)(ii), and 45 CFR 149.510(c)(3)(ii) to establish a process for disputes to be withdrawn from the Federal IDR process. First, these proposed rules would allow a dispute to be withdrawn from the Federal IDR process if the initiating party provides notification through the Federal IDR portal to the Departments and the certified IDR entity (if selected) that both parties agree to withdraw the dispute, with signatures from authorized signatories for both parties. These proposed rules would also establish that the initiating party could withdraw a dispute by submitting a standard withdrawal request notice to the Departments, the non-initiating party, and the certified IDR entity (if selected) through the Federal IDR portal. In this case, the non-initiating party would then be required to provide the standard withdrawal request response notice within 5 business days indicating agreement or objection to the request for withdrawal. If the non-initiating party fails to respond within 5 business days of the initiating party's request, the non-initiating party would be considered to have agreed to the dispute's withdrawal.

The Departments also propose to establish that the certified IDR entity or the Departments could withdraw a dispute from the Federal IDR process if the certified IDR entity or the Departments cannot determine eligibility because both parties are unresponsive to any requests for additional information to determine eligibility, or if the certified IDR entity cannot make a payment determination because both parties have failed to submit an offer as described in 26 CFR 54.9816–8(c)(5)(i), 29 CFR 2590.716–8(c)(5)(i), and 45 CFR 149.510(c)(5)(i). The Departments are of the view that these proposals would both create

fairness to the disputing parties and encourage efficiency of the Federal IDR process by generally requiring mutual agreement by the disputing parties to withdraw the dispute and providing that the dispute would be withdrawn in the event the parties are nonresponsive within the required timeframes. The Departments also are of the view that permitting the withdrawal of a dispute in such cases would decrease the number of payment determinations the certified IDR entity is required to adjudicate, improving efficiency of the Federal IDR process.

h. Treatment of Batched Items and Services

The Departments propose to amend the batching policies in response to the Departments' experiences with batched determinations and operationalizing the Federal IDR process, as well as consideration of interested parties' feedback regarding the Federal IDR process. Under this proposal, the Departments would allow parties the flexibility to batch qualified IDR items and services (or "line items") that relate to the treatment of similar conditions with necessary limitations to encourage efficiency. Specifically, the policy would allow all qualified IDR items and services to be batched by: (1) items and services furnished to a single patient during a patient encounter on one or more consecutive dates of service and billed on the same claim form (single patient encounter); (2) items and services were furnished to one or more patients and billed under the same service code, or a comparable code under a different procedural code system; or (3) anesthesiology, radiology, pathology, and laboratory IDR items and services furnished under service codes belonging to the same Category I CPT code range, as specified in guidance by the Departments, in order to address the unique circumstances of certain medical specialties and provider types.

As discussed in section II.E.2. of this preamble, the Departments are of the view this approach would encourage efficiency (including minimizing costs) within the Federal IDR process without unreasonably impeding payers' or providers' access to the Federal IDR process considering relative costs and administrative burden; provide a framework to expedite processing of the backlog of Federal IDR disputes by simplifying the Federal IDR process; and ensure that items and services included in batched determinations have a clear organizing principle that makes for logical and consistent payment determinations across certified

IDR entities to reduce the chance of disparate outcomes.

i. Administrative and Certified IDR Entity Fee Collection

i. Establishment of the Administrative Fee Amount and Methodology

First, the Departments propose revisions to the methodology for setting the administrative fee and propose new reduced administrative fee amounts. The revised methodology and amounts would account for the proposals in these proposed rules, such as the reduced administrative fees for ineligible disputes and low-dollar disputes discussed in sections II.E.3.e. and II.E.3.f. of this preamble, while still complying with the statutory requirement that the Departments set the administrative fee amount such that the total amount of fees paid for such year is estimated to be equal to the amount of expenditures estimated to be made by the Departments for such year in carrying out the Federal IDR process. These proposals would allow the Departments to administer the Federal IDR process and be responsive to the needs of the program by updating the methodology and administrative fee amounts in conjunction with policy and operational improvements to the process.

ii. Time of Collection of Administrative Fee and Certified IDR Entity Fee

Second, the Departments are proposing to amend the provisions related to the time of administrative fee collection such that an initiating party would be required to pay the non-refundable administrative fee within 2 business days of the date of preliminary selection of the certified IDR entity, which occurs before an eligibility determination is complete, and the non-initiating party would be required to pay the non-refundable administrative fee within 2 business days of the non-initiating party receiving notice of an eligibility determination. Specifically, an initiating party would be expected to pay the administrative fee regardless of whether the dispute is determined eligible for the Federal IDR process. Because the administrative fees are currently non-refundable and under the current regulation and associated impact analysis, this benefit is unchanged. The Departments are of the view that the effect of this change in benefits experienced as a result of this proposal on disputing parties would be minimal.

Overall, the Departments are of the view that this proposal would promote the objective of costs of using the

Federal IDR process being proportionately borne by parties to both eligible and ineligible disputes.

iii. Manner of Administrative Fee Collection

Third, the Departments are proposing to directly collect the administrative fee from each party. Because the administrative fees are always non-refundable, the Departments are of the view that the impact of this proposed change would be minimal. The Departments anticipate that direct collection of the administrative fee by the Departments would reduce the burden on certified IDR entities, as it would remove the requirement that certified IDR entities collect this fee and later remit it to the Departments upon dispute closure. This burden is currently approved under OMB control number 1210-0169 and accounts for an average of 18 hours of clerical worker time annually per certified IDR entity, as discussed further in section V.F.7. of this preamble.¹⁹⁶ If this policy is finalized, the Departments anticipate this change would have minimal impact on the certified IDR entities, as certified IDR entities would continue to collect certified IDR entity fees from disputing parties.

iv. Application of Federal IDR Process Requirements in Circumstances Involving a Failure To Pay Certified IDR Entity Fees or Administrative Fees

Fourth, the Departments propose to clarify how the Federal IDR process applies when either party fails to timely pay the fees associated with the Federal IDR process. Specifically, the failure to pay the administrative fee by an initiating party would result in the closure of the dispute due to nonpayment, and failure to pay the certified IDR entity fee by an initiating party would result in the certified IDR entity not considering the initiating party's offer. Nonpayment of the certified IDR entity fee or administrative fee by a non-initiating party would result in the certified IDR entity not considering the non-initiating party's offer. The Departments are of the view that the impact of this change would be minimal. The purpose of this policy is to codify the sub-regulatory guidance that already exists and allow the closure of disputes in which the initiating party

¹⁹⁶ OMB Control Number: 1210-0169 (No Surprises Act: IDR Process). The burden is estimated as follows: (18 hours × \$39.56) = \$712.08 per certified IDR entity. A labor rate of \$39.56 is used for a clerical worker. The labor rates are applied in the following calculation: (13 × 18 hours × \$39.56) = \$9,257.

does not provide the appropriate administrative fee payment.

v. Administrative Fee Structure for Disputing Parties in Low-Dollar Disputes

Fifth, the Departments propose to charge both parties a reduced administrative fee when the initiating party attests that the highest offer (or aggregate offers for a dispute, whether the dispute is for one item or service, a bundled arrangement, or multiple items and services submitted as part of a batched dispute) made during open negotiation by either disputing party was less than the predetermined threshold. Because a reduction to the administrative fee would only be made in these limited situations, the Departments are of the view that the impact of this change would be minimal for most parties, particularly if the value of disputes increases as intended under the batching policies proposed in these rules, if finalized.

Furthermore, the Departments are of the view that this proposal would have a positive impact on some initiating parties, particularly small providers or providers in rural areas, that may not be able to efficiently access the Federal IDR process even under the batching policies proposed in these rules. Even though the Departments estimate in the Regulatory Flexibility Act analysis later in these proposed rules that there are approximately 66,000 small physicians¹⁹⁷ that may access the Federal IDR process, the Departments lack the data or ability to estimate how many providers would actually initiate the Federal IDR process and how many would or would not be able to efficiently initiate the process under the proposed batching policies in these rules and would therefore be impacted by the proposed reduced administrative fee for low-dollar disputes. The Departments seek comment on data sources or other resources to quantitatively estimate the benefits to this population and how to estimate the proportion of disputes that would be impacted by this policy.

vi. Administrative Fee Structure for Non-Initiating Parties in Ineligible Disputes

The Departments propose to charge the non-initiating party a reduced administrative fee when either the certified IDR entity or the Departments determine the entire dispute is not eligible for the Federal IDR process. Because a reduction to the administrative fee would be made only in this limited situation and one other situation (for low-dollar disputes), the Departments are of the view that the impact of this change would be minimal, particularly if the volume of ineligible disputes is reduced as anticipated due to the other policies proposed in these rules. The Departments are of the view that system improvements coupled with a reduced administrative fee in ineligible disputes may incentivize non-initiating parties to proactively raise and provide documentation to support eligibility challenges earlier in open negotiation or the Federal IDR process. This may result in a reduction in the volume of ineligible disputes (as further described in section V.D.1.l. of this preamble) and therefore reduce program administrative costs for the Departments overall. The Departments seek comment on the impact of a reduced administrative fee for non-initiating parties in ineligible disputes, including whether bad faith challenges to dispute eligibility may increase burden and whether modifications to the guidance for disputing parties are needed to prevent bad faith challenges to dispute eligibility.

j. Extension of Time Periods for Extenuating Circumstances

The Departments are proposing to amend 26 CFR 54.9816–8(g), 29 CFR 2590.716–8(g), and 45 CFR 149.510(g) to establish at paragraph (g)(1)(i) that the Departments, or at the request of a certified IDR entity or a party, would determine whether an extension is necessary because the parties or certified IDR entity cannot meet applicable timeframes due to matters beyond the control of the certified IDR entity or one or both parties, or for other good cause. Under these proposed rules, the Departments would provide an extension of the time periods if they identify unforeseen or good cause delays on a case-by-case basis, as opposed to solely relying on one of the parties to submit an extension request. The Departments may detect these issues before either party would, and could immediately grant the necessary

extension without having to wait for the submission of a formal request.

The Departments also propose to establish at 26 CFR 54.9816–8(g)(1)(ii), 29 CFR 2590.716–8(g)(1)(ii), and 45 CFR 149.510(g)(1)(ii) to codify a generally applicable extension of time periods when the Departments determine that such extension is necessary due to extenuating circumstances that contribute to systematic delays in processing disputes under the Federal IDR process, such as a high volume of disputes or Federal IDR portal system failures. The Departments would also post a public notice about any generally applicable extensions of time periods. Under these proposed changes, the Departments would extend the time periods under the Federal IDR process without requiring a case-by-case analysis of individual extension requests. The Departments are of the view that granting certain extensions in this manner would provide protection for parties engaged in the Federal IDR process from the impact of systematic processing delays and ensure that unforeseen circumstances do not unfairly disadvantage a party or hinder its ability to comply with the Federal IDR process timeframes. This would also provide more transparency into the time it would take for a dispute to be processed.

k. Registration of Group Health Plans and Health Insurance Issuers

Access to the IDR registry would provide a single, centralized place for initiating parties to find contact information for a plan or issuer, therefore reducing time spent by providers, facilities, and providers of air ambulance services when they initiate open negotiations. The registry would also help reduce wasted effort on inappropriately initiated disputes for certified IDR entities, as well as both initiating and non-initiating parties, by minimizing: (1) disputes initiated against the wrong party; (2) disputes over items or services that are subject to a specified State law or All-Payer Model Agreement; and (3) disputes that are incorrectly batched.

l. Reduction in Ineligible Disputes

The Departments anticipate that provisions of these proposed rules, in particular the proposed use of RARCs and CARCs, the proposed requirements in the open negotiation notice and response and the IDR initiation notice and response, the proposed modifications to batching requirements, the proposal to require the initiating party to pay the non-refundable administrative fee earlier in the

¹⁹⁷ Based on data from the NAICS Association for NAICS code 62111 (Offices of Physicians), the Departments estimate the percent of businesses within the industry of Offices of Physicians with less than \$16 million in annual sales. By this standard, the Departments estimate that 47.2 percent or 66,207 physicians are considered small under the SBA's size standards. See <https://www.census.gov/data/tables/2017/econ/susb/2017-susb-annual.html>.

initiation process, and the proposed registry for group health plans and health insurance issuers, would reduce the number of ineligible disputes initiated in the Federal IDR process each year. Preliminary internal data indicate that between June 2022 and May 2023, approximately 48,000 disputes were determined to be ineligible by certified IDR entities. Based on this data and the rates of ineligibility attributable to various reasons (for example, State jurisdiction over the dispute or the dispute being initiated against the wrong non-initiating party), the Departments estimate that a total decrease in ineligible disputes of approximately 50 to 75 percent, or 24,000 to 36,000 disputes, could result from the cumulative impact of these proposals each year. The Departments have calculated this estimated range to reflect that the proposals in these rules, while severable, may work in concert with one another to reduce ineligible disputes. Uncertainties in the reduction of ineligible disputes remain, and the Departments note that variables such as the number of disputes initiated have changed over time and may continue to fluctuate. Therefore, it is possible that the number of ineligible disputes ultimately prevented by the proposals in these rules could be outside of the range estimated in this paragraph.

2. Costs
- These proposed rules seek to minimize costs to providers, facilities, providers of air ambulance services, plans, and issuers. The Departments seek comments on the assumptions made in this section and any additional costs that would be incurred by affected parties associated with the proposals in these proposed rules. The Departments also seek comment from individuals from minority and underserved communities, and providers who serve these individuals, to help address the costs that would be associated with these proposed rules related to these communities specifically.
- a. Required Use of CARCs and RARCs
- Plans and issuers would incur costs to comply with the requirements of these proposed rules related to the use of CARCs and RARCs. Plans and issuers would be required to use CARCs and RARCs on both electronic and paper remittance advice, in accordance with guidance issued by the Departments or as required under any applicable, adopted standards and operating rules under 45 CFR part 162. This would be necessary when processing out-of-network claims¹⁹⁸ to communicate information related to whether a claim for an item or service furnished by an entity that does not have a direct or indirect contractual relationship with the plan or issuer for the furnishing of

the item or service under the plan or coverage is subject to the No Surprises Act’s surprise billing provisions.

The Departments estimate that 1,500 issuers¹⁹⁹ and 205 TPAs²⁰⁰ would incur costs to automate the process to include the appropriate CARCs and RARCs in the appropriate remittance documents and comply with the proposed provisions. The Departments anticipate that issuers and TPAs would need to make annual changes to their IT systems to accommodate additional No Surprises Act-related CARCs and RARCs that may be required by the Departments in future guidance, or as required under any applicable adopted standards and operating rules under 45 CFR part 162. The Departments estimate that each issuer or TPA would require a computer programmer 8 hours (at an hourly rate of \$98.84)²⁰¹ to make annual changes to their IT system to allow for the incorporation of newly developed No Surprises Act-related CARCs and RARCs into their remittance documents and an operations manager 1 hour (at an hourly rate of \$118.14) to annually verify accuracy and accessibility. The Departments estimate that each issuer or TPA would require a total of 9 hours annually, with an associated cost of \$909. For all issuers and TPAs, the Departments estimate an annual burden of 15,345 hours, with an associated total annual cost of \$1,549,606 beginning in 2024.

TABLE 7: Annual IT Costs for Issuers and TPAs Related to CARCs and RARCs

	Estimated Number of Issuers and TPAs	Hours per Issuer/TPA (Hours)	Total Annual (Hours)	Total Estimated Cost
Annual IT Changes	1,705	9.0	15,345	\$1,549,606

The Departments anticipate that most issuers and TPAs that are subject to HIPAA Administrative Simplification requirements currently use ERA and therefore are already required to use CARCs and RARCs in their ERAs to providers. However, the Departments recognize that some plans, issuers, and TPAs may not have the capacity to use more than one CARC and RARC per line

item or may not currently use CARCs and RARCs when providing paper remittances. These issuers and TPAs would incur a higher burden and cost associated with the proposed provisions, particularly to the extent that an issuer or TPA is required to use multiple CARCs and RARCs per line item. In addition, plans and issuers with narrow networks may incur increased

costs, as they would likely process more out-of-network claims to which this proposal would apply. The Departments anticipate that TPAs would, in general, pass on the costs to implement the use of CARCs and RARCs to plan sponsors, which in turn could be passed on to participants in the form of higher premiums or contributions.

¹⁹⁸ This requirement would not apply to claims submitted by a participant, beneficiary, or enrollee directly to the plan or issuer for items or services furnished by a nonparticipating provider or nonparticipating facility.

¹⁹⁹ Based on data from MLR annual report for the 2021 MLR reporting year. See <https://www.cms.gov/CCIIO/Resources/Data-Resources/mlr>.

²⁰⁰ Non-issuer TPAs based on data derived from the 2016 benefit year reinsurance program contributions.

²⁰¹ Wage rate derived from the BLS May 2022 National Occupational Employment and Wage Estimates for Computer Programmer (occupation 15–1251). Mean hourly rate (\$49.42) has been increased by 100 percent to account for the cost of

fringe benefits and other indirect costs (\$49.42 * 100% = \$98.84).

The Departments seek comment on these estimates, the number of issuers or TPAs that do not currently have the ability to use CARCs and RARCs on paper remittance documents, what the burden and cost would be, and if any of those costs would be passed on to plan sponsors, to meet the requirements of this proposed provision. The Departments specifically seek comment on whether plans and issuers generally have the ability to use CARCs and RARCs in both paper and electronic remittance advice, or just electronic remittance advice. The Departments recognize that an issuer's or TPA's current IT structure could play a role in their ability to meet the requirements in the proposed provisions and the ability to apply more than one CARC and RARC combination on a single line item, if required in certain scenarios. The Departments seek comment on issuers' and TPAs' capability to implement new No Surprises Act-specific CARCs and RARCs and to use more than one CARC and RARC combination on a single line item if necessary; what barriers plans, issuers, and TPAs may face in developing and implementing this capability; and what associated burden and cost would be incurred to implement and operationalize this capability for both electronic and paper remittances.

In addition, the use of CARCs and RARCs on both electronic and paper remittance advice would potentially reduce costs to certified IDR entities by reducing the number of ineligible payment disputes submitted to the Federal IDR process, as further described in section V.D.1.l. of this preamble. It would also reduce administrative costs incurred by parties related to initiating and responding to ineligible payment disputes.

b. Information To Be Shared About the QPA

As detailed in section V.F.2. of this preamble, the Departments estimate that in the aggregate plans (or their TPAs) and issuers would incur a total one-time cost in 2024 of approximately \$505,567 to make changes to the currently required QPA notification to incorporate the additional information described in proposed amendments to paragraphs 26 CFR 54.9816–6(d)(1)(iv) and (v), 29 CFR 2590.716–6(d)(1)(iv) and (v), and 45 CFR 149.140(d)(1)(iv) and (v).

c. Open Negotiation

The Departments propose to amend the open negotiation provisions to require the party initiating open negotiations to provide an open negotiation notice and supporting

documentation to the other party and the Departments through the Federal IDR portal to initiate the open negotiation period. The Departments propose to expand the required information on the open negotiation notice to include new elements. Furthermore, the party in receipt of the open negotiation notice would be required to provide a response to the open negotiation notice within the first 15 business days of 30-business-day open negotiation period.

To implement this proposal and other proposals in these proposed rules impacting the submission of information to the Federal IDR portal (including the proposals pertaining to the notice of IDR initiation and notice of IDR initiation response forms, the notice of certified IDR entity selection form, and the departmental eligibility review), the Departments would need to implement system changes to the Federal IDR portal to ensure parties are able to submit the open negotiation notice through the portal to the other party and the Departments, and to allow for a response from the non-initiating party. The Departments estimate that their costs to implement all portal system changes described in these proposed rules would be approximately \$11,000,000 in fiscal year 2024. While some plans or issuers have created their own proprietary portals to facilitate open negotiations, providers, facilities, and providers of air ambulance services are not required to use them, and the Departments are of the view that there would be significant efficiencies in having one central location where providers, facilities, and providers of air ambulance services could initiate open negotiations across all plans and issuers.

The Departments estimate that these proposed rules would increase burden and create burden for the parties submitting the open negotiation notice and the proposed open negotiation response notice.²⁰² The total burden associated with these new requirements for parties would be 420,000 hours at a cost of \$44,079,000 in 2024 and 840,000 hours at a cost of \$88,158,000 annually beginning in 2025. The burden associated with this information collection is discussed further in section V.F.3. of this preamble.

The Departments seek comment on these costs and any other burdens interested parties foresee resulting from this proposal.

d. Initiating the Federal IDR Process and Notice of IDR Initiation

The Departments are proposing changes impacting the process for initiating the Federal IDR process and the notice of IDR initiation. The cost associated with updates to the Federal IDR portal for IDR initiation are described in the previous section V.D.2.c. regarding open negotiation costs. The Departments are proposing these changes to accelerate dispute processing and reduce the burden on certified IDR entities. Specifically, the Departments propose to require the initiating party to provide additional information and supporting documentation on the notice of IDR initiation. The Departments also propose to require the non-initiating party to provide a response to the notice of IDR initiation within 3 business days of the date of IDR initiation that must include an enumerated list of information with additional disclosures, including a statement agreeing to the preferred certified IDR entity or providing an alternative preferred certified IDR entity, information regarding the eligibility of the item or service subject to the dispute, and supporting documentation. These proposals would increase the administrative burden for parties as they add information requirements that parties must submit at the initiation of the Federal IDR process. The Departments estimate that the total combined burden associated with the new requirements for all parties would be 315,000 hours at a cost of \$33,059,250 in 2024 and 630,000 hours at a cost of \$66,118,500 annually beginning in 2025. The burden associated with this information collection is discussed further in section V.F.4.a. of this preamble.

e. Certified IDR Entity Selection

The Departments propose to amend the process for the preliminary selection of the certified IDR entity and the submission of the notice of certified IDR entity selection. Specifically, under these proposed rules, the Departments propose that the non-initiating party must agree or object to the preferred certified IDR entity in the notice of IDR initiation response within 3 business days after the date of IDR initiation as discussed in section II.D.2.b. of this preamble. Due to this proposed change, the initiating party would only be required to submit the notice of certified IDR entity selection if the non-initiating party submits an alternative preferred certified IDR entity in the notice of IDR initiation response. The initiating party

²⁰² OMB Control Number: 1210–0169 (No Surprises Act: IDR Process).

would submit its notice agreeing or objecting to the non-initiating's alternative preferred certified IDR entity through the Federal IDR portal. The non-initiating party would only be required to submit the notice of certified IDR entity selection if the initiating party provides an alternative preferred certified IDR entity in the notice of certified IDR entity selection within the 3-business-day period following the date of IDR initiation. As such, the burden associated with this collection would be increased by approximately \$418,621 and is described further in section V.F.4.b. of this preamble.

f. Federal IDR Eligibility Determinations

The Departments propose amending 26 CFR 54.9816–8(c)(1)(v), 29 CFR 2590.716–8(c)(1)(v), and 45 CFR 149.510(c)(1)(v) to make Federal IDR process eligibility determinations the responsibility of the Departments in certain circumstances, at the discretion of the Departments. Under this proposal to invoke a departmental eligibility review when certain criteria are met as discussed in section II.E.1.b. of this preamble, following IDR initiation, the Departments would evaluate whether the dispute is eligible for the Federal IDR process and make an eligibility determination. If the dispute is found to be eligible, the Departments would send it to the certified IDR entity to continue the Federal IDR process. If the dispute is found to be ineligible for the Federal IDR process, it would be closed.

By assuming the responsibility for Federal IDR process eligibility determinations, the Departments would incur costs that have thus far been incurred primarily by certified IDR entities. Therefore, it is important to note that these costs generally represent a transfer of costs (from certified IDR entities to the Departments) rather than actual new costs associated with the Federal IDR process. It is equally important to note that the Departments cannot quantify the full extent of these costs as they are now being incurred by certified IDR entities, and the Departments are not privy to their finances. As such, these estimates should be considered as the Departments' best approximations based on limited information.

These costs would vary depending on whether the departmental eligibility review for Federal IDR process eligibility determinations is in effect or not and may also vary considerably based on Federal IDR process dispute volume. When the departmental eligibility review is not in effect, the Departments would incur fewer costs, as they would not be responsible for

Federal IDR process eligibility determinations. The Departments estimate that they would incur a one-time "startup" cost for system and operations development in the first year beginning when these proposed rules are finalized and go into effect, which is included in the cost of the overall Federal IDR portal build described in section V.D.2.c. of this preamble, and ongoing operations and maintenance costs of \$463,320 annually thereafter. When the departmental eligibility review is in effect, the Departments would be making eligibility determinations for disputes submitted to the Federal IDR process, which would incur a much higher level of burden, including responsibilities such as regulatory analysis, outreach, quality assurance, administrative activities, and close coordination among multiple parties. The Departments estimate that this would cost approximately \$17,199,000 in 2024 and \$41,277,600 per year beginning in 2025. The Departments wish to reiterate the draft nature of these estimates and their strong dependency on Federal IDR process volume, which is highly challenging to predict. As such, the Departments encourage comment and feedback.

g. Withdrawals

The Departments propose to add 26 CFR 54.9816–8(c)(3)(ii), 29 CFR 2590.716–8(c)(3)(ii), and 45 CFR 149.510(c)(3)(ii) to establish a process for disputes to be withdrawn from the Federal IDR process. If the withdrawal is not agreed upon by both parties, these proposed rules would require the initiating party to submit a withdrawal request to the Departments and the non-initiating party through the Federal IDR portal. The non-initiating party would then be required to provide a response within 5 business days indicating agreement or objection to the request for withdrawal. If the non-initiating party fails to respond within 5 business days of the initiating party's request, the non-initiating party would be considered to have agreed to the dispute's withdrawal. This new collection would result in a cost to the parties of \$455,196 in 2024 (\$372,120 for initiating parties and \$83,076 for non-initiating parties) and \$910,392 (\$744,240 for initiating parties and \$166,152 for non-initiating parties) annually beginning in 2025, as discussed further in section V.F.6. of this preamble.

h. Treatment of Batched Items and Services

The Departments propose to amend the batching policies in response to the

Departments' experiences with batched determinations and operationalizing the Federal IDR process, as well as consideration of interested parties' feedback regarding the Federal IDR process. Under this proposal, the Departments would allow parties the flexibility to batch qualified IDR items and services (or "line items") that relate to the treatment of a similar condition with necessary limitations to encourage efficiency. Specifically, the policy would allow all qualified IDR items and services to be batched by: (1) items and services furnished to a single patient during a patient encounter on one or more consecutive dates of service and billed on the same claim form (single patient encounter); (2) items and services furnished to one or more patients and billed under the same service code, or a comparable code under a different procedural code system; or (3) anesthesiology, radiology, pathology, and laboratory IDR items and services furnished under service codes belonging to the same Category I CPT code range, as specified in guidance by the Departments, in order to address the unique circumstances of certain medical specialties and provider types.

To implement this proposal, the Departments would need to implement system changes to the Federal IDR portal to ensure that the ability to batch under the new rules is operationalized. The total cost to implement system changes associated with submitting information through the portal, including those related to batching, is described in the open negotiation cost section of these proposed rules (section V.D.2.c. of this preamble). While the Federal IDR portal currently has batching capabilities, these proposed rules would allow for additional permissible mechanisms of batching which would need to be collected and captured in the Federal IDR portal.

i. Administrative Fee Collection

i. Establishment of the Administrative Fee Amount and Methodology

The Departments propose revisions to the methodology for setting the administrative fee and propose new reduced administrative fee amounts. If the IDR Process Fees proposed rules are finalized as proposed, the administrative fee in effect in calendar year 2024 would be \$150 per party per dispute.²⁰³ Based on internal Federal IDR process data and estimating the impact of *TMA IV*'s vacatur of the

²⁰³ Federal Independent Dispute Resolution (IDR) Process Administrative Fee and Certified IDR Entity Fee Ranges proposed rules, 88 FR 65888 (September 26, 2023).

batching regulations at 26 CFR 54.9816–8T(c)(3)(i)(C), 29 CFR 2590–716–8(c)(3)(i)(C), and 45 CFR

149.510(c)(3)(i)(C), the Departments estimate that approximately 225,000 disputes are closed per year. Therefore, if the administrative fee as proposed in the IDR Process Fees proposed rule, if finalized, were to remain applicable, disputing parties would pay approximately \$67,500,000 in administrative fees annually (225,000 disputes × 2 parties per dispute × \$150 per party).

In these proposed rules, the Departments are proposing an administrative fee of \$150 per party per dispute, a reduced administrative fee of \$75 for both parties in low-dollar disputes, and a reduced administrative fee of \$30 for non-initiating parties in ineligible disputes for disputes initiated on or after January 1, 2025. The Departments are also proposing to collect the administrative fee directly from the parties closer to the time of initiation rather than the time a dispute is closed.

The Departments project a total of 420,000 disputes would be initiated annually based on internal data, which includes 65,520 disputes for which both parties would pay the reduced administrative fee for low-dollar disputes, 18,480 disputes for which the initiating party would pay the reduced administrative fee for low-dollar disputes and the non-initiating party would pay the reduced administrative fee for ineligible disputes, 73,920 disputes for which the initiating party would pay the full administrative fee and the non-initiating party would pay the reduced administrative fee for ineligible disputes, and 262,080 disputes for which both parties would pay the full administrative fee. Thus, based on this data and assuming the number of disputes remains stable year over year and the administrative fee amounts are not subsequently changed through notice and comment rulemaking, the Departments estimate that disputing parties would pay approximately \$103,698,000 in administrative fees annually beginning in 2025.²⁰⁴ Therefore, the costs associated with this proposal would be approximately \$36,198,000 annually beginning in 2025 (\$103,698,000 if this proposal is finalized – \$67,500,000 if

the baseline condition under the IDR Process Fees proposed rules, if finalized, were to continue).

The Departments seek comment on these estimates and assumptions.

ii. Time of Collection of Administrative Fee and Certified IDR Entity Fee

The Departments are proposing to amend the provisions related to the time of administrative fee collection such that an initiating party would be required to pay the non-refundable administrative fee within 2 business days of the date of preliminary selection of the certified IDR entity, and the non-initiating party would be required to pay the non-refundable administrative fee within 2 business days after a notice of an eligibility determination. Because initiating parties are not required to pay the administrative fee until offer submission under current guidance, some initiating parties fail to pay this fee for ineligible disputes. Although the Departments anticipate that this proposal would result in all initiating parties paying their administrative fee because the administrative fees are always non-refundable and incurred when preliminary selection of the certified IDR entity is complete, the Departments are of the view that the impact of this proposed change would be minimal on initiating parties, as compared to the existing regulation, associated burden analysis, and approved Paperwork Reduction Act Supporting Statement, which provide for all administrative fees to be non-refundable and to be paid in every dispute submitted. Under these proposed rules, if an initiating party fails to pay the required administrative fee within 2 business days of preliminary selection of the certified IDR entity, the dispute would be closed and neither disputing party would owe the administrative fee; thus, a dispute opened by an initiating party that fails to timely pay the administrative fee is treated as a provisional dispute that does not proceed through the full Federal IDR process. Further, the Departments anticipate that this proposal would result in almost all non-initiating parties paying their administrative fee because of associated penalties for nonpayment, including that their offer would not be considered received, the non-initiating party would still be responsible for paying the administrative fee, and the unpaid administrative fee would be subject to Federal debt collection procedures.

Currently, approximately 40 percent of non-initiating parties do not pay the administrative fee. Under these proposed changes, the Departments

estimate a total of 420,000 disputes would be initiated annually. However, the Departments are of the view that extrapolating a 40 percent cost increase to non-initiating parties would not be appropriate. Specifically, the combination of policies proposed in these rules, including attestation of eligibility during open negotiation and requiring the initiating party to pay the administrative fee at preliminary selection of the certified IDR entity, are designed to reduce the number of ineligible disputes submitted (as further described in section V.D.1.l. of this preamble), which are the disputes for which parties are often not paying the associated administrative fees. This proposal would be implemented in tandem with the requirements that non-initiating parties respond to the notice of IDR initiation, and the estimated amount of time for the non-initiating party to submit payment would be included in the estimated amount of time for the non-initiating party to submit the notice of IDR initiation response proposed in these rules. This amount of time is discussed further in section V.F.4.a. of this preamble.

The Departments are of the view that, if these proposed rules are finalized, initiating parties would submit fewer ineligible disputes, which would decrease the expenses incurred by the Departments and certified IDR entities to review eligibility information. In addition, parties would pay the required administrative fees in a higher percentage of disputes. However, at the same time, there would be fewer disputes to review, so fewer administrative fees would be collected. Overall, the Departments are of the view that this proposal would ensure that the costs of using the Federal IDR process are being equitably allocated to both eligible and ineligible disputes.

iii. Manner of Administrative Fee Collection

The proposal for the Departments to directly collect the administrative fee from disputing parties would increase the activities required to be accounted for in the administrative fee, as the Departments' costs associated with this collection would need to be included in that fee. The Departments estimate that there would be an implementation cost of approximately \$3,000,000 for system and operations development related to administrative fee collection in FY 2024, and ongoing operations and maintenance costs of approximately \$2,500,000 in FY 2025, \$1,250,000 in FY 2026, \$1,000,000 in FY 2027, and \$1,000,000 in FY 2028. Because the Federal IDR process is intended to be

²⁰⁴ This is calculated as follows: (65,520 disputes × 2 parties per dispute × \$75 per party) + {18,480 disputes × [(1 party per dispute × \$75 per party) + (1 party per dispute × \$30 per party)]} + {73,920 disputes × [(1 party per dispute × \$150 per party) + (1 party per dispute × \$30 per party)]} + {262,080 disputes × 2 parties per dispute × \$150 per party} = \$103,698,000.

self-sustaining, once the administrative fee calculation is adjusted, there would be no financial impact to the Federal Government. Although the Departments are of the view that requiring disputing parties to pay the administrative fee directly to the Departments, instead of to certified IDR entities, would not impose an additional administrative burden on disputing parties, the Departments acknowledge that any increased fee that could potentially result from this proposal could impact disputing parties. The Departments seek comment on these assumptions, including any burden increase associated with this process and whether that potential burden would be offset by a reduction of the administrative fee based on a higher collection rate of the administrative fee from disputing parties.

iv. Application of Federal IDR Process Requirements in Circumstances Involving a Failure To Pay Certified IDR Entity Fees or Administrative Fees

The Departments propose to clarify how the Federal IDR process applies when either party fails to timely pay the fees associated with the Federal IDR process. Specifically, the failure to pay the administrative fee by an initiating party would result in the closure of the dispute, and nonpayment of the certified IDR entity fee by the initiating party would result in the certified IDR entity not considering the initiating party's offer. Nonpayment of the certified IDR entity or administrative fee by a non-initiating party would result in the certified IDR entity not considering the non-initiating party's offer. The Departments are of the view that the impact of this change would be minimal for the parties, as the purpose of this policy is to clarify the sub-regulatory guidance that already exists and allow closure of disputes in which the initiating party does not provide the appropriate administrative fee payment. Further, the Departments are of the view that it would take a *de minimis* amount of time for the initiating and non-initiating parties to include their taxpayer identification numbers, which would be required to link debts owed by the disputing parties to the Departments, on the notice of IDR initiation and the notice of IDR initiation response.

v. Administrative Fee Structure for Disputing Parties in Low-Dollar Disputes

The Departments propose to charge the parties a reduced administrative fee when the initiating party attests that the highest offer made during open

negotiation by either party was less than the predetermined threshold as discussed further in section II.E.3.e. of this preamble. Because a reduction of the administrative fee would be applied to both parties when a low-dollar dispute is initiated, the Departments are of the view that the impact of this change would be minimal for most parties when combined with the proposal to expand batching, because these policies combined would result in fewer single low-dollar disputes being initiated. Furthermore, this proposal would reduce costs for certain parties to participate in the process, namely parties that provide low-dollar items or services and are unable to batch a sufficient number of items and services together to benefit from the batching proposals in these rules.

This proposal would require initiating parties to attest (for example, by checking a box) in the Federal IDR portal that no offer made by either party during open negotiation exceeded a predetermined threshold. The Departments are of the view that this action would only take a *de minimis* amount of time for the initiating party to complete, perhaps a minute, and therefore would result in negligible costs. This amount of time is minimal and is captured in the total time it takes to initiate the dispute—2.25 hours, as discussed further in the PRA package for the Federal IDR process (OMB control number: 1210-0169). This proposal may also increase the burden on the Federal Government due to the costs to complete system updates to account for this proposal, but the Departments anticipate that these costs would be incurred in tandem with changes to the other system build costs discussed in these proposed rules; thus, those costs are included in the cost estimates for the proposed changes related to open negotiation in section V.D.2.c. of this preamble. Furthermore, the Departments are of the view that the benefit of making the Federal IDR process more accessible to all types of providers, such as providers of low-dollar services, outweighs the limited costs to HHS to modify its system build.

vi. Administrative Fee Structure for Non-Initiating Parties in Ineligible Disputes

Additionally, the Departments propose to charge the non-initiating party a reduced administrative fee when either the certified IDR entity or the Departments determine the entire dispute is not eligible for the Federal IDR process. Because a reduction of the administrative fee would be applied to the non-initiating party when a dispute

is ineligible for the Federal IDR process, the Departments are of the view that the impact of this change would be minimal for two reasons. First, under the current process, certified IDR entities often do not collect the administrative fee in these disputes; however, non-paying parties have been on notice that this fee was due even if they did not pay at the appropriate time. Second, policies such as requiring an attestation of eligibility during open negotiation and requiring the initiating party to pay the administrative fee at preliminary selection of the certified IDR entity are designed to reduce the number of ineligible disputes (as further described in section V.D.1.l. of this preamble) such that non-initiating parties would be assessed an administrative fee in fewer ineligible disputes. Because this process may incentivize non-initiating parties to timely challenge dispute eligibility during open negotiation, this may better capture the costs associated with the parties.

Further, the burden on disputing parties is dependent on whether the administrative fee is increased or decreased, which is a byproduct of estimated total annual expenditures by the Departments. In the event of a substantial change in payment of the administrative fee based on the volume of ineligible disputes or associated expenditures, which would impact the calculation of the administrative fee, the parties may incur an increased or decreased administrative fee to cover the costs to carry out the Federal IDR process. The Departments seek comment on potential impacts to disputing parties and certified IDR entities of any change in burden from this policy, including any modifications to internal operating procedures that may be required to implement this fee structure.

j. Extension of Time Periods for Extenuating Circumstances

The Departments propose to establish that the Departments, or at the request of a certified IDR entity or a party, would determine whether an extension is necessary because the parties or certified IDR entity cannot meet applicable timeframes due to matters beyond the control of the certified IDR entity or one or both parties, or for other good cause. The process for requesting an extension due to extenuating circumstances would remain the same as when this process was established in the October 2021 interim final rules, and entities would continue to submit the Request for Extension due to Extenuating Circumstances form through the Federal IDR portal.

However, based on the proposed changes to this policy, the Departments estimate that the number of respondents would increase due to the addition of certified IDR entities, thus slightly increasing the total burden associated with this collection. The Departments estimate that the costs associated with certified IDR entity requests for the extension would be \$99 in 2024 and \$197.80 annually beginning in 2025. This cost is explained in further detail in section V.F.8. of this preamble.

k. Registration of Group Health Plans and Health Insurance Issuers

Establishing the Federal IDR registry would impose a cost on the Departments by requiring them to develop and build the registry. The Departments anticipate incurring a cost of approximately \$3,000,000 to develop and build the Federal IDR registry in FY 2024, with annual ongoing costs to maintain the registry of \$150,000 on average thereafter. Additionally, enrolling in the Federal IDR registry would impose a cost on issuers and plans by requiring them to submit information to the Departments. These costs amount to \$1,573,693 in 2024 and \$94,252 annually beginning in 2025 and are further described in section V.F.9. of this preamble.

3. Uncertainties

While the Departments are of the view that the majority of issuers and TPAs have the capability to use single CARC and RARC combinations on ERA transactions, the Departments are uncertain about the current level of use within the industry and whether issuers and TPAs have the capability to incorporate this information on paper remittance advice. Further, the Departments are uncertain about the current capability or percentage of issuers and TPAs that have the ability to use multiple CARC and RARC combinations for individual line items, including on electronic and paper remittance advice; what barriers and challenges issuers and TPAs would face to implement and operationalize this capability; and whether substantial system changes would need to be implemented to effectuate this proposed policy.

It is unclear whether the Federal IDR process would experience the same operating conditions, such as the number of ineligible disputes submitted or the number of disputes that would be closed for nonpayment of the administrative fee, if all or some of the policies proposed in these proposed rules are finalized and implemented. While these factors would have a direct

impact on the expenditures made by the Departments to carry out the Federal IDR process, it is difficult to project the impact that may result to the administrative fee amount charged to the parties. It is also uncertain how many disputes would be considered low-dollar disputes in the future, which would impact how many parties would be charged the proposed reduced administrative fee for low-dollar disputes, and it is uncertain how many disputes would be determined ineligible if the proposals in these rules are finalized, which would impact how many non-initiating parties would be charged the proposed reduced administrative fee for ineligible disputes.

Furthermore, it is unclear if or when the proposed departmental eligibility review, which would allow the Departments to make eligibility determinations rather than certified IDR entities, may need to be invoked. The departmental eligibility review would impact dispute processing times and overall certified IDR entity operations; further, these factors may impact what percentage of disputes are settled or withdrawn after initiation but before offer submission.

The economies of scale that may be realized by batching qualified IDR items and services are uncertain, including whether there would be a reduction in the amount of fees each party has to pay since parties would generally be allowed to batch more items and services in a single dispute than under the vacated provisions (discussed in section II.E.2. of this preamble). The specific provisions of the batching proposal may have differing effects on the trends in dispute initiation overall. For example, the increased flexibility to batch based on a single patient encounter may increase initiation of batched disputes, while the proposed cap on the number of line items within a batch may require parties that previously submitted batches with a high number of line items to divide the claims across multiple batched disputes. Further, the Departments are of the view that the increased batching flexibilities in concert with the reduced administrative fee for low-dollar disputes, if finalized, could lead to an increase in disputes initiated, since these policies may result in the Federal IDR process becoming more accessible to providers and payers. For these reasons, the Departments recognize the uncertainty in estimating the potential impact on the number of disputes submitted, and thus the fees collected, due to the proposed batching provisions. Further, it is uncertain if

increased batching would lead to decreased collection of funds by the Departments if fewer administrative fees are paid.

It is uncertain how much time would be needed for plans, issuers, carriers, and TPAs to collect the registration information that they would be required to provide under these proposed rules. Furthermore, it is unclear how many group health plans would choose to self-register for the proposed IDR registry, rather than relying on a TPA or other third party to register on their behalf. If a significant number of group health plans self-register, this may increase the burden to industry as well as the operational burden to the Departments to create and maintain the registry.

Although the Departments have analyzed the last 12 months of Federal IDR process data available to inform their projections, it is uncertain if the trends in this data will remain applicable for two reasons. First, the Federal IDR process is still in an early phase of implementation and has not yet achieved the stabilization that occurs with long-term uptake of the process. Initially, the Departments estimated that approximately 22,000 disputes would be submitted to the process each year;²⁰⁵ uptake of the process, however, has rapidly outpaced that estimate as dispute initiations have grown exponentially since implementation, and analysis has revealed an estimated number closer to 420,000 annual disputes²⁰⁶ would have been more accurate.

Second, although each of the proposed provisions could be implemented separately and is severable, when reviewed holistically, implementation of these proposed policies would create comingled impacts, including on the number and type of disputes initiated, such that it is uncertain what the overall collective impact of these proposed policies would be. For example, although the Departments project a 50 to 75 percent decrease in the number of ineligible disputes as discussed further in section V.D.1.l. of this preamble, other policies such as expanded batching and the reduced administrative fee for low-

²⁰⁵ In the regulatory impact analysis of the October 2021 interim final rules, the Departments estimated that 17,333 disputes involving non-air ambulance services and 4,899 disputes involving air ambulance services would be submitted to the Federal IDR process during the first year of implementation, totaling 22,232 anticipated disputes.

²⁰⁶ Federal Independent Dispute Resolution Process—Status Update. Centers for Medicare & Medicaid Services. April 27, 2023. <https://www.cms.gov/files/document/federal-idr-processstatus-update-april-2023.pdf>.

dollar disputes are anticipated to increase access to the Federal IDR process, such that the total number of disputes initiated yearly may increase overall. Additionally, the proposed framework for administrative fees that, if finalized, would result in a reduced administrative fee for some disputing parties when a dispute is ineligible or low-dollar complicates the analysis of what types of disputes would be initiated under these proposed rules. Further, the policies designed to increase communication between the disputing parties, such as the registry, open negotiation, and dispute initiation provisions, are anticipated to reduce the number of ineligible disputes initiated and increase the number of disputes resolved through open negotiation. However, the Departments are uncertain whether additional parties will utilize the Federal IDR process due to these process improvements, which would ultimately bring more disputes into the process.

Overall, some of the proposed policies may reduce the number of disputes while others may increase the number of disputes initiated. Additionally, whether there will be a reduction in costs to the disputing parties is also uncertain under these collective proposals. For example, a provider that previously felt that the nature of their practice made it infeasible to initiate a dispute due to financial concerns may find the Federal IDR process more financially accessible under the proposed reduced administrative fee framework, thus incurring the associated cost and administrative fees and increasing the annual dispute number.

4. Regulatory Review Cost Estimation

If regulations impose administrative costs on entities, such as the time needed to read and interpret rules, regulatory agencies should estimate the total cost associated with regulatory review. Based on comments received for the July 2021 interim final rules and October 2021 interim final rules, the Departments estimate that more than 2,100 entities will review these proposed rules, including 1,500 issuers, 205 TPAs, and at least 395 other interested parties (for example, State insurance departments, State legislatures, industry associations, advocacy organizations, and providers and provider organizations). The Departments acknowledge that this assumption may understate or overstate the number of entities that will review these proposed rules.

Using the mean hourly wage rate from the Bureau of Labor Statistics for a

Lawyer (Code 23–1011) to account for average labor costs (including a 100 percent increase for the cost of fringe benefits and other indirect costs), the Departments estimate that the cost of reviewing these proposed rules would be \$157.48 per hour.²⁰⁷ The Departments estimate, based on an average reading speed of 200 to 250 words per minute, that it would take each reviewing entity approximately 10 hours to review these proposed rules, with an associated cost of approximately \$1,574.80 (10 hours × \$157.48 per hour). Therefore, the Departments estimate that the total burden to review these proposed rules will be approximately 21,000 hours (2,100 reviewers × 10 hours per reviewer), with an associated cost of approximately \$3,307,080 (2,100 reviewers × \$1,574.80 per reviewer).

The Departments welcome comments on this approach to estimating the total burden and cost for interested parties to read and interpret these proposed rules.

E. Regulatory Alternatives— Departments of Health and Human Services and Labor

In developing these proposed rules, the Departments considered various alternative approaches.

1. Required Use of CARCs and RARCs

The Departments considered applying the proposed requirement to use CARCs and RARCs under new 26 CFR 54.9816–6A, 29 CFR 2590.716–6A, and 45 CFR 149.100 only to claims subject to the surprise billing protections of the No Surprises Act. However, the Departments have become aware that providers, facilities, and providers of air ambulance services have sought to initiate open negotiations or the Federal IDR process for a sizeable number of claims that are not subject to the No Surprises Act. Therefore, the Departments have concluded that it would be helpful for plans and issuers to communicate information regarding the applicability of the No Surprises Act for all out-of-network claims, and that a narrower application would be less impactful. Thus, the proposed approach may reduce the number of ineligible claims submitted, as further described in section V.D.1.l. of this preamble.

The Departments considered specifying in regulation which CARCs and RARCs must be used, rather than providing this information in guidance. The Departments are working to understand and address the current

backlog of disputes slowing down the Federal IDR process. The Departments have concluded that retaining the flexibility to identify the CARCs and RARCs to be used in specified scenarios in guidance rather than through notice and comment rulemaking would provide greater ability to quickly address communication gaps that are contributing to this backlog and future implementation challenges, as the Departments better understand these gaps. This also mirrors the current approach for required CARC and RARC code combinations that must be used by HIPAA-covered entities in business scenarios, as specified in guidance.

The Departments also considered continuing to support the voluntary use of No Surprises Act-specific RARCs. The Departments recognize the additional burden that requiring certain RARCs may place on small entities that may have fewer dedicated IT and coding staff. However, since the RARC Committee approved a set of RARCs for optional use, effective March 1, 2022, providers, facilities, and providers of air ambulance services and plans and issuers have continued to report communication challenges and to request more standardized mechanisms for communicating information. The Departments concluded that requiring certain CARCs and RARCs in specific circumstances, as well as continuing to permit the use of voluntary RARCs at the discretion of plans and issuers, would provide a more effective means of standardizing communication and better achieve a number of aims, including improving information flow between plans and issuers and providers, facilities, and providers of air ambulance services and consequently reducing the submission of ineligible claims to the Federal IDR process.

2. Open Negotiation Provision Changes (26 CFR 54.9816–8(b)(1), 29 CFR 2590.716–8(b)(1), and 45 CFR 149.510(b)(1))

The Departments propose to amend the open negotiation provisions at 26 CFR 54.9816–8(b)(1)(i), 29 CFR 2590.716–8(b)(1)(i), and 45 CFR 149.510(b)(1)(i) to require the party initiating open negotiations to provide an open negotiation notice and supporting documentation to the other party and the Departments to initiate the open negotiation period. Furthermore, the party in receipt of the open negotiation notice would be required to provide a response to the open negotiation notice to the other party and the Departments no later than the 15th business day of the 30-business-day open negotiation period.

²⁰⁷ Centers for Medicare & Medicaid Services. (May 1, 2022). *May 2022 National Occupational Employment and Wage Estimates*. https://www.bls.gov/oes/current/oes_nat.htm.

The Departments considered alternative ways for the party initiating open negotiation to notify the Departments of the initiation of open negotiations instead of submitting the notice through the Federal IDR portal. The Departments considered having the party submitting the open negotiation notice notify the Departments via mail or email but decided that the portal would provide a more logical place for the notice to be provided, as this is where Federal IDR process information is stored. The Departments also considered taking no action and maintaining the current process in which parties initiating open negotiation do not inform the Departments directly of the initiation of open negotiations. However, the Departments are of the view that these changes are necessary to make it explicitly clear to the Departments when open negotiations are initiated in order to best track the flow of Federal IDR process dispute initiations. The Departments are of the view that these proposals would create more certainty regarding whether and when the party initiating open negotiation begins open negotiations by ensuring that start and end dates are documented in the Federal IDR portal, which is the official place of record for the Federal IDR process. Further, the Departments acknowledge the additional burden that small entities may face in meeting the requirements of the Federal IDR process since they may not have dedicated staff to perform all the functions necessary to meet the requirements. However, the Departments are of the view that the proposed policy to centralize the submission of open negotiation notices through the Federal IDR portal would alleviate burden on small entities as it would reduce the number of channels they previously submit these notices through.

The Departments also considered alternatives to requiring the party in receipt of the open negotiation notice to provide a response to the open negotiation notice within the 30-business-day open negotiation period. The Departments considered maintaining the status quo of not requiring this response, but are of the view that creating this requirement would be the better alternative, because this proposal would create an additional exchange of eligibility-related disclosures between the parties and foster better communication between the parties to improve the Federal IDR process.

The Departments also propose to require that the open negotiation notice contain additional specific information

and be in a specific format as discussed in section II.D.1.c. of this preamble. The Departments further propose to require that the open negotiation response notice must be provided, using the standard form developed by the Departments, no later than the 15th business day of the 30-business-day open negotiation period, and the party in receipt of the open negotiation notice must provide the open negotiation response notice through the Federal IDR portal resulting in receipt by the party initiating open negotiation and the Departments on the same day. The Departments considered maintaining the status quo and not requiring the additional information, the specific format, or timing, but determined that this proposal would create an additional exchange of information necessary to help the Federal IDR process be successful, allow certified IDR entities to make more informed decisions, and improve communication between the parties.

3. Changes to the Initiation of the Federal IDR Process and the Notice of IDR Initiation (26 CFR 54.9816–8(b)(2), 29 CFR 2590.716–8(b)(2), and 45 CFR 149.510(b)(2))

The Departments propose to amend the IDR initiation provisions of 26 CFR 54.9816–8(b)(2), 29 CFR 2590.716–8(b)(2), and 45 CFR 149.510(b)(2) to accelerate dispute processing and reduce the burden on certified IDR entities. Specifically, the Departments propose to require the initiating party to provide an enumerated list of additional information on the notice of IDR initiation, including a statement describing the aspects of the claim, such as patient acuity or level of training, any payment discussed by the parties during open negotiation, whether the reasons for initiating the Federal IDR process are different from the aspects of the claim discussed during the open negotiation period, and an explanation of why the party is initiating the Federal IDR process.

Similarly, the Departments propose to require the non-initiating party to provide a response to the notice of IDR initiation, within 3 business days after the date of IDR initiation, that must include an enumerated list of information, including an agreement or disagreement that the dispute is eligible for the Federal IDR process, supporting documentation if the non-initiating party believes a dispute is not eligible, and an agreement to the preferred certified IDR entity identified in the notice of IDR initiation or an alternate preferred certified IDR entity selection.

The Departments propose to require these notices to be provided to the other party and the Departments electronically through the Federal IDR portal.

The Departments considered alternatives to these notices and the information they are required to contain, including contemplating notices that contained less required information. Recognizing the increased administrative burden of providing this additional information within the specified timeframe, particularly for small entities that may regularly engage with the IDR process and may not have staff dedicated to perform this function, the Departments also considered maintaining the status quo, but instead determined that these notices are necessary to address processing and communication issues caused by the lack of information. These new requirements would provide information to the certified IDR entities that is frequently missing under the status quo.

Each of the new required elements would provide specific information needed by the certified IDR entities to successfully conduct the Federal IDR process. The lack of these information elements creates a burden on the certified IDR entities, as they are currently required to undertake concerted efforts to obtain the information from the parties or other sources. This has resulted in additional time and effort for the certified IDR entities and caused the process to move at a slower pace than is desired. The Departments are of the view that requiring the parties to provide these notices and the information contained in them within the timeframes and in the manner proposed would result in a reduction in this burden on the certified IDR entities and would result in greater efficiency of the Federal IDR process overall. Additionally, the Departments are of the view that these additional elements would assist in determining whether the items or services associated with the dispute are eligible for the Federal IDR process, allow for a streamlined process to track dispute initiation, enhance communication between the parties, and facilitate a more efficient process of IDR initiation.

4. Certified IDR Entity Selection (26 CFR 54.9816–8(c)(1), 29 CFR 2590.716–8(c)(1), and 45 CFR 149.510(c)(1))

The Departments propose to establish a process for the preliminary selection of the certified IDR entity and final selection of the certified IDR entity at 26 CFR 54.9816–8(c)(1), 29 CFR 2590.716–8(c)(1), and 45 CFR 149.510(c)(1).

Specifically, the Departments propose amending the preliminary selection of the certified IDR entity process to establish that if the party last in receipt of either the notice of IDR initiation response or the notice of certified IDR entity selection received the notice on the third business day after the date of IDR initiation and did not agree to the other party's alternative preferred certified IDR entity by the end of third business day after the date of IDR initiation, the Departments would provide the party 2 additional business days to agree or object to other party's alternative preferred certified IDR entity selection. Further, the Departments propose to clarify that the date of preliminary selection of the certified IDR entity would be 3 business days after the date of IDR initiation if the parties jointly selected a certified IDR entity, or 6 business days after the date of IDR initiation if the parties fail to jointly select a certified IDR entity and the Departments select a certified IDR entity either based on the agreement (or failure to respond) of the party in receipt of the last notice (either the notice of IDR initiation response or the notice of certified IDR entity selection) or through random selection. Lastly, the Departments propose to establish the process for finalizing selection of the certified IDR entity at 26 CFR 54.9816–8(c)(1)(iv), 29 CFR 2590.716–8(c)(1)(iv), and 45 CFR 149.510(c)(1)(iv), which would establish that the date of final selection of the certified IDR entity is the date the Departments provide notice to the parties that the preliminarily selected certified IDR entity attests that it meets the conflict-of-interest requirements.

The Departments considered alternatives to this proposal. The Departments considered maintaining the status quo and not modifying the process of selecting a certified IDR entity. However, given that the current rules allow the conflict-of-interest review to coincide with the eligibility review, the Departments are of the view that creating a finalization stage of certified IDR entity selection in the Federal IDR process would improve efficiency and reduce confusion when completing certified IDR entity selection. The Departments are of the view that this proposed policy would not increase burden for disputing parties, including small entities, as the time period requirement for disputing parties to jointly select a certified IDR entity is not changing. The Departments are of the view that the certified IDR entity must be considered preliminarily selected until it is determined that the

certified IDR entity has no conflict of interest, and that the conflict-of-interest review should not cut into the time periods for either disputing party to submit their offers or for the certified IDR entity to make a payment determination.

5. Federal IDR Eligibility Determinations (26 CFR 54.9816–8(c)(1)(v), 29 CFR 2590.716–8(c)(1)(v), and 45 CFR 149.510(c)(1)(v))

The Departments propose to amend 26 CFR 54.9816–8(c), 29 CFR 2590.716–8(c), and 45 CFR 149.510(c) regarding Federal IDR eligibility determinations to make the Federal IDR process eligibility reviews the responsibility of the Departments under certain circumstances. Under this proposal, when a departmental eligibility review is in effect, the Departments would determine whether the dispute is eligible for the Federal IDR process. If the dispute is found to be eligible, the Departments would send it to the certified IDR entity to continue the Federal IDR process. If the dispute is found to be ineligible for the Federal IDR process, it would be closed.

The Departments considered being more involved in the entire eligibility review process on a permanent basis; however, once the Federal IDR process arrives at a steadier operational state, the Departments are of the view that the majority of eligibility work—in particular eligibility determinations—should be conducted by certified IDR entities, particularly if the other proposed policies in these proposed rules and non-regulatory improvements are successful in improving throughput. The Departments also considered maintaining the status quo of certified IDR entities performing the full scope of the eligibility determination process, but the burden of making these eligibility determinations has proven to be complex and time-consuming for certified IDR entities, and the statute only affords certified IDR entities the ability to collect the certified IDR entity fee when a payment determination is made. A payment determination can only be made for eligible disputes, so certified IDR entities are not able to keep any portion of their fee for disputes they determine are ineligible. This situation results in certified IDR entities being uncompensated for eligibility determination work on ineligible disputes. The Departments do not anticipate that this policy, if finalized as proposed, would have a differential impact on small entities. Therefore, the Departments are proposing this provision in a manner that provides the Departments with the

flexibility to move the responsibility for Federal IDR eligibility determinations between the Departments and certified IDR entities, as appropriate and with appropriate notice to interested parties.

6. Withdrawals (26 CFR 54.9816–8(c)(3), 29 CFR 2590.716–8(c)(3), and 45 CFR 149.510(c)(3))

The Departments propose to add 26 CFR 54.9816–8(c)(3)(ii), 29 CFR 2590.716–8(c)(3)(ii), and 45 CFR 149.510(c)(3)(ii) to establish a process for disputes to be withdrawn from the Federal IDR process. Specifically, the Departments propose that a dispute may be withdrawn from the Federal IDR process if: (1) the initiating party provides notification through the Federal IDR portal to the Secretary and the certified IDR entity (if selected) that both parties agree to withdraw the dispute from the Federal IDR process, with signatures from authorized signatories for both parties; (2) the initiating party provides a standard withdrawal request notice to the Departments, the certified IDR entity (if selected), and the non-initiating party, and the non-initiating party notifies the Secretary, certified IDR entity (if selected), and initiating party of its agreement to withdraw within 5 business days of the initiating party's request (or the non-initiating party fails to respond within 5 business days of the initiating party's request); (3) the certified IDR entity or the Departments cannot determine eligibility because both parties to the dispute are unresponsive to any requests for additional information to determine eligibility; or (4) the certified IDR entity cannot make a payment determination because both parties to the dispute have failed to submit an offer as described in 26 CFR 54.9816–8(c)(5)(i), 29 CFR 2590.716–8(c)(5)(i), and 45 CFR 149.510(c)(5)(i).

The Departments considered alternatives to this proposal. The Departments considered maintaining the status quo and not formalizing the process for disputes to be withdrawn. The Departments recognize that the withdrawal process may place particular burden on resource constrained small entities, that may face greater challenges meeting the timetables described in this proposal. However, given that the current rules do not establish a clear uniform process for disputes to be withdrawn, the Departments are of the view that these proposals would encourage efficiency by creating a centralized process for the parties to request a withdrawal of a dispute and requiring that the dispute would be withdrawn in the event the

parties are nonresponsive within the required timeframes. Further, the Departments also are of the view that permitting the withdrawal of a dispute in these cases would decrease the number of payment determinations the certified IDR entity is required to adjudicate.

7. Treatment of Batched Items and Services (26 CFR 54.9816–8(c)(4), 29 CFR 2590.716–8(c)(4), and 45 CFR 149.510(c)(4))

After considering feedback from interested parties, the Departments are of the view that the batching rules should be amended to capture additional efficiencies and expand access to the Federal IDR process, while avoiding combinations of unrelated claims in a single dispute that could unnecessarily complicate an IDR payment determination and operate to reduce efficiency. The Departments also anticipate that these batching policies, if finalized as proposed, would be particularly beneficial to small entities. By offering greater flexibility, these policies will improve the economic cost of the Federal IDR process and reduce the burden on small entities' billing and coding staff.

The Departments considered different approaches to expand the batching rules at proposed 26 CFR 54.9816–8(c)(4), 29 CFR 2590.716–8(c)(4), and 45 CFR 149.510(c)(4) for determining whether the items or services are related to treatment of a similar condition. In particular, the Departments considered approaches that relied on existing code sets that would capture a wider range of items and services than those under the current regulations, including the vacated provisions (discussed in section II.E.2. of this preamble). The rationale underlying batching based on code sets (or subsets of those code sets) is that based on the manner in which these code sets were built (by medical and coding professionals and others), the code sets present a reasonable basis upon which to conclude that certain sections (or subsections) of those code sets describe items and services that are related to the treatment of a similar condition.

The broadest potentially workable standard the Departments considered for determining whether the items or services are related to treatment of a similar condition is the Berenson-Eggers Type of Service (BETOS) codes. The BETOS coding system was originally developed for analyzing the growth in Medicare expenditures and is not

utilized for the purposes of billing.²⁰⁸ The Restructured BETOS Classification System (RBCS) includes HCPCS Level I codes (commonly referred to as “CPT codes”) and HCPCS Level II codes (commonly referred to as “HCPCS codes”) and groups CPT and HCPCS procedural codes into a few very broad categories: (1) anesthesia, (2) evaluation and management, (3) procedures, (4) imaging, (5) tests, (6) durable medical equipment, (7) treatment, and (8) other. However, this could theoretically offer unlimited batching of services furnished by specialty providers and, accordingly, result in batches that would be difficult for certified IDR entities to adjudicate in a timely manner. While this coding system is stable over time and is relatively immune to minor changes in technology or practice patterns, this approach would require parties and certified IDR entities to learn and become familiar with a new framework for categorizing items and services for the specific purpose of engaging with the Federal IDR process. The Departments are of the view that this would result in confusion and an exacerbation of backlog issues.

The Departments also considered allowing initiating parties to batch all items and services with the same ICD–10 diagnosis code. Every medical claim includes at least one ICD–10 diagnosis code, including a primary diagnosis code and optional secondary diagnosis codes. There are approximately 68,000 ICD–10 diagnosis codes that cover a wide variation in patient diagnoses. Given the wide variation in diagnoses and the fact that a single ICD–10 diagnosis code can cover a wide range of individual items or services, it is conceivable that diagnosis codes are not a reasonable basis upon which to determine that items or services provided to different patients sufficiently relate to treatment of a similar condition. Furthermore, the Departments are of the view that this level of variation could create complexity for disputing parties and certified IDR entities and increase the risk of inconsistent batching determinations.

In addition to batching based on code sets, the Departments considered specific recommendations from interested parties on creating additional batching flexibilities for determining whether the items or services are related to treatment of a similar condition. As

discussed in section II.E.2. of this preamble, anesthesiologists have advocated for batching by conversion factor since contracting practices for anesthesiology items and service focus on conversion factor rates. The Departments are of the view that this approach would undermine the Departments' efforts to increase efficiency in the Federal IDR process. Because conversion factors would be identical for every out-of-network service furnished by an anesthesiologist provider or provider group, the “same conversion factor” requirement results in the provider or provider group being able to batch every out-of-network service it furnishes that otherwise satisfies the requirements of the batching rules at proposed 26 CFR 54.9816–8(c)(4), 29 CFR 2590.716–8(c)(4), and 45 CFR 149.510(c)(4). Instead, the Departments are of the view that batching based on CPT code categories would lead to greater efficiency, would more closely align with the interpretation of treatment of a similar condition, and would lead to less risk in the variability among the items and services and factual circumstances that certified IDR entities must consider.

Additionally, the Departments considered feedback provided by emergency physicians, who stated that the nature of emergency care makes it difficult for them to batch claims under the current rules and suggested that the batching rules should allow for the most common evaluation and management CPT codes (99281–99285) to be batched together. However, the Departments have concluded that in the context of emergency care, the acuity of a patient may vary substantially in these circumstances. This means that certified IDR entities would need to review complex and disparate factual conditions for each item or service in a batch pertaining to emergency care, which would be extremely time consuming. Batching in these circumstances would therefore exacerbate payment determination delays and compound the backlog of disputes.

Similarly, the Departments considered allowing batching of all items and services within one of the six major sections of the CPT code book: (1) evaluation & management, (2) anesthesiology, (3) surgery, (4) radiology, (5) pathology and laboratory, and (6) medicine. This could allow batching of the services most often provided by emergency physicians, anesthesiologists, radiologists, pathologists, and other specialty providers. Due to the breadth of CPT

²⁰⁸ Centers for Medicare & Medicaid Services. (October 20, 2022). Restructured BETOS Classification System. <https://data.cms.gov/provider-summary-by-type-of-service/provider-service-classifications/restructured-betos-classification-system>.

codes relevant to surgery and radiology services, the Departments considered further limiting providers' batching ability to the specific services represented by the code spans relevant to each row in Table 8 that correlates to surgery or radiology services. While

these delineations could serve as straightforward guidelines that may result in consistent application of a batching standard across certified IDR entities, the Departments are of the view that variations in these services within a batched dispute could present

challenges to certified IDR entities' efficient resolution of disputes due again to the fact-specific and time intensive nature of reviewing information specific to each item or service within a batch.

TABLE 8: CPT Level I HCPCS Codes Groupings

CPT Level I HCPCS Codes (CPT) Code Span	Description
99202 – 99499	Evaluation and Management
00100 – 01999	Anesthesia
10004 – 19499	Surgery/Integumentary System
20100 – 29999	Surgery/Musculoskeletal System
33016 – 39599	Surgery/Cardiovascular System
40490 – 49999	Surgery/Digestive System
50010 – 53899	Surgery/Urinary System
54000 – 55980	Surgery/Male Genital System
56405 – 58999	Surgery/Female Genital System
60000 – 60599	Surgery/Endocrine System
61000 – 64999	Surgery/Nervous System
65091 – 68899	Surgery/Eye and Ocular Adnexa
69000 – 69979	Surgery/Auditory System
70010 – 77092	Radiology/Diagnostic Radiology/Diagnostic Ultrasound
77261 – 79999	Radiology/Radiation Oncology/Nuclear Medicine
80047 – 89398 0001U – 0284U	Pathology and Laboratory/Proprietary Laboratory Analysis
90281 – 99607	Medicine

The Departments are of the view that specific, narrower ranges within CPT Category I sections could mitigate this risk, more closely relate to the treatment of a similar condition, and encourage efficiencies of the Federal IDR process. Further, the Departments are of the view that batching based on CPT code categories would lead to greater efficiency, would more closely align with the interpretation of treatment of a similar condition, and would lead to less risk in the variability among the items and services and factual circumstances that certified IDR entities must consider. Thus, in balancing the need to create a workable batching rule for all parties and encouraging efficiency (including minimizing costs) to the Federal IDR process, the Departments determined that it would be appropriate to propose amendments to allow qualified IDR items and services to be batched by: (1) items and services furnished to a single patient during a patient encounter on one or more consecutive dates of service and billed on the same claim form (single patient encounter); (2) items and services furnished to one or more

patients and billed under the same service code, or a comparable code under a different procedural code system; or (3) anesthesiology, radiology, pathology, and laboratory IDR items and services furnished under service codes belonging to the same Category I CPT code range, as specified in guidance by the Departments, in order to address the unique circumstances of certain medical specialties and provider types.

Because these proposed rules would potentially allow batching of an unlimited number of qualified IDR items or services, the Departments also considered different approaches to mitigate the risk of large batches that may require certified IDR entities to review the eligibility for each line item, the acuity of each patient and/or other payment determination factors for each line item in the batch. First, the Departments considered modifying regulations related to the certified IDR entity fee to permit certified IDR entities to charge per line item. However, the Departments are of the view that a per line-item charge would present cost challenges for providers with lower dollar-value claims when utilizing the

Federal IDR process. The Departments subsequently considered modifying the IDR entity fee structure such that the certified IDR entity could charge per unique service code, so that certified IDR entities would be able to be adequately compensated for the time and work involved in payment determinations, while allowing for flexibility to batch a greater number of line items per dispute. However, given the Departments' experience in managing the Federal IDR process, the Departments are of the view that such a modification to the certified IDR entity fee structure would still necessitate a line-item limit to ensure certified IDR entities are able to make payment determinations within the required 30-business-day period. It is the Departments' understanding that a per service code charge and line-item limit combined may unnecessarily restrict access to the Federal IDR process.

The Departments also considered limiting a batched dispute to more than 25 different payment offers. For line items in which the payment offers are equal, the certified IDR entity could resolve all such line items through its

review of a single set of facts and documentation. A few certified IDR entities noted that it is easier to resolve payment determinations if the QPA is the same across codes. However, to accommodate batching of more than 25 qualified IDR items and services with equal payment offers, the initiating party would need to provide the offer for each line item or service earlier in the process such as during open negotiation or in the notice of IDR initiation as opposed to only at the time of the notice of offer. The Departments are of the view that this option would prove challenging because it would raise the issue of how to handle the limit of unique payment offers if the non-initiating party disagrees with the amount of unique payment offers. Further, under this approach, if the Departments would require offer information at the time of IDR initiation, the initiating party would only have 4 days to determine their offer following the end of the open negotiation period.

Lastly, the Departments considered imposing line-item limits to mitigate the risk of unwieldy batches. Specifically, the Departments considered proposing a limit of no more than 50 qualified IDR items or services in a batched determination. As of June 6, 2023, the average number of line items per batched dispute was 9 line items from April 2022 to June 2023. The Departments considered that while the average number of line items per batched dispute is much lower than the 50-line-item limit, this data is reflective of the number of line items a party can submit under the same service code, or a comparable code under a different procedural code system, and that there may likely be a higher average with the additional proposed batching flexibilities. Further, the Departments considered that 50 line items might, in some cases, still allow certified IDR entities to resolve payment determinations within the required 30-business-day period. However, based on their experience making payment determinations under the current batching rule, many certified IDR entities stated that batched determinations with more than 25 line items would be difficult to render payment determinations within the 30-business-day period if the Departments proposed additional batching flexibilities. To ensure operational efficiency for certified IDR entities as they make their payment determinations and given the average number of line items in a batched dispute, the Departments propose to require that no more than 25 qualified IDR items and

services may be considered jointly as part of one payment determination for the purposes of batched determinations.

8. Administrative and Certified IDR Entity Fee Collection (26 CFR 54.9816–8T(d), 29 CFR 2590.716–8(d), and 45 CFR 149.510(d))

The Departments considered maintaining the current policy that both the administrative fee and the certified IDR entity fee are due at the same time, later in the Federal IDR process. The Departments, however, determined that requiring a uniform 2-business-day requirement for the administrative fee to be paid by the parties was appropriate. The Departments are of the view that requiring payment by an initiating party within 2 business days of the date of preliminary selection of the certified IDR entity and by a non-initiating party within 2 business days of a notice of an eligibility determination by either the certified IDR entity or the Departments would substantially accelerate dispute throughput in the Federal IDR process and ensure that the costs of using the Federal IDR process are being allocated to both eligible and ineligible disputes.

Further, the Departments considered requiring the initiating party to pay the administrative fee within 1 business day of the date of preliminary selection of the certified IDR entity. The Departments considered whether the initiating party, by virtue of being the party that brings the dispute into the Federal IDR process, takes a more active role from the outset, and it should therefore be aware that it would be required to pay the administrative fee soon after initiating the dispute. In contrast, the Departments considered whether it was appropriate to allow the non-initiating party an additional business day from the date of notice of an eligibility determination to pay the administrative fee, because the non-initiating party neither controls when the dispute is initiated nor when eligibility is determined. On balance, the Departments determined a uniform 2 business day deadline from the date the administrative fee amount is determined (which is at preliminary selection of the certified IDR entity for the initiating party and at notification of an eligibility determination for the non-initiating party) was appropriate to allow equitable payment timeframes for both disputing parties.

Further, the Departments considered requiring the non-initiating party to pay the administrative fee within 2 business days of preliminary selection of the certified IDR entity. However, because the Departments propose in these proposed rules that the non-initiating

party may receive a reduced administrative fee for an ineligible dispute, the Departments determined requiring payment within 2 business days of notification of the eligibility determination was more appropriate. In making this determination, the Departments considered the additional burden associated with an overcharge to non-initiating parties for ineligible disputes, including the hold of additional administrative fees while eligibility is determined and operational costs to effectuate refunds to overcharged non-initiating parties.

The Departments considered maintaining the status quo of certified IDR entities collecting the administrative fee on behalf of the Departments. However, collection of the administrative fee by the certified IDR entities is inefficient, increases the burden of uncompensated work to certified IDR entities when the volume of ineligible disputes is high, and has historically resulted in low collection rates for ineligible disputes partially due to the existing administrative fee collection timing. The Departments also considered direct collection of both the administrative fee and certified IDR entity fee. The Departments are of the view that direct payment of the fee by the parties to the organization to which payment is ultimately owed (the Departments for the administrative fee and the certified IDR entity for the certified IDR entity fee) is more appropriate, especially in light of the different timing of these fee collections.

The Departments also considered only pursuing collection actions from all non-paying parties instead of moving up the timing of the fee collection. This option was counterbalanced by the expense associated with collection proceedings and the need to implement a policy that appropriately accounts for the financial burden of ineligible disputes.

The Departments considered allowing disputes to be placed on a temporary hold while fees are paid. However, ensuring all appropriate Federal IDR process fees are paid was counterbalanced by the need to implement an efficient Federal IDR process to determine out-of-network rates between providers, facilities, and providers of air ambulance services and plans, issuers, and FEHB carriers. The Departments are also of the view that a hold would not incentivize non-responsive parties to take action to challenge eligibility and further participate in open negotiation and the Federal IDR process, which are some of the goals of this proposal.

The Departments also considered charging only the initiating party a reduced administrative fee for low-dollar disputes and charging the non-initiating party the full administrative fee; however, the Departments determined this may be unnecessarily punitive to non-initiating parties in low-dollar disputes. Before proposing the highest offer from a disputing party during open negotiation as the proper metric to determine whether a dispute is low-dollar, the Departments considered setting the threshold for low-dollar disputes based on several metrics including the QPA, billed charge amount, and submitted offer. The Departments are of the view that the QPA is inappropriate because interested parties have expressed concerns about relying on the QPA as a determinative factor in the Federal IDR process. Similarly, billed charge amount was discarded as an option because it is a statutorily prohibited factor in payment determinations; thus, including it as an anchoring point for the administrative fee amount in the Federal IDR portal may lead disputing parties to believe the billed charge amount would be improperly considered by the certified IDR entity in making the final payment determination. Additionally, it would be inappropriate to utilize the final offer amount for two reasons. First, the parties may not know their offer amount when the certified IDR entity is selected and the administrative fee is billed. Second, utilizing the initiating party's offer amount may result in the non-initiating party having insight into the final offer of the initiating party, which may afford a negotiating advantage to non-initiating parties.

The Departments also considered creating an administrative fee that would be scaled based on the value of the dispute initiated, such as charging each disputing party an administrative fee that was 20 percent of the value of the dispute submitted. The Departments, however, are of the view that this approach is not appropriate for two reasons. First, the value of disputes can have a wide range, such as a \$5 million dispute for a NICU inpatient hospital stay compared to a \$500 outpatient service. This example structure would result in parties to the former dispute paying a \$1 million administrative fee and parties to the latter dispute paying a \$100 administrative fee. Second, the Departments recognize that resolving a dispute generally costs the Departments the same amount regardless of whether the dispute involves low-dollar or high-dollar items or services, and the Federal

IDR process is intended to streamline resolution of payment disputes between plans or issuers and providers or facilities. Further, the nature of estimating the administrative fee based on the expenditures made by the Departments in a given year means the administrative fee is not particularized to an individual dispute. This makes a sliding scale impractical to apply to the wide range of disputes subject to the Federal IDR process. Finally, the Departments considered maintaining a flat administrative fee applicable to all disputes but determined that the impact of a flat administrative fee amount on parties seeking to initiate low-dollar disputes could make the Federal IDR process cost prohibitive for some initiating parties.

The Departments considered applying a standardized administrative fee to all parties in all disputes regardless of eligibility. After considering a uniform application, the Departments determined that a framework that better accounts for eligibility costs based on the role of the disputing party and the eligibility of the dispute was a more appropriate distribution of the Departments' expenditures which the administrative fee is designed to recoup. The Departments also had concerns that non-initiating parties could be penalized by paying for an ineligible dispute if an initiating party indiscriminately submitted disputes; however, given that an initiating party must pay the administrative fee for a dispute to be considered fully submitted and for the fee to be assessed to both parties, the Departments are of the view that there are sufficient safeguards in place. Further, the Departments also considered not charging non-initiating parties for ineligible disputes; however, because the statute indicates that each party to a dispute is responsible for the administrative fee, and even in ineligible disputes the non-initiating party is benefiting from Federal IDR process safeguards such as access to the proposed registry and open negotiation, the Departments are of the view that a payment of a reduced administrative fee for non-initiating parties is appropriate, even in disputes that are not eligible for the Federal IDR process. The Departments recognize that the timelines described in this proposed policy may place additional burden on resource constrained small entities. However, the Departments believe that any additional burden to small entities will be significantly outweighed by the additional benefits to small entities from the proposed policies regarding low dollar and ineligible disputes.

9. Extension of Time Periods for Extenuating Circumstances (26 CFR 54.9816–8(g), 29 CFR 2590.716–8(g), and 45 CFR 149.510(g))

Under the proposed amendments to 26 CFR 54.9816–8(g), 29 CFR 2590.716–8(g), and 45 CFR 149.510(g), the Departments would provide an extension of the time periods associated with the Federal IDR process if they identify unforeseen or good cause delays on a case-by-case basis, as opposed to solely relying on one of the parties to submit an extension request. Further, the Departments also propose to codify a generally applicable extension of time periods when the Departments determine that such extension is necessary due to extenuating circumstances that contribute to systematic delays in processing disputes under the Federal IDR process, such as an unforeseen high volume of disputes or Federal IDR portal system failures.

The Departments considered alternatives to these proposals, including maintaining the status quo and not proposing to modify the ability of the Departments to provide extensions on a case-by-case basis or for generally applicable extensions of time periods. Additionally, the Departments considered only proposing the former, and not proposing to codify generally applicable extensions. However, the Departments are of the view that both proposed pathways to granting extensions of time periods for extenuating circumstances are relevant and necessary for the parties and entities participating in the Federal IDR process. In particular, the Departments are of the view that the ability to grant generally applicable extensions of time periods due to extenuating circumstances that contribute to systematic delays would provide protection for parties engaged in the Federal IDR process from the impact of systematic processing delays and ensure that unforeseen circumstances do not unfairly disadvantage a party or hinder its ability to comply with the Federal IDR process timeframes. Furthermore, the Departments believe that these additional protections may be especially beneficial to small entities, which may face difficulty in complying with the timelines proposed in this rulemaking. This proposed policy may partially offset the additional timeframe compliance burden placed on small entities, as described throughout this section, by providing greater flexibility in obtaining extensions in extenuating circumstances.

10. Registration of Group Health Plans and Health Insurance Issuers (26 CFR 54.9816–9, 29 CFR 2590.716–9, and 45 CFR 149.530)

These proposed rules would require plans and issuers to submit certain information to the Departments within 30 business days after the effective date of the final rules through an IDR registration process, and would make the resulting registry of plans and issuers available to parties initiating open negotiation requests or disputes through the Federal IDR portal. The Departments also recognize that this proposed policy may impose additional burden on resource constrained small entities by requiring them to submit additional information to the Departments. The Departments considered limiting registration information to a plan's or issuer's contact information and plan type (for example, fully-insured, self-insured, etc.). However, the Departments are of the view that this limited set of information would be insufficient to allow providers, facilities, and providers of air ambulances to initiate open negotiation and disputes correctly. For example, if a plan submitted information that it was self-insured but did not submit information showing that it had opted into a specified State law, a provider might incorrectly initiate a payment dispute in the Federal IDR process rather than the relevant State process. The Departments also considered requiring more

comprehensive registration information, including a list of items and services that the plan covers which would be subject to a specified State law or All-Payer Model Agreement. The Departments are of the view that this level of detail would be overly burdensome on plans and issuers. Additionally, since States regularly modify the requirements of their specified State laws and All-Payer Model Agreements, the information contained in the registry would frequently be out-of-date. The Departments also considered allowing plans and issuers a period of one year following the rules' effective date to register; however, the Departments are of the view that since plans and issuers are already required to disclose most of the proposed registration information, requiring registration by 30 business days after the rules' effective date would not be unduly burdensome.

*F. Paperwork Reduction Act—
Department of Health and Human
Services, Department of Labor, and
Department of the Treasury*

Under the Paperwork Reduction Act of 1995 (PRA), the Departments are required to provide 60-day notice in the **Federal Register** and solicit public comment before a collection of information requirement is submitted to OMB for review and approval. To fairly evaluate whether an information collection should be approved by OMB, section 3506(c)(2)(A) of the PRA

requires that the Departments solicit comment on the following issues:

- The need for information collection and its usefulness in carrying out the proper functions of the Departments.
- The accuracy of the Departments' estimate of the information collection burden.
- The quality, utility, and clarity of the information to be collected.
- Recommendations to minimize the information collection burden on the affected public, including automated collection techniques.

1. Wage Estimates

To derive wage estimates, the Departments generally used data from the Bureau of Labor Statistics to derive average labor costs (including a 100 percent increase for fringe benefits and overhead) for estimating the burden associated with the information collection requirements (ICRs).²⁰⁹ Table 9 presents the mean hourly wage, the cost of fringe benefits and overhead, and the adjusted hourly wage from the May 2022 National Occupational Employment and Wage Estimates (https://www.bls.gov/oes/current/oes_nat.htm).

As indicated, employee hourly wage estimates have been adjusted by a factor of 100 percent. This is necessarily a rough adjustment, both because fringe benefits and overhead costs vary significantly across employers and because methods of estimating these costs vary widely across studies.

TABLE 9: Adjusted Hourly Wages Used in Burden Estimates

Occupation Title	Occupational Code	Mean Hourly Wage (\$/hour)	Fringe Benefits and Overhead (\$/hour)	Adjusted Hourly Wage (\$/hour)
Computer Programmers	15-1251	\$49.42	\$49.42	\$98.84
General and Operations Manager	11-1021	\$59.07	\$59.07	\$118.14
Secretaries and Administrative Assistants, Except Legal, Medical, and Executive	43-6014	\$20.87	\$20.87	\$41.74
Compensation and Benefits Manager	11-3111	\$68.82	\$68.82	\$137.64
Medical and Health Services Manager	11-9111	\$61.53	\$61.53	\$123.06
Office Clerk	43-9061	\$19.78	\$19.78	\$39.56

2. ICRs Regarding Information To Be Shared About the QPA (26 CFR 54.9816–6(d), 29 CFR 2590.716–6(d), and 45 CFR 149.140(d))

The July 2021 interim final rules, as updated by the August 2022 final rules, require plans and issuers to provide

certain information regarding the QPA to providers, facilities, and providers of air ambulance services when making an initial payment or notice of denial of payment when the QPA is the recognized amount (or, for air ambulance services, the amount on which cost sharing is based).

These proposed rules would require plans and issuers to disclose the legal business name of the group health plan (if any) or issuer; the legal business name of the plan sponsor (if applicable); and the assigned Federal IDR registration number (if the plan or issuer is registered with the Federal IDR

²⁰⁹ *Id.*

registry). In addition, these proposed rules would amend the statement required under 26 CFR 54.9816–6(d)(1)(iv), 29 CFR 2590.716–6(d)(1)(iv), and 45 CFR 149.140(d)(1)(iv) to make technical and conforming changes to the content of the statement.

The Departments assume that TPAs would provide this information on behalf of the self-insured plans they administer. The Departments assume that issuers and TPAs would automate the process of preparing and providing this information to providers, facilities, and providers of air ambulance services. The Departments anticipate that issuers and TPAs would need to make a one-time change to their IT systems to make changes to the currently required QPA notification to incorporate the proposed information described in the proposed new paragraph (d)(1)(v) and paragraph (d)(1)(iv). The Departments estimate that for each plan and issuer, on average, it would take a computer programmer 3 hours (at an hourly rate of \$98.84) to add fillable fields to disclose the legal

business name (if any) of the group health plan or issuer; the legal business name of the plan sponsor (if applicable) and the assigned Federal IDR registration number (if the plan or issuer is registered with the Federal IDR registry); to add information notifying the provider, facility, or provider of air ambulance services of the proposed requirement to notify the Departments to initiate open negotiation; and to replace the phrase “amount of total payment” with the term “out-of-network rate” and the term “determination” with the phrase “agreement on the amount of payment” in the statement about initiating open negotiation. The Departments estimate that the one-time burden for each plan or issuer, to be incurred in 2024, would be 3 hours on average, with an equivalent cost of approximately \$297. The Departments estimate a total one-time burden, for all issuers and TPAs, of 5,115 hours, with an associated cost of approximately \$505,567. As the Departments share jurisdiction, HHS

would account for 50 percent of the total burden, or approximately 2,558 burden hours, with an equivalent cost of approximately \$252,783. The Departments of Labor and the Treasury would each account for 25 percent of the total burden, or approximately 1,279 burden hours, with an equivalent cost of approximately \$126,392. The Departments seek comment on these burden estimates.

In addition, the Departments propose to revise the regulation addressing information to be shared about the QPA to make clear these disclosures are required when the recognized amount (or for air ambulance services, the amount on which cost sharing is based) is the QPA or the amount billed by the provider, facility, or provider of air ambulance services. The Departments anticipate that this is not a common occurrence and therefore would not result in an increase in burden for plans and issuers.

TABLE 10: One-Time IT Burden and Cost for Plans and Issuers to Incorporate Information Related to QPA to Providers, Facilities, and Providers of Air Ambulance Services

Year	Department	Estimated Number of Respondents	Estimated Number of Responses	Burden per Response (Hours)	Total Annual Burden (Hours)	Total Estimated Cost
2024	HHS	853	853	3	2,557.5	\$252,783
	Labor	426	426	3	1,278.8	\$126,392
	Treasury	426	426	3	1,278.8	\$126,392

The Departments would revise the information collection currently approved under OMB control number 0938–1401 to account for this new burden.²¹⁰

3. ICRs Regarding Open Negotiation (26 CFR 54.9816–8(b)(1), 29 CFR 2590.716–8(b)(1), and 45 CFR 149.510(b)(1))

The Departments propose to require a party to provide an open negotiation notice containing additional required elements and supporting documentation to the other party and the Departments to initiate the open negotiation period. The October 2021 interim final rules established that the initiating party must provide an open negotiation notice to

the other party which must include information sufficient to identify the items or services subject to negotiation, including the date(s) the item(s) or service(s) were furnished, the service code, and initial payment amount, if applicable), an offer of an out-of-network rate, and contact information for the party sending the open negotiation notice. The provisions in these proposed rules would expand the required information in an open negotiation notice to include 12 new content additions to the existing required elements. The expanded content requirements would include: (1) information sufficient to identify the provider, facility or provider of air ambulance services, including name and current contact information (including the legal business name, email address, phone number, and

mailing address) and the National Provider Identifier (NPI); (2) the plan’s or issuer’s registration number as required under 26 CFR 54.9816–9, 29 CFR 2590.716–9, and 45 CFR 149.530 (if the plan or issuer is not registered under 26 CFR 54.9816–9, 29 CFR 2590.716–9, and 45 CFR 149.530, an attestation by the party submitting the open negotiation notice that the plan or issuer was not registered by the date it submitted the open negotiation notice), the legal business name of the plan or issuer as well as the current contact information (name, email address, phone number, and mailing address) of the plan or issuer as provided with the initial payment or notice of denial of payment, and if the party submitting the open negotiation notice is a plan or issuer, the plan type (for example, self-insured or fully-insured); (3) the name

²¹⁰ OMB Control Number: 0938–1401 (CMS–10780, Requirements Related to Surprise Billing: Qualifying Payment Amount, Notice and Consent, Disclosure on Patient Protections Against Balance Billing, and State Law Opt-in).

and contact information including the legal business name, email address, phone number, and mailing address for any third party representing the party submitting the open negotiation notice and an attestation that the third party has the authority to act on behalf of the party it represents in the open negotiation; (4) information sufficient to identify the item or service, including, but not limited to: the date(s) the item or service was furnished and the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for such item or service from the plan or issuer; the type of item or service including, whether the item or service is an emergency service as defined in 26 CFR 54.9816-4T(c)(2), 29 CFR 2590.716-4(c)(2), and 45 CFR 149.110(c)(2), non-emergency times and services as described in 26 CFR 54.9816-5T(b), 29 CFR 2590.716-5(b), and 45 CFR 149.120(b); or an air ambulance service as defined in 26 CFR 54.9816-3T, 29 CFR 2590.716-3, and 45 CFR 149.30; whether the service is a professional service or facility-based service; the State where the item or service was furnished; the claim number; the service code; and information sufficient to identify the location the item of service was furnished (such as place of service code or bill type); (5) the initial payment amount (including \$0 if, for example, payment is denied); (6) the QPA if provided with the initial payment or denial of payment; (7) an offer of an out-of-network rate for each item or service; (8) if the party submitting the open negotiation notice is a plan or issuer, the amount of cost sharing imposed for the item or service; (9) if the party submitting the open negotiation notice is a provider or facility, a statement that the patient who received the item or service did not receive notice or provide consent as described in 45 CFR 149.410(b) or 149.420(c) through (i) to be treated by a nonparticipating provider or nonparticipating emergency facility; (10) a statement that the provider, facility, or provider of air ambulance services was a nonparticipating provider, nonparticipating emergency facility, or nonparticipating provider of air ambulance services on the date the item or service was furnished; (11) general information listed in the standard open negotiation notice developed by the Departments describing the open negotiation period and the Federal IDR process (including a description of the purpose of the open negotiation period and Federal IDR process and key

deadlines in the open negotiation period and Federal IDR process); and (12) a copy of the initial payment or notice of denial of payment or other remittance advice that is required to include the disclosures under 26 CFR 54.9816-6T(d)(1), 29 CFR 2590.716-6(d)(1), and 45 CFR 149.140(d)(1) for the item or service.

Furthermore, the Departments propose that the party in receipt of the open negotiation notice would be required to provide a response to the open negotiation notice through the Federal IDR portal no later than the 15th business day of the 30-business-day open negotiation period. The proposed open negotiation response notice would require the following categories of information, beginning with the same information as specified in proposed 26 CFR 54.9816-8(b)(1)(ii)(A)(1) through (3), 29 CFR 2590.716-8(b)(1)(ii)(A)(1) through (3), and 45 CFR 149.510(b)(1)(ii)(A)(1) through (3) related to the requirements to provide contact information for the provider, facility, or provider of air ambulance services, and the plan or issuer that is a party to the open negotiation, and any third party representing a party in the open negotiation. It would also include (4) information sufficient to identify each item or service included in the open negotiation notice, including the date(s) the item or service was furnished and the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for such item or service from the plan or issuer and the claim number; (5) if the party in receipt of the open negotiation notice is a plan or issuer, a statement as to whether the party in receipt of the open negotiation notice agrees that the initial payment amount (including \$0 if, for example, payment is denied) and the QPA reflected in the open negotiation notice is accurate for the item or service, and if not, or if the open negotiation notice indicated that the initial payment amount or qualifying payment amount was not communicated by the plan or issuer with the initial payment or notice of denial of payment or other remittance advice, the initial payment amount (including \$0 if, for example, payment is denied) and/or QPA amount it believes to be correct and documentation to support the statement; (6) if the party in receipt of the open negotiation notice is a plan or issuer, the amount of cost sharing imposed for the item or service; (7) a counteroffer of an out-of-network rate for the item or service or an acceptance of the other party's offer; (8) if the party in receipt

of the open negotiation notice is a provider or facility, a statement that the patient who received the item or service did not receive notice or provide consent to be treated by a nonparticipating provider or nonparticipating emergency facility as described in 149.410(b) or 149.420(c) through (i); (9) with respect to each item or service, either a statement and supporting documentation that notes why the item or service is ineligible for the Federal IDR process or a statement agreeing that the item or service is eligible for the Federal IDR process; (10) a statement as to whether any of the information provided in the open negotiation notice is inaccurate and the basis for the assertion; and (11) a statement confirming that the initial payment or notice of denial of payment or other remittance advice provided with the open negotiation notice is accurate, and if inaccurate, a copy of the initial payment or notice of denial of payment or other remittance advice that are required to include the disclosures under 26 CFR 54.9816-6T(d)(1), 29 CFR 2590.716-6(d)(1), and 45 CFR 149.140(d)(1), for the item or service.

In addition to the paperwork costs for the Federal IDR process previously accounted for in the July 2021 interim final rules and October 2021 interim final rules, the Departments estimate that it would take a compensation and benefits manager 30 minutes (at an hourly rate of \$137.64) and an office clerk 15 minutes (at an hourly rate of \$39.56) on average to prepare and submit the additional information for open negotiation for each plan, issuer, or FEHB carrier and provider or facility initiating open negotiation. This results in a cost of \$78.71 per party per open negotiation notice. Similarly, the Departments estimate that it would take a compensation and benefits manager 30 minutes (at an hourly rate of \$137.64) and an office clerk 15 minutes (at an hourly rate of \$39.56) on average to prepare and submit the proposed open negotiation response notice for each party in receipt of the open negotiation notice, resulting in a cost of \$78.71 per party per open negotiation response notice. In the October 2021 interim final rules, the Departments originally estimated that 25 percent of disputes would be resolved in open negotiation before entering the Federal IDR process.²¹¹ The Departments request data or comments on whether this assumption has been proven correct. Accordingly, the Departments estimate that 560,000 disputes per year would go through open negotiation, requiring

²¹¹ 86 FR 56056.

560,000 initiating parties to prepare and submit the additional materials proposed for the open negotiation notice and 560,000 non-initiating parties to prepare and submit the additional materials proposed for the open negotiation notice response notice. At a cost of \$78.71 (\$68.82 for 30 minutes by the compensation and benefits manager and \$9.89 for 15 minutes by the office clerk, or a combined hourly rate of \$104.95) per party per dispute, this

results in a total annual hour burden of 840,000 hours with an equivalent cost of approximately \$88,158,000 for 560,000 disputes annually beginning in 2025.²¹² As the Departments and OPM share jurisdiction, HHS would account for 45 percent of the total burden, or approximately 378,000 burden hours, with an equivalent cost of approximately \$39,671,100. The Departments of Labor and the Treasury would each account for 25 percent of

the total burden, or approximately 210,000 burden hours, with an equivalent cost of approximately \$22,039,500. OPM would account for 5 percent of the total burden, or approximately 42,000 burden hours, with an equivalent cost of approximately \$4,407,900. The Departments seek comment on these assumptions.

TABLE 11: Annual Burden and Cost for Open Negotiation

Department	Estimated Number of Respondents	Estimated Number of Responses	Burden per Response (Hours)	Total Annual Burden (Hours)	Total Estimated Cost
HHS	472,500	472,500	0.75	378,000	\$39,671,100
Labor	262,500	262,500	0.75	210,000	\$22,039,500
Treasury	262,500	262,500	0.75	210,000	\$22,039,500
OPM	52,500	52,500	0.75	42,000	\$4,407,900

The Departments would revise the information collection currently approved under OMB control number 1210–0169 to account for this new burden.²¹³

4. ICRs Regarding Initiating the Federal IDR Process and the Notice of IDR Initiation (26 CFR 54.9816–8(b)(2), 29 CFR 2590.716–8(b)(2), and 45 CFR 149.510(b)(2))

a. Notice of IDR Initiation and Notice of IDR Initiation Response

To initiate the Federal IDR process, the initiating party must submit a written notice of IDR initiation to the non-initiating party and to the Departments (using the standard form developed by the Departments) during the 4-business-day period beginning on the first business day after the close of the 30-business-day open negotiation period. The Departments propose to add additional required elements under the 8 categories to the existing required information in the written notice of IDR initiation: (1) information sufficient to identify the initiating party, including the TIN, the NPI of the provider, facility, or provider of air ambulance services (if available), the plan’s or issuer’s registration number, if the plan or issuer is registered under 26 CFR 54.9816–9, 29 CFR 2590.716–9, and 45 CFR 149.530, and if the initiating party is a plan or issuer, the plan type; (2) the

name and contact information for any third party representing the initiating party and an attestation that the third party has the authority to act on behalf of the party it represents in the Federal IDR process; (3) information sufficient to identify whether the dispute being initiated includes batched or bundled qualified IDR items or services; (4) information sufficient to identify the item or service included in the notice of IDR initiation, including the date(s) the item or service was furnished. If the initiating party is a provider, facility, or provider of air ambulances, the date(s) the provider, facility, or air ambulance provider received the initial payment or denial of payment, the date the open negotiation period began, the type of item or service, whether the service is a professional or service or facility-based service, the State where the item or service was furnished, the claim number, service code and information to identify the location the service was furnished (including place of service or bill type code); (5) if the non-initiating party is a plan or issuer, a statement that the provider, facility, or air ambulance provider was a nonparticipating provider, facility, or air ambulance provider; (6) an attestation that the item or service is a qualified IDR item or service and the basis for the attestation; (7) a copy of the initial payment or notice of denial of payment or other

prorated to 50 percent, or 420,000 hours with an equivalent cost of \$44,079,000.

remittance advice that is required to include the disclosures under 26 CFR 54.9816–6T(d)(1), 29 CFR 2590.716–6(d)(1), and 45 CFR 149.140(d)(1), with respect to the item or service; and (8) a statement describing the key aspects of the claim, such as patient acuity or level of training of the provider, facility, or provider of air ambulance services that furnished the qualified IDR item or service, discussed by the parties during open negotiation that relate to the payment for the disputed claim, whether the reasons for initiating the Federal IDR process are different from the aspects of the claim discussed during the open negotiation period, and an explanation of why the party is initiating the Federal IDR process.

The Departments also propose that the non-initiating party must submit a written response to the notice of IDR initiation to the initiating party and to the Departments during the 3-business-day period beginning on the day after the notice of IDR initiation is received by the Departments. This proposed IDR initiation response notice would require the following information: (1) information sufficient to identify the provider, facility, or provider of air ambulance services, including name and current contact information (including the legal business name, email address, phone number, and mailing address), the TIN, the NPI of the

²¹² As the Departments do not anticipate these proposed rules would be finalized and effective before July 1, 2024, the burden for 2024 would be

²¹³ OMB Control Number: 1210–0169 (No Surprises Act: IDR Process).

provider, facility, or provider of air ambulance services, (2) information sufficient to identify the plan or issuer including the plan's or issuer's registration number, as required under 26 CFR 54.9816–9, 29 CFR 2590.716–9, and 45 CFR 149.530 or an attestation from the non-initiating party that the plan or issuer was not registered prior to the date that it submitted the notice, the legal business name of the plan or issuer, as well as the current contact information (name, email address, phone number, and mailing address) of the plan or issuer as provided with the initial payment or notice of denial of payment; and if the party submitting the notice of IDR initiation response is a plan or issuer, the plan type (for example, self-insured or fully-insured) and TIN (or, in the case of a plan that does not have a TIN, the TIN of the plan sponsor); (3) the name and contact information for any third party representing the non-initiating party and an attestation that the third party has the authority to act on behalf of the party it represents in the Federal IDR process; (4) information sufficient to identify each item or service (including the date(s) the item or service was furnished, if the non-initiating party is a provider, facility, or provider of air ambulance services, the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for such item or service from the plan or issuer, and the claim number); (5) if the non-initiating party is a plan or issuer, a statement as to whether the non-initiating party agrees that the initial payment (including \$0 if, for example, payment is denied) and the QPA reflected in the notice of IDR initiation is accurate and if not, an assertion of the correct initial payment amount and/or the QPA that was disclosed with the initial payment or notice of denial of payment for the item

or service and documentation to support the assertion; (6) if the non-initiating party is a plan or issuer, the amount of cost sharing imposed for the item or service; (7) if the non-initiating party is a provider or facility, a statement that the items and services do not qualify for the notice and consent exception described at CFR 149.410(b) or 149.420(c); (8) for each item or service subject to the dispute, an attestation that the item or service that is the subject of the dispute is a qualified IDR item or service, and for each item or service that the non-initiating party attests is not a qualified IDR item or service, an explanation and supporting documentation; (9) a statement confirming that the initial payment or notice of denial of payment or other remittance advice provided by the initiating party under paragraph (b)(2)(ii)(A)(12) is accurate, and if inaccurate, a copy of the remittance advice or other documentation required to include the disclosures under 26 CFR 54.9816–6T(d)(1), 29 CFR 2590.716–6(d)(1), and 45 CFR 149.140(d)(1), with respect to the item or service; (10) a statement as to whether any of the information provided in the notice of IDR initiation is inaccurate and the basis for the statement as well as any supporting documentation; and (11) a statement as to whether the non-initiating party agrees or objects to the initiating party's preferred certified IDR entity and if the party objects, an alternative preferred certified IDR entity.

In addition to the paperwork costs for the Federal IDR process, the Departments estimate that it would take a compensation and benefits manager 30 minutes (at an hourly rate of \$137.64) and an office clerk 15 minutes (at an hourly rate of \$39.56) on average to prepare and submit the additional statements proposed for the notice of IDR initiation for each initiating party,

resulting in a cost of \$78.71 per party per notice of IDR initiation. Similarly, the Departments estimate that it would take a compensation and benefits manager 30 minutes (at an hourly rate of \$137.64) and an office clerk 15 minutes (at an hourly rate of \$39.56) on average to prepare and submit the proposed notice of IDR initiation response for each non-initiating party, resulting in a cost of \$78.71 per party per notice of IDR initiation response. The Departments estimate that 420,000 disputes would be initiated, requiring work by 840,000 disputing parties. At a per party cost of \$78.71 (\$68.82 for 30 minutes by the compensation and benefits manager at \$137.64 per hour and \$9.89 for 15 minutes by the office clerk at \$39.56 per hour, or a combined hourly rate of \$104.95) per party, this results in a total estimated annual hour burden of 630,000 hours or an equivalent cost burden of \$66,118,500 for 420,000 disputes, which includes 315,000 estimated annual burden hours or an equivalent annual cost burden of \$33,059,250 each for initiating and non-initiating parties, respectively, beginning in 2025.²¹⁴ As the Departments and OPM share jurisdictions, HHS would account for 45 percent of the total burden, or approximately 283,500 burden hours, with an equivalent cost of approximately \$29,753,325. The Departments of Labor and the Treasury would each account for 25 percent of the total burden, or approximately 157,500 burden hours, with an equivalent cost of approximately \$16,529,625. OPM would account for 5 percent of the total burden, or approximately 31,500 burden hours, with an equivalent cost of approximately \$3,305,925. The Departments seek comment on these assumptions.

TABLE 12: Annual Burden and Cost for Notice of IDR Initiation

Department	Estimated Number of Respondents	Estimated Number of Responses	Burden per Response (Hours)	Total Annual Burden (Hours)	Total Estimated Cost
HHS	378,000	378,000	0.75	283,500	\$29,753,325
DOL	210,000	210,000	0.75	157,500	\$16,529,625
Treasury	210,000	210,000	0.75	157,500	\$16,529,625
OPM	42,000	42,000	0.75	31,500	\$3,305,925

²¹⁴ As the Departments do not anticipate these proposed rules would be finalized and effective

before July 1, 2024, the burden for 2024 would be

prorated to 50 percent, or 315,000 hours with an equivalent cost of \$33,059,250.

The Departments would revise the information collection currently approved under OMB control number 1210–0169 to account for the new burden.²¹⁵

b. Preliminary Selection of the Certified IDR Entity

The Departments anticipate that the amendments to the process for the preliminary selection of the certified IDR entity would reduce the overall burden associated with collecting information through the notice of certified IDR entity selection. In these proposed rules, the Departments propose that the non-initiating party must agree or object to the preferred certified IDR entity in the notice of IDR initiation response. Accordingly, the initiating party would only be required to submit the notice of certified IDR entity selection if the non-initiating party objects to the initiating party's preferred certified IDR entity and submits an alternative preferred certified IDR entity in the notice of IDR initiation response, thus limiting the frequency with which the Departments expect the initiating party to submit this information. Similarly, the non-initiating party would only be required to use the notice of certified IDR entity selection if the non-initiating party objected to the initiating party's alternative preferred certified IDR entity included in the initiating party's notice of certified IDR selection form. The content submitted through the notice would also be streamlined to only reflect information confirming the party's agreement or objection, preferred alternative to other party's alternative preferred certified IDR entity, and if applicable, an explanation of the conflict of interest with the alternative preferred certified IDR entity.

Under the current rules and currently approved PRA package (OMB control number 1210–0169), the Departments assume that all disputes require the submission of the notice of certified IDR entity selection, and that each notice corresponds to approximately 1.25 burden hours, with an equivalent cost of \$119.²¹⁶ Across all disputes, the Departments assume an annual burden of approximately 21,794 hours at a cost of approximately \$2,156,635 for parties to submit the notice of certified IDR

entity selection. However, based on these proposed rules, the Departments anticipate that the frequency and content of this collection would change, thus impacting the currently estimated burden.

Under these proposed rules, this information collection would be limited to those disputes in which either party does not agree to the other party's preferred alternative certified IDR entity. For this subset of disputes, the initiating party would be required to submit the notice of certified IDR entity selection to indicate agreement or objection to the non-initiating party's alternate preferred certified IDR entity selection as indicated in the notice of IDR initiation response, and both parties would have the ability to submit the notice back-and-forth during the 3-day period after the date of IDR initiation until an agreed upon entity is identified or the parties fail to jointly agree. The content of the collection would be revised to only require a party to indicate their agreement or objection and if applicable an explanation of the conflict of interest, and identification of an alternate preferred certified IDR entity and thus the Departments anticipate that it would take a respondent much less time to submit this information than previously estimated.

Based on internal data, in approximately 29 percent of disputes, the non-initiating party objects to the certified IDR entity selected by the initiating party. Further, out of the 29 percent of disputes in which the non-initiating party objected to the certified IDR entity selected by the initiating party, the majority of those disputes (93 percent, or 27 percent of all disputes) the initiating party agreed to the alternate preferred certified IDR entity selected by the non-initiating party. In a very small percentage (approximately 2 percent) of disputes, the non-initiating party and initiating party engage in a back-and-forth by objecting to each other's preferred certified IDR entities multiple times. Based on the number of disputes submitted from June 2022 through June 2023, the Departments estimate that approximately 113,400 disputes would require the initiating party to submit a notice of certified IDR entity selection form a single time. The Departments estimate that it would take an office clerk 30 minutes (at an hourly rate of \$39.56) on average to prepare and submit the notice indicating agreement or objection to the alternate preferred certified IDR entity and selecting an alternative entity, if applicable. This would result in a cost of \$19.78 per dispute. For the approximately 113,400

disputes that would require this collection, the total annual hourly burden would be 56,700 hours, with an equivalent annual cost of approximately \$2,243,052.²¹⁷

In addition, the Departments expect that, for a small proportion of disputes, the initiating party and the non-initiating party would exchange the notice of certified IDR entity selection multiple times within the proposed timeframe before reaching agreement and jointly selecting or defaulting to random selection. To reflect the additional burden associated with disputes requiring multiple notices, the Departments estimate that approximately 8,400 disputes would require the provision of two total rounds of notice exchange²¹⁸ by the initiating party and non-initiating party before either jointly selecting a certified IDR entity or defaulting to selection by the Departments. This would result in a cost of \$39.56 per dispute, and a total annual hourly burden of 8,400 hours with an equivalent cost of \$332,304.²¹⁹

The Departments estimate that in total for disputes requiring this collection, including both the 113,400 disputes that the Departments anticipate would require a single submission of the notice of certified IDR entity selection form and the 8,400 disputes requiring multiple submissions of the form, the average burden per response would be approximately 0.53 hours²²⁰ with an equivalent cost of approximately \$21.14 per response.²²¹ Therefore, the total annual burden would be 65,100 hours, with an equivalent cost of

²¹⁷ The is calculated as follows: 113,400 disputes × 0.5 hours = 56,700 burden hours. 56,700 burden hours × \$39.56 hourly rate = \$2,243,052 total annual cost.

²¹⁸ Internal data show that the highest number of times a certified IDR entity was selected for a single dispute was five. Since these proposed rules would amend the frequency of use of the notice of certified IDR entity selection by transferring one of the selection instances to the notice of IDR initiation, five unique selections would correspond to four exchanges of the notice of certified IDR entity selection. However, the Departments anticipate that four exchanges would be quite rare based on internal data, so the Departments are using two exchanges of the notice of certified IDR entity selection in these estimates. The Departments seek comment on these assumptions.

²¹⁹ This is calculated as follows: 8,400 disputes × 0.5 hours × 2 exchanges = 8,400 burden hours. 8,400 burden hours × \$39.56 hourly rate = \$332,304 total annual cost.

²²⁰ The precise unrounded number for the weighted average time per response is 0.53448 hours. This unrounded number is used to calculate the total annual burden across the disputes requiring the submission of a certified IDR entity selection notice. The calculation is as follows: 0.53448 weighted average time per response × 121,800 disputes = 65,100 total annual burden hours.

²²¹ This is calculated as follows: 0.53 hours × \$39.56 hourly rate = \$21.14 cost per response.

²¹⁵ OMB Control Number: 1210–0169 (No Surprises Act: IDR Process).

²¹⁶ The Departments assume that it will take 1 hour for a medical and health services professional to write the notice and 15 minutes for a clerical worker to prepare and send the notice at a wage rate of \$109.03 per hour for the medical and health services manager and a wage rate of \$58.66 per hour for the clerical worker.

\$2,575,356.²²² As the Departments and OPM share jurisdiction, HHS would account for 45 percent of the total burden, or approximately 29,295 burden hours, with an equivalent cost of approximately \$1,158,910. The Departments of Labor and the Treasury would each account for 25 percent of the total burden, or approximately

16,275 burden hours each, with an equivalent cost of approximately \$643,839 each. OPM would account for 5 percent of the total burden, or approximately 3,255 burden hours, with an equivalent cost of approximately \$128,768.

However, as discussed earlier in this section, as the current information

collection assumes a burden per respondent of 1.25 hours and a total cost burden of \$2,156,635, the Departments estimate a total increase in costs of approximately \$418,621²²³ due to the proposed changes to the requirement to submit this notice. The Departments seek comment on these assumptions.

TABLE 13: Annual Burden and Cost for Notice of Certified IDR Entity Selection Form

Department	Estimated Number of Respondents	Estimated Number of Responses	Burden per Response (Hours)	Total Annual Burden (Hours)	Total Estimated Cost
HHS	44,370	44,370	0.53	29,295	\$1,158,910
Labor	24,650	24,650	0.53	16,275	\$643,839
Treasury	24,650	24,650	0.53	16,275	\$643,839
OPM	4,930	4,930	0.53	3,255	\$128,768

The Departments would revise the information collection currently approved under OMB control number 1210-0169 to account for this revised burden.

5. ICRs Regarding Federal IDR Eligibility Determinations (26 CFR 54.9816-8(c), 29 CFR 2590.716-8(c), and 45 CFR 149.510(c))

The Departments anticipate no change or nominal change in burden related to the proposed departmental eligibility review provision. This information collection is approved under OMB control number 1210-0169. The same type and quantity of information would continue to be collected from disputing parties to determine eligibility under these proposed rules. When the departmental eligibility review is in effect, the Departments would be collecting information related to Federal IDR dispute eligibility. When the departmental eligibility review is not in effect, the Departments and the certified IDR entities would be collecting this information. Therefore, the Departments are of the view that there is no change in burden associated with changing to whom the parties are submitting eligibility information. The Departments seek comment on these assumptions.

6. ICRs Regarding Withdrawals (26 CFR 54.9816-8(c)(3)(ii), 29 CFR 2590.716-8(c)(3)(ii), and 45 CFR 149.510(c)(3)(ii))

The Departments propose to add 26 CFR 54.9816-8(c)(3)(ii), 29 CFR 2590.716-8(c)(3)(ii), and 45 CFR 149.510(c)(3)(ii) to establish a process for disputes to be withdrawn from the Federal IDR process. The proposed withdrawal process would require the creation of a new collection of information and increase burden on the initiating and non-initiating parties required to submit the proposed notice. These proposed rules would require the initiating party to submit a withdrawal request to the Departments and the non-initiating party through the Federal IDR portal. The non-initiating party would then be required to provide a response within 5 business days indicating agreement or objection to the request for withdrawal. Each dispute would therefore require a collection from both the initiating (requesting) and the non-initiating (responding) parties in order to withdraw. If the non-initiating party fails to respond, the non-initiating party would be considered to have agreed to the dispute's withdrawal. The Departments expect that dispute withdrawals would be relatively rare: Based on internal data, the Departments anticipate that approximately 4 percent

of disputes (or 16,800 disputes) would be withdrawn annually.

The Departments estimate that it would take a compensation and benefits manager 15 minutes (at an hourly rate of \$137.64) and an office clerk 15 minutes (at an hourly rate of \$39.56) for the initiating party to prepare and submit the notice of request for withdrawal to the non-initiating party and the Departments through the Federal IDR portal, resulting in a time of 30 minutes and cost of \$44.30 per dispute for the initiating party.²²⁴ For the anticipated 16,800 withdrawn disputes annually, initiating parties would incur a total of 8,400 burden hours with an equivalent cost burden of \$744,240 to submit withdrawal requests annually.²²⁵ Because the notice of withdrawal response would have fewer data elements and would require a lower amount of time and labor burden to submit, the Departments estimate that it would take an office clerk approximately 15 minutes (at an hourly rate of \$39.56) on average for the non-initiating party to submit the notice of withdrawal response to the initiating party and the Departments through the Federal IDR portal, resulting in a cost of \$9.89 per response.²²⁶ For the anticipated 16,800 withdrawn disputes annually, the non-initiating party would

²²² As the Departments do not anticipate these proposed rules would be finalized and effective before July 1, 2024, the burden for 2024 would be prorated to 50 percent, or 32,550 hours with an equivalent cost of \$1,287,678.

²²³ This is calculated as follows: \$2,156,635 – \$2,575,256 = –\$418,621.

²²⁴ This is calculated as follows: 0.25 hours per response × \$137.64 hourly rate for a compensation and benefits manager = \$34.41 per response. 0.25 hours per response × \$39.56 hourly rate for an office clerk = \$9.89 per response. \$34.41 + \$9.89 = \$44.30 total per response.

²²⁵ This is calculated as follows: 16,800 disputes × 0.5 labor hours per dispute = 8,400 total burden hours. 16,800 disputes × \$44.30 per dispute =

\$744,240 total cost. As the Departments do not anticipate these proposed rules would be finalized and effective before July 1, 2024, the burden for 2024 would be prorated to 50 percent, or 4,200 hours with an equivalent cost of \$372,120.

²²⁶ This is calculated as follows: 0.25 hours per response × \$39.56 hourly rate for an office clerk = \$9.89 per response.

incur a total of 4,200 burden hours or an equivalent cost burden of \$166,152 to submit withdrawal responses annually.²²⁷ This results in a total estimated annual burden of 12,600 hours or an equivalent cost burden of \$910,392 across both the initiating and non-initiating parties.²²⁸

As the Departments and OPM share jurisdictions, HHS would account for 45 percent of the total burden, or approximately 5,670 burden hours, with an equivalent cost of approximately \$409,676. The Departments of Labor and the Treasury would each account for 25 percent of the total burden, or

approximately 3,150 burden hours, with an equivalent cost of approximately \$227,598. OPM would account for 5 percent of the total burden, or approximately 630 burden hours, with an equivalent cost of approximately \$45,520. The Departments seek comment on these assumptions.

TABLE 14: Annual Burden and Costs for Withdrawals

Department	Estimated Number of Respondents	Estimated Number of Responses	Burden per Response (Hours)	Total Annual Burden (Hours)	Total Estimated Cost
HHS	7,560	7,560	0.75	5,670	\$409,676
Labor	4,200	4,200	0.75	3,150	\$227,598
Treasury	4,200	4,200	0.75	3,150	\$227,598
OPM	840	840	0.75	630	\$45,520

The Departments would revise the information collection currently approved under OMB control number 1210–0169 to account for this proposed burden.

7. ICRs Regarding Administrative and Certified IDR Entity Fee Collection (26 CFR 54.9816–8(d), 29 CFR 2590.716–8(d), and 45 CFR 149.510(d))

The Departments propose to allow for the administrative fee due from each party for participating in the Federal IDR process to be paid to the Departments. The burden currently associated with this requirement is the time and effort for a certified IDR entity to track payments made by disputing parties and submit the administrative fees to HHS upon invoice. In the No Surprises Act: IDR Process PRA package,²²⁹ the Departments estimated that tracking payments made by disputing parties and submitting the administrative fees to HHS upon invoice

would take a clerical worker (a secretary or administrative assistant, not including legal, medical, or executive) approximately 18 hours annually (at a rate of \$39.56 per hour). The Departments estimated that each certified IDR entity would incur a burden of 18 hours annually at a cost of approximately \$711 per certified IDR entity to comply with the administrative fee reporting and submission requirements.

Since this proposal would eliminate the requirement that certified IDR entities collect the administrative fee on behalf of the Departments, the Departments propose to rescind this information collection. The burden associated with this information collection estimated above would be removed if this proposal is finalized, since certified IDR entities would no longer be collecting the administrative fee moving forward.

The Departments estimate a total burden reduction, for 13 certified IDR entities, of 234 hours, with an associated cost reduction of approximately \$9,257 beginning in 2025. As the Departments share jurisdiction, HHS would account for 45 percent of the total burden reduction, or a reduction of approximately 108 burden hours, with an equivalent cost reduction of approximately \$4,272. The Departments of Labor and the Treasury would each account for 25 percent of the total burden reduction, or approximately 54 burden hours each, with an equivalent cost reduction of approximately \$2,136. OPM would account for 5 percent of the total burden reduction, or approximately 18 burden hours, with an equivalent cost reduction of approximately \$712. The Departments seek comment on these assumptions.

²²⁷ This is calculated as follows: 16,800 disputes × 0.25 labor hours per dispute = 4,200 total burden hours. 16,800 disputes × \$9.89 = \$166,152 total cost. As the Departments do not anticipate these proposed rules would be finalized and effective before July 1, 2024, the burden for 2024 would be prorated to 50 percent, or 2,100 hours with an equivalent cost of \$83,076.

²²⁸ This is calculated as follows: 8,400 total initiating party burden hours + 4,200 total non-initiating party burden hours = 12,600 overall total burden hours. \$744,240 total initiating party cost + \$166,152 total non-initiating party cost = \$910,392 overall total cost. As the Departments do not anticipate these proposed rules would be finalized and effective before July 1, 2024, the burden for 2024 would be prorated to 50 percent, or 6,300 hours with an equivalent cost of \$455,196.

²²⁹ OMB Control Number: 1210–0169 (No Surprises Act: IDR Process). The burden is estimated as follows: (18 hours × \$39.56) = \$712.08 per certified IDR entity. A labor rate of \$39.56 is used for a clerical worker (a secretary or administrative assistant, not including legal, medical, or executive). The labor rates are applied in the following calculation: (13 certified IDR entities × 18 hours × \$39.56) = \$9,257.04.

TABLE 15: Annual Burden and Cost for Administrative Fee Collection

Department	Estimated Number of Respondents	Estimated Number of Responses	Burden per Response (Hours)	Total Annual Burden (Hours)	Total Estimated Cost
HHS	6	6	(18)	(108)	(\$4,272)
Labor	3	3	(18)	(54)	(\$2,136)
Treasury	3	3	(18)	(54)	(\$2,136)
OPM	1	1	(18)	(18)	(\$712)

This information collection is approved under OMB control number 1210–0169, and if this proposal is finalized, the Departments would rescind this information collection under OMB control number 1210–0169 accordingly. The Departments seek comment on this proposed burden reduction.

The Departments also propose to collect one new information collection element in the Federal IDR portal associated with the administrative fee. The Departments propose to require the initiating party to attest (for example, by checking a box) in the portal that no offer made by either party during open negotiation exceeded a predetermined threshold discussed in section II.E.3.f. of this preamble, to determine whether the parties should be charged the reduced administrative fee for low-dollar disputes. The Departments are of the view that checking this box would take a *de minimis* amount of time in the context of the total time it takes for the initiating party to initiate a dispute—2.25 hours, as discussed further in the PRA package for the Federal IDR process (OMB control number: 1210–0169). The Departments will add this information collection element to the information collection currently approved under OMB control number 1210–0169. The Departments seek comment on this proposed information collection.

Although the Departments would now be collecting the administrative fee directly from the disputing parties, rather than the certified IDR entities collecting the fee on the Departments’

behalf, generally, the information collected from disputing parties and associated with this step in the Federal IDR process would not change; the parties would be submitting this information to the Departments rather than to the certified IDR entities. Therefore, the Departments are of the view that there is no additional information collection burden associated with this proposal. The Departments seek comment on this assumption.

8. ICRs Regarding Extension of Time Periods for Extenuating Circumstances (26 CFR 54.9816–8(g), 29 CFR 2590.716–8(g), and 45 CFR 149.510(g))

The Departments anticipate that codifying the ability of certified IDR entities to submit case-by-case extension requests in the same manner as parties would slightly increase the estimated burden associated with collecting requests for extensions. In general, the Departments maintain the expectation that requests for extensions due to extenuating circumstances would be relatively limited, and do not expect that certified IDR entities would submit a high volume of requests for extensions, particularly since these proposed rules also propose to codify the Departments’ ability to grant case-by-case extensions of their own initiative without a prior request from certified IDR entities or parties. Based on internal data, the Departments anticipate that certified IDR entities would submit approximately 20 such requests for extensions annually.

The Departments estimate that it would take an office clerk approximately 15 minutes (at an hourly rate of \$39.56) on average to prepare and submit the Request for Extension due to Extenuating Circumstances form. Based on internal data reflecting the number of extension requests submitted by certified IDR entities, the Departments estimate that approximately 20 extensions requests would be submitted by certified IDR entities annually. Accordingly, the Departments estimate that the burden associated with the submission of the extension request notice by certified IDR entities would result in a total annual burden of 5 hours with an equivalent cost of approximately \$197.80²³⁰ across all certified IDR entities in addition to the existing burden estimate for extension requests submitted by plans, issuers, FEHB carriers, providers, facilities, and air ambulance services providers already approved under OMB 1210–0169. As the Departments and OPM share jurisdictions, HHS would account for 45 percent of the total burden, or approximately 2.25 burden hours, with an equivalent cost of approximately \$89.01. The Departments of Labor and the Treasury would each account for 25 percent of the total burden, or approximately 1.25 burden hours each, with an equivalent cost of approximately \$49.45 each. OPM would account for 5 percent of the total burden, or approximately 0.25 burden hours, with an equivalent cost of approximately \$9.89. The Departments seek comment on these assumptions.

²³⁰ This is calculated as follows: 20 annual requests × 0.25 hours = 5 annual burden hours. 5 annual burden hours × \$39.56 hourly rate = \$197.80

total annual cost. As the Departments do not anticipate these proposed rules would be finalized and effective before July 1, 2024, the burden for

2024 would be prorated to 50 percent, or 2.5 hours with an equivalent cost of \$99.

TABLE 16: Annual Burden and Cost for Extension Requests Submitted by Certified IDR Entities

Department	Estimated Number of Respondents	Estimated Number of Responses	Burden per Response (Hours)	Total Annual Burden (Hours)	Total Estimated Cost
HHS	9	9	0.25	2.25	\$89
Labor	5	5	0.25	1.25	\$49
Treasury	5	5	0.25	1.25	\$49
OPM	1	1	0.25	0.25	\$10

The Departments would revise the information collection currently approved under OMB control number 1210–0169 to account for this additional burden.

9. ICRs Regarding Registration of Group Health Plans and Health Insurance Issuers (26 CFR 54.9816–9, 29 CFR 2590.716–9, and 45 CFR 149.530)

These proposed rules would require plans and issuers that are subject to the Federal IDR process to register and submit certain information to the Departments.

The Departments assume that TPAs would register on behalf of most self-insured plans. The Departments estimate that a total of 1,705 issuers and TPAs would incur a burden to comply with this provision. The Departments estimate that for each issuer and TPA, an administrative assistant would spend 8 hours (at an hourly rate of \$41.74), a compensation and benefits manager would spend 2 hours (at an hourly rate of \$137.64), and a lawyer would spend 2 hours (at an hourly rate of \$157.48), to communicate with plans, gather the necessary information, and prepare the registration, resulting in a combined hourly rate of \$77.01. The estimated

total burden for each issuer or TPA would be 12 hours with an equivalent cost of approximately \$924.16. The estimated total cost for initial registration and submission of information would be 20,460 hours, with an equivalent cost of approximately \$1,575,693. As the Departments and OPM share jurisdictions, HHS would account for 45 percent of the total burden, or approximately 9,207 burden hours, with an equivalent cost of approximately \$709,062. The Departments of Labor and the Treasury would each account for 25 percent of the total burden, or approximately 5,115 burden hours, with an equivalent cost of approximately \$393,923. OPM would account for 5 percent of the total burden, or approximately 1,023 burden hours, with an equivalent cost of approximately \$78,785.

The proposed regulation would also require that plans update the information associated with their registration no later than 30 days after such information changes or at least annually. The Departments estimate that for each issuer and TPA, an administrative assistant would spend 30 minutes (at an hourly rate of \$41.74),

and a compensation and benefits manager would spend 15 minutes (at an hourly rate of \$137.64) to update information in a timely way when such information changes, resulting in a combined hourly rate of \$73.71. The estimated total burden for each issuer or TPA would be 0.75 hours with an equivalent cost of approximately \$55.28. The Departments estimate that updating information in a timely way would incur a total cost for all issuers and TPAs of approximately 1,279 hours with an equivalent cost of approximately \$94,252 beginning in 2025. As the Departments and OPM share jurisdictions, HHS would account for 45 percent of the total burden, or approximately 575 burden hours, with an equivalent cost of approximately \$42,414. The Departments of Labor and the Treasury would each account for 25 percent of the total burden, or approximately 320 burden hours, with an equivalent cost of approximately \$23,563. OPM would account for 5 percent of the total burden, or approximately 64 burden hours, with an equivalent cost of approximately \$4,713.

BILLING CODE 6325–63–P; 4830–01–P; 4510–29–P; 4120–01–P

TABLE 17: One-Time Burden and Cost for Plans and Issuers for Initial Registration and Submission of Certain Information to the Departments

Year	Department	Estimated Number of Respondents	Estimated Number of Responses	Burden per Response (Hours)	Total Annual Burden (Hours)	Total Estimated Cost
2023	HHS	767	767	12	9,207	\$709,062
	Labor	426	426	12	5,115	\$393,923
	Treasury	426	426	12	5,115	\$393,923
	OPM	85	85	12	1,023	\$78,785

TABLE 18: Annual Burden and Cost for Plans and Issuers to Register and Submit Certain Information to the Departments

Department	Estimated Number of Respondents	Estimated Number of Responses	Burden per Response (Hours)	Total Annual Burden (Hours)	Total Estimated Cost
HHS	767	767	0.75	575	\$42,414
DOL	426	426	0.75	320	\$23,563
Treasury	426	426	0.75	320	\$23,563
OPM	85	85	0.75	64	\$4,713

The Departments would revise the information collection currently approved under OMB control number

1210–0169 to account for this new burden.²³¹ The Departments seek comment on these burden estimates.

The information collections are summarized as follows:

²³¹ OMB Control Number: 0938–1401 (CMS–10780, Requirements Related to Surprise Billing;

Qualifying Payment Amount, Notice and Consent,

Disclosure on Patient Protections Against Balance Billing, and State Law Opt-in).

TABLE 19: Annual Recordkeeping and Reporting Requirements

Regulation Section	OMB Control Number	Respondents	Responses	Burden per Response (hours)	Total Annual Burden (hours)	Hourly Labor Cost of Reporting	Total Labor Cost of Reporting

10. Submission of PRA-Related Comments²³²

The Departments have submitted a copy of these proposed rules to OMB for its review of the rule's information collection and recordkeeping requirements. These requirements are not effective until they have been approved by the OMB.

To obtain copies of the supporting statement and any related forms for the proposed collections for control number 0938-1401, please visit CMS's website at <https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing>. To obtain copies of the supporting statement for control number 1210-0169, please go to <https://www.RegInfo.gov> or email the request to ebssa.opr@dol.gov and reference control number 1210-0169. The Departments invite public comment on these potential information collection requirements. Commenters may send their views on the Departments' PRA analysis in the same way they send comments in response to these proposed rules as a whole (for example, through the <https://www.regulations.gov> website), including as part of a comment responding to the broader proposed rules.

If you wish to comment, please submit your comments electronically as specified in the **ADDRESSES** section of these proposed rules and identify the

rule (CMS-9897-P), the ICR's CFR citation, CMS ID number, and OMB control number.

ICR-related comments are due January 2, 2024.

G. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) (5 U.S.C. 601, *et seq.*) requires agencies to analyze options for regulatory relief of small entities to prepare an initial regulatory flexibility analysis to describe the impact of these proposed rules on small entities, unless the head of the agency can certify that the rule will not have a significant economic impact on a substantial number of small entities. The RFA generally defines a "small entity" as (1) a proprietary firm meeting the size standards of the Small Business Administration (SBA), (2) a not-for-profit organization that is not dominant in its field, or (3) a small government jurisdiction with a population of less than 50,000. States and individuals are not included in the definition of "small entity." The Departments use a change in revenues of more than 3 to 5 percent as its measure of significant economic impact on a substantial number of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdiction.

1. Need for Regulatory Action, Objectives, and Legal Basis

This proposed rulemaking authorized by the No Surprises Act is intended to address specific issues that are critical to ensuring the timely rendering of payment determinations and to address feedback from interested parties and certified IDR entities to improve the functioning of the Federal IDR process.

These proposed rules are intended to address some of the common communication issues stemming from a lack of clarity as to whether items and services are qualified IDR items and services covered by the No Surprises Act. These proposed rules would impose requirements and create incentives for parties to engage with one another during the open negotiation period, which would help reduce the volume of ineligible disputes being submitted. Specifically, these proposed rules would make changes to the information that plans, issuers, providers, facilities, and providers of air ambulance services must share before initiating the Federal IDR process by including proposals at 26 CFR 54.9816-6A, 29 CFR 2590.716-6A, and 45 CFR 149.100 to require plans and issuers to provide CARCs and RARCs when providing any paper or electronic remittance in response to a claim for payment for health care items or services furnished by an entity with which it does not have a direct or indirect contractual relationship. Additionally, the Departments propose amendments at 26 CFR 54.9816-6, 29 CFR 2590.716-6, and 45 CFR 149.140 to the information that must be disclosed about the QPA. These proposed rules would also establish new requirements at 26 CFR 54.9816-9, 29 CFR 2590.716-9, and 45 CFR 149.530, which would require plans and issuers to register with the Federal IDR portal to better enable a provider, facility, or provider of air ambulance services to identify the appropriate plan or issuer with which it has a dispute and determine whether its coverage of an item or service is subject to a specified State law, an All-Payer

²³² 840,000 respondents are duplicated between the open negotiation and Federal IDR process initiation information collections because these respondents must complete open negotiations to be a party to an initiated dispute; therefore, the total number of respondents has been reduced to reflect an accurate total of respondents.

Model Agreement, or the Federal IDR process for determining the out-of-network rate.

To further facilitate communication and improve open negotiations, these proposed rules would amend the open negotiation process that precedes the Federal IDR process. Specifically, at 26 CFR 54.9816–8(b)(1), 29 CFR 2590.716–8(b)(1), and 45 CFR 149.510(b)(1), these proposed rules would amend the content requirements of the standard open negotiation notice, would establish requirements related to an open negotiation response notice, and would clarify the timing for when the open negotiation period begins. These proposed rules would also amend the process for initiating the Federal IDR process. Specifically, at 26 CFR 54.9816–8(b)(2), 29 CFR 2590.716–8(b)(2), and 45 CFR 149.510(b)(2), these proposed rules would amend the content of the notice of IDR initiation and establish new requirements for a notice of IDR initiation response from the non-initiating party. At 26 CFR 54.9816–8T(b)(3), 29 CFR 2590.716–8(b)(3), and 45 CFR 149.510(b)(3), these proposed rules would also establish a new manner for providing notices to the other party and the Departments.

These proposed rules would also provide additional clarity regarding timeframes within the Federal IDR process. The No Surprises Act includes certain timeframes by which certain steps of the Federal IDR process must be conducted. For example, disputing parties must jointly select a certified IDR entity not later than the last day of the 3-business-day period following the date of the initiation of the Federal IDR process, and if the parties fail to jointly select a certified IDR entity, the Departments must select a certified IDR entity not later than 6 business days after the date of IDR initiation.²³³ While the No Surprises Act also provides detailed timeframes for certain other steps in the process, the steps that must be conducted before a payment determination can be issued are not as clearly defined, such as when a certified IDR entity must conduct a conflict-of-interest review and must determine whether an item or service is a qualified IDR item or service, as defined in 26 CFR 54.9816–8T(a)(2)(xi), 29 CFR 2590.716–8(a)(2)(xi), and 45 CFR 149.510(a)(2)(xi), and eligible for the Federal IDR process. Therefore, the provisions in these proposed rules would adjust certain steps and establish associated timeframes (see Table 1).

These include provisions related to establishing a process for preliminary selection of the certified IDR entity and final selection of the certified IDR entity as set out in 26 CFR 54.9816–8(c)(1), 29 CFR 2590.716–8(c)(1), and 45 CFR 149.510(c)(1), in order to account for the time it takes certified IDR entities to confirm that they do not have a conflict of interest with either party. To allow more time for certified IDR entities to conduct eligibility reviews, these proposed rules would include proposed amendments to the Federal IDR process eligibility review proposed in 26 CFR 54.9816–8T(c)(2), 29 CFR 2590.716–8(c)(2), and 45 CFR 149.510(c)(2). As discussed in section I.H. of this preamble, eligibility reviews have proven to be complex and time consuming. In extenuating circumstances, such as when dispute volume is high, it may be more appropriate for the Departments, rather than certified IDR entities, to conduct eligibility reviews to facilitate quicker dispute processing. Therefore, these proposed rules would establish a Departmental eligibility review process in proposed paragraph 26 CFR 54.9816–8(c)(2)(ii), 29 CFR 2590.716–8(c)(2)(ii), and 45 CFR 149.510(c)(2)(ii). Further, to support eligibility determinations, conflict-of-interest reviews, and payment determinations, the Departments propose requirements for the submission of additional information from the disputing parties at 26 CFR 54.9816–8(c)(2)(iii), 29 CFR 2590.716–8(c)(2)(iii), and 45 CFR 149.510(c)(2)(iii). To clarify and establish a standard process for disputes to be withdrawn from the Federal IDR process, the Departments propose four conditions in which a dispute may be withdrawn at 26 CFR 54.9816–8(c)(3)(i), 29 CFR 2590.716–8(c)(3)(i), and 45 CFR 149.510(c)(3)(ii). To further adjust timeframes and processes associated with the Federal IDR process, these proposed rules would include proposed amendments related to submission of offers and payment determination and notification at 26 CFR 54.9816–8(c)(5), 29 CFR 2590.716–8(c)(5), and 45 CFR 149.510(c)(5); the collection of the certified IDR entity fee at 26 CFR 54.9816–8(d)(1), 29 CFR 2590.716–8(d)(1), and 45 CFR 149.510(d)(1); and the collection of the administrative fee, including a process for setting a reduced administrative fee for low-dollar amount disputes and for non-initiating parties in cases of ineligible disputes, at 26 CFR 54.9816–8(d)(2), 29 CFR 2590.716–8(d)(2), and 45 CFR 149.510(d)(2). These proposed rules also include provisions to expand upon situations in which

Federal IDR process timeframes may be waived due to extenuating circumstances at 26 CFR 54.9816–8T(g), 29 CFR 2590.716–8(g), and 45 CFR 149.510(g).

Lastly, to address concerns regarding the vacated batching provision at 26 CFR 54.9816–8(c)(3)(i)(C), 29 CFR 2590.716–8(c)(3)(i)(C), and 45 CFR 149.510(c)(3)(i)(C) and to create more efficiencies in the process, these proposed rules at 26 CFR 54.9816–8(c)(4), 29 CFR 2590.716–8(c)(4), and 45 CFR 149.510(c)(4) include provisions that would allow for more flexibility in batching multiple items or services in a single dispute.

It is the Departments' intention that the implementation of the proposed provisions in these proposed rules, if finalized, would lead to a more efficient Federal IDR process and more timely payment determinations.

2. Small Entities Regulated

The provisions in these proposed rules would affect plans (or their TPAs), health insurance issuers offering group or individual health insurance coverage, certified IDR entities, and providers, facilities, and providers of air ambulance services.

For purposes of analysis under the RFA, the Departments consider an employee benefit plan with fewer than 100 participants to be a small entity.²³⁴ The basis of this definition is found in section 104(a)(2), which permits the Secretary of Labor to prescribe simplified annual reports for plans that cover fewer than 100 participants. Under section 104(a)(3), the Secretary may also provide for exemptions or simplified annual reporting and disclosure for welfare benefit plans. Under the authority of section 104(a)(3), DOL has previously issued simplified reporting provisions and limited exemptions from reporting and disclosure requirements for small plans, including unfunded or insured welfare plans, which cover fewer than 100 participants and satisfy certain requirements.²³⁵ While some large employers have small plans, small plans are generally maintained by small employers. Thus, the Departments are of the view that assessing the impact of these proposed rules on small plans is an appropriate substitute for evaluating the effect on small entities. The definition of a small entity considered

²³³ Section 9816(c)(4)(F) of the Code, section 716(c)(4)(F) of ERISA, and section 2799A–1(c)(4)(F) of the PHS Act.

²³⁴ The Department of Labor consulted with the Small Business Administration Office of Advocacy in making this determination, as required by 5 U.S.C. 603(c) and 13 CFR 121.903(c) in a memo dated June 4, 2020.

²³⁵ See 29 CFR 2520.104–20, 2520.104–21, 2520.104–41, 2520.104–46, and 2520.104b–10.

appropriate for this purpose differs, however, from a definition of a small business based on size standards issued by the SBA²³⁶ in accordance with the Small Business Act.²³⁷

In 2021, there were 1,500 issuers in the U.S. health insurance market²³⁸ and 205 TPAs.²³⁹ Health insurance issuers are generally classified under the North American Industry Classification System (NAICS) code 524114 (Direct Health and Medical Insurance Carriers). According to SBA size standards,²⁴⁰ entities with average annual receipts of \$47 million or less are considered small entities for this NAICS code. The Departments expect that few, if any, insurance companies underwriting health insurance policies fall below these size thresholds. Based on data from MLR annual report submissions for the 2021 MLR reporting year, approximately 87 out of 483 issuers of health insurance coverage nationwide had total premium revenue of \$47 million or less.²⁴¹ However, it should be noted that also based on MLR data, over 77 percent of these small companies belong to larger holding groups, and many, if not all, of these small companies, are likely to have non-health lines of business that would result in their revenues exceeding \$47 million. The Departments are of the view that the same assumptions also apply to TPAs that would be affected by these proposed rules.²⁴² To produce a conservative estimate, for the purposes of this analysis, the Departments assume 4.1 percent, or 62 health insurance issuers and 8 TPAs, of the total of 1,500 health insurance issuers and 205 TPAs across the country, are considered small entities.²⁴³ The Departments seek comment on this assumption.

²³⁶ 13 CFR 121.201 (2011).

²³⁷ 15 U.S.C. 631 *et seq.* (2011).

²³⁸ Centers for Medicare and Medicaid Services. (2022). *Medical Loss Ratio Data and System Resources*. <https://www.cms.gov/CCIIO/Resources/Data-Resources/mlr>. There are 483 issuers of health insurance coverage nationwide and 1,500 issuer-State combinations.

²³⁹ Non-issuer TPAs based on data derived from the 2016 benefit year reinsurance program contributions.

²⁴⁰ United States Small Business Administration. (March 17, 2023). *Table of Size Standards*. <https://www.sba.gov/document/support-table-size-standards>.

²⁴¹ Centers for Medicare and Medicaid Services. (2022). *Medical Loss Ratio Data and System Resources*. <https://www.cms.gov/CCIIO/Resources/Data-Resources/mlr>.

²⁴² The Departments are of the view that most TPAs are also issuers.

²⁴³ These numbers are calculated as follows: 77 percent of small companies belong to larger holding groups, so 23 percent do not and would be small entities. $87 \text{ issuers} \times 0.23 = 20$. $20/483 = 4.1$ percent. Applying the 4.1 percent to 1,500 issuers and 205 TPAs total = 62 small issuers and 8 small TPAs.

These proposed rules would also affect health care providers due to the proposed requirements for the initiating party to submit the open negotiation notice to the non-initiating party and the Departments, among other proposals.²⁴⁴ The Departments estimate that 140,270 physicians, on average, bill on an out-of-network basis. The number of small physicians is estimated based on the SBA's size standards. The size standard applied for providers is NAICS 62111 (Offices of Physicians), for which a business with less than \$16 million in receipts is considered to be small. By this standard, the Departments estimate that 47.2 percent or 66,207 physicians are considered small under the SBA's size standards.²⁴⁵ These proposed rules are also expected to affect non-physician providers who bill on an out-of-network basis. The Departments lack data on the number of non-physician providers who would be impacted.

The Departments do not have the same level of data for the air ambulance sub-sector. In 2020, the total revenue of providers of air ambulance services was estimated to be \$4.2 billion, with 1,114 air ambulance bases.²⁴⁶ This results in an industry average of \$3.8 million per air ambulance base. Based on a 2020 U.S.C.-Brookings Schaeffer report on air ambulance services,²⁴⁷ by 2017, large private equity firms controlled roughly two-thirds of the air ambulance market. The Departments seek comment on the number of small entities in the air ambulance market.

Although based on the Departments' experience operating the Federal IDR process, significantly fewer than 66,207 small providers have accessed the process to date, and the vast majority of disputes are initiated by 10 large revenue cycle management companies

²⁴⁴ Historically, less than 1 percent of disputes for emergency and non-emergency services have been submitted by group health plans, health insurance issuers, or FEHB carriers. See U.S. Department of Labor, U.S. Department of the Treasury, and U.S. Department of Health and Human Services.

(December 15, 2022) *Initial Report on the Federal Independent Dispute Resolution (IDR) Process*, April 15–September 30, 2022. <https://www.cms.gov/files/document/initial-report-idr-april-15-september-30-2022.pdf>.

²⁴⁵ Based on data from the NAICS Association for NAICS code 62111, the Departments estimate the percent of businesses within the industry of Offices of Physicians with less than \$16 million in annual sales. See <https://www.census.gov/data/tables/2017/econ/susb/2017-susb-annual.html>.

²⁴⁶ ASPE Office of Health Policy. (September 10, 2021). *Air Ambulance Use and Surprise Billing*. <https://aspe.hhs.gov/sites/default/files/2021-09/aspe-air-ambulance-ib-09-10-2021.pdf>.

²⁴⁷ Adler, L., Hannick, K., and Lee, S. High Air Ambulance Charges Concentrated in Private Equity-Owned Carriers. U.S.C.-Brookings Schaeffer Initiative for Health Policy. October 13, 2020.

or provider groups,²⁴⁸ the Departments lack adequate data to better inform the number of small providers impacted by these proposed rules. The Departments are also aware that many providers are subject to a specified State law or All-Payer Model Agreement, rather than the Federal IDR process, and therefore would not have reason to access the Federal IDR process or need to review these proposed rules.²⁴⁹ Therefore, although the Departments acknowledge that 66,207 small providers is likely a significant overestimate of the number of small providers impacted by these proposed rules, the Departments use this number of small providers in this analysis to be conservative. The Departments seek comment on this assumption.

Additionally, as discussed in the *Partial Report on the Federal Independent Dispute Resolution (IDR) Process, October 1–December 31, 2022*, the top 10 initiating parties initiate approximately 85 percent of disputes, and the top 10 non-initiating parties are initiated against in approximately 95 percent of disputes.²⁵⁰ These top 10 parties are large provider groups or revenue cycle management groups and large insurance companies or their representatives. Therefore, for purposes of this analysis, the Departments assume that only 15 percent of all disputes involve small providers. The 5 percent of all disputes that do not involve the top 10 non-initiating parties could involve any of the 1,695 issuers and TPAs that are not the top 10 non-initiating parties (1,500 issuers and 205 TPAs total – 10 top non-initiating parties = 1,695 remaining issuers and TPAs). The Departments assume that the same proportion of small issuers and TPAs to all issuers and TPAs also applies to the number of disputes each issuer or TPA is involved in, as small issuers and TPAs cover fewer enrollees than large issuers and TPAs. The Departments seek comment on this assumption.

3. Compliance Requirements

The proposed policies that would result in an increased burden to small entities are described below.

²⁴⁸ See U.S. Department of Health and Human Services, U.S. Department of Labor, and U.S. Department of the Treasury, *Partial Report on the Federal Independent Dispute Resolution (IDR) Process, October 1–December 31, 2022*. (n.d.). <https://www.cms.gov/files/document/partial-report-idr-process-octoberdecember-2022.pdf>.

²⁴⁹ See Chart for Determining the Applicability for the Federal Independent Dispute Resolution (IDR) Process (n.d.). <https://www.cms.gov/files/document/caa-federal-idr-applicability-chart.pdf>.

²⁵⁰ *Id.*

The Departments propose to require that plans and issuers use CARCs and RARCs to convey information related to the No Surprises Act, on electronic and paper remittance advice. The annual burden per issuer/TPA associated with this proposal is \$909. For more details, please refer to section V.D.2.a. of this preamble.

The Departments also propose to amend the information plans and issuers must provide related to the QPA with an initial payment or notice of denial of payment. The one-time burden per issuer/TPA associated with this proposal is \$297. For more details, please refer to V.F.2 of this preamble.

Additionally, the Departments propose to require the party to provide an open negotiation notice and supporting documentation to the other party and the Departments to initiate the open negotiation period. Furthermore, the party in receipt of the open negotiation notice would be required to provide a response to the open negotiation notice that is provided to the other party and the Departments within the first 15 business days of the 30-business-day open negotiation period. The annual burden per small provider associated with this proposal is \$79,²⁵¹ and the annual burden per small issuer/TPA associated with this proposal is \$1,338.²⁵² For more details, please refer to section V.F.3. of this preamble.

Furthermore, the Departments propose to continue requiring the initiating party to submit a written notice of IDR initiation to the non-initiating party and to the Departments. The Departments also propose that the

non-initiating party must submit a written response to the notice of IDR initiation to the initiating party and to the Departments. The annual burden per small provider associated with this proposal is \$79,²⁵³ and the annual burden per small issuer/TPA associated with this proposal is \$945.²⁵⁴ For more details, please refer to section V.F.4.a. of this preamble.

Additionally, the Departments propose to revise the content in the notice of certified IDR entity selection form to reflect that this notice would only be used in situations in which the non-initiating party disagrees with the initiating party's preferred certified IDR entity identified in the notice of IDR initiation form. The annual burden per small provider associated with this proposal is \$21,²⁵⁵ and the annual burden per small issuer/TPA associated with this proposal is \$85.²⁵⁶ For more details, please refer to section V.F.4.b. of this preamble.

Moreover, the Departments propose to establish a process for disputes to be withdrawn from the Federal IDR process, including the creation of new notice of withdrawal and notice of withdrawal response forms. The annual burden per small provider associated with this proposal is \$44,²⁵⁷ and the annual burden per small issuer/TPA associated with this proposal is \$10.²⁵⁸ For more details, please refer to section V.F.6. of this preamble.

Additionally, for disputes initiated on or after January 1, 2025, the Departments propose to establish the administrative fee amount at \$150 per party per dispute, a reduced administrative fee amount for both

parties in low-dollar disputes of \$75 per party per dispute, and a reduced administrative fee for non-initiating parties in ineligible disputes of \$30 per party per dispute. The annual burden per small provider associated with this proposal is \$150,²⁵⁹ and the annual burden per small issuer/TPA is \$1,290.²⁶⁰ For more details, please refer to section V.D.2.i.i. of this preamble.

Finally, the Departments propose to require plans and issuers to submit information to the Departments to receive a registration number. The initial (one-time) burden per issuer/TPA associated with this proposal is \$924, and the annual burden per issuer/TPA associated with this proposal is \$55. For more details, please refer to section V.F.9. of this preamble.

The Departments estimate the one-time cost to review the rule would be \$1,575 per entity. For more details, please refer to section V.D.4. of this preamble.

Thus, the per-entity estimated annual cost for each small issuer/TPA is \$4,632, and the per-entity estimated annual cost for each small provider is \$373. The total annual cost for small issuers and TPAs is \$324,240, and the total annual cost for small providers is \$24,695,211. The per-entity estimated one-time cost for each small issuer/TPAs is \$2,796, and the per-entity estimated one-time cost for each small provider is \$1,575. The total one-time cost for small issuers and TPAs is \$195,720, and the total one-time cost for small providers is \$622,125. See Tables 20, 21, 22, and 23.

BILLING CODE 6325-63-P; 4830-01-P; 4510-29-P; 4120-01-P

²⁵¹ 560,000 disputes in open negotiations—85 percent (476,000) disputes entered into open negotiations by the top 10 initiating parties = 84,000 disputes entered into open negotiations by other initiating parties. 84,000 disputes/66,207 small providers = approximately 1 dispute initiated per small provider annually. 1 dispute × \$78.71 per dispute = \$79 per small provider.

²⁵² 560,000 disputes in open negotiations—95 percent (532,000) disputes entered into open negotiations against the top 10 non-initiating parties = 28,000 disputes entered into open negotiations against other non-initiating parties. 28,000 disputes/1,695 issuers/TPAs = 17 disputes per issuer/TPA. 17 disputes × \$78.71 per dispute = \$1,338 per small issuer/TPA.

²⁵³ 420,000 disputes initiated—85 percent (357,000) disputes initiated by the top 10 initiating parties = 63,000 disputes initiated by other initiating parties. 63,000 disputes/66,207 small providers = approximately 1 dispute initiated per small provider annually. 1 dispute × \$78.71 per dispute = \$79 per small provider.

²⁵⁴ 420,000 disputes initiated—95 percent (399,000) disputes initiated against the top 10 non-initiating parties = 21,000 disputes initiated against

other non-initiating parties. 21,000 disputes/1,695 issuers/TPAs = 12 disputes per issuer/TPA annually. 12 disputes × \$78.71 per dispute = \$945 per small issuer/TPA.

²⁵⁵ 120,200 disputes for which a notice of certified IDR entity selection is required—85 percent (102,170) disputes initiated by the top 10 initiating parties = 18,030 disputes for other initiating parties. 18,030 disputes/66,207 small providers = less than 1 dispute per small provider annually. 1 dispute × \$21.14 = \$21 per small provider.

²⁵⁶ 120,200 disputes for which a notice of certified IDR entity selection is required—95 percent (114,190) disputes initiated against the top 10 non-initiating parties = 6,010 disputes for other non-initiating parties. 6,010 disputes/1,695 issuers/TPAs = 4 disputes per issuer/TPA annually. 4 disputes × \$21.14 = \$85 per small issuer/TPA.

²⁵⁷ 16,800 disputes withdrawn—85 percent (14,280) disputes withdrawn by the top 10 initiating parties = 2,520 disputes withdrawn by other initiating parties. 2,520 disputes/66,207 small providers = less than 1 dispute withdrawn per small provider annually. 1 dispute × \$44.30 per dispute = \$44 per small provider.

²⁵⁸ 16,800 disputes withdrawn—95 percent (15,960) disputes withdrawn against the top 10 non-initiating parties = 840 disputes withdrawn against other non-initiating parties. 840 disputes/1,695 issuers/TPAs = less than 1 dispute withdrawn per issuer/TPA annually. 1 dispute × \$9.89 per dispute = \$10 per small issuer/TPA.

²⁵⁹ 420,000 disputes initiated—85 percent (357,000) disputes initiated by the top 10 initiating parties = 63,000 disputes initiated by other initiating parties. 63,000 disputes/66,207 small providers = approximately 1 dispute initiated per small provider annually. 1 dispute × \$150 per dispute = \$150 per small provider.

²⁶⁰ 420,000 disputes initiated—95 percent (399,000) disputes initiated against the top 10 non-initiating parties = 21,000 disputes initiated against other non-initiating parties. 21,000 disputes/1,695 issuers/TPAs = 12 disputes per issuer/TPA annually. Of those 12 disputes, issuers/TPAs would pay a \$75 administrative fee for 16 percent (or 2 disputes), a \$30 administrative fee for 22 percent (or 3 disputes), and a \$150 administrative fee for 62 percent (or 7 disputes). (2 disputes × \$75 per dispute) + (3 disputes × \$30 per dispute) + (7 disputes × \$150 per dispute) = \$1,290.

TABLE 20: Detailed Annual Costs for Small Entities

Description of Cost	Annual Cost per Small Issuer/TPA	Annual Cost per Small Provider
CARCs and RARCs	\$909	N/A
Open Negotiation	\$1,338	\$79
Initiation	\$945	\$79
Certified IDR Entity Selection	\$85	\$21
Withdrawal	\$10	\$44
Administrative Fees	\$1,290	\$150
Registration	\$55	N/A
Total	\$4,632	\$373

Provider	395	\$1,575	\$622,125

BILLING CODE 6325–63–C; 4830–01–C; 4510–29–C; 4120–01–C

The annual cost per small provider of \$373 is approximately 0.03 percent of the average annual receipts per small provider. The Departments anticipate that small providers would be unlikely to initiate disputes and thereby incur these costs unless they anticipate prevailing in the dispute and receiving payment from issuers or TPAs that exceed the costs incurred to initiate the dispute. The Departments therefore are of the view that small providers could experience an increase in receipts commensurate or larger than the increase in costs. The annual cost per small issuer/TPA of \$4,632 is approximately 0.25 percent of the average annual receipts per small issuer/TPA. The Departments anticipate

that small issuers/TPAs could pass on these increased costs to consumers in the form of higher premiums (or for TPAs, higher administration fees), resulting in an increase in receipts commensurate with the increase in costs. However, the Departments are of the view that the actual increase in costs and subsequent impact on revenue is de minimis and likely to decrease due to the proposals in these rules, as many proposals are anticipated to result in increased efficiency and fewer dispute initiations, as discussed further in section V.D.1.l. of this preamble. Additionally, the Departments anticipate that by batching qualified IDR items and services, there may be a reduction in the per-service cost of the Federal IDR process, and potentially the

aggregate administrative costs, because the Federal IDR process is likely to exhibit at least some economies of scale.²⁶¹ The Departments seek comment on these assumptions.

Thus, the Departments do not anticipate that these proposed rules would have a significant impact on a substantial number of small entities, based on the HHS threshold of 3 to 5 percent change in revenue. The Departments seek comment on this analysis and seek information on the

²⁶¹ Fielder, M., Adler, L., Ippolito, B. (March 16, 2021). *Recommendations for Implementing the No Surprises Act*. U.S.C.-Brookings Schaeffer on Health Policy. <https://www.brookings.edu/blog/usc-brookings-schaeffer-on-health-policy/2021/03/16/recommendations-for-implementing-the-no-surprises-act/>.

number of small issuers, TPAs, or providers that may be affected by the provisions in these proposed rules, as well as any additional costs associated with these proposed rules that could have a significant economic impact on a substantial number of small entities.

4. Duplication, Overlap, and Conflict With Other Rules and Regulations

The Departments do not anticipate any duplication, overlap, or conflict with other rules and regulations associated with these proposed rules. These proposed rules revise current regulations and add new regulations to continue to implement the No Surprises Act and improve the Federal IDR process. The Departments seek comment on any duplication, overlap, or conflict with other rules and regulations identified by interested parties.

5. Significant Alternatives

The regulatory alternatives considered in developing these proposed rules are discussed in section V.E. of this preamble. The Departments are of the view that none of these alternatives would both achieve the policy objectives and goals of these proposed rules as previously stated and be less burdensome to small entities. For example, although the proposals pertaining to the open negotiation notice and response, initiation notice and response, selection form and response, and withdrawal form and response may impose costs on small entities, these proposals are critical to ensure the exchange of information between the parties in a standardized time and format, in order to reduce wasted effort for the parties at other stages of the Federal IDR process due to inappropriately or incorrectly initiated open negotiations or Federal IDR process disputes. Although the Departments recognize that the less stringent timetables considered in certain regulatory alternatives described in section V.E. of this preamble may account for the resources available to small entities, they would be contrary to the policy objectives of these proposed rules. Alternative timelines for small entities for any of the policy proposals described in these rules were not considered. The Departments did not identify any alternatives to these proposals that would be less burdensome to small entities while still achieving the objectives of these proposed rules. In addition, the proposals pertaining to the administrative fee may impose costs on small entities, but the proposed \$150 administrative fee amount in these

proposed rules for disputes initiated on or after January 1, 2025 is the same as the proposed administrative fee amount for disputes initiated on or after January 1, 2024,²⁶² and these proposed rules further propose to reduce the administrative fee amount for both parties in low-dollar disputes and non-initiating parties in ineligible disputes. Therefore, although some of the regulatory alternatives considered may have led to minor reduction in burden to small entities, we believe they would ultimately undermine the proposals to reduce the cost to initiate a Federal IDR process dispute for small entities in certain situations, which we believe will confer a far greater benefit to small entities.

For a more detailed discussion of the regulatory alternatives considered, please reference section V.E. of this preamble.

6. Small Rural Hospitals

In addition, section 1102(b) of the Social Security Act requires the Departments to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, the Departments define a small rural hospital as a hospital that is located outside of a metropolitan statistical area and has fewer than 100 beds. The Departments have determined that these proposed rules will not affect small rural hospitals and that these proposed rules are not subject to section 1102(b) of the Act. Therefore, the Secretary certifies that these proposed rules will not have a significant economic impact on a substantial number of small rural hospitals.

H. Special Analyses—Department of the Treasury

Pursuant to the Memorandum of Agreement, Review of Treasury Regulations under Executive Order 12866 (June 9, 2023), tax regulatory actions issued by the IRS are not subject to the requirements of section 6 of Executive Order 12866, as amended. Therefore, a regulatory impact assessment is not required. Pursuant to section 7805(f) of the Code, these regulations have been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

²⁶² See *Federal Independent Dispute Resolution (IDR) Process Administrative Fee and Certified IDR Entity Fee Ranges* proposed rules. 88 FR 65888 (September 26, 2023).

I. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a proposed rule or any final rule for which a general notice of proposed rulemaking was published that includes any Federal mandate that may result in expenditures in any 1 year by State, local, or tribal governments, in the aggregate, or by the private sector, of \$100 million in 1995 dollars, updated annually for inflation. That threshold is approximately \$177 million in 2023. As discussed earlier in the RIA, plans, issuers, TPAs, certified IDR entities, and providers, facilities, and providers of air ambulance services would incur costs to comply with the proposed provisions of these proposed rules. The Departments estimate the combined impact on State, local, or tribal governments and the private sector would not be above the threshold.

J. Federalism

Executive Order 13132 outlines the fundamental principles of federalism. It requires adherence to specific criteria by Federal agencies in formulating and implementing policies that have “substantial direct effects” on the States, the relationship between the national government and States, or on the distribution of power and responsibilities among the various levels of government. Federal agencies issuing regulations that have these federalism implications must consult with State and local officials and describe the extent of their consultation and the nature of the concerns of State and local officials in the preamble to these proposed rules.

The Departments do not anticipate that these proposed rules would have any federalism implications or limit the policy-making discretion of the States in compliance with the requirement of Executive Order 13132. The Departments recognize that at least one State (and possibly more) currently require the use of CARCs and RARCs to communicate information related to the applicability of State balance billing laws. In these instances, these proposed rules would not infringe upon the State’s ability to continue to specify its requirements related to using CARCs and RARCs.

State and local government health plans may be subject to the Federal IDR process where a specified State law or All-Payer Model Agreement does not apply. The No Surprises Act authorizes States to enforce the new requirements, including those related to balance

billing, for issuers, providers, facilities, and providers of air ambulance services, with HHS enforcing only in cases where the State has notified HHS that the State does not have the authority to enforce or is otherwise not enforcing, or HHS has made a determination that a State has failed to substantially enforce the requirements. However, in the Departments' view, the federalism implications of these proposed rules are substantially mitigated because some States have their own process for determining the total amount payable under a plan or coverage for out-of-network emergency services and to out-of-network providers for patient visits to in-network facilities. Where a State has a specified State law, the State law, rather than the Federal IDR process, would apply. The Departments anticipate that some States, with their own process, may want to change their laws or adopt new laws in response to these proposed rules. The Departments anticipate that these States would incur a small incremental cost when making changes to their laws.

In compliance with the requirement of Executive Order 13132 that agencies examine closely any policies that may have federalism implications or limit the policy making discretion of the States, the Departments have engaged in efforts to consult with and work cooperatively with affected States, including participating in conference calls with and attending conferences of the National Association of Insurance Commissioners and consulting with State insurance officials on an individual basis.

While developing these rules, the Departments attempted to balance the States' interests in regulating health insurance issuers with the need to ensure market stability. By doing so, the Departments complied with the requirements of Executive Order 13132.

OFFICE OF PERSONNEL MANAGEMENT

For the reasons stated in the preamble, the Office of Personnel Management proposes to amend 5 CFR part 890 as set forth below:

PART 890—FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

■ 1. The authority citation for part 890 continues to read as follows:

Authority: 5 U.S.C. 8913; Sec. 890.102 also issued under sections 11202(f), 11232(e), and 11246(b) of Pub. L. 105–33, 111 Stat. 251; Sec. 890.111 also issued under section 1622(b) of Pub. L. 104–106, 110 Stat. 521 (36 U.S.C. 5522); Sec. 890.112 also issued under section 1 of Pub. L. 110–279, 122 Stat. 2604 (2 U.S.C. 2051); Sec. 890.113 also issued under section 1110 of Pub. L. 116–92, 133 Stat. 1198 (5 U.S.C. 8702 note); Sec. 890.301 also issued under section 311 of Pub. L. 111–3, 123 Stat. 64 (26 U.S.C. 9801); Sec. 890.302(b) also issued under section 1001 of Pub. L. 111–148, 124 Stat. 119, as amended by Pub. L. 111–152, 124 Stat. 1029 (42 U.S.C. 300gg–14); Sec. 890.803 also issued under 50 U.S.C. 3516 (formerly 50 U.S.C. 403p) and 22 U.S.C. 4069c and 4069c–1; subpart L also issued under section 599C of Pub. L. 101–513, 104 Stat. 2064 (5 U.S.C. 5561 note), as amended; and subpart M also issued under section 721 of Pub. L. 105–261 (10 U.S.C. 1108), 112 Stat. 2061; 25 U.S.C. 1647b.

■ 2. Section 890.114 is amended by revising paragraph (a) to read as follows:

§ 890.114 Surprise billing.

(a) A carrier must comply with requirements described in 26 CFR 54.9816–3, 54.9816–3T through 54.9816–6T, 54.9816–6A, 54.9816–6, 54.9816–8T, 54.9816–8, 54.9817–1T, 54.9817–2, 54.9817–2T, 54.9822–1T, and 54.9825–3T through 6T; 29 CFR 2590.716–3 through 2590.716–6, 2590.716–6A, 2590.716–8, 2590.717–1, 2590.717–2, 2590.722, 2590.725–1 through 2590.725–4; and 45 CFR 149.30,

149.100, 149.110 through 149.140, 149.310, 149.510 through 530, and 149.710 through 149.740 in the same manner as such provisions apply to a group health plan or health insurance issuer offering group or individual health insurance coverage, subject to 5 U.S.C. 8902(m)(1), and the provisions of the carrier's contract. For purposes of application of such sections, all carriers are deemed to offer health benefits in the large group market.

* * * * *

**DEPARTMENT OF THE TREASURY
INTERNAL REVENUE SERVICE**

Accordingly, the Treasury Department and the IRS propose to amend 26 CFR part 54 as follows:

PART 54—PENSION EXCISE TAXES

■ 3. The authority citation for part 54 is amended by adding entries for §§ 54.9816–3, 54.9816–6A and 54.9816–9 in numerical order to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

* * * * *

Section 54.9816–3 also issued under 26 U.S.C. 9816.

Section 54.9816–6A also issued under 26 U.S.C. 9816.

Section 54.9816–9 also issued under 26 U.S.C. 9816.

* * * * *

■ 4. Section 54.9816–3 is added to read as follows:

§ 54.9816–3 Definitions.

(a) The definitions in § 54.9801–2 apply to §§ 54.9816–4 through 54.9816–9, 54.9817–1, 54.9817–2, and 54.9822–1, unless otherwise specified. In addition, for purposes of §§ 54.9816–4 through 54.9816–9, 54.9817–1, 54.9817–2, and 54.9822–1, the following definition applies:

Bundled payment arrangement means an arrangement under which—

(1) A provider, facility, or provider of air ambulance services bills for multiple items and/or services furnished to a single patient under a single service code that represents multiple items or services (for example, a Diagnosis-Related Group (DRG) code); or

(2) A plan or issuer makes an initial payment or notice of denial of payment to a provider, facility, or provider of air ambulance services under a single service code that represents multiple items or services furnished to a single patient (for example, a DRG code).

(b) For further guidance, see § 54.9816–3T.

■ 5. Section 54.9816–3T is amended by—

■ a. Revising the introductory text; and

■ b. Adding the definition of “Bundled payment arrangement” in alphabetical order.

The revisions and additions read as follows:

§ 54.9816–3T Definitions (temporary).

For further guidance, see § 54.9816–3 introductory text;

* * * * *

Bundled payment arrangement has the meaning given in § 54.9816–3(a).

* * * * *

■ 6. Section 54.9816–6A is added to read as follows:

§ 54.9816–6A Use of Claim Adjustment Reason Codes and Remittance Advice Remark Codes.

(a) *In general.* When providing any paper or electronic remittance advice to an entity that does not have a contractual relationship directly or indirectly with a group health plan or a health insurance issuer offering group or individual health insurance coverage with respect to the furnishing of the item or service under the plan or coverage in response to a claim for payment for health care items and services furnished by that entity, the plan or issuer must use claim adjustment reason codes (CARCs) and remittance advice remark codes (RARCs) (see 45 CFR 162.1602 and 162.1603) as specified in guidance issued by the Secretaries of the Treasury, Labor, and Health and Human Services, or as required under any applicable adopted standards and operating rules under 45 CFR part 162, to communicate information related to whether the claim is or is not subject to the provisions of this part and 45 CFR part 149, subpart E.

(b) *Severability.* (1) Any provision of this section held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, shall be construed so as to continue to give maximum effect to the provision permitted by law, unless such holding shall be one of utter invalidity or unenforceability, in which event the provision shall be severable from this section and shall not affect the remainder thereof or the application of the provision to persons not similarly situated or to dissimilar circumstances.

(2) The provisions in § 54.9816–6A are intended to be severable from the provisions in §§ 54.9816–6, 54.9816–6T, 54.9816–8, 54.9816–8T, and 54.9816–9, from any grant of forbearance from removal resulting from this subpart, and from any provision referenced in §§ 54.9816–6, 54.9816–6T, 54.9816–8, 54.9816–8T, and 54.9816–9.

■ 7. Section 54.9816–6 is amended by adding a heading to paragraph (a), revising paragraphs (b), (c), and (d) and adding paragraph (h) to read as follows:

§ 54.9816–6 Methodology for calculating qualifying payment amount.

(a) *Definitions.* * * *

(b) *Methodology for calculation of median contracted rate.* For further guidance, see § 54.9816–6T(b).

(c) *Methodology for calculation of the qualifying payment amount.* For further guidance, see § 54.9816–6T(c).

(d) *Information to be shared about the qualifying payment amount.* In cases in which the recognized amount, with respect to an item or service furnished by a nonparticipating provider or nonparticipating emergency facility, is the qualifying payment amount or the amount billed by the provider or facility, or if the amount on which cost sharing is based with respect to air ambulance services furnished by a nonparticipating provider of air ambulance services is the qualifying payment amount or the amount billed by the provider of air ambulance services, the plan must provide to the provider, facility, or provider of air ambulance services, as applicable, in writing, in paper or electronic form—

(1) With an initial payment or notice of denial of payment under § 54.9816–4, § 54.9816–4T, § 54.9816–5, § 54.9816–5T, § 54.9817 or § 54.9817–T:

(i) For further guidance, see § 54.9816–6T(d)(i);

(ii) If the qualifying payment amount is based on a downcoded service code or modifier—

(A) A statement that the service code or modifier billed by the provider, facility, or provider of air ambulance services was downcoded;

(B) An explanation of why the claim was downcoded, which must include a description of which service codes were altered, if any, and a description of which modifiers were altered, added, or removed, if any; and

(C) The amount that would have been the qualifying payment amount had the service code or modifier not been downcoded.

(iii) For further guidance, see § 54.9816–6T(d)(1)(iii);

(iv) A statement that—

(A) If the provider, facility, or provider of air ambulance services, as applicable, wishes to initiate a 30-business-day open negotiation period for purposes of determining the out-of-network rate, the provider, facility, or provider of air ambulance services must:

(1) Contact the appropriate person or office to initiate open negotiation within 30 business days of receiving the initial

payment or notice of denial of payment, and

(2) For disclosures required to be provided on or after [DATE 90 DAYS AFTER PUBLICATION OF FINAL REGULATIONS IN THE FEDERAL REGISTER] and once the open negotiation notice can be submitted through the Federal IDR portal, notify the Secretary as described under § 54.9816–8(b)(1)(i); and

(B) If the 30-business-day open negotiation period does not result in an agreement on the amount of payment the provider, facility, or provider of air ambulance services may generally initiate the Federal IDR process within 4 business days after the end of the open negotiation period;

(v) For disclosures required to be provided on or after [DATE 90 DAYS AFTER PUBLICATION OF FINAL REGULATIONS IN THE FEDERAL REGISTER], the legal business name of the group health plan (if any), the legal business name of the plan sponsor (if applicable), and the registration number assigned under § 54.9816–9, if the plan is registered under § 54.9816–9.

(vi) For further guidance, see § 54.9816–6T(d)(1)(vi);

(2) In a timely manner upon request of the provider, facility, or provider of air ambulance services:

(i) For further guidance, see § 54.9816–6T(d)(2)(i) through (iv)

(ii) [Reserved]

* * * * *

(h) *Severability.* (1) Any provision of this section held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, shall be construed so as to continue to give maximum effect to the provision permitted by law, unless such holding shall be one of utter invalidity or unenforceability, in which event the provision shall be severable from this section and shall not affect the remainder thereof or the application of the provision to persons not similarly situated or to dissimilar circumstances.

(2) The provisions in § 54.9816–6 are intended to be severable from the provisions in §§ 54.9816–6A, 54.9816–6T, 54.9816–8, 54.9816–8T, and 54.9816–9, from any grant of forbearance from removal resulting from this subpart, and from any provision referenced in §§ 54.9816–6A, 54.9816–8, 54.9816–8T, and 54.9816–9.

■ 8. Section 54.9816–6T is amended by:

■ a. Revising paragraphs (d) introductory text, (d)(1)(iv) and (v);

■ b. Adding paragraph (d)(1)(vi);

■ c. Revising paragraph (d)(2) introductory text; and

■ d. Adding paragraph (h).

The additions read as follows:

§ 54.9816–6T Methodology for calculating qualifying payment amount (temporary).

* * * * *

(d) For further guidance, see § 54.9816–6(d) introductory text;

(1) * * *

(iv) For further guidance, see § 54.9816–6(d)(1)(iv); and

(v) For further guidance, see § 54.9816–6(d)(1)(v);

(vi) Contact information, including a telephone number and email address, for the appropriate person or office to initiate open negotiations for purposes of determining an amount of payment (including cost sharing) for such item or service.

(2) For further information see § 54.9816–6(d)(2):

* * * * *

(h) *Severability*. For further guidance, see § 54.9816–6(h).

■ 9. Section 54.9816–8 is amended by revising paragraphs (a), (b), (c), (d), (e), (g), and (h), and adding paragraph (i) to read as follows:

The revisions and additions read as follows:

§ 54.9816–8 Independent dispute resolution process.

(a) *Scope and definitions*—(1) *Scope*. For further guidance, see § 54.9816–8T(a)(1).

(2) *Definitions*. For further guidance, see § 54.9816–8T(a)(2). Additionally, for purposes of this section, the following definitions apply:

(i) *Batched qualified IDR items and services* means multiple qualified IDR items or services that are considered jointly as part of one payment determination by a certified IDR entity for purposes of the Federal IDR process in accordance with paragraph (c)(4) of this section.

(ii) For further guidance, see § 54.9816–8T(a)(2)(ii)–(xii).

(b) *Determination of payment amount through open negotiation and the initiation of the Federal IDR process*—

(1) *Determination of payment amount through open negotiation*—(i) *In general*. With respect to an item or service that meets the requirements of § 54.9816–8T(a)(2)(xi)(A), the provider, facility, or provider of air ambulance services, or the group health plan or health insurance issuer offering group or individual health insurance coverage may, during the 30-business-day period beginning on the day the provider, facility, or provider of air ambulance services receives an initial payment or notice of denial of payment regarding the item or service, initiate an open negotiation period for purposes of

determining the out-of-network rate for such item or service. To initiate the open negotiation period, a party must submit a written open negotiation notice with the content specified in paragraph (b)(1)(ii) of this section to the other party and to the Secretary in the manner specified in paragraph (b)(3) of this section. The 30-business-day open negotiation period begins on the day on which the party first submits the open negotiation notice and the remittance advice documentation specified in paragraph (b)(1)(ii)(A)(12) of this section to the other party and the Secretary. The party in receipt of the open negotiation notice must provide to the other party and to the Secretary in the manner specified in paragraph (b)(3) of this section as soon as practicable, but no later than the 15th business day of the 30-business-day open negotiation period, a written notice and supporting documentation in response to the open negotiation notice, as specified in paragraph (b)(1)(iii)(A) of this section.

(ii) *Open negotiation notice*—(A) *Content*. The open negotiation notice must include, with respect to the item or service that is the subject of the open negotiation notice, information about the item or service and the parties including:

(1) Information sufficient to identify the provider, facility, or provider of air ambulance services, including the name and current contact information (including the legal business name, email address, phone number, and mailing address) as provided with the claim form submitted by the provider, facility, or air ambulance provider to the plan or issuer, and the National Provider Identifier (NPI);

(2) Information sufficient to identify the plan or issuer, including the plan's or issuer's registration number, as required under § 54.9816–9, if the plan or issuer is registered under § 54.9816–9, or an attestation from the party submitting the open negotiation notice that the plan or issuer was not registered prior to the date it submitted the notice; the legal business name of the plan or issuer, as well as the current contact information (name, email address, phone number, and mailing address) of the plan or issuer as provided with the initial payment or notice of denial of payment; and if the party submitting the open negotiation notice is a plan or issuer, the plan type (for example, self-insured or fully-insured);

(3) The name and contact information (including the legal business name, email address, phone number, and mailing address) for any third party representing the party submitting the open negotiation notice, and an

attestation that the third party has the authority to act on behalf of the party it represents in the open negotiation;

(4) Information sufficient to identify the item or service, including: the date(s) the item or service was furnished and, if the party submitting the open negotiation notice is a provider, facility, or provider of air ambulance services, the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for the item or service from the plan or issuer; the type of item or service (specifically, whether the item or service is an emergency service as defined in § 54.9816–4T(c)(2)(i) or (ii), a non-emergency service as described in § 54.9816–5T(b), or an air ambulance service as defined in § 54.9816–3T); whether the service is a professional service or facility-based service; the State where the item or service was furnished; the claim number; the service code; and information to identify the location where the item or service was furnished (such as, place of service code or bill type code);

(5) The initial payment amount (including \$0 if, for example, payment is denied);

(6) The qualifying payment amount, if provided with the initial payment or notice of denial of payment or if the party submitting the open negotiation notice is a plan or issuer;

(7) An offer of an out-of-network rate for each item or service;

(8) If the party submitting the open negotiation notice is a plan or issuer, the amount of cost sharing imposed for the item or service, if any;

(9) If the party submitting the open negotiation notice is a provider or facility, a statement that the items and services do not qualify for the notice and consent exception described at 45 CFR 149.410(b) or § 149.420(c) through (i);

(10) A statement that the provider, facility, or provider of air ambulance services was a nonparticipating provider, nonparticipating emergency facility, or nonparticipating provider of air ambulance services on the date the item or service was furnished;

(11) General information listed in the standard open negotiation notice developed by the Secretary pursuant to paragraph (b)(3) of this section describing the open negotiation period and the Federal IDR process (including a description of the purpose of the open negotiation period and Federal IDR process and key deadlines in the open negotiation period and Federal IDR process); and

(12) A copy of the initial payment or notice of denial of payment or other remittance advice that is required to include the disclosures under §§ 54.9816–6T(d)(1) and 54.9816–6(d)(1), with respect to the item or service.

(B) [Reserved]

(iii) *Open negotiation response notice*—(A) *Content*. The response to the open negotiation notice must include, with respect to the item or service that is the subject of the open negotiation response notice, information about the item or service and the parties including:

(1) Information sufficient to identify the provider, facility, or provider of air ambulance services, including the name and current contact information (including the legal business name, email address, phone number, and mailing address) as provided with the claim form submitted by the provider, facility, or provider of air ambulance services to the plan or issuer, and the NPI;

(2) Information sufficient to identify the plan or issuer, including the plan's or issuer's registration number, as required under § 54.9816–9 if the plan or issuer is registered under § 54.9816–9, or an attestation from the party submitting the open negotiation response notice that the plan or issuer was not registered prior to the date it submitted the notice; the legal business name of the plan or issuer, as well as the current contact information (name, email address, phone number, and mailing address) of the plan or issuer as provided with the initial payment or notice of denial of payment; and if the party submitting the open negotiation response notice is a plan or issuer, the plan type (for example, self-insured or fully-insured);

(3) The name and contact information (including the legal business name, email address, phone number, and mailing address) for any third party representing the party submitting the open negotiation response notice, and an attestation that the third party has the authority to act on behalf of the party it represents in the open negotiation;

(4) Information sufficient to identify the item or service included in the open negotiation notice, including the date(s) the item or service was furnished, and if the party submitting the open negotiation response notice is a provider, facility, or provider of air ambulance services, the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment

for such item or service from the plan or issuer, and the claim number;

(5) If the party submitting the open negotiation response notice is a plan or issuer, a statement as to whether it agrees that the initial payment amount (including \$0 if, for example, payment is denied) and the qualifying payment amount reflected in the open negotiation notice accurately reflect the initial payment amount and qualifying payment amount disclosed with the initial payment for the item or service, and if not, or if the open negotiation notice indicates that the qualifying payment amount was not communicated by the plan or issuer with the initial payment or notice of denial of payment or other remittance advice, the initial payment amount (including \$0 if, for example, payment is denied) and/or qualifying payment amount it believes to be correct, and documentation to support the statement (for example, the remittance advice confirming the qualifying payment amount);

(6) If the party submitting the open negotiation response notice is a plan or issuer, the amount of cost sharing imposed for the item or service, if any;

(7) A counteroffer for an out-of-network rate for each item or service or an acceptance of the other party's offer;

(8) If the party submitting the open negotiation response notice is a provider or facility, a statement that the items and services do not qualify for the notice and consent exception described at 45 CFR 149.410(b) or 45 CFR 149.420(c) through (i);

(9) With respect to each item or service, either a statement and supporting documentation that explains why the item or service is not subject to the Federal IDR process or a statement agreeing that the item or service is subject to the Federal IDR process;

(10) A statement as to whether any of the information provided in the open negotiation notice is inaccurate and the basis for the statement, as well as supporting documentation; and

(11) A statement confirming that the initial payment or notice of denial of payment or other remittance advice provided by the party submitting the open negotiation notice under paragraph (b)(1)(ii)(A)(12) of this section is accurate, and if inaccurate, a copy of the accurate initial payment or notice of denial of payment or other remittance advice required to include the disclosures under § 54.9816–6(d)(1) and § 54.9816–6T(d)(1), with respect to the item or service.

(B) [Reserved]

(2) *Initiating the Federal IDR process*—(i) *In general*. Either party may

initiate the Federal IDR process with respect to a qualified IDR item or service for which the parties do not agree upon an out-of-network rate by the last day of the open negotiation period provided for under paragraph (b)(1) of this section. To initiate the Federal IDR process, a party (the initiating party) must submit a written notice of IDR initiation, consistent with paragraph (b)(2)(ii) of this section, to the other party to the dispute (the non-initiating party), and to the Secretary in the manner specified in paragraph (b)(3) of this section, during the 4-business-day period beginning on the first business day after the last day of the open negotiation period (unless it is otherwise required to be submitted in the timeframe specified in paragraph (c)(5)(vii)(C) of this section). The date of IDR initiation is the date that the Secretary receives the notice of IDR initiation described in paragraph (b)(2)(ii) of this section.

(A) *Exception for items and services provided by certain nonparticipating providers and facilities*. A party may not initiate the Federal IDR process with respect to an item or service if, with respect to that item or service, the party knows (or reasonably should have known) that the provider or facility provided notice and received consent under 45 CFR 149.410(b) or 149.420(c) through (i).

(B) [Reserved]

(ii) *Notice of IDR initiation*—(A) *Content*. The notice of IDR initiation must include, with respect to the item or service that is the subject of the notice, information about the item or service and the parties including:

(1) Information sufficient to identify the provider, facility, or provider of air ambulance services, including the name and current contact information (including the legal business name, email address, phone number, and mailing address), and the NPI; and if the initiating party is a provider, facility, or provider of air ambulance services, the Tax Identification Number (TIN);

(2) Information sufficient to identify the plan or issuer, including the plan's or issuer's registration number, as required under § 54.9816–9 if the plan or issuer is registered under § 54.9816–9, or an attestation from the initiating party that the plan or issuer was not registered prior to the date that it submitted the notice; the legal business name of the plan or issuer, as well as the current contact information (name, email address, phone number, and mailing address) of the plan or issuer as provided with the initial payment or notice of denial of payment; and if the initiating party is a plan or issuer, the

plan type (for example, self-insured or fully-insured) and TIN (or, in the case of a plan that does not have a TIN, the TIN of the plan sponsor);

(3) The name and contact information (including the legal business name, email address, phone number, and mailing address) for any third party representing the initiating party, and an attestation that the third party has the authority to act on behalf of the party it represents in the Federal IDR process;

(4) Information sufficient to identify whether the dispute being initiated includes batched or bundled qualified IDR items or services as described in paragraph (c)(4) of this section;

(5) Information sufficient to identify the qualified IDR item or service that is the subject of the notice of IDR initiation, including the date(s) the qualified IDR item or service was furnished; if the initiating party is a provider, facility, or provider of air ambulance services, the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for such item or service from the plan or issuer; the date the open negotiation period under paragraph (b)(1) of this section began; the type of item or service (specifically, whether the qualified IDR item or service is an emergency service as defined in § 54.9816–4T(c)(2)(i) or (ii), a non-emergency service as described in § 54.9816–5T(b), or an air ambulance service as defined in § 54.9816–3T); whether the service is a professional service or facility-based service; the State where the item or service was furnished; the claim number; the service code; and information to identify the location the item or service was furnished (including place of service code or bill type code);

(6) The initial payment amount (including \$0 if, for example, payment is denied);

(7) The qualifying payment amount, if provided with the initial payment or notice of denial of payment or if the initiating party is a plan or issuer;

(8) If the initiating party is a provider or facility, a statement that the items and services do not qualify for the notice and consent exception described at 45 CFR 149.410(b) or 45 CFR 149.420(c) through (i);

(9) A statement that the provider, facility, or provider of air ambulance services was a nonparticipating provider, nonparticipating emergency facility, or nonparticipating provider of air ambulance services on the date the item or service was furnished;

(10) Attestation that the item or service under dispute is a qualified IDR

item or service, and the basis for the attestation;

(11) General information listed in the standard notice of IDR initiation developed by the Secretary pursuant to paragraph (b)(3) of this section describing the Federal IDR process (including a description of the purpose of the Federal IDR process and key deadlines in the Federal IDR process);

(12) A copy of the initial payment or notice of denial of payment or other remittance advice that is required to include the disclosures under § 54.9816–6(d)(1) and § 54.9816–6T(d)(1), with respect to the item or service;

(13) Preferred certified IDR entity; and

(14) A statement describing the key aspects of the claim, such as patient acuity or level of training of the provider, facility, or provider of air ambulance services that furnished the qualified IDR item or service, discussed by the parties during open negotiation that relate to the payment for the disputed claim, whether the reasons for initiating the Federal IDR process are different from the aspects of the claim discussed during the open negotiation period, and an explanation of why the party is initiating the Federal IDR process, including any of the permissible considerations described in paragraph (c)(5)(iii) of this section and § 54.9817–2(b)(2) that serve as the party's basis for initiating the Federal IDR process.

(B) [Reserved]

(iii) *Notice of IDR initiation response.*

-The non-initiating party must provide to the initiating party and to the Secretary in the manner specified in paragraph (b)(3) of this section within 3 business days after the date of IDR initiation, a written notice and supporting documentation in response to the notice of IDR initiation, as specified in paragraph (b)(2)(iii)(A) of this section.

(A) *Content.* The notice of IDR initiation response must include, with respect to the item or service that is the subject of the notice, information about the item or service and the parties including:

(1) Information sufficient to identify the provider, facility, or provider of air ambulance services, including the name and current contact information (including the legal business name, email address, phone number, and mailing address), and the NPI; and if the non-initiating party is a provider, facility, or provider of air ambulance services, the TIN;

(2) Information sufficient to identify the plan or issuer, including the plan's or issuer's registration number, as

required under § 54.9816–9 if the plan or issuer is registered under § 54.9816–9 or an attestation from the non-initiating party that the plan or issuer was not registered prior to the date that it submitted the notice; the legal business name of the plan or issuer, as well as the current contact information (name, email address, phone number, and mailing address) of the plan or issuer as provided with the initial payment or notice of denial of payment; and if the non-initiating party is a plan or issuer, the plan type (for example, self-insured or fully-insured) and TIN (or, in the case of a plan that does not have a TIN, the TIN of the plan sponsor);

(3) The name and contact information (including the legal business name, email address, phone number, and mailing address) for any third party representing the non-initiating party, and an attestation that the third party has the authority to act on behalf of the party it represents in the Federal IDR process;

(4) Information sufficient to identify each item or service included in the notice of IDR initiation, including the date(s) the item or service was furnished. If the non-initiating party is a provider, facility, or provider of air ambulance services, the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for such item or service from the plan or issuer, and the claim number;

(5) If the non-initiating party is a plan or issuer, a statement as to whether the non-initiating party agrees that the initial payment (including \$0 if, for example, payment is denied) and the qualifying payment amount reflected in the notice of IDR initiation are accurate for the item or service that is the subject of the dispute, and if not, the initial payment amount (including \$0 if, for example, payment is denied) and/or qualifying payment amount it believes to be correct, and documentation to support the statement (for example, the remittance advice confirming the qualifying payment amount);

(6) If the non-initiating party is a plan or issuer, the amount of cost sharing imposed for the item or service, if any;

(7) If the non-initiating party is a provider or facility, a statement that the items and services do not qualify for the notice and consent exception described at 45 CFR 149.410(b) or 45 CFR 149.420(c) through (i);

(8) With respect to each item or service that is the subject of the dispute, either an attestation that the item or service is a qualified IDR item or service, or, for each item or service that

the non-initiating party asserts is not a qualified IDR item or service, an explanation and documentation to support the statement;

(9) A statement confirming that the initial payment or notice of denial of payment or other remittance advice provided by the initiating party under paragraph (b)(2)(ii)(A)(12) of this section is accurate, and if inaccurate, a copy of the accurate initial payment or notice of denial of payment or other remittance advice required to include the disclosures under §§ 54.9816–6(d)(1) and 54.9816–6T(d)(1), with respect to the item or service;

(10) A statement as to whether any of the information provided in the notice of IDR initiation is inaccurate and the basis for the statement as well as any supporting documentation; and

(11) A statement as to whether the non-initiating party agrees or objects to the initiating party's preferred certified IDR entity. If the non-initiating party objects to the initiating party's preferred certified IDR entity, the notice of IDR initiation response must include the name of an alternative preferred certified IDR entity and, if applicable, an explanation of any conflict of interest with the initiating party's preferred certified IDR entity.

(B) [Reserved].

(3) *Manner.* A party furnishing notices as required under paragraphs (b)(1)(ii) and (iii), and (b)(2)(ii) and (iii) of this section must furnish the notices using the standard forms developed by the Secretary and must furnish the notices and supporting documentation to the other party and the Secretary, through the Federal IDR portal.

(c) *Federal IDR process following initiation*—(1) *Selection of certified IDR entity*—(i) *Preliminary selection of the certified IDR entity.* Within 3 business days after the date of IDR initiation, the non-initiating party must agree or object to the preferred certified IDR entity identified in the notice of IDR initiation, as described in paragraph (b)(2)(iii)(A)(11) of this section.

(A) If the non-initiating party agrees, or fails to object, to the selection of the initiating party's preferred certified IDR entity in the manner described in paragraph (b)(2)(iii)(A)(11) of this section and within the timeframe specified in paragraph (c)(1)(i) of this section, the initiating party's preferred certified IDR entity will be considered jointly selected on the third business day after the date of IDR initiation.

(B) If the non-initiating party objects to the selection of the initiating party's preferred certified IDR entity by designating an alternative preferred certified IDR entity in the manner

described in paragraph (b)(2)(iii)(A)(11) of this section and within 3 business days after the date of IDR initiation, the initiating party may then agree or object to the non-initiating party's alternative preferred certified IDR entity by submitting the notice of certified IDR entity selection in the manner specified in paragraph (c)(1)(i)(D) of this section. If the initiating party agrees to the non-initiating party's alternative preferred certified IDR entity within 3 business days after the date of IDR initiation, or if the non-initiating party submits the notice of IDR initiation response on or before the second business day after the date of IDR initiation and the initiating party fails to respond within 3 business days after the date of IDR initiation, the alternative preferred certified IDR entity will be considered jointly selected by the parties. If the non-initiating party submits the notice of IDR initiation response on the third business day after the date of IDR initiation and the initiating party does not agree on the same day, selection will proceed under paragraph (c)(1)(i)(C) of this section.

(C) If a certified IDR entity is not jointly selected under paragraph (c)(1)(i)(A) or (B) of this section, either party may select an alternative preferred certified IDR entity by submitting the notice of certified IDR entity selection in the manner specified in paragraph (c)(1)(i)(D) of this section, until the earlier of the date that the parties agree on the alternative preferred certified IDR entity or the deadline for joint selection, which is 3 business days after the date of IDR initiation. Once a party submits a notice of certified IDR entity selection, it may not submit another notice of certified IDR entity selection until after it receives a responding notice of certified IDR entity selection from the other party.

(1) If a party submits a notice of certified IDR entity selection to the other party on the first or second day after the date of IDR initiation and the party in receipt of the notice agrees or fails to object to the alternative preferred certified IDR entity by the third business day after the date of IDR initiation, the alternative preferred certified IDR entity will be considered jointly selected by the parties.

(2) If a party submits a notice of certified IDR entity selection to the other party on the third business day after the date of IDR initiation and the party last in receipt of the notice agrees to the alternative preferred certified IDR entity on the same day, the alternative preferred certified IDR entity will be considered jointly selected by the parties.

(3) If a party submits a notice of certified IDR entity selection to the other party on the third business day after the date of IDR initiation and the party last in receipt of the notice does not agree to the alternative preferred certified IDR entity on the same day, the parties will have failed to jointly select a certified IDR entity.

(D) To notify the other party and the Secretary of an agreement or objection to an alternative preferred certified IDR entity under paragraph (c)(1)(i)(C) of this section, a party must submit the notice of certified IDR entity selection. The party must furnish the notice of certified IDR entity selection using the standard form developed by the Secretary and must furnish the notice to the other party and the Secretary through the Federal IDR portal within 3 business days after the date of IDR initiation. However, in the event the conditions under paragraph (c)(1)(ii) of this section apply, the party may notify the Secretary of an agreement or objection to an alternative preferred certified IDR entity in accordance with paragraph (c)(1)(ii) of this section. The notice of certified IDR entity selection must include a statement indicating the party's agreement with or objection to the other party's alternative preferred certified IDR entity and, if applicable, an explanation of any conflict of interest with the alternative preferred certified IDR entity. If the party in receipt of a notice of certified IDR entity selection objects to the other party's alternative preferred certified IDR entity and the party submits a notice of certified IDR entity selection by the end of the third business day after the date of IDR initiation, that party's notice of certified IDR entity selection reflecting the objection must include the name of another alternative preferred certified IDR entity.

(ii) *Failure to jointly select a certified IDR entity.* If the parties fail to jointly select a certified IDR entity within 3 business days after the date of IDR initiation, the Secretary will select a certified IDR entity. The parties will have failed to jointly select a certified IDR entity if, by the end of the third business day after the date of IDR initiation, the party last in receipt of the notice of IDR initiation response or the notice of certified IDR entity selection has objected to the other party's alternative preferred certified IDR entity, or if the notice of IDR initiation response or the notice of certified IDR entity selection is submitted to the other party on the third business day after the date of IDR initiation and the party in receipt of the notice does not agree to the alternative preferred certified IDR

entity within 3 business days after the date of IDR initiation.

(A) In selecting the certified IDR entity, the Secretary will first confirm whether a party submitted the notice of IDR initiation response or the notice of certified IDR entity selection with an alternative preferred certified IDR entity on the third business day after the date of IDR initiation without the other party's agreement to the selection. If either notice was provided on the third business day after the date of IDR initiation without the other party's agreement to the alternative preferred certified IDR entity by the end of third business day after the date of IDR initiation, the Secretary will provide the party last in receipt of the applicable notice 2 additional business days to agree or object to the other party's alternative preferred certified IDR entity selection.

(1) If the party last in receipt of the notice of IDR initiation response or the notice of certified IDR entity selection agrees with the other party's alternative preferred certified IDR entity and notifies the Secretary of the agreement or fails to notify the Secretary of its objection in the Federal IDR portal by the fifth business day after the date of IDR initiation, the Secretary will select the final alternative preferred certified IDR entity selected in the applicable notice. In disputes where the applicable notice was submitted on the third business day after the date of IDR initiation, the party last in receipt of the notice will not be allowed to select another alternative preferred certified IDR entity.

(2) If the party notifies the Secretary of its objection to the alternative preferred certified IDR entity by the fifth business day after the date of IDR initiation, the Secretary will proceed with the random selection of the certified IDR entity from among the certified IDR entities (other than the preferred certified IDR entity and any alternative preferred certified IDR entity previously selected in such dispute by a party, unless there is no other certified IDR entity available to select) that charge a fee within the allowed range of certified IDR entity fees on the sixth business day after the date of IDR initiation. If there are insufficient certified IDR entities that charge a fee within the allowed range of certified IDR entity fees available to arbitrate the dispute, the Secretary will select a certified IDR entity that has received approval, as described in § 54.9816–8T(e)(2)(vii)(B), to charge a fee outside of the allowed range of certified IDR entity fees. In either case, the Secretary will notify the parties of the preliminary

selection of the certified IDR entity not later than 6 business days after the date of IDR initiation.

(B) [Reserved].

(iii) *Date of preliminary selection of the certified IDR entity.* The date of preliminary selection of the certified IDR entity will be:

(A) Three business days after the date of IDR initiation if the parties jointly selected a certified IDR entity, as specified in paragraph (c)(1)(i) of this section; or

(B) Six business days after the date of IDR initiation, if the parties fail to jointly select a certified IDR entity as specified in paragraph (c)(1)(ii) of this section.

(iv) *Final selection of certified IDR entity—(A) Conflict-of-interest review.* The certified IDR entity preliminarily selected for a dispute must review the selection. The selection of the certified IDR entity will be finalized only if the certified IDR entity attests to the Secretary that it meets the following requirements:

(1) The certified IDR entity does not have a conflict of interest as defined in § 54.9816–8T(a)(2)(iv);

(2) The certified IDR entity will only assign personnel to a dispute and make decisions regarding hiring, compensation, termination, promotion, or other similar matters related to personnel assigned to the dispute in a manner that is not based upon the likelihood that the assigned personnel will support a particular party to the dispute; and

(3) The certified IDR entity will not assign any personnel to a dispute who would have any conflicts of interest, as defined in § 54.9816–8T(a)(2)(iv), regarding any party to the dispute or whose relationship with a party within the 1 year immediately preceding the assignment to the dispute would violate the restrictions on aiding or advising a former employer or principal in a manner similar to the restrictions set forth in 18 U.S.C. 207(b).

(B) *Failure to meet conflict-of-interest requirements.* If the certified IDR entity notifies the Secretary within 3 business days of the date of preliminary selection of the certified IDR entity that it does not meet the requirements of paragraphs (c)(1)(iv)(A)(1) through (3) of this section or if the certified IDR entity does not respond within 3 business days after the date of preliminary selection of the certified IDR entity, the Secretary will randomly select another certified IDR entity consistent with paragraph (c)(1)(ii) of this section. The Secretary will notify the parties of the new randomly preliminarily selected certified IDR entity no later than 1

business day after the previously selected certified IDR entity notifies the Secretary that it has a conflict of interest or, if the previously selected certified IDR entity fails to respond within 3 business days after the date of preliminary selection of the certified IDR entity, no later than 1 business day after the end of the 3-business-day period.

(C) *Date of final selection of the certified IDR entity.* If the certified IDR entity that has been preliminarily selected attests within 3 business days that it meets the requirements of paragraphs (c)(1)(iv)(A)(1) through (3) of this section, the Secretary will notify the parties of the final selection of the certified IDR entity no later than 1 business day after the certified IDR entity attests that it meets the conflict-of-interest requirements. The date of final selection of the certified IDR entity is the date that the Secretary provides this notice to the parties.

(2) *Federal IDR process eligibility review—(i) Federal IDR process eligibility determination by certified IDR entity.* Unless the departmental eligibility review described in paragraph (c)(2)(ii) of this section applies, the selected certified IDR entity must review the information in the notice of IDR initiation, notice of IDR initiation response, and any additional information described in paragraph (c)(2)(iii) of this section, and make a final determination as to whether the item or service is a qualified IDR item or service, as defined in § 54.9816–8T(a)(2)(xi), that is eligible for the Federal IDR process. The certified IDR entity must make such a determination and notify the Secretary and both parties no later than 5 business days after the date of final selection of the certified IDR entity. If the certified IDR entity determines that the item or service is not a qualified IDR item or service, the dispute will be closed, and the selected certified IDR entity will not take any action with regard to the dispute.

(ii) *Departmental eligibility review for Federal IDR process eligibility determinations.* When the conditions for the departmental eligibility review set forth in paragraph (c)(2)(ii)(A) of this section are met, the Secretary will conduct the eligibility review and make the eligibility determination instead of the certified IDR entity. If the Secretary determines that the item or service is not a qualified IDR item or service, the dispute will be closed, and the selected certified IDR entity will not take any action with regard to the dispute. If the dispute is found to be eligible, the Secretary will inform the preliminarily

selected certified IDR entity of the dispute's eligibility so that it may conduct its conflict-of-interest assessment, and the dispute will otherwise continue through the Federal IDR process, including notification of the eligibility determination to the disputing parties by the preliminarily selected certified IDR entity.

(A) *Application of the departmental eligibility review.* The departmental eligibility review will apply when the Secretary determines that any of the extenuating circumstances described in paragraph (g)(1) of this section require application of the departmental eligibility review to facilitate timely payment determinations or the effective processing of disputes under the Federal IDR process.

(B) *Notification regarding applicability of the departmental eligibility review.* Before invoking the application of the departmental eligibility review, the Secretary will post advance public notification of the date on which the departmental eligibility review will take effect and the reasons for invoking the application of the departmental eligibility review. Before ending the application of the departmental eligibility review, the Secretary will post advance public notification of the date on which the departmental eligibility review will no longer be in effect and the reasons for ending the application of the departmental eligibility review.

(iii) *Request for additional information.* The Secretary or the selected certified IDR entity may request additional information from either party to a dispute at any time, including for the purpose of assessing whether a conflict of interest exists, conducting an eligibility determination, or making a payment determination.

(A) Upon request, a party must submit the additional information within 5 business days to the Secretary or the selected certified IDR entity, as applicable, through the Federal IDR portal. Following a request for additional information, the time period for the applicable stage of the Federal IDR process will be tolled until the earlier of the date either all of the requested information is provided or the 5-business-day period expires, and each subsequent timeframe in the Federal IDR process will be determined based on the date of completion of the stage of the Federal IDR process that was tolled for provision of the requested information.

(B) If a party fails to submit the additional information as required, the related determination, including the eligibility determination, conflict-of-

interest review, or payment determination will be made without the requested information unless a good-cause extension of the 5-business-day period, as specified in paragraph (g)(1)(i) of this section, has been provided, and the party subsequently submits the additional information requested within the extended period.

(3) *Authority to continue negotiations or withdraw—(i) Authority to continue to negotiate.* If the parties to the Federal IDR process agree on an out-of-network rate for a qualified IDR item or service after providing the notice of IDR initiation to the Secretary required under paragraph (b)(2)(ii) of this section, but before the certified IDR entity has made its payment determination, the amount agreed to by the parties for the qualified IDR item or service will be treated as the out-of-network rate for the qualified IDR item or service. To the extent the amount exceeds the initial payment amount and any cost sharing paid or required to be paid by the participant, beneficiary, or enrollee, or there was an initial denial of payment, payment must be made directly by the plan or issuer to the nonparticipating provider, nonparticipating facility, or nonparticipating provider of air ambulance services not later than 30 business days after the agreement is reached. In no instance may either party seek additional payment from the participant, beneficiary, or enrollee, including in instances in which the out-of-network rate exceeds the qualifying payment amount. The initiating party must send a notification to the Secretary and to the certified IDR entity (if selected) electronically, through the Federal IDR portal, as soon as possible, but no later than 3 business days after the date of the agreement. The notification must include the dispute number, a statement of the out-of-network rate for the qualified IDR item or service, and signatures from authorized signatories for both parties.

(ii) *Withdrawals.* A dispute may be withdrawn from the Federal IDR process by the initiating party, the Secretary, or a certified IDR entity before a payment determination is made if one of the following conditions is met:

(A) The initiating party provides notification through the Federal IDR portal to the Secretary and the certified IDR entity (if selected) that both parties to the dispute agree to withdraw the dispute from the Federal IDR process without agreement on an out-of-network rate. The notification must include the dispute number, a statement about both parties' agreement to withdraw, and signatures from authorized signatories for both parties.

(B) The initiating party provides a standard withdrawal request notice through the Federal IDR portal to the Secretary, the certified IDR entity (if selected), and the non-initiating party of its request to withdraw the dispute from the Federal IDR process and the non-initiating party notifies the Secretary, certified IDR entity (if selected), and the initiating party through the Federal IDR portal of its agreement to withdraw from the Federal IDR process within 5 business days of the initiating party's request. If the non-initiating party fails to respond within 5 business days of the initiating party's request, the non-initiating party will be considered to have agreed to the withdrawal, and the dispute will be withdrawn.

(C) The certified IDR entity or Secretary cannot determine eligibility because both parties to the dispute are unresponsive to any requests for additional information to determine eligibility as described in paragraph (c)(2)(iii) of this section, or

(D) The certified IDR entity cannot make a payment determination because both parties to the dispute have failed to submit an offer as described in paragraph (c)(5)(i) of this section.

(4) *Treatment of batched qualified IDR items and services—(i) In general.* A certified IDR entity may consider up to 25 qualified IDR items and services jointly as part of one payment determination that is subject to the certified IDR entity fee for batched determinations only if the qualified IDR items and services meet the requirements of this paragraph (c)(4)(i).

(A) For further guidance, see § 54.9816–8T(c)(4)(i)(A);

(B) Payment for the qualified IDR items and services is required to be made by the same group health plan or health insurance issuer. For group or individual health insurance coverage, this requirement is satisfied if the same issuer is required to make payment for the qualified IDR items and services, even if the qualified IDR items and services relate to claims from different group health plans or individual market policies. For self-insured group health plans, this requirement is satisfied if the same self-insured group health plan is required to make payment for the qualified IDR items and services, including when the plan makes payments through a third party administrator; the requirement is not satisfied if multiple self-insured group health plans are required to make payments for the qualified IDR items and services, even if those group health plans make payments through the same third party administrator;

(C) The qualified IDR items and services meet any of the following criteria under which multiple qualified IDR items and services relate to the treatment of a similar condition and therefore are permitted to be considered jointly as a single payment determination for purposes of encouraging efficiencies (including minimizing costs) in the Federal IDR process:

(1) The qualified IDR items or services were furnished to a single patient during the same patient encounter. For purposes of this section, a single patient encounter is defined as a patient encounter on one or more consecutive days during which the qualified IDR items or services were furnished to the same patient and billed on the same claim form; or

(2) The qualified IDR items and services were furnished to one or more patients and were billed under the same service code or a comparable code under a different procedural coding system, such as Current Procedural Terminology (CPT) codes with modifiers, if applicable, Healthcare Common Procedure Coding System (HCPCS) codes with modifiers, if applicable, or Diagnosis-Related Group (DRG) codes with modifiers, if applicable; or

(3) For anesthesiology, radiology, pathology, and laboratory qualified IDR items and services, the qualified IDR items and services were furnished to one or more patients and were billed under service codes belonging to the same Category I CPT code range, as specified in guidance published by the Secretary; and

(D) All the qualified IDR items and services were furnished within the same 30-business-day period following the date on which the first item or service included in the batched determination was furnished and were the subjects of a 30-business-day open negotiation period that ended within 4 business days of IDR initiation, except as provided in paragraph (c)(5)(vii) of this section.

(ii) *Treatment of bundled payment arrangements.* Qualified IDR items and services that meet the definition of a bundled payment arrangement under § 54.9816–3 may be submitted and considered as a single payment determination, and the certified IDR entity must make a single payment determination for the multiple qualified IDR items and services included in the bundled payment arrangement. Bundled payment arrangements as defined in § 54.9816–3 and submitted under this paragraph (c)(4)(ii) are subject to the

certified IDR entity fee for single determinations.

(5) *Payment determination for a qualified IDR item or service—(i) Submission of offers.* Not later than 10 business days after the date of final selection of the certified IDR entity as described in paragraph (c)(1)(iv)(C) of this section (or not later than 10 business days after the qualified IDR items and services are determined eligible as described in paragraph (c)(2) of this section, when the Secretary determines that any of the extenuating circumstances described in paragraph (g)(1)(ii) of this section apply), the plan or issuer and the provider, facility, or provider of air ambulance services:

(A) For further guidance, see § 54.9816–8T(c)(5)(i)(A).

(B) For further guidance, see § 54.9816–8T(c)(5)(i)(B);

(ii) *Payment determination and notification.* Not later than 30 business days after the date of final selection of the certified IDR entity as described in paragraph (c)(1)(iv)(C) of this section (or not later than 30 business days after the qualified IDR items and services are determined eligible as described in paragraph (c)(2) of this section, when the Secretary determines that any of the extenuating circumstances described in paragraph (g) of this section apply), the certified IDR entity must:

(A) Select as the out-of-network rate for the qualified IDR item or service one of the offers submitted under paragraph (c)(5)(i) of this section, weighing only the considerations specified in paragraph (c)(5)(iii) of this section (as applied to the information provided by the parties pursuant to § 54.9816–8T(c)(5)(i)). The certified IDR entity must select the offer that the certified IDR entity determines best represents the value of the qualified IDR item or service as the out-of-network rate.

(1) *Prevailing party.* In the case of single determinations, the party whose offer is selected by the certified IDR entity is considered the prevailing party. In the case of batched determinations, the party with the most determinations in its favor is considered the prevailing party; if each party prevails in an equal number of determinations, neither party will be considered the prevailing party, and the certified IDR entity fee will be split evenly between the parties.

(2) *Non-prevailing party.* In the case of single determinations, the party whose offer is not selected by the certified IDR entity is considered the non-prevailing party. In the case of batched determinations, the party with the fewest determinations in its favor is considered the non-prevailing party.

(B) *For further guidance, see § 54.9816–8T(c)(5)(ii)(B).*

(iii) *Considerations in determination.* In determining which offer to select:

(A) The certified IDR entity must consider the qualifying payment amount(s) for the applicable year for the same or similar item or service.

(B) The certified IDR entity must then consider information submitted by a party that relates to the following circumstances:

(1) The level of training, experience, and quality and outcomes measurements of the provider or facility that furnished the qualified IDR item or service (such as those endorsed by the consensus-based entity authorized in section 1890 of the Social Security Act).

(2) The market share held by the provider or facility or that of the plan or issuer in the geographic region in which the qualified IDR item or service was provided.

(3) The acuity of the participant or beneficiary receiving the qualified IDR item or service, or the complexity of furnishing the qualified IDR item or service to the participant or beneficiary.

(4) The teaching status, case mix, and scope of services of the facility that furnished the qualified IDR item or service, if applicable.

(5) Demonstration of good faith efforts (or lack thereof) made by the provider or facility or the plan or issuer to enter into network agreements with each other, and, if applicable, contracted rates between the provider or facility, as applicable, and the plan or issuer, as applicable, during the previous 4 plan years.

(C) The certified IDR entity must also consider information provided by a party in response to a request by the certified IDR entity under § 54.9816–8T(c)(4)(i)(A)(2) that relates to the offer for the payment amount for the qualified IDR item or service that is the subject of the payment determination and that does not include information on factors described in § 54.9816–8T(c)(4)(v).

(D) The certified IDR entity must also consider additional information submitted by a party that relates to the offer for the payment amount for the qualified IDR item or service that is the subject of the payment determination and that does not include information on factors described in § 54.9816–8T(c)(4)(v).

(E) In weighing the considerations described in paragraphs (c)(4)(iii)(B) through (D) of this section, the certified IDR entity should evaluate whether the information is credible and relates to the offer submitted by either party for the payment amount for the qualified IDR

item or service that is the subject of the payment determination. The certified IDR entity should not give weight to information to the extent it is not credible, it does not relate to either party's offer for the payment amount for the qualified IDR item or service, or it is already accounted for by the qualifying payment amount under *paragraph (c)(4)(iii)(A)* of this section or other credible information under *paragraphs (c)(4)(iii)(B) through (D)* of this section.

(iv) *Examples.* The rules of *paragraph (c)(4)(iii)* of this section are illustrated in the following paragraphs. Each example assumes that the Federal IDR process applies for purposes of determining the out-of-network rate, that both parties have submitted the information parties are required to submit as part of the Federal IDR process, and that the submitted information does not include information on factors described in *paragraph (c)(4)(v)* of this section:

(A) *Example 1—(1) Facts.* A level 1 trauma center that is a nonparticipating emergency facility and an issuer are parties to a payment determination in the Federal IDR process. The facility submits an offer that is higher than the qualifying payment amount. The facility also submits additional written information showing that the scope of services available at the facility was critical to the delivery of care for the qualified IDR item or service provided, given the particular patient's acuity. This information is determined to be credible by the certified IDR entity. Further, the facility submits additional information showing the contracted rates used to calculate the qualifying payment amount for the qualified IDR item or service were based on a level of service that is typical in cases in which the services are delivered by a facility that is not a level 1 trauma center and that does not have the capability to provide the scope of services provided by a level 1 trauma center. This information is also determined to be credible by the certified IDR entity. The issuer submits an offer equal to the qualifying payment amount. No additional information is submitted by either party. The certified IDR entity determines that all the information submitted by the nonparticipating emergency facility relates to the offer for the payment amount for the qualified IDR item or service that is the subject of the payment determination.

(2) *Conclusion.* In this *paragraph (c)(4)(iv)(A)* (*Example 1*), the certified IDR entity must consider the qualifying payment amount. The certified IDR entity then must consider the additional information submitted by the

nonparticipating emergency facility, provided the information relates to circumstances described in *paragraphs (c)(4)(iii)(B) through (D)* of this section and relates to the offer for the payment amount for the qualified IDR item or service that is the subject of the payment determination. If the certified IDR entity determines that it is appropriate to give weight to the additional credible information submitted by the nonparticipating emergency facility and that the additional credible information submitted by the facility demonstrates that the facility's offer best represents the value of the qualified IDR item or service, the certified IDR entity should select the facility's offer.

(B) *Example 2—(1) Facts.* A nonparticipating provider and an issuer are parties to a payment determination in the Federal IDR process. The provider submits an offer that is higher than the qualifying payment amount. The provider also submits additional written information regarding the level of training and experience the provider possesses. This information is determined to be credible by the certified IDR entity, but the certified IDR entity finds that the information does not demonstrate that the provider's level of training and experience relates to the offer for the payment amount for the qualified IDR item or service that is the subject of the payment determination (for example, the information does not show that the provider's level of training and experience was necessary for providing the qualified IDR service that is the subject of the payment determination to the particular patient, or that the training or experience made an impact on the care that was provided). The nonparticipating provider does not submit any additional information. The issuer submits an offer equal to the qualifying payment amount, with no additional information.

(2) *Conclusion.* In this *paragraph (c)(4)(iv)(B)* (*Example 2*), the certified IDR entity must consider the qualifying payment amount. The certified IDR entity must then consider the additional information submitted by the nonparticipating provider, provided the information relates to circumstances described in *paragraphs (c)(4)(iii)(B) through (D)* of this section and relates to the offer for the payment amount for the qualified IDR item or service that is the subject of the payment determination. In addition, the certified IDR entity should not give weight to information to the extent it is already accounted for by the qualifying payment amount or other credible information under *paragraphs (c)(4)(iii)(B) through (D)* of this section.

If the certified IDR entity determines that the additional information submitted by the provider is credible but does not relate to the offer for the payment amount for the qualified IDR service that is the subject of the payment determination, and determines that the issuer's offer best represents the value of the qualified IDR service, in the absence of any other credible information that relates to either party's offer, the certified IDR entity should select the issuer's offer.

(C) *Example 3—(1) Facts.* A nonparticipating provider and an issuer are parties to a payment determination in the Federal IDR process involving an emergency department visit for the evaluation and management of a patient. The provider submits an offer that is higher than the qualifying payment amount. The provider also submits additional written information showing that the acuity of the patient's condition and complexity of the qualified IDR service furnished required the taking of a comprehensive history, a comprehensive examination, and medical decision making of high complexity. This information is determined to be credible by the certified IDR entity. The issuer submits an offer equal to the qualifying payment amount for CPT code 99285, which is the CPT code for an emergency department visit for the evaluation and management of a patient requiring a comprehensive history, a comprehensive examination, and medical decision making of high complexity. The issuer also submits additional written information showing that this CPT code accounts for the acuity of the patient's condition. This information is determined to be credible by the certified IDR entity. The certified IDR entity determines that the information provided by the provider and issuer relates to the offer for the payment amount for the qualified IDR service that is the subject of the payment determination. Neither party submits any additional information.

(2) *Conclusion.* In this *paragraph (c)(4)(iv)(C)* (*Example 3*), the certified IDR entity must consider the qualifying payment amount. The certified IDR entity then must consider the additional information submitted by the parties, but the certified IDR entity should not give weight to information to the extent it is already accounted for by the qualifying payment amount or other credible information under *paragraphs (c)(4)(iii)(B) through (D)* of this section. If the certified IDR entity determines the additional information on the acuity of the patient and complexity of the service is already accounted for in the

calculation of the qualifying payment amount, the certified IDR entity should not give weight to the additional information provided by the provider. If the certified IDR entity determines that the issuer's offer best represents the value of the qualified IDR service, the certified IDR entity should select the issuer's offer.

(D) *Example 4—(1) Facts.* A nonparticipating emergency facility and an issuer are parties to a payment determination in the Federal IDR process. Although the facility is not participating in the issuer's network during the relevant plan year, it was a participating facility in the issuer's network in the previous 4 plan years. The issuer submits an offer that is higher than the qualifying payment amount and that is equal to the facility's contracted rate (adjusted for inflation) for the previous year with the issuer for the qualified IDR service. The issuer also submits additional written information showing that the contracted rates between the facility and the issuer during the previous 4 plan years were higher than the qualifying payment amount submitted by the issuer, and that these prior contracted rates account for the case mix and scope of services typically furnished at the nonparticipating facility. The certified IDR entity determines this information is credible and that it relates to the offer submitted by the issuer for the payment amount for the qualified IDR service that is the subject of the payment determination. The facility submits an offer that is higher than both the qualifying payment amount and the contracted rate (adjusted for inflation) for the previous year with the issuer for the qualified IDR service. The facility also submits additional written information, with the intent to show that the case mix and scope of services available at the facility were integral to the service provided. The certified IDR entity determines this information is credible and that it relates to the offer submitted by the facility for the payment amount for the qualified IDR service that is the subject of the payment determination. Neither party submits any additional information.

(2) *Conclusion.* In this paragraph (c)(4)(iv)(D) (*Example 4*), the certified IDR entity must consider the qualifying payment amount. The certified IDR entity then must consider the additional information submitted by the parties, but should not give weight to information to the extent it is already accounted for by the qualifying payment amount or other credible information under paragraphs (c)(4)(iii)(B) through (D) of this section. If the certified IDR

entity determines that the information submitted by the facility regarding the case mix and scope of services available at the facility includes information that is also accounted for in the information the issuer submitted regarding prior contracted rates, then the certified IDR entity should give weight to that information only once. The certified IDR entity also should not give weight to the same information provided by the nonparticipating emergency facility in relation to any other factor. If the certified IDR entity determines that the issuer's offer best represents the value of the qualified IDR service, the certified IDR entity should select the issuer's offer.

(E) *Example 5—(1) Facts.* A nonparticipating provider and an issuer are parties to a payment determination in the Federal IDR process regarding a qualified IDR service for which the issuer downcoded the service code that the provider billed. The issuer submits an offer equal to the qualifying payment amount (which was calculated using the downcoded service code). The issuer also submits additional written information that includes the documentation disclosed to the nonparticipating provider under § 54.9816–6(d)(1)(ii) at the time of the initial payment (which describes why the service code was downcoded). The certified IDR entity determines this information is credible and that it relates to the offer for the payment amount for the qualified IDR service that is the subject of the payment determination. The provider submits an offer equal to the amount that would have been the qualifying payment amount had the service code not been downcoded. The provider also submits additional written information that includes the documentation disclosed to the nonparticipating provider under § 54.9816–6(d)(1)(ii) at the time of the initial payment. Further, the provider submits additional written information that explains why the billed service code was more appropriate than the downcoded service code, as evidence that the provider's offer, which is equal to the amount the qualifying payment amount would have been for the service code that the provider billed, best represents the value of the service furnished, given its complexity. The certified IDR entity determines this information to be credible and that it relates to the offer for the payment amount for the qualified IDR service that is the subject of the payment determination. Neither party submits any additional information.

(2) *Conclusion.* In this paragraph (c)(4)(iv)(E) (*Example 5*), the certified

IDR entity must consider the qualifying payment amount, which is based on the downcoded service code. The certified IDR entity then must consider whether to give weight to additional information submitted by the parties. If the certified IDR entity determines that the additional credible information submitted by the provider demonstrates that the nonparticipating provider's offer, which is equal to the qualifying payment amount for the service code that the provider billed, best represents the value of the qualified IDR service, the certified IDR entity should select the nonparticipating provider's offer.

(v) *Prohibition on consideration of certain factors.* For further guidance, see § 54.9816–8T(c)(5)(v).

(vi) *Written Decision.* For further guidance, see § 54.9816–8T(c)(5)(vi).

(vii) *Effects of determination—(A) Binding.* For further guidance see § 54.9816–8T(c)(5)(vii)(A).

(B) *Suspension of certain subsequent IDR requests.*—In the case of a determination made by a certified IDR entity under paragraph (c)(5)(ii) of this section, the party that submitted the initial notification under paragraph (b)(2) of this section may not submit a subsequent notification involving the same other party with respect to a claim for the same item or service that was the subject of the initial notification during the 90-calendar-day period following the determination.

(C) *Subsequent submission of requests permitted.* If the end of the open negotiation period specified in paragraph (b)(1) of this section occurs during the 90-calendar-day suspension period regarding claims for the same item or service that were the subject of the initial notice of IDR determination as described in paragraph (c)(5)(vi) of this section, either party may initiate the Federal IDR process for those claims by submitting a notification as specified in paragraph (b)(2) of this section during the 30-business-day period beginning on the day after the last day of the 90-calendar-day suspension period.

(viii) *Recordkeeping requirements.* For further guidance see § 54.9816–8T(c)(5)(viii).

(ix) *Payment.* For further guidance see § 54.9816–8T(c)(5)(ix).

(d) *Costs of IDR process—(1) Certified IDR entity fee—(i) Timing of payment of certified IDR entity fee.* Each party to a dispute for which there is a final selection of the certified IDR entity and a determination that the dispute is eligible for the Federal IDR process in accordance with paragraph (c)(2) of this section must pay to the certified IDR entity the predetermined certified IDR entity fee charged by the certified IDR

entity. The certified IDR entity fee must be paid no later than the date a party submits its offer to the certified IDR entity, in accordance with paragraph (c)(5)(i) of this section.

(ii) *Failure to timely pay certified IDR entity fee.* If a party fails to pay the certified IDR entity fee as specified in paragraph (d)(1)(i) of this section, that party's offer will not be considered received. Such party will continue to be responsible for payment of the certified IDR entity fee.

(iii) *Method of allocation of the certified IDR entity fee after a payment determination.* After making a payment determination, the certified IDR entity shall retain the certified IDR entity fee described under paragraph (d)(1)(i) of this section paid by the non-prevailing party as defined in paragraph (c)(5)(ii)(A)(2) of this section. The certified IDR entity must return the fee paid by the prevailing party, as defined in paragraph (c)(5)(ii)(A)(1) of this section, within 30 business days following the date of the certified IDR entity's payment determination. In the event of a batched dispute in which each party prevails in an equal number of determinations, the certified IDR entity fee will be split evenly between the parties. In that case, the certified IDR entity must return half the fee paid by each party within 30 business days following the date of the certified IDR entity's payment determination.

(iv) *Method of allocation of the certified IDR entity fee upon agreement or withdrawal after an eligibility determination.* For a dispute for which there is a final selection of the certified IDR entity and a determination that the dispute is eligible for the Federal IDR process in accordance with paragraph (c)(2) of this section, unless directed otherwise by both parties, the certified IDR entity is required to return half of each party's certified IDR entity fee within 30 business days of the date both parties notify the certified IDR entity that they have:

(A) Reached an agreement on an out-of-network rate for qualified IDR items or services before the certified IDR entity has made its payment determination, as described in paragraph (c)(3)(i) of this section; or

(B) Withdrawn the dispute before the certified IDR entity has made its payment determination, as described in paragraph (c)(3)(ii) of this section.

(v) *Method of allocation of the certified IDR entity fee upon agreement or withdrawal before an eligibility determination.* When the parties reach an agreement on an out-of-network rate or withdraw a dispute for which there is a final selection of the certified IDR

entity, but for which no eligibility determination has yet been made, unless directed otherwise by both parties, the certified IDR entity is required to return each party's full certified IDR entity fee within 30 business days of the date both parties notify the certified IDR entity that they have agreed on an out-of-network rate or agreed to withdraw the dispute.

(2) *Administrative fee—(i) In general.* Each party to a dispute for which a certified IDR entity is selected under paragraph (c)(1) of this section must pay a non-refundable administrative fee to the Secretary for participating in the Federal IDR process.

(A) *Timing of payment of administrative fee.* The initiating party must pay the administrative fee within 2 business days of the date of preliminary selection of the certified IDR entity as described in paragraph (c)(1)(iii) of this section. The non-initiating party must pay the administrative fee within 2 business days of the date the non-initiating party receives notice that an eligibility determination for the Federal IDR process has been reached by either the certified IDR entity or the Departments in accordance with paragraph (c)(2) of this section.

(B) *Agreements and withdrawals.* In the case of an agreement, as described in paragraph (c)(3)(i) of this section, or a withdrawal, as described in paragraph (c)(3)(ii) of this section, the administrative fee will not be returned to the parties if preliminary selection of the certified IDR entity has occurred, as described in paragraph (c)(1)(i) of this section; if not yet collected, the administrative fee must still be paid, except as provided in paragraph (d)(2)(i)(C) of this section for a dispute closed for nonpayment by an initiating party.

(C) *Failure to pay administrative fee.* If the initiating party fails to pay the administrative fee in accordance with paragraph (d)(2)(i)(A) of this section, the dispute will be closed due to nonpayment and neither party will be responsible for the administrative fee. If the non-initiating party fails to pay the administrative fee in accordance with paragraph (d)(2)(i)(A) of this section, that party's offer will not be considered received and the non-initiating party will continue to be responsible for payment of the administrative fee.

(D) *Collection of unpaid fees.* Any party that fails to pay the administrative fee owed in accordance with paragraph (d)(2)(i)(A) of this section is obligated to pay the administrative fee otherwise due and owing, except as provided in paragraph (d)(2)(i)(C) of this section for

a dispute closed for nonpayment by an initiating party. The Secretary will pursue collection from a party to a dispute of any administrative fee that is not timely paid pursuant to applicable debt collection authorities.

(ii) *Administrative fee amount.* The administrative fee amount and method of payment will be established through notice and comment rulemaking in a manner such that the total administrative fees paid for a year, including administrative fees reduced under paragraph (d)(2)(iii) of this section, are estimated to be equal to the projected amount of expenditures made by the Secretaries of the Treasury, Labor, and Health and Human Services for the year in carrying out the Federal IDR process.

(A) For disputes initiated on or after the later of the effective date of Federal Independent Dispute Resolution (IDR) Process Administrative Fee and Certified IDR Entity Fee Ranges final rules or January 1, 2024, the administrative fee amount is \$150 per party per dispute, which will remain in effect until changed by subsequent rulemaking.

(B) [Reserved]

(iii) *Reducing the administrative fee amount.* For disputes initiated on or after January 1, 2025—

(A) The Secretary may reduce the administrative fee for both parties in accordance with paragraph (d)(2)(iii)(C) of this section when the highest offer made by either party during open negotiation for the dispute is less than the threshold established through notice and comment rulemaking, pursuant to paragraph (d)(2)(ii) of this section. For a dispute that satisfies the requirements for a reduced administrative fee in accordance with this paragraph and for which a determination has been made that the dispute is eligible for the Federal IDR process in accordance with paragraph (c)(2) of this section, the administrative fee amount may be reduced to 50 percent of the administrative fee amount as described in paragraph (d)(2)(ii) of this section for each party to the dispute. For a dispute that satisfies the requirements for a reduced administrative fee in accordance with this paragraph and for which a determination has been made that the dispute is ineligible for the Federal IDR process in accordance with paragraph (c)(2) of this section, the administrative fee amount may be reduced to 50 percent of the administrative fee amount as described in paragraph (d)(2)(ii) of this section for the initiating party and to 20 percent of the administrative fee amount for the non-initiating party.

(B) The Secretary may reduce the administrative fee for a non-initiating party in accordance with paragraph (d)(2)(iii)(C) of this section when the dispute is determined to be ineligible for the Federal IDR process in accordance with paragraph (c)(2) of this section. For a dispute that satisfies the requirements for a reduced administrative fee in accordance with this paragraph, the administrative fee amount for the non-initiating party may be reduced to 20 percent of the administrative fee amount as described in paragraph (d)(2)(ii) of this section.

(C) The reduced administrative fee amounts provided for in paragraphs (d)(2)(iii)(A) and (B) of this section shall be established in notice and comment rulemaking and will remain in effect until changed by subsequent rulemaking, pursuant to paragraph (d)(2)(ii) of this section.

(e) *Certification of IDR entity—(1) In general.* For further guidance, see § 54.9816–8T(e)(1);

(2) *Requirements.* For further guidance, see § 54.9816–8T(e)(2) introductory text;

(i) For further guidance, see § 54.9816–8T(e)(2)(i);

(ii) For further guidance, see § 54.9816–8T(e)(2)(ii);

(iii) For further guidance, see § 54.9816–8T(e)(2)(iii);

(iv) For further guidance, see § 54.9816–8T(e)(2)(iv);

(v) For further guidance, see § 54.9816–8T(e)(2)(v);

(vi) Meet appropriate indicators of fiscal integrity and stability by demonstrating that the certified IDR entity has a system of safeguards and controls in place to prevent and detect improper financial activities by its employees and agents to assure fiscal integrity and accountability for all certified IDR entity fees and administrative fees (if applicable) received, held, and disbursed and by submitting 3 years of financial statements or, if not available, other information to demonstrate fiscal stability of the certified IDR entity;

(vii) For further guidance, see § 54.9816–8T(e)(2)(vii);

(viii) Have a procedure in place to retain the certified IDR entity fees described in paragraph (d)(1) of this section paid by both parties in a trust or escrow account and to return the certified IDR entity fee paid by the prevailing party or a portion of each party's certified IDR entity fee in the case of an agreement described in paragraph (c)(3)(i) of this section, a withdrawal described in paragraph (c)(3)(ii) of this section, or a circumstance described under

paragraph (d)(1)(iii) of this section, within 30 business days following the date of the determination;

(ix) Have a procedure in place to retain the administrative fees (if applicable) described in paragraph (d)(2) of this section and to remit the administrative fees to the Secretary in accordance with the timeframe and procedures set forth in guidance published by the Secretary;

(x) For further guidance, see § 54.9816–8T(e)(2)(x); and

(xi) For further guidance, see § 54.9816–8T(e)(2)(xi);

(3) *Conflict-of-interest standards.* For further guidance, see § 54.9816–8T(e)(3).

(4) *Period of Certification.* For further guidance, see § 54.9816–8T(e)(4).

(5) *Petition for denial or revocation.* For further guidance, see § 54.9816–8T(e)(5).

(6) *Denial of IDR entity certification or revocation of certified IDR entity certification.* For further guidance, see § 54.9816–8T(e)(6).

* * * * *

(g) *Extension of time periods for extenuating circumstances—(1) In general.* The time periods specified in this section (other than the time for payment, if applicable, under § 54.9816–8T(c)(5)(ix)) may be extended in extenuating circumstances at the Secretary's discretion. Extenuating circumstances include, but are not limited to when:

(i) With respect to a specific dispute, the Secretary determines that the parties or certified IDR entity cannot meet applicable timeframes due to matters beyond the control of one or both parties or the certified IDR entity, or for other good cause. The certified IDR entity or either party may also submit a request for an extension due to extenuating circumstances to the Secretary through the Federal IDR portal. The requesting certified IDR entity or party must attest that it will take prompt action to ensure that the certified IDR entity's payment determination under this section may be made as soon as administratively practicable under the circumstances; or

(ii) The Secretary determines that the parties or certified IDR entity cannot meet applicable timeframes due to systematic delays in processing disputes under the Federal IDR process, such as an unforeseen volume of disputes or Federal IDR portal system failures. Extensions provided due to extenuating circumstances caused by an unforeseen volume of disputes will be applied to the timeframe for eligibility determinations under paragraph (c)(2) of this section. Extensions provided due to

extenuating circumstances caused by systems failures within the Federal IDR portal will be applied to the Federal IDR process timeframe(s) determined relevant by the Secretary. The Secretary will post a public notice regarding any extensions of time periods pursuant to this paragraph (g)(1)(ii).

(A) *Timeframe following an extension to eligibility determination.* When an extension to the eligibility determination timeframe pursuant to paragraph (g)(1)(ii) of this section is in effect, the start date of the subsequent timeframes in the Federal IDR process will be determined based on the date of completion of the eligibility determination by the certified IDR entity or the Secretary.

(1) *Submission of offers.* The parties must submit their offers and certified IDR entity fees to the certified IDR entity not later than 10 business days after the qualified IDR items and services are determined eligible as described in paragraph (c)(2) of this section.

(2) *Payment Determination.* The certified IDR entity must make the payment determination and notification of the payment determination to the parties not later than 30 business days after the qualified IDR items and services are determined eligible as described in paragraph (c)(2) of this section.

(B) *Timeframe following an extension to other timeframes in the Federal IDR process.* When an extension to any timeframe within the Federal IDR process, other than the eligibility timeframe, is in effect pursuant to paragraph (g)(1)(ii) of this section, the start date of each subsequent timeframe in the Federal IDR process will be determined based on the date of completion of the process for which the extension was granted.

(2) [Reserved]

(h) *Applicability date.* (1) Paragraph (a) of § 54.9816–8T is applicable with respect to plan years beginning on or after January 1, 2022, except that the provisions regarding IDR entity certification at § 54.9816–8T(a) and (e) are applicable beginning on October 7, 2021, and the revised definition for batched qualified IDR items and services at paragraph (a)(2)(i) of this section is applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule.

(2) Paragraph (b) of this section is applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule.

(3) Paragraph (c)(1) of this section, regarding the selection of a certified IDR entity, is applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule, except that paragraphs (c)(1)(iv)(A)(1) through (3) of this section, regarding the conflict-of-interest standards, are applicable with respect to plan years beginning on or after January 1, 2022.

(4) Paragraph (c)(2) of this section, regarding the Federal IDR process eligibility review and paragraph (c)(3) of this section regarding the authority to continue negotiations or withdraw, are applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule, and paragraph (c)(4) of this section regarding the treatment of batched and bundled qualified IDR items and services is applicable 90 days after the effective date of the rule.

(5) Paragraphs (c)(5)(i) and (ii), and (c)(5)(vii)(B) and (C) of this section regarding the deadlines for the submission of offers, payment determination and notification, suspension of certain subsequent IDR requests, and subsequent submission of requests submitted are applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule. Paragraphs (c)(5)(iii) and (vi) of this section regarding considerations in payment determinations and the related examples and paragraph (c)(5)(vi)(B) of this section regarding written decisions are applicable with respect to items or services furnished on or after October 25, 2022, for plan years beginning on or after January 1, 2022. Section 54.9816–8T(c)(5)(v) through (c)(5)(vi)(A), § 54.9816–8T(c)(5)(vii)(A), and § 54.9816–8T(c)(5)(viii) and (ix) are applicable with respect to plan years beginning on or after January 1, 2022.

(6) Paragraph (d) of this section regarding the costs of the IDR process is applicable to disputes initiated on or after January 1, 2025.

(7) Section 54.9816–8T(e) is applicable with respect to plan years beginning on or after January 1, 2022. The provisions regarding IDR entity certification at paragraphs (1), (e)(2)(i) through (vi), (e)(2)(x) and (xi), and (e)(3) through (6) of this section are applicable beginning on October 7, 2021. Paragraphs (e)(2)(vi), (viii), and (ix) of this section regarding the certified IDR entity's controls to prevent and detect improper financial activities, and procedures to retain the certified IDR

entity fee and administrative fee are applicable upon the effective date of the rule.

(8) Section 54.9816–8T(f) is applicable with respect to plan years beginning on or after January 1, 2022. Section 54.9816–8(f)(1)(v)(F) regarding reporting of information relating to the Federal IDR process is applicable with respect to items or services furnished on or after October 25, 2022, for plan years beginning on or after January 1, 2022.

(9) Paragraph (g) of this section regarding the extension of time periods for extenuating circumstances is applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule.

(10) Until the relevant applicability date for the requirements of this section, plans, issuers, providers, facilities, providers of air ambulance services and certified IDR entities are required to continue to comply with the corresponding section of §§ 54.9816–8 and 54.9816–8T in effect on October 25, 2022.

(i) *Severability.* (1) Any provision of this section held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, shall be construed so as to continue to give maximum effect to the provision permitted by law, unless such holding shall be one of utter invalidity or unenforceability, in which event the provision shall be severable from this section and shall not affect the remainder thereof or the application of the provision to persons not similarly situated or to dissimilar circumstances.

(2) The provisions of paragraphs (b)(1), (c)(2)(ii), (c)(4), (d)(2), and (g)(1) of this section are intended to be severable from one another, from any grant of forbearance from removal resulting from this subpart, and from any provision referenced in those paragraphs. The provisions in §§ 54.9816–8 and 54.9816–8T are intended to be severable from the provisions in §§ 54.9816–6A, 54.9816–6, 54.9816–6T, and 54.9816–9, from any grant of forbearance from removal resulting from this subpart, and from any provision referenced in §§ 54.9816–6A, 54.9816–6, 54.9816–6T, and 54.9816–9.

■ 10. Section 54.9816–8T is amended by:

■ a. Revising paragraphs (a)(2)(i), (b)(1) through (3), (c)(1)(i) and (c)(2);

■ b. Redesignating paragraphs (c)(3) through (c)(4) as (c)(4) through (c)(5);

■ c. Adding new paragraph (c)(3);

■ d. Revising newly redesignated paragraphs (c)(4)(i) introductory text, (c)(4)(i)(B) through (D), (c)(4)(ii), (c)(5)(i)

introductory text, (c)(5)(ii), (iii) and (iv), (c)(5)(vi)(B), (c)(5)(vii)(A) introductory text, and (c)(5)(vii)(B) and (C);

■ e. Revising paragraphs (d) introductory text, (e)(2)(vi), (viii) and (ix), and (g); and

■ f. Adding paragraphs (h) and (i).

The revisions and additions read as follows:

§ 54.9816–8T Independent dispute resolution process. (temporary)

(a) * * *

(2) * * *

(i) *Batched items and services*—For further guidance, see § 54.9816–8(a)(2)(i);

* * * * *

(b) * * *

(1) *Determination of payment amount through open negotiation.* For further guidance, see § 54.9816–8(b)(1);

(2) *Initiating the Federal IDR process.* For further guidance, see § 54.9816–8(b)(2);

(3) *Manner.* For further guidance, see § 54.9816–8(b)(3).

(c) * * *

(1) * * *

(i) *Preliminary selection of the certified IDR entity.* For further guidance, see § 54.9816–8(c)(1).

* * * * *

(2) *Federal IDR process eligibility review.* For further guidance, see § 54.9816–8(c)(2).

(3) *Authority to continue negotiations or withdraw.* For further guidance, see § 54.9816–8(c)(3).

(4) * * *

(i) *In general.* For further guidance, see § 54.9816–8(c)(4)(i).

(A) The qualified IDR items and services are billed by the same provider or group of providers, the same facility, or the same provider of air ambulance services. Items and services are billed by the same provider or group of providers, the same facility, or the same provider of air ambulance services if the items or services are billed with the same National Provider Identifier or Tax Identification Number;

(B) For further guidance, see § 54.9816–8(c)(4)(i)(B).

(C) For further guidance, see § 54.9816–8(c)(4)(i)(C).

(D) For further guidance, see § 54.9816–8(c)(4)(i)(D).

(ii) *Treatment of bundled payment arrangements.* For further guidance, see § 54.9816–8(c)(4)(ii)

(5) * * *

(i) *Submission of offers.* For further guidance, see § 54.9816–8(c)(5)(i).

(g) *Extension of time periods for extenuating circumstances.* For further guidance, see § 54.9816–8(g).

(h) *Applicability date.* For further guidance, see § 54.9816–8(h);

(i) *Severability.* For further guidance, see § 54.9816–8(i).

■ 11. Section 54.9816–9 is added to read as follows:

§ 54.9816–9 Federal Independent Dispute Resolution Registry of Group Health Plans, Health Insurance Issuers, and Federal Employees Health Benefits Carriers.

(a) *Establishment of Federal independent dispute resolution registry.* The Secretary, jointly with the Secretary of Health and Human Services and the Secretary of Labor, will establish a Federal IDR registry consisting of the information described in paragraph (b)(2) of this section and will assign a registration number for each group health plan, health insurance issuer offering group or individual health insurance coverage, and Federal

Employees Health Benefits (FEHB) Program carrier. The information contained in the registry will be made available to parties seeking to initiate an open negotiation or a dispute through the Federal IDR portal, and will be searchable, including by registration number.

(b) *Federal IDR registration*—(1) *Registration requirement.* Each group health plan subject to the Federal IDR process must register with the Federal IDR registry as specified by the Secretary in guidance. Initial registration must be completed by the later of the date that is 30 business days after the effective date of the final rule, the date that is 30 business days after the registry becomes available, or the date the group health plan begins offering a group health plan coverage subject to the Federal IDR process.

(2) *Required data elements.* Group health plans subject to the registration requirement must include the following information with their registration:

(i) The legal business name (if any) of the group health plan, and, if applicable, the legal business name of the group health plan sponsor;

(ii) Whether the plan is a self- or fully-insured group health plan subject to ERISA or a self- or fully-insured church plan;

(iii) The State(s) in which the plan is subject to a specified State law, as defined in § 54.9816–3T for any items or services for which the protections of §§ 54.9816–1T, 54.9816–4T, and 54.9816–5T apply;

(iv) The State(s) in which the plan is subject to an All-Payer Model Agreement under section 1115A of the Social Security Act for any items or services to which the protections in §§ 54.9816–1T, 54.9816–4T, and 54.9816–5T, apply;

(v) For self-insured group health plans not otherwise subject to State law, any State(s) in which the group health plan has properly effectuated an election to opt in to a specified State law as defined in § 54.9816–3T, if that State allows a plan not otherwise subject to the State law to opt-in;

(vi) Contact information, including a telephone number and email address, for the appropriate person or office with whom to initiate open negotiations for purposes of determining an amount of payment (including cost sharing) for such item or service;

(vii) The 14-digit Health Insurance Oversight System (HIOS) identifier; or if the 14-digit HIOS identifier has not been assigned, the 5-digit HIOS identifier; or if no HIOS identifier is available, the plan's or the plan sponsor's Employer Identification Number (EIN) and the

plan's plan number (PN), if a PN is available;

(viii) Additional information needed to identify the plan and the applicable Federal and State requirements for determining appropriate out-of-network payment rates for items or services to which the protections against balance billing in this part apply, as specified by the Secretary in guidance; and

(ix) Additional information needed for purposes of administrative fee collection, as specified by the Secretary in guidance.

(3) *Updating disclosures.* A plan must timely report to the Secretary changes to the information required under this section within 30 calendar days after the information changes. A plan must confirm the accuracy of its registration annually in the fourth quarter of each calendar year.

(4) *Third party authority.* The requirements of paragraphs (b)(1) through (3) of this section may be performed by a third party administrator or service provider with authority to act on behalf of the group health plan subject to the Federal IDR process. If the registration requirements are performed by such third party administrator or service provider the group health plan or health insurance issuer offering group or individual health insurance coverage must require that such third party administrator or service provider clearly delineate each group health plan or health insurance issuer offering group health insurance coverage for which it has authority to act. If such third party administrator or service provider fails to provide the information in compliance with the requirements of paragraphs (b)(1) through (3) of this section the plan or issuer will be in violation of the requirements of this section.

(c) *Severability.* (1) Any provision of this section held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, shall be construed so as to continue to give maximum effect to the provision permitted by law, unless such holding shall be one of utter invalidity or unenforceability, in which event the provision shall be severable from this section and shall not affect the remainder thereof or the application of the provision to persons not similarly situated or to dissimilar circumstances.

(2) The provisions in § 54.9816–9 are intended to be severable from the provisions in §§ 54.9816–6, 54.9816–6T, 54.9816–8, and 54.9816–8T, from any grant of forbearance from removal resulting from this subpart, and from any provision referenced in §§ 54.9816–6, 54.9816–6T, 54.9816–8, and 54.9816–8T.

DEPARTMENT OF LABOR
EMPLOYEE BENEFITS SECURITY
ADMINISTRATION

For the reasons stated in the preamble, the Department of Labor proposes to amend 29 CFR part 2590 as set forth below:

PART 2590—RULES AND REGULATIONS FOR GROUP HEALTH PLANS

■ 12. The authority citation for part 2590 continues to read as follows:

Authority: 29 U.S.C. 1027, 1059, 1135, 1161–1168, 1169, 1181–1183, 1181 note, 1185, 1185a, 1185b, 1191, 1191a, 1191b, and 1191c; sec. 101(g), Pub. L. 104–191, 110 Stat. 1936; sec. 401(b), Pub. L. 105–200, 112 Stat. 645 (42 U.S.C. 651 note); sec. 512(d), Pub. L. 110–343, 122 Stat. 3881; sec. 1001, 1201, and 1562(e), Pub. L. 111–148, 124 Stat. 119, as amended by Pub. L. 111–152, 124 Stat. 1029; Division M, Pub. L. 113–235, 128 Stat. 2130; Secretary of Labor’s Order 1–2011, 77 FR 1088 (Jan. 9, 2012).

Subpart D—Surprise Billing and Transparency Requirements

■ 13. Section 2590.716–3 is amended by adding the definition of “Bundled payment arrangement” in alphabetical order to read as follows:

§ 2590.716–3 Definitions.

* * * * *

Bundled payment arrangement means an arrangement under which—

(1) A provider, facility, or provider of air ambulance services bills for multiple items or services furnished to a single patient under a single service code that represents multiple items or services (for example, a Diagnosis-Related Group (DRG) code); or

(2) A plan or issuer makes an initial payment or notice of denial of payment to a provider, facility, or provider of air ambulance services under a single service code that represents multiple items or services furnished to a single patient (for example, a DRG code).

* * * * *

■ 14. Section 2590.716–6 is amended by:

- a. Revising paragraphs (d) introductory text and (d)(1)(iv);
- b. Redesignating paragraph (d)(1)(v) as paragraph (d)(1)(vi);
- c. Adding a new paragraph (d)(1)(v);
- d. Revising paragraph (d)(2) introductory text; and
- e. Adding paragraph (g).

The revisions and additions read as follows:

§ 2590.716–6 Methodology for calculating qualifying payment amount.

* * * * *

(d) *Information to be shared about the qualifying payment amount.* In cases in which the recognized amount, with respect to an item or service furnished by a nonparticipating provider or nonparticipating emergency facility, is the qualifying payment amount or the amount billed by the provider or facility, or if the amount on which cost sharing is based with respect to air ambulance services furnished by a nonparticipating provider of air ambulance services is the qualifying payment amount or the amount billed by the provider of air ambulance services, the plan or issuer must provide to the provider, facility, or provider of air ambulance services, as applicable, in writing, in paper or electronic form—

(1) * * *

(iv) A statement that—

(A) If the provider, facility, or provider of air ambulance services, as applicable, wishes to initiate a 30-business-day open negotiation period for purposes of determining the out-of-network rate, the provider, facility, or provider of air ambulance services must:

(1) Contact the appropriate person or office to initiate open negotiation within 30 business days of receiving the initial payment or notice of denial of payment, and

(2) For disclosures required to be provided on or after [DATE 90 DAYS AFTER PUBLICATION OF FINAL REGULATIONS IN THE **FEDERAL REGISTER**] and once the open negotiation notice can be submitted through the Federal IDR portal, notify the Secretary as described under § 2590.716–8(b)(1)(i); and

(B) If the 30-business-day open negotiation period does not result in an agreement on the amount of payment the provider, facility, or provider of air ambulance services may generally initiate the Federal IDR process within 4 business days after the end of the open negotiation period;

(v) For disclosures required to be provided on or after [date 90 days after publication of final regulations in the **Federal Register**], the legal business name of the group health plan (if any) or issuer, the legal business name of the plan sponsor (if applicable), and the registration number assigned under § 2590.716–9, if the plan or issuer is registered under § 2590.716–9.

(2) In a timely manner upon the request of the provider, facility, or provider of air ambulance services:

* * * * *

(g) *Severability.* (1) Any provision of this section held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, shall be

construed so as to continue to give maximum effect to the provision permitted by law, unless such holding shall be one of utter invalidity or unenforceability, in which event the provision shall be severable from this section and shall not affect the remainder thereof or the application of the provision to persons not similarly situated or to dissimilar circumstances.

(2) The provisions in § 2590.716–6 are intended to be severable from the provisions in §§ 2590.716–6A, 2590.716–8, and 2590.716–9, from any grant of forbearance from removal resulting from this subpart, and from any provision referenced in §§ 2590.716–6A, 2590.716–8, and 2590.716–9.

■ 15. Section 2590.716–6A is added to subpart D to read as follows:

§ 2590.716–6A Use of Claim Adjustment Reason Codes and Remittance Advice Remark Codes.

(a) *In general.* When providing any paper or electronic remittance advice to an entity that does not have a contractual relationship directly or indirectly with a group health plan or a health insurance issuer offering group or individual health insurance coverage with respect to the furnishing of the item or service under the plan or coverage in response to a claim for payment for health care items and services furnished by that entity, the plan or issuer must use claim adjustment reason codes (CARCs) and remittance advice remark codes (RARCs) (see 45 CFR 162.1602 and 162.1603) as specified in guidance issued by the Secretaries of the Treasury, Labor, and Health and Human Services, or as required under any applicable adopted standards and operating rules under 45 CFR part 162, to communicate information related to whether the claim is or is not subject to the provisions of this subpart and 45 CFR part 149, subpart E.

(b) *Severability.* (1) Any provision of this section held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, shall be construed so as to continue to give maximum effect to the provision permitted by law, unless such holding shall be one of utter invalidity or unenforceability, in which event the provision shall be severable from this section and shall not affect the remainder thereof or the application of the provision to persons not similarly situated or to dissimilar circumstances.

(2) The provisions in § 2590.716–6A are intended to be severable from the provisions in §§ 2590.716–6, 2590.716–8, and 2590.716–9, from any grant of

forbearance from removal resulting from this subpart, and from any provision referenced in §§ 2590.716–6, 2590.716–8, and 2590.716–9.

■ 16. Section 2590.716–8 is amended by:

- a. Revising paragraphs (a)(2)(i), (b)(1)(i), and (b)(1)(ii)(A);
- b. Removing and reserving paragraph (b)(1)(ii)(B);
- c. Adding paragraph (b)(1)(iii);
- d. Revising paragraph (b)(2)(i);
- e. Redesignating paragraph (b)(2)(ii) as (b)(2)(i)(A);
- f. Adding and reserving paragraph (b)(2)(i)(B);
- g. Redesignating paragraph (b)(2)(iii) as (b)(2)(ii);
- h. Revising newly redesignated paragraph (b)(2)(ii)(A);
- i. Reserving newly redesignated paragraph (b)(2)(ii)(B);
- j. Removing newly redesignated paragraph (b)(2)(ii)(C);
- k. Adding paragraphs (b)(2)(iii) and (b)(3);
- l. Revising paragraph (c)(1);
- m. Redesignating paragraphs (c)(2) through (4) as paragraphs (c)(3) through (5), respectively;
- n. Adding a new paragraph (c)(2);
- o. Revising newly redesignated paragraphs (c)(3), (c)(4)(i) introductory text, (c)(4)(i)(B) through (D), (c)(4)(ii), (c)(5)(i) introductory text, (c)(5)(ii) introductory text,
- p. Adding paragraphs (c)(5)(ii)(A)(1) and (2) and removing the reference to “(c)(4)” and adding in its place “(c)(5)” in newly redesignated paragraphs (c)(5)(ii)(A) introductory text and (B);;
- q. Revising paragraphs (c)(5)(vii)(B) and (C);;
- r. Revising paragraphs (d), (e)(2)(vi), (viii), and (ix), (g) and (h);
- s. Adding paragraph (i).

The revisions and additions read as follows:

§ 2590.716–8 Independent dispute resolution process.

- (a) * * *
- (2) * * *

(i) *Batched qualified IDR items and services* means multiple qualified IDR items or services that are considered jointly as part of one payment determination by a certified IDR entity for purposes of the Federal IDR process in accordance with paragraph (c)(4) of this section.

* * * * *

- (b) * * *
- (1) * * *

(i) *In general.* With respect to an item or service that meets the requirements of paragraph (a)(2)(xi)(A) of this section, the provider, facility, or provider of air ambulance services, or the group health

plan or health insurance issuer offering group or individual health insurance coverage may, during the 30-business-day period beginning on the day the provider, facility, or provider of air ambulance services receives an initial payment or notice of denial of payment regarding the item or service, initiate an open negotiation period for purposes of determining the out-of-network rate for such item or service. To initiate the open negotiation period, a party must submit a written open negotiation notice with the content specified in paragraph (b)(1)(ii) of this section to the other party and to the Secretary in the manner specified in paragraph (b)(3) of this section. The 30-business-day open negotiation period begins on the day on which the party first submits the open negotiation notice and the remittance advice documentation specified in paragraph (b)(1)(ii)(A)(12) of this section to the other party and the Secretary. The party in receipt of the open negotiation notice must provide to the other party and to the Secretary in the manner specified in paragraph (b)(3) of this section as soon as practicable, but no later than the 15th business day of the 30-business-day open negotiation period, a written notice and supporting documentation in response to the open negotiation notice, as specified in paragraph (b)(1)(iii)(A) of this section.

(ii) * * *

(A) *Content.* The open negotiation notice must include, with respect to the item or service that is the subject of the open negotiation notice, information about the item or service and the parties including:

(1) Information sufficient to identify the provider, facility, or provider of air ambulance services, including the name and current contact information (including the legal business name, email address, phone number, and mailing address) as provided with the claim form submitted by the provider, facility, or air ambulance provider to the plan or issuer, and the National Provider Identifier (NPI);

(2) Information sufficient to identify the plan or issuer, including the plan’s or issuer’s registration number, as required under § 2590.716–9, if the plan or issuer is registered under § 2590.716–9, or an attestation from the party submitting the open negotiation notice that the plan or issuer was not registered prior to the date it submitted the notice; the legal business name of the plan or issuer, as well as the current contact information (name, email address, phone number, and mailing address) of the plan or issuer as provided with the initial payment or notice of denial of payment; and if the party submitting the

open negotiation notice is a plan or issuer, the plan type (for example, self-insured or fully-insured);

(3) The name and contact information (including the legal business name, email address, phone number, and mailing address) for any third party representing the party submitting the open negotiation notice, and an attestation that the third party has the authority to act on behalf of the party it represents in the open negotiation;

(4) Information sufficient to identify the item or service, including: the date(s) the item or service was furnished and, if the party submitting the open negotiation notice is a provider, facility, or provider of air ambulance services, the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for the item or service from the plan or issuer; the type of item or service (specifically, whether the item or service is an emergency service as defined in § 2590.716–4(c)(2)(i) or (ii), a non-emergency service as described in § 2590.716–5(b), or an air ambulance service as defined in § 2590.716–3); whether the service is a professional service or facility-based service; the State where the item or service was furnished; the claim number; the service code; and information to identify the location where the item or service was furnished (such as, place of service code or bill type code);

(5) The initial payment amount (including \$0 if, for example, payment is denied);

(6) The qualifying payment amount, if provided with the initial payment or notice of denial of payment or if the party submitting the open negotiation notice is a plan or issuer;

(7) An offer of an out-of-network rate for each item or service;

(8) If the party submitting the open negotiation notice is a plan or issuer, the amount of cost sharing imposed for the item or service, if any;

(9) If the party submitting the open negotiation notice is a provider or facility, a statement that the items and services do not qualify for the notice and consent exception described at 45 CFR 149.410(b) or 149.420(c) through (i);

(10) A statement that the provider, facility, or provider of air ambulance services was a nonparticipating provider, nonparticipating emergency facility, or nonparticipating provider of air ambulance services on the date the item or service was furnished;

(11) General information listed in the standard open negotiation notice developed by the Secretary pursuant to

paragraph (b)(3) of this section describing the open negotiation period and the Federal IDR process (including a description of the purpose of the open negotiation period and Federal IDR process and key deadlines in the open negotiation period and Federal IDR process); and

(12) A copy of the initial payment or notice of denial of payment or other remittance advice that is required to include the disclosures under § 2590.716–6(d)(1), with respect to the item or service.

(B) [Reserved]

(iii) *Open negotiation response notice.*

(A) *Content.* The response to the open negotiation notice must include, with respect to the item or service that is the subject of the open negotiation response notice, information about the item or service and the parties including:

(1) Information sufficient to identify the provider, facility, or provider of air ambulance services, including the name and current contact information (including the legal business name, email address, phone number, and mailing address) as provided with the claim form submitted by the provider, facility, or provider of air ambulance services to the plan or issuer, and the NPI;

(2) Information sufficient to identify the plan or issuer, including the plan's or issuer's registration number, as required under § 2590.716–9 if the plan or issuer is registered under § 2590.716–9, or an attestation from the party submitting the open negotiation response notice that the plan or issuer was not registered prior to the date it submitted the notice; the legal business name of the plan or issuer, as well as the current contact information (name, email address, phone number, and mailing address) of the plan or issuer as provided with the initial payment or notice of denial of payment; and if the party submitting the open negotiation response notice is a plan or issuer, the plan type (for example, self-insured or fully-insured);

(3) The name and contact information (including the legal business name, email address, phone number, and mailing address) for any third party representing the party submitting the open negotiation response notice, and an attestation that the third party has the authority to act on behalf of the party it represents in the open negotiation;

(4) Information sufficient to identify the item or service included in the open negotiation notice, including the date(s) the item or service was furnished, and if the party submitting the open negotiation response notice is a

provider, facility, or provider of air ambulance services, the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for such item or service from the plan or issuer, and the claim number;

(5) If the party submitting the open negotiation response notice is a plan or issuer, a statement as to whether it agrees that the initial payment amount (including \$0 if, for example, payment is denied) and the qualifying payment amount reflected in the open negotiation notice accurately reflects the initial payment amount and qualifying payment amount disclosed with the initial payment for the item or service, and if not, or if the open negotiation notice indicates that qualifying payment amount was not communicated by the plan or issuer with the initial payment or notice of denial of payment or other remittance advice, the initial payment amount (including \$0 if, for example, payment is denied) and/or qualifying payment amount it believes to be correct, and documentation to support the statement (for example, the remittance advice confirming the qualifying payment amount);

(6) If the party submitting the open negotiation response notice is a plan or issuer, the amount of cost sharing imposed for the item or service, if any;

(7) A counteroffer for an out-of-network rate for each item or service or an acceptance of the other party's offer;

(8) If the party submitting the open negotiation response notice is a provider or facility, a statement that the items and services do not qualify for the notice and consent exception described at 45 CFR 149.410(b) or 149.420(c) through (i);

(9) With respect to each item or service, either a statement and supporting documentation that explains why the item or service is not subject to the Federal IDR process or a statement agreeing that the item or service is subject to the Federal IDR process;

(10) A statement as to whether any of the information provided in the open negotiation notice is inaccurate and the basis for the statement, as well as supporting documentation; and

(11) A statement confirming that the initial payment or notice of denial of payment or other remittance advice provided by the party submitting the open negotiation notice under paragraph (b)(1)(ii)(A)(12) of this section is accurate, and if inaccurate, a copy of the accurate initial payment, or notice of denial of payment, or other remittance advice required to include the disclosures under § 2590.716–6(d)(1), with respect to the item or service.

(B) [Reserved]

(2) * * *

(i) *In general.* Either party may initiate the Federal IDR process with respect to a qualified IDR item or service for which the parties do not agree upon an out-of-network rate by the last day of the open negotiation period provided for under paragraph (b)(1) of this section. To initiate the Federal IDR process, a party (the initiating party) must submit a written notice of IDR initiation, consistent with paragraph (b)(2)(ii) of this section, to the other party to the dispute (the non-initiating party), and to the Secretary in the manner specified in paragraph (b)(3) of this section, during the 4-business-day period beginning on the first business day after the last day of the open negotiation period (unless it is otherwise required to be submitted in the timeframe specified in paragraph (c)(5)(vii)(C) of this section). The date of IDR initiation is the date that the Secretary receives the notice of IDR initiation described in paragraph (b)(2)(ii) of this section.

* * * * *

(B) [Reserved]

(ii) * * *

(A) *Content.* The notice of IDR initiation must include, with respect to the item or service that is the subject of the notice, information about the item or service and the parties including:

(1) Information sufficient to identify the provider, facility, or provider of air ambulance services, including the name and current contact information (including the legal business name, email address, phone number, and mailing address), and the NPI; and if the initiating party is a provider, facility, or provider of air ambulance services, the Tax Identification Number (TIN);

(2) Information sufficient to identify the plan or issuer, including the plan's or issuer's registration number, as required under § 2590.716–9 if the plan or issuer is registered under § 2590.716–9, or an attestation from the initiating party that the plan or issuer was not registered prior to the date that it submitted the notice; the legal business name of the plan or issuer, as well as the current contact information (name, email address, phone number, and mailing address) of the plan or issuer as provided with the initial payment or notice of denial of payment; and if the initiating party is a plan or issuer, the plan type (for example, self-insured or fully-insured) and TIN (or, in the case of a plan that does not have a TIN, the TIN of the plan sponsor);

(3) The name and contact information (including the legal business name, email address, phone number, and

mailing address) for any third party representing the initiating party, and an attestation that the third party has the authority to act on behalf of the party it represents in the Federal IDR process;

(4) Information sufficient to identify whether the dispute being initiated includes batched or bundled qualified IDR items or services as described in paragraph (c)(4) of this section;

(5) Information sufficient to identify the qualified IDR item or service that is the subject of the notice of IDR initiation, including the date(s) the qualified IDR item or service was furnished; if the initiating party is a provider, facility, or provider of air ambulance services, the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for such item or service from the plan or issuer; the date the open negotiation period under paragraph (b)(1) of this section began; the type of item or service (specifically, whether the qualified IDR item or service is an emergency service as defined in § 2590.716–4(c)(2)(i) or (ii), a non-emergency service as described in § 2590.716–5(b), or an air ambulance service as defined in § 2590.716–3); whether the service is a professional service or facility-based service; the State where the item or service was furnished; the claim number; the service code; and information to identify the location the item or service was furnished (including place of service code or bill type code);

(6) The initial payment amount (including \$0 if, for example, payment is denied);

(7) The qualifying payment amount, if provided with the initial payment or notice of denial of payment or if the initiating party is a plan or issuer;

(8) If the initiating party is a provider or facility, a statement that the items and services do not qualify for the notice and consent exception described at 45 CFR 149.410(b) or 149.420(c) through (i);

(9) A statement that the provider, facility, or provider of air ambulance services was a nonparticipating provider, nonparticipating emergency facility, or nonparticipating provider of air ambulance services on the date the item or service was furnished;

(10) Attestation that the item or service under dispute is a qualified IDR item or service, and the basis for the attestation;

(11) General information listed in the standard notice of IDR initiation developed by the Secretary pursuant to paragraph (b)(3) of this section describing the Federal IDR process

(including a description of the purpose of the Federal IDR process and key deadlines in the Federal IDR process);

(12) A copy of the initial payment or notice of denial of payment or other remittance advice that is required to include the disclosures under § 2590.716–6(d)(1), with respect to the item or service;

(13) Preferred certified IDR entity; and

(14) A statement describing the key aspects of the claim, such as patient acuity or level of training of the provider, facility, or provider of air ambulance services that furnished the qualified IDR item or service, discussed by the parties during open negotiation that relate to the payment for the disputed claim, whether the reasons for initiating the Federal IDR process are different from the aspects of the claim discussed during the open negotiation period, and an explanation of why the party is initiating the Federal IDR process, including any of the permissible considerations described in §§ 2590.716–8(c)(5)(iii) and 2590.717–2(b)(2) that serve as the party's basis for initiating the Federal IDR process.

(B) [Reserved]

(iii) *Notice of IDR initiation response.* The non-initiating party must provide to the initiating party and to the Secretary in the manner specified in paragraph (b)(3) of this section within 3 business days after the date of IDR initiation, a written notice and supporting documentation in response to the notice of IDR initiation, as specified in paragraph (b)(2)(iii)(A) of this section.

(A) *Content.* The notice of IDR initiation response must include, with respect to the item or service that is the subject of the notice, information about the item or service and the parties including:

(1) Information sufficient to identify the provider, facility, or provider of air ambulance services, including the name and current contact information (including the legal business name, email address, phone number, and mailing address), and the NPI; and if the non-initiating party is a provider, facility, or provider of air ambulance services, the TIN;

(2) Information sufficient to identify the plan or issuer, including the plan's or issuer's registration number, as required under § 2590.716–9 if the plan or issuer is registered under § 2590.716–9 or an attestation from the non-initiating party that the plan or issuer was not registered prior to the date that it submitted the notice; the legal business name of the plan or issuer, as well as the current contact information (name, email address, phone number, and mailing address) of the plan or

issuer as provided with the initial payment or notice of denial of payment; and if the non-initiating party is a plan or issuer, the plan type (for example, self-insured or fully-insured) and TIN (or, in the case of a plan that does not have a TIN, the TIN of the plan sponsor);

(3) The name and contact information (including the legal business name, email address, phone number, and mailing address) for any third party representing the non-initiating party, and an attestation that the third party has the authority to act on behalf of the party it represents in the Federal IDR process;

(4) Information sufficient to identify each item or service included in the notice of IDR initiation, including the date(s) the item or service was furnished. If the non-initiating party is a provider, facility, or provider of air ambulance services, the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for such item or service from the plan or issuer, and the claim number;

(5) If the non-initiating party is a plan or issuer, a statement as to whether the non-initiating party agrees that the initial payment (including \$0 if, for example, payment is denied) and the qualifying payment amount reflected in the notice of IDR initiation is accurate for the item or service that is the subject of the dispute, and if not, the initial payment amount (including \$0 if, for example, payment is denied) and/or qualifying payment amount it believes to be correct, and documentation to support the statement (for example, the remittance advice confirming the qualifying payment amount);

(6) If the non-initiating party is a plan or issuer, the amount of cost sharing imposed for the item or service, if any;

(7) If the non-initiating party is a provider or facility, a statement that the items and services do not qualify for the notice and consent exception described at 45 CFR 149.410(b) or 149.420(c) through (i);

(8) With respect to each item or service that is the subject of the dispute, either an attestation that the item or service is a qualified IDR item or service, or for each item or service that the non-initiating party asserts is not a qualified IDR item or service, an explanation and documentation to support the statement;

(9) A statement confirming that the initial payment or notice of denial of payment or other remittance advice provided by the initiating party under paragraph (b)(2)(ii)(A)(12) of this section is accurate, and if inaccurate, a copy of

the accurate initial payment or notice of denial of payment or other remittance advice required to include the disclosures under § 2590.716–6(d)(1), with respect to the item or service;

(10) A statement as to whether any of the information provided in the notice of IDR initiation is inaccurate and the basis for the statement as well as any supporting documentation; and

(11) A statement as to whether the non-initiating party agrees or objects to the initiating party's preferred certified IDR entity. If the non-initiating party objects to the initiating party's preferred certified IDR entity, the notice of IDR initiation response must include the name of an alternative preferred certified IDR entity and, if applicable, an explanation of any conflict of interest with the initiating party's preferred certified IDR entity.

(B) [Reserved].

(3) *Manner.* A party furnishing notices as required under paragraphs (b)(1)(ii) and (iii), and (b)(2)(ii) and (iii) of this section must furnish the notices using the standard forms developed by the Secretary and must furnish the notices and supporting documentation to the other party and the Secretary, through the Federal IDR portal.

(c) * * *

(1) *Selection of certified IDR entity—*
(i) *Preliminary selection of the certified IDR entity.* Within 3 business days after the date of IDR initiation, the non-initiating party must agree or object to the preferred certified IDR entity identified in the notice of IDR initiation, as described in paragraph

(b)(2)(iii)(A)(11) of this section.

(A) If the non-initiating party agrees, or fails to object, to the selection of the initiating party's preferred certified IDR entity in the manner described in paragraph (b)(2)(iii)(A)(11) of this section and within the timeframe specified in paragraph (c)(1)(i) of this section, the initiating party's preferred certified IDR entity will be considered jointly selected on the third business day after the date of IDR initiation.

(B) If the non-initiating party objects to the selection of the initiating party's preferred certified IDR entity by designating an alternative preferred certified IDR entity in the manner described in paragraph (b)(2)(iii)(A)(11) of this section and within the timeframe specified in paragraph (c)(1)(i) of this section, the initiating party may then agree or object to the non-initiating party's alternative preferred certified IDR entity by submitting the notice of certified IDR entity selection in the manner specified in paragraph (c)(1)(i)(D) of this section. If the initiating party agrees to the non-

initiating party's alternative preferred certified IDR entity within 3 business days after the date of IDR initiation, or if the non-initiating party submits the notice of IDR initiation response on or before the second business day after the date of IDR initiation and the initiating party fails to respond within 3 business days after the date of IDR initiation, the alternative preferred certified IDR entity will be considered jointly selected by the parties. If the non-initiating party submits the notice of IDR initiation response on the third business day after the date of IDR initiation and the initiating party does not agree on the same day, selection will proceed under paragraph (c)(1)(i)(C) of this section.

(C) If a certified IDR entity is not jointly selected under paragraph (c)(1)(i)(A) or (B) of this section, either party may select an alternative preferred certified IDR entity by submitting the notice of certified IDR entity selection in the manner specified in paragraph (c)(1)(i)(D) of this section, until the earlier of the date that the parties agree on the alternative preferred certified IDR entity or the deadline for joint selection, which is 3 business days after the date of IDR initiation. Once a party submits a notice of certified IDR entity selection, it may not submit another notice of certified IDR entity selection until after it receives a responding notice of certified IDR entity selection from the other party.

(1) If a party submits a notice of certified IDR entity selection to the other party on the first or second day after the date of IDR initiation and the party in receipt of the notice agrees or fails to object to the alternative preferred certified IDR entity by the third business day after the date of IDR initiation, the alternative preferred certified IDR entity will be considered jointly selected by the parties.

(2) If a party submits a notice of certified IDR entity selection to the other party on the third business day after the date of IDR initiation and the party last in receipt of the notice agrees to the alternative preferred certified IDR entity on the same day, the alternative preferred certified IDR entity will be considered jointly selected by the parties.

(3) If a party submits a notice of certified IDR entity selection to the other party on the third business day after the date of IDR initiation and the party last in receipt of the notice does not agree to the alternative preferred certified IDR entity on the same day, the parties will have failed to jointly select a certified IDR entity.

(D) To notify the other party and the Secretary of an agreement or objection

to an alternative preferred certified IDR entity under paragraph (c)(1)(i)(C) of this section, a party must submit the notice of certified IDR entity selection. The party must furnish the notice of certified IDR entity selection using the standard form developed by the Secretary and must furnish the notice to the other party and the Secretary through the Federal IDR portal within 3 business days after the date of IDR initiation. However, in the event the conditions under paragraph (c)(1)(ii) of this section apply, the party may notify the Secretary of an agreement or objection to an alternative preferred certified IDR entity in accordance with paragraph (c)(1)(ii) of this section. The notice of certified IDR entity selection must include a statement indicating the party's agreement with or objection to the other party's alternative preferred certified IDR entity and, if applicable, an explanation of any conflict of interest with the alternative preferred certified IDR entity. If the party in receipt of a notice of certified IDR entity selection objects to the other party's alternative preferred certified IDR entity and the party submits a notice of certified IDR entity selection by the end of the third business day after the date of IDR initiation, that party's notice of certified IDR entity selection reflecting the objection must include the name of another alternative preferred certified IDR entity.

(ii) *Failure to jointly select a certified IDR entity.* If the parties fail to jointly select a certified IDR entity within 3 business days after the date of IDR initiation, the Secretary will select a certified IDR entity. The parties will have failed to jointly select a certified IDR entity if, by the end of the third business day after the date of IDR initiation, the party last in receipt of the notice of IDR initiation response or the notice of certified IDR entity selection has objected to the other party's alternative preferred certified IDR entity, or if the notice of IDR initiation response or the notice of certified IDR entity selection is submitted to the other party on the third business day after the date of IDR initiation and the party in receipt of the notice does not agree to the alternative preferred certified IDR entity within 3 business days after the date of IDR initiation.

(A) In selecting the certified IDR entity, the Secretary will first confirm whether a party submitted the notice of IDR initiation response or the notice of certified IDR entity selection with an alternative preferred certified IDR entity on the third business day after the date of IDR initiation without the other party's agreement to the selection. If

either notice was provided on the third business day after the date of IDR initiation without the other party's agreement to the alternative preferred certified IDR entity by the end of third business day after the date of IDR initiation, the Secretary will provide the party last in receipt of the applicable notice 2 additional business days to agree or object to the other party's alternative preferred certified IDR entity selection.

(1) If the party last in receipt of the notice of IDR initiation response or the notice of certified IDR entity selection agrees with the other party's alternative preferred certified IDR entity and notifies the Secretary of the agreement or fails to notify the Secretary of its objection in the Federal IDR portal by the fifth business day after the date of IDR initiation, the Secretary will select the final alternative preferred certified IDR entity selected in the applicable notice. In disputes where the applicable notice was submitted on the third business day after the date of IDR initiation, the party last in receipt of the notice will not be allowed to select another alternative preferred certified IDR entity.

(2) If the party notifies the Secretary of its objection to the alternative preferred certified IDR entity by the fifth business day after the date of IDR initiation, the Secretary will proceed with the random selection of the certified IDR entity from among the certified IDR entities (other than the preferred certified IDR entity and any alternative preferred certified IDR entity previously selected in such dispute by a party, unless there is no other certified IDR entity available to select) that charge a fee within the allowed range of certified IDR entity fees on the sixth business day after the date of IDR initiation. If there are insufficient certified IDR entities that charge a fee within the allowed range of certified IDR entity fees available to arbitrate the dispute, the Secretary will select a certified IDR entity that has received approval, as described in paragraph (e)(2)(vii)(B) of this section, to charge a fee outside of the allowed range of certified IDR entity fees. In either case, the Secretary will notify the parties of the preliminary selection of the certified IDR entity not later than 6 business days after the date of IDR initiation.

(B) [Reserved].

(iii) *Date of preliminary selection of the certified IDR entity.* The date of preliminary selection of the certified IDR entity will be:

(A) Three business days after the date of IDR initiation if the parties jointly selected a certified IDR entity, as

specified in paragraph (c)(1)(i) of this section; or

(B) Six business days after the date of IDR initiation, if the parties fail to jointly select a certified IDR entity as specified in paragraph (c)(1)(ii) of this section.

(iv) *Final selection of the certified IDR entity—(A) Conflict-of-interest review.* The certified IDR entity preliminarily selected for a dispute must review the selection. The selection of the certified IDR entity will be finalized only if the certified IDR entity attests to the Secretary that it meets the following requirements:

(1) The certified IDR entity does not have a conflict of interest as defined in paragraph (a)(2)(iv) of this section;

(2) The certified IDR entity will only assign personnel to a dispute and make decisions regarding hiring, compensation, termination, promotion, or other similar matters related to personnel assigned to the dispute in a manner that is not based upon the likelihood that the assigned personnel will support a particular party to the dispute; and

(3) The certified IDR entity will not assign any personnel to a dispute who would have any conflicts of interest, as defined in paragraph (a)(2)(iv) of this section, regarding any party to the dispute or whose relationship with a party within the 1 year immediately preceding the assignment to the dispute would violate the restrictions on aiding or advising a former employer or principal in a manner similar to the restrictions set forth in 18 U.S.C. 207(b).

(B) *Failure to meet conflict-of-interest requirements.* If the certified IDR entity notifies the Secretary within 3 business days of the date of preliminary selection of the certified IDR entity that it does not meet the requirements of paragraphs (c)(1)(iv)(A)(1) through (3) of this section or if the certified IDR entity does not respond within 3 business days after the date of preliminary selection of the certified IDR entity, the Secretary will randomly select another certified IDR entity consistent with paragraph (c)(1)(ii) of this section. The Secretary will notify the parties of the new randomly preliminarily selected certified IDR entity no later than 1 business day after the previously selected certified IDR entity notifies the Secretary that it has a conflict of interest or, if the previously selected certified IDR entity fails to respond within 3 business days after the date of preliminary selection of the certified IDR entity, no later than 1 business day after the end of the 3-business-day period.

(C) *Date of final selection of the certified IDR entity.* If the certified IDR entity that has been preliminarily selected attests within 3 business days that it meets the requirements of paragraphs (c)(1)(iv)(A)(1) through (3) of this section, the Secretary will notify the parties of final selection of the certified IDR entity no later than 1 business day after the certified IDR entity attests that it meets the conflict-of-interest requirements. The date of final selection of the certified IDR entity is the date that the Secretary provides this notice to the parties.

(2) *Federal IDR process eligibility review—(i) Federal IDR process eligibility determination by certified IDR entity.* Unless the departmental eligibility review described in paragraph (c)(2)(ii) of this section applies, the selected certified IDR entity must review the information in the notice of IDR initiation, notice of IDR initiation response, and any additional information described in paragraph (c)(2)(iii) of this section, and make a final determination as to whether the item or service is a qualified IDR item or service, as defined in paragraph (a)(2)(xi) of this section, that is eligible for the Federal IDR process. The certified IDR entity must make such a determination and notify the Secretary and both parties no later than 5 business days after the date of final selection of the certified IDR entity. If the certified IDR entity determines that the item or service is not a qualified IDR item or service, the dispute will be closed, and the selected certified IDR entity will not take any action with regard to the dispute.

(ii) *Departmental eligibility review for Federal IDR process eligibility determinations.* When the conditions for the departmental eligibility review set forth in paragraph (c)(2)(ii)(A) of this section are met, the Secretary will conduct the eligibility review and make the eligibility determination instead of the certified IDR entity. If the Secretary determines that the item or service is not a qualified IDR item or service, the dispute will be closed, and the selected certified IDR entity will not take any action with regard to the dispute. If the dispute is found to be eligible, the Secretary will inform the preliminarily selected certified IDR entity of the dispute's eligibility so that it may conduct its conflict-of-interest assessment, and the dispute will otherwise continue through the Federal IDR process, including notification of the eligibility determination to the disputing parties by the preliminarily selected certified IDR entity.

(A) *Application of the departmental eligibility review.* The departmental eligibility review will apply when the Secretary determines that any of the extenuating circumstances described in paragraph (g)(1) of this section require application of the departmental eligibility review to facilitate timely payment determinations or the effective processing of disputes under the Federal IDR process.

(B) *Notification regarding applicability of the departmental eligibility review.* Before invoking the application of the departmental eligibility review, the Secretary will post advance public notification of the date on which the departmental eligibility review will take effect and the reasons for invoking the application of the departmental eligibility review. Before ending the application of the departmental eligibility review, the Secretary will post advance public notification of the date on which the departmental eligibility review will no longer be in effect and the reasons for ending the application of the departmental eligibility review.

(iii) *Request for additional information.* The Secretary or the selected certified IDR entity may request additional information from either party to a dispute at any time, including for the purpose of assessing whether a conflict of interest exists, conducting an eligibility determination, or making a payment determination.

(A) Upon request, a party must submit the additional information within 5 business days to the Secretary or the selected certified IDR entity, as applicable, through the Federal IDR portal. Following a request for additional information, the time period for the applicable stage of the Federal IDR process will be tolled until the earlier of the date either all of the requested information is provided or the 5-business-day period expires, and each subsequent timeframe in the Federal IDR process will be determined based on the date of completion of the stage of the Federal IDR process that was tolled for provision of the requested information.

(B) If a party fails to submit the additional information as required, the related determination, including the eligibility determination, conflict-of-interest review, or payment determination will be made without the requested information unless a good-cause extension of the 5-business-day period, as specified in paragraph (g)(1)(i) of this section, has been provided, and the party subsequently submits the additional information requested within the extended period.

(3) *Authority to continue negotiations or withdraw—(i) Authority to continue to negotiate.* If the parties to the Federal IDR process agree on an out-of-network rate for a qualified IDR item or service after providing the notice of IDR initiation to the Secretary required under paragraph (b)(2)(ii) of this section, but before the certified IDR entity has made its payment determination, the amount agreed to by the parties for the qualified IDR item or service will be treated as the out-of-network rate for the qualified IDR item or service. To the extent the amount exceeds the initial payment amount and any cost sharing paid or required to be paid by the participant or beneficiary, or there was an initial denial of payment, payment must be made directly by the plan or issuer to the nonparticipating provider, nonparticipating facility, or nonparticipating provider of air ambulance services not later than 30 business days after the agreement is reached. In no instance may either party seek additional payment from the participant or beneficiary, including in instances in which the out-of-network rate exceeds the qualifying payment amount. The initiating party must send a notification to the Secretary and to the certified IDR entity (if selected) electronically, through the Federal IDR portal, as soon as possible, but no later than 3 business days after the date of the agreement. The notification must include the dispute number, a statement of the out-of-network rate for the qualified IDR item or service, and signatures from authorized signatories for both parties.

(ii) *Withdrawals.* A dispute may be withdrawn from the Federal IDR process by the initiating party, the Secretary, or a certified IDR entity before a payment determination is made if one of the following conditions is met:

(A) The initiating party provides notification through the Federal IDR portal to the Secretary and the certified IDR entity (if selected) that both parties to the dispute agree to withdraw the dispute from the Federal IDR process without agreement on an out-of-network rate. The notification must include the dispute number, a statement about both parties' agreement to withdraw and signatures from authorized signatories for both parties.

(B) The initiating party provides a standard withdrawal request notice through the Federal IDR portal to the Secretary, the certified IDR entity (if selected), and the non-initiating party of its request to withdraw the dispute from the Federal IDR process and the non-initiating party notifies the Secretary, certified IDR entity (if selected), and the

initiating party through the Federal IDR portal of its agreement to withdraw from the Federal IDR process within 5 business days of the initiating party's request. If the non-initiating party fails to respond within 5 business days of the initiating party's request, the non-initiating party will be considered to have agreed to the withdrawal, and the dispute will be withdrawn.

(C) The certified IDR entity or Secretary cannot determine eligibility because both parties to the dispute are unresponsive to any requests for additional information to determine eligibility as described in paragraph (c)(2)(iii) of this section, or

(D) The certified IDR entity cannot make a payment determination because both parties to the dispute have failed to submit an offer as described in paragraph (c)(5)(i) of this section.

(4) *Treatment of batched qualified IDR items and services—(i) In general.* A certified IDR entity may consider up to 25 qualified IDR items and services jointly as part of one payment determination that is subject to the certified IDR entity fee for batched determinations only if the qualified IDR items and services meet the requirements of this paragraph (c)(4)(i):

* * * * *

(B) Payment for the qualified IDR items and services is required to be made by the same group health plan or health insurance issuer. For group or individual health insurance coverage, this requirement is satisfied if the same issuer is required to make payment for the qualified IDR items and services, even if the qualified IDR items and services relate to claims from different group health plans or individual market policies. For self-insured group health plans, this requirement is satisfied if the same self-insured group health plan is required to make payment for the qualified IDR items and services, including when the plan makes payments through a third party administrator; the requirement is not satisfied if multiple self-insured group health plans are required to make payments for the qualified IDR items and services, even if those group health plans make payments through the same third party administrator;

(C) The qualified IDR items and services meet any of the following criteria under which multiple qualified IDR items and services relate to the treatment of a similar condition and therefore are permitted to be considered jointly as a single payment determination for purposes of encouraging efficiencies (including minimizing costs) in the Federal IDR process:

(1) The qualified IDR items or services were furnished to a single patient during the same patient encounter. For purposes of this section, a single patient encounter is defined as a patient encounter on one or more consecutive days during which the qualified IDR items or services were furnished to the same patient and billed on the same claim form; or

(2) The qualified IDR items and services were furnished to one or more patients and were billed under the same service code or a comparable code under a different procedural coding system, such as Current Procedural Terminology (CPT) codes with modifiers, if applicable, Healthcare Common Procedure Coding System (HCPCS) codes with modifiers, if applicable, or Diagnosis-Related Group (DRG) codes with modifiers, if applicable; or

(3) For anesthesiology, radiology, pathology, and laboratory qualified IDR items and services, the qualified IDR items and services were furnished to one or more patients and were billed under service codes belonging to the same Category I CPT code range, as specified in guidance published by the Secretary; and

(D) All the qualified IDR items and services were furnished within the same 30-business-day period following the date on which the first item or service included in the batched determination was furnished and were the subjects of a 30-business-day open negotiation period that ended within 4 business days of IDR initiation, except as provided in paragraph (c)(5)(vii) of this section.

(ii) *Treatment of bundled payment arrangements.* Qualified IDR items and services that meet the definition of a bundled payment arrangement under § 2590.716–3 may be submitted and considered as a single payment determination, and the certified IDR entity must make a single payment determination for the multiple qualified IDR items and services included in the bundled payment arrangement. Bundled payment arrangements as defined in § 2590.716–3 and submitted under this paragraph (c)(4)(ii) are subject to the certified IDR entity fee for single determinations.

(5) * * *

(i) *Submission of offers.* Not later than 10 business days after the date of final selection of the certified IDR entity as described in paragraph (c)(1)(iv)(C) of this section (or not later than 10 business days after the qualified IDR items and services are determined eligible as described in paragraph (c)(2) of this section, when the Secretary

determines that any of the extenuating circumstances described in paragraph (g)(1)(ii) of this section apply), the plan or issuer and the provider, facility, or provider of air ambulance services:

* * * * *

(ii) *Payment determination and notification.* Not later than 30 business days after the date of final selection of the certified IDR entity as described in paragraph (c)(1)(iv)(C) of this section (or not later than 30 business days after the qualified IDR items and services are determined eligible as described in paragraph (c)(2) of this section, when the Secretary determines that any of the extenuating circumstances described in paragraph (g) of this section apply), the certified IDR entity must:

(A) * * *

(1) *Prevailing party.* In the case of single determinations, the party whose offer is selected by the certified IDR entity is considered the prevailing party. In the case of batched determinations, the party with the most determinations in its favor is considered the prevailing party; if each party prevails in an equal number of determinations, neither party will be considered the prevailing party, and the certified IDR entity fee will be split evenly between the parties.

(2) *Non-prevailing party.* In the case of single determinations, the party whose offer is not selected by the certified IDR entity is considered the non-prevailing party. In the case of batched determinations, the party with the fewest determinations in its favor is considered the non-prevailing party.

* * * * *

(vii) *Effects of determination.*

(A) * * *

(B) *Suspension of certain subsequent IDR requests.* In the case of a determination made by a certified IDR entity under paragraph (c)(5)(ii) of this section, the party that submitted the initial notification under paragraph (b)(2) of this section may not submit a subsequent notification involving the same other party with respect to a claim for the same item or service that was the subject of the initial notification during the 90-calendar-day period following the determination.

(C) *Subsequent submission of requests permitted.* If the end of the open negotiation period specified in paragraph (b)(1) of this section occurs during the 90-calendar-day suspension period regarding claims for the same item or service that were the subject of the initial notice of IDR determination as described in paragraph (c)(5)(vi) of this section, either party may initiate the Federal IDR process for those claims by submitting a notification as specified in

paragraph (b)(2) of this section during the 30-business-day period beginning on the day after the last day of the 90-calendar-day suspension period.

* * * * *

(d) *Costs of IDR process—(1) Certified IDR entity fee—(i) Timing of payment of certified IDR entity fee.* Each party to a dispute for which there is a final selection of the certified IDR entity and a determination that the dispute is eligible for the Federal IDR process in accordance with paragraph (c)(2) of this section must pay to the certified IDR entity the predetermined certified IDR entity fee charged by the certified IDR entity. The certified IDR entity fee must be paid no later than the date a party submits its offer to the certified IDR entity, in accordance with paragraph (c)(5)(i) of this section.

(ii) *Failure to timely pay certified IDR entity fee.* If a party fails to pay the certified IDR entity fee as specified in paragraph (d)(1)(i) of this section, that party's offer will not be considered received. Such party will continue to be responsible for payment of the certified IDR entity fee.

(iii) *Method of allocation of the certified IDR entity fee after a payment determination.* After making a payment determination, the certified IDR entity shall retain the certified IDR entity fee described under paragraph (d)(1)(i) of this section paid by the non-prevailing party as defined in paragraph (c)(5)(ii)(A)(2) of this section. The certified IDR entity must return the fee paid by the prevailing party, as defined in paragraph (c)(5)(ii)(A)(1) of this section, within 30 business days following the date of the certified IDR entity's payment determination. In the event of a batched dispute in which each party prevails in an equal number of determinations, the certified IDR entity fee will be split evenly between the parties. In that case, the certified IDR entity must return half the fee paid by each party within 30 business days following the date of the certified IDR entity's payment determination.

(iv) *Method of allocation of the certified IDR entity fee upon agreement or withdrawal after an eligibility determination.* For a dispute for which there is a final selection of the certified IDR entity and a determination that the dispute is eligible for the Federal IDR process in accordance with paragraph (c)(2) of this section, unless directed otherwise by both parties, the certified IDR entity is required to return half of each party's certified IDR entity fee within 30 business days of the date both parties notify the certified IDR entity that they have:

(A) Reached an agreement on an out-of-network rate for qualified IDR items or services before the certified IDR entity has made its payment determination, as described in paragraph (c)(3)(i) of this section; or

(B) Withdrawn the dispute before the certified IDR entity has made its payment determination, as described in paragraph (c)(3)(ii) of this section.

(v) *Method of allocation of the certified IDR entity fee upon agreement or withdrawal before an eligibility determination.* When the parties reach an agreement on an out-of-network rate or withdraw a dispute for which there is a final selection of the certified IDR entity, but for which no eligibility determination has yet been made, unless directed otherwise by both parties, the certified IDR entity is required to return each party's full certified IDR entity fee within 30 business days of the date both parties notify the certified IDR entity that they have agreed on an out-of-network rate or agreed to withdraw the dispute.

(2) *Administrative fee—(i) In general.* Each party to a dispute for which a certified IDR entity is selected under paragraph (c)(1) of this section must pay a non-refundable administrative fee to the Secretary for participating in the Federal IDR process.

(A) *Timing of payment of administrative fee.* The initiating party must pay the administrative fee within 2 business days of the date of preliminary selection of the certified IDR entity as described in paragraph (c)(1)(iii) of this section. The non-initiating party must pay the administrative fee within 2 business days of the date the non-initiating party receives notice that an eligibility determination for the Federal IDR process has been reached by either the certified IDR entity or the Departments in accordance with paragraph (c)(2) of this section.

(B) *Agreements and withdrawals.* In the case of an agreement, as described in paragraph (c)(3)(i) of this section, or a withdrawal, as described in paragraph (c)(3)(ii) of this section, the administrative fee will not be returned to the parties if preliminary selection of the certified IDR entity has occurred, as described in paragraph (c)(1)(i) of this section; if not yet collected, the administrative fee must still be paid, except as provided in paragraph (d)(2)(i)(C) of this section for a dispute closed for nonpayment by an initiating party.

(C) *Failure to pay administrative fee.* If the initiating party fails to pay the administrative fee in accordance with paragraph (d)(2)(i)(A) of this section, the

dispute will be closed due to nonpayment and neither party will be responsible for the administrative fee. If the non-initiating party fails to pay the administrative fee in accordance with paragraph (d)(2)(i)(A) of this section, that party's offer will not be considered received and the non-initiating party will continue to be responsible for payment of the administrative fee.

(D) *Collection of unpaid fees.* Any party that fails to pay the administrative fee owed in accordance with paragraph (d)(2)(i)(A) of this section is obligated to pay the administrative fee otherwise due and owing, except as provided in paragraph (d)(2)(i)(C) of this section for a dispute closed for nonpayment by an initiating party. The Secretary will pursue collection from a party to a dispute of any administrative fee that is not timely paid pursuant to applicable debt collection authorities.

(ii) *Administrative fee amount.* The administrative fee amount and method of payment will be established through notice and comment rulemaking in a manner such that the total administrative fees paid for a year, including administrative fees reduced under paragraph (d)(2)(iii) of this section, are estimated to be equal to the projected amount of expenditures made by the Secretaries of the Treasury, Labor, and Health and Human Services for the year in carrying out the Federal IDR process.

(A) For disputes initiated on or after the later of the effective date of Federal Independent Dispute Resolution (IDR) Process Administrative Fee and Certified IDR Entity Fee Ranges final rules or January 1, 2024, the administrative fee amount is \$150 per party per dispute, which will remain in effect until changed by subsequent rulemaking.

(B) [Reserved]

(iii) *Reducing the administrative fee amount.* For disputes initiated on or after January 1, 2025—

(A) The Secretary may reduce the administrative fee for both parties in accordance with paragraph (d)(2)(iii)(C) of this section when the highest offer made by either party during open negotiation for the dispute is less than the threshold established in notice and comment rulemaking pursuant to paragraph (d)(2)(ii) of this section. For a dispute that satisfies the requirements for a reduced administrative fee in accordance with this paragraph and for which a determination has been made that the dispute is eligible for the Federal IDR process in accordance with paragraph (c)(2) of this section, the administrative fee amount may be reduced to 50 percent of the

administrative fee amount as described in paragraph (d)(2)(ii) of this section for each party to the dispute. For a dispute that satisfies the requirements for a reduced administrative fee in accordance with this paragraph and for which a determination has been made that the dispute is ineligible for the Federal IDR process in accordance with paragraph (c)(2) of this section, the administrative fee amount may be reduced to 50 percent of the administrative fee amount as described in paragraph (d)(2)(ii) of this section for the initiating party and to 20 percent of the administrative fee amount for the non-initiating party.

(B) The Secretary may reduce the administrative fee for a non-initiating party in accordance with paragraph (d)(2)(iii)(C) of this section when the dispute is determined to be ineligible for the Federal IDR process in accordance with paragraph (c)(2) of this section. For a dispute that satisfies the requirements for a reduced administrative fee in accordance with this paragraph, the administrative fee amount for the non-initiating party may be reduced to 20 percent of the administrative fee amount as described in paragraph (d)(2)(ii) of this section.

(C) The reduced administrative fee amounts provided for in paragraphs (d)(2)(iii)(A) and (d)(2)(iii)(B) of this section shall be established in notice and comment rulemaking and will remain in effect until changed by subsequent rulemaking, pursuant to paragraph (d)(2)(ii) of this section.

(e) * * *

(2) * * *

(vi) Meet appropriate indicators of fiscal integrity and stability by demonstrating that the certified IDR entity has a system of safeguards and controls in place to prevent and detect improper financial activities by its employees and agents to assure fiscal integrity and accountability for all certified IDR entity fees and administrative fees (if applicable) received, held, and disbursed and by submitting 3 years of financial statements or, if not available, other information to demonstrate fiscal stability of the certified IDR entity;

* * * * *

(viii) Have a procedure in place to retain the certified IDR entity fees described in paragraph (d)(1) of this section paid by both parties in a trust or escrow account and to return the certified IDR entity fee paid by the prevailing party or a portion of each party's certified IDR entity fee in the case of an agreement described in paragraph (c)(3)(i) of this section, a

withdrawal described in paragraph (c)(3)(ii) of this section, or a circumstance described under paragraph (d)(1)(iii) of this section, within 30 business days following the date of the determination;

(ix) Have a procedure in place to retain the administrative fees (if applicable) described in paragraph (d)(2) of this section and to remit the administrative fees to the Secretary in accordance with the timeframe and procedures set forth in guidance published by the Secretary;

* * * * *

(g) *Extension of time periods for extenuating circumstance*—(1) *In general.* The time periods specified in this section (other than the time for payment, if applicable, under paragraph (c)(5)(ix) of this section) may be extended in extenuating circumstances at the Secretary's discretion. Extenuating circumstances include, but are not limited to when:

(i) With respect to a specific dispute, the Secretary determines that the parties or certified IDR entity cannot meet applicable timeframes due to matters beyond the control of one or both parties or the certified IDR entity, or for other good cause. The certified IDR entity or either party may also submit a request for an extension due to extenuating circumstances to the Secretary through the Federal IDR portal. The requesting certified IDR entity or party must attest that it will take prompt action to ensure that the certified IDR entity's payment determination under this section may be made as soon as administratively practicable under the circumstances; or

(ii) The Secretary determines that the parties or certified IDR entity cannot meet applicable timeframes due to systematic delays in processing disputes under the Federal IDR process, such as an unforeseen volume of disputes or Federal IDR portal system failures. Extensions provided due to extenuating circumstances caused by an unforeseen volume of disputes will be applied to the timeframe for eligibility determinations under paragraph (c)(2) of this section. Extensions provided due to extenuating circumstances caused by systems failures within the Federal IDR portal will be applied to the Federal IDR process timeframe(s) determined relevant by the Secretary. The Secretary will post a public notice regarding any extensions of time periods pursuant to this paragraph (g)(1)(ii).

(A) *Timeframe following an extension to eligibility determination.* When an extension to the eligibility determination timeframe pursuant to

paragraph (g)(1)(ii) of this section is in effect, the start date of the subsequent timeframes in the Federal IDR process will be determined based on the date of completion of the eligibility determination by the certified IDR entity or the Secretary.

(1) *Submission of offers.* The parties must submit their offers and certified IDR entity fees to the certified IDR entity not later than 10 business days after the qualified IDR items and services are determined eligible as described in paragraph (c)(2) of this section.

(2) *Payment Determination.* The certified IDR entity must make the payment determination and notification of the payment determination to the parties not later than 30 business days after the qualified IDR items and services are determined eligible as described in paragraph (c)(2) of this section.

(B) *Timeframe following an extension to other timeframes in the Federal IDR process.* When an extension to any timeframe within the Federal IDR process, other than the eligibility timeframe, is in effect pursuant to paragraph (g)(1)(ii) of this section, the start date of each subsequent timeframe in the Federal IDR process will be determined based on the date of completion of the process for which the extension was granted.

(2) [Reserved]

(h) *Applicability date.* (1) Paragraph (a) of this section is applicable with respect to plan years beginning on or after January 1, 2022, except that the provisions regarding IDR entity certification at paragraphs (a) and (e) of this section are applicable beginning on October 7, 2021, and the revised definition for batched qualified IDR items and services at paragraph (a)(2)(i) of this section is applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule.

(2) Paragraph (b) of this section is applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule.

(3) Paragraph (c)(1) of this section, regarding the selection of a certified IDR entity, is applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule, except that paragraphs (c)(1)(iv)(A)(1) through (3) of this section, regarding the conflict-of-interest standards, are applicable with respect to plan years beginning on or after January 1, 2022.

(4) Paragraph (c)(2) of this section, regarding the Federal IDR process eligibility review and paragraph (c)(3) of this section regarding the authority to continue negotiations or withdraw are applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule, and paragraph (c)(4) of this section regarding the treatment of batched and bundled qualified IDR items and services is applicable 90 days after the effective date of the rule.

(5) Paragraphs (c)(5)(i) and (ii), and (c)(5)(vii)(B) and (C) of this section regarding the deadlines for the submission of offers, payment determination and notification, suspension of certain subsequent IDR requests, and subsequent submission of requests submitted are applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule. Paragraphs (c)(5)(iii) and (iv) of this section regarding considerations in payment determinations and the related examples and paragraph (c)(5)(vi)(B) of this section regarding written decisions are applicable with respect to items or services furnished on or after October 25, 2022, for plan years beginning on or after January 1, 2022. Paragraphs (c)(5)(v) through (c)(5)(vi)(A), (c)(5)(vii)(A), and (c)(5)(viii) and (ix) are applicable with respect to plan years beginning on or after January 1, 2022.

(6) Paragraph (d) of this section regarding the costs of the IDR process is applicable to disputes initiated on or after January 1, 2025.

(7) Paragraph (e) of this section is applicable with respect to plan years beginning on or after January 1, 2022, except that the provisions regarding IDR entity certification at paragraphs (e)(1), (e)(2)(i) through (vi), (e)(2)(x) and (xi), and (e)(3) through (6) of this section are applicable beginning on October 7, 2021. Paragraphs (e)(2)(vi), (viii), and (ix) of this section regarding the certified IDR entity's controls to prevent and detect improper financial activities, and procedures to retain the certified IDR entity fee and administrative fee are applicable upon the effective date of the rule.

(8) Paragraph (f) of this section is applicable with respect to plan years beginning on or after January 1, 2022, except that paragraph (f)(1)(v)(F) of this section regarding reporting of information relating to the Federal IDR process is applicable with respect to items or services furnished on or after October 25, 2022, for plan years beginning on or after January 1, 2022.

(9) Paragraph (g) of this section regarding the extension of time periods for extenuating circumstances is applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule.

(10) Until the relevant applicability date for the requirements of this section, plans, issuers, providers, facilities, providers of air ambulance services and certified IDR entities are required to continue to comply with the corresponding section of § 2590.716–8 in effect on October 25, 2022.

(i) *Severability.* (1) Any provision of this section held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, shall be construed so as to continue to give maximum effect to the provision permitted by law, unless such holding shall be one of utter invalidity or unenforceability, in which event the provision shall be severable from this section and shall not affect the remainder thereof or the application of the provision to persons not similarly situated or to dissimilar circumstances.

(2) The provisions of paragraphs (b)(1), (c)(2)(ii), (c)(4), (d)(2), and (g)(1) of this section are intended to be severable from one another, from any grant of forbearance from removal resulting from this subpart, and from any provision referenced in those paragraphs. The provisions in § 2590.716–8 are intended to be severable from the provisions in §§ 2590.716–6A, 2590.716–6, and 2590.716–9, from any grant of forbearance from removal resulting from this subpart, and from any provision referenced in §§ 2590.716–6A, 2590.716–6, and 2590.716–9.

■ 17. Section 2590.716–9 is added to subpart F to read as follows:

§ 2590.716–9 Federal Independent Dispute Resolution Registry of Group Health Plans, Health Insurance Issuers, and Federal Employees Health Benefits Carriers.

(a) *Establishment of Federal independent dispute resolution registry.* The Secretary, jointly with the Secretary of the Treasury and the Secretary of Health and Human Services, will establish a Federal IDR registry consisting of the information described in paragraph (b)(2) of this section and will assign a registration number for each group health plan, health insurance issuer offering group or individual health insurance coverage, and Federal Employees Health Benefits (FEHB) Program carrier. The information contained in the registry will be made available to parties seeking to initiate an open negotiation or a

dispute through the Federal IDR portal, and will be searchable, including by registration number.

(b) *Federal IDR registration.*—(1) *Registration requirement.* Each group health plan and health insurance issuer offering group health insurance coverage subject to the Federal IDR process must register with the Federal IDR registry as specified by the Secretary in guidance. Initial registration must be completed by the later of the date that is 30 business days after the effective date of the final rule, the date that is 30 business days after the registry becomes available, or the date the group health plan or health insurance issuer begins offering a group health plan or health insurance coverage subject to the Federal IDR process.

(2) *Required data elements.* Group health plans and health insurance issuers offering group health insurance coverage subject to the registration requirement must include the following information with their registration:

(i) The legal business name (if any) of the group health plan, or issuer, and, if applicable, the legal business name of the group health plan sponsor;

(ii) Whether the plan or coverage is a self- or fully-insured group health plan subject to ERISA;

(iii) The State(s) in which the plan or coverage is subject to a specified State law, as defined in § 2590.716–3 for any items or services for which the protections of §§ 2590.716–4, 2590.716–5, and 2590.717–1 apply;

(iv) The State(s) in which the plan or coverage is subject to an All-Payer Model Agreement under section 1115A of the Social Security Act for any items or services to which the protections in §§ 2590.716–4, 2590.716–5, and 2590.717–1 apply;

(v) For self-insured group health plans not otherwise subject to State law, any State(s) in which the group health plan has properly effectuated an election to opt in to a specified State law as defined in § 2590.716–3, if that State allows a plan not otherwise subject to the State law to opt-in;

(vi) Contact information, including a telephone number and email address, for the appropriate person or office to initiate open negotiations for purposes of determining an amount of payment (including cost sharing) for such item or service;

(vii) The 14-digit Health Insurance Oversight System (HIOS) identifier; or if the 14-digit HIOS identifier has not been assigned, the 5-digit HIOS identifier; or if no HIOS identifier is available, the plan's or the plan sponsor's Employer Identification Number (EIN) and the

plan's plan number (PN), if a PN is available;

(viii) Additional information needed to identify the plan or issuer and the applicable Federal and State requirements for determining appropriate out-of-network payment rates for items or services to which the protections against balance billing in this part apply, as specified by the Secretary in guidance; and

(ix) Additional information needed for purposes of administrative fee collection, as specified by the Secretary in guidance.

(3) *Updating disclosures.* A plan or issuer must timely report to the Secretary changes to the information required under this section within 30 calendar days after the information changes. A plan or issuer must confirm the accuracy of its registration annually in the fourth quarter of each calendar year.

(4) *Third party authority.* The requirements of paragraphs (b)(1) through (3) of this section may be performed by a third party administrator or service provider with authority to act on behalf of the group health plan or health insurance issuer offering group health insurance coverage subject to the Federal IDR process. If the registration requirements are performed by such third party administrator or service provider the group health plan or health insurance issuer offering group or individual health insurance coverage must require that such third party administrator or service provider clearly delineate each group health plan or health insurance issuer offering group health insurance coverage for which it has authority to act. If such third party administrator or service provider fails to provide the information in compliance with the requirements of paragraphs (b)(1) through (3) of this section the plan or issuer will be in violation of the requirements of this section.

(c) *Severability.* (1) Any provision of this section held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, shall be construed so as to continue to give maximum effect to the provision permitted by law, unless such holding shall be one of utter invalidity or unenforceability, in which event the provision shall be severable from this section and shall not affect the remainder thereof or the application of the provision to persons not similarly situated or to dissimilar circumstances.

(2) The provisions in § 2590.716–9 are intended to be severable from the provisions in §§ 2590.716–6A, 2590.716–6, and 2590.716–8, from any grant of forbearance from removal

resulting from this subpart, and from any provision referenced in §§ 2590.716–6A, 2590.716–6, and 2590.716–8.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

For the reasons stated in the preamble, the Department of Health and Human Services proposes to amend 45 CFR part 149 as set forth below:

PART 149—SURPRISE BILLING AND TRANSPARENCY REQUIREMENTS

■ 18. The authority citation for part 149 continues to read as follows:

Authority: 42 U.S.C. 300gg–92 and 300gg–111 through 300gg–139, as amended.

Subpart A—General Provisions

■ 19. Section 149.30 is amended by adding the definition of “Bundled payment arrangement” in alphabetical order to read as follows:

§ 149.30 Definitions.

* * * * *

Bundled payment arrangement means an arrangement under which—

(1) A provider, facility, or provider of air ambulance services bills for multiple items or services furnished to a single patient under a single service code that represents multiple items or services (for example, a Diagnosis-Related Group (DRG) code); or

(2) A plan or issuer makes an initial payment or notice of denial of payment to a provider, facility, or provider of air ambulance services under a single service code that represents multiple items or services furnished to a single patient (for example, a DRG code).

* * * * *

Subpart B—Requirements Relating to Health Care Access

■ 20. Section 149.100 is added to subpart B to read as follows:

§ 149.100 Use of claim adjustment reason codes and remittance advice remark codes.

(a) *In general.* When providing any paper or electronic remittance advice to an entity that does not have a contractual relationship directly or indirectly with a group health plan or a health insurance issuer offering group or individual health insurance coverage with respect to the furnishing of the item or service under the plan or coverage in response to a claim for payment for health care items and services furnished by that entity, the plan or issuer must use claim adjustment reason codes (CARCs) and remittance advice remark codes (RARCs) (see 45 CFR 162.1602 and

162.1603) as specified in guidance issued by the Secretaries of the Treasury, Labor, and Health and Human Services, or as required under any applicable adopted standards and operating rules under 45 CFR part 162, to communicate information related to whether the claim is or is not subject to the provisions of this subpart and subparts E and F of this part.

(b) *Severability.* (1) Any provision of this section held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, shall be construed so as to continue to give maximum effect to the provision permitted by law, unless such holding shall be one of utter invalidity or unenforceability, in which event the provision shall be severable from this section and shall not affect the remainder thereof or the application of the provision to persons not similarly situated or to dissimilar circumstances.

(2) The provisions in § 149.100 are intended to be severable from the provisions in §§ 149.140, 149.510, and 149.530, from any grant of forbearance from removal resulting from this subpart, and from any provision referenced in §§ 149.140, 149.510, and 149.530.

■ 21. Section 149.140 is amended by:

- a. Revising paragraphs (d) introductory text and (d)(1)(iv);
- b. Redesignating paragraph (d)(1)(v) as paragraph (d)(1)(vi);
- c. Adding a new paragraph (d)(1)(v);
- d. Revising paragraph (d)(2) introductory text; and
- e. Adding paragraph (h).

The revisions and additions read as follows:

§ 149.140 Methodology for calculating qualifying payment amount.

* * * * *

(d) *Information to be shared about the qualifying payment amount.* In cases in which the recognized amount, with respect to an item or service furnished by a nonparticipating provider or nonparticipating emergency facility, is the qualifying payment amount or the amount billed by the provider or facility, or if the amount on which cost sharing is based with respect to air ambulance services furnished by a nonparticipating provider of air ambulance services is the qualifying payment amount or the amount billed by the provider of air ambulance services, the plan or issuer must provide to the provider, facility, or provider of air ambulance services, as applicable, in writing, in paper or electronic form—

(1) * * *

(iv) A statement that—

(A) If the provider, facility, or provider of air ambulance services, as

applicable, wishes to initiate a 30-business-day open negotiation period for purposes of determining the out-of-network rate, the provider, facility, or provider of air ambulance services must:

(1) Contact the appropriate person or office to initiate open negotiation within 30 business days of receiving the initial payment or notice of denial of payment, and

(2) For disclosures required to be provided on or after [DATE 90 DAYS AFTER PUBLICATION OF FINAL REGULATIONS IN THE FEDERAL REGISTER] and once the open negotiation notice can be submitted through the Federal IDR portal, notify the Secretary as described under § 149.510(b)(1)(i); and

(B) If the 30-business-day open negotiation period does not result in an agreement on the amount of payment the provider, facility, or provider of air ambulance services may generally initiate the Federal IDR process within 4 business days after the end of the open negotiation period;

(v) For disclosures required to be provided on or after [DATE 90 DAYS AFTER PUBLICATION OF FINAL REGULATIONS IN THE FEDERAL REGISTER], the legal business name of the group health plan (if any) or issuer, the legal business name of the plan sponsor (if applicable), and the registration number assigned under § 149.530, if the plan or issuer is registered under § 149.530.

* * * * *

(2) In a timely manner upon the request of the provider, facility, or provider of air ambulance services:

* * * * *

(h) *Severability.* (1) Any provision of this section held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, shall be construed so as to continue to give maximum effect to the provision permitted by law, unless such holding shall be one of utter invalidity or unenforceability, in which event the provision shall be severable from this section and shall not affect the remainder thereof or the application of the provision to persons not similarly situated or to dissimilar circumstances.

(2) The provisions in § 149.140 are intended to be severable from the provisions in §§ 149.100, 149.510, and 149.530, from any grant of forbearance from removal resulting from this subpart, and from any provision referenced in §§ 149.100, 149.510, and 149.530.

■ 22. Section 149.510 is amended by:

- a. Revising paragraphs (a)(2)(i), (b), and (c)(1);

- b. Redesignating paragraphs (c)(2) through (4) as paragraphs (c)(3) through (5), respectively;
- c. Adding a new paragraph (c)(2);
- d. Revising newly redesignated paragraphs (c)(3), (c)(4)(i) introductory text, (c)(4)(i)(B) through (D), (c)(4)(ii), (c)(5)(i) introductory text, (c)(5)(ii) introductory text;
- e. In newly redesignated paragraphs (c)(5)(ii)(A) and (B), removing the reference to “(c)(4)” and adding in its place “(c)(5)”;
- f. Adding paragraphs (c)(5)(ii)(A)(1) and (2);
- g. Adding paragraphs (c)(5)(vii)(B) and (C);
- h. Revising paragraphs (d), (e)(2)(vi), (viii), and (ix), (g), and (h); and
- i. Adding paragraph (i).

The revisions and additions read as follows:

§ 149.510 Independent dispute resolution process.

(a) * * *

(2) * * *

(i) *Batched qualified IDR items and services* means multiple qualified IDR items or services that are considered jointly as part of one payment determination by a certified IDR entity for purposes of the Federal IDR process in accordance with paragraph (c)(4) of this section.

* * * * *

(b) *Determination of payment amount through open negotiation and initiation of the Federal IDR process*—(1) *Determination of payment amount through open negotiation*—(i) *In general.* With respect to an item or service that meets the requirements of paragraph (a)(2)(xi)(A) of this section, the provider, facility, or provider of air ambulance services, or the group health plan or health insurance issuer offering group or individual health insurance coverage may, during the 30-business-day period beginning on the day the provider, facility, or provider of air ambulance services receives an initial payment or notice of denial of payment regarding the item or service, initiate an open negotiation period for purposes of determining the out-of-network rate for such item or service. To initiate the open negotiation period, a party must submit a written open negotiation notice with the content specified in paragraph (b)(1)(ii) of this section to the other party and to the Secretary in the manner specified in paragraph (b)(3) of this section. The 30-business-day open negotiation period begins on the day on which the party first submits the open negotiation notice and the remittance advice documentation specified in paragraph (b)(1)(ii)(A)(12) of this section

to the other party and the Secretary. The party in receipt of the open negotiation notice must provide to the other party and to the Secretary in the manner specified in paragraph (b)(3) of this section as soon as practicable, but no later than the 15th business day of the 30-business-day open negotiation period, a written notice and supporting documentation in response to the open negotiation notice, as specified in paragraph (b)(1)(iii)(A) of this section.

(ii) *Open negotiation notice*—(A) *Content.* The open negotiation notice must include, with respect to the item or service that is the subject of the open negotiation notice, information about the item or service and the parties including:

(1) Information sufficient to identify the provider, facility, or provider of air ambulance services, including the name and current contact information (including the legal business name, email address, phone number, and mailing address) as provided with the claim form submitted by the provider, facility, or air ambulance provider to the plan or issuer, and the National Provider Identifier (NPI);

(2) Information sufficient to identify the plan or issuer, including the plan’s or issuer’s registration number, as required under § 149.530, if the plan or issuer is registered under § 149.530, or an attestation from the party submitting the open negotiation notice that the plan or issuer was not registered prior to the date it submitted the notice; the legal business name of the plan or issuer, as well as the current contact information (name, email address, phone number, and mailing address) of the plan or issuer as provided with the initial payment or notice of denial of payment; and if the party submitting the open negotiation notice is a plan or issuer, the plan type (for example, self-insured or fully-insured);

(3) The name and contact information (including the legal business name, email address, phone number, and mailing address) for any third party representing the party submitting the open negotiation notice, and an attestation that the third party has the authority to act on behalf of the party it represents in the open negotiation;

(4) Information sufficient to identify the item or service, including: the date(s) the item or service was furnished and, if the party submitting the open negotiation notice is a provider, facility, or provider of air ambulance services, the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for the item or service from the plan or issuer; the type of item

or service (specifically, whether the item or service is an emergency service as defined in § 149.110(c)(2)(i) or (ii), a non-emergency service as described in § 149.120(b), or an air ambulance service as defined in § 149.30); whether the service is a professional service or facility-based service; the State where the item or service was furnished; the claim number; the service code; and information to identify the location where the item or service was furnished (such as, place of service code or bill type code);

(5) The initial payment amount (including \$0 if, for example, payment is denied);

(6) The qualifying payment amount, if provided with the initial payment or notice of denial of payment or if the party submitting the open negotiation notice is a plan or issuer;

(7) An offer of an out-of-network rate for each item or service;

(8) If the party submitting the open negotiation notice is a plan or issuer, the amount of cost sharing imposed for the item or service, if any;

(9) If the party submitting the open negotiation notice is a provider or facility, a statement that the items and services do not qualify for the notice and consent exception described at § 149.410(b) or § 149.420(c) through (i);

(10) A statement that the provider, facility, or provider of air ambulance services was a nonparticipating provider, nonparticipating emergency facility, or nonparticipating provider of air ambulance services on the date the item or service was furnished;

(11) General information listed in the standard open negotiation notice developed by the Secretary pursuant to paragraph (b)(3) of this section describing the open negotiation period and the Federal IDR process (including a description of the purpose of the open negotiation period and Federal IDR process and key deadlines in the open negotiation period and Federal IDR process); and

(12) A copy of the initial payment or notice of denial of payment or other remittance advice that is required to include the disclosures under § 149.140(d)(1), with respect to the item or service.

(B) [Reserved]

(iii) *Open negotiation response notice*—(A) *Content.* The response to the open negotiation notice must include, with respect to the item or service that is the subject of the open negotiation response notice, information about the item or service and the parties including:

(1) Information sufficient to identify the provider, facility, or provider of air

ambulance services, including the name and current contact information (including the legal business name, email address, phone number, and mailing address) as provided with the claim form submitted by the provider, facility, or provider of air ambulance services to the plan or issuer, and the NPI;

(2) Information sufficient to identify the plan or issuer, including the plan's or issuer's registration number, as required under § 149.530 if the plan or issuer is registered under § 149.530, or an attestation from the party submitting the open negotiation response notice that the plan or issuer was not registered prior to the date it submitted the notice; the legal business name of the plan or issuer, as well as the current contact information (name, email address, phone number, and mailing address) of the plan or issuer as provided with the initial payment or notice of denial of payment; and if the party submitting the open negotiation response notice is a plan or issuer, the plan type (for example, self-insured or fully-insured);

(3) The name and contact information (including the legal business name, email address, phone number, and mailing address) for any third party representing the party submitting the open negotiation response notice, and an attestation that the third party has the authority to act on behalf of the party it represents in the open negotiation;

(4) Information sufficient to identify the item or service included in the open negotiation notice, including the date(s) the item or service was furnished, and if the party submitting the open negotiation response notice is a provider, facility, or provider of air ambulance services, the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for such item or service from the plan or issuer, and the claim number;

(5) If the party submitting the open negotiation response notice is a plan or issuer, a statement as to whether it agrees that the initial payment amount (including \$0 if, for example, payment is denied) and the qualifying payment amount reflected in the open negotiation notice accurately reflect the initial payment amount and qualifying payment amount disclosed with the initial payment for the item or service, and if not, or if the open negotiation notice indicates that the initial payment amount or qualifying payment amount was not communicated by the plan or issuer with the initial payment or notice of denial of payment or other remittance advice, the initial payment amount

(including \$0 if, for example, payment is denied) and/or qualifying payment amount it believes to be correct, and documentation to support the statement (for example, the remittance advice confirming the qualifying payment amount);

(6) If the party submitting the open negotiation response notice is a plan or issuer, the amount of cost sharing imposed for the item or service, if any;

(7) A counteroffer for an out-of-network rate for each item or service or an acceptance of the other party's offer;

(8) If the party submitting the open negotiation response notice is a provider or facility, a statement that the items and services do not qualify for the notice and consent exception described at § 149.410(b) or § 149.420(c) through (i);

(9) With respect to each item or service, either a statement and supporting documentation that explains why the item or service is not subject to the Federal IDR process or a statement agreeing that the item or service is subject to the Federal IDR process;

(10) A statement as to whether any of the information provided in the open negotiation notice is inaccurate and the basis for the statement, as well as supporting documentation; and

(11) A statement confirming that the initial payment or notice of denial of payment or other remittance advice provided by the party submitting the open negotiation notice under paragraph (b)(1)(ii)(A)(12) of this section is accurate, and if inaccurate, a copy of the accurate initial payment or notice of denial of payment or other remittance advice required to include the disclosures under § 149.140(d)(1), with respect to the item or service.

(B) [Reserved]

(2) *Initiating the Federal IDR process*—(i) *In general.* Either party may initiate the Federal IDR process with respect to a qualified IDR item or service for which the parties do not agree upon an out-of-network rate by the last day of the open negotiation period provided for under paragraph (b)(1) of this section. To initiate the Federal IDR process, a party (the initiating party) must submit a written notice of IDR initiation, consistent with paragraph (b)(2)(ii) of this section, to the other party to the dispute (the non-initiating party), and to the Secretary in the manner specified in paragraph (b)(3) of this section, during the 4-business-day period beginning on the first business day after the last day of the open negotiation period (unless it is otherwise required to be submitted in the timeframe specified in paragraph (c)(5)(vii)(C) of this section). The date of

IDR initiation is the date that the Secretary receives the notice of IDR initiation described in paragraph (b)(2)(ii) of this section.

(A) *Exception for items and services provided by certain nonparticipating providers and facilities.* A party may not initiate the Federal IDR process with respect to an item or service if, with respect to that item or service, the party knows (or reasonably should have known) that the provider or facility provided notice and received consent under §§ 149.410(b) or 149.420(c) through (i).

(B) [Reserved]

(ii) *Notice of IDR initiation*—(A) *Content.* The notice of IDR initiation must include, with respect to the item or service that is the subject of the notice, information about the item or service and the parties including:

(1) Information sufficient to identify the provider, facility, or provider of air ambulance services, including the name and current contact information (including the legal business name, email address, phone number, and mailing address), and the NPI; and if the initiating party is a provider, facility, or provider of air ambulance services, the Tax Identification Number (TIN);

(2) Information sufficient to identify the plan or issuer, including the plan's or issuer's registration number, as required under § 149.530 if the plan or issuer is registered under § 149.530, or an attestation from the initiating party that the plan or issuer was not registered prior to the date that it submitted the notice; the legal business name of the plan or issuer, as well as the current contact information (name, email address, phone number, and mailing address) of the plan or issuer as provided with the initial payment or notice of denial of payment; and if the initiating party is a plan or issuer, the plan type (for example, self-insured or fully-insured) and TIN (or, in the case of a plan that does not have a TIN, the TIN of the plan sponsor);

(3) The name and contact information (including the legal business name, email address, phone number, and mailing address) for any third party representing the initiating party, and an attestation that the third party has the authority to act on behalf of the party it represents in the Federal IDR process;

(4) Information sufficient to identify whether the dispute being initiated includes batched or bundled qualified IDR items or services as described in paragraph (c)(4) of this section;

(5) Information sufficient to identify the qualified IDR item or service that is the subject of the notice of IDR initiation, including the date(s) the

qualified IDR item or service was furnished; if the initiating party is a provider, facility, or provider of air ambulance services, the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for such item or service from the plan or issuer; the date the open negotiation period under paragraph (b)(1) of this section began; the type of item or service (specifically, whether the qualified IDR item or service is an emergency service as defined in § 149.110(c)(2)(i) or (ii), a non-emergency service as described in § 149.120(b), or an air ambulance service as defined in § 149.30); whether the service is a professional service or facility-based service; the State where the item or service was furnished; the claim number; the service code; and information to identify the location the item or service was furnished (including place of service code or bill type code);

(6) The initial payment amount (including \$0 if, for example, payment is denied);

(7) The qualifying payment amount, if provided with the initial payment or notice of denial of payment or if the initiating party is a plan or issuer;

(8) If the initiating party is a provider or facility, a statement that the items and services do not qualify for the notice and consent exception described at 45 CFR 149.410(b) or 149.420(c) through (i);

(9) A statement that the provider, facility, or provider of air ambulance services was a nonparticipating provider, nonparticipating emergency facility, or nonparticipating provider of air ambulance services on the date the item or service was furnished;

(10) Attestation that the item or service under dispute is a qualified IDR item or service, and the basis for the attestation;

(11) General information listed in the standard notice of IDR initiation developed by the Secretary pursuant to paragraph (b)(3) of this section describing the Federal IDR process (including a description of the purpose of the Federal IDR process and key deadlines in the Federal IDR process);

(12) A copy of the initial payment or notice of denial of payment or other remittance advice that is required to include the disclosures under § 149.140(d)(1), with respect to the item or service;

(13) Preferred certified IDR entity; and

(14) A statement describing the key aspects of the claim, such as patient acuity or level of training of the provider, facility, or provider of air ambulance services that furnished the

qualified IDR item or service, discussed by the parties during open negotiation that relate to the payment for the disputed claim, whether the reasons for initiating the Federal IDR process are different from the aspects of the claim discussed during the open negotiation period, and an explanation of why the party is initiating the Federal IDR process, including any of the permissible considerations described in §§ 149.510(c)(5)(iii) and 149.520(b)(2) that serve as the party's basis for initiating the Federal IDR process.

(B) [Reserved]

(iii) *Notice of IDR initiation response.* The non-initiating party must provide to the initiating party and to the Secretary in the manner specified in paragraph (b)(3) of this section within 3 business days after the date of IDR initiation, a written notice and supporting documentation in response to the notice of IDR initiation, as specified in paragraph (b)(2)(iii)(A) of this section.

(A) *Content.* The notice of IDR initiation response must include, with respect to the item or service that is the subject of the notice, information about the item or service and the parties including:

(1) Information sufficient to identify the provider, facility, or provider of air ambulance services, including the name and current contact information (including the legal business name, email address, phone number, and mailing address), and the NPI; and if the non-initiating party is a provider, facility, or provider of air ambulance services, the TIN;

(2) Information sufficient to identify the plan or issuer, including the plan's or issuer's registration number, as required under § 149.530 if the plan or issuer is registered under § 149.530 or an attestation from the non-initiating party that the plan or issuer was not registered prior to the date that it submitted the notice; the legal business name of the plan or issuer, as well as the current contact information (name, email address, phone number, and mailing address) of the plan or issuer as provided with the initial payment or notice of denial of payment; and if the non-initiating party is a plan or issuer, the plan type (for example, self-insured or fully-insured) and TIN (or, in the case of a plan that does not have a TIN, the TIN of the plan sponsor);

(3) The name and contact information (including the legal business name, email address, phone number, and mailing address) for any third party representing the non-initiating party, and an attestation that the third party has the authority to act on behalf of the

party it represents in the Federal IDR process;

(4) Information sufficient to identify each item or service included in the notice of IDR initiation, including the date(s) the item or service was furnished. If the non-initiating party is a provider, facility, or provider of air ambulance services, the date(s) that the provider, facility, or provider of air ambulance services received the initial payment or notice of denial of payment for such item or service from the plan or issuer, and the claim number;

(5) If the non-initiating party is a plan or issuer, a statement as to whether the non-initiating party agrees that the initial payment (including \$0 if, for example, payment is denied) and the qualifying payment amount reflected in the notice of IDR initiation is accurate for the item or service that is the subject of the dispute, and if not, the initial payment amount (including \$0 if, for example, payment is denied) and/or qualifying payment amount it believes to be correct, and documentation to support the statement (for example, the remittance advice confirming the qualifying payment amount);

(6) If the non-initiating party is a plan or issuer, the amount of cost sharing imposed for the item or service, if any;

(7) If the non-initiating party is a provider or facility, a statement that the items and services do not qualify for the notice and consent exception described at § 149.410(b) or § 149.420(c) through (i);

(8) With respect to each item or service that is the subject of the dispute, either an attestation that the item or service is a qualified IDR item or service, or for each item or service that the non-initiating party asserts is not a qualified IDR item or service, an explanation and documentation to support the statement;

(9) A statement confirming that the initial payment or notice of denial of payment or other remittance advice provided by the initiating party under paragraph (b)(2)(ii)(A)(12) of this section is accurate, and if inaccurate, a copy of the accurate initial payment or notice of denial of payment or other remittance advice required to include the disclosures under § 149.140(d)(1), with respect to the item or service;

(10) A statement as to whether any of the information provided in the notice of IDR initiation is inaccurate and the basis for the statement as well as any supporting documentation; and

(11) A statement as to whether the non-initiating party agrees or objects to the initiating party's preferred certified IDR entity. If the non-initiating party objects to the initiating party's preferred

certified IDR entity, the notice of IDR initiation response must include the name of an alternative preferred certified IDR entity and, if applicable, an explanation of any conflict of interest with the initiating party's preferred certified IDR entity.

(B) [Reserved].

(3) *Manner.* A party furnishing notices as required under paragraphs (b)(1)(ii) and (iii), and (b)(2)(ii) and (iii) of this section must furnish the notices using the standard forms developed by the Secretary and must furnish the notices and supporting documentation to the other party and the Secretary, through the Federal IDR portal.

(c) * * *

(1) *Selection of certified IDR entity—*
(i) *Preliminary selection of the certified IDR entity.* Within 3 business days after the date of IDR initiation, the non-initiating party must agree or object to the preferred certified IDR entity identified in the notice of IDR initiation, as described in paragraph (b)(2)(iii)(A)(11) of this section.

(A) If the non-initiating party agrees, or fails to object, to the selection of the initiating party's preferred certified IDR entity in the manner described in paragraph (b)(2)(iii)(A)(11) of this section and within the timeframe specified in paragraph (c)(1)(i) of this section, the initiating party's preferred certified IDR entity will be considered jointly selected on the third business day after the date of IDR initiation.

(B) If the non-initiating party objects to the selection of the initiating party's preferred certified IDR entity by designating an alternative preferred certified IDR entity in the manner described in paragraph (b)(2)(iii)(A)(11) of this section and within the timeframe specified in paragraph (c)(1)(i) of this section, the initiating party may then agree or object to the non-initiating party's alternative preferred certified IDR entity by submitting the notice of certified IDR entity selection in the manner specified in paragraph (c)(1)(i)(D) of this section. If the initiating party agrees to the non-initiating party's alternative preferred certified IDR entity within 3 business days after the date of IDR initiation, or if the non-initiating party submits the notice of IDR initiation response on or before the second business day after the date of IDR initiation and the initiating party fails to respond within 3 business days after the date of IDR initiation, the alternative preferred certified IDR entity will be considered jointly selected by the parties. If the non-initiating party submits the notice of IDR initiation response on the third business day after the date of IDR initiation and the

initiating party does not agree on the same day, selection will proceed under paragraph (c)(1)(i)(C) of this section.

(C) If a certified IDR entity is not jointly selected under paragraph (c)(1)(i)(A) or (B) of this section, either party may select an alternative preferred certified IDR entity by submitting the notice of certified IDR entity selection in the manner specified in paragraph (c)(1)(i)(D) of this section, until the earlier of the date that the parties agree on the alternative preferred certified IDR entity or the deadline for joint selection, which is 3 business days after the date of IDR initiation. Once a party submits a notice of certified IDR entity selection, it may not submit another notice of certified IDR entity selection until after it receives a responding notice of certified IDR entity selection from the other party.

(1) If a party submits a notice of certified IDR entity selection to the other party on the first or second day after the date of IDR initiation and the party in receipt of the notice agrees or fails to object to the alternative preferred certified IDR entity by the third business day after the date of IDR initiation, the alternative preferred certified IDR entity will be considered jointly selected by the parties.

(2) If a party submits a notice of certified IDR entity selection to the other party on the third business day after the date of IDR initiation and the party last in receipt of the notice agrees to the alternative preferred certified IDR entity on the same day, the alternative preferred certified IDR entity will be considered jointly selected by the parties.

(3) If a party submits a notice of certified IDR entity selection to the other party on the third business day after the date of IDR initiation and the party last in receipt of the notice does not agree to the alternative preferred certified IDR entity on the same day, the parties will have failed to jointly select a certified IDR entity.

(D) To notify the other party and the Secretary of an agreement or objection to an alternative preferred certified IDR entity under paragraph (c)(1)(i)(C) of this section, a party must submit the notice of certified IDR entity selection. The party must furnish the notice of certified IDR entity selection using the standard form developed by the Secretary and must furnish the notice to the other party and the Secretary through the Federal IDR portal within 3 business days after the date of IDR initiation. However, in the event the conditions under paragraph (c)(1)(ii) of this section apply, the party may notify the Secretary of an agreement or

objection to an alternative preferred certified IDR entity in accordance with paragraph (c)(1)(ii) of this section. The notice of certified IDR entity selection must include a statement indicating the party's agreement with or objection to the other party's alternative preferred certified IDR entity and, if applicable, an explanation of any conflict of interest with the alternative preferred certified IDR entity. If the party in receipt of a notice of certified IDR entity selection objects to the other party's alternative preferred certified IDR entity and the party submits a notice of certified IDR entity selection by the end of the third business day after the date of IDR initiation, that party's notice of certified IDR entity selection reflecting the objection must include the name of another alternative preferred certified IDR entity.

(ii) *Failure to jointly select a certified IDR entity.* If the parties fail to jointly select a certified IDR entity within 3 business days after the date of IDR initiation, the Secretary will select a certified IDR entity. The parties will have failed to jointly select a certified IDR entity if, by the end of the third business day after the date of IDR initiation, the party last in receipt of the notice of IDR initiation response or the notice of certified IDR entity selection has objected to the other party's alternative preferred certified IDR entity, or if the notice of IDR initiation response or the notice of certified IDR entity selection is submitted to the other party on the third business day after the date of IDR initiation and the party in receipt of the notice does not agree to the alternative preferred certified IDR entity within 3 business days after the date of IDR initiation.

(A) In selecting the certified IDR entity, the Secretary will first confirm whether a party submitted the notice of IDR initiation response or the notice of certified IDR entity selection with an alternative preferred certified IDR entity on the third business day after the date of IDR initiation without the other party's agreement to the selection. If either notice was provided on the third business day after the date of IDR initiation without the other party's agreement to the alternative preferred certified IDR entity by the end of third business day after the date of IDR initiation, the Secretary will provide the party last in receipt of the applicable notice 2 additional business days to agree or object to the other party's alternative preferred certified IDR entity selection.

(1) If the party last in receipt of the notice of IDR initiation response or the notice of certified IDR entity selection

agrees with the other party's alternative preferred certified IDR entity and notifies the Secretary of the agreement or fails to notify the Secretary of its objection in the Federal IDR portal by the fifth business day after the date of IDR initiation, the Secretary will select the final alternative preferred certified IDR entity selected in the applicable notice. In disputes where the applicable notice was submitted on the third business day after the date of IDR initiation, the party last in receipt of the notice will not be allowed to select another alternative preferred certified IDR entity.

(2) If the party notifies the Secretary of its objection to the alternative preferred certified IDR entity by the fifth business day after the date of IDR initiation, the Secretary will proceed with the random selection of the certified IDR entity from among the certified IDR entities (other than the preferred certified IDR entity and any alternative preferred certified IDR entity previously selected in such dispute by a party, unless there is no other certified IDR entity available to select) that charge a fee within the allowed range of certified IDR entity fees on the sixth business day after the date of IDR initiation. If there are insufficient certified IDR entities that charge a fee within the allowed range of certified IDR entity fees available to arbitrate the dispute, the Secretary will select a certified IDR entity that has received approval, as described in paragraph (e)(2)(vii)(B) of this section, to charge a fee outside of the allowed range of certified IDR entity fees. In either case, the Secretary will notify the parties of the preliminary selection of the certified IDR entity not later than 6 business days after the date of IDR initiation.

(B) [Reserved].

(iii) *Date of preliminary selection of the certified IDR entity.* The date of preliminary selection of the certified IDR entity will be:

(A) Three business days after the date of IDR initiation if the parties jointly selected a certified IDR entity, as specified in paragraph (c)(1)(i) of this section; or

(B) Six business days after the date of IDR initiation, if the parties fail to jointly select a certified IDR entity as specified in paragraph (c)(1)(ii) of this section.

(iv) *Final selection of the certified IDR entity—(A) Conflict-of-interest review.* The certified IDR entity preliminarily selected for a dispute must review the selection. The selection of the certified IDR entity will be finalized only if the certified IDR entity attests to the

Secretary that it meets the following requirements:

(1) The certified IDR entity does not have a conflict of interest as defined in paragraph (a)(2)(iv) of this section;

(2) The certified IDR entity will only assign personnel to a dispute and make decisions regarding hiring, compensation, termination, promotion, or other similar matters related to personnel assigned to the dispute in a manner that is not based upon the likelihood that the assigned personnel will support a particular party to the dispute; and

(3) The certified IDR entity will not assign any personnel to a dispute who would have any conflicts of interest, as defined in paragraph (a)(2)(iv) of this section, regarding any party to the dispute or whose relationship with a party within the 1 year immediately preceding the assignment to the dispute would violate the restrictions on aiding or advising a former employer or principal in a manner similar to the restrictions set forth in 18 U.S.C. 207(b).

(B) *Failure to meet conflict-of-interest requirements.* If the certified IDR entity notifies the Secretary within 3 business days of the date of preliminary selection of the certified IDR entity that it does not meet the requirements of paragraphs (c)(1)(iv)(A)(1) through (3) of this section or if the certified IDR entity does not respond within 3 business days after the date of preliminary selection of the certified IDR entity, the Secretary will randomly select another certified IDR entity consistent with paragraph (c)(1)(ii) of this section. The Secretary will notify the parties of the new randomly preliminarily selected certified IDR entity no later than 1 business day after the previously selected certified IDR entity notifies the Secretary that it has a conflict of interest or, if the previously selected certified IDR entity fails to respond within 3 business days after the date of preliminary selection of the certified IDR entity, no later than 1 business day after the end of the 3-business-day period.

(C) *Date of final selection of the certified IDR entity.* If the certified IDR entity that has been preliminarily selected attests within 3 business days that it meets the requirements of paragraphs (c)(1)(iv)(A)(1) through (3) of this section, the Secretary will notify the parties of final selection of the certified IDR entity no later than 1 business day after the certified IDR entity attests that it meets the conflict-of-interest requirements. The date of final selection of the certified IDR entity is the date that the Secretary provides this notice to the parties.

(2) *Federal IDR process eligibility review—(i) Federal IDR process eligibility determination by certified IDR entity.* Unless the departmental eligibility review described in paragraph (c)(2)(ii) of this section applies, the selected certified IDR entity must review the information in the notice of IDR initiation, notice of IDR initiation response, and any additional information described in paragraph (c)(2)(iii) of this section, and make a final determination as to whether the item or service is a qualified IDR item or service, as defined in paragraph (a)(2)(xi) of this section, that is eligible for the Federal IDR process. The certified IDR entity must make such a determination and notify the Secretary and both parties no later than 5 business days after the date of final selection of the certified IDR entity. If the certified IDR entity determines that the item or service is not a qualified IDR item or service, the dispute will be closed, and the selected certified IDR entity will not take any action with regard to the dispute.

(ii) *Departmental eligibility review for Federal IDR process eligibility determinations.* When the conditions for the departmental eligibility review set forth in paragraph (c)(2)(ii)(A) of this section are met, the Secretary will conduct the eligibility review and make the eligibility determination instead of the certified IDR entity. If the Secretary determines that the item or service is not a qualified IDR item or service, the dispute will be closed, and the selected certified IDR entity will not take any action with regard to the dispute. If the dispute is found to be eligible, the Secretary will inform the preliminarily selected certified IDR entity of the dispute's eligibility so that it may conduct its conflict-of-interest assessment, and the dispute will otherwise continue through the Federal IDR process, including notification of the eligibility determination to the disputing parties by the preliminarily selected certified IDR entity.

(A) *Application of the departmental eligibility review.* The departmental eligibility review will apply when the Secretary determines that any of the extenuating circumstances described in paragraph (g)(1) of this section require application of the departmental eligibility review to facilitate timely payment determinations or the effective processing of disputes under the Federal IDR process.

(B) *Notification regarding applicability of the departmental eligibility review.* Before invoking the application of the departmental eligibility review, the Secretary will

post advance public notification of the date on which the departmental eligibility review will take effect and the reasons for invoking the application of the departmental eligibility review. Before ending the application of the departmental eligibility review, the Secretary will post advance public notification of the date on which the departmental eligibility review will no longer be in effect and the reasons for ending the application of the departmental eligibility review.

(iii) *Request for additional information.* The Secretary or the selected certified IDR entity may request additional information from either party to a dispute at any time, including for the purpose of assessing whether a conflict of interest exists, conducting an eligibility determination, or making a payment determination.

(A) Upon request, a party must submit the additional information within 5 business days to the Secretary or the selected certified IDR entity, as applicable, through the Federal IDR portal. Following a request for additional information, the time period for the applicable stage of the Federal IDR process will be tolled until the earlier of the date either all of the requested information is provided or the 5-business-day period expires, and each subsequent timeframe in the Federal IDR process will be determined based on the date of completion of the stage of the Federal IDR process that was tolled for provision of the requested information.

(B) If a party fails to submit the additional information as required, the related determination, including the eligibility determination, conflict-of-interest review, or payment determination will be made without the requested information unless a good-cause extension of the 5-business-day period, as specified in paragraph (g)(1)(i) of this section, has been provided, and the party subsequently submits the additional information requested within the extended period.

(3) *Authority to continue negotiations or withdraw*—(i) *Authority to continue to negotiate.* If the parties to the Federal IDR process agree on an out-of-network rate for a qualified IDR item or service after providing the notice of IDR initiation to the Secretary required under paragraph (b)(2)(ii) of this section, but before the certified IDR entity has made its payment determination, the amount agreed to by the parties for the qualified IDR item or service will be treated as the out-of-network rate for the qualified IDR item or service. To the extent the amount exceeds the initial payment amount and any cost sharing

paid or required to be paid by the participant, beneficiary, or enrollee, or there was an initial denial of payment, payment must be made directly by the plan or issuer to the nonparticipating provider, nonparticipating facility, or nonparticipating provider of air ambulance services not later than 30 business days after the agreement is reached. In no instance may either party seek additional payment from the participant, beneficiary, or enrollee, including in instances in which the out-of-network rate exceeds the qualifying payment amount. The initiating party must send a notification to the Secretary and to the certified IDR entity (if selected) electronically, through the Federal IDR portal, as soon as possible, but no later than 3 business days after the date of the agreement. The notification must include the dispute number, a statement of the out-of-network rate for the qualified IDR item or service, and signatures from authorized signatories for both parties.

(ii) *Withdrawals.* A dispute may be withdrawn from the Federal IDR process by the initiating party, the Secretary, or a certified IDR entity before a payment determination is made if one of the following conditions is met:

(A) The initiating party provides notification through the Federal IDR portal to the Secretary and the certified IDR entity (if selected) that both parties to the dispute agree to withdraw the dispute from the Federal IDR process without agreement on an out-of-network rate. The notification must include the dispute number, a statement about both parties' agreement to withdraw and signatures from authorized signatories for both parties.

(B) The initiating party provides a standard withdrawal request notice through the Federal IDR portal to the Secretary, the certified IDR entity (if selected), and the non-initiating party of its request to withdraw the dispute from the Federal IDR process and the non-initiating party notifies the Secretary, certified IDR entity (if selected), and the initiating party through the Federal IDR portal of its agreement to withdraw from the Federal IDR process within 5 business days of the initiating party's request. If the non-initiating party fails to respond within 5 business days of the initiating party's request, the non-initiating party will be considered to have agreed to the withdrawal, and the dispute will be withdrawn.

(C) The certified IDR entity or Secretary cannot determine eligibility because both parties to the dispute are unresponsive to any requests for additional information to determine

eligibility as described in paragraph (c)(2)(iii) of this section, or

(D) The certified IDR entity cannot make a payment determination because both parties to the dispute have failed to submit an offer as described in paragraph (c)(5)(i) of this section.

(4) * * *

(i) *In general.* A certified IDR entity may consider up to 25 qualified IDR items and services jointly as part of one payment determination that is subject to the certified IDR entity fee for batched determinations only if the qualified IDR items and services meet the requirements of this paragraph (c)(4)(i):

* * * * *

(B) Payment for the qualified IDR items and services is required to be made by the same group health plan or health insurance issuer. For group or individual health insurance coverage, this requirement is satisfied if the same issuer is required to make payment for the qualified IDR items and services, even if the qualified IDR items and services relate to claims from different group health plans or individual market policies. For self-insured group health plans, this requirement is satisfied if the same self-insured group health plan is required to make payment for the qualified IDR items and services, including when the plan makes payments through a third party administrator; the requirement is not satisfied if multiple self-insured group health plans are required to make payments for the qualified IDR items and services, even if those group health plans make payments through the same third party administrator;

(C) The qualified IDR items and services meet any of the following criteria under which multiple qualified IDR items and services relate to the treatment of a similar condition and therefore are permitted to be considered jointly as a single payment determination for purposes of encouraging efficiencies (including minimizing costs) in the Federal IDR process:

(1) The qualified IDR items or services were furnished to a single patient during the same patient encounter. For purposes of this section, a single patient encounter is defined as a patient encounter on one or more consecutive days during which the qualified IDR items or services were furnished to the same patient and billed on the same claim form; or

(2) The qualified IDR items and services were furnished to one or more patients and were billed under the same service code or a comparable code under a different procedural coding

system, such as Current Procedural Terminology (CPT) codes with modifiers, if applicable, Healthcare Common Procedure Coding System (HCPCS) codes with modifiers, if applicable, or Diagnosis-Related Group (DRG) codes with modifiers, if applicable; or

(3) For anesthesiology, radiology, pathology, and laboratory qualified IDR items and services, the qualified IDR items and services were furnished to one or more patients and were billed under service codes belonging to the same Category I CPT code range, as specified in guidance published by the Secretary; and

(D) All the qualified IDR items and services were furnished within the same 30-business-day period following the date on which the first item or service included in the batched determination was furnished and were the subjects of a 30-business-day open negotiation period that ended within 4 business days of IDR initiation, except as provided in paragraph (c)(5)(vii) of this section.

(ii) *Treatment of bundled payment arrangements.* Qualified IDR items and services that meet the definition of a bundled payment arrangement under § 149.30 may be submitted and considered as a single payment determination, and the certified IDR entity must make a single payment determination for the multiple qualified IDR items and services included in the bundled payment arrangement. Bundled payment arrangements as defined in § 149.30 and submitted under this paragraph (c)(4)(ii) are subject to the certified IDR entity fee for single determinations.

(5) * * *

(i) *Submission of offers.* Not later than 10 business days after the date of the final selection of the certified IDR entity as described in paragraph (c)(1)(iv)(C) of this section (or not later than 10 business days after the qualified IDR items and services are determined eligible as described in paragraph (c)(2) of this section, when the Secretary determines that any of the extenuating circumstances described in paragraph (g)(1)(ii) of this section apply), the plan or issuer and the provider, facility, or provider of air ambulance services:

* * * * *

(ii) *Payment determination and notification.* Not later than 30 business days after the date of the final selection of the certified IDR entity as described in paragraph (c)(1)(iv)(C) of this section (or not later than 30 business days after the qualified IDR items and services are determined eligible as described in

paragraph (c)(2) of this section, when the Secretary determines that any of the extenuating circumstances described in paragraph (g) of this section apply), the certified IDR entity must:

(A) * * *

(1) *Prevailing party.* In the case of single determinations, the party whose offer is selected by the certified IDR entity is considered the prevailing party. In the case of batched determinations, the party with the most determinations in its favor is considered the prevailing party; if each party prevails in an equal number of determinations, neither party will be considered the prevailing party, and the certified IDR entity fee will be split evenly between the parties.

(2) *Non-prevailing party.* In the case of single determinations, the party whose offer is not selected by the certified IDR entity is considered the non-prevailing party. In the case of batched determinations, the party with the fewest determinations in its favor is considered the non-prevailing party.

* * * * *

(vii) *Effects of determination.*

(A) * * *

(B) *Suspension of certain subsequent IDR requests.* In the case of a determination made by a certified IDR entity under paragraph (c)(5)(ii) of this section, the party that submitted the initial notification under paragraph (b)(2) of this section may not submit a subsequent notification involving the same other party with respect to a claim for the same item or service that was the subject of the initial notification during the 90-calendar-day period following the determination.

(C) *Subsequent submission of requests permitted.* If the end of the open negotiation period specified in paragraph (b)(1) of this section occurs during the 90-calendar-day suspension period regarding claims for the same item or service that were the subject of the initial notice of IDR determination as described in paragraph (c)(5)(vi) of this section, either party may initiate the Federal IDR process for those claims by submitting a notification as specified in paragraph (b)(2) of this section during the 30-business-day period beginning on the day after the last day of the 90-calendar-day suspension period.

* * * * *

(d) *Costs of IDR process—(1) Certified IDR entity fee—(i) Timing of payment of certified IDR entity fee.* Each party to a dispute for which there is a final selection of the certified IDR entity and a determination that the dispute is eligible for the Federal IDR process in accordance with paragraph (c)(2) of this section must pay to the certified IDR

entity the predetermined certified IDR entity fee charged by the certified IDR entity. The certified IDR entity fee must be paid no later than the date a party submits its offer to the certified IDR entity, in accordance with paragraph (c)(5)(i) of this section.

(ii) *Failure to timely pay certified IDR entity fee.* If a party fails to pay the certified IDR entity fee as specified in paragraph (d)(1)(i) of this section, that party's offer will not be considered received. Such party will continue to be responsible for payment of the certified IDR entity fee.

(iii) *Method of allocation of the certified IDR entity fee after a payment determination.* After making a payment determination, the certified IDR entity shall retain the certified IDR entity fee described under paragraph (d)(1)(i) of this section paid by the non-prevailing party as defined in paragraph (c)(5)(ii)(A)(2) of this section. The certified IDR entity must return the fee paid by the prevailing party, as defined in paragraph (c)(5)(ii)(A)(1) of this section, within 30 business days following the date of the certified IDR entity's payment determination. In the event of a batched dispute in which each party prevails in an equal number of determinations, the certified IDR entity fee will be split evenly between the parties. In that case, the certified IDR entity must return half the fee paid by each party within 30 business days following the date of the certified IDR entity's payment determination.

(iv) *Method of allocation of the certified IDR entity fee upon agreement or withdrawal after an eligibility determination.* For a dispute for which there is a final selection of the certified IDR entity and a determination that the dispute is eligible for the Federal IDR process in accordance with paragraph (c)(2) of this section, unless directed otherwise by both parties, the certified IDR entity is required to return half of each party's certified IDR entity fee within 30 business days of the date both parties notify the certified IDR entity that they have:

(A) Reached an agreement on an out-of-network rate for qualified IDR items or services before the certified IDR entity has made its payment determination, as described in paragraph (c)(3)(i) of this section; or

(B) Withdrawn the dispute before the certified IDR entity has made its payment determination, as described in paragraph (c)(3)(ii) of this section.

(v) *Method of allocation of the certified IDR entity fee upon agreement or withdrawal before an eligibility determination.* When the parties reach an agreement on an out-of-network rate

or withdraw a dispute for which there is a final selection of the certified IDR entity, but for which no eligibility determination has yet been made, unless directed otherwise by both parties, the certified IDR entity is required to return each party's full certified IDR entity fee within 30 business days of the date both parties notify the certified IDR entity that they have agreed on an out-of-network rate or agreed to withdraw the dispute.

(2) *Administrative fee.* (i) *In general.* Each party to a dispute for which a certified IDR entity is selected under paragraph (c)(1) of this section must pay a non-refundable administrative fee to the Secretary for participating in the Federal IDR process.

(A) *Timing of payment of administrative fee.* The initiating party must pay the administrative fee within 2 business days of the date of preliminary selection of the certified IDR entity as described in paragraph (c)(1)(iii) of this section. The non-initiating party must pay the administrative fee within 2 business days of the date the non-initiating party receives notice that an eligibility determination for the Federal IDR process has been reached by either the certified IDR entity or the Departments in accordance with paragraph (c)(2) of this section.

(B) *Agreements and withdrawals.* In the case of an agreement, as described in paragraph (c)(3)(i) of this section, or a withdrawal, as described in paragraph (c)(3)(ii) of this section, the administrative fee will not be returned to the parties if preliminary selection of the certified IDR entity has occurred, as described in paragraph (c)(1)(i) of this section; if not yet collected, the administrative fee must still be paid, except as provided in paragraph (d)(2)(i)(C) of this section for a dispute closed for nonpayment by an initiating party.

(C) *Failure to pay administrative fee.* If the initiating party fails to pay the administrative fee in accordance with paragraph (d)(2)(i)(A) of this section, the dispute will be closed due to nonpayment and neither party will be responsible for the administrative fee. If the non-initiating party fails to pay the administrative fee in accordance with paragraph (d)(2)(i)(A) of this section, that party's offer will not be considered received and the non-initiating party will continue to be responsible for payment of the administrative fee.

(D) *Collection of unpaid fees.* Any party that fails to pay the administrative fee owed in accordance with paragraph (d)(2)(i)(A) of this section is obligated to pay the administrative fee otherwise

due and owing, except as provided in paragraph (d)(2)(i)(C) of this section for a dispute closed for nonpayment by an initiating party. The Secretary will pursue collection from a party to a dispute of any administrative fee that is not timely paid pursuant to applicable debt collection authorities, after netting any amounts owed by the Federal Government in accordance with § 156.1215 of this Title, as applicable.

(ii) *Administrative fee amount.* The administrative fee amount and method of payment will be established through notice and comment rulemaking in a manner such that the total administrative fees paid for a year, including administrative fees reduced under paragraph (d)(2)(iii) of this section, are estimated to be equal to the projected amount of expenditures made by the Secretaries of the Treasury, Labor, and Health and Human Services for the year in carrying out the Federal IDR process.

(A) For disputes initiated on or after the later of the effective date of Federal Independent Dispute Resolution (IDR) Process Administrative Fee and Certified IDR Entity Fee Ranges final rules or January 1, 2024, the administrative fee amount is \$150 per party per dispute, which will remain in effect until changed by subsequent rulemaking.

(B) [Reserved]

(iii) *Reducing the administrative fee amount.* For disputes initiated on or after January 1, 2025—

(A) The Secretary may reduce the administrative fee for both parties in accordance with paragraph (d)(2)(iii)(C) of this section when the highest offer made by either party during open negotiation for the dispute is less than the threshold established in notice and comment rulemaking pursuant to paragraph (d)(2)(ii) of this section. For a dispute that satisfies the requirements for a reduced administrative fee in accordance with this paragraph and for which a determination has been made that the dispute is eligible for the Federal IDR process in accordance with paragraph (c)(2) of this section, the administrative fee amount may be reduced to 50 percent of the administrative fee amount as described in paragraph (d)(2)(ii) of this section for each party to the dispute. For a dispute that satisfies the requirements for a reduced administrative fee in accordance with this paragraph and for which a determination has been made that the dispute is ineligible for the Federal IDR process in accordance with paragraph (c)(2) of this section, the administrative fee amount may be reduced to 50 percent of the

administrative fee amount as described in paragraph (d)(2)(ii) of this section for the initiating party and to 20 percent of the administrative fee amount for the non-initiating party.

(B) The Secretary may reduce the administrative fee for a non-initiating party in accordance with paragraph (d)(2)(iii)(C) of this section when the dispute is determined to be ineligible for the Federal IDR process in accordance with paragraph (c)(2) of this section. For a dispute that satisfies the requirements for a reduced administrative fee in accordance with this paragraph, the administrative fee amount for the non-initiating party may be reduced to 20 percent of the administrative fee amount as described in paragraph (d)(2)(ii) of this section.

(C) The reduced administrative fee amounts provided for in paragraphs (d)(2)(iii)(A) and (d)(2)(iii)(B) of this section shall be established in notice and comment rulemaking and will remain in effect until changed by subsequent rulemaking, pursuant to paragraph (d)(2)(ii) of this section.

(e) * * *

(2) * * *

(vi) Meet appropriate indicators of fiscal integrity and stability by demonstrating that the certified IDR entity has a system of safeguards and controls in place to prevent and detect improper financial activities by its employees and agents to assure fiscal integrity and accountability for all certified IDR entity fees and administrative fees (if applicable) received, held, and disbursed and by submitting 3 years of financial statements or, if not available, other information to demonstrate fiscal stability of the certified IDR entity;

* * * * *

(viii) Have a procedure in place to retain the certified IDR entity fees described in paragraph (d)(1) of this section paid by both parties in a trust or escrow account and to return the certified IDR entity fee paid by the prevailing party or a portion of each party's certified IDR entity fee in the case of an agreement described in paragraph (c)(3)(i) of this section, a withdrawal described in paragraph (c)(3)(ii) of this section, or a circumstance described under paragraph (d)(1)(iii) of this section, within 30 business days following the date of the determination;

(ix) Have a procedure in place to retain the administrative fees (if applicable) described in paragraph (d)(2) of this section and to remit the administrative fees to the Secretary in accordance with the timeframe and

procedures set forth in guidance published by the Secretary;

* * * * *

(g) * * *

(1) *In general.* The time periods specified in this section (other than the time for payment, if applicable, under paragraph (c)(5)(ix) of this section) may be extended in extenuating circumstances at the Secretary's discretion. Extenuating circumstances include, but are not limited to when:

(i) With respect to a specific dispute, the Secretary determines that the parties or certified IDR entity cannot meet applicable timeframes due to matters beyond the control of one or both parties or the certified IDR entity, or for other good cause. The certified IDR entity or either party may also submit a request for an extension due to extenuating circumstances to the Secretary through the Federal IDR portal. The requesting certified IDR entity or party must attest that it will take prompt action to ensure that the certified IDR entity's payment determination under this section may be made as soon as administratively practicable under the circumstances; or

(ii) The Secretary determines that the parties or certified IDR entity cannot meet applicable timeframes due to systematic delays in processing disputes under the Federal IDR process, such as an unforeseen volume of disputes or Federal IDR portal system failures. Extensions provided due to extenuating circumstances caused by an unforeseen volume of disputes will be applied to the timeframe for eligibility determinations under paragraph (c)(2) of this section. Extensions provided due to extenuating circumstances caused by systems failures within the Federal IDR portal will be applied to the Federal IDR process timeframe(s) determined relevant by the Secretary. The Secretary will post a public notice regarding any extensions of time periods pursuant to this paragraph (g)(1)(ii).

(A) *Timeframe following an extension to eligibility determination.* When an extension to the eligibility determination timeframe pursuant to paragraph (g)(1)(ii) of this section is in effect, the start date of the subsequent timeframes in the Federal IDR process will be determined based on the date of completion of the eligibility determination by the certified IDR entity or the Secretary.

(1) *Submission of offers.* The parties must submit their offers and certified IDR entity fees to the certified IDR entity not later than 10 business days after the qualified IDR items and services are determined eligible as described in paragraph (c)(2) of this section.

(2) *Payment Determination.* The certified IDR entity must make the payment determination and notification of the payment determination to the parties not later than 30 business days after the qualified IDR items and services are determined eligible as described in paragraph (c)(2) of this section.

(B) *Timeframe following an extension to other timeframes in the Federal IDR process.* When an extension to any timeframe within the Federal IDR process, other than the eligibility timeframe, is in effect pursuant to paragraph (g)(1)(ii) of this section, the start date of each subsequent timeframe in the Federal IDR process will be determined based on the date of completion of the process for which the extension was granted.

(2) [Reserved]

(h) *Applicability date.* (1) Paragraph (a) of this section is applicable with respect to plan years (or in the individual market, policy years) beginning on or after January 1, 2022, except that the provisions regarding IDR entity certification at paragraphs (a) and (e) of this section are applicable beginning on October 7, 2021, and the revised definition for batched qualified IDR items and services at paragraph (a)(2)(i) of this section is applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule.

(2) Paragraph (b) of this section is applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule.

(3) Paragraph (c)(1) of this section, regarding the selection of a certified IDR entity, is applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule, except that paragraphs (c)(1)(iv)(A)(1) through (3) of this section, regarding the conflict-of-interest standards, are applicable with respect to plan years (or in the individual market, policy years) beginning on or after January 1, 2022.

(4) Paragraph (c)(2) of this section, regarding the Federal IDR process eligibility review and paragraph (c)(3) of this section regarding the authority to continue negotiations or withdraw are applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule and paragraph (c)(4) of this section regarding the treatment of batched and bundled qualified IDR items and

services is applicable 90 days after the effective date of the rule.

(5) Paragraphs (c)(5)(i) and (ii), and (c)(5)(vii)(B) and (C) of this section regarding the deadlines for the submission of offers, payment determination and notification, suspension of certain subsequent IDR requests, and subsequent submission of requests submitted are applicable to disputes with open negotiation periods beginning on or after the later of August 15, 2024, or 90 days after the effective date of the rule. Paragraphs (c)(5)(iii) and (iv) of this section regarding considerations in payment determinations and the related examples and paragraph (c)(5)(vi)(B) of this section regarding written decisions are applicable with respect to items or services furnished on or after October 25, 2022, for plan years (or in the individual market policy years) beginning on or after January 1, 2022. Paragraphs (c)(5)(v) through (c)(5)(vi)(A), (c)(5)(vii)(A), and (c)(5)(viii) and (ix) are applicable with respect to plan years (or in the individual market, policy years) beginning on or after January 1, 2022.

(6) Paragraph (d) of this section regarding the costs of the IDR process is applicable to disputes initiated on or after January 1, 2025.

(7) Paragraph (e) of this section is applicable with respect to plan years (or in the individual market, policy years) beginning on or after January 1, 2022, except that the provisions regarding IDR entity certification at paragraphs (e)(1), (e)(2)(i) through (vi), (e)(2)(x) and (xi), and (e)(3) through (6) of this section are applicable beginning on October 7, 2021. Paragraphs (e)(2)(vi), (viii), and (ix) of this section regarding the certified IDR entity's controls to prevent and detect improper financial activities, and procedures to retain the certified IDR entity fee and administrative fee are applicable upon the effective date of the rule.

(8) Paragraph (f) of this section is applicable with respect to plan years (or in the individual market, policy years) beginning on or after January 1, 2022, except that paragraph (f)(1)(v)(F) of this section regarding reporting of information relating to the Federal IDR process is applicable with respect to items or services furnished on or after October 25, 2022, for plan years (or in the individual market policy years) beginning on or after January 1, 2022.

(9) Paragraph (g) of this section regarding the extension of time periods for extenuating circumstances is applicable to disputes with open negotiation periods beginning on or

after the later of August 15, 2024, or 90 days after the effective date of the rule.

(10) Until the relevant applicability date for the requirements of this section, plans, issuers, providers, facilities, providers of air ambulance services and certified IDR entities are required to continue to comply with the corresponding section of § 149.510 in effect on October 25, 2022.

(i) *Severability.* (1) Any provision of this section held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, shall be construed so as to continue to give maximum effect to the provision permitted by law, unless such holding shall be one of utter invalidity or unenforceability, in which event the provision shall be severable from this section and shall not affect the remainder thereof or the application of the provision to persons not similarly situated or to dissimilar circumstances.

(2) The provisions of paragraphs (b)(1), (c)(2)(ii), (c)(4), (d)(2), and (g)(1) of this section are intended to be severable from one another, from any grant of forbearance from removal resulting from this subpart, and from any provision referenced in those paragraphs. The provisions in § 149.510 are intended to be severable from the provisions in §§ 149.100, 149.140, and 149.530, from any grant of forbearance from removal resulting from this subpart, and from any provision referenced in §§ 149.100, 149.140, and 149.530.

■ 23. Section 149.530 is added to subpart F to read as follows:

§ 149.530 Federal independent dispute resolution registry of group health plans, health insurance issuers, and Federal Employees Health Benefits Carriers.

(a) *Establishment of Federal independent dispute resolution registry.* The Secretary, jointly with the Secretary of the Treasury and the Secretary of Labor, will establish a Federal IDR registry consisting of the information described in paragraph (b)(2) of this section and will assign a registration number for each group health plan, health insurance issuer offering group or individual health insurance coverage, and Federal Employees Health Benefits (FEHB) Program carrier. The information contained in the registry will be made available to parties seeking to initiate an open negotiation or a dispute through the Federal IDR portal, and will be searchable, including by registration number.

(b) *Federal IDR registration—(1) Registration requirement.* Each group health plan and health insurance issuer offering group or individual health

insurance coverage subject to the Federal IDR process must register with the Federal IDR registry as specified by the Secretary in guidance. Initial registration must be completed by the later of the date that is 30 business days after the effective date of the final rule, the date that is 30 business days after the registry becomes available, or the date the group health plan or health insurance issuer begins offering a group health plan or individual health insurance coverage subject to the Federal IDR process.

(2) *Required data elements.* Group health plans and health insurance issuers offering group or individual health insurance coverage subject to the registration requirement must include the following information with their registration:

(i) The legal business name (if any) of the group health plan, issuer, or FEHB carrier and, if applicable, the legal business name of the group health plan sponsor;

(ii) Whether the plan or coverage is a self- or fully-insured group health plan subject to ERISA, individual health insurance coverage, a plan offered by a FEHB carrier, a self- or fully-insured non-Federal governmental plan, or a self- or fully-insured church plan;

(iii) The State(s) in which the plan or coverage is subject to a specified State law, as defined in § 149.30 for any items or services for which the protections of §§ 149.110, 149.120, and 149.130 apply;

(iv) The State(s) in which the plan or coverage is subject to an All-Payer Model Agreement under section 1115A of the Social Security Act for any items or services to which the protections in §§ 149.110, 149.120, and 149.130, apply;

(v) For self-insured group health plans not otherwise subject to State law, any State(s) in which the group health plan has properly effectuated an election to opt in to a specified State law as defined in § 149.30, if that State allows a plan not otherwise subject to the State law to opt-in; and for FEHB plans that adopt a specified State law pursuant to their FEHB carrier's contract terms, any State(s) in which they have made such an adoption;

(vi) Contact information, including a telephone number and email address, for the appropriate person or office to initiate open negotiations for purposes of determining an amount of payment (including cost sharing) for such item or service;

(vii) The 14-digit Health Insurance Oversight System (HIOS) identifier; or if the 14-digit HIOS identifier has not been assigned, the 5-digit HIOS identifier; or if no HIOS identifier is available, the plan's or the plan sponsor's Employer

Identification Number (EIN) and the plan's plan number (PN), if a PN is available, or for FEHB carriers, the applicable contract number(s) and plan code(s);

(viii) Additional information needed to identify the plan or issuer and the applicable Federal and State requirements for determining appropriate out-of-network payment rates for items or services to which the protections against balance billing in this part apply, as specified by the Secretary in guidance, or such additional information needed with respect to FEHB carriers as specified by OPM in guidance; and

(ix) Additional information needed for purposes of administrative fee collection, as specified by the Secretary in guidance, or such additional information needed with respect to FEHB carriers as specified by OPM in guidance.

(3) *Updating disclosures.* A plan or issuer must timely report to the Secretary changes to the information required under this section within 30 calendar days after the information changes. A plan or issuer must confirm the accuracy of its registration annually in the fourth quarter of each calendar year.

(4) *Third party authority.* The requirements of paragraphs (b)(1) through (3) of this section may be performed by a third party administrator or service provider with authority to act on behalf of the group health plan or health insurance issuer offering group or individual health insurance coverage subject to the Federal IDR process. If the registration requirements are performed by such third party administrator or service provider the group health plan or health insurance issuer offering group or individual health insurance coverage must require that such third party administrator or service provider clearly delineate each group health plan or health insurance issuer offering group health insurance coverage for which it has authority to act. If such third party administrator or service provider fails to provide the information in compliance with the requirements of paragraphs (b)(1) through (3) of this section the plan or issuer will be in violation of the requirements of this section.

(c) *Severability.* (1) Any provision of this section held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, shall be construed so as to continue to give maximum effect to the provision permitted by law, unless such holding shall be one of utter invalidity or unenforceability, in which event the provision shall be severable from this

section and shall not affect the remainder thereof or the application of the provision to persons not similarly situated or to dissimilar circumstances.

(2) The provisions in § 149.530 are intended to be severable from the

provisions in §§ 149.100, 149.140, and 149.510, from any grant of forbearance from removal resulting from this subpart, and from any provision

referenced in §§ 149.100, 149.140, and 149.510.

Part IV

Department of Labor

Employee Benefits Security Administration

29 CFR Parts 2510, et al.

Retirement Security Rule: Definition of an Investment Advice Fiduciary;
Proposed Rule

DEPARTMENT OF LABOR

Employee Benefits Security
Administration

29 CFR Part 2510

RIN 1210-AC02

Retirement Security Rule: Definition of
an Investment Advice Fiduciary

AGENCY: Employee Benefits Security Administration, Department of Labor.

ACTION: Proposed rule.

SUMMARY: This document contains a proposed amendment to the regulation defining when a person renders “investment advice for a fee or other compensation, direct or indirect” with respect to any moneys or other property of an employee benefit plan, for purposes of the definition of a “fiduciary” in the Employee Retirement Income Security Act of 1974 (Title I of ERISA or the Act). The proposal also would amend the parallel regulation defining for purposes of Title II of ERISA, a “fiduciary” of a plan defined in Internal Revenue Code (Code) section 4975, including an individual retirement account. The Department also is publishing elsewhere in today’s **Federal Register** proposed amendments to Prohibited Transaction Exemption 2020-02 (Improving Investment Advice for Workers & Retirees) and to several other existing administrative exemptions from the prohibited transaction rules applicable to fiduciaries under Title I and Title II of ERISA.

DATES:

Public Comments. Comments are due on or before January 2, 2024.

Public Hearing. The Department anticipates holding a public hearing approximately 45 days following the date of publication in the **Federal Register**. Specific information regarding the date, location, and submission of requests to testify will be published in the **Federal Register**.

ADDRESSES: You may submit written comments, identified by RIN 1210-AC02, by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for sending comments.
- *Mail:* Office of Regulations and Interpretations, Employee Benefits Security Administration, Room N-5655, U.S. Department of Labor, 200 Constitution Ave. NW, Washington, DC 20210, Attention: Definition of Fiduciary—RIN 1210-AC02.

Instructions: All submissions must include the agency name and Regulatory

Identifier Number (RIN) for this rulemaking. If you submit comments electronically, do not submit paper copies.

Warning: Do not include any personally identifiable information or confidential business information that you do not want publicly disclosed. Comments are public records posted on the internet as received and can be retrieved by most internet search engines.

Docket: For access to the docket to read background documents, including the plain-language summary of the proposed rule of not more than 100 words in length required by the Providing Accountability Through Transparency Act of 2023, or comments, go to the Federal eRulemaking Portal at <https://www.regulations.gov>. Comments will be available to the public, without charge, online at <http://www.regulations.gov> and <http://www.dol.gov/agencies/ebsa> and at the Public Disclosure Room, Employee Benefits Security Administration, Room N-1513, 200 Constitution Ave, NW, Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT:

- *For questions regarding the proposed rule:* contact Luisa Grillo-Chope, Office of Regulations and Interpretations, Employee Benefits Security Administration (EBSA), 202-693-8510. (Not a toll-free number).
- *For questions regarding the prohibited transaction exemptions:* contact Susan Wilker, Office of Exemption Determinations, EBSA, 202-693-8540. (Not a toll-free number).
- *For questions regarding the Regulatory Impact Analysis:* contact James Butikofer, Office of Research and Analysis, EBSA, 202-693-8434. (Not a toll-free number).

Customer Service Information: Individuals interested in obtaining information from the Department of Labor concerning Title I of ERISA and employee benefit plans may call the Employee Benefits Security Administration (EBSA) Toll-Free Hotline, at 1-866-444-EBSA (3272) or visit the Department of Labor’s website (<http://www.dol.gov/agencies/ebsa>).

SUPPLEMENTARY INFORMATION:**A. Executive Summary**

The Department of Labor is proposing a new regulatory definition of an investment advice fiduciary for purposes of Title I and Title II of the Employee Retirement Income Security Act (ERISA). As compared to the existing regulatory definition, which dates to 1975, the proposal better reflects the text and the purposes of the

statute and better protects the interests of retirement investors, consistent with the mission of the Department’s Employee Benefits Security Administration to ensure the security of the retirement, health, and other workplace-related benefits of America’s workers and their families.

The Department proposes that a person would be an investment advice fiduciary under Title I and Title II of ERISA if they provide investment advice or make an investment recommendation to a retirement investor (*i.e.*, a plan, plan fiduciary, plan participant or beneficiary, IRA, IRA owner or beneficiary or IRA fiduciary); the advice or recommendation is provided “for a fee or other compensation, direct or indirect,” as defined in the proposed rule; and the person makes the recommendation in one of the following contexts:

- The person either directly or indirectly (*e.g.*, through or together with any affiliate) has discretionary authority or control, whether or not pursuant to an agreement, arrangement, or understanding, with respect to purchasing or selling securities or other investment property for the retirement investor;
- The person either directly or indirectly (*e.g.*, through or together with any affiliate) makes investment recommendations to investors on a regular basis as part of their business and the recommendation is provided under circumstances indicating that the recommendation is based on the particular needs or individual circumstances of the retirement investor and may be relied upon by the retirement investor as a basis for investment decisions that are in the retirement investor’s best interest; or
- The person making the recommendation represents or acknowledges that they are acting as a fiduciary when making investment recommendations.

The proposal is designed to ensure that ERISA’s fiduciary standards uniformly apply to all advice that retirement investors receive concerning investment of their retirement assets in a way that ensures that retirement investors’ reasonable expectations are honored when receiving advice from financial professionals who hold themselves out as trusted advice providers. The Department’s proposal fills an important gap in those advice relationships where advice is not currently required to be provided in the retirement investor’s best interest, and the investor may not be aware of that fact.

Together with proposed amendments to administrative exemptions from the prohibited transaction rules applicable to fiduciaries under Title I and Title II of ERISA published elsewhere in this issue of the **Federal Register**, the

proposal is intended to protect the interests of retirement investors by requiring investment advice providers to adhere to stringent conduct standards and mitigate their conflicts of interest. The proposals' compliance obligations are generally consistent with the best interest obligations set forth in the Securities and Exchange Commission's (SEC's) Regulation Best Interest and its Commission Interpretation Regarding Standard of Conduct for Investment Advisers (SEC Investment Adviser Interpretation), each released in 2019.

The Department anticipates that the most significant benefits of the proposals will stem from the uniform application of the ERISA fiduciary standard and exemption conditions to investment advice to retirement investors. Under the proposals, advice providers would be subject to a common fiduciary standard that would reduce retirement investor exposure to conflicted advice that erodes investment returns and would be obligated to adhere to protective conflict-mitigation requirements.¹ Requiring advice providers to compete under a common fiduciary standard will be especially beneficial with respect to those transactions that currently are not uniformly covered by fiduciary protections consistent with ERISA's high standards, including recommendations to roll over assets from a workplace retirement plan to an IRA (e.g., in those cases in which the advice provider is not subject to Federal securities law standards and, as is often the case, does not have an ongoing and preexisting relationship with the customer); investment recommendations with respect to many commonly purchased retirement annuities, such as fixed index annuities; and investment recommendations to plan fiduciaries.

B. Background

1. Title I and Title II of ERISA and the 1975 Rule

ERISA² is a "comprehensive statute designed to promote the interests of employees and their beneficiaries in employee benefit plans."³ Under the statutory framework, Title I of ERISA imposes duties and restrictions on individuals who are "fiduciaries" with respect to employee benefit plans. In particular, fiduciaries to Title I plans must adhere to duties of prudence and

loyalty. ERISA section 404 provides that Title I plan fiduciaries must act with the "care, skill, prudence, and diligence under the circumstances then prevailing that a prudent [person] acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims," and they also must discharge their duties with respect to a plan "solely in the interest of the participants and beneficiaries."⁴

These fiduciary duties, which are rooted in the common law of trusts, are reinforced by prohibitions against transactions involving conflicts of interest because of the dangers such transactions pose to plans and their participants. The prohibited transaction provisions of ERISA, including Title II of ERISA which is codified in the Internal Revenue Code (Code), "categorically bar[]" plan fiduciaries from engaging in transactions deemed "likely to injure the pension plan."⁵ These prohibitions broadly forbid a fiduciary from "deal[ing] with the assets of the plan in his own interest or for his own account," and "receiv[ing] any consideration for his own personal account from any party dealing with such plan in connection with a transaction involving the assets of the plan."⁶ Congress also gave the Department authority to grant conditional administrative exemptions from the prohibited transaction provisions, but only if the Department finds that the exemption is (1) administratively feasible for the Department, (2) in the interests of the plan and of its participants and beneficiaries, and (3) protective of the rights of participants and beneficiaries of such plan.⁷

Title II of ERISA, codified in the Code,⁸ governs the conduct of fiduciaries to plans defined in Code section 4975(e)(1), which includes IRAs.⁹ Some plans defined in Code

section 4975(e)(1) are also covered by Title I of ERISA, but the definitions of such plans are not identical. Although Title II, as codified in the Code, does not directly impose specific duties of prudence and loyalty on fiduciaries as in ERISA section 404(a), it prohibits fiduciaries from engaging in conflicted transactions on many of the same terms as Title I.¹⁰ Under the Reorganization Plan No. 4 of 1978, which Congress subsequently ratified in 1984,¹¹ the Department was generally granted authority to interpret the fiduciary definition and issue administrative exemptions from the prohibited transaction provisions in Code section 4975.¹²

Many of the protections, duties, and liabilities in both Title I and Title II of ERISA hinge on fiduciary status; therefore, the determination of who is a "fiduciary" is of central importance. ERISA includes a statutory definition of a fiduciary at section 3(21)(A), which provides that a person is a fiduciary with respect to a plan to the extent the person (i) exercises any discretionary authority or discretionary control respecting management of such plan or exercises any authority or control respecting management or disposition of its assets, (ii) renders investment advice for a fee or other compensation, direct or indirect, with respect to any moneys or other property of such plan, or has any authority or responsibility to do so, or (iii) has any discretionary authority or discretionary responsibility in the administration of such plan.¹³ The same

described in Code section 4975(e)(1)(B)–(F), and includes individual retirement accounts, individual retirement annuities, health savings accounts, and certain other tax-advantaged trusts and plans. However, for purposes of any rollover of assets between a Title I Plan and an IRA described in this preamble, the term "IRA" includes only an account or annuity described in Code section 4975(e)(1)(B) or (C). Additionally, while the Department uses the term "retirement investor" throughout this document to describe advice recipients, that is not intended to suggest that the fiduciary definition would apply only with respect to employee pension benefit plans and IRAs that are retirement savings vehicles. As discussed herein, the rule would apply with respect to plans as defined in Title I and Title II of ERISA that make investments. In this regard, see also proposed paragraph (f)(11) that provides that the term "investment property" "does not include health insurance policies, disability insurance policies, term life insurance policies, or other property to the extent the policies or property do not contain an investment component."

¹⁰ 26 U.S.C. 4975(c)(1); *cf. id.* at 4975(f)(5), which defines "correction" with respect to prohibited transactions as placing a plan or an IRA in a financial position not worse than it would have been in if the person had acted "under the highest fiduciary standards."

⁷ ERISA section 408(a), 29 U.S.C. 1108(a).

⁸ This proposal includes some references to the Code in the context of discussions of Title II of ERISA involving specific provisions codified in the Code. The Department understands that references to the Code are useful but emphasizes that both Title I and Title II are covered by the same definition of fiduciary and the same general framework of prohibited transactions, and that, under both Title I and Title II, fiduciaries must comply with the conditions of an available prohibited transaction exemption in order to engage in an otherwise prohibited transaction.

⁹ For purposes of the proposed rule, the term "IRA" is defined as any account or annuity

definition of a fiduciary is in Code section 4975(e)(3).¹⁴

These statutory definitions broadly assign fiduciary status for purposes of Title I and Title II of ERISA. Thus, “any authority or control” over plan assets is sufficient to confer fiduciary status, and any person who renders “investment advice for a fee or other compensation, direct or indirect” is an investment advice fiduciary, regardless of whether they have direct control over the plan’s assets, and regardless of their status under another statutory or regulatory regime. In the absence of fiduciary status, persons who provide investment advice would neither be subject to Title I of ERISA’s fundamental fiduciary standards, nor responsible under Title I and Title II of ERISA for avoiding prohibited transactions. The broad statutory definition, prohibitions on conflicts of interest, and core fiduciary obligations of prudence and loyalty (as applicable) all reflect Congress’ recognition in 1974, when it passed ERISA, of the fundamental importance of investment advice to protect the interests of retirement savers.

In 1975, shortly after ERISA was enacted, the Department issued a regulation at 29 CFR 2510.3–21(c)(1) that defined the circumstances under which a person renders “investment advice” to an employee benefit plan within the meaning of section 3(21)(A)(ii) of ERISA, such that said person would be a fiduciary under ERISA.¹⁵ The regulation narrowed the plain and expansive language of section 3(21)(A)(ii), creating a five-part test that must be satisfied in order for a person to be treated as a fiduciary by reason of rendering investment advice. Under the five-part test, a person is a fiduciary only if they: (1) render advice as to the value of securities or other property, or make recommendations as to the advisability of investing in, purchasing, or selling securities or other property (2) on a regular basis (3) pursuant to a mutual agreement, arrangement, or understanding with the plan or a plan fiduciary that (4) the advice will serve as a primary basis for investment decisions with respect to plan assets, and that (5) the advice will be individualized based on the particular needs of the plan. The Department of the Treasury issued a virtually identical regulation under Code section 4975(e)(3), at 26 CFR 54.4975–9(c)(1), which applies to plans defined in Code section 4975.¹⁶

Since 1975, the retirement plan landscape has changed significantly, with a shift from defined benefit plans (in which decisions regarding investment of plan assets are primarily made by professional asset managers) to defined contribution/individual account plans such as 401(k) plans (in which decisions regarding investment of plan assets are often made by plan participants themselves). In 1975, IRAs had only recently been created (by ERISA itself), and 401(k) plans did not yet exist. Retirement assets were principally held in pension funds controlled by large employers and professional money managers. Now, IRAs and participant-directed plans, such as 401(k) plans, have become more common retirement vehicles as opposed to traditional pension plans, and rollovers of employee benefit plan assets to IRAs are commonplace. Individuals, regardless of their financial literacy, have thus become increasingly responsible for their own retirement savings.

The shift toward individual control over retirement investing (and the associated shift of risk to individuals) has been accompanied by a dramatic increase in the variety and complexity of financial products and services, which has widened the information gap between investment advice providers and their clients. Plan participants and other retirement investors may be unable to assess the quality of the advice they receive or be aware of and guard against the investment advice provider’s conflicts of interest. However, as a result of the five-part test in the 1975 rule, many investment professionals, consultants, and financial advisers have no obligation to adhere to the fiduciary standards in Title I of ERISA or to the prohibited transaction rules, despite the critical role they play in guiding plan and IRA investments. In many situations, this disconnect serves to undermine the reasonable expectations of retirement investors in today’s marketplace; a retirement investor may reasonably expect that the advice they are receiving is fiduciary advice even when it is not. If these investment advice providers are not fiduciaries under Title I or Title II of ERISA, they do not have obligations under Federal pension law to either avoid prohibited transactions or comply with the protective conditions in a prohibited transaction exemption (PTE).

Recently, other regulators have recognized the need for change in the

regulation of investment recommendations and have imposed enhanced conduct standards on financial professionals that make investment recommendations, including broker-dealers and insurance agents. As a result, the regulatory landscape today is very different than it was even five years ago. In 2019, the SEC adopted Regulation Best Interest, which established an enhanced best interest standard of conduct applicable to broker-dealers when making a recommendation of any securities transaction or investment strategy involving securities to retail customers.¹⁷ The SEC also issued its SEC Investment Adviser Interpretation, which addressed the conduct standards applicable to investment advisers under the Investment Advisers Act of 1940 (Advisers Act).¹⁸ As the SEC has repeatedly stated, “key elements of the standard of conduct that applies to broker-dealers under Regulation Best Interest will be substantially similar to key elements of the standard of conduct that applies to investment advisers pursuant to their fiduciary duty under the Advisers Act.”¹⁹ In this connection, the SEC has also stressed that Regulation Best Interest “aligns the standard of conduct with retail customers’ reasonable expectations[.]”²⁰

In 2020, the National Association of Insurance Commissioners (NAIC) also revised its Suitability In Annuity Transactions Model Regulation to provide that insurance agents must act in the consumer’s best interest, as defined by the Model Regulation, when making a recommendation of an annuity. Under the Model Regulation, insurers would also be expected to establish and maintain a system to supervise recommendations so that the insurance needs and financial objectives of consumers at the time of the transaction are effectively addressed.²¹ The goal of the NAIC working group was “to seek clear, enhanced standards for annuity sales so consumers understand the products they purchase, are made aware of any material conflicts of interest, and are assured those selling the products do not place their financial

²¹ Available at www.naic.org/store/free/MDL-275.pdf.

¹⁴ 26 U.S.C. 4975(e)(3).

¹⁵ 40 FR 50842 (Oct. 31, 1975).

¹⁶ 40 FR 50840 (Oct. 31, 1975). The issuance of this regulation pre-dated The Reorganization Plan

No. 4 of 1978, and thus authority to issue this regulatory definition under Title II of ERISA was still with the Department of the Treasury.

interests above consumers' interests."²² According to the NAIC, as of August 23, 2023, 43 jurisdictions have implemented the revisions to the model regulation.²³

These regulatory efforts reflect the understanding that broker-dealers and insurance agents commonly make recommendations to their customers for which they are compensated as a regular part of their business; that investors rely upon these recommendations; and that regulatory protections are important to ensure that the advice is in the best interest of the retail customer, in the case of broker-dealers, or consumers, in the case of insurance agents.²⁴ After careful review of the existing regulatory landscape, the Department too has concluded that existing regulations should be revised to reflect current realities in light of the text and purposes of Title I of ERISA and the Code.

In the current landscape, the existing 1975 regulation no longer serves ERISA's purpose to protect the interests of retirement investors, especially given the growth of participant-directed investment arrangements and IRAs, the conflicts of interest associated with investment recommendations, and the pressing need for plan participants, IRA owners, and their beneficiaries to receive sound advice from sophisticated financial advisers when making critical investment decisions in an increasingly complex financial marketplace. As the SEC and NAIC recognized, many different types of financial professionals, including insurance agents, broker-dealers, advisers subject to the Advisers Act, and others, make recommendations to investors for which they are compensated, and investors rightly rely upon these recommendations with an expectation that they are receiving advice that is in

their interest. Like these other regulators, the Department has concluded that it is appropriate to revisit the existing regulatory structure to ensure that it properly and uniformly protects the financial interests of retirement investors as Congress intended. As reflected in this regulatory package, after evaluation of the types of investment advisory relationships that should give rise to ERISA fiduciary status, the Department has concluded that it is appropriate to revise the regulatory definition of an investment advice fiduciary under Title I and Title II of ERISA in the manner set forth herein.

2. Prior Rulemakings

The Department began the process of reexamining the regulatory definition of an investment advice fiduciary under Title I and Title II of ERISA in 2010. After issuing two notices of proposed rules, conducting multiple days of public hearings, and over six years of deliberations, on April 8, 2016, the Department replaced the 1975 regulation with a new regulatory definition (the "2016 Final Rule"), which applied under Title I and Title II of ERISA.²⁵ In the preamble to the 2016 Final Rule, the Department noted that the 1975 five-part test had been created in a very different context and

investment advice marketplace. The Department expressed concern that specific elements of the five-part test—which are not found in the text of Title I or Title II of ERISA—worked to defeat retirement investors' legitimate expectations when they received investment advice from trusted advice providers in the modern marketplace for financial advice.

The Department identified the "regular basis" element²⁶ in the five-part test as a particularly important example of the 1975 regulation's shortcomings. The Department stated that the requirement that advice be provided on a "regular basis" had failed to draw a sensible line between fiduciary and non-fiduciary conduct and had undermined the Act's protective purpose. The Department pointed to examples of transactions in which a discrete instance of advice can be of critical importance to the plan, such as a one-time purchase of a group annuity to cover all of the benefits promised to substantially all of a plan's participants for the rest of their lives when a defined benefit plan terminates, or a plan's expenditure of hundreds of millions of dollars on a single real estate transaction based on the recommendation of a financial adviser hired for purposes of that one transaction.

The Department likewise expressed concern that the requirements in the 1975 regulation of a "mutual agreement, arrangement, or understanding" that advice would serve as "a primary basis for investment decisions" had encouraged investment advice providers in the current marketplace to use fine print disclaimers as potential means of avoiding ERISA fiduciary status, even as they marketed themselves as providing tailored or individualized advice based on the retirement investor's best interest. Additionally, the Department noted that the "primary basis" element of the five-part test appeared in tension with the statutory text and purposes of Title I and Title II of ERISA. If, for example, a prudent plan fiduciary hires multiple specialized advisers for an especially complex transaction, it should be able to rely upon any or all of the consultants that it hired to render advice regardless of arguments about whether one could characterize the advice, in some sense, as primary, secondary, or tertiary.

In adopting the 2016 Final Rule, the Department presented an economic

²⁵ *Definition of the Term "Fiduciary"; Conflict of Interest Rule—Retirement Investment Advice*, 81 FR 20946 (Apr. 8, 2016). The Department issued its first proposal to amend the regulatory definition of an investment advice fiduciary in 2010. 75 FR 65263 (Oct. 22, 2010). The first proposed rulemaking provided for a 90-day comment period, from October 22, 2010, through January 20, 2011. The comment period was extended for 14 days. The Department held a public hearing in Washington, DC, on March 1–2, 2011, after which the Department welcomed public comment for 15 days in order for commenters to supplement hearing testimony or otherwise provide additional comments. That proposal was withdrawn, and the Department issued a second proposal in 2015 along with related proposed prohibited transaction exemptions and proposed amendments to existing exemptions. 80 FR 21928 (Apr. 20, 2015). The 2015 proposal and proposed related exemptions initially provided for 75-day comment periods, ending on July 6, 2015, but the Department extended the comment periods to July 21, 2015. Before finalizing the 2015 proposals, the Department held a public hearing in Washington, DC on August 10–13, 2015, at which over 75 speakers testified. The transcript of the hearing was made available on September 8, 2015, and the Department provided additional opportunity for interested persons to submit comments on the proposal and proposed related exemptions or on the transcript until September 24, 2015. A total of over 3,000 comment letters were received on the 2015 proposals. There were also over 300,000 submissions made as part of 30 separate petitions submitted on the proposals. These comments and petitions, which came from consumer groups, plan sponsors, financial services companies, academics, elected government officials, trade and industry associations, and others, were both in support of and in opposition to the 2015 proposals.

²² See <https://content.naic.org/cipr-topics/annuity-suitability-best-interest-standard>.

²³ NAIC Annuity Suitability & Best Interest Standard web page, <https://content.naic.org/cipr-topics/annuity-suitability-best-interest-standard>.

²⁴ The SEC stated in the Regulation Best Interest release that "there is broad acknowledgment of the benefits of, and support for, the continuing existence of the broker-dealer business model, including a commission or other transaction-based compensation structure, as an option for retail customers seeking investment recommendations." 84 FR 33318, 33319 (July 12, 2019). The NAIC Model Regulation, section 6.5.M defines a recommendation as "advice provided by a producer to an individual consumer that was intended to result or does result in a purchase, an exchange or a replacement of an annuity in accordance with that advice." Section 5.B., defines "cash compensation" as "any discount, concession, fee, service fee, commission, sales charge, loan, override, or cash benefit received by a producer in connection with the recommendation or sale of an annuity from an insurer, intermediary, or directly from the consumer." (Emphasis added).

²⁶ This refers to the requirement in the 1975 regulation that, in order for fiduciary status to attach, investment advice must be provided by the person "on a regular basis." 29 CFR 2510.3–21(c)(1)(ii)(B).

analysis demonstrating that investment advice providers are compensated in ways that create conflicts of interest, which can bias investment advice and erode plan and IRA investment results.²⁷ The Department noted that many of the consultants and advisers who provide investment-related advice and recommendations received compensation from the financial institutions whose investment products they recommend, and that this can give the consultants and advisers a strong bias, conscious or unconscious, to favor investments that provide them greater compensation rather than those that may be most appropriate for the retirement investors. The Department also found that consolidation of the financial services industry and developments in compensation arrangements multiplied the opportunities for self-dealing and reduced the transparency of fees. Most significantly, the Department explained in its analysis that, in the absence of the 2016 Final Rule, the underperformance associated with conflicts of interest in the mutual funds segment alone could have cost IRA investors between \$95 billion and \$189 billion over the following 10 years and between \$202 billion and \$404 billion over the following 20 years. While these projected losses were substantial, they represented only a portion of what IRA investors stood to lose as a result of conflicted investment advice.

The Department expected that compliance with the 2016 Final Rule would deliver large gains for retirement investors by reducing these losses. The Department cited evidence that holding broker-dealer representatives to fiduciary standards at the State level does not impair access to their services. Additionally, the Department noted that financial services firms already were moving toward more fee-based advice models, considering flatter compensation models, and integrating technology. The Department anticipated that the rule would accelerate these types of innovations for the benefit of plan and IRA investors.

The 2016 Final Rule defined an investment advice fiduciary for purposes of Title I or Title II of ERISA in a way that would apply fiduciary status in a wider array of advice relationships than the five-part test in the 1975 regulation. The 2016 Final Rule generally covered: (1)

recommendations by a person who represents or acknowledges that they are acting as a fiduciary within the meaning of ERISA; (2) advice rendered pursuant to a written or verbal agreement, arrangement or understanding that the advice is based on the particular investment needs of the retirement investor; and, most expansively, (3) recommendations directed to a specific retirement investor or investors regarding the advisability of a particular investment or management decision with respect to securities or other investment property of the plan or IRA.

One main issue highlighted in the 2016 Final Rule involved the protection of retirement investors in the context of recommendations to roll over assets from workplace retirement plans to IRAs.²⁸ As the Department noted, decisions to take a benefit distribution or engage in rollover transactions are among the most, if not the most, important financial decisions that plan participants and beneficiaries and IRA owners and beneficiaries are called upon to make. The Department explained that when an individual is a participant in a workplace retirement plan, their employer or other plan sponsor has both the incentive and the fiduciary duty to facilitate sound investment choices, while in an IRA, both good and bad investment choices are more numerous, and investment advice providers often operate under conflicts of interest. The Department illustrated the consequence of these rollovers to both individuals and investment advice providers, by pointing out that rollovers from employee benefit plans to IRAs were expected to approach \$2.4 trillion cumulatively from 2016 through 2020.²⁹ Investment advice providers have a strong economic incentive to recommend that investors roll over assets into one of their institutions' IRAs, whether from a plan or from an IRA account at another financial institution, or even between different account types. The 2016 Final Rule also specifically superseded a 2005 Advisory Opinion, 2005–23A (commonly known as the Deseret Letter) which had opined that it is not fiduciary investment advice under Title I of ERISA to make a recommendation as to distribution options from an employee benefit plan, even if accompanied by a recommendation as to where the distribution would be invested.³⁰

On the same date it published the 2016 Final Rule, the Department also published two new administrative class exemptions from the prohibited transaction provisions of Title I and Title II of ERISA: the Best Interest Contract Exemption (BIC Exemption)³¹ and the Class Exemption for Principal Transactions in Certain Assets Between Investment Advice Fiduciaries and Employee Benefit Plans and IRAs (Principal Transactions Exemption).³² The Department granted the new exemptions with the objective of promoting the provision of investment advice that is in the best interest of retail investors such as plan participants and beneficiaries, IRA owners and beneficiaries, and certain plan fiduciaries, including small plan sponsors.

The new exemptions included conditions designed to protect the interests of the retirement investors receiving advice. The exemptions required investment advice fiduciaries to adhere to the following “Impartial Conduct Standards”: providing advice in retirement investors’ best interest; charging no more than reasonable compensation; and making no misleading statements about investment transactions and other important matters. In the case of IRAs and non-Title I plans, the exemption required these standards to be set forth in an enforceable contract with the retirement investor, which also was required to include certain warranties and disclosures. The exemption further provided that parties could not rely on the exemption if they included provisions in their contracts disclaiming liability for compensatory remedies or waiving or qualifying retirement investors’ right to pursue a class action or other representative action in court. In conjunction with the new exemptions, the Department also made amendments to pre-existing exemptions, namely PTEs 75–1, 77–4, 80–83, 83–1, 84–24 and 86–128, to require compliance with the Impartial Conduct Standards and to make certain other changes.³³

3. Litigation Over the 2016 Rulemaking

The 2016 Final Rule and related new and amended exemptions (collectively, the 2016 Rulemaking) was challenged in multiple lawsuits. In *National Association for Fixed Annuities v. Perez*, a district court in the District of

²⁸ See 81 FR 20946, 20964 (Apr. 8, 2016).

²⁹ *Id.* at 20949 fn. 7 (citing Cerulli Associates, “U.S. Retirement Markets 2015”).

³⁰ *Id.*

³¹ 81 FR 21002 (Apr. 8, 2016).

³² 81 FR 21089 (Apr. 8, 2016).

³³ 81 FR 21139 (Apr. 8, 2016); 81 FR 21147 (Apr. 8, 2016); 81 FR 21181 (Apr. 8, 2016); 81 FR 21208 (Apr. 8, 2016).

Columbia upheld the 2016 Rulemaking in the context of a broad challenge on multiple grounds.³⁴ Among other things, the court found that the 2016 Final Rule comports with both the text and the purpose of ERISA, and it noted “if anything, it is the five-part test—and not the current rule—that is difficult to reconcile with the statutory text. Nothing in the phrase ‘renders investment advice’ suggests that the statute applies only to advice provided ‘on a regular basis.’”³⁵ Relatedly, in *Market Synergy v. United States Department of Labor*, the U.S. Court of Appeals for the Tenth Circuit affirmed a district court’s decision similarly upholding the 2016 Rulemaking as it applied to fixed indexed annuities.³⁶

On March 15, 2018, however, the U.S. Court of Appeals for the Fifth Circuit (Fifth Circuit) overturned a district court’s decision upholding the validity of the 2016 Final Rule³⁷ and vacated the 2016 Rulemaking *in toto*, in *Chamber of Commerce v. United States Department of Labor* (*Chamber*).³⁸ The Fifth Circuit held that the 2016 Final Rule conflicted with ERISA section 3(21)(A)(ii) and Code section 4975(e)(3)(B). Specifically, the Fifth Circuit found that the 2016 Final Rule swept too broadly and extended to relationships that lacked “trust and confidence,” which the court stated were hallmarks of the common law fiduciary relationship that Congress intended to incorporate into the statutory definitions. The court concluded that “all relevant sources indicate that Congress codified the touchstone of common law fiduciary status—the parties’ underlying

relationship of trust and confidence—and nothing in the statute ‘requires’ departing from the touchstone.”³⁹

In addition to holding that the 2016 Final Rule conflicted with the statutory definitions in Title I and Title II of ERISA, the Fifth Circuit in *Chamber* also determined that the 2016 Rulemaking failed to honor the difference in the Department’s authority over employee benefit plans under Title I of ERISA and IRAs under Title II, by imposing “novel and extensive duties and liabilities on parties otherwise subject only to the prohibited transactions penalties.”⁴⁰ These included the conditions of the BIC Exemption and Principal Transactions Exemption that required financial institutions and individual fiduciary advisers to enter into contracts with their customers with specific duties, warranties, and disclosures, and forbade damages limitations and class action waivers.⁴¹ Under the Code, IRA investors do not have a private right of action.⁴² Instead, the primary remedy for a violation of the prohibited transaction provisions under the Code is the assessment of an excise tax.⁴³ In the Fifth Circuit’s view, the Department had effectively exceeded its authority by giving IRA investors the ability to bring a private cause of action that Congress had not authorized.⁴⁴

4. Field Assistance Bulletin No. 2018–02

In response to the Fifth Circuit’s vacatur of the 2016 Rulemaking, on May 7, 2018, the Department issued Field Assistance Bulletin 2018–02, Temporary Enforcement Policy on Prohibited

Transactions Rules Applicable to Investment Advice Fiduciaries (FAB 2018–02).⁴⁵ FAB 2018–02 announced that, pending further guidance, the Department would not pursue prohibited transaction claims against fiduciaries who were working diligently and in good faith to comply with the Impartial Conduct Standards for transactions that would have been exempted in the BIC Exemption and Principal Transactions Exemption, or treat such fiduciaries as violating the applicable prohibited transaction rules. In adopting the temporary enforcement policy, the Department cited uncertainty about fiduciary obligations and the scope of exemptive relief following the court’s opinion that could disrupt existing investment advice arrangements to the detriment of retirement plans, retirement investors, and financial institutions, as well as the significant resources some financial institutions had devoted towards compliance with the BIC Exemption and the Principal Transactions Exemption.

5. Subsequent Actions by the Department

On July 7, 2020, the Department proposed a new prohibited transaction class exemption under Title I and Title II of ERISA for investment advice fiduciaries with respect to employee benefit plans and IRAs, called “Improving Investment Advice for Workers & Retirees.”⁴⁶ The proposal stated it was in response to informal industry feedback seeking a permanent administrative class exemption based on FAB 2018–02.⁴⁷ On the same day, the Department issued a technical amendment to the Code of Federal Regulations (CFR) reinserting the 1975 regulation, reflecting the Fifth Circuit’s vacatur of the 2016 Final Rule.⁴⁸ The technical amendment also reinserted into the CFR Interpretive Bulletin 96–1 (IB 96–1) relating to participant investment education, which had been removed and largely incorporated into the text of the 2016 Final Rule. Additionally, the Department updated its website to reflect the fact that the pre-existing prohibited transaction exemptions that had been amended in the 2016 Rulemaking had been restored to their pre-amendment form, and also to reflect that the Department had withdrawn the Deseret Letter.

On December 18, 2020, the Department adopted the Improving

³⁴ *Nat’l Ass’n. for Fixed Annuities v. Perez*, 217 F.Supp.3d 1 (D.D.C. 2016) [hereinafter *NAFA*]. On December 15, 2016, the U.S. Court of Appeals for the District of Columbia denied an emergency request to stay application of the definition or the exemptions pending an appeal of the district court’s ruling. *Nat’l Ass’n. for Fixed Annuities v. Perez*, No. 16–5345, 2016 BL 452075 (D.C. Cir. 2016).

Investment Advice for Workers & Retirees exemption as PTE 2020–02.⁴⁹ The exemption provides relief that is similar in scope to the BIC Exemption and the Principal Transactions Exemption, but it does not include contract or warranty provisions. The exemption expressly covers prohibited transactions resulting from both rollover advice and advice on how to invest assets within a plan or IRA, and imposes new conditions on investment advice fiduciaries providing such advice. In particular, PTE 2020–02 mirrors the core of the BIC and Principal Transaction exemptions' requirements of best interest standards of conduct and policies and procedures to ensure the advice is provided consistent with those standards.

The preamble to PTE 2020–02 also included the Department's interpretation of when advice to roll over assets from an employee benefit plan to an IRA would constitute fiduciary investment advice under the 1975 regulation's five-part test. As in the 2016 Rulemaking, the Department again made clear in 2020 that rollover recommendations were a central concern in the regulation of fiduciary investment advice. Accordingly, the Department emphasized the importance to a retirement investor of the rollover decision, as well as the fact that investment advice providers may have a strong economic incentive to recommend that investors roll over assets into one of their institutions' IRAs.

The preamble interpretation confirmed the Department's continued view that the Deseret Letter was incorrect, and that a recommendation to roll assets out of a Title I Plan is advice with respect to moneys or other property of the plan and, if provided by a person who satisfies all of the requirements of the regulatory test, constitutes fiduciary investment advice. The preamble interpretation also discussed when a recommendation to roll over assets from an employee benefit plan to an IRA would satisfy the "regular basis" requirement. Additionally, the preamble set forth the Department's interpretation of the 1975 regulation's requirement of "a mutual agreement, arrangement, or understanding" that the investment advice will serve as "a primary basis for investment decisions." In April 2021, the Department issued Frequently Asked Questions (FAQs) that, among

other things, summarized aspects of the preamble interpretation.⁵⁰

The Department's preamble interpretation and certain FAQs were challenged in two lawsuits filed after the issuance of PTE 2020–02.⁵¹ On February 13, 2023, the U.S. District Court for the Middle District of Florida issued an opinion vacating the policy referenced in FAQ 7 (entitled "When is advice to roll over assets from an employee benefit plan to an IRA considered to be on a 'regular basis'?" and remanded it to the Department for future proceedings.⁵² On June 30, 2023, a magistrate judge in the Northern District of Texas filed a report with the judge's findings, conclusions, and recommendations, including that the court should vacate portions of PTE 2020–02 that permit consideration of actual or expected Title II investment advice relationships when determining Title I fiduciary status.⁵³

6. Other Regulatory Developments

U.S. Securities and Exchange Commission

Since the vacatur of the Department's 2016 Rulemaking, other regulators have considered and adopted enhanced standards of conduct for investment professionals as a method of addressing, among other things, conflicts of interest. At the Federal level, on June 5, 2019, the SEC finalized a regulatory package relating to conduct standards for broker-dealers and investment advisers. The package included Regulation Best Interest, which established a best interest standard applicable to broker-dealers when making a recommendation of any securities transaction or investment strategy involving securities to retail customers.⁵⁴ The SEC also issued its SEC Investment Adviser Interpretation regarding the conduct standards applicable to investment

advisers under the Advisers Act.⁵⁵ As part of the package, the SEC adopted new Form CRS, which requires registered investment advisers under the Advisers Act and registered broker-dealers to provide retail investors with a short relationship summary with specified information (SEC Form CRS).⁵⁶

According to the SEC, these actions were designed to enhance and clarify the standards of conduct applicable to broker-dealers and investment advisers, help retail investors better understand and compare the services offered and make an informed choice of the relationship best suited to their needs and circumstances, and foster greater consistency in the level of protections provided by each regime, particularly at the point in time that a recommendation is made.⁵⁷

The SEC's Regulation Best Interest enhanced the broker-dealer standard of conduct "beyond existing suitability obligations."⁵⁸ According to the SEC, this

[A]lign[ed] the standard of conduct with retail customers' reasonable expectations by requiring broker-dealers, among other things, to: Act in the best interest of the retail customer at the time the recommendation is made, without placing the financial or other interest of the broker-dealer ahead of the interests of the retail customer; and address conflicts of interest by establishing, maintaining, and enforcing policies and procedures reasonably designed to identify and fully and fairly disclose material facts about conflicts of interest, and in instances where [the SEC has] determined that disclosure is insufficient to reasonably address the conflict, to mitigate or, in certain instances, eliminate the conflict.⁵⁹

Regulation Best Interest's "best interest obligation" includes a Disclosure Obligation, a Care Obligation, a Conflict of Interest Obligation, and a Compliance Obligation. The Care Obligation requires broker-dealers, in making recommendations, to exercise reasonable diligence, care, and skill to:

- Understand the potential risks, rewards, and costs associated with the recommendation, and have a reasonable basis to believe that the recommendation could be in the best interest of at least some retail customers;
- Have a reasonable basis to believe that the recommendation is in the best interest of a particular retail customer based on that

⁴⁹ 85 FR 82798 (Dec. 18, 2020).

retail customer's investment profile and the potential risks, rewards, and costs associated with the recommendation and does not place the financial or other interest of the broker, dealer, or such natural person ahead of the interest of the retail customer; and

- Have a reasonable basis to believe that a series of recommended transactions, even if in the retail customer's best interest when viewed in isolation, is not excessive and is in the retail customer's best interest when taken together in light of the retail customer's investment profile and does not place the financial or other interest of the broker, dealer, or such natural person making the series of recommendations ahead of the interest of the retail customer.⁶⁰

The Conflict of Interest Obligation requires the broker-dealer to establish, maintain and enforce written policies and procedures reasonably designed to:

- Identify and at a minimum disclose, or eliminate, all conflicts of interest associated with such recommendations;
- Identify and mitigate any conflicts of interest associated with such recommendations that create an incentive for a natural person who is an associated person of a broker or dealer to place the interest of the broker, dealer, or such natural person ahead of the interest of the retail customer;
- Identify and disclose any material limitations placed on the securities or investment strategies involving securities that may be recommended to a retail customer and any conflicts of interest associated with such limitations, and prevent such limitations and associated conflicts of interest from causing the broker, dealer, or a natural person who is an associated person of the broker or dealer to make recommendations that place the interest of the broker, dealer, or such natural person ahead of the interest of the retail customer; and
- Identify and eliminate any sales contests, sales quotas, bonuses, and non-cash compensation that are based on the sales of specific securities or specific types of securities within a limited period of time.⁶¹

A conflict of interest is defined as “an interest that might incline a broker, dealer, or a natural person who is an associated person of a broker or dealer—consciously or unconsciously—to make a recommendation that is not disinterested.”⁶²

The SEC stated that “[t]he Commission has crafted Regulation Best Interest to draw on key principles underlying fiduciary obligations, including those that apply to investment advisers under the Advisers Act, while providing specific requirements to address certain aspects of the relationships between broker-dealers and their retail customers.”⁶³ The SEC

emphasized that, “[i]mportantly, regardless of whether a retail investor chooses a broker-dealer or an investment adviser (or both), the retail investor will be entitled to a recommendation (from a broker-dealer) or advice (from an investment adviser) that is in the best interest of the retail investor and that does not place the interests of the firm or the financial professional ahead of the interests of the retail investor.”⁶⁴ The SEC also noted that the standard of conduct cannot be satisfied through disclosure alone.⁶⁵

The best interest standard in the SEC's Regulation Best Interest applies to broker-dealers and their associated persons when they make a recommendation to a retail customer of any “securities transaction or an investment strategy involving securities (including account recommendations).” According to the SEC, this language encompasses recommendations to roll over or transfer assets in a workplace retirement plan account to an IRA, and recommendations to take a plan distribution.⁶⁶ However, the SEC also stated that while Regulation Best Interest applies to advice regarding a person's own retirement account such as a 401(k) account or IRA, it does not cover advice to workplace retirement plans themselves or to their legal representatives when they are receiving advice on the plan's behalf.⁶⁷

The SEC Investment Adviser Interpretation, published simultaneously with Regulation Best Interest, reaffirmed and in some cases clarified aspects of the fiduciary duty of an investment adviser under the Investment Advisers Act.⁶⁸ The SEC stated that “an investment adviser's fiduciary duty under the Investment Advisers Act comprises both a duty of care and a duty of loyalty.”⁶⁹ According to the SEC, “[t]his fiduciary duty is based on equitable common law principles and is fundamental to advisers' relationships with their clients under the Advisers Act.”⁷⁰ The fiduciary duty under the Federal securities laws requires an adviser “to adopt the principal's goals, objectives, or ends.”⁷¹ The SEC stated:

This means the adviser must, at all times, serve the best interest of its client and not subordinate its client's interest to its own. In other words, the investment adviser cannot

place its own interests ahead of the interests of its client. This combination of care and loyalty obligations has been characterized as requiring the investment adviser to act in the “best interest” of its client at all times.⁷²

The SEC further stated, “[t]he investment adviser's fiduciary duty is broad and applies to the entire adviser-client relationship.”⁷³

The SEC also adopted a new required disclosure of a “Form CRS Relationship Summary,” under which registered investment advisers under the Advisers Act and broker-dealers must provide retail investors with certain information about the nature of their relationship with their financial professional. One of the purposes of the Form CRS is to help retail investors better understand and compare the services and relationships that investment advisers and broker-dealers offer in a way that is distinct from other required disclosures under the Federal securities laws.⁷⁴ Form CRS also includes a link to a dedicated page on the SEC's investor education website, *Investor.gov*, which offers educational information about broker-dealers and investment advisers, and other materials.⁷⁵

State Legislative and Regulatory Developments

Also, since the vacatur of the Department's 2016 Rulemaking, there have been legislative and regulatory developments at the State level involving conduct standards. The Massachusetts Securities Division amended its regulations to apply a fiduciary conduct standard under which broker-dealers and their agents must “[m]ake recommendations and provide investment advice without regard to the financial or any other interest of any party other than the customer.”⁷⁶

The NAIC Model Regulation, updated in 2020, provides that insurance agents must act in the consumer's "best interest," as defined by the Model Regulation, when making a recommendation of an annuity, and insurers must establish and maintain a system to supervise recommendations so that the insurance needs and financial objectives of consumers at the time of the transaction are effectively addressed.⁷⁷ According to the NAIC, as of August 23, 2023, 43 jurisdictions have implemented the revisions to the model regulation.⁷⁸

The NAIC Model Regulation includes a best interest obligation comprised of a care obligation, a disclosure obligation, a conflict of interest obligation, and a documentation obligation, applicable to an insurance producer.⁷⁹ If these specific obligations are met, the producer is treated as satisfying the overarching best interest standard as expressed in the NAIC Model Regulation. The care obligation states that the producer, in making a recommendation, must exercise reasonable diligence, care and skill to:

- Know the consumer's financial situation, insurance needs and financial objectives;
- Understand the available recommendation options after making a reasonable inquiry into options available to the producer;
- Have a reasonable basis to believe the recommended option effectively addresses the consumer's financial situation, insurance needs and financial objectives over the life of the product, as evaluated in light of the consumer profile information; and
- Communicate the basis or bases of the recommendation.⁸⁰

The conflict of interest obligation requires the producer to "identify and avoid or reasonably manage and disclose material conflicts of interest, including material conflicts of interest related to an ownership interest."⁸¹ "Material conflict of interest" is defined as "a financial interest of the producer in the sale of an annuity that a reasonable person would expect to influence the impartiality of a recommendation," but the definition expressly carves out "cash compensation or non-cash

compensation" from treatment as sources of conflicts of interest.⁸² The NAIC Model Regulation also provides that it does not apply to transactions involving contracts used to fund an employee pension or welfare plan covered by ERISA.⁸³

The NAIC expressly disclaimed that its standard creates fiduciary obligations, and the obligations in the Model Regulation differ in significant respects from those applicable to broker-dealers in the SEC's Regulation Best Interest.⁸⁴ For example, in addition to disregarding compensation as a source of conflicts of interest, the specific care, disclosure, conflict of interest, and documentation requirements do not expressly incorporate the obligation not to put the producer's or insurer's interests before the customer's interests, even though compliance with their terms is treated as meeting the "best interest" standard. Similarly, the Model Regulation's care obligation does not repeat the "best interest" requirement but instead includes a requirement to "have a reasonable basis to believe the recommended option effectively addresses the consumer's financial situation, insurance needs and financial objectives" ⁸⁵ Additionally, the obligation to comply with the "best interest" standard is limited to the individual producer, as opposed to the insurer responsible for supervising the producer.

These regulatory changes cover many, but not all, of the assets held by retirement plans. Further, the SEC's Regulation Best Interest and the NAIC Model Regulation are each limited in important ways in terms of application to advice provided to ERISA plan fiduciaries although this is not the case with the Advisers Act fiduciary obligations. For example, Regulation Best Interest does not cover advice to workplace retirement plans or their representatives (such as an employee of a small business who is a fiduciary of

the business's 401(k) plan).⁸⁶ The NAIC Model Regulation does not apply to transactions involving contracts used to fund an employee pension or welfare plan covered by ERISA.⁸⁷ The Department believes that retirement investors and the regulated community are best served by an ERISA fiduciary standard that applies uniformly to all investments that retirement investors may make with respect to their retirement accounts. Amendments to the ERISA regulation are necessary to achieve that result.

7. Coordination With Other Agencies

Under Title I and Title II of ERISA, the Department has primary responsibility for the regulation of fiduciaries' advice to retirement investors. Because of the fundamental importance of retirement investments to workers' financial security and the tax-preferred status of plans and IRAs, Congress defined the scope of fiduciary coverage broadly and imposed stringent obligations on fiduciaries, including prohibitions on conflicted transactions that do not have direct analogues under the securities and insurance laws. The fiduciary standards and prohibited transaction rules set forth in Title I and Title II of ERISA, as applicable, broadly apply to covered fiduciaries, irrespective of the particular investment product they recommend or their status as investment advisers under the Advisers Act, broker-dealers, insurance agents, bankers, or other status. This proposed regulatory approach is designed to ensure that the standards and rules applicable under Title I and Title II of ERISA are broadly uniform as applied to retirement investors across different categories of investment advice providers and advisory relationships.

At the same time, however, many stakeholders have stressed the need to harmonize the Department's efforts with potential rulemaking and rulemaking activities by other regulators, including the SEC's standards of care for providing investment advice and the Commodity Futures Trading Commission's (CFTC) business conduct standards for swap dealers (and comparable SEC standards for security-based swap dealers). In addition, commenters have urged coordination with other agencies regarding IRA products and services.

As the SEC has adopted regulatory standards for broker-dealers that are

⁷⁸ NAIC Annuity Suitability & Best Interest Standard web page, <https://content.naic.org/cipr-topics/annuity-suitability-best-interest-standard>.

⁷⁹ A producer is defined in section 5.L. of the Model Regulation as "a person or entity required to be licensed under the laws of this state to sell, solicit or negotiate insurance, including annuities." Section 5.L. further provides that the term producer includes an insurer where no producer is involved.

⁸⁰ NAIC Model Regulation, at section 6(A)(1)(a).

⁸¹ *Id.* at section 6(A)(3).

based on fiduciary principles of care and loyalty also applicable to investment advisers under the Advisers Act, and the NAIC has adopted a model law that includes a best interest standard, the Department believes that it is possible to honor the unique regulatory structure imposed by the law governing tax-preferred retirement investments, adopt a regulatory approach that provides a broadly uniform standard for all retirement investors, as contemplated by Title I and Title II of ERISA, and avoid the imposition of obligations that conflict with investment professionals' obligations under other applicable laws. In particular, in the Department's view, PTE 2020–02 is consistent with the requirements of the SEC's Regulation Best Interest and the fiduciary obligations of investment advisers under the Advisers Act. Therefore, broker-dealers and investment advisers that have already adopted meaningful compliance mechanisms for Regulation Best Interest and the Advisers Act fiduciary duty, respectively, should be able to adapt easily to comply with the PTE.

Nevertheless, to better understand whether the proposed rule and exemptions would subject investment advice providers to requirements that conflict with or add to their obligations under other Federal laws, the Department has continued consulting and coordinating with the SEC; other securities, banking, and insurance regulators; the Department of the Treasury, including the Federal Insurance Office; and the Financial Industry Regulatory Authority (FINRA), the independent regulatory authority of the broker-dealer industry.

The Department has also continued consulting and coordinating with the Department of the Treasury and the Internal Revenue Service (IRS), particularly on the subject of IRAs, and will continue to do so through the rulemaking process. Although the Department has responsibility for issuing regulations and prohibited transaction exemptions under section 4975 of the Code, which applies to IRAs, the IRS maintains general responsibility for enforcing the excise tax applicable to prohibited transactions. The IRS's responsibilities extend to the imposition of excise taxes on fiduciaries who participate in prohibited transactions. As a result, the Department and the IRS share responsibility for addressing self-dealing by investment advice fiduciaries to tax-qualified plans and IRAs.

C. Purpose of the Proposed Rule and Summary of the Major Provisions

1. Purpose of the Proposed Rule

Since the 1975 rule was adopted, developments in retirement savings vehicles and in the investment advice marketplace have altered the way retirement investors interact with investment advice providers. In 1975, retirement plans were primarily defined benefit plans, which were typically managed by sophisticated investment professionals. IRAs were not major market participants and 401(k) plans were not yet in existence. Today, however, plan participants, IRA owners, and their beneficiaries exercise direct authority over their investments, and depend upon a wide range of investment professionals, including broker-dealers, advisers subject to the Advisers Act, insurance agents, and others on how to make complex decisions about the management of retirement assets.

These individual investors have far greater responsibility for decisions about their retirement savings than was true in 1975, when investment professionals directly managed plan investments. Individual investors routinely depend on the quality of the advice they receive from financial professionals who commonly hold themselves out as trusted advice providers. Because these professionals have inherent conflicts of interest, however, there is an ever-present danger that the investment advice the retirement investor receives will be driven, not by the best interest of the investor, but by the financial interests of the investment professional or firm whom they depend upon for advice that is in their interest.

Certainly, when an investment professional satisfies all five conditions of the 1975 regulation with respect to a given instance of advice, the investment professional is properly treated as a fiduciary in accordance with the parties' reasonable understanding of the nature of their relationship. However, the 1975 test, as applied to the current marketplace is underinclusive because it fails to capture many circumstances in which an investor would reasonably believe they were receiving advice from an investment professional who was rendering services to the investor based upon the investor's best interest. The Department's experience in the current marketplace is that the five-part test—in particular, the “regular basis” requirement and the requirement of “a mutual agreement, arrangement, or understanding” that the investment advice will serve as “a primary basis for

investment decisions”—too often work to defeat legitimate retirement investor expectations of impartial advice and allow some advice relationships to occur where there is no best interest standard.

These components of the five-part test are not found in the statute's text, and in today's marketplace, undermine legitimate investor understandings of a professional relationship centered around the investor's best interest. In other words, there are currently many situations where the retirement investor reasonably expects that their relationship with the advice provider is one in which the investor can (and should) place trust and confidence in the recommendation, yet which are not covered by the current regulation. This proposal attempts to reconcile the regulatory text with the both the reasonable expectations of the retirement investor along with the statutory text and purpose.

The proposed revised definition of an investment advice fiduciary under ERISA, as discussed in detail below, is consistent with the express text of the statutory definition and better protects the interests of retirement investors. The proposal comports with the broad language and protective purposes of the statute, while at the same time limiting the treatment of recommendations as ERISA *fiduciary* advice to those objective circumstances in which a retirement investor would reasonably believe that they can rely upon the advice as rendered by an investment professional who is acting in the investor's best interest, rather than merely promoting their own competing financial interests at the investor's expense.

An important premise of Title I and Title II of ERISA is that fiduciaries' conflicts of interest should not be left unchecked, but rather should be carefully regulated through rules requiring adherence to basic fiduciary norms and avoidance of prohibited transactions. The specific duties imposed on fiduciaries by Title I and Title II of ERISA stem from Congress' judgment regarding the best way to protect the public interest in tax-advantaged benefit arrangements that are critical to workers' financial and physical health. In contrast to the Federal securities laws and other regulatory regimes which can permit certain conflicts if prescribed disclosure obligations are met, the statutory prohibited transaction provisions in Title I and Title II of ERISA contemplate a more stringent approach for the protection of these tax-advantaged retirement savings. In this context, an

appropriately constructed regulatory definition of an investment advice fiduciary under Title I and Title II of ERISA is essential.

While Congress enacted ERISA to give special protections to retirement investors based on the central importance of retirement assets to individuals' financial security and the broader marketplace, ERISA's regulation of advice has failed to keep up with changes in the marketplace, in marked contrast to other regulatory regimes. As noted above, the Department's proposal follows the acts of other regulators who have similarly recognized the need to change the standards applicable to investment professionals to reflect current realities. It is appropriate that the Department, too, update its regulation to reflect the current marketplace, and to ensure that ERISA and the Code serve their protective purposes. When Congress enacted ERISA, it chose to impose a uniquely protective regime on the management and oversight of plan assets. The law's aim was to protect the interests of plan participants and beneficiaries by imposing especially high standards on those who exercise functional authority over plan investments, including rendering investment advice for a fee. As many Courts have noted, ERISA's obligations are the "highest known to the law."⁸⁸ The 1975 rule as applied to current market conditions, however, undermines ERISA's protective goals and defeats legitimate investor expectations of professional advice based upon their best interest. As discussed in more detail in the RIA, some retirement investors remain vulnerable to harm from conflicts of interest in the investment advice they receive because of the outdated 1975 regulation. The Department, as opposed to other regulators, remains uniquely positioned to create a regulatory definition of an investment advice fiduciary under ERISA that is uniformly applicable to all the types of investments that retirement investors make.

For example, the Department's proposal fills an important gap regarding advice to plans and plan fiduciaries. Advice from broker-dealers to plans and plan fiduciaries is not protected by the SEC's Regulation Best Interest. And the NAIC Model Regulation does not apply to transactions involving contracts used to fund retirement plans covered by ERISA. The fiduciary advice definition in Title I and Title II of ERISA, however,

extends more broadly to cover advice to plan and IRA fiduciaries as well as plan participants, beneficiaries, and IRA owners and beneficiaries. This provides important protections to the retirement investors saving through these plans. The proposed rule would apply uniformly to advice to retirement investors within the ambit of Title I and Title II of ERISA, as is consistent with the text of the statutory definition which draws no distinctions between these different categories of retirement investors.

The proposal also takes on special importance in creating uniform standards for investment transactions that are not covered by the Federal securities laws. Some types of plan and IRA investments, such as real estate, fixed indexed annuities, certificates of deposit, and other bank products, may not be subject to the SEC's Regulation Best Interest, and there are a number of persons who provide investment advice services that are neither subject to the SEC's Regulation Best Interest nor to the fiduciary obligations in the Advisers Act. An update to the regulatory definition of an investment advice fiduciary, for purposes of Title I and Title II of ERISA, will enhance protections of retirement investors. This approach reflects both the statutory text, which adopts a uniform approach to all assets held in tax-advantaged retirement plans, as well as sound public policy. When investment professionals hold themselves out to retirement investors as making recommendations based on the retirement investors' best interests, their recommendations should be driven by a uniform fiduciary obligation, and not by perceptions that one category of investment product is subject to lower regulatory standards than another.

Since ERISA's enactment, the Department has been expressly given the authority under Title I of ERISA to issue regulations defining terms in Title I and to grant administrative exemptions from the prohibited transactions provisions. Pursuant to the President's Reorganization Plan No. 4 of 1978,⁸⁹ which Congress ratified in 1984,⁹⁰ the Department's authority was expanded to include authority to issue regulations, rulings, and opinions on the definition of a fiduciary with respect to Title II plans under the Code (including IRAs) and to grant administrative prohibited transaction exemptions applicable to them.⁹¹ Thus, the Department has clear

authority to promulgate the regulatory definition of a fiduciary under both Title I and Title II of ERISA, and the Department has taken care in this proposal to honor the text and purposes of Title I and Title II of ERISA.

2. Summary of the Major Provisions of the Proposed Rule

The Department proposes that a person would be an investment advice fiduciary if they provide investment advice or make an investment recommendation to a retirement investor (*i.e.*, a plan, plan fiduciary, plan participant or beneficiary, IRA, IRA owner or beneficiary, or IRA fiduciary); the advice or recommendation is provided "for a fee or other compensation, direct or indirect," as defined in the proposed rule; and the person provides the advice or makes the recommendation in one of the following contexts:

- The person either directly or indirectly (*e.g.*, through or together with any affiliate) has discretionary authority or control, whether or not pursuant to an agreement, arrangement, or understanding, with respect to purchasing or selling securities or other investment property for the retirement investor;
- The person either directly or indirectly (*e.g.*, through or together with any affiliate) makes investment recommendations to investors on a regular basis as part of their business and the recommendation is provided under circumstances indicating that the recommendation is based on the particular needs or individual circumstances of the retirement investor and may be relied upon by the retirement investor as a basis for investment decisions that are in the retirement investor's best interest; or
- The person making the recommendation represents or acknowledges that they are acting as a fiduciary when making investment recommendations.⁹²

⁹² This proposed rule is accompanied by proposals (published elsewhere in the **Federal Register**) related to prohibited transaction exemptive relief. The proposals would amend existing PTEs, including PTE 2020-02, that allow, subject to protective conditions, investment advice fiduciaries to receive compensation and engage in transactions that otherwise would be prohibited. Unlike the PTEs that were a part of the 2016 Rulemaking, these PTEs do not, and the amendments would not, include required contracts or warranties that the Fifth Circuit objected to. These prohibited transaction exemptions also do not exempt a party from *status as a fiduciary*, and therefore, the proposals do not affect the scope of the regulatory definition of an investment advice fiduciary. Rather, the exemption proposals involve an exercise of the statutory authority afforded to the Department by Congress to grant administrative relief from the strict prohibited transaction provisions in Title I and Title II of ERISA for beneficial transactions involving plans and IRAs. See section 408(a) of ERISA (requiring the Department to make findings before granting an exemption that the exemption is administratively feasible, in the interests of the plan or IRA and of its participants and beneficiaries, and protective of

⁸⁸ *Donovan v. Bierwirth*, 680 F.2d 263, 272 n. 8 (2d. Cir. 1982), *cert denied*, 459 U.S. 1069 (1982).

⁸⁹ 5 U.S.C. App. 1 (2018).

⁹⁰ Sec. 1, Public Law 98-532, 98 Stat. 2705 (Oct. 19, 1984).

⁹¹ Sec. 102, 5 U.S.C. App. 1.

It is important to note that each required component of the new proposed regulatory definition would have to be satisfied with respect to any particular recommendation for the recommendation to constitute fiduciary investment advice. In accordance with the statute, fiduciary status is determined on a transactional basis. Under the statutory text, a person is a fiduciary with respect to advice “to the extent . . . [they] render[] investment advice for a fee or other compensation, direct or indirect.” The proposed rule, like the statute, applies fiduciary status on a transaction-by-transaction basis. One is only a fiduciary “to the extent” the person making the recommendation meets the rule’s requirements with respect to the particular advice transaction at issue.

The Department believes the test that it is proposing here better honors the statute and retirement investors’ legitimate expectations of impartial investment advice from trusted advice providers than the 1975 rule, while avoiding the danger of sweeping too broadly and covering recommendations that Congress might not have intended to cover.

The Department’s proposal is also intended to be responsive to the Fifth Circuit’s emphasis on relationships of trust and confidence. The current proposal is much more narrowly tailored than the 2016 Final Rule, which treated as fiduciary advice, any compensated investment recommendation as long as it was directed to a specific retirement investor regarding the advisability of a particular investment or management decision with respect to securities or other investment property of the plan or IRA. In contrast, the proposal provides that fiduciary status would attach only if compensated recommendations are made in certain specified contexts, each of which describes circumstances in which the retirement investor can reasonably place their trust and confidence in the advice provider. The Department believes the approach in this proposal is consistent with the statutory definition that applies fiduciary status on a functional (and therefore, transactional) basis.⁹³

the rights of participants and beneficiaries of such plan or IRA); section 4975(c)(2) of the Code (same).

⁹³ *Mertens v. Hewitt Assocs.*, 508 U.S. 248 (1993). In this regard, the Department notes that the SEC’s Regulation Best Interest also applies on a transactional basis. As stated by the SEC, “the provision of recommendations in a broker-dealer relationship is generally transactional and episodic, and therefore the final rule requires that broker-dealers act in the best interest of their retail customers at the time a recommendation is made and imposes no duty to monitor a customer’s

The proposed regulatory definition of an investment advice fiduciary includes the following paragraphs, which are discussed in greater detail below. Paragraph (c) of the proposed regulation defines the term “investment advice.” Paragraph (d) retains the provision in the existing regulation regarding “execution of securities transactions.” Paragraph (e) defines the phrase “for fee or other compensation, direct or indirect.” Paragraph (f) sets forth definitions used in the regulation. Paragraph (g) addresses applicability of the regulation. Paragraph (h) confirms the continued applicability of State law regulating insurance, banking, and securities.

3. Covered Advice and Recommendations

Paragraph (c)(1) of the proposed regulation provides that a person renders “investment advice” with respect to moneys or other property of a plan or IRA if the person makes a recommendation of any securities or other investment transaction or any investment strategy involving securities or other investment property to the plan, plan fiduciary, plan participant or beneficiary, IRA, IRA owner or beneficiary, or IRA fiduciary, subject to certain specified criteria. Paragraphs (c)(1)(i), (ii), and (iii) set forth three alternative contexts under which covered recommendations would constitute investment advice for purposes of the statutory definitions of an investment advice fiduciary in Title I and Title II of ERISA. As discussed herein, under each of these three contexts, the Department believes that retirement investors could reasonably place their trust and confidence in the advice provider. The proposal also makes clear that fiduciary status under Title I and/or Title II of ERISA may result from recommendations to any of the relevant plan actors, including not only the plan fiduciary, but also plan participants, IRA owners, and their beneficiaries. This is consistent with the Department’s longstanding position that advice to a plan participant or beneficiary is advice to the plan.⁹⁴

Paragraph (c)(1)(i)

In the first context, which is set forth in proposed paragraph (c)(1)(i), a person renders fiduciary “investment advice” within the meaning of ERISA section 3(21) if the person rendering advice

account following a recommendation.” 84 FR 33318, 33331 (July 12, 2019).

⁹⁴ IB 96–1, 29 CFR 2509.96–1. For purposes of this definition, a participant or beneficiary of the plan is not a “plan fiduciary” with respect to the plan.

either directly or indirectly (e.g., through or together with any affiliate) has discretionary authority or control, whether or not pursuant to an agreement, arrangement or understanding, with respect to purchasing or selling securities or other investment property for the retirement investor.

This proposed provision is similar to a provision in the 1975 rule that provides for investment advice fiduciary status if a covered recommendation is made and the person making the recommendation either directly or indirectly has “discretionary authority or control, whether or not pursuant to an agreement, arrangement, or understanding, with respect to purchasing or selling securities or property for the plan.”⁹⁵ The proposal would broaden this provision by referencing securities or other investment property of the retirement investor, not just an investment through a plan or IRA.

Persons that have discretionary authority or control over the investment of a retirement investor’s assets necessarily are in a relationship of trust and confidence with respect to the retirement investor.⁹⁶ Further, like the 1975 provision, the proposal would extend to circumstances in which the person making the recommendation “indirectly (e.g., through or together with any affiliate)” has discretionary authority or control over securities or other investment property; in this context, the use of “indirectly” generally refers to an arrangement in which an affiliate has discretionary authority or control.

Paragraph (c)(1)(ii)

The second context, in proposed paragraph (c)(1)(ii), sets forth that a person provides fiduciary “investment advice” if the person making the recommendation directly or indirectly (e.g., through or together with an affiliate) makes investment recommendations to investors on a

⁹⁵ See 29 CFR 2510.3–21(c)(1)(ii)(A) and 26 CFR 54.4975–9(c)(1)(ii)(A) (emphasis added). See also paragraph (d) of the proposal, which provides that a person is not a fiduciary merely because they have certain specific discretion in connection with the execution of securities transactions.

⁹⁶ As discussed below, the proposed rule would not impose on a fiduciary an automatic fiduciary obligation to continue to monitor an investment or a retirement investor’s activities to ensure the recommendations remain prudent and appropriate for the plan or IRA. The extent of a monitoring obligation would depend on whether the facts and circumstances indicate that the fiduciary has undertaken that responsibility. A fiduciary that assumes discretion over plan or IRA assets, however, would generally be viewed as assuming a monitoring obligation.

regular basis as part of their business and the recommendation is provided under circumstances indicating the recommendation is based on the particular needs or individual circumstances of the retirement investor and may be relied upon by the retirement investor as a basis for investment decisions that are in the retirement investor's best interest.

The proposed provision applies only to advice rendered by a person who makes investment recommendations to investors "on a regular basis as part of their business." As compared to the "regular basis" prong of the 1975 regulation, which the Department believes can work to undermine the current reasonable expectations of retirement investors, this proposed provision is properly focused on whether the advice provider is in the business of providing investment recommendations. The proposal's updated regular basis requirement avoids concerns that the rule could sweep so broadly as to cover, for example, the car dealer who suggests that a consumer finance a purchase by tapping into retirement funds. Retirement investors would not typically view such persons as making investment recommendations based on the retirement investors' individual financial interests, and the rule would not treat them as fiduciaries. Similarly, the human resources employees of a plan sponsor would not be considered investment advice fiduciaries under the proposed regulatory definition, because they do not regularly make investment recommendations to investors as part of their business.⁹⁷

However, the proposal's regular basis requirement would not defeat legitimate investor expectations by automatically excluding one-time advice from treatment as fiduciary investment advice.⁹⁸ For example, the proposed

rule would treat an insurance agent's recommendation to invest a retiree's retirement savings in an annuity as fiduciary advice if the agent regularly makes investment recommendations to investors, and the circumstances indicate that the recommendation is based on the retiree's particular needs and circumstances and may be relied upon for making an investment decision that is in the investor's best interest. Similarly, if the agent told the retiree that they were rendering fiduciary advice, the proposal would treat the recommendation as fiduciary advice even if it was one-time advice. Over time, the Department has become concerned that 1975 regulation's regular basis test served to defeat objective understandings of the nature of the professional relationship and the reliability of the advice as based on the investor's best interest.

By limiting the scope of those who may be an investment advice fiduciary to those who make investment recommendations as a regular part of their business, the Department believes that the proposed definition is appropriately tailored to those advice providers in whom retirement investors may reasonably place their trust and confidence. Whether someone gives investment recommendations on a regular basis as part of their business is an objective test based on the totality of facts and circumstances.⁹⁹ The Department invites comment on this approach, including the extent to which the Department should consider the investor's understandings as to whether the adviser regularly makes investment recommendations as part of their business. The Department seeks comment regarding examples of financial professionals who may be reasonably viewed by investors as

giving investment advice but would not in fact meet the requirements laid out in this provision.

Proposed paragraph (c)(1)(ii) further provides that, to count as fiduciary advice, the recommendation must be provided "under circumstances indicating that the recommendation is based on the particular needs or individual circumstances of the retirement investor and may be relied upon by the retirement investor as a basis for investment decisions that are in the retirement investor's best interest."

This provision of the proposal is similar to, but improves upon, the parts of the 1975 regulation that require a "mutual agreement, arrangement or understanding" that the advice will serve as "a primary basis" for the retirement investor's investment decisions. Instead of the "mutual agreement, arrangement, or understanding" requirement—which over time has encouraged investment professionals to hold themselves out as trusted advisers while disclaiming fiduciary status in the fine print—the proposal would focus on the objective "circumstances" surrounding the recommendation, including how the investment professional held themselves out to the retirement investor and described the services offered. The Department believes that the proposed language will better avoid loopholes and fine print disclaimers, while properly focusing on a reasonable understanding of the nature of their relationship.

Further, the proposal does not include the 1975 regulation's "primary basis" requirement, which has proved difficult to interpret and untethered from the extent to which the recommendation was presented as advice upon which the investor could rely in making a decision.¹⁰⁰ Instead, the proposal has a requirement that the circumstances indicate that the recommendation "may be relied upon by the retirement investor as a basis for investment decisions that are in the retirement investor's best interest."

Recommendations that meet this test can be outcome-determinative for the investor and are appropriately treated as fiduciary advice when the elements of the proposed rule are satisfied.

In determining whether proposed paragraph (c)(1)(ii) is satisfied, the Department intends to examine the

other compensation." Findings, Conclusions, and Recommendations of the United States Magistrate Judge, *FACC*, No. 3:22-CV-00243-K-BT, 2023 WL 5682411, at *22 (N.D. Tex. June 30, 2023) (quoting ERISA section 3(21)(A)(ii), 29 U.S.C. 1002(21)(A)(ii)) (emphasis in original).

⁹⁹ The reference to "investment recommendations" here and elsewhere in the proposal does not indicate that the proposal is limited to broker-dealers, or parties who regularly provide advice or make recommendations in the securities or banking industries. The scope of the regulation would extend to recommendations involving securities or other investment property. Therefore, for example, insurance agents who regularly make recommendations to customers with respect to the purchase of annuity contracts would be considered to make investment recommendations to investors on a regular basis as part of their business. Proposed paragraph (f)(11) provides that the term "investment property" does not include health insurance policies, disability insurance policies, term life insurance policies, or other property to the extent the policies or property do not contain an investment component.

⁹⁷ The Department also would not consider salaries of human resources employees of the plan sponsor to be a fee or other compensation in connection with or as a result of the educational services and materials that they provide to plan participants and beneficiaries. Further, the proposed rule does not alter the principles articulated in ERISA Interpretive Bulletin 75-8, D-2 (29 CFR 2509.75-8) (IB 75-8). IB 75-8 provides that persons who perform purely administrative functions for an employee benefit plan, within a framework of policies, interpretations, rules, practices and procedures made by other persons, but who have no power to make decisions as to plan policy, interpretations, practices or procedures, are not fiduciaries with respect to the plan by virtue of those purely ministerial functions.

⁹⁸ As noted by the magistrate judge in *Federation of Americans for Consumer Choice v. United States Dept. of Labor*, the Fifth Circuit's opinion "did not foreclose that Title I duties may reach those fiduciaries who, as aligned with Title I's text, render advice, even for the first time, 'for a fee or

¹⁰⁰ See Preamble to Prohibited Transaction Exemption 2020-02, Improving Investment Advice for Workers & Retirees, 85 FR 82798, 82808 (Dec. 18, 2020) (discussing comments on whether the test focuses on "a" primary basis or "the" primary basis).

ways investment advice providers market themselves and describe their services. For example, some stakeholders have previously expressed concern that investment advice providers that adopt titles such as financial consultant, financial planner, and wealth manager, are holding themselves out as acting in positions of trust and confidence while simultaneously disclaiming status as an ERISA fiduciary.¹⁰¹ In the Department's view, an investment advice provider's use of such titles routinely involves holding themselves out as making investment recommendations that will be based on the particular needs or individual circumstances of the retirement investor and may be relied upon as a basis for investment decisions that are in the retirement investor's best interest.

Of course, whether a recommendation is provided under circumstances indicating that it is based on the particular needs or individual circumstances of the retirement investor and that it may be relied upon as a basis for investment decisions that are in the retirement investor's best interest is only part of the consideration. Even if a recommendation satisfies a portion of the definition, it is not fiduciary investment advice unless each aspect is satisfied (e.g., to satisfy paragraph (c)(1)(ii), the person must also (directly or indirectly) make investment recommendations on a regular basis as part of their business).

The Department invites comments on the extent to which particular titles are commonly perceived to convey that the investment professional is providing individualized recommendations that may be relied upon as a basis for investment decisions in a retirement investor's best interest (and if not, why such titles are used). The Department also requests comment on whether other types of conduct, communication, representation, and terms of engagement of investment advice providers should merit similar treatment.

Paragraph (c)(1)(iii)

The third context identified in the proposal, in proposed paragraph (c)(1)(iii), is if the person making recommendations represents or acknowledges that they are acting as a fiduciary when making investment recommendations. An investment advice provider that acknowledges fiduciary status has expressly agreed that the customer may place trust and confidence in them. Furthermore, as discussed in the Fifth Circuit's opinion,

honesty is a general premise of a common law fiduciary relationship.¹⁰² This provision of the proposal would ensure that parties making a fiduciary representation or acknowledgment cannot subsequently deny their fiduciary status if a dispute arises, but rather must honor their words.

For purposes of the proposal, paragraph (c)(1)(iii) is not limited to the circumstances in which the person specifically represents that they are a fiduciary for purposes of Title I or Title II of ERISA, or specifically cites any particular statutory provisions. It is enough that the investment advice provider told the retirement investor that the investment advice or investment recommendations were or will be made in a fiduciary capacity. As with the other contexts identified in proposed paragraph (c)(1), this is intended to align fiduciary status with the retirement investor's reasonable expectations. A retirement investor who is told by a person that the person will be acting as a fiduciary reasonably and appropriately places their trust and confidence in such a person.

In the retirement context, the Department has stressed the importance of clarity regarding the nature of an advice relationship and has encouraged retirement investors to ask advice providers about their status as an ERISA fiduciary with respect to retirement accounts and seek a written statement of the advice provider's fiduciary status. The Department's FAQs entitled *Choosing the Right Person to Give You Investment Advice: Information for Investors in Retirement Plans and Individual Retirement Accounts* state "A written statement helps ensure that the fiduciary nature of the relationship is clear to both you and the investment advice provider at the time of the transaction, and limits the possibility of miscommunication."¹⁰³

Many retirement investors may receive a written fiduciary acknowledgment due to compliance obligations of an investment advice provider. For example, retirement investors that are plan fiduciaries entering into an investment advice services arrangement on behalf of the plan are likely to receive an acknowledgment of fiduciary status from the provider as part of the disclosure obligations under ERISA section 408(b)(2) and the regulations

thereunder.¹⁰⁴ Further, an upfront written acknowledgment of fiduciary status is a requirement of several prohibited transaction exemptions available to investment advice fiduciaries, including the statutory exemption added by Congress at ERISA section 408(b)(14)¹⁰⁵ and the Department's broad administrative exemption, PTE 2020-02.¹⁰⁶

As discussed in the preamble to PTE 2020-02, the Department believes that parties seeking to provide investment advice to retirement investors and relying on the exemption should, at a minimum, make a conscious up-front determination of whether they are acting as fiduciaries; tell their retirement investor customers that they are rendering advice as fiduciaries; and, based on their conscious decision to act as fiduciaries, implement and follow the exemption's conditions.¹⁰⁷

Disclaimers

Paragraph (c)(1)(v) of the proposal addresses the impact of disclaimers on parties' status as investment advice fiduciaries. The proposed paragraph provides that written statements by a person disclaiming status as a fiduciary under the Act, the Code, or this regulation, or disclaiming any of the conditions set forth in paragraph (c)(1)(ii), will not control to the extent they are inconsistent with the person's oral communications, marketing materials, applicable State or Federal law, or other interactions with the retirement investor. The Department's intent in including this paragraph in the proposal is to permit parties to define the nature of their relationship, but also to ensure that any disclaimer be consistent with oral communications or actions, marketing material, State and Federal law, and other interactions based on all relevant facts and circumstances. When the disclaimer is at odds with the investment advice provider's oral communications, marketing material, State or Federal law, or other interactions, the disclaimer is insufficient to defeat the retirement investor's legitimate expectations.¹⁰⁸

4. Recommendations Regarding Securities Transactions or Other Investment Transactions or Investment Strategies

The definition of “investment advice” in proposed paragraph (c)(1) requires that there be “a recommendation regarding securities transactions or other investment transactions or investment strategies.”

Recommendation

Whether a person has made a “recommendation” is a threshold element in establishing the existence of fiduciary investment advice. For purposes of the proposed rule, the Department views a recommendation as a communication that, based on its content, context, and presentation, would reasonably be viewed as a suggestion that the retirement investor engage in or refrain from taking a particular course of action. The analysis would apply equally to a communication that is made orally or in writing and would include electronic communications. The determination of whether a recommendation has been made would be an objective rather than a subjective inquiry.

In this regard, the more individually tailored the communication is to a specific retirement investor or investors about, for example, a security, investment property, or investment strategy, the more likely the communication will be viewed as a recommendation; however, the Department cautions that the fact that a communication is made to a group rather than an individual would not be dispositive of whether a recommendation exists. Additionally, providing a selective list of securities to a particular retirement investor as appropriate for the investor would be a recommendation as to the advisability of acquiring securities even if no recommendation is made with respect to any one security. Furthermore, a series of actions, taken directly or indirectly (e.g., through or together with any affiliate), that may not constitute a recommendation when each action is viewed individually may amount to a recommendation when considered in the aggregate. Even if an action rises to the level of a recommendation, the advice is only fiduciary investment advice if the rest of the regulatory test is met.

In evaluating whether a recommendation has been made under

advice fiduciary, and would not extend to a circumstance in which a financial professional has investment discretion over a retirement investor's assets.

the proposal, the Department intends to take an approach similar to that taken by the SEC and FINRA in the broker-dealer context. In the SEC's Regulation Best Interest, the SEC stated that it would apply the term as currently interpreted with respect to broker-dealer regulation for purposes of the suitability obligations, to achieve efficiencies for broker-dealers.¹⁰⁹ The Department likewise believes that efficiencies will apply if it adopts a similar approach.

In the Regulation Best Interest release, the SEC stated,

[T]he determination of whether a broker-dealer has made a recommendation that triggers application of Regulation Best Interest should turn on the facts and circumstances of the particular situation and therefore, whether a recommendation has taken place is not susceptible to a bright line definition. Factors considered in determining whether a recommendation has taken place include whether the communication “reasonably could be viewed as a ‘call to action’” and “reasonably would influence an investor to trade a particular security or group of securities.” The more individually tailored the communication to a specific customer or a targeted group of customers about a security or group of securities, the greater the likelihood that the communication may be viewed as a “recommendation.”¹¹⁰

The SEC did not include a formal definition of a recommendation in Regulation Best Interest, based on its view that the concept of a recommendation is fact-specific and not conducive to an express definition.¹¹¹ In drafting this proposal, the Department has worked to ensure alignment with the regulatory regimes of the SEC and other regulatory agencies, and is proposing a similar approach.

In the Department's view, the framework established by the SEC for broker-dealers is consistent with ordinary understandings of “advice” and familiar to the broker-dealers that are regulated by the SEC. Accordingly, the Department would consider a recommendation for purposes of the SEC's Regulation Best Interest as a recommendation for purposes of this proposed regulation. The Department seeks comment on whether the approach taken in the proposal is sufficiently clear, or whether an express definition would be preferable.

Definition of the phrase “recommendation of any securities transaction or other investment

¹⁰⁹ Regulation Best Interest release, 84 FR 33318, 33335 (July 12, 2019); *see id.* at fn. 161 (providing citations to relevant FINRA guidance, including on the definition and contours of the term “recommendation”).

¹¹⁰ *Id.*

¹¹¹ *Id.*

transaction or any investment strategy involving securities or other investment property.”

Proposed paragraph (f)(10) defines the phrase “recommendation of any securities transaction or other investment transaction or any investment strategy involving securities or other investment property.” This phrase largely parallels the language in the SEC's Regulation Best Interest, which applies to broker-dealers’ “recommendation of any securities transaction or investment strategy involving securities (including account recommendations).”¹¹² The phrase's broader reference to “other investment property” reflects the differences in jurisdiction between the SEC and the Department.

Under proposed paragraph (f)(10), the phrase “recommendation of any securities transaction or other investment transaction or any investment strategy involving securities or other investment property” is defined as recommendations:

- As to the advisability of acquiring, holding, disposing of, or exchanging, securities or other investment property, as to investment strategy, or as to how securities or other investment property should be invested after the securities or other investment property are rolled over, transferred, or distributed from the plan or IRA;
- As to the management of securities or other investment property, including, among other things, recommendations on investment policies or strategies, portfolio composition, selection of other persons to provide investment advice or investment management services, selection of investment account arrangements (e.g., account types such as brokerage versus advisory) or voting of proxies appurtenant to securities; and
- As to rolling over, transferring, or distributing assets from an employee benefit plan or IRA, including recommendations as to whether to engage in the transaction, and the amount, the form, and the destination of such a rollover, transfer, or distribution.

Components of these proposed covered recommendations are discussed below.

Recommendations Involving Securities, Other Investment Property, and Investment Strategy

Paragraph (f)(10)(i) of the proposal describes, as covered recommendations, recommendations as to “the advisability of acquiring, holding, disposing of, or exchanging, securities or other investment property, as to investment strategy, or as to how securities or other investment property should be invested after the securities or other investment property are rolled over, transferred, or

¹¹² 17 CFR 240.15l–1(a)(1).

distributed from the plan or IRA.” Similar to the SEC and FINRA, the Department intends to interpret “investment strategy” broadly, to include “among others, recommendations generally to use a bond ladder, day trading . . . or margin strategy involving securities, irrespective of whether the recommendations mention particular securities.”¹¹³

The reference to “other investment property” is intended to capture other investments made by plans and IRAs that are not securities. This includes, but would not be limited to, non-securities annuities, banking products, and digital assets (regardless of status as a security). The Department does not see any basis for differentiating advice regarding investments in CDs, including investment strategies involving CDs (e.g., laddered CD portfolios), from other investment products, and therefore would interpret paragraph (f)(10) to cover such recommendations.

The Department proposes that the term investment property, however, not include health insurance policies, disability insurance policies, term life insurance policies, and other property to the extent the policies or property do not contain an investment component. This is confirmed in a proposed definition of “investment property” in paragraph (f)(11). Although there can be situations in which a person recommending group health or disability insurance, for example, effectively exercises such control over the decision that the person is functionally exercising discretionary control over the management or administration of the plan as described in ERISA section 3(21)(A)(i) or section 3(21)(A)(iii), the Department does not believe that the definition of investment advice in ERISA’s statutory text is properly interpreted or understood to cover a recommendation to purchase group health, disability, term life insurance, or similar insurance policies that do not have an investment component.

Recommendations as to How Securities or Other Investment Property Should Be Invested After Rollover, Transfer, or Distribution

Proposed paragraph (f)(10)(i) also references recommendations “as to how securities or other investment property should be invested after the securities or other investment property are rolled

over, transferred, or distributed from the plan or IRA.” This proposed provision addresses an important concern of the Department that investment advice providers should not be able to avoid fiduciary responsibility for a rollover recommendation by focusing solely on the investment of assets *after* they are rolled over from the plan. In many or most cases, a recommendation to a plan participant or beneficiary regarding the investment of securities or other investment property after a rollover, transfer, or distribution involves an implicit recommendation to the participant or beneficiary to engage in the rollover, transfer, or distribution. Certainly, a prudent and loyal fiduciary generally could not make a recommendation on how to invest assets currently held in a plan after a rollover, without even considering the logical alternative of leaving the assets in the plan or evaluating how that option compares with the retirement investor’s likely investment experience post-rollover. A fiduciary would violate ERISA’s 404 obligations if it recommended that a retirement investor roll the money out of the plan without proper consideration of how the money might be invested after the rollover.

Moreover, even in those relatively rare circumstances in which there is no implicit rollover recommendation, advice to a plan participant on how to invest assets currently held in an ERISA-covered plan is “advice with respect to moneys or other property of such plan” within the meaning of section 3(21)(A)(ii) of ERISA, inasmuch as the assets at issue are still held by the plan. The Department requests comments on the proposed language, and on whether this approach will appropriately protect the interests of plan participants and beneficiaries, or whether another approach would be more protective.

Recommendations on Strategies, Management of Securities or Other Investment Property, and Account Types

Paragraph (f)(10)(ii) of the proposed rule describes, as covered recommendations, recommendations as to the management of securities or other investment property, including, among other things, recommendations on investment policies or strategies, portfolio composition, selection of other persons to provide investment advice or investment management services, selection of investment account arrangements (e.g., account types such as brokerage versus advisory), or the voting of proxies appurtenant to securities. The statutory text broadly

refers to “investment advice . . . with respect to any moneys or other property of such plan.” Recommendations as to investment management or strategy fall within the most straightforward reading of the statutory text. Accordingly, the proposed regulation makes clear that covered investment advice is not artificially limited solely to recommendations to buy, sell, or hold particular securities or investment property to the exclusion of all the other important categories of investment advice that investment professionals routinely provide.

This provision of the proposed regulation also makes clear that recommendations as to the selection of investment account arrangements would be covered. Accordingly, a recommendation to move from a commission-based account to an advisory fee-based account (or vice versa) would be a covered recommendation. The provision is consistent with the SEC’s Regulation Best Interest and the Advisers Act’s fiduciary obligations.¹¹⁴

Recommendation on the Selection of Other Persons To Provide Investment Advice or Investment Management

Proposed paragraph (f)(10)(ii) extends to recommendations as to “selection of other persons to provide investment advice or investment management services.” Consistent with the Department’s longstanding position, the proposed regulation would cover the recommendation of another person to be entrusted with investment advice or investment management authority over retirement assets. Such recommendations are often critical to the proper management and investment of those assets and are fiduciary in nature if the other conditions of the proposed definition are satisfied. Recommendations of investment advisers or managers are no different than recommendations of investments that the plan or IRA may acquire and are often, by virtue of the track record or

¹¹³ Regulation Best Interest release, 84 FR 33318, 33339 (July 12, 2019) (citing FINRA Rule 2111.03 and FINRA Regulatory Notice 12–25, available at <https://www.finra.org/rules-guidance/notices/12-25>).

¹¹⁴ 17 CFR 240.15l–1(a)(1) (“A broker, dealer, or a natural person who is an associated person of a broker or dealer, when making a recommendation of any securities transaction or investment strategy involving securities (*including account recommendations*) to a retail customer, shall act in the best interest of the retail customer at the time the recommendation is made, without placing the financial or other interest of the broker, dealer, or natural person who is an associated person of a broker or dealer making the recommendation ahead of the interest of the retail customer.”) (emphasis added); SEC Investment Adviser Interpretation, 84 FR at 33674 (“An adviser’s fiduciary duty applies to all investment advice the investment adviser provides to clients, including advice about investment strategy, engaging a sub-adviser, and account type.”).

information surrounding the capabilities and strategies that are employed by the recommended fiduciary, inseparable from recommendations as to the types of investments that the plan or IRA will acquire. For example, the assessment of an investment fund manager or management is often a critical part of the analysis of which fund to pick for investing plan or IRA assets.

Under this proposal, the Department does not intend to suggest, however, that a person could become a fiduciary merely by engaging in the normal activity of marketing themselves as a potential fiduciary to be selected by a plan fiduciary or IRA owner, without making a recommendation of a securities transaction or other investment transaction or any investment strategy involving securities or other investment property. Touting the quality of one's own advisory or investment management services would not trigger fiduciary obligations. This view is made clear by the language in proposed paragraph (f)(10)(ii) that extends to recommendations of "other persons" to provide investment advice or investment management services.

However, this discussion should not be read to exempt a person from being a fiduciary with respect to any of the investment recommendations covered by proposed paragraphs (c)(1) and defined in proposed paragraph (f)(10). There is a line between an investment advice provider making claims as to the value of its own advisory or investment management services in marketing materials, on the one hand, and making recommendations to retirement investors on how to invest or manage their savings, on the other. An investment advice provider can recommend that a retirement investor enter into an advisory relationship with the provider without acting as a fiduciary. But when the investment advice provider recommends, for example, that the investor pull money out of a plan or invest in a particular fund, that advice may be given in a fiduciary capacity even if part of a presentation in which the provider is also recommending that the person enter into an advisory relationship. As proposed, the complete facts and circumstances surrounding each piece of advice would be considered. The Department believes that this is consistent with the functional fiduciary test laid out in the statute in which an entity is an investment advice fiduciary to the extent that they satisfy the definition. Just because one piece of advice is not fiduciary investment advice (here, the "hire me" recommendation) does not mean that

the rest of the advice is necessarily excluded from the definition (here, the advice to pull money out of the plan and invest in a particular fund). The investment advice fiduciary could not prudently recommend that a plan participant roll money out of a plan into investments that generate a fee for the fiduciary but leave the participant in a worse position than if the participant had left the money in the plan. Thus, when a recommendation to "hire me" effectively includes a recommendation on how to invest or manage plan or IRA assets (e.g., whether to roll assets into an IRA or plan or how to invest assets if rolled over), that recommendation would need to be evaluated separately under the provisions in the proposed regulation.¹¹⁵

Proxy Voting Appurtenant to Ownership of Shares of Corporate Stock

Proposed paragraph (f)(10)(ii) also extends to recommendations as to the "voting of proxies appurtenant to securities." The Department has long viewed the exercise of ownership rights as a fiduciary responsibility; consequently, advice or recommendations on the exercise of proxy or other ownership rights are appropriately treated as fiduciary in nature if the other conditions of the regulation are satisfied.¹¹⁶

Similar to other types of broad, generalized guidance that would not rise to the level of investment advice, however, guidelines or other information on voting policies for proxies that are provided to a broad class of investors without regard to a client's individual interests or investment policy and that are not directed or presented as a recommended policy for the plan or IRA to adopt, would not rise to the level of a covered recommendation under the proposal. Similarly, a recommendation addressed to all shareholders in an SEC-required proxy statement in connection with a shareholder meeting of a company

whose securities are registered under Section 12 of the Exchange Act, for example, soliciting a shareholder vote on the election of directors and the approval of other corporate action, would not, under the proposed rule, constitute fiduciary investment advice from the person who creates or distributes the proxy statement.

Recommendations on Rollovers, Benefit Distributions, or Transfers From Plan or IRA

Proposed paragraph (f)(10)(iii) describes, as a category of covered recommendations, recommendations "as to rolling over, transferring, or distributing assets from an employee benefit plan or IRA, including recommendations as to whether to engage in the transaction, and the amount, the form, and the destination of such a rollover, transfer, or distribution." This aspect of the proposal is consistent with the Department's longstanding interest in protecting retirement investors in the context of a recommendation to roll over employee benefit plan assets to an IRA, as well as other recommendations to roll over, transfer, or distribute assets from a plan or IRA.

The Department continues to believe that decisions to take a benefit distribution or engage in rollover transactions are among the most, if not the most, important financial decisions that plan participants and beneficiaries, and IRA owners and beneficiaries are called upon to make. The Department continues to believe that advice provided in connection with a rollover decision, even if not accompanied by a specific recommendation on how to invest assets, should be treated as fiduciary investment advice. A distribution recommendation involves either advice to change specific investments in the plan or to change fees and services directly affecting the return on those investments. Even if the assets would not be covered by Title I or Title II of ERISA when they are moved outside the plan or IRA, the recommendation to change the plan or IRA investments is investment advice under Title I or Title II of ERISA.

Thus, recommendations on distributions (including rollovers or transfers into another plan or IRA) or recommendations to entrust plan assets to a particular IRA provider would fall within the scope of investment advice in this proposed regulation, and would be covered by Title I of ERISA, including the enforcement provisions of section 502(a). Further, in the Department's view, the evaluation of whether a recommendation constitutes

¹¹⁵ The Department believes this approach is consistent with the SEC's approach in Regulation Best Interest. In FAQs, the SEC described a scenario involving broker-dealer communications with a prospective retail customer that would not rise to the level of a recommendation. However, the SEC cautioned that a recommendation made in the context of a "hire me" conversation or otherwise would be subject to Regulation Best Interest. See Questions on Regulation Best Interest, available at <https://www.sec.gov/tm/faq-regulation-best-interest>.

¹¹⁶ See Fiduciary Duties Regarding Proxy Voting and Shareholder Rights, 85 FR 81658 (Dec. 16, 2020) ("In connection with proxy voting, the Department's longstanding position is that the fiduciary act of managing plan assets includes the management of voting rights (as well as other shareholder rights) appurtenant to shares of stock.").

fiduciary investment advice should be the same regardless of whether it is a recommendation to take a distribution or make a rollover to an IRA or a recommendation not to take a distribution or to keep assets in a plan.

The proposal's approach also aligns with the SEC's Regulation Best Interest and Advisers Act fiduciary obligations, which extend to account recommendations generally as well as recommendations to roll over or transfer assets from one type of account to another.¹¹⁷

5. Application of Paragraph (c)(1)

The proposal provides a general rule under which investment advice providers could determine their status through application of the facts and circumstances surrounding their interactions with their customers. To aid parties in conducting the analysis, the Department provides the following discussion of the application of the general rule in certain common circumstances and requests comment on the discussion. The Department also seeks comment on whether any adjustment should be made to the regulatory text to address issues discussed herein.

Sophisticated Retirement Investors

The proposed regulation does not include any special provision for recommendations to sophisticated advice recipients. Rather, under the proposal, fiduciary status would turn on the application of proposed paragraph (c)(1). In the absence of investment discretion (see proposed paragraph (c)(1)(i)) or a fiduciary acknowledgment (see proposed paragraph (c)(1)(iii)), the investment advice provider's fiduciary or non-fiduciary status would depend on the parties' understandings under the particular facts and circumstances (see proposed paragraph (c)(1)(ii)).

The Department acknowledges that some commenters in previous rulemakings have asserted that a specific "counterparty" provision is necessary to avoid limiting plan and IRA investors' choices in investment transactions.¹¹⁸ Commenters have suggested that the Department should adopt certain metrics, such as wealth or income, as conclusively establishing that the retirement investor has sufficient expertise and sophistication

to foreclose fiduciary status of an advice provider. The Department is unaware, however, of compelling evidence that wealth and income are strong proxies for financial sophistication or inconsistent with a relationship of trust and confidence.¹¹⁹ Moreover, and independently, nothing in the statute's text suggests that Congress intended to categorically deny fiduciary protection to "sophisticated investors." Instead of a specific "counterparty" provision or a provision for sophisticated plan- and IRA-level fiduciaries, proposed paragraph (c)(1)(ii) generally states an appropriate test for fiduciary status to apply to a covered recommendation, even if made to a plan or IRA fiduciary. To the extent counterparties wish to avoid fiduciary status, they can avoid structuring their relationships to fall within the circumstances described in that subparagraph.

In the context of "wholesaling" activity, which involves communications by product manufacturers or other financial service providers to financial intermediaries who then directly advise plans, participants, beneficiaries, and IRA owners and beneficiaries, the Department believes that communications to financial intermediaries would typically fall outside the scope of proposed paragraph (c)(1)(ii) because they would not involve recommendations based on the particular needs or individual circumstances of the plan or IRA serviced by the intermediary. There may also be other circumstances in which application of proposed paragraph (c)(1)(ii) would not result in a covered recommendation being treated as fiduciary investment advice. In general, however, the Department envisions that proposed paragraph (c)(1)(ii) would apply broadly to recommendations to plan and IRA fiduciaries acting on behalf of plans and IRAs.

More fundamentally, the Department rejects the purported dichotomy between a mere "sales" recommendation to a counterparty, on the one hand, and advice, on the other, in the context of the retail market for investment products. As reflected in recent regulatory developments from both the SEC and NAIC, financial service industry marketing materials, and the industry's comment letters reciting the guidance they provide to investors, sales and advice typically go hand in hand in the retail market.

In the Department's view, the updated conduct standards adopted by the SEC and the NAIC also reflect an acknowledgment of the fact that broker-dealers and insurance agents commonly provide paid investment and annuity recommendations to their customers. The SEC stated in the Regulation Best Interest release that "there is broad acknowledgment of the benefits of, and support for, the continuing existence of the broker-dealer business model, including a commission or other transaction-based compensation structure, as an option for retail customers seeking investment recommendations."¹²⁰ The NAIC Model Regulation, section 6.5.M defines a recommendation as "advice provided by a producer to an individual consumer that was intended to result or does result in a purchase, an exchange or a replacement of an annuity in accordance with that advice." Further, "cash compensation" is defined as "any discount, concession, fee, service fee, commission, sales charge, loan, override, or cash benefit received by a producer in connection with the recommendation or sale of an annuity from an insurer, intermediary, or directly from the consumer."¹²¹ When retirement investors talk to investment advice providers about the investments they should make, they commonly pay for, and receive, advice within the meaning of the statutory definition.

Platform Providers and Pooled Employer Plans

Platform providers are entities that offer a platform or selection of investment alternatives to participant-directed individual account plans and their fiduciaries who choose the specific investment alternatives that will be made available to participants for investing their individual accounts. In connection with such offerings, platform providers may provide investment advice, or they may simply provide general financial information such as information on the historic performance of asset classes and of the investment alternatives available through the provider.

In the case of a platform provider, application of the proposed regulation may often focus on whether the communications fall within the threshold definition of a "recommendation." As discussed in section 4, whether a recommendation exists under the proposal will turn on the degree to which a communication is

¹¹⁷ Regulation Best Interest release, 84 FR 33318, 33339 (July 12, 2019); SEC Investment Adviser Interpretation, 84 FR 33669, 33674 (July 12, 2019).

¹¹⁸ The 2016 Final Rule provided that, subject to specified conditions, certain transactions with independent fiduciaries with financial expertise would not constitute fiduciary investment advice. 81 FR 20946, 20980 (Apr. 8, 2016).

¹¹⁹ High net worth investors and sophisticated investors are not carved out of protections under the SEC's Regulation Best Interest or the Advisers Act fiduciary duty.

¹²⁰ 84 FR 33318, 33319 (July 12, 2019).

¹²¹ NAIC Model Rule section 5.B. (emphasis added).

“individually tailored” to the retirement investor or investors, and providing a selective list of securities to a particular retirement investor as appropriate for the investor would be a recommendation as to the advisability of acquiring securities even if no recommendation is made with respect to any one security. Therefore, the inquiry may turn on whether the provider presents the investments on the platform as having been selected for and appropriate for the investor (*i.e.*, the plan and its participants and beneficiaries). In this regard, platform providers who merely identify investment alternatives using objective third-party criteria (*e.g.*, expense ratios, fund size, or asset type specified by the plan fiduciary) to assist in selecting and monitoring investment alternatives, without additional screening or recommendations based on the interests of plan or IRA investors, would not be considered under the proposal to be making a recommendation.

In the Department’s view, this same analysis is likely to apply in the context of pooled employer plans (PEPs), which are individual account plans established or maintained for the purpose of providing benefits to the employees of two or more employers, authorized in the Setting Every Community Up for Retirement Enhancement (SECURE) Act.¹²² PEPs are required to designate a pooled plan provider (PPP) who is a named fiduciary of the PEP.¹²³ PPPs are in a unique statutory position in that they are granted full discretion and authority to establish the plan and all of its features, administer the plan, act as a fiduciary, hire service providers, and select investments and investment managers. When a PPP or another service provider interacts with an employer about investment options under the plan, whether they have made a recommendation under the proposal will turn, in part, on whether they present the investments as selected for, and appropriate for, the plan, its participants, or beneficiaries.

Swaps and Security-Based Swaps

Swaps and security-based swaps are a broad class of financial transactions defined and regulated under amendments to the Commodity Exchange Act and the Securities Exchange Act of 1934 (Securities Exchange Act) by the Dodd-Frank Act. Section 4s(h) of the Commodity Exchange Act¹²⁴ and section 15F of the

Securities Exchange Act¹²⁵ establish similar business conduct standards for dealers and major participants in swaps or security-based swaps. Special rules apply for swap and security-based swap transactions involving “special entities,” a term that includes employee benefit plans covered under ERISA. Under the business conduct standards in the Commodity Exchange Act as added by the Dodd-Frank Act, swap dealers or major swap participants that act as counterparties to ERISA plans must, among other conditions, have a reasonable basis to believe that the plans have independent representatives who are fiduciaries under ERISA.¹²⁶ Similar requirements apply for security-based swap transactions.¹²⁷ The CFTC and the SEC have issued final rules to implement these requirements.¹²⁸

In the Department’s view, when Congress enacted the swap and security-based swap provisions in the Dodd-Frank Act, including those expressly applicable to ERISA-covered plans, it did not intend to broadly impose ERISA fiduciary status on the plan’s counterparty as it engaged in regulated conduct as part of the swap or security-based swap transaction with the employee benefit plan. The Department conferred with both the CFTC and the SEC at the time of those agencies’ rulemakings, and assured harmonization of any change in the ERISA fiduciary advice regulation so as to avoid unintended consequences.

The Department makes the same assurance with respect to this proposed regulation. The disclosures required of plans’ counterparties under the business conduct standards would not generally constitute a “recommendation” as defined in the proposal, or otherwise compel the dealers or major participants to act as fiduciaries in swap and security-based swap transactions conducted pursuant to section 4s of the Commodity Exchange Act and section 15F of the Securities Exchange Act. This includes disclosures regarding material risks, characteristics, incentives and conflicts of interest; disclosures regarding the daily mark of a swap or security-based swap and a counterparty’s clearing rights; disclosures necessary to ensure fair and balanced communications; and

disclosures regarding the capacity in which a swap or security-based swap dealer or major swap participant is acting when a counterparty to a special entity, as required by the business conduct standards.

This is not to say that a dealer or major participant would necessarily fall outside the scope of the proposed regulation if, in addition to providing the disclosures mandated above, it also chose to make specific investment recommendations to plan clients. In that circumstance, a swap dealer could become a fiduciary by virtue of their voluntary decision to make individualized investment recommendations to an ERISA-covered plan if the subparagraph’s conditions were met.¹²⁹ To the extent dealers wish to avoid fiduciary status under the proposal, however, they can structure their relationships to avoid making such investment recommendations to plans. Additionally, clearing firms would not be investment advice fiduciaries under the proposed rule merely as a result of providing such services as valuations, pricing, and liquidity information. As discussed in greater detail in the next section, the proposed rule does not include valuation and similar services as a category of covered recommendations.

Valuation of Securities and Other Investment Property

This proposed rule does not include valuation services, appraisal services, or fairness opinions as categories of covered recommendations. In this regard, the Department notes that the definition of “recommendation of any securities transaction or other investment transaction or any investment strategy involving securities or other investment property” in proposed paragraph (f)(10) does not include reference to any of these functions. Accordingly, the provision of valuation services, appraisal services, or fairness opinions would not, in and of themselves, lead to fiduciary status under the proposed rule. The Department continues to believe issues related to valuation are best addressed through a separate rulemaking.

¹²⁹ The business conduct standards do not preclude a swap dealer from giving advice if it chooses to do so. See, *e.g.*, 17 CFR 23.434 (imposing requirements on swap dealers that recommend a swap or trading strategy involving a swap to a counterparty); see also 17 CFR 240.15Fh–3(f) (similar provision applicable to security-based swap dealers).

6. For a Fee or Other Compensation, Direct or Indirect

Paragraph (e) of the proposal includes a definition of “for a fee or other compensation, direct or indirect,” for purposes of section 3(21)(A)(ii) of ERISA and section 4975(e)(3)(B) of the Code. The proposal provides:

[A] person provides investment advice “for a fee or other compensation, direct or indirect,” if the person (or any affiliate) receives any explicit fee or compensation, from any source, for the advice or the person (or any affiliate) receives any other fee or other compensation, from any source, in connection with or as a result of the recommended purchase, sale, or holding of a security or other investment property or the provision of investment advice, including, though not limited to, commissions, loads, finder’s fees, revenue sharing payments, shareholder servicing fees, marketing or distribution fees, mark ups or mark downs, underwriting compensation, payments to brokerage firms in return for shelf space, recruitment compensation paid in connection with transfers of accounts to a registered representative’s new broker-dealer firm, expense reimbursements, gifts and gratuities, or other non-cash compensation. A fee or compensation is paid “in connection with or as a result of” such transaction or service if the fee or compensation would not have been paid but for the recommended transaction or provision of advice, including if eligibility for or the amount of the fee or compensation is based in whole or in part on the recommended transaction or the provision of advice.

This proposed definition is consistent with the preamble of the 1975 regulation, which states that “a fee or other compensation, direct or indirect” includes all fees or other compensation “incident to the transaction in which the investment advice to the plan has been rendered or will be rendered,” including, for example, brokerage commissions, mutual fund sales commissions, and insurance sales commissions.¹³⁰

As the Department explained in the preamble when it proposed the exemption now at PTE 77–9:¹³¹

[T]he Department and the [IRS] stated in the preamble sections of the notices announcing the adoption of the [1975 fiduciary definition] regulations that, until a more definitive statement is issued, the phrase “fee or other compensation, direct or indirect” for the rendering of investment advice for purposes of section 3(21)(A)(ii) of the Act and section 4975(e)(3)(B) of the Code should be deemed to include all fees or other compensation incidental to the transaction in which the investment advice to the plan has been rendered or will be rendered, and may therefore include insurance and mutual fund

sales commissions. The Department and the [IRS] have not modified or revised this position, notwithstanding the contrary views expressed in several of the applications for class exemption.

This proposed definition is also consistent with, for example, guidance the Department provided just eight years after the 1975 regulation was finalized. Specifically, an association that represented broker-dealers asked the Department to “clarify the status of broker-dealers under ERISA.”¹³² The association posited that fiduciary status under ERISA section 3(21)(A)(ii) (the “fee or other compensation, direct or indirect” provision) would not attach to broker-dealers “unless the broker-dealer provides investment advice for distinct, non-transactional compensation.”¹³³ The Department rejected this interpretation of ERISA section 3(21)(A)(ii). The Department stated that, based on the facts and circumstances presented by each case,

if . . . the services provided by the broker-dealer include the provision of “investment advice”, as defined in regulation 2510.3–21(c), it may be reasonably expected that, even in the absence of a distinct and identifiable fee for such advice, a portion of the commissions paid to the broker-dealer would represent compensation for the provision of such investment advice.¹³⁴

As the proposed regulation makes clear, however, there must be a link between the transaction-based compensation and the investment professional’s recommendation. Under the terms of the proposal, the compensation is treated as paid “in connection with or as a result of” the provision of advice only if it would not have been paid but for the recommended transaction or the provision of advice, or if the investment advice provider’s eligibility for the compensation (or its amount) is based in whole or part on the recommended transaction or the provision of advice.

Under the proposed definition, any fee that is paid explicitly for the provision of investment advice would fall within the proposed definition of “for a fee or other compensation, direct

or indirect.” This would include, for example, a fee paid to an investment adviser under the Advisers Act based on the retirement investor’s assets under management.

A fee or other compensation received in connection with an investment transaction also would fall within the proposed definition of “for a fee or other compensation, direct or indirect.” This treatment of investment compensation is in accord with the actions of other State and Federal regulators, and with the modern marketplace for investment advice in which brokers and insurance agents can do far more than merely execute transactions or close sales. Investment professionals are commonly compensated for their advice through the payment of transaction-based fees, such as commissions, which are contingent on the investor’s decision to engage in the recommended transaction.

The SEC acknowledged this in the Regulation Best Interest release, noting that “there is broad acknowledgment of the benefits of, and support for, the continuing existence of the broker-dealer business model, including a commission or other transaction-based compensation structure, as an option for retail customers seeking investment recommendations.”¹³⁵ The SEC discussion further contemplated that commissions compensate broker-dealers for their recommendations, and may be the preferred method of investment advice compensation with respect to certain transactions. As an example, the SEC stated that retail customers seeking a long-term investment may determine that “paying a one-time commission to a broker-dealer recommending such an investment is more cost effective than paying an ongoing advisory fee to an investment adviser merely to hold the same investment.”¹³⁶ The Department agrees that there are benefits to ensuring a wide range of compensation structures remain available to retirement investors.

Likewise, the NAIC Model Regulation acknowledged that insurance agents make recommendations and might be compensated for their recommendations through commissions. The NAIC Model Regulation defines a recommendation as “advice provided by a producer to an individual consumer that was intended to result or does result in a purchase, an exchange or a replacement of an annuity in accordance with that advice.”¹³⁷ The definition of “cash compensation” in the model regulation is: “any discount, concession, fee, service fee,

¹³² U.S. Department of Labor, Adv. Op. 83–60A (Nov. 21, 1983), available at <https://www.dol.gov/agencies/ebsa/about-ebsa/our-activities/resource-center/advisory-opinions/1983-60a>.

¹³⁶ *Id.*

¹³⁷ NAIC Model Regulation, at Section 6, 5. M.

commission, sales charge, loan, override, or cash benefit received by a producer in connection with the recommendation or sale of an annuity from an insurer, intermediary, or directly from the consumer.”¹³⁸

When an investment professional meets the five-part test set out in the 1975 rule, or the fiduciary definition set forth in this proposal, the services rendered by the professional include individualized advice, and the compensation, including commission payments, is not merely for execution of a sale, but for the professional advice provided to the investor, as uniformly recognized by the Department’s previous guidance and by other State and Federal regulators.¹³⁹

The statutory exemption for investment advice to participants and beneficiaries of individual account plans set forth in ERISA section 408(b)(14) similarly recognizes that compensation for advice often comes in the form of commissions and transaction-based compensation.¹⁴⁰ Accordingly, the exemption applies to transactions “in connection with the provision of investment advice described in section 3(21)(A)(ii)” including “the direct or indirect receipt of fees or other compensation by the fiduciary adviser or an affiliate thereof . . . in connection with the provision of the advice or in connection with an acquisition, holding, or sale of a security or other property available as an investment under the plan pursuant to the investment advice.”¹⁴¹

As has been true since the Department first proposed regulations under this section in 1975 and as discussed above, the Department understands the phrase “for a fee or other compensation, direct or indirect” to encompass a broad array of compensation incident to the transaction.¹⁴² The Department requests comments on this portion of the proposal, including whether additional examples would be helpful.

7. Other Definitions in the Proposed Rule

In addition to the definitions discussed above, proposed paragraph (f) would define a variety of other pertinent terms for purposes of the proposed rule. The definitions generally track other definitions within Title I and Title II of ERISA and the Federal securities laws. The definitions in proposed paragraph (f), not otherwise discussed above, are: “affiliate” (similar to that of paragraph (e)(1) of the 1975 rule); and “control” (similar to that of paragraph (e)(2) of the 1975 rule). “Plan” refers to any plan described under section 3(3) of ERISA and any plan described in section 4975(e)(1)(A) of the Code. For purposes of the proposal “IRA” refers to any account or annuity described in Code section 4975(e)(1)(B) through (F), including, for example, an individual retirement account described in section 408(a) of the Code and a health savings account described in section 223(d) of the Code.¹⁴³ “Plan fiduciary” would use the same definition as described in section 3(21)(A) of the Act and section 4975(e)(3) of the Code; for these purposes, a participant or beneficiary of the plan who is receiving advice is not a “plan fiduciary” with respect to the plan. Under the proposed rule “relative” refers to a person described in section 3(15) of the Act and section 4975(e)(6) of the Code and also includes a sibling, or a spouse of a sibling. “Plan participant” or “participant” (for a plan described in section 3(3) of ERISA), would be a person described in section 3(7) ERISA.

8. Scope of Investment Advice Fiduciary Duty

Paragraph (c)(2) of the proposal confirms that a person who is a fiduciary with respect to a plan or IRA by reason of rendering investment advice is not deemed to be a fiduciary regarding any assets of the plan or IRA with respect to which that person does not have or exercise any discretionary authority, control, or responsibility or with respect to which the person does not render or have authority to render investment advice defined by the proposed rule. On the other hand, nothing in paragraph (c)(2) exempts such a person from the provisions of section 405(a) of the Act concerning

liability for violations of fiduciary responsibility by other fiduciaries or excludes such person from the definition of party in interest under section 3(14)(B) of the Act or section 4975(e)(2) of the Code. This provision is unchanged from the current 1975 regulation.

The Department further notes that, if a person’s recommendations relate to the advisability of acquiring or exchanging securities or other investment property in a particular transaction, the proposed rule does not impose on the person an automatic fiduciary obligation to continue to monitor the investment or the retirement investor’s activities to ensure the recommendations remain prudent and appropriate for the plan or IRA. Instead, the obligation to monitor the investment on an ongoing basis would be a function of the reasonable expectations, understandings, arrangements, or agreements of the parties.

Also, as has been made clear by the Department, there are a number of ways to provide fiduciary investment advice without engaging in transactions prohibited by Title I or Title II of ERISA because of the conflicts of interest they pose. For example, an investment advice provider can structure the fee arrangement to avoid a prohibited transaction (and the related conflicts of interest) by offsetting third party payments against direct fees agreed to by the retirement investor, as explained in advisory opinions issued by the Department.¹⁴⁴ If there is not a prohibited transaction, then there is no need to comply with the terms of an exemption, though an investment advice fiduciary with respect to a Title I plan would still be required to comply with the statutory duties including prudence and loyalty.

Proposed paragraph (d) of the regulation is identical to paragraph (d) of the 1975 regulation, apart from updated references. The paragraph specifically provides that the mere execution of a securities transaction at the direction of a plan or IRA owner would not be deemed to be fiduciary activity. The regulation’s scope remains limited to advice relationships, as delineated in its text, and does not cover transactions that are executed pursuant to specific direction in which no advice is provided. The Department seeks comment as to whether any updates to paragraph (d) are necessary.

¹⁴³ The definition of an IRA would also include an individual retirement annuity described in Code section 408(b), an Archer MSA described in Code section 220(d), and a Coverdell education savings account described in Code section 530. However, for purposes of any rollover of assets between a Title I Plan and an IRA described in this preamble, the term “IRA” includes only an account or annuity described in Code section 4975(e)(1)(B) or (C).

¹⁴⁴ U.S. Department of Labor, Adv. Op. 97–15A (May 22, 1997).

9. Interpretive Bulletin 96–1

The proposed regulation does not include a specific provision addressing investment education. Investment education is addressed in the Department's IB 96–1, which was reinstated in 2020.¹⁴⁵ IB 96–1 provides examples of four categories of information and materials regarding participant-directed individual account plans—plan information, general financial and investment information, asset allocation models, and interactive investment materials—that do not constitute investment advice. This is the case irrespective of who provides the information (*e.g.*, plan sponsor, fiduciary, or service provider), the frequency with which the information is shared, the form in which the information and materials are provided (*e.g.*, on an individual or group basis, in writing or orally, or via video or computer software), or whether an identified category of information and materials is furnished alone or in combination with other identified categories of information and materials. The IB states that there may be many other examples of information, materials, and educational services, which, if furnished to participants and beneficiaries, would not constitute “investment advice.”

Although the Department issued IB 96–1 when the 1975 rule was in effect, the Department believes that the IB would continue to provide accurate guidance under the proposed regulation. If the proposed rule is finalized, the IB would continue to correctly describe the types of educational information and materials that should not be treated as “recommendations” subject to the fiduciary advice definition. Although the IB specifically applies in the context of participants and beneficiaries in participant-directed individual account plans, the Department believes that the analysis it presents is valid regardless of whether the retirement investor is a plan participant, beneficiary, IRA owner, IRA beneficiary, or fiduciary.

One important example of investment education is the provision of information about the benefits of increasing contributions to an employee benefit plan. Under IB 96–1, the provision of information on “the benefits of plan participation” and the “benefits of increasing plan contributions” are both examples of “plan information.” The Department confirms that, for purposes of the proposal, the provision of such

information would not trigger fiduciary status.

In the 2016 Final Rule, the Department incorporated the provisions of IB 96–1 into the regulatory text; as a result, certain provisions were specifically applicable to transactions involving IRAs. In addition, the Department made a few changes to the provisions. The Department clarified and expanded the category in IB 96–1 from “General Financial and Investment Information” to “General financial, investment, and retirement information.” The revised category included information on “[g]eneral methods and strategies for managing assets in retirement (*e.g.*, systemic withdrawal payments, annuitization, guaranteed minimum withdrawal benefits).” This change was intended to improve retirement security by facilitating the provision of information and education relating to retirement needs that extend beyond a participant's or beneficiary's date of retirement. Such information would be considered non-fiduciary education as long as the provider did not recommend a specific investment or investment strategy.¹⁴⁶

The Department cautions however, that to the extent a provider goes beyond providing education and gives investment advice on a specific investment or investment strategy, it is not appropriate to broadly exempt those communications from fiduciary liability. The Department believes that such an approach would be especially inappropriate in cases in which a service provider offers “educational” services that systematically exceed the boundaries of education. In such cases, when firms or individuals make specific investment recommendations to plan participants, they should adhere to basic fiduciary norms of prudence and loyalty and take appropriate measures to protect plan participants and beneficiaries from the potential harm caused by conflicts of interest.

An employer or other plan sponsor would not, however, become an investment advice fiduciary under the proposal merely because the employer or plan sponsor engaged a service provider to provide investment advice or because a service provider engaged to provide investment education crossed the line and provided investment advice in a particular case. On the other hand, whether the service provider renders fiduciary advice or non-fiduciary education, the proposed rule does not change the well-established fiduciary obligations that arise in connection with the selection and monitoring of plan

service providers.¹⁴⁷ Even if the service provider crosses the line and makes investment recommendations that go beyond mere “education,” the service provider will only be treated as an investment advice fiduciary to the extent that the full proposed regulatory definition is satisfied. Depending on the facts and circumstances, whether a service provider is an investment advice fiduciary under the proposal may require an inquiry into whether that service provider has held itself out as a fiduciary, whether that service provider regularly provides investment advice as part of the provider's business, whether such advice is individualized, and whether the service provider received a fee or compensation (directly or indirectly) in connection with the advice.

The Department seeks comment on this discussion of investment education. Do commenters agree that the examples of investment education information and materials identified in IB 96–1 and in the provisions of the 2016 Final Rule regarding investment education do not constitute a “recommendation” as described under the proposed rule? Further, do commenters believe that IB 96–1 provides sufficient and appropriate guidance in conjunction with the provisions in this proposal, or do commenters support amending IB 96–1 or incorporating any of its provisions into the final regulation?

10. Application to Code Section 4975

Certain provisions of Title I of ERISA, such as those relating to participation, benefit accrual, and prohibited transactions, also appear in Title II of ERISA, codified in the Code. This parallel structure ensures that the relevant provisions apply to Title I plans, whether or not they are “plans” defined in section 4975 of the Code, and to tax-qualified plans and IRAs, regardless of whether they are subject to Title I of ERISA. With regard to prohibited transactions, the ERISA Title I provisions generally authorize recovery of losses from, and imposition of civil penalties on, the responsible plan fiduciaries, while the Title II provisions impose excise taxes on persons engaging in the prohibited transactions. The definition of fiduciary is the same in section 4975(e)(3)(B) of the Code as the definition in section 3(21)(A)(ii) of ERISA, and, as noted above, the Department's 1975 regulation defining fiduciary investment advice is virtually identical to the regulation

¹⁴⁵ 85 FR 40589 (July 7, 2020).

¹⁴⁶ 81 FR 20946, 20977 (Apr. 8, 2016).

¹⁴⁷ See IB 96–1, Section (e) “Selection and Monitoring of Educators and Advisors.”

defining the term “fiduciary” under the Code.

To rationalize the administration and interpretation of the parallel provisions in Title I and Title II of ERISA, Reorganization Plan No. 4 of 1978 divided the interpretive and rulemaking authority for these provisions between the Secretaries of Labor and of the Treasury.¹⁴⁸ Under the Reorganization Plan, which was prepared by the President and transmitted to Congress pursuant to the provisions of Chapter 9 of Title 5 of the United States Code, the Department of Labor has authority to interpret the prohibited transaction provisions and the definition of a fiduciary in the Code. ERISA’s prohibited transaction rules, sections 406 to 408,¹⁴⁹ apply to Title I plans, and the Code’s corresponding prohibited transaction rules, 26 U.S.C. 4975(c), apply to tax-qualified pension plans, as well as other tax-advantaged arrangements, such as IRAs, that are not subject to the fiduciary responsibility and prohibited transaction rules in Title I of ERISA.¹⁵⁰ In accordance with the above discussion, paragraph (g) of the proposal, entitled “Applicability” provides that the regulation defines a “fiduciary” both for purposes of ERISA section 3(21)(A)(ii) and for the parallel provision in Code section 4975(e)(3)(B).

Proposed paragraph (g) explains the applicability of Title I of ERISA and the Code in the specific context of rollovers. As that paragraph explains, “a person who satisfies paragraphs (c)(1) and (e) of this section in connection with a recommendation to a retirement investor that is an employee benefit plan as defined in section 3(3) of the Act, a fiduciary of such a plan, or a participant or beneficiary of such a plan, including a recommendation concerning the rollover of assets currently held in a plan to an IRA, is a fiduciary subject to the provisions of Title I of the Act.” With this example, the Department intends to clarify the application of Title I to recommendations made regarding rollovers from a Title I plan under the proposal. As discussed above, the Department had earlier taken a contrary position in the Deseret Letter, which was withdrawn.

11. State Law

Proposed paragraph (h) is entitled “Continued applicability of state law regulating insurance, banking, or

securities” and provides “[n]othing in this section shall be construed to affect or modify the provisions of section 514 of Title I of the Act, including the savings clause in section 514(b)(2)(A) for State laws that regulate insurance, banking, or securities.” This paragraph of the proposal acknowledges that ERISA section 514 expressly saves State regulation of insurance, banking, and securities from ERISA’s express preemption provision, and confirms that the regulation is not intended to change the scope or effect of ERISA section 514, including the savings clause in ERISA section 514(b)(2)(A) for State regulation of insurance, banking, or securities.

D. Severability

The Department is considering whether this proposal could continue to work even if certain aspects of the proposal were struck down by a court. In determining whether any aspects of this proposal could be severable the Department is focused on the text and purpose of ERISA. The Department requests comments regarding whether this proposal would be workable and appropriate if certain aspects were severed, or why it would not be workable or appropriate. Specifically, the Department is interested in hearing which aspects of the rule the public believes could or could not be severed, and the rationale behind those views. The Department expects to consider severability as it reviews comments and drafts a final rule.

The Department generally intends discrete aspects of this regulatory package to be severable. For example, in the event that this regulatory package is finalized with both an updated regulatory definition of a fiduciary and amendments to the PTEs, the Department intends that the updated regulatory definition of a fiduciary would survive even if a court vacated any of the amendments to the PTEs leaving in place the previously granted versions of those PTEs.

E. Effective Date

The Department proposes to make the rule effective 60 days after publication of a final rule in the **Federal Register**. The Department requests comment on this proposed timeframe and whether parties believe that additional time is needed before the rule becomes applicable.

F. Regulatory Impact Analysis

This section analyzes the economic impact of the proposed rule and proposed amendments to the following class administrative exemptions (PTEs) providing relief from the prohibited

transaction rules that are applicable to fiduciaries under Title I of ERISA and the Code: PTEs 2020–02, 84–24, 75–1, 77–4, 80–83, 83–1, and 86–128. The Department is publishing the proposed amendments to the PTEs elsewhere in this issue of today’s **Federal Register**. Collectively, the proposed rule and amendments to the PTEs are referred to as “the proposal” for this section.

Employment-based retirement plans and IRAs are critical to the retirement security of millions of America’s workers and their families. Because retirement investors often lack financial expertise, professional investment advice providers often play an important role in guiding their investment decisions. Prudent professional advice helps consumers set and achieve appropriate retirement savings and decumulation goals more effectively than consumers would on their own. For many years, the benefits of professional investment advice, however, have been persistently undermined by conflicts of interest that occur when financial services firms compensate individual investment advice providers in a manner that incentivizes them to steer consumers toward investments and transactions that yield higher profits for the firms. These practices can bias the investment advice that providers render to consumers and detrimentally impact their retirement savings by eroding plan and IRA investment results.

Title I of ERISA imposes duties and restrictions on fiduciaries with respect to employee benefit plans. ERISA section 404 requires Title I plan fiduciaries to act with the “care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims.” Further, fiduciaries must carry out their duties “solely in the interest of the participants and beneficiaries” of the plan. Title I of ERISA also includes prohibited transaction provisions that forbid fiduciaries from, among other things, self-dealing.¹⁵¹ The aim of the prohibited transaction provisions is to protect plans, their participants, and beneficiaries from dangerous conflicts of interest that threaten the safety and security of plan benefits.¹⁵²

Title II of ERISA, codified in the Internal Revenue Code, governs the conduct of fiduciaries to tax-qualified

¹⁴⁸ 5 U.S.C. App. (2018).

¹⁴⁹ 29 U.S.C. 1106–1108.

¹⁵⁰ Reorganization Plan No. 4 of 1978 also transferred to the Secretary of Labor the authority to grant administrative exemptions from the prohibited transaction provisions in section 4975 of the Code. See section 4975(c)(2) of the Code.

¹⁵¹ ERISA section 406, 29 U.S.C. 1106.

¹⁵² *Lockheed Corp. v. Spink*, 517 U.S. 882 (1996); *Comm’r v. Keystone Consol. Indus., Inc.*, 508 U.S. 152 (1993).

plans and IRAs. Although Title II does not directly impose specific duties of prudence and loyalty on fiduciaries as ERISA section 404(a) does, it prohibits fiduciaries from engaging in conflicted transactions on many of the same terms as Title I.¹⁵³

The proposal focuses on the provision of fiduciary investment advice to ERISA retirement plans, participants, and IRA owners and seeks to reduce or eliminate the impacts of conflicts of interest on advice they receive. The proposal amends the definition of a fiduciary such that an investment advice provider is a fiduciary if the person provides advice or makes a recommendation on any securities transaction or other investment transaction or any investment strategy involving securities or other investment property to the plan, plan fiduciary, plan participant or beneficiary, IRA, IRA owner or IRA fiduciary (retirement investor), the advice or recommendation is provided “for a fee or other compensation, direct or indirect,” as defined by the proposed rule, and (i), (ii) or (iii) is satisfied:

(i) The person either directly or indirectly (*e.g.*, through or together with any affiliate) has discretionary authority or control, whether or not pursuant to an agreement, arrangement or understanding, with respect to purchasing or selling securities or other investment property for the retirement investor;

(ii) The person either directly or indirectly (*e.g.*, through or together with any affiliate) makes investment recommendations to investors on a regular basis as part of its business and the recommendation is provided under circumstances indicating that the recommendation is based on the particular needs or individual circumstances of the retirement investor and may be relied upon by the retirement investor as a basis for investment decisions that are in the retirement investor’s best interest; or

(iii) The person making the recommendation represents or acknowledges that they are acting as a fiduciary when making the investment recommendation.

The proposed amendments to PTE 2020–02 expand the scope of the exemption to cover certain transactions involving PEPs and transactions involving “pure” robo-advice providers. The amendments would provide greater specificity as to what information must

be disclosed to retirement investors under the exemption and clarify that fiduciary acknowledgements must clearly indicate whether the entity is a fiduciary with respect to investment recommendations and advice.

Additionally, the amendments would require financial institutions to notify retirement investors of their right to obtain additional information upon request, free of charge. The proposed amendments would also provide more guidance for financial institutions and investment professionals complying with PTE 2020–02’s requirements related to financial institutions’ policies and procedures. The amendments would also expand on which parties can request and receive records under the exemption’s recordkeeping provisions.

PTE 84–24 would be amended to limit relief for investment advice to independent insurance producers (*i.e.*, independent insurance agencies) that recommend annuities from an unaffiliated financial institution to retirement investors on a commission or fee basis. Additionally, PTEs 75–1 Parts III and IV, 77–4, 80–83, 83–1, and 86–128 would be amended to eliminate relief for transactions resulting from fiduciary investment advice, as defined under ERISA.

Rather than look to an assortment of different exemptions with different conditions for different transactions, investment advice fiduciaries—apart from independent insurance producers—would generally be expected to rely solely on the amended PTE 2020–02 for exemptive relief for covered investment advice transactions. These amendments serve to give the same or similar requirement for the provision of retirement investment advice regardless of the market and investment product.

The most significant benefits of the proposal are expected to result from (1) changing the definition of a fiduciary by amending the five-part test, (2) requiring advice given to a broader range of advice recipients, including plan fiduciaries and non-retail investors, to meet fiduciary standards under ERISA, (3) extending the application of the fiduciary best interest standard in the market for non-security annuities, creating a uniform standard across different retirement products, and (4) requiring that more rollover recommendations be in the retirement investor’s best interest.

These proposed amendments generally align with the Investment Advisers Act of 1940 and the SEC’s Regulation Best Interest. In crafting this proposal, the Department has worked to align its proposed definition with

Regulation Best Interest and the Advisers Act where it can. ERISA has a functional fiduciary test and imposes fiduciary status only to the extent the functional test is satisfied. The Department intends for the compliance obligations under this proposal to broadly align with the standards set by the SEC where practicable and has tried to accomplish such alignment in this proposal. The Department believes that by harmonizing the application of fiduciary duty for retirement investment advisers across regulatory regimes, retirement investors will benefit from more uniform protections from conflicted advice. While extending fiduciary duty to more entities will generate costs, the Department believes any new compliance costs will not be unduly burdensome as the proposal broadly aligns with those compliance obligations imposed under the Investment Advisers Act and the SEC’s Regulation Best Interest on investment advisers and broker-dealers, respectively, and simply expands them to larger portions of the retirement market.

The Department of Labor has examined the effect of the proposal as required by Executive Order 13563,¹⁵⁴ Executive Order 12866,¹⁵⁵ the Regulatory Flexibility Act,¹⁵⁶ section 202 of the Unfunded Mandates Reform Act,¹⁵⁷ and Executive Order 13132.¹⁵⁸

1. Executive Orders

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives. If regulation is necessary, agencies must choose a regulatory approach that maximizes net benefits, including potential economic, environmental, public health and safety effects; distributive impacts; and equity. Executive Order 13563 emphasizes the importance of quantifying costs and benefits, reducing costs, harmonizing rules, and promoting flexibility.

Under Executive Order 12866, “significant” regulatory actions are subject to review by the Office of Management and Budget (OMB). As amended by Executive Order 14094,¹⁵⁹ entitled “Modernizing Regulatory Review”, section 3(f) of Executive Order 12866 defines a “significant regulatory

¹⁵⁷ Public Law 104–4, 109 Stat. 48 (Mar. 22, 1995).

¹⁵⁸ 64 FR 43255 (Aug. 9, 1999).

¹⁵⁹ 88 FR 21879 (Apr. 6, 2023).

¹⁵³ *Cf.* 26 U.S.C. 4975(c)(1), Code section 4975(f)(5) defining “correction” with respect to prohibited transactions as placing a plan or an IRA in a financial position not worse than it would have been in if the person had acted “under the highest fiduciary standards.”

action” as any regulatory action that is likely to result in a rule that may:

(1) have an annual effect on the economy of \$200 million or more (adjusted every three years by the Administrator of the Office of Information and Regulatory Affairs (OIRA) for changes in gross domestic product); or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, territorial, or tribal governments or communities;

(2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) raise legal or policy issues for which centralized review would meaningfully further the President’s priorities or the principles set forth in the Executive order, as specifically authorized in a timely manner by the Administrator of OIRA in each case.

It has been determined that this proposal is significant within the meaning of section 3(f)(1) of the Executive Order. Therefore, the Department has provided an assessment of the proposal’s potential costs, benefits, and transfers, and OMB has reviewed the proposal.

2. Need for Regulatory Action

In preparing this analysis, the Department has reviewed recent regulatory and legislative actions concerning investment advice, market developments in industries providing investment advice, and research literature weighing in on investment advice. From this review, the Department believes there is compelling evidence that retirement investors remain vulnerable to harm from conflicts of interest in the investment advice they receive. Given this evidence, and the Department’s mission to ensure the security of retirement benefits of America’s workers and their families, the Department is proposing to amend the definition of fiduciary and certain exemption relief.

Why Being a Fiduciary Matters

As described above, fiduciaries under ERISA are subject to specific requirements. ERISA section 404 requires Title I plan fiduciaries to act with the “care, skill, prudence, and diligence under the circumstances then prevailing that a prudent man acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with

like aims.” Further, fiduciaries must carry out their duties “solely in the interest of the participants and beneficiaries” of the plan. Title II of ERISA, codified in the Internal Revenue Code, governs the conduct of fiduciaries to tax-qualified plans and IRAs. Under both Title I and Title II, fiduciaries are subject to prohibited transactions that forbid them from, among other things, self-dealing.¹⁶⁰ The aim of the prohibited transaction provisions is to protect plans, their participants, and beneficiaries from dangerous conflicts of interest that threaten the safety and security of plan benefits.¹⁶¹

This combination of a high standard of conduct and personal liability for violations of the standard of conduct for Title I fiduciaries, and restrictions on behavior for Title I and Title II fiduciaries functions to protect plans, participants, and beneficiaries from fiduciary misdeeds. Previously, the Department conducted an economic analysis¹⁶² (2016 Regulatory Impact Analysis (RIA)) of then-current market conditions and the likely effects of expanding the definition of fiduciary to include more individuals. It reviewed evidence that included:

- statistical comparisons finding poorer risk-adjusted investment performance in more conflicted settings;
- experimental and audit studies revealing questionable investment advice provider conduct, including recommendations to withdraw from low-cost, well diversified portfolios and invest in higher-cost alternatives likely to deliver inferior results;
- studies detailing gaps in consumers’ financial literacy, errors in their financial decision-making, and the inadequacy of disclosure as a consumer protection;
- federal agency reports documenting abuse and investors’ vulnerability;
- a study by the President’s Council of Economic Advisers that attributed \$17 billion in annual IRA investor losses to advisory conflicts;
- economic theory, which predicts that when expert investment advice providers have conflicts of interest, non-expert investors will be harmed; and

- international experience with harmful advisory conflicts and responsive reforms.

The Department’s analysis found that conflicted advice was widespread, caused serious harm to retirement investors, and that disclosing conflicts alone would fail to adequately mitigate the conflicts or remedy the harm. The analysis concluded that extending fiduciary protections to more advice would reduce advisory conflicts and deliver substantial net gains for retirement investors.

Changes in Retirement Savings Since the 1975 Regulation

While the 1975 regulation that established the five-part test has remained fixed, the private retirement savings landscape has changed dramatically. In the late 1970s, private retirement savings were mainly held in large employer-sponsored defined benefit plans. Under the terms of these plans and the governing legal structure, the plans and plan sponsors promised fixed payments to retirees, generally based on a percentage of their compensation and years of employment with the sponsoring employer. Plan sponsors hired professional asset managers, who were subject to ERISA’s fiduciary obligations, to invest the funds, and the employers or other plan sponsors shouldered the risk that investment returns were insufficient to pay promised benefits. Individual plan participants did not take direct responsibility for management of the assets held by the plan and did not depend on expert advice for the sound management of funds, which were directly controlled by investment professionals.

Since then, much of the responsibility for investment decisions in employment-based plans has shifted from these large private pension fund managers to individual retirement account participants, many with low levels of financial literacy. Over time, the share of participants covered by defined contribution plans, in which benefits are based on contributions and earnings within an individual account, grew substantially, from just 26 percent in 1975 to 78 percent in 2020.¹⁶³ By 2020, 94 percent of active participants in defined contribution plans had responsibility for directing the investment of some or all of their

account balances.¹⁶⁴ The Department could not have foreseen such a dramatic shift when it issued the existing fiduciary investment advice regulation in 1975. The passage of ERISA authorized IRAs in 1974, and IRAs remained in their infancy when the 1975 rule was issued. The vast majority of consumers were not managing their own retirement savings, nor retaining investment advisers to do so, because 401(k) plans did not even exist in 1975.

Though workers have assumed more of the responsibility for their investment decisions, they at least still receive some fiduciary oversight and protections provided by ERISA while participating in employer-sponsored plans. However, often workers who change jobs or retire roll over their retirement savings to an IRA, where they assume full responsibility for investing the assets in the larger marketplace without those protections. Not only is it very common for defined contribution plan participants to roll over their retirement savings to an IRA, but it is also increasingly common among defined benefit plan participants. Defined benefit plan participants have the option to perform a rollover if their plan allows them to take a lump-sum payment when they separate from service. About 36 percent of private industry workers in traditional defined benefit plans have a lump-sum payment available at normal retirement, as do virtually all private industry workers in non-traditional defined benefit plans, such as cash balance plans.¹⁶⁵

In 1981, private defined benefit plans held more than twice the assets in private defined contribution plans, and roughly 10 times more than IRA assets. By the first quarter of 2022, the order had reversed: IRAs held \$13.2 trillion in assets, private defined contribution plans held \$9.2 trillion, and private defined benefit plans held \$3.7 trillion in assets.¹⁶⁶ This trend is expected to

continue as retirement investors are projected to move \$4.5 trillion from defined contribution plans to IRAs from 2022 through 2027.¹⁶⁷

Moreover, workers have become more reliant on their retirement savings as Social Security benefits have eroded in recent decades. The age to receive full retirement benefits is gradually increasing from 65 to 67 between 2003 and 2027. Those who claim Social Security before reaching full retirement age—which in 2021 was approximately 60 percent of new retired-worker beneficiaries—receive reduced benefits.¹⁶⁸ For a hypothetical medium wage earner who first claims benefits at age 65, their Social Security benefit, as a share of average career earnings, was more than 40 percent in 2005 but is projected to be only about 35 percent in 2025.¹⁶⁹

Investment Advice and the 1975 Regulation

As the nature of retirement savings has changed since 1975, investment advice has also evolved. Commercial relationships between corporate pension plan sponsors and fund managers and their consulting advisers have been supplanted by retail relationships between consumers and the trusted experts they turn to for help managing their 401(k) plan and IRA savings.

Instead of ensuring that trusted advisers give prudent and unbiased advice in accordance with fiduciary norms, the 1975 regulation erected a multi-part series of technical impediments to fiduciary responsibility. The five-part test of the 1975 rule diverges from the express language of the statute and from its protective purposes by stating that advice must be on a “regular basis” and be “a primary basis for investment decisions” to confer fiduciary status. Without fiduciary status, the advice provider is free to disregard ERISA’s duties of prudence and loyalty and to engage in self-dealing transactions that would otherwise be flatly prohibited by ERISA and the Code because of the dangers they pose to plans and plan participants.

While consumers often use financial advisers for investment advice related to their retirement savings, if an

investment recommendation does not meet *all* five parts of the 1975 test, the adviser is not treated as a fiduciary under ERISA, no matter how complete the investor’s reliance on recommendations purported to be based on their best interest in light of their individual circumstances.

For example, under the 1975 rule, if the advice is not given on a “regular basis,” it makes no difference if the person making the recommendation claims to make the recommendation based on the investor’s best interest and knows that the investor is relying on that recommendation. Thus, if a plan participant seeks advice on whether to roll over all their retirement savings, representing a lifetime of work, out of an ERISA-covered plan overseen by professional ERISA fiduciaries, to purchase an annuity, the person making the recommendation with respect to the purchase of the annuity has no obligation to adhere to a best interest standard unless they meet all prongs of the 1975 rule, including regularly giving advice to the plan participant. This is true even if the person giving the advice holds themselves out as an investment expert whose recommendation is based solely on a careful and individualized assessment of the investor’s needs, the plan participant has no investment expertise whatsoever, and both parties understand that the participant is relying upon the advice for the most important financial decision of their life. Because the advice was not rendered on a “regular basis,” the adviser has no obligation under ERISA to adhere to fiduciary standards, and thus would not be subject to ERISA’s prohibitions on disregarding the participants’ financial interests, recommending an annuity that is imprudent and ill-suited to the participant’s circumstances, and favoring the adviser’s own financial interests at the expense of the participant.¹⁷⁰ An adviser who regularly

¹⁷⁰ Investors have suffered significant losses when an investment professional does not act in the investor’s best interest. For example, in 2021, the SEC settled with Teachers Insurance and Annuity Association of America (TIAA) for \$97 million, citing disclosure violations and failure to implement policies and procedures. See <https://www.sec.gov/litigation/admin/2021/33-10954.pdf>. While the SEC was able to settle, the Southern District of New York recently dismissed a complaint by plaintiffs in this same TIAA plan who argued that TIAA acted as an ERISA fiduciary when advising plan participants to roll over assets from their employer-sponsored plan to a TIAA managed account product. Although TIAA represented in market materials that it “[met] a fiduciary standard” when providing investment recommendations, the court found that it did not provide this advice on a regular basis and therefore did not satisfy the five-part test to be considered an ERISA fiduciary. See

had rendered trivial advice about small plan investments, and met the other prongs of the multi-part test, would appropriately be treated as a fiduciary if they met the other requirements of the 1975 rule, but not the person who on one occasion purported to give individualized advice to roll a lifetime of savings out of an ERISA-covered plan and place it in a fixed indexed annuity. This is not a sensible way to draw distinctions in fiduciary status, and finds no support in the text of ERISA, which makes no mention of a “regular basis” requirement.

When the Department issued PTE 2020–02, it sought to ameliorate some of the effects of the regular basis requirement by suggesting that rollover advice could be treated as falling within the 1975 rule, if it was rendered at the beginning of an ongoing advisory relationship. Accordingly, in an April 2021 FAQ, in the context of advice to roll over assets from an employee benefit plan to an IRA, the Department acknowledged that a single instance of advice would not satisfy the regular basis prong of the 1975 test¹⁷¹ but explained that “advice to roll over plan assets can also occur as part of an ongoing relationship or as the beginning of an intended future ongoing relationship that an individual has with an investment advice provider.”¹⁷² In other words, “when the investment advice provider has not previously provided advice but expects to regularly make investment recommendations regarding the IRA as part of an ongoing relationship, the advice to roll assets out of an employee benefit plan into an IRA would be the start of an advice relationship that satisfies the regular basis requirement.”¹⁷³

Carfora v. TIAA, 631 F. Supp. 3d 125, 138 (S. D. N. Y. 2022).

¹⁷¹ Employee Benefits Security Administration, *New Fiduciary Advice Exemption: PTE 2020–02 Improving Investment Advice for Workers & Retirees Frequently Asked Questions*, (April 2021), <https://www.dol.gov/agencies/ebsa/about-ebsa/our-activities/resource-center/faqs/new-fiduciary-advice-exemption>; Notably, although the Department does not think that a single instance of advice would satisfy the regular basis prong of the 1975 regulation, a single piece of advice can be sufficient to satisfy the language of the statute. See Findings, Conclusions, and Recommendations of the United States Magistrate Judge, *Federation of Ams. for Consumer Choice v. U.S. Dep’t of Labor*, 2023 WL 5682411, at *18, No. 3:22–CV–00243–K–BT, at 43 (N.D. Tex. June 30, 2023) (“First-time advice may be sufficient to confer fiduciary status and is consistent with ERISA.”) (emphasis added).

¹⁷² Employee Benefits Security Administration, *New Fiduciary Advice Exemption: PTE 2020–02 Improving Investment Advice for Workers & Retirees Frequently Asked Questions*, (April 2021), <https://www.dol.gov/agencies/ebsa/about-ebsa/our-activities/resource-center/faqs/new-fiduciary-advice-exemption>.

¹⁷³ *Id.*

Ultimately, however, that policy interpretation was struck down as inconsistent with the text of the 1975 rule.¹⁷⁴ In *American Securities Association v. United States Department of Labor*, the court found that “the scope of the regular basis inquiry is limited to the provision of advice pertaining to a particular plan.”¹⁷⁵ Further, the court held that, “[b]efore a rollover occurs, a professional who gives rollover advice does so with respect to an ERISA-governed plan. However, after the rollover, any future advice will be with respect to a new non-ERISA plan, such as an IRA that contains new assets from the rollover. The professional’s one-time rollover advice is thus the last advice that he or she makes to the specific plan.”¹⁷⁶ Based on the court’s ruling, the only way for the Department to remedy the shortcomings of the “regular basis” test is through new rulemaking.

Inexpert Customers

Researchers have consistently found that many Americans demonstrate low levels of financial knowledge and lack basic understanding of investment strategies. In particular, households age 50 and older and nearing retirement, “fail to grasp essential aspects of risk diversification, asset valuation, portfolio choice, and investment fees.”¹⁷⁷ Such customers appear to be particularly vulnerable to receiving harmful advice. Egan et al. (2019) found that misconduct among investment advice professionals was higher in counties with populations that were less financially sophisticated, including those who are less educated and older.¹⁷⁸ Retirement investors are in

¹⁷⁴ *ASA v. U.S. Dep’t of Labor*, No. 8:22–CV–330VMC–CPT, 2023 WL 1967573, at *14–*19 (M.D. Fla. Feb. 13, 2023).

¹⁷⁵ *Id.* at *16 (emphasis added).

¹⁷⁶ *Id.* at *17; *id.* (“Because assets cease to be assets of an ERISA plan after the rollover is complete, any future provision of advice is, by nature, no longer to that ERISA plan.”); Findings, Conclusions, and Recommendations of the United States Magistrate Judge, *Federation of Americans for Consumer Choice v. a poor position to assess the quality of the advice they receive, and the advisers’ incentives are often misaligned with the investors’ interests.¹⁷⁹ The dependence of inexperienced clients on advisers with significant conflicts of interest creates a large risk of investment advice and investment decisions that are not in the best interest of retirement investors.

The Department’s 2016 RIA¹⁸⁰ demonstrated that the balance of research and evidence indicates that the aggregate harm from cases in which consumers received bad advice due to investment advice providers’ conflicts of interest is significant. The complex nature of financial markets alone, particularly for insurance products, creates information asymmetry that makes it difficult for inexperienced investors to navigate savings for retirement. Multiple studies cited found that retirement investors often lack a basic understanding of investment fundamentals.¹⁸¹ A subsequent 2018 FINRA study of non-retired individuals age 25–65 found that those investors that only had retirement accounts through their employers routinely scored lower on financial literacy questions than active investors and that these workplace-only investors scored only two percentage points higher than the general population (32 percent versus 30 percent) on a composite question regarding interest, inflation and risk diversification.¹⁸² In addition to lacking rudimentary financial knowledge, many retirement investors do not understand the roles of different players in the investment industry and what those players are obligated to do.

The SEC has commissioned several studies on whether investors can differentiate between different types of

investment service providers. A 2005 study considered four focus groups in different geographic locations and found that investors were generally unclear about distinctions between broker-dealers, financial advisers, investment advisers, and financial planners and often used the terms indistinguishably.¹⁸³ A 2008 household survey found that while most of the survey respondents had “a general sense of the difference in services offered by brokers and by investment advisers but that they are not clear about their specific legal duties.”¹⁸⁴ A 2018 study also evaluated four focus groups and found that participant understanding of the distinction between broker-dealers and investment advisers was low, even among those who were provided information describing the classifications of the two categories.¹⁸⁵ If investors are unable to distinguish between types of advisers, they cannot be expected to understand legal distinctions of the standard to which that advice is held.

Confusion regarding the different types of advice providers and the different standards of conduct to which they must adhere is often made worse by industry marketing and other practices.¹⁸⁶ To attempt to address this, the SEC adopted as part of its 2019 Rulemaking a new required disclosure of a “Form CRS Relationship Summary,” under which registered investment advisers and broker-dealers must provide retail investors with certain information about the nature of their relationship with the firm and its financial professionals in plain English.¹⁸⁷ One of the purposes of the Form CRS is to help retail investors better understand and compare the services and relationships that

investment advisers and broker-dealers offer in a way that is distinct from other required disclosures under the securities laws.

In order for disclosures to be effective, however, investors must both review and understand them. Many disclosures, however, suffer from complexity, so investors overlook or misunderstand them and gloss over the information presented to them. A 2017 survey of private-sector workers with retirement plans found only one-third had read any investment fee disclosure in the past year and only 25 percent of all respondents had both read and understood the information.¹⁸⁸

Many investors also cannot effectively assess the quality of investment advice they receive. Research suggests that, in general, consumers often fail to fully comprehend the quality of professional services they receive, including services from doctors, lawyers, and banks in addition to investment advice providers.¹⁸⁹ The 2016 RIA cited evidence that advice from providers often encouraged investors’ cognitive biases, such as return chasing, rather than correcting such biases. It cited research showing that payments made to broker-dealers influenced the advice provided to clients and that funds distributed through more conflicted broker channels tend to perform worse.¹⁹⁰ Research also suggests that investors’ opinions of adviser quality can be manipulated. For instance, Agnew et al. (2014) found that if an adviser first provides good advice on a financial decision that is easy to understand, the client will subsequently trust bad advice on a more difficult or complicated topic.¹⁹¹ Investors who are unable to discern when they are receiving bad advice are at risk of being persuaded to make investment decisions that are not in their best interest.

Overall, evidence demonstrates that the combination of inexperienced customers and conflicted advisers results in investment underperformance and negative outcomes for investors. According to a 2015 report by the Council of Economic Advisers, approximately \$1.7 trillion of IRA assets were invested in products with a payment structure that generates conflicts of interests.¹⁹² A substantial body of research has shown that IRA holders receiving conflicted investment advice can expect their investments to underperform by approximately 50 to 100 basis points per year.¹⁹³

As discussed in the 2016 RIA, the Department estimated that a 50 to 100 basis point performance gap of broker-sold funds would result in retirees losing \$9 to \$17 billion each year (or between 0.5 and 1 percentage point of return each year for \$1.7 trillion in assets), \$95 to \$189 billion over 10 years, and \$202 and \$404 billion over 20 years. That means a retiree spending their savings down over 30 years would have 6 to 12 percent less to spend.¹⁹⁴ If a retiree encounters conflicts of interest and experiences a 100-basis point reduction in performance, but still spends as though they were not encountering conflicts of interest, they would run out of retirement savings more than five years early.¹⁹⁵

¹⁹² Council of Economic Advisors, *The Effects of Conflicted Investment Advice on Retirement Savings*, (2015), https://obamawhitehouse.archives.gov/sites/default/files/docs/cea_coi_report_final.pdf.

¹⁹³ *Ibid.*

¹⁹⁴ For example, an ERISA plan investor who rolls \$200,000 into an IRA, earns a 6 percent nominal rate of return with 2.3 percent inflation, and aims to spend down her savings in 30 years, would be able to consume \$11,034 per year for the 30-year period. A similar investor whose assets underperform by 0.5, 1, or 2 percentage points per year would only be able to consume \$10,359, \$9,705, or \$8,466, respectively, in each of the 30 years. The 0.5 and 1 percentage point figures represent estimates of the underperformance of retail mutual funds sold by potentially conflicted brokers. These figures are based on a large body of literature cited in the 2015 NPRM RIA, comments on the 2015 NPRM RIA, and testimony at the Department’s hearing on conflicts of interest in investment advice in August 2015. The 2 percentage point figure illustrates a scenario for an individual where the impact of conflicts of interest is more severe than average. Pervasiveness of Conflicts of Interest in Investment Advice

In recent years, consolidation of the financial industry and innovations in products and compensation practices have multiplied opportunities for self-dealing and made fee arrangements less transparent to clients and regulators. The existence of safeguards in only certain markets, such as the recent adoption of Regulation Best Interest by the SEC regarding recommendations of securities transactions or investment strategies involving securities, creates incentives for agents to recommend conflicted products in less regulated markets. While the relative newness of Regulation Best Interest makes it challenging to quantify instances of these effects, there is research demonstrating similar impacts from other policies addressing financial conflicts of interest or misconduct that varied across markets. Bhattacharya et al. (2020) found that higher fiduciary standards are associated with the sale of higher quality annuity products.¹⁹⁶ Honigsberg et al. (2022) showed that variation in regulatory oversight regimes leads to a situation where the worst financial advisers are operating in the most lightly regulated regimes.¹⁹⁷ Charoenwong et al. (2019) found that under lighter regulation, advisers were more likely to receive complaints, particularly advisers with past complaints or with conflicts of interest.¹⁹⁸ This proposal would extend protections associated with fiduciary status under ERISA, regardless of advice model, and reduce the gap in protections with respect to ERISA-covered investments.

Conflicts of Interest After the SEC's Regulation Best Interest

Regulation Best Interest under the Securities Exchange Act of 1934 created a "best interest" standard of conduct for broker-dealers and associated persons when they make a recommendation to a retail customer of any securities transaction or investment strategy involving securities, including recommendation of types of accounts. While Regulation Best Interest does

overlap with ERISA's fiduciary standard, and reduces conflicts, the two standards do not align perfectly: Regulation Best Interest does not apply fiduciary accountability to all parties that provide investment advice to Retirement Investors and does not cover advice to non-retail investors. Moreover, Regulation Best Interest generally does not apply to recommendations of investment products that are not regulated as securities, such as many annuity products. Similarly, while there is a large overlap in the substance of the different regulatory regimes, in enacting ERISA, Congress provided special protections for tax-advantaged retirement savings that don't apply more broadly. For example, Congress prohibited transactions (absent an exemption) that were determined to raise significant risk to retirement plan participants and beneficiaries.

The SEC began conducting limited scope broker-dealer examinations and risk-based inspections in June 2020 to assess whether firms established written policies and procedures to comply with Regulation Best Interest and had made reasonable progress in implementing those policies and procedures. In their reviews, staff identified instances of deficient disclosure obligations, care obligations, periodic review and testing, and conflict of interest obligations.¹⁹⁹ FINRA has identified similar deficiencies in its Report on Examination and Risk Monitoring Program.²⁰⁰ The SEC's Division of Examination notes that in response to deficiency letters identifying these issues, many broker-dealers modified their practices, policies and procedures.²⁰¹ In addition, the SEC released additional guidance in April 2023 focused on the Care Obligation to continue to improve compliance with Regulation Best Interest.²⁰²

In the first year after the SEC's compliance deadline for Regulation Best Interest, the North American Securities

Administrators Association (NASAA) conducted a survey of 443 FINRA firms.²⁰³ The survey found that many broker-dealer firms were still utilizing the compliance programs they had in place prior to Regulation Best Interest, when the standard for retail advice was to recommend investments that were "suitable" for the client.²⁰⁴ In addition, the percentage of broker-dealer firms surveyed that were offering complex, costly, and risky products increased by 11 percent after Regulation Best Interest took effect. About 65 percent of broker-dealer firms did not discuss lower-cost or lower-risk products with their customers when they recommended complex, costly, and risky products. The survey also found that 24 to 30 percent of broker-dealer firms were still using conflicted forms of compensation, including sales contests, differential or variable compensation, and other extra forms of compensation.²⁰⁵ In the first year after Regulation Best Interest took effect, only 35 percent of those broker-dealer firms recommending complex, costly, and risky products had "reduced the financial reward associated with these products by capping agent sales credits."²⁰⁶ In other words, the majority of broker-dealer firms that offered complex, costly and risky products had not restructured their financial reward structure in response to conflict mitigation requirements in SEC's Regulation Best Interest.

NASAA's Broker-Dealer Section Committee concluded a subsequent review of over 200 examinations evaluating broker-dealers' compliance of Regulation Best Interest by state examiners in 25 states, under its second and third year of implementation.²⁰⁷ This review revealed steady implementation progress, including that firms had been updating investor profile forms and policies and procedures; that firms recommending complex, costly or risky products were imposing restrictions based on ages, income/net worth and risk profiles; and that firms were utilizing cost-comparison tools to better consider reasonable investment

alternatives. The report noted, however, that firms still struggle with considering reasonably available alternatives and conflict mitigation; ignoring lower cost and risk products when recommending complex, costly risk products and relying on financial incentives to sell them; and that firms have not enhanced point of sale disclosures.

The SEC and FINRA have subsequently released additional guidance designed to clarify and strengthen compliance with Regulation Best Interest's Consumer Protective conditions.²⁰⁸ The SEC announced in January 2023 that it intends to incorporate compliance with Regulation Best Interest into retail-focused examinations of broker-dealers²⁰⁹ and both the SEC and FINRA have begun enforcement actions related to Regulation Best Interest.²¹⁰ In June 2022, the SEC charged a firm and five brokers for violating Regulation Best Interest and selling high-risk bonds to retirees and other retail investors.²¹¹ Meanwhile, FINRA levied its first Regulation Best Interest-related fine in October 2022 and suspended two New York-based brokers in February 2023.²¹²

Conflicts of Interest in Advice Given to Plan Fiduciaries

Concerns regarding investment advice extend to that received by ERISA plan fiduciaries. Pool et al. (2016) found that while mutual fund companies involved in plan management for 401(k) plans included both funds from their own family as well as unaffiliated funds in the menu of investment options, poor performing funds were less likely to be removed and more likely to be added to the menu if they were affiliated with the plan trustee.²¹³ In 2005, the SEC found evidence that some pension consultants do not adequately disclose their conflicts and may steer plan fiduciaries to hire money managers based partly on the consultants' own financial interests.²¹⁴ The U.S. Government Accountability Office (GAO) found these inadequately disclosed conflicts were associated with substantial financial losses. GAO's study found that between 2000 and 2004, plans associated with pension consultants without adequate disclosure of their conflicts of interest saw annual rates of return 1.2 to 1.3 percentage points lower than plans associated with pension consultants with adequate disclosure of conflicts of interest.²¹⁵ In another study, GAO found that ERISA plan sponsors often are confused as to whether the advice they receive is fiduciary advice, and small plans in particular may suffer as a result.²¹⁶ This confusion leaves plan participants vulnerable to lower returns due to conflicted advice.

Conflicts of Interest in Rollover Recommendations or Advice

The treatment of rollover recommendations or advice under the 1975 rule has been a central concern in the Department's regulation of fiduciary investment advice. The decision to roll over assets from a plan to an IRA is often the single most important financial decision a plan participant makes, involving a lifetime of retirement savings.

Most IRA assets are attributable to rollover contributions, and the amount

of assets rolled over to IRAs is large and expected to increase substantially. In 2021, IRA rollovers from defined contribution plans increased by 4.9 percent. Cerulli Associates estimates that aggregate rollover contributions to IRAs from 2022 to 2027 will surpass \$4.5 trillion.²¹⁷

The decision to roll over one's retirement savings from an ERISA-covered employer-based plan into an IRA or other plan has significant consequences, and for many investors is the single most consequential advice they will receive and affects a lifetime of savings. About 57 percent of traditional IRA-owning households indicated that their IRAs contained rollovers from employer-sponsored retirement plans and of those households, 85 percent indicated they had rolled over their entire account balance in their most recent rollover.²¹⁸ In 2020 more than 95 percent of the dollars flowing into IRAs came from rollovers, while the rest came from regular contributions.²¹⁹

Retiring workers must decide how best to invest a career's worth of 401(k) savings, and many look to an investment advice provider for guidance. Financial institutions face an innate conflict of interest, in that a financial institution that provides a recommendation or advice concerning a rollover to a retirement investor may expect to earn transaction-based compensation such as commissions and/or receive an ongoing advisory fee that it likely would not receive if the assets were to remain in an ERISA-covered plan. Further, under the 1975 rule, if an investment advice provider makes a one-time recommendation that the worker move the entire balance of their retirement plan into an IRA and invest it in a particular annuity, then the advice provider has no fiduciary obligation under ERISA to honor the worker's best interest unless this recommendation is part of an "ongoing" advice relationship. The resulting compensation represents a significant revenue source for investment advice providers.

²¹⁹ Internal Revenue Service, *SOI Tax Stats—Accumulation and Distribution of Individual Retirement Arrangement (IRA)*, Table 1: Taxpayers with Individual Retirement Arrangement (IRA) Plans, By Type of Plan, Tax Year 2020, (2023).

In the preamble to PTE 2020–02, the Department provided an interpretation of when advice or a recommendation to roll over assets from an employee benefit plan to an IRA would constitute fiduciary investment advice under the 1975 regulation's five-part test. The preamble interpretation confirmed the Department's view that advice or a recommendation to roll assets out of a Title I Plan is advice with respect to moneys or other property of the plan and, if provided by a person who satisfies all of the requirements of the five-part test, constitutes fiduciary investment advice. The preamble interpretation also discussed when a recommendation to roll over employee benefit plans to an IRA would satisfy the "regular basis" requirement and the Department's interpretation of the requirement of "a mutual agreement, arrangement, or understanding" that the investment advice will serve as "a primary basis for investment decisions."

Regarding the regular basis prong, the Department explained that "advice to roll assets out of a Title I Plan into an IRA where the investment advice provider has not previously provided advice but will be regularly giving advice regarding the IRA in the course of a lengthier financial relationship would be the start of an advice relationship that satisfies the regular basis prong."²²⁰ As discussed above, however, this interpretation of the 1975 rule was rejected by the court in *American Securities Association v. United States Department of Labor*,²²¹ and in the case of *Federation of Americans for Consumer Choice v. United States Department of Labor*,²²² the magistrate judge has recommended that the district court also reject this interpretation. In their view, the 1975 rule does not permit the Department to treat one-time rollover recommendations as "regular basis" advice based on the expectation of future advice on the management of the assets rolled out of the ERISA plan and into the IRA. Any change to the "regular basis" requirement requires a new rule.²²³

While PTE 2020–02 mitigates some of these concerns by requiring investment advice fiduciaries to render advice in their customer's best interest in order to

receive certain types of compensation from otherwise prohibited transactions resulting from rollover advice, the limitations of the existing five-part test for fiduciary status still result in significant portions of the retirement investment market operating outside of the PTE's protections.

Uniformity Across Markets and Product Types

The current regulatory approach to investment advice results in standards that vary by advice market and investment product.²²⁴ As a result, retirement investors cannot rely on a single protective standard, and their exposure to risk is not only based on the types of products they invest in but also by who gives that advice or makes that recommendation and in what capacity they are acting. This creates investor confusion and makes room for regulatory arbitrage, where investment advice providers can use more favorable rules in one market to circumvent less favorable regulations elsewhere. The Department identifies the following nuances of the regulatory landscape as sources of investor confusion:

- Regulation Best Interest only applies to recommendations made by broker-dealers to retail customers. As a result of this limitation, broker-dealers' recommendations of securities transactions, investment strategies, plan design, and plan investment options to plan fiduciaries, fall outside its scope. This may be particularly confusing for small plan fiduciaries.

- Securities laws (*i.e.*, the Investment Advisers Act and Regulation Best Interest) may not apply to advice on investments such as real estate, fixed indexed annuities, commodities, certificates of deposit, and other bank products.

- Variable annuities and some indexed annuities are considered securities and are subject to securities laws, while fixed annuities, including fixed indexed annuities, are subject to state law. As discussed in the Regulatory Baseline section, these laws vary significantly from state to state.

This list is not exhaustive but provides a sense of how many seemingly similar investments are subject to widely different regulators and protective standards.

Honigsberg et al. (2022) identified associated persons of broker-dealers who had been registered with FINRA between 2010 and 2020 but were no longer registered with the regulatory

authority. Of those that exited, roughly a third continued providing financial advice under a different regulatory regime, of which eight percent had a history of serious misconduct while registered with FINRA. This share increased to 12 percent when you looked at those that were still providing financial advice as an insurance producer registered with the NAIC and 13 percent when you looked at the National Futures Association members. The authors argued that the existing framework for regulating adviser misconduct creates incentives for the worst advisers to migrate to more poorly regulated state regimes.²²⁵

The risk posed by non-uniform regulatory environments is exemplified by the annuity market. A recent survey of insurers reported that 58 percent of insurers thought the SEC's Regulation Best Interest had improved protections for consumers.²²⁶ However, as discussed above, generally only annuities considered securities are under the jurisdiction of the SEC. The remaining annuities are covered by state regulations that potentially hold those selling such insurance products to a lower standard. In crafting this proposal, the Department strove to craft a definition that hews to both the text and purpose of ERISA.

An investor's retirement account may hold a wide range of investment products, those products may touch multiple regulatory regimes, and the retirement investor may not be aware of the different standards. Once the investment products are held in a tax-advantaged retirement account, however, ERISA requires a uniform standard, applicable regardless of the type of investment product. This range of investment products held in retirement plans means that the regulatory definition of an investment advice fiduciary for purposes of Title I of ERISA and the Code takes on special importance in creating uniform standards for investment advice, particularly when a retirement investor may not realize the investment product is not covered by another regulatory regime such as federal securities laws.

Need for Uniformity Concerning Rollovers

The difference between types of products, such as securities subject to regulation by the SEC and non-

securities annuities subject to regulation by state insurance departments, creates problematic incentives for financial professionals to recommend certain products.

Under the Investment Advisers Act and Regulation Best Interest, investment advisers and broker-dealers must have a reasonable basis to believe both the rollover itself and the account being recommended are in the retail investor's best interest.²²⁷ SEC staff guidance recognizes that it would be difficult to have such a reasonable basis if, "you do not consider the alternative of leaving the retail investor's investments in their employer's plan, where that is an option."²²⁸ Moreover, broker-dealers and investment advisers are instructed to generally consider certain factors when making rollover recommendations to retail investors, specifically and without limitation, "costs; level of services available; features of the existing account, including costs; available investment options; ability to take penalty-free withdrawals; application of required minimum distributions; protection from creditors and legal judgments; and holdings of employer stock."²²⁹ As such, the SEC's regulatory framework is likely to mitigate some of the aforementioned harms to retirement investors, but only in markets where it applies.

In contrast, the NAIC Model Regulation #275, which is the basis for much of the state regulation on insurers,²³⁰ makes no direct reference to rollovers, and imposes a less stringent obligation on annuity recommendations than the best interest standard imposed on securities recommendations and investment advice by the SEC. Given the average rollover contribution to a traditional IRA in 2019 was \$112,000,²³¹ the variation in regulatory standards regarding rollover advice can result in widely disparate outcomes among similarly situated retirement investors

based solely on who they sought for advice and whether that adviser was required to put the investor's interests above their own.

An update to the regulatory definition of an investment advice fiduciary, for purposes of Title I of ERISA and the Code, is necessary to enhance protections of retirement investors. This approach both reflects ERISA's and the Code's statutory text, which adopts a uniform approach, as well as sound public policy. Investment recommendations should be consistently governed solely by the best interest of retirement investors, rather than adviser perceptions that advice on one category of investment product is subject to different regulatory standards than another.

How the Proposed Rule Addresses the Need for Regulatory Action

The proposed amendments to the 1975 rule would better reflect the text and purposes of the statute and would address inadequacies that the Department has observed during its decades of experience in implementing the 1975 rule. This proposal would honor the broad statutory definition of fiduciary by amending the five-part test to create a uniformly protective fiduciary standard for retirement investors, subject to firm-level oversight, designed to mitigate and eliminate the harmful effects of biased advice. The amendments to the 1975 rule and related exemptions would also eliminate the risk of regulatory arbitrage, in which an investment advice provider may operate in a particular market to evade more stringent regulation. For instance, under the current regulation, an independent producer selling an indexed annuity, a financial professional giving a retirement investor one-time advice to roll investments into an IRA, or a financial professional giving advice on one transaction, could portray themselves as serving the best interest of the investor while being held to lower care standard than financial professionals subject to the Investment Advisers Act of 1940 or the SEC's Regulation Best Interest or the Department's fiduciary standard. In contrast, the amended rule would broadly align the standard of care required of all financial professionals giving retirement investment advice with retirement investors' reasonable expectations that those recommendations are trustworthy. This would in turn create a retirement market where all advisers compete under a uniform fiduciary standard, reducing

investor exposure to harms from conflicted advice.

The fiduciary standard, as buttressed by the protective conditions of PTE 2020-02 and PTE 84-24, protects investors from getting investment recommendations that are improperly biased because of the advisers' competing financial interests. It requires firms and advisers to put the interests of Retirement Investors first and to take appropriate action to mitigate and control conflicts of interest. These conditions should go a long way to redressing the dangers posed by biased advice.

In addition, the proposed exemptions also give inexperienced investors important information on the scope, severity, and magnitude of conflicts of interest. Moreover, by imposing a uniform fiduciary standard on conflicted advisers in the retirement marketplace, the proposed rule and exemptions reduce investor confusion about the standards governing advice. Retail investors who rely on expert advice are unlikely to have a sound understanding of differences in standards across various categories of investments and investment professionals.²³² The SEC Investor Advisory Committee, when considering a uniform adoption of a standard of duty for investment advisers and broker-dealers in 2013, found that "investors do not distinguish between broker-dealers and investment advisers, do not know that broker-dealers and investment advisers are subject to different legal standards, do not understand the difference between a suitability standard and a fiduciary duty, and expect broker-dealers and investment advisers alike to act in their best interest when giving advice and making recommendation."²³³

While these issues have been mitigated to a considerable degree by the imposition of a common "best interest" standard for broker-dealers governed by Regulation Best Interest and investment advisers subject to the Investment Advisers Act or state law, significant differences remain with respect to the standards governing investments that are not securities, such as fixed indexed annuities. Investor confusion is exacerbated by different

²²⁷ In addition to staff guidance, the Commission recognized in Regulation Best Interest that, "as part of determining whether a broker-dealer has a reasonable basis to believe that a recommendation is in the best interest of the retail customer, a broker-dealer generally should consider reasonably available alternatives offered by the broker-dealer" which the Commission viewed as "an inherent aspect of making a 'best interest' recommendation." See Reg BI Adopting Release at 33381.

regulatory regimes referencing a “best interest standard” while defining what that means and the protections that entails differently.

Although the proposal will enhance disclosures of conflicts of interest, the Department stresses that disclosure alone is limited in its effectiveness at protecting investors from the dangers posed by conflicts of interest, as detailed in the RIA for the fiduciary rule the Department promulgated in 2016.²³⁴ As that document explained, there are myriad reasons to doubt that disclosure alone could effectively mitigate conflicts of interest, and available data support a finding that disclosure is not a reliable corrective for conflicts of interest:

- Even with relatively clear disclosures, investors routinely ignore them and are hard pressed to understand them. Investors often lack the requisite financial expertise, disregard the materials they receive, and have trouble following the disclosures or parsing their significance. These problems can be compounded for older and more vulnerable retirement-age investors.

- Merely disclosing a conflict of interest does not give the investor a working model on how to determine the impact of the conflict of interest on the advice they are receiving or of how to use the disclosure to make a better investment decision. While now on notice of the conflict, the inexperienced customer remains dependent on the expert’s advice.

- Disclosure can even exacerbate the harmful impacts of conflicts of interest, as when an adviser feels morally licensed to indulge the conflict of interest because they can now treat the customer as duly warned or as when they press harder to make the sale to offset possible concerns about disclosed conflicts.

- Without a working model on how to take account of conflicts of interest, investors may overweight the advice based on the adviser’s perceived honesty for having disclosed the conflict, or unduly discount the advice and take a contrarian approach because of discomfort about the advice’s reliability. Investors may also feel pressure not to question the adviser’s integrity or deprive them of their livelihood.

While disclosure of conflicts could, in some cases, change the adviser’s behavior for the better,²³⁵ mitigating or removing conflicts and requiring the adviser to adhere to a strong conduct standard with a mechanism for overseeing and enforcing compliance, when necessary, provides stronger incentives for advisers to provide investment advice that is in the best interest of the investor. These are the key components of the Department’s proposals, and the primary ways the Department expects the rule to address the problems posed by conflicted advice.

While the SEC has addressed many of the Department’s concerns about conflicted advice, the impact is limited to advice in the SEC’s regulatory jurisdiction. This situation would be alleviated by the introduction of a uniform fiduciary standard for the broad range of retirement investment transactions in all regulatory spheres. Additional regulatory action is warranted due to the pervasiveness of conflicts of interest in this marketplace and the complexity of investing assets for retirement. The growing body of evidence underscores that best interest fiduciary standards play an important role in protecting retirement investors.²³⁶ One of the Department’s objectives in issuing this proposal is to abate these and similar harms in areas outside of SEC jurisdiction, to ensure that retirement investors’ assets outside the securities space are also protected from conflicted advice. This proposal would extend the fiduciary best interest standard to additional markets and investment product, including annuities and other non-securities. This proposal would apply to advice given to plan fiduciaries as well as plan participants.

In addition, for retirement investors who already receive the protections in the Investment Advisers Act of 1940, Regulation Best Interest, and PTE 2020–02 under the regulatory baseline, this proposal would provide even stronger protections. Standards for mitigating conflicts under this proposal would be more rigorous and well-defined.

3. Baseline

Since the Department first took on the issues of fiduciary advice and conflicts of interest, there have been numerous developments in the regulatory environment and the financial markets in which they operate.

Regulatory Baseline

The problems of conflicted advice and supervisory structures for advice have received increased regulatory attention, resulting in action from the Department, the SEC, individual states, and the National Association of Insurance Commissioners (NAIC). The major actions are summarized below.

Regulatory Baseline, the Department of Labor

Many financial institutions undertook efforts to adapt to the Department’s 2016 Final Rule. As such, the intended improvements in retirement investor outcomes appear to have been on track prior to the Fifth Circuit’s vacatur of the 2016 Final Rule.²³⁷ Research suggests that the Department’s prior efforts produced positive changes in advice markets, even without fully taking effect, which were reinforced by the SEC’s actions. For instance, several studies found that the Department’s 2016 Final Rule had a positive effect on conflicts of interest and that some categories of conflicts, such as bundled share classes of mutual funds and high-expense variable annuities, were reduced even after the DOL rule was struck down.²³⁸ The nature of the conflicts associated with bundled share classes and high-expense variable annuities are discussed later in this document.

In 2020, the Department issued a technical amendment to the CFR to reinsert the 1975 rule and published PTE 2020–02. The exemption is available to registered investment advisers, broker dealers, banks, and insurance companies and their individual employees, agents, and

²³⁶ For more information on the relationship of best interest fiduciary standards and the protection of retirement investors, refer to the Benefits section of the RIA.

representatives that provide fiduciary investment advice to retirement investors. However, the exemption explicitly excluded investment advice solely generated by an interactive website, referred to as “pure robo-advice.”²³⁹ Under the exemption, financial institutions and investment professionals can receive a wide variety of payments that would otherwise violate the prohibited transaction rules. The exemption’s relief extends to prohibited transactions arising as a result of investment advice to roll over assets from a plan to an IRA, under certain conditions.

This exemption conditions relief on the investment professional and financial institution investment advice fiduciaries providing advice in accordance with the Impartial Conduct Standards. The Impartial Conduct Standards include a best interest standard, a reasonable compensation standard, and a requirement to make no misleading statements about investment transactions and other relevant matters. The best interest standard in the exemption is broadly aligned with the federal securities laws. In addition, the exemption requires financial institutions to acknowledge in writing the institution’s and their investment professionals’ fiduciary status under Title I and the Code, as applicable, when providing investment advice to the retirement investor, and to describe in writing the services to be provided and the financial institutions’ and investment professionals’ material conflicts of interest. Financial institutions must document the reasons that a rollover recommendation is in the best interest of the retirement investor and provide that documentation to the retirement investor.²⁴⁰ Financial institutions are required to adopt policies and procedures prudently designed to ensure compliance with the Impartial Conduct Standards and conduct a retrospective review of compliance.

In order to ensure that financial institutions provide reasonable oversight of investment professionals

and adopt a culture of compliance, the exemption provides that financial institutions and investment professionals will be ineligible to rely on the exemption if, within the previous 10 years, they were convicted of certain crimes arising out of their provision of investment advice to retirement investors. They can also become ineligible if they engage in systematic or intentional violation of the exemption’s conditions or provided materially misleading information to the Department in relation to their conduct under the exemption.

At the time PTE 2020–02 was finalized, the Department left in place other administrative exemptions that could be used to provide investment advice in place of PTE 2020–02, including the other PTEs being amended in this proposal. Leaving the other PTEs in place allowed for a varied landscape of conditions that could be used by different types of financial institutions to provide investment advice for different types of assets and financial products. The varied landscape of conditions allows for regulatory arbitrage where investment advice providers can use more favorable rules in one market to circumvent less favorable regulations elsewhere.

Regulatory Baseline, the Securities and Exchange Commission

The Investment Advisers Act of 1940, “establishes a fiduciary duty for [investment advisers] roughly analogous to the fiduciary duties of care and loyalty established by ERISA for investment advisers to plans and plan participants.”²⁴¹ In an interpretation of the conduct standards applicable to investment advisers, the SEC wrote:

An investment adviser’s fiduciary duty under the Advisers Act comprises a duty of care and a duty of loyalty. This fiduciary duty requires an adviser “to adopt the principal’s goals, objectives, or ends.” This means the adviser must, at all times, serve the best interest of its client and not subordinate its client’s interest to its own.²⁴²

In June 2019, the SEC adopted a package of rulemakings and interpretations designed to enhance the quality and transparency of retail investors’ relationships with investment

advisers and broker-dealers.²⁴³ The package included Regulation Best Interest, the Form CRS, and publication of two separate interpretations under the Investment Advisers Act.

Regulation Best Interest establishes a standard of conduct for broker-dealers and associated persons (unless otherwise indicated, together referred to as “broker-dealers”) when they make a recommendation to a retail customer of any securities transaction or investment strategy involving securities.²⁴⁴ In adopting Regulation Best Interest, the SEC made findings consistent with the underlying premise of DOL’s recent rulemakings: that financial services firms’ conflicts of interest are harmful to investors. Specifically, in the Regulation Best Interest preamble, the SEC stated that:

[l]ike many principal-agent relationships—including the investment adviser-client relationship—the relationship between a broker-dealer and a customer has inherent conflicts of interest, including those resulting from a transaction-based (e.g., commission) compensation structure and other broker-dealer compensation.²⁴⁵ These and other conflicts of interest may provide an incentive to a broker-dealer to seek to increase its own compensation or other financial interests at the expense of the customer to whom it is making investment recommendations.²⁴⁶

Notwithstanding these inherent conflicts of interest in the broker-dealer-customer relationship, there is broad acknowledgment of the benefits of, and support for, the continuing existence of the broker-dealer business model, including a commission or other transaction-based compensation structure, as an option for retail customers

²⁴³ SEC Regulation Best Interest defines retail customer to include ERISA plan participants and beneficiaries, including IRA owners, but not ERISA fiduciaries. See 84 FR 33343–44 (July 12, 2019). This subject is further addressed in the affected entities section below.

²⁴⁴ The SEC’s Regulation Best Interest was adopted pursuant to the express and broad grant of rulemaking in Section 913(f) of the Dodd-Frank Wall Street Reform and Consumer Protection Act. The SEC also required disclosure of a Customer Relationship Summary, adopted an interpretation of the fiduciary duty that investment advisers owe to their clients under the Investment Advisers Act, and published an interpretation of the “solely incidental” prong of the broker-dealer exclusion under the Investment Advisers Act. Under Regulation Best Interest, broker-dealers are required to act in the best interest of a retail customer when making a recommendation of any securities transaction or investment strategy involving securities to a retail customer and cannot place its own interests ahead of the customer’s interests.

²⁴⁵ The SEC also stated that “[t]he investment adviser-client relationship also has inherent conflicts of interest, including those resulting from an asset-based compensation structure that may provide an incentive for an investment adviser to encourage its client to invest more money through an adviser in order increase its AUM at the expense of the client.”

²⁴⁶ 84 FR 33319 (July 12, 2019).

²³⁹ “Hybrid robo-advice,” or advice that combines combine features of robo-advice and traditional investment advice, is included under the existing PTE 2020–02. 85 FR 82798, 82830 (Dec. 18, 2020).

²⁴⁰ The PTE 2020–02 preamble says: This requirement extends to recommended rollovers from a Plan to another Plan or IRA as defined in Code section 4975(e)(1)(B) or (C), from an IRA as defined in Code section 4975(e)(1)(B) or (C) to a Plan, from an IRA to another IRA, or from one type of account to another (e.g., from a commission-based account to a fee-based account). The requirement to document the specific reasons for these recommendations is part of the required policies and procedures, in Section II(c)(3).”

²⁴¹ Employee Benefits Security Administration, *Regulating Advice Markets Definition of the Term “Fiduciary” Conflicts of Interest—Retirement Investment Advice Regulatory Impact Analysis for Final Rule and Exemptions*, pp. 30, (April 2016), <https://www.dol.gov/sites/dolgov/files/EBSA/laws-and-regulations/rules-and-regulations/completed-rulemaking/1210-AB32-2/ria.pdf>.

²⁴² Commission Interpretation Regarding Standard of Conduct for Investment Advisers, 84 FR 33669 (July 12, 2019).

seeking investment recommendations . . . Nevertheless, concerns exist regarding (1) the potential harm to retail customers resulting from broker-dealer recommendations provided where conflicts of interest exist and (2) the insufficiency of existing broker-dealer regulatory requirements to address these conflicts when broker-dealers make recommendations to retail customers. More specifically, there are concerns that existing requirements do not require a broker-dealer's recommendations to be in the retail customer's best interest.²⁴⁷

Accordingly, the SEC stated that Regulation Best Interest enhances the broker-dealer standard of conduct beyond existing "suitability" obligations²⁴⁸ and aligns the standard of conduct with customers' reasonable expectations by requiring broker-dealers to act in the best interest of the retail customer at the time the recommendation is made, without placing the financial or other interest of the broker-dealer ahead of the retail customer's interest; and, among other things, address conflicts of interest by disclosing and mitigating, or even eliminating, conflicts of interest.²⁴⁹

In particular, the best interest obligation for Regulation Best Interest is only satisfied if the broker-dealer complies with four component obligations: a Disclosure Obligation, which requires a broker-dealer to provide all material facts related to the scope and terms of the relationship with the retail customer and the conflicts of interests associated with the recommendation prior to or at the time of the recommendation; a Care Obligation, which requires a broker-dealer to exercise reasonable diligence, care, and skill when making recommendations to a retail customer; a Conflict of Interest Obligation, which requires the broker-dealer to establish, maintain and enforce written policies and procedures reasonably designed to address conflicts of interest associated with its recommendations to retail customers; and a Compliance Obligation, which requires broker-dealers to establish, maintain and enforce written policies and procedures reasonably designed to achieve compliance with Regulation Best Interest as a whole.²⁵⁰

Significantly, Regulation Best Interest applies to recommendations by broker-dealers to roll over or transfer assets in a workplace retirement plan accounts to

an IRA and recommendations to take a plan distribution. The SEC has also issued staff guidance that under Regulation Best Interest and the Advisers Act's fiduciary duty, when making a rollover recommendation, broker-dealers and investment advisers must consider costs, the level of services available, and features of existing accounts. The guidance notes that, "it would be difficult to form a reasonable basis to believe that a rollover recommendation is in the retail investor's best interest and does not place your or your firm's interests ahead of the retail investor's interest, if you do not consider the alternative of leaving the retail investor's investments in their employer's plan, where that is an option."²⁵¹

The standard of conduct in SEC's Regulation Best Interest draws from key principles of fiduciary obligations, including those that apply to investment advisers under the Investment Advisers Act. As reiterated in Staff Bulletins²⁵² and speeches,^{253 254} Regulation Best Interest, as adopted, incorporates Care and Conflict of Interest Obligations substantially similar to the fiduciary duties under the Advisers Act of loyalty (to not subordinate their client's interest to their own) and care (to ensure that advice is suitable and in the best interest of the client), to recommendations made by broker-dealers to their retail clients. Importantly, regardless of whether a retail investor chooses a broker-dealer or an investment adviser (or both), the retail investor will be entitled to a recommendation (from a broker-dealer) or advice (from an investment adviser) that is in the best interest of the retail investor and does not place the interests of the firm or the financial professional ahead of the interests of the retail investor.

The SEC's Regulation Best Interest covers advice that SEC-registered broker-dealers render to retail investors. Therefore, the affected firms and professionals include those making

recommendations to the individual IRA and ERISA plan investors covered by this proposal. With respect to this area of overlap, the potential costs of this proposal are relatively limited, because the SEC actions and this proposal share many similarities and many firms have already built compliance structures based on SEC actions, the Department's 2016 Final Rule, and PTE 2020-02.

The SEC also covers robo-advice, subjecting robo-advisers that meet the definition of "investment adviser" to regulation under the Investment Advisers Act of 1940. It states that robo-advisers have a fiduciary duty to provide advice in the best interest of their clients. In addition, if robo-advisers also hold customer assets, they must register with the SEC and FINRA as broker-dealers. In 2017, the SEC's Division of Investment Management released regulatory compliance guidance for robo-advisers that included the need for adequate disclosure about the robo-adviser and the services it provides, the need to ensure that the robo-adviser is providing appropriate advice to its customers, and the need to adopt and implement appropriate compliance programs tailored to the automated nature of the robo-adviser's services.²⁵⁵ This SEC guidance confirms that robo-advisers registered as investment advisers with the SEC are subject to the Investment Adviser Act's legal requirements and fiduciary obligations.

For brokers-dealers subject to Regulation Best Interest and investment advisers subject to the Investment Advisers Act, there is substantial overlap between SEC requirements and the obligations imposed by ERISA, the Code, and this regulatory project. Outside this area of overlap, however, current standards generally are lower, so the potential costs—and benefits—of this proposal may be more significant. For example, this proposal would apply to state-licensed insurance agents and state-registered brokers, who are not uniformly regulated by the SEC, when they provide investment advice to IRA or ERISA plan investors. It would also apply to broker-dealers who give fiduciary advice to ERISA plan fiduciaries, who are not included within Regulation Best Interest's definition of a retail customer. Recommendations regarding plan and IRA investments in real estate, certificates of deposit, other bank products and fixed indexed annuities that are not considered

securities under the federal securities laws are also not generally regulated by the SEC.

The Department is especially concerned about the proper regulation of fixed index annuities, as they comprised 67 percent of the retail annuity market in 2022, an increase of 42 percent from 2021, as investors hedged against rising interest rates.²⁵⁶ This growth in fixed annuity investments has increased the share of retirement savings residing in a less secure environment with fewer protections against conflicted advice compared to direct investors in mutual funds and securities. The Department

anticipates the benefits to investors of extending fiduciary law principles to entities providing investment advice in currently less stringent regulatory regimes to be substantial.

Regulatory Baseline, State Legislative and Regulatory Developments

The appropriate baseline for this analysis is also informed by certain recent legislative and regulatory developments involving conduct standards at the state level.

Summary of State Legislative and Regulatory Developments

In a list compiled in July 2023, the Department identified 43 states that

have enacted legislation, finalized regulation, or both that impose conduct standards and disclosure requirements on various financial institutions.²⁵⁷ The table below summarizes the enacted legislation and finalized regulation in each state, as well as the type of financial institution each regulation pertains to. This list includes states that have adopted the NAIC Model Regulation #275,²⁵⁸ in addition to states that have adopted conduct standards and disclosure requirements outside of NAIC Model Regulation #275.

TABLE 1—STATES THAT HAVE ENACTED LEGISLATION OR FINALIZED REGULATION

State	Legislation or regulation	Title of legislation or regulation	Affected entities
Alabama	Regulation	Suitability in Annuity Transactions	Insurers, Broker-Dealers, and Independent Producers.
Alaska	Regulation	Suitability in Annuity Transactions	Insurers and Independent Producers.

NAIC Annuity Transactions Model Regulation #275

As shown in the table above, much of the legislative and regulatory action among states focuses on insurers and

independent producers. In February 2020, the NAIC membership approved revisions to its Suitability in Annuity Transactions Model Regulation to include a “best interest” standard of conduct. When the Department conducted its analysis of states in July of 2023, 39 states had adopted the NAIC Model Regulation #275.²⁶¹ Since then,

²⁶¹ Based on internal Department analysis, the modified Model Regulation #275, including a best interest standard, was adopted by Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Iowa, Kansas, Kentucky, Maine, Maryland,

additional states may have adopted the Model Regulation. In August 2023, the NAIC reported that 43 states had adopted it.²⁶²

The revisions were in response to both the SEC and the Department’s work

Massachusetts, Michigan, Minnesota, Mississippi, Montana, Nebraska, New Mexico, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.

²⁶² NAIC, *Annuity Suitability & Best Interest Standard*, (August 2023), <https://content.naic.org/cipr-topics/annuity-suitability-best-interest-standard>.

²⁶⁰ California, New Hampshire, and New Jersey have introduced legislation and/or regulation.

in the regulatory space and reflected some movement in the direction of greater uniformity, although significant differences remain, as partially discussed below.²⁶³ The NAIC Model Regulation includes a best interest obligation comprised of a care obligation, a disclosure obligation, a conflict of interest obligation, and a documentation obligation, applicable to an insurance producer.²⁶⁴ If these obligations are met, the producer is treated as satisfying the best interest standard. The care obligation states that the producer, in making a recommendation, must exercise reasonable diligence, care and skill to:

- Know the consumer's financial situation, insurance needs and financial objectives;
- Understand the available recommendation options after making a reasonable inquiry into options available to the producer;
- Have a reasonable basis to believe the recommended option effectively addresses the consumer's financial situation, insurance needs and financial objectives over the life of the product, as evaluated in light of the consumer profile information; and
- Communicate the basis or bases of the recommendation.

The conflict of interest obligation requires the producer to “identify and avoid or reasonably manage and disclose material conflicts of interest, including material conflicts of interest related to an ownership interest.” “Material conflict of interest” is defined as “a financial interest of the producer in the sale of an annuity that a reasonable person would expect to influence the impartiality of a recommendation,” but the definition expressly carves out “cash compensation or non-cash compensation” from treatment as sources of conflicts of interest. The NAIC Model Regulation also provides that it does not apply to transactions involving contracts used to fund an employee pension or welfare plan covered by ERISA.

The NAIC expressly disclaimed that its standard creates fiduciary obligations and the obligations in the Model Regulation differ in significant respects

from those in Regulation Best Interest. For example, in addition to disregarding compensation as a source of conflicts of interest, the specific care, disclosure, conflict of interest, and documentation requirements, do not expressly incorporate the obligation not to put the producer's interests before the customer's interests, even though compliance with their terms is treated as meeting the “best interest” standard. The care obligation in the Model Regulation only requires that the adviser “[h]ave a reasonable basis to believe the recommended option *effectively addresses the consumer's financial situation.*”²⁶⁵ In contrast, Regulation Best Interest requires that, when making a recommendation, the broker-dealer “exercises reasonable diligence, care, and skill to . . . [h]ave a reasonable basis to believe that the *recommendation is in the best interest of a particular retail customer,*”²⁶⁶ and the exemptions proposed here, consistent with ERISA's text, require that advice reflect the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims, based on the investment objectives, risk tolerance, financial circumstances, and needs of the Retirement Investor.

In recent insurance industry litigation against the Department, the plaintiffs described the differences between “the requirements of an ERISA fiduciary and an insurance agent operating under the NAIC model regulation [as] extensive.”²⁶⁷ Among the numerous differences they identified is the fact that, “the NAIC model regulation does not define conflicts of interest or the requirements pertaining to such conflicts as broadly as ERISA.”²⁶⁸ Additionally, they asserted that “the NAIC model regulation does not contain a ‘prudence’ standard”²⁶⁹ and characterized “these best interest requirements . . . [as] a far cry from the obligations imposed on an ERISA fiduciary.”²⁷⁰

²⁶⁵ *Id.* at § 6(A)(1)(a)(iii). Members of the insurance industry have noted that “[t]here is a world of difference” between the NAIC model rule and ERISA's fiduciary regime. The Department of Labor, uniquely among the regulators, can impose uniform standards for the provision of investment advice to retirement investors. It is neither limited to the regulation of securities, nor to insurance products, but rather can set a uniform fiduciary standard for the regulation of conflicts of interest with respect to any advice on any investment products recommended to retirement investors. The Department believes that retirement investors and the regulated community are best served by a consistent, protective, and understandable fiduciary standard.

Market Conditions and Impacts of Conflicts of Interest

Financial products, commission structures, and investment services are constantly evolving. The major market developments that the Department considered with respect to the proposed amendments are discussed below.

Market Developments, Mutual Fund Share Classes

The 2016 Final Rule and recent SEC actions highlighted inherent conflicts of interest in how broker-dealers or investment advisers are compensated for recommending certain share classes of mutual funds. Since then, share classes without traditional conflicts of interest have increased in popularity. For instance, data published by the Investment Company Institute (ICI) in 2021 show that no-load mutual funds, or mutual funds without commissions, accounted for 46 percent of long-term mutual fund gross sales in 2000, 79 percent in 2015, and 89 percent in 2021. The ICI attributed the increase in no-load funds to two growing trends: investors paying intermediaries for advice through direct fees rather than indirectly through funds and the popularity of retirement accounts that invest in institutional, no-load share classes.²⁷¹

Sethi, Spiegel, and Szapiro (2019) found that the Department's 2016 Final Rule reduced flows into funds with excess loads or loads that were higher than would otherwise be expected based on the fund's characteristics.²⁷²

²⁷¹ Investment Company Institute, *Trends in the Expenses and Fees of Funds*, 2021, 28(2) ICI Research Perspective (March 2022).

²⁷² This study updated the analysis performed by Christoffersen, Evans, and Musto (2013) and examined the period from 1993 to 2017 in order to look at the impact of the Department's Final Rule, taking into consideration preexisting marketplace trends, anticipatory effects, the April 2015 Proposal, and the April 2016 Final Rule. The study calculates the excess load as “the difference between loads predicted by a regression and actual load, given a

²⁶³ NAIC, *Suitability in Annuity Transactions Model Regulation (#275) Best Interest Standard of Conduct Revisions Frequently Asked Questions*, (May 10, 2021), <https://content.naic.org/sites/default/files/inline-files/Final%20FAQ%20July%202021.pdf>.

²⁶⁴ A producer is defined in section 5.L. of the model regulation as “a person or entity required to be licensed under the laws of this state to sell, solicit or negotiate insurance, including annuities.” Section 5.L. further provides that the term producer includes an insurer where no producer is involved.

Mitchell, Sethi, and Szapiro (2019) found while mutual funds with excess loads have historically received greater inflows, since 2010 the correlation between excess loads and inflows has been lower. The authors attribute this change to an “increased focus on broker practices” and “a culture of accountability.”²⁷³

Meanwhile, other types of share classes have emerged and grown more prevalent, including unbundled and semi-bundled share classes. In a traditional, bundled share class, the investor pays the mutual fund a load or 12b–1 fee, and the mutual fund pays a portion back to an intermediary, such as the intermediary that sold the fund to the investor. Alternatively, in an unbundled or “clean” share class, the investor pays any intermediaries directly, while in a semi-bundled share class, the fund pays sub-accounting fees for recordkeeping services and uses revenue sharing for other services, such as distribution.²⁷⁴ The different compensation arrangement for each of the types of share classes create different types and magnitudes of conflicts for financial professionals.

Adoption of these new share classes has spread quickly. Mitchell, Sethi, and Szapiro (2019) found that between July 2018 to August 2019, relatively few bundled share classes were launched into the market and that more bundled share classes closed in that time frame than semi-bundled and unbundled combined. Additionally, they found that unbundled share classes received almost five times as much new money as semi-bundled share classes. While flows to semi-bundled share classes fluctuated, they received net positive flows overall during this period.²⁷⁵

Market Developments, the Insurance Market

Before it was vacated, the 2016 Final Rule had begun exerting substantial influence on financial advice and products in the insurance market, particularly with regard to annuities. There are three common types of annuities offered by insurance companies.

- In a *variable annuity*, an insurance company invests in an investment option chosen by the investor, which is

number of other control variables.” See Jasmin Sethi, Jake Spiegel, & Aron Szapiro, *Conflicts of Interest in Mutual Fund Sales: What Do the Data Tell Us?*, 6(3) *The Journal of Retirement* 46–59 (Winter 2019).

²⁷³ Lia Mitchell, Jasmin Sethi, & Aron Szapiro, *Regulation Best Interest Meets Opaque Practices: It's Time to Dive Past Superficial Conflicts of Interest*, *Morningstar* (November 2019).

²⁷⁴ *Ibid.*

²⁷⁵ *Ibid.*

often a mutual fund.²⁷⁶ The return of the variable annuity reflects the return on the underlying investments. Variable annuities have often been referred to as “mutual funds in an insurance wrapper.”²⁷⁷

- In a *fixed annuity*, an insurance company agrees to pay the investor no less than a specified rate of interest during the asset accumulation phase and to pay a specified amount per dollar in the decumulation phase.^{278 279}

- In an *indexed annuity*, an insurance company agrees to pay the investor returns linked to the performance of a market index. However, unlike a variable annuity, the terms in the contract and the method used to calculate gains and losses may result in actualized gains or losses that differ from the gains and losses experienced by the index.²⁸⁰

Annuity regulators also vary by type. While all annuity products are subject to state regulation, variable annuities and some indexed annuities are considered securities, and therefore are also subject to SEC and FINRA regulations.²⁸¹ As the financial structure of each type of annuity varies, so does the risk of conflicted advice. Variable and fixed-indexed annuity commissions tend to be similar, while fixed rate income and immediate annuity commissions are generally lower.²⁸²

Similar to mutual funds, insurance agents and brokers are often compensated through load fees for selling variable annuities.²⁸³ The

²⁷⁷ Frank Fabozzi, *The Handbook of Financial Instruments*, 596–599 (2002).

²⁷⁸ SEC, *Annuities*, (2021), <https://www.investor.gov/introduction-investing/investing-basics/glossary/annuities>.

²⁷⁹ The initial contract of a fixed annuity establishes an initial credited rate, a minimum guaranteed rate, and a bailout rate. The invested premiums grow at the specified credited rate and are added to the cash value of the annuity. The credited rate may be changed by the insurance company at a specified frequency. However, the interest rate is guaranteed to be no lower than the specified minimum guaranteed rate. If the credited rate falls below the bailout rate, the investor is able to withdraw all the funds without paying a surrender charge. See Frank Fabozzi, *The Handbook of Financial Instruments*, 599–601 (2002).

²⁸⁰ SEC, *Updated Investor Bulletin: Indexed Annuities*, (July 2020), <https://www.investor.gov/introduction-investing/general-resources/news-alerts/alerts-bulletins/investor-bulletins/updated-13>. See also FINRA Rule 2330.

²⁸³ Frank Fabozzi, *The Handbook of Financial Instruments* 596–599 (2002).

commission paid varies significantly, from as little as 0 percent to as much as 10 percent of the investment with the most common amount being 7 percent.²⁸⁴ The 2016 Final Rule discouraged sales of the typical load funds. Between 2016 and 2018, the sale of fee-based variable annuities, or I-share class variable annuities, increased by 43 percent.²⁸⁵ Following the vacatur of the 2016 Final Rule in 2018, fee-based variable annuity sales decreased, falling by 28 percent between 2018 and 2020. More recently, sales have rebounded, increasing 76 percent between 2020 and 2021.²⁸⁶ The significant increases in I-share class variable annuities have been driven by demand for fee-based products among fee-based advisers. They have been the second most popular variable annuity contract type since 2016, though they still only comprised 9.5 percent of retail variable annuity sales in 2021.²⁸⁷ The Department does not have similar trend data on sales of fee-based fixed annuities.

Summary

The recent regulatory and market developments, combined with the judicial vacatur of the 2016 Final Rule, provide for a different baseline than the pre-2016 Final Rule baseline. While some reforms and improvements in the delivery of advice have endured despite the vacatur, without new regulatory action, gains made to some products and markets that are not covered by recent regulatory actions by the Department, SEC, or states, could be derailed. Other regulatory agencies have worked to reduce conflicts of interest, but this has resulted in a “patchwork” approach to regulating advice arrangements of retirement investments,²⁸⁸ which has already resulted in the most conflicted advisers moving to markets with the least oversight.²⁸⁹

²⁸⁹ Colleen Honigsberg, Edwin Hu, & Robert J. Jackson, Jr., *Regulatory Arbitrage and the Persistence of Financial Misconduct*, 74 *Stanford Law Review* 797 (2022).

This proposal would extend important and effective protections broadly to retirement investors. Specifically, the proposal would replace the 1975 regulation's five-part test with a new fiduciary status test, which would capture more financial investment transactions in which the investor is reasonably relying on the advice individualized to the investor's financial needs and best interest. This proposal would also increase the number of rollover recommendations being considered as fiduciary advice, which would enhance protections to retirement investors, particularly in

regard to recommendations regarding annuities.

In accordance with OMB Circular A–4, Table 2 depicts an accounting statement summarizing the Departments' assessment of the benefits, costs, and transfers associated with this regulatory action. The Department is unable to quantify all benefits, costs, and transfers of the proposal but has sought, where possible, to describe these non-quantified impacts. The effects in Table 2 reflect non-quantified impacts and estimated direct monetary costs resulting from the provisions of the proposal.

The quantified costs are significantly lower than costs in the 2016 RIA due to the smaller scope of the proposal relative to the 2016 Final Rule as well as compliance structures adopted by the industry to reduce conflicted advice in response to state regulations, Regulation Best Interest, PTE 2020–02, and the Department's 2016 Rulemaking. The methodology for estimating the costs of the proposed amendments to the rule and PTEs is consistent with the methodology and assumptions used in the 2020 analysis for the current PTE 2020–02.

TABLE 2—ACCOUNTING STATEMENT

Benefits:

Non-Quantified (please also see the Transfers section of this table):

• Increase uniformity in the regulation of financial advice for retirement investors, across different market segments and market participants. • Protect consumers from losses that can result from advisory conflicts of interest (without unduly limiting consumer choice or adviser flexibility). • Facilitate retirement investors' trust in advisers. • Facilitate more efficient capital allocation				
Costs	Estimate	Year dollar	Discount rate	Period covered
Annualized	\$221.1	2023	7 percent	2024–2033
Monetized (\$million/Year)	220.4	2023	3 percent	2024–2033

Quantified Costs:

The Department expects that entities would not incur additional costs from the proposed amendments to PTE 77–4, PTE 80–83, and PTE 83–1. However, the Department expects that entities would incur costs directly from the proposed amendments to the following PTEs:

- The annualized cost estimates in PTE 2020–02 reflect estimated costs associated with reviewing the proposal, preparing written disclosures for investors, preparing written disclosures for PEPs, reviewing and updating policies and procedures, reviewing and updating the retrospective review, and preparing rollover documentation.
- The annualized cost estimates in PTE 84–24 reflect estimated costs associated with reviewing the rule, providing disclosures to retirement investors, establishing written policies and procedures, conducting a retrospective review, and maintaining recordkeeping.
- The annualized cost estimates in PTE 75–1 reflect estimated costs associated with maintaining recordkeeping.
- The annualized cost estimates in PTE 86–128 reflect estimated costs associated with maintaining recordkeeping. In addition, the annualized cost estimates in PTE 86–128 reflect estimated costs associated with extending the exemption requirements on IRAs. These costs include preparing and distributing the written authorization from the authorizing fiduciary to the broker-dealer, preparing and mailing the required information to the authorizing fiduciary, preparing and distributing the annual termination form, preparing and distributing the quarterly report, collecting and generating the information required for the annual report, and collecting and generating the information required for the report of commissions paid.

TABLE 2—ACCOUNTING STATEMENT—Continued

Transfers:

Non-Quantified:

The Benefits section provides a qualitative description of the expected gains to investors; however, the available data do not allow the Department to break down those gains into component social welfare “benefits” and “transfers.”

Transfers identified in this analysis include:

- Lower fees and expenses for participants paid to financial institutions.
- Reallocation of investment capital to different asset classes, share classes, or investment products.
- Shifts in the assets in plans and IRAs.

4. *Affected Entities*

The table below summarizes the estimated number of entities that would

be affected by the proposed amendments to the Rule and each of the

PTEs. These estimates are discussed in greater detail below.

TABLE 3—AFFECTED FINANCIAL ENTITIES

	Prohibited transaction exemptions					
	2020–02	75–1	77–4	80–83	86–128	84–24
Retirement Plans	765,124	765,124	277,390	6,886	1,000	1,722
Individual Retirement Accounts	3,119,832				210	52,449
Pooled Employer Plans	382					
Pooled Plan Providers	134					
Broker-Dealers	1,894	1,894				
Discretionary Fiduciaries					1,894	
Registered Investment Advisers	15,982					
Pure Robo-Advisers	200					
Insurance Companies	183					215
Captive Insurance Agents and Brokers	1,577					1,577
Insurance Producers						4,000
Banks		2,048		25		
Mutual Fund Companies			812			
Investment Company Principal Underwriters	20					20
Pension Consultants	1,011					1,011

Plans and Participants

The proposed amendments to the rule and related PTEs would affect plans that receive investment advice from a financial institution. Participants may be affected by advice they receive directly and by advice that is received by their plan’s administrators and fiduciaries. As of 2021, there were approximately 765,000 private sector retirement plans with 146 million participants and \$13.2 trillion in assets that would be affected by these proposals. Approximately 46,000 of these plans were defined benefit plans, with 31 million participants and \$3.7 trillion in assets, and approximately 719,000 are defined contribution plans with 115 million participants and \$9.5 trillion in assets.²⁹⁰ The Department

recognizes that some plans, such as simplified employee pension (SEP) plans and Savings Incentive Match Plan for Employees IRA (SIMPLE IRA) plans, are exempt from filing and are not included in these estimates but would typically be affected by the proposal. The Department expects that participants in general would benefit from the stronger, uniform standards imposed by the proposed amendments to the rule and PTEs.

Participants who receive investment advice would be directly affected by the proposed amendments, particularly participants receiving one-time advice as to whether they should roll over their retirement savings. These participants are discussed in the section on IRA owners, below.

Similarly, plans receiving fiduciary investment advice would also be

directly affected by the proposed amendments. The Department believes that most of these plan fiduciaries are compliant with the existing PTE 2020–02. Accordingly, the Department expects that plans would be only minimally affected by the proposed amendments to the rule. The Department requests comment on how plans currently compliant with PTE 2020–02 would be affected. As amended, PTE 86–128, PTE 84–24, and PTE 77–4 would directly affect subsets of plans, described below.

The proposed amendments to PTE 86–128 would limit the scope of the amendment to transactions in which a fiduciary uses its fiduciary authority to cause the plan or IRA to pay a fee to such trustee for effectuating or executing securities transactions as an agent for the plan. Using 2021 Form 5500 data, the Department estimates that 1,257 unique plans hired service providers that denoted on the Schedule C that they were a discretionary trustee. Further, among these plans, 801 plans

²⁹⁰ Private Pension Plan Bulletin: Abstract of 2021 Form 5500 Annual Reports, Employee Benefits Security Administration (2023; forthcoming), Table A1. Table A1 reports that there were 765,124 pension plans, consisting of 46,388 defined benefit plans and 718,736 defined contribution plans. Due to a rounding discrepancy, the sum of defined

benefit and defined contribution plans does not equal the aggregate of the plans. Additionally, some individuals participate in two or more plans, so the number of individuals covered is lower than the number of gross participants.

also reported that the discretionary trustee provided investment management services or received investment management fees paid directly or indirectly by the plan.²⁹¹ Based on the range of values (801 and 1,257), the Department estimates on average, 1,000 plans have discretionary fiduciaries with full discretionary control. As small plans do not file the Schedule C, this estimate may be an underestimate. The Department requests comment on how many plans have discretionary fiduciaries with full discretionary control and how many would continue to rely on PTE 86–128 under the proposed amendments.

The Department estimates that of the estimated 1,000 plans discussed above, 7.5 percent are new accounts or new financial advice relationships.²⁹² Based on these assumptions, the Department estimates that 75 plans would be affected by the proposed amendments to PTE 86–128.²⁹³

For PTE 84–24, the Department estimates that 7.5 percent of plans are new accounts or new financial advice relationships²⁹⁴ and that 3 percent of plans will use the exemption for covered transactions.²⁹⁵ Based on these assumptions, the Department estimates that 1,722 plans would be affected by the proposed amendments to PTE 84–24.²⁹⁶

To estimate the number of plans affected by the proposed amendments to PTE 77–4, the Department estimated the number of plans relying on a mutual fund company. The Department does not have data on what percentage of plans receive fiduciary advice through mutual fund companies. A 2013 Deloitte/ICI survey found that 37 percent of 401(k) plans have a mutual fund company as their service

provider.²⁹⁷ Based upon ICI analyses and Form 5500 data that examines the percentage of plans that are invested in registered investment companies, the Department estimates that 24.7 percent of defined benefit plans have mutual fund companies as money managers.²⁹⁸ Applying these percentages to the universe of pension plans that filed a Form 5500 in 2021 yields a total of approximately 277,390 plans with service provider relationships with mutual fund companies.²⁹⁹ Thus, the Department estimates that 277,390 plans would be affected by the proposed amendments to PTE 77–4. The Department acknowledges that this estimate likely overestimates the number of plans affected by the proposed amendments.

Individual Retirement Account (IRA) Owners

The proposed amendments to the rule and PTEs 2020–02, 84–24, 75–1, and 86–128 would also impact IRA owners receiving investment advice. According to Cerulli Associates, there were 67.8 million IRA owners holding \$11.5 trillion in assets in 2022.³⁰⁰ Approximately 85 percent of the assets are held in traditional IRAs, 10 percent in Roth IRAs, and 5 percent in SEP, Salary Reduction Simplified Employee Pension (SARSEP), and SIMPLE IRAs.³⁰¹ Some owners hold multiple IRAs. The Department estimates that the number of IRA accounts is 83.3 million by applying the ratio of IRA accounts to IRA owners observed in EBRI's administrative database.³⁰²

²⁹⁷ The Department uses this estimate as a proxy for the percent of defined contribution plans that have service provider relationships with mutual fund companies. See Deloitte & Investment Company Institute, *Defined Contribution/401(k) Fee Study*, (August 2014).

²⁹⁸ Based on Form 5500 Data 2000–2010, defined benefit plans are approximately 33 percent less likely than defined contribution plans to be invested in a registered investment company. See Sarah Holden, *The Economics of Providing 401(k) Plans: Services, Fees, and Expenses*, Investment Company Institute (September 2010).

²⁹⁹ Private Pension Plan Bulletin: Abstract of 2021 Form 5500 Annual Reports, Employee Benefits Security Administration (2023; forthcoming), Table A1. There are 765,124 pension plans, of which 718,736 are defined contribution plans and 46,388 are defined benefit plans. The number of plans with service provider relationships with mutual fund companies is estimated as: 718,736 defined contribution plans $\times$ 37% = 265,932; 46,388 defined benefit plans $\times$ 24.7% = 11,458.

³⁰⁰ Cerulli Associates, *U.S. Retirement End-Investor 2023: Personalizing the 401(k) Investor Experience*, Exhibits 5.03 and 5.12. The Cerulli Report.

³⁰¹ *Ibid.* Exhibits 5.03 and 5.04.

³⁰² The EBRI database has data on 11.3 million IRA accounts owned by 9.2 million individuals. See Craig Copeland, *EBRI IRA Database: IRA Balances, Contributions, Rollovers, Withdrawals, and Asset Allocation, 2017 Update*, EBRI Issue Brief, no. 513

The proposed amendments to the rule and PTE 2020–02 would affect retirement investors who roll over money from a plan or IRA into another plan or IRA. A 2020 survey found that 46 percent of recent retirees who had at least \$30,000 in retirement savings had rolled at least some of their savings into an IRA.³⁰³ According to Cerulli Associates, in 2022, almost 4.5 million DC plan accounts with \$779 billion in assets were rolled over into an IRA. Additionally, 0.7 million DC plan accounts with \$66 billion in assets were rolled over to other employer-sponsored plans.³⁰⁴ It is challenging to obtain detailed data on other types of rollovers such as IRA-to-IRA and DB plan-to-IRA. The Department used IRS data from 2020 to estimate overall rollovers into IRAs, which is 5.7 million taxpayers and \$618 billion.³⁰⁵ Adding in the figures for plan-to-plan rollovers, the Department estimates the total number of rollovers at 6.4 million accounts with \$684 billion in assets.³⁰⁶ The Department requests comment on these estimates.

Only rollovers overseen by an ERISA fiduciary would be affected by the proposed amendments to PTE 2020–02. The Department does not have compelling data on the percentage of rollovers that will be overseen by an ERISA fiduciary under the amended rule. In 2022, 49 percent of DC plan-to-IRA rollovers with 63 percent of DC plan rollover assets were intermediated by a financial adviser.³⁰⁷ Because the

(2020). The Department uses this ratio as a proxy for the ratio for total IRA accounts to IRA owners in the following estimate: (11.3 million IRA accounts/9.2 million IRA owners) $\times$ 67,781,000 IRA owners = 83,252,750 IRA accounts.

³⁰³ Pew Charitable Trusts, “Pew Survey Explores Consumer Trend to Roll Over Workplace Savings Into IRA Plans,” Issue Brief, (October 2021), <https://www.pewtrusts.org/en/research-and-analysis/issue-briefs/2021/09/pew-survey-explores-consumer-trend-to-roll-over-workplace-savings-into-ira-plans>.

³⁰⁴ According to Cerulli, in 2022, there were 4,485,059 DC plan-to-IRA rollovers and 707,104 DC plan-to-DC plan rollovers. See Cerulli Associates, *U.S. Retirement End-Investor 2023: Personalizing the 401(k) Investor Experience*, Exhibit 6.05. The Cerulli Report.

³⁰⁵ Internal Revenue Service, *SOI Tax Stats—Accumulation and Distribution of Individual Retirement Arrangement (IRA)*, Table 1: Taxpayers with Individual Retirement Arrangement (IRA) Plans, By Type of Plan, Tax Year 2020, (2023).

³⁰⁶ Estimates for the number of IRAs may include some non-retirement accounts such as Health Savings Accounts, Archer medical savings accounts, and Coverdell education savings accounts. See the discussion on Code section 4975 in the Background section of the preamble for more details.

³⁰⁷ According to Cerulli, 49 percent of rollovers were mediated by an adviser, while 37 percent were self-directed. The remaining 14 percent were plan-to-plan rollovers. See Cerulli Associates, *U.S. Retirement-End Investor 2023: Personalizing the*

²⁹¹ Estimates based on 2021 Form 5500 data.

²⁹² EBSA identified 57,575 new plans in its 2021 Form 5500 filings, or 7.5 percent of all Form 5500 pension plan filings.

²⁹³ The number of new plans is estimated as: 1,000 plans $\times$ 7.5 percent of plans are new = 75 new plans. The number of new IRAs is estimated as: 10,000 IRAs $\times$ 2.1 percent of IRAs are new = 210 new IRAs.

²⁹⁴ EBSA identified 57,575 new plans in its 2021 Form 5500 filings, or 7.5 percent of all Form 5500 pension plan filings.

²⁹⁵ In 2020, 7 percent of traditional IRAs were held by insurance companies. See Investment Company Institute, *The Role of IRAs in US Households' Saving for Retirement, 2020*, 27(1) ICI Research Perspective (2021), <https://www.ici.org/system/files/attachments/pdf/per27-01.pdf>. This number has been adjusted downward to 3 percent to account for the fact that some transactions are not covered by this exemption.

²⁹⁶ 765,124 plans $\times$ 7.5 percent of plans are new $\times$ 3 percent of plans with relationships with insurance agents or pension consultants = 1,722 plans.

Department assumes that advisers intermediating rollovers are ERISA fiduciaries, this estimate is an upper bound. The Department then applies the estimate of DC plan-to-IRA rollovers to all types of rollovers. Accordingly, the Department estimates that 3.1 million rollovers and \$431 billion in rollover assets would be affected by the proposed amendments to PTE 2020–02.³⁰⁸ The Department requests comments on these estimates.

As amended, PTE 86–128 and PTE 84–24 would each affect subsets of the number of IRAs discussed above. The Department's estimates of the IRAs that would be affected by the proposed amendments to PTE 86–128 and PTE 84–24 are discussed below.

The proposed amendments to PTE 84–24 would affect new IRA accounts. The Department does not have data on the number of new IRA accounts that are opened each year. However, in 2022, of the 67.8 million IRA owners, 1.4 million, or approximately 2.1 percent, opened an IRA for the first time.³⁰⁹ The Department used this statistic to estimate that 2.1 percent of IRA accounts are new each year. The Department acknowledges that some IRA owners may have multiple IRAs, and as such, this statistic may underestimate the percentage of new IRAs opened.³¹⁰ Additionally, the Department estimates that about 3 percent of these new IRAs, or approximately 52,000 IRAs, would use PTE 84–24 for covered transactions.³¹¹ The Department requests comments on these assumptions, particularly with

regard to the percent of IRAs that are new accounts each year.

The proposed amendments to PTE 86–128 would limit the scope of the amendment to transactions in which a fiduciary uses its fiduciary authority to cause the plan or IRA to pay a fee to such trustee for effectuating or executing securities transactions as an agent for the plan, without providing investment advice. The Department lacks reliable data on the number of managed IRAs that would experience such a transaction in a given year. For the purpose of this analysis, the Department assumes that there are 10,000 managed IRAs. To err on the side of caution, the Department assumes that all managed IRAs would have a relationship with a discretionary fiduciary. As discussed above for PTE 84–24, the Department assumes 2.1 percent of IRA accounts are new each year. This results in an estimate of 210 managed IRAs that are new accounts or new financial advice relationships.³¹² The Department requests comment on these estimates, particularly on the number of IRAs that are managed accounts.

These estimates likely overestimate of the number of IRA owners that would be affected by the proposed amendments, since IRA owners would only be affected by the proposed rule and amendments to PTEs when they have a relationship with certain financial entities or are conducting financial certain transactions, as defined by the revised fiduciary definition and the conditions for exemptive relief of each PTE. In addition to the specific requests for comment, the Department welcomes general comments on how IRAs and rollovers are likely to be affected by the proposed amendments.

Pooled Plan Providers and Pooled Employer Plans

The proposed amendments to PTE 2020–02 would affect PPPs and PEPs. As of August 22, 2023, 134 PPPs had filed an initial Form PR Pooled Plan Provider Registration (Form PR) and 382 PEPs were registered with the Department, though this number does not include all PEPs operating on fiscal years whose filing deadline may be delayed.³¹³ Due to these data limitations, the Department assumes a

universe of 134 PPPs and 382 PEPs for its cost estimate.³¹⁴

The Department does not have data on what percent of PPPs or PEPs would be affected by PTE 2020–02. For the purposes of this analysis, the Department assumes that all PPPs and PEPs would be affected. The Department requests comment on this assumption.

Summary of Affected Financial Entities

In its economic analysis for its 2020 rulemaking, the Department included all financial institutions eligible for relief on a variety of transactions and compensation that may not have been covered by prior exemptions in its cost estimate. In 2020, the Department acknowledged that not all these entities will serve as investment advice fiduciaries to plans and IRAs within the meaning of Title I and the Code. Additionally, the Department acknowledged that because other exemptions are also currently available to these entities, it is unclear how widely financial institutions will rely upon the new exemptions and which firms are most likely to choose to rely on them.

This analysis, like the analysis from 2020, includes all financial institutions eligible for relief in its cost estimate. These estimates are subject to caveats similar to those in 2020. The Department requests comments on which, and how many, financial institutions may rely on each of the exemptions, as amended.

Additionally, the proposed rule would expand the definition of a fiduciary such that an advice provider would be a fiduciary if they make an investment recommendation to a retirement investor for a fee or compensation and any of the following circumstances apply: (1) the advice provider (directly or indirectly) has investment discretion over the retirement investor's assets, (2) the advice provider (directly or indirectly) provides investment recommendations on a regular basis as part of their business and the recommendation is provided under circumstances indicating that it is based on the particular needs or individual circumstances of the retirement investor and may be relied upon by the retirement investor as a basis for investment decisions that are in the retirement investor's best interest, or (3)

401(k) Investor Experience Fostering Comprehensive Relationships, Exhibit 6.04. The Cerulli Report.

³⁰⁸ The number of affected rollovers is estimated as: $(6,367,005 \times 49\%) = 3,119,832$.

³⁰⁹ Cerulli Associates, *U.S. Retirement End-Investor 2023: Fostering Comprehensive Relationships*, The Cerulli Report.

³¹⁰ The Department lacks data on the number of IRA owners that own multiple IRAs. To provide scope of magnitude, one source reported that in 2019, 19 percent of IRA owners contributed to both a traditional IRA and Roth IRA. See Investment Company Institute, *The Role of IRAs in U.S. Households' Saving for Retirement, 2020*, 27(1) ICI Research Perspective (2021), <https://www.ici.org/system/files/attachments/pdf/per27-01.pdf>. This statistic does not account for individuals who own multiple of each type of IRA or those who did not contribute in 2019, but it provides a lower bound.

³¹¹ In 2020, 7 percent of traditional IRAs were held by insurance companies. See Investment Company Institute, *The Role of IRAs in U.S. Households' Saving for Retirement, 2020*, 27(1) ICI Research Perspective (2021), <https://www.ici.org/system/files/attachments/pdf/per27-01.pdf>. This number has been adjusted downward to 3 percent to reflect the removal of transactions not covered by this exemption. The number of IRAs affected is estimated as: $(83,252,750 \text{ IRAs} \times 2.1\% \text{ IRAs assumed to be new IRAs} \times 3\% \text{ of IRAs held by insurance companies}) = 52,449 \text{ IRAs}$.

³¹² $(10,000 \text{ managed IRAs} \times 2.1 \text{ percent of IRAs are new}) = 210 \text{ IRAs}$.

³¹³ Department of Labor, *Form PR*, <https://www.dol.gov/agencies/ebsa/employers-and-advisers/plan-administration-and-compliance/reporting-and-filing/form-pr>.

³¹⁴ The inaugural filing deadline for Form 5500 filings for PEPs with plan years beginning after January 1, 2021, was July 31, 2022. The Department based its estimates on those filings it had received by August 22, 2023. The Department anticipates that this understates the true number of PEPs.

the advice provider represents or acknowledges they are a fiduciary when making investment recommendations.

Registered Investment Advisers

Registered investment advisers providing investment advice to retirement plans or retirement investors and registered investment advisers acting as pension consultants would be directly affected by the proposed amendments to PTE 2020–02. Generally, investment advisers must register with either the SEC or with state securities authorities, as appropriate.³¹⁵

Investment advisers registered with the SEC are generally larger than state-registered investment advisers, both in staff and in regulatory assets under management.³¹⁶ For example, according to one report, 64 percent of state-registered investment advisers manage assets under \$30 million while investment advisers must register with the SEC if they manage assets of \$110 million or more.³¹⁷ In addition, according to one survey of SEC-registered investment advisers, about 47 percent of SEC-registered investment advisers reported 11 to 50 employees.³¹⁸ In contrast, an examination of state-registered investment advisers reveals about 80 percent reported less than two employees.³¹⁹

³¹⁵ Generally, a person that meets the definition of “investment adviser” under the Investment Advisers Act (and is not eligible to rely on an enumerated exclusion) must register with the SEC, unless they are prohibited from registering under Section 203A of the Investment Advisers Act or qualify for an exemption from the Act’s registration requirement. An adviser precluded from registering with the SEC may be required to register with one or more state securities authorities.

³¹⁶ After the Dodd-Frank Wall Street Reform and Consumer Protection Act, an investment adviser with \$110 million or more in regulatory assets under management generally registers with the SEC, while an investment adviser with less than \$110 million registers with the state in which it has its principal office, subject to certain exceptions. For more details about the registration of investment advisers. See Securities and Exchange Commission, *General Information on the Regulation of Investment Advisers*, (March 11, 2011), <https://www.sec.gov/investment/divisionsinvestmentiaa/regulationmemoia.htm>; North American Securities Administrators Association, *A Brief Overview: The Investment Adviser Industry*, (2019), www.nasaa.org/industry-resources/investment-advisers/investment-adviser-guide/.

³¹⁹ North American Securities Administrators Association, *NASAA 2019 Investment Adviser*

As of December 2021, there were 14,714 SEC-registered investment advisers, of which 9,254 provided advice to retail investors while 5,460 provided advice to non-retail investors. Of the 14,714 SEC-registered investment advisers, 325 were dual-registered as broker-dealers.³²⁰ To avoid double counting when estimating compliance costs, the Department counted dually registered firms as broker-dealers and excluded them from the count of registered investment advisers.³²¹ Therefore, the Department estimates there to be 14,389 SEC-registered investment advisers.

Additionally, as of December 2021, there were 15,987 state-registered investment advisers, of which 283 are dually registered as a broker-dealer.³²² In 2018, 125 state-registered investment advisers were also registered with the SEC.³²³ To avoid double counting, the Department counted dually registered firms as broker-dealers and excluded them from the count of state-registered investment advisers. Similarly, the Department counted investment advisers registered with the SEC and a state as SEC-registered investment advisers. Accordingly, for the purposes of this analysis, the Department considers 15,579 state-registered investment advisers.

In 2021, 54 percent of registered investment advisers provided employer-sponsored retirement benefits consulting.³²⁴ Based on this statistic, the Department estimates that 16,182 registered investment advisers, including 7,770 SEC-registered investment advisers and 8,412 state-registered investment advisers state, would be affected by the proposed amendments.³²⁵

As discussed in the Baseline section, PTE 2020–02 excludes investment

Section Annual Report, (May 2019), www.nasaa.org/wp-content/uploads/2019/06/2019-IA-Section-Report.pdf.

³²⁰ Estimates are based on the SEC’s FOCUS filings and Form ADV filings.

³²¹ The Department applied this exclusion rule across all types of investment advisers, regardless of registration (SEC-registered versus state only) and retail status (retail versus nonretail).

³²² Estimates are based on the SEC’s FOCUS filings and Form ADV filings.

³²³ In December 2018, 125 of the state-registered investment advisers were also registered with the SEC and 204 were dually registered as broker-dealers. See *Form CRS Relationship Summary: Amendments to Form ADV*, 84 FR 33492 (Jul. 12, 2019).

³²⁴ Cerulli Associates, *U.S. RIA Marketplace 2022: Expanding Opportunities to Support Independence*, Exhibit 5.10. The Cerulli Report.

³²⁵ The number of registered investment advisers is estimated as: [(14,389 SEC-registered investment advisers + 15,579 state-registered investment advisers) × 54%] = 16,182 registered investment advisers.

advisers providing pure robo-advice. The proposed amendments would include these entities; however, pure robo-advisers would have a different baseline from registered investment advisers currently under PTE 2020–02. As discussed below, the Department estimates that there are 200 pure robo-advisers.³²⁶ Accordingly, the Department estimates that 15,982 registered investment advisers who do not provide pure robo-advice are currently eligible for relief under PTE 2020–02.³²⁷

The Department does not have data on how many of these firms provide advice only to retirement investors that are plan participants, plan beneficiaries, or IRA owners, rather than the workplace retirement plans themselves. These firms are fiduciaries under the Investment Advisers Act and already operate under standards broadly similar to those required by PTE 2020–02.³²⁸

Robo Advisers

The proposed changes to PTE 2020–02 would make investment advice providers providing pure robo-advice eligible for relief under the exemption. While there has been a significant increase in robo-advice in recent years,³²⁹ the market for robo-advice has shifted away from pure robo-advice to a hybrid approach which combines features of robo-advisers and traditional human advisers.³³⁰ This is partly driven by investor preference. For instance, one survey found that only 45 percent of investors were comfortable using online only advice services.³³¹ Another driver is larger financial institutions entering the market with hybrid robo-advice.

³²⁶ For more information on this estimate, refer to the Robo-Advisers discussion in the Affected Entities section.

³²⁷ As discussed below, the Department estimates that there are 200 pure robo-advisers. Accordingly, the Department estimates that 15,982 registered investment advisers would be affected by the proposed amendments and are not pure robo-advisers. The number of registered investment advisers is estimated as: [(14,389 SEC-registered investment advisers + 15,579 state-registered investment advisers) × 54%] – 200 robo-advisers = 15,982 registered investment advisers.

³²⁸ Investment Adviser Association, *SEC Standards of Conduct Rulemaking: What It Means for RIAs*, IAA Legal Staff Analysis (July 2019), <https://higherlogicdownload.s3.amazonaws.com/INVESTMENTADVISER/aa03843e-7981-46b2-aa49-c572f2ddb7e8/UploadedImages/resources/IAA-Staff-Analysis-Standards-of-Conduct-Rulemaking2.pdf>.

³³¹ Cerulli Associates, *U.S. Retail Investor Advice Relationships 2022: Rethinking the Advice Continuum*, Exhibit 3.02. The Cerulli Report.

While the first robo-advisers were stand-alone firms, many existing financial firms, including banks, broker-dealers, technology firms, and asset managers, have entered the market.³³² many by acquiring existing pure robo-advice platforms.³³³

Robo-advisers offer varying services and different degrees of hands-on assistance.³³⁴ The most basic models use computer algorithms to offer investments deemed appropriate in terms of asset allocation and diversification based on the information supplied by the client on opening an account. These investments typically include low-cost mutual funds and exchange traded funds (ETFs), and automatically invest and rebalance funds based on a specified objective or risk tolerance. Most robo-advisers offer advice concerning taxable accounts and IRA accounts. The nature of robo-advice appeals to different investors than traditional investment advice does. While traditional advisers often target older investors with high net worth, robo-advice providers or other low-cost investment firms tend to attract young, technology-savvy investors with low balances.³³⁵

According to one source, there were 200 robo-advisers in the United States in 2017.³³⁶ Robo-advisers are typically required to register with the SEC or state authorities. For the purposes of this analysis, the Department estimates that there are 200 pure robo-advisers that would be subject to the amended PTE 2020-02 that are not subject to the current PTE 2020-02. The Department requests comment on how the number of robo-advisers in the market has evolved since 2017, what proportion of robo-advisers provide pure versus hybrid robo-advice, and what proportion of pure robo-advisers are likely to rely on the amended PTE 2020-02. The Department also requests comment on whether robo-advisers operate as registered investment

advisers, or if they can also operate as broker-dealers.

Broker-Dealers

The proposed amendments would modify PTE 75-1 such that broker-dealers would no longer be able to rely on the exemption for investment advice. The Department does not have information about how many of these firms provide investment advice to plan fiduciaries, plan participants and beneficiaries, and IRA owners.

Under PTE 75-1, broker-dealers would still be able to receive reasonable compensation for extending credit to a plan or IRA to avoid a failed purchase or sale of securities involving the plan or IRA if (1) the potential failure of the purchase or sale of the securities is not caused by such fiduciary or an affiliate, and (2) the terms of the extension of credit are at least as favorable to the plan or IRA as the terms available in an arm's length transaction between unaffiliated parties. Any broker-dealers seeking relief for investment advice, however, would be required to rely on the amended PTE 2020-02.

According to data provided by the SEC, there were 3,508 registered broker-dealers as of December 2021. Of those, approximately 70 percent, or 2,447 broker-dealers, reported retail customer activities, while approximately 30 percent, or 1,061 broker-dealers, were estimated to have no retail customers.³³⁷

Not all broker-dealers perform services for employee benefit plans. In 2021, 54 percent of registered investment advisers provided employer-sponsored retirement benefits consulting.³³⁸ Assuming the percentage of broker-dealers provide advice to retirement plans is the same as the percent of investment advisers providing services to plans, the Department assumes 54 percent, or 1,894 broker-dealers, would be affected by the proposed amendments.³³⁹ The Department requests comment on this estimate.

Discretionary Fiduciaries

The proposed amendments to PTE 86-128 would affect investment advice fiduciaries. The proposed amendments

would remove provisions that had provided relief for certain plans not covering employees, such as IRAs. Investment advice fiduciaries to IRAs would, instead, have to rely on another exemption, such as PTE 2020-02. While fiduciaries that exercise full discretionary authority or control with respect to IRAs may continue to rely on the exemption, the proposed amendments to PTE 86-128 would impose additional requirements on fiduciaries of employee benefits plans that affect or execute securities transactions and the independent plan fiduciaries authorizing the plan or IRA to engage in the transactions with an authorizing fiduciary.

The Department lacks reliable data on the number of investment advice providers who are discretionary fiduciaries that would rely on the amended exemption. For the purposes of this analysis, the Department assumes that the number of discretionary fiduciaries relying on the exemption is no larger than the estimated number of broker-dealers estimated to be affected by the amendments to PTE 2020-02, or 1,894 investment advice providers while acknowledging the number is likely significantly smaller.³⁴⁰

The Department requests comment on this assumption, particularly with regard to what types of entities would be likely to rely on the amended exemption, as well as any underlying data.

Insurance Companies

The proposed amendments to PTE 2020-02 and PTE 84-24 would affect insurance companies and captive agents.

The existing version of PTE 84-24 granted relief for captive insurance agents, insurance agents who are overseen by a single insurance company; however, the proposed amendments would exclude insurance companies and captive agents currently relying on the exemption for investment advice. These entities would be required to comply with the requirements of PTE 2020-02 for relief involving investment advice. As a result, the estimates for PTE 84-24 discussed below likely overestimate the reliance on the exemption. The Department requests comment on the extent to which entities currently relying on PTE 84-24 would continue to rely on the exemption.

Insurance companies are primarily regulated by states and no single

³³⁷ Estimates are based on the SEC's FOCUS filings and Form ADV filings.

³³⁸ Cerulli Associates, *U.S. RIA Marketplace 2022: Expanding Opportunities to Support Independence*, Exhibit 5.10. The Cerulli Report.

³³⁹ The estimated of retail broker-dealers affected by this exemption is estimated as: (2,447 retail broker-dealers × 54%) = 1,321 retail broker dealers. The estimated number of non-retail broker-dealers affected by this exemption is estimated as: (1,061 non-retail broker-dealers × 54%) = 573 non-retail broker dealers. The estimated number of total broker-dealers is 1,894 (1,321 + 573).

³⁴⁰ SEC Commission Interpretation Regarding the Solely Incidental Prong of the Broker-Dealer Exclusion From the Definition of Investment Adviser, 84 FR 33681, 33685-86 (July 12, 2019).

regulator records a nationwide count of insurance companies. Although state regulators track insurance companies, the total number of insurance companies cannot be calculated by aggregating individual state totals, because individual insurance companies often operate in multiple states. In the Department's 2016 RIA, it estimated that 398 insurance companies wrote annuities.³⁴¹ The Department continues to use this estimate although the number may have changed during the intervening years. Furthermore, this may be an overestimate because some of these insurance companies may not sell annuity contracts in the IRA or Title I retirement plan markets. The Department requests information on the number of insurance companies underwriting annuities that would be affected by this proposal.

Annuity sales reached record highs in 2022. Total annuity sales in 2022 amounted to \$312.8 billion, while indexed annuity sales amounted to \$79.8 billion, or approximately 26% of total annuity sales. During the first two quarters of 2023, indexed annuity sales accounted for 27% of total annuity sales.³⁴²

Recent legislative developments may lead to an expansion in this market. A 2021 survey asked insurers what impacts they expected to see from the Setting Every Community Up for Retirement Enhancement Act of 2019 (the SECURE Act). It found that 58 percent of insurers thought the SECURE Act would result in a significant increase in the number of plan sponsors offering in-plan annuities, and 63 percent of insurers thought the SECURE Act would lead to a significant increase in the number of plan participants allocating a portion of their plan balances to an annuity option.³⁴³ With increasing usage of annuities in plans, the future impact on plans, participants, assets, and insurance companies will be greater. It also increases the need for

plan fiduciaries to receive advice that is subject to a best interest standard.

Insurance companies sell insurance products through (1) their employees or "captive insurance agents" that work directly for an insurance company or as independent contractors and exclusively sell the insurance company's products, and/or (2) independent agents that sell multiple insurance companies' products. In recent years, the market has seen a shift away from captive distribution towards independent distribution.³⁴⁴

The Department does not have strong data on the number of insurance companies using captive agents or independent producers. Based on data on the sales of individual annuities by distribution channel, the Department estimates that, of annuities distributed through either a captive or independent distribution channel, approximately 46 percent of sales are done through captive distribution channels and 54 percent of sales are done through independent distribution channels.³⁴⁵ For the purpose of this analysis, the Department assumes that the number of companies selling annuities through captive distribution channels and independent distribution channels is proportionate to the sales completed by each distribution channel. The Department recognizes that the distribution of sales by distribution channel is likely different from the distribution of insurance companies by distribution channel. The Department

requests comment on how many insurance companies sell annuities through captive and independent distribution channels. The Department also requests comment on whether how many insurance companies may rely on both methods of distribution.

Following from this assumption, the Department estimates that 183 insurance companies distribute annuities through captive channels and would rely on PTE 2020–02 for transactions involving investment advice. Further, the Department estimates that 215 insurance companies distribute annuities through independent channels and would rely on PTE 84–24 for transactions involving investment advice.³⁴⁶

The Department estimates that 70 of the 398 insurance companies are large entities.³⁴⁷ In the absence of data relating to the distribution channel differences by firm size, the Department uses the aggregate rate in its estimates. That is, the Department assumes that 46 percent of large insurance companies (32 insurance companies) sell annuities through captive distribution channels, while the remaining 151 insurance companies distributing annuities through captive channels are assumed to be small.³⁴⁸ Additionally, 54 percent of large insurance companies (38 insurance companies) sell annuities through independent distribution channels, while the remaining 177 insurance companies selling annuities through independent distribution channels are assumed to be small.³⁴⁹ The Department requests comment on this assumption.

Independent Producers

The proposal would also affect independent insurance producers that recommend annuities from unaffiliated

³⁴¹ This estimate is based on 2014 data from SNL Financial on life insurance companies reported receiving either individual or group annuity considerations. ³⁴⁴ See Ramnath Balasubramanian, Rajiv Dattani, Asheet Mehta, & Andrew Reich, *Unbundling Value: How Leading Insurers Identify Competitive Advantage*, McKinsey & Company (June 2022), <https://www.mckinsey.com/industries/financial-services/our-insights/unbundling-value-how-leading-insurers-identify-competitive-advantage>; Sheryl Moore, *The Annuity Model Is Broken*, Wink Intel (June 2022), <https://www.winkintel.com/2022/06/the-annuity-model-is-broken-reprint/>.

³⁴⁵ According to the Insurance Information Institute, in 2022, independent broker dealers accounted for 20 percent of individual annuities sales, independent agents accounted for 18 percent of sales, career agents accounted for 15 percent of sales, banks accounted for 24 of sales, full-service national broker-dealers accounted for 17 percent of sales, direct response accounted for 3 percent of sales, and other methods accounted for 2 percent of sales. For the purposes of this analysis, the Department considers those sales made by career agents and full-service national broker-dealers to be "captive," and those made by independent broker-dealers and independent agents to be "independent." To estimate the proportion of sales completed through "captive" and "independent" channels, the Department excludes the 6% of sales associated with direct response and "other methods" from the calculation. The Department assumes that 46 percent of sales by banks are captive, while 54% of sales by banks are independent. See Insurance Information Institute, *Facts + Statistics: Distribution Channels*, (2023), <https://www.iii.org/fact-statistic/facts-statistics-distribution-channels>.

³⁴⁶ The number of insurance companies using captive distribution channels is estimated as $398 \times 46\% = 183$ insurance companies. The number of insurance companies using independent distribution channels is estimated as $398 - 183 = 215$ insurance companies.

³⁴⁷ LIMRA estimates that, in 2016, 70 insurers had more than \$38.5 million in sales. See LIMRA Secure Retirement Institute, *U.S. Individual Annuity Yearbook: 2016 Data*, (2017).

³⁴⁸ The number of large insurance companies using a captive distribution channel is estimate as: $70 \text{ large insurance companies} \times 46\% = 32 \text{ insurance companies}$. The number of small insurance companies using a captive distribution channel is estimated as: $183 \text{ insurance companies} - 32 \text{ large insurance companies} = 151 \text{ small insurance companies}$.

³⁴⁹ The number of large insurance companies using an independent distribution channel is estimate as: $70 \text{ large insurance companies} \times 54\% = 38 \text{ insurance companies}$. The number of small insurance companies using a captive distribution channel is estimated as: $215 \text{ insurance companies} - 38 \text{ large insurance companies} = 177 \text{ small insurance companies}$.

financial institutions to retirement investors, as well as the financial institutions whose products are recommended. While captive insurance agents are employees of an insurance company, other insurance agents are “independent” and work with multiple insurance companies. Though these independent insurance producers may rely on PTE 2020–02, the Department believes they are more likely to rely on PTE 84–24, which is tailored to the industry under the proposal. For this reason, the Department only considers captive insurance agents in the analysis for PTE 2020–02. The Department requests comment on how captive insurance agents and independent insurance producers would be affected by the proposed amendments to PTE 2020–02 and PTE 84–24.

The Department estimates that the independent agent distribution channel has sales of about \$56 billion since this channel is 18 percent of individual annuity sales and total U.S. annuity sales reached \$312.8 billion in 2022.³⁵⁰

It is challenging to estimate the number of independent producers selling annuities to the retirement market. A new release referencing a study reported that there were approximately 40,000 independent property-casualty agents and brokers in the United States.³⁵¹ The Department assumes that the number of independent producers selling annuities to the retirement market who would use the exemption under its proposed provisions would be about 10 percent of this figure, or 4,000 independent producers. This assumption is based on anecdotal evidence. The Department requests comment on these assumptions, as well as information as to how much of an independent producer's business focuses on the retirement market (*i.e.*, the shares of independent producers serving the retirement market that receive less than one percent of their sales from the

retirement market, between one and twenty-five percent, between twenty-five and seventy-five percent, or more than seventy-five percent).

The proposed amendments would not impose any conditions on insurance intermediaries, such as independent marketing organizations, field marketing organizations, or brokerage general agencies. These entities do not have supervisory obligations over independent insurance producers under state or federal law that are comparable to those of the other entities, such as insurance companies, banks, and broker-dealers, nor do they have a history of exercising such supervision in practice. They are generally described as wholesaling and marketing and support organizations that are not tasked with ensuring compliance with regulatory standards. In addition, they are not subject to the sort of capital and solvency requirements imposed on state-regulated insurance companies and banks.

Pension Consultants

The Department expects that pension consultants would continue to rely on the existing PTE 84–24. Based on 2021 Form 5500 data, the Department estimates that 1,011 pension consultants serve the retirement market.³⁵²

The proposed amendment would exclude pension consultants for plans and IRAs currently relying on the existing PTE 84–24 for investment advice. As such, any pension consultants relying on the existing exemption for investment advice would be required to comply with PTE 2020–02 for relief. In this analysis, the Department includes pension consultants in the affected entities for continued relief for the existing provisions of PTE 84–24 as well as the amended PTE 2020–02. The Department acknowledges that this approach likely overestimates the entities and related costs to complying with the exemptions. The Department requests comment on whether pension consultants would continue to rely on the existing provisions of 84–24 or would rely on the amended 2020–02.

Principal Company Underwriter

The Department expects that some investment company principal

underwriters for plans and IRAs rely on the existing PTE 84–24 for advice. The Department does not have data allowing it to estimate how many investment company principal underwriters would choose to rely on the exemption, but based on its experience, the Department expects investment company principal underwriters relying on PTE 84–24 to be rare. For the purposes of this analysis, the Department assumes that 10 investment company principal underwriters for plans and 10 investment company principal underwriters for IRAs would use this exemption once with one client plan.

The proposed amendment would exclude investment company principal underwriters for plans and IRAs currently relying on the existing PTE 84-24 for investment advice. As such, any principal company underwriter relying on the existing exemption for investment advice would be required to comply with PTE 2020-02 for relief. In this analysis, the Department includes principal company underwriters in the affected entities for continued relief for the existing provisions of PTE 84-24 as well as the amended PTE 2020-02.

The Department acknowledges that this approach likely overestimates the entities and related costs to complying with the exemptions. The Department requests comment on whether principal company underwriters would continue to rely on the existing provisions of 84-24 or would rely on the amended 2020-02.

Banks and Credit Unions

The proposed amendments to PTE 75–1, PTE 80–83, and PTE 2020–02 would affect banks and credit unions. There are 4,672 federally insured depository institutions in the United States, consisting of 4,096 commercial banks and 576 savings institutions.³⁵³ Additionally, there are 4,686 federally insured credit unions.³⁵⁴ In 2017, the GAO estimated that approximately two percent of credit unions have private deposit insurance.³⁵⁵ Based on this estimate, the Department estimates that there are approximately 96 credit unions with private deposit insurance

³⁵¹ Annemarie McPherson Spears, 7 *Findings From the 2022 Ageazine Universe Study*, (October 13, 2022), https://www.iamagazine.com/news/7-findings-from-the-2022-ageazine-universe-study?_hstc=79369803.5fd6a87d75ca95f94d2e9dc33fed281b9.1691447156981.1691447156981.1691447156981.1691447156981.1&_hssc=79369803.3.1691447156981&_hsfp=2180945085.

³⁵² Internal Department of Labor calculations based on the number of unique service providers listed as pension consultants on the 2021 Form 5500 Schedule C. This could be an underestimate as only plans with one hundred or more participants need to file a Schedule C and then only for service providers paid more than \$5,000 during the plan year. To the extent small plans use different pension consultants the number would be underestimated.

³⁵³ Federal Insurance Deposit Corporation, *Statistics at a Glance- as of March 31, 2023*, <https://www.fdic.gov/analysis/quarterly-banking-profile/statistics-at-a-glance/2023mar/industry.pdf>.

³⁵⁴ National Credit Union Administration, *Quarterly Credit Union Data Summary 2023 Q2*, <https://ncua.gov/files/publications/analysis/quarterly-data-summary-2023-Q2.pdf>.

355 GAO, *Private Deposit Insurance: Credit Unions Largely Complied with Disclosure Rules, But Rules Should be Clarified*, (March 29, 2017), <https://www.gao.gov/products/gao-17-259>.

and 4,782 credit unions in total.³⁵⁶ The Department requests comment on what proportion of credit unions offer IRAs and what proportion sell share certificate products. The Department also requests comment on how many banks and credit unions currently rely on PTE 2020–02, PTE 75–1, and PTE 80–83 for investment advice.

The proposed amendments would exclude entities currently relying on the existing PTE 75–1 and PTE 80–83 for investment advice. The Department does not have a reliable data source on how many banks currently rely on these exemptions. PTE 75–1 allows banks to engage in certain classes of transactions with employee benefit plans and IRAs. The Department assumes that half of these banks, or 2,048 banks would use PTE 75–1. As amended, PTE 80–83 allows banks to purchase, on behalf of employee benefit plans, securities issued by a corporation indebted to the bank that is a party in interest to the plan. The Department estimates that 25 fiduciary-banks with public offering services would rely annually on the amended PTE 80–83. The Department requests comment on how many banks currently rely on PTE 75–1 and PTE 80–83 and how many of these entities rely on the exemptions for relief concerning investment advice.

Banks relying on the existing exemptions for investment advice would be required to comply with PTE 2020–02 for relief for advice. Banks would be permitted to act as financial institutions under PTE 2020–02 if they or their employees are investment advice fiduciaries with respect to retirement investors.

The Department understands that banks most commonly use “networking arrangements” to sell retail non-deposit investment products, including equities, fixed-income securities, exchange-traded funds, and variable annuities.³⁵⁷ Under such arrangements, bank

employees are limited to performing only clerical or ministerial functions in connection with brokerage transactions. However, bank employees may forward customer funds or securities and may describe, in general terms, the types of investment vehicles available from the bank and broker-dealer under the arrangement. Similar restrictions on bank employees’ referrals of insurance products and state-registered investment advisers exist. The Department believes that, in most cases, such referrals would not constitute fiduciary investment advice within the meaning of the proposal. The Department, however, also requests comment on what other types of activities banks or credit unions may engage in that would require reliance on PTE 2020–02.

The Department currently estimates that no banks or credit unions would be impacted by the proposed amendments to PTE 2020–02 but requests comments on this assumption. The Department does not have sufficient data to estimate the costs to banks or credit unions of complying with PTE 2020–02 for investment advice services because it does not know how frequently these entities use their own employees to perform activities that would otherwise be covered by the prohibited transaction provisions of ERISA and the Code. The Department seeks comment on the frequency with which employees recommend their products to retirement investors and how they currently ensure such recommendations are prudent to the extent required by ERISA. The Department invites comments on the magnitude of any such costs and solicits data that would facilitate their quantification in the proposal.

Mutual Fund Companies

The proposed amendments would modify PTE 77–4 such that mutual fund companies providing services to plans can no longer rely on the exemption when giving investment advice. Under the proposal, these mutual funds would need to rely on PTE 2020–02 for relief concerning investment advice.

According to the ICI, in 2022, there were 812 mutual fund companies.³⁵⁸ The Department assumes that all of these companies are service providers to pension plans, providing investment management services.

Mortgage Pool Sponsors

PTE 83–1 provides relief for the sale of certificates in an initial issuance of

certificates by the sponsor of a mortgage pool to a plan or IRA when the sponsor, trustee, or insurer of the mortgage pool is a fiduciary with respect to the plan or IRA assets invested in such certificates. The proposed amendments would modify PTE 83–1 to exclude exemptive relief for investment advice. Under the proposal, these entities would need to rely on PTE 2020–02 for relief concerning investment advice. The Department requests comment on how many of these entities currently rely on PTE 83–1 and how many of these entities rely on PTE 83–1 for investment advice.

5. Benefits and Transfers

The Department believes that, as a result of this proposal, retirement investors would achieve higher net returns on average in the long run by selecting better investments or paying lower fees. More specifically, this proposal would generate economic gains for retirement investors by:

- increasing uniformity in the regulation of financial advice for retirement investors, across different market segments and market participants,
- protecting consumers from losses that can result from advisory conflicts of interest (without unduly limiting consumer choice or adviser flexibility),
- giving retirement investors increased trust and confidence in their advisers and in the reliability of their advice, and
- facilitating more efficient capital allocation.

These represent gains to investors, which may manifest as pure social welfare “benefits,” as some resources that were previously inefficiently used to acquire financial products and services are now available for more valuable uses. Other improvements may take the form of “transfers” of social welfare to retirement investors from other entities in society. The available data do not allow the Department to quantify the gains to investors or the components social welfare “benefits” and “transfers.” These transfers represent a beneficial gain to retirement investors and are a primary objective of the proposed rule and PTE.

If some transactions have increased net returns for certain parties and decreased returns of equal magnitude for other parties, that would represent a transfer. If the increase in net returns for the first group is larger than the corresponding decrease for the second group, then only the equivalent portion would be transfers and the amount of the additional net returns would represent benefits. For example, non-

³⁵⁶ The total number of credit unions is calculated as: 4,686 federally insured credit unions/ (100% – 2% of credit unions that are privately insured) = 4,782 total credit unions. The number of private credit unions is estimated as: 4,782 total credit unions – 4,686 federally insured credit unions = 96 credit unions with private deposit insurance.

³⁵⁷ For more details about “networking arrangements,” see Employee Benefits Security Administration, *Regulating Advice Markets Definition of the Term “Fiduciary” Conflicts of Interest—Retirement Investment Advice Regulatory Impact Analysis for Final Rule and Exemptions*, (April 2016), <https://www.dol.gov/sites/dolgov/files/EBSA/laws-and-regulations/rules-and-regulations/completed-rulemaking/1210-AB32-2/ria.pdf>. Financial institutions that are broker-dealers, investment advisers, or insurance companies that participate in networking arrangements and provide fiduciary investment advice would be included in the counts in their respective sections.

³⁵⁸ Investment Company Institute, *2023 Investment Company Fact Book: A Review of Trends and Activities in the Investment Company Industry*, (2023), <https://www.ici.org/system/files/2023-05/2023-factbook.pdf>.

retirement investors may have previously experienced lower prices and higher returns resulting from timing errors of retirement investors due to conflicted advice. As those conflicts are removed, those transactions may not occur, leading to a transfer from non-retirement investors to retirement investors. Moreover, it is possible that the financial industry would forego profits (e.g., as a result of conflicted advisers charging retirement investors lower fees), resulting in a transfer from investment advisers and associated service providers to retirement investors.

As detailed later in this RIA, the magnitude of the gains to retirement investors, through benefits or transfers, is uncertain. As noted earlier, advisory conflicts—which this proposal, in harmony with federal securities laws, would mitigate—are very costly for retirement investors. The cost is high both on aggregate and for individual retirement investors, such as when a new retiree adheres to conflicted advice to transfer a career’s-worth of 401(k) savings into an over-priced annuity or a high-risk investment.

Both the Department’s 2016 RIA and the SEC’s Regulation Best Interest analyses show that investors stand to gain much from the mitigation of advisory conflicts. This RIA provides a mainly qualitative discussion of the benefits of this proposal. The Department invites comments and data related to how it might quantify these benefits as part of the RIA of any final rule.

Regulatory Uniformity

This proposal would make the rules that govern fiduciary advice to plan and IRA investors more consistent with federal securities laws, and thereby promote clarity and efficiency. Under the current regulatory regime, bad actors are drawn to those markets with the least regulated products, where they are not required to prioritize retirement investors interest over their own when they make investment recommendations. By harmonizing advice regulations across all markets that are used by retirement investors, the Department can ensure that advisers all face the same regulatory standard. It would also remove incentives for investment advisers to steer recommendations in ways that customers cannot monitor and that run counter to the customers’ best interest.

When contemplating a potential “Financial Adviser Reform Act” that would “be uniform in its application of the fiduciary duties of loyalty and care across all financial advisers,” Smith

(2017) noted that, “this uniformity would eliminate the ‘false distinction’ between investment service providers by recognizing the overlapping services they offer.”³⁵⁹ Smith argued that creating a uniform standard “would both reduce consumer confusion as to what constitutes advice or recommendations and ensure that the uniform fiduciary duty is consistently applied in the investor’s favor by taking a broad approach to what constitutes investment advice and recommendations.”³⁶⁰ Simply put, requiring that only some investment advisers advising retirement investors adhere to an ERISA fiduciary standard promotes recommendations that are driven by differences in the regulatory regime rather than by the products or investors’ interests.

Research suggests that the problems resulting from differing regulatory regimes are not unique to the United States. For instance, Anagol et al. (2017) found that when agents selling life insurance in India were required to disclose commissions for one particular product, they were much less likely to recommend it to clients. Instead, the agents recommended products that did not have this requirement, but which had higher and opaque commissions.³⁶¹ The authors conclude, “These results suggest that the disclosure requirements for financial products need to be consistent across the menu of substitutable products.” This underscores that regulatory regimes that are not uniform allow advisers to engage in regulatory arbitrage, leaving their clients vulnerable to conflicts of interest.

This proposed rule would help create a uniform standard, as it would apply to all retirement investment advice. This would address concerns the Department has about lower standards for advice related to insurance products and other investments that are not securities, advice that broker-dealers render to ERISA plan fiduciaries, and robo-advice.³⁶² The proposed rule’s broad

³⁵⁹ Alec Smith, *Advisers, Brokers, and Online Platforms: How a Uniform Fiduciary Duty Will Better Serve Investors*, 2017(3) Colum. Bus. L. Rev. 1200–1243 (2017), <https://doi.org/10.7916/cblr.v2017i3.1730>.

³⁶⁰ *Ibid.*

³⁶¹ Santosh Anagol, Shawn Cole & Shayak Sarkar, *Understanding the Advice of Commissions-Motivated Agents: Evidence from the Indian Life Insurance Market*, 99(1) *The Review of Economics and Statistics* 1–15, (2015), https://doi.org/10.1162/REST_a_00625.

³⁶² The Department identifies these areas as areas of concern because non-security investments and investment advice from broker-dealers to ERISA plan fiduciaries are not covered by recent SEC actions and pure robo-advice, while included in the SEC’s actions was excluded from the current PTE

application to all retirement investment advice would help different market participants and different financial products compete on similar terms for IRA and plan business. This would reduce the risk to retirement investors. Uniform, well-designed rules can make markets fairer for competitors and friendlier for customers, leading to more efficient market outcomes. They can also promote efficiency by allowing firms that offer multiple products or make recommendations in both the retail and non-retail market to utilize a common compliance structure.

Financial services firms are already moving toward new approaches in how they offer advice, including more fee-based advice models, flatter compensation models, and integrating technology. The proposed amendments to the rule and exemptions would help ensure that these new approaches evolve toward less conflicted and more innately impartial business models. These types of technology-enhanced models—whether pure robo-adviser or hybrid models—will contain the overall costs associated with providing investment advice and strategies and will help low-balance account holders obtain investment advice at an affordable cost.

This proposal would generate additional economic benefits and transfers by extending important and effective protections broadly to cover all advice given to retirement investors. In this analysis, the Department identifies three specific areas in which retirement investors would benefit from an extension of protections: one-time advice regarding the rollover of assets, advice on non-security annuity products, and advice given to ERISA plan fiduciaries. These types of advice are discussed in the following sections.

Protections Concerning Rollover Investment Advice

The proposal would generate benefits for, and transfers to, savers by reducing conflicts related to one-time advice concerning rollovers. Frequently, participants are better off leaving their 401(k) account in the retirement plan rather than rolling it over to an IRA, particularly if the 401(k) plan has low fees and high-quality investment options. Large 401(k) plans often have lower fees than IRAs, though smaller 401(k) plans sometimes find it difficult to keep fees low.³⁶³ IRAs often utilize

2020–02. For more information, refer to the Baseline discussion.

³⁶³ BrightScope and Washington, DC: Investment Company Institute. *The BrightScope/ICI Defined Contribution Plan Profile: A Close Look at 401(k) Plans*, 2019 (San Diego, CA: 2022). Available at

retail shares in mutual funds with substantially higher fees than the institutional share classes that employer-sponsored plans typically utilize. A 2022 Pew Charitable Trusts study analyzed the difference between median institutional and retail share class expense ratios across all mutual funds that offered at least one institutional share and one retail share in 2019. They found that the median retail shares of equity funds had annual expenses that were 37 percent higher than institutional shares. Over the course of saving for retirement, the impact of even small differences in fees was significant.³⁶⁴

The investment fiduciaries of 401(k) plans also have responsibilities under ERISA to act in the best interests of, and solely for the benefit of, the plan participants, whereas IRA providers do not have such responsibilities.³⁶⁵ Turner and Klein (2014) suggested that the services and investment performance associated with higher fees paid in an IRA are not necessarily justified,³⁶⁶ meaning a plan participant would be able to obtain similar investment performance and services in a lower cost 401(k) plan. For instance, Turner, Klein, and Stein (2015) found that most financial advisers told federal workers about the benefits of rolling over into an IRA, such as having a larger number of investment options and more lenient withdrawal options, without mentioning the higher costs that would be incurred relative to keeping their savings in the Thrift Savings Plan, which has extremely low fees.³⁶⁷

If fewer participants roll over their 401(k) plan account balances into IRAs, and instead keep their account balances in plans sponsored by former or new employers, this would result in transfers between different segments of the market. To consider one example, there may be a transfer from service providers who specialize in serving IRAs to service providers who specialize in serving defined contribution plans. As a

second example, retirement investors often pay lower fees in plans where they can access institutional share classes than they do in IRAs where they use retail share classes. This represents a transfer from actors in the financial industry to retirement investors.

Protections Concerning Annuity Investment Advice

The proposal would generate additional benefits by extending protections to investment advice from insurance agents or independent producers to IRA investors. The annuity products offered by insurance companies are notoriously complex, leaving retirement investors reliant on advice from the insurance agent, broker, or independent producer selling the annuity. The fees and adviser incentives are similarly complex, often in a way that can conceal the full magnitude of the fees. Other regulators have highlighted the complexity of many annuity products. For example, FINRA stated:

Annuities are often products investors consider when they plan for retirement—so it pays to understand them. They also are often marketed as tax-deferred savings products. Annuities come with a variety of fees and expenses, such as surrender charges, mortality and expense risk charges and administrative fees. Annuities also can have high commissions, reaching seven percent or more.³⁶⁸

As described in the baseline discussion above, fixed annuities, variable annuities, and indexed annuities differ significantly in risk. For instance, while the insurer carries the investment risk for fixed annuities, the investor carries the investment risk for variable annuities and indexed annuities.³⁶⁹ Additionally, they differ in regulatory standards and the required protections owed to customers. While variable annuities and some indexed annuities are considered securities subject to SEC and FINRA regulation,³⁷⁰ the standard of care owed to a customer for other types of annuities depends on the state regulation.

One area of concern for the Department is how financial entities selling annuities are compensated, which may result in a conflict of

interest. According to the 2015 Warren Report, which examined 15 of the largest annuity companies in the United States, 87 percent of the annuity companies offered “kickbacks” to their agents in exchange for sales to retirees.³⁷¹ Further, insurance agents, brokers, and independent producers are often compensated through load fees for selling variable and fixed annuities fees.³⁷² As discussed in the Baseline section discussion on market developments in the insurance market, research has found load fees create a conflict of interest in investment advice, leading to decreased returns.³⁷³

The Department is also particularly concerned about vulnerable retirement investors who lack a basic understanding of investment fundamentals and the complexities associated with indexed annuities. FINRA cautions that, “indexed annuities are complex financial instruments, and retirement experts warn that such annuities include a number of features that may result in lower returns than an investor may expect.”³⁷⁴ While indexed annuities have a minimum guaranteed rate of return tied to an underlying index, the guarantee rate does not cover all of a premium.³⁷⁵ Moreover, while the rate of return of the indexed annuity is linked to performance of the index, indexed annuity returns are subject to contractual limitations which effectively cap returns. FINRA identified the following contractual limitations observed in indexed annuities:

- Participation rates explicitly set the percentage of index returns that are credited to the annuity;
- Spread, margin, or asset fees are subtracted from the index returns; and

³⁷⁰ Securities and Exchange Commission, *Annuities*, Securities and Exchange Commission, <https://www.investor.gov/introduction-investing/investing-basics/glossary/annuities>.

• Interest caps limit the returns if the underlying index sees large returns.³⁷⁶

FINRA also warns that indexed annuities may be able to change these contractual limitations, depending on the terms of the contract.³⁷⁷

In a 2020 investor alert, the SEC warned, “*You can lose money buying an indexed annuity. Read your contract carefully to understand how your annuity works.*”³⁷⁸ The SEC listed several ways that investors in these products can lose money, including through surrender charges and withdrawals during a specified time period. The SEC further cautioned:

• “Indexed annuity contracts describe both how the amount of return is calculated and what indexing method they use. Based on the contract terms and features, an insurance company may credit your indexed annuity with a lower return than the actual index’s gain.”

• “Indexed annuity contracts commonly allow the insurance company to change some of these features periodically, such as the rate cap. Changes can affect your return. Read your contract carefully to determine what changes the insurance company may make to your annuity.”³⁷⁹

The Department also has concerns about sales tactics of insurance agents, brokers, and independent producers for annuity products. A number of state regulators have issued website alerts regarding deceptive sales practices to sell annuities to seniors, including “high-pressure sales pitch[es]” and “quick-change tactics” in which an agent tries to convince an investor to change coverage quickly without time for adequate research. State regulators also warned that a licensed agent will be more than willing to show credentials and to question an agent’s “[unwillingness or inability] to prove credibility” to prospective customers.³⁸⁰

One regulator noted, “With billions of dollars in sales to be made, insurance companies may offer commissions as high as 10 percent to agents to sell products like long-term deferred annuities to senior citizens.”³⁸¹ As described by the regulator:

Some unscrupulous sellers use high-pressure sales pitches, seminars, and telemarketing. Beware of agents who “cold call” you, contact you repeatedly, offer “limited time offers,” show up without an appointment, or won’t meet with you if your family is present. Beware of estate planning “seminars” that are actually designed to sell annuities. Beware of seminars that offer free meals or gifts. In the end, they are rarely free. Beware of agents who give themselves fake titles to enhance their credibility.³⁸²

Supporting this call for caution, Egan et al. (2019) found substantial amounts of misconduct disputes in the sales of annuities between 2005 and 2015.³⁸³

Research shows that fiduciary protections in the annuity markets lead to better outcomes for investors. By analyzing deferred annuity sales at a large financial services provider during 2013 to 2015, Bhattacharya et al. (2020) found that fiduciary duty increases risk-adjusted returns by 25 basis points.³⁸⁴

³⁸⁴ Vivek Bhattacharya, Gaston Illanes, & Manisha Padi, *Fiduciary Duty and the Market for Financial Advice*, Working Paper 25861 National Bureau of Economic Research (2020), <https://www.nber.org/papers/w25861>.

This results from a compositional shift in the set of products purchased by investors. Fiduciary duty protections tend to shift sales towards fixed indexed annuities and away from variable annuities. Within variable annuities, sales shifted towards products with more and higher quality investment options. The authors obtained these findings by exploiting the variation in fiduciary duties between broker-dealers and registered investment advisers as well as the variation between states as to whether broker-dealers are subject to a common law fiduciary duty.

Bhattacharya et al. (2020) also found that fiduciary duty led to a 16 percent reduction in the number of broker-dealers, which they described as a “potentially small” effect. There was no change in total annuity sales. Furthermore, the reduction in broker-dealers did not result in poor quality products being sold. The authors developed a model that shows that the benefits of improved advice under a fiduciary standard, offset by the reduction in the number of broker-dealers and the advice they provide, yields an overall effect of increasing average returns by 20 basis points. On the whole, these results indicate that this proposal would improve the quality of advice in the investment market and protect the welfare of investors and retirees.³⁸⁵

The Bhattacharya et al. (2020) model is particularly helpful in that it provides a framework to illustrate the quantitative impact of extending the fiduciary duty. It takes into account both empirical findings—the increase in returns of 25 basis points and the exit of 16 percent of the broker-dealers. While the model illustrates how these results would apply to the larger market, the results are still subject to the limitations of the empirical analysis, which looked only at certain types of annuities sold by one large firm. The authors examined the effects of variation in state-level fiduciary laws, but it is unclear how similar those would be to the effects of a national regulation.

Approximately \$3.8 trillion in pension entitlements are held in annuities at life insurance companies, including those within IRAs.³⁸⁶ The recommendation of many of these assets are already subject to a best interest

³⁸⁵ *Ibid.*

(June 8, 2023), <https://www.federalreserve.gov/releases/z1/>.

standard; for example, they were sold by a registered investment adviser or sold in a state with a fiduciary standard. It is difficult to know exactly how many assets fall into this category, but for illustrative purposes, let us assume that 50 percent of the market is not currently subject to a best interest standard and would be under the proposal and would therefore expect an increase in average returns of 20 basis points as suggested by Bhattacharya et al. In this scenario, the expansion of fiduciary duty would lead to gains for investors (a mix of societal benefits and transfers) of \$3.6 billion, assuming a 20 basis point increase in returns.³⁸⁷

Good regulation may also improve the overall investment advice market. According to Egan, Ge, and Tang (2022), after the Department issued its 2016 Final Rule, total variable annuity sales fell significantly—primarily driven by a 52 percent decrease in annuities with expenses in the highest quartile, suggesting that broker-dealers responded to the 2016 Final Rule by placing greater weight on investor interests. These impacts persisted even after the rule was vacated by the Fifth Circuit. Critics of the Department's 2016 Final Rule often refer to a decline in variable annuity sales as evidence of the 2016 Final Rule having negative effects. Egan, Ge, and Tang (2002) conclude, however, that investors on average experienced a net benefit from the Rule, even taking into account the fact that some investors were no longer participating in the annuity market.³⁸⁸ Other commenters observed that even if the 2016 Final Rule could have reduced investors' access to certain services or products, the impact would have been on services and products that were not in the investors' best interest.³⁸⁹

The benefits of this proposal's application of fiduciary status to investment advice from insurance agents, brokers, and independent producers include eliminating the incentives for regulatory arbitrage by those agents. Without this proposal, insurers and insurance intermediaries can secure excess profits at investors' expense by rewarding investment advice providers for giving biased advice in ways that broker-dealers

operating under Regulation Best Interest cannot.

Protections Concerning Advice Given to Plan Fiduciaries

This proposal would also yield economic benefits by extending protections to advice given to ERISA plan fiduciaries. Accordingly, the proposal would ensure that investors and the Secretary could enforce the fiduciary protections by pursuing claims for fiduciary misconduct involving ERISA-covered plans. When a broker-dealer currently provides advice to plan fiduciaries, the advice is not covered by Regulation Best Interest because the plan fiduciaries are not retail customers.³⁹⁰ Pool et al. (2016) offered evidence that mutual fund companies acting as service providers to 401(k) plans display favoritism toward their own affiliated funds, even when their performance is worse, generating "significant subsequent negative abnormal returns for participants investing in those funds."³⁹¹ This proposal aims to reduce or eliminate such harmful favoritism.

Pool et al. (2022) demonstrated that funds who offer defined contribution plan recordkeepers revenue-sharing payments are more likely to be added as investment options on plan menus and are also more likely to be retained. Additionally, plans whose menus include funds that share revenue had higher expense ratios resulting in significantly higher fees.³⁹² Pool states that this is "consistent with the notion that . . . less transparent indirect payments allow record keepers to extract additional rents from plan participants."³⁹³ Fiduciaries can negotiate the specific formula and methodology under which revenue sharing will be credited to the plan or plan service providers, indirectly reducing the fees the plan pays which could in turn mitigate the conflict, but this requires a sophisticated understanding of the underlying agreement.³⁹⁴ Given the proliferation of

fee arrangements for investment advice that are increasingly less transparent to clients and regulators as well as the variation in standards and safeguards across advice markets, the Department believes it is critical to extend protections associated with fiduciary status under ERISA, to protect retirement investors' assets.

Plan fiduciaries receive advice on many important topics. For defined contribution plans, these topics can include plan design provisions such as investment alternatives, whether the plan should have automatic enrollment, default contribution rates, and default investments. For defined benefit plans, it can include selection of investments and investment strategies as well as distribution options. Given the large number of participants in ERISA plans and the huge asset holdings of such plans, the benefits of protecting the advice received by plan fiduciaries is likely to be substantial.

Increased Confidence in Advisers and in the Reliability of Their Advice

The market for financial advice generally works best when investors trust investment advice providers and their trust is well-placed. Both conditions are necessary for optimal results. If investors distrust investment advice providers, they will incur higher costs to select a provider and monitor their conduct. Their provider may also incur higher costs to counter prospective and existing customers' distrust. Distrustful investors may be less likely to obtain beneficial advice and more likely not to follow beneficial advice.³⁹⁵ Likewise, if investors trust investment advice providers more than is warranted, they may reduce their monitoring of the advisor's actions and accept less transparency in policies, procedures and fees, making them more vulnerable to harm from advice that is biased by advisory conflicts.³⁹⁶ A 2019 survey regarding the Australian financial advice industry reported that the biggest barriers for consumers in accessing financial advice are cost (35 percent), limited financial

³⁹⁰ Advice provided by an investment adviser to a plan fiduciary is subject to the Advisers Act fiduciary duty.

circumstances in which it is “not worth getting financial advice” (29 percent), the desire to manage an individual’s own finances (26 percent), a lack of trust (19 percent), or a lack of perceived value in paying for financial advice (18 percent).³⁹⁷

By holding all retirement investment advice providers to standards that rightly instill trust, this proposal would facilitate efficient, trust-based relationships between retirement investors and investment advice providers of all types, so investors would be more likely to obtain and follow beneficial advice, at lower cost.

There is extensive evidence that investors, including retail investors and ERISA plan fiduciaries, are often subject to behavioral biases that lead to costly systematic investment errors. There is evidence that good advice can improve saving and investing decisions. Accordingly, the proposal may result in a beneficial reallocation of investment capital. Montmarquette and Viennot-Briot (2015) provided evidence that “having a financial advisor for at least four years has a positive and significant impact on financial assets” and that “the positive effect of advice on wealth creation cannot be explained by asset performance alone: the greater savings discipline acquired through advice plays the major role.”³⁹⁸

Fisch et al. (2016) also provided evidence that “highlight[s] the potential value of professional advice in mitigating the effects of financial illiteracy in retirement planning.”³⁹⁹ Fisch et al. recruited Amazon Mechanical Turk users (MTurk sample), a crowdsourcing marketplace, to allocate a hypothetical ten thousand dollars among ten investments options as part of a 401(k) plan. Separately, professional advisers—registered investment advisers, broker-dealers or dual registrants—were asked to allocate ten thousand dollars on behalf of a hypothetical 30-year-old, single client, with no children, a lower middle-class income and no substantial outside savings or investments. They found that professional advisers, on average,

selected portfolios with higher returns, allocated more money to cheaper index funds, paid lower fees, and accessed more information in connection with the allocation decision than the MTurk sample. For example, professional advisers were “uniformly sensitive to the fact that the equity risk premium and the 30-year time horizon of the allocation decision warranted substantial equity exposure—facts that the low-literacy investors seemed to be unaware.”⁴⁰⁰ Overall, professional advisers had a higher level of financial knowledge, which enabled them to make better retirement investing decisions from which unsophisticated investors could benefit.

Enforcement

Under the proposal, the full range of covered investment advice interactions with Title I plans would be subject to the Department’s robust enforcement program as well as to a private right of action. In general, participants and beneficiaries have the right to bring suit under ERISA 502(a) against fiduciaries who breach their duties and obligations to the plan, including engaging in non-exempt prohibited transactions. This private right of action, which ensures participants and beneficiaries have ready access to the Federal courts, provides critical protection of tax-advantaged retirement plans. For advice interactions not currently covered by relevant standards of conduct, such as much advice provided to plan fiduciaries, these enforcement measures will help to ensure the proposal is implemented effectively. For advice interactions that are subject to state regulation, under the proposal they will likely have stronger oversight, which will provide greater protections to investors.

Charoenwong et al. (2019) showed that regulatory oversight has an important impact on investment advice.⁴⁰¹ They studied a policy reform that did not affect the laws or rules that registered investment advisers were operating under; instead, it changed the regulatory oversight. The reform shifted some advisers from a federal regulator, the SEC, to state-securities regulators. Registered investment advisers who shifted to the state-securities regulators received 30–40 percent more complaints from customers, relative to the unconditional complaint rate. This effect mainly resulted from fiduciary

violations. Furthermore, the vigor of the enforcement program mattered; the more resources a state-securities regulator had, the fewer complaints there tended to be.

The proposal would also ensure the imposition of appropriate excise taxes for prohibited transactions involving both ERISA-covered plans and IRAs. As part of their retrospective review, financial institutions would be required to report to the Department of the Treasury any non-exempt prohibited transactions in connection with fiduciary investment advice, correct those transactions, and pay any resulting excise taxes. Failure to report, correct, and pay an excise tax, in addition to existing factors, would make a financial institution ineligible to rely on PTE 2020–02 and PTE 84–24. The Department believes these additional conditions would provide important protections to retirement investors by enhancing the existing protections of PTE 2020–02 and PTE 84–24.

Implications for Retirement Savings Estimates

To understand the potential magnitude of savings for retirement investors from the proposed rule, the Department believes the experience following the 2016 rulemaking and SEC’s Regulation Best Interest provides context. As discussed in the baseline discussion, the regulatory and market environments have shifted since the 2016 Rule, and accordingly, the Department acknowledges that there is significant uncertainty about the magnitude of savings that would result for retirement investors as a result of the proposed rulemaking. The Department requests comment on this point.

One major market development resulting from the 2016 Final Rule and exemptions involved the development of new mutual fund share classes designed to eliminate advisory conflicts attributable to variation in commissions. As discussed in the Baseline section, Mitchell, Sethi, and Szapiro (2019) found that the share classes that are less likely to have traditional conflicts of interest have become more popular in recent years.⁴⁰² In 2020, 94 percent of 401(k) mutual fund assets were invested in no-load funds, compared to 66 percent in 2000.⁴⁰³

In the 2016 RIA, the Department estimated that broker-sold mutual funds underperformed direct-sold mutual funds by approximately 50 basis points per year.⁴⁰⁴ In response to this estimate, Morningstar opined that transparency improvements associated with such shares “should encourage advisors to provide high quality advice to remain competitive” and that “50 basis points is a reasonable estimate of savings to investors from reducing conflicted advice.”⁴⁰⁵ Their support of the Department estimate was based on a study looking at mutual fund T shares. However, this share class has faded following the revocation of the 2016 rule.⁴⁰⁶ As a result, it is largely uncertain how many retirement investors would have adopted the new share class had it been permitted to go fully into effect. For the purposes of this illustration, if it were assumed that half of the roughly \$2.0 trillion assets invested in long-term mutual funds with front-end load fees were transitioned into T shares, investors could have saved approximately \$5 billion.⁴⁰⁷

The Department acknowledges that the Morningstar study only looks at the IRA market, specifically examining share classes designed for retail investors. The proposed rule, of course, applies more broadly than just to IRAs. The Department believes the proposed rule would encourage continued market trends away from share classes with traditional conflicts of interest.

However, Mitchell, Sethi, and Szapiro (2019) also found that the newer share classes appear to have their own conflicts that are opaque to investors and regulators, such as revenue

sharing.⁴⁰⁸ Many of the commonly considered potential conflicts of interest are embedded in a bundled share class arrangement, where the investor pays the mutual fund a load or 12b–1 fee, and the mutual fund pays a portion back to an intermediary, such as the intermediary that sold the fund to the investor. Semi-bundled share classes use revenue sharing or sub-accounting fees.

The damages associated with conflicts of interest in compensation structures are exacerbated in that many of these compensation structures incentivize excessive trading. Good advice can help investors avoid timing errors when trading by reducing panic-selling during large and abrupt downturns. However, conflicted advice providers may profit by encouraging investors’ natural inclination to trade more and “chase returns,” an activity that tends to produce harmful timing errors.⁴⁰⁹

Friesen and Sapp (2007) found that equity mutual fund investors made timing decisions that reduced fund investor average returns by 1.56 percent annually.⁴¹⁰ Their evidence “suggests that those investors who are most likely relying on advice from a broker perform especially poorly from a timing standpoint.” Bullard, Friesen, and Sapp (2008) found that the difference in performance between load and no-load funds has two components: the difference in prospectus returns across share classes and the difference in investor returns resulting from differences in investor timing.⁴¹¹ Additionally, Christoffersen, Evans, and Musto (2013) found that as the size of the load-share increased, mutual fund returns decreased. This suggests that the greater the adviser’s conflict of interest, the worse off the IRA investor can expect to be.^{412 413}

A Department-sponsored study by Panis and Padmanabhan (2023) examined how investors timed the purchase and sale of mutual funds between 2007 and June 2023. During the decade from 2007 to 2016, the authors found that investors in load funds had worse timing than investors in no-load funds, with an excess performance gap, comparing measures of the impact of purchase and sales timing, of 1.12 percent per year for U.S. equity funds and 0.63 percent for all funds. After Regulation Best Interest took effect, the authors observed that there had been dramatic improvement in the timing of trades. Between July of 2020 and June of 2023, the excess performance gap was only 0.13 percent for U.S. equity funds and was negative, –0.11 percent, overall. This means that in the later period, looking across all funds in the aggregate, investors in load funds timed their transactions slightly better than investors in no-load funds. While it is not certain what factors underlie the reduction in timing errors, it is consistent with an interpretation that Regulation Best Interest enhanced the standard of conduct for broker-dealers to act in the best interest of retail customers and persuade their customers to refrain from return chasing behavior.⁴¹⁴

The nature of the conflicts facing broker-dealers in the mutual fund space is similar to that facing insurance agents and independent producers in the annuity space. As discussed in the Baseline section, commissions earned by selling annuities vary considerably even within a certain type of product.⁴¹⁵ For example, commissions for variable annuities vary widely, creating a strong incentive for brokers to sell some variable annuities over others. Egan, Ge, and Tang (2022) showed that variable annuity sales were four times more sensitive to brokers’ financial interests than to investors’ financial interests.⁴¹⁶

Continued

After the Department published its 2015 proposal, sales of high-expense variable annuities fell by 52 percent, which Egan, Ge, and Tang (2022) attributed to sales becoming more sensitive to expenses and insurers increasing the availability of low-expense products. In fact, the authors stated that the “regulatory change improved the distribution of products available to investors along the extensive margin, in terms of the annuities available for sale, as well as the intensive margin, in terms of the actual annuities sold by brokers.” Thus, the authors concluded, the 2016 Final Rule resulted in improved investor welfare, increasing risk-adjusted returns of investors by up to 30 basis points per year, with two-thirds of the effect associated with investors moving into lower-expense products and the remainder from sales of annuities with more desirable investment options and characteristics.⁴¹⁷ The long-run impact of such a regulation can be estimated by applying the 30 basis point figure to the assets held in variable annuities in 2018, which was \$2.2 trillion, yielding a total annual increase in risk-adjusted returns of approximately \$6.6 billion.⁴¹⁸ Because the 2016 Final Rule was vacated, its long-run effects on the annuity market remain unknown. The current proposal, however, would help ensure a long-run positive impact on the market for variable annuities.

The Department is also concerned about the risks faced by retirement investors purchasing indexed annuities. The benefits from improved investment advice from the proposal would differ from those estimated by Egan, Ge, and Tang (2022), as they would affect a different segment of the market with distinctive characteristics.

The recent SEC actions extended new protections to retail customers advised by broker-dealers on securities transactions. According to the SEC, the Conflict of Interest Obligation under Regulation Best Interest is “intended to reduce the agency costs that arise when a broker-dealer and its associated persons provide a recommendation to a retail customer by addressing the effect of the associated person’s or broker-dealer’s conflicts of interest on the

recommendation.” In its Economic Analysis, the SEC explored the market mechanisms by which this and other provisions would benefit retail investors. The SEC estimated that the present value of potential future mutual fund fee reductions after Regulation Best Interest would be between \$14 billion to \$76 billion.⁴¹⁹ The SEC separately estimated that the potential present value of improved future mutual fund performance net of fees (which would overlap with fee reductions) would be between \$7 billion to \$35 billion. The SEC noted that these estimates represented only “some of the potential benefits” and that more benefits were expected. It also noted that while its estimates focused on mutual funds, it expected that “the same or similar dynamics could apply to other financial products.”

As discussed above, the preliminary evidence that is available for the mutual fund and annuity markets following the 2016 Final Rule and SEC’s Regulation Best Interest reinforces the Department’s view that well-designed reforms that raise advisory conduct standards and mitigate advisory conflicts would benefit retirement investors. The Department requests comment on how the investment advice market has evolved since following the enactment of such regulatory actions, with particular interest in how investment returns, net of fees, have changed for mutual funds and annuities.

6. Impact of the Proposal on Small Savers

Some observers have argued that some small savers, individuals, or households with low account balances or of modest means, will lose access to investment advice under this type of regulation and will be worse off. The Department has considered in detail the overall impact of the proposal on small savers.

The Department recognizes that investment advice is often very valuable for small savers. There is also ample evidence and broad consensus that many U.S. consumers struggle to make and implement good retirement saving and investment decisions without effective help. Many lack the skills, motivation, or discipline to accumulate adequate savings, optimize their investment strategies, and thereby realize financial security in retirement.⁴²⁰ Less sophisticated

investors may benefit from “hand-holding” to make sure they are taking basic steps such as saving adequately and allocating their investments with an appropriate amount of risk.

The Department believes that small savers are especially vulnerable to the detrimental effects of conflicted advice. With fewer economic resources, small savers are particularly susceptible to any practices that diminish their resources by extracting unnecessary fees or by yielding lower returns. These savers cannot afford to lose any of their retirement savings. Yet conflicts sometimes lead advisers to recommend products with lower expected net returns than available alternatives. Consumers’ losses from advisory conflicts tend to exceed what can be justified as fair compensation for good advice as these consumers could often benefit more from competitively priced impartial advice.⁴²¹ However, advisory conflicts have historically distorted the market in ways that have prevented consumers from accessing less conflicted investment alternatives. Less sophisticated investors frequently do not know how much they are paying for advice and are not equipped to effectively monitor the quality of the advice they receive.⁴²² Indeed, Agnew et al. (2021) found in an experimental setting that younger, less financially literate, and less numerate participants were more likely to hire a low-quality adviser.⁴²³ It is possible that they do not

Final Rule and Exemptions, pp. 108, (April 2016), <https://www.dol.gov/sites/dolgov/files/EBSA/laws-and-regulations/rules-and-regulations/completed-rulemaking/1210-AB32-2/ria.pdf>. (“many IRA investors lack sophistication”); 136 (older individuals often “lack even a rudimentary understanding of stock and bond prices, risk diversification, portfolio choice, and investment fees”); and 137 (“only one-half of individuals aged 50 and older in the United States can correctly answer two simple financial questions that involve calculations. Many respondents failed to correctly conclude that \$100 would grow to more than \$102 after five years if interest accrues at 2 percent per year, while others were unable to determine that an account earning interest at 1 percent while inflation was 2 percent would lose buying power”).

understand the potential effects of their advisers' conflicts.⁴²⁴ By itself, disclosure directly to the consumer is unlikely to change this without other protections also in place.⁴²⁵

Small investors often save using an ERISA plan. Frequently this is the main vehicle they use to save for retirement; in fact, approximately two-thirds of households participating in a pension plan do not own an IRA.⁴²⁶ This proposal will require advice given to the plan fiduciaries to meet a fiduciary standard. Improvements in plan design and selection of investments on the menu will benefit small savers. The vast majority of small savers choose investments from their plan's platform rather than investing through a brokerage account, if their plan even offers a brokerage account option.⁴²⁷ Research shows that low-income participants tend to be influenced by default options more than high income participants.⁴²⁸ Small savers will benefit from plan fiduciaries choosing default options that are well selected and well monitored.

During the 2016 Rulemaking, the Department devoted considerable

attention to the question of small investors' access to financial services, including advice.⁴²⁹ The Department believed that the rule would benefit small investors and generally would not adversely affect their access to advice.⁴³⁰ It noted ongoing market innovations that promised to make good advice more affordable and predicted that the rule would accelerate these efforts.⁴³¹ However, the Department also acknowledged the potential for short-term disruption and transition costs⁴³² and noted that the services of independent brokers and insurance agents might be most affected.⁴³³

The 2016 Rulemaking was significantly different than the current rulemaking in that it imposed a fiduciary obligation on virtually all investment recommendations specifically directed to retirement investors, imposed demanding contract and warranty requirements in the IRA market, which gave investors a direct cause of action against firms and advisers for breach of the Impartial Conduct Standards, and represented a

significant break from the then-existing regulatory baseline. Confronted with these significant changes, a number of industry commenters both during the rulemaking process of the 2016 Final Rule, and in the period immediately following the rule's finalization, expressed concern that the regulatory changes could erode small investors' access to affordable advice and to some beneficial financial products, primarily based on surveys conducted by the industry of its members.

The Department carefully reviewed such comments and papers prior to the publishing of the 2016 Final Rule and found many contained analytic flaws that rendered the comments' conclusions unsupported and unreliable. The Department accordingly discussed in the 2016 RIA its points of concern with the comments' methods and conclusions.⁴³⁴ The Department also sought assistance from an outside consultant to help review the comment letters and claims.⁴³⁵ The consultant generally found "the studies lacking in rigor, failing to recognize emerging alternatives to traditional offerings of investment advice, incorrectly equating the benefits of conflicted advice to those of non-conflicted advice, or suffering from logical fallacies."

In 2021, the Hispanic Leadership Fund and Quantria prepared a paper on the effects of reinstatement of the 2016 Rule. Based on the same approach as Quantria's prior paper, they estimated that reinstatement of the rule would reduce retirement savings of individuals with incomes below \$100,000 by \$140 billion over 10 years.⁴³⁶ The 2021 findings have shortcomings similar to those identified in the 2014 analysis, such as assuming such policy action would eliminate all financial advice received by these individuals or purporting causation from correlation. ⁴³⁶ Hispanic Leadership Fund and Quantria Strategies, LLC, *Analysis of the Effects of the 2016 Department of Labor Fiduciary Regulation on Retirement Savings and Estimate of the Effects of Reinstatement*, (November 2021).

point out that several of the paper's key assertions, such as many advisers will not be willing to operate under the fiduciary standard set out by the Department's rule, do not have empirical support and are not consistent with current practices. Furthermore, the paper's findings are not applicable to the current proposal because it assumes reinstatement of the 2016 Rulemaking, which was markedly different than the current proposal. For instance, the 2016 Final Rule required fiduciary advisers to enter into a written contract with a plan or IRA investor, which is not included in this proposal.

Similarly, the U.S. Chamber of Commerce cited surveys indicating that firms reported they might limit the availability of advice in some customer arrangements after the 2016 Final Rule and predicted that "up to 7 million IRA owners could lose access to investment advice altogether."⁴³⁷ This prediction apparently did not consider the potential for customers to move to different firms or the availability of a full range of investment choices and advisory arrangements in the market as a whole. The Chamber of Commerce and others also pointed to an increase in the number of orphaned accounts from which advisers had resigned and argued that many small customers would move to automated advice arrangements.⁴³⁸

Additionally, in 2017, Deloitte prepared a report that suggested the 2016 Final Rule had accelerated the trend toward fee-based accounts.⁴³⁹ Deloitte interviewed and collected data from 21 Securities Industry and Financial Markets Association (SIFMA) member firms regarding their response to the 2016 Final Rule as of June 9, 2017, its initial applicability date.⁴⁴⁰ Of the member firms that participated in the study, nearly half reported that they maintained advice for all of their brokerage customers, while 29 percent limited advice and 24 percent eliminated advice. Firms that eliminated or limited their advised

brokerage platforms gave retirement investors an option to either transition to a fee-based program, self-directed brokerage account, or in some cases, a new platform they were launching (e.g., robo-advice, call-center, self-directed). According to Deloitte, firms reported that many of the investors that moved into self-directed accounts either did not want to move to a fee-based account, had accounts too small to qualify for fee-based advisory accounts at the same firms, wished to retain investments that were not eligible for the same firms' fee-based accounts, or some combination.

In a report for the Financial Services Institute, a trade group representing independent financial firms and advisers, Oxford Economics (2017), predicted that "smaller investors will be offered robo-investing type account services and that these small, often entry level, novice investors would lose access to personalized financial planning."⁴⁴¹ According to a survey conducted by the Insured Retirement Institute, 70 percent of respondents either already had or were considering exiting smaller markets such as small employer-based plans and lower balance IRAs.⁴⁴² In another survey, two-thirds of responding advisers said they believed that small investors would have less access to professional financial advice.⁴⁴³

The preliminary market reaction to the 2016 Rule, however, differed from those expected by the studies discussed above and are inconsistent with more rigorous academic research. In a survey conducted in September 2017, 82 percent of broker-dealers had not made changes to their handling of smaller, retail retirement accounts, although about 18 percent had raised their minimum account threshold and closed smaller accounts.⁴⁴⁴ In examining the effects of the 2016 Final Rule, Egan, Ge, and Tang (2022) found that while variable annuity sales had decreased, there is no evidence that the change affected investors with less wealth more than others. They concluded that variable annuity sales had become more sensitive to expenses and that insurers had increased the relative availability of low-expense products. Even if there is reporting error in the maximum upfront

commission rates data, it would tend to understate the effect of brokerage commissions on investment transactions. Therefore, the study concluded that investor welfare had improved because of the 2016 Rulemaking, despite the fact that it was vacated.⁴⁴⁵

A majority of surveyed independent registered investment advisers believed that small investors would not lose access to advice due to the 2016 Final Rule.⁴⁴⁶ Some expected that young advisers just starting out would serve any abandoned investors to build their clientele.⁴⁴⁷ According to one report, many larger and more productive registered investment advisers viewed robo-advice platforms as a tool to expand their client base and attract young and low-asset investors, not simply as a tool to reduce costs.⁴⁴⁸

The surveys, papers, and predictions described above do not support a finding that small investors would lose or have lost access to personalized advice as a result of fiduciary protections, even under the 2016 Rulemaking, which imposed more onerous conditions—and liability—on firms and advisers than is true of the proposed rule and exemptions. The proposal broadly comports to Regulation Best Interest, and the Department is not aware of any substantial, documented reductions in access to advice as a result of Regulation Best Interest.

The proposal accommodates different types of business models. Still, it is possible that, as the market evolves, small investors and the firms that serve them will increasingly move away from commission-based full-service or "advised" brokerage accounts or commission-compensated advice from insurance agents. Instead, they may use one or more of the following: target-date funds (which adjusts risk allocation over time based on the target-date); receiving advice directly from investment firms (which allows for interaction with a live adviser though the advice tends to focus on in-house funds and investments); hourly engagement or subscription-based firms (which are particularly useful for financial planning); and robo-advice

(which generally provides a customized investment mix based on information about the investor's financial circumstances and existing investment assets).⁴⁴⁹ Robo-advisers and target-date funds, in particular, are rapidly gaining market share.^{450 451}

The Department requests comment on research or data demonstrating how access to advice has changed, particularly for small savers, following the 2016 Final Rule, vacatur of the Final rule, recent regulatory actions taken by the Department and the SEC, and the increased use of technology to provide advice.

The Department expects the proposed rule and exemptions would not significantly impact the overall availability of affordable investment advice but rather improve the quality of this advice as conflicts are removed. This would apply as well to small investors who continue to have access to advice. Furthermore, increasing the quality of advice provided to retirement plan fiduciaries will benefit many workers who are participating in a defined contribution or defined benefit pension plan.

This is supported by the experience in the U.K., which adopted a far more aggressive stance in addressing conflicted advice than the Department proposed in the 2016 Rulemaking or the current proposals. When the U.K. initially banned commissions for investment advice and required more stringent qualifications for advisers under its Retail Distribution Review (RDR) in 2013, the advice rate fell both in the lead up to the regulatory change and in the years immediately following its implementation. However, more recent research has found evidence of improvements in the market since 2017, including a 35 percent increase in the number of U.K. adults that received financial advice, a 5 percent increase in the number of advisers, and a 9-percentage point increase in consumer awareness of automated advice,⁴⁵² which suggested a greater focus on

digital advice as a potential solution to provide low-cost investment advice with specifically tailored outcomes to individual investors at scale.⁴⁵³

The Department has reason to believe that such alternative forms of advice have become more available in the U.S. and, as in the U.K., are beneficial to small investors. In recent years, the investment advice market has seen an increase in financial technology and robo-advice service providers, which cater to small savers. In 2017, Morningstar noted that advances in financial technology could increase personal advisers' productivity and streamline compliance, enabling them to offer higher service levels affordably to small investors even as they adapt business practices to mitigate conflicts of interest.⁴⁵⁴ Because the core portfolio management functions are performed by computer algorithm, robo-adviser services generally can be expanded more easily than traditional advisory services. The marginal cost incurred by a robo-adviser to serve additional customers is very small relative to that incurred by traditional advisers. Robo-advisers often serve investors with assets under \$500,⁴⁵⁵ and some robo-advisers do not require a minimum investment at all.⁴⁵⁶ The financial needs of small investors often can be easily met by basic services and given the low balance of many such accounts, there may be little need or justification for a more intensively personalized (and expensive) strategy. The increasing presence of robo-advice has proved to be such an innovation.

Many robo-advice providers claim to offer relatively conflict-free services, claiming no commission, no performance fees, and no compensation from third parties. Others claim to serve investors as fiduciaries. Robo-adviser offerings are typically comprised of ETFs that, in comparison to mutual funds, offer little room for revenue

streams and payment shares that would create a conflict of interest for investment advisers (e.g., 12b-1 fees, subtransfer agent fees).⁴⁵⁷

Despite the increasing popularity of robo-advisers, empirical evidence on their performance and returns, especially during market downturns, is limited. In 2015, SEC Commissioner Kara Stein stated, "Do investors using robo-advisors appreciate that, for all their benefits, robo-advisors will not be on the phone providing counsel if there is a market crash?"⁴⁵⁸ However, a recent study by Liu et al. (2021) looked specifically at the impact of using robo-advisers on investment performance during the 2020 financial crisis caused by the COVID-19 global pandemic.⁴⁵⁹ Using portfolio and transaction data from investors at a Taiwanese mutual fund online investment platform, Liu et al. (2021) found that robo-advice significantly reduced the losses experienced by investors during the crisis and that investors using robo-advice adjusted risk levels and trading to adapt to changes in the market while other investors did not. Younger users and those with less investment experience benefited the most from robo-advice.

7. Reform in the United Kingdom

As regulators in several countries have identified failures in their investment advice markets, they have undertaken a range of regulatory and legislative initiatives that directly address conflicted investment advice. One of the most studied initiatives occurred in the developed pension markets of the United Kingdom, where the Financial Conduct Authority (FCA) issued new regulations effective January 1, 2013, called the Retail Distribution Review (RDR). The U.K. focused its new regulatory regime on more transparent fee-for-service compensation structures. The U.K. enacted an aggressive reform that banned commissions on all retail investment products, not just those

related to retirement savings;⁴⁶⁰ required that customers in the U.K. be charged directly for advice; and raised qualification standards for advisers.

In marked contrast to these reforms, the Department's proposal does not ban commissions or eliminate conflicted compensation structures, but rather relies upon conduct standards and oversight structures designed to minimize the harmful impact of conflicts of interest, while permitting a wide range of business practices and models. The Department's proposal represents a middle ground between no reform and the outright bans on conflicted payments, allowing businesses to use a range of compensation practices while minimizing the harmful impact of conflicts of interest on the quality of advice.

Moreover, the Department's proposed regulatory action is narrower than the rules passed by the U.K. as it does not prescribe additional qualification

standards for existing financial advisers or broadly ban commissions. Those rules also sought to overhaul the entire financial advice market, while this rule focuses on advice to retirement investors and seeks to harmonize all advice to retirement investors under a uniform standard and oversight structure including disclosure requirements, rather than the existing patchwork of regulatory standards. Still, an important aim of all these interventions is to reduce incentives for financial advisers to recommend investments that are not in their client's best interest and thereby increase investor confidence in financial advice.

The experience of the U.K. suggests that while there are transitional costs of overhauling the incentive structure and qualifications of the financial advisers, the changes have resulted in a modest increase in the number of adults accessing financial advice as well as their satisfaction with the advice they

are receiving.⁴⁶¹ In general, the U.K., experience, which was more broadly applied, indicates that these reforms will not result in a significant reduction of advice but will instead increase confidence in that advice's value.

8. Cost

To estimate compliance costs associated with the proposal, the Department considers the marginal cost associated with the proposed amendments. The Department estimates that the proposal would impose total costs of \$253.2 million in the first year and \$216.2 million in each subsequent year. The estimated compliance costs associated with the proposed amendments in the rule and PTEs are summarized in the table below. Over 10 years, the costs associated with the proposal would total approximately \$1,553.1 million, annualized to \$221.1 million per year (using a 7 percent discount rate).⁴⁶²

TABLE 4—SUMMARY OF MARGINAL COST AND PER-ENTITY COST BY EXEMPTION

	Total cost	
	First year	Subsequent years

PTE 77–4	0	0
PTE 80–83	0	0
PTE 83–1	0	0
PTE 86–128	609,487	609,487
Total	253,241,229	216,200,080

The estimated costs associated with each exemption are broken down and explained below. More details can be found in the Paperwork Reduction Act sections of each respective exemption, also published in today's **Federal Register**.⁴⁶³

The quantified costs are significantly lower than costs in the 2016 RIA due to the smaller scope of the proposal relative to the 2016 Final Rule as well

as compliance structures adopted by the industry to reduce conflicted advice in response to state regulations, Regulation Best Interest, PTE 2020–02, and the Department's 2016 Rulemaking. The methodology for estimating the costs of the proposed amendments to the rule and PTEs is consistent with the methodology and assumptions used in the 2020 analysis for the current PTE 2020–02.

Preliminary Assumptions and Cost Estimate Inputs

The Department acknowledges that not all entities would decide to use the amended PTE 2020–02 and PTE 84–24 for transactions resulting from fiduciary investment advice. Some may instead rely on other existing exemptions that better align with their business models. However, for this cost estimation, the Department assumes that all eligible

⁴⁶⁰ “Non-advised” services, or execution-only sales, where no advice or recommendation is given, fall outside of the RDR. Thus, a commission is still permitted for non-advised annuity sales. The FCA is currently examining the risks that exist with the purchase of “non-advised” annuities. Please see: <http://www.fca.org.uk/static/documents/consultation-papers/cp15-30.pdf>.

⁴⁶¹ UK Financial Conduct Authority, *Evaluation of the Impact of the Retail Distribution Review and the Financial Advice Market Review*, U.K. Financial Conduct Authority, (December 2020), <https://www.fca.org.uk/publication/corporate/evaluation-of-the-impact-of-the-rdr-and-famr.pdf>.

⁴⁶² The costs would be \$1,880.2 million over 10-year period, annualized to \$220.4 million per year if a 3 percent discount rate were applied.

⁴⁶³ As noted above, the Department is proposing to amend the following exemptions: PTE 2020–02 (*Improving Investment Advice for Workers & Retirees*), PTE 84–24 (*Class Exemption for Certain Transactions Involving Insurance Agents and Brokers, Pension Consultants, Insurance Companies, and Investment Company Principal Underwriters*), PTE 75–1 (*Exemptions From Prohibitions Respecting Certain Classes of Transactions Involving Employee Benefit Plans and Certain Broker-Dealers, Reporting Dealers and*

Banks), PTE 80–83 (*Class Exemption for Certain Transactions Between Investment Companies and Employee Benefit Plans*), PTE 80–83 (*Class Exemption for Certain Transactions Involving Purchase of Securities where Issuer May Use Proceeds to Reduce or Retire Indebtedness to Parties In Interest*), PTE 83–1 (*Class Exemption for Certain Transactions Involving Mortgage Pool Investment Trusts*) and PTE 86–128 (*Class Exemption for Securities Transactions Involving Employee Benefit Plans and Broker-Dealers*).

entities would use the PTE 2020–02 and PTE 84–24 for such transactions. The Department recognizes that this may result in an overestimate.

The Department does not have information on how many retirement investors—including plan beneficiaries, plan participants, and IRA owners—receive electronic disclosures from investment advice fiduciaries. For the purposes of this analysis, the Department assumes that the percent of retirement investors receiving electronic disclosures would be similar to the percent of plan participants receiving electronic disclosures under the Department's 2020 and 2002 electronic disclosure safe harbors.⁴⁶⁴ Accordingly, the Department estimates that 94.2 percent of the disclosures sent to retirement investors would be sent electronically, and the remaining 5.8 percent would be sent by mail.⁴⁶⁵ For disclosure sent by mail, the Department estimates that entities will incur a cost of \$0.66⁴⁶⁶ for postage and \$0.05 per page for material and printing costs.

Additionally, the Department assumes that several types of personnel would perform the tasks associated with information collection requests at an hourly wage rate of \$63.45 for clerical personnel, \$128.11 for a top executive, \$133.05 for a computer programmer, \$158.94 for an insurance sales agent, \$159.34 for a legal professional, \$190.63 for a financial manager, and \$219.23 for a financial adviser.⁴⁶⁷

Finally, the Department assumes affected entities would likely incur only incremental costs if they were already subject to rules or requirements from the Department or another regulator.

⁴⁶⁴ 67 FR 17263 (Apr. 9, 2002); 85 FR 31884 (May 27, 2020).

⁴⁶⁵ The Department estimates 94.2 percent of retirement investors receive disclosures electronically. This is the sum of the estimated share of retirement investors receiving electronic disclosures under the 2002 electronic disclosure safe harbor (58.2 percent) and the estimated share of retirement investors receiving electronic disclosures under the 2020 electronic disclosure safe harbor (36 percent).

Costs Associated With Amendments to Section 3(21)(A)(ii) of the Employee Retirement Income Security Act of 1974 and Section 4975(e)(3)(B) of the Code

As discussed in the Affected Entities section, the proposed amendment to the rule would change the definition of a fiduciary such that some financial institutions previously not considered fiduciaries would be so under the proposed rule. Additionally, some financial institutions, who already provide fiduciary services for some clients or types of services, would be required to act as a fiduciary for more services under the proposed rule.

Entities may incur some cost associated with the proposed amendments to regulations under section 3(21)(A)(ii) of ERISA and section 4975(e)(3)(B) of the Code. While most of the cost incurred would be associated with the proposed amendments to related PTEs, entities who did not previously identify as a fiduciary may also incur some transition costs. These costs would likely differ significantly by type of financial institution. For instance, retail broker-dealers subject to Regulation Best Interest or registered investment advisers subject to the Investment Advisers Act would be closer to satisfying the requirements of a fiduciary under ERISA than an insurance company or independent producer selling annuity products. The Department requests comment on the costs these entities would incur as a result of becoming a fiduciary under this rule, as well as the underlying data to estimate these costs. The Department is particularly interested in costs that would not be incurred in satisfying the requirements to the PTEs, such as legal costs, fiduciary insurance costs, technology costs, human capital costs, or other costs of this nature. The Department also requests comment on how plans would be affected by the proposed rule.

Costs Associated With PTE 2020–02

The Department proposes to amend PTE 2020–02 to require the provision of additional disclosures to retirement investors receiving advice from financial institutions and to provide more guidance for financial institutions and investment professionals complying with the Impartial Conduct Standards and implementing the policies and procedures. This proposal is intended to align with other regulators' rules and standards of conduct. As such, the Department expects that satisfying the proposal would not be unduly burdensome.

Summary of Affected Entities

The entities that the Department expects to be affected by the proposed amendments to the PTE are also affected by the existing PTE 2020–02. The Department estimates that 19,290 financial institutions, composed of 1,894 broker-dealers, 15,982 registered investment advisers,⁴⁶⁸ 183 insurers, 200 pure robo-advisers, 1,011 pension consultants, and 20 investment company underwriters would be affected by the proposed amendments.⁴⁶⁹

The Department recognizes that the proposed amendments may change the number of financial institutions who choose to rely on PTE 2020–02. Consistent with its initial analysis of the exemption in 2020, this analysis assumes that all eligible entities currently rely on the exemption and would continue to rely on the exemption if amended as proposed. As a result, this analysis does not reflect any change in the number of entities relying on the exemption in response to these amendments. The Department requests comment on how the proposed amendments might change the number of affected entities relying on PTE 2020–02.

Additionally, the Department recognizes that entities within the insurance industry are subject to different regulatory regimes, depending on the types of products they offer. The Department does not have data on what proportion of entities are subject to the requirements in the NAIC Model regulation, or obligations subject to regulation by the SEC or state insurance departments. The analysis below considers cost to comply if the entity currently meets none of the requirements. This likely is an overestimate, as many of these entities are already meeting some, if not most, of the requirements of this proposal. The Department requests comments on this assumption.

Costs To Review the Rule

The Department estimates that all of the 19,290 financial institutions discussed above would be affected by the proposed amendments to PTE 2020–02 and would need to review the rule. The Department estimates that such a review would take a legal professional, on average, nine hours to review the rule, resulting in an estimated cost of

⁴⁶⁸ The Department estimates that 15,982 registered investment advisers that do not provide pure robo-advice.

⁴⁶⁹ For more information on how the number of each type of entity is estimated, refer to the Affected Entities section.

\$27.7 million in the first year.⁴⁷⁰ This estimate also assumes all effected financial institutions expend the effort, however, that may not be the case as other arrangements may exist where individual financial firms receive compliance assistants from other sources. The Department asks for comments on this estimate.

Costs Associated With General Disclosures for Investors

Costs Associated With Modifications of Existing Disclosure Requirements

As discussed in the preamble, Section II(b) currently requires financial institutions to provide certain disclosures to retirement investors before engaging in a transaction pursuant to the exemption. These disclosures include:

(1) a written acknowledgment that the financial institution and its investment professionals are fiduciaries;

(2) a written description of the services to be provided and any conflicts of interest of the investment professional and financial institution; and

(3) documentation of the financial institution and its investment professional's conclusions as to whether a rollover is in the retirement investor's best interest, before engaging in a rollover or offering recommendations on post-rollover investments.

As discussed in more detail in the preamble and below, the proposed amendments make minor language edits to the existing disclosures.

The proposed amendment makes minor edits to the written acknowledgment that the financial institution and its investment professionals are fiduciaries. Financial institutions would be required to provide a written acknowledgment that the Financial Institution and its Investment Professionals are providing fiduciary investment advice to the Retirement Investor and are fiduciaries under Title I, the Code, or both when making an investment recommendation. This condition would not be met if the fiduciary acknowledgement states that the financial institution and its investment professionals "may" be fiduciaries or would become fiduciaries only "if" or "when" providing fiduciary investment advice as defined under the applicable regulation.

The Department does not have data on how many financial institutions

would need to modify their disclosures in response to this amendment; however, the Department expects that the disclosures required under the existing form of PTE 2020-02 likely satisfy this requirement for most financial institutions covered under the existing exemption. For the purposes of this analysis, the Department assumes that 10 percent of financial entities under the existing exemption would need to update their disclosures and that it would take a legal professional at a financial institution, on average, 10 minutes to update existing disclosures. Robo-advisers, pension consultants, and investment company underwriters, who are not covered under the existing exemption would need to draft the acknowledgement. The Department estimates that it would take a legal professional at these entities, on average, 30 minutes to draft the acknowledgement. Updating and drafting the acknowledgement is estimated to result in a cost of approximately \$0.1 million in the first year.⁴⁷¹

The proposed amendments would also expand on the existing requirement for a written description of the services provided to also require a statement on whether the retirement investor would pay for such services, directly or indirectly, including through third-party payments. The Department assumes it would take a legal professional at a financial institution under the existing exemption 30 minutes to update existing disclosures to include this information. Robo-advisers, pension consultants, and investment company underwriters, who are not covered under the existing exemption, would need to draft a written description of services provided, which the Department estimates would take a legal professional a large institution five hours and a legal professional at a small institution one hour, on average, to

⁴⁷¹ The number of financial entities needing to update their written acknowledgement is estimated as: $(1,894 \text{ broker-dealers} \times 10\%) + (7,570 \text{ SEC-registered investment advisers} \times 10\%) + (8,412 \text{ state-registered investment advisers} \times 10\%) + (183 \text{ insurers} \times 10\%) = 1,806$ financial institutions updating existing disclosures. The number of financial entities needing to draft their written acknowledgement is estimated as: $200 \text{ robo-advisers} + 1,011 \text{ pension consultants} + 20 \text{ investment company underwriters} = 1,231$ financial institutions drafting new disclosures. The burden is estimated as: $(1,806 \text{ financial institutions} \times (10 \text{ minutes} + 60 \text{ minutes})) + (1,231 \text{ financial institutions} \times (30 \text{ minutes} + 60 \text{ minutes})) = 917$ hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: $[(1,806 \text{ financial institutions} \times (10 \text{ minutes} + 60 \text{ minutes})) + (1,231 \text{ financial institutions} \times (30 \text{ minutes} + 60 \text{ minutes}))] \times \$159.34 = \$146,035$.

prepare such a draft.⁴⁷² The Department requests comment on how long it would take entities of varying size to prepare such a disclosure. This results in an estimated cost of approximately \$1.8 million in the first year.⁴⁷³

The Department requests comment on the average time estimates to satisfy each of the new requirements in the proposed amendments.

Costs Associated With New Disclosure Requirements

As amended, PTE 2020-02 would require financial institutions to provide investors with the following additional disclosures:

(1) a written statement of the best interest standard of care owed; and

(2) a written statement that the retirement investor has the right to obtain specific information regarding costs, fees, and compensation, described in dollar amounts, percentages, formulas, or other means reasonably designed to present full and fair disclosure that is materially accurate in scope, magnitude, and nature, sufficient detail to permit the Retirement Investor to make an informed judgment about the costs of the transaction and about the significance and severity of the Conflicts of Interest, and describes how the Retirement Investor can get the information, free of charge.

Under the Investment Advisers Act and the SEC's Regulation Best Interest, most registered investment advisers and broker-dealers with retail investors already provide disclosures that the

⁴⁷² As discussed in the Regulatory Flexibility Act analysis, the Department estimates that 10 robo-advisers, 930 pension consultants, and 20 investment company underwriters are considered small entities. For more information, refer to the Affected Entities discussion in the Regulatory Flexibility Act section of this document.

⁴⁷³ The number of financial entities needing to update their written description of services is estimated as: $(1,894 \text{ broker-dealers} + 7,750 \text{ SEC-registered investment advisers} + 8,412 \text{ state-registered investment advisers} + 183 \text{ insurers}) = 18,059$ financial institutions updating existing disclosures. The number of financial entities needing to draft their written description of services is estimated as: $(200 \text{ robo-advisers} + 1,011 \text{ pension consultants} + 20 \text{ investment company underwriters}) = 1,231$ financial institutions drafting new descriptions. Of these, 960 financial institutions, or 10 robo-advisers, 930 pension consultants, and 20 investment company underwriters, are considered small entities. For more information, refer to the Affected Entities discussion in the Regulatory Flexibility Act section of this document. The burden is estimated as: $(18,059 \text{ financial institutions} \times (30/60 \text{ hours})) + (960 \text{ small financial institutions} \times 1 \text{ hour}) + [(1,231 \text{ financial institutions} - 960 \text{ small financial institutions}) \times 5 \text{ hours}] = 11,345$ hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: $\{(18,059 \text{ financial institutions} \times (30/60 \text{ minutes})) + (960 \text{ small financial institutions} \times 1 \text{ hour}) + [(1,231 \text{ financial institutions} - 960 \text{ small financial institutions}) \times 5 \text{ hours}]\} \times \$159.34 = \$1,807,712$.

⁴⁷⁰ The burden is estimated as: $(19,290 \text{ entities} \times 9 \text{ hours}) = 173,610$ hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: $(38,580 \text{ entities} \times 9 \text{ hours}) \times \$159.34 = \$27,663,017$.

Department expects would satisfy these requirements.⁴⁷⁴

The Department expects that the written statement of the Best Interest standard of care owed would not take a significant amount of time to prepare and would be uniform across clients. The Department assumes that a legal professional employed by a broker-dealer or registered investment advisers, on average, would take 30 minutes to modify existing disclosures and that it would take insurers, robo-advisers, pension consultants, and investment company underwriters, on average, one hour to prepare the statement. This results in a cost estimate of approximately \$1.7 million in the first year.⁴⁷⁵

The added requirement of a written statement informing the investor of their right to obtain a written description of the financial institution's policies and procedures and information regarding costs, fees, and compensation would require financial institutions to maintain sufficient records to allow them to meaningfully respond to investors' requests to demonstrate how the financial institution and its investment professionals are compensated in connection with their recommendations. The Department expects that many financial institutions' disclosures already substantially comply with this regulation or would require modest adjustments to do so. To satisfy this requirement, the Department estimates that a legal professional for broker-dealers and registered investment advisers would require, on average, 30 minutes to modify existing statements and that it would take insurers, robo-advisers, pension consultants, and investment company underwriters, on average, one hour to prepare the statement. This results in a cost estimate of approximately \$1.7 million in the first year.⁴⁷⁶

⁴⁷⁴ Form CRS Relationship Summary; Amendments to Form ADV, 84 FR 33492 (July 12, 2019).

⁴⁷⁵ The burden is estimated as: [(1,894 broker-dealers + 15,982 registered investment advisers) × (30 minutes + 60 minutes)] + [(183 insurers + 200 robo-advisers + 1,011 pension consultants, and 20 investment company underwriters) × 1 hour] = 10,352 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(1,894 broker-dealers + 15,982 registered investment advisers) × (30 minutes + 60 minutes)] + [(183 insurers + 200 robo-advisers + 1,011 pension consultants, and 20 investment company underwriters) × 1 hour] × \$159.34 = \$1,649,488.

⁴⁷⁶ The burden is estimated as: [(1,894 broker-dealers + 15,982 registered investment advisers) × (30 minutes + 60 minutes)] + [(183 insurers + 200 robo-advisers + 1,011 pension consultants, and 20 investment company underwriters) × 1 hour] = 10,352 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the

The Department requests comment on the average time estimates to satisfy each of the new requirements in the proposed amendments.

Costs Associated With the Provision of Disclosures to Retirement Investors

Financial institutions would incur costs associated with preparing and sending the new disclosure requirements. The Department does not have data on the number of retirement investors that have relationships with financial institutions that would engage in transactions covered under the amended exemption. For the purposes of this analysis, the Department uses the number of participants who roll over defined contribution plan assets to IRAs as a proxy for the number of retirement investors that would receive general disclosures. Accordingly, the Department estimates that approximately 3.2 million retirement investors have relationships with financial institutions and are likely to engage in transactions covered under this PTE.⁴⁷⁷

Of these 3.2 million retirement investors, it is assumed that 5.8 percent, or 184,643 retirement investors would receive paper disclosures.⁴⁷⁸ The Department assumes that there would not be a measurable increase in the time burden for a clerical worker to prepare the additional disclosures for individuals already receiving disclosures. The Department estimates that providing the additional disclosures would require two additional pages, resulting in a material cost estimate of \$18,464.⁴⁷⁹

Financial institutions would also incur costs associated with preparing and sending requested written descriptions of policies and procedures and information regarding costs, fees, and compensation. The Department does not have data on how often investors would request this information. The Department assumes that, on average, each financial institution would receive 10 such

following calculation: [(1,894 broker-dealers + 15,982 registered investment advisers) × (30 minutes + 60 minutes)] + [(159 insurers + 200 robo-advisers + 1,060 pension consultants, and 20 investment company underwriters) × 1 hour] × \$159.34 = \$1,649,488.

⁴⁷⁷ The Department estimates the number of affected plans and IRAs to be equal to 50 percent of rollovers from retirement plans to IRAs. As discussed in the Affected Entities section, the Department estimates that there are 6,367,005 total rollovers annually.

⁴⁷⁸ The number of retirement investors receiving paper disclosures is estimated as: (3,183,503 retirement investors × 5.8%) = 184,643 paper disclosures.

⁴⁷⁹ The cost is estimated as: (184,643 paper disclosures × 2 pages) × \$0.05 = \$18,464.

requests annually and that most financial institutions already have such information available. The Department requests comments on the assumption that financial institutions readily have this information available and the time necessary to gather such information. The Department estimates it would take a clerical worker five minutes to distribute, regardless of whether it is sent electronically or by mail. This results in an estimated cost of approximately \$1.0 million.⁴⁸⁰ As discussed at the beginning of the cost section, the Department assumes that 5.8 percent of these disclosures (11,188 disclosures) would be mailed. Financial institutions would incur \$0.66 for postage and \$0.10 for the paper and printing costs of two pages for each of the disclosures, which the Department estimates to cost approximately \$8,503.⁴⁸¹

Summary Costs Associated With the General Disclosures

The Department estimates that the total cost associated with preparing and providing the general disclosures discussed above would be approximately \$6.3 million in the first year and \$1.0 million in subsequent years.⁴⁸²

Costs Associated With Rollover Documentation and Disclosure for Financial Institutions

Compared to the requirements in the existing exemption, the proposed amendment would clarify the rollover disclosure requirements in Sections II(b)(3) and II(c)(3) of PTE 2020-02. Before engaging in a rollover or making

⁴⁸⁰ The burden is estimated as: (19,290 financial institutions × 10 disclosures) × (5 minutes + 60 minutes) = 16,075 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: [(19,290 financial institutions × 10 disclosures) × (5 minutes + 60 minutes)] × \$63.45 = \$1,019,959.

⁴⁸¹ The cost is estimated as: (19,290 financial institutions × 10 disclosures × 2 pages × \$0.05) + (19,290 financial institutions × 10 disclosures × \$0.66) × (5.8%) = \$8,503.

⁴⁸² The cost in the first year is estimated as: (\$146,035 to prepare the written acknowledgment + \$1,807,633 to prepare the written description of services provided + \$1,649,488 to prepare the written statement of the Best Interest standard of care + \$1,649,488 to prepare the written statement informing the investor of their right to obtain a written description of the financial institution's policies and procedures + \$18,464 to prepare and send disclosures + \$1,019,959 to prepare requested written policies and procedures + \$8,053 for material costs associated with requested policies and procedures) = \$6,299,569. The cost in subsequent years is attributable to the \$18,464 to prepare and send disclosures + \$1,019,959 to prepare requested written policies and procedures + \$8,503 for material costs associated with requested policies and procedures = \$1,046,926. Note that the total value may not equal the sum of the parts due to rounding.

a recommendation to a plan participant as to the post-rollover investment of assets, the investment professional must consider and document their conclusions as to whether a rollover is in the retirement investor's best interest and provide that documentation to the retirement investor. Relevant factors to consider must include but are not limited to:

(i) the alternatives to a rollover, including leaving the money in the plan or IRA, if applicable;

(ii) the comparative fees and expenses;

(iii) whether an employer or other party pays for some or all administrative expenses; and

(iv) the different levels of fiduciary protection, services, and investments available.

As discussed in the Affected Entities section, the Department estimates that 3,119,832 rollovers would be affected by the proposed amendments to PTE 2020–02.⁴⁸³

As a best practice, the SEC already encourages firms to record the basis for significant investment decisions, such as rollovers, although doing so is not required under Regulation Best Interest. In addition, some firms may voluntarily document significant investment decisions to demonstrate compliance with applicable law, even if not required. SIFMA commissioned Deloitte to conduct a survey of its member firms to learn how they expected to implement Regulation Best Interest. The survey was conducted by December 31, 2019, prior to Regulation Best Interest's effective date of June 30, 2020. Just over half (52 percent) of the firms surveyed will require their financial advisers to provide best interest rationale documentation for rollover recommendations.⁴⁸⁴ The Department estimates that documenting each rollover recommendation will require 30 minutes for a personal financial adviser whose firms currently do not require rollover documentations and

five minutes for financial advisers whose firms already require them to do so. This results in an estimated annual cost of approximately \$193.8 million.⁴⁸⁵ The Department requests comment on how long such documentation would take.

The Department assumes financial institutions that do not have enhanced technology capabilities for other regulations will take a mixed approach, combining current technology solutions with manual processes. Accordingly, the Department estimates that financial institutions already requiring rollover documentation will face no more than a nominal burden increase, and only to the extent that their current compliance systems do not meet the requirements of this exemption. Those firms currently not documenting rollover recommendations will likely face a larger, but still somewhat limited burden.

Costs Associated With Disclosures for PEPs

Financial institutions providing investment advice for PEPs must give each participating employer an additional disclosure detailing any amounts the financial institution pays to or receives from the PPP or its affiliates, in addition to any conflicts of interest that arise in connection with the investment advice it provides to a PEP. According to filings submitted to the Department as of August 22, 2023, there are 382 PEPs and 134 PPPs.⁴⁸⁶

The Department does not have data on what percent of PEPs would be affected by the exemption. For the purposes of this analysis, the Department assumes that all PEPs would be affected. The Department requests comment on this assumption. The Department assumes that, on average, one financial institution would need to prepare one disclosure for each PEP in the first year. The Department requests comment on this assumption and how frequently PPPs would provide investment advice to a PEP within the framework of the exemption. The Department estimates that, on average, it would take a legal professional at each entity two hours to prepare the disclosure, resulting in a cost of approximately \$0.1 million in the first year.⁴⁸⁷

⁴⁸⁶ For more information on this estimate, refer to the Affected Entities section.

⁴⁸⁷ The burden is estimated as: (382 financial institutions × 2 hours) = 764 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (382 financial institutions × 2 hours) × \$159.34 = \$121,736.

In addition to providing the disclosure described above to each PEP, financial institutions must also provide these disclosures to each participating employer. According to filings submitted to the Department by August 22, 2023, there are 955 employers in PEPs.⁴⁸⁸ The Department assumes that all of these disclosures will be sent electronically. Distributing the disclosures is estimated to take clerical personnel one minute per disclosure, resulting in an estimated cost of approximately \$1,010.⁴⁸⁹

Costs Associated With Annual Report of Retrospective Review for Financial Institutions

PTE 2020–02 currently requires financial institutions to conduct a retrospective review at least annually that is reasonably designed to prevent violations of, and achieve compliance with the conditions of this exemption, the Impartial Conduct Standards, and the policies and procedures governing compliance with the exemption. The Department is clarifying that the Financial Institution must update the policies and procedures as business, regulatory, and legislative changes and events dictate, and to ensure they remain prudently designed, effective, and compliant with the exemption. Under the original exemption, financial institutions were already required to maintain their policies and procedures. The Department's estimates for any additional cost for entities updating their policies and procedures are discussed in the discussion of costs associated with written policies and procedures for financial institutions, below.

Robo-advisers, pension consultants, and investment company underwriters, who are not covered under the existing exemption, would incur costs associated with conducting the annual review. The Department does not have data on how many would incur costs associated with this requirement; however, the Department expects that many of these entities already develop an audit report. The Department assumes that 10 percent of these entities do not currently

⁴⁸³ For more information on how the number of IRA rollover is estimated, refer to the Affected Entities section. In light of ongoing litigation, the Department is assuming for purposes of this discussion that all Affected Entities will become subject to these requirements, regardless of whether they currently provide fiduciary investment advice.

⁴⁸⁴ Deloitte, *Regulation Best Interest: How Wealth Management Firms are Implementing the Rule Package*, Deloitte, (Mar. 6, 2020).

⁴⁸⁵ The burden is estimated as: (3,119,833 rollovers × 48% × (30 minutes + 60 minutes)) + (3,119,833 rollovers × 52% × (5 minutes + 60 minutes)) = 883,953 hours. A labor rate of \$219.23 is used for a personal financial adviser. The labor rate is applied in the following calculation: (3,119,833 rollovers × 48% × (30 minutes + 60 minutes)) + (3,119,833 rollovers × 52% × (5 minutes + 60 minutes)) × \$219.23 = \$193,788,961.

⁴⁸⁸ Estimates are based on 2021 EFAST filings as of August 22, 2023. The inaugural filing deadline for Form 5500 filings for PEPs with plan years beginning after January 1, 2021 was July 31, 2022. The Department based its estimates on those filings it had received by August 22, 2023. However, since this is the first year PEPs could file, the Department anticipates that this understates the true number of PEPs affected by this proposed rule.

⁴⁸⁹ The burden is estimated as: (955 employers × (1 minute + 60 minutes)) = 16 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: (955 employers × (1 minute + 60 minutes)) × \$63.45 = \$1,010.

produce an audit report, while the remaining 90 percent would need to make modifications to satisfy the requirements. This results in an estimate of 123 entities not currently producing audit reports, of which 96 are small entities and 27 are large entities.⁴⁹⁰ The Department requests comment on this assumption.

The Department estimates that it would take a legal professional five hours for small firms and ten hours for large firms to produce a retrospective review report, resulting in an estimated cost of \$0.1 million.⁴⁹¹ The Department estimates that it would take a legal professional one hour for small firms and two hours for large firms to modify existing reports, on average. This results in an estimated cost of \$0.2 million.⁴⁹²

The Department estimates it will take a certifying officer two hours for small firms and four hours for large firms to review the report and certify the exemption, resulting in an estimated cost burden of approximately \$0.6 million.⁴⁹³

The results in a total cost annual cost of \$0.9 million.⁴⁹⁴

⁴⁹⁰ The number of total entities affected is estimated as: (200 robo-advisers + 1,011 pension consultants + 20 investment company underwriters) $\times$ 10% = 123 entities. As discussed in the Regulatory Flexibility Act analysis of this document, 10-robo advisers, 930 pension consultants, and 20 investment company underwriters are estimated to be small entities. The number of small entities affected is estimated as: (10 robo-advisers + 930 pension consultants + 20 investment company underwriters) $\times$ 10% = 96 small entities.

⁴⁹¹ The burden is estimated as: (96 financial institutions $\times$ 5 hours) + (27 financial institutions $\times$ 10 hours) = 750 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(96 financial institutions $\times$ 5 hours) + (27 financial institutions $\times$ 10 hours)] $\times$ \$159.34 = \$119,505.

⁴⁹² The number of total entities affected is estimated as: (200 robo-advisers + 1,011 pension consultants + 20 investment company underwriters) $\times$ 90% = 1,108 entities. As discussed in the Regulatory Flexibility Act analysis of this document, 10 robo-advisers, 930 pension consultants, and 20 investment company underwriters are estimated to be small entities. The number of small entities affected is estimated as: (10 robo-advisers + 930 pension consultants + 20 investment company underwriters) $\times$ 90% = 864 small entities. The burden is estimated as: (905 financial institutions $\times$ 1 hours) + (248 financial institutions $\times$ 2 hours) = 1,401 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(864 financial institutions $\times$ 1 hour) + (244 financial institutions $\times$ 2 hours)] $\times$ \$159.34 = \$215,428.

⁴⁹³ The burden is estimated as: (960 financial institutions $\times$ 2 hours) + ((1,231 – 960 financial institutions) $\times$ 4 hours) = 3,004 hours. A labor rate of \$190.63 is used for a top executive. The labor rate is applied in the following calculation: [(960 financial institutions $\times$ 2 hours) + ((1,231 – 960 financial institutions) $\times$ 4 hours)] $\times$ \$190.63 = \$572,653.

⁴⁹⁴ This is estimated as: (\$119,505 + \$215,428 + \$572,653) = \$907,586.

Costs Associated With Written Policies and Procedures for Financial Institutions

The time required to establish, maintain, and enforce written policies and procedures prudently designed to ensure compliance with the Impartial Conduct Standards would depend on the size and complexity as of the financial institution. The Department estimates that this would take a legal professional 10 hours at a large firm and five hours at a small firm in the first year and 30 minutes in subsequent years.⁴⁹⁵ The Department assumes that most financial institutions affected by the existing exemption likely already satisfy much of this requirement, as it would be a customary business practice to periodically review required policies and procedures.

The proposed amendments would also require financial institutions to provide their complete policies and procedures to the Department upon request. Based on the number of past cases as well as current open cases that would merit such a request, the Department estimates that the Department would request 165 policies and procedures in the first year and 50 policies and procedures in subsequent years. The Department assumes that a clerical worker would prepare and send their complete policies and procedures to the Department and that it would take them 15 minutes. The Department requests comment on these assumptions. The Department estimates that the requirement would result an estimated cost of approximately \$2,600 in the first year⁴⁹⁶ and \$790 in subsequent years.⁴⁹⁷ The Department assumes financial institutions would send the documents electronically and thus would not incur costs for postage or materials.

This results in a total cost of \$2.6 million in the first year and \$1.5 million in subsequent years.⁴⁹⁸

⁴⁹⁵ As discussed in the Regulatory Flexibility Act analysis, the Department estimates that 960 entities, consisting of 10 robo-advisers, 930 pension consultants, and 20 investment company underwriters, are considered small entities. For more information, refer to the Affected Entities discussion in the Regulatory Flexibility Act section of this document.

⁴⁹⁶ The burden is estimated as: (165 $\times$ (15 minutes + 60 minutes)) = 41 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: (165 $\times$ (15 minutes + 60 minutes)) $\times$ \$63.45 = \$2,617.

⁴⁹⁷ The burden is estimated as: (50 $\times$ (15 minutes + 60 minutes)) = 12.5 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: (50 $\times$ (15 minutes + 60 minutes)) $\times$ \$63.45 = \$793.

⁴⁹⁸ The cost in the first year is estimated as: (\$2,635,404 + \$2,617) = \$2,638,021. The cost in

Summary of Total Cost for the Proposed Amendments to PTE 2020–02

The Department estimates that in order to meet the additional conditions of the amended PTE 2020–02, affected entities would incur a total cost of \$231.6 million and a per-firm cost of \$12,002 in the first year and a total cost of \$197.3 million and a per-firm cost of \$10,227 in subsequent years.⁴⁹⁹

Costs Associated With PTE 84–24

Currently, PTE 84–24 provides an exemption for insurance agents, insurance brokers, and pension consultants to receive a sales commission from an insurance company for the purchase of an insurance or annuity contract with plan or IRA assets. Relief is also provided for a principal underwriter for an investment company registered under the Investment Company Act of 1940 to receive a sales commission for the purchase of securities issued by the investment company with plan or IRA assets.

The Department is proposing an amendment to PTE 84–24 that would exclude many investment advice fiduciaries from the existing relief. Except for independent producers, fiduciary advisers would be expected to rely on the relief provided by PTE 2020–02, rather than PTE 84–24. The proposed amendment would provide exemptive relief to fiduciaries who are independent producers that recommend annuities from an unaffiliated financial institution to retirement investors. Relief for independent producers depends on protective conditions that substantially mirror those contained in PTE 2020–02. The conditions are tailored to protect retirement investors from the specific conflicts that arise for independent producers who are compensated through commissions when providing investment advice to retirement investors regarding the purchase of an annuity.

The Department recognizes that entities within the insurance industry are subject to different regulatory regimes, depending on the types of products they offer. The Department does not have data what proportion of

subsequent years is estimated as: (\$1,536,834 + \$793) = \$1,537,627.

⁴⁹⁹ The first-year total cost includes: (\$27,663,017 for rule review + \$6,422,616 for general disclosures + \$193,788,961 for rollover disclosures + 907,585 for the retrospective review + \$2,736,095 for policies and procedures) = \$231,518,275. The total cost in subsequent years includes: (\$1,047,936 for general disclosures + \$193,788,961 for rollover disclosures + 907,585 for the retrospective review + \$1,537,627 for policies and procedures) = \$197,282,110. Note, the total values may not equal the sum of the parts due to rounding.

entities are subject to the requirements in the NAIC Model regulation, SEC, or state insurance departments. The analysis below considers the full cost of compliance. This likely is an overestimate, as many of these entities are already meeting some, if not most, of the requirements of this proposal. The Department requests comment on this assumption.

Summary of Affected Entities

The Department expects that 5,246 financial entities would be affected by the proposed amendments, consisting of 1,011 pension consultants, 10 investment company principal underwriters that service plans, 10 investment company principal underwriters that service IRAs, 4,000 independent producers, and 215 insurance companies would be affected by the proposed amendments to PTE 84–24.⁵⁰⁰ Additionally, the Department estimates that 1,722 plans would be affected by the proposed amendments.⁵⁰¹

Costs to Rule Review

The Department estimates that the financial entities—including pension consultants, investment company principal underwriters, and insurance companies—currently relying on the exemption and independent producers affected by the proposed amendments would need to review the rule. The Department estimates that such a review will take a legal professional, on average, two hours to review the rule, resulting in an estimated cost of approximately \$1.7 million.⁵⁰²

Costs Associated With Disclosures for Investors

The proposed amendment would require independent producers to provide disclosures to retirement investors before engaging in a transaction covered by this exemption. Under the proposed amendments, independent producers seeking relief would be required to provide:

- a written fiduciary acknowledgement,
- a written statement of the Best Interest standard of care owed,
- a written description of the service provided by the independent producer

and the products they are licensed to sell,

- a written statement of the independent producer's material conflicts of interest and the amount of insurance commission paid in connection with the purchase by a retirement investor of the recommended annuity, and
- a written explanation of whether a rollover is in the retirement investor's best interest before engaging in a rollover or making a recommendation to a plan participant.

Costs Associated With Preparing General Disclosure Documents

For more generalized disclosures, the Department assumes that insurance companies would prepare and provide disclosures to independent producers selling their products. However, some of the disclosures are tailored specifically to the independent producer. For these, the Department assumes that the disclosure would need to be prepared by the independent producer themselves. The Department recognizes that some may rely on intermediaries in the distribution channel to prepare more specific disclosures and that the costs associated with the preparation would be covered by a commission retained by the intermediary for its services. The costs for the intermediary to prepare the disclosure may result in an increase in commission. The Department expects that this increase in commission would not exceed the cost of preparing the disclosure in house.

The Department is including model language in the preamble to PTE 84–24 that details what should be included in fiduciary acknowledgment for financial institutions. The Department assumes that the time associated with preparing the disclosures would be minimal. Further, these disclosures are expected to be uniform in nature. Accordingly, the Department estimates that these disclosures would not take a significant amount of time to prepare.

Due to the nature of independent producers, the Department assumes that most financial institutions would make draft disclosures available to independent producers, pertaining to their fiduciary status. However, the Department expects that a small percentage of independent producers may draft their own disclosures. The Department assumes that an in-house attorney for all 215 insurance companies and 5 percent of independent producers, or 200 independent producers, would spend 10 minutes of legal staff time to produce a written acknowledgement in the first year. This results in an estimated cost of

approximately \$11,000 in the first year.⁵⁰³

Regarding the required written statement of the Best Interest standard of care owed by the independent producer, the Department similarly assumes that most financial institutions would make draft disclosures available to independent producers. The Department assumes that an in-house attorney for all 215 insurance companies and 5 percent of independent producers, or 200 independent producers, would spend 30 minutes of legal staff time to prepare the statement in the first year. This results in an estimated cost of approximately \$33,100 in the first year.⁵⁰⁴

The written description of the services provided and the products the independent producer is licensed to sell would likely need to be produced by the independent producer. The Department recognizes that many independent producers may not have the internal resources to prepare such disclosure. The Department expects that some may rely on intermediaries in the distribution channel to prepare the disclosures and some may seek external legal support. However, the Department expects that the costs associated with the preparation would be covered by commissions retained by the intermediary for its services or by the fee paid to external legal support. As such, the Department still attributes this cost to the independent producer. The Department requests comment on this assumption.

Accordingly, the Department assumes that all 4,000 independent producers in this analysis would need to prepare the disclosure. The Department assumes that for each of these independent producers, an attorney would spend 30 minutes of legal staff time drafting the written description. This results in an estimated cost of approximately \$0.3 million in the first year.⁵⁰⁵

⁵⁰³ The burden is estimated as: (215 insurance companies + 200 independent producers) × (10 minutes + 60 minutes) = 69 hours. A labor rate of approximately \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(215 insurance companies + 200 independent producers) × (10 minutes + 60 minutes)] × \$159.34 = \$11,021.

⁵⁰⁴ The burden is estimated as: (215 insurance companies + 200 independent producers) × (30 minutes + 60 minutes) = 208 hours. A labor rate of approximately \$159.43 is used for a legal professional. The labor rate is applied in the following calculation: [(215 insurance companies + 200 independent producers) × (30 minutes + 60 minutes)] × \$159.34 = \$33,063.

⁵⁰⁵ The burden is estimated as: (4,000 independent producers × (30 minutes + 60 minutes)) = 2,000 hours. A labor rate of approximately \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (4,000 independent

⁵⁰⁰ For more information on how the number of each entity type is calculated, refer to the Affected Entities section.

⁵⁰¹ For more information on how the number of each type of entity is estimated, refer to the Affected Entities section.

⁵⁰² The burden is estimated as: (5,246 entities × 2 hours) = 10,492 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (5,246 entities × 2 hours) × \$159.34 = \$1,671,795.

Similarly, the Department expects that the statement of the independent producer's material conflicts of interest and the amount of insurance commission paid in connection with the purchase by a retirement investor of the recommended annuity would need to be prepared by the individual producer. As with the written statement on the description of services, the Department recognizes that many independent producers may not have the internal resources to prepare such disclosures, however they may already have similar statements to satisfy other legal requirements. The Department expects that some may rely on intermediaries in the distribution channel to prepare the disclosures and some may seek external legal support. However, the Department expects that the costs associated with the preparation would be covered by commissions retained by the intermediary for its services or by the fee paid to external legal support. As such, the Department still attributes this cost to the independent producer. The Department requests comment on this assumption.

Accordingly, the Department assumes that all 4,000 independent producers in this analysis would need to prepare the disclosure. The Department assumes that, for each of these entities, an attorney would spend one hour of legal staff time drafting the written description. This results in an estimated cost of approximately \$0.6 million the first year.⁵⁰⁶

Costs Associated With Documenting Whether a Rollover Is in the Investor's Best Interest, Before Recommending an Annuity, Engaging in a Rollover, or Making a Recommendation to a Plan Participant as to the Post-Rollover Investment of Assets Currently Held in a Plan

In addition, the proposed amendment would require an independent producer to provide a disclosure to investors that documents their consideration as to whether a recommended annuity or rollover is in the retirement investor's best interest. Due to the nature of this disclosure, the Department assumes that the content of the disclosure would need to be prepared by the independent producer. The Department recognizes that some may rely on intermediaries in the distribution channel, and some may

producers $\times$ (30 minutes + 60 minutes)) $\times$ \$159.34 = \$318,680.

⁵⁰⁶ The burden is estimated as: (4,000 independent producers $\times$ 1 hour) = 4,000 hours. A labor rate of approximately \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (4,000 independent producers $\times$ 1 hour) $\times$ \$159.34 = \$637,360.

seek external legal support to assist with drafting the disclosures. However, the Department expects that most independent producers would prepare the disclosure themselves. The Department requests comment on this assumption.

The Department estimates that 52,449 retirement investors would receive documentation on whether the recommended annuity is in their best interest each year.⁵⁰⁷ The Department assumes that, for each of these retirement investors, an independent producer would spend one hour of a financial manager's time drafting the documentation. This results in an estimated cost of approximately \$8.3 million annually.⁵⁰⁸

Costs Associated With the Provision of Disclosures to Retirement Investors

The Department does not have data on the number of retirement investors that have relationships with independent producers that would engage in transactions covered under the exemption. For the purposes of this analysis, the Department uses its estimate for the number of new IRA accounts held by insurance companies as a proxy for the number of retirement investors that have relationships with independent producers that would engage in transactions covered under the exemption. As such, the Department estimates that 52,449 retirement investors would receive documentation on whether the recommended annuity is in their best interest each year.⁵⁰⁹

As discussed at the beginning of the cost section, the Department assumes that 5.8 percent of disclosures sent to retirement investors would be mailed. Accordingly, of the estimated 52,449 affected retirement investors, 3,042 retirement investors are estimated to receive paper disclosures.⁵¹⁰ For paper copies, a clerical staff member is assumed to require five minutes to prepare and mail the required information to the retirement investor. This requirement results in an estimated

⁵⁰⁷ For information on this estimate, refer to the estimate of IRAs affected by the proposed amendments to PTE 84–24 in the Affected Entities section.

⁵⁰⁸ The burden is estimated as: (52,449 rollovers $\times$ 1 hour) = 52,449 hours. A labor rate of approximately \$158.94 is used for an independent producer. The labor rate is applied in the following calculation: (52,449 rollovers $\times$ 1 hour) $\times$ \$158.94 = \$8,336,244.

⁵⁰⁹ For information on this estimate, refer to the estimate of IRAs affected by the proposed amendments to PTE 84–24 in the Affected Entities section.

⁵¹⁰ This is estimated as: (52,449 retirement investors $\times$ 5.8%) = 3,042 paper disclosures.

labor cost of approximately \$16,100.⁵¹¹ The Department assumes that this information would include seven pages, resulting annual cost burden for material and paper costs of approximately \$3,100.⁵¹²

Additionally, independent producers would be required to send the documentation to the insurance company. The Department expects that such documentation would be sent electronically and result in a de minimis burden. The Department requests comment on this assumption.

Summary Costs Associated With Disclosures

The estimates described above result in a total cost estimate of \$9.4 million in the first year and \$8.4 million in subsequent years.⁵¹³

Costs Associated With Policies and Procedures

The proposed amendment would require insurance companies to establish, maintain, and enforce written policies and procedures to review each recommendation from an independent producer before an annuity is issued to a retirement investor. The insurance company's policies and procedures must mitigate conflicts of interest to the extent that a reasonable person reviewing the policies and procedures and incentive practices as a whole would conclude that they do not create an incentive for the independent producer to place its interests, or those of the insurance, or any affiliate or related entity, ahead of the interests of the retirement investor. Insurance companies' policies and procedures include a prudent process for determining whether to authorize an independent producer to sell the insurance company's annuity contracts to retirement investors, and for taking

⁵¹¹ This is estimated as: (3,042 paper disclosures $\times$ (5 minutes + 60 minutes)) = 253.5 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: (3,042 paper disclosures $\times$ (5 minutes + 60 minutes)) $\times$ \$63.45 = \$16,085.

⁵¹² This is estimated as: 3,042 rollovers resulting in a paper disclosure $\times$ [\$0.66 postage + (\$0.05 per page $\times$ 7 pages)] = \$3,072.

⁵¹³ The cost in the first year is estimated as: (\$11,021 for the disclosure confirming fiduciary status + \$33,063 for the written statement of the Best Interest standard of care + \$318,680 for the written description of services provided + \$637,360 for the statement on material conflicts of interest and commissions paid + \$8,336,244 for the rollover disclosure + \$16,085 to prepare and send disclosures + \$3,072 for material and postage costs) = \$9,355,525. The cost in subsequent years is estimated as: (\$8,336,244 for the rollover disclosure + \$16,085 to prepare and send disclosures + \$3,072 for material and postage costs) = \$8,355,401. Note, the total values may not equal the sum of the parts due to rounding.

action to protect retirement investors from independent producers who have failed or are likely to fail to adhere to the impartial conduct standards, or who lack the necessary education, training, or skill. Finally, insurance companies must provide their complete policies and procedures to the Department within 10 days upon request.

These requirements are consistent with, though more protective than, the requirements in NAIC Model Regulation 275. Model Regulation 275 has been updated and revised several times; however, both the 2010 Model Regulation 275⁵¹⁴ and the 2020 revisions to Model Regulation 275⁵¹⁵ include a requirement to “establish and maintain procedures for the review of each recommendation prior to issuance of an annuity.”⁵¹⁶ While the 2010 version required such procedures “are designed to ensure that there is a reasonable basis to determine that a recommendation is suitable,”⁵¹⁷ the 2020 version requires such procedures are “are designed to ensure there is a reasonable basis to determine that the recommended annuity would effectively address the particular consumer’s financial situation, insurance needs and financial objectives.”⁵¹⁸ The 2020 revisions impose a higher best interest standard, compared to the suitability standard in 2010 standard.

Most states have adopted some form of the Model Regulation 275, and, to date, 39 states have adopted the most recent version.⁵¹⁹ The Harkin amendment, Section 989J of the Dodd-Frank Act requires states to adopt rules

that meet or exceed the minimum requirements of model regulation modifications within five years of adoption.⁵²⁰

While many insurance companies may have policies and procedures in place that would largely satisfy the requirements of the proposed amendments, the Department expects that many would need to change and improve policies and procedures to be fully compliant. The Department requests comment on how extensive and costly changes to existing policies and procedures would need to be, both in terms of establishing and updating policies and procedures and in terms of the annual review in subsequent years.

The Department expects that satisfying this requirement would be more time consuming for larger entities due to the complexity of their business. The Department assumes that, for each large insurance company, an in-house attorney would spend on average, 10 hours of legal staff time drafting or modifying the policies and procedures, and for each small insurance company, an in-house attorney would spend on average, five hours of legal staff time. This results in an estimated cost of approximately \$0.2 million in the first year.⁵²¹ The Department requests comment on this assumption.

In the following years, the Department assumes for each insurance company, an in-house attorney would spend two hours of legal staff time reviewing. This results in an estimated cost of approximately \$68,500 in subsequent years.⁵²²

The proposed rule would also require insurance companies to review each of the independent producer’s recommendations before an annuity is issued to a retirement investor to ensure compliance with the Impartial Conduct Standards and other conditions of this exemption. Given the requirements established in both the 2010 and 2020 versions of Model Regulation 275, the Department expects that reviewing recommendations before an annuity is

issued is common industry practice. Accordingly, the Department expects that for those insurance companies already complying with Model Regulation 275, the cost to review and comply with the proposed amendment would be small. The Department lacks data on how many recommendations are already reviewed or how many additional recommendations would need to be reviewed based on this proposal. The Department requests data and comment to inform its estimate.

The proposed amendments would also require insurance companies to provide their complete policies and procedures to the Department upon request. As discussed above for PTE 2020–02, the Department estimates that it would request 165 policies and procedures in the first year and 50 in subsequent years. Assuming that the number of requests for the entities covered under PTE 2020–02 is equivalent to the number of requests for the entities covered under PTE 84–24, the Department assumes that it will request two policies and procedures from insurers in the first year and one request in subsequent years, on average.⁵²³ This results in an estimated cost of approximately \$30 in the first year⁵²⁴ and \$15 in subsequent years.⁵²⁵

The Department believes that policies and procedures requested by the Department under the proposed PTE 84–24 would be accounted for in the paperwork burden of PTE 2020–02. Accordingly, this analysis does not include an additional burden.

The Department estimates that satisfying the requirements described above would result in an estimated total cost of approximately \$0.2 million in first year and \$68,500 in subsequent years.⁵²⁶

⁵¹⁴ NAIC, *Model Suitability Regulations*, § 6(F)(1)(d) NAIC (2010), <https://naic.soutrnglobal.net/Portal/Public/en-GB/RecordView/Index/25201>.

⁵¹⁸ NAIC, *Model Suitability Regulations*, § 6(F)(1)(d) NAIC (2020), <https://content.naic.org/sites/default/files/inline-files/MDL-275.pdf>.

⁵¹⁹ Based on internal Department analysis, the modified Model Regulation #275, including a best interest standard, was adopted by Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Montana, Nebraska, New Mexico, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.

⁵²⁰ NAIC, *Suitability in Annuity Transactions Model Regulation* (#275) Best Interest Standard of Conduct Revisions Frequently Asked Question, (May 2021).

⁵²¹ This is estimated as: (177 small insurance companies × 5 hours) + (38 large insurance companies × 10 hours) = 1,265 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(177 small insurance companies × 5 hours) + (38 large insurance companies × 10 hours)] × \$159.34 = \$201,565.

⁵²² This is estimated as: (215 insurance companies × 2 hours) = 430 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (215 insurance companies × 2 hours) × \$159.34 = \$68,516.

⁵²³ The number of requests in the first year is estimated as 215 insurance companies × (165 requests in PTE 2020–02/19,290 financial institutions in PTE 2020–02) = 2 requests. The number of requests in subsequent years is estimated as: 215 insurance companies × (50 requests in PTE 2020–02/19,290 financial institutions in PTE 2020–02) = 1 request.

⁵²⁴ The burden is estimated as: (2 × (15 minutes + 60 minutes)) = 0.5 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: (2 × (15 minutes + 60 minutes)) × \$63.45 = \$32.

⁵²⁵ The burden is estimated as: (1 × (15 minutes + 60 minutes)) = 0.25 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: (1 × (15 minutes + 60 minutes)) × \$63.45 = \$16.

⁵²⁶ The cost in the first year is estimated as: (\$201,565 to develop policies and procedures + \$32 to provide policies and procedures upon request) = \$201,597. The cost in subsequent years is estimated as: (\$68,516 to review policies and procedures + \$16 to provide policies and procedures upon request) = \$68,532. Note, the total values may not equal the sum of the parts due to rounding.

Costs Associated With Retrospective Review

The proposed amendment would require insurance companies to conduct a retrospective review at least annually. The review would be required to be reasonably designed to prevent violations of and achieve compliance with (1) the Impartial Conduct Standards, (2) the terms of this exemption, and (3) the policies and procedures governing compliance with the exemption. The review would be required to evaluate the effectiveness of the supervision system, any noncompliance discovered in connection with the review, and corrective actions taken or recommended, if any. The retrospective review must also include a review of independent producers' rollover recommendations and the required rollover disclosure. As part of this review, the insurance company must prudently determine whether to continue to permit individual independent producers to sell the insurance company's annuity contracts to retirement investors. Additionally, the insurance company must update the policies and procedures as business, regulatory, and legislative changes and events dictate, and to ensure they remain prudently designed, effective, and comply with the exemption.

The insurance company annually must provide a written report to a Senior Executive Officer which details the review. The Senior Executive must annually certify that (A) the officer has reviewed the report of the retrospective review report; (B) the insurance company has, within 90 days of discovery, reported to the Department of the Treasury any non-exempt prohibited transaction discovered by the insurance company in connection with investment advice covered under Code section 4975(e)(3)(B), advised the independent producer of the violation and any resulting excise taxes owed under Code section 4975, and notified the Department of Labor of the violation via email; (C) the insurance company has established policies and procedures prudently designed to ensure that independent producers achieve compliance with the conditions of this exemption, and has updated and modified the policies and procedures as appropriate after consideration of the findings in the retrospective review report; and (D) the insurance company has in place a prudent process to modify such policies and procedures.

Insurers would also be required to provide the independent producer with the underlying methodology and results

of the retrospective review. The Department assumes that the insurance company would provide the methodology and results electronically.

The Department lacks data on the average number of independent producers selling annuities per insurance company. For the purposes of this analysis, the Department assumes that, on average, each independent producer sells the products of three insurance companies. From each of these insurance companies, they may sell multiple products. As such, the Department assumes that each year, insurance companies would need to prepare a total 12,000 retrospective reviews,⁵²⁷ or on average, each insurance company would need to prepare approximately 56 retrospective reviews.⁵²⁸ The Department requests comment on this estimate.

The Department assumes that, for each independent producer selling an insurance company's products, an in-house attorney at the insurance company would spend one hour of legal staff time, on average, conducting and drafting the retrospective review. This results in an estimated cost of approximately \$1.9 million.⁵²⁹

The Department assumes it would take a Senior Executive Officer 15 minutes to review and certify the report. This results in an estimated annual cost of approximately \$0.4 million.⁵³⁰

The Department assumes that the insurance company would provide the methodology and results electronically. The Department requests comment on this assumption. The Department estimates that it would take clerical staff five minutes each to prepare and send each of the estimated 12,000 retrospective reviews. This results in an estimated annual cost of approximately \$63,500.⁵³¹ The Department expects that the results would be provided

⁵²⁷ This is estimated as: (4,000 independent producers × 3 insurance companies covered) = 12,000 retrospective reviews.

⁵²⁸ This is estimated as: (12,000 retrospective reviews/215 insurance companies) = 55.8 retrospective reviews, on average.

⁵²⁹ This is estimated as: (12,000 retrospective reviews × 1 hour) = 12,000 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (12,000 retrospective reviews × 1 hour) × \$159.34 = \$1,912,080.

⁵³⁰ This is estimated as: (12,000 retrospective reviews × (15 minutes ÷ 60 minutes)) = 3,000 hours. A labor rate of \$128.11 is used for a senior executive officer. The labor rate is applied in the following calculation: (12,000 retrospective reviews × (15 minutes ÷ 60 minutes)) × \$128.11 = \$384,330.

⁵³¹ This is estimated as: (12,000 retrospective reviews × (5 minutes ÷ 60 minutes)) = 1,000 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: (12,000 retrospective reviews × (5 minutes ÷ 60 minutes)) × \$63.45 = \$63,450.

electronically, thus the Department does not expect there to be any material costs with providing independent producers with the retrospective review.

The Department estimates that satisfying the requirements for retrospective reviews would result in an estimated total annual cost of approximately \$2.4 million.⁵³²

Costs Associated With Recordkeeping

The proposed amendment would change the current recordkeeping requirements to incorporate a new provision that is similar to the recordkeeping provision in PTE 2020–02. This requirement would replace the more limited existing recordkeeping requirement in the current version of PTE 84–24, which requires sufficient records to demonstrate that the conditions of the exemption have been met. The Department does not have data on how many pension consultants, insurance companies, and investment company principal underwriters would continue to rely on PTE 84–24 as amended without also complying with the amended PTE 2020–02. In this analysis, the Department assumes that all of the pension consultants and investment company principal underwriters continuing to rely on the amended PTE 84–24 would also rely on the amended on the PTE 2020–02. Thus, to avoid double counting the compliance cost, this analysis does not include the cost associated with the proposed recordkeeping requirement for these entities.

For this analysis, the Department only considers the cost for insurance companies and independent producers complying with the proposed recordkeeping requirements. The Department estimates that the additional time needed to maintain records to be consistent with the exemption would require an independent producer two hours, resulting in an estimated cost of \$1.3 million.⁵³³

The proposed amendment would require fiduciaries engaging in all transactions covered by the exemption to maintain records necessary for the

⁵³² The annual cost is estimated as: (\$1,912,080 to conduct the retrospective review + \$384,330 for the review of the retrospective review + \$63,450 for the provision of the report to Independent Producers) = \$2,359,860.

⁵³³ This is estimated as: (4,000 independent producers + 215 insurance companies) × 2 hours = 8,430 hours. A labor rate of \$158.94 is used for an independent producer and \$159.34 for a legal professional at an insurance company. The labor rate is applied in the following calculation: (4,000 independent producers × 2 hours × \$159.34) + (215 insurance companies × 2 hours × \$158.94) = \$1,340,036.

following entities to determine whether the conditions of this exemption have been met.

(1) any authorized employee of the Department or the IRS or another state or federal regulator,

(2) any fiduciary of a plan that engaged in a transaction pursuant to this exemption,

(3) any contributing employer and any employee organization whose members are covered by a plan that engaged in a transaction pursuant to this exemption, or

(4) any participant or beneficiary of a plan or beneficial owner of an IRA acting on behalf of the IRA that engaged in a transaction pursuant to this exemption.

The Department does not have data on how often independent producers would receive requests for records. For the purposes of this analysis, the Department assumes that, on average, independent producer would receive 10 requests per year and that preparing and sending each request would take a legal professional, on average, 30 minutes. Based on these assumptions, the Department estimates that the proposed amendments would result in an annual cost of approximately \$3.2 million.⁵³⁴ The Department requests comment on how often financial institutions would receive requests for records, who would prepare such reports, and how long the preparation of such records would take.

This results in a total annual cost of \$4.5 million associated with recordkeeping.⁵³⁵

Summary of Total Cost for the Proposed Amendments to PTE 84–24

The Department estimates that in order to meet the additional conditions of the amended PTE 84–24, affected entities would incur a total cost of \$18.1 million in the first year and \$15.3 million in subsequent years.⁵³⁶

⁵³⁴ The burden is estimated as: (4,000 independent producers × 10 requests) × (30 minutes + 60 minutes) = 20,000 hours. A labor rate of \$158.94 is used for an independent producer. The labor rate is applied in the following calculation: [(4,000 independent producers × 10 requests) × (30 minutes + 60 minutes)] × \$158.94 = \$3,178,800.

⁵³⁵ The annual cost is estimated as: (\$1,340,036 to maintain records + \$3,178,800 to distribute records) = \$4,518,836.

⁵³⁶ The first-year total cost includes: (\$1,671,795 for rule review + \$9,355,525 for general disclosures + \$201,597 for policies and procedures + \$2,359,860 for the retrospective review + \$4,518,836 for recordkeeping) = \$18,107,613. The total cost in subsequent years includes: (\$8,355,401 for disclosures + \$68,532 for policies and procedures + \$2,359,860 for the retrospective review + \$4,518,836 for recordkeeping) = \$15,302,629. Note, the total values may not equal the sum of the parts due to rounding.

Costs Associated With the Mass Amendments

The following analysis summarizes the proposed changes and associated costs to PTE 75–1, PTE 77–4, PTE 1980–3, and 86–128. For more information on the cost estimates, refer to the Paperwork Reduction Act statements for the proposed amendments, published elsewhere in today's edition of the **Federal Register**.

Costs Associated With PTE 75–1 Summary of Affected Entities

The amendment to PTE 75–1 would affect banks, reporting dealers, and broker-dealers registered under the Security Exchange Act of 1934. As discussed in the Affected Entities section above, the Department estimates that 1,894 broker-dealers and 2,048 banks would use PTE 75–1.⁵³⁷

Costs Associated With Disclosure Requirements in Part V

The Department proposes to amend PTE 75–1 Part V to allow an investment advice fiduciary to receive reasonable compensation for extending credit to a plan or IRA to avoid a failed purchase or sale of securities involving the plan or IRA if (1) the potential failure of the purchase or sale of the securities is not caused by such fiduciary or an affiliate, and (2) the terms of the extension of credit are at least as favorable to the plan or IRA as the terms available in an arm's length transaction between unaffiliated parties. Prior to the extension of credit, the plan or IRA receives written disclosure, including the interest rate or other fees that will be charged on the credit extension as well as the method of determining the balance upon which interest will be charged. The Department believes that it is a usual and customary business practice to maintain records required to demonstrate compliance with SEC-mandated disclosure distribution regulations. The Department believes that this new requirement is consistent with the disclosure requirement mandated by the SEC in 17 CFR 240.10b-16(1) for margin transactions.⁵³⁸ Therefore, the Department concludes that this

⁵³⁷ For more information on how the number of each type of entity is estimated, refer to the Affected Entities section.

⁵³⁸ Employee Benefits Security Administration, *Regulating Advice Markets Definition of the Term "Fiduciary" Conflicts of Interest—Retirement Investment Advice Regulatory Impact Analysis for Final Rule and Exemptions*, pp. 258, (April 2016), <https://www.dol.gov/sites/dolgov/files/EBSA/laws-and-regulations/rules-and-regulations/completed-rulemaking/1210-AB32-2/ria.pdf>.

requirement produces no additional burden to the public.

Costs Associated With Recordkeeping in Parts II and V

The Department is also amending PTE 75–1 Parts II and V to adjust the recordkeeping requirement to shift the burden from plans and IRAs to financial institutions. The amended class exemption requires financial institutions engaging in the exempted transactions (rather than the plans or IRAs) to maintain all records pertaining to such transactions for six years and provide access to the records upon request to the specified parties.

The Department has estimated that the amount of time needed for financial professional to maintain records for the financial institutions to be consistent with the exemption and to make the record available for inspection would require four hours, on average, resulting in an estimated cost of \$3.0 million.⁵³⁹

Costs Associated With Removing Fiduciary Investment Advice From Parts III and IV

Finally, the Department is proposing to amend PTE 75–1 Parts III and IV, which currently provide relief for investment advice fiduciaries, by removing fiduciary investment advice from the covered transactions. Investment advice providers would instead have to rely on the amended PTE 2020–02 for exemptive relief covering investment advice transactions. The Department believes that since investment advice providers were already required to provide records and documentation under PTE 2020–02, this amendment would not result in additional costs.

Summary of Total Cost for the Proposed Amendments to PTE 75–1

The Department estimates that in order to meet the additional conditions of the amended PTE 75–1, affected entities would annually incur a total cost of \$3.0 million.⁵⁴⁰

Costs Associated With PTE 77–4, PTE 80–83, PTE 83–1

Summary of Affected Entities

The amendment to PTE 77–4 would affect mutual fund companies. As discussed in the Affected Entities section, the Department estimates that

⁵³⁹ The burden is estimated as: (3,942 financial institutions × 4 hours) = 15,768 hours. A labor rate of \$190.63 is used for a financial manager. The labor rate is applied in the following calculation: (3,942 × 4 hours) × \$190.63 = \$3,005,854.

⁵⁴⁰ This cost is the estimated \$3,005,854 cost to maintain recordkeeping.

825 mutual fund companies would be affected by the amended PTE 77–4.⁵⁴¹

PTE 80–83 allows banks to purchase, on behalf of employee benefit plans, securities issued by a corporation indebted to the bank that is a party in interest to the plan. The Department estimates that 25 fiduciary-banks with public offering services would be affected by the amended PTE 80–83.⁵⁴²

PTE 83–1 provides relief for the sale of certificates in an initial issuance of certificates by the sponsor of a mortgage pool to a plan or IRA when the sponsor, trustee, or insurer of the mortgage pool is a fiduciary with respect to the plan or IRA assets invested in such certificates.

Summary of Total Cost for the Proposed Amendments to PTE 77–4, PTE 80–83, and PTE 83–1

The Department is proposing to amend PTE 77–4, PTE 80–83, and PTE 83–1 which currently include relief for investment advice fiduciaries, by removing fiduciary investment advice from the covered transactions. Investment advice providers would instead have to rely on the amended PTE 2020–02 for exemptive relief covering investment advice transactions. The Department believes that since investment advice providers were already required to provide documentation under PTE 2020–02, these amendments would not result in additional costs.

Costs Associated With PTE 86–128

The Department is proposing to amend Section VI of PTE 86–128 to require financial institutions to maintain for six years the records necessary for the Department, the IRS, the plan fiduciary, the contributing employer, or employee organization whose members are covered by the plan, plan participants, plan beneficiaries, and IRA owners to determine whether conditions of this exemption have been met.

In addition, the amendment would extend and impose conditions on IRAs. Section III of PTE 86–128 imposes requirements on investment advice providers and the independent plan fiduciaries authorizing the IRA to engage in the transactions with the investment advice providers (“authorizing fiduciary”) under the conditions contained in the exemption.

⁵⁴¹ For more information on how the number of each type of entity is estimated, refer to the Affected Entities section.

⁵⁴² For more information on how the number of each type of entity is estimated, refer to the Affected Entities section.

Summary of Affected Entities

The amendment to PTE 86–128 would affect fiduciaries of employee benefit plans that effect or execute securities transactions and independent plan fiduciaries that authorize the plan or IRA to engage in the transactions. As discussed in the Affected Entities section, the Department estimates that 1,894 investment advice providers would be affected by the proposed amendments to PTE 86–128.

Additionally, the Department estimates that 10,000 IRAs will engage in transactions covered under this class exemption, of which 210 are new IRAs.⁵⁴³

With the removal of exemptive relief for investment advice, the Department requests comment on what types of financial institutions would continue to rely on PTE 86–128, as well as how many entities would do so. Additionally, the Department requests comment on how many plans or managed IRAs would receive services from these entities.

Costs Associated With Recordkeeping

Each of the estimated 1,894 investment advice providers will maintain these records on behalf of their client plans in their normal course of business. The Department estimates that the additional time needed to maintain records consistent with the exemption would require a financial professional 30 minutes annually, resulting in an estimated cost of \$0.2 million.⁵⁴⁴ The Department estimates that the proposed amendments would also require 15 minutes of clerical time to prepare and send the documents for inspection, resulting estimated cost of approximately \$30,000.⁵⁴⁵

Costs Associated With Written Authorization From the Authorizing Fiduciary to the Investment Advice Provider

Authorizing fiduciaries of IRAs entering into a relationship with an investment advice provider are required to provide the investment advice

⁵⁴³ For more information on how the number of each type of entity is estimated, refer to the Affected Entities section.

⁵⁴⁴ The burden is estimated as: (1,894 investment advice providers × (30 minutes + 60 minutes)) = 947 hours. A labor rate of \$190.63 is used for a financial manager. The labor rate is applied in the following calculation: (1,894 investment advice providers × (30 minutes + 60 minutes)) × \$190.63 per hour = \$180,527.

⁵⁴⁵ The burden is estimated as: (1,894 investment advice providers × (15 minutes + 60 minutes)) = 474 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: (1,894 investment advice providers × (15 minutes + 60 minutes)) × \$63.45 per hour = \$30,044.

provider with advance written authorization to perform transactions for the IRA. The Department estimates that there are approximately 210 IRAs that are new or that enter new arrangements each year.⁵⁴⁶ Therefore, the Department estimates that approximately 210 authorizing fiduciaries are expected to send an advance written authorization. It is assumed that a legal professional will spend 15 minutes per IRA reviewing the disclosures and preparing an authorization form, resulting in an estimated cost of approximately \$8,400.⁵⁴⁷

As discussed at the beginning of the cost section, the Department assumes that 5.8 percent of these authorizations will be mailed. For paper and electronic authorizations, the Department assumes that clerical staff will spend five minutes per participant to prepare and send the authorization, resulting in an estimated labor cost of approximately \$1,100.⁵⁴⁸ It is assumed that the authorization will be two pages and paper authorizations will cost \$0.76 each, which results in a cost burden of approximately \$9.⁵⁴⁹

This results in a total cost for the written authorization of approximately \$9,500.⁵⁵⁰

Cost Associated With the Provision of Materials for the Evaluation of Authorization of Transaction

Prior to a written authorization, the investment advice provider must provide the authorizing fiduciary with a copy of the exemption, a form for termination of authorization, a description of broker’s placement

⁵⁴⁶ The Department estimates that there are 10,000 managed IRAs. Of these managed IRAs, the Department assumes that 2.1 percent are new accounts or new financial advice relationships. See Cerulli Associates, “U.S. Retirement End-Investor 2023: Personalizing the 401(k) Investor Experience,” Exhibit 6.02. The Cerulli Report., and that 100 percent of these managed IRAs will engage in transactions covered under this class exemption. These assumptions are applied in the following manner: 10,000 managed IRAs × 2.1 percent of plans are new × 100 percent of plans with broker-dealer relationships = 210 IRAs.

⁵⁴⁷ The burden is estimated as: (210 IRAs × (15 minutes + 60 minutes) per IRA) = 52.5 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (210 IRA × (15 minutes + 60 minutes)) per IRA × \$159.34 per hour = \$8,365.

⁵⁴⁸ The burden is estimated as: (210 IRA × (5 minutes + 60 minutes) per IRA) = 17.5 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: (210 IRA × (5 minutes + 60 minutes) per IRA) × \$63.45 = \$1,110.

⁵⁴⁹ The burden is estimated as: (2 pages × \$0.05 per page) + \$0.66 for postage = \$0.76; The mailing rate is applied in the following calculation: (210 authorizations for IRAs × 5.8%) × \$0.76 = \$9.

⁵⁵⁰ This is estimated as: (\$8,365 to prepare the written authorization + \$1,110 to send the written authorization + \$9 for material costs) = \$9,485.

practices, and any other reasonably available information. The Department assumes that this information is readily available. As discussed at the beginning of the cost section, the Department assumes that 5.8 percent of these authorizations will be mailed, while the remaining 94.2 percent will be delivered electronically. A clerical staff member is assumed to require five minutes per participant to electronically send and mail the required information to the authorizing fiduciary. This information will be sent to the authorizing fiduciaries of 210 IRAs entering into an agreement with an investment advice provider. Based on the above, the Department estimates that this requirement results in estimated cost of approximately \$1,100.⁵⁵¹ It is assumed that this information will be seven pages and paper distribution will cost \$1.01 each, which results in an estimated cost of approximately \$12.⁵⁵²

This results in a total cost of approximately \$1,100.⁵⁵³

Costs Associated With the Provision of an Annual Termination Form

Investment advice providers must annually supply each authorizing fiduciary with a form expressly providing an election to terminate the written authorization. It is assumed that legal professionals with each of the estimated 1,894 investment advice providers would spend one hour preparing the termination forms, which results in an estimated cost of approximately \$0.3 million.⁵⁵⁴

As discussed in the Affected Entities section, the Department estimates that 10,000 IRAs will engage in transactions covered under this class exemption and would receive the form.⁵⁵⁵ As discussed at the beginning of the cost section, the Department assumes that 5.8 percent of IRAs will receive paper copies of the termination forms. The Department

estimates that clerical staff will spend five minutes per IRA preparing and distributing the paper and electronic termination forms, resulting in an estimated cost of approximately \$52,900.⁵⁵⁶ It is assumed that the form will be two pages, so paper copies will cost \$0.76 each for materials and postage, which results in a cost burden of approximately \$441.⁵⁵⁷

This results in a total cost of 0.4 million.⁵⁵⁸

Cost Associated With Transaction Reporting

The investment advice provider engaging in a covered transaction must give the authorizing fiduciary either a confirmation slip for each securities transaction or a quarterly report. As discussed above, the provision of the confirmation is already required under SEC regulations. Therefore, if the transaction reporting requirement is satisfied by sending confirmation slips or quarterly reporting, no additional hour and cost burden will occur.

Costs Associated With the Annual Statement

Investment advice providers are required to send to each authorizing fiduciary an annual report that contains the same information as the quarterly report, including all security transaction-related charges, the brokerage placement practices, and a portfolio turnover ratio. As such, the Department does not expect that financial institutions would incur an additional burden to produce the annual statement, aside from what is already incurred to produce the quarterly report. Additionally, the Department assumes that this information could be sent with the annual termination form. Therefore, the clerical staff hours required to prepare and distribute the report, as well as postage costs, have been included with the provision of annual termination form requirement, and no additional burden has been reported. It is assumed that the annual statement will be five pages, and the paper and print costs are \$0.25 each. Therefore, the

overall cost burden for the paper and print costs are approximately \$145.⁵⁵⁹

Costs Associated With the Report of Commissions Paid

A discretionary trustee must provide an authorizing fiduciary with an annual report that separately shows the commissions paid to affiliated brokers and non-affiliated brokers on both a total dollar basis and a cents-per-share basis. The clerical hour burden to prepare and distribute the report is included with the provision of annual termination form requirement, because both items are required to be sent annually. However, the collecting and generating information for the report of commissions paid is reported as a cost burden.

An investment advice provider that is a discretionary trustee must provide each of the 10,000 authorizing fiduciaries with this annual commissions report.⁵⁶⁰ As discussed at the beginning of the cost section, the Department assumes that 5.8 percent of investment advice providers will mail the annual reports. As the report is sent annually, it is assumed that it could be sent with the transaction report, therefore postage costs are not counted here. It is assumed that the report will be two pages, and the paper and print costs are \$0.10 each. Therefore, the overall cost burden of the paper and print costs is approximately \$58.⁵⁶¹

Investment advice providers are required to report the total of all transaction-related charges incurred by the plan in connection with covered transactions, the allocation of such charges among various persons, as well as a conspicuous statement about the negotiability of brokerage commissions and an estimate of future commission rates to the plan fiduciaries. The information must be tracked, assigned to specific plans, and reported. It is assumed that it costs the investment advice provider \$3.30 per IRA to track this information.⁵⁶² With approximately 10,000 affected IRAs, this results in a cost burden of approximately \$33,000 annually.⁵⁶³

⁵⁵¹ The burden is estimated as: (210 IRAs × (5 minutes + 60 minutes) per IRA) = 17.5 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: (210 IRAs × (5 minutes + 60 minutes) per IRA) × \$63.45 = \$1,110.

⁵⁵² The burden is estimated as: (7 pages × \$0.05 per page) + \$0.66 for postage = \$1.01; The mailing rate is applied in the following calculation: (210 materials packages for IRAs × 5.8%) × \$1.01 = \$12.

⁵⁵³ This is estimated as: (\$1,110 to prepare the information + \$12 for materials and postage) = \$1,123.

⁵⁵⁴ The burden is estimated as: (1,894 investment advice providers × 1 hour per broker-dealer) = 1,894 hours; A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (1,894 investment advice providers × 1 hour per broker-dealer) × \$159.34 per hour = \$301,790.

⁵⁵⁵ For more information on how the number of IRAs is estimated, refer to the Affected Entities section.

⁵⁵⁶ The burden is estimated as: (10,000 IRAs × (5 minutes + 60 minutes) per IRA) = 833 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: (10,000 IRAs × (5 minutes + 60 minutes) per IRA) × \$63.45 per hour = \$52,875.

⁵⁵⁷ The mailing cost is estimated as: (2 pages × \$0.05 per page) + \$0.66 for postage = \$0.76; The mailing rate is applied in the following calculation: (10,000 IRAs × 5.8%) × \$0.76 = \$441.

⁵⁵⁸ This cost is estimated as: (\$301,790 to prepare the termination form + \$52,875 to distribute the termination form + \$441 for material and postage costs) = \$355,106.

⁵⁵⁹ The mailing cost is estimated as: (5 pages × \$0.05 per page) = \$0.25. The mailing cost is applied in the following calculation: (10,000 IRAs × 5.8%) × \$0.25 = \$145.

⁵⁶⁰ For more information on how the number of IRAs is estimated, refer to the Affected Entities section.

⁵⁶¹ The mailing cost is estimated as: (2 pages × \$0.05 per page) = \$0.10. The mailing cost is applied in the following calculation: (10,000 IRAs × 5.8%) × \$0.10 = \$58.

⁵⁶² This estimate is based on information from a Request for Information and from industry sources.

⁵⁶³ This burden is estimated as: (10,000 IRAs × \$3.30) = \$33,000.

This results in a total cost of approximately \$33,100.⁵⁶⁴

Summary of Total Cost for the Proposed Amendments to PTE 86–128

The Department estimates that in order to meet the additional conditions of the amended PTE 86–128, affected entities would annually incur a total cost of \$0.6 million.⁵⁶⁵

9. Regulatory Alternatives

The Department considered various alternative approaches in developing this proposal. Those alternatives are discussed below.

Broader Rule

The Department considered proposing a definition of an investment advice fiduciary that would be broader in scope, similar to the 2016 Final Rule. In promulgating the 2016 Final Rule, the Department expanded the definition of a fiduciary beyond the five-part test included in the 1975 regulation. The 2016 Final Rule covered as fiduciary investment advice:

- recommendations by a person who represents or acknowledges their fiduciary status under the Act or the Code;
- advice rendered pursuant to a written or verbal agreement, arrangement or understanding that the advice is based on the particular investment needs of the retirement investor;
- recommendations directed to a specific retirement investor or investors regarding the advisability of a particular investment or management decision with respect to securities or other investment property of the plan or IRA; and
- recommendations to buy, sell or hold assets held in IRAs and non-ERISA plans.

In developing this proposal, the Department has crafted a more focused definition that would consider the scope issues identified by the Fifth Circuit while still protecting retirement investors. The Department was also cognizant of stated concerns of some stakeholders that the compliance costs associated with the broader 2016 Final

Rule would lead to adverse consequences such as increases in the cost of investment advice and potential loss of access by retirement investors with small account balances.

The current proposal bases investment advice fiduciary status on circumstances that indicate the retirement investor may place trust and confidence in the recommendation as a professional recommendation based upon the particular needs of the investor. The proposal reflects the Department's interpretation of the text of the statute, as informed by the Fifth Circuit's emphasis on relationships of trust and confidence. Accordingly, the proposed definition, unlike the 2016 Final Rule, does not automatically treat as fiduciary advice all compensated recommendations directed to a specific retirement investor regarding the advisability of a particular investment or management decision with respect to securities or other investment property of the plan or IRA. For example, an entity can satisfy the test under (c)(1)(ii) of this proposal, only if they satisfy each part, including the requirement that the retirement adviser provides investment advice on a regular basis as part of their business. This is more limiting than the 2016 Final Rule, and it ensures that individuals like human resource professionals discussing 401(k) investment options, and the car salesman who recommends a retiree cash in their 401(k) for a new convertible are not caught up in the definition. In publishing this proposal, the Department was mindful of concerns with respect to the 2016 Final Rule, specifically regarding access to investment advice for all retirement investors.

No Amendment to PTE 2020–02

The Department considered not amending PTE 2020–02 and leaving the exemption in its present form. The Department supports the existing PTE 2020–02 and has retained its core components in the amendment, including the Impartial Conduct Standards and the requirement for strong policies and procedures. These are fundamental investor protections that are necessary to ensure the financial institutions and investment professionals provide investment advice that is in the best interest of retirement investors. The retention of the core elements of PTE 2020–02 will also ensure that any work financial institutions have done to comply with PTE 2020–02 will prepare them to comply with the amended exemption.

However, the Department believes that additional protections are necessary

to ensure that fiduciary investment advice providers adhere to the stringent standards outlined in PTE 2020–02. Therefore, as discussed in detail earlier, the proposed amendments clarify and tighten the existing text of PTE 2020–02 to enhance the disclosure requirements. In order to more fully protect retirement investors, the Department is proposing additional disclosures to ensure that investors have sufficient information to make informed decisions about the costs of an investment advice transaction and about the significance and severity of the investment advice fiduciary's conflicts of interest.

In addition to the need for additional protections, upon reviewing the implementation of PTE 2020–02, the Department determined it is necessary to provide financial institutions and investment professionals with additional guidance on implementing the exemption's core elements. As a result, the proposed amendment would also provide more guidance on how to best comply with the Impartial Conduct Standards and implement the policies and procedures condition.

No Amendment to PTE 84–24

The Department is aware that insurance companies sometimes sell insurance products through independent agents that sell multiple insurance companies' products. In connection with this business structure, when the Department finalized PTE 2020–02, the Department explained that insurance companies could rely on either PTE 2020–02 or PTE 84–24. As a result, the Department considered the option of leaving PTE 84–24 unaltered.

Through outreach with financial institutions after issuing PTE 2020–20, the Department heard concerns from insurance companies that distribute annuities through independent agents and believed that they may not be able to effectively comply with PTE 2020–02. This is primarily due to the difficulty insurers confront when overseeing independent insurance producers who do not work for any one insurance company and are not obligated to recommend only one company's annuities. The Department understands that this compliance issue has been resolved by reliance on PTE 84–24.

However, the Department is concerned that PTE 84–24, if left in its current state, offers few of the protections provided by PTE 2020–02. Further, insurance companies' continued reliance on PTE 84–24 instead of PTE 2020–02 could prevent retirement investors from being able to fully compare varying products and services. In order to address these

⁵⁶⁴ This cost is estimated as: (\$58 for material and post costs + \$33,000 to track relevant information for mailing annual reports) = \$33,058.

⁵⁶⁵ The annual cost is estimated as: (\$180,527 for recordkeeping + \$30,044 for preparing and sending documents for inspection + \$9,485 for the written authorization + \$1,123 for the materials for the evaluation of authorization of transaction + \$355,106 for the annual termination form + \$145 for materials for the annual statement + \$33,058 for the report on commissions paid) = \$609,487. Note, the total may not equal the sum of components due to rounding.

concerns, the Department proposes to amend PTE 84–24 to provide an exemption to independent insurance producers to sell annuities or other insurance products. The proposed amendment addresses insurance industry concerns regarding the workability of PTE 2020–02’s conditions, while providing a tailored exemption for insurance companies and independent agents that ensures that fiduciary investment advice with respect to all products is delivered pursuant to the same core principles that protect retirement investors.

Including an Individual Contract Requirement

The Department also considered amending PTE 2020–02 to include an enforceable written contract between the financial institution and the retirement investor. While the predecessor to PTE 2020–02, the Best Interest Contract Exemption,⁵⁶⁶ required such an enforceable contract, PTE 2020–02 did not include a contract or warranty provision enforceable by IRA owners.

In crafting the proposed amendment, the Department reviewed the decision to not include an enforceable written contract in PTE 2020–02 but concluded that the better course of action was not to include such a requirement. Given that the Fifth Circuit found that the contractual requirement for IRAs exceeded the scope of the Department’s authority, a proposal attempting to reinstate that requirement would likely be invalidated in the Fifth Circuit, leading to uncertainty in the regulated community. Such uncertainty could lead to the potential for disruption in the market for investment advice, and in crafting an exemption that does not include an enforceable written contract, the Department intends to avoid this potential disruption.

Instead, the exemption includes many protective measures and targeted opportunities for the Department to review compliance within its existing oversight and enforcement authority under ERISA. For example, financial institutions’ reports regarding their retrospective review are required to be certified by a senior executive officer of the financial institution and provided to the Department within 10 business days of request. The exemption also includes eligibility provisions, which the Department believes will encourage financial institutions and investment professionals to maintain an appropriate focus on compliance with legal requirements and with the exemption.

The Department also intends to ensure that financial institutions relying on the exemption comply with excise tax provisions. The Department has proposed to bolster this protection by requiring financial institutions, as part of their retrospective review, to report to the Department of the Treasury any non-exempt prohibited transactions in connection with fiduciary investment advice, correct those transactions, and pay any resulting excise taxes. Further, the proposed amendment would add failure to report, correct, and pay an excise tax to the list of factors that could make a financial institution ineligible to rely on PTE 2020–02. The Department believes these additional conditions would provide important protections to retirement investors by enhancing the existing protections of PTE 2020–02.

Relying on Disclosure Alone

Some commenters responding to the 2015 NPRM⁵⁶⁷ argued that disclosure of potential adviser conflicts is, by itself, sufficiently protective of plan and IRA investors’ interests. According to these comments, if conflicts are transparent, then investors can choose between more and less conflicted advisers. The commenters advocated that the Department should issue broad PTEs that exempt all or almost all existing and potential adviser business models and compensation arrangements on the sole condition that material conflicts be disclosed. The Department does not believe that disclosure alone is adequately protective of retirement investors. The Department chose not to take that approach in the 2016 Final Rule and chooses not to take that approach with this proposal.

As discussed above in the “Need for Regulatory Action” section, most retirement investors are not financially sophisticated, and even those who are financially sophisticated are unlikely to detect lapses in the quality of financial advice. Due to the complexity of some disclosures as well as investors’ propensity to ignore lengthy disclosures, disclosures often fail to accomplish their goals. Retirement investors regularly fail to understand advisers’ conflicts, let alone the impacts that those conflicts could have on their investments. A large body of research discussed in the RIA for the 2016 Final Rule suggested that disclosures alone can have, at best, a minor impact on conflicts, and can sometimes exacerbate the conflicted behavior.⁵⁶⁸ Advisers may inflate the bias in their advice to counteract any discounting that might

occur because of the disclosure of conflicts.⁵⁶⁹ In addition, even when inexperienced retirement investors receive easy-to-understand disclosures alerting them to conflicts, there is no ready way for them to use that knowledge to improve investment outcomes, inasmuch as they are still dependent on the adviser’s recommendations and expertise.

Adding a Requirement for a Web Disclosure

The Department considered amending PTE 2020–02 and PTE 84–24 to require financial institutions to disclose the sources of third-party compensation received in connection with recommended investment products on a public web page. The Department believes such disclosures would allow market-based forces to extend protections to consumers by discouraging and eliminating the most conflicted compensation practices. Moreover, public disclosure of firms’ compensation arrangements with the third parties whose products they recommend would provide an additional focus on firm-level, as opposed to individual adviser-level, conflicts of interest.

Such public disclosure could produce market effects similar to public disclosures required by the SEC (e.g., public companies’ 10–K filings). Conflicted compensation practices are often complex, opaque, and shrouded from view. Requiring public disclosure of conflicted compensation practices would allow investment professionals, experts, and consultants, as well as academic researchers, to draw attention to the concerning aspects of the conflicts and even rate firms based on the scope of their conflicts. As noted by Landier and Thesmar (2011), data availability feeds research intensity.⁵⁷⁰ A wide range of literature suggest that when financial data are available to researchers, these researchers uncover problematic behaviors and draw attention to the behaviors, which has the effect of curbing the practices in the future.⁵⁷¹ Making compensation

⁵⁶⁸ See FR 20946, 20950–51 (Apr. 8, 2016).

information publicly available could allow intermediaries and consultants to package this information as part of their ratings and evaluations, likely improving investor information.

Further, a web disclosure of this nature may encourage financial institutions to stop engaging in conflicted behaviors due to litigation risk from unsatisfied clients, risk of complaints made to the Department that might result in enforcement actions, and the risk to their public reputations.

The Department estimates that, if such a disclosure were required, it would require eight hours of labor annually from a computer programmer, on average, resulting in an annual cost of approximately \$20.5 million for PTE 2020–02⁵⁷² And \$4.5 million for PTE 84–24.⁵⁷³ The Department welcomes comments on the accuracy of Department's estimates on the required time to maintain the disclosure, and how many financial institutions currently have the technology infrastructure to post a web disclosure. The Department is also interested in the benefits of such a disclosure, as well as in any data that commenters may have that estimate how frequently retirement investors may visit a web page that includes such disclosures, and the extent to which various consultants and financial intermediaries would likely use the website to assist retirement investors and others.

Allowing for More Parties To Review Records

For the proposed amendment to PTE 2020–02, the Department considered allowing more parties to review the records necessary to determine whether the exemption is satisfied, such as:

- any authorized employee of the Department or the Department of the Treasury,

- any fiduciary of a plan that engaged in a transaction pursuant to this exemption,

- any contributing employer, any employee organization whose members are covered by a plan that engaged in a transaction pursuant to this exemption, and

- any participant or beneficiary of a plan or beneficial owner of an IRA acting on behalf of the IRA that engaged in a transaction pursuant to this exemption.

The Department does not have data on how often financial institutions would receive such requests. For the purposes of this analysis, the Department assumes that, on average, financial institutions would receive 10 requests per year and that preparing and sending each request would take a legal professional, on average, 30 minutes. Based on these assumptions, the Department estimates that the proposed amendments would result in an annual cost of approximately \$15.4 million.⁵⁷⁴ The Department requests comment on how often financial institutions would receive requests for records, who would prepare such reports, and how long the preparation of such records would take.

10. Uncertainty

In estimating costs associated with rollover documentations, the Department faces uncertainty in determining the number of rollovers affected by the amendments to PTE 2020–02 and PTE 84–24. Some financial services professionals who do not generally serve as fiduciaries may act in a fiduciary capacity when making certain rollover recommendations, and thus will be affected by the exemptions. Alternatively, the opposite can also be true. Financial services professionals who generally serve as fiduciaries may act in a non-fiduciary capacity in handling certain rollover recommendations, and thus will not be affected by the exemptions. Thus, there is uncertainty in estimating the cost of compliance.

The Department welcomes any comments and data that can help estimate the number of rollovers affected by the exemptions. The Department also invites comments about financial services professionals' practices for documenting rollover recommendations, particularly the extent to which financial services

professionals use standardized forms or templates to document the reasons for recommending rollovers and how long on average it would take for a financial services professional to document a rollover recommendation.⁵⁷⁵

While the Department expects that the proposed rule would result in lower fees and expenses for plan participants, the Department faces uncertainty in estimating the magnitude of savings. The Department welcomes any comments and data that can help estimate the amount of decrease in fees and expenses. The Department also expects the proposed rule would result in a reallocation of capital, but the Department faces uncertainty on estimating the new market equilibrium across products and services. The Department welcomes any comments and data that can help estimate how much capital may be reallocated and how much efficiency will be gained.

G. Paperwork Reduction Act

As part of its continuing effort to reduce paperwork and respondent burden, the Department conducts a preclearance consultation program to allow the general public and Federal agencies to comment on proposed and continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA). This helps ensure that the public understands the Department's collection instructions, respondents can provide the requested data in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the Department can properly assess the impact of collection requirements on respondents.

The Department is soliciting comments regarding the information collection request (ICR) included in the proposed amendments to the prohibited transaction exemptions. To obtain a copy of the ICR, contact the PRA addressee below or go to *RegInfo.gov*. The Department has submitted a copy of

Option Grants to Top Executives Have Been Backdated or Manipulated?, 55(4) *Management Science* 513–525.; Mark Carhart, Ron Kaniel & Adam Reed, *Leaning for the Tape: Evidence of Gaming Behavior in Equity Mutual Funds*, 57(2) *Journal of Finance* 661–693 (2002).; Truong X. Duong & Felix Meschke, *The Rise and Fall of Portfolio Pumping Among U.S. Mutual Funds*, 60 *Journal of Corporate Finance* (February 2020).

⁵⁷² The burden is estimated as: (19,290 entities × 8 hours) = 154,320 hours. A labor rate of \$133.05 is used for a computer programmer professional. The labor rate is applied in the following calculation: (19,290 entities × 8 hours) × \$133.05 = \$20,532,276.

⁵⁷³ The burden is estimated as: (215 insurance companies + 4,000 independent producers) × 8 hours = 33,720 hours. A labor rate of \$133.05 is used for a computer programmer professional. The labor rate is applied in the following calculation: (215 insurance companies + 4,000 independent producers) × 8 hours × \$133.05 = \$4,486,446.

⁵⁷⁴ The burden is estimated as follows: (19,290 financial institutions × 10 requests) × (30 minutes + 60 minutes) = 96,450 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(19,290 financial institutions × 10 requests) × (30 minutes + 60 minutes)] × \$159.34 = \$15,368,343.

⁵⁷⁵ The Department assumes that financial services professionals would spend, on average, 10 minutes to document the basis for rollover recommendations in addition to their work researching and determining the recommendations. The Department understands that financial services professionals seek and gather information regarding investor profiles in accordance with other regulators' rules. Further, financial professionals often discuss the basis for their recommendations and associated risks with their clients as a best practice. After collecting relevant information and discussing the basis for certain recommendations with clients, the Department believes that it would take a relatively short time to document justifications for rollover recommendations. However, the Department welcomes comments about the burden hours associated with documenting rollover recommendations.

the rule to the Office of Management and Budget (OMB) in accordance with 44 U.S.C. 3507(d) for review of its information collections. The Department and OMB are particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronically delivered responses).

Commenters may send their views on the Departments' PRA analysis in the same way they send comments in response to the proposed rule as a whole (for example, through the www.regulations.gov website), including as part of a comment responding to the broader proposed rule. Comments are due by January 2, 2024 to ensure their consideration.

ICRs are available at RegInfo.gov (reginfo.gov/public/do/PRAMain). Requests for copies of the ICR can be sent to the PRA addressee:

By mail: James Butikofer, Office of Research and Analysis, Employee Benefits Security Administration, U.S. Department of Labor, 200 Constitution Avenue NW, Room N-5718, Washington, DC 20210.

By email: ebbsa.opr@dol.gov.

There is no paperwork burden associated with the proposed rule. However, there is paperwork burden associated with the amendments to PTEs 75-1, 84-24, 86-128, and 2020-02. The Department estimates that the proposed amendments would not affect the paperwork burden related to PTEs 77-4, 80-3, and 83-1. The PRA analysis for the amendments is included with each of the respective amendments.

PTE 75-1

Type of Review: Revision of an existing collection.

Agency: Employee Benefits Security Administration, Department of Labor.

Titles: Prohibited Transaction Exemption 75-1 (Security Transactions

with Broker-Dealers, Reporting Dealers and Banks).

OMB Control Number: 1210-0092.

Affected Public: Businesses or other for-profits; not for profit institutions.

Estimated Number of Respondents: 3,942.

Estimated Number of Annual Responses: 3,942.

Frequency of Response: Initially, Annually, When engaging in exempted transaction.

Estimated Total Annual Burden Hours: 15,768 hours.

Estimated Total Annual Burden Cost: \$0.

PTE 84-24

Type of Review: Revision of an Existing Collection.

Agency: Employee Benefits Security Administration, Department of Labor.

Title: Prohibited Transaction Exemption (PTE) 84-24 for Certain Transactions Involving Insurance Agents and Brokers, Pension Consultants, Insurance Companies, and Investment Company Principal Underwriters.

OMB Control Number: 1210-0158.

Affected Public: Businesses or other for-profits; not for profit institutions.

Estimated Number of Respondents: 7,221.

Estimated Number of Annual Responses: 119,376.

Frequency of Response: Initially, Annually, When engaging in exempted transaction.

Estimated Total Annual Burden Hours: 123,726 hours.

Estimated Total Annual Burden Cost: \$8,457.

PTE 86-128

Type of Review: Revision to an existing collection.

Agency: Employee Benefits Security Administration, Department of Labor.

Titles: PTE 86-128 (Securities Broker-Dealers).

OMB Control Number: 1210-0059.

Affected Public: Businesses or other for-profits; not for profit institutions.

Estimated Number of Respondents: 2,179.

Estimated Number of Annual Responses: 33,570.

Frequency of Response: Initially, Annually, When engaging in exempted transaction.

Estimated Total Annual Burden Hours: 2,929 hours.

Estimated Total Annual Burden Cost: \$37,034.

PTE 2020-02

OMB Control Number: 1210-0163.

Affected Public: Businesses or other for-profits; not for profit institutions.

Estimated Number of Respondents: 19,290.

Estimated Number of Annual Responses: 6,504,119.

Frequency of Response: Initially, Annually, When engaging in exempted transaction.

Estimated Total Annual Burden Hours: 1,044,050 hours.

Estimated Total Annual Burden Cost: \$167,296.

H. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA)⁵⁷⁶ imposes certain requirements on rules subject to the notice and comment requirements of section 553(b) of the Administrative Procedure Act or any other law.⁵⁷⁷ Under section 603 of the RFA, agencies must submit an initial regulatory flexibility analysis (IRFA) of a proposal that is likely to have a significant economic impact on a substantial number of small entities, such as small businesses, organizations, and governmental jurisdictions. Below is the Department's IRFA.

1. Need for and Objectives of the Rule

As discussed earlier, the Department believes that changes to the marketplace since 1975, when "fiduciary" was first defined, have made the existing definition inadequate and obsolete. This proposal will update the definition of "fiduciary" to reflect changes to the retirement and financial advice marketplaces since 1975 and add important protections to existing prohibited transaction class exemptions. More detail can be found in the "Need for Regulatory Action" section of this RIA.

Smaller plans may be more exposed to conflicts of interest on the part of service providers, because they are less likely than larger plans to receive investment assistance from a service provider that is acting as a fiduciary. Smaller plans have historically received investment assistance from insurance brokers or broker-dealers, who may be subject to conflicts of interest.⁵⁷⁸ Larger plans may also have sufficient resources and in-house expertise to make investment decisions without outside assistance.⁵⁷⁹ Additionally, many sponsors of smaller plans may have a lack of knowledge of whether the providers to the plan are fiduciaries and how the provider's compensation varies

⁵⁷⁶ 5 U.S.C. 601 et seq.

⁵⁷⁷ 5 U.S.C. 601(2), 603(a); also see 5 U.S.C. 551.

⁵⁷⁸ U.S. Government Accountability Office, GAO-11-119, 401(K) Plans: Improved Regulation Could Better Protect Participants from Conflicts of Interest, U.S. Government Accountability Office (2011), <http://www.gao.gov/products/GAO-11-119>.

⁵⁷⁹ Id.

based on the investment options selected.⁵⁸⁰

2. Affected Small Entities

The Small Business Administration (SBA)^{581 582} defines small businesses and issues size standards by industry.

The SBA defines a small business in the financial investments and related activities sector as a business with up to \$47.0 million in annual receipts. Over 97 percent of broker-dealers⁵⁸³ and 99 percent of registered investment

advisers⁵⁸⁴ are small businesses according to the SBA size standards.

The Department requests comments on the appropriateness of the size standards used to evaluate the impact of the proposal on small entities.

TABLE 5—AFFECTED SMALL FINANCIAL ENTITIES

	Prohibited transaction exemptions					
	2020–02	84–24	75–1	77–4	80–83	86–128
Broker-Dealers	1,835		1,835			
Registered Investment Advisers	15,775					
<i>Pure Robo-Advisers</i>	10					
Discretionary Fiduciaries						1,835
Insurance Companies	151	177				
Insurance Producers		3,960				
Banks			1,568		19	
Mutual Fund Companies				796		
Investment Company Principal Underwriters	20	20				20
Pension Consultants	930	930				930

In its economic analysis for its 2020 rulemaking, the Department included all entities eligible for relief on a variety of transactions and compensation that may not have been covered by prior exemptions in its cost estimate. In 2020, the Department acknowledged that not all these entities will serve as investment advice fiduciaries to plans and IRAs within the meaning of Title I and the Code. Additionally, the Department acknowledged that because other exemptions are also currently available to these entities, it is unclear how widely financial institutions will rely upon the new exemptions and which firms are most likely to choose to rely on it.

This analysis, like the analysis from 2020, includes all entities eligible for relief in its cost estimate. These estimates are subject to caveats like those in 2020, though this proposal will expand the parties that will be considered investment advice fiduciaries and also will narrow the exemption alternatives.

The Department requests comments on which, and how many, entities may rely on each of the exemptions, as amended.

Registered Investment Advisers

Small, registered investment advisers who provide investment advice to

retirement plans or retirement investors and registered investment advisers who act as pension consultants would be directly affected by the proposed amendments to PTE 2020–02. As discussed in the Affected Entities section of the RIA, the Department estimates that 16,182 registered investment advisers, including 200 robo-advisers, would be affected by the proposed amendments.⁵⁸⁵ The Department estimates that 98.7 percent of broker-dealers are small businesses according to the SBA size standards.⁵⁸⁶ Based on these statistics, the Department estimates that 15,775 registered investment advisers, including those registered with the SEC and the state, would be affected by the proposed amendments.⁵⁸⁷

Robo Advisers

The proposed changes to PTE 2020–02 would affect robo-advisers. As discussed in the RIA, the Department estimates that 200 robo-advisers will be affected by the proposed amendments. The Department does not have information on how many of these robo-advisers would be considered small entities. The Department expects that most robo-advisers would not be considered small. For the purposes of this analysis, the Department assumes that 5 percent of robo-advisers, or 10

robo-advisers, are small entities. The Department requests comment on these estimates.

Broker-Dealers

Small broker-dealers who provide investment advice to retirement plans or retirement investors and registered investment advisers who act as pension consultants would be directly affected by the proposed amendments to PTE 2020–02. Additionally, the proposed amendments would modify PTE 75–1 and PTE 86–128 such that small broker-dealers would no longer be able to rely on the exemption for investment advice. The Department does not have information about how many small broker-dealers provide investment advice to plan fiduciaries, plan participants and beneficiaries, and IRA owners. However, the Department believes that few broker-dealers, including small broker-dealers, will continue to rely on PTE 75–1 and PTE 86–128 for transactions that do not involve investment advice.

As discussed in the RIA, the Department assumes that 1,894 broker-dealers would be affected by the proposed amendments.⁵⁸⁸ The Department estimates that 96.9 percent of broker-dealers are small businesses according to the SBA size standards.⁵⁸⁹ Accordingly, the Department assumes

⁵⁸⁰ *Id.*

⁵⁸¹ 13 CFR 121.201.

⁵⁸² 15 U.S.C. 631 *et seq.*

⁵⁸³ This is estimated on the percent of entities with less than \$47.0 million for the industry Securities Brokerage, NAICS 523120. See NAICS Association, Count by NAICS Industry Sectors, NAICS Association, <https://www.naics.com/business-lists/counts-by-naics-code/>.

⁵⁸⁴ This is estimated on the percent of entities with less than \$47.0 million for the industry Investment Advice, NAICS 523930. See NAICS

Association, Count by NAICS Industry Sectors, NAICS Association, <https://www.naics.com/business-lists/counts-by-naics-code/>.

⁵⁸⁵ For more information on this estimate, refer to the Affected Entities section of the RIA.

⁵⁸⁶ This is estimated on the percent of entities with less than \$47.0 million for the industry Investment Advice, NAICS 523930. See NAICS Association, Count by NAICS Industry Sectors, NAICS Association, <https://www.naics.com/business-lists/counts-by-naics-code/>.

⁵⁸⁷ The number of small investment advisers, who do not provide pure robo-advice, is estimated as: (16,182 investment advisers – 200 robo-advisers) × 98.7% = 15,775 small investment advisers.

⁵⁸⁸ For more information on this estimate, refer to the Affected Entities section of the RIA.

⁵⁸⁹ This is estimated on the percent of entities with less than \$47.0 million for the industry Securities Brokerage, NAICS 523120. See NAICS Association, Count by NAICS Industry Sectors, NAICS Association, <https://www.naics.com/business-lists/counts-by-naics-code/>.

that 1,835 small broker-dealers would be affected by the proposed amendments.⁵⁹⁰ The Department requests comment on this estimate.

Discretionary Fiduciary

The proposed amendments to PTE 86–128 would delete Section IV(a), which provides an exclusion from the conditions of the exemption for certain plans not covering employees, including IRAs, to increase the safeguards available to these retirement investors. Therefore, investment advice fiduciaries to IRAs would have to rely on another exemption, such as PTE 2020–02. Fiduciaries that exercise full discretionary authority or control with respect to IRAs could continue to rely on PTE 86–128, as long as they comply with all of the exemption’s conditions. Under PTE 86–128, discretionary fiduciaries would still be able to effect or execute securities transactions. Any discretionary fiduciaries seeking relief for investment advice, however, would be required to rely on the amended PTE 2020–02. The Department lacks reliable data on the number of investment advice providers who are discretionary fiduciaries that would rely on the amended exemption.

For the purposes of this analysis, the Department assumes that the number of discretionary fiduciaries relying on the exemption is no larger than the estimated number of broker-dealers estimated to be affected by the amendments to PTE 2020–02. As discussed in the RIA, the Department assumes that 1,894 broker-dealers would be affected by the proposed amendments.⁵⁹¹ The Department estimates that 96.9 percent of broker-dealers are small businesses according to the SBA size standards.⁵⁹² Accordingly, the Department assumes that 1,835 small discretionary fiduciaries would be affected by the proposed amendments.⁵⁹³

The Department requests comment on this assumption, particularly with regard to what types of entities would be likely to rely on the amended exemption, as well as any underlying data.

⁵⁹⁰ The estimated of retail broker-dealers affected by this exemption is estimated as: $(1,894 \text{ broker-dealers} \times 96.9\%) = 1,835 \text{ broker-dealers}$.

⁵⁹¹ For more information on this estimate, refer to the Affected Entities section of the RIA.

⁵⁹² This is estimated on the percent of entities with less than \$47.0 million for the industry Securities Brokerage, NAICS 523120. See NAICS Association, Count by NAICS Industry Sectors, NAICS Association, <https://www.naics.com/business-lists/counts-by-naics-code/>.

⁵⁹³ The estimated of retail broker-dealers affected by this exemption is estimated as: $(1,894 \text{ broker-dealers} \times 96.9\%) = 1,835 \text{ broker-dealers}$.

Insurance Companies

The proposed amendments to PTE 2020–02 and PTE 84–24 would affect small insurance companies and captive agents. The existing version of PTE 84–24 granted relief for captive insurance agents, overseen by insurance companies; however, the proposed amendments would exclude insurance companies and captive agents currently relying on the exemption for investment advice. These entities would be required to comply with the requirements of PTE 2020–02 for relief involving investment advice.

As discussed in the RIA, the Department estimates that 398 insurance companies would be affected by the proposed rulemaking. The Department estimates that 70 of these entities are large entities.⁵⁹⁴ The Department does not have data on whether small insurance companies are more likely to rely on captive or independent distribution channels. For the purposes of this analysis, the Department assumes the percent of small insurance companies using each distribution channel is the same as for all insurance companies. That is, the Department assumes that 46 percent of insurance companies (183 insurance companies) sell annuities through captive distribution channels, of which 151 are estimated to be small insurance companies and 32 are estimated to be large insurance companies.⁵⁹⁵ Additionally, 54 percent (215 insurance companies) sell annuities through independent distribution channels, of which 177 are estimated to be small insurance companies and the remaining 38 are large insurance companies.⁵⁹⁶ The Department requests comment on this assumption.

Captive Insurance Agents

Additionally, as discussed in the Affected Entities section of the RIA, the Department estimates that 1,577 captive insurance agents would be affected by

⁵⁹⁴ LIMRA estimates that, in 2016, 70 insurers had more than \$38.5 million in sales. See LIMRA, *U.S. Individual Annuity Yearbook: 2016 Data*, LIMRA Secure Retirement Institute (2017).

⁵⁹⁵ The number of large insurance companies using a captive distribution channel is estimated as: $(70 \text{ large insurance companies} \times 46\%) = 32 \text{ insurance companies}$. The number of small insurance companies using a captive distribution channel is estimated as: $(183 \text{ insurance companies} - 32 \text{ large insurance companies}) = 151 \text{ small insurance companies}$.

⁵⁹⁶ The number of large insurance companies using an independent distribution channel is estimated as: $(70 \text{ large insurance companies} \times 54\%) = 38 \text{ insurance companies}$. The number of small insurance companies using an independent distribution channel is estimated as: $(215 \text{ insurance companies} - 38 \text{ large insurance companies}) = 177 \text{ small insurance companies}$.

the proposed amendments. The Department estimates that 99 percent of these captive agents work for small entities.⁵⁹⁷ Thus, the Department estimates there are 1,561 captive insurance agents and brokers that would be affected by the proposed amendments.⁵⁹⁸

Independent Producers

The proposal would also affect independent insurance producers that recommend annuities from unaffiliated financial institutions to retirement investors, as well as the financial institutions whose products are recommended. While captive insurance agents are employees of an insurance company, other insurance agents are “independent” and work with multiple insurance companies. Though these independent insurance producers may rely on PTE 2020–02, the Department believes they are more likely to rely on PTE 84–24. For this reason, the Department only considers captive insurance agents in the analysis for PTE 2020–02. The Department requests comment on how captive insurance agents and independent insurance producers would be affected by the proposed amendments to PTE 2020–02 and PTE 84–24.

The Independent Insurance Agents and Brokers of America estimated that there were 40,000 independent producers in 2022. The Department does not have data on what percent of independent producers serve the retirement market. For the purposes of this analysis, the Department assumes that 10 percent, or 4,000, of these independent producers serve the retirement market. The Department estimates that 99 percent of these entities are small entities.⁵⁹⁹ As such, the Department estimates that 3,960

⁵⁹⁷ This is estimated on the percent of entities with annual receipts less than \$15.0 million for the industry Insurance Agencies and Brokerages, NAICS 524210. See NAICS Association, Count by NAICS Industry Sectors, NAICS Association, <https://www.naics.com/business-lists/counts-by-naics-code/>; Small Business Administration, *Table of Size Standards*, Small Business Administration, (December 2022), <https://www.sba.gov/document/support-table-size-standards>.

⁵⁹⁸ The number of captive insurance agents is calculated as: $(1,577 \text{ captive agents} \times 99.0\%) = 1,561 \text{ captive insurance agents serving the annuity market}$.

⁵⁹⁹ This is estimated on the percent of entities with annual receipts less than \$15.0 million for the industry Insurance Agencies and Brokerages, NAICS 524210. See NAICS Association, Count by NAICS Industry Sectors, NAICS Association, <https://www.naics.com/business-lists/counts-by-naics-code/>; Small Business Administration, *Table of Size Standards*, Small Business Administration, (December 2022), <https://www.sba.gov/document/support-table-size-standards>.

small independent producers would be affected by the proposed amendment.

Pension Consultants

The Department expects that pension consultants would continue to rely on the existing 84–24; however, the proposed amendment would exclude pension consultants for plans and IRAs currently relying on the existing PTE 84–24 for investment advice. As such, any pension consultants relying on the existing exemption for investment advice would be required to comply with PTE 2020–02 for relief. In this analysis, the Department includes pension consultants in the affected entities for continued relief for the existing provisions of PTE 84–24 as well as the amended PTE 2020–02.

As discussed in the Affected Entities section of the RIA, the Department estimates that 1,011 pension consultants serve the retirement market. The Department estimates that approximately 92 percent of these entities are small entities.⁶⁰⁰ As such, the Department estimates that 930 pension consultants would be affected by the proposed amendments.

Principal Company Underwriter

The Department expects that some investment company principal underwriters for plans and IRAs rely on the existing PTE 84–24. The proposed amendment would exclude investment company principal underwriters for plans and IRAs currently relying on the existing PTE 84–24 for investment advice. As such, any principal company underwriter relying on the existing exemption for investment advice would be required to comply with PTE 2020–02 for relief. In this analysis, the Department includes principal company underwriters in the affected entities for continued relief for the existing provisions of PTE 84–24 as well as the amended PTE 2020–02.

As discussed in the Affected Entities section, the Department assumes that 10 investment company principal underwriters for plans and 10 investment company principal underwriters for IRAs will use this exemption once with one client plan. The Department estimates that approximately 97 percent of these

entities are small entities.⁶⁰¹ As a result, the Department estimates that all 10 of the estimated small investment company principal underwriters for plans and all 10 of the estimated small investment company principal underwriters for IRAs would be affected by the proposed amendments.

Banks and Credit Unions

The proposed amendments to PTE 80–83, PTE 75–1, and PTE 2020–02 would affect banks. The proposed amendments would exclude banks currently relying on the existing PTE 80–83 and PTE 75–1 for investment advice. Banks relying on the existing exemptions for investment advice would be required to comply with PTE 2020–02 for relief. Banks with discretionary control could still rely on PTE 80–83 and PTE 75–1.

The Department estimates that approximately 77 percent of commercial banks are small banks.⁶⁰² As discussed in the Affected Entities section of the RIA, the Department estimates that 4,096 banks would use the amended PTE 75–1, of which 3,135 commercial banks are estimated to be small.⁶⁰³ Additionally, in the Affected Entities section of the RIA, the Department estimates that 25 fiduciary-banks with public offering services would use the amended PTE 80–83, of which, 19 are estimated to be small.⁶⁰⁴ The Department recognizes that these estimates assume that the proportion of small banks using the aforementioned PTEs would be the same as the proportion of all banks using the PTEs. The Department recognizes that the banking industry within the United States is characterized by high market concentration.⁶⁰⁵ The Department

requests comment on whether small banks are equally as likely as large banks to rely on such exemptions.

The Department requests comments on how many small banks would seek exemptive relief under PTE 80–83 and PTE 75–1.

As discussed in the Affected Entities section of the RIA, the proposed amendments could also affect credit unions that offer IRAs. The Department estimates that there are approximately 4,782 credit unions.⁶⁰⁶ In 2023, the SBA estimated that there are 4,586 small credit unions.⁶⁰⁷ The Department requests comment on what proportion of small credit unions offer IRAs and what proportion sell share certificate products. Additionally, the Department requests comment on how many of these entities currently rely on PTE 2020–02, 75–1, and PTE 80–83 for investment advice.

Mutual Fund Companies

The proposed amendments would modify PTE 77–4 such that mutual fund company as their providing services to plans can no longer rely on the exemption when giving investment advice. Under the proposal, these mutual funds would need to rely on PTE 2020–02 for relief concerning investment advice.

As discussed in the Affected entities section of the RIA, the Department estimates that 812 mutual fund companies would be affected by the proposed amendments to PTE 77–4. The Department estimates that approximately 98 percent of these mutual fund companies, or 796 mutual fund companies, are small.⁶⁰⁸

Mortgage Pool Sponsors

PTE 83–1 provides relief for the sale of certificates in an initial issuance of certificates by the sponsor of a mortgage pool to a plan or IRA when the sponsor, trustee, or insurer of the mortgage pool is a fiduciary with respect to the plan or IRA assets invested in such certificates. The proposed amendments would exclude exemptive relief for investment advice. Under the proposal, these

has-the-banking-industry-become-too-concentrated.pdf.

⁶⁰⁶ For more information on how the number of credit unions is estimated, refer to the Affected Entities section of the RIA.

⁶⁰⁷ 88 FR 18906 (March 29, 2023).

⁶⁰⁸ This is estimated on the percent of entities with annual receipts less than \$40 million for the industry Open End Investment Fund, NAICS 525910. See NAICS Association, *Count by NAICS Industry Sectors*, NAICS Association, <https://www.naics.com/business-lists/counts-by-naics-code/>; Small Business Administration, *Table of Size Standards*, Small Business Administration, (December 2022), <https://www.sba.gov/document/support-table-size-standards>.

⁶⁰⁰ This is estimated on the percent of entities with annual receipts less than \$45.5 million for the industry Third Party Administration of Insurance and Pension Funds, NAICS 524292. See NAICS Association, *Count by NAICS Industry Sectors*, NAICS Association, <https://www.naics.com/business-lists/counts-by-naics-code/>; Small Business Administration, *Table of Size Standards*, Small Business Administration, (December 2022), <https://www.sba.gov/document/support-table-size-standards>.

⁶⁰¹ This is estimated on the percent of entities with less than \$47.0 million for the industry Investment Banking and Securities Intermediation, NAICS 523150. See NAICS Association, *Count by NAICS Industry Sectors*, NAICS Association, <https://www.naics.com/business-lists/counts-by-naics-code/>.

⁶⁰² This is estimated on the percent of commercial banks with assets less than \$850 million. See Federal Deposit Insurance Corporation, *FOIA RIS Data Bulk Download*, Federal Deposit Insurance Corporation, (December 2022), <https://www.fdic.gov/foia/ris/index.html>; Small Business Administration, *Table of Size Standards*, Small Business Administration, (December 2022), <https://www.sba.gov/document/support-table-size-standards>.

⁶⁰³ The number of small commercial banks that would use PTE 75–1 is estimated as: (4,096 banks × 76.5%) = 3,135 small banks.

⁶⁰⁴ The number of small banks that would use PTE 80–83 is estimated as: (25 fiduciary-banks with public offering services × 76.5%) = 19 banks.

⁶⁰⁵ Jim DiSalvo, *Banking Trends: Has the Banking Industry Become Too Concentrated?*, Federal Reserve Bank of Philadelphia, (2023), <https://www.philadelphiafed.org/-/media/frbp/assets/economy/articles/economic-insights/2023/q1/bt->

entities would need to rely on PTE 2020–02 for relief concerning investment advice. The Department requests comment on how many small entities currently rely on PTE 83–1, and how many of these entities rely on PTE 83–1 for investment advice.

3. Impact of the Rule

The Department believes the costs associated with the proposed amendments are modest because the proposal was developed in

consideration of other regulatory conduct standards. The Department believes that many financial institutions and investment professionals have already developed compliance structures for similar regulatory standards. The Department does not expect that the proposal will impose a significant compliance burden on small entities. As discussed, the Department estimates that the proposal would impose costs of approximately \$253.2 million in the first year and \$216.2

million in each subsequent year, of which approximately \$248.0 million in the first year and \$212.7 million in each subsequent year would be imposed on small financial institutions.

The table below summarizes the estimated aggregate cost for small entities due to the proposed amendments to each exemption. The following section describes estimated cost for each entity type for each exemption.

TABLE 6—SUMMARY OF TOTAL COST AND AVERAGE PER-ENTITY COST BY EXEMPTION

	Total cost		Per-entity cost	
	First year	Subsequent years	First year	Subsequent years
PTE 84–24	\$17,425,393	\$14,733,328	\$3,425	\$2,896
PTE 2020–02	227,505,836	194,922,497	18,029	2,757
Mass Amendments:				
PTE 75–1	2,594,856	2,594,856	763	763
PTE 77–4	0	0	0	0
PTE 80–83	0	0	0	0
PTE 83–1	0	0	0	0
PTE 1986–128	444,296	444,296	242	242
Total	247,970,380	212,694,976	22,459	6,657

Note: The sum of the columns may not sum to total due to rounding.

Preliminary Assumptions and Cost Estimate Inputs

The Department also assumes affected entities will likely incur only incremental costs if they are already subject to rules or requirements from the Department or another regulator. The Department acknowledges that not all entities will decide to use the amended PTE 2020–02 and PTE 84–24 for transactions resulting from fiduciary investment advice. Some may instead rely on other existing exemptions that better align with their business models. However, for this cost estimation, the Department assumes that all eligible entities will use the PTE 2020–02 and PTE 84–24 for such transactions. The Department recognizes that this may result in an overestimate, as not all entities will necessarily rely on these exemptions.

The Department does not have information on how many retirement investors—including plan beneficiaries, plan participants, and IRA owners—receive electronic disclosures from investment advice fiduciaries. For the purposes of this analysis, the Department assumes that the percent of retirement investors receiving electronic disclosures would be similar to the percent of plan participants receiving electronic disclosures under the Department's 2020 and 2002 electronic

disclosure safe harbors.⁶⁰⁹ Accordingly, the Department estimates that 94.2 percent of the disclosures sent to retirement investors would be sent electronically, and the remaining 5.8 percent would be sent by mail.⁶¹⁰ The Department requests comment on these assumptions.

Additionally, the Department assumes that various types of personnel will perform the tasks associated with information collection requests at an hourly wage rate of \$63.45 for clerical personnel, \$128.11 for a top executive, \$133.05 for a computer programmer, \$158.94 for an insurance sales agent, \$159.34 for a legal professional, \$190.63 for a financial manager, and \$219.23 for a financial adviser.⁶¹¹

⁶⁰⁹ 85 FR 31884 (May 27, 2020); 67 FR 17263 (Apr. 9, 2002).

⁶¹⁰ The Department estimates approximately 94.2 percent of retirement investors receive disclosures electronically. This is the sum of the estimated share of retirement investors receiving electronic disclosures under the 2002 electronic disclosure safe harbor (58.2 percent) and the estimated share of retirement investors receiving electronic disclosures under the 2020 electronic disclosure safe harbor (36 percent).

⁶¹¹ Internal Department calculation based on 2023 labor cost data. For a description of the Department's methodology for calculating wage rates. See Employee Benefits Security Administration, *Labor Cost Inputs Used in the Employee Benefits Security Administration, Office of Policy and Research's Regulatory Impact Analyses and Paperwork Reduction Act Burden Calculations*, Employee Benefits Security

Cost Associated With PTE 2020–02 Summary of Affected Entities

As discussed in the Affected Entities section of the Regulatory Flexibility Analysis, the Department estimates that 18,721 small financial institutions would be affected by the proposal, comprised of 1,835 broker-dealers, 15,775 registered investment advisers, 10 robo-advisers, 151 insurance companies, 20 investment company principal underwriters, and 930 pension consultants.⁶¹²

Cost To Review the Rule

The Department estimates that all 18,721 of the small financial institutions affected would each need to review the rule, as it applies to their business. The Department estimates that such a review will take a legal professional, on average, nine hours to review the rule, resulting in a total cost of \$26.9 million.⁶¹³

Administration, <https://www.dol.gov/sites/dolgov/files/EBSA/laws-and-regulations/rules-and-regulations/technical-appendices/labor-cost-inputs-used-in-ebsa-opr-ria-and-pra-burden-calculations-june-2019.pdf>.

⁶¹² For more information on how the number of each type of entity is estimated, refer to the Affected Entities section of the Regulatory Flexibility Act analysis.

⁶¹³ The burden is estimated as: (18,721 entities × 9 hours) = 168,489 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is

Cost Associated With Disclosures

The proposed amendments would require small entities to modify existing general disclosures and develop additional general disclosures to those required under the existing exemption. For more information on the changed requirements for each disclosure, refer to the descriptions in the preamble and RIA of this document. The Department estimates the marginal cost for each of the disclosure requirements as:

- Drafting or updating a written acknowledgement that the financial institution and its investment professional are fiduciaries is estimated to result in an aggregate cost of approximately \$123,647.⁶¹⁴
- Drafting or updating a written description of service provided is estimated to result in an aggregate cost of \$1.6 million in the first year.⁶¹⁵
- Drafting the written statement of the Best Interest standard of care owed is estimated to result in an aggregate cost of \$1.6 million in the first year.⁶¹⁶

applied in the following calculation: (18,721 entities × 9 hours) × \$159.34 = \$26,847,037.

⁶¹⁴ The number of financial entities needing to update their written acknowledgement is estimated as: (1,835 broker-dealers × 10%) + (15,775 registered investment advisers × 10%) + (151 insurers × 10%) = 1,776 financial institutions updating existing disclosures. The number of financial entities needing to draft their written acknowledgement is estimated as: (10 robo-advisers + 930 pension consultants + 20 investment company underwriters) = 960 financial institutions drafting new disclosures. The burden is estimated as: (1,776 financial institutions × (10 minutes + 60 minutes)) + (960 financial institutions × (30 minutes + 60 minutes)) = 776 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(1,776 financial institutions × (10 minutes + 60 minutes)) + (960 financial institutions × (30 minutes + 60 minutes))] × \$159.34 = \$123,647. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶¹⁵ The number of financial entities needing to update their written description of services is estimated as: (1,835 broker-dealers + 15,775 registered investment advisers + 151 insurers) = 17,761 financial institutions updating existing disclosures. The number of financial entities needing to draft their written description of services is estimated as: (10 robo-advisers + 930 pension consultants + 20 investment company underwriters) = 960 financial institutions drafting new descriptions. The burden is estimated as: (17,761 financial institutions × (30 minutes + 60 minutes)) + (960 financial institutions × 1 hour) = 9,841 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(17,761 financial institutions × (30 minutes + 60 minutes)) + (960 financial institutions × 1 hour)] × \$159.34 = \$1,567,985. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶¹⁶ The burden is estimated as: [(1,835 broker-dealers + 15,775 registered investment advisers) × (30 minutes + 60 minutes)] + [(151 insurers + 10 robo-advisers + 930 pension consultants + 20 investment company underwriters) × 1 hour] = 9,896 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(1,835 broker-dealers +

• Drafting a written statement informing the investor of their right to obtain a written description of the financial institution's policies and procedures and information regarding costs, fees, and compensation is estimated to result in an aggregate cost of \$1.6 million in the first year.⁶¹⁷

• Preparing and sending the general disclosures described above is estimated to result in a de minimis marginal cost.⁶¹⁸

• Preparing and sending requested written descriptions of policies and procedures and information regarding costs, fees, and compensation is estimated to result in an annual cost of \$1.0 million.⁶¹⁹

• Preparing disclosures for PEPs detailing any amounts the financial institution pays to or receives from the PPP or its affiliates, in addition to any conflicts of interest that arise in connection with the investment advice it provides to a PEP is estimated to result in an annual cost of approximately \$118,230 in the first

15,775 registered investment advisers) × (30 minutes + 60 minutes)] + [(151 insurers + 10 robo-advisers + 930 pension consultants, and 20 investment company underwriters) × 1 hour] × \$159.34 = \$1,576,828. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶¹⁷ The burden is estimated as: [(1,835 broker-dealers + 15,775 registered investment advisers) × (30 minutes + 60 minutes)] + [(151 insurers + 10 robo-advisers + 930 pension consultants + 20 investment company underwriters) × 1 hour] = 9,916 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(1,835 broker-dealers + 15,775 registered investment advisers) × (30 minutes + 60 minutes)] + [(151 insurers + 10 robo-advisers + 930 pension consultants, and 20 investment company underwriters) × 1 hour] × \$159.34 = \$1,580,015. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶¹⁸ Based on FOCUS data, the SEC reported that in 2018, there were 143,333,278 cumulative customer broker-dealer accounts. Of these accounts, the SEC estimates that the 287 small retail broker-dealers held 5,281 customer accounts. The Department used this to estimate that small broker-dealers hold 0.004 percent of the total customer accounts. The Department assumes that the market for other types of financial institutions matches the broker-dealer market and applied this percentage to all other accounts. Accordingly, the burden is estimated as: [(3,183,503 paper disclosures × 0.004%) × 2 pages] × \$0.05 = \$0.74. The Department considers this to be a de minimis cost.

⁶¹⁹ The burden is estimated as: (18,721 financial institutions × 10 disclosures) × (5 minutes + 60 minutes) = 15,601 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: [(18,721 financial institutions × 10 disclosures) × (5 minutes + 60 minutes)] × \$63.45 = \$989,873. The material cost is estimated as: (18,721 financial institutions × 10 disclosures × 2 pages × \$0.05) + (18,721 financial institutions × 10 disclosures × \$0.66) × (5.8%) = \$8,252. The total cost is estimated as: \$989,873 + \$8,252 = \$998,125. For more information on the assumptions included in this calculation, refer to the RIA of this document.

year.⁶²⁰ The Department estimates that this would result in 928 disclosures sent to employers of PEPs.⁶²¹ This results in an annual cost of approximately \$981.⁶²²

The Department estimates that the total cost for 18,721 small financial institutions to update their disclosure materials and distribute the newly required disclosures is \$6.0 million during the first year and \$1.0 million in each subsequent year.

Cost Associated With Rollover Documentation and Disclosure

As discussed in the cost section of the RIA, the Department estimates that, 3,119,832 rollovers would be affected.⁶²³ The Department lacks reliable data on the number of rollovers that would involve small financial institutions. For the purposes of this analysis, the Department assumes the percent of rollovers conducted by small institutions is proportional to the percent of small financial institutions. Accordingly, the Department estimates that 99 percent of these rollovers, or 3,088,633 rollovers, would involve small financial institutions. The Department requests comments on these assumptions.

Applying these assumptions to the 18,721 small financial institutions, using the same methodology described above to calculate the rollover

⁶²⁰ The Department assumes that the percent of PEPs that are serviced by small institutions is proportionate the percent of financial institutions that are estimated to be small. This percentage is estimated as: (18,721 small financial institutions / 19,290 financial institutions) = 97.1%. The number of PEPs serviced by small financial institutions is estimated as: (382 PEPs × 97.1%) = 371 PEPs. The burden is estimated as: (371 financial institutions × 2 hours) = 742 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (371 financial institutions × 2 hours) × \$159.34 = \$118,230. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶²¹ As discussed in the RIA, according to filings submitted to the Department by August 22, 2023, there are 955 employers in PEPs. The Department does not have data on how many of these disclosures are service by small financial institutions. For the purposes of this analysis, the Department estimates that the number of employers in PEPs serviced by small financial institutions is proportionate the number of PEPs serviced by small financial institutions. Accordingly, the Department estimates the number of disclosures sent to employers of PEPs in this context as: 955 PEPs × (371/382) = 928 PEPs.

⁶²² The burden is estimated as: (928 PEPs × 1 minute) = 15 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: (928 PEPs × 1 minute) × \$63.45 = \$981. The Department expects that these disclosures would be sent electronically. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶²³ For more information on how the number of IRA rollovers is estimated, refer to the Affected Entities section of the RIA.

documentation costs for all firms, the Department estimates a total annual cost of approximately \$191.9 million.⁶²⁴

Costs Associated With Annual Report of Retrospective Review for Financial Institutions

PTE 2020–02 requires financial institutions to conduct a retrospective review at least annually that is reasonably designed to prevent violations of and achieve compliance with the conditions of this exemption, Impartial Conduct Standards, and the policies and procedures governing compliance with the exemption. While entities covered by the existing exemption would not incur additional costs with this requirement, robo-advisers, pension consultants, and investment company underwriters, who are not covered under the existing exemption, would incur costs associated with conducting the annual review. This requirement is estimated to result in an annual aggregate cost of \$0.2 million.⁶²⁵

Additionally, the Department estimates the cost for a certifying officer to review the report and certify the exemption would result in an estimated annual cost burden of approximately \$366,000.⁶²⁶

Cost Associated With Written Policies and Procedures

Entities that were not previously complying with PTE 2020–02 would incur the cost to develop policies and procedures in the first year. The requirements to maintain and review policies and procedures is estimated to result in an aggregate cost of \$2.2 million in the first year⁶²⁷ and \$1.5 million in subsequent years.⁶²⁸

The proposed amendments would also require financial institutions to provide their complete policies and procedures to the Department upon request. Based on the number of past cases as well as current open cases that would merit such a request, the Department estimates that the Department would request a total of 165 policies and procedures in the first year

and 50 policies and procedures in subsequent years. Assuming the number of requests from small institutions is proportionate to the number of small financial institutions, the Department estimates that it would request 160 policies and procedures in the first year and 49 in subsequent years.⁶²⁹ The Department estimates that the requirement would result an estimated cost of approximately \$2,538 in the first year⁶³⁰ and \$777 in subsequent years.⁶³¹ The cost for a firm receiving the request would be approximately \$80 in years when a request is made and no cost in most years when no request is made.

Summary of Total Cost

The Department estimates that in order to meet the additional conditions of the amended PTE 2020–02, affected entities would incur a total cost of \$227.5 million in the first year and \$194.9 million in subsequent years. The cost by requirement and entity type is summarized in the table below.

TABLE 7—THREE-YEAR AVERAGE COST BY TYPE OF ENTITY AND REQUIREMENT

	Broker-dealer	SEC registered investment adviser	State-registered investment adviser	Insurance company	Robo-adviser	Pension consultant	Investment company underwriter
Rule Review:							
<i>Total</i>	\$877,167	\$3,571,765	\$3,969,000	\$72,181	\$4,780	\$444,559	\$9,560

<i>Per-Entity</i>	2	2	2	2	2	2	2
Policies and Procedures:							
<i>Total</i>	146,328	595,837	662,103	12,041	3,453	321,138	6,906
<i>Per-Entity</i>	80	80	80	80	345	345	345
Retrospective Review:							
<i>Total</i>					6,043	562,032	12,087
<i>Per-Entity</i>					604	604	604

⁶²⁴ The burden is estimated as: (3,088,633 rollovers × 48% × (30 minutes + 60 minutes)) + (3,088,633 rollovers × 52% × (5 minutes + 60 minutes)) = 875,113 hours. A labor rate of \$219.23 is used for a personal financial adviser. The labor rate is applied in the following calculation: (3,088,633 rollovers × 48% × (30 minutes + 60 minutes)) + (3,088,633 rollovers × 52% × (5 minutes + 60 minutes)) × \$219.23 = \$191,850,954. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶²⁵ The number of small entities not currently producing audit reports is estimated as: (10 robo-advisers + 930 pension consultants + 20 investment company underwriters) × 10% = 96 small entities. The number of small entities needing to modify existing audit reports is estimated as: (10 robo-advisers + 930 pension consultants + 20 investment company underwriters) × 90% = 864 small entities. The burden is estimated as: (96 financial institutions × 5 hours) + (864 financial institutions × 1 hour) = 1,344 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(96 financial institutions × 5 hours) + 864 financial institutions

× 1 hour] × \$159.34 = \$214,153. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶²⁶ The burden is estimated as: (10 robo-advisers + 930 pension consultants + 20 investment company underwriters) × 2 hours = 1,920 hours. A labor rate of \$190.63 is used for a financial manager. The labor rate is applied in the following calculation: (10 robo-advisers + 930 pension consultants + 20 investment company underwriters) × 2 hours × \$190.63 = \$366,010.

⁶²⁷ The burden is estimated as: (17,761 × (30 minutes + 60 minutes)) + (960 × 5 hours) = 13,681 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(17,761 × (30 minutes + 60 minutes)) + (960 × 5 hours)] × \$159.34 = \$2,179,851. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶²⁸ The burden is estimated as: (18,721 small financial institutions × (30 minutes + 60 minutes)) = 9,361 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (18,721 small financial

institutions × (30 minutes + 60 minutes)) × \$159.34 = \$1,491,502.

⁶²⁹ The percent of financial institutions that are small is estimated as: (18,721 small financial institutions/19,290 financial institutions) = 97.1%. The number of policies and procedures requested from small financial entities in the first year is estimated as: (165 × 97.1%) = 160. The number of policies and procedures requested from small financial entities in the first year is estimated as: (50 × 97.1%) = 49.

⁶³⁰ The burden is estimated as: (160 × (15 minutes + 60 minutes)) = 40 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: (160 × (15 minutes + 60 minutes)) × \$63.45 = \$2,538. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶³¹ The burden is estimated as: (49 × (15 minutes + 60 minutes)) = 12 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: (49 × (15 minutes + 60 minutes)) × \$63.45 = \$777. For more information on the assumptions included in this calculation, refer to the RIA of this document.

TABLE 7—THREE-YEAR AVERAGE COST BY TYPE OF ENTITY AND REQUIREMENT—Continued

	Broker-dealer	SEC registered investment adviser	State- registered investment adviser	Insurance company	Robo-adviser	Pension consultant	Investment company underwriter
Total:							
<i>Total</i>	20,078,016	81,756,286	90,848,839	1,660,214	119,169	11,082,746	238,339

Cost Associated With PTE 84–24

Summary of Affected Entities

As discussed in the Affected Entities section of the Regulatory Flexibility Analysis, the Department expects that 5,087 small financial entities would be affected by the proposed amendments, including 930 pension consultants, 20 investment company principal underwriters, 3,960 independent producers, and 177 insurance companies.⁶³²

Cost To Review the Rule

The Department estimates that all 5,087 of the small financial institutions affected would each need to review the rule, as it applies to their business. The Department estimates that such a review will take a legal professional, on average, two hours to review the rule, resulting in a total cost of \$1.6 million in the first year.⁶³³

Costs Associated With Disclosures

The proposed amendment would require small independent producers to provide disclosures to retirement investors before engaging in a transaction covered by this exemption. For more information on the changed requirements for each disclosure, refer to the descriptions in the preamble and RIA of this document. The Department estimates the marginal cost for each of the disclosure requirements as:

- Drafting or updating a written acknowledgement that the financial institution and its investment professional are fiduciaries is estimated to result in an aggregate cost of approximately \$10,000.⁶³⁴

⁶³² For more information on how the number of each type of entity is estimated, refer to the Affected Entities section.

⁶³³ The burden is estimated as: (5,087 entities × 2 hours) = 10,174 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (5,087 entities × 2 hours) × \$159.34 = \$1,621,125.

⁶³⁴ The burden is estimated as: [177 financial institutions + (3,960 independent producers × 5%)] × (10 minutes + 60 minutes) = 63 hours. A labor rate of approximately \$159.34 is used for a legal

- Drafting the written statement of the Best Interest standard of care owed is estimated to result in an aggregate cost of \$29,900.⁶³⁵

- Drafting or updating a written description of service provided is estimated to result in an aggregate cost of \$0.3 million.⁶³⁶

- Drafting a written statement of the independent producer's material conflicts of interest and the amount of insurance commission paid in connection with the purchase by a retirement investor of the recommended annuity is estimated to result in an aggregate cost of \$0.6 million.⁶³⁷

For small entities, the Department estimates that developing the disclosures described above would result in a total cost of \$1.0 million the first year.

professional. The labor rate is applied in the following calculation: [(177 financial institutions + 3,960 independent producers × 5%) × (10 minutes + 60 minutes)] × \$159.34 = \$9,959. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶³⁵ The burden is estimated as: [177 financial institutions + (3,960 independent producers × 5%)] × (30 minutes + 60 minutes) = 188 hours. A labor rate of approximately \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(177 financial institutions + 3,960 independent producers × 5%) × (30 minutes + 60 minutes)] × \$159.34 = \$29,876. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶³⁶ The burden is estimated as: (3,960 independent producers × (30 minutes + 60 minutes)) = 1,980 hours. A labor rate of approximately \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (3,960 independent producers × (30 minutes + 60 minutes)) × \$159.34 = \$315,493. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶³⁷ The burden is estimated as: (3,960 independent producers × 1 hour) = 3,960 hours. A labor rate of approximately \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (3,960 independent producers × 1 hour) × \$159.34 = \$630,986. For more information on the assumptions included in this calculation, refer to the RIA of this document.

Cost Associated With Rollover Documentation and Disclosure

The proposed amendment would require an independent producer to provide a rollover disclosure that is similar to the disclosure required in the proposed amendment to PTE 2020–02. As discussed in the RIA, the Department assumes that such disclosures would be prepared by the independent producer. The Department requests comment on whether this would be true for small independent producers.

In the RIA, the Department estimates that 52,449 retirement investors would receive documentation on whether the recommended annuity is in their best interest each year.⁶³⁸ The Department does not have data on what proportion of rollovers would be produced by small independent producers. For the purposes of this analysis, the Department assumes that the proportion of rollovers advised by small independent producers is equal to the proportion of independent producers that are small. The Department estimates that 99 percent of rollovers would be produced by small independent producers.⁶³⁹ The Department estimates small independent producers would need to provide 51,925 rollover disclosures annually. This results in an estimated cost of approximately \$8.3 million annually.⁶⁴⁰ These costs likely reflect an

⁶³⁸ For information on this estimate, refer to the estimate of IRAs affected by the proposed amendments to PTE 84–24 in the Affected Entities section of the RIA.

⁶³⁹ This is estimated on the percent of entities with annual receipts less than \$15.0 million for the industry Insurance Agencies and Brokerages, NAICS 524210. See NAICS Association, *Count by NAICS Industry Sectors*, NAICS Association, <https://www.naics.com/business-lists/counts-by-naics-code/>; Small Business Administration, *Table of Size Standards*, Small Business Administration, (December 2022), <https://www.sba.gov/document/support-table-size-standards>.

⁶⁴⁰ The burden is estimated as: (51,925 rollovers × 1 hour) = 51,925 hours. A labor rate of approximately \$158.94 is used for an independent producer. The labor rate is applied in the following calculation: (51,925 rollovers × 1 hour) × \$158.94

Continued

overestimate of the total cost, as it assumes that small independent producers would make the same number of recommended rollovers as the average independent producer. The Department requests comment on how many rollover recommendations a small independent producer is likely to make in a given year, on average.

Costs Associated With the Provision of Disclosures to Retirement Investors

The Department estimates that the number of disclosures that would need to be provided to retirement investors is equal to the number of rollover disclosures, or 51,925 disclosures. Preparing and sending the general disclosures described above is estimated to result in an estimated cost of approximately \$18,968.⁶⁴¹

Additionally, independent producers would be required to send the documentation to the insurance company. The Department expects that such documentation would be sent electronically and result in a de minimis burden. The Department requests comment on this assumption.

Costs Associated With the Retrospective Review

The proposed amendment would require small insurance companies to conduct a retrospective review at least annually. The review would be required to be reasonably designed to prevent violations of and achieve compliance with (1) the Impartial Conduct Standards, (2) the terms of this exemption, and (3) the policies and procedures governing compliance with the exemption. The review would be required to evaluate the effectiveness of the supervision system, any noncompliance discovered in connection with the review, and corrective actions taken or recommended, if any. Insurance companies would be required to annually provide a written report that details the review to a senior executive officer for certification. Insurance companies would also be required to provide the independent producer with

= \$8,252,960. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶⁴¹ The labor cost is estimated as: (51,925 disclosures × 5.8% sent by mail × (5 minutes + 60 minutes)) = 251 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: (51,925 disclosures × 5.8% sent by mail × (5 minutes + 60 minutes)) × \$63.45 = \$15,926. The material cost is estimated as: 3,012 rollovers resulting in a paper disclosure × [\$0.66 postage + (\$0.05 per page × 7 pages)] = \$3,042. The total cost is estimated as: \$15,926 + \$3,042 = \$18,968. For more information on the assumptions included in this calculation, refer to the RIA of this document.

the underlying methodology and results of the retrospective review.

As discussed in the RIA, the Department estimates that insurance companies would need to prepare a total of 12,000 retrospective reviews.⁶⁴² The Department does not have data on the proportion of retrospective reviews that would be prepared by small insurance companies. For the purpose of this analysis, the Department assumes that the number of retrospective reviews prepared by small insurance companies is proportionate to the number of small insurance companies. This results in an estimate of 9,879 retrospective reviews.⁶⁴³

The Department estimates that conducting and drafting the retrospective review would result in an estimated annual cost of \$1.6 million.⁶⁴⁴ Additionally, the Department estimates the cost for a certifying officer to review the report and certify the exemption would result in an estimated cost burden of \$0.3 million.⁶⁴⁵ Finally, the Department estimates that the requirement to provide the methodology and results to each independent producer would result in an annual cost of approximately \$52,200.⁶⁴⁶

Costs Associated With Policies and Procedures

The proposed amendment would require insurance companies to establish, maintain, and enforce written policies and procedures for the review of each independent producer's recommendation before an annuity is issued to a retirement investor. The insurance company's policies and procedures must mitigate conflicts of

⁶⁴² For more information on this estimate, refer to the RIA.

⁶⁴³ The number of retrospective reviews prepared by small insurance companies is estimated as: $[12,000 \times (177/215)] = 9,879$ retrospective reviews.

⁶⁴⁴ This is estimated as: (9,879 retrospective reviews × 1 hour) = 9,879 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (9,879 retrospective reviews × 1 hour) × \$159.34 = \$1,574,120. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶⁴⁵ The burden is estimated as: (9,879 retrospective reviews × (15 minutes ÷ 60 minutes)) = 2,470 hours. A labor rate of \$128.11 is used for a top executive. The labor rate is applied in the following calculation: (9,879 retrospective reviews × (15 minutes ÷ 60 minutes)) × \$128.11 = \$316,400. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶⁴⁶ This is estimated as: (9,879 retrospective reviews × (5 minutes ÷ 60 minutes)) = 823 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: (9,879 retrospective reviews × (5 minutes ÷ 60 minutes)) × \$63.45 = \$52,235. For more information on the assumptions included in this calculation, refer to the RIA of this document.

interest to the extent that a reasonable person reviewing the policies and procedures and incentive practices as a whole would conclude that they do not create an incentive for the independent producer to place its interests, or those of the insurance, or any affiliate or related entity, ahead of the interests of the retirement investor. Insurance companies' policies and procedures include a prudent process for determining whether to authorize an independent producer to sell the insurance company's annuity contracts to retirement investors, and for taking action to protect retirement investors from independent producers who have failed or are likely to fail to adhere to the impartial conduct standards, or who lack the necessary education, training, or skill. Finally, insurance companies must provide their complete policies and procedures to the Department within 10 days upon request. Finally, insurance companies must provide their complete policies and procedures to the Department within 10 days upon request.

The Department estimates that drafting or modifying the policies and procedures would result in an estimated cost of approximately \$0.1 million in the first year.⁶⁴⁷ The requirement to review policies and procedures annually would result in an estimated cost of approximately \$56,400 in subsequent years.⁶⁴⁸ Providing policies and procedures to the Department upon request is estimated to result in a de minimis annual cost.⁶⁴⁹

⁶⁴⁷ This is estimated as: (177 small insurance companies × 5 hours) = 885 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (177 small insurance companies × 5 hours) × \$159.34 = \$141,016. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶⁴⁸ This is estimated as: (177 insurance companies × 2 hours) = 354 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (177 insurance companies × 2 hours) × \$159.34 = \$56,406. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶⁴⁹ The number of requests in the first year is estimated as 177 small insurance companies × (39 requests in PTE 2020–02/4,430 small financial institutions in PTE 2020–02) = 2 requests. The number of requests in subsequent years is estimated as: 177 insurance companies × (12 requests in PTE 2020–02/4,430 small financial institutions in PTE 2020–02) = 1 request. The burden is estimated as: ((2 × 15 minutes) ÷ 60 minutes) = 0.50 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: ((2 × 15 minutes) ÷ 60 minutes) × \$63.45 = \$31.73.

Costs Associated With the Recordkeeping

The proposed amendment would amend the current recordkeeping requirements to incorporate new provisions that are similar to the recordkeeping provision in PTE 2020–02 for all entities relying on the exemption. The Department estimates that the additional time needed to

maintain records for the financial institutions to be consistent with the exemption would require an insurance company and independent producer two hours annually, resulting in an estimated annual cost of \$1.3 million.⁶⁵⁰ Additionally, the Department estimates that the requirement to distribute records upon request would result in an estimated annual cost of \$3.1 million.⁶⁵¹

Summary of Total Cost

The Department estimates that in order to meet the additional conditions of the amended PTE 84–24, affected entities would incur a total cost of \$17.4 million in the first year and \$14.7 million in subsequent years. The per-entity cost by type of entity is broken down in the table below.

TABLE 8—COST BY TYPE OF ENTITY AND REQUIREMENT, FIRST YEAR

	Independent producer	Insurance agents and pension consultants	Financial institutions/ insurance companies	Mutual fund underwriters
Rule Review:				
Total	\$1,261,973	\$296,372	\$56,406	\$6,374

Per-Entity Cost	3,960	319	12,835	319
SBA:				
Threshold (in millions)	15.0	45.5	47.0	47.0
Per-Entity Cost as a Percentage of SBA Threshold	0.021%	0.001%	0.027%	0.001%

Costs Associated With the Mass Amendments

Cost Associated With PTE 75–1

Summary of Affected Entities

The amendment to PTE 75–1 would affect banks, reporting dealers, and broker-dealers registered under the Security Exchange Act of 1934. As discussed in the Affected Entities section above, the Department estimates that 3,403 financial institutions, comprised of 1,835 broker-dealers and 1,568 banks, would use PTE 75–1.⁶⁵²

Costs Associated With Disclosure Requirements in Part V

The Department proposes to amend PTE 75–1 Part V to allow an investment advice fiduciary to receive reasonable

compensation for extending credit to a plan or IRA to avoid a failed purchase or sale of securities involving the plan or IRA if certain conditions are met.⁶⁵³ Prior to the extension of credit, the plan or IRA must receive written a disclosure, including the interest rate or other fees that will be charged on the credit extension as well as the method of determining the balance upon which interest will be charged. As discussed in the RIA, the Department expects that these disclosures are common business practice and would not create an additional burden on small broker-dealers or banks.

Costs Associated With Recordkeeping in Parts II and V

Additionally, the Department proposes to amend Parts II and V to adjust the recordkeeping requirement to shift the burden from plans and IRAs to financial institutions. The amended class exemption requires financial institutions engaging in the exempted transactions (rather than the plans or IRAs) to maintain all records pertaining to such transactions for six years and provide access to the records upon request to the specified parties. The Department estimates that the total cost for small financial institutions to maintain recordkeeping and provide access to records upon request is approximately \$2.6 million annually

⁶⁵⁰ This is estimated as: (3,960 independent producers + 177 insurance companies) × 2 hours = 8,274 hours. A labor rate of \$158.94 is used for an independent producer. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(3,960 independent producers × 2 hours × \$158.94) + (177 insurance companies × 2 hours × \$159.34)] = \$1,315,211.

⁶⁵¹ The burden is estimated as: (3,960 independent producers × 10 requests) × (30 minutes + 60 minutes) = 19,800 hours. A labor rate of \$158.94 is used for an independent producer. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(3,960 independent producers × 10 requests) × (30 minutes + 60 minutes)] × \$158.94 = \$3,147,012.

⁶⁵² For more information on how the number of each type of entity is estimated, refer to the Affected Entities sections of the RIA and the Regulatory Flexibility Analysis.

⁶⁵³ For more information on these conditions, refer to the Preamble and RIA of this document.

and the per-firm cost is approximately \$763 annually.⁶⁵⁴

Costs Associated With Removing Fiduciary Investment Advice From Parts III and IV

Finally, the Department is proposing to amend Parts III and IV, which currently provide relief for investment advice fiduciaries, by removing fiduciary investment advice from the

covered transactions. Investment advice providers would instead have to rely on the amended PTE 2020–02 for exemptive relief covering investment advice transactions. The Department believes that since investment advice providers were already required to provide records and documentation under PTE 2020–02, this amendment would not result in additional costs.

Summary of Total Cost

The Department estimates that in order to meet the additional conditions of the amended PTE 75–1, affected entities would annually incur a total cost of approximately \$2.6 million and a per-firm cost of approximately \$763. The per-entity cost by type of entity is broken down in the table below.

TABLE 9—COST BY TYPE OF ENTITY AND REQUIREMENT

	Broker-dealers	Commercial banks
Recordkeeping:		
Total	\$1,399,224	\$1,195,631
Per-Entity	763	763
Total:		
Total	1,399,224	1,195,631
Per-Entity	763	763
SBA		
Threshold (in millions)	47.0	850
Per-Entity Cost as a Percentage of SBA Threshold	0.0016%	0.0001%

Cost Associated With PTE 77–4, PTE 80–83, and PTE 83–1

Summary of Affected Entities

The amendment to PTE 77–4 would affect mutual fund companies. As discussed in the Affected Entities section, the Department estimates that 812 mutual fund companies would be affected by the amended PTE 77–4.⁶⁵⁵

PTE 80–83 allows banks to purchase, on behalf of employee benefit plans, securities issued by a corporation indebted to the bank that is a party in interest to the plan. The Department estimates that 19 small fiduciary-banks with public offering services would be affected by the amended PTE 80–83.⁶⁵⁶

PTE 83–1 provides relief for the sale of certificates in an initial issuance of certificates by the sponsor of a mortgage pool to a plan or IRA when the sponsor, trustee, or insurer of the mortgage pool is a fiduciary with respect to the plan or IRA assets invested in such certificates.

Summary of Total Cost

The Department is proposing to amend PTE 77–4, PTE 80–83, and PTE 83–1 by removing fiduciary investment advice from the covered transactions.

Investment advice providers would instead have to rely on the amended PTE 2020–02 for exemptive relief covering investment advice transactions. The Department believes that since investment advice providers were already required to provide such documentation under these exemptions, these amendments would result in a de minimis change for investment advice providers. Thus, these amendments would not result in measurable additional costs.

Cost Associated With PTE 86–128

Summary of Affected Entities

The amendment to PTE 86–128 would affect fiduciaries of employee benefit plans that affect or execute securities transactions and independent plan fiduciaries that authorize the plan or IRA. As discussed in the Affected Entities section, the Department estimates that 1,835 investment advice providers would be affected by the proposed amendments to PTE 86–128.

As discussed in the RIA, the Department estimates that 10,000 IRAs, will engage in transactions covered under this class exemption, of which 210 are new IRAs.⁶⁵⁷ The Department

estimates that 96.9 percent of these IRAs would be overseen by a small investment advice provider.⁶⁵⁸ As such, the Department estimates that, each year, there are 9,690 IRAs, of which 203 are new IRAs that would be overseen by a small investment advice provider.⁶⁵⁹

Costs Associated With Recordkeeping

The Department is proposing to amend Section VI of PTE 86–128 to require financial institutions to maintain for six years the records necessary for the Department, IRS, plan fiduciary, contributing employer or employee organization whose members are covered by the plan, participants and beneficiaries and IRA owners to determine whether conditions of this exemption have been met. As discussed above, the Department estimates that 395 small-business investment advice providers will be affected by this recordkeeping requirement. Applying this assumption to the cost calculations described above, the Department estimates that the total cost for small-business investment advice providers to maintain recordkeeping is \$204,011

⁶⁵⁴ The burden is estimated as: (3,403 small financial institutions × 4 hours) = 13,612 hours. A labor rate of \$190.63 is used for a financial manager. The labor rate is applied in the following calculation: (3,403 small financial institutions × 4 hours) × \$190.63 = \$2,594,856.

⁶⁵⁵ For more information on how the number of each type of entity is estimated, refer to the Affected Entities section.

⁶⁵⁶ For more information on how the number of each type of entity is estimated, refer to the Affected Entities section.

⁶⁵⁷ For more information on how the number of each type of entity is estimated, refer to the Affected Entities section.

⁶⁵⁸ Based on data from the NAICS Association for NAICS code 523120, the Departments estimate the percent of businesses within the industry of Securities Brokerage with less than \$47 million in

annual sales. (See NAICS Association. “Market Analysis Profile: NAICS Code Annual Sales.” <https://www.naics.com/business-lists/counts-by-naics-code/>.)

⁶⁵⁹ The number of IRAs overseen by a small investment provider is estimated as: 10,000 IRAs × 96.9% = 9,690 IRAs. The number of new IRAs overseen by a small investment provider is estimated as: 210 IRAs × 96.9% = 203 IRAs.

annually⁶⁶⁰ and the per-firm cost is \$111 annually.

Cost Associated With the Written Authorization From the Authorizing Fiduciary to the Broker-Dealer

Authorizing fiduciaries of IRAs entering into a relationship with an investment advice provider are required to provide the investment advice provider with advance written authorization to perform transactions for the IRA. As discussed in the Summary of Affected Entities section for this exemption in this analysis, the Department estimates that approximately 44 authorizing fiduciaries are expected to send an advance written authorization. Applying this assumption to the cost calculations described above, the Department estimates that the total cost to send an advance written authorization is approximately \$9,169 annually.⁶⁶¹ The per-transaction cost is \$45 annually, and the per-firm cost is \$5 annually.

Cost Associated With the Provision of Materials for Evaluation of Authorization of Transaction

Prior to a written authorization being made, the financial institution must provide the authorizing fiduciary with a copy of the exemption, a form for termination of authorization, a description of placement practices, and any other reasonably available information. This information is assumed to be readily available. As described above, the Department assumes this information will be sent to the 203 IRAs that enter into an

agreement with a financial institution. Applying this assumption to the cost calculations described above, Department estimates that the total cost to send the materials is \$1,085 annually.⁶⁶² The per-transaction cost is \$5 annually, and the per-firm cost is \$0.59 annually.

Cost Associated With the Provision of an Annual Termination Form

Financial institutions must annually supply each authorizing fiduciary with a form expressly providing an election to terminate the written authorization. The Department estimates that 395 investment advice providers would prepare the termination form, and 9,690 IRAs would receive the form. Applying these assumptions to the cost calculations described above, Department estimates that the total cost to prepare and send the annual termination form is approximately \$197,857 annually.⁶⁶³ The per-transaction cost is \$20 annually, and the per-firm cost is \$108 annually.

Transaction Reporting

The investment advice provider engaging in a covered transaction must give the authorizing fiduciary either a confirmation slips for each securities transaction or a quarterly report containing specified information. As discussed above, the provision of the confirmation is already required under SEC regulations. Therefore, if the transaction reporting requirement is satisfied by sending confirmation slips,

no additional hour and cost burden will occur.

Annual Statement

Broker-dealers are required to send an annual report to each authorizing fiduciary containing the same information as the quarterly report and all security transaction-related charges, the brokerage placement practices, and a portfolio turnover ratio. The Department assumes this information could be sent together. Therefore, the clerical staff hours required to prepare and distribute the report has been included with the provision of annual termination form requirement, and no additional burden has been reported.

However, collecting and generating the information required for the annual report is reported as a burden. As discussed above, the Department estimates that 2,100 IRAs will receive an annual report. Applying these assumptions to the cost calculations described above, the Department estimates that the total cost to collect and generate information for the annual report is \$141 annually.⁶⁶⁴ The per-account cost is \$0.01 annually, and the per-firm cost is \$0.08 annually.

Report of Commissions Paid

A discretionary trustee must provide each authorizing fiduciary with an annual report that separately shows the commissions paid to affiliated brokers and non-affiliated brokers on both a total dollar basis and a cents-per-share basis. The burden to prepare and distribute the report is included with the provision of annual termination form requirement, because both items are required to be sent annually. However, the collection and generation of the information for the quarterly report is reported as a burden. As described above, the Department estimates that 2,100 IRAs will receive a report of the commissions paid. Applying this assumption to the cost calculations described above, the Department estimates that the total cost to collect and generate information for the report of commission paid is \$56 annually.⁶⁶⁵ The per-account cost is

⁶⁶⁰ The burden is estimated as: 1,835 broker-dealers $\times$ ((30 minutes + 15 minutes) + 60 minutes) = 1,376 hours. The labor rates of \$190.63 and \$63.45 are used for a financial manager and a clerical worker, respectively. The labor rate is applied in the following calculation: (1,835 broker-dealers $\times$ (30 minutes + 60 minutes) $\times$ \$190.63 per hour) + (1,835 broker-dealers $\times$ (15 minutes + 60 minutes) $\times$ \$63.45) = \$204,011. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶⁶¹ The burden for a legal professional to prepare the authorization form is estimated as: 203 IRAs $\times$ (15 minutes + 60 minutes) per IRA = 51 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: 203 IRA $\times$ (15 minutes + 60 minutes) per IRA $\times$ \$159.34 per hour = \$8,087. The burden of clerical staff to send the authorization is estimated as: 203 IRA $\times$ (5 minutes + 60 minutes) per IRA = 16 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: 203 IRA $\times$ (5 minutes + 60 minutes) per IRA $\times$ \$63.45 = \$1,073. The material cost and postage cost associated with the authorization is estimated as: 203 authorizations for IRAs $\times$ 5.8% paper $\times$ \$0.76 = \$9. Therefore, the total cost to send an advance written authorization is estimated as: \$8,087 + \$1,073 + \$9 = \$9,169. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶⁶² The burden for a clerical worker to prepare the information is estimated as: 203 IRAs $\times$ (5 minutes + 60 minutes) per IRA = 17 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: 203 IRAs $\times$ (5 minutes + 60 minutes) per IRA $\times$ \$63.45 per hour = \$1,073. The material and postage cost are estimated as: 203 IRAs $\times$ 5.8% paper $\times$ (7 pages $\times$ \$0.05 per page + \$0.66 for postage) = \$12. Therefore, the total cost to send the materials is estimated as: \$1,073 + \$12 = \$1,085. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶⁶³ The burden for a legal professional to prepare the forms is estimated as: 1,835 broker-dealers $\times$ (30 minutes + 60 minutes) = 918 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: 1,835 broker-dealers $\times$ (30 minutes + 60 minutes) $\times$ \$159.34 = \$146,194. The burden for a clerical worker to prepare and send the forms is estimated as: 9,690 IRAs $\times$ (5 minutes + 60 minutes) = 808 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: 9,690 IRAs $\times$ (5 minutes + 60 minutes) $\times$ \$63.45 = \$51,236. The material and postage cost associated with the forms is estimated as: 9,690 IRAs $\times$ 5.8% paper $\times$ (2 pages $\times$ \$0.05 per page + \$0.66 for postage) = \$427. Therefore, total cost to prepare and send the annual termination form is estimated as: \$146,194 + \$51,236 + \$427 = \$197,857. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶⁶⁴ The mailing cost is estimated as: 5 pages $\times$ \$0.05 per page = \$0.25. The mailing rate is applied in the following calculation: 9,690 IRAs $\times$ 5.8% paper $\times$ \$0.25 = \$141. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶⁶⁵ The mailing cost is estimated as: 2 pages $\times$ \$0.05 per page = \$0.10. The mailing cost is applied in the following calculation: 9,690 IRAs $\times$ 5.8% $\times$ \$0.10 = \$56. For more information on the assumptions included in this calculation, refer to the RIA of this document.

\$0.01 annually, and the per-firm cost is less than \$0.03 annually.

Financial institutions are also required to report total of all transaction-related charges incurred by the plan in connection with covered transactions, the allocation of such charges among various persons, as well as a conspicuous statement about the negotiability of brokerage commissions and an estimate of future commission rates to the plan fiduciaries. The

information must be tracked, assigned to specific plans, and reported. As described above, the Department estimates that 9,690 IRAs will be affected by this requirement. Applying this assumption to the cost calculations described above, the Department estimates that the total cost to report this information is \$31,977 annually.⁶⁶⁶ The per-account cost is \$3.30 annually, and the per-firm cost is \$17 annually.

This results in a total annual cost of \$32,033.⁶⁶⁷

Summary of Total Cost

The Department estimates that in order to meet the additional conditions of the amended PTE 86–128, affected entities would annually incur a total cost of \$444,296 and a per-firm cost of \$242. The per-entity cost is broken down in the table below.

TABLE 10—COST BY TYPE OF ENTITY AND REQUIREMENT

	Total cost	Per-entity cost
Recordkeeping	\$204,011	\$111
Written Authorization from the Authorizing Fiduciary to the Broker-Dealer	9,169	5
Provision of Materials for Evaluation of Authorization of Transaction	1,085	0.59
Annual Termination Form	197,857	108
Annual Statement	141	0.08
Report of Commissions Paid	32,033	17
Total	444,296	242
SBA Threshold (in millions)		47.0
Per-Entity Cost as a Percentage of SBA Threshold		0.0005%

4. Duplicate, Overlapping, or Relevant Federal Rules

The rules in ERISA and the Code that govern advice on the investment of retirement assets overlap with SEC rules that govern the conduct of investment advisers and broker-dealers that advise retail investors. The Department considered conduct standards set by other regulators, such as SEC, NAIC, and FINRA, in developing the proposal, with the goal of avoiding overlapping or duplicative requirements. If the requirements overlap, compliance with the other disclosure or recordkeeping requirements can be used to satisfy the exemption, as long as the conditions are satisfied.

5. Description of Alternatives Considered

Section 604 of the RFA requires the Department to consider significant alternatives that would accomplish the stated objective, while minimizing any significant adverse impact on small entities. The Department tried to align the requirements in this proposal with the requirements set by other regulators to minimize regulatory burden.

The Department considered not amending PTE 2020–02 and leaving the exemption in its present form. The Department supports the existing PTE

2020–02 and has retained its core components in the amendment, including the Impartial Conduct Standards and the requirement for strong policies and procedures. However, the Department believes that additional protections are necessary to ensure that fiduciary investment advice providers adhere to the stringent standards outlined in PTE 2020–02. Therefore, the proposed amendments clarify and tighten the existing text of PTE 2020–02 to enhance the disclosure requirements and strengthen the disqualification provisions.

The Department has considered requiring financial institutions to disclose the sources of third-party compensation received in connection with recommended investment products on a public web page in PTE 2020–02. When considering this requirement, the Department discussed exempting small financial institutions from this disclosure. The Department estimates that such a disclosure would cost small entities \$4.8 million⁶⁶⁸ with an average per-entity cost of \$1,064. The Department requests comment on whether small financial institutions current provide website disclosures or have the technological infrastructure to do so.

I. Unfunded Mandate Reform Act

Title II of the Unfunded Mandates Reform Act of 1995⁶⁶⁹ requires each federal agency to prepare a written statement assessing the effects of any federal mandate in a proposed or final rule that may result in an expenditure of \$100 million or more (adjusted annually for inflation with the base year 1995) in any one year by state, local, and tribal governments, in the aggregate, or by the private sector. That threshold is approximately \$177 million in 2023.

For purposes of the Unfunded Mandates Reform Act, this proposal is expected to have an impact on the private sector. For the purposes of the proposal, the RIA shall meet the UMRA obligations.

J. Federalism Statement

Executive Order 13132 outlines the fundamental principles of federalism. It also requires federal agencies to adhere to specific criteria in formulating and implementing policies that have “substantial direct effects” on the states, the relationship between the national government and states, or on the distribution of power and responsibilities among the various levels of government. Federal agencies promulgating regulations that have these federalism implications must

⁶⁶⁶ This burden is estimated as: 9,690 IRAs × \$3.30 = \$31,977. For more information on the assumptions included in this calculation, refer to the RIA of this document.

⁶⁶⁷ This burden is estimated as: \$56 + \$31,977 = \$32,033.

⁶⁶⁸ This estimate is based on the assumption that satisfying this requirement would require a computer programmer to spend, on average, 8 hours. A labor rate of \$133.05 is used for a computer programmer professional. The cost is

estimated as: (4,512 small financial institutions × 8 hours) × \$133.05 = \$4,802,573.

⁶⁶⁹ Unfunded Mandates Reform Act of 1995, *Public Law 104–4, 109 Stat. 48*, (1995).

consult with state and local officials throughout the process of developing the proposed regulation.

As discussed throughout this analysis, this proposed regulatory action would affect the insurance industry pertaining to annuities. These entities are also regulated by states, many of whom, as discussed in the discussion of the regulatory baseline, have taken regulatory or legislative actions. The Department has carefully considered the regulatory landscape in the states and worked to ensure that its proposed regulations would not impose obligations on advisers that are inconsistent with their responsibilities under state law, including the obligations imposed in states that based their laws on the NAIC Model Regulation. Nor would these proposed regulations impose obligations or costs on the state regulators. As discussed above, however, the Department has increased the protections afforded by many of these laws, consistent with its own responsibilities under ERISA, and has endeavored to lend greater uniformity on the provision of advice to retirement investors, so that advisers covered by the rule must all abide by a uniform fiduciary standard. The Department has had discussions with state insurance regulators and state-regulated parties about these issues including the need to ensure that retirement investors have sufficient protection when receiving investment advice. The Department expects to continue discussions with state insurance regulators to ensure that this proposed regulation complements the protections provided by the NAIC Model Rule. The Department also expects to continue its discussion with state securities regulators.

Authority

This regulation is proposed pursuant to the authority in section 505 of ERISA (Pub. L. 93–406, 88 Stat. 894 (Sept. 2, 1974); 29 U.S.C. 1135) and section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713 (Oct. 17, 1978)), 3 CFR, 1978 Comp. 332, effective December 31, 1978 (44 FR 1065 (Jan. 3, 1979)), 3 CFR, 1978 Comp. 332, 5 U.S.C. App. 237, and under Secretary of Labor's Order No. 1–2011, 77 FR 1088 (Jan. 9, 2012).

List of Subjects in 29 CFR Part 2510

Employee benefit plans, Employee Retirement Income Security Act, Pensions, Plan assets.

For the reasons set forth in the preamble, the Department is proposing to amend part 2510 of subchapter B of Chapter XXV of Title 29 of the Code of Federal Regulations as follows:

PART 2510—DEFINITIONS OF TERMS USED IN SUBCHAPTERS C, D, E, F, AND G OF THIS CHAPTER

■ 1. The authority citation for part 2510 is revised to read as follows:

Authority: 29 U.S.C. 1002(1)–(8), 1002(13)–(16), 1002(20), 1002(21), 1002(34), 1002(37), 1002(38), 1002(40)–(44), 1031, and 1135; Div. O, Title I, Sec. 101, Pub. L. 116–94, 133 Stat. 2534 (Dec. 20, 2019); Div. T, Title I, Sec. 105, Pub. L. 117–328, 136 Stat. 4459 (Dec. 29, 2022); Secretary of Labor's Order 1–2011, 77 FR 1088 (Jan. 9, 2012); Secs. 2510.3–21, 2510.3–101 and 2510.3–102 also issued under Sec. 102 of Reorganization Plan No. 4 of 1978, 5 U.S.C. App. 237 (E.O. 12108, 44 FR 1065 (Jan. 3, 1979)), and 29 U.S.C. 1135 note. Section 2510.3–38 also issued under Sec. 1(b) Pub. L. 105–72, 111 Stat. 1457 (Nov. 10, 1997).

■ 2. Revise § 2510.3–21 to read as follows:

§ 2510.3–21 Definition of “Fiduciary.”

(a)–(b) [Reserved]

(c) *Investment advice.* (1) For purposes of section 3(21)(A)(ii) of the Employee Retirement Income Security Act of 1974 (the Act), section 4975(e)(3)(B) of the Internal Revenue Code (Code), and this paragraph, a person renders “investment advice” with respect to moneys or other property of a plan or IRA if the person makes a recommendation of any securities transaction or other investment transaction or any investment strategy involving securities or other investment property (as defined in paragraph (f)(10) of this section) to the plan, plan fiduciary, plan participant or beneficiary, IRA, IRA owner or beneficiary or IRA fiduciary (retirement investor), and the person satisfies paragraphs (c)(1)(i), (ii), or (iii) of this section:

(i) The person either directly or indirectly (e.g., through or together with any affiliate) has discretionary authority or control, whether or not pursuant to an agreement, arrangement, or understanding, with respect to purchasing or selling securities or other investment property for the retirement investor;

(ii) The person either directly or indirectly (e.g., through or together with any affiliate) makes investment recommendations to investors on a regular basis as part of their business and the recommendation is provided under circumstances indicating that the recommendation is based on the particular needs or individual circumstances of the retirement investor and may be relied upon by the retirement investor as a basis for investment decisions that are in the retirement investor's best interest; or

(iii) The person making the recommendation represents or acknowledges that they are acting as a fiduciary when making investment recommendations.

(iv) For purposes of this paragraph, when advice is directed to a plan or IRA fiduciary, the relevant retirement investor is both the plan or IRA and the fiduciary.

(v) Written statements by a person disclaiming status as a fiduciary under the Act, the Code, or this section, or disclaiming the conditions set forth in paragraph (c)(1)(ii) of this section, will not control to the extent they are inconsistent with the person's oral communications, marketing materials, applicable State or Federal law, or other interactions with the retirement investor.

(2) A person who is a fiduciary with respect to a plan or IRA by reason of rendering investment advice (as defined in paragraph (c)(1) of this section) for a fee or other compensation, direct or indirect, with respect to any moneys or other property of such plan or IRA, or having any authority or responsibility to do so, shall not be deemed to be a fiduciary regarding any assets of the plan or IRA with respect to which such person does not have any discretionary authority, discretionary control, or discretionary responsibility, does not exercise any authority or control, does not render investment advice (as defined in paragraph (c)(1) of this section) for a fee or other compensation, and does not have any authority or responsibility to render such investment advice, provided that nothing in this paragraph shall be deemed to:

(i) Exempt such person from the provisions of section 405(a) of the Act concerning liability for fiduciary breaches by other fiduciaries with respect to any assets of the plan; or

(ii) Exclude such person from the definition of the term “party in interest” (as set forth in section 3(14)(B) of the Act) or “disqualified person” (as set forth in section 4975(e)(2) of the Code) with respect to any assets of the plan or IRA.

(d) *Execution of securities transactions.* (1) A person who is a broker or dealer registered under the Securities Exchange Act of 1934, a reporting dealer who makes primary markets in securities of the United States Government or of an agency of the United States Government and reports daily to the Federal Reserve Bank of New York its positions with respect to such securities and borrowings thereon, or a bank supervised by the United States or a State, shall not be deemed to be a

fiduciary, within the meaning of section 3(21)(A) of the Act or section 4975(e)(3)(B) of the Code, with respect to a plan or an IRA solely because such person executes transactions for the purchase or sale of securities on behalf of such plan or IRA in the ordinary course of its business as a broker, dealer, or bank, pursuant to instructions of a fiduciary with respect to such plan or IRA, if:

(i) Neither the fiduciary nor any affiliate of such fiduciary is such broker, dealer, or bank; and

(ii) The instructions specify

(A) The security to be purchased or sold,

(B) A price range within which such security is to be purchased or sold, or, if such security is issued by an open-end investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1, *et seq.*), a price which is determined in accordance with Rule 22c–1 under the Investment Company Act of 1940 (17 CFR 270.22c–1),

(C) A time span during which such security may be purchased or sold (not to exceed five business days), and

(D) The minimum or maximum quantity of such security which may be purchased or sold within such price range, or, in the case of a security issued by an open-end investment company registered under the Investment Company Act of 1940, the minimum or maximum quantity of such security which may be purchased or sold, or the value of such security in dollar amount which may be purchased or sold, at the price referred to in paragraph (d)(1)(ii)(B) of this section.

(2) A person who is a broker-dealer, reporting dealer, or bank which is a fiduciary with respect to a plan or IRA solely by reason of the possession or exercise of discretionary authority or discretionary control in the management of the plan or IRA or the management or disposition of plan or IRA assets in connection with the execution of a transaction or transactions for the purchase or sale of securities on behalf of such plan or IRA which fails to comply with the provisions of paragraph (d)(1) of this section shall not be deemed to be a fiduciary regarding any assets of the plan or IRA with respect to which such broker-dealer, reporting dealer or bank does not have any discretionary authority, discretionary control, or discretionary responsibility, does not exercise any authority or control, does not render investment advice (as defined in paragraph (c)(1) of this section) for a fee or other compensation, and does not have any authority or responsibility to

render such investment advice, provided that nothing in this paragraph shall be deemed to:

(i) Exempt such broker-dealer, reporting dealer, or bank from the provisions of section 405(a) of the Act concerning liability for fiduciary breaches by other fiduciaries with respect to any assets of the plan; or

(ii) Exclude such broker-dealer, reporting dealer, or bank from the definition, of the term “party in interest” (as set forth in section 3(14)(B) of the Act) or “disqualified person” (as set forth in section 4975(e)(2) of the Code) with respect to any assets of the plan or IRA.

(e) *For a fee or other compensation, direct or indirect.* For purposes of section 3(21)(A)(ii) of the Act and section 4975(e)(3)(B) of the Code, a person provides investment advice “for a fee or other compensation, direct or indirect,” if the person (or any affiliate) receives any explicit fee or compensation, from any source, for the advice or the person (or any affiliate) receives any other fee or other compensation, from any source, in connection with or as a result of the recommended purchase, sale, or holding of a security or other investment property or the provision of investment advice, including, though not limited to, commissions, loads, finder’s fees, revenue sharing payments, shareholder servicing fees, marketing or distribution fees, mark ups or mark downs, underwriting compensation, payments to brokerage firms in return for shelf space, recruitment compensation paid in connection with transfers of accounts to a registered representative’s new broker-dealer firm, expense reimbursements, gifts and gratuities, or other non-cash compensation. A fee or compensation is paid “in connection with or as a result of” such transaction or service if the fee or compensation would not have been paid but for the recommended transaction or the provision of advice, including if eligibility for or the amount of the fee or compensation is based in whole or in part on the recommended transaction or the provision of advice.

(f) *Definitions.* For purposes of this section—

(1) The term “affiliate” means any person directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with such person; any officer, director, partner, employee, representative, or relative (as defined in paragraph (f)(12) of this section) of such person; and any corporation or partnership of which such person is an officer, director, or partner.

(2) The term “control” means the power to exercise a controlling influence over the management or policies of a person other than an individual.

(3) The term “IRA” means any account or annuity described in Code section 4975(e)(1)(B) through (F), including, for example, an individual retirement account described in section 408(a) of the Code and a health savings account described in section 223(d) of the Code.

(4) The term “IRA owner” means, with respect to an IRA, either the person who is the owner of the IRA or the person for whose benefit the IRA was established.

(5) The term “IRA fiduciary” means a person described in section 4975(e)(3) of the Code with respect to an IRA.

(6) The term “plan” means any employee benefit plan described in section 3(3) of the Act and any plan described in section 4975(e)(1)(A) of the Code.

(7) The term “plan fiduciary” means a person described in section (3)(21)(A) of the Act and/or 4975(e)(3) of the Code with respect to a plan. For purposes of this section, a participant or beneficiary of the plan who is receiving advice is not a “plan fiduciary” with respect to the plan.

(8) The term “plan participant” or “participant” means, for a plan described in section 3(3) of the Act, a person described in section 3(7) of the Act.

(9) The term “beneficiary” means, for a plan described in section 3(3) of the Act, a person described in section 3(8) of the Act.

(10) The phrase “recommendation of any securities transaction or other investment transaction or any investment strategy involving securities or other investment property” means recommendations:

(i) As to the advisability of acquiring, holding, disposing of, or exchanging, securities or other investment property, as to investment strategy, or as to how securities or other investment property should be invested after the securities or other investment property are rolled over, transferred, or distributed from the plan or IRA;

(ii) As to the management of securities or other investment property, including, among other things, recommendations on investment policies or strategies, portfolio composition, selection of other persons to provide investment advice or investment management services, selection of investment account arrangements (e.g., account types such as brokerage versus advisory) or voting of proxies appurtenant to securities; and

(iii) As to rolling over, transferring, or distributing assets from a plan or IRA, including recommendations as to whether to engage in the transaction, the amount, the form, and the destination of such a rollover, transfer, or distribution.

(11) The term “investment property” does not include health insurance policies, disability insurance policies, term life insurance policies, or other property to the extent the policies or property do not contain an investment component.

(12) The term “relative” means a person described in section 3(15) of the Act and section 4975(e)(6) of the Code or a brother, a sister, or a spouse of a brother or sister.

(g) *Applicability.* Effective December 31, 1978, section 102 of the Reorganization Plan No. 4 of 1978, 5 U.S.C. App. 237, transferred the authority of the Secretary of the Treasury to promulgate regulations of the type published herein to the Secretary of Labor. Accordingly, in addition to defining a “fiduciary” for purposes of section 3(21)(A)(ii) of the Act, this section applies to the parallel provision in section 4975(e)(3)(B) of the Code, which defines a “fiduciary” of a plan defined in Code section 4975 (including an IRA) for purposes of the prohibited transaction provisions in the Code. For example, a person who satisfies paragraphs (c)(1) and (e) of this section in connection with a recommendation to a retirement investor that is an employee benefit plan as defined in section 3(3) of the Act, a fiduciary of such a plan, or a participant or beneficiary of such plan, including a recommendation concerning the rollover of assets currently held in a plan to an IRA, is a fiduciary subject to Title I of the Act.

(h) *Continued applicability of State law regulating insurance, banking, or securities.* Nothing in this section shall be construed to affect or modify the provisions of section 514 of Title I of the Act, including the savings clause in section 514(b)(2)(A) for State laws that regulate insurance, banking, or securities.

Signed at Washington, DC, this 24th day of October, 2023.

Lisa M. Gomez,

Assistant Secretary, Employee Benefits Security Administration, Department of Labor.

Proposed Amendment to Prohibited Transaction Exemption 2020–02

AGENCY: Employee Benefits Security Administration, U.S. Department of Labor.

ACTION: Notice of Proposed Amendment to Class Exemption PTE 2020–02.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed amendment to class prohibited transaction exemption (PTE) 2020–02, which provides relief for certain compensation received by investment advice fiduciaries. The proposed amendment would affect participants and beneficiaries of Plans, IRA owners, and fiduciaries with respect to such Plans and IRAs.

DATES: *Public Comments.* Comments are due on or before January 2, 2024.

Public Hearing. The Department anticipates holding a public hearing approximately 45 days following the date of publication in the **Federal Register**. Specific information regarding the date, location, and submission of requests to testify will be published in a notice in the **Federal Register**.

Applicability Date. The Department proposes to make the final amendment effective 60 days after it is published in the **Federal Register**.

ADDRESSES: All written comments concerning the proposed amendment should be sent to the Employee Benefits Security Administration, Office of Exemption Determinations, U.S. Department of Labor through the Federal eRulemaking Portal and identified by Application No. D–12057:

Federal eRulemaking Portal: Visit <http://www.regulations.gov>. Follow the instructions for sending comments.

Docket: For access to the docket to read background documents or comments, including the plain-language summary of the proposal required by the Providing Accountability Through Transparency Act of 2023, please go to the Federal eRulemaking Portal at <http://www.regulations.gov>.

See **SUPPLEMENTARY INFORMATION** below for additional information regarding comments.

FOR FURTHER INFORMATION CONTACT: Susan Wilker, telephone (202) 693–

8540, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor (this is not a toll-free number).

SUPPLEMENTARY INFORMATION:

Comment Instructions

Warning: All comments received will be included in the public record without change and will be made available online at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be confidential or other information whose disclosure is restricted by statute. If you submit a comment, EBSA recommends that you include your name and other contact information, but DO NOT submit information that you consider to be confidential, or otherwise protected (such as Social Security number or an unlisted phone number), or confidential business information that you do not want publicly disclosed. However, if EBSA cannot read your comment due to technical difficulties and cannot contact you for clarification, EBSA might not be able to consider your comment. Additionally, the <http://www.regulations.gov> website is an “anonymous access” system, which means EBSA will not know your identity or contact information unless you provide it. If you send an email directly to EBSA without going through <http://www.regulations.gov>, your email address will be automatically captured and included as part of the comment that is placed in the public record and made available on the internet.

Background

The proposed amendment to PTE 2020–02 would provide additional protections for employee benefit plans described in ERISA section 3(3) and any plan described in Code section 4975(e)(1)(A) (Plans) and investors and additional clarity for investment advice fiduciaries seeking to receive compensation for their advice, including as a result of advice to roll over assets from a Plan to an individual retirement account (IRA), and to engage in principal transactions, that would otherwise violate the prohibited transaction provisions of Title I of the Employee Retirement Income Security Act of 1974 (ERISA) and Internal Revenue Code (Code) section 4975.

As described elsewhere in this edition of the **Federal Register**, the Department is proposing to amend the regulation defining when a person renders “investment advice for a fee or other compensation, direct or indirect” with

respect to any moneys or other property of an employee benefit plan, for purposes of the definition of a “fiduciary” in section 3(21)(A)(ii) of ERISA and in section 4975(e)(3)(B) of the Code. The Department also is proposing amendments to existing prohibited transaction exemptions (PTEs) 75–1, 77–4, 80–83, 83–1, 86–128, and 84–24 elsewhere in this edition of the **Federal Register**.

Description of the Proposed Amendment to PTE 2020–02

The Department is proposing to amend PTE 2020–02, which was designed to promote investment advice that is in the best interest of retirement investors (for example, Plan participants and beneficiaries, and IRA owners) by permitting advisers to receive compensation for the advice that is otherwise barred by statute so long as advisers comply with the terms of the exemption. The current exemption conditions emphasize mitigating conflicts of interest and ensuring that retirement investors receive advice that is prudent and loyal. An important objective of the existing exemption is to require fiduciary investment advice providers to adhere to stringent standards that are designed to ensure that their investment recommendations reflect the best interest of Plan and IRA investors. Accordingly, under the current framework of PTE 2020–02, Financial Institutions and Investment Professionals relying on the existing exemption must:

- acknowledge their fiduciary status¹ in writing;
- disclose their services and material conflicts of interest;
- adhere to Impartial Conduct Standards requiring them to:
 - investigate and evaluate investments, provide advice, and exercise sound judgment in the same way that knowledgeable and impartial professionals would (in other words, their recommendations must be “prudent”);
 - act with undivided loyalty to retirement investors when making recommendations (in other words, they must never place their own interests ahead of the retirement investor’s interest, or subordinate the retirement investor’s interests to their own);
 - charge no more than reasonable compensation and comply with Federal

securities laws regarding “best execution”; and

- avoid making misleading statements about investment transactions and other relevant matters;
 - adopt policies and procedures prudently designed to ensure compliance with the Impartial Conduct Standards and mitigate conflicts of interest that could otherwise cause violations of those standards;
 - document and disclose the specific reasons that any rollover recommendations are in the retirement investor’s best interest; and
 - conduct an annual retrospective compliance review.

The Department is proposing to maintain all of these core protections in PTE 2020–02 that provide fundamental investor protections.

This proposed amendment would build on these existing conditions to provide more certainty for Retirement Investors receiving advice and Financial Institutions and Investment Professionals complying with the exemption’s conditions. In this regard, the Department is proposing additional disclosures to ensure that Retirement Investors have sufficient information to make informed decisions about the costs of the investment advice transaction and about the significance and severity of the investment advice fiduciary’s Conflicts of Interest. The proposed amendment also would provide more guidance for Financial Institutions and Investment Professionals complying with the Impartial Conduct Standards and implementing their policies and procedures.

Importantly, the Department is not proposing to require a contract for investment advice to IRAs, as it did in 2016. Neither the existing PTE 2020–02 nor the proposed amendment creates any new causes of action or requires Financial Institutions to provide enforceable warranties to Retirement Investors. The primary penalty for an IRA fiduciary that engages in a non-exempt prohibited transaction by failing to satisfy the exemption conditions of amended PTE 2020–02 would be the prohibited transaction excise tax imposed under Code section 4975 and enforced by the Department of the Treasury and the Internal Revenue Service (IRS). This proposal would require Financial Institutions, as part of their retrospective review, to report any non-exempt prohibited transactions in connection with fiduciary investment advice by filing IRS Form 5330, correcting those transactions, and paying any resulting excise taxes. The proposed amendment would add failure to correct prohibited transactions, report

those transactions to the IRS on Form 5330, and pay the resulting excise tax imposed under Code section 4975 to the list of behaviors that could make a Financial Institution ineligible to rely on PTE 2020–02 for ten years. The Department believes these proposed conditions would provide important protections to Retirement Investors by enhancing the existing protections of PTE 2020–02.

Effective Date

PTE 2020–02 was originally published on December 18, 2020, and it became effective on February 16, 2021. The Department proposes that the amendment to PTE 2020–02 will be effective on the date that is 60 days after the publication of a final amendment in the **Federal Register**. This current exemption (PTE 2020–20) will remain effective under its existing conditions until the effective date of a final amendment, if granted.

To provide absolute clarity, the Department confirms that the restrictions of ERISA section 406(a)(1)(A), 406(a)(1)(D), and 406(b) and the sanctions imposed by Code section 4975(a) and (b), by reason of Code section 4975(c)(1)(A), (D), (E) and (F), would not apply to the receipt of compensation by a Financial Institution, Investment Professional, or any Affiliate and Related Entity in connection with investment advice, if the recommendation were made before the effective date of the final amendment to PTE 2020–02, or if the compensation was received pursuant to a systematic purchase program established before the effective date of the final amendment. Also, no party would be required to comply with the amended conditions for a transaction that occurred before the effective date of the final amended exemption.

Exemption Scope

The Department is proposing minor changes and clarifications to the scope of the exemption. PTE 2020–02 currently permits Financial Institutions, Investment Professionals, and their Affiliates and Related Entities to receive reasonable compensation as a result of providing fiduciary investment advice, including as a result of investment advice to roll over assets from a Plan to an IRA. Subject to additional conditions, the exemption also provides relief for Financial Institutions, Investment Professionals, Affiliates and Related Entities to engage in certain principal transactions, and to receive a mark-up, mark-down, or other payment. The Department is not proposing changes to these covered transactions.

¹ For purposes of this disclosure, and throughout the exemption, the term fiduciary status is limited to fiduciary status under Title I of ERISA, the Code, or both. While this exemption and the SEC’s Regulation Best Interest both use the term “best interest,” the Department retains interpretive authority with respect to satisfaction of this exemption.

At the same time, the Department notes that more parties may need to rely on an amended PTE 2020–02, because of the Department’s proposed amendment to the definition of “fiduciary investment advice.” If the new rule is adopted, parties that have not been fiduciaries under the five-part test may become fiduciaries in the future. In addition, the Department is proposing to amend other class prohibited transaction exemptions that provide relief for fiduciary investment advice.² Parties that have been relying on those exemptions may choose to comply with the amended PTE 2020–02 instead. The Department requests comment on whether other or additional changes are needed to the scope of the exemption in light of the changes proposed elsewhere in this edition of the **Federal Register**.

Covered Principal Transactions

The Department is proposing minor changes to the definition of Covered Principal Transaction. As proposed, a “Covered Principal Transaction” is a principal transaction that:

(1) For sales to a Plan or an IRA:

(i) Involves a U.S. dollar denominated debt security issued by a U.S. corporation and offered pursuant to a registration statement under the Securities Act of 1933, a U.S. Treasury Security, a debt security issued or guaranteed by a U.S. federal government agency other than the Department of the Treasury, a debt security issued or guaranteed by a government-sponsored enterprise, a municipal security, a certificate of deposit, an interest in a Unit Investment Trust, or any investment permitted to be sold by an investment advice fiduciary to a Retirement Investor under an individual exemption granted by the Department after the effective date of this exemption that includes the same conditions as this exemption; and

(ii) A debt security may only be recommended in accordance with written policies and procedures adopted by the Financial Institution that are reasonably designed to ensure that the security, at the time of the recommendation, has no greater than moderate credit risk and sufficient liquidity that it could be sold at or near carrying value within a reasonably short period of time; and

(2) For purchases from a Plan or an IRA, involves any securities or investment property.

This is very similar to the current definition in PTE 2020–02, with minor wording changes for clarity. The Department is considering revising the beginning of Section II(d) to read “A ‘Covered Principal Transaction’ is a principal transaction for cash that . . .” Adding the phrase “for cash” would prevent in-kind transactions from being Covered Principal Transactions. The Department seeks comment on this revision and particularly would like to receive information regarding whether eliminating in-kind assets would reduce the complexity and conflicts of interest involved in these transactions.

The Department is also proposing to add a definition of Riskless Principal Transaction to PTE 2020–02. Proposed Section V(l) provides that “Riskless Principal Transaction” means a transaction in which a Financial Institution, after having received an order from a Retirement Investor to buy or sell an asset, purchases or sells the asset for the Financial Institution’s own account to offset the contemporaneous transaction with the Retirement Investor. A Riskless Principal Transaction is not a Covered Principal Transaction. While these are technically executed as principal transactions, the Department is not including them in the definition of Covered Principal Transaction. Thus, there is no limitation on the types of products that may be sold in a Riskless Principal Transaction. Adding the definition provides clarity regarding which transactions qualify as Riskless Principal Transactions. The Department requests comment on this definition. The Department notes that Financial Institutions should take care in determining that a product is eligible for a Covered Principal Transaction or Riskless Principal Transaction. These definitions are intentionally narrow, based on the potentially acute conflicts of interest created by principal transactions. If a Financial Institution later determines that an Investment Professional recommended a principal transaction that was neither a Covered Principal Transaction nor a Riskless Principal Transaction, then that transaction was not eligible for this exemption and may need to be reversed to put the Retirement Investor in the same position they would have been if the transaction had not occurred.

Financial Institutions, Investment Professionals, and Retirement Investors

The Department is not proposing substantive changes to definitions of the parties that can rely on the exemption. PTE 2020–02 is available to Financial Institutions (registered investment

advisers,³ broker-dealers, banks,⁴ and insurance companies) and their Investment Professionals (individual employees, agents, and representatives) that provide fiduciary investment advice to Retirement Investors (Plan participants and beneficiaries, IRA owners, and Plan and IRA fiduciaries).⁵ As it did in 2020, the Department requests comment on this definition of Financial Institution and whether any other type of entity should be included.⁶

The Department is proposing a very minor change to the definition of “Retirement Investor.” Proposed Section V(l) defines Retirement Investor as “(1) A participant or beneficiary of a Plan with authority to direct the investment of assets in his or her account or to take a distribution; (2) The beneficial owner of an IRA acting on behalf of the IRA; or (3) A fiduciary of a Plan or an IRA.” In the proposed amendment, the definition of Retirement Investor is re-designated as Section V(n), and section V(n)(3) reads “A fiduciary acting on behalf of a Plan or an IRA.” The Department intends this

³ The definition of Financial Institution in Section V(e) includes an entity that is “(1) Registered as an investment adviser under the Investment Advisers Act of 1940 (15 U.S.C. 80b–1 *et seq.*) or under the laws of the state in which the adviser maintains its principal office and place of business.” References in the preamble to registered investment advisers include both SEC- and state-registered investment advisers.

⁴ Section V(e)(2) includes “A bank or similar financial institution supervised by the United States or a state, or a savings association (as defined in section 3(b)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1813(b)(1)))” In the preamble to PTE 2020–02, the Department clarified that the Department interprets this definition to extend to credit unions.” 85 FR 82811.

⁵ As defined in Section V(i) of the exemption, the term “Plan” means any employee benefit plan described in ERISA section 3(3) and any plan described in Code section 4975(e)(1)(A). In Section V(g), the term “Individual Retirement Account” or “IRA” is defined as any account or annuity described in Code section 4975(e)(1)(B) through (F), including an Archer medical savings account, a health savings account, and a Coverdell education savings account. While the Department uses the term “Retirement Investor” throughout this document, the exemption is not limited only to investment advice fiduciaries of employee pension benefit plans and IRAs. Relief would be available for investment advice fiduciaries of employee welfare benefit plans as well.

⁶ 85 FR 40838 (“The Department seeks comment on the definition of Financial Institution in general and whether any other type of entity should be included. The Department also seeks comment as to whether the definition is overly broad, or whether Retirement Investors would benefit from a narrowed list of Financial Institutions. In addition, the Department requests comment on whether the definition of Financial Institution is sufficiently broad to cover firms that render advice with respect to investments in Health Savings Accounts (HSA), and about the extent to which Plan participants receive investment advice in connection with such accounts.”) In finalizing PTE 2020–02, the Department determined to not expand the scope of the exemption.

² Elsewhere in this edition of the **Federal Register**, the Department is proposing to amend PTEs 75–1, 77–4, 80–83, 84–24, and 86–128.

as a mere clarification that advice provided to a Plan or IRA fiduciary must be in the Best Interest of the Plan or IRA, and not the Best Interest of the fiduciary. The Department requests comment on whether additional clarifications are necessary.

Exclusions

PTE 2020–02 Section I(c) provides that the exemption does not apply in certain situations. The Department is proposing changes to expand the availability of this exemption, to facilitate more Financial Institutions and Investment Professionals providing high quality advice to Retirement Investors.

Pooled Employer Plans (PEPs)

PTE 2020–02 Section I(c)(1) currently provides an exclusion from the exemption if the Plan is covered by Title I of ERISA and the Investment Professional, Financial Institution or any Affiliate is (A) the employer of employees covered by the Plan, or (B) a named fiduciary or plan administrator with respect to the Plan that was selected to provide advice to the Plan by a fiduciary who is not independent of the Financial Institution, Investment Professional, and their Affiliates. In 2020, the Department received comments requesting additional guidance and clarification regarding the exemption's application to PEPs, which were authorized by the Setting Every Community Up for Retirement Enhancement Act of 2019 (SECURE Act).⁷ In finalizing PTE 2020–02, the Department explained its belief that it was premature to address issues related to PEPs, given their recent origination, unique structure, and likelihood of significant variations in potential business models, as the Pooled Plan Providers (PPPs) were still deciding how to structure their operations.⁸ Based on PEP developments since December 2020, including the Department's final rule establishing registration requirements for PPPs under 29 CFR 2510.3–44, the Department is now proposing to change the exclusions so that PTE 2020–02 clearly would cover investment advice provided by an Investment Professional, Financial Institution, or any Affiliate that is a PPP. The proposal amends the existing exclusion to clearly provide that a PPP

can provide investment advice to a PEP within the framework of the exemption. This would allow PEPs to receive investment advice in the same manner as other ERISA plans. The proposed text would allow Investment Professionals, Financial Institutions, or any Affiliates to be a named fiduciary or plan administrator of the PEP, if that named fiduciary or plan administrator is a PPP that is registered with the Department under 29 CFR 2510.3–44. However, it would not provide relief for a PPP's decision to hire an affiliated or related party as an advice provider.

To ensure PEPs are properly covered, the Department is also proposing certain changes to the definitions in Section V. The proposed amendment would add the defined terms “PEP” and “PPP” by referencing ERISA section 3(43) and 3(44), the statutory provisions defining PEPs and PPPs that were added to ERISA by the SECURE Act. The Department seeks comment on how PEPs and PPPs may use this exemption. For example, will advice be provided directly to the PEP, or will it be provided to the PPP in connection with the PEP? Will the exemption be used to provide advice to employers participating in the PEP?

Robo Advice

The Department is proposing to remove PTE 2020–02 Section I(c)(2), which excludes investment advice generated solely by an interactive website in which computer software-based models or applications provide investment advice based on personal information each investor supplies through the website, without any personal interaction or advice with an Investment Professional (robo-advice). As explained in the preamble to PTE 2020–02, the statutory exemption in ERISA section 408(b)(14), (g), and Code section 4975(d)(17) and 4975(f)(8), includes specific conditions that are tailored to computer-generated investment advice. PTE 2020–02, by contrast, was tailored to investment advice that is provided through a human Investment Professional who is supervised by a Financial Institution. The Department is now proposing to amend PTE 2020–02 to allow Financial Institutions providing investment advice through computer models to rely on the exemption. The Department understands that Financial Institutions may use a combination of computer models and individual Investment Professionals to provide investment advice and may wish to have a single set of policies and procedures that can govern all recommendations, regardless of whether a Retirement Investor speaks

with an Investment Professional. Including computer-generated advice in this exemption would simplify Financial Institutions' compliance, so that a Retirement Investor could request an Investment Professional's assistance with a particular transaction, or an Investment Professional could review the computer model's recommendations, without separate analysis as to whether an Investment Professional has provided fiduciary investment advice.

Like any other advice arrangement, Financial Institutions relying on computer models would have to satisfy the exemption's best interest standard and other protective conditions in order to satisfy PTE 2020–02. For example, a computer model that preferentially recommends that a Retirement Investor purchase products that generate more income to the Financial Institution would not be permitted under this exemption. The Department is not, however, proposing to require Financial Institutions to comply with the conditions of the statutory exemption in ERISA 408(g)⁹ in order to rely on PTE 2020–02. The Department believes that the additional conditions of this exemption, particularly the retrospective review and ineligibility provisions, would provide strong protections that are not a part of the statutory exemption. However, complying with the statutory exemption conditions could form the basis for policies and procedures that effectively mitigate Conflicts of Interest. To enhance their policies and procedures, it would be reasonable for a Financial Institution to incorporate some, but not all, of the statutory exemption conditions when relying on PTE 2020–02, although a Financial Institution could not merely pick and choose among the conditions of both exemptions in an attempt to avoid the meaningful conflict mitigation requirements each exemption provides. In other words, a Financial Institution must determine that its policies and procedures are, in fact, prudently designed to ensure compliance with the Best Interest standard, regardless of whether the policies and procedures include conditions taken from the statutory exemption.

The Department requests comment on amending PTE 2020–02 to provide relief for Financial Institutions that provide investment advice through computer models without the involvement of an

⁷ The SECURE Act was enacted as Division O of the Further Consolidated Appropriations Act, 2020 (Pub. L. 116–94, 133 Stat. 2534 (Dec. 20, 2019)). The SECURE Act amended ERISA section 3(2) to authorize PEPs and added new ERISA sections 3(43) which establishes requirements for PEPs and 3(44), which establishes requirements for PPPs.

⁸ 85 FR 82798, 82819 (Dec. 18, 2020).

⁹ ERISA section 408(g) and the regulations thereunder provide prohibited transaction relief for certain investment advice arrangements that use fee leveling or use computer models. See 29 CFR 2550.408g–1 and Code section 4975(f)(8).

Investment Professional. The Department also requests responses to the following questions:

- Are Financial Institutions currently relying on the statutory exemption in ERISA section 408(g)?
- Are Financial Institutions that use computer models providing advice in a manner that does not require a prohibited transaction exemption?
- Would expanding PTE 2020–02 to include investment recommendations by computer models allow more conflicted investment advice?
- Are Financial Institutions providing rollover advice via computer models?
 - If so, would those Financial Institutions be able to provide the required Rollover disclosure in Section II(b)(5)?
 - If not, are there other ways the Financial Institution can ensure that the Retirement Investor receives a full explanation of why the recommended product is in their Best Interest?
- Are Financial Institutions using artificial intelligence to provide investment advice? If so, how are those Financial Institutions compensated for advice provided in this manner and do they rely on PTE 2020–02 or on the statutory exemption in ERISA section 408(g)? Would recommendations that relied in whole or part on artificial intelligence require additional or separate conditions?

Investment Discretion

Section I(c)(3) of PTE 2020–02 currently excludes transactions that involve the Investment Professional acting in a fiduciary capacity other than as an investment advice fiduciary within the meaning of the regulations issued by the Department and the Department of the Treasury/IRS,¹⁰ which set forth the definition of fiduciary investment advice. In the preamble to PTE 2020–02, the Department explained it was citing the Department's five-part test as the governing authority for status as an investment advice fiduciary.¹¹

Now that the Department is proposing to amend the regulation defining an investment advice fiduciary, the Department is also proposing to simplify the language in the exemption. Specifically, the proposed amendment redesignates Section I(c)(3) as Section I(c)(2), which would exclude from the exemption advice provided in a fiduciary capacity other than as an investment advice fiduciary within the meaning of ERISA section 3(21)(A)(ii))

and Code section 4975(e)(3)(B) and the regulations issued thereunder. While the Department does not intend to change the substance of this exclusion, the Department is proposing to clarify that Financial Institutions and Investment Professionals cannot rely on the exemption if they act in a fiduciary capacity other than as an investment advice fiduciary.

Impartial Conduct Standards

Best Interest

The Best Interest standard in PTE 2020–02 currently requires investment advice to be, at the time it is provided, in the Best Interest of the Retirement Investor. As defined in current Section V(b), Best Interest advice (1) reflects the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims, based on the investment objectives, risk tolerance, financial circumstances, and needs of the Retirement Investor, and (2) does not place the financial or other interests of the Investment Professional, Financial Institution or any Affiliate, Related Entity, or other party ahead of the interests of the Retirement Investor, or subordinate the Retirement Investor's interests to their own.

The proposed amendment would retain the Best Interest standard from PTE 2020–02. To provide additional clarity, the Department is proposing to add an example to the operative text from the 2020–02 preamble specifying that it is impermissible for the Investment Professional to recommend a product that is worse for the Retirement Investor because it is better for the Investment Professional's or the Financial Institution's bottom line. In other words, the requirement for Investment Professionals not to subordinate the Retirement Investor's interests to their own is not satisfied if the Investment Professional merely considers the Retirement Investor's interests along with its own and the Financial Institution's in choosing which product to recommend to a Retirement Investor. The Department notes this standard is consistent with the SEC's standards for both registered investment advisers and broker-dealers.

As the Department stated in the preamble to PTE 2020–02, this Best Interest standard allows Investment Professionals and Financial Institutions to provide investment advice despite having a financial or other interest in the transaction, so long as they do not

place their own interests ahead of the interests of the Retirement Investor or subordinate the Retirement Investor's interests to their own. For example, in choosing between two investments offered and available to the investor from the Financial Institution, it is not permissible for the Investment Professional to advise investing in the one that is worse for the Retirement Investor but better for the Investment Professional's or the Financial Institution's bottom line. It bears emphasis, however, that this standard should not be read as somehow foreclosing the Investment Professional and Financial Institution from being paid on a transactional basis, nor does it foreclose investment advice on proprietary products or investments that generate Third-Party Payments, or advice based on investment menus that are limited to such products, in part or whole. Financial Institutions and Investment Professionals are entitled to receive reasonable compensation fairly disclosed for their work, as long as they do not subordinate the Retirement Investor's interests to their own and have appropriate policies and procedures to safeguard against imprudent or disloyal advice.

Certainly, in many cases, it is in the Retirement Investor's best interest to receive advice from Investment Professionals that are compensated through commissions incurred on a transactional basis, rather than as part of an ongoing fee-based relationship (for example, pursuant to an advisory relationship subject to a recurring charge based on assets under management). In such cases, the fact that the Investment Professional received a commission for their services is not inconsistent with the principles set forth herein. Conversely, a recommendation to enter into a fee-based arrangement may, in certain cases, be inconsistent with the Best Interest standard. For example, "reverse churning," or recommending that a Retirement Investor continue to receive advice and hold assets subject to an ongoing advisory fee, in circumstances where the investor has low trading activity and little need for ongoing advice, would constitute a violation of the Impartial Conduct Standards and ERISA section 406(b)(1) that is not covered by this exemption. In the discussion of the policies and procedures requirement under Section II(c), the Department provides additional guidance on how Financial Institutions that construct their investment menus with reference to proprietary products or Third-Party

¹⁰ 29 CFR 2510.3–21(c)(1)(i) and (ii)(B) or 26 CFR 54.4975–9(c)(1)(i) and (ii)(B).

¹¹ 85 FR 82798, 40842 (Dec. 18, 2020).

payments can comply with the exemption.

Finally, it should be noted that this Best Interest standard also does not impose an unattainable obligation on Investment Professionals and Financial Institutions to somehow identify the single “best” investment for the Retirement Investor out of all the investments in the national or international marketplace, assuming such advice were even possible at the time of the transaction.

Reasonable Compensation and Best Execution

The Department is retaining the reasonable compensation and best execution standards from PTE 2020–02, with minor adjustments to the language. Section II(a)(2)(A) provides that the compensation received, directly or indirectly, by the Financial Institution, Investment Professional, their Affiliates and Related Entities for their fiduciary investment advice services provided to the Retirement Investor must not exceed reasonable compensation within the meaning of ERISA section 408(b)(2) and Code section 4975(d)(2). In addition, Section II(a)(2)(B) provides that the Financial Institution and Investment Professional must seek to obtain the best execution of the recommended investment transaction that is reasonably available under the circumstances as required by the Federal securities laws.

No Misleading Statements

The Department is also maintaining the requirement in Section II(a)(3), which prohibits Financial Institutions and Investment Professionals from making materially misleading statements to Retirement Investors. It is not sufficient for such statements to be technically accurate; therefore, the Department is clarifying that this condition is not satisfied if a Financial Institution or Investment Professional omits information that is needed to make the statement not misleading in light of the circumstances under which it was made. The Financial Institution and Investment Professional must consider whether the information provides data the Retirement Investor likely would need or want to know about the recommended investment and provide that information in a manner the Retirement Investor can understand.

Disclosure

Section II(b) of PTE 2020–02 currently requires Financial Institutions to provide certain disclosures to Retirement Investors before engaging in a transaction pursuant to the exemption.

The Financial Institution must provide a written acknowledgment that the Financial Institution and its Investment Professionals are fiduciaries under Title I of ERISA and the Code, as applicable, with respect to any investment recommendations provided by the Financial Institution or Investment Professional to the Retirement Investor. The Financial Institution must also provide an accurate written description of the services to be provided to the Retirement Investor and the Financial Institution’s and Investment Professional’s material Conflicts of Interest that is not misleading in all material respects. In addition, under current Section II(c)(3) of PTE 2020–02, before engaging in a rollover recommended pursuant to the exemption, the Financial Institution must provide Retirement Investors with documentation of specific reasons why the rollover recommendation is in the Retirement Investor’s best interest.

As part of this amendment to PTE 2020–02, the Department is proposing additional disclosures described below, which the Department has determined will help ensure that Retirement Investors have sufficient information to make an informed decision about the costs of the transaction and the significance and severity of the Financial Institution’s Conflicts of Interest. The Department requests comment on these disclosures and is particularly interested in receiving information regarding whether additional or alternative information would be helpful to Retirement Investors. Since many Financial Institutions are already complying with PTE 2020–02, the Department is interested in hearing from those Financial Institutions and from investors about the helpfulness of the current disclosures and what information might provide additional protections.

Pre-Transaction Disclosure

Before engaging in a transaction pursuant to this exemption, PTE 2020–02 Section II(b)(1) currently requires the Financial Institution to provide a written acknowledgment that the Financial Institution and its Investment Professionals are fiduciaries under Title I of ERISA or the Code, or both, as applicable, with respect to any investment recommendations provided by the Financial Institution or Investment Professional to the Retirement Investor. The Department has become concerned that some parties misinterpret this condition and claim to satisfy it through artful phrasing that does not, in fact, tell the Retirement

Investor if the recommendation is made by a fiduciary (for example, by saying they “may” be fiduciaries or that they are fiduciaries to the extent they meet the definition of fiduciary investment advice under the ERISA or the Code). Before executing a recommended transaction, however, a Retirement Investor should know whether the recommendation is coming from a Financial Institution or Investment Professional who is subject to the ERISA/Code fiduciary standard. Similarly, if the Financial Institution and Investment Professional are to comply with the law and meet the exemption’s conditions, they should decide if they are acting as a fiduciary, inasmuch as their legal obligations and exemption conditions turn on fiduciary status under ERISA, the Code, or both.

The proposed amendment would clarify the fiduciary acknowledgment requirement so that the Financial Institution must provide a written acknowledgment that the Financial Institution and its Investment Professionals are providing fiduciary investment advice to the Retirement Investor and are fiduciaries under Title I, the Code, or both when making an investment recommendation. If Financial Institutions and Investment Professionals are unwilling to meet this exemption condition, they must restructure their operations to avoid prohibited transactions.

The Department is proposing to add a requirement in Section II(b)(2) that the Financial Institutions include with the initial disclosure a written statement of the Best Interest standard of care owed by the Investment Professional and Financial Institution to the Retirement Investor. PTE 2020–02 Section II(b)(2) currently requires a written description of the services to be provided and the Financial Institution’s and Investment Professional’s material Conflicts of Interest that is accurate and not misleading in all material respects. The Department is proposing to re-designate this provision as Section II(b)(3), replace “all material respects” with “any material respect,” and add a clarification that this description will include the amount the Retirement Investor will directly pay for such services and the amounts the Financial Institution and Investment Professional receive from other sources, including through Third-Party Payments. If, for example, the Retirement Investor will pay through commissions or transaction-based payments, the written statement must clearly disclose that fact. This description must be written in plain English, taking into consideration a Retirement Investor’s level of financial

experience. As explained previously in the preamble to final PTE 2020–02 published in 2020, the Department anticipates Financial Institutions are able to satisfy this disclosure requirement in part through disclosures required by other regulators.¹² The Department requests comment whether additional specificity is needed, particularly as to the type of Third-Party Payments or other incentives provided to the Financial Institution.

The Department is also proposing a new Section II(b)(4) which would require Financial Institutions to inform Retirement Investors of their right to obtain specific information regarding costs, fees, and compensation that is described in dollar amounts, percentages, formulas, or other means reasonably designed to present materially accurate disclosure of their scope, magnitude, and nature. The Financial Institution must provide the information in sufficient detail for the Retirement Investor to make an informed judgment about the costs of the transaction and the significance and severity of Conflicts of Interest. This includes the total compensation that the Financial Institution and Investment Professional receive, not just the costs directly paid by the Retirement Investor. This disclosure also must describe how the Retirement Investor can receive the information free of charge. The Department is not proposing to require Financial Institutions to maintain records of every transaction or be able to quickly provide specific information regarding costs or fees generated by specific transactions. However, the Department is proposing to require Financial Institutions to maintain sufficient records to allow them to meaningfully respond to Retirement Investors' requests to demonstrate how the Financial Institution and its

Investment Professionals are compensated in connection with their recommendations.¹³

To assist Financial Institutions and Investment Professionals in complying with this exemption condition, the Department is providing the following model language that will satisfy Section II(b)(1), (2), and (4).

When we make investment recommendations to you regarding your retirement plan account or individual retirement account, we are fiduciaries within the meaning of Title I of the Employee Retirement Income Security Act and/or the Internal Revenue Code, as applicable, which are laws governing retirement accounts. The way we make money creates some conflicts with your interests, so we operate under a special rule that requires us to act in your best interest and not put our interest ahead of yours. Under this special rule's provisions, we must:

- Meet a professional standard of care when making investment recommendations (give prudent advice);
- Never put our financial interests ahead of yours when making recommendations (give loyal advice);
- Avoid misleading statements about conflicts of interest, fees, and investments;
- Follow policies and procedures designed to ensure that we give advice that is in your best interest;
- Charge no more than is reasonable for our services; and
- Give you basic information about conflicts of interest.

You can ask us for more information explaining costs, fees, and compensation, so that you may make an informed judgment about the costs of the transaction and about the significance and severity of the Conflicts of Interest. We will provide you with this information at no cost to you.

Please note that the Department is not proposing to include model language for Section II(b)(3) because many different types of Financial Institutions will rely on this exemption and provide a wide range of services to Plans and Retirement Investors.

Rollover Disclosure

The proposed amendment would clarify the rollover disclosure. While the current requirement is a part of both the disclosure conditions in Section II(b)(3) and the policies and procedures condition in Section II(c)(3) of PTE 2020–02, the proposed amendment would consolidate this into one condition in amended Section II(b)(5). This requirement extends to recommended rollovers from a Plan to

another Plan or IRA as defined in Code section 4975(e)(1)(B) or (C), from an IRA as defined in Code section 4975(e)(1)(B) or (C) to a Plan, from an IRA to another IRA, or from one type of account to another (e.g., from a commission-based account to a fee-based account).

Before engaging in a rollover or making a recommendation to a Plan participant as to the post-rollover investment of assets currently held in a Plan, the Financial Institution, and Investment Professional must consider and document their conclusions as to whether a rollover is in the Retirement Investor's Best Interest and provide that documentation to the Retirement Investor. Relevant factors to consider must include but are not limited to:

- (i) the alternatives to a rollover, including leaving the money in the Plan or account type, as applicable;
- (ii) the comparative fees and expenses;
- (iii) whether an employer or other party pays for some or all administrative expenses; and
- (iv) the different levels of fiduciary protection, services and investments available.

When considering the alternatives to a rollover recommendation, the Financial Institution and Investment Professional should not focus solely on the Retirement Investor's existing investment allocation without considering other investment options in the existing Plan or IRA.¹⁴

Investment Professionals and Financial Institutions should make diligent and prudent efforts to obtain information about the fees, expenses, and investment options offered in the Retirement Investor's Plan account. In general, such information should be readily available to the Retirement Investor as a result of Department regulations mandating disclosure of plan-related information to the plan's participants that is found at 29 CFR 2550.404a–5. If the Retirement Investor refuses to provide such information, even after a full explanation of its significance, and the information is not otherwise readily available, the Financial Institution and Investment Professional should make a reasonable estimate of a Plan's expenses, asset

¹² “While the exemption does not include specific safe harbors, the Department confirms that Financial Institutions may rely, in whole or in part, on other regulatory disclosures to satisfy certain aspects of this disclosure requirement, for example, the disclosures required under Regulation Best Interest and Form CRS, applicable to broker-dealers; Form ADV including Form CRS, applicable to registered investment advisers; and disclosures required under insurance and banking laws when such disclosures cover services to be provided and the Financial Institution's and Investment Professional's material Conflicts of Interest. Avoiding duplication of disclosures is important and the Department reiterates that the disclosure standard under this exemption may be satisfied in whole, or in part, by using other required disclosures to the extent those disclosures include information required to be disclosed by the exemption. Allowing the use of other disclosures to meet the disclosure standard under this exemption should serve to harmonize this exemption's conditions with those of other disclosure regimes.” 85 FR at 82830.

¹³ In addition, Section IV already requires Financial Institutions to “maintain[] for a period of six years records demonstrating compliance with this exemption and make[] such records available, to the extent permitted by law including 12 U.S.C. 484, to any authorized employee of the Department or the Department of the Treasury.”

¹⁴ The Department included very similar language in its April 2021 FAQs, Q15. When this policy was challenged in litigation, the court determined that that policy was a procedurally proper interpretive rule, and it was not arbitrary and capricious, because it is “the type of documentation that . . . is precisely of the nature that a prudent investment advisor would undertake. Accordingly, it neither contradicts the 2020 Exemption nor goes beyond it.” *Am. Securities Ass'n v. Dep't of Labor*, No. 8:22-cv-330, 2023 WL 1967573, at *21 (M.D. Fla. Feb. 13, 2023).

values, risk, and returns based on publicly available information. The Financial Institution and Investment Professional should document and explain the assumptions used in the estimate and their limitations. In such cases, the Financial Institution and Investment Professional could rely on alternative data sources, such as the Plan's most recent Form 5500 or reliable benchmarks on typical fees and expenses for the type and size of the Plan that holds the Retirement Investor's account. The Department welcomes comments on reliable benchmarks that could be used for this purpose.

The Department notes it would be permissible under this exemption for a Financial Institution to charge a discrete fee for the rollover analysis and charge separately for advice following the rollover. Like all other service providers and investment advice fiduciaries, the Financial Institution may only charge reasonable compensation for the rollover analysis and must satisfy all other conditions of the exemption.

Web Disclosure

The Department also seeks comment on whether Financial Institutions should be required to provide additional disclosures to Retirement Investors and the investing public. In particular, the Department is interested in receiving comments regarding whether it should require Financial Institutions to maintain a public website containing the pre-transaction disclosure, a description of the Financial Institution's business model, associated Conflicts of Interest (including arrangements that provide Third-Party Payments), and a schedule of typical fees. The website could be formatted as a separate website, a web page on an existing website, or in some other way that is publicly accessible. If the Department were to add a web disclosure requirement, the Department would also require Financial Institutions to provide Retirement Investors with a link to the web disclosure (or a printed web address) as part of the pre-transaction disclosures currently required by Section II(b)(1)–(4).

The Department is interested in receiving data and other information regarding the benefits of such a disclosure. The Department estimates that, if such a disclosure were required, it would require eight hours of labor annually from a computer programmer, on average, resulting in an annual cost of approximately \$20.5 million.¹⁵ The

Department welcomes comments on the accuracy of Department's estimates on the required time to maintain the disclosure, and how many Financial Institutions currently have the technology infrastructure to post a web disclosure. The Department is also interested in receiving any data that commenters may have that can inform an estimate of the extent to which Retirement Investors, investment consultants, and third-party intermediaries would visit and use a web page that includes such disclosures, and the extent to which such disclosures could drive better investor outcomes.

The Department contemplates that, to the extent applicable, the website would list all product manufacturers and other parties with whom the Financial Institution maintains arrangements that provide Third-Party Payments to the Investment Professional, the Financial Institution, or Affiliates with respect to specific investment products or classes of investments recommended to Retirement Investors; a description of the arrangements, including a statement on whether and how these arrangements impact Investment Professionals' compensation, and a statement on any benefits the Financial Institution provides to the product manufacturers or other parties in exchange for the Third-Party Payments.

The website may describe the above arrangements with product manufacturers, Investment Professionals, and others by reference to dollar amounts, percentages, formulas, or other means reasonably calculated to present a materially accurate description of the arrangements. Similarly, the Financial Institution may group disclosures on the website based on reasonably defined categories of investment products or classes, product manufacturers, Investment Professionals, and arrangements, and it may disclose reasonable ranges of values, rather than specific values as appropriate. Regardless of how it is constructed, the website should fairly disclose the scope, magnitude, and nature of the Financial Institution's compensation arrangements and Conflicts of Interest in sufficient detail to permit visitors to the website to make an informed judgment about the significance of the compensation practices and Conflicts of Interest with respect to transactions recommended by

is used for a computer programmer professional. The labor rate is applied in the following calculation: (19,290 entities × 8 hours) × \$133.05 = \$20,532,276.

the Financial Institution and its Investment Professionals.

Good Faith

Section II(b)(6) of the proposal would provide that the Financial Institution will not fail to satisfy the conditions in Section II(b) solely because it, acting in good faith and with reasonable diligence, makes an error or omission in disclosing the required information, or if the disclosure is temporarily inaccessible through no fault of the Financial Institution, provided that the Financial Institution discloses the correct information as soon as practicable, but not later than 30 days after the date on which it discovers or reasonably should have discovered the error or omission.

Under proposed Section II(b)(7) of the amendment, Investment Professionals and Financial Institutions may rely in good faith on information and assurances from the other entities that are not Affiliates as long as they do not know that such information is incomplete or inaccurate. The proposed exemption makes clear in Section II(b)(8) that Financial Institutions will not be required to disclose information pursuant to this Section II(b) if such disclosure is otherwise prohibited by law.

Policies and Procedures

Under PTE 2020–02, Section II(c), a Financial Institution must currently establish, maintain, and enforce written policies and procedures that it prudently designs to ensure that the Financial Institution and its Investment Professionals comply with the Impartial Conduct Standards. The proposed amendment clarifies, by adding examples to the operative text, some actions that Financial Institutions may not take because a reasonable person could conclude that they are likely to encourage Investment Professionals to make recommendations that are not in the Retirement Investors' Best Interest. The Department is not proposing changes to the underlying requirements applicable to these policies and procedures but is proposing to require Financial Institutions to provide their complete policies and procedures to the Department upon request within 10 business days of request.¹⁶

The Financial Institution's policies and procedures must mitigate Conflicts of Interest to such an extent that a reasonable person reviewing the Financial Institution's policies and procedures and its incentive practices as

¹⁵ The burden is estimated as: (19,290 entities × 8 hours) = 154,320 hours. A labor rate of \$133.05

¹⁶ Except where specified, as here, "days" refers to calendar days.

a whole would conclude that they do not create an incentive for the Financial Institution or Investment Professional to place its interests ahead of the Retirement Investor's interest.¹⁷ The policies and procedures must be prudently designed to protect Retirement Investors from recommendations to make excessive trades; to buy investment products, annuities, or riders that are not in the Retirement Investor's Best Interest; or to allocate excessive amounts to illiquid or risky investments. To satisfy Section II(c), Financial Institutions may not use quotas, appraisals, performance or personnel actions, bonuses, contests, special awards, differential compensation, or other similar actions or incentives that are intended, or that a reasonable person would conclude are likely, to encourage Investment Professionals to make recommendations that are not in Retirement Investors' Best Interest. A Financial Institution should not offer incentive vacations, or even paid trips to educational conferences, if the desirability of the destination is based on sales volume and satisfaction of sales quotas.

The Financial Institution must pay close attention to any Conflicts of Interest that may exist within the Financial Institution itself. For example, it is not enough merely to pay Investment Professionals the same percentage of the Financial Institution's compensation for a recommended investment product, as for other products, if the Financial Institution receives more compensation from recommending that product rather than other products. In such cases, the "level" compensation percentage effectively directly transmits the Financial Institution's conflict of interest to the Investment Professional, as the Investment Professional's compensation is increased in direct proportion to the profitability of the investment to the firm. Thus, Section II(c) requires the Financial Institution to look carefully at its own incentives and ensure that all recommendations are focused on the Retirement Investor's Best Interest rather than the Financial Institution's interests.

This is not to say the exemption is limited to certain types of Financial Institutions or investment products. Financial Institutions that offer a restricted menu of proprietary products or products that generate Third-Party

Payments can establish, maintain, and enforce written policies and procedures that satisfy these requirements. For example, the Department would view a Financial Institution that authorizes a limited universe of investment recommendations as satisfying the policies and procedures requirement if it prudently does the following:

- Documents in writing its limitations on the universe of recommended investments, the Conflicts of Interest associated with any contract, agreement, or arrangement providing for its receipt of Third-Party Payments or associated with the sale or promotion of proprietary products.

- Documents any services it will provide to Retirement Investors in exchange for Third-Party Payments, as well as any services or consideration it will furnish to any other party, including the payor, in exchange for the Third-Party Payments.

- Reasonably concludes that the limitations on the universe of recommended investments and Conflicts of Interest will not cause the Financial Institution or its Investment Professionals to receive compensation in excess of reasonable compensation for Retirement Investors as set forth in Section II(a)(2).

- Reasonably concludes that these limitations and Conflicts of Interest will not cause the Financial Institution or its Investment Professionals to recommend imprudent investments; and documents in writing the bases for its conclusions.

- Informs the Retirement Investor clearly and prominently in writing that the Financial Institution limits the types of products that it and its Investment Professionals recommend to proprietary products and/or products that generate Third-Party Payments.

- In this regard, the notice should not simply state that the Financial Institution or Investment Professional "may" limit investment recommendations based on whether the investments are proprietary products or generate Third-Party Payments, without specific disclosure of the extent to which recommendations are, in fact, limited on that basis.

- Clearly explains its fees, compensation, and associated Conflicts of Interest to the Retirement Investor in plain English.

- Ensures that all recommendations are based on the Investment Professional's considerations of factors or interests such as investment objectives, risk tolerance, financial circumstances, and needs of the Retirement Investor.

- At the time of the recommendation, the amount of compensation and other

consideration reasonably anticipated to be paid, directly or indirectly, to the Investment Professional, Financial Institution, or their Affiliates or Related Entities for their services in connection with the recommended transaction is not in excess of reasonable compensation within the meaning of ERISA section 408(b)(2) and Code section 4975(d)(2).

- The Investment Professional's recommendation reflects the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims, based on the investment objectives, risk tolerance, financial circumstances, and needs of the Retirement Investor; and the Investment Professional's recommendation is not based on the financial or other interests of the Investment Professional or on the Investment Professional's consideration of any factors or interests other than the investment objectives, risk tolerance, financial circumstances, and needs of the Retirement Investor.

The Department intends this as an example of one way a Financial Institution could satisfy the policies and procedures requirement, but not the only way. The Department requests comment on whether additional guidance is needed regarding a Financial Institution or Investment Professional's recommendations of proprietary products to a Retirement Investor, and, if so, the type of guidance that would be most useful.

Retrospective Review

The Department is proposing to retain the retrospective review in PTE 2020–02, Section II(d) with certain modifications. The review must be reasonably designed to detect and prevent violations of, and achieve compliance with, the conditions of the exemption, including the Impartial Conduct Standards, and the policies and procedures governing compliance with the exemption. The Department is clarifying that as part of the review, it expects Financial Institutions to determine whether they have complied with each exemption condition. This expectation is based in part on the premise that PTE 2020–02 currently requires the Financial Institution's Senior Executive Officer to certify that the Financial Institution has policies and procedures in place that are prudently designed to achieve compliance with the exemption conditions as part of the retrospective review. In order to make that

¹⁷ The Department provided further guidance on the policies and procedures in Questions 16 and 17 of a set of Frequently Asked Questions available at <https://www.dol.gov/sites/dolgov/files/ebsa/about-ebsa/our-activities/resource-center/faqs/new-fiduciary-advice-exemption.pdf>.

certification, the retrospective review must be reasonably designed to detect and prevent violations of, and achieve compliance with, all conditions of the exemption itself. Consistent with this expectation, the Department has received self-correction notifications summarizing the Financial Institution's annual retrospective review and identifying its failure to comply with a range of conditions.

The Department is also adding a clarification that, as part of its retrospective review, the Financial Institution must update its policies and procedures as business, regulatory, and legislative changes and events dictate, and to ensure they remain prudently designed, effective, and compliant with Section II(c). This is intended as clarification of the current PTE 2020–02, which requires Financial Institutions “maintain” their policies and procedures and also requires the Senior Executive Officer's certification to include that the Financial Institution has in place a prudent process to modify the policies and procedures. The Department is proposing to add this language to Section II(d)(1) for clarity.

In the Department's view, an annual review will generally be appropriate. However, Financial Institutions may choose to conduct their reviews more frequently and should do so as circumstances dictate. For example, if a Financial Institution knows or should know that non-exempt prohibited transactions or violations of either the Impartial Conduct Standards or policies and procedures conditions have occurred, the Financial Institution cannot wait until the next annual review to correct transactions or revise its policies and procedures.

As the Department described in the preamble to PTE 2020–02 when it was finalized in 2020, an appropriate retrospective review would be aimed at detecting non-compliance across a wide range of transaction types and sizes, large and small, identifying deficiencies in the policies and procedures, and rectifying those deficiencies. For large Financial Institutions that conduct large numbers of transactions each year, sampling may not be the sole means of testing compliance, but it is an important and necessary component of any prudent review process and should be performed in a manner designed to identify potential violations, problems, and deficiencies that need to be addressed.¹⁸

The methodology and results of the retrospective review must be reduced to a written report that is provided to a

Senior Executive Officer. The Department is proposing some edits to the Senior Executive Officer's report. The Department is making minor edits to reflect the clarifications to the retrospective review described above. In addition, the Department is proposing to amend Section II(d)(3) to require the Senior Executive Officer to certify that the Financial Institution has filed (or will file timely, including extensions) Form 5330 to report to the IRS any non-exempt prohibited transactions discovered by the Financial Institution in connection with investment advice covered under Code section 4975(e)(3)(B). The certification must also include that the Financial Institution has corrected those transactions and paid any resulting excise taxes owed under Code section 4975. As further described below, the Department is proposing to amend other sections of PTE 2020–02 to ensure Financial Institutions pay the excise taxes owed on non-exempt prohibited transactions. In its decision vacating the 2016 rulemaking, the Fifth Circuit wrote that “ERISA Title II only punishes violations of the ‘prohibited transactions’ provision by means of IRS audits and excise taxes.”¹⁹ Consistent with this reasoning, the Department is proposing to require the Senior Executive Officer to carefully review transactions, correct violations, and pay any required excise taxes.

The review, report, and certification must be completed no later than six months following the end of the period covered by the review. The Financial Institution must retain the report, certification and supporting data for six years, and provide such information to the Department within 10 business days of request, to the extent permitted by law including 12 U.S.C. 484 (regarding limitations on visitatorial powers for national banks).

Self-Correction

The Department is proposing to retain the self-correction in Section II(e) in amended PTE 2020–02. The exemption allows self-correction in certain cases when either the violation did not result in investment losses to the Retirement Investor, or the Financial Institution made the Retirement Investor whole for any resulting losses. In this context, “losses” are not limited to recommendations that leave the Retirement Investor with fewer assets

than originally invested. For example, if the Financial Institution's fees are excessive, the Financial Institution cannot keep the fees just because the Retirement Investor did not lose money in the transaction.

Since finalizing PTE 2020–02, the Department has received several self-correction emails under Section II(e). Most of these emails describe late disclosures (including both fiduciary acknowledgments and rollover analyses) which may be corrected under PTE 2020–02 as long as all of the required information was provided to the Retirement Investor, even if not in writing, so that the Financial Institution is confident that the Retirement Investor had the information needed to make an informed investment decision before a transaction was executed pursuant to the Financial Institution or Investment Professional's recommendation.

The Department has also received questions about the types of transactions that can be corrected under PTE 2020–02, Section II(e). If a recommendation satisfies all conditions of the exemption, but due to a clerical error the wrong asset is purchased or sold, the Financial Institution must correct this error as quickly as possible by ensuring the Retirement Investor's account is in the same position it would have been if the correct transaction had occurred. However, if an Investment Professional has recommended a transaction that was not in the Retirement Investor's Best Interest, the Retirement Investor may be prohibited from returning money to an ERISA account after it has been rolled over into an IRA. Even if the IRA investments have performed well since the rollover, the Retirement Investor may have been harmed by the loss of ERISA Title I's protections. The Department requests comment on whether additional clarifications are needed as to the types of transactions eligible for correction under Section II(e).

Eligibility

The Department is proposing to retain the eligibility provision in Section III, which identifies circumstances under which an Investment Professional or Financial Institution will become ineligible to rely on the exemption for a period of 10 years. The Department continues to maintain that the eligibility provisions ensure that Financial Institutions provide reasonable oversight of Investment Professionals and that both adopt a culture of compliance. The Department is proposing certain changes to Section III, mostly for clarity. The Department requests comment on these proposed

¹⁹ *Chamber of Commerce v. U.S. Dep't of Labor*, 885 F.3d 360, 384 (5th Cir. 2018). For additional information regarding correcting prohibited transactions see *Voluntary Fiduciary Correction Program Under the Employee Retirement Income Security Act of 1974*, 71 FR 20262 (Apr. 19, 2006).

¹⁸ 85 FR 82798, 82839 (Dec. 18, 2020).

changes and whether additional clarity is needed.

The Department is proposing to expand ineligibility to include Financial Institutions that are Affiliates, rather than a more limited definition of “Controlled Group.” The Department remains concerned that a Financial Institution facing ineligibility for its actions affecting Retirement Investors could merely change its corporate form and continue to rely on the exemption. The Department understands there has been some confusion about what entities would be considered Financial Institutions in the same Controlled Group and has determined that by including Affiliates as opposed to Financial Institutions in the same Controlled Group, the provision will be better understood by the parties involved. Moreover, the inclusion of Affiliates ensures that Financial Institutions would be diligent in their obligation to monitor the actions of their Affiliates and foster a culture of compliance throughout the organization.

The proposed amendment also would set forth the specific crimes (including foreign crimes) that could cause ineligibility in Section III(a). Under current PTE 2020–02, a Financial Institution or Investment Professional only becomes ineligible upon conviction of “crimes arising out of such person’s provision of investment advice to Retirement Investors.” The Department is proposing to broaden this to include the enumerated crimes, regardless of the conduct under which they arose. The Department is concerned that the limitation of “arising out of . . . provision of investment advice” is too narrow. Like the addition of Affiliates, this will help foster a culture of compliance throughout the organization in recognition of the importance of investment advice to Retirement Investors. The Department requests comment on this change.

Similar to the amended retrospective review provision, the Department is proposing to add ineligibility for a systematic pattern or practice of failing to correct prohibited transactions, report those transactions to the IRS on Form 5330 and pay the resulting excise taxes imposed by Code section 4975 in connection with non-exempt prohibited transactions involving investment advice under Code section 4975(e)(3)(B) to Section II(a)(2). This proposed amendment would ensure that IRAs and other Title II plans actually report and pay an excise tax that they owe. A single missed excise tax would not make the Financial Institution ineligible for 10 years, but Financial Institutions that

regularly disregard their legal obligation to pay excise taxes on prohibited transactions would need to find alternative relief.

The Department is also making clarifying changes to the timing of the ineligibility designation set forth in Section III(b). While PTE 2020–02 provides for different amounts of time before ineligibility, and then provides a one-year winding down period, the Department is proposing to simplify this process and create uniformity so that all entities would become ineligible six months after the conviction date, the date of the Department’s written determination regarding a foreign conviction, or the date of the Department’s written ineligibility notice regarding other misconduct, as applicable. In the Department’s view, the one-year wind down created a long period in which noncompliance and inappropriate conduct could continue. This six-month period will take the place of the winding down period and provide ample time for Financial Institutions and Investment Professionals to inform Retirement Investors of their ineligibility and/or find alternative means of complying with ERISA. During the six months, the Financial Institution and Investment Professionals are still fiduciaries that are subject to all of the fiduciary requirements and prohibited transaction rules. Thus, Financial Institutions and Investment Professionals must continue to comply with the exemption during those six months, and any transactions that do not meet the terms of the exemption will be subject to excise tax and ERISA penalties.

Furthermore, the Department has clarified that the ineligibility remains in effect until the earliest of: (A) a subsequent judgment reversing a person’s conviction, (B) 10 years after the person became ineligible or is released from imprisonment, if later, or (C) the Department grants an individual exemption permitting reliance on this exemption, notwithstanding the conviction.

The Department is proposing changes to Section III(c), which provides an opportunity to be heard. In a change from PTE 2020–02, Financial Institutions and Investment Professionals that become ineligible due to a conviction under Section III(a)(1)(A) would not have a separate opportunity to be heard by the Department following conviction by a U.S. Federal or state court of competent jurisdiction. A convicted advice provider has been provided due process by the U.S. court, and the criminal conduct underlying the conviction cannot be cured. Financial

Institutions and Investment Professionals are required to act in the Best Interest of the Retirement Investor and in doing so, the Department expects them to act with a high degree of integrity and foster a culture of compliance. The criminal conduct underlying the conviction calls into question the advice provider’s ability to act in the Retirement Investor’s Best Interest, although a convicted Financial Institution or Investment Professional may be able to use other exemptions or apply for an individual exemption. The Department is proposing to provide an opportunity to be heard when the conviction is by a foreign court. Section III(c)(1) would allow Financial Institutions and Investment Professionals to submit a petition informing the Department of the conviction and seeking a determination that continued reliance on the exemption would not be contrary to the purposes of the exemption.

Proposed Section III(c)(2) of the exemption would allow Financial Institutions and Investment Professionals that have engaged in conduct described in Section III(a)(2) to have the opportunity to cure the behavior and to be heard in an evidentiary hearing by the Department. Under this provision, before issuing a written ineligibility notice, the Department will issue a written warning to the Investment Professional or Financial Institution, as applicable, identifying the specific conduct, and provide a six-month period to cure the misconduct. At the end of the six-month period, if the Department determines that the Investment Professional or Financial Institution has not taken appropriate action to prevent recurrence of the disqualifying conduct, it will then provide an opportunity to be heard and present evidence, in person (including by phone or videoconference), or in writing, or a combination thereof. The evidentiary hearing will be limited to one conference unless the Department determines in its sole discretion to allow additional conferences. Following the hearing, the Department’s determination whether to issue the ineligibility notice will be based solely on its discretion. If the Department issues a written ineligibility notice, the notice will articulate the basis for the determination that the Investment Professional or Financial Institution engaged in conduct described in Section III(a)(2).

For all hearings under Section III(c), the Department will consider the following when making its determination:

- the gravity of the offense;

- the degree to which the underlying conduct concerned individual misconduct, or, alternately, corporate managers or policy;

- recency of the conduct at issue;
- any remedial measures the Investment Professional or Financial Institution has taken upon learning of the underlying conduct; and
- other factors the Department determines in its discretion are reasonable in light of the nature and purposes of the exemption.

The Department is also proposing to add the heading “Alternative exemptions” in Section III(d), which describes how a Financial Institution may continue business after becoming ineligible. The Department requests comments on the process described above, including whether it would be helpful to provide greater details about the evidentiary hearing and the written ineligibility notice, and, if so, what details are necessary.

Recordkeeping

The Department is considering amending the recordkeeping provisions in Section IV to allow more parties to review the records necessary to determine whether the exemption is satisfied. The recordkeeping provisions of PTE 2020–02 allow only the Department and the Department of the Treasury to inspect books and records. The Department originally proposed that records should be available for review by additional parties but limited that access in the final exemption in response to comments. Commenters expressed concern that parties might “overwhelm” Financial Institutions with requests for use in litigation.

Since PTE 2020–02 became effective, the Department has worked with Financial Institutions seeking to comply. The Department is of the view both that Financial Institutions could easily share their documentation of compliance and that Retirement Investors would benefit from access to that information. As described above, the Department is proposing additional disclosure requirements, which means some of this information would be provided to Retirement Investors without them needing to request to review records. In addition, the Department believes that most parties will likely not request records, and, when they do, the Department believes it is important that plans, unions and employee organizations, and participants and beneficiaries can access information they need to determine whether the exemption is satisfied and to understand how the Financial Institution and Investment Professional

are acting in the Retirement Investor’s Best Interest.

The Department seeks feedback on whether to replace Section IV with the following:

(a) The Financial Institution maintains the records necessary to enable the persons described in subsection (a)(2) below to determine whether the conditions of this exemption have been met with respect to a transaction for a period of six years from the date of the transaction in a manner that is reasonably accessible for examination. No prohibited transaction will be considered to have occurred solely on the basis of the unavailability of such records if they are lost or destroyed due to circumstances beyond the control of the Financial Institution before the end of the six-year period:

(1) No party, other than the Financial Institution responsible for complying with this section IV, will be subject to the civil penalty that may be assessed under ERISA section 502(i) or the excise tax imposed by Code section 4975(a) and (b), if applicable, if the records are not maintained or available for examination as required by this section IV.

(2) Except as provided in subsection (3) or precluded by 12 U.S.C. 484 (regarding limitations on visitorial powers for national banks), and notwithstanding any provisions of ERISA section 504(a)(2) and (b), the records are reasonably available at their customary location during normal business hours for examination by:

(A) Any authorized employee of the Department or the IRS or another state or Federal regulator;

(B) Any fiduciary of a Plan that engaged in a transaction pursuant to this exemption;

(C) Any contributing employer and any employee organization whose members are covered by a Plan that engaged in a transaction pursuant to this exemption; or

(D) Any participant or beneficiary of a Plan or beneficial owner of an IRA acting on behalf of the IRA that engaged in a transaction pursuant to this exemption.

(3) None of the persons described in subsection (2)(B)–(D) above are authorized to examine records regarding a transaction involving another Retirement Investor, privileged trade secrets or privileged commercial or financial information of the Financial Institution, or information identifying other individuals.

(4) If the Financial Institution refuses to disclose information to a person described in subsection (2)(B)–(D) above on the basis that the information is exempt from disclosure, the Financial Institution must provide a written notice advising the requestor of the reasons for its refusal and that the Department may request that such information be produced to the Department by the end of the thirtieth (30th) day following the Department’s request.

(b) A Financial Institution’s failure to maintain the records necessary to determine whether the conditions of this exemption have been met will result in the loss of the exemption only for the transaction or transactions for which records are missing or have not been maintained. Such failure does

not affect the relief for other transactions if the Financial Institution maintains required records for such transactions in compliance with this section IV.

The Department requests comment on both the burden to Financial Institutions and the benefits to Retirement Investors of being able to access this information on request.

Executive Order 12866 and 13563 Statement

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects; distributive impacts; and equity). Executive Order 13563 emphasizes the importance of quantifying costs and benefits, reducing costs, harmonizing rules, and promoting flexibility.

Under Executive Order 12866, as amended by Executive Order 14094, “significant” regulatory actions are subject to review by the Office of Management and Budget (OMB). Section 3(f) of the Executive Order defines a “significant regulatory action” as an action that is likely to result in a rule (1) having an annual effect on the economy of \$200 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or communities; (2) creating a serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising legal or policy issues for which centralized review would meaningfully further the President’s priorities, or the principles set forth in the Executive Order. It has been determined that this proposal is a “significant regulatory action” within the scope of section 3(f)(1) of the Executive Order.

Therefore, the Department has provided an assessment of the proposal’s potential costs, benefits, and transfers, and OMB has reviewed this proposed amendment pursuant to the Executive Order.

Paperwork Reduction Act

As part of its continuing effort to reduce paperwork and respondent burden, the Department conducts a preclearance consultation program to allow the general public and Federal

agencies to comment on proposed and continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA). This helps ensure that the public understands the Department's collection instructions, respondents can provide the requested data in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the Department can properly assess the impact of collection requirements on respondents.

The Department is soliciting comments regarding the information collection request (ICR) included in the proposed amendments to the ICR. To obtain a copy of the ICR, contact the PRA addressee below or go to RegInfo.gov. The Department has submitted a copy of the rule to the Office of Management and Budget (OMB) in accordance with 44 U.S.C. 3507(d) for review of its information collections. The Department and OMB are particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or

other forms of information technology (e.g., permitting electronically delivered responses).

Commenters may send their views on the Departments' PRA analysis in the same way they send comments in response to the proposed rule as a whole (for example, through the www.regulations.gov website), including as part of a comment responding to the broader proposed rule. Comments are due by January 2, 2024 to ensure their consideration.

PRA Addressee: Address requests for copies of the ICR to James Butikofer, Office of Research and Analysis, U.S. Department of Labor, Employee Benefits Security Administration, 200 Constitution Avenue NW, Room N-5718, Washington, DC 20210, or ebbsa.opr@dol.gov. ICRs also are available at <http://www.RegInfo.gov> (<http://www.reginfo.gov/public/do/PRAMain>).

As discussed above in the preamble, the Department proposes to amend PTE 2020-02 to require the provision of additional disclosures to retirement investors receiving advice and to provide more guidance for financial institutions and investment professionals complying with the Impartial Conduct Standards and implementing the policies and procedures. This proposal is intended to align with other regulators' rules and standards of conduct.

These requirements are ICRs subject to the PRA. Readers should note that the burden discussed below conforms to the requirements of the PRA and is not the incremental burden of the changes.²⁰

1.1 Preliminary Assumptions

In the analysis discussed below, a combination of personnel would

perform the tasks associated with the ICRs at an hourly wage rate of \$63.45 for clerical personnel, \$133.05 for a computer programmer, and \$159.34 for a legal professional, and \$219.23 for a financial advisor.²¹

The Department does not have information on how many retirement investors, including plan beneficiaries and participants and IRA owners, receive disclosures electronically from investment advice fiduciaries. For the purposes of this analysis, the Department assumes that the percent of retirement investors receiving disclosures electronically would be similar to the percent of plan participants receiving disclosures electronically under the Department's 2020 electronic disclosure rules.²² Accordingly, the Department estimates that 94.2 percent of the disclosures sent to retirement investors would be sent electronically, and the remaining 5.8 percent would be sent by mail.²³ The Department requests comment on these assumptions.

The Department assumes any documents sent by mail would be sent by first class mail, incurring a postage cost of \$0.66 for each piece of mail.²⁴ Additionally, the Department assumes that documents sent by mail would incur a material cost of \$0.05 for each page.

1.2 Affected Entities

The Department expects the same 19,290 entities that are affected by the existing PTE 2020-02 would be affected by the proposed amendments to the PTE. The number of entities by type and size are summarized in the table below.²⁵

TABLE 1—AFFECTED ENTITIES BY TYPE AND SIZE

	Small	Large	Total
Broker-Dealer	395	1,499	1,894
Retail	287	1,034	1,321
Non-Retail	108	465	573
Registered Investment Adviser	2,996	12,986	15,982
SEC	220	7,350	7,570
Retail	74	4,570	4,644
Non-Retail	146	2,780	2,926
State	2,776	5,636	8,412
Retail	2,166	4,399	6,566
Non-Retail	610	1,237	1,847

²⁰ For a more detailed discussion of the marginal costs associated with the proposed amendments to PTE 2020-02, refer to the Regulatory Impact Analysis (RIA) in the Notice of Proposed Rulemaking published elsewhere in today's edition of the **Federal Register**.

²¹ Internal DOL calculation based on 2023 labor cost data. For a description of the Department's methodology for calculating wage rates, see <https://www.dol.gov/sites/dolgov/files/EBBSA/laws-and-regulations/rules-and-regulations/technical-appendices/labor-cost-inputs-used-in-ebbsa-opr-ria-and-pra-burden-calculations-june-2019.pdf>.

²² 67 FR 17263.

²³ The Department estimates approximately 94.2% of retirement investors receive disclosures electronically, which is the sum of the estimated share of retirement investors receiving electronic disclosures under the 2002 electronic disclosure safe harbor (58.2%) and the estimated share of

retirement investors receiving electronic disclosures under the 2020 electronic disclosure safe harbor (36.0%).

²⁵ For more information on how the number of each type and size of entity is estimated, refer to the Affected Entity section of the RIA in the Notice of Proposed Rulemaking published elsewhere in today's edition of the **Federal Register**.

TABLE 1—AFFECTED ENTITIES BY TYPE AND SIZE—Continued

	Small	Large	Total
Insurer	151	32	183
Robo-Adviser	10	190	200
Pension Consultant	930	81	1,011
Investment Company Underwriter	20	0	20
Total	4,502	14,788	19,290

In addition, the proposed amendments may affect banks and credit unions selling non-deposit investment products. There are 4,672 federally insured depository institutions in the United States, consisting of 4,096 commercial banks and 576 savings institutions.²⁶ Additionally, there are 4,686 federally insured credit unions.²⁷ Moreover, in 2017, the U.S. Government Accountability Office estimated that approximately two percent of credit unions have private deposit insurance.²⁸ Based on this estimate, the Department estimates that there are approximately 96 credit unions with private deposit insurance and 4,782 credit unions in total.²⁹

The Department understands that banks most commonly use “networking arrangements” to sell retail non-deposit investment products, including equities, fixed-income securities, exchange-traded funds, and variable annuities.³⁰ Under such arrangements, bank employees are limited to performing only clerical or ministerial functions in connection with brokerage transactions. However, bank employees may forward

customer funds or securities and may describe, in general terms, the types of investment vehicles available from the bank and broker-dealer under the arrangement. Similar restrictions on bank employees’ referrals of insurance products and state-registered investment advisers exist.

Because of these limitations, the Department believes that, in most cases, such referrals would not constitute fiduciary investment advice within the meaning of the proposal. Due to the prevalence of banks using networking arrangements for transactions related to retail non-deposit investment products, the Department believes that most banks would not be affected by PTE 2020–02 with respect to such transactions.

The Department currently estimates that no banks or credit unions would be impacted by the proposed amendments to PTE 2020–02 but requests comments on this assumption. The Department is requesting comment on how frequently these entities use their own employees to perform activities that would otherwise be covered by the prohibited transaction provisions of ERISA and the Code. The Department seeks comment on the frequency with which bank or credit union employees recommend bank products to retirement investors and how they currently ensure such recommendations are prudent to the extent required by ERISA. The Department invites comments on the magnitude of any such costs and solicits data that would facilitate their quantification in the proposal.

1.3 Production and Distribution of Required Disclosures for Investors

1.3.1 Disclosure Requirements Under the Current PTE 2020–02

Section II(b) currently requires financial institutions to provide certain disclosures to retirement investors before engaging in a transaction pursuant to the exemption. These disclosures include:

- a written acknowledgment that the financial institution and its investment professionals are fiduciaries;
- a written description of the services to be provided and any material conflicts of interest of the investment

professional and financial institution; and

- documentation of the financial institution and its investment professional’s conclusions as to whether a rollover is in the retirement investor’s best interest, before engaging in a rollover or offering recommendations on post-rollover investments.

The following estimates reflect the ongoing paperwork burdens of the affected entities. Broker-dealers, registered investment advisers, and insurance companies were required to prepare these disclosures under the existing PTE 2020–02. The estimates below reflect paperwork burden these entities would incur to modify such exemption, but the Department assumes that these entities have already incurred costs related to drafting such disclosures.

The Department estimates that preparing a disclosure indicating fiduciary status would take a legal professional at affected robo-advisors, pension consultants, and investment company underwriters 30 minutes, resulting in an hour burden of 616 hours and a cost burden of \$98,074.³¹

The proposed amendment makes minor edits to the written acknowledgment that the financial institution and its investment professional are fiduciaries. The Department does not have data on how many financial institutions would need to modify their disclosures in response to this amendment; however, the Department expects that the disclosures required under the existing form of PTE 2020–02 likely satisfy this requirement for most financial institutions covered under the existing exemption. For the purposes of this analysis, the Department assumes that 10 percent of financial entities under the existing exemption would need to update their disclosures and that it would take a legal professional at a financial

²⁶ Federal Insurance Deposit Corporation, *Statistics at a Glance—as of March 31, 2023*, <https://www.fdic.gov/analysis/quarterly-banking-profile/statistics-at-a-glance/2023mar/industry.pdf>.

²⁷ National Credit Union Administration, *Quarterly Credit Union Data Summary 2023 Q2*, <https://ncua.gov/files/publications/analysis/quarterly-data-summary-2023-Q2.pdf>.

²⁸ U.S. Government Accountability Office, *Private Deposit Insurance: Credit Unions Largely Complied with Disclosure Rules, But Rules Should be Clarified*, (March 29, 2017), <https://www.gao.gov/products/gao-17-259>.

²⁹ The total number of credit unions is calculated as: 4,686 federally insured credit unions/(100%–2% of credit unions that are privately insured) = 4,782 total credit unions. The number of private credit unions is estimated as: 4,782 total credit unions – 4,686 federally insured credit unions = 96 credit unions with private deposit insurance.

³⁰ For more details about “networking arrangements,” see Employee Benefits Security Administration, *Regulating Advice Markets Definition of the Term “Fiduciary” Conflicts of Interest—Retirement Investment Advice Regulatory Impact Analysis for Final Rule and Exemptions*, (April 2016), <https://www.dol.gov/sites/dolgov/files/EBSA/laws-and-regulations/rules-and-regulations/completed-rulemaking/1210-AB32-2/ria.pdf>. Financial institutions that are broker-dealers, investment advisers, or insurance companies that participate in networking arrangements and provide fiduciary investment advice would be included in the counts in their respective sections.

³¹ The burden is estimated as: [(200 robo-advisers + 1,011 pension consultants + 20 investment company underwriters) × 30 minutes] + 60 minutes = 616 hours. The burden is estimated as: [(200 robo-advisers + 1,011 pension consultants + 20 investment company underwriters) × 30 minutes] + 60 minutes × \$159.34 = \$98,074.

institution, on average, 10 minutes to update existing disclosures. Robo-advisers, pension consultants, and investment company underwriters, who

are not covered under the existing exemption would need to draft the acknowledgement. Updating the acknowledgement is estimated to result

in an hour burden of 301 hours with an equivalent cost of \$47,961.³²

TABLE 2—HOURLY BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE FIDUCIARY ACKNOWLEDGEMENT

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Legal	917	\$146,035	0	\$0
Total	917	146,035	0	0

The Department estimates that preparing a disclosure identifying services provided and conflicts of interest would take a legal professional at affected robo-advisers, pension consultants, and investment company underwriters one hour at small financial institutions and five hours at large financial institutions, resulting in an

hour burden of 2,315 hours and an equivalent cost burden of \$368,872.³³ The proposed amendments would also expand on the existing requirement for a written description of the services provided to also require a statement on whether the retirement investor would pay for such services, directly or indirectly, including through third-party

payments. The Department assumes it would take a legal professional at a financial institution under the existing exemption 30 minutes to update existing disclosures to include this information. This results in an hour burden of 9,030 hours and an equivalent cost burden of \$1,438,761 in the first year.³⁴

TABLE 3—HOURLY BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE WRITTEN DESCRIPTION OF SERVICES PROVIDED

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Legal	11,345	\$1,807,633	0	\$0
Total	11,345	1,807,633	0	0

According to Cerulli Associates, in 2022, almost 4.5 million defined contribution (DC) plan accounts with \$779 billion in assets were rolled over to an IRA. Additionally, 0.7 million DC plan accounts with \$66 billion in assets were rolled over to other employer-sponsored plans.³⁵ It is challenging to obtain reliable data on other types of rollovers such as IRA-to-IRA and defined benefit (DB) plan-to-IRA. The Department uses Internal Revenue Service (IRS) data from 2020 on overall rollovers into IRAs, which is 5.7 million taxpayers and \$618 billion.³⁶ Adding in

the figures for plan-to-plan rollovers, the Department estimates the total number of rollovers at 6.4 million accounts with \$684 billion in assets. The Department requests comment on this estimate.

Only rollovers overseen by an ERISA fiduciary would be affected by the proposed amendments to PTE 2020–02. The Department does not have compelling data on the percentage of rollovers that are overseen by an ERISA fiduciary. In 2022, 49 percent of DC plan-to-IRA rollovers, accounting for 63 percent of DC plan rollover assets, were intermediated by an adviser.³⁷ For

purposes of this analysis, the Department assumes that advisers intermediating rollovers are ERISA fiduciaries, which means the estimate is an upper bound. The Department applies the estimate made for DC plan-to-IRA rollovers to all types of rollovers. Accordingly, the Department estimates that 3.1 million rollovers and \$431 billion in rollover assets would be affected by the proposed amendments to PTE 2020–02.³⁸ The Department requests comments on these assumptions.

³² The number of financial entities needing to update their written acknowledgement is estimated as: $(1,894 \text{ broker-dealers} \times 10\%) + (7,570 \text{ SEC-registered investment advisers} \times 10\%) + (8,412 \text{ state-registered investment advisers} \times 10\%) + (183 \text{ insurers} \times 10\%) = 1,806$ financial institutions updating existing disclosures. $[(1,806 \text{ financial institutions} \times 10 \text{ minutes}) \div 60 \text{ minutes}] = 301$ hours. The equivalent cost is estimated as: $301 \text{ hours} \times \$159.34 = \$47,961$.

³³ The burden is estimated as: $[(930 \text{ small pension consultants} + 10 \text{ small robo-adviser} + 20 \text{ small investment company underwriters}) \times 1 \text{ hour}] + [(81 \text{ large pension consultants} + 190 \text{ large robo-advisers}) \times 5 \text{ hours}] = 2,315$ hours. The equivalent cost is estimated as: $[(930 \text{ small pension consultants} + 10 \text{ small robo-adviser} + 20 \text{ small investment company underwriters}) \times 1 \text{ hour}] + [(81 \text{ large pension}$

$\text{consultants} + 190 \text{ large robo-advisers}) \times 5 \text{ hours}] \times \$159.34 = \$368,872$.

³⁴ The number of financial entities needing to update their written description of services is estimated as: $1,894 \text{ broker-dealers} + 15,982 \text{ registered investment advisers} + 183 \text{ insurers} = 18,059$ financial institutions updating existing disclosures. The burden is estimated as follows: $[(18,059 \text{ financial institutions} \times 30 \text{ minutes}) \div 60 \text{ minutes}] = 9,030$ hours. The equivalent cost is estimated as: $[(18,059 \text{ financial institutions} \times 30 \text{ minutes}) \div 60 \text{ minutes}] \times \$159.34 = \$1,438,761$.

³⁵ According to Cerulli, in 2022, there were 4,485,059 DC plan-to-IRA rollovers and 707,104 DC plan-to-DC plan rollovers. (See Cerulli Associates, *U.S. Retirement End-Investor 2023: Personalizing the 401(k) Investor Experience*, Exhibit 6.02. The Cerulli Report.) These account estimates may

include health savings accounts, Archer medical savings accounts, or Coverdell education savings accounts.

³⁶ Internal Revenue Service, *SOI Tax Stats—Accumulation and Distribution of Individual Retirement Arrangement (IRA)*, Table 1: Taxpayers with Individual Retirement Arrangement (IRA) Plans, By Type of Plan, Tax Year 2020 (2023).

³⁷ According to Cerulli, 49 percent of rollovers were mediated by an adviser, while 37 percent were self-directed. The remaining 14 percent were plan-to-plan rollovers. (See Cerulli Associates, *U.S. Retirement-End Investor 2023: Personalizing the 401(k) Investor Experience Fostering Comprehensive Relationships*, Exhibit 6.04. The Cerulli Report.)

³⁸ The number of affected rollovers is estimated as: $(6,367,005 \times 49\%) = 3,119,832$.

The current PTE required rollover documentation from plans to IRAs. As a best practice, the SEC already encourages firms to record the basis for significant investment decisions, such as rollovers, although doing so is not required. In addition, some firms may voluntarily document significant investment decisions to demonstrate compliance with applicable law, even if

not required. A report commissioned by this commenter found that slightly more than half (52 percent) of respondents will “require best interest rationale documentation for rollover recommendations.”³⁹ The Department estimates that documenting each rollover recommendation will require 30 minutes for a personal financial advisor whose firms currently do not

require rollover documentations and five minutes for financial advisors whose firms already require them to do so. The Department estimates that this will result in an hour burden of 883,953 hours with an equivalent cost of approximately \$193.8 million.⁴⁰ The Department requests comment on the time it would take to document the rollover recommendation.

TABLE 4—HOUR BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE ROLLOVER DOCUMENTATION

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Financial Adviser	883,953	\$193,788,961	883,953	\$193,788,961
Total	883,953	193,788,961	883,953	193,788,961

1.3.2. New Disclosure Requirements Under the Proposed Amended PTE 2020–02

As amended, PTE 2020–02 would require financial institutions to provide investors with the following additional disclosures:

- (1) a written statement of the best interest standard of care owed; and
- (2) a written statement that the retirement investor has the right to obtain specific information regarding costs, fees, and compensation.

Under the Investment Advisers Act of 1940 and SEC Regulation Best Interest, most SEC-registered investment advisers and broker-dealers with retail investors already provide disclosures that the Department expects would satisfy these requirements.

The proposed amendments would add a requirement for financial institutions to provide a written statement of the Best Interest standard of care owed. Under the Investment Advisers Act, the SEC’s Regulation Best Interest, and Form CRS, most SEC-registered investment advisers and

broker-dealers with retail investors are already required to provide disclosures that the Department expects would satisfy these requirements.

The Department expects that the written statement of the Best Interest standard of care owed would not take a significant amount of time to prepare and would be uniform across clients. The Department assumes it would take a financial institution 30 minutes to prepare the statement, resulting in an hour burden of 10,352 hours and an equivalent cost burden of \$1,649,488 in the first year.⁴¹

TABLE 5—HOUR BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE BEST INTEREST STANDARD DISCLOSURE

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Legal	10,352	\$1,649,488	0	\$0
Total	10,352	1,649,488	0	0

For the added requirement of a written statement informing the investor of their right to obtain a written description of the financial institution’s policies and procedures and information regarding costs, fees, and compensation, the Department expects that many financial institutions’

disclosures, as required by the existing PTE 2020–02, already substantially comply with this regulation or would require modest adjustments to do so. The Department estimates that, on average, it would take a legal professional at broker-dealers and registered investment advisers, on

average, 30 minutes to modify existing statements and that it would take insurers, robo-advisers, pension consultants, and investment company underwriters, on average, one hour to prepare the statement. This results in an hour burden of 10,352 hours and a cost burden of \$1,649,488 in the first year.⁴²

³⁹ Deloitte, *Regulation Best Interest: How Wealth Management Firms are Implementing the Rule Package*, (March 6, 2020). This report was released before Regulation Best Interest was effective, so more broker-dealers may now document rollover recommendations. As such, this may represent an overestimate of the cost incurred to comply with this requirement.

⁴⁰ The burden is estimated as follows: (3,119,833 rollovers × 48% × 30 minutes) + (3,119,833 rollovers × 52% × 5 minutes) = 883,953 hours. A labor rate of \$219.23 is used for a personal financial

adviser. The labor rate is applied in the following calculation: {(3,119,833 rollovers × 48% × 30 minutes) + (3,119,833 rollovers × 52% × 5 minutes)} ÷ 60 minutes × \$219.23 = \$193,788,961.

⁴¹ The burden is estimated as follows: [(19,290 financial institutions × 30 minutes) ÷ 60 minutes] = 10,352 hours. A labor rate of \$159.34 is used for a lawyer. The labor rate is applied in the following calculation: [(19,290 financial institutions × 30 minutes) ÷ 60 minutes] × \$159.34 = \$1,649,488.

⁴² The burden is estimated as follows: [(1,894 broker-dealers + 15,982 registered investment

advisers) × 30 minutes] + [(183 insurers + 200 robo-advisers + 1,011 pension consultants, and 20 investment company underwriters) × 1 hour] = 10,352 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(1,894 broker-dealers + 15,982 registered investment advisers) × 30 minutes] + [(183 insurers + 200 robo-advisers + 1,011 pension consultants, and 20 investment company underwriters) × 1 hour] × \$159.34 = \$1,649,488.

The Department does not have data on how often investors would request a written description of the financial institutions' policies and procedures and information regarding costs, fees, and compensation. The Department assumes that, on average, each financial

institution would receive 10 such requests annually and that most financial institutions already have such information available. The Department requests comment on these assumptions. The Department estimates it would take a clerical worker five

minutes to prepare and send the disclosure, regardless of whether it is sent electronically or by mail. This results in an annual hour burden of 16,075 with an equivalent cost of \$1,019,959.⁴³

TABLE 6—HOURL BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE WRITTEN DESCRIPTION STATEMENT OF THE RIGHT TO OBTAIN A WRITTEN DESCRIPTION OF THE FINANCIAL INSTITUTION'S POLICIES AND PROCEDURES AND PROVISION OF REQUESTED POLICIES AND PROCEDURES

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Legal	10,352	\$1,649,488	0	\$0
Clerical	16,075	1,019,959	16,075	1,019,959
Total	26,427	2,669,447	16,075	1,019,959

As discussed above, the Department assumes that 5.8 percent, or 11,188, of these disclosures would not be sent electronically. Financial institutions

would incur \$0.66 for postage and \$0.10 for the paper and printing costs of two pages for each of the disclosures that would not be sent electronically, which

the Department estimates to cost \$8,503.⁴⁴

TABLE 7—MATERIAL AND POSTAGE COST ASSOCIATED WITH THE WRITTEN DESCRIPTION STATEMENT OF THE RIGHT TO OBTAIN A WRITTEN DESCRIPTION OF THE FINANCIAL INSTITUTION'S POLICIES AND PROCEDURES AND PROVISION OF REQUESTED POLICIES AND PROCEDURES

Activity	Year 1		Subsequent years	
	Pages	Cost	Pages	Cost
Material Cost	2	\$8,503	2	\$8,503
Total	2	8,503	2	8,503

1.3.3. Provision of Disclosures

Similar to the 2020 analysis, the Department assumes most required disclosures will be electronically delivered to plan fiduciaries. As discussed above, the Department assumes that approximately 5.8 percent of participants who roll over their plan

assets to IRAs would not receive required disclosures electronically. The Department estimates that approximately 3.2 million retirement investors⁴⁵ have relationships with financial institutions and are likely to engage in transactions covered under this PTE. Of these 3.2 million retirement investors, it is estimated that 5.8

percent, or 184,643 retirement investors, would receive paper disclosures.⁴⁶ The Department estimates that preparing and sending each disclosure would take a clerical worker, on average, five minutes, resulting in an hour burden of 15,387 hours with an equivalent cost of \$976,301.⁴⁷

⁴³ The burden is estimated as follows: [(19,290 financial institutions × 10 disclosures × 5 minutes) ÷ 60 minutes] = 16,075 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: [(16,075 financial institutions × 10 disclosures × 5 minutes) ÷ 60 minutes] × \$63.45 = \$1,019,959.

⁴⁴ [(19,290 financial institutions × 10 disclosures × 2 pages × \$0.05) + (19,290 financial institutions × 10 disclosures × \$0.66)] × 5.8% = \$8,503.

⁴⁵ According to Cerulli, in 2022, there were 707,104 DC plan-to-DC plan rollovers. (See Cerulli

Associates, *U.S. Retirement End-Investor 2023: Personalizing the 401(k) Investor Experience*, Exhibit 6.02. The Cerulli Report.) The Department also uses Internal Revenue Service (IRS) data from 2020 on overall rollovers into IRAs, which is 5,659,901 taxpayers. (See *Internal Revenue Service, SOI Tax Stats—Accumulation and Distribution of Individual Retirement Arrangement (IRA)*, Table 1: Taxpayers with Individual Retirement Arrangement (IRA) Plans, By Type of Plan, Tax Year 2020. (2023).) The Department estimates the number of affected plans and IRAs to be equal to 50 percent of rollovers from retirement plans to IRAs. The total

number of retirement investors that have relationships with financial institutions and are likely to engage in transacted covered under this PTE is estimated as: (707,104 DC plan-to-DC plan rollovers + 5,659,901 taxpayer with IRA rollovers) × 50 percent = 3,183,503.

⁴⁶ This is estimated as: 3,183,503 rollovers × 5.8% = 184,643 disclosures.

⁴⁷ This burden is estimated as: [(184,643 disclosures × 5 minutes) ÷ 60 minutes] = 15,387 hours. [(184,643 disclosures × 5 minutes) ÷ 60 minutes] × \$63.45 = \$976,301.

TABLE 8—HOURLY BURDEN AND EQUIVALENT COST ASSOCIATED PREPARING AND SENDING DISCLOSURES

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Clerical	15,387	\$976,301	15,387	\$976,301
Total	15,387	976,301	15,387	976,301

The Department assumes that the disclosures would require four pages in total, resulting in a material and postage cost of \$158,793.⁴⁸

TABLE 9—MATERIAL AND POSTAGE COST ASSOCIATED WITH SENDING DISCLOSURES

Activity	Year 1		Subsequent years	
	Pages	Cost	Pages	Cost
Material Cost	4	\$158,793	4	\$158,793
Total	4	158,793	4	158,793

1.4 Costs Associated With Disclosures for PEPs

Financial institutions providing investment advice for PEPs must provide to each participating employer an additional disclosure detailing any amounts the financial institution pays to or receives from the PPP or its affiliates in addition to any conflicts of interest that arise in connection with the investment advice it provides to a PEP. According to filings submitted to the Department, the Department estimates that there are 382 PEPs.⁴⁹

The Department does not have data on what percent of PEPs would be affected by the exemption. The Department assumes that on average, one financial institution would need to prepare one disclosure for each PEP. The Department estimates that, on average, it would take legal staff for each entity two hours to draft the disclosure, resulting in an hour burden of 764 hours with an equivalent cost of \$121,736 in the first year.⁵⁰ The Department requests comment on this assumption and how frequently PPPs would provide

investment advice to a PEP within the framework of the exemption. According to filings submitted to the Department, the Department estimates that there are 955 employers in PEPs.⁵¹ The Department assumes that all of these disclosures will be sent electronically. Distributing the disclosures is estimated to take clerical personnel one minute per disclosure. This results in an hour burden of 16 hours, and assuming an hourly wage rate for clerical personnel of \$63.45, the estimated equivalent cost burden is \$1,010.⁵²

TABLE 10—HOURLY BURDEN AND EQUIVALENT COST ASSOCIATED WITH PREPARING AND SENDING DISCLOSURES

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Legal	764	\$121,736	0	\$0
Clerical	16	1,010	16	1,010
Total	780	122,746	16	1,010

1.5 Costs Associated With Annual Report of Retrospective Review

The proposed amendment would require financial institutions to conduct a retrospective review at least annually.

The review would be required to be reasonably designed to detect and prevent violations of, and achieve compliance with, (1) the conditions of this exemption, (2) the Impartial Conduct Standards, and (3) the policies

and procedures governing compliance with the exemption. The Department is clarifying that the Financial Institution must update the policies and procedures as business, regulatory, and legislative changes and events dictate, to

⁴⁸ The material and postage cost is estimated as: (184,643 disclosures × 4 pages × \$0.05) + (184,643 disclosures × \$0.66 postage) = \$158,793.

⁴⁹ Department of Labor, *Form PR*, <https://www.dol.gov/agencies/ebsa/employers-and-advisers/plan-administration-and-compliance/reporting-and-filing/form-pr>.

⁵⁰ The burden is estimated as follows: 382 PEPs × 2 hours = 764 hours. A labor rate of \$159.34 is used for a lawyer. The labor rate is applied in the following calculation: 382 PEPs × 2 hours × \$159.34 = \$121,736.

⁵¹ Based on 2021 EFAST filings as of August 22, 2023, the Department estimates that there were 955 employers in 382 PEPs. The Department does not have data on the number of employers since October 2022. To estimate the number of employees, the Department applies the ratio of employers to PEPs in October 2021 (955/382 ~2.5) to the updated number of PEPs. Accordingly, the Department estimates that there are 955 employers in PEPs (382 × 2.5 = 955). The inaugural filing deadline for Form 5500 filings for PEPs with plan years beginning after January 1, 2021 was July 31,

2022. The Department based its estimates on those filings it had received by August 22, 2023.

However, since this is the first year PEPs could file, the Department anticipates that this understates the true number of PEPs affected by this proposed rule.

⁵² The burden is estimated as follows: [(955 employers × 1 minute) ÷ 60 minutes] = 16 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: [(955 employers × 1 minute) ÷ 60 minutes] × \$63.45 = \$1,010.

ensure they remain prudently designed, effective, and compliant with the exemption. This report would need to be certified by a Senior Executive.

Many of the entities affected by PTE 2020–02 likely already have retrospective review requirements. Broker-dealers are subject to retrospective review requirements under FINRA Rule 3110,⁵³ FINRA Rule 3120,⁵⁴ and FINRA Rule 3130;⁵⁵ SEC-registered investment advisers are already subject to retrospective review requirements under SEC Rule 206(4)–7; and insurance companies in many states are already subject to state insurance law based on the NAIC's Model Regulation.⁵⁶ Accordingly, in this analysis, the Department assumes that these entities will incur minimal costs to meet this requirement.

In 2018, the Investment Adviser Association estimated that 92 percent of SEC-registered investment advisers voluntarily provide an annual compliance program review report to senior management.⁵⁷ The Department assumes that state-registered investment advisers exhibit similar retrospective

review patterns as SEC-registered investment advisers. Accordingly, the Department estimates that eight percent, or 1,279 investment advisers advising retirement plans will incur costs associated with producing a retrospective review report.

The Department assumes that only ten percent of financial institutions will incur the total costs of producing the retrospective review report. This is estimated to take a legal professional five hours for small firms and 10 hours for large firms. This results in an annual hour burden of 3,715 hours and an equivalent cost burden of \$591,948.⁵⁸

Financial Institutions that already produce retrospective review reports voluntarily or in accordance with other regulators' rules likely will spend additional time to fully comply with this exemption condition such as revising their current retrospective review reports. This is estimated to take a financial professional one hour for small firms and two hours for large firms. This results in an annual hour burden of 33,335 hours and an equivalent cost burden of \$5,311,672.⁵⁹

The proposed amendments would add a requirement to review policies and procedures at least annually and to update them as needed to ensure they remain prudently designed, effective, and current. This includes a requirement to update and modify the policies and procedures, as appropriate, after considering the findings in the retrospective review report. For entities currently covered by PTE 2020–02, the Department estimates that it would take a legal professional an additional 30 minutes for all entities covered under the existing and amended exemption. The Department estimates this would result an annual hour burden of 9,645 with an equivalent cost of \$1,536,834.⁶⁰

In addition to conducting the audit and producing a report, financial institutions also will need to review the report and certify the exemption. This is estimated to take the certifying officer two hours for small firms and four hours for large firms. This results in an hour burden of 68,156 and an equivalent cost burden of \$12,992,578.⁶¹

TABLE 11—HOURLY BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE RETROSPECTIVE REVIEW

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost

⁵⁸ The burden is estimated as: [(395 small broker-dealers + (2,996 small registered-investment advisers × 8%) + 151 small insurers + 10 small robo-advisers + 930 small pension consultants + 20 small investment company underwriters) × 10% × 5 hours] + [(1,499 large broker-dealers + (12,986

large registered-investment advisers × 8%) + 32 large insurers + 190 large robo-advisers + 81 large pension consultants) × 10% × 10 hours] = 3,715 hours. The equivalent cost is estimated as: [(395 small broker-dealers + (2,996 small registered-investment advisers × 8%) + 151 small insurers + 10 small robo-advisers + 930 small pension consultants + 20 small investment company underwriters) × 10% × 5 hours] + [(1,499 large broker-dealers + (12,986 large registered-investment advisers × 8%) + 32 large insurers + 190 large robo-advisers + 81 large pension consultants) × 10% × 10 hours] × \$159.34 = \$591,948.

⁵⁹ The burden is estimated as: [(395 small broker-dealers + (2,996 small registered-investment advisers × 92%) + 151 small insurers + 10 small robo-advisers + 930 small pension consultants + 20 small investment company underwriters) × 90% × 5 hours] + [(1,499 large broker-dealers + (12,986 large registered-investment advisers × 92%) + 32 large insurers + 190 large robo-advisers + 81 large pension consultants) × 90% × 10 hours] = 33,335 hours.

The equivalent cost is estimated as: [(395 small broker-dealers + (2,996 small registered-investment advisers × 92%) + 151 small insurers + 10 small robo-advisers + 930 small pension consultants + 20 small investment company underwriters) × 90% × 5 hours] + [(1,499 large broker-dealers + (12,986

large registered-investment advisers × 92%) + 32 large insurers + 190 large robo-advisers + 81 large pension consultants) × 90% × 10 hours] × \$159.34 = \$5,311,672.

⁶⁰ The burden is estimated as follows: [(19,290 × 30 minutes) + 60 minutes] = 9,645 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(19,290 × 30 minutes) + 60 minutes] × \$159.34 = \$1,536,834.

⁶¹ The burden is estimated as: [(395 small broker-dealers + (2,996 small registered-investment advisers + 151 small insurers + 10 small robo-advisers + 930 small pension consultants + 20 small investment company underwriters) × 2 hours] + [(1,499 large broker-dealers + (12,986 large registered-investment advisers) + 32 large insurers + 190 large robo-advisers + 81 large pension consultants) × 4 hours] = 68,156 hours. The equivalent cost is estimated as: [(395 small broker-dealers + (2,996 small registered-investment advisers + 151 small insurers + 10 small robo-advisers + 930 small pension consultants + 20 small investment company underwriters) × 2 hours] + [(1,499 large broker-dealers + (12,986 large registered-investment advisers) + 32 large insurers + 190 large robo-advisers + 81 large pension consultants) × 4 hours] × \$190.63 = \$12,992,578.

1.6 Costs Associated With Written Policies and Procedures

Under the original exemption, financial institutions were already required to maintain their policies and procedures. Robo-advisers, pension consultants, and investment company

underwriters, who are not covered under the existing exemption may need to develop policies and procedures. The Department estimates that initially establishing, maintaining, and enforcing written policies and procedures prudently designed to ensure compliance with the Impartial Conduct

Standards will take a legal professional five hours for small entities and 10 hours for large entities. The Department estimates the requirement would have an hour burden of 7,510 hours with an equivalent cost of \$1,196,643 in the first year.⁶²

TABLE 12—HOURLY BURDEN AND EQUIVALENT COST ASSOCIATED WITH DEVELOPING POLICIES AND PROCEDURES

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Clerical	7,510	\$1,196,463	0	\$0
Total	7,510	1,196,643	0	0

The proposed amendments would require financial institutions to provide their complete policies and procedures to the Department upon request. Based on the number of cases in the past and current open cases that would merit such a request, the Department estimates that the Department would request 165 policies and procedures in the first year and 50 policies and

procedures in subsequent years. The Department estimates that it will take a clerical worker 15 minutes to prepare and send their complete policies and procedures to the Department resulting in an hourly burden of approximately 41 hours in the first year. Assuming an hourly wage rate for clerical personnel of \$63.45, the estimated cost burden in the first year is \$2,617.⁶³ In subsequent

years, the Department estimates that the requirement would result in an hour burden of approximately 13 hours with an equivalent cost of \$793.⁶⁴ The Department assumes financial institutions would send the documents electronically and thus would not incur costs for postage or materials.

TABLE 13—HOURLY BURDEN AND EQUIVALENT COST ASSOCIATED WITH PROVIDING POLICIES AND PROCEDURES TO THE DEPARTMENT

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Clerical	41	\$2,617	13	\$793
Total	41	2,617	13	793

1.7 Overall Summary

The paperwork burden estimates are summarized as follows:

Type of Review: Revision of an existing collection.

Agency: Employee Benefits Security Administration, Department of Labor.

Title: Fiduciary Proposed Transaction Exemption.

OMB Control Number: 1210–0163.

Affected Public: Business or other for-profit institution.

Estimated Number of Respondents: 19,290.

Estimated Number of Annual Responses: 6,504,119.

Frequency of Response: Initially, Annually, and when engaging in exempted transaction.

Estimated Total Annual Burden Hours: 1,044,050.

Estimated Total Annual Burden Cost: \$167,296.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA)⁶⁵ imposes certain requirements on rules subject to the notice and comment requirements of section 553(b) of the Administrative Procedure Act or any other law.⁶⁶ Under section 603 of the RFA, agencies must submit an initial regulatory flexibility analysis (IRFA) of

a proposal that is likely to have a significant economic impact on a substantial number of small entities, such as small businesses, organizations, and governmental jurisdictions. This proposed amended exemption, along with related amended exemptions and a proposed rule amendment published elsewhere in this issue of the **Federal Register**, is part of a rulemaking regarding the definition of fiduciary investment advice, which the Department has determined likely will have a significant economic impact on a substantial number of small entities. The impact of this proposed amendment on small entities is included in the IRFA

⁶² The burden is estimated as follows: [(930 small pension consultants + 10 small robo-adviser + 20 small investment company underwriters) × 5 hours] + [(81 large pension consultants + 190 large robo-advisers) × 10 hours] = 7,510 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(930 small pension consultants + 10 small robo-adviser

+ 20 small investment company underwriters) × 5 hours] × \$159.34 = \$1,196,643.

⁶³ The burden is estimated as follows: [(165 policies and procedures × 15 minutes) ÷ 60 minutes] = 41 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: [(165 policies and procedures × 15 minutes) ÷ 60 minutes] × \$63.45 = \$2,617.

⁶⁴ The burden is estimated as follows: [(50 policies and procedures × 15 minutes) ÷ 60 minutes] = 13 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: [(50 policies and procedures × 15 minutes) ÷ 60 minutes] × \$63.45 = \$793.

⁶⁵ 5 U.S.C. 601 *et seq.*

⁶⁶ 5 U.S.C. 601(2), 603(a); *see* 5 U.S.C. 551.

for the entire project, which can be found in the related notice of proposed rulemaking found elsewhere in this edition of the **Federal Register**.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995⁶⁷ requires each Federal agency to prepare a written statement assessing the effects of any Federal mandate in a proposed or final rule that may result in an expenditure of \$100 million or more (adjusted annually for inflation with the base year 1995) in any 1 year by state, local, and tribal governments, in the aggregate, or by the private sector. For purposes of the Unfunded Mandates Reform Act, as well as Executive Order 12875, this proposed amended exemption does not include any Federal mandate that will result in such expenditures.

Federalism Statement

Executive Order 13132 outlines fundamental principles of federalism. It also requires Federal agencies to adhere to specific criteria in formulating and implementing policies that have “substantial direct effects” on the states, the relationship between the national government and states, or on the distribution of power and responsibilities among the various levels of government. Federal agencies promulgating regulations that have these federalism implications must consult with State and local officials, and describe the extent of their consultation and the nature of the concerns of State and local officials in the preamble to the final regulation. Notwithstanding this, Section 514 of ERISA provides, with certain exceptions specifically enumerated, that the provisions of Titles I and IV of ERISA supersede any and all laws of the States as they relate to any employee benefit plan covered under ERISA.

The Department does not intend this exemption to change the scope or effect of ERISA section 514, including the savings clause in ERISA section 514(b)(2)(A) for State regulation of securities, banking, or insurance laws. Ultimately, the Department does not believe this proposed class exemption has federalism implications because it has no substantial direct effect on the States, on the relationship between the National government and the States, or on the distribution of power and responsibilities among the various levels of government.

General Information

The attention of interested persons is directed to the following: (1) The fact that a transaction is the subject of an exemption under ERISA section 408(a) and Code section 4975(c)(2) does not relieve a fiduciary, or other party in interest or disqualified person with respect to a Plan, from certain other provisions of ERISA and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of ERISA section 404 which require, among other things, that a fiduciary act prudently and discharge his or her duties respecting the Plan solely in the interests of the participants and beneficiaries of the Plan. Additionally, the fact that a transaction is the subject of an exemption does not affect the requirement of Code section 401(a) that the Plan must operate for the exclusive benefit of the employees of the employer maintaining the Plan and their beneficiaries; (2) Before the proposed exemption may be granted under ERISA section 408(a) and Code section 4975(c)(2), the Department must find that it is administratively feasible, in the interests of Plans and their participants and beneficiaries and IRA owners, and protective of the rights of participants and beneficiaries of the Plan and IRA owners; (3) If granted, the proposed exemption is applicable to a particular transaction only if the transaction satisfies the conditions specified in the exemption; and (4) The proposed exemption, if granted, is supplemental to, and not in derogation of, any other provisions of ERISA and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

The Department is proposing the following amendment on its own motion, pursuant to its authority under ERISA section 408(a) and Code section 4975(c)(2) and in accordance with procedures set forth in 29 CFR part 2570, subpart B (76 FR 66637 (October 27, 2011)).⁶⁸

⁶⁸ Reorganization Plan No. 4 of 1978 (5 U.S.C. App. 1 (2018)) generally transferred the authority of the Secretary of the Treasury to grant administrative exemptions under Code section 4975 to the Secretary of Labor.

Prohibited Transaction Exemption 2020–02, Improving Investment Advice for Workers & Retirees

Section I—Transactions

(a) In General

ERISA Title I (Title I) and the Internal Revenue Code (the Code) prohibit fiduciaries, as defined, that provide investment advice to Plans and individual retirement accounts (IRAs) from receiving compensation that varies based on their investment advice and compensation that is paid from third parties. Title I and the Code also prohibit fiduciaries from engaging in purchases and sales with Plans or IRAs on behalf of their own accounts (principal transactions). This exemption permits Financial Institutions and Investment Professionals who provide fiduciary investment advice to Retirement Investors to receive otherwise prohibited compensation and engage in riskless principal transactions and certain other principal transactions (Covered Principal Transactions) as described below.

The exemption provides relief from the prohibitions of ERISA section 406(a)(1)(A), (D), and 406(b), and the sanctions imposed by Code section 4975(a) and (b), by reason of Code section 4975(c)(1)(A), (D), (E), and (F), if the Financial Institutions and Investment Professionals provide fiduciary investment advice in accordance with the conditions set forth in Section II and are eligible pursuant to Section III, subject to the definitional terms and recordkeeping requirements in Sections IV and V.

(b) Covered Transactions

This exemption permits Financial Institutions and Investment Professionals, and their Affiliates and Related Entities, to engage in the following transactions, including as part of a rollover from a Plan to an IRA as defined in Code section 4975(e)(1)(B) or (C), as a result of the provision of investment advice within the meaning of ERISA section 3(21)(A)(ii) and Code section 4975(e)(3)(B):

(1) The receipt of reasonable compensation; and

(2) The purchase or sale of an asset in a riskless principal transaction or a Covered Principal Transaction, and the receipt of a mark-up, mark-down, or other payment.

(c) Exclusions

This exemption does not apply if: (1) The Plan is covered by Title I and the Investment Professional, Financial Institution, or any Affiliate providing investment advice is

⁶⁷ Public Law 104–4, 109 Stat. 48 (Mar. 22, 1995).

(A) the employer of employees covered by the Plan, or

(B) the Plan's named fiduciary or administrator; provided however that a named fiduciary or administrator or their Affiliate may rely on the exemption if it is: (i) selected to provide investment advice by a fiduciary who is Independent of the Financial Institution, Investment Professional, and their Affiliates, or (ii) a Pooled Plan Provider (PPP) registered with the Department under 29 CFR 2510.3-44; or

(2) The transaction involves the Investment Professional or Financial Institution acting in a fiduciary capacity other than as an investment advice fiduciary within the meaning of ERISA section 3(21)(A)(ii) and Code section 4975(e)(3)(B).

Section II—Investment Advice Arrangement

Section II(a) requires Investment Professionals and Financial Institutions to comply with Impartial Conduct Standards, including a best interest standard, when providing fiduciary investment advice to Retirement Investors. In addition, Section II(b) requires Financial Institutions to acknowledge fiduciary status under Title I and/or the Code, and provide investors with a statement of the best interest standard of care, a written description of the services they will provide and their Conflicts of Interest, rollover disclosure (as applicable), Financial Institution, and additional disclosure with respect to Pooled Employer Plans (as applicable). Section II(c) requires Financial Institutions to adopt policies and procedures prudently designed to ensure compliance with the Impartial Conduct Standards when providing fiduciary investment advice to Retirement Investors regarding compliance with the Impartial Conduct Standards. Section II(d) requires the Financial Institution to conduct a retrospective review of compliance with the Impartial Conduct Standards and the policies and procedures. Section II(e) allows Financial Institutions to correct certain violations of the exemption conditions and continue to rely upon the exemption for relief.

(a) Impartial Conduct Standards

The Financial Institution and Investment Professional comply with the following "Impartial Conduct Standards":

(1) Investment advice is, at the time it is provided, in the Best Interest of the Retirement Investor. As defined in Section V(b), such advice: (A) reflects the care, skill, prudence, and diligence

under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims, based on the investment objectives, risk tolerance, financial circumstances, and needs of the Retirement Investor; and (B) does not place the financial or other interests of the Investment Professional, Financial Institution or any Affiliate, Related Entity, or other party ahead of the interests of the Retirement Investor, or subordinate the Retirement Investor's interests to their own. For example, in choosing between two investments offered and available to the Retirement Investor from the Financial Institution, it is not permissible for the Investment Professional to advise investing in the one that is worse for the Retirement Investor but better or more profitable for the Investment Professional or the Financial Institution.

(2)(A) The compensation received, directly or indirectly, by the Financial Institution, Investment Professional, their Affiliates and Related Entities for their services does not exceed reasonable compensation within the meaning of ERISA section 408(b)(2) and Code section 4975(d)(2); and (B) as required by the Federal securities laws, the Financial Institution and Investment Professional seek to obtain the best execution of the investment transaction reasonably available under the circumstances; and

(3) The Financial Institution's and its Investment Professionals' statements (written and oral) to the Retirement Investor about the recommended transaction and other relevant matters are not, at the time statements are made, materially misleading. For purposes of this paragraph, the term "materially misleading" includes omitting information that is needed to prevent the statement from being misleading to the Retirement Investor under the circumstances.

(b) Disclosure

Prior to engaging in a transaction pursuant to this exemption, the Financial Institution provides the disclosures set forth in (1)–(4) to the Retirement Investor:

(1) A written acknowledgment that the Financial Institution and its Investment Professionals are providing fiduciary investment advice to the Retirement Investor and are fiduciaries under Title I, the Code, or both when making an investment recommendation;

(2) A written statement of the Best Interest standard of care owed by the

Investment Professional and Financial Institution to the Retirement Investor;

(3) A written description of the services to be provided and the Financial Institution's and Investment Professional's material Conflicts of Interest that is accurate and not misleading in any material respect. This description will include a statement on whether the Retirement Investor will pay for such services, directly or indirectly, including through Third-Party Payments. If, for example, the Retirement Investor will pay through commissions or transaction-based payments, the written statement must clearly disclose that fact. This statement must be written in plain English, taking into consideration a Retirement Investor's level of financial experience;

(4) A written statement that the Retirement Investor has the right to obtain specific information regarding costs, fees, and compensation, described in dollar amounts, percentages, formulas, or other means reasonably designed to present full and fair disclosure that is materially accurate in scope, magnitude, and nature, with sufficient detail to permit the Retirement Investor to make an informed judgment about the costs of the transaction and about the significance and severity of the Conflicts of Interest, and that describes how the Retirement Investor can get the information, free of charge;

(5) *Rollover disclosure.* Before engaging in a rollover, or making a recommendation to a Plan participant as to the post-rollover investment of assets currently held in a Plan, the Financial Institution and Investment Professional must consider and document the basis for their conclusions as to whether a rollover is in the Retirement Investor's Best Interest, and must provide that documentation to the Retirement Investor. Relevant factors to consider must include but are not limited to:

(A) the alternatives to a rollover, including leaving the money in the Plan or account type, as applicable;

(B) the fees and expenses associated with the Plan and the recommended investment or account;

(C) whether an employer or other party pays for some or all of the Plan's administrative expenses; and

(D) the different levels of services and investments available under the Plan and the recommended investment or account.

(6) The Financial Institution will not fail to satisfy the conditions in Section II(b) solely because it, acting in good faith and with reasonable diligence, makes an error or omission in disclosing the required information, provided that

the Financial Institution discloses the correct information as soon as practicable, but not later than 30 days after the date on which it discovers or reasonably should have discovered the error or omission.

(7) Investment Professionals and Financial Institutions may rely in good faith on information and assurances from the other entities that are not Affiliates as long as they do not know or have reason to know that such information is incomplete or inaccurate.

(8) The Financial Institution is not required to disclose information pursuant to this Section II(b) if such disclosure is otherwise prohibited by law.

(c) Policies and Procedures

(1) The Financial Institution establishes, maintains, and enforces written policies and procedures prudently designed to ensure that the Financial Institution and its Investment Professionals comply with the Impartial Conduct Standards in connection with covered fiduciary advice and transactions.

(2) The Financial Institution's policies and procedures mitigate Conflicts of Interest to the extent that a reasonable person reviewing the policies and procedures and incentive practices as a whole would conclude that they do not create an incentive for a Financial Institution or Investment Professional to place their interests ahead of the interests of the Retirement Investor. Financial Institutions may not use quotas, appraisals, performance or personnel actions, bonuses, contests, special awards, differential compensation, or other similar actions or incentives that are intended, or that a reasonable person would conclude are likely, to result in recommendations that are not in Retirement Investors' Best Interest.

(3) Financial Institutions must provide their complete policies and procedures to the Department upon request within 10 business days of request.

(d) Retrospective Review

(1) The Financial Institution conducts a retrospective review, at least annually, that is reasonably designed to assist the Financial Institution in detecting and preventing violations of, and achieving compliance with, this exemption, including the Impartial Conduct Standards and the policies and procedures governing compliance with the exemption. The Financial Institution updates the policies and procedures as business, regulatory, and legislative changes and events dictate, and to

ensure they remain prudently designed, effective, and compliant with Section II(c).

(2) The methodology and results of the retrospective review are reduced to a written report that is provided to a Senior Executive Officer.

(3) A Senior Executive Officer of the Financial Institution certifies, annually, that:

(A) The officer has reviewed the report of the retrospective review;

(B) The Financial Institution has filed (or will file timely, including extensions) Form 5330 reporting any non-exempt prohibited transactions discovered by the Financial Institution in connection with investment advice covered under Code section 4975(e)(3)(B), corrected those transactions, and paid any resulting excise taxes owed under Code section 4975;

(C) The Financial Institution has written policies and procedures that meet the conditions set forth in Section II(c)(1); and

(D) The Financial Institution has in place a prudent process to modify such policies and procedures as set forth in Section II(d)(1).

(4) The review, report, and certification are completed no later than six months following the end of the period covered by the review.

(5) The Financial Institution retains the report, certification, and supporting data for a period of six years and makes the report, certification, and supporting data available to the Department, within 10 business days of request, to the extent permitted by law including 12 U.S.C. 484 (regarding limitations on visitorial powers for national banks).

(e) Self-Correction

A non-exempt prohibited transaction will not occur due to a violation of the exemption's conditions with respect to a transaction, provided:

(1) Either the violation did not result in investment losses to the Retirement Investor or the Financial Institution made the Retirement Investor whole for any resulting losses;

(2) The Financial Institution corrects the violation and notifies the Department of Labor of the violation and the correction via email to IIAWR@dol.gov within 30 days of correction;

(3) The correction occurs no later than 90 days after the Financial Institution learned of the violation or reasonably should have learned of the violation; and

(4) The Financial Institution notifies the person(s) responsible for conducting the retrospective review during the applicable review cycle and the

violation and correction is specifically set forth in the written report of the retrospective review required under subsection II(d)(2).

Section III—Eligibility

(a) General

Subject to the timing and scope provisions set forth in subsection (b) and the opportunity to be heard as set forth in subsection (c), an Investment Professional or Financial Institution will be ineligible to rely on the exemption with respect to any transaction, if the Financial Institution, its Affiliate, or Investment Professional is described in (1) or (2):

(1) The Investment Professional or Financial Institution has been convicted either:

(A) by a U.S. Federal or state court as a result of any felony involving abuse or misuse of such person's employee benefit plan position or employment, or position or employment with a labor organization; any felony arising out of the conduct of the business of a broker, dealer, investment adviser, bank, insurance company or fiduciary; income tax evasion; any felony involving larceny, theft, robbery, extortion, forgery, counterfeiting, fraudulent concealment, embezzlement, fraudulent conversion, or misappropriation of funds or securities; conspiracy or attempt to commit any such crimes or a crime in which any of the foregoing crimes is an element; or a crime that is identified or described in ERISA section 411; or

(B) by a foreign court of competent jurisdiction as a result of any crime, however denominated by the laws of the relevant foreign or state government, that is substantially equivalent to an offense described in (A).

For purposes of this section (a)(1), a person shall be deemed to have been convicted of a crime as of the "conviction date," which is the date of the judgment of the trial court (or the date of the judgment of any court in a foreign jurisdiction that is the equivalent of a U.S. Federal or state trial court), regardless of whether that judgment remains under appeal.

(2) The Investment Professional or Financial Institution has received a written ineligibility notice issued by the Department for:

(A) engaging in a systematic pattern or practice of violating the conditions of this exemption in connection with otherwise non-exempt prohibited transactions;

(B) intentionally violating the conditions of this exemption in connection with otherwise non-exempt prohibited transactions;

(C) engaging in a systematic pattern or practice of failing to correct prohibited transactions, report those transactions to the IRS on Form 5330 and pay the resulting excise taxes imposed by Code section 4975 in connection with non-exempt prohibited transactions involving investment advice under Code section 4975(e)(3)(B); or

(D) providing materially misleading information to the Department in connection with the conditions of the exemption.

(b) **Timing and Scope of Ineligibility**

(1) Ineligibility shall begin six months after:

(A) the conviction date defined in Section (a)(1);

(B) the date of the Department's written determination under Section (c)(1)(C) for a petition regarding a foreign conviction; or

(C) the date of the written ineligibility notice described in subsection (a)(2).

(2) A person shall become eligible to rely on this exemption again only upon the earliest of the following:

(A) the date of a subsequent judgment reversing such person's conviction described in (a)(1);

(B) 10 years after the person became ineligible under Section III(b)(1) or 10 years after the person was released from imprisonment as a result of a crime described in (a)(1), if later; or

(C) the date, if any, the Department grants an individual exemption (which may impose additional conditions) to the person permitting its continued reliance on this exemption notwithstanding the conviction.

(c) **Opportunity To Be Heard**

(1) **Foreign Convictions.**

(A) A Financial Institution, its Affiliate, or an Investment Professional that has been convicted by a foreign court of competent jurisdiction as provided in subsection (a)(1)(B)), the Financial Institution or Investment Professional may submit a petition to the Department that informs the Department of the conviction and seeks the Department's determination that the Financial Institution's continued reliance on the exemption would not be contrary to the purposes of the exemption. Petitions must be submitted to the Department within 10 business days after the conviction date by email to IIAWR@dol.gov.

(B) Following receipt of the petition, the Department will provide the Investment Professional or Financial Institution with the opportunity to be heard in person (including by phone or videoconference), in writing, or a combination thereof. The opportunity to

be heard will be limited to one conference unless the Department determines in its sole discretion to allow additional conferences.

(C) Following the hearing, the Department will issue a written determination to the Financial Institution or Investment Professional, as applicable, articulating the basis for its determination whether or not to allow the Financial Institution or Investment Professional to continue relying on PTE 2020–02.

(2) **Written Ineligibility Notice.** Prior to issuing a written ineligibility notice, the Department will issue a written warning to the Investment Professional or Financial Institution, as applicable, identifying specific conduct implicating subsection (a)(2) and providing a six-month opportunity to cure. At the end of the six-month period, if the Department determines that the Investment Professional or Financial Institution has not taken appropriate action to prevent recurrence of the disqualifying conduct, it will provide the Investment Professional or Financial Institution with the opportunity to be heard, in person (including by phone or videoconference), in writing, or a combination, before the Department issues the written ineligibility notice. The opportunity to be heard will be limited to one conference unless the Department determines in its sole discretion to allow additional conferences. The written ineligibility notice will articulate the basis for the determination that the Investment Professional or Financial Institution engaged in conduct described in subsection (a)(2).

(3) **Department's Considerations.** For hearings under (c)(1) and (c)(2), the Department will consider: the gravity of the offense; the degree to which the underlying conduct concerned individual misconduct, or, alternately, corporate managers or policy; recency of the conduct at issue; any remedial measures taken; and other factors the Department determines in its discretion are reasonable in light of the nature and purposes of the exemption.

(d) **Alternative Exemptions**

A Financial Institution or Investment Professional that is ineligible to rely on this exemption may rely on a statutory or separate administrative prohibited transaction exemption if one is available or seek an individual prohibited transaction exemption from the Department. To the extent an applicant seeks retroactive relief in connection with an exemption application, the Department will consider the application in accordance with its

retroactive exemption policy as set forth in 29 CFR 2570.35(d). The Department may require additional prospective compliance conditions as a condition of retroactive relief.

Section IV—Recordkeeping

The Financial Institution maintains for a period of six years records demonstrating compliance with this exemption and makes such records available, to the extent permitted by law including 12 U.S.C. 484, to any authorized employee of the Department or the Department of the Treasury.

Section V—Definitions

(a) “Affiliate” means:

(1) Any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with the Investment Professional or Financial Institution. (For this purpose, “control” would mean the power to exercise a controlling influence over the management or policies of a person other than an individual);

(2) Any officer, director, partner, employee, or relative (as defined in ERISA section 3(15)), of the Investment Professional or Financial Institution; and

(3) Any corporation or partnership of which the Investment Professional or Financial Institution is an officer, director, or partner.

(b) Advice is in a Retirement Investor's “Best Interest” if such advice (A) reflects the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims, based on the investment objectives, risk tolerance, financial circumstances, and needs of the Retirement Investor, and (B) does not place the financial or other interests of the Investment Professional, Financial Institution or any Affiliate, Related Entity, or other party ahead of the interests of the Retirement Investor, or subordinate the Retirement Investor's interests to their own.

(c) A “Conflict of Interest” is an interest that might incline a Financial Institution or Investment Professional—consciously or unconsciously—to make a recommendation that is not in the Best Interest of the Retirement Investor.

(d) A “Covered Principal Transaction” is a principal transaction that:

(1) For sales to a Plan or an IRA:

(A) Involves a U.S. dollar denominated debt security issued by a U.S. corporation and offered pursuant to

a registration statement under the Securities Act of 1933, a U.S. Treasury Security, a debt security issued or guaranteed by a U.S. federal government agency other than the U.S. Department of the Treasury, a debt security issued or guaranteed by a government-sponsored enterprise, a municipal security, a certificate of deposit, an interest in a Unit Investment Trust, or any investment permitted to be sold by an investment advice fiduciary to a Retirement Investor under an individual exemption granted by the Department after the effective date of this exemption that includes the same conditions as this exemption; and

(B) A debt security may only be recommended in accordance with written policies and procedures adopted by the Financial Institution that are reasonably designed to ensure that the security, at the time of the recommendation, has no greater than moderate credit risk and sufficient liquidity that it could be sold at or near carrying value within a reasonably short period of time; and

(2) For purchases from a Plan or an IRA, involves any securities or investment property.

(e) “Financial Institution” means an entity that is not suspended, barred or otherwise prohibited (including under Section III of this exemption) from making investment recommendations by any insurance, banking, or securities law or regulatory authority (including any self-regulatory organization), that employs the Investment Professional or otherwise retains such individual as an independent contractor, agent or registered representative, and that is:

(1) Registered as an investment adviser under the Investment Advisers Act of 1940 (15 U.S.C. 80b–1 *et seq.*) or under the laws of the state in which the adviser maintains its principal office and place of business;

(2) A bank or similar financial institution supervised by the United States or a state, or a savings association (as defined in section 3(b)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1813(b)(1))); or

(3) An insurance company qualified to do business under the laws of a state, that: (A) has obtained a Certificate of Authority from the insurance commissioner of its domiciliary state which has neither been revoked nor suspended; (B) has undergone and shall continue to undergo an examination by an independent certified public accountant for its last completed taxable year or has undergone a financial examination (within the meaning of the law of its domiciliary state) by the state’s insurance commissioner within

the preceding five years, and (C) is domiciled in a state whose law requires that an actuarial review of reserves be conducted annually and reported to the appropriate regulatory authority;

(4) A broker or dealer registered under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*); or

(5) An entity that is described in the definition of Financial Institution in an individual exemption granted by the Department after the date of this exemption that provides relief for the receipt of compensation in connection with investment advice provided by an investment advice fiduciary under the same conditions as this class exemption.

(f) For purposes of subsection I(c)(1), a fiduciary is “Independent” of the Financial Institution and Investment Professional if:

(1) the fiduciary is not the Financial Institution, Investment Professional, or an Affiliate;

(2) the fiduciary does not have a relationship to or an interest in the Financial Institution, Investment Professional, or any Affiliate that might affect the exercise of the fiduciary’s best judgment in connection with transactions covered by the exemption; and

(3) the fiduciary does not receive and is not projected to receive within the current Federal income tax year, compensation or other consideration for his or her own account from the Financial Institution, Investment Professional, or an Affiliate, in excess of 2% of the fiduciary’s annual revenues based upon its prior income tax year.

(g) “Individual Retirement Account” or “IRA” means any plan that is an account or annuity described in Code section 4975(e)(1)(B) through (F).

(h) “Investment Professional” means an individual who:

(1) Is a fiduciary of a Plan or an IRA by reason of the provision of investment advice described in ERISA section 3(21)(A)(ii) or Code section 4975(e)(3)(B), or both, and the applicable regulations, with respect to the assets of the Plan or IRA involved in the recommended transaction;

(2) Is an employee, independent contractor, agent, or representative of a Financial Institution; and

(3) Satisfies the Federal and state regulatory and licensing requirements of insurance, banking, and securities laws (including self-regulatory organizations) with respect to the covered transaction, as applicable, and is not disqualified or barred from making investment recommendations by any insurance, banking, or securities law or regulatory authority (including any self-regulatory organization).

(i) “Plan” means any employee benefit plan described in ERISA section 3(3) and any plan described in Code section 4975(e)(1)(A).

(j) A “Pooled Employer Plan” or “PEP” means a pooled employer plan described in ERISA section 3(43).

(k) A “Pooled Plan Provider” or “PPP” means a pooled plan provider described in ERISA section 3(44).

(l) “Riskless Principal Transaction” means a transaction in which a Financial Institution, after having received an order from a Retirement Investor to buy or sell an asset, purchases or sells the asset for the Financial Institution’s own account to offset the contemporaneous transaction with the Retirement Investor. A Riskless Principal Transaction is not a Covered Principal Transaction.

(m) A “Related Entity” is any party that is not an Affiliate, but which either has, or in which the Investment Professional or Financial Institution has, an interest that may affect best judgment as a fiduciary.

(n) “Retirement Investor” means:

(1) A participant or beneficiary of a Plan with authority to direct the investment of assets in their account or to take a distribution;

(2) The beneficial owner of an IRA acting on behalf of the IRA; or

(3) A fiduciary acting on behalf of a Plan or an IRA.

(o) A “Senior Executive Officer” is any of the following: the chief compliance officer, the chief executive officer, president, chief financial officer, or one of the three most senior officers of the Financial Institution.

(p) “Third-Party Payments” include sales charges when not paid directly to the Financial Institution by the Plan, from a participant or beneficiary’s account, or from an IRA; gross dealer concessions; revenue sharing payments; 12–1 fees; distribution, solicitation or referral fees; volume-based fees; fees for seminars and educational programs; and any other compensation, consideration, or financial benefit provided to the Financial Institution or an Affiliate or Related Entity by a third party as a result of a transaction involving a Plan, participant or beneficiary account, or IRA.

Signed at Washington, DC, this 24th day of October, 2023.

Lisa M. Gomez,

Assistant Secretary, Employee Benefits Security Administration, U.S. Department of Labor.

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR**Employee Benefits Security Administration****29 CFR Part 2550**

[Application No. D–12060]

ZRIN 1210–ZA33**Proposed Amendment to Prohibited Transaction Exemption 84–24**

AGENCY: Employee Benefits Security Administration, U.S. Department of Labor.

ACTION: Notice of Proposed Amendment to Prohibited Transaction Exemption 84–24.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed amendment to Prohibited Transaction Exemption (PTE) 84–24, an exemption from certain prohibited transaction provisions of the Employee Retirement Income Security Act of 1974 (ERISA) and the Internal Revenue Code of 1986 (the Code). The amendment would affect participants and beneficiaries of plans, Individual Retirement Account (IRA) owners, and certain fiduciaries of plans and IRAs.

DATES:

Public Comments. Comments are due on or before January 2, 2024.

Public Hearing. The Department anticipates holding a public hearing approximately 45 days following the date of publication in the **Federal Register**. Specific information regarding the date, location, and submission of requests to testify will be published in a notice in the **Federal Register**.

Applicability Date. The Department proposes to make the final amendment effective 60 days after it is published in the **Federal Register**.

ADDRESSES: All written comments concerning the proposed amendments should be sent to the Employee Benefits Security Administration, Office of Exemption Determinations, U.S. Department of Labor through the Federal eRulemaking Portal and identified by Application No. D–12060.

Federal eRulemaking Portal: Visit <http://www.regulations.gov>. Follow the instructions for sending comments.

Docket: For access to the docket to read background documents and comments, including the plain-language summary of the proposal required by the Providing Accountability Through Transparency Act of 2023, or comments, please go to the Federal eRulemaking Portal at <http://www.regulations.gov>.

See **SUPPLEMENTARY INFORMATION** below for additional information regarding comments.

FOR FURTHER INFORMATION CONTACT: Susan Wilker, (202) 693–8540 (not a toll-free number), Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor.

SUPPLEMENTARY INFORMATION:**Comment Instructions**

Warning: All comments received will be included in the public record without change and will be made available online at [regulations.gov](https://www.regulations.gov). This includes any personal information provided, unless the comment includes information claimed to be confidential or information whose disclosure is restricted by statute. If you submit a comment, EBSA recommends that you include your name and other contact information, but DO NOT submit information that you consider to be confidential, or otherwise protected (such as Social Security number or an unlisted phone number), or confidential business information that you do not want publicly disclosed. If EBSA cannot read your comment due to technical difficulties and cannot contact you for clarification, EBSA might not be able to consider your comment. The www.regulations.gov website is an “anonymous access” system, which means EBSA will not know your identity or contact information unless you provide it. If you send an email directly to EBSA without going through [regulations.gov](https://www.regulations.gov), your email address will be automatically captured and included as part of the comment that is placed in the public record and made available on the internet.

Background

As described elsewhere in this edition of the **Federal Register**, the Department is proposing to amend the regulation defining when a person renders “investment advice for a fee or other compensation, direct or indirect” with respect to any moneys or other property of an employee benefit plan, for purposes of the definition of a “fiduciary” in section 3(21)(A)(ii) of ERISA and in section 4975(e)(3)(B) of the Code. The Department also is proposing amendments to existing PTEs 75–1, 77–4, 80–83, 83–1, 86–128, and 2020–02 elsewhere in this edition of the **Federal Register**.

The Department is proposing to amend PTE 84–24 to address specific issues that Insurers confront in complying with the current conditions of PTE 2020–02 when distributing

annuities through independent agents. The ERISA and Code provisions at issue generally prohibit employee benefit plan and IRA fiduciaries from engaging in self-dealing in connection with transactions involving these plans and IRAs. Currently, PTE 84–24 allows these fiduciaries to receive compensation when plans and IRAs enter into certain insurance and mutual fund transactions that the fiduciaries recommend, as well as certain related transactions. The proposed amendment would provide exemptive relief to fiduciaries who are Independent Producers that recommend annuities from an unaffiliated Insurer to Retirement Investors on a commission or fee basis if certain protective conditions are met.

The Department is proposing this amendment on its own motion pursuant to its authority under ERISA section 408(a) and Code section 4975(c)(2) and in accordance with procedures set forth in 29 CFR part 2570, subpart B (76 FR 66637 (October 27, 2011)).¹

Current PTE 84–24

Currently, under PTE 84–24, plans and IRAs may purchase insurance or annuity contracts or investment company securities, and insurance agents or brokers, pension consultants, and principal underwriters may receive compensation as a result of these purchases.² Originally proposed in 1976,³ PTE 84–24 covers several transactions in connection with the purchase of insurance and annuity contracts and the purchase and sale of securities issued by an investment company.

PTE 2020–02

When the Department finalized PTE 2020–02 in December 2020, the Department explained that insurance companies could rely on either PTE 2020–02 or PTE 84–24 regardless of whether they sell their products through captive or independent agents. In the preamble to the final PTE 2020–02, the

¹ Reorganization Plan No. 4 of 1978 (5 U.S.C. App. 1 (2018)) generally transferred the authority of the Secretary of the Treasury to grant administrative exemptions under Code section 4975 to the Secretary of Labor.

² As defined in Section X(d), the term “Individual Retirement Account” or “IRA” means any plan that is an account or annuity described in Code section 4975(e)(1)(B) through (F), including an Archer medical savings account, a health savings account, and a Coverdell education savings account. While the Department uses the term “Retirement Investor” throughout this document, the exemption is not limited only to investment advice fiduciaries of employee pension benefit plans and IRAs. Relief would be available for investment advice fiduciaries of employee welfare benefit plans with an investment component as well.

³ 41 FR 56760 (Dec. 29, 1976), finalized as PTE 77–9, 42 FR 32395 (June 24, 1977).

Department stated that insurance companies working with independent agents can satisfy the conditions of PTE 2020–02 related to the required policies and procedures either by supervising independent insurance agents or by contracting with insurance intermediaries to do so.⁴ In April 2021, the Department provided further guidance in a set of Frequently Asked Questions (FAQs) regarding compliance with the exemption.⁵ Specifically, Question 18 of the FAQs provided that:

When an independent insurance agent recommends an annuity under the exemption, the agent and the financial institution (*e.g.*, the insurance company) must satisfy the exemption's conditions, including the fiduciary acknowledgement and the Impartial Conduct Standards with respect to that transaction. In such cases, the insurance company must ensure that it has adopted policies and procedures to ensure compliance with the Impartial Conduct Standards and to avoid incentives that place the firm's or agent's interests ahead of the interests of retirement investors. While the independent agent may recommend products issued by a variety of insurance companies, PTE 2020–02 does not require insurance companies to exercise supervisory responsibility with respect to the practices of unrelated and unaffiliated insurance companies. When an insurance company is the supervisory financial institution for purposes of the exemption, its obligation is simply to ensure that the insurer, its affiliates, and related parties meet the exemption's terms with respect to the insurance company's annuity which is the subject of the transaction.

Since issuing PTE 2020–02 and posting the FAQs on its website, the Department has conferred with representatives of insurance companies that distribute annuities through independent agents, regarding their compliance with the conditions of PTE 2020–02. At the meetings, the representatives almost universally asserted that the main compliance challenge they face in complying with PTE 2020–02 is that they cannot effectively exercise fiduciary authority over independent insurance agents who do not work for any one insurance company and are not obligated to recommend only one company's annuities. According to the insurance

company representatives, unlike a broker-dealer that can readily control the products its representatives recommend and the compensation they receive, insurance companies working with independent agents have much less authority over the conduct and compensation of independent agents. These insurance companies also face much greater liability risk if they are required to provide a fiduciary acknowledgement, because they do not have the necessary control over the independent agents to manage the independent agent's product offerings and do not know the full range of products the independent agent is authorized to sell. Thus, despite the Department's compliance guidance provided in the preamble to PTE 2020–02 and FAQ 18, these parties represented to the Department that they prefer relying on existing PTE 84–24.

While acknowledging these concerns, the Department continues to believe that insurance companies can effectively exercise fiduciary oversight with respect to independent agents' recommendations of their own products under PTE 2020–02. PTE 2020–02 is a broad, flexible, and principles-based approach that applies across different financial sectors and business models and provides relief for multiple categories of Financial Institutions and Investment Professionals, including insurance companies selling their products through independent agents, and it would continue to be so if the Department adopts the amendments to PTE 2020–02 that it is proposing today. The Department is proposing to amend PTE 84–24, however, to provide a narrowly tailored, alternative exemption allowing independent insurance agents to receive commissions from insurance companies with respect to annuity recommendations.

As amended, PTE 84–24 would not require the insurance company to provide a fiduciary acknowledgement, and the insurance company would not be treated as a fiduciary merely because it exercised oversight responsibilities over independent insurance agents under the exemption.⁶ Instead, the proposed amendment would require the independent agent that recommends the annuity to make the fiduciary

acknowledgement,⁷ and the insurance company selling its product through the independent agent only would be required to exercise supervisory authority over the independent agent's recommendation of its own products. The proposed amended exemption would be limited to commissions or fees as defined in the amendment, which would have to be fully disclosed to the Retirement Investor.

Overview of the Proposed Amendment to PTE 84–24

The Department is proposing to amend PTE 84–24 so that investment advice fiduciaries would rely on a new section of PTE 84–24 for independent insurance agents (called Independent Producers) selling non-securities annuities or other insurance products not regulated by the Securities and Exchange Commission (SEC) to Retirement Investors. The proposed amendment would exclude investment advice fiduciaries from the current relief in PTE 84–24 while proposing relief under a new section of the exemption with specific conditions for independent insurance agents providing investment advice. The Department's objective in proposing this amendment is to provide a level playing field for all investment advice fiduciaries.

To rely on the investment advice relief in this proposed amendment to PTE 84–24, the Independent Producers would have to sell annuities of two or more unrelated Insurers. Independent Producers that sell or recommend investment products other than annuities, such as mutual funds, stocks and bonds, and certificates of deposit must rely on PTE 2020–02 when receiving fees or other compensation in connection with investment recommendations related to those products. The amended PTE 84–24 would provide relief from the prohibited transaction rules only for the receipt of fully disclosed commissions or fees in connection with annuity recommendations or other insurance products not regulated by the SEC. In other respects, the proposed amendment to PTE 84–24 for investment advice would provide very similar protections to Retirement Investors as PTE 2020–02 and create a level playing field for all investment advice provided to Retirement Investors regardless of the investment products that are recommended.

The Department is proposing to amend PTE 84–24 to exclude

⁴ “Insurance company Financial Institutions can comply with the new exemption by supervising independent insurance agents, or by creating oversight and compliance systems through contracts with insurance intermediaries. The Financial Institution and/or intermediary would address incentives created with respect to independent agents' recommendations of the Financial Institution's insurance or annuity products.” 85 FR 82798, 82835 (Dec. 18, 2020).

⁵ <https://www.dol.gov/sites/dolgov/files/ebsa/about-ebsa/our-activities/resource-center/faqs/new-fiduciary-advice-exemption.pdf>

⁶ For purposes of this disclosure, and throughout the exemption, the term fiduciary status is limited to fiduciary status under Title I, the Code, or both. While this exemption and the SEC's Regulation Best Interest both use the term “best interest,” the Department retains interpretive authority with respect to satisfaction of this exemption.

⁷ For purposes of this disclosure, and throughout the exemption, the term fiduciary status is limited to fiduciary status under Title I, the Code, or both.

investment advice fiduciaries from the existing relief provided in Section II, which would be redesignated as Section II(a). The proposed amendment would add Section II(b), which would provide investment advice fiduciaries with relief from the restrictions of ERISA sections 406(a)(1)(D) and 406(b) and the taxes imposed by Code section 4975(a) and (b) by reason of Code sections 4975(c)(1)(E) and (F) if:

- the fiduciary is an Independent Producer (as defined in Section X(d)),
- the transactions are described in new Section III(g), and
- the conditions set forth in new Sections VI, VII, and IX are satisfied.

These conditions are similar to the conditions contained in PTE 2020–02 but are tailored to protect Retirement Investors from the specific conflicts that can arise for Independent Producers that are compensated through commissions when providing investment advice to Retirement Investors regarding the purchase of an annuity. The Department also is proposing to add a new eligibility provision in Section VIII for investment advice transactions and amend the current recordkeeping condition in Section V(e) with a new recordkeeping provision in Section IX that is similar to the recordkeeping provision in PTE 2020–02.

Although the Department is proposing a pathway for insurance companies to oversee the conduct of Independent Producers under the proposed amendment to PTE 84–24 without assuming fiduciary status, the Department remains concerned that, without fiduciary status, insurance companies may not take their supervisory obligations as seriously as they should. Accordingly, the proposed amendment does not provide relief for the Insurer, and it strictly limits the scope of relief to the Independent Producer's receipt of fully disclosed commissions. An Insurer must rely on PTE 2020–02 for relief if it is itself an investment advice fiduciary because it provides investment advice within the meaning of ERISA section 3(21)(A)(ii) and Code section 4975(e)(3)(B) and the regulations issued thereunder. In addition, an Insurer's systematic failures to comply with the proposed exemption's conditions could result in Independent Producers' inability to rely on the amended exemption for relief with respect to recommendations of that Insurer's products. In such a situation, the Independent Producer would still be able to receive compensation in connection with fiduciary investment advice related to the products of other Insurers, as long as those other Insurers

complied with all conditions of amended PTE 84–24.

Effective Date

The Department proposes that the amendment will be effective on the date that is 60 days after the publication of a final amendment in the **Federal Register**. Prior to the effective date, PTE 84–24 would remain available for all insurance agents and insurance companies that currently rely on the exemption. Thus, the Department confirms that the restrictions of ERISA section 406(a)(1)(A), 406(a)(1)(D), and 406(b) and the sanctions imposed by Code section 4975(a) and (b), by reason of Code section 4975(c)(1)(A), (D), (E) and (F), would not apply to the receipt of compensation by an Insurer, Investment Professional, or any Affiliate and Related Entity in connection with investment advice, if the recommendation were made before the effective date or pursuant to a systematic purchase program established before the effective date. Also, no party would be held to the amended conditions for a transaction that occurred before the effective date of the amended exemption.

Description of Changes to Existing PTE 84–24

Section II of existing PTE 84–24 provides exemptive relief for the covered transactions described in Section III(a) through (f). The Department is proposing minor language changes to capitalize defined terms where they are used in the existing sections of PTE 84–24, to update the references to a “master or prototype plan” to instead refer to a “Pre-approved Plan,” consistent with changes in IRS Rev. Proc. 2017–41, and to move the definitions from existing Section VI to new proposed Section X. As amended, Section III(a)–(f) would read:

- The receipt, directly or indirectly, by an insurance agent or broker or a pension consultant of a Mutual Fund Commission or an Insurance Sales Commission from an insurance company in connection with the purchase, with plan assets, of an insurance or annuity contract;
- The receipt of a Mutual Fund Commission by a Principal Underwriter for an investment company registered under the Investment Company Act of 1940 (hereinafter referred to as an investment company) in connection with the purchase, with plan assets, of securities issued by an investment company;
- The effecting by an insurance agent or broker, pension consultant or

investment company Principal Underwriter of a transaction for the purchase, with plan assets, of an insurance or annuity contract or securities issued by an investment company;

(d) The purchase, with plan assets, of an insurance or annuity contract from an insurance company;

(e) The purchase, with plan assets, of an insurance or annuity contract from an insurance company which is a fiduciary or a service provider (or both) with respect to the plan solely by reason of the sponsorship of a Pre-approved Plan; and

(f) The purchase, with plan assets, of securities issued by an investment company from, or the sale of such securities to, an investment company or an investment company Principal Underwriter, when such investment company, Principal Underwriter, or the investment company investment adviser is a fiduciary or a service provider (or both) with respect to the plan solely by reason of: (1) the sponsorship of a Pre-approved Plan; or (2) the provision of Nondiscretionary Trust Services to the plan; or (3) both (1) and (2).

The Department also is proposing the following amendments.

Excluding Investment Advice

The Department is proposing to exclude investment advice fiduciaries from relief for the transactions described in Section III(a) through (f) of current PTE 84–24. Investment advice fiduciaries would be required to comply with the conditions in Sections VI–VIII, which are tailored specifically for investment advice. The Department notes that many types of fiduciaries are already excluded from the transactions in Sections III(a)–(d). The relief provided for in these sections would remain available for non-fiduciaries and nondiscretionary trustees,⁸ even if they

⁸ Nondiscretionary trustees were added in 1984, in response to a request from the Investment Company Institute listing typical nondiscretionary or trustee services. In an April 21, 1980 letter, “ICI states nondiscretionary trustees and custodians:

(a) Open and maintain plan accounts and, in the case of defined contribution plans, individual participant accounts, pursuant to the employer's instructions;

(b) Receive contributions from the employer and credit them to individual participant accounts in accordance with the employer's instructions;

(c) Invest contributions and other plan assets in shares of a mutual fund or funds or other products such as insurance or annuity contracts designated by the employer, plan trustee, or participants, and reinvest dividends and other distributions in such investments;

(d) Redeem, transfer, or exchange mutual fund shares or surrender insurance or annuity contracts as instructed by the employer, plan trustee, or participant;

do not need all of the prohibited transaction relief provided. The relief for the transaction described in Section III(e) would be available for any insurance company that is a fiduciary (other than an investment advice fiduciary) or service provider (or both) with respect to the plan solely by reason of the sponsorship of a Pre-approved Plan. The relief for the transaction described in Section III(f) would be available for any insurance company, principal underwriter, or investment company adviser that is a fiduciary (other than an investment advice fiduciary) or service provider (or both) with respect to the plan solely by reason of: (1) the sponsorship of a Pre-approved Plan; or (2) the provision of nondiscretionary trust services to the plan; or (3) both (1) and (2).⁹

The Department requests comment on whether the relief in proposed Section II(a) for the covered transactions in Section III(a)–(f) will be used by fiduciaries and non-fiduciaries. The Department further asks whether parties are currently relying on Sections III(e) and (f), involving Pre-approved Plans. To the extent Sections III(a) through (f) provide needed relief, the Department also asks whether the conditions in current Sections IV and V are sufficiently protective for the specific covered transactions.

(e) Provide or maintain “designation of beneficiary” forms and make distributions from the trust or custodial account to participants or beneficiaries in accordance with the instructions of the employer, plan trustee, participants, or beneficiaries;

(f) Deliver to participants or their employer all notices, prospectuses, and proxy statements, and vote proxies in accordance with the participants’ instructions.

(g) Maintain records of all contributions, investments, distributions, and other transactions and report them to the employer and participants;

(h) Make necessary filings with the Internal Revenue Service and other government agencies;

(i) Keep custody of the plan’s assets;

(j) Reply to and prepare correspondence, either directly or through the mutual fund distributor or adviser, regarding the investment account and the operation and interpretation of a master or prototype plan sponsored by the complex to which the nondiscretionary trustee or custodian belongs.

In some situations, the trustee or custodian is empowered to amend the master or prototype plan; in others, this power resides in the sponsor of the master or prototype plan. ICI further describes the duties of the nondiscretionary trustees as “ministerial” and indicates that such trustees possess no decisional authority with respect to a plan’s funding medium or subsequent purchases or sales.”

⁹ The Department is not proposing to amend Section III(f) to remove the phrase “investment company adviser,” but notes that those providing investment advice within the meaning of ERISA section 3(21)(A)(ii) and Code section 4975(e)(3)(B) would be excluded under Section II(a).

Commissions

The Department is proposing to replace the term “sales commission,” which is not defined in Section VI of existing PTE 84–24, with the more specific terms Mutual Fund Commission and Insurance Sales Commission. “Insurance Sales Commission” would be defined as a sales commission paid by the Insurance Company or an Affiliate to the Independent Producer¹⁰ for the service of recommending and/or effecting the purchase or sale of an insurance or annuity contract, including renewal fees and trailing fees but excluding revenue sharing payments, administrative fees or marketing payments, payments from parties other than the Insurance Company or its Affiliates, or any other similar fees. “Mutual Fund Commission” would be defined as a commission or sales load paid by either the Plan or the investment company for the service of effecting or executing the purchase of investment company securities, but does not include 12b–1 fees, revenue sharing payments, administrative fees, management fees, or marketing fees.

The Department is proposing to use these terms to clarify the types of compensation that can be received under the exemption. The Department is limiting the exemption to sales commissions on insurance or annuity contracts and investment company securities, as opposed to any related or alternative forms of compensation. This is consistent with the Department’s historical understanding and intent. The exemption was originally granted in 1977, and the conditions were crafted with simple commission payments in mind. In the interim, the exemption was not amended or formally interpreted to broadly permit additional types of compensation. The proposed definitions would provide certainty regarding the payments permitted by the exemption.¹¹

¹⁰ The Insurance Sales Commission may be paid directly to an intermediary such as an intermediary marketing organization (IMO) or field market organization) FMO, which then compensates the individual Independent Producer who has provided investment advice.

¹¹ The Department has previously expressed this view on the scope of relief under PTE 84–24 in amending the exemption in 2016. “The Department does not believe this exemption was properly interpreted over the years to provide relief for payments such as administrative services fees, which are not akin to a commission. No determination has been made that the conditions of the exemption are protective in the context of such payments. Without further information on these fees, or suggested additional conditions addressed at these types of payments, the Department declines to take such an expansive approach to relief from the prohibited transaction rules under the terms of this exemption.” 81 FR 21147, 21166 (Apr. 8, 2016).

The Department requests comment on whether these defined terms appropriately capture the type of compensation that an Independent Producer may receive.

Disclosures to IRA Owners

Section V(b)(1) of PTE 84–24 currently requires insurance agents, brokers, or consultants to provide disclosures to an “independent fiduciary” before executing a transaction involving the purchase of an annuity with plan assets. That fiduciary must acknowledge receipt of the disclosure in writing and approve the transaction. The Department is proposing to clarify that for transactions involving IRAs, these disclosures may be provided to the IRA owner instead of an unrelated fiduciary. The Department requests comment on how frequently this provision is currently used, how frequently it would be used with the additional proposed changes to PTE 84–24 described below, how it is practically implemented today, and how the revised provision would be operationalized.

Discretionary Managers

The Department proposes to clarify the exclusion for discretionary managers in current Section V(a)(3), which provides that the insurance agent or broker, pension consultant, insurance company, or investment company principal underwriter may not be a fiduciary who is expressly authorized in writing to manage, acquire or dispose of the plan’s assets on a discretionary basis. The Department is proposing to amend this provision to exclude fiduciaries with discretionary authority, regardless of whether that authority has been conferred orally or in writing. As amended, proposed Section V(a)(3) would provide that the insurance agent or broker, pension consultant, insurance company, or investment company principal underwriter may not be a fiduciary who is authorized (formally or informally) to manage, acquire or dispose of the plan’s assets on a discretionary basis. The Department intends for this change to be a mere clarification, but requests comment as to whether fiduciaries with oral authority to manage plan assets have been relying on PTE 84–24, because the current condition requires the fiduciary to be “expressly authorized in writing.”

Recordkeeping

The Department is proposing to add a new Section IX to PTE 84–24 that would require fiduciaries engaging in all transactions covered by the exemption to maintain records necessary for the

following to determine that the conditions of this exemption have been met:

- (1) any authorized employee of the Department or the Internal Revenue Service or another state or federal regulator,
- (2) any fiduciary of a Plan that engaged in a transaction pursuant to this exemption,
- (3) any contributing employer and any employee organization whose members are covered by a Plan that engaged in a transaction pursuant to this exemption, or
- (4) any participant or beneficiary of a Plan or beneficial owner of an IRA acting on behalf of the IRA that engaged in a transaction pursuant to this exemption.

This requirement would replace the more limited existing recordkeeping requirement in current Section V(e).

This proposed amendment to the recordkeeping requirement is consistent with the recordkeeping provision the Department has included in other existing class exemptions (including the proposed amendment to the recordkeeping provisions of PTE 2020–02). It is intended to protect the rights of plan participants, beneficiaries, and IRA owners by ensuring that they and the Department are provided with sufficient information to determine whether the exemption conditions have been satisfied.

Fiduciary Investment Advice Exemption

The relief for fiduciary investment advice in proposed Section II(b) for the covered transactions described in proposed Section III(g) is generally similar to the relief provided in PTE 2020–02. However, while PTE 2020–02 is available for almost any fiduciary investment advice provider, the amended PTE 84–24 would be available only for investment advice that is provided to a Retirement Investor by an Independent Producer who works with multiple insurance companies to sell non-securities annuities or other insurance products not regulated by the SEC. The Department requests comment on whether to exclude these other insurance products not regulated by the SEC and limit Section III(g) to only non-securities annuities.

Independent Producers relying on proposed Section III(g) may reasonably rely on factual representations from the Insurer, and the Insurer may reasonably rely on factual representations from the Independent Producer regarding compliance with the exemption conditions, as long as they do not know

that such factual representations are incomplete or inaccurate. For example, the Independent Producer can rely on the Insurer's representations that it is maintaining the required documentation.

Proposed Section VI provides conditions for transactions described in proposed Section III(g) and would require the advice to be provided by an Independent Producer that is authorized to sell annuities from two or more unrelated Insurers. The term “Independent Producer” would be defined in Section X as a person or entity that is licensed under the laws of a state to sell, solicit or negotiate insurance contracts, including annuities, and that sells products of multiple unaffiliated insurance companies to Retirement Investors but is not an employee of an insurance company (including a statutory employee under Code section 3121). The term “Retirement Investor” would be defined in proposed Section X(o) to have the same meaning as it has in PTE 2020–02, and the term “Insurer” would be defined in proposed Section X(f) similarly to the definition of the term “Financial Institution” in PTE 2020–02, except it would be limited to insurance companies.

Thus, proposed Section VI would limit the transactions described in proposed Section III(g) to the narrow category of transactions in which an independent, insurance-only agent provides investment advice to a Retirement Investor regarding a non-securities annuity or insurance contract. For all other investment advice transactions, including those by Independent Producers that do not satisfy the conditions of the amended PTE 84–24 and those involving captive or career insurance agents, the advice provider would have to rely on PTE 2020–02 to receive exemptive relief for investment advice transactions. The Department has determined that when non-independent agents recommend insurance products, the insurance company whose product is recommended should be willing and able to acknowledge its fiduciary status under ERISA and the Code when investment advice is provided to a Retirement Investor for a fee, because it has sufficient control over the agent and the products the agent recommends.

Even though amended PTE 84–24 would not require Insurers to be fiduciaries, they would be subject to certain conditions when their products are recommended. Consistent with the NAIC Suitability in Annuity Transactions Model Regulation (the

NAIC Model Regulation),¹² and as discussed in the policies and procedures section below, the proposed exemption would require the Insurer whose product is being sold to provide meaningful supervision over the Independent Producer making the recommendation and sale to the Retirement Investor. As stated in proposed Section VI(b), the Insurer would not become an investment advice fiduciary under ERISA and/or the Code merely by complying with the applicable exemption conditions and providing the required supervision. However, the Department cautions that Insurers selling insurance and annuity products through Independent Producers could become an investment advice fiduciary under ERISA and/or the Code through other actions they take. If the Insurers are fiduciaries, they could not rely on amended PTE 84–24 and would need to rely on a different prohibited transaction exemption, such as PTE 2020–02, for relief from ERISA section 406(b) and Code section 4975.

To facilitate compliance with the exemption, Independent Producers and Insurers may rely on factual representations from each other, as long as they are reasonable in doing so. For example, an Independent Producer may generally rely on an Insurer's written report generated as part of its retrospective review required by Section VII(d), unless the Independent Producer knows (or should know) that the report is inaccurate or incomplete.

Exclusions

Section VI(c) proposes to exclude certain specific investment advice transactions. Under proposed Section VI(c)(1), the relief would not be available if the Plan is covered by Title I of ERISA and the Independent Producer, Insurer, or any Affiliate is the employer of employees covered by the Plan, or the Plan's named fiduciary or administrator. For example, an Independent Producer that sponsors a plan for its employees and provides the investment advice to the plan can only receive direct expenses and not reasonable compensation for the advice. However, there is an exception when the advice provider is selected by an independent fiduciary. Proposed Section VI(c)(2) would exclude transactions that involve the Independent Producer acting in a fiduciary capacity other than as an investment advice fiduciary. Unlike in PTE 2020–02, the Department is not proposing a specific provision for

¹² Available at <https://content.naic.org/sites/default/files/inline-files/MDL-275.pdf>.

pooled employer plans, because the Department does not expect that pooled employer plans would need to rely on the limited relief in this exemption. The Department requests comment on whether pooled employer plans as described in ERISA section 3(43) would rely on the investment advice relief in amended PTE 84–24.

Impartial Conduct Standards of Amended PTE 84–24

Section VII(a) of the proposed amendment would condition relief for investment advice transactions described in proposed Section III(g) on the Independent Producer that is providing investment advice to Retirement Investors complying with the Impartial Conduct Standards that are the same as those in PTE 2020–02—*i.e.*, acting in the Retirement Investor's Best Interest, receiving no more than reasonable compensation, and making no misleading statements—with some modifications to reflect the specifics of the independent agent channel. These standards are discussed below.

Best Interest

The Best Interest standard would require the Independent Producer to provide investment advice that is in the Retirement Investor's Best Interest at the time it is provided. Proposed Section VII would rely on the same Best Interest standard from PTE 2020–02. As defined in proposed Section X(b), Best Interest advice reflects the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims, based on the investment objectives, risk tolerance, financial circumstances, and needs of the Retirement Investor, and does not place the financial or other interests of the Independent Producer, Insurer or any Affiliate, Related Entity, or other party ahead of the interests of the Retirement Investor, or subordinate the Retirement Investor's interests to those of the Independent Producer, Insurer or any Affiliate, Related Entity, or other party. For example, in choosing between annuity products offered by Insurers whose products the Independent Producer is authorized to sell, the Independent Producer may not recommend a product that is worse for the Retirement Investor but better or more profitable for the Independent Producer or Insurer.

Reasonable Compensation

Like PTE 2020–02, the proposed exemption requires an Independent

Producer's compensation to not exceed reasonable compensation within the meaning of ERISA section 408(b)(2) and Code section 4975(d)(2). To tailor this condition to the specifics of insurance sales, Section VII(a)(2) would require that the Independent Producer can only receive an Insurance Sales Commission as compensation in connection with the transaction.

No Misleading Statements

Proposed Section VII(a)(3) provides the same prohibition on misleading statements that is part of PTE 2020–02. This provision requires an Independent Producer's statements to the Retirement Investor about the recommended transaction and other relevant matters to not be materially misleading at the time the statements are made. For purposes of this condition, the term “materially misleading” includes omitting information that is needed to make the statement not misleading in light of the circumstances under which it was made. To the extent the Independent Producer provides materials, including marketing materials that are prepared and provided by the Insurer, this condition also would require such materials not to be materially misleading to the Independent Producer's knowledge.

Disclosure

Section VII(b) of the proposed amendment would require Independent Producers to provide disclosures to Retirement Investors before engaging in a transaction pursuant to this exemption. Similar to PTE 2020–02, proposed Section VII(b)(1) would require a fiduciary acknowledgement, but unlike PTE 2020–02, only the Independent Producer and not the Insurer must acknowledge that it is a fiduciary providing investment advice to the Retirement Investor. Also similar to the proposed amendment to PTE 2020–02, the Department is proposing additional disclosures in PTE 84–24 Section VII(b) to help ensure that Retirement Investors have sufficient information to make an informed decision about the costs of the transaction and the significance and severity of the Independent Producer's conflicts of interest. The Department requests comment on these disclosures, particularly regarding whether additional or alternative information would be helpful to Retirement Investors receiving advice from Independent Producers. The Department is also interested in receiving comments regarding whether it should require Insurers or Independent Producers to maintain a

public website containing the pre-transaction disclosure, a description of the Insurer's or Independent Producer's business model, associated Conflicts of Interest (including arrangements that provide third party payments), and a schedule of typical fees. The Department is interested in receiving data and other information regarding the benefits of such a web disclosure. The Department is also interested in receiving any data that commenters may have that can inform an estimate of the extent to which Retirement Investors, investment consultants, and third party intermediaries would visit and use a web page that includes such disclosures.

Pre-Transaction Disclosure

Similar to PTE 2020–02, proposed Section VII(b)(1) would require a fiduciary acknowledgement, but unlike PTE 2020–02, only the Independent Producer and not the Insurer must acknowledge that it is a fiduciary providing investment advice to the Retirement Investor.¹³ Section VII(b)(2) would require the Independent Producer to provide the Retirement Investor with a written statement of the Best Interest standard of care that the Independent Producer owes to the Retirement Investor. Under Section VII(b)(3), the Independent Producer must provide a written description of the services to be provided and the Independent Producer's material Conflicts of Interest that is accurate and not misleading in any material respects. The description will include the products the Independent Producer is licensed and authorized to sell and inform the Retirement Investor in writing of any limits on the range of insurance products recommended. The Independent Producer must identify the specific Insurers and specific investment products available for recommendation.

Under proposed Section VII(b)(4), the Independent Producer would also be required to provide a written statement of the amount of the Insurance Sales Commission it will be paid in connection with the purchase by the Retirement Investor of the recommended annuity. The statement must disclose the amount of the expected Insurance Sales Commission, in both dollars and as a percentage of gross annual premium payments. If applicable, the statement must also disclose the amount the Independent

¹³ The Department cautions that an Insurer cannot insulate itself from fiduciary status merely by not making this acknowledgment. As noted above, an Insurer may become a fiduciary based on its actions.

Producer will be paid for the first year and each succeeding year.¹⁴

Under proposed Section VII(b)(5), the Independent Producer would also be required to provide a written statement informing the Retirement Investor of the right to obtain specific information regarding costs, fees, and compensation, and how to obtain it, free of charge. The statement must be written in plain English, taking into consideration the Retirement Investor's level of financial experience, and it must be accurate and not misleading. The cost, fee, and compensation information may be described in dollar amounts, percentages, formulas, or other means reasonably designed to be materially accurate in scope, magnitude, and nature of the compensation. The information must be detailed enough for the Retirement Investor to make an informed judgment about the transaction costs and the significance and severity of the Conflicts of Interest. For example, the Retirement Investor may ask how the Independent Producer would be compensated for recommending and selling other products they are authorized to sell and whether the Independent Producer is likely to receive more as a result of its recommendation than it would have received if it had recommended other annuities.

The proposed requirement to disclose the amount of expected Insurance Sales Commission, expressed both in dollars and as a percentage of gross annual premium payments, if applicable, for the first year and for each of the succeeding years is consistent with the existing disclosure requirements in PTE 84–24 Section V(b)(1). The proposed requirement to disclose the range of compensation is intended to ensure that the Retirement Investor understands the magnitude of the Independent Producer's material Conflicts of Interest. Without a single Insurer overseeing each recommendation, Independent Producers must carefully analyze and disclose the various incentives available

from different Insurers that could affect the recommendation. For this reason, proposed Section VII(b)(4) requires the Independent Producer to make specific disclosures before the sale of a recommended annuity. The Independent Producer must consider and document its conclusions that the recommended annuity is in the Retirement Investor's Best Interest and provide that documentation to the Retirement Investor and the Insurer.

To assist Independent Producers in complying with this proposed exemption's disclosure conditions, the Department is providing the following proposed model language that will satisfy proposed Section VII(b)(1), (2), and (5).

When we make investment recommendations to you regarding your retirement plan account or individual retirement account, we are fiduciaries within the meaning of Title I of the Employee Retirement Income Security Act and/or the Internal Revenue Code, as applicable, which are laws governing retirement accounts. The way we make money creates some conflicts with your interests, so we operate under a special rule that requires us to act in your best interest and not put our interest ahead of yours. Under this special rule's provisions, we must:

- Meet a professional standard of care when making investment recommendations (give prudent advice);
- Never put our financial interests ahead of yours when making recommendations (give loyal advice);
- Avoid misleading statements about conflicts of interest, fees, and investments;
- Follow policies and procedures designed to ensure that we give advice that is in your best interest;
- Charge no more than is reasonable for our services; and
- Give you basic information about conflicts of interest.

You can ask us for more information explaining costs, fees, and compensation, so that you may make an informed judgment about the costs of the transaction and about the significance and severity of the Conflicts of Interest. We will provide you with this information at no cost to you.

Please note that the Department is not proposing to include model language for Section VII(b)(3) or (4) that would describe services to be provided, the conflicts of interest, or the commissions paid because those will vary for each Independent Producer.

Best Interest Documentation and Rollover Disclosure

Under proposed Section II(b)(6), before the sale of a recommended non-security annuity, the Independent Producer would consider and document its conclusions as to whether the recommended non-security annuity is in the Best Interest of the Retirement

Investor. The Independent Producer must provide this documentation to both the Retirement Investor and to the Insurer whose products are being sold. The Department requests comment on whether this proposed condition should be expanded to other insurance products not regulated by the SEC.

Proposed Section VII(b)(7) would further require Independent Producers to provide a rollover disclosure that is similar to the disclosure required in the proposed amendment to PTE 2020–02 Section II(b)(5). Before engaging in a rollover or making a recommendation to a Plan participant as to the post-rollover investment of assets currently held in a Plan, the Independent Producer must consider and document its conclusions as to whether a rollover is in the Retirement Investor's Best Interest and provide that documentation to the Retirement Investor. Relevant factors to consider must include but are not limited to:

- the alternatives to a rollover, including leaving the money in the Plan, if applicable,
- the comparative fees and expenses,
- whether an employer or other party pays for some or all administrative expenses, and
- the different levels of fiduciary protection, services, and investments available.

To assist the Insurer in satisfying its supervisory obligations, the Independent Producer must also provide the documentation to the Insurer.

Good Faith

Proposed Section VII(b)(6) provides that Independent Producers and the Insurer may rely in good faith on information and assurances from other entities that are not Affiliates as long as they do not know or have reason to know that such information is incomplete or inaccurate. Proposed Section II(b)(7) confirms that the Independent Producer would not be required to disclose information that otherwise is prohibited by law.

Policies and Procedures

The exemption depends on oversight by a responsible Insurer to ensure that appropriate policies and procedures are in place. While the exemption would not require the Insurer to act in a fiduciary capacity or to acknowledge fiduciary status, the Insurer would be expected to adopt and implement protective policies and procedures, and to carefully police recommendations of its own investment products. These requirements are consistent with supervisory requirements for insurance

¹⁴ Some insurers offer fee-based annuities which are generally designed for sale in fee-based distribution models. These annuities do not pay a sales commission and typically have no withdrawal charges or lower charges than under commissioned products. Compensation for sales of fee-based annuities is usually based on a percentage of the annuity's account value or some other methodology. Fee-based annuities are eligible for the relief provided by the proposed amendment if all the conditions of the exemption are met. If an Independent Producer recommends a fee-based annuity, the written statement must disclose the specific method for determining the amount of compensation for the first year and succeeding years, expressed both in dollars and as percentage of the account value (or other relevant value) to the extent possible.

companies under state insurance law, and do not require the Insurers to police Independent Producers' recommendations of competitors' products.

Proposed Section VII(c) would require Insurers to establish, maintain, and enforce written policies and procedures. These conditions are similar to those in PTE 2020–02 Section II(c), including that compliance with these obligations are the Insurer's responsibility and not the Independent Producer's. Under proposed Section VII(c)(1), the Insurer must establish, maintain, and enforce written policies and procedures for the Insurer to review each of the Independent Producer's recommendations before an annuity is issued to a Retirement Investor. The policies and procedures must be prudently designed to ensure compliance with the Impartial Conduct Standards and other conditions of this exemption. This requirement is similar to that in PTE 2020–02 and is consistent with the language in NAIC Model Regulation Section 6.C.(2)(d), which provides that “[t]he insurer shall establish and maintain procedures for the review of each recommendation prior to issuance of an annuity that are designed to ensure there is a reasonable basis to determine that the recommended annuity would effectively address the particular consumer's financial situation, insurance needs and financial objectives.” Under the proposal, the Insurer's prudent review of the Independent Producer's specific recommendations must be made without regard to the Insurer's own interests or those of its affiliates and related entities.

The Department notes that the NAIC Model Regulation contemplates that insurance companies will maintain a system of oversight with respect to insurance agents. Insurers could implement procedures to review annuity sales to Retirement Investors to ensure that they are made in compliance with the Impartial Conduct Standards similar to how they currently are required to review annuity sales to ensure compliance with the state-law suitability requirements.¹⁵ Section I of

the NAIC Model Regulation provides that the purpose of the regulation is to “require producers, as defined in this regulation, to act in the best interest of the consumer when making a recommendation of an annuity and to require insurers to establish and maintain a system to supervise recommendations so that the insurance needs and financial objectives of consumers at the time of the transaction are effectively addressed.”¹⁶ Accordingly, the Department believes that a system of oversight by Insurers over Independent Producers is consistent with the obligations imposed by NAIC's Model Regulation, and is achievable under this proposed amendment to PTE 84–24.

In terms of the specific oversight requirements, the Department confirms that under the proposed amendment, an Insurer would only be required to supervise an Independent Producer's recommendations of the annuities it offers to Retirement Investors. The Insurer would not be required to review annuities offered by another institution. The Department also clarifies that the exemption would not require the Insurer to consider or compare the specific annuities that an Independent Producer sells or the compensation relating to those annuities, unless they are annuities the Insurer offers. This approach is also consistent with the approach of NAIC Model Regulation Section 6.C.(4).¹⁷

Under proposed Section VII(c)(2), the Insurer's policies and procedures must mitigate Conflicts of Interest to the extent that a reasonable person reviewing the policies and procedures and the Insurer's incentive practices as a whole would conclude that they do

review. Such an electronic or other system may be designed to require additional review only of those transactions identified for additional review by the selection criteria”). Section 6.C.(2)(e) provides that “[t]he insurer shall establish and maintain reasonable procedures to detect recommendations that are not in compliance with subsections A, B, D and E. This may include, but is not limited to, confirmation of the consumer's consumer profile information, systematic customer surveys, producer and consumer interviews, confirmation letters, producer statements or attestations and programs of internal monitoring. Nothing in this subparagraph prevents an insurer from complying with this subparagraph by applying sampling procedures, or by confirming the consumer profile information or other required information under this section after issuance or delivery of the annuity.”

¹⁶ *Id.*, Section 1.A.

¹⁷ NAIC Model Regulation Section 6.C.(4) provides that an insurer is not required to include in its system of supervision: (a) A producer's recommendations to consumers of products other than the annuities offered by the insurer; or (b) Consideration of or comparison to options available to the producer or compensation relating to those options other than annuities or other products offered by the insurer.

not create an incentive for the Independent Producer to place its interests, or those of the Insurer, or any Affiliate, ahead of the Retirement Investor's interests. The Insurer's procedures must identify and eliminate quotas, appraisals, bonuses, contests, special awards, differential compensation, riders and or other similar features that are intended, or that a reasonable person would conclude are likely, to incentivize Independent Producers to provide recommendations that do not meet the Impartial Conduct Standards. This is the same condition that applies to Financial Institutions under Section II(c)(2) of PTE 2020–02. It is also consistent with, although more protective than, the narrower NAIC Model Regulation section 6.C.(2)(h), which prohibits an insurer from establishing sales contests, sales quotas, bonuses, and non-cash compensation that are based on sales of specific annuities within a limited period of time.

Under proposed Section VII(c)(2), an Insurer could not offer incentive vacations, trips, or even educational conferences, if qualification for the vacation, trip or conference is based on sales volume or satisfaction of sales quotas. The Best Interest standard discussed above and defined in proposed Section X(b) clearly prohibits these types of incentives on the grounds they create undue conflicts of interest. Moreover, the Department believes that educational opportunities should be offered equally to all agents and not connected to sales volume, because training is a necessary component of providing Best Interest advice. This emphasis on Independent Producer training is consistent with NAIC Model Regulation section 6.C.(2)(c), which requires insurers to provide its producers with product-specific training and training materials that explain all material features of its annuity products.

Under proposed Section VII(c)(3), the Insurer's policies and procedures must include a prudent process for determining whether to authorize an Independent Producer to sell the Insurer's annuity contracts to Retirement Investors. It must also include a prudent process for taking action to protect Retirement Investors from Independent Producers who have failed or are likely to fail to adhere to the Impartial Conduct Standards, or who lack the necessary education, training, or skill. This is consistent with, but more protective than, NAIC Model Regulation section 7.B.(11), which requires an insurer to verify the producer has completed the annuity training course required under NAIC

¹⁵ NAIC Model Regulation Section 6.C.(2)(d) provides that “[t]he insurer shall establish and maintain procedures for the review of each recommendation prior to issuance of an annuity that are designed to ensure that there is a reasonable basis to determine that the recommended annuity would effectively address the particular consumer's financial situation, insurance needs and financial objectives. Such review procedures may apply a screening system for the purpose of identifying selected transactions for additional review and may be accomplished electronically or through other means including, but not limited to, physical

Model Regulation section 7 before allowing the producer to sell an annuity product for that insurer.

As part of a prudent evaluation of an Independent Producer's background, the Insurer must carefully review customer complaints, disciplinary history, and regulatory actions concerning the Independent Producer, as well as the Independent Producer's training, education, and conduct with respect to the Insurer's own products. The Insurer must document the basis for its initial determination that it can rely on the Independent Producer to adhere to the Impartial Conduct Standards, and it must review that determination at least annually as part of the retrospective review. The Department notes that Insurers may rely in part on an automated system to apply general standards and review formal discipline records, as long as careful, individual review is applied when the general review raises concerns. However, the Department expects that an Insurer would not work with an Independent Producer that either has been barred by any regulator from selling insurance or annuity contracts, or that is ineligible to rely on either PTE 2020–02 or the amended PTE 84–24 under proposed Section VIII. The Department requests comments on these requirements and is specifically interested in the systems Insurers currently use to determine whether Independent Producers are compliant with state insurance obligations. The Department is also interested in comments about how Insurers have operationalized the supervisory requirements in the NAIC Model Regulation.

Under proposed Section VII(c)(4), Insurers must provide their complete policies and procedures to the Department within 10 days upon request. The Department believes that ensuring its access to policies and procedures will facilitate the quicker resolution of disputes and allow the Department, if it desires, to survey the policies and procedures for exemption compliance and effectiveness.

Retrospective Review

Proposed Section VII(d) would require Insurers to conduct a retrospective review, at least annually. The retrospective review must be reasonably designed to detect and prevent violations of, and achieve compliance with the Impartial Conduct Standards, the terms of this exemption, and the policies and procedures governing compliance with the exemption, including the effectiveness of the supervision system, any noncompliance discovered in

connection with the review, and corrective actions taken or recommended, if any.

The retrospective review requirement is similar to that in Section II(d) of PTE 2020–02. However, unlike PTE 2020–02, Insurers under proposed Section VII(d) of PTE 84–24 must include in their review a prudent determination whether to continue to permit individual Independent Producers to sell the Insurer's annuity contracts to Retirement Investors. This review does not need to be as extensive as the initial decision to contract with an Independent Producer. An Insurer may consider any change in discipline records that are found in widely-available databases and rollover documentations that have been provided under Section VII(c)(5). Additionally, the Insurer must update the policies and procedures as business, regulatory, and legislative changes and events dictate, and to ensure they remain prudently designed, effective, and compliant with Section VII(c).

Consistent with both PTE 2020–02 and the NAIC Model Regulation Section 6.C.(2)(i),¹⁸ proposed Section VII(d)(2) would require the Insurer to provide a Senior Executive Officer with an annual written report which details the review. Under Section VII(d)(3), the Department would further require the Insurer to provide the Independent Producer with the underlying methodology and results of the retrospective review. The Department understands that Insurers will conduct reviews for many different Independent Producers and confirms that Independent Producers only have the right to information about their own sales. There is no obligation to inform any Independent Producers of an unrelated Independent Producer's failure.

Proposed Section VII(d)(4) would require a Senior Executive Officer of the Insurer to annually certify that:

- The officer has reviewed the retrospective review report,
- The Insurer has filed (or will file timely, including extensions) Form 5330, reporting any non-exempt prohibited transaction discovered by the Insurer in connection with investment advice covered under Code section 4975(e)(3)(B),
- The Insurer has advised the Independent Producer of the violation

¹⁸ NAIC Model Reg Section 6.(C)(i) provides that: "The insurer shall annually provide a written report to senior management, including to the senior manager responsible for audit functions, which details a review, with appropriate testing, reasonably designed to determine the effectiveness of the supervision system, the exceptions found, and corrective action taken or recommended, if any."

and any resulting excise taxes owed under Code section 4975, and

- The Insurer has notified the Department of Labor of the violation via email to PTE_84-24@dol.gov.

- The Insurer has established policies and procedures prudently designed to ensure that Independent Producers achieve compliance with the conditions of this exemption, and has updated and modified the policies and procedures as appropriate after consideration of the findings in the retrospective review report; and

- The Insurer has in place a prudent process to modify such policies and procedures as business, regulatory, and legislative changes and events dictate, as well as a prudent process to test the effectiveness of such policies and procedures on a periodic basis, to ensure its continuing compliance with the exemption's conditions.

Under proposed Section VII(d)(5), the review, report, and certification must be completed no later than 6 months following the end of the period covered by the review, and proposed Section VII(d)(6) would require the Insurer to retain the report, certification, and supporting data for a period of six years and make the report, certification, and supporting data available to the Department, within 10 business days of request, to the extent permitted by law.

Self-Correction

While the Insurer is responsible for the retrospective review, proposed Section VII(e) would allow the Independent Producer to make the corrections needed to avoid a non-exempt prohibited transaction in certain circumstances. Self-correction would be allowed in cases when either (1) the Independent Producer has refunded any charge to the Retirement Investor or (2) the Insurer has rescinded a mis-sold annuity, canceled the contract, and waived the surrender charges. This is somewhat different from the self-correction provision in PTE 2020–02, which is focused on investment losses. With a fixed annuity, the consumer is guaranteed not to lose any account value but can incur a charge (and hence a loss) if the contract is surrendered during the surrender charge period. The usual remedy for a mis-sold annuity is rescission, which requires the insurer to cancel the contract and waive surrender charges. Under the proposed amendment, the Independent Producer must notify the Department of the violation and the refund or rescission via email to PTE_84-24@dol.gov within 30 days of correction. The correction must occur no later than 90 days after the Independent Producer learned, or

reasonably should have learned, of the violation. Lastly, the Independent Producer must notify the person(s) at the Insurer responsible for conducting the retrospective review during the applicable review cycle and the violation and correction must specifically be set forth in the written retrospective review report.

Eligibility

Section VIII of the proposed amendment identifies circumstances under which an Independent Producer or Insurer would become ineligible to rely on the exemption for 10 years, and also circumstances when an entity would not be permitted to serve as an Insurer under this exemption for 10 years. These eligibility provisions are similar to the provisions of Section III of PTE 2020–02, and are intended to promote compliance. Section VIII(a) describes how Independent Producers can become ineligible. The proposed amendment sets forth the specific crimes (including foreign crimes) that could cause ineligibility in Section III(a)(1). Independent Producers would also become ineligible if they are issued a written ineligibility notice from the Department stating that they: (A) engaged in a systematic pattern or practice of violating the conditions of this exemption; (B) intentionally violated, or knowingly participated in violations of, the conditions of this exemption; (C) engaged in a systematic pattern or practice of failing to correct prohibited transactions, report those transactions to the IRS on Form 5330, and pay excise taxes involving investment advice; or (D) provided materially misleading information to the Department in connection with the its conduct under the exemption. Independent Producers would become ineligible six months after the conviction date, the date of the Department's written determination regarding a foreign conviction, or the date of the Department's written ineligibility notice, as applicable. During the six-month period, the Independent Producers are still fiduciaries, subject to all of the fiduciary requirements and prohibited transaction rules. Thus, Independent Producers must continue to comply with the exemption during those six months, and any transactions that do not meet the terms of the exemption will be subject to excise tax and ERISA penalties. The ineligibility remains in effect until the earliest of: a subsequent judgement reversing a person's conviction, 10 years after the person became ineligible or is released from imprisonment, if later, or the Department grants an individual

exemption permitting reliance on this exemption, notwithstanding the conviction.

Section VIII(b) delineates similarly eligibility provisions for Insurers. An entity will be ineligible to serve as an Insurer with respect to the exemption if it has a conviction for a crime listed under Section VIII(b)(1) or has been determined to be ineligible under Section VIII(b)(2). Furthermore, because Insurers that fail to satisfy the conditions of this exemption would not necessarily engage in a non-exempt prohibited transaction, their eligibility to rely on this exemption would not be linked to engaging in a systematic pattern or practice of failing to correct prohibited transactions, report those transactions to the IRS on Form 5330, and pay excise taxes imposed by Code section 4975 in connection with non-exempt prohibited transactions involving investment advice under Code section 4975(e)(3)(B). The Department notes that, as a fiduciary, before recommending an insurance product the Independent Producer is responsible for ensuring that the relevant insurance company is an Insurer permitted to sell its products through Independent Producers and Section VIII. The Independent Producer may reasonably rely on an Insurer's representations to it regarding the Insurer's continued eligibility under the exemption.

Insurers would become ineligible six months after the conviction date, the date of the Department's written determination regarding a foreign conviction, or the date of the Department's written ineligibility notice, as applicable. Unlike Independent Producers, Insurers might not be fiduciaries; therefore, they might not be subject to all fiduciary requirements during the six-month period. As fiduciaries, the Independent Producers should be aware of whether they are selling products of any Insurers that will become ineligible within six months. The ineligibility remains in effect until the earliest of: a subsequent judgement reversing a person's conviction, 10 years after the person became ineligible or is released from imprisonment, if later, or the Department grants an individual exemption permitting reliance on this exemption, notwithstanding the conviction.

Proposed Section VIII(c) would provide Independent Producers and Insurers with the opportunity to be heard. Like PTE 2020–02, there would be no separate evidentiary hearing following conviction by a U.S. federal or state court of competent jurisdiction, but Section XVIII(c)(1) would allow

Insurers and Independent Producers to submit a petition informing the Department of the conviction and seeking a determination that continued reliance on the exemption would not be contrary to the purposes of the exemption.

Proposed Section VIII(c)(2) would allow Independent Producers and Insurers to request an evidentiary hearing before becoming ineligible and losing access to the exemption. Before issuing a written ineligibility notice, the Department will issue a written warning to the Independent Producer or Insurer, as applicable, identifying specific conduct implicating proposed Section VIII(a)(2) or (b)(2), as applicable. The Insurer or Independent Producer then has a six-month opportunity to correct their conduct. At the end of the six-month period, if the Department determines that the Independent Producer or Insurer has not taken appropriate action to prevent recurrence of the disqualifying conduct, it will give the Independent Producer or Insurer the opportunity to be heard in person (including by phone or videoconference), in writing, or a combination thereof, before the Department issues the written ineligibility notice. The opportunity to be heard will be limited to one conference unless the Department determines in its sole discretion to allow additional conferences.

Following a hearing for either foreign convictions or other misconduct, the Department's determination will be based solely on its discretion. The Department will consider the following when making its determination:

- the gravity of the offense;
- the degree to which the underlying conduct concerned individual misconduct, or, alternately, corporate managers or policy;
- recency of the conduct at issue;
- any remedial measures the Independent Producer or Insurer has taken upon learning of the underlying conduct; and
- other factors the Department determines in its discretion are reasonable in light of the nature and purposes of the exemption.

If the Department issues a written ineligibility notice, the notice will articulate the basis for the Department's determination that the Independent Producer or Insurer engaged in conduct described in Section VIII(a)(2).

If an Insurer or Independent Producer is ineligible to rely on amended PTE 84–24, proposed Section VIII(d) provides that the Insurer or Independent Producer may rely on a statutory or

separate administrative prohibited transaction exemption if one is available or seek an individual prohibited transaction exemption from the Department. The Department notes that PTE 2020–02 will generally be available for insurance companies that are ineligible to serve as Insurers under PTE 84–24. However, the Department may, as part of its eligibility determination process, determine that an entity is not eligible for either PTE 2020–02 or PTE 84–24. The written warning, opportunity to be heard, and written ineligibility notice would each clearly state the exemption or exemptions for which ineligibility was being considered.

If an Insurer cannot sell its products under PTE 84–24, the Department would consider an application for an individual exemption for that Insurer, and any resulting exemption would likely require the Insurer to be a fiduciary and acknowledge fiduciary status. If an applicant seeks retroactive relief in connection with an exemption application, the Department will consider the application in accordance with its retroactive exemption policy.¹⁹ The Department may require additional prospective compliance conditions as a condition of retroactive relief. The Department requests comments on the process described above, including whether it would be helpful to provide greater details about the evidentiary hearing and the written ineligibility notice, and, if so, what details are necessary.

Recordkeeping

As discussed above, the Department is proposing to add a new Section IX to PTE 84–24, which would require the party engaging in a transaction covered by the exemption to maintain records necessary to enable certain persons (described in proposed Section IX(a)(2)) to determine whether the conditions of this exemption have been met. This provision would apply to all of the conditions of PTE 84–24, replacing the more limited existing recordkeeping requirement in current Section V(e). This proposed recordkeeping requirement is consistent with PTE 2020–02 and is intended to protect the rights of plan participants and beneficiaries and IRA owners by ensuring that they and the Department have sufficient information to confirm that that exemption conditions have been satisfied.

Executive Order 12866 and 13563 Statement

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects; distributive impacts; and equity). Executive Order 13563 emphasizes the importance of quantifying costs and benefits, reducing costs, harmonizing rules, and promoting flexibility.

Under Executive Order 12866, as amended by Executive Order 14094, “significant” regulatory actions are subject to review by the Office of Management and Budget (OMB). Section 3(f) of the Executive Order defines a “significant regulatory action” as an action that is likely to result in a rule (1) having an annual effect on the economy of \$200 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or communities; (2) creating a serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising legal or policy issues for which centralized review would meaningfully further the President’s priorities or the principles set forth in the Executive Order. It has been determined that this proposal is a “significant regulatory action” within the scope of section 3(f)(1) of the Executive Order.

Therefore, the Department has provided an assessment of the proposal’s potential costs, benefits, and transfers, and OMB has reviewed this proposed amendment pursuant to the Executive Order.

Paperwork Reduction Act

As part of its continuing effort to reduce paperwork and respondent burden, the Department conducts a preclearance consultation program to allow the general public and Federal agencies to comment on proposed and continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA). This helps ensure that the public understands the Department’s collection instructions, respondents can provide the requested data in the desired format, reporting burden (time and financial resources) is

minimized, collection instruments are clearly understood, and the Department can properly assess the impact of collection requirements on respondents.

The Department is soliciting comments regarding the information collection request (ICR) included in the proposed amendments to the ICR. To obtain a copy of the ICR, contact the PRA addressee below or go to *RegInfo.gov*. The Department has submitted a copy of the rule to the OMB in accordance with 44 U.S.C. 3507(d) for review of its information collections. The Department and OMB are particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency’s estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronically delivered responses).

Commenters may send their views on the Departments’ PRA analysis in the same way they send comments in response to the proposed rule as a whole (for example, through the *www.regulations.gov* website), including as part of a comment responding to the broader proposed rule. Comments are due by January 2, 2024 to ensure their consideration.

PRA Addressee: Address requests for copies of the ICR to James Butikofer, Office of Research and Analysis, U.S. Department of Labor, Employee Benefits Security Administration, 200 Constitution Avenue NW, Room N–5718, Washington, DC 20210, or *ebsa.opr@dol.gov*. ICRs also are available at *http://www.RegInfo.gov* (*http://www.reginfo.gov/public/do/PRAMain*).

As discussed in detail above, PTE 84–24, as amended, would exclude investment advice fiduciaries from the existing relief provided in Section II, which would be redesignated as Section II(a) and add new Sections VI–VIII, which would provide relief for investment advice limited to the narrow category of transactions in which an

¹⁹ Set forth in 29 CFR 2570.35(d).

independent, insurance-only agent, or Independent Producer, provides investment advice to a Retirement Investor regarding an annuity or insurance contract. Additionally, as amended, the exemption requires the Independent Producers engaging in these transactions to adhere to certain Impartial Conduct Standards, including acting in the best interest of the plans and IRAs when providing advice.

Financial institutions and investment professionals that engage in all other investment advice transactions, including those involving captive or career insurance agents would rely on PTE 2020–02 to receive exemptive relief for investment advice transactions. The amendment would revise the recordkeeping requirements for all entities relying on PTE 84–24. Additionally, for Independent Producers, the exemption would require entities to make certain new disclosures, conduct an annual retrospective review, and comply with policy and procedure requirements.

These requirements are ICRs subject to the PRA. Readers should note that the burden discussed below conforms to the requirements of the PRA and is not the incremental burden of the changes.²⁰

1.1 Preliminary Assumptions

In the analysis discussed below, a combination of personnel would perform the tasks associated with the ICRs at an hourly wage rate of \$158.94 for an Independent Producer, \$63.45 for clerical personnel, and \$159.34 for a legal professional, and \$128.11 for a senior executive.²¹

The Department does not have information on how many Retirement Investors, including plan beneficiaries and participants and IRA owners, receive disclosures electronically from investment advice fiduciaries. For the purposes of this analysis, the Department assumes that the percent of Retirement Investors receiving disclosures electronically would be similar to the percent of plan participants receiving disclosures electronically under the Department's 2020 electronic disclosure rules.²²

²⁰ For a more detailed discussion of the marginal costs associated with the proposed amendments to PTE 84–24, refer to the Notice of Proposed Rulemaking published elsewhere in today's edition of the *Federal Register*.

²¹ Internal Department calculation based on 2023 labor cost data. For a description of the Department's methodology for calculating wage rates, see <https://www.dol.gov/sites/dolgov/files/EBSA/laws-and-regulations/rules-and-regulations/technical-appendices/labor-cost-inputs-used-in-ebsa-opr-ria-and-pra-burden-calculations-june-2019.pdf>.

²² 67 FR 17263 (Apr. 9, 2002).

Accordingly, the Department estimates that 94.2 percent of the disclosures sent to Retirement Investors would be sent electronically, and the remaining 5.8 percent would be sent by mail.²³ The Department requests comment on these assumptions.

The Department assumes any documents sent by mail would be sent by First Class Mail, incurring a postage cost of \$0.66 for each piece of mail.²⁴ Additionally, the Department assumes that documents sent by mail would incur a material cost of \$0.05 for each page.

1.2 Costs Associated With Satisfying Conditions for Transactions Described in Section III(a)–(f)

Insurance agents and brokers, pension consultants, insurance companies, and investment company principal underwriters are expected to continue to take advantage of the exemption for transactions described in Section III(a)–(f). The Department estimates that 2,986 insurance agents and brokers, pension consultants, and insurance companies will continue to take advantage of the exemption for transactions described in Section III(a)–(f). This estimate is based on the following assumptions:

- According to the Insurance Information Institute, in 2022, there were 3,328 captive agents, which are insurance agents who work for only one insurance company.²⁵ The Insurance Information Institute also found that life and annuity insurers accounted for 47.4 percent of all net premiums for the insurance industry in 2022.²⁶ Thus, the Department estimates there are 1,577 insurance agents and brokers relying on the existing provisions.²⁷
- The Department expects that pension consultants would continue to

²³ The Department estimates approximately 94.2% of Retirement Investors receive disclosures electronically, which is the sum of the estimated share of Retirement Investors receiving electronic disclosures under the 2002 electronic disclosure safe harbor (58.2%) and the estimated share of Retirement Investors receiving electronic disclosures under the 2020 electronic disclosure safe harbor (36.0%).

²⁶ Insurance Information Institute, *Facts + Statistics: Industry Overview—Insurance Industry at a Glance*, <https://www.iii.org/fact-statistic/facts-statistics-industry-overview>.

²⁷ The number of captive insurance agents is estimated as: (3,328 captive agents × 47.4%) = 1,577 captive insurance agents serving the annuity market.

rely on the existing PTE 84–24. Based on 2021 Form 5500 data, the Department estimates that 1,011 pension consultants serve the retirement market.²⁸

- In the Department's 2016 Regulatory Impact Analysis, it estimated that 398 insurance companies wrote annuities.²⁹ The Department requests information on how the number of insurance companies underwriting annuities has changed since then.

In addition, investment company principals may rely on the exemption. In the Department's experience, investment company principal underwriters almost never use PTE 84–24. Therefore, the Department assumes that 20 investment company principal underwriters will engage in one transaction annually under PTE 84–24, 10 of which are assumed to service plans and 10 are assumed to service IRAs.

The Department requests comments on how many entities currently rely on PTE 84–24 for transactions that do not involve investment advice and would continue to rely on the exemption as amended.

Further, the Department estimates that there are approximately 765,124 ERISA covered pension plans³⁰ and approximately 67.8 million IRAs.³¹ The Department estimates that 7.5 percent of plans are new accounts or new financial advice relationships³² and that 3 percent of plans will use the exemption for covered transactions.³³ Based on these assumptions, the Department estimates that 1,722 plans would be

²⁸ Internal Department of Labor calculations based on the number of unique service providers listed as pension consultants on the 2021 Form 5500 Schedule C.

²⁹ This estimate is based on 2014 data from SNL Financial on life insurance companies that reported receiving either individual or group annuity considerations. (See Employee Benefits Security Administration, *Regulating Advice Markets Definition of the Term "Fiduciary" Conflicts of Interest—Retirement Investment Advice Regulatory Impact Analysis for Final Rule and Exemptions*, (April 2016), <https://www.dol.gov/sites/dolgov/files/EBSA/laws-and-regulations/rules-and-regulations/completed-rulemaking/1210-AB32-2/ria.pdf>.)

³⁰ Employee Benefits Security Administration, United States Department of Labor, *Private Pension Plan Bulletin: Abstract of 2021 Form 5500 Annual Reports*, Table A1 (2023; forthcoming).

³¹ Cerulli Associates, *2023 Retirement-End Investor*, Exhibit 5.12. The Cerulli Report, (2023).

³² EBSA identified 57,575 new plans in its 2021 Form 5500 filings, or 7.5 percent of all Form 5500 pension plan filings.

³³ In 2020, 7 percent of traditional IRAs were held by insurance companies. (See Investment Company Institute, *The Role of IRAs in US Households' Saving for Retirement*, 2020, 27(1) ICI Research Perspective (2021), <https://www.ici.org/system/files/attachments/pdf/per27-01.pdf>.) This number has been adjusted downward to 3 percent to account for the fact that some transactions are not covered by this exemption.

affected by the proposed amendments to PTE 84–24.³⁴

The proposed amendments to 84–24 would also affect new IRA accounts. The Department does not have data on the number of new IRA accounts that are opened each year. However, in 2022, of the 67.8 million IRA owners, 1.4 million, or approximately 2.1 percent, opened an IRA for the first time.³⁵ Inferring from this statistic, the Department estimates that 2.1 percent of IRA accounts are new each year. The Department acknowledges that some IRA owners may have multiple IRAs, and as such, this statistic may underestimate the percentage of new IRAs opened.³⁶ Additionally, the Department estimates that about 3 percent of these new IRAs, or approximately 52,000 IRAs, would use PTE 84–24 for covered transactions.³⁷

The proposed amendment would exclude entities currently relying on the exemption, under the existing provisions for investment advice. As such, the Department acknowledges that the estimates discussed above may

overestimate the entities able to rely on the exemption for relief for the transactions described in Section III(a)–(f). The Department requests comment or data on whether the relief in proposed Section II(a) for the covered transactions in Section III(a)–(f) would still be utilized after investment advice is excluded.

1.2.1. Written Authorization From the Independent Plan Fiduciary

Based on the estimates discussed above, the Department estimates that authorizing fiduciaries for 1,722 plans and authorizing fiduciaries for 52,449 IRA holders would be required to send an advance written authorization to the 2,996 financial institutions for IRAs³⁸ for exemptive relief for the transactions described in Section III(a)–(f).

In the plan universe, it is assumed that a legal professional would spend five hours per plan reviewing the disclosures and preparing an authorization form. In the IRA universe, it is assumed that a legal professional working on behalf of the financial institution for IRAs will spend three

hours drafting an authorization form for IRA holders to sign. This results in an hour burden of 17,598 hours with an equivalent cost of \$2.8 million.³⁹

The Department expects that plans will send the written authorization through already established electronic means, and thus, the Department does not expect plans to incur any cost to send the authorization. The Department expects that 94.2 percent of written authorization for IRAs will be sent electronically at no additional burden. The remaining 5.8 percent of authorizations will be mailed. For paper authorizations, the Department assumes that clerical staff will spend two minutes preparing and sending the authorization resulting in an hour burden of approximately 101 hours with an equivalent cost of \$6,434.⁴⁰

In total, as presented in the table below, the written authorization requirement, under the new conditions of relief, is expected to result in an annual total hour burden of 17,699 hours with an equivalent cost of \$2,810,499.

TABLE 1—HOUR BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE WRITTEN AUTHORIZATION

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Legal	17,598	\$2,804,065	17,598	\$2,804,065
Clerical	101	6,434	101	6,434
Total	17,699	2,810,499	17,699	2,810,499

The Department assumes 5.8 percent of authorizations for IRAs would be distributed by mail and that the

authorization will include two pages. Accordingly, the Department estimates

an annual cost burden of approximately \$2,312.⁴¹

TABLE 2—MATERIAL AND POSTAGE COST ASSOCIATED WITH THE WRITTEN AUTHORIZATION

Activity	Year 1		Subsequent years	
	Pages	Cost	Pages	Cost
Material and Postage Cost	2	\$2,312	2	\$2,312

³⁴ 765,124 plans × 7.5 percent of plans are new × 3 percent of plans with relationships with insurance agents or pension consultants = 1,722 plans.

³⁵ Cerulli Associates, *U.S. Retirement End-Investor 2023: Fostering Comprehensive Relationships*, The Cerulli Report.

³⁶ The Department lacks data on the number of IRA owners that own multiple IRAs. To provide scope of magnitude, one source reported that in 2019, 19 percent of IRA owners contributed to both a traditional IRA and Roth IRA. (See Investment Company Institute, *The Role of IRAs in US Households' Saving for Retirement, 2020*, 27(1) ICI Research Perspective (2021), <https://www.ici.org/system/files/attachments/pdf/per27-01.pdf>.) This statistic does not account for individuals who own

multiple IRAs of each type or those who did not contribute in 2019, but it provides a lower bound.

³⁷ In 2020, 7 percent of traditional IRAs were held by insurance companies. (See Investment Company Institute, *The Role of IRAs in US Households' Saving for Retirement, 2020*, 27(1) ICI Research Perspective (2021), <https://www.ici.org/system/files/attachments/pdf/per27-01.pdf>.) This number has been adjusted downward to 3 percent to reflect the removal of transactions not covered by this exemption. The number of IRAs affected is estimated as: (83,252,750 IRAs × 2.1% IRAs assumed to be new IRAs × 3% of IRAs held by insurance companies) = 52,449 IRAs.

³⁸ This includes 2,986 insurance agents and brokers, pension consultants, and insurance companies and 10 investment company underwriters servicing IRAs.

³⁹ The burden is estimated as: (1,722 plans × 5 hours) + (2,996 financial institutions × 3 hours) = 17,598 hours. A labor rate of approximately \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(1,722 plans × 5 hours) + (2,996 financial institutions × 3 hours)] × \$159.34 per hour = \$2,804,065.

⁴⁰ The burden is estimated as: ((52,449 IRAs × 5.8 percent paper × 2 minutes per plan) + 60 minutes) = 101 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: ((52,449 IRAs × 5.8 percent paper × 2 minutes per plan) + 60 minutes) × \$63.45 per hour = \$6,434.

⁴¹ The material cost is estimated as: (52,449 IRA authorizations × 5.8 percent paper) × [\$0.66 + (\$0.05 × 2)] = \$2,312.

TABLE 2—MATERIAL AND POSTAGE COST ASSOCIATED WITH THE WRITTEN AUTHORIZATION—Continued

Activity	Year 1		Subsequent years	
	Pages	Cost	Pages	Cost
Total	2	2,312	2	2,312

1.2.2. Disclosure

Based on the estimates discussed above, the Department estimates that approximately 3,006 financial institutions⁴² would continue to utilize the exemption for exemptive relief for the transactions described in Section III(a)–(f) for each plan and IRA. In total, the Department estimates that 2,996 entities would prepare disclosures for plans and 2,996 entities would prepare disclosures for IRAs. The Department assumes that an in-house attorney will spend one hour of legal staff time drafting the disclosure for plans and one hour of legal staff time drafting the

disclosure for IRAs. This results in an hour burden of 5,992 hours with an equivalent cost of \$954,765.⁴³

The Department expects that the disclosures for plans would be distributed through already established electronic means, and thus, the Department does not expect plans to incur any cost to send the disclosures. The Department expects that 94.2 percent of disclosures for IRAs will be sent electronically at no additional burden. The remaining 5.8 percent of authorizations will be mailed. For paper copies, a clerical staff member is assumed to require two minutes to prepare and mail the required

information to the plan fiduciary. This information will be sent to the 52,449 IRAs plus the 10 investment company principal underwriters for IRAs entering into an agreement with an insurance agent, pension consultant, or mutual fund principal underwriter, and based on the above, the Department estimates that this requirement results in an hour burden of 84 hours with an equivalent cost of \$6,435.⁴⁴

In total, as presented in the table below, providing the pre-authorization materials is expected to impose an annual total hour burden of 6,093 hours with an equivalent cost of \$961,200.

TABLE 3—HOUR BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE DISCLOSURE

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Legal	5,992	\$954,765	5,992	\$954,765
Clerical	101	6,435	101	6,435
Total	6,093	961,200	6,093	961,200

The Department assumes that this information will include seven pages with 94.2 percent of disclosures distributed electronically through

traditional electronic methods at no additional burden, and the remaining 5.8 percent of disclosures will be mailed. Accordingly, the Department

estimates an annual cost burden of approximately \$2,313.⁴⁵

TABLE 4—MATERIAL AND POSTAGE COST ASSOCIATED WITH THE DISCLOSURE

	Year 1		Subsequent years	
	Pages	Equivalent burden cost	Pages	Equivalent burden cost
Material and Postage Cost	7	\$2,313	7	\$2,313
Total	7	2,313	7	2,313

1.3 Costs Associated With Satisfying Conditions for Transactions Described in Section III(g)

The amendment would provide investment advice fiduciaries with relief for Independent Producers for

transactions in which the Independent Producer receives an insurance sales commission as a result of the provision of investment advice, regarding the purchase of an annuity contract of a financial institution that is not an

Affiliate. The Department expects that the financial institutions covered by this proposal would be insurance companies that directly write annuities. The proposed amendments outline conditions pertaining to disclosure,

⁴² This includes 2,986 insurance agents and brokers, pension consultants, and insurance companies and 20 investment company underwriters servicing plans and IRAs.

⁴³ The burden is estimated as: [2,996 financial institutions × (1 hour for plans + 1 hour for IRAs)] = 5,992 hours. A labor rate of approximately \$159.34 is used for a legal professional. The labor

rate is applied in the following calculation: [2,996 financial institutions × (1 hour for plans + 1 hour for IRAs)] × \$159.34 per hour = \$954,765.

⁴⁴ The burden is estimated as: {[52,449 IRAs + 10 investment company principal underwriters for IRAs] × 5.8 percent paper × 2 minutes} ÷ 60 minutes = 101 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the

following calculation: {[52,449 IRAs + 10 investment company principal underwriters for IRAs] × 5.8 percent paper × 2 minutes} ÷ 60 minutes × \$63.45 = \$6,435.

⁴⁵ The material cost is estimated as: [(52,449 IRA authorizations + 10 investment company principal underwriters for IRAs) × 5.8 percent paper] × [\$0.66 + (\$0.05 × 7)] = \$2,313.

policies and procedures, and retrospective reviews that need to be satisfied to rely on the exemption. These conditions are tailored to protect Retirement Investors from the specific conflicts that arise for Independent Producers when providing investment advice to Retirement Investors regarding the purchase of an annuity.

The Independent Insurance Agents and Brokers of America estimated that there were 40,000 Independent Producers in 2022.⁴⁶ The Department does not have data on what percent of Independent Producers service the retirement market. For the purposes of this analysis, the Department assumes that 10 percent, or 4,000, of these Independent Producers service the retirement market. The Department requests comment on this assumption.

Insurance companies are primarily regulated by states and no single regulator records a nationwide count of insurance companies. Although state regulators track insurance companies, the total number of insurance companies cannot be calculated by aggregating individual state totals, because individual insurance companies often operate in multiple states. In the Department's 2016 Regulatory Impact Analysis, it estimated that 398 insurance companies wrote annuities.⁴⁷ The Department requests information on how the number of insurance companies underwriting annuities has changed since then.

Some of these insurance companies may not sell any annuity contracts in the IRA or plans. Because of these data limitations, the Department includes all 398 insurance companies in its cost estimate, though this likely represents an upper bound.

Insurance companies sell insurance products through (1) captive insurance agents that work for an insurance company as employees or as independent contractors who exclusively sell the insurance company's products and (2) independent agents who sell multiple

insurance companies' products. In recent years, the market has seen a shift away from captive distribution toward independent distribution.⁴⁸

The Department does not have data on the number of insurance companies using captive agents or Independent Producers. Based on data on the sales of individual annuities by distribution channel, the Department estimates that approximately 46 percent of insurance companies underwriting annuities sell annuities through captive distribution channels, while 54 percent sell annuities through independent distribution channels.⁴⁹ For the purposes of this analysis, the Department estimates that 215 insurance companies distribute annuities through independent channels and would rely on PTE 84–24 for transactions involving investment advice.⁵⁰

The Department estimates that 70 of the 398 insurance companies are large entities.⁵¹ For the purposes of this analysis, the Department assumes the percent of small insurance companies using each distribution channel is the same as for all insurance companies. That is, the Department assumes that 46 percent of insurance companies (183 insurance companies) sell annuities

through captive distribution channels, of which 151 are estimated to be small insurance companies and the remaining 32 large insurance companies.⁵² Additionally, 54 percent (215 insurance companies) sell annuities through independent distribution channels, of which 177 are estimated to be small insurance companies and the remaining 38 are large.⁵³ The Department recognizes that the distribution of sales by distribution channel is likely different from the distribution of insurance companies by distribution channel. The Department requests comment on how many insurance companies sell annuities through captive and independent distribution channels. The Department also requests comment on whether, or how many, insurance companies may rely on both methods of distribution.

1.3.1 Disclosures

As discussed above, the Department assumes that 4,000 Independent Producers service the retirement market, selling the products of 215 insurance companies. For more generalized disclosures, the Department assumes that insurance companies would prepare and provide disclosures to Independent Producers selling their products. However, some of the disclosures are tailored specifically to the Independent Producer. The Department assumes that these disclosures would need to be prepared by the Independent Producer themselves. The Department recognizes that some may rely on intermediaries in the distribution channel to prepare more specific disclosures; however, the Department expects that the costs associated with the preparation would be covered by commissions retained by the intermediary for its services.

1.3.1.1. Written Acknowledgement That the Independent Producer Is a Fiduciary by the Independent Producer

The Department is including a model statement in the preamble to PTE 84–24 that details what should be included in a fiduciary acknowledgment for

⁴⁶ Annemarie McPherson Spears, *7 Findings From the 2022 Agency Universe Study*, (October 13, 2022), <https://www.iamagazine.com/news/7-findings-from-the-2022-agency-universe-study/?hstc=79369803.5fd6a87d75ca95f942e9dc33fed281b9.1691447156981.1691447156981.1691447156981.1691447156981&hsfp=2180945085>.

⁴⁷ This estimate is based on 2014 data from SNL Financial on life insurance companies reported receiving either individual or group annuity considerations. (See Conflict of Interest Final Rule, *Regulatory Impact Analysis for Final Rule and Exemptions*, U.S. Department of Labor (April 2016), www.dol.gov/sites/dolgov/files/EBSA/laws-and-regulations/rules-and-regulations/completed-rulemaking/1210-AB32-2/ria.pdf).

⁴⁸ Ramnath Balasubramanian, Rajiv Dattani, Asheet Mehta, & Andrew Reich, *Unbundling Value: How Leading Insurers Identify Competitive Advantage*, McKinsey & Company, (June 2022), <https://www.mckinsey.com/industries/financial-services/our-insights/unbundling-value-how-leading-insurers-identify-competitive-advantage>; Sheryl Moore, *The Annuity Model Is Broken*, Wink Intel, (June 2022), <https://www.winkintel.com/2022/06/the-annuity-model-is-broken-reprint/>.

⁴⁹ According to the Insurance Information Institute, in 2022, 20 percent of individual annuities were sold through independent broker-dealers, 18 percent through independent agents, 15 percent through career agents, 24 percent through banks, 17 percent through full-service national broker-dealers, 3 percent through direct-response, and 2 percent through other methods. For the purposes of this analysis, the Department considers those sales made by career agents and full-service national broker-dealers to be “captive,” and those made by independent broker-dealers and independent agents to be “independent.” The Department assumes that 46 percent of sales by banks are captive, while 54 percent of sales by banks are independent. As such, the Department assumes that 46 percent of sales are sold through captive channels $\{[15\% + 17\% + (46\% \times 24\%)] / (100\% - 6\%)\}$, while 54 percent of sales are sold through independent channels $\{[20\% + 18\% + (54\% \times 24\%)] / (100\% - 6\%)\}$.

⁵⁰ The number of insurance companies using captive distribution channels is estimated as $(398 \times 46\%) = 183$ insurance companies. The number of insurance companies using independent distribution channels is estimated as $(398 - 183) = 215$ insurance companies.

⁵¹ LIMRA estimates that, in 2016, 70 insurers had more than \$38.5 million in sales, which is the Small Business Administration's threshold for a large entity within the insurance industry. (See LIMRA, *U.S. Individual Annuity Yearbook: 2016 Data*, LIMRA Secure Retirement Institute (2017)).

⁵² The number of large insurance companies using a captive distribution channel is estimated as: $(70 \text{ large insurance companies} \times 46\%) = 32$ insurance companies. The number of small insurance companies using a captive distribution channel is estimated as: $(183 \text{ insurance companies} - 32 \text{ large insurance companies}) = 151$ small insurance companies.

⁵³ The number of large insurance companies using an independent distribution channel is estimated as: $(70 \text{ large insurance companies} \times 54\%) = 38$ insurance companies. The number of small insurance companies using an independent distribution channel is estimated as: $(215 \text{ insurance companies} - 38 \text{ large insurance companies}) = 177$ small insurance companies.

financial institutions.⁵⁴ The Department assumes that the time associated with preparing the disclosures would be minimal. Further, these disclosures are expected to be uniform in nature. Accordingly, the Department estimates that these disclosures would not take a significant amount of time to prepare.

Due to the nature of Independent Producers, the Department assumes that

most financial institutions would make draft disclosures available to Independent Producers pertaining to their fiduciary status. However, the Department expects that a small percentage of Independent Producers may draft their own disclosures. The Department assumes that an in-house attorney for all 215 financial institutions

as well as 5 percent of Independent Producers, or 200 Independent Producers, would spend 10 minutes of legal staff time to produce a written acknowledgement in the first year. This results in an estimated hour burden of approximately 69 with an equivalent cost of \$11,021 in the first year.⁵⁵

TABLE 5—HOUR BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE FIDUCIARY ACKNOWLEDGEMENT

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Legal	69	\$11,021	0	\$0
Total	69	11,021	0	0

1.3.1.2 Written Statement of the Best Interest Standard of Care Owed by the Independent Producer

As discussed above, the Department assumes that 4,000 Independent Producers service the retirement market, selling the products of 215 financial

institutions. Due to the nature of Independent Producers, the Department assumes that most financial institutions would make draft disclosures available to Independent Producers, pertaining to the annuities they offer. The Department assumes that an in-house attorney for all 215 financial institutions as well as 5

percent of Independent Producers, or 200 Independent Producers, would spend 30 minutes of legal staff time to prepare the statement in the first year. This results in an hour burden of 208 hours with an equivalent cost of \$33,063 in the first year.⁵⁶

TABLE 6—HOUR BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE WRITTEN STATEMENT OF THE BEST INTEREST STANDARD OF CARE OWED

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Legal	208	\$33,063	0	\$0
Total	208	33,063	0	0

1.3.1.2. Written Description of the Services Provided and the Products the Independent Producer Is Licensed and Authorized To Sell

As discussed above, the Department assumes that 4,000 Independent Producers service the retirement market, selling the products of 215 insurance companies. For disclosures tailored more specifically to an individual Independent Producer, the Department assumes that the disclosure would need to be prepared by the Independent Producer. The Department recognizes

that many Independent Producers may not have the internal resources to prepare such disclosure. The Department expects that some may rely on intermediaries in the distribution channel to prepare the disclosures and some may seek external legal support. However, the Department expects that the costs associated with the preparation would be covered by commission retained by the intermediary for its services or by the fee paid to external legal support. As such, the Department still attributes this

cost back to the Independent Producer. The Department requests comment on this assumption.

Accordingly, the Department assumes that all 4,000 Independent Producers in this analysis would need to prepare the disclosure. The Department assumes that, for each of these Independent Producers, an attorney would spend 30 minutes of legal staff time drafting the written description. This results in an hour burden of 2,000 hours with an equivalent cost of \$318,680 in the first year.⁵⁷

⁵⁴ 85 FR 82798, 82827 (Dec. 18, 2020). The model statement was also included in Frequently Asked Questions in April 2021, New Fiduciary Advice Exemption: PTE 2020-02 *Improving Investment Advice for Workers & Retirees* Frequently Asked Questions, Q13, (April 2021), <https://www.dol.gov/sites/dolgov/files/ebsa/about-ebsa/our-activities/resource-center/faqs/new-fiduciary-advice-exemption.pdf>.

⁵⁵ The burden is estimated as: $\{[(215 \text{ financial institutions} + 200 \text{ Independent Producers}) \times (10 \text{ minutes})] \div 60 \text{ minutes}\} = 69 \text{ hours}$. A labor rate of approximately \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: $\{[(215 \text{ financial institutions} + 200 \text{ Independent Producers}) \times (10 \text{ minutes})] \div 60 \text{ minutes}\} \times \$159.34 = \$11,021$.

minutes)] $\div 60 \text{ minutes}\} = 69 \text{ hours}$. A labor rate of approximately \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: $\{[(215 \text{ financial institutions} + 200 \text{ Independent Producers}) \times (10 \text{ minutes})] \div 60 \text{ minutes}\} \times \$159.34 = \$11,021$.

⁵⁶ The burden is estimated as: $\{[(215 \text{ financial institutions} + 200 \text{ Independent Producers}) \times (30 \text{ minutes})] \div 60 \text{ minutes}\} = 208 \text{ hours}$. A labor rate of approximately \$159.34 is used for a legal professional. The labor rate is applied in the

following calculation: $\{[(215 \text{ financial institutions} + 200 \text{ Independent Producers}) \times (30 \text{ minutes})] \div 60 \text{ minutes}\} \times \$159.34 = \$33,063$.

⁵⁷ The burden is estimated as: $(4,000 \text{ Independent Producers} \times 0.5 \text{ hours}) = 2,000 \text{ hours}$. A labor rate of approximately \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: $(4,000 \text{ Independent Producers} \times 0.5 \text{ hours}) \times \$159.34 = \$318,680$.

TABLE 7—HOURLY BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE WRITTEN DESCRIPTION OF SERVICE PROVIDED

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Legal	2,000	\$318,680	0	\$0
Total	2,000	318,680	0	0

1.3.1.4. A Written Statement of the Independent Producer's Material Conflicts of Interest and the Amount of the Insurance Commission that Would Be Paid to the Independent Producer in Connection With the Purchase by a Retirement Investor of the Recommended Annuity

As discussed above, for disclosures tailored more specifically to an individual Independent Producer, the Department assumes that the disclosure would need to be prepared by the Independent Producer. The Department recognizes that many Independent

Producers may not have the internal resources to prepare such disclosure, however they may already have a similar statement to satisfy other legal requirements. The Department expects that some may rely on intermediaries in the distribution channel to prepare the disclosures and some may seek external legal support. However, the Department expects that the costs associated with the preparation would be covered by the commission retained by the intermediary for its services or by the fee paid to external legal support. As such, the Department still attributes this

cost back to the Independent Producer. The Department requests comment on this assumption.

Accordingly, the Department assumes that all 4,000 Independent Producers in this analysis would need to prepare the disclosure. The Department assumes that, for each of these entities, an attorney would spend one hour of legal staff time drafting the written description. This results in an hour burden of 4,000 hours with an equivalent cost of \$637,360 in the first year.⁵⁸

TABLE 8—HOURLY BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE WRITTEN STATEMENT OF THE INDEPENDENT PRODUCER'S MATERIAL CONFLICTS OF INTEREST

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Legal	4,000	\$637,360	0	\$0
Total	4,000	637,360	0	0

1.3.1.5 Before Recommending an Annuity, Engaging in a Rollover, or Making a Recommendation to a Plan Participant as to the Post-Rollover Investment of Assets Currently Held in a Plan, the Independent Producer Must Document Its Conclusions as to Whether a Rollover Is in the Investor's Best Interest

The proposed amendment would require an Independent Producer to provide a disclosure to investors that documents their consideration as to whether a recommended annuity or rollover is in the Retirement Investor's best interest. Due to the nature of this

disclosure, the Department assumes that the content of the disclosure would need to be prepared by the Independent Producer. The Department recognizes that some may rely on intermediaries in the distribution channel, and some may seek external legal support to assist with drafting the disclosures. However, the Department expects that most Independent Producers would prepare the disclosure themselves. The Department requests comment on this assumption.

For the purposes of this analysis, the Department uses its estimate for the number of new IRA accounts held by insurance companies as a proxy for the

number of Retirement Investors that have relationships with Independent Producers that would engage in transactions covered under the exemption. As such, the Department estimates that 52,449 Retirement Investors would receive documentation on whether the recommended annuity is in their best interest each year.⁵⁹

The Department assumes that, for each of these Retirement Investors, an Independent Producer would spend one hour of a financial manager's time drafting the documentation. This results in an estimated hour burden of 52,449 hours with an equivalent cost of \$8.3 million annually.⁶⁰

⁵⁸ The burden is estimated as: (4,000 Independent Producers × 1 hour) = 4,000 hours. A labor rate of approximately \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (4,000 hours × \$159.34) = \$637,360.

⁵⁹ In 2020, 7 percent of traditional IRAs were held by insurance companies. (See Investment Company

Institute, *The Role of IRAs in US Households' Saving for Retirement*, 2020, 27(1) ICI Research Perspective (2021). <https://www.ici.org/system/files/attachments/pdf/per27-01.pdf>.) This number has been adjusted downward to 3 percent to reflect the removal of transactions not covered by this exemption. The number of IRAs affected is estimated as: (83,252,750 IRAs × 2.1% IRAs

assumed to be new IRAs × 3% of IRAs held by insurance companies) = 52,449 IRAs.

⁶⁰ The burden is estimated as: (52,449 rollovers × 1 hour) = 52,449 hours. A labor rate of approximately \$158.94 is used for an Independent Producer. The labor rate is applied in the following calculation: (52,449 rollovers × 1 hour) × \$158.94 = \$8,336,244.

TABLE 9—HOURLY BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE ROLLOVER DOCUMENTATION

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Insurance Sales Agent	52,449	\$8,336,244	52,449	\$8,336,244
Total	52,449	8,336,244	52,449	8,336,244

1.3.1.6 Mailing Cost for Disclosures Sent From Independent Producers to Retirement Investors

As discussed at the beginning of the cost section, The Department assumes

that 5.8 percent of disclosures would be mailed. Accordingly, of the estimated 52,449 affected Retirement Investors, 3,042 Retirement Investors are estimated to receive paper disclosures.⁶¹ For paper copies, a clerical staff member is

assumed to require five minutes to prepare and mail the required information to the Retirement Investor. This requirement results in an estimated hour burden of 254 hours with an equivalent cost of \$16,085.⁶²

TABLE 10—HOURLY BURDEN AND EQUIVALENT COST ASSOCIATED WITH PREPARING THE DISCLOSURES

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Clerical	254	\$16,085	254	\$16,085
Total	254	16,085	254	16,085

The Department assumes that this information would include seven pages,

resulting in an annual cost burden for material and paper costs of \$3,072.⁶³

TABLE 11—MATERIAL COST ASSOCIATED WITH THE DISCLOSURES

Activity	Year 1		Subsequent years	
	Pages	Equivalent burden cost	Pages	Equivalent burden cost
Cost	7	\$3,072	7	\$3,072
Total	7	3,072	7	3,072

Additionally, Independent Producers would be required to send the documentation to the insurance company. The Department expects that such documentation would be sent electronically and result in a de minimis burden. The Department requests comment on this assumption.

1.3.2 Policies and Procedures

1.3.2.1 Financial Institutions Must Establish, Maintain, and Enforce Written Policies and Procedures for the Review of Each Recommendation Before an Annuity Is Issued to a Retirement Investor, and the Financial Institution Review Its Policies and Procedures at Least Annually

As discussed above, the Department estimates that 215 financial institutions would need to meet this requirement, of which 177 are estimated to be small and 38 are estimated to be large.⁶⁴ The Department assumes that, for each large

insurance company, an in-house attorney would spend 10 hours of legal staff time drafting the written description, and for each small insurance company, an in-house attorney would spend 5 hours of legal staff time. This results in an hour burden of 1,265 hours with an equivalent cost of \$201,565 in the first year.⁶⁵

In the following years, the Department assumes for each insurance company, an in-house attorney would spend two hours of legal staff time reviewing the policies and procedures. This results in an hour burden of 430 hours with an

⁶¹ This is estimated as: (52,449 Retirement Investors × 5.8%) = 3,042 paper disclosures.

⁶² This is estimated as: [(3,042 paper disclosures × 5 minutes) ÷ 60 minutes] = 254 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: [(3,042 paper disclosures × 5 minutes) ÷ 60 minutes] × \$63.45 = \$16,085.

⁶³ This is estimated as: 3,042 rollovers resulting in a paper disclosure × [\$0.66 postage + (\$0.05 per page × 7 pages)] = \$3,072.

⁶⁴ The number of large insurance companies using an independent distribution channel is estimated as: (70 large insurance companies × 54%) = 38 insurance companies. The number of small insurance companies using an independent distribution channel is estimated as: (215 insurance

companies – 38 large insurance companies) = 177 small insurance companies.

⁶⁵ This is estimated as: [(177 small insurance companies × 5 hours) + (38 large insurance companies × 10 hours)] = 1,265 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(177 small insurance companies × 5 hours) + (38 large insurance companies × 10 hours)] × \$159.34 = \$201,565.

equivalent cost of \$68,516 in subsequent years.⁶⁶

The proposed amendments would also require financial institutions to provide their complete policies and procedures to the Department upon request. As discussed above for PTE 2020–02, the Department estimates that it would request 165 policies and procedures in the first year and 50 in subsequent years. Assuming that the number of requests for the entities covered under PTE 2020–02 is equivalent to the number of requests for the entities covered under PTE 84–24, the Department assumes that it will

request two policies and procedures from insurers in the first year and one request in subsequent years, on average.⁶⁷ This results in an estimated cost of approximately \$32 in the first year⁶⁸ and \$16 in subsequent years.⁶⁹

Insurers would also be required to review each of the Independent Producer's recommendations before an annuity is issued to a Retirement Investor to ensure compliance with the Impartial Conduct Standards and other conditions of this exemption. This requirement is consistent with the language in NAIC's 2010 Model Regulation 275, Suitability in Annuity

Transactions,⁷⁰ and the 2020 revisions to Model Regulation 275, which expanded the suitability standard to a best interest standard.⁷¹ Most states have adopted some form of the Model Regulation 275.⁷² As such, the Department expects that reviewing recommendations before an annuity is issued is common industry practice. Accordingly, the Department expects that financial institutions would incur a de minimis burden to comply with the proposed amendments, when already complying with Model Regulation 275. The Department requests comment on this assumption.

TABLE 12—HOUR BURDEN AND EQUIVALENT COST ASSOCIATED WITH POLICIES AND PROCEDURES

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Legal	1,265	\$201,565	430	\$68,516
Clerical	1	32	1	16
Total	1,266	201,597	430	68,532

1.3.3. Retrospective Review

The proposed amendment would require financial institutions to conduct a retrospective review at least annually. The review would be required to be reasonably designed to prevent violations of and achieve compliance with (1) the Impartial Conduct Standards, (2) the terms of this exemption, and (3) the policies and procedures governing compliance with the exemption. The review would be required to evaluate the effectiveness of the supervision system, any noncompliance discovered in connection with the review, and corrective actions taken or recommended, if any. Financial institutions would also be required to provide the Independent Producer with

the underlying methodology and results of the retrospective review.

1.3.3.1. The Insurance Company Must Conduct a Retrospective Review, at Least Annually, for Each Independent Producer That Sells the Insurance Company's Annuity Contracts

The Department estimates that 215 financial institutions would need to meet this requirement. For this requirement the information collection is documenting the findings of the retrospective review. The Departments lacks data on, for a given insurance company, how many Independent Producers, on average, sell their annuities. For the purposes of this analysis, the Department assumes that, on average, each Independent Producer sells the products of three financial

institutions. From each of these financial institutions, they may sell multiple products. As such, the Department assumes that each year, insurance companies would need to prepare a total of 12,000 retrospective reviews,⁷³ or on average, each insurance company would need to prepare approximately 56 retrospective reviews.⁷⁴ The Department requests comment on this estimate. The Department assumes that, for each Independent Producer selling an insurance company's products, an in-house attorney at the insurance company would spend one hour of legal staff time, on average, drafting the retrospective review. This results in an estimated hour burden of 12,000 hours with an equivalent cost of \$1.9 million.⁷⁵

⁶⁶ This is estimated as: (215 insurance companies × 2 hours) = 430 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (215 insurance companies × 2 hours) × \$159.34 = \$68,516.

⁶⁷ The number of requests in the first year is estimated as 215 insurance companies × (165 requests in PTE 2020–02/19,290 financial institutions in PTE 2020–02) = 2 requests. The number of requests in subsequent years is estimated as: 215 insurance companies × (50 requests in PTE 2020–02/19,290 financial institutions in PTE 2020–02) = 1 request.

⁶⁸ The burden is estimated as: [(2 × 15 minutes) ÷ 60 minutes] = 0.5 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is

applied in the following calculation: [(2 × 15 minutes) ÷ 60 minutes] × \$63.45 = \$31.73.

⁶⁹ The burden is estimated as: [(1 × 15 minutes) ÷ 60 minutes] = 0.25 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: [(1 × 15 minutes) ÷ 60 minutes] × \$63.45 = \$15.86.

⁷⁰ NAIC Model Suitability Regulations, § 6(F)(1)(d) (2010), <https://naic.soutrnglobal.net/Portal/Public/en-GB/RecordView/Index/25201>.

⁷¹ NAIC Model Suitability Regulations, § 6(C)(1)(d) (2020), <https://content.naic.org/sites/default/files/inline-files/MDL-275.pdf>.

⁷² As of October of 2021, only three states had not adopted some form of Model Regulation 275. (See

A.D. Banker & Company, *Annuity Best Interest State Map and FAQs*, (October 2021), <https://blog.adbanker.com/annuity-best-interest-state-map-and-faqs>).

⁷³ This is estimated as: (4,000 Independent Producers × 3 insurance companies covered) = 12,000 retrospective reviews.

⁷⁴ This is estimated as: (12,000/215) = 55.81 retrospective reviews, on average

⁷⁵ This is estimated as: (12,000 retrospective reviews × 1 hour) = 12,000 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: (12,000 retrospective reviews × 1 hour) × \$159.34 = \$1,912,080.

TABLE 13—HOURL BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE RETROSPECTIVE REVIEW

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden Hours	Equivalent burden cost
Legal	12,000	\$1,912,080	12,000	\$1,912,080
Total	12,000	1,912,080	12,000	1,912,080

1.3.3.2. Certification by the Senior Executive Officer of the Insurance Company

The Department assumes it would take a Senior Executive Officer 15 minutes to certify the report. This

results in an annual hour burden of 3,000 hours with an equivalent cost of \$384,330.⁷⁶

TABLE 14—HOURL BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE CERTIFICATION BY THE SENIOR EXECUTIVE OFFICER

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Senior Executive Officer	3,000	\$384,330	3,000	\$384,330
Total	3,000	384,330	3,000	384,330

1.3.3.3. The Insurance Company Provides to the Independent Producer the Methodology and Results of the Retrospective Review

The Department assumes that the insurance company would provide the methodology and results electronically.

The Department requests comment on this assumption. The Department estimates that it would take clerical staff five minutes to prepare and send each of the estimated 12,000 retrospective reviews. This results in an annual hour burden of 1,000 hours with an

equivalent cost of \$63,450.⁷⁷ The Department expects that the results would be provided electronically, thus the Department does not expect there to be any material costs with providing Independent Producers with the retrospective review.

TABLE 15—HOURL BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE PROVISION OF THE RESULTS OF THE RETROSPECTIVE REVIEW

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Clerical	1,000	\$63,450	1,000	\$63,450
Total	1,000	63,450	1,000	63,450

1.3.4. Recordkeeping Requirement

The proposed amendment would change the current recordkeeping requirements to incorporate a new provision that is similar to the recordkeeping provision in PTE 2020–02. This requirement would replace the more limited existing recordkeeping requirement in current version of PTE 84–24, which requires sufficient records

to demonstrate that the conditions of the exemption have been met. The Department does not have data on how many pension consultants, insurance companies, and investment company principal underwriters would continue to rely on PTE 84–24 as amended without also complying with the amended PTE 2020–02. In this analysis, the Department assumes that all of the pension consultants and investment

company principal underwriters continuing to rely on the amended PTE 84–24 would also rely on the amended PTE 2020–02. Thus, to avoid double counting the compliance cost, this analysis does not include the cost associated with the proposed recordkeeping requirement for these entities.

⁷⁶ This is estimated as: [(12,000 retrospective reviews × 15 minutes) ÷ 60 minutes] = 3,000 hours. A labor rate of \$128.11 is used for a Senior Executive Officer. The labor rate is applied in the following calculation: [(12,000 retrospective

reviews × 15 minutes) ÷ 60 minutes] × \$128.11 = \$384,330.

⁷⁷ This is estimated as: [(12,000 retrospective reviews × 5 minutes) ÷ 60 minutes] = 1,000 hours.

A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: [(12,000 retrospective reviews × 5 minutes) ÷ 60 minutes] × \$63.45 = \$63,450.

For this analysis, the Department considers the cost for insurance companies and Independent Producers complying with the proposed recordkeeping requirements. The

Department estimates that the additional time needed to maintain records for the financial institutions to be consistent with the exemption would take an Independent Producer 2 hours,

resulting in an hour burden of 8,430 hours and an equivalent cost of \$1.3 million.⁷⁸

TABLE 16—HOURLY BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE RECORDKEEPING REQUIREMENT

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Legal	8,430	\$1,340,036	8,430	\$1,340,036
Total	8,430	1,340,036	8,430	1,340,036

For the purposes of this analysis, the Department assumes that, on average, an Independent Producer would receive 10 requests per year and that preparing and sending each request would take a legal professional, on average, 30 minutes.

Based on these assumptions, the Department estimates that the proposed amendments would result in an annual hour burden of 20,000 hours with an equivalent cost of approximately \$3.2 million.⁷⁹ The Department requests

comment on how often financial institutions would receive requests for records and how long the preparation of such records would take.

TABLE 17—HOURLY BURDEN AND EQUIVALENT COST ASSOCIATED WITH THE RECORDKEEPING REQUIREMENT

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Independent Producer	20,000	\$3,178,800	20,000	\$3,178,800
Total	20,000	3,178,800	20,000	3,178,800

1.4. Overall Summary

These paperwork burden estimates are summarized as follows:

Type of Review: Revision of an Existing Collection.

Agency: Employee Benefits Security Administration, Department of Labor.

Title: Prohibited Transaction Exemption (PTE) 84–24 for Certain Transactions Involving Insurance Agents and Brokers, Pension Consultants, Insurance Companies, and Investment Company Principal Underwriters.

OMB Control Number: 1210–0158.

Affected Public: Businesses or other for-profits; not for profit institutions.

Estimated Number of Respondents: 7,221.

Estimated Number of Annual Responses: 119,376.

Frequency of Response: Initially, Annually, When engaging in exempted transaction.

Estimated Total Annual Burden Hours: 123,726 hours.

Estimated Total Annual Burden Cost: \$8,457.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA)⁸⁰ imposes certain requirements on rules subject to the notice and comment requirements of section 553(b) of the Administrative Procedure Act or any other law.⁸¹ Under section 603 of the RFA, agencies must submit an initial regulatory flexibility analysis (IRFA) of a proposal that is likely to have a significant economic impact on a substantial number of small entities, such as small businesses, organizations, and governmental jurisdictions. This proposed amended exemption, along with related amended exemptions and a proposed rule amendment published elsewhere in this issue of the **Federal Register**, is part of a rulemaking regarding the definition of fiduciary investment advice, which the Department has determined likely will have a significant economic impact on a substantial number of small entities.

The impact of this proposed amendment on small entities is included in the IRFA for the entire project, which can be found in the related notice of proposed rulemaking found elsewhere in this edition of the **Federal Register**.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995⁸² requires each federal agency to prepare a written statement assessing the effects of any federal mandate in a proposed or final rule that may result in an expenditure of \$100 million or more (adjusted annually for inflation with the base year 1995) in any 1 year by state, local, and tribal governments, in the aggregate, or by the private sector. For purposes of the Unfunded Mandates Reform Act, as well as Executive Order 12875, this proposed amended exemption does not include any Federal mandate that will result in such expenditures.

⁷⁸ This is estimated as: (4,000 Independent Producers + 215 insurance companies) × 2 hours = 8,430 hours. A labor rate of \$158.94 is used for an Independent Producer and a rate of \$159.34 for an insurance company legal professional. The labor rate is applied in the following calculation: [(4,000 Independent Producers × 2 hours × \$158.94) + (215

insurance companies × 2 hours × \$159.34)] = \$1,340,036.

⁷⁹ The burden is estimated as: [(4,000 Independent Producers × 10 requests) × 30 minutes] ÷ 60 minutes = 20,000 hours. A labor rate of \$158.94 is used for an Independent Producer. The

labor rate is applied in the following calculation: [(4,000 Independent Producers × 10 requests) × 30 minutes] ÷ 60 minutes = 20,000 hours. A labor rate of \$158.94 is used for an Independent Producer. The

Federalism Statement

Executive Order 13132 outlines fundamental principles of federalism. It also requires federal agencies to adhere to specific criteria in formulating and implementing policies that have “substantial direct effects” on the states, the relationship between the national government and states, or on the distribution of power and responsibilities among the various levels of government. Federal agencies promulgating regulations that have these federalism implications must consult with State and local officials, and describe the extent of their consultation and the nature of the concerns of State and local officials in the preamble to the final regulation. Notwithstanding this, ERISA section 514 provides, with certain exceptions specifically enumerated, that the provisions of Titles I and IV of ERISA supersede any and all laws of the States as they relate to any employee benefit plan covered under ERISA.

The Department does not intend this exemption to change the scope or effect of ERISA section 514, including the savings clause in ERISA section 514(b)(2)(A) for State regulation of securities, banking, or insurance laws. Ultimately, the Department does not believe this proposed class exemption has federalism implications because it has no substantial direct effect on the States, on the relationship between the National government and the States, or on the distribution of power and responsibilities among the various levels of government.

General Information

The attention of interested persons is directed to the following: (1) The fact that a transaction is the subject of an exemption under ERISA section 408(a) and Code section 4975(c)(2) does not relieve a fiduciary, or other party in interest or disqualified person with respect to a Plan, from certain other provisions of ERISA and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of ERISA section 404 which require, among other things, that a fiduciary act prudently and discharge his or her duties respecting the Plan solely in the interests of the participants and beneficiaries of the Plan. Additionally, the fact that a transaction is the subject of an exemption does not affect the requirement of Code section 401(a) that the Plan must operate for the exclusive benefit of the employees of the employer maintaining the Plan and their

beneficiaries; (2) Before the proposed exemption may be granted under ERISA section 408(a) and Code section 4975(c)(2), the Department must find that it is administratively feasible, in the interests of Plans and their participants and beneficiaries and IRA owners, and protective of the rights of participants and beneficiaries of the Plan and IRA owners; (3) If granted, the proposed exemption is applicable to a particular transaction only if the transaction satisfies the conditions specified in the exemption; and (4) The proposed exemption, if granted, is supplemental to, and not in derogation of, any other provisions of ERISA and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

The Department is proposing the following amendment on its own motion, pursuant to its authority under ERISA section 408(a) and Code section 4975(c)(2) and in accordance with procedures set forth in 29 CFR part 2570, subpart B (76 FR 66637 (October 27, 2011)).⁸³

Proposed Amendment to PTE 84–24

Section I—Retroactive Application

The restrictions of sections 406(a)(1)(A) through (D) and 406(b) of the Act and the taxes imposed by section 4975 of the Code do not apply to any of the transactions described in section III of this exemption in connection with purchases made before November 1, 1977, if the conditions set forth in section IV are met.

Section II—Prospective Application

(a) Except for fiduciaries providing investment advice within the meaning of ERISA section 3(21)(A)(ii) or Code section 4975(e)(3)(B) and regulations thereunder, the restrictions of section 406(a)(1)(A) through (D) and 406(b) of the Act and the taxes imposed by section 4975 of the Code do not apply to any of the transactions described in section III(a)–(f) of this exemption in connection with purchases made after October 31, 1977, if the conditions set forth in sections IV, V and IX are met.

(b) Effective on the date that is 60 days after the publication of a final amendment in the **Federal Register**, the restrictions of ERISA sections

406(a)(1)(D) and 406(b) and the taxes imposed by Code section 4975(a) and (b) by reason of Code sections 4975(c)(1)(E) and (F) for fiduciaries providing investment advice within the meaning of ERISA section 3(21)(A)(ii) or Code section 4975(e)(3)(B) and regulations thereunder will not apply if the fiduciaries are Independent Producers, the transactions meet the requirements described in Section III(g), the conditions set forth in Sections VI, VII and IX are satisfied, and the Independent Producer and Insurer are not ineligible under Section VIII.

Section III—Transactions

(a) The receipt, directly or indirectly, by an insurance agent or broker or a pension consultant of a Mutual Fund Commission or an Insurance Sales Commission from an insurance company in connection with the purchase, with plan assets, of an insurance or annuity contract.

(b) The receipt of a Mutual Fund Commission by a Principal Underwriter for an investment company registered under the Investment Company Act of 1940 (hereinafter referred to as an investment company) in connection with the purchase, with plan assets, of securities issued by an investment company.

(c) The effecting by an insurance agent or broker, pension consultant or investment company Principal Underwriter of a transaction for the purchase, with plan assets, of an insurance or annuity contract or securities issued by an investment company.

(d) The purchase, with plan assets, of an insurance or annuity contract from an insurance company.

(e) The purchase, with plan assets, of an insurance or annuity contract from an insurance company which is a fiduciary or a service provider (or both) with respect to the plan solely by reason of the sponsorship of a Pre-approved Plan.

(f) The purchase, with plan assets, of securities issued by an investment company from, or the sale of such securities to, an investment company or an investment company Principal Underwriter, when such investment company, Principal Underwriter, or the investment company investment adviser is a fiduciary or a service provider (or both) with respect to the plan solely by reason of: (1) the sponsorship of a Pre-approved plan; or (2) the provision of Nondiscretionary Trust Services to the plan; or (3) both (1) and (2).

(g) The receipt, directly or indirectly, by an Independent Producer of an Insurance Sales Commission as a result

⁸³ Reorganization Plan No. 4 of 1978 (5 U.S.C. App. 1 (2018)) generally transferred the authority of the Secretary of the Treasury to grant administrative exemptions under Code section 4975 to the Secretary of Labor.

of the provision of investment advice within the meaning of ERISA section 3(21)(A)(ii) and Code section 4975(e)(3)(B), regarding the purchase of a non-security annuity contract or other insurance product not regulated by the Securities and Exchange Commission (SEC) of an Insurer that is not an Affiliate, including as part of a rollover from a Plan to an IRA as defined in Code section 4975(e)(1)(B) or (C).

Section IV—Conditions With Respect to Transactions Described in Section III(a)–(f)

The following conditions apply solely to a transaction described in Section III(a)–(f):

(a) The transaction is effected by the insurance agent or broker, pension consultant, insurance company or investment company Principal Underwriter in the ordinary course of its business as such a person.

(b) The transaction is on terms at least as favorable to the plan as an arm's-length transaction with an unrelated party would be.

(c) The combined total of all fees, commissions and other consideration received by the insurance agent or broker, pension consultant, insurance company, or investment company Principal Underwriter:

(1) For the provision of services to the plan; and

(2) In connection with the purchase of insurance or annuity contracts or securities issued by an investment company is not in excess of "reasonable compensation" within the contemplation of section 408(b)(2) and 408(c)(2) of the Act and sections 4975(d)(2) and 4975(d)(10) of the Code. If such total is in excess of "reasonable compensation," the "amount involved" for purposes of the civil penalties of section 502(i) of the Act and the excise taxes imposed by section 4975(a) and (b) of the Code is the amount of compensation in excess of "reasonable compensation."

Section V—Conditions for Transactions Described in Section III(a) Through (d)

The following conditions apply solely to a transaction described in subsections (a), (b), (c) or (d) of section III:

(a) The insurance agent or broker, pension consultant, insurance company, or investment company Principal Underwriter is not

(1) a trustee of the plan (other than a Nondiscretionary Trustee who does not render investment advice with respect to any assets of the plan),

(2) a plan administrator (within the meaning of section 3(16)(A) of the Act and section 414(g) of the Code),

(3) a fiduciary who is authorized to manage, acquire, or dispose of the plan's assets on a discretionary basis, or

(4) for transactions described in sections III (a) through (d) entered into after December 31, 1978, an employer any of whose employees are covered by the plan.

Notwithstanding the above, an insurance agent or broker, pension consultant, insurance company, or investment company Principal Underwriter that is affiliated with a trustee or an investment manager (within the meaning of section VI(b)) with respect to a plan may engage in a transaction described in section III(a) through (d) of this exemption on behalf of the plan if such trustee or investment manager has no discretionary authority or control over the plan assets involved in the transaction other than as a Nondiscretionary Trustee.

(b)(1) With respect to a transaction involving the purchase with plan assets of an insurance or annuity contract or the receipt of an Insurance Sales Commission thereon, the insurance agent or broker or pension consultant provides to an independent fiduciary or IRA owner with respect to the plan prior to the execution of the transaction the following information in writing and in a form calculated to be understood by a plan fiduciary who has no special expertise in insurance or investment matters:

(A) If the agent, broker, or consultant is an affiliate of the insurance company whose contract is being recommended, or if the ability of such agent, broker or consultant to recommend insurance or annuity contracts is limited by any agreement with such insurance company, the nature of such affiliation, limitation, or relationship;

(B) The Insurance Sales Commission, expressed as a percentage of gross annual premium payments for the first year and for each of the succeeding renewal years, that will be paid by the insurance company to the agent, broker or consultant in connection with the purchase of the recommended contract; and

(C) For purchases made after June 30, 1979, a description of any charges, fees, discounts, penalties or adjustments which may be imposed under the recommended contract in connection with the purchase, holding, exchange, termination or sale of such contract.

(2) Following the receipt of the information required to be disclosed in subsection (b)(1), and prior to the execution of the transaction, the independent fiduciary or IRA owner acknowledges in writing receipt of such information and approves the

transaction on behalf of the plan. Such fiduciary may be an employer of employees covered by the plan, but may not be an insurance agent or broker, pension consultant or insurance company involved in the transaction. Such fiduciary may not receive, directly or indirectly (e.g., through an Affiliate), any compensation or other consideration for his or her own personal account from any party dealing with the plan in connection with the transaction.

(c)(1) With respect to a transaction involving the purchase with plan assets of securities issued by an investment company or the receipt of a Mutual Fund Commission thereon by an investment company Principal Underwriter, the investment company Principal Underwriter provides to an Independent fiduciary or IRA owner with respect to the plan, prior to the execution of the transaction, the following information in writing and in a form calculated to be understood by a plan fiduciary who has no special expertise in insurance or investment matters:

(A) If the person recommending securities issued by an investment company is the Principal Underwriter of the investment company whose securities are being recommended, the nature of such relationship and of any limitation it places upon the Principal Underwriter's ability to recommend investment company securities;

(B) The Mutual Fund Commission, expressed as a percentage of the dollar amount of the plan's gross payment and of the amount actually invested, that will be received by the Principal Underwriter in connection with the purchase of the recommended securities issued by the investment company; and

(C) For purchases made after December 31, 1978, a description of any charges, fees, discounts, penalties, or adjustments which may be imposed under the recommended securities in connection with the purchase, holding, exchange, termination or sale of such securities.

(2) Following the receipt of the information required to be disclosed in subsection (c)(1), and prior to the execution of the transaction, the independent fiduciary or IRA owner approves the transaction on behalf of the plan. Unless facts or circumstances would indicate the contrary, such approval may be presumed if the fiduciary or IRA owner permits the transaction to proceed after receipt of the written disclosure. Such fiduciary may be an employer of employees covered by the plan, but may not be a Principal Underwriter involved in the

transaction. Such fiduciary may not receive, directly or indirectly (*e.g.*, through an affiliate), any compensation or other consideration for his or her own personal account from any party dealing with the plan in connection with the transaction.

(d) With respect to additional purchases of insurance or annuity contracts or securities issued by an investment company, the written disclosure required under subsections (b) and (c) of this section V need not be repeated, unless—

(1) More than three years have passed since such disclosure was made with respect to the same kind of contract or security, or

(2) The contract or security being recommended for purchase or the commission with respect thereto is materially different from that for which the approval described in subsections (b) and (c) of this section was obtained.

Section VI—Conditions for Transactions Described in Section III(g)

The following conditions apply solely to a transaction described in subsection (g) of section III:

(a) The Independent Producer is authorized to sell annuities from two or more unrelated Insurers.

(b) The Independent Producer and the Insurer satisfy the applicable conditions in Sections VII and IX and are not ineligible under Section VIII. The Insurer will not necessarily become a fiduciary under ERISA or the Code merely by complying with the exemption's conditions.

(c) Exclusions.

The relief in Section III(g) is not available if:

(1) The Plan is covered by Title I of ERISA and the Independent Producer, Insurer, or any Affiliate is:

(A) the employer of employees covered by the Plan, or

(B) the Plan's named fiduciary or administrator; provided however that a named fiduciary or administrator or their Affiliate may rely on the exemption if it is selected to provide investment advice by a fiduciary who:

(i) is not the Insurer, Independent Producer, or an Affiliate;

(ii) does not have a relationship to or an interest in the Insurer, Independent Producer, or any Affiliate that might affect the exercise of the fiduciary's best judgment in connection with transactions covered by the exemption;

(iii) does not receive and is not projected to receive within the current federal income tax year, compensation or other consideration for their own account from the Insurer, Independent Producer, or an Affiliate in excess of

two (2) percent of the fiduciary's annual revenues based upon its prior income tax year; or

(iv) is not the IRA owner or beneficiary; or

(2) The Independent Producer transaction involves the Independent Producer and Insurer acting in a fiduciary capacity other than as an investment advice fiduciary within the meaning of ERISA section 3(21)(A)(ii) and Code section 4975(e)(3)(B).

Section VII—Investment Advice Arrangement

Section VII(a) requires Independent Producers to comply with Impartial Conduct Standards, including a Best Interest standard, when providing fiduciary investment advice to Retirement Investors. Section VII(b) requires Independent Producers to provide to Retirement Investors a written acknowledgement that the Independent Producer is a fiduciary under Title I of ERISA and/or the Code, a written statement of the Best Interest standard of care, a written description of the services they will provide and the products they are licensed and authorized to sell, and a written statement of their material Conflicts of Interest and the amount of the Insurance Commission that will be paid to them in connection with the purchase of the recommended annuity by a Retirement Investor. In addition, before the sale of a recommended annuity, Independent Producers must consider and document their conclusions as to whether the recommended annuity is in the Best Interest of the Retirement Investor. Independent Producers recommending a rollover must also provide additional disclosure as set forth in subsection (b), below. Section VII(c) requires Insurers to adopt policies and procedures prudently designed to ensure compliance with the Impartial Conduct Standards and other conditions of this exemption. Section VII(d) requires the Insurer to conduct a retrospective review, at least annually, that is reasonably designed to detect and prevent violations of, and achieve compliance with, the Impartial Conduct Standards and the terms of this exemption. Section VII(e) allows Independent Producers to correct certain violations of the exemption conditions and maintain relief under the exemption. In complying with this Section VII, the Independent Producer may reasonably rely on factual representations from the Insurer, and Insurers may rely on factual representations from the Independent Producer, as long as they do not have knowledge that such factual

representations are incomplete or inaccurate.

(a) Impartial Conduct Standards

(1) The Independent Producer's investment advice is, at the time it is provided, in the Retirement Investor's Best Interest. As defined in Section X(b), advice is in the Retirement Investor's Best Interest if it (A) reflects the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims, based on the investment objectives, risk tolerance, financial circumstances, and needs of the Retirement Investor, and (B) does not place the financial or other interests of the Independent Producer, Insurer or any Affiliate, Related Entity, or other party ahead of the Retirement Investor's interests, or subordinate the Retirement Investor's interests to those of the Independent Producer, Insurer or any Affiliate, Related Entity, or other party. For example, in choosing between annuity products offered by Insurers, whose products the Independent Producer is authorized to sell, it is not permissible for the Independent Producer to recommend a product that is worse for the Retirement Investor, but better or more profitable for the Independent Producer or the Insurer;

(2) The Independent Producer receives no compensation in connection with the transaction other than the Insurance Sales Commission, and the Insurance Sales Commission does not exceed reasonable compensation within the meaning of ERISA section 408(b)(2) and Code section 4975(d)(2); and

(3) The Independent Producer's statements to the Retirement Investor about the recommended transaction and other relevant matters are not, at the time the statements are made, materially misleading. For purposes of this subsection, the term "materially misleading" includes omitting information that is needed to make the statement not misleading in light of the circumstances under which it was made.

(b) Disclosure

Prior to engaging in a transaction described in Section III(g), the Independent Producer provides the disclosures set forth in paragraphs (1)–(5) to the Retirement Investor:

(1) A written acknowledgment that the Independent Producer is a fiduciary under Title I and the Code, as applicable, with respect to any investment recommendation provided

by the Independent Producer to the Retirement Investor;

(2) A written statement of the Best Interest standard of care owed by the Independent Producer to the Retirement Investor;

(3) A written description of the services to be provided and the Independent Producer's material Conflicts of Interest that is accurate and not misleading in any material respects. The description will include the products the Independent Producer is licensed and authorized to sell. The description must inform the Retirement Investor in writing of any limits on the range of insurance products recommended. The Independent Producer must identify the specific Insurers and specific insurance products available for recommendation.

(4) A written statement of the amount of the Insurance Commission that will be paid to the Independent Producer in connection with the purchase by a Retirement Investor of the recommended annuity. The statement must disclose the amount of expected Insurance Sales Commission, expressed both in dollars and as a percentage of gross annual premium payments, if applicable, for the first year and for each of the succeeding years.

(5) A written statement that the Retirement Investor has the right to obtain specific information regarding costs, fees, and compensation, described in dollar amounts, percentages, formulas, or other means reasonably designed to present materially accurate disclosure of their scope, magnitude, nature with in sufficient detail to permit the Retirement Investor to make an informed judgment about the costs of the transaction and about the significance and severity of the Conflicts of Interest, and describe how the Retirement Investor can get the information, free of charge.

(6) Before the sale of a recommended annuity, the Independent Producer considers and documents its conclusions as to whether the recommended annuity is in the Best Interest of the Retirement Investor and provides that documentation to both the Retirement Investor and to the Insurer;

(7) *Rollover disclosure.* Before engaging in a rollover or making a recommendation to a Plan participant as to the post-rollover investment of assets currently held in a Plan, the Independent Producer must consider and document its conclusions as to whether a rollover is in the Retirement Investor's Best Interest and provide that documentation to both the Retirement Investor and to Insurer. Relevant factors to consider must include to the extent

applicable, but in any event are not limited to:

(A) the alternatives to a rollover, including leaving the money in the Plan, if applicable;

(B) the comparative fees and expenses;

(C) whether an employer or other party pays for some or all administrative expenses; and

(D) the different levels of fiduciary protection, services, and investments available.

(6) Independent Producers and Insurers may rely in good faith on information and assurances from the other entities that are not Affiliates as long as they do not know (or have a reason to know) that such information is incomplete or inaccurate.

(8) The Independent Producer is not required to disclose information pursuant to this Section VII(b) if such disclosure is otherwise prohibited by law.

(c) Policies and Procedures

(1) The Insurer establishes, maintains, and enforces written policies and procedures for the review of each recommendation before an annuity is issued to a Retirement Investor pursuant to an Independent Producer's recommendation that are prudently designed to ensure compliance with the Impartial Conduct Standards and other exemption conditions. The Insurer's prudent review of the Independent Producer's specific recommendations must be made without regard to the Insurer's own interests. An Insurer is not required to supervise an Independent Producer's recommendations to Retirement Investors of products other than annuities offered by the Insurer.

(2) The Insurer's policies and procedures mitigate Conflicts of Interest to the extent that a reasonable person reviewing the policies and procedures and incentive practices as a whole would conclude that they do not create an incentive for the Independent Producer to place its interests, or those of the Insurer, or any Affiliate or Related Entity, ahead of the interests of the Retirement Investor. The Insurer's procedures identify and eliminate quotas, appraisals, performance or personnel actions, bonuses, contests, special awards, differential compensation, or other similar actions or incentives that are intended, or that a reasonable person would conclude are likely, to result in recommendations that are not in the Retirement Investor's Best Interest, or that subordinate the interests of the Retirement Investor to the Independent Producer's own

interests, or those of the Insurer, or to make recommendations based on the Independent Producer's considerations of factors or interests other than the investment objectives, risk tolerance, financial circumstances, and needs of the Retirement Investor.

(3) The Insurer's policies and procedures include a prudent process for determining whether to authorize an Independent Producer to sell the Insurer's annuity contracts to Retirement Investors, and for taking action to protect Retirement Investors from Independent Producers who have failed or are likely to fail to adhere to the Impartial Conduct Standards, or who lack the necessary education, training, or skill. A prudent process includes careful review of customer complaints, disciplinary history, and regulatory actions concerning the Independent Producer, as well as the Insurer's review of the Independent Producer's training, education, and conduct with respect to the Insurer's own products. The Insurer must document the basis for its initial determination that it can rely on the Independent Producer to adhere to the Impartial Conduct Standards, and must review that determination at least annually as part of the retrospective review set forth in subsection (d) below.

(4) Insurers must provide their complete policies and procedures to the Department within 10 business days of request.

(d) Retrospective Review

(1) The Insurer conducts a retrospective review, at least annually, that is reasonably designed to detect and prevent violations of, and achieve compliance with the conditions of the exemption, including the Impartial Conduct Standards, and the policies and procedures governing compliance with the exemption, including the effectiveness of the supervision system, the exceptions found, and corrective action taken or recommended, if any. The retrospective review must also include a review of Independent Producers' rollover recommendations and the required rollover disclosure. As part of this review, the Insurer must prudently determine whether to continue to permit individual Independent Producers to sell the Insurer's annuity contracts to Retirement Investors. Additionally, the Insurer updates the policies and procedures as business, regulatory, and legislative changes and events dictate, and to ensure they remain prudently designed, effective, and compliant with Section VII(c).

(2) The Insurer annually provides a written report to a Senior Executive Officer which details the review.

(3) The Insurer provides to the Independent Producer the methodology and results of the retrospective review;

(4) A Senior Executive Officer of the Insurer certifies, annually, that:

(A) The officer has reviewed the report of the retrospective review report;

(B) The Insurer has filed (or will file timely, including extensions) Form 5330 reporting any non-exempt prohibited transaction discovered by the Insurer in connection with investment advice covered under Code section 4975(e)(3)(B), advised the Independent Producer of the violation and any resulting excise taxes owed under Code section 4975, and notified the Department of Labor of the violation via email to PTE_84-24@dol.gov.

(C) The Insurer has established policies and procedures prudently designed to ensure that Independent Producers achieve compliance with the conditions of this exemption, and has updated and modified the policies and procedures as appropriate after consideration of the findings in the retrospective review report; and

(D) The Insurer has in place a prudent process to modify such policies and procedures as set forth in Section II(d)(1).

(5) The review, report, and certification are completed no later than six months following the end of the period covered by the review.

(6) The Insurer retains the report, certification, and supporting data for a period of six years and makes the report, certification, and supporting data available to the Department, within 10 business days of request, to the extent permitted by law.

(e) Self-Correction

A non-exempt prohibited transaction will not occur due to a violation of the exemption's conditions with respect to a transaction, provided:

(1) Either the Independent Producer has refunded any charge to the Retirement Investor or the Insurer has rescinded a mis-sold annuity, canceling the contract and waiving the surrender charges;

(2) The Independent Producer notifies the Department of Labor of the violation and the refund or rescission via email to PTE_84-24@dol.gov within 30 days of correction;

(3) The correction occurs no later than 90 days after the Independent Producer learned of the violation or reasonably should have learned of the violation; and

(4) The Independent Producer notifies the person(s) at the Insurer responsible for conducting the retrospective review during the applicable review cycle and the violation and correction is specifically set forth in the written report of the retrospective review required under Section VII(d)(2).

Section VIII—Eligibility

(a) Independent Producer

Subject to the timing and scope provisions set forth in subsection (3), and the opportunity to be heard as set forth in subsection (c), an Independent Producer will be ineligible to rely on the relief for transactions described in Section III(g), if within 10 years preceding the transaction, the Independent Producer is described in (1) or (2):

(1) The Independent Producer has been convicted either:

(A) by a U.S. federal or state court as a result of any felony involving abuse or misuse of such person's employee benefit plan position or employment, or position or employment with a labor organization; any felony arising out of the conduct of the business of a broker, dealer, investment adviser, bank, insurance company or fiduciary; income tax evasion; any felony involving larceny, theft, robbery, extortion, forgery, counterfeiting, fraudulent concealment, embezzlement, fraudulent conversion, or misappropriation of funds or securities; conspiracy or attempt to commit any such crimes or a crime in which any of the foregoing crimes is an element; or a crime that is identified or described in ERISA section 411; or

(B) by a foreign court of competent jurisdiction as a result of any crime, however denominated by the laws of the relevant foreign or state government, that is substantially equivalent to an offense described in (A).

For purposes of this section (a)(1), a person shall be deemed to have been convicted of a crime as of the "conviction date," which is the date of the judgment of the trial court (or the date of the judgment of any court in a foreign jurisdiction that is the equivalent of a U.S. federal or state trial court), regardless of whether that judgment remains under appeal.

(2) The Independent Producer has received a written ineligibility notice issued by the Department for:

(A) engaging in a systematic pattern or practice of violating the conditions of this exemption in connection with otherwise non-exempt prohibited transactions;

(B) intentionally violating, or knowingly participating in violations of,

the conditions of this exemption in connection with otherwise non-exempt prohibited transactions;

(C) engaging in a systematic pattern or practice of failing to correct prohibited transactions, report those transactions to the IRS on Form 5330, and pay the resulting excise taxes imposed by Code section 4975 in connection with non-exempt prohibited transactions involving investment advice under Code section 4975(e)(3)(B); or

(D) providing materially misleading information to the Department in connection with the conditions of the exemption.

(3) Ineligibility shall begin six months after:

(A) the conviction date defined in Section (a)(1);

(B) the date of the Department's written determination under Section (c)(1)(C) on a petition regarding a foreign conviction; or

(C) the date of the written ineligibility notice described in subsection (a)(2).

(4) An Independent Producer shall become eligible to rely on this exemption again only upon the earliest of the following:

(A) the date of a subsequent judgment reversing such person's conviction;

(B) 10 years after the person became ineligible under Section VIII(a)(3) or 10 years after the person was released from imprisonment as a result of a crime described in (a)(1) if later; or

(C) the date, if any, the Department grants an individual exemption which may impose additional conditions) to the person permitting its continued reliance on this exemption, notwithstanding the conviction.

(b) Insurers

Subject to the timing and scope provisions set forth in subsection (3), and the opportunity to be heard as set forth in subsection (c), an entity will be ineligible to serve as an Insurer if, within the 10 years preceding the transaction:

(1) The Insurer or the Affiliate has been convicted:

(A) by a U.S. federal or state court of any felony involving abuse or misuse of such person's employee benefit plan position or employment, or position or employment with a labor organization; any felony arising out of the conduct of the business of a broker, dealer, investment adviser, bank, insurance company or fiduciary; income tax evasion; any felony involving the larceny, theft, robbery, extortion, forgery, counterfeiting, fraudulent concealment, embezzlement, fraudulent conversion, or misappropriation of funds or securities; conspiracy or

attempt to commit any such crimes or a crime in which any of the foregoing crimes is an element; or a crime that is identified or described in ERISA section 411; or

(B) by a foreign court of competent jurisdiction as a result of any crime, however denominated by the laws of the relevant foreign or state government, that is substantially equivalent to an offense described in (A).

For purposes of this Section (b)(1), a person shall be deemed to have been convicted of a crime as of the “conviction date,” which is the date of the judgment of the trial court (or the date of the judgment of any court in a foreign jurisdiction that is the equivalent of a U.S. federal or state trial court), regardless of whether that judgment remains under appeal.

(2) The Insurer or an Affiliate has received a written ineligibility notice issued by the Department for:

(A) engaging in a systematic pattern or practice of violating the conditions of this exemption in connection with otherwise non-exempt prohibited transactions;

(B) intentionally violating, or knowingly participating in violation of, the conditions of this exemption in connection with otherwise non-exempt prohibited transactions; or

(C) providing materially misleading information to the Department in connection with the conditions of the exemption.

(3) Ineligibility shall begin six months after:

(A) the conviction date as defined in Section (b)(1);

(B) the Department’s written determination under Section (c)(1)(C) for a petition regarding a foreign conviction; or

(C) the date of the written ineligibility notice described in subsection (b)(2) above.

(4) An entity shall become eligible to act as an Insurer under this exemption again only upon the earliest of the following:

(A) the date of a subsequent judgment reversing such person’s conviction;

(B) 10 years after the person became ineligible under Section VIII(b)(3) or 10 years after the person was released from imprisonment as a result of a crime described in (b)(1), if later; or

(C) the date, if any, the Department grants an individual exemption (which may impose additional conditions) to the person permitting its continued reliance on this exemption, notwithstanding the conviction.

(c) Opportunity To Be Heard

(1) *Foreign Convictions.*

(A) An Insurer, its Affiliate, or an Independent Producer that has been convicted by a foreign court of competent jurisdiction as provided in subsection (a)(1)(B) or (b)(1)(B), as applicable, may submit a petition to the Department that informs the Department of the conviction and seeks the Department’s determination that continued reliance on the exemption would not be contrary to the purposes of the exemption. Petitions must be submitted to the Department within 10 business days after the conviction date by email at IIAWR@dol.gov.

(B) Following receipt of the petition, the Department will provide the Insurer or Independent Producer with the opportunity to be heard, in person (including by phone or videoconference), in writing, or a combination thereof. The opportunity to be heard will be limited to one conference unless the Department determines in its sole discretion to allow additional conferences.

(C) Following the hearing, the Department will issue a written determination to the Insurer or Independent Producer, as applicable, articulating the basis for its determination whether or not to allow the Insurer or Independent Producer to continue relying on PTE 84–24.

(2) *Written Ineligibility Notice.* Prior to issuing a written ineligibility notice, the Department will issue a written warning to the Independent Producer or Insurer, as applicable, identifying specific conduct implicating subsection (a)(2) or (b)(2), as applicable, and providing a six-month opportunity to cure. At the end of the six-month period, if the Department determines that the Independent Producer or Insurer has not taken appropriate action to prevent recurrence of the disqualifying conduct, it will provide the Independent Producer or Insurer with the opportunity to be heard, in person (including by phone or videoconference), or in writing, or a combination thereof, before the Department issues the written ineligibility notice. The opportunity to be heard will be limited to one conference unless the Department determines in its sole discretion to allow additional conferences. The written ineligibility notice will state the basis for the determination that the Independent Producer or Insurer engaged in conduct described in subsection (a)(2) or (b)(2), as applicable, and has not taken appropriate action to prevent recurrence of the disqualifying conduct.

(3) *Department’s Considerations.* For hearings under (c)(1) and (c)(2), the

Department will consider: the gravity of the offense; the degree to which the underlying conduct concerned individual misconduct, or, alternately, corporate managers or policy; recency of the conduct at issue; any remedial measures taken; and other factors the Department determines in its discretion are reasonable in light of the nature and purposes of the exemption.

(d) Alternative Exemptions

An Insurer or Independent Producer that is ineligible to rely on this exemption may rely on a statutory or separate administrative prohibited transaction exemption if one is available or seek an individual prohibited transaction exemption from the Department. To the extent an applicant seeks retroactive relief in connection with an exemption application, the Department will consider the application in accordance with its retroactive exemption policy as set forth in 29 CFR 2570.35(d). The Department may require additional prospective compliance conditions as a condition of retroactive relief.

Section IX—Recordkeeping

(a) The insurance agent or broker (or the insurance company whose contract is being described if designated by the agent or broker), pension consultant or investment company Principal Underwriter, Independent Producer or Insurer must maintain the records necessary to enable the persons described in subsection (a)(2) below to determine whether the conditions of this exemption have been met with respect to a transaction for a period of six years from the date of the transaction in a manner that is reasonably accessible for examination. No prohibited transaction will be considered to have occurred solely on the basis of the unavailability of such records if they are lost or destroyed due to circumstances beyond the control of the responsible party before the end of the six-year period.

(1) No party, other than the party responsible for complying with this section IX, will be subject to the civil penalty that may be assessed under ERISA section 502(i) or the excise tax imposed by Code section 4975(a) and (b), if applicable, if the records are not maintained or available for examination as required by this section IX.

(2) Except as provided in subsection (3), and notwithstanding any provisions of ERISA section 504(a)(2) and (b), the records are reasonably available at their customary location during normal business hours for examination by:

(A) Any authorized employee of the Department or the Internal Revenue Service or another state or federal regulator;

(B) Any fiduciary of a Plan that engaged in a transaction pursuant to this exemption;

(C) Any contributing employer and any employee organization whose members are covered by a Plan that engaged in a transaction pursuant to this exemption; or

(D) Any participant or beneficiary of a Plan or beneficial owner of an IRA acting on behalf of the IRA that engaged in a transaction pursuant to this exemption.

(3) None of the persons described in subsection (2)(B)–(D) above are authorized to examine records regarding a transaction involving another Retirement Investor, privileged trade secrets or privileged commercial or financial information of the Insurer, or information identifying other individuals.

(4) If a party refuses to disclose information to a person described in subsection (2)(B)–(D) above on the basis that the information is exempt from disclosure, the party must provide a written notice advising the requestor of the reasons for its refusal and that the Department may request that such information be produced to the Department by the end of the thirtieth (30th) day following the request.

(b) A party's failure to maintain the records necessary to determine whether the conditions of this exemption have been met will result in the loss of the exemption only for the transaction or transactions for which records are missing or have not been maintained. Such failure does not affect the relief for other transactions if the responsible party maintains required records for such transactions in compliance with this section IV.

Section X—Definitions

For purposes of this exemption, the terms “insurance agent or broker,” “pension consultant,” “insurance company,” “investment company,” and “Principal Underwriter” mean such persons and any Affiliates thereof. In addition, for purposes of this exemption:

(a) “Affiliate” of a person means:

(1) Any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with the person (For this purpose, “control” would mean the power to exercise a controlling influence over the management or policies of a person other than an individual);

(2) Any officer, director, partner, employee, or relative (as defined in ERISA section 3(15)), of the person; and

(3) Any corporation or partnership of which the person is an officer, director, or partner.

(b) Advice is in a Retirement Investor's “Best Interest” if such advice (A) reflects the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims, based on the investment objectives, risk tolerance, financial circumstances, and needs of the Retirement Investor, and (B) does not place the financial or other interests of the Independent Producer, Insurer or any Affiliate, Related Entity, or other party ahead of the interests of the Retirement Investor, or subordinate the Retirement Investor's interests to those of the Independent Producer, Insurer or any Affiliate, Related Entity, or other party.

(c) A “Conflict of Interest” is an interest that might incline an Independent Producer—consciously or unconsciously—to make a recommendation that is not in the Best Interest of the Retirement Investor.

(d) “Independent Producer” means a person or entity that is licensed under the laws of a state to sell, solicit or negotiate insurance contracts, including annuities, and that sells to Retirement Investors products of multiple unaffiliated insurance companies but is not an employee of an insurance company (including a statutory employee under Code section 3121).

(e) “Individual Retirement Account” or “IRA” means any plan that is an account or annuity described in Code section 4975(e)(1)(B) through (F).

(f) “Insurer” means an insurance company qualified to do business under the laws of a state, that: (A) has obtained a Certificate of Authority from the insurance commissioner of its domiciliary state which has neither been revoked nor suspended; (B) has undergone and shall continue to undergo an examination by an independent certified public accountant for its last completed taxable year or has undergone a financial examination (within the meaning of the law of its domiciliary state) by the state's insurance commissioner within the preceding five years, (C) is domiciled in a state whose law requires that an actuarial review of reserves be conducted annually and reported to the appropriate regulatory authority; (D) is not disqualified or barred from making investment recommendations by any

insurance, banking, or securities law or regulatory authority (including any self-regulatory organization), that retains the Independent Producer as an independent contractor, agent or registered representative.

(g) “Insurance Sales Commission” means a sales commission paid by the Insurance Company or an Affiliate to the Independent Producer for the service of recommending and/or effecting the purchase or sale of an insurance or annuity contract, including renewal fees and trailing fees, but excluding revenue sharing payments, administrative fees or marketing payments, payments from parties other than the Insurance Company or its Affiliates, or any other similar fees.

(h) The term “Mutual Fund Commission” means a commission or sales load paid by either the Plan or the investment company for the service of effecting or executing the purchase of investment company securities, but does not include a 12b–1 fee, revenue sharing payment, administrative fee, or marketing fee.

(i) The term “Nondiscretionary Trust Services” means custodial services, services ancillary to custodial services, none of which services are discretionary, duties imposed by any provisions of the Code, and services performed pursuant to directions in accordance with ERISA section 403(a)(1).

(j) The term “Nondiscretionary Trustee” of a plan means a trustee whose powers and duties with respect to the plan are limited to the provision of Nondiscretionary Trust Services. For purposes of this exemption, a person who is otherwise a Nondiscretionary Trustee will not fail to be a Nondiscretionary Trustee solely by reason of his having been delegated, by the sponsor of a Pre-approved Plan, the power to amend such plan.

(k) “Plan” means any employee benefit plan described in ERISA section 3(3) and any plan described in Code section 4975(e)(1)(A).

(l) The term “Pre-approved Plan” means a plan which is approved by the Internal Revenue Service pursuant to the procedure described in Rev. Proc. 2017–44, 2017–29 I.R.B. 92, or its successors.

(m) A “Principal Underwriter” means a principal underwriter as that term is defined in section 2(a)(29) of the Investment Company Act of 1940 (15 U.S.C. 80a–2(a)(29)).

(n) A “Related Entity” is any party that is not an Affiliate, but in which the Independent Producer has an interest that may affect the exercise of its best judgment as a fiduciary.

(o) “Retirement Investor” means:

(1) A participant or beneficiary of a Plan with authority to direct the investment of assets in their account or to take a distribution;

(2) The beneficial owner of an IRA acting on behalf of the IRA; or

(3) A fiduciary acting on behalf of a Plan or an IRA.

(p) A “Senior Executive Officer” is any of the following: the chief compliance officer, the chief executive officer, president, chief financial officer, or one of the three most senior officers of the Insurer.

Signed at Washington, DC, this 24th day of October, 2023.

Lisa M. Gomez,

Assistant Secretary, Employee Benefits Security Administration, U.S. Department of Labor.

[Application No. D–12094]

ZRIN 1210–ZA34

Proposed Amendment to Prohibited Transaction Exemptions 75–1, 77–4, 80–83, 83–1, and 86–128

AGENCY: Employee Benefits Security Administration (EBSA), U.S. Department of Labor.

ACTION: Notice of Proposed Amendment to Prohibited Transaction Exemptions 75–1, 77–4, 80–83, 83–1, and 86–128.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of proposed amendments to Prohibited Transaction Exemptions (PTEs) 75–1, 77–4, 80–83, 83–1, and 86–128, exemptions from certain prohibited transaction provisions of the Employee Retirement Income Security Act of 1974 (ERISA) and the Internal Revenue Code of 1986 (the Code). The amendments would affect participants and beneficiaries of plans, IRA owners, and certain fiduciaries of plans and IRAs.

DATES: *Public Comments.* Comments are due on or before January 2, 2024.

Public Hearing. The Department anticipates holding a public hearing approximately 45 days following the date of publication in the **Federal Register**. Specific information regarding the date, location, and submission of requests to testify will be published in a notice in the **Federal Register**.

Applicability Date. The Department proposes to make the final amendment effective 60 days after it is published in the **Federal Register**.

ADDRESSES: All written comments concerning the proposed amendments should be sent to the Employee Benefits Security Administration, Office of Exemption Determinations, U.S. Department of Labor through the Federal eRulemaking Portal and identified by Application No. D–12094: *Federal eRulemaking Portal:* <https://www.regulations.gov>. at Follow the instructions for submitting comments.

Docket: For access to the docket to read background documents, including the plain-language summary of the proposal of not more than 100 words in length required by the Providing Accountability Through Transparency Act of 2023, or comments, go to the Federal eRulemaking Portal at <https://www.regulations.gov>.

See **SUPPLEMENTARY INFORMATION** below for additional information regarding comments.

FOR FURTHER INFORMATION CONTACT: Susan Wilker, telephone (202) 693–8540, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor (these are not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Comment Instructions

Warning: All comments received will be included in the public record without change and will be made available online at <https://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be confidential or other information whose disclosure is restricted by statute. If you submit a comment, EBSA recommends that you include your name and other contact information, but DO NOT submit information that you consider to be confidential, or otherwise protected (such as Social Security number or an unlisted phone number), or confidential business information that you do not want publicly disclosed. However, if EBSA cannot read your comment due to technical difficulties and cannot contact you for clarification, EBSA might not be able to consider your comment. Additionally, the <https://www.regulations.gov> website is an “anonymous access” system, which means EBSA will not know your identity or contact information unless you provide it. If you send an email directly to EBSA without going through <https://www.regulations.gov>, your email

address will be automatically captured and included as part of the comment that is placed in the public record and made available on the internet.

Background

As described elsewhere in this edition of the **Federal Register**, the Department is proposing to amend the regulation defining when a person renders “investment advice for a fee or other compensation, direct or indirect” with respect to any moneys or other property of an employee benefit plan, for purposes of the definition of a “fiduciary” in section 3(21)(A)(ii) of the Employee Retirement Income Security Act of 1974 (ERISA or the Act) and in section 4975(e)(3)(B) of the Internal Revenue Code (Code). The Department is also proposing, elsewhere in this edition of the **Federal Register**, to amend prohibited transaction exemption (PTE) 2020–02 to provide additional clarity for advice fiduciaries and additional protections for plans and investors and PTE 84–24 to address specific issues that financial institutions face complying with the conditions of PTE 2020–02 when distributing annuities through independent agents.

The Department is hereby proposing amendments to existing PTEs 75–1, 77–4, 80–83, 83–1, and 86–128 that currently provide relief for investment advice fiduciaries to receive compensation when plans and IRAs enter into certain transactions recommended by the fiduciaries as well as certain related transactions. The ERISA and Code provisions at issue generally prohibit fiduciaries with respect to employee benefit plans and individual retirement accounts (IRAs) from engaging in self-dealing in connection with transactions involving these plans and IRAs. The proposed amendments would remove fiduciary investment advice, as defined under ERISA and in a proposed regulation issued by the Department that is found elsewhere in this issue of the **Federal Register**, from the covered transactions in each exemption and make certain other administrative changes. The Department is proposing these amendments on its own motion, pursuant to its authority under ERISA section 408(a) and Code section 4975(c)(2) and in accordance with procedures set forth in 29 CFR part 2570, subpart B (76 FR 66637 (October 27, 2011)).¹

¹ Reorganization Plan No. 4 of 1978 (5 U.S.C. App. 1 (2018)) generally transferred the authority of the Secretary of the Treasury to grant administrative exemptions under Code section 4975 to the Secretary of Labor.

Current PTEs 75–1, 77–4, 80–83, 83–1, and 86–128

PTEs 75–1, 77–4, 80–83, 83–1, and 86–128 currently provide investment advice fiduciaries with relief for the following transactions:

PTE 75–1² provides an exemption for broker-dealers, reporting dealers, and banks to engage in certain classes of transactions with employee benefit plans and IRAs. The exemption has five parts:³

- Part I provides relief for agency transactions and services;⁴
- Part II(1) permits the purchase or sale of a security between an employee benefit plan or IRA and a broker-dealer registered under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*), a reporting dealer who makes primary markets in securities of the United States Government or of any agency of the United States Government and reports daily to the Federal Reserve Bank of New York its positions with respect to Government securities and borrowings thereon, or a bank supervised by the United States or a State. The exemption provided in Part II(1) does not extend to the fiduciary self-dealing and conflicts of interest prohibitions of ERISA and the Code;
- Part II(2) contains a special exemption for mutual fund purchases (the mutual fund exemption) between fiduciaries and plans or IRAs. Although it does provide relief for fiduciary self-dealing and conflicts of interest, the mutual fund exemption is only available if the fiduciary who decides on behalf of the plan or IRA to enter into the transaction is not a principal underwriter for, or affiliated with, the mutual fund;
- Part III permits a fiduciary to cause a plan or IRA to purchase securities from a member of an underwriting syndicate other than the fiduciary itself when the fiduciary is also a member of the syndicate;
- Part IV permits a plan or IRA to purchase securities in a principal transaction from a fiduciary that is a market maker with respect to such securities; and
- Part V permits the extension of credit to a plan or IRA by a broker-dealer in connection with the purchase or sale of securities;

² Exemptions from Prohibitions Respecting Certain Classes of Transactions Involving Employee Benefit Plans and Certain Broker-Dealers, Reporting Dealers and Banks, 40 FR 50845 (Oct. 31, 1975), as amended at 71 FR 5883 (Feb. 3, 2006).

³ 71 FR 5883 (Feb. 3, 2006).

⁴ Part I(a) expired on May 1, 1978. It ultimately was replaced by PTE 86–128 (51 FR 41686 (Nov. 18, 1986)).

PTE 77–4⁵ provides relief for a plan's or IRA's purchase or sale of open-end investment company shares where the investment adviser for the open-end investment company is also a fiduciary to the plan or IRA;

PTE 80–83⁶ provides relief for a fiduciary causing a plan or IRA to purchase a security when the proceeds of the securities issuance may be used by the issuer to retire or reduce indebtedness to the fiduciary or an affiliate;

PTE 83–1⁷ provides relief for the sale of certificates in an initial issuance of certificates by the sponsor of a mortgage pool to a plan or IRA when the sponsor, trustee, or insurer of the mortgage pool is a fiduciary with respect to the plan or IRA assets invested in such certificates; and

PTE 86–128⁸ provides an exemption for certain types of fiduciaries to use their authority to cause a plan or IRA to pay a fee to the fiduciary, or its affiliate, for effecting or executing securities transactions as agent for the plan. The exemption further provides relief for these types of fiduciaries to act as agent in an “agency cross transaction” for both a plan or IRA and one or more other parties to the transaction, and for such fiduciaries or their affiliates to receive fees from the other party(ies) in connection with the agency cross transaction. An agency cross transaction is defined in the exemption as a securities transaction in which the same person acts as agent for both any seller and any buyer for the purchase or sale of a security.

Other Advice Exemptions**PTE 2020–02**

PTE 2020–02⁹ permits investment advice fiduciaries to receive compensation as a result of their advice, including as a result of advice to roll over assets from an employee benefit plan to an IRA, and to engage in certain principal transactions and was designed to promote investment advice that is in

the best interest of retirement investors (e.g., plan participants and beneficiaries, and IRA owners). The exemption's conditions emphasize mitigating conflicts of interest and ensuring that retirement investors receive advice that is prudent and loyal. An important objective of the exemption is to require fiduciary investment advice providers to adhere to stringent standards that are designed to ensure that their investment recommendations reflect the best interest of plan and IRA investors. Accordingly, financial institutions and investment professionals relying on PTE 2020–02 must: (i) acknowledge their fiduciary status in writing; (ii) disclose their services and material conflicts of interest; and adhere to impartial conduct standards; (iii) adopt policies and procedures prudently designed to ensure compliance with the impartial conduct standards and mitigate conflicts of interest that could otherwise cause violations of those standards; (iii) document and disclose the specific reasons that any rollover recommendations are in the retirement investor's best interest; (iv) and conduct an annual retrospective compliance review.

The Department is proposing an amendment to PTE 2020–02 that is published separately in this edition of the **Federal Register**. The proposed amendment to PTE 2020–02 would build on these existing conditions to provide more protections for retirement investors receiving advice and more certainty for financial institutions and investment professionals complying with the exemption's conditions. In this regard, among other things, the Department is proposing additional disclosures to ensure that retirement investors have sufficient information to make informed decisions about the costs of the investment advice transaction and about the significance and severity of the investment advice fiduciary conflicts of interest. The proposed amendment also would provide more guidance for financial institutions and investment professionals complying with the impartial conduct standards and implementing the policies and procedures requirement. As discussed in detail in the preamble to the amendment, these additional conditions would provide important protections to retirement investors by enhancing the existing protections of PTE 2020–02.

⁵ Class Exemption for Certain Transactions Between Investment Companies and Employee Benefit Plans, 42 FR 18732 (Apr. 8, 1977).

⁶ Class Exemption for Certain Transactions Involving Purchase of Securities Where Issuer May Use Proceeds to Reduce or Retire Indebtedness to Parties in Interest, 45 FR 73189 (Nov. 4, 1980), as amended at 67 FR 9483 (March 1, 2002).

⁷ Class Exemption for Certain Transactions Involving Mortgage Pool Investment Trusts, 48 FR 895 (Jan. 7, 1984), as amended at 67 FR 9483 (March 1, 2002).

⁸ Class Exemption for Securities Transactions Involving Employee Benefit Plans and Broker-Dealers, 51 FR 41686 (November 18, 1986), as amended at 67 FR 64137 (October 17, 2002).

⁹ Prohibited Transaction Exemption 2020–02, Improving Investment Advice for Workers & Retirees 85 FR 82798 (Dec. 18, 2020).

PTE 84–24

PTE 84–24¹⁰ provides exemptive relief for certain prohibited transactions that occur when plans or IRAs purchase insurance and annuity contracts and shares in an investment company registered under the Investment Company Act of 1940 (a mutual fund). The exemption permits insurance agents, insurance brokers and pension consultants that are parties in interest or fiduciaries with respect to plans and IRAs to effect the purchase of the insurance or annuity contracts for the plans or IRAs and receive a commission on the sale. The exemption also is available for the prohibited transaction that occurs when the insurance company selling the insurance or annuity contract is a party in interest or disqualified person with respect to the plan or IRA. Likewise, with respect to mutual fund transactions, PTE 84–24 permits mutual fund principal underwriters that are parties in interest or fiduciaries to effect the sale of mutual fund shares to plans or IRAs and receive a commission on the transaction.

The Department is proposing an amendment to PTE 84–24 that is published separately in this edition of the **Federal Register** that would provide an alternative exemption for independent insurance agents to receive insurance commissions in connection with recommendations of annuity products if certain conditions are met that are similar to the conditions contained in PTE 2020–02. These conditions are tailored to protect retirement investors from the specific conflicts of interest that arise when independent insurance agents are compensated through insurance commissions. Additionally, the amendment would exclude investment advice fiduciaries from the existing relief provided in the current Section II of PTE 84–24, add a new eligibility provision for investment advice transactions, and amend the current recordkeeping condition to be similar to the recordkeeping provision in PTE 2020–02.

Description of Proposed Amendments to PTEs 75–1, 77–4, 80–83, 83–1, and 86–128

Providing for a single standard of care (which is currently found in PTE 2020–02) that would apply universally to all fiduciary investment advice, regardless of the specific type of product or advice provider, will provide greater protection for retirement investors and create a level playing field among investment

advice providers. Therefore, to ensure a universal standard of care for the provision of investment advice that is based on the conditions of PTE 2020–02, the Department is proposing to amend PTEs 75–1 Parts III & IV, 77–4, 80–83, 83–1, and 86–128 to include the following statement: “*Exception.* No relief from the restrictions of ERISA section 406(b) and the taxes imposed by Code section 4975(a) and (b) by reason of Code sections 4975(c)(1)(E) and (F) is available for fiduciaries providing investment advice within the meaning of ERISA section 3(21)(A)(ii) or Code section 4975(e)(3)(B) and regulations thereunder.”

As a result of this amendment, investment advice fiduciaries would instead rely on the amended PTE 2020–02 for exemptive relief for covered investment advice transactions. By providing exemptive relief for fiduciary investment advice transactions under one exemption, PTE 2020–02, retirement investors would receive consistent protections when receiving investment advice from investment professionals such that a level playing regulatory playing field would apply regardless of the investment product the advisor recommends. The Department requests comment on this proposed change.

In addition to removing exemptive relief for investment advice transactions, the Department also is proposing certain administrative amendments to these exemptions, which are discussed below.

Amendments to PTE 75–1

The Department is proposing to revoke parts of PTE 75–1, which was granted shortly after ERISA’s passage to provide certainty to the securities industry over the nature and extent to which ordinary and customary transactions between broker-dealers and plans or IRAs would be subject to ERISA’s prohibited transaction rules.

PTE 75–1 Part I

PTE 75–1, Part I, paragraphs (b) and (c) provide exemptive relief for certain non-fiduciary services provided by broker-dealers in securities transactions. Code section 4975(d)(2), ERISA section 408(b)(2) and regulations thereunder, have clarified the scope of relief for service providers to plans and IRAs.¹¹ The Department believes that the relief provided in Parts I(b) and I(c) of PTE 75–1 duplicates the relief available under the statutory exemptions at Code

section 4975(d)(2) and ERISA section 408(b)(2). Therefore, the Department is proposing to revoke paragraphs (b) and (c) of Part I, and requests comments on this proposed revocation.

PTE 75–1, Part II

PTE 75–1, Part II(2), contains a special exemption for mutual fund purchases (the mutual fund exemption) between fiduciaries and plans or IRAs subject to minimal safeguards for retirement investors. The conditions of the exemption require a fiduciary to customarily purchase and sell securities for its own account in the ordinary course of its business, the transaction to occur on terms at least as favorable to the plan as an arm’s length transaction with an unrelated party, and records to be maintained.

The Department is proposing to revoke PTE 75–1, Part II(2), because it has determined that it is not protective of retirement investors and has been broadly interpreted beyond the Department’s intention when it was issued.¹² The transactions that have been covered by PTE 75–1 Part II(2) are largely now covered by newer, more protective exemptions, and fiduciaries providing investment advice on the purchase or sale of a mutual fund security can rely on PTE 2020–02. Moreover, fiduciaries providing investment management on the purchase or sale of a mutual fund security can receive non-commission compensation under PTE 77–4. The Department requests comment on this proposed revocation, and also on how the remaining parts of PTE 75–1 Part II will be used.

The Department is further proposing to revise the recordkeeping provisions of Section (e) of PTE 75–1, Part II. Section (e) currently provides that records demonstrating compliance with the exemption must be maintained by the plan or IRA involved in the transaction. The proposed amendment would place the responsibility for maintaining such records on the broker-dealer, reporting dealer, or bank engaging in the transaction with such plan or IRA. The proposed amendment also would provide that parties relying on the exemption do not have to disclose trade secrets or other confidential information to members of the public (*i.e.*, plan fiduciaries, contributing employers or employee organizations whose members are covered by the plan, participants and beneficiaries and IRA owners), but that in the event a party refuses to disclose information on this basis, it must

¹⁰ 49 FR 13208 (April 3, 1983), as amended at 71 FR 5887 (Feb. 3, 2006).

¹¹ See 29 CFR 2550.408b–2; 42 FR 32390 (June 24, 1977); Reasonable Contract or Arrangement under Section 408(b)(2)—Fee Disclosure, Final Rule, 77 FR 5632 (Feb. 3, 2012).

¹² 81 FR 21181, 21199 (Apr. 8, 2016).

provide a written notice to the requester advising it of the reasons for the refusal and that the Department may request such information on the requester's behalf.

The Department requests comment regarding whether fiduciaries providing discretionary investment management services on the purchase or sale of a mutual fund security in a principal transaction need the relief that is provided by PTE 75–1, Part II(2), and, if so, what conditions would be appropriate.

Part 75–1, Part V

PTE 75–1, Part V permits a broker-dealer to extend credit to a plan or IRA in connection with the purchase or sale of securities. It originally did not permit the receipt of compensation for an extension of credit by broker-dealers that are fiduciaries with respect to the assets involved in the transaction. In 2016, the Department amended this exemption to allow investment advice fiduciaries to receive compensation when they extend credit to plans and IRAs to avoid a failed securities transaction. As a condition of the amendment, the failure of the purchase or sale of the securities could not have been caused by the fiduciary or an affiliate. The Department also added a definition of the term “IRA” as any account or annuity described in Code section 4975(e)(1)(B) through (F), including, for example, an individual retirement account described in section 408(a) of the Code and a health savings account described in section 223(d) of the Code.¹³ The amendment also revised the recordkeeping provisions of PTE 75–1, Part V, to require the broker-dealer engaging in the covered transaction, as opposed to the plan or IRA, to maintain the records. The Department is proposing to make these amendments to PTE 75–1 Part V as it did in 2016.

PTE 86–128

The Department is proposing certain administrative changes to PTE 86–128, which are not directly related to the provision of fiduciary investment advice. As it did in 2016, the Department is proposing to delete Section IV(a), which provides an

exclusion from the conditions of the exemption for certain plans not covering employees, including IRAs, to increase the safeguards available to these retirement investors. Therefore, investment advice fiduciaries to IRAs would have to rely on another exemption, such as PTE 2020–02. Fiduciaries that exercise full discretionary authority or control with respect to IRAs could continue to rely on PTE 86–128, as long as they comply with all of the exemption's conditions.

The Department is also proposing certain technical changes to the exemption, including deleting subsection IV(b)(1), and redesignating remaining sections as needed. The language currently in Section IV(b)(1) excludes investment advice providers; however, investment advice providers would be excluded from the exemption as a whole; therefore, the exclusion does not need to be repeated in Section IV. As a result of the deletion of Section IV(a) and IV(b)(1), the Department is redesignating subsections IV(b)(2) and (3) as subsections IV(a)(1) and (2), respectively, and Section IV(c) as Section IV(b).

The Department is proposing to revise the new Section IV(b) to read: “Recapture of profits. Sections III(a) and III(i) of this exemption do not apply in cases where the person engaging in a covered transaction returns or credits to the plan all profits earned by that person in connection with the securities transactions associated with the covered transaction.” Discretionary trustees were first permitted to rely on PTE 86–128 without meeting the “recapture of profits” provision pursuant to an amendment made in 2002 (2002 Amendment). To effect this change, the 2002 Amendment revised Section III(a), which had provided that “[t]he person engaging in the covered transaction [may not be] a trustee (other than a nondiscretionary trustee), or an administrator of the plan, or an employer any of whose employees are covered by the plan.” Under the amendment, the reference to “trustee (other than a nondiscretionary trustee)” was deleted from Section III(a), and discretionary trustees had to satisfy certain additional conditions set forth in Section III(h) and (i) to rely on the exemption. Section III(h) provides that discretionary trustees may engage in the covered transactions only with plans or IRAs with total net assets of at least \$50 million,¹⁴ and Section III(i) requires discretionary trustees to provide

additional disclosures. The Department understands that after the 2002 Amendment, practitioners had questions regarding whether discretionary trustees were permitted to rely on the “recapture of profits” provision, which allows persons identified in Section III(a) to engage in the covered transactions if they return or credit to the plan or IRA all profits, as an alternative to complying with Sections III(h) and (i). By deleting the reference to discretionary trustees from Section III(a), the Department believes that the 2002 Amendment inadvertently may have prevented trustees of plans or IRAs from using the recapture of profits approach, and instead, has limited the exemption to trustees that satisfy Section III(h) and (i). This result was not intended, therefore, the Department is proposing to modify the exemption to permit all trustees, regardless of associated plan or IRA size, to utilize the recapture of profits exception as they originally were permitted to do in PTE 86–128.

In order to achieve this result, the Department has proposed an amendment to section IV(c) providing that Sections III(a) and III(i) do not apply in any case where the person engaging in the covered transaction returns or credits to the plan or IRA all profits earned by that person in connection with the securities transaction associated with the covered transaction. In addition, the Department proposes to reinsert a reference to trustees (other than nondiscretionary trustees) in Section III(a) along with the existing references to plan administrators and employers. Finally, the Department is proposing to add a sentence to the end of Section III(a) stating: “Notwithstanding the foregoing, this condition does not apply to a trustee that satisfies Section III(h) and (i).” The purpose of these proposed amendments is to clarify that trustees may engage in covered transactions subject to the recapture of profits limitations in Section V(b) of the exemption.

The Department is not proposing to amend PTE 86–128 to include mutual fund principal transactions that are currently covered in PTE 75–1 Part II(2). The Department previously made such a change in 2016 to allow both investment advice and investment discretion mutual fund principal fund transactions to rely on an amended PTE 86–128. However, the Department now believes other exemptions, including PTE 2020–02, provide sufficient relief for these types of transactions and enhanced protection for retirement investors.

¹³ The Department has previously determined, after consulting with the Internal Revenue Service (the IRS), that plans described in 4975(e)(1) of the Code are included within the scope of relief provided by PTE 75–1 because it was issued jointly by the Department and the IRS. See PTE 2002–13, 67 FR 9483 (Mar. 1, 2002) (preamble discussion). For simplicity and consistency with the other new exemptions and amendments to other existing exemptions published elsewhere in this issue of the *Federal Register*, the Department has adopted this specific definition of IRA.

¹⁴ Special rules apply under Section III(h) for pooled funds and groups of plans maintained by a single employer or controlled group of employers.

Lastly, the Department is proposing to add a new Section VII to PTE 86–128 that would require the fiduciary engaging in a transaction covered by the exemption to maintain records necessary to enable certain persons (described in proposed Section VII(b)) to determine whether the conditions of this exemption have been met. The proposed recordkeeping requirement is consistent with the recordkeeping provisions contained in other existing class exemptions as well as the recordkeeping provisions of proposed amendments to PTEs 84–24 and 2020–02, which are published separately in this issue of the **Federal Register**.

Executive Order 12866 and 13563 Statement

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects; distributive impacts; and equity). Executive Order 13563 emphasizes the importance of quantifying costs and benefits, reducing costs, harmonizing rules, and promoting flexibility.

Under Executive Order 12866, as amended by Executive Order 14094, “significant” regulatory actions are subject to review by the Office of Management and Budget (OMB). Section 3(f) of the Executive order defines a “significant regulatory action” as an action that is likely to result in a rule (1) having an annual effect on the economy of \$200 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or communities; (2) creating a serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising legal or policy issues for which centralized review would meaningfully further the President’s priorities or the principles set forth in the Executive order. It has been determined that this proposal is “significant regulatory action” within the scope of section 3(f)(1) of the Executive order. Therefore, the Department has provided an assessment of the proposal’s potential costs, benefits, and transfers, and OMB has reviewed this proposed amendment pursuant to the Executive order.

Paperwork Reduction Act Statements

As part of its continuing effort to reduce paperwork and respondent burden, the Department conducts a preclearance consultation program to allow the general public and Federal agencies to comment on proposed and continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA). This helps to ensure that the public understands the Department’s collection instructions, respondents can provide the requested data in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the Department can properly assess the impact of collection requirements on respondents.

Currently, the Department is soliciting comments concerning the information collection requests (ICRs) included in the proposed amendments to Prohibited Transaction Exemptions 75–1, 77–4, 80–83, 83–1, and 86–128. To obtain a copy of the ICRs, contact the PRA addressee shown below or go to <https://www.RegInfo.gov>. The Department has submitted a copy of the amendments to the OMB in accordance with 44 U.S.C. 3507(d) for review of its information collections. The Department and OMB are particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency’s estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronically delivered responses).

Commenters may send their views on the Department’s PRA analysis in the same way they send comments in response to these proposed rules (for example, through the www.regulations.gov website), including as part of a comment responding to the broader proposal. Comments are due by January 2, 2024 to ensure their consideration.

PRA Addressee: Address requests for copies of the ICR to James Butikofer,

Office of Research and Analysis, U.S. Department of Labor, Employee Benefits Security Administration, 200 Constitution Avenue NW, Room N–5718, Washington, DC 20210, or ebbsa.opr@dol.gov. ICRs also are available at <https://www.RegInfo.gov> (<https://www.reginfo.gov/public/do/PRAMain>).

Amendments to PTE 75–1

The Department proposes to amend PTE 75–1, Part V, to include a new disclosure requirement requiring the plan or IRA to receive a written disclosure of certain terms before the extension of credit. The disclosure must include the rate of interest or other fees that will be charged on such extension of credit, and the method of determining the balance upon which interest will be charged. The plan or IRA must additionally be provided with prior written disclosure of any changes to these terms. The Department believes that it is a usual and customary business practice to maintain records required to demonstrate compliance with disclosure distribution regulations mandated by the Securities and Exchange Commission (SEC). The Department believes that this new disclosure requirement is consistent with the disclosure requirement mandated by the SEC in 17 CFR 240.10b–16(1) for margin transactions. Therefore, the Department concludes that this requirement produces no additional burden to the public.

The Department is also amending PTE 75–1, Parts II and V to adjust the recordkeeping requirement to shift the burden from plans and IRAs to financial institutions. The amended class exemption requires as a condition for relief that financial institutions engaging in the exempted transactions (rather than the plans or IRAs) to retain or cause to be maintained all records pertaining to such transactions for six years and provide access to the records upon request to the specified parties.

Finally, the Department is proposing to amend PTE 75–1 Parts III and IV, which currently provide relief for investment advice fiduciaries, by removing fiduciary investment advice from the covered transactions. Investment advice providers would instead have to rely on the amended PTE 2020–02 for exemptive relief covering investment advice transactions.

Broker-dealers registered under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*), reporting dealers, and banks are eligible to rely on the exemption. According to the SEC, approximately 3,508 broker-dealers

were SEC-registered as of December 2021.¹⁵ Not all broker-dealers perform services for employee benefit plans. In 2021, 54 percent of registered investment advisers provided employer-sponsored retirement benefits consulting.¹⁶ Assuming the percentage of broker-dealers provide advice to retirement plans is the same as the percent of investment advisers providing services to plans, the Department estimates 54 percent, or 1,894 broker-dealers, would be affected by PTE 75–1.

According to the Federal Deposit Insurance Corporation, there are 4,096 commercial banks as of March 31,

2023.¹⁷ If one-half of these banks (about 2,048) and 54 percent of broker-dealers (about 1,894 broker-dealers) relied on this exemption, there would be approximately 3,942 respondents.¹⁸

Recordkeeping Requirements

The Department has assumed that financial service providers that transact with employee benefit plans will maintain these records on behalf of their client plans. Because of the sophisticated nature of financial service providers and the regulation of the securities industry by State and federal government, and by self-regulatory organizations, the Department has

assumed that the records required by this class exemption are the same records kept in the normal course of business, or in compliance with other requirements. The Department requests comment on this assumption.

The Department has estimated that the additional time needed to maintain records for the financial institutions to be consistent with the exemption will be four hours per entity annually at a wage rate of \$190.63 per hour.¹⁹ Thus, the Department estimates it would take 15,768 hours at an equivalent cost of \$3,005,854 to maintain the records and make the records available for inspection.²⁰

TABLE 1—HOURL BURDEN AND EQUIVALENT COST ASSOCIATED WITH RECORDKEEPING

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Financial Manager	15,768	\$3,005,854	15,768	\$3,005,854
Total	15,768	3,005,854	15,768	3,005,854

Summary

In sum, the Department estimates the total burden hours for the amended PTE 1975–1 is 15,768 hours at a total equivalent burden cost of \$3,005,854. The total cost burden is estimated to be de minimis. The Department assumes that required records are maintained by the relevant affected entities, the broker-dealers and banks. Thus, there are no additional tasks performed outside of those performed by the brokerage firms/banks.

The paperwork burden estimates are summarized as follows:

Type of Review: Revision of an existing collection.

Agency: Employee Benefits Security Administration, Department of Labor.

Titles: Prohibited Transaction Exemption 75–1 (Security Transactions with Broker-Dealers, Reporting Dealers and Banks).

OMB Control Number: 1210–0092.

Affected Public: Businesses or other for-profits; not for profit institutions.

Estimated Number of Respondents: 3,942.

Estimated Number of Annual Responses: 3,942.

Frequency of Response: Initially, Annually, When engaging in exempted transaction.

Estimated Total Annual Burden Hours: 15,768 hours.

Estimated Total Annual Burden Cost: \$0.

Amendments to PTE 86–128

The Department is proposing to amend Section VI of PTE 86–128 to require financial institutions to maintain or cause to be maintained for six years the records necessary for the Department, IRS, plan fiduciary, contributing employer or employee organization whose members are covered by the plan, participants and beneficiaries and IRA owners to determine whether conditions of this exemption have been met.

In addition, the amendment would impose conditions on IRAs. Section III of the class exemption imposes the following requirements on fiduciaries of employee benefit plans that effect or execute securities transactions and the independent plan fiduciaries

authorizing the plan or IRA to engage in the transactions with the investment advice provider (“authorizing fiduciary”) under the conditions contained in the exemption:

(1) The authorizing fiduciary must provide the investment advice provider with an advance written authorization for the transactions;

(2) The investment advice provider must provide the authorizing fiduciary with information necessary to determine whether an authorization should be made, including a copy of the exemption, a form for termination, a description of the investment advice provider’s brokerage placement practices, and any other reasonably available information regarding the matter that the authorizing fiduciary requests;

(3) The investment advice provider must provide the authorizing fiduciary with a termination form, at least annually, explaining that the authorization is terminable at will, without penalty to the plan, and that failure to return the form will result in continued authorization for the

¹⁵ Estimates based on SEC’s FOCUS filings and SEC’s Form ADV filings.

¹⁸ Reporting dealers covered by the exemption are not accounted for separately because they are banks

and security brokerages that trade in U.S. Government Securities; thus, reporting dealers are already accounted for in the number of broker-dealer firms and banks. The New York Federal Reserve Bank reported 21 primary dealers on March 21, 2013. http://www.newyorkfed.org/markets/pridealers_current.html.

¹⁹ Internal Department calculation based on 2023 labor cost data. For a description of the Department’s methodology for calculating wage rates, see <https://www.dol.gov/sites/dolgov/files/>

EBSA/laws-and-regulations/rules-and-regulations/technical-appendices/labor-cost-inputs-used-in-ebsa-opr-ria-and-pra-burden-calculations-june-2019.pdf.

²⁰ The burden is estimated as follows: (3,942 financial institutions × 4 hours) = 15,768 hours. A labor rate of \$190.63 is used for a financial manager. The labor rate is applied in the following calculation: (3,942 × 4 hours) × \$190.63 = \$3,005,854.

investment advice provider to engage in securities transactions on behalf of the plan or IRA;

(4) The investment advice provider must provide the authorizing fiduciary with either (a) a confirmation slip for each individual securities transaction within 10 days of the transaction containing the information described in Rule 10b-10(a)(1-7) under the Securities Exchange Act of 1934, 17 CFR 240.10b-10 or (b) a quarterly report containing certain financial information including the total of all transaction-related charges incurred by the plan or IRA;

(5) The investment advice provider must provide the authorizing fiduciary with an annual summary of the confirmation slips or quarterly reports, containing all security transaction-related charges, the brokerage placement practices (if changed), and a portfolio turnover ratio;

(6) An investment advice provider who is a discretionary trustee must provide the authorizing fiduciary with an annual report showing separately the commissions paid to affiliated brokers and non-affiliated brokers, on both a total dollar basis and a cents-per-share basis.

Using data from 2021 Form 5500, the Department estimates that 1,257 unique plans hired service providers denoting on the Schedule C that they were a discretionary trustee. Further, among these plans, 801 also reported that they provided investment management services or received investment management fees paid directly or indirectly by the plan.²¹ Based on these values, the Department estimates on average, 1,000 plans have discretionary fiduciaries with full discretionary control. As small plans do not file the Schedule C, this estimate may be an underestimate. The Department requests comment on how many plans have discretionary fiduciaries with full discretionary control and how many would continue to rely on PTE 1986-128 under the proposed amendments.

The Department estimates that of the estimated 1,000 plans discussed above, 7.5 percent are new accounts or new financial advice relationships.²² Based on these assumptions, the Department estimates that 75 plans would be affected by the proposed amendments to PTE 1986-128.²³

The Department lacks reliable data on the number of managed IRAs that would experience such a transaction in a given year. The Department estimates that there are 10,000 managed IRAs. The Department also does not have data on the number of new IRA accounts that are opened each year. However, in 2022, of the 67.8 million IRA owners, 1.4 million, or approximately 2.1 percent, opened an IRA for the first time.²⁴ Inferring from this statistic, the Department estimates that 2.1 percent of IRA accounts are new each year. The Department acknowledges that some IRA owners may have multiple IRAs, and as such, this statistic may underestimate the percentage of new IRAs opened.²⁵ This results in an estimate of 210 IRAs that are new accounts or new financial advice relationships.²⁶

The Department lacks reliable data on the number of investment advice providers who are discretionary fiduciaries that would rely on the amended exemption. For the purposes of this analysis, the Department assumes that the number of discretionary fiduciaries relying on the exemption is equal to the estimated number of broker-dealers estimated to be affected by the amendments to PTE 2020-02, or 1,894 investment advice providers.²⁷

The Department requests comment on this assumption, particularly with regard to what types of entities would be likely to rely on the amended exemption, as well as any underlying data.

The following wage rates are assumed: an in-house rate of \$159.34 for legal professionals and \$63.45 for clerical staff.²⁸ In addition, the Department assumes that 100 percent of plans will use electronic means to

deliver the required information with no associated cost burden. The Department also assumes that 94.2 percent of IRAs and financial institutions will use electronic means to deliver the required information with no associated cost burden.²⁹ The Department assumes that is similar to the percent receiving electronically under the Department's 2020 electronic disclosure safe harbor.³⁰ The Department requests comments on these assumptions.

Recordkeeping Requirement

The Department is proposing to amend Section VI to require financial institutions to maintain or cause to be maintained for six years the records necessary for the Department, IRS, plan fiduciary, contributing employer or employee organization whose members are covered by the plan, participants and beneficiaries and IRA owners to determine whether conditions of this exemption have been met.

Each of the 1,894 investment advice providers will maintain these records on behalf of their client plans in their normal course of business. Therefore, the Department has estimated that the additional time needed to maintain records consistent with the exemption will only require about one-half hour, on average annually for a financial manager at an hourly rate of \$190.63 to organize and collate the documents. This results in 947 hours of burden at an equivalent cost of \$180,527.³¹ The recordkeeping requirement will also require 15 minutes of clerical time at an hourly rate of \$63.45 to prepare and send the documents for inspection, resulting in 474 hours of burden at an equivalent cost of \$30,044.³²

In total, the recordkeeping requirement is expected to impose an hour burden of 1,421 hours with an equivalent cost of \$210,571.

²⁴ Cerulli Associates, *U.S. Retirement End-Investor 2023: Fostering Comprehensive Relationships*, The Cerulli Report.

²⁵ The Department lacks data on the number of IRA owners that own multiple IRAs. To provide scope of magnitude, one source reported that in 2019, 19 percent of IRA owners contributed to both a traditional IRA and Roth IRA. (See Investment Company Institute, *The Role of IRAs in U.S. Households' Saving for Retirement*, 2020, 27(1) *ICI Research Perspective*, (2021).) This statistic does not account for individuals who own multiple IRAs of each type or those who did not contribute in 2019, but it provides a lower bound.

²⁶ $(10,000 \text{ managed IRAs} \times 2.1 \text{ percent of IRAs are new}) = 210 \text{ IRAs}$.

²⁷ Estimates are based on the SEC's FOCUS filings and Form ADV filings for broker-dealers.

²⁸ Internal Department calculation based on 2023 labor cost data. For a description of the Department's methodology for calculating wage rates, see <https://www.dol.gov/sites/dolgov/files/EBSA/laws-and-regulations/rules-and-regulations/technical-appendices/labor-cost-inputs-used-in-ebsa-opr-ria-and-pra-burden-calculations-june-2019.pdf>.

²⁹ The Department estimates approximately 94.2 percent of retirement investors receive disclosures electronically. This is the sum of the estimated share of retirement investors receiving electronic disclosures under the 2002 electronic disclosure safe harbor (58.2 percent) and the estimated share of retirement investors receiving electronic disclosures under the 2020 electronic disclosure safe harbor (36 percent).

³⁰ 85 FR 31884 (May 27, 2020).

³¹ The burden is estimated as follows: $[(1,894 \text{ investment advice providers} \times 30 \text{ minutes}) \div 60 \text{ minutes}] = 947 \text{ hours}$. A labor rate of \$190.63 is used for a financial manager. The labor rate is applied in the following calculation: $[(1,894 \text{ investment advice providers} \times 30 \text{ minutes}) \div 60 \text{ minutes}] \times \$190.63 \text{ per hour} = \$180,527$.

³² The burden is estimated as follows: $1,894 \text{ investment advice providers} \times 15 \text{ minutes} = 474 \text{ hours}$. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: $[(1,894 \text{ investment advice providers} \times 15 \text{ minutes}) \div 60 \text{ minutes}] \times \$63.45 \text{ per hour} = \$30,044$.

²¹ Estimates based on 2021 Form 5500 data.

²² EBSA identified 57,575 new plans in its 2021 Form 5500 filings, or 7.5 percent of all Form 5500 pension plan filings.

²³ The number of new plans is estimated as: $1,000 \text{ plans} \times 7.5 \text{ percent of plans are new} = 75 \text{ new plans}$.

TABLE 2—HOURLY BURDEN AND EQUIVALENT COST ASSOCIATED WITH RECORDKEEPING

Activity	Year 1		Subsequent years	
	Burden hours	Equivalent burden cost	Burden hours	Equivalent burden cost
Financial Manager	947	\$180,527	947	\$180,527
Clerical	474	30,044	474	30,044
Total	1,421	210,571	1,421	210,571

Written Authorization From the Authorizing Fiduciary to the Broker-Dealer

Authorizing fiduciaries of new plans and IRAs entering into a relationship with an investment advice provider are required to provide the investment advice provider with an advance written authorization to perform transactions for the plan or IRA. The Department estimates that there are approximately 285 plans and IRAs that are new or that enter new arrangements each year.³³ Therefore, the Department estimates

that approximately 285 authorizing fiduciaries are expected to send an advance written authorization. It is assumed that a legal professional will spend 15 minutes per plan reviewing the disclosures and preparing an authorization form. This results in an hour burden of 71 hours with an equivalent cost of \$11,353.³⁴ To produce and distribute the authorization, the Department assumes that 100 percent of plans and 94.2 percent of IRAs will use traditional electronic methods at no additional burden, and the remaining 5.8 percent

of IRAs will be mailed. The Department assumes that clerical staff will spend 5 minutes preparing and sending the authorization, resulting in an hour burden of approximately 24 hours with an equivalent cost of \$1,507.³⁵ It is assumed that the authorization will be two pages and paper authorizations will cost \$0.76 each, which results in a cost burden of \$9.³⁶

In total, the written authorization requirement is expected to result in a total hour burden of 95 hours with an equivalent cost of \$12,860 and a total cost burden of \$9.

TABLE 3—HOURLY BURDEN, EQUIVALENT COST, POSTAGE AND MATERIAL COST ASSOCIATED WITH THE WRITTEN AUTHORIZATION

Activity	Year 1				Subsequent years			
	Burden hours	Equivalent burden cost	Pages	Material cost	Burden hours	Equivalent burden cost	Pages	Material cost
Legal	71	\$11,353	0	\$0	71	\$11,353	0	\$0
Clerical	24	1,507	2	9	24	1,507	2	9
Total	95	12,860	2	9	95	12,860	2	9

Provision of Materials for Evaluation of Authorization of Transaction

Prior to a written authorization being made, the authorizing fiduciary must be provided by the financial institution with a copy of the exemption, a form for termination of authorization, a description of broker's placement practices, and any other reasonably available information. This information is assumed to be readily available.

To produce and distribute the materials, the Department assumes that

94.2 percent of financial institutions will use traditional electronic methods at no additional burden, while the remaining 5.8 percent of financial institutions will mail the materials. The Department estimates that a clerical staff member will spend five minutes to prepare and distribute the required information to the authorizing fiduciary. This information will be sent to the 285 plans and IRAs entering into an agreement with a financial institution, and based on the above, the Department

estimates that this requirement results in an hour burden of 24 hours with an equivalent cost of \$1,507.³⁷ It is assumed that this information will be seven pages and paper distribution will cost \$1.01 each, which results in a cost burden of about \$17.³⁸

In total, the written authorization requirement is expected to result in a total hour burden of 24 hours with an equivalent cost of \$1,507 and a total cost burden of \$17.

³³ 75 plans + 210 IRAs = 285 plans and IRAs that are new or that enter new arrangements each year.

³⁴ The burden is estimated as follows: [(285 plans and IRAs × 15 minutes per plan or IRA) ÷ 60 minutes] = 71 hours. A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(285 plans and IRAs × 15 minutes per plan or IRA) ÷ 60 minutes] × \$159.34 per hour = \$11,353.

³⁵ The burden is estimated as follows: [(285 plans or IRAs × 5 minutes per plan or IRA) ÷ 60 minutes] = 24 hours; A labor rate of \$63.45 is used for a

clerical worker. The labor rate is applied in the following calculation: [(285 plans or IRAs × 5 minutes per IRA) ÷ 60] × \$63.45 = \$1,507.

³⁶ The burden is estimated as follows: (2 pages × \$0.05 per page) + \$0.66 for postage = \$0.76; The mailing rate is applied in the following calculation: (210 authorizations for IRAs × 5.8 percent paper) × \$0.76 = \$9.

³⁷ The burden is estimated as follows: [(75 plans × 5 minutes per plan) ÷ 60 minutes] + [(210 IRAs × 5 minutes per IRA) ÷ 60 minutes] = 24 hours; A labor rate of \$63.45 is used for a clerical worker.

The labor rate is applied in the following calculation: {[(75 plans × 5 minutes per plan) ÷ 60 minutes] × \$63.45} + {[(210 IRAs × 5 minutes per IRA) ÷ 60 minutes] × \$63.45} = \$1,507.

³⁸ The burden is estimated as follows: 7 pages × \$0.05 per page + \$0.66 for postage = \$1.01; The mailing rate is applied in the following calculation: (75 plans × 5.8 percent paper × \$1.01) + (210 materials packages for IRAs × 5.8 percent paper × \$1.01) = \$17.

TABLE 4—HOURLY BURDEN, EQUIVALENT COST, POSTAGE AND MATERIAL COST ASSOCIATED WITH PROVISION OF MATERIALS FOR TRANSACTION AUTHORIZATION

Activity	Year 1				Subsequent years			
	Burden hours	Equivalent burden cost	Pages	Material cost	Burden hours	Equivalent burden cost	Pages	Material cost
Clerical	24	\$1,507	7	\$17	24	\$1,507	7	\$17
Total	24	1,507	7	17	24	1,507	7	17

Provision of an Annual Termination Form

Each authorizing fiduciary must be supplied annually with a form expressly providing an election to terminate the written authorization. It is assumed that legal professionals with each of the 1,894 investment advice providers will spend on average 15 minutes preparing the termination forms, which results in an hour burden of 474 hours with an equivalent cost of \$75,447.³⁹

To produce and distribute the termination form to the 10,000 IRAs and 1,000 plans, the Department assumes that 94.2 percent of financial institutions will use traditional electronic methods at no additional burden, while the remaining 5.8 percent of financial institutions will mail the termination forms. The Department estimates that clerical staff will spend five minutes per plan or IRA preparing and distributing the termination forms

resulting in an hour burden of 917 hours with an equivalent cost of \$58,163.⁴⁰ It is assumed that the form will be two pages, so paper copies will cost \$0.76 each, which results in a cost burden of approximately \$485.⁴¹

In total, providing the annual termination form is expected to impose an hour burden of 1,391 hours with an equivalent cost of \$133,610 and a total cost burden of \$485.

TABLE 5—HOURLY BURDEN, EQUIVALENT COST, POSTAGE AND MATERIAL COST ASSOCIATED WITH PROVISION OF THE ANNUAL TERMINATION FORM

Activity	Year 1				Subsequent years			
	Burden hours	Equivalent burden cost	Pages	Material cost	Burden hours	Equivalent burden cost	Pages	Material cost
Legal	474	\$75,447	0	\$0	474	\$75,447	0	\$0
Clerical	917	58,163	2	485	917	58,163	2	485
Total	1,391	133,610	2	485	1,391	133,610	2	485

Transaction Reporting

The investment advice provider engaging in a covered transaction must furnish the authorizing fiduciary with either a conformation slip for each securities transaction or a quarterly report containing specified information. As discussed above, the provision of the confirmation already is required under SEC regulations. Therefore, if the transaction reporting requirement is satisfied by sending conformation slips, no additional hour and cost burden will occur.

Annual Statement

In addition to the transaction reporting requirement, investment

advice providers are required to send an annual report to each of the 11,000 authorizing fiduciaries⁴² containing the same information as the quarterly report and also containing all security transaction-related charges, the brokerage placement practices, and a portfolio turnover ratio. Collecting and generating the information required for the annual report is reported as a cost burden. Postage cost is not included here as it is assumed that the annual statement will be sent with the annual termination form and postage costs are accounted for there. It is assumed that the annual statement will be five pages, and the paper and print costs are \$0.25 each.⁴³ Therefore, the overall cost

burden for the paper and print costs are about \$160.⁴⁴

In addition, it is assumed that the information that must be sent annually could be sent together; therefore, the clerical staff hours required to prepare and distribute the report has been included with the provision of annual termination form requirement. Therefore, no additional hour burden has been reported.

In total, providing the annual statement is expected to impose a total cost burden of \$160.

³⁹ The burden is estimated as follows: [(1,894 investment advice providers × 15 minutes per financial institution) ÷ 60 minutes] = 474 hours; A labor rate of \$159.34 is used for a legal professional. The labor rate is applied in the following calculation: [(1,894 investment advice providers × 15 minutes per financial institution) ÷ 60 minutes] × \$159.34 per hour = \$75,447.

⁴⁰ The burden is estimated as follows: [(1,000 plans × 5 minutes per plan) ÷ 60 minutes] + [(10,000

IRAs × 5 minutes per IRA) ÷ 60 minutes] = 917 hours. A labor rate of \$63.45 is used for a clerical worker. The labor rate is applied in the following calculation: {[(1,000 plans × 5 minutes per plan) ÷ 60 minutes] × \$63.45} + {[(10,000 IRAs × 5 minutes per IRA) ÷ 60 minutes] × \$63.45} = \$58,163.

⁴¹ The burden is estimated as follows: 2 pages × \$0.05 per page + \$0.66 for postage = \$0.76. The mailing rate is applied in the following calculation:

(1,000 plans × 5.8 percent paper × \$0.76) + (10,000 IRAs × 5.8 percent paper × \$0.76) = \$485.

⁴² 1,000 plans + 10,000 IRAs = 11,000 plans and IRAs.

⁴³ 5 pages × \$0.05 per page = \$0.25.

⁴⁴ (11,000 plans and IRAs × 5.8 percent paper × \$0.25) = \$160.

TABLE 6—HOURL BURDEN, EQUIVALENT COST, POSTAGE AND MATERIAL COST ASSOCIATED WITH THE ANNUAL STATEMENT

Activity	Year 1				Subsequent years			
	Burden hours	Equivalent burden cost	Pages	Material cost	Burden hours	Equivalent burden cost	Pages	Material cost
Clerical	0	\$0	5	\$160	0	\$0	5	\$160
Total	0	0	5	160	0	0	5	160

Report of Commissions Paid

A discretionary trustee must provide an authorizing fiduciary with an annual report showing separately the commissions paid to affiliated brokers and non-affiliated brokers, on both a total dollar basis and a cents-per-share basis. The collecting and generation of the information for the quarterly report is reported as a cost burden. The clerical hour burden to prepare and distribute the report is included with the provision of annual termination form requirement, because both items are required to be sent annually.

A financial institution who is a discretionary trustee must provide each

of the 11,000 authorizing fiduciaries with an annual report showing commissions paid to affiliated and non-affiliated brokers, on both a total dollar and a cents-per-share basis. As the report is sent annually, it is assumed that it could be sent with the transaction report, therefore postage costs are not counted here. The Department estimates that 94.2 percent of financial institutions will use traditional electronic methods at no additional burden, while the remaining 5.8 percent of financial institutions will mail the annual reports. It is assumed that the report will be two pages, and the paper and print costs are \$0.10 each.⁴⁵

Therefore, the overall cost burden of the paper and print costs is \$64.⁴⁶

Financial institutions are required to report specific transaction fees and information to the plan fiduciaries. The information must be tracked, assigned to specific plans, and reported. It is assumed that it costs the financial institution \$3.30 per plan or IRA to track this information.⁴⁷ With approximately 11,000 affected plans and IRAs, this results in a cost burden of approximately \$36,300 annually.⁴⁸

In total, providing the report is expected to impose a total cost burden of \$36,364.⁴⁹

TABLE 7—HOURL BURDEN, EQUIVALENT COST, POSTAGE AND MATERIAL COST ASSOCIATED WITH THE REPORT OF COMMISSIONS PAID

Activity	Year 1				Subsequent years			
	Burden hours	Equivalent burden cost	Pages	Material cost	Burden hours	Equivalent burden cost	Pages	Material cost
Clerical	0	\$0	2	\$36,364	0	\$0	2	\$36,364
Total	0	0	2	36,364	0	0	2	36,364

Summary

In total, the conditions of this exemption will result in the production of 33,570 disclosures.⁵⁰ The Department assumes that 100 percent of plans will use electronic methods to distribute the required information, at de minimis burden. The Department also assumes that 94.2 percent of IRAs and financial institutions will use electronic methods to distribute the required information, at de minimis burden, while 1,943⁵¹ disclosures will be on paper. Production and distribution of disclosures will result in an overall hour burden of 2,929 hours with an equivalent cost of

\$358,548 and an overall cost burden of \$37,034.

The paperwork burden estimates are summarized as follows:

Type of Review: Revision to an existing collection.

Agency: Employee Benefits Security Administration, Department of Labor.

Titles: PTE 86–128 (Securities Broker-Dealers).

OMB Control Number: 1210–0059.

Affected Public: Businesses or other for-profits; not for profit institutions.

Estimated Number of Respondents: 2,179.

Estimated Number of Annual Responses: 33,570.

Frequency of Response: Initially, Annually, When engaging in exempted transaction.

Estimated Total Annual Burden Hours: 2,929 hours.

Estimated Total Annual Burden Cost: \$37,034.

Amendments to PTE 77–4, 80–83 and PTE 83–1

The Department has determined that PTE 77–4 and PTE 80–83 do not have information collections impacted by the removal of advice from the exemption. There is no paperwork burden related to PTE 83–1.

⁴⁵ 2 pages × \$0.05 per page = \$0.10.

⁴⁶ (11,000 plans and IRAs × 5.8 percent paper × \$0.10) = \$64.

⁴⁷ This estimate is based on information from a Request for Information and from industry sources.

⁴⁸ (11,000 plans and IRAs × \$3.30) = \$36,300.

⁴⁹ This estimate is calculated as: \$64 + \$36,300 = \$36,364.

⁵⁰ The total number of disclosures is calculated in the following manner: 285 (Written authorization disclosures) + 285 (Provision of materials for evaluation of authorization of transaction) + 11,000 (Annual termination form) + 11,000 (Annual Statement) + 11,000 (Report of Commissions Paid) = 33,570 disclosures.

⁵¹ The total number of paper disclosures is calculated in the following manner: (210 Written

authorization disclosures for IRAs × 5.8 percent paper) + (285 Provision of materials for evaluation of authorization of transaction × 5.8 percent paper) + (11,000 Annual termination form × 5.8 percent paper) + (11,000 Annual Statement × 5.8 percent paper) + (11,000 Report of Commissions Paid × 5.8 percent paper) = 1,943 disclosures.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA)⁵² imposes certain requirements on rules subject to the notice and comment requirements of section 553(b) of the Administrative Procedure Act or any other law.⁵³ Under section 603 of the RFA, agencies must submit an initial regulatory flexibility analysis (IRFA) of a proposal that is likely to have a significant economic impact on a substantial number of small entities, such as small businesses, organizations, and governmental jurisdictions. This proposed amended exemption, along with related amended exemptions and a proposed rule amendment published elsewhere in this issue of the **Federal Register**, is part of a rulemaking regarding the definition of fiduciary investment advice, which the Department has determined likely will have a significant economic impact on a substantial number of small entities. The impact of this proposed amendment on small entities is included in the IRFA for the entire project, which can be found in the related notice of proposed rulemaking found elsewhere in this edition of the **Federal Register**.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995⁵⁴ requires each federal agency to prepare a written statement assessing the effects of any federal mandate in a proposed or final rule that may result in an expenditure of \$100 million or more (adjusted annually for inflation with the base year 1995) in any 1 year by state, local, and tribal governments, in the aggregate, or by the private sector. For purposes of the Unfunded Mandates Reform Act, as well as Executive Order 12875, this proposed amended exemption does not include any Federal mandate that will result in such expenditures.

Federalism Statement

Executive Order 13132 outlines fundamental principles of federalism. It also requires Federal agencies to adhere to specific criteria in formulating and implementing policies that have “substantial direct effects” on the states, the relationship between the national government and states, or on the distribution of power and responsibilities among the various levels of government. Federal agencies promulgating regulations that have these federalism implications must consult with State and local officials, and describe the extent of their

consultation and the nature of the concerns of State and local officials in the preamble to the final regulation. Notwithstanding this, Section 514 of ERISA provides, with certain exceptions specifically enumerated, that the provisions of Titles I and IV of ERISA supersede any and all laws of the States as they relate to any employee benefit plan covered under ERISA.

The Department does not intend this exemption to change the scope or effect of ERISA section 514, including the savings clause in ERISA section 514(b)(2)(A) for State regulation of securities, banking, or insurance laws. Ultimately, the Department does not believe this proposed class exemption has federalism implications because it has no substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of Government.

General Information

The attention of interested persons is directed to the following: (1) The fact that a transaction is the subject of an exemption under ERISA section 408(a) and Code section 4975(c)(2) does not relieve a fiduciary, or other party in interest or disqualified person with respect to a Plan, from certain other provisions of ERISA and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of ERISA section 404 which require, among other things, that a fiduciary act prudently and discharge his or her duties respecting the Plan solely in the interests of the participants and beneficiaries of the Plan. Additionally, the fact that a transaction is the subject of an exemption does not affect the requirement of Code section 401(a) that the Plan must operate for the exclusive benefit of the employees of the employer maintaining the Plan and their beneficiaries; (2) Before the proposed exemption may be granted under ERISA section 408(a) and Code section 4975(c)(2), the Department must find that it is administratively feasible, in the interests of Plans and their participants and beneficiaries and IRA owners, and protective of the rights of participants and beneficiaries of the Plan and IRA owners; (3) If granted, the proposed exemption is applicable to a particular transaction only if the transaction satisfies the conditions specified in the exemption; and (4) The proposed exemption, if granted, is supplemental to, and not in derogation of, any other provisions of ERISA and the Code,

including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Proposed Amendments to Class Exemptions Prohibited Transaction Exemption 75–1, Exemptions From Prohibitions Respecting Certain Classes of Transactions Involving Employee Benefit Plans and Certain Broker-Dealers, Reporting Dealers and Banks

The Department proposes to amend Prohibited Transaction Exemption 75–1 under the authority of ERISA section 408(a) and Code section 4975(c)(2), and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (76 FR 66637, October 27, 2011).

I. PTE 75–1, Part I, *Agency transactions and services*, subparts (b) and (c), are revoked in their entirety.

II. Part II, *Principal transactions*, the first sentence of subpart (2) is revoked; the sentence beginning “The exemptions set forth in (1) and (2) is designated as Part II(2) and amended to read, “The exemption set forth in (1) above is subject to the following conditions:” and new section II(2)(d) is revised to delete the phrase “Except with respect to transactions described in section (2) above,”.

III. Part II, *Principal transactions*, sections (e) and (f) are revised to read as follows: (e) The broker-dealer, reporting dealer, or bank engaging in the covered transaction maintains or causes to be maintained for a period of six years from the date of such transaction such records as are necessary to enable the persons described in paragraph (f) of this exemption to determine whether the conditions of this exemption have been met, except that:

(1) No party in interest other than the broker-dealer, reporting dealer, or bank engaging in the covered transaction, shall be subject to the civil penalty, which may be assessed under section 502(i) of the Act, or to the taxes imposed by section 4975(a) and (b) of the Code, if such records are not maintained, or are not available for examination as required by paragraph (f) below; and

(2) A prohibited transaction will not be deemed to have occurred if, due to circumstances beyond the control of the broker-dealer, reporting dealer, or bank, such records are lost or destroyed prior to the end of such six-year period.

(f)(1) Notwithstanding anything to the contrary in subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (e) are

⁵² 5 U.S.C. 601 *et seq.*

⁵⁴ Public Law 104–4, 109 Stat. 48 (Mar. 22, 1995).

reasonably available for examination during normal business hours by:

(A) Any duly authorized employee or representative of the Department or the Internal Revenue Service;

(B) Any fiduciary of the plan or any duly authorized employee or representative of such fiduciary;

(C) Any contributing employer and any employee organization whose members are covered by the plan, or any authorized employee or representative of these entities; or

(D) Any participant or beneficiary of the plan, or IRA owner, or the duly authorized representative of such participant or beneficiary; and

(2) None of the persons described in subparagraph (1)(B)-(D) above shall be authorized to examine trade secrets or commercial or financial information of the broker-dealer, reporting dealer, or bank which is privileged or confidential, or records regarding a plan or IRA other than the plan or IRA with respect to which they are the fiduciary, contributing employer, employee organization, participant, beneficiary, or IRA owner.

(3) Should such broker-dealer, reporting dealer, or bank refuse to disclose information on the basis that such information is exempt from disclosure, the broker-dealer, reporting dealer, or bank shall, by the close of the thirtieth (30th) day following the request, provide a written notice advising that person of the reasons for the refusal and that the Department may request such information.

(4) Failure to maintain the required records necessary to determine whether the conditions of this exemption have been met will result in the loss of the exemption only for the transaction or transactions for which records are missing or have not been maintained. It does not affect the relief for other transactions.

For purposes of this exemption, the terms “broker-dealer,” “reporting dealer” and “bank” shall include such persons and any affiliates thereof, and the term “affiliate” shall be defined in the same manner as that term is defined in 29 CFR 2510.3–21(e) and 26 CFR 54.4975–9(e).

IV. Part III, *Underwritings*, is amended by inserting a new section III(h) to read as follows:

Exception. No relief from the restrictions of ERISA section 406(b) and the taxes imposed by Code section 4975(a) and (b) by reason of Code sections 4975(c)(1)(E) and (F) is available for fiduciaries providing investment advice within the meaning of ERISA section 3(21)(A)(ii) or Code section and regulations thereunder.

V. Part IV, *Market-making*, is amended by inserting a new section IV(g) to read as follows:

Exception. No relief from the restrictions of ERISA section 406(b) and the taxes imposed by Code section 4975(a) and (b) by reason of Code sections 4975(c)(1)(E) and (F) is available for fiduciaries providing investment advice within the meaning of ERISA section 3(21)(A)(ii) or Code section 4975(e)(3)(B) and regulations thereunder.

VI. Part V, *Extension of Credit*, is amended by replacing Sections (c) and (d) with the following: (c) Notwithstanding section (a)(2), a fiduciary under ERISA section 3(21)(A)(ii) or Code section 4975(e)(3)(B) may receive reasonable compensation for extending credit to a plan or IRA to avoid a failed purchase or sale of securities involving the plan or IRA if:

(1) The potential failure of the purchase or sale of the securities is not caused by such fiduciary or an affiliate;

(2) The terms of the extension of credit are at least as favorable to the plan or IRA as the terms available in an arm’s length transaction between unaffiliated parties;

(3) Prior to the extension of credit, the plan or IRA receives written disclosure of (i) the rate of interest (or other fees) that will apply and (ii) the method of determining the balance upon which interest will be charged, in the event that the fiduciary extends credit to avoid a failed purchase or sale of securities, as well as prior written disclosure of any changes to these terms. This section (e)(3) will be considered satisfied if the plan or IRA receives the disclosure described in Securities Exchange Act Rule 10b–16;⁵⁵

(d) The broker-dealer engaging in the covered transaction maintains or causes to be maintained for a period of six years from the date of such transaction in a manner that is reasonably accessible for examination, such records as are necessary to enable the persons described in paragraph (e) of this exemption to determine whether the conditions of this exemption have been met with respect to a transaction, except that:

(1) No party other than the broker-dealer engaging in the covered transaction shall be subject to the civil penalty which may be assessed under section 502(i) of the Act, or to the taxes imposed by section 4975(a) and (b) of the Code, if such records are not maintained, or are not available for

examination as required by paragraph (e) below; and

(2) A prohibited transaction will not be deemed to have occurred if, due to circumstances beyond the control of the broker-dealer, such records are lost or destroyed prior to the end of such six-year period.

(e)(1) Except as provided in paragraph (e)(2) of this exemption, and notwithstanding anything to the contrary in subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (d) are reasonably available at their customary location for examination during normal business hours by:

(A) An authorized employee or representative of the Department of Labor or the Internal Revenue Service,

(B) Any fiduciary of a plan that engaged in a transaction pursuant to this exemption, or any authorized employee or representative of such fiduciary;

(C) Any contributing employer and any employee organization whose members are covered by a plan described in paragraph (e)(1)(B), or any authorized employee or representative of these entities; or

(D) Any participant or beneficiary of a plan described in paragraph (e)(1)(B), IRA owner or the authorized representative of such participant, beneficiary or owner.

(2) None of the persons described in paragraph (e)(1)(B)–(D) of this exemption are authorized to examine records regarding a recommended transaction involving another investor, or privileged trade secrets or privileged commercial or financial information, of the broker-dealer engaging in the covered transaction, or information identifying other individuals.

(3) Should the broker-dealer engaging in the covered transaction refuse to disclose information on the basis that the information is exempt from disclosure, the broker-dealer must, by the close of the thirtieth (30th) day following the request, provide a written notice advising the requestor of the reasons for the refusal and that the Department may request such information.

(4) Failure to maintain the required records necessary to determine whether the conditions of this exemption have been met will result in the loss of the exemption only for the transaction or transactions for which records are missing or have not been maintained. It does not affect the relief for other transactions.

For purposes of this exemption, the terms “party in interest,” “disqualified person” and “fiduciary” shall include such party in interest, disqualified

⁵⁵ 17 CFR 240.10b–16.

person, or fiduciary, and any affiliates thereof, and the term “affiliate” shall be defined in the same manner as that term is defined in 29 CFR 2510.3–21 and 26 CFR 54.4975–9. Also, for the purposes of this exemption, the term “IRA” means any account or annuity described in Code section 4975(e)(1)(B) through (F), including, for example, an individual retirement account described in section 408(a) of the Code and a health savings account described in section 223(d) of the Code.

Prohibited Transaction Exemption 77–4, Class Exemption for Certain Transactions Between Investment Companies and Employee Benefit Plans

The Department proposes to amend Prohibited Transaction Exemption 77–4 under the authority of ERISA section 408(a) and Code section 4975(c)(2), and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (76 FR 66637, October 27, 2011).

I. A new section II(g) is inserted to read as follows:

Exception. No relief from the restrictions of 406(b) and the taxes imposed by section 4975(a) and (b) by reason of sections 4975(c)(1)(E) and (F) is available for fiduciaries providing investment advice within the meaning of section 3(21)(A)(ii) of ERISA or 4975(e)(3)(B) of the Code and regulations thereunder.

Prohibited Transaction Exemption 80–83, Class Exemption for Certain Transactions Involving Purchase of Securities Where Issuer May Use Proceeds To Reduce or Retire Indebtedness to Parties in Interest

The Department proposes to amend Prohibited Transaction Exemption 80–83 under the authority of ERISA section 408(a) and Code section 4975(c)(2), and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (76 FR 66637, October 27, 2011).

I. A new section I.E. is inserted to read as follows:

Exception. No relief from the restrictions of 406(b) and the taxes imposed by section 4975(a) and (b) by reason of sections 4975(c)(1)(E) and (F) is available for fiduciaries providing investment advice within the meaning of section 3(21)(A)(ii) of ERISA or 4975(e)(3)(B) of the Code and regulations thereunder.

Prohibited Transaction Exemption 83–1, Exemption for Certain Transactions Involving Mortgage Pool Investment Trusts

The Department proposes to amend Prohibited Transaction Exemption 83–1 under the authority of ERISA section

408(a) and Code section 4975(c)(2), and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (76 FR 66637, October 27, 2011).

I. A new section I.E. is inserted to read as follows:

Exception. No relief from the restrictions of 406(b) and the taxes imposed by section 4975(a) and (b) by reason of sections 4975(c)(1)(E) and (F) is available for fiduciaries providing investment advice within the meaning of section 3(21)(A)(ii) of ERISA or 4975(e)(3)(B) of the Code and regulations thereunder.

Prohibited Transaction Exemption 86–128, Class Exemption for Securities Transactions Involving Employee Benefit Plans and Broker-Dealers

The Department proposes to amend Prohibited Transaction Exemption 86–128 under the authority of ERISA section 408(a) and Code section 4975(c)(2), and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (76 FR 66637, October 27, 2011).

I. New sections II(d) is inserted as follows:

(d) *Exception.* No relief from the restrictions of ERISA 406(b) and the taxes imposed by Code section 4975(a) and (b) by reason of Code sections 4975(c)(1)(E) and (F) is available for fiduciaries providing investment advice within the meaning of ERISA section 3(21)(A)(ii) or Code section 4975(e)(3)(B) and regulations thereunder.

II. Section IV(a) is deleted.

III. Section IV(b) is redesignated as Section IV(a), and IV(a)(1) is deleted and Sections IV(b)(2) and (3) are redesignated as Sections IV(b)(1) and (2).

IV. Section IV(c) is redesignated as Section IV(b) and is amended to read:

(c) Recapture of profits. Sections III(a) and III(i) of this exemption do not apply in any case where the person engaging in a covered transaction returns or credits to the plan all profits earned by that person in connection with the securities transactions associated with the covered transaction.

V. The following is added to the end of Section III(a)

“Notwithstanding the foregoing, this condition does not apply to a trustee that satisfies Section III(h) and (i).”

VI. New Section VII is inserted as follows:

Section VII. Recordkeeping Requirements

(a) The plan fiduciary engaging in a covered transaction maintains or causes to be maintained for a period of six years, in a manner that is reasonably

accessible for examination, the records necessary to enable the persons described in Section VI(b) to determine whether the conditions of this exemption have been met, except that:

(1) If such records are lost or destroyed, due to circumstances beyond the control of the plan fiduciary, then no prohibited transaction will be considered to have occurred solely on the basis of the unavailability of those records; and

(2) No party in interest, other than such plan fiduciary who is responsible for complying with this paragraph (a), will be subject to the civil penalty that may be assessed under ERISA section 502(i) or the taxes imposed by Code section 4975(a) and (b), if applicable, if the records are not maintained or are not available for examination as required by paragraph (b) below; and

(b)(1) Except as provided below in subparagraph (2), or as precluded by 12 U.S.C. 484, and notwithstanding any provisions of ERISA section 504(a)(2) and (b), the records referred to in the above paragraph are reasonably available at their customary location for examination during normal business hours by—

(A) Any duly authorized employee or representative of the Department or the Internal Revenue Service;

(B) Any fiduciary of the plan or any duly authorized employee or representative of such fiduciary;

(C) Any contributing employer and any employee organization whose members are covered by the plan, or any authorized employee or representative of these entities; or

(D) Any participant or beneficiary of the plan or the authorized representative of such participant or beneficiary.

(2) None of the persons described in subparagraph (1)(B)–(D) above are authorized to examine privileged trade secrets or privileged commercial or financial information of such fiduciary or are authorized to examine records regarding a plan or IRA other than the plan or IRA with which they are the fiduciary, contributing employer, employee organization, participant, beneficiary or IRA owner.

(3) Should such plan fiduciary refuse to disclose information on the basis that such information is exempt from disclosure, such plan fiduciary must, by the close of the thirtieth (30th) day following the request, provide a written notice advising the requestor of the reasons for the refusal and that the Department may request such information.

(4) Failure to maintain the required records necessary to determine whether

the conditions of this exemption have been met will result in the loss of the exemption only for the transaction or transactions for which records are missing or have not been maintained. It

does not affect the relief for other transactions.

Signed at Washington, DC, this 24th day of October, 2023.

Lisa M. Gomez,

*Assistant Secretary, Employee Benefits
Security Administration, U.S. Department of
Labor.*

Part V

Federal Communications Commission

47 CFR Parts 8 and 20

Safeguarding and Securing the Open Internet; Proposed Rule

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 8 and 20

[WC Docket No. 23–320; FCC 23–83; FR ID 179272]

Safeguarding and Securing the Open Internet

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this document, the Federal Communications Commission's (Commission) adopted a Notice of Proposed Rulemaking (NPRM) that proposes to reestablish the Commission's authority over broadband internet access service by classifying it as a telecommunications service under Title II of the Communications Act. This NPRM proposes to classify broadband internet access service as a telecommunications service and provide the Commission with authority necessary to safeguard the open internet, advance national security, and protect public safety. The NPRM also proposes to reestablish conduct rules for internet service providers that would provide a national approach for safeguarding internet openness.

DATES: Comments are due on or before December 14, 2023, and reply comments are due on or before January 17, 2024. Written comments on the Paperwork Reduction Act proposed information collection requirements must be submitted by the public and other interested parties on or before January 2, 2024.

ADDRESSES: You may submit comments, identified by WC Docket No. 23–320 by any of the following methods:

- *Electronic Filers:* Comments may be filed electronically using the internet by accessing ECFS: <https://www.fcc.gov/ecfs/>.

- *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing.

Filings can be sent by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.

- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD 20701.

- U.S. Postal Service first-class, Express, and Priority mail must be addressed to 45 L Street NE, Washington, DC 20554.

- Effective March 19, 2020, and until further notice, the Commission no longer accepts any hand or messenger delivered filings. This is a temporary measure taken to help protect the health and safety of individuals, and to mitigate the transmission of COVID–19. See FCC Announces Closure of FCC Headquarters Open Window and Change in Hand-Delivery Policy, Public Notice, 35 FCC Rcd 2788 (2020). <https://www.fcc.gov/document/fcc-closes-headquarters-open-window-and-changes-hand-delivery-policy>.

People with Disabilities: To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at (202) 418–0530 (voice).

FOR FURTHER INFORMATION CONTACT:

Wireline Competition Bureau, Competition Policy Division, Openinternet2023@fcc.gov. For additional information concerning the Paperwork Reduction Act information collection requirements contained in this document, send an email to PRA@fcc.gov or contact Nicole Ongele, Nicole.Ongele@fcc.gov.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking (NPRM) in WC Docket No. 23–320, FCC 23–83, adopted on October 19, 2023 and released on October 20, 2023. The full text of the document is available on the Commission's website at <https://docs.fcc.gov/public/attachments/FCC-23-83A1.pdf>. To request materials in accessible formats for people with disabilities (e.g., braille, large print, electronic files, audio format, etc.), send an email to FCC504@fcc.gov or call the Consumer & Governmental Affairs Bureau at (202) 418–0530 (voice).

Initial Paperwork Reduction Act of 1995 Analysis

This document contains proposed information collection requirements. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public to comment on the information collection requirements contained in this document, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. Public and agency comments are due January 2, 2024.

Comments should address: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's

burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and (e) way to further reduce the information collection burden on small business concerns with fewer than 25 employees. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4), we seek specific comment on how we might further reduce the information collection burden for small business concerns with fewer than 25 employees.

Providing Accountability Through Transparency Act

The Providing Accountability Through Transparency Act, Public Law 118–9, requires each agency, in providing notice of a rulemaking, to post online a brief plain-language summary of the proposed rule. The required summary of this Notice of Proposed Rulemaking/Further Notice of Proposed Rulemaking is available at <https://www.fcc.gov/proposed-rulemakings>.

Synopsis

I. Proposed Classification of Broadband Internet Access Service

1. Today, we propose to return BIAS to its classification as a telecommunications service under Title II of the Act. We further propose to reclassify mobile BIAS as a commercial mobile service. In the time since the *RIF Order* (83 FR 7852 (Feb. 22, 2018)), propelled by the COVID–19 pandemic, BIAS has become even more essential to consumers for work, health, education, community, and everyday life. In light of this reality, we believe that looking anew at the classification of BIAS is necessary and timely given the critical importance of ensuring the Commission's authority to fulfill policy objectives and responsibilities to protect this vital service. Notable among these is enabling the Commission to safeguard the fair and open internet through a national regulatory approach. The Commission also has an important statutory mandate to protect “life and property” by supporting national security and public safety. We anticipate that the proper classification of BIAS as a telecommunications service will enhance the Commission's ability to advance these and other important interests, including protection of consumers' privacy and data security

interests and consumers' ability to access BIAS. Beyond these areas, we believe that classification of BIAS as a telecommunications service represents the best reading of the text of the Act in light of the marketplace reality of how the service is offered and perceived today. Below, we seek comment on our proposed classification framework, and particularly seek comment on its benefits and burdens. Additionally, we seek comment on the impact of reclassification on small businesses and entities, including small ISPs.

A. Broadband Internet Access Service Is Essential

2. While BIAS connections have long been important to full participation in our society and economy, we believe the COVID-19 pandemic dramatically changed the importance of the internet today, and seek comment on our belief. Not unlike other essential utilities, such as electricity and water, BIAS connections have proved essential to every aspect of our daily lives, from work, education, and healthcare, to commerce, community, and free expression. BIAS connections were so critical during the pandemic that Congress undertook a number of federal initiatives to improve the accessibility and affordability of BIAS across America, finding in the preamble to § 60101 of the bipartisan Infrastructure Investment and Jobs Act (Infrastructure Act) that "access to affordable, reliable, high-speed broadband is essential to full participation in modern life in the United States." A Pew Research Center survey highlighted this reality, showing that high speed internet was essential or important to 90 percent of U.S. adults during the COVID-19 pandemic. That finding is backed by the tremendous use during the pandemic of text messaging applications, voice services, and video conferencing for work, school, civic engagement, and connecting with family and communities, accessed through consumers' fixed and mobile broadband connections. The increased importance of BIAS connections has persisted post-pandemic. Compared to last year, nearly 45 percent of respondents to one survey said their internet usage had increased, while the average amount of time respondents spent actively using the internet on a phone, tablet, or computer was eight hours, excluding passive activities, such as streaming music or video in the background. OpenVault reports that almost 50 percent of fixed broadband subscribers in the U.S. used 533 gigabytes (GB) or more of bandwidth per month through the fourth quarter of 2022, compared to about 10 percent of subscribers in 2017.

From year-end 2020 to year-end 2021, monthly data usage per smartphone subscriber rose to an average of 12.1 GB per subscriber per month—an increase of approximately 12 percent. We seek comment on how consumers' usage and view of BIAS has changed since 2018, when Title II classification was reversed, and particularly since the onset of the pandemic in 2020. In what ways has the importance of BIAS to consumers stayed the same? How should any evolution in the importance of BIAS to consumers drive our analysis today? We also seek comment on how the importance of BIAS is expected to evolve going forward.

3. We tentatively conclude that developments in the importance of the internet to consumers demonstrate that consumers perceive and use BIAS as a standalone service that provides telecommunications. In the *2015 Open Internet Order* (80 FR 19737 (April 13, 2015)), the Commission concluded that consumers perceive BIAS both as a standalone offering and as providing telecommunications. The D.C. Circuit found in *USTA* that these conclusions had "extensive support in the record and together justify the Commission's decision to reclassify broadband as a telecommunications service." As the D.C. Circuit recognized, "[e]ven the most limited examination of contemporary broadband usage reveals that consumers rely on the service primarily to access third-party content." We believe that the increased importance of BIAS to consumers since the onset of the pandemic shows that consumers' perception and use of BIAS as a standalone telecommunications service is even more pronounced now than it was in 2015. Indeed, consumers' use of BIAS today appears to go to the very heart of the purposes for which consumers have historically utilized "telecommunication services": to "transmi[t], between or among points specified by the user, of information of the user's choosing, without change in the form or content of the information as sent and received." We seek comment on our tentative conclusion and this analysis.

4. We also believe that the COVID-19 pandemic, and the increased importance of BIAS to consumers, has spurred ISPs to market BIAS as a telecommunications service that is essential to accessing separate data-related "add-on" offerings. In the *2015 Open Internet Order*, the Commission concluded that ISPs "market and offer consumers separate services that are best characterized as (1) a broadband internet access service that is a telecommunications service; and (2)

'add-on' applications, content, and services that are generally information services" separate from the underlying broadband service. The Commission specifically found that ISPs market their BIAS "primarily as a conduit for the transmission of data across the internet," with fixed providers distinguishing service offerings on the basis of transmission speeds, while mobile providers advertise speed, reliability, and coverage of their networks. Although the *RIF Order* contended that "ISPs generally market and provide information processing capabilities and transmission capabilities together as a single service," it did not provide examples. Examples of ISP marketing today appear even more focused than in 2015 on the capability of BIAS to transmit information of users' choosing between internet endpoints, rather than its capability to generate, acquire, store, transform, process, retrieve, utilize, or make available that information. Such marketing emphasizes faster speeds aimed at connecting multiple devices, unlimited data for mobile service, and reliable and secure coverage. At the same time, ISPs appear to advertise data-related offerings as separate services that can be bundled with or added on to their BIAS services, including subscriptions to unaffiliated video and music streaming services, new devices, access to Wi-Fi hotspots, or mobile security apps. We seek comment generally on how BIAS offerings are advertised today. Have fixed or mobile ISPs changed their marketing or advertising of BIAS since 2018? We seek evidence and examples of how the BIAS market is shaped today, and particularly how it has changed in response to developments in consumers' perception about the essential nature of BIAS connections. How does the current marketing of BIAS by ISPs bear on our tentative determination that such service is a telecommunications service? We also seek comment on ways ISPs' advertising of bundled services and devices as "add-ons" to their BIAS offerings has evolved as a result of recent changes in the importance of BIAS to consumers. How do these additional offerings modify the underlying BIAS offered by the ISP, if at all?

5. We further seek comment on the development of third-party services and devices that utilize BIAS. We believe that since the 2018 reclassification of BIAS, and particularly as a result of the COVID-19 pandemic, there is substantial market proliferation of third-party services and devices and that

consumers' use of these offerings significantly outweigh their use of ISPs' affiliated offerings. We seek comment on this observation. How have trends in third-party services and devices impacted consumer use of BIAS? In what ways have these services and devices driven demand for fixed and mobile BIAS?

B. Reclassification is Necessary To Ensure Internet Openness, Safeguard National Security, Protect Public Safety, and Support Other Public Interest Goals

6. Given how essential BIAS is to consumers' daily lives, we believe that our proposed reclassification of BIAS as a telecommunications service is necessary to unlock tools the Commission needs to fulfill its objectives and responsibilities to safeguard this vital service. Critical among these is enabling the Commission to ensure that the internet is open and fair, including by establishing a national regulatory approach that would provide consistent protections for consumers and certainty for ISPs. We also believe that the proposed reclassification would enhance the Commission's ability to safeguard national security and protect public safety. Further, we anticipate that returning BIAS to its telecommunications service classification would provide us with better tools to address policy initiatives to protect consumers when they use communications services and support their ability to access BIAS, including through the Commission's universal service programs. We believe the *RIF Order's* reclassification of BIAS as an information service not only inhibits the Commission's ability to achieve these outcomes, but that its policy rationales failed to support that reclassification. Below, we seek comment on these views and on any other considerations bearing on the grounds for us to return to a telecommunications service classification of BIAS, including the impact of our proposed reclassification on small ISPs and other small entities. In seeking comment on potential reclassification, we also welcome the submission of economic analyses that weigh the costs and benefits of the Commission taking such action. We also invite commenters to identify whether there are any other regulatory frameworks administered by the Commission, not discussed below, that might be affected by our proposed reclassification, and seek comment on how such reclassification would affect those frameworks.

7. Beyond these issues, we invite comment on additional public policy

considerations we should examine in our analysis of BIAS classification. For instance, to what extent are there any reasonable reliance interests we should consider? We expect any commenters claiming reliance to submit evidence demonstrating the existence, magnitude, and reasonableness of any alleged reliance interests.

1. Ensuring Internet Openness

8. In light of how essential BIAS connectivity is to consumers following the COVID-19 pandemic, we believe that the open internet must be protected to ensure consumers can use their BIAS connections in all the lawful ways they see fit. We tentatively conclude that reclassification of BIAS as a telecommunications service will allow the Commission to safeguard the open internet and seek comment on this tentative conclusion. As an initial manner, following Title II classification, the Commission could rely on its authority in sections 201 and 202 of the Act to address practices that are unjust, unreasonable, or unreasonably discriminatory. Below, we also propose to reinstate rules that prohibit ISPs from blocking or throttling the information transmitted over their networks or engaging in paid or affiliated prioritization arrangements. Additionally, we propose to reinstate a general conduct standard that would prohibit practices that cause unreasonable interference or unreasonable disadvantage to consumers or edge providers. Our proposal would leave the existing transparency requirements undisturbed. The proposed rules would establish clear standards for ISPs to maintain internet openness and would give the Commission a solid basis on which to take enforcement action against conduct that prevents consumers from fully accessing all of the critical services available through the internet. We seek comment on this analysis. In particular, how would these rules ensure that consumers can continue to use their internet connections for healthcare, education, work, commerce, and civic engagement? What would be the potential impact on these uses if the open internet is not secured?

9. We further believe reclassification would enable the Commission to establish a nationwide framework of open internet rules for ISPs. In both the *2015 Open Internet Order* and the *RIF Order*, the Commission expressed concern that potentially inconsistent state laws could increase burdens for ISPs and hinder the broadband market. With the goal of avoiding this, the Commission, in each instance,

attempted to establish a framework that would preempt any inconsistent state laws. However, by reclassifying broadband as a Title I service and eliminating the conduct rules established in the *2015 Open Internet Order*, the *RIF Order* failed to achieve this goal, because the *Mozilla* court vacated the *RIF Order's* blanket preemption of inconsistent state laws, concluding that the Commission "fail[ed] to ground its sweeping Preemption Directive . . . in a lawful source of statutory authority." Thus, instead of creating "a uniform set of federal regulations," the *RIF Order's* hands-off approach to BIAS has led to the existence of state-by-state open internet requirements it sought to avoid. We remain concerned that differing state open internet requirements may be burdensome for ISPs, particularly small ISPs, thus hindering the broadband market, and at the same time, fail to ensure that all consumers are protected from conduct harmful to internet openness. We believe that reclassification will put our authority to preempt any inconsistent state laws on substantially stronger legal footing, thereby enabling the Commission to create a set of open internet standards that will apply nationwide. We seek comment on this analysis.

2. Safeguarding National Security and Preserving Public Safety

10. We tentatively conclude that the demonstrated need to address national security and public safety concerns makes it necessary and timely to revisit the statutory classification of BIAS. The D.C. Circuit criticized the *RIF Order* for giving short shrift to the evidence of public safety concerns in the record before it. The *RIF Remand Order* (86 FR 994 (Jan. 7, 2021)), in declining to reclassify BIAS as a telecommunications service on that basis, largely dismissed such concerns as speculative. But developments in recent years have highlighted national security and public safety concerns arising in connection with the U.S. communications sector, ranging from the security risks posed by malicious cyber actors targeting network equipment and infrastructure to the loss of communications capability in emergencies through service outages. We believe it is now timely for us to reevaluate the classification of BIAS to ensure the Commission can use all of its capabilities to address threats to national security and public safety.

11. *National Security and Law Enforcement.* We tentatively conclude that authority under applicable Title II provisions, reinforced by the Commission's existing authority, would

enhance the Commission's efforts to protect the national defense. The Commission's attention to national security is a responsibility that underlies its other statutory obligations, as evidenced by Congress's statement in the Communications Act that among the reasons it created the Commission was "for the purpose of the national defense." This responsibility was affirmed by Presidential Policy Directive 21, which described how the FCC could, to the extent permitted by law, exercise its authority and expertise to identify and address vulnerabilities in the communications sector. We seek comment generally on how reclassification would advance the Commission's fulfillment of its national security responsibilities and how it specifically would affect the Commission's efforts, in coordination with other agencies, and with ISPs themselves, to protect the nation's communications networks from entities and equipment and services that pose threats to national security and law enforcement.

12. We tentatively conclude that our proposed reclassification would enhance the Commission's ability to protect the nation's communications networks from entities that pose threats to national security and law enforcement pursuant to its authority under section 214 of the Act, and we seek comment on this tentative conclusion. Under section 214, carriers must be authorized by the Commission to provide domestic and international telecommunications service in the United States. Section 214, however, applies to common carriers, and thus does not apply to BIAS under its current classification as an information service, potentially exposing the nation's communications networks to national security and law enforcement threats by entities providing BIAS. In the *China Telecom Americas Order on Revocation and Termination*, *China Unicom Americas Order on Revocation*, and *Pacific Networks and ComNet Order on Revocation and Termination*, the Commission extensively evaluated national security and law enforcement considerations raised by existing section 214 authorizations and determined, based on the record, that the present and future public interest, convenience, and necessity was no longer served by those carriers' retention of their section 214 authority. In particular, the Commission identified national security and law enforcement concerns with respect to those entities' access to Internet Points of Presence (PoPs) (usually located within data centers)

and other harms in relation to the services provided by those entities pursuant to section 214 authorization. The Commission concluded that China Telecom Americas' (CTA) provision of services pursuant to its section 214 authority, "whether offered individually or as part of a suite of services—combined with CTA's physical presence in the United States, CTA's ultimate ownership and control by the Chinese government, and CTA's relationship with its indirect parent [China Telecommunications Corporation], which itself maintains a physical presence in the United States—present unacceptable national security and law enforcement risks to the United States," and it reached similar conclusions in the other proceedings. We believe the same national security and law enforcement threats identified in those proceedings equally exist with respect to entities providing BIAS, and that reclassifying BIAS as a telecommunications service would allow the Commission to use its section 214 authority to address those threats and other threats to our communications networks. We seek comment on this analysis.

13. We also seek comment on other ways the proposed reclassification would enhance the Commission's ability to address national security and law enforcement threats by entities providing BIAS. Are there other specific national security and law enforcement risks in connection with the provision of BIAS resulting from the current classification of BIAS as an information service? Have there been relevant and demonstrable changes with respect to how nation-states have sought to exploit the technological convergence of broadband and other services that present vulnerabilities affecting the national defense? We ask commenters to provide detailed comments on any regulatory requirements designed to address such risks that would newly apply to these entities if the Commission were to reclassify BIAS as a telecommunications service. For instance, could the Commission prohibit ISPs from entering into internet traffic exchange arrangements with certain companies that operate data centers or other Internet Exchange Points in the U.S.? Would reclassification enable the Committee for the Assessment of Foreign Participation in the United States Telecommunications Services Sector to review telecommunications licenses or authorizations meeting appropriate thresholds of foreign ownership or control for national security and law

enforcement concerns? Would reclassification increase law enforcement agencies' ability to seek lawful assistance, including identification and disruption of illegal activity, for investigations involving ISP networks? For mobile BIAS, would reclassification extend the foreign ownership restrictions for wireless common carriers that the Commission applies under section 310(b) of the Act and its implementing rules? In the absence of reclassification, does the Commission have other authority that it could use that is sufficient to protect the nation's communications networks against ISPs that pose national security and law enforcement threats? If so, we ask commenters to indicate the statutory authority and how the Commission could use such authority to ensure national security and law enforcement concerns are addressed.

14. We also seek comment on how reclassification would support the Commission's efforts to safeguard the nation's communications network infrastructure from equipment and services that pose a security threat. Pursuant to its universal service authority in section 254 of the Act, its authority to regulate equipment in sections 302 and 303 of the Act, and new mandates established by Congress through the Secure and Trusted Communications Networks Act of 2019, as amended, and the Secure Equipment Act of 2021 to address communications equipment and service that poses an unacceptable risk to national security, the Commission has undertaken significant efforts to improve supply chain security. In particular, the Commission has: prohibited the use of universal service fund (USF) support to purchase or obtain any equipment or services produced or provided by companies posing a national security threat; prohibited the use of federal subsidies administered by the Commission and used for capital expenditures to provide advanced communications service to purchase, rent, lease, or otherwise obtain such equipment or services; created and maintained a list of communications equipment and services that pose an unacceptable risk to the national security ("covered equipment and services"); established the Secure and Trusted Communications Networks Reimbursement Program (Reimbursement Program) to reimburse the costs providers incur to remove, replace, and dispose of covered Huawei and ZTE equipment and services from their networks; and prohibited the authorization of equipment that poses a

threat and the marketing and importation of such equipment in the United States. We seek comment on how reclassification may allow the Commission to further these efforts. For instance, would reclassification give the Commission additional authority to restrict a larger class of entities from using equipment and services that pose a threat? Additionally, would reclassification give the Commission more robust authority to require more entities to remove and replace covered Huawei and ZTE communications equipment and services? Could the Commission prohibit the use of covered equipment or services in any network infrastructure that is used to route or transmit communications, including data centers and internet exchange facilities? Could we use the additional authority under Title II to prohibit carriers from interconnecting with other carriers who have a PoP within the U.S. and its territories that use such equipment and services? Are there other ways Title II authority could be used to address national security threats arising from equipment and services outside the scope of our prior actions? How does the Commission's role fit with that of other agencies that help to address potential security threats from foreign actors to the nation's communications network and equipment, and how would enhancements to the Commission's regulatory authority as a result of reclassification bolster that role?

15. *Cybersecurity.* We believe that returning BIAS to its telecommunications service classification would reinforce the Commission's authority to support its efforts to enhance cybersecurity in the communications sector, and we seek comment on this tentative conclusion. Among such efforts are those pursuant to Presidential Policy Directive 21, which tasks the Commission with "identifying communications sector vulnerabilities and working with industry and other stakeholders to address those vulnerabilities . . . [and] to increase the security and resilience of critical infrastructure within the communications sector. . . ." The Commission is actively involved in federal interagency cybersecurity planning, coordination, and response activities. However, the current classification of BIAS limits the regulatory and operational actions that the Commission can take to address cyber incidents impacting the communications sector, as well as other critical infrastructure sectors. For example, the Commission has limited

authority to require providers of non-Title II services (e.g., ISPs) to adopt cybersecurity standards or performance goals, which inhibits the Commission's ability to protect U.S. communications services and infrastructure from cyberattacks and to ensure that communications devices and equipment do not pose security risks to other critical infrastructure sectors. While the Commission will continue to work closely with ISPs to secure their networks, reclassification of BIAS as telecommunications service would provide the Commission with the authority to act in the absence of voluntary action by ISPs or in cases of emergency or significant risk. We tentatively conclude that the proposed reclassification could address this issue by enhancing the Commission's cybersecurity authority, and we seek comment on this tentative conclusion.

16. Another initiative is the Commission's inquiry into vulnerabilities threatening the security and integrity of the Border Gateway Protocol (BGP), which impacts "the transmission of data from email, e-commerce, and bank transactions to interconnected Voice-over Internet Protocol (VoIP) and 9-1-1 calls." The Commission noted that "BGP's initial design, which remains widely deployed today, does not include security features to ensure trust in the information that it is used to exchange," which allows a bad network actor to "deliberately falsify BGP reachability information to redirect traffic to itself or through a specific third-party network, and prevent that traffic from reaching its intended recipient." Would reclassification provide the Commission with additional authority to address BGP vulnerabilities, including, for example, by requiring providers to deploy solutions to address BGP vulnerabilities in the absence of voluntary action?

17. In what other ways could reclassification bolster the Commission's authority to address cybersecurity in the communications sector? For instance, would it strengthen the Commission's ability to establish rules mandating that service providers implement cybersecurity practices and risk management plans? Similarly, would reclassification permit the Commission to consider cybersecurity in its annual inquiry under section 706 of the Telecommunications Act 1996? For example, could the Commission determine that only broadband services that meet certain cybersecurity standards constitute "advanced telecommunications capability"? To what extent would reclassification allow

us to address threats related to the DNS, which enables domain names to resolve to the correct IP addresses, and other naming protocols? Could the Commission use Title II authority to require ISPs to block IP addresses that originate malicious software and ransomware? Would reclassification allow the Commission to mandate the adoption of Communications Security, Reliability, and Interoperability Council (CSRIC) best practices directed to ISPs and audit or enforce the implementation? Would it likewise enable the Commission to use Title II authority to require ISPs to implement or certify to their implementation of network security practices, such as those recommended in Executive Order 14028, the National Cybersecurity Strategy, or related cybersecurity measures recommended by the Deputy National Security Advisor, the Office of National Cyber Director, and other government agencies or intergovernmental agencies, such as the Federal Acquisition Security Council (FASC)? Would reclassification give the Commission sufficient authority to establish cybersecurity requirements for other components that facilitate communications between end points, such as internet exchange facilities and data centers that route communications and deliver applications? Could the Commission rely on authority in section 218 to require more comprehensive cyber incident reporting? Would reclassification permit the Commission to rely on a broader range of regulatory tools to ensure network and service reliability and better support an effective 911 and emergency preparedness efforts?

18. *Public Safety.* We next tentatively conclude that reclassifying BIAS as a telecommunications service would enable the Commission to advance several public safety initiatives, and we seek comment on this tentative conclusion. As the Commission recognized in the *RIF Remand Order*, "[a]dvancing public safety is one of our fundamental obligations." Indeed, the Commission is "required to consider public safety by . . . its enabling act." The *Mozilla* court explained that when "'Congress has given an agency the responsibility to regulate a market such as the telecommunications industry that it has repeatedly deemed important to protecting public safety,' then the agency's decisions 'must take into account its duty to protect the public.'" We believe that the Commission's responsibility to address public safety is becoming increasingly important as the severity and frequency of natural

disasters are on the rise. We tentatively conclude that reclassification would enhance the Commission's jurisdiction over ISPs, which it could use in combination with other statutory authority to ensure BIAS meets the needs of public safety entities and individuals when they use those services for public safety purposes. We seek comment on this tentative conclusion and analysis below. We note that the *RIF Order* concluded that Title I classification advances, and does not harm, public safety, primarily based on its overarching policy rationales for reversing Title II classification. We seek comment on the *RIF Order's* policy rationales and framework for protecting against harms elsewhere in this *Notice*, and we invite commenters to address whether those rationales sufficiently advance public safety. In particular, we invite comment on whether the Commission's ability to adopt *ex ante* regulations would provide better public safety protections than an *ex post* enforcement framework.

19. We seek comment on how our proposed reclassification would enable the Commission to support public safety officials' use of BIAS for public safety purposes. As a general matter, broadband services play an important role in how public safety officials communicate with each other and how they deliver and receive information from the public. Although much of the communications between public safety entities and first responders take advantage of enterprise-level dedicated public safety broadband services, they often rely on commercial broadband services to communicate during emergency situations. Increasingly, public safety entities rely on retail BIAS to access various databases, share data with emergency responders, and stream video into 911 and emergency operations centers. We also are aware that public safety officials often use services accessible over-the-top (OTT) of broadband connections, such as social media, to communicate important and timely information to the public and to gain valuable information from the public and build on-the-ground situational awareness. We seek comment on the extent to which public safety officials rely on BIAS for public safety purposes and on our tentative conclusion that reclassification would give us additional jurisdiction to advance the existing uses of BIAS by these officials.

20. We also seek comment on how reclassification could further other public safety initiatives. For instance, while the Commission has taken important steps to improve the

effectiveness of Wireless Emergency Alerts (WEAs), would classification of BIAS as a telecommunications service enable the Commission to make the nation's alert and warning capabilities more effective and resilient by, for instance, requiring ISPs to transmit emergency alerts to their subscribers? More recently, the Commission modernized its priority services rules to authorize service providers to offer, on a voluntary basis, priority treatment of data, video, and IP-based voice services for public safety personnel and first responders, including by removing outdated requirements that may impede the use of IP-based technologies. Would reclassification allow the Commission to go a step further by requiring service providers to offer prioritized routing for all IP-based services and prioritized restoration for all network infrastructure? Could the Commission require ISPs to participate in Telecommunications Service Priority (TSP), Government Emergency Telecommunications Service (GETS), and Wireless Priority Service (WPS)? How, if at all, would reclassification allow the Commission to expand the applicability, and therefore the public safety benefits, of the Communications Assistance for Law Enforcement Act (CALEA) requirements?

21. We tentatively conclude that BIAS also plays an increasingly important role in allowing the public to communicate with first responders during emergency situations and seek comment on this tentative conclusion. In the *RIF Remand Order*, the Commission noted that retail broadband services are used to translate communications with 911 callers and patients in the field and to deliver critical information about 911 callers that is not delivered through the traditional 911 network. Are there other ways in which BIAS can or does supplement traditional 911 communications? The Commission has undertaken various efforts in recent years to improve how the public reaches and shares information with emergency service providers. What effect, if any, would Title II classification of BIAS have on these and future efforts? Would reclassification enhance the Commission's jurisdiction to improve the flow of voice communications, photos, videos, text messages, real-time text (RTT), or any other type of communication from the public to emergency service providers through Next Generation 911 or over the use of Wi-Fi calling to reach emergency service providers? If so, how? We also believe BIAS is critical when used by

individuals with disabilities to communicate with public safety services, and the Commission has taken several steps to improve access to IP-enabled 911 communications for people with disabilities. How will reclassification fortify our existing jurisdiction to ensure these communications are not interrupted or degraded? To what extent does or will BIAS support alternatives to 911 communications, and will reclassification help to ensure that BIAS-based emergency communications meet certain reliability and security standards? Would reclassification of BIAS enhance the access to, availability of, and service quality for IP-based communication services used by people with disabilities in emergencies, including the IP-based forms of telecommunications relay services (TRS)?

22. BIAS is also critical for allowing the public to easily and efficiently access public safety resources and information. In particular, members of the public often rely on BIAS during emergencies to enable them to find and receive potentially life-saving information. As the Commission stated in the *RIF Remand Order*, "consumers regularly use their mobile devices and broadband connections 'to access broadly available information regarding threatening weather, shelter-in-place mandates, ongoing active-shooter scenarios, and other matters essential to public safety.'" The COVID-19 pandemic, severe natural disasters, and other incidents have demonstrated the importance of the public being able to access public safety information using their BIAS connections. We seek comment on how reclassification would allow the Commission to ensure that the public can access life-saving public safety resources and information using BIAS.

23. Furthermore, BIAS is important for public safety communications that occur outside of emergencies. The Commission observed in the *RIF Remand Order* that the COVID-19 pandemic demonstrated that many Americans rely on telemedicine over mass-market broadband services for routine health care, triage, and basic health advice, and that the ability of 5G networks to transmit massive amounts of data in real time will also help enable new applications for advanced communications between the public and health care officials, such as through the use of wireless sensors to for remote patient monitoring and data transmission so doctors can identify problems before they become emergencies, and through the

development of connected ambulance services for faster patient transport. BIAS connections are also playing a more important role in home safety and security as consumers increasingly purchase home security and monitoring systems that use connected devices to monitor, deter, and address theft, breaking and entering, and other home threats and BIAS connections are increasingly important for in-home monitoring of individuals who are elderly or disabled. We seek comment on the impact that reclassification may have on these and other public safety applications that rely on BIAS.

24. Network Resiliency and Reliability. We tentatively conclude that reclassifying BIAS as a telecommunications service would enhance the Commission's ability to ensure the nation's communications networks are resilient and reliable, and we seek comment on this tentative conclusion. For instance, under the Commission's Network Outage Reporting System (NORS), qualifying communications providers are required to report to the Commission network outages that satisfy certain criteria, and the Commission uses this information to advance network resiliency and reliability. Because this reporting requirement has generally been limited to outages affecting voice services, the Commission has historically lacked reliable outage information for today's modern, essential broadband networks, which inhibits the Commission from fully ensuring the resiliency and reliability of those networks. Would reclassification support the Commission's ability to expand the scope of NORS to require ISPs to submit outage reports in response to service incidents that cause outages or the degradation of communications services, such as cybersecurity breaches, wire cuts, infrastructure damages from natural disaster, and operator errors or misconfigurations? Under rules implemented in 2022, Federal, State, Tribal and Territorial public safety agencies are eligible to obtain direct read-only access to outage information filed in NORS and the Disaster Information Reporting System (DIRS) for their jurisdictions. Would reclassification and enhanced NORS reporting afford public safety officials greater transparency during outages and disasters to assess the operational status of networks for dissemination of emergency information or to assess where support is needed? Would it support reliability efforts for calls and texts to 911 and the 988 Suicide and Crisis Lifeline? How, if at all, would

reclassification allow us to further our goal to improve the reliability of wireless networks? Would broadband reclassification give the Commission additional authority to facilitate the use of Wi-Fi calling during emergencies or network outages, and if so, to what extent could the Commission apply reliability standards for Wi-Fi calling? Are there other ways that reclassification of BIAS would help us improve network resiliency and reliability, such as requirements for network upgrades and changes, rules relating to recovery from network outages, and improving our incident investigation and enforcement authority? What impact would any such actions have on ISPs, particularly small ISPs?

3. Protecting Consumers' Privacy and Data Security

25. Since before the adoption of the 1996 Act, the Commission has consistently protected consumers from activities that undermine their ability to use communications services freely, fairly, and free from abuse by bad actors. As the communications industry has changed and the tactics used by bad actors have evolved, so too have the Commission's efforts. The current information service classification of BIAS, however, appears to inhibit the Commission's ability to fully ensure that consumers are protected from harmful conduct when they use communications services today and able to utilize these services in a fair and secure manner. We believe that classification of BIAS as a telecommunications service could support the Commission's efforts to protect consumers' privacy and data security and relieve them from unlawful robocalls and robotexts. We seek comment on this view.

26. Privacy and Data Protection. We tentatively conclude that reclassification of BIAS as a telecommunications service would support the Commission's efforts to safeguard consumers' privacy and data security, and we seek comment on this tentative conclusion. Highlighting the Commission's important role in this area, earlier this year, Chairwoman Rosenworcel established the FCC Privacy and Data Protection Task Force to coordinate the agency's efforts to protect against and respond to consumer privacy infringements and data breaches by communications providers. The Commission's efforts will rely on, among other things, its authority under section 222 of the Act. That provision governs telecommunications carriers' protection and use of information obtained from their customers or other carriers, and calibrates the protection of

such information based on its sensitivity. Congress imposed a duty on every telecommunications carrier to protect the confidentiality of its customers' proprietary information, according the category of customer proprietary network information (CPNI) the greatest level of protection.

27. When the Commission classified BIAS as a telecommunications service in the 2015 *Open Internet Order*, it declined to forbear from applying section 222 of the Act, citing the need to protect consumers' privacy regardless of whether they communicate via broadband or telephone services. The *RIF Order* eliminated these statutory protections for broadband customers and surrendered the Commission's authority over ISPs' privacy and data protection practices. We believe that ISPs are situated to collect vast swaths of information about their customers, including personal information, financial information, and information regarding subscriber online activity. We further believe that consumers currently may not fully comprehend—and therefore may not be able to meaningfully consent to—ISPs' collection, processing, and disclosure of customer information, including potentially through the use of artificial intelligence models. We are also concerned that, absent statutory and regulatory requirements to do so, ISPs may not adopt adequate administrative, technical, physical, and procedural safeguards to protect their customers' data. Indeed, ISPs appear to continue to be attractive targets to hackers and other bad actors, putting BIAS customer data at significant risk of compromise. We seek comment on these views.

28. Based on the foregoing, we once again propose herein not to forbear from section 222. Returning BIAS to its telecommunications service classification would bring ISPs back under the section 222 privacy and data security framework, and therefore restore those protections for consumers. Additionally, classifying BIAS as a telecommunications service could support a consistent privacy and data security framework for voice and data services, which we believe consumers often subscribe to from one provider in a bundle and perceive to be part of the same service, particularly for mobile services. We seek comment on this proposed analysis.

29. We further believe that, in addition to protecting consumers, reclassifying BIAS as a telecommunications service and declining to forbear from section 222 would protect information concerning entities that interact with ISPs. Section

222 places an obligation on telecommunications carriers to protect the confidentiality of the proprietary information of and relating to other telecommunication carriers (including resellers), equipment manufacturers, and business customers. We seek comment on how reclassification of BIAS will affect telecommunications carriers and equipment manufacturers who interact with ISPs, as well as the customers those entities serve, such as content creators and edge providers. Would these protections also have national security benefits by, for example, deterring ISPs from contracting with foreign companies that may pose a national security threat or are owned by, controlled by, or subject to the jurisdiction or direction of foreign adversaries? Would these section 222 requirements create a meaningful burden on ISPs, especially small ISPs?

30. *Robocalls and Robotexts.* We seek comment on whether reclassification can serve to enhance the Commission's authority to support consumer privacy by combating illegal robocalls and robotexts. In recent years, the Commission has undertaken extensive efforts to address these invasive communications, including by establishing rules for call authentication, robocall mitigation, and call blocking; expanding requirements and restrictions to robotexts; and taking enforcement action against providers who originate and transport these communications. Yet bad actors continue to evolve their techniques to find new ways to interrupt consumers and perpetuate fraud. We note that many illegal robocalls are transmitted via VoIP networks and many illegal robotexts are transmitted by OTT messaging services (e.g., iMessage, WhatsApp, and Signal). We seek comment on the extent to which Title II classification would help the Commission in its efforts to combat these practices. Would Title II classification grant the Commission oversight to reach a larger class of entities, particularly for messages and calls delivered via broadband networks? For example, to the extent robotext scams include links to spoofed websites designed to defraud consumers, would reclassification allow us to require that ISPs block traffic to IP addresses associated with those websites? Would reclassification allow the Commission to apply new requirements and restrictions beyond what it can achieve under the sources of authority the Commission has relied on to date for its robocall and robotext actions? If so, how? Are there other ways in which reclassification

would help the Commission combat illegal robocalls and robotexts? How would this affect ISPs, especially small ISPs?

4. Supporting Access to Broadband Internet Access Service

31. From the Commission's inception, it has played a critical role in facilitating the proliferation of communications networks and ensuring that consumers have access to the services these networks provide. While these efforts are crucial to the Commission's mission, we believe that the information service classification of BIAS has limited the Commission's efforts to achieve these goals for the communications service that has become fundamental to consumers' everyday lives. Classifying BIAS as a telecommunications service will enable the Commission to better support the deployment of wireline and wireless infrastructure, advance universal service, and increase the accessibility of communications networks. We seek comment on this tentative conclusion. We also seek comment on whether, and how, we could leverage our proposed reclassification in other proceedings to further encourage access to BIAS by all consumers.

32. *Wireline and Wireless Infrastructure.* We seek comment on the public policy impact of our proposed reclassification of BIAS on the Commission's goals to support investment in and deployment of wireline and wireless infrastructure. For example, section 224(b) of the Act grants the Commission clear authority to regulate the rates, terms, and conditions of pole attachments by a cable television system or provider of telecommunications service. Since 2011, the Commission has undertaken a series of reforms with the goal of improving access to poles to, among other things, help speed the deployment of broadband infrastructure. However, in the *RIF Order*, the Commission effectively eliminated section 224 pole attachment rights of broadband-only providers as a result of its classifying broadband as an information service. In 2020, following the *Mozilla* court's direction that the Commission "grapple with the lapse in legal safeguards" for broadband-only providers that resulted from the *RIF Order*, the Commission concluded that while there were potentially adverse effects to this class of providers resulting from the loss of pole attachment rights, the benefits of returning BIAS to an information service classification outweighed any drawbacks. We tentatively conclude that the Commission erred in its 2020

analysis and believe that reclassifying BIAS as a telecommunications service will help support the Commission's goals to facilitate broadband deployment, and we seek comment on this tentative conclusion. How has the market for broadband-only ISPs changed since 2015, in particular for new entrants and those ISPs seeking infrastructure access via pole attachments? What effect has the Commission's elimination of pole attachment rights for broadband-only ISPs had on the deployment of broadband, particularly to unserved or underserved areas? How would reinstatement of pole attachment rights benefit or burden ISPs, particularly small ISPs? As the Commission has recognized, Congress recently has made available unprecedented levels of federal funding for broadband buildout, including a variety of programs administered by the National Telecommunications and Information Administration (NTIA), including the Broadband, Equity, Access, and Deployment Program (BEAD), the State Digital Equity Capacity Grant Program and its federal counterpart, the Middle Mile Infrastructure Grant Program, and the Tribal Broadband Connectivity Program. We believe that ensuring the protections of section 224 are restored to all ISPs, including broadband-only providers, will pave the way for quicker and less expensive broadband deployment, thereby enabling that funding to go as far as possible. We seek comment on that view.

33. We also seek comment on how reclassifying BIAS as a telecommunications service and classifying mobile BIAS as a commercial mobile service will impact the Commission's authority over wireless infrastructure. Although section 332(e)(7) of the Act, and Commission interpretation thereof, regulate state and local authority over the placement, construction, and modification of personal wireless service facilities, are there ways in which classifying broadband as a telecommunications service can further advance the Commission's goals to "improve service quality and lower prices for consumers" for broadband access? Finally, we also seek comment on how reclassification of BIAS as a telecommunications service may affect the Commission's application of the Act's preemption frameworks in sections 253(d) and 332(c)(3) regarding infrastructure used to provide broadband-only services.

34. *Universal Service.* We tentatively conclude that classifying BIAS as a telecommunications service will strengthen our policy initiatives to

support the availability and affordability of BIAS through USF programs, and we seek comment on this tentative conclusion. The Communications Act defines universal service as an “evolving level of telecommunications services,” and charges the Commission with periodically establishing such services. BIAS is now clearly an essential service upon which consumers rely, and we believe that placing BIAS outside of the Commission’s Title II authority weakens the Commission’s ability to deliver universal service support for that essential service, especially in rural areas. We seek comment on this view. In *Mozilla*, the court found that the Commission failed to explain how its universal service authority over telecommunications carriers in section 254(e) of the Act could extend to ISPs without BIAS classified as a telecommunications service for purposes of the Lifeline program, and it remanded the issue back to the Commission. Although the Commission conceded in the *RIF Remand Order* that under a Title I regime, BIAS could not be a section 254(c) supported service because section 254(c) defines universal service as an “evolving level of telecommunications services,” it nevertheless asserted a theory under section 254(e) to enable Lifeline support for BIAS offered by eligible telecommunications carriers (ETCs), similar to the theory under which the Commission has funded broadband-capable networks through the High-Cost Program.

35. We tentatively conclude that reclassifying BIAS as a telecommunications service will bolster the Commission’s ability to provide High-Cost and low-income support, and seek comment on this tentative conclusion. Among other things, we believe that reclassifying BIAS as a telecommunications service could eventually allow broadband-only providers to once again participate in the Lifeline program, and would give the Commission the ability to adjust certain service obligations for ETCs. We further believe that reclassifying BIAS as a telecommunications service would enhance our ability to connect low-income households in rural areas, including through the Link Up program, which provides support to reduce connection charges for eligible residents of Tribal lands who subscribe to telecommunications service from a telecommunications carrier receiving high-cost support. We seek comment on these views, including how this may

impact ISPs, especially smaller ISPs and ISPs serving rural areas.

36. We also tentatively conclude that classification of BIAS as a telecommunications service protects public investments in BIAS access and affordability. Since the inception of BIAS, the Commission, along with other federal and state entities, have made significant investments to ensure that BIAS networks reach all consumers and are affordable, particularly through the Affordable Connectivity Program. These efforts increased dramatically since the beginning of the COVID-19 pandemic as Congress directed a large influx of funding in broadband deployment and consumer access. We believe our proposed reclassification will enable the Commission to protect these investments on an ongoing basis by enabling the Commission to ensure the connections supported by these funds align with the other policy goals we detail here: advancing national security and public safety and protecting consumers. In doing so, we believe we can ensure these connections continue to achieve their primary purpose of benefiting consumers. We seek comment on these views.

37. *Multiple-Tenant Environments (MTEs)*. We seek comment on how reclassification may impact the Commission’s authority to take action to promote tenant choice and competition in the provision of broadband services to the benefit of those who live and work in MTEs. The Commission has long prohibited agreements between providers of certain communications services and MTE owners that grant the provider exclusive access and rights to provide service to the MTE. In 2019, the Commission released a Notice of Proposed Rulemaking that sought comment about these practices and others that could have the effect of dampening competition or deployment, and on the Commission’s authority to target different kinds of entities, including telecommunications providers, MVPDs, and broadband-only providers. In 2022, relying on sections 201 and 628 of the Act, the Commission adopted rules to prohibit telecommunications carriers and MVPDs from entering into exclusive and graduated revenue sharing agreements, and to require that telecommunications carriers and MVPDs include disclaimers on marketing materials distributed to MTE tenants that inform tenants of the existence of an exclusive marketing arrangement, among other things. The Commission determined that it was appropriate to “proceed incrementally,” but cautioned that it would “continue to monitor competition in MTEs to

determine whether we should alter the scope of our rules to cover other providers,” including broadband-only providers. We seek comment whether reclassification of BIAS would provide additional authority for the Commission to further promote competition and consumer choice in communications services in MTEs.

38. *Free Expression*. We believe BIAS connections promote diversity of viewpoints by allowing traditionally disadvantaged communities to express themselves outside of traditional media. Social media websites and other platforms particularly have become important platforms for free expression, political engagement, and social activism. Indeed, Congress has recognized that “the internet offer[s] a forum for a true diversity of political discourse, unique opportunities for cultural development, and myriad avenues for intellectual activity.” Accordingly, we invite comment on any free expression-related considerations associated with classifying BIAS as a telecommunications service and any benefits or drawbacks of such classification for relevant communications.

39. *Digital Equity*. The Commission, as part of its continuing effort to advance digital equity for all, including people of color, persons with disabilities, persons who live in rural or Tribal areas, and others who have been historically underserved, marginalized, and adversely affected by persistent poverty and inequality, invites comments on any equity-related considerations and benefits (if any) that may be associated with the proposals and issues discussed herein. Specifically, we seek comment on how our proposals may promote or inhibit advances in diversity, equity, inclusion, and accessibility, as well as the scope of the Commission’s relevant legal authority.

5. Access for Persons With Disabilities

40. We seek comment on how reclassification may impact the Commission’s authority to ensure that individuals with disabilities can communicate using BIAS. People with disabilities “increasingly rely upon internet-based video communications, both to communicate directly (point-to-point) with other persons who are deaf or hard of hearing who use sign language, and through video relay service.” Section 716 of the Act requires that interoperable video conferencing services be accessible, regardless of how those services are transmitted—by broadband or otherwise—and also requires that text messaging, email,

other electronic messaging services, and interconnected and non-interconnected VoIP services, be accessible. In addition, section 718 of the Act requires that internet browsers installed on mobile phones must be accessible to people who are blind or visually impaired to ensure the accessibility of mobile broadband. How would reclassification affect the Commission's ability to implement and enforce these provisions? We seek comment on the impact, if any, that reclassification may have on the Commission's goals to ensure that BIAS remains accessible to individuals with disabilities. For instance, if the Commission declines to forbear from section 255 of the Act, as we propose below, would that provide additional authority for the Commission to require that ISPs' telecommunications services and equipment be accessible to and usable by people with disabilities?

6. The RIF Order's Policy Rationales Did Not Justify Reversing the Classification of Broadband Service

41. In the *RIF Order*, the Commission's primary policy justifications for reclassifying BIAS as a Title I service were its conclusions regarding the alleged harm to investment by Title II classification and the benefits to investment by Title I classification. However, the *RIF Order* gave little weight to the *2015 Open Internet Order's* showing that investment continued for broadband services that were regulated as Title II common carrier services, including digital subscriber line (DSL), which was regulated as such until 2005.

42. We tentatively conclude that the Commission's conclusions in the *RIF Order* that ISP investment is closely tied to the classification of BIAS were unsubstantiated. Instead, we agree with the *RIF Order's* statement that "owners of network infrastructure make long-term, irreversible investments," which we believe makes it unlikely that changes in investment shortly following the adoption of each *Order* were actually related to the effects of each *Order*. We seek comment on this belief. We note that the Commission received conflicting viewpoints regarding the actual effect of Title II classification on investment. Instead of concluding, as the *2015 Open Internet Order* did, that conflicting viewpoints concerning the effect of classification on investment prevented the Commission from being certain which viewpoint was more accurate, the Commission chose to rely on certain studies purporting to show that Title II classification in the *2015 Open Internet Order* hurt investment to reach its conclusion about the effect of

Title II classification on investment, even as the Commission seemed to recognize the weaknesses of those studies. Additionally, similar to the *2015 Open Internet Order* record, the *RIF Order's* record showed opposing views on the likely long-term effects of the Commission's regulatory decisions on investment. We believe, as the Commission did in 2015, that "no party [could] quantify with any reasonable degree of accuracy how either a Title I or a Title II approach may affect future investment." As such, we tentatively conclude that changes in ISP investment following the adoption of each *Order* were more likely the result of other factors unrelated to the classification of BIAS, such as broader economic conditions at the time, technology changes such as the transition from 3G to 4G LTE networks, and ISPs' general business development decisions. We seek comment on this tentative conclusion. Is there any evidence that ISP investment is closely tied to the regulatory classification of BIAS? Can any declines or increases in investment following adoption of either the *2015 Open Internet Order* or the *RIF Order* be directly attributed to the classification of BIAS in those *Orders*? What other factors besides the regulatory classification of broadband impact investment decisions? We invite parties to comment on the strength of any evidence submitted on these issues.

43. Notwithstanding these tentative conclusions, we seek comment generally on how, and the extent to which, our proposed classification of BIAS as a telecommunications service will affect ISPs' investment incentives today. How will it affect small ISPs? Is it possible to evaluate ISPs' investment incentives independent of any incentives and investment activity that may result from the billions of dollars in federal and state funding that has been and will be provided to ISPs to support infrastructure deployment and broadband connectivity?

C. Scope of Reclassification

44. *Broadband Internet Access Service*. We propose to continue using the definition of "broadband internet access service" as a "mass-market retail service by wire or radio that provides the capability to transmit data to and receive data from all or substantially all internet endpoints, including any capabilities that are incidental to and enable the operation of the communications service, but excluding dial-up internet access service," as well as "any service that the Commission finds to be providing a functional equivalent of the service described [in

the definition] or that is used to evade the protections set forth" in part 8 of the Commission's rules. The Commission has chiefly retained this definition since it first defined broadband internet access service in the *2010 Open Internet Order* (76 FR 60754 (Sept. 30, 2011)). We seek comment on whether there is any reason to depart from this definition of broadband internet access service.

45. Similarly, we propose to continue to define "mass market" as the Commission did in the *2015 Open Internet Order* and *RIF Order*—"a service marketed and sold on a standardized basis to residential customers, small businesses, and other end-user customers such as school and libraries." In addition to including broadband internet access service purchased with support from the E-Rate, Lifeline, and Rural Health Care programs, as well as any broadband internet access service offered using networks supported by the Connect America Fund or the Rural Digital Opportunity Fund, we propose that such "mass market" services would also include any broadband internet access service purchased with support from the Affordable Connectivity Program and the Connected Care Pilot Program. Consistent with the *2015 Open Internet Order* and *RIF Order*, the proposed definition excludes enterprise service offerings, which are typically offered to larger organizations through customized or individually negotiated arrangements, and special access services. We seek comment on our proposal. Should we apply the modified definition of broadband internet access service used for the broadband label requirement in this context to make clear that enterprise services are excluded even when they are supported by the Commission's broadband access and affordability programs?

46. We also propose to remain consistent with the Commission's conclusions in prior *Orders* to include in the term "broadband internet access service" those services provided over any technology platform, including but not limited to wire, terrestrial wireless (including fixed and mobile wireless services using licensed or unlicensed spectrum), and satellite. We seek comment on this proposal. We continue to intend broadband internet access service "to cover the entire universe of internet access services at issue in the Commission's prior broadband classification decisions, as well as all other broadband internet access services offered over other technology platforms that were not addressed by prior classification orders." As in prior orders, we propose that "fixed"

broadband internet access service refers to a broadband internet access service that serves end users primarily at fixed endpoints using stationary equipment, such as the modem that connects an end user's home router, computer, or other internet access device to the internet, and encompasses the delivery of fixed broadband service over any medium, including various forms of wired broadband service (e.g., cable, DSL, fiber), fixed wireless broadband service (including fixed services using unlicensed spectrum), and fixed satellite broadband service. Likewise, we propose that "mobile" broadband internet access service refers to a broadband internet access service that serves end users primarily using mobile stations, and includes, among other things, services that use smartphones or mobile-network-enabled tablets as the primary endpoints for connection to the internet, as well as mobile satellite broadband service. Consistent with the existing definition, we propose to include within the definition of broadband internet access service any such service, regardless of whether the ISP leases or owns the facilities used to provide the service. We seek comment on our proposals.

47. We also propose that to the extent coffee shops, bookstores, airlines, private end-user networks such as libraries and universities, and other businesses acquire broadband internet access service from an ISP to enable patrons to access the internet from their respective establishments, provision of such service by the premise operator would not itself be considered BIAS unless it was offered to patrons as a retail mass-market service. Likewise, when a user employs, for example, a wireless router or a Wi-Fi hotspot to create a personal Wi-Fi network that is not intentionally offered for the benefit of others, we believe he or she is not offering a broadband internet access service under our proposed definition, because the user is not marketing and selling such service to residential customers, small businesses, and other end-user customers. Such proposed findings are consistent with the manner in which the Commission has historically defined broadband internet access service, and we seek comment on any changed circumstances that would justify a different outcome.

48. We seek comment on whether there are other types of services we should address in defining the scope of broadband internet access service. For example, with respect to 5G deployments, new network architectures and uses of the technology are emerging, including some that offer

both private and public 5G connectivity, like 5G Internet of Things (IoT). We seek comment on how we should view these services for purposes of defining broadband internet access service—are these types of services best viewed as enterprise services excluded from the definition of broadband internet access service or should they be treated as non-BIAS data services?

49. *Non-BIAS Data Services.* We also seek comment on whether to continue excluding non-BIAS data services (formerly "specialized services") from the scope of broadband internet access service. In the *2015 Open Internet Order*, the Commission explained that certain services offered by ISPs that share capacity with broadband internet access service over ISPs' last-mile facilities were not broadband internet access service and provided examples and characteristics of services that, at that time, likely fit within this category of non-BIAS data services. The Commission defined characteristics of these services, explaining that they (1) are not used to reach large parts of the internet; (2) are not a generic platform, but rather a specific "application level" service; and (3) use some form of network management to isolate the capacity used by these services from that used by broadband internet access service. We seek comment on whether these characteristics still appropriately describe non-BIAS data services. Are there any other characteristics of such services on which we should rely? Are these still appropriate examples of data services that are outside the scope of broadband internet access service? Have the distinctions between mass-market retail and non-BIAS data services changed, particularly from a consumer, technical, or other perspective, to warrant reconsideration of this exclusion?

50. We also tentatively conclude that we should maintain the *2015 Open Internet Order's* approach to continue closely monitoring the development of non-BIAS data services. In the *2015 Open Internet Order*, the Commission emphasized that non-BIAS data services might still be subject to enforcement action if the Commission determined that: (1) a particular service is providing the functional equivalent of BIAS; (2) an ISP claimed or attempted to claim that a service that is the equivalent of BIAS is a non-BIAS data service not subject to any rules that would otherwise apply; or (3) a non-BIAS data service offering is undermining investment, innovation, competition, and end-user benefits. We are especially concerned about activities that may undermine national security and public safety, consumers' use of

broadband internet access service, and the ability of consumers to access broadband internet access service. We also share the Commission's concern in the *2015 Open Internet Order* "that over-the-top services offered over the internet are not impeded in their ability to compete with other data services." We seek comment on our proposed approach.

51. *Internet Traffic Exchange.* We next tentatively conclude that broadband internet access service, as we propose to define it, includes arrangements for the exchange of internet traffic by an edge provider or an intermediary with the ISP's network, referred to as internet peering, traffic exchange or interconnection, to the extent they provide the "capability to transmit data to and receive data from all or substantially all internet endpoints . . . [and] enable the operation of the communications service." We seek comment on this position. As the Commission explained in 2015, "[t]he representation to retail customers that they will be able to reach 'all or substantially all internet endpoints' necessarily includes the promise to make the interconnection arrangements necessary to allow that access" and "the promise to transmit traffic to and from those internet endpoints back to the user." We tentatively conclude that the Commission's findings and rationale regarding internet traffic exchange in the *2015 Open Internet Order*—that such "edge service" is derivative of broadband internet access service and constitutes the same traffic—remain valid, and we seek comment on our tentative conclusion. We observe that the *RIF Order* does not appear to dispute the Commission's previous conclusion that broadband internet access service includes this "edge service," and instead determined that internet traffic exchange arrangements were appropriately regulated as an information service by virtue of its conclusion that broadband internet access service is an information service. We seek comment on whether there are circumstances under which "edge service" would not be best characterized as a part of broadband internet access service, and how commenters would characterize that service, given the *Verizon* court's conclusion that, in addition to the retail service provided to consumers, "broadband providers furnish a service to edge providers, thus undoubtedly functioning as edge providers' 'carriers.'" We seek comment on the *Verizon* court's characterization of broadband internet access service in

relation to service provided to both consumers and edge providers. How, if at all, has edge service changed in relation to broadband internet access service? Are there any grounds to depart from the Commission's prior treatment of edge service and edge providers as a "derivative" service of broadband internet access service?

52. We also seek comment on whether we should exclude any particular services or functions from the definition of broadband internet access service. For example, should we exclude virtual private network (VPN) services, web hosting services, and/or data storage services from the scope of broadband internet access service? For purposes of this NPRM, "data storage services" refers to the provision of access to data storage platforms. The term is distinct from "caching," which involves the temporary storage of data for purposes of delivering content to specific endpoints. While the Commission has previously excluded content delivery networks (CDNs) and internet backbone services, including transit arrangements, we seek comment whether a different approach may be warranted because these services are integral to transmitting data and delivering communications to internet endpoints, thus falling within the proposed definition of "broadband internet access service." We observe that these services directly or indirectly provide data on behalf of their clients. For example, while VPN servers reflect one end-point of an underlying communication stream, they act as a launching pad to forward traffic to the destination identified by the user. We seek comment on this proposed analysis. Do these services fall within the scope of broadband internet access service, as we propose to define it?

D. Classifying Broadband Internet Access Service as a Telecommunications Service

53. The 1996 Act enacted the "telecommunications service" and "information service" definitional frameworks, and since that time, the Commission and courts have grappled with the classification of internet access services as technology and the communications marketplace have evolved and the internet has become essential to our daily lives. Courts have long recognized the Commission's authority to interpret and implement the Communications Act of 1934. Both the 2015 *Open Internet Order* and the *RIF Order* recognized this authority. And on review of each of those decisions, the D.C. Circuit accepted the Commission's authority to make classification

decisions, even when this involved a change in course. In addressing a prior Commission decision classifying BIAS, in *Brand X*, the Supreme Court confirmed not only that an administrative agency *can* change its interpretation of an ambiguous statute, but that it "*must* consider varying interpretations and the wisdom of its policy on a continuing basis, for example in response to . . . a change in administrations." In light of this precedent, we believe that we not only have the authority to classify BIAS, but that we must reevaluate the 2018 information service classification in consideration of the policy rationales and marketplace developments we have described above as warranting a return to the telecommunications service classification. We seek comment on this view.

54. In evaluating the classification of BIAS, three definitional terms are relevant. First, the Act defines "telecommunications" as "the transmission, between or among points specified by the user, of information of the user's choosing, without change in the form or content of the information as sent and received." Second, the Act defines "telecommunications service" as "the offering of telecommunications for a fee directly to the public, or to such classes of users as to be effectively available directly to the public, regardless of the facilities used." Finally, the Act defines "information service" as "the offering of a capability for generating, acquiring, storing, transforming, processing, retrieving, utilizing, or making available information via telecommunications . . . , but does not include any use of any such capability for the management, control, or operation of a telecommunications system or the management of a telecommunications service." When Congress enacted the definitions of "telecommunications service" and "information service" in the 1996 Act, it substantially incorporated the "basic" and "enhanced" service classifications from the *Computer Inquiries* line of decisions. Under the *Computer Inquiries*, facilities-based telephone companies were obligated to offer the transmission component of their enhanced service offerings—including broadband internet access service offered via DSL—to unaffiliated enhanced service providers on nondiscriminatory terms and conditions pursuant to tariffs or contracts governed by Title II. Thus, there is no disputing that until 2005, Title II applied to the transmission component of DSL service.

Further, because the statutory definitions substantially incorporated the Commission's terminology under the *Computer Inquiries*, Commission decisions regarding the distinction between basic and enhanced services—in particular, decisions regarding features that are "adjunct to basic" services—are relevant to our analysis, as discussed further below, because the Commission's definition of "adjunct to basic" services has been instrumental in determining which functions fall within the "telecommunications systems management" exception to the "information service" definition.

55. We tentatively conclude that both a reasonable and the best reading of these definitional provisions supports classifying BIAS as a telecommunications service. As explained in the 2015 *Open Internet Order*, "the critical distinction between a telecommunications and an information service turns on what the provider is 'offering.'" If the provider is offering "telecommunications" to the public for a fee, then the service is necessarily a telecommunications service. Thus, in 2015, the Commission interpreted these terms to classify BIAS as a telecommunications service, finding that BIAS, as then offered, is sufficiently independent from the information services that ISPs may also offer. Consistent with the Commission's finding in 2015, we believe that BIAS is best understood as making available high-speed access to the internet (that may be bundled with other applications and functions)—and therefore that it provides telecommunications—and that ISPs offer BIAS to the public for a fee. Accordingly, we tentatively conclude the best reading of the Act is that BIAS, as offered to and understood by consumers today, is a telecommunications service rather than an information service. We seek comment on this tentative conclusion.

56. *Broadband Internet Access Service Provides Telecommunications.* We tentatively conclude that BIAS provides "telecommunications" as it is defined under the Act, and seek comment on this conclusion. As discussed above, the Act defines "telecommunications" as "the transmission, between or among points specified by the user, of information of the user's choosing, without change in the form or content of the information as sent and received." As discussed above, we believe that users rely on BIAS to transmit "information of the user's choosing," "between or among points specified by the user." We further believe, as the Commission has previously found, that the term "points

specified by the user” is ambiguous, and that “uncertainty concerning the geographic location of an endpoint of communication is irrelevant for the purpose of determining whether a broadband internet access service is providing ‘telecommunications.’” We also contend that these points are not constrained to be defined in one particular format. They may be in the form of an IP address or perhaps more commonly associated with fully qualified domain names resolved by the DNS, such as *www.example.com*. This is consistent with the Commission’s prior deduction that while consumers often do not know the precise physical or virtual location of the edge provider or other user they want to access, “there is no question that users specify the end points of their internet communications” and “would be quite upset if their internet communications did not make it to their intended recipients or the website addresses they entered into their browser would take them to unexpected web pages.” As the Commission explained, “numerous forms of telephone service qualify as telecommunications even though the consumer typically does not know the geographic location of the called party,” including cell phone service, toll free 800 service, and call bridging service. Likewise, the fact that DNS may resolve the same domain name to one or more virtual locations (e.g., due to load balancing), just as in the toll free arena a single telephone number may route to multiple locations, “does not transform that service to something other than telecommunications.” In the *RIF Order*, the Commission conceded that at least some telecommunications are used as an input into BIAS and “an ISP makes use of telecommunications” in the provision of BIAS, but found that it “need not further address the scope of the ‘telecommunications’ definition in order to justify [its] classification of broadband internet access service,” and did not further address the Commission’s interpretation and application of the “telecommunications” definition in the *2015 Open Internet Order*. We seek comment on the analysis that BIAS provides “telecommunications,” including whether there is any reason to depart from it.

57. We further tentatively conclude that there is no change or modification to the form or content of information during transmission, and seek comment on this analysis. In 2015, the Commission explained that “the packet payload (i.e., the content requested or sent by the user) is not altered by the

variety of headers that a provider may use to route a given packet” and therefore, the “form and content of the information” is the same when an IP packet is sent by the sender as when the same packet is received by the recipient. We seek comment on whether this analysis of packet transmission remains accurate and relevant today. Have there been any developments or changes in how BIAS is provisioned that would cause us to reconsider this analysis? How do ISPs transmit data information from one point on the network to another? How does it differ from how PSTN calls are transmitted today?

58. *Broadband Internet Access Service is a Telecommunications Service*. Here, we propose to build off our tentative conclusion that BIAS provides telecommunications and our belief that current factual circumstances show that consumers perceive BIAS as a standalone offering used to access third-party services and, as such, ISPs routinely market BIAS widely to the general public. Viewed together, ISPs would necessarily offer BIAS “for a fee directly to the public, or to such classes of users as to be effectively available directly to the public, regardless of the facilities used,” and therefore we tentatively conclude that BIAS is a telecommunications service as defined in the Act. We seek comment on our tentative conclusion and assessment. We further propose to find that the implied promise to make arrangements for exchange of internet traffic as part of the BIAS offering does not constitute a private carriage arrangement, and that the rationale adopted in the *2015 Open Internet Order* remains persuasive. We seek comment on this approach. How do internet traffic arrangements with negotiated terms differ from mass-market services offered to the public? Have there been any significant developments in the internet traffic exchange market since 2015 that would cause us to reconsider these proposals? We observe that in 2015, the Commission concluded that “some individualization in pricing or terms is not a barrier to finding that a service is a telecommunications service,” and the *RIF Order* does not appear to disturb this finding. We seek comment on this analysis.

59. *Broadband Internet Access Service Is Not Best Classified an Information Service*. We tentatively conclude that, as offered today, BIAS is not an information service under the best reading of the Act. The Act defines an information service as the offering “of a capability for generating, acquiring, storing, transforming, processing, retrieving, utilizing, or making available

information via telecommunications.” We believe that the Commission’s reasoning in the *RIF Order*—that because BIAS has the “capability” to be used to engage in the activities within the information service definition, it is best interpreted as an information service—is flawed. Concluding that BIAS “is an information service irrespective of whether it provides the entirety of any end user functionality or whether it provides end user functionality in tandem with edge providers,” as the Commission did in the *RIF Order*, fails to recognize the relationship of BIAS transmission services to other functions, which may be offered by either the ISP or a third party of the end user’s choice. Logically, under the framework set out in the *RIF Order*, even traditional switched telephone service would be classified as an information service, as it provides customers with the ability to make information available to others (e.g., public service announcements), retrieve information from others, and process and utilize stored information from others (e.g., by interacting with a call menu). We tentatively conclude that the best and more reasonable interpretation of the statutory language is that BIAS is a telecommunications service, while the applications that run over BIAS either constitute distinct information services or fall within the exception to the information service definition for capabilities used “for the management, control, or operation of a telecommunications system or the management of a telecommunications service.” We seek comment on this proposed analysis.

60. We tentatively conclude that companion services, such as DNS and caching, when provided with BIAS, fit within the telecommunications systems management exception to the definition of “information service,” and therefore when these services are provided with BIAS, they do not convert BIAS into an information service. We seek comment on this tentative conclusion. The Act’s telecommunications systems management exception excludes from the definition of “information service” “any use of any such capability for the management, control, or operation of a telecommunications system or the management of a telecommunications service.” In the *2015 Open Internet Order*, the Commission concluded that when DNS and caching are offered with BIAS, they “either fall within the telecommunications systems management exception or are separate offerings that are not inextricably integrated with broadband internet

access service, or both.” In the *RIF Order*, the Commission took a contrary view, concluding that “DNS and caching functionalities . . . offered by ISPs[] are integrated information processing capabilities offered as part of broadband internet access service to consumers today.” On review of the *RIF Order*, Judge Millet explained in her concurrence that “the question is whether the combination of transmission with DNS and caching *alone* can justify the information service classification. If we were writing on a clean slate, that question would seem to have only one answer given the current state of technology: No.” She added that “new factual developments call[ed] for serious technological reconsideration and engagement through expert judgment. Instead, the Commission’s exclusive reliance on DNS and caching blinkered itself off from modern broadband reality, and untethered the service ‘offer[ed]’ from both the real-world marketplace and the most ordinary of linguistic conventions.” We intend to guide our decisionmaking about the role of DNS and caching based on today’s broadband reality, and we seek information on the present circumstances.

61. We tentatively conclude that the Commission’s 2015 analysis provides the more reasonable application of the relevant statutory terms and Commission precedent to DNS functionality with respect to BIAS, and we seek comment on this tentative conclusion. In the *2015 Open Internet Order*, the Commission analogized DNS to adjunct-to-basic services, such as speed dialing, call forwarding, and computer-provided directory assistance, and concluded that because it is effectively equivalent to routing information and does not alter the fundamental character of the telecommunications service, it falls within the telecommunications systems management exception to the definition of “information service.” “Adjunct-to-basic” functions were those features and services that met the literal definition of “enhanced service” but did not alter the fundamental character of the associated basic transmission service and thus were treated as basic (*i.e.*, telecommunications) services even though they went beyond mere transmission. The Commission has held that such functions: (1) must be “incidental” to an underlying telecommunications service—*i.e.*, “‘basic’ in purpose and use” in the sense that they facilitate use of the network; and (2) must “not alter the fundamental character of [the

telecommunications service].” The *RIF Order* rejected the adjunct-to-basic comparison largely based on its contention that adjunct-to-basic services and the telecommunications systems management exception must be viewed narrowly, effectively to only include functions that solely facilitate transmission. Because it concluded that DNS, as then used, is a core function of BIAS that provides more than a functionally integrated address-translation capability, it determined that DNS did not fall within the exception. We tentatively disagree with the *RIF Order*’s narrow characterization of adjunct-to-basic services and the telecommunications systems management exception as not mandated by the statutory language; however, even under that unnecessarily narrow characterization, we believe DNS would fall under the telecommunications management exception, as its fundamental purpose is to route information—*i.e.*, to facilitate transmission.

62. We further believe that even if DNS did not fall within the telecommunications systems management exception to the Act’s definition of “information services,” it is not so inextricably intertwined so as to convert the entire BIAS offering into an information service, consistent with the Commission’s finding in 2015. In support of the *2015 Open Internet Order*’s conclusion, the Commission explained that IP packet transfer can work without DNS and that DNS lookup is available through third parties. In the *RIF Order*, the Commission argued that even though DNS can also be provided by third parties, the focus should remain on the capabilities that ISPs offer, which it concluded is a single, inextricably intertwined information service. However, in her *Mozilla* concurrence, Judge Millet noted that “DNS, much like email, is now free and widely available to consumers in the internet marketplace.” We tentatively conclude that the *2015 Open Internet Order*’s showing that DNS is not a necessary component of BIAS, which the *RIF Order* did not dispute, provides the better rationale for evaluating whether DNS transforms the entire BIAS offering into an information service, and tentatively conclude that it does not. We seek comment on this tentative conclusion. Does the Commission’s 2015 analysis of DNS as it relates to BIAS remain relevant, accurate, and persuasive? Why or why not? Are there any technical or commercial developments that should cause us to reconsider this analysis?

63. For the same reasons the Commission found in 2015, we believe that caching, when provided in connection with BIAS, is “used to facilitate the transmission of information so that users can access other services, in this case by enabling the user to obtain ‘more rapid retrieval of information’ through the network,” and thus falls within the telecommunications systems management exception. We seek comment on this analysis. The Commission concluded otherwise in the *RIF Order*, finding that “ISP-provided caching does not merely ‘manage’ an ISP’s broadband internet access service and underlying network, it enables and enhances consumers’ access to and use of information online” and that because it is “useful to the consumer,” caching does not fall within the telecommunications systems management exception. However, we do not believe consumers consider caching capabilities when purchasing BIAS. We seek comment regarding the technical and commercial aspects of caching, how caching functionality is both provisioned by ISPs and offered to customers, as well as the relevance (if any) of Commission precedent as applied to caching today.

64. In particular, given that web pages today change constantly and are often customized on a per-user basis, we question whether ISPs cache popular content requested by multiple users to supply the same web page when requested later, rather than fetching the page anew. Further, as Judge Millet observed in *Mozilla*, caching “does not work when users employ encryption,” which as of 2017 constituted a majority of internet traffic, which suggests “that caching no longer enjoys the pride of place ascribed to it” by the *RIF Order*. We seek comment on whether ISPs use this practice and, to the extent that commenters contend they do, why (given the ever-changing nature and high customization of contemporary web pages). In addition, should the Commission distinguish between caching by ISPs and the kind of caching that third-party content providers use to keep copies of content (such as videos and images, but possibly also web pages) closer to users? We preliminarily conclude that caching of this kind is not provided by ISPs and thus is not a part of BIAS, and as such does not transform BIAS into an information service.

65. We also seek comment on whether there are other functionalities provided or offered with BIAS, besides DNS and caching, that might fall into the telecommunications systems management exception, as well as on

other add-on information services offered in conjunction with BIAS and how they might affect our analysis with respect to the classification of BIAS. The 2015 *Open Internet Order* identified examples of processing-related capabilities that fall within the telecommunications systems management functions, such as security virus protection and blocking denial of service attacks, as well as add-on information services such as cloud-based storage services, email, and spam protection that were often offered in conjunction with BIAS but were not inextricably intertwined with it. Consistent with the Commission's finding in 2015, we propose that "such services are not inextricably intertwined with [BIAS], but rather are a product of the provider's marketing decision not to offer the two separately," and seek comment on this proposal. We believe that, to the extent BIAS is offered along with other capabilities that would otherwise fall into the "information service" definition, such an offering does not turn BIAS into a functionally integrated information service. Are there examples of other information services or capabilities that are often offered by ISPs in conjunction with BIAS? How do consumers view and use these products in relation to their BIAS subscription? How has the market for third-party information services offered in tandem with BIAS developed since the *RIF Order* was adopted? We also seek comment on any devices or applications, such as Wi-Fi hotspots, wearables, appliances, and other IoT devices that an ISP may include with its BIAS offering and how they may function both in conjunction with and apart from the underlying BIAS. How does a secondary market for such devices and applications impact our interpretation that they are separable information services?

66. *Major Questions Doctrine Applicability.* We seek comment on whether, and if so how, the major questions doctrine—the notion that Congress is expected to speak clearly when delegating authority in certain extraordinary cases—should inform the conclusions we reach based on the text and structure of the Act. In the *USTA* decision, the D.C. Circuit reasoned that *Brand X* conclusively held that the Commission has the authority to determine the proper statutory classification of BIAS and that its determinations are entitled to deference, and so there is no need to consult the major questions doctrine here. In opinions respecting the denial of rehearing *en banc*, several judges

debated how (if at all) the major questions doctrine would otherwise apply to the issue. The *RIF Order* did not directly dispute this conclusion, but stated that the doctrine supported its decision to classify BIAS as an information service in order to steer clear of any major questions doctrine issues.

67. What factors are relevant to the Commission's consideration of whether the major questions doctrine applies to the classification of BIAS, taking account of evolving Supreme Court precedent? Among other factors, we ask that commenters consider the extent to which this matter falls within the Commission's recognized expertise and authority as the federal regulator responsible for "regulating interstate and foreign commerce in communications by wire and radio so as to make available, so far as possible, . . . wire and radio communications service with adequate communications facilities at reasonable charges." In light of relevant Commission precedent, both before and shortly after Congress adopted the 1996 Act, classifying analogous transmission services—including the transmission component of broadband internet access service offered via digital subscriber line (DSL)—as common carrier services, what basis is there, if any, for concluding that the Commission's proposed classification action here is an exercise of "newfound power" not previously recognized? Has Congress acted or failed to act on proposals to clarify the proper classification of broadband in subsequent years, and to what extent does such action or inaction inform the Commission's exercise of its claimed classification authority or the application of the major questions doctrine?

68. We also seek comment on how and to what extent each relevant factor should affect the Commission's analysis of whether the classification of BIAS implicates the major questions doctrine. Commenters should consider how the relevant factors apply to the specific proposals here. For example, should the Commission evaluate the applicability of the major questions doctrine for BIAS as a whole, or should it distinguish between or among particular categories of BIAS offerings? How would the major questions doctrine apply in the case of particular rules we might adopt if we determine BIAS meets a given statutory classification?

69. Separately, even assuming *arguendo* that the major questions doctrine were applied to our classification of BIAS, we seek comment on whether Congress has spoken

sufficiently clearly in the Act—in definitional provisions or more generally—to satisfy that standard.

E. Classifying Mobile Broadband Internet Access Service as a Commercial Mobile Service

70. In addition to our proposed return to the 2015 *Open Internet Order's* classification of BIAS as a telecommunications service, we propose to return to that *Order's* classification of mobile BIAS as a commercial mobile service. In the alternative, even if mobile BIAS does not meet the definition of "commercial mobile service," we propose to find that it is the functional equivalent of a commercial mobile service and, therefore, not private mobile service.

71. Section 332(d)(1) of the Act defines "commercial mobile service" as "any mobile service . . . that is provided for profit and makes interconnected service available (A) to the public or (B) to such classes of eligible users as to be effectively available to a substantial portion of the public, as specified by regulation by the Commission." As an initial matter, we tentatively conclude that mobile BIAS is a "mobile service" because subscribers access the service through their mobile devices. Next, we tentatively conclude that mobile BIAS is provided "for profit" because ISPs offer it to subscribers with the intent of receiving compensation. We also tentatively conclude that mobile BIAS is widely available to the public, without restriction on who may receive it.

72. We also propose to return to the 2015 *Open Internet Order's* determination that mobile BIAS is an interconnected service. Section 332(d)(2) states that the term "interconnected service" means "service that is interconnected with the public switched network (as such terms are defined by regulation by the Commission). . . ." In the 2015 *Open Internet Order*, the Commission reached the conclusion that mobile BIAS was an interconnected service through the application of an updated definition of "public switched network" that included networks that use public IP addresses. In doing so, the Commission highlighted the Commission's longstanding determination from the *Second CMRS Report and Order* (59 FR 18493 (Apr. 19, 1994)) that the term "public switched network" "should not be defined in a static way" as "the network is continuously growing and changing because of new technology and increasing demand." The Commission reversed course in the *RIF Order*, reinstating the prior definition of

“public switched network.” We believe the Commission’s decision in the *RIF Order* fails to align with the technological reality and widespread use of mobile BIAS. The ubiquity of mobile BIAS that the Commission recognized in 2015 is even more pronounced today, as mobile broadband networks have continued to develop and grow in the intervening years, with more users and increased mobile data traffic. In 2022, there was more than 73 trillion megabytes of mobile data traffic exchanged in the United States, representing a 38 percent increase from the previous year. Continued growth of mobile BIAS is expected, with one forecast predicting that there will be 410 million 5G mobile subscriptions in North America by 2028. In light of these factors, we propose to return to the 2015 *Open Internet Order*’s modernized definition of “public switched network” in § 20.3 of the Commission’s rules, specifically defining the term to mean “the network that includes any common carrier switched network, whether by wire or radio, including local exchange carriers, interexchange carriers, and mobile service providers, that use[s] the North American Numbering Plan, or public IP addresses, in connection with the provision of switched services.” We believe this definition, which includes IP addresses, embodies the current technological landscape and the widespread use of mobile broadband networks, and is therefore more consistent with the Commission’s recognition that the public switched network will grow and change over time. We seek comment on this analysis and our proposed approach.

73. We further propose to reach the same conclusion the Commission did in the 2015 *Open Internet Order* that mobile BIAS is interconnected with the “public switched network,” as we propose to define it today. The 2015 *Open Internet Order* found that mobile BIAS should be considered interconnected because it was a broadly available mobile service that provided users with the ability to send and receive communications to all other users of the internet. Given the “universal access” and expected future growth of mobile BIAS, the 2015 *Open Internet Order* determined that finding mobile BIAS to be interconnected and a commercial mobile service was consistent with Congress’ objective in section 332 of the Act in creating a symmetrical regulatory framework among similar mobile services that were available to the public. Mobile BIAS remains a broadly available mobile service that provides its users with the

ability to send and receive communications and is an essential component of today’s technology landscape. As discussed above, there has been a marked increase in the amount of mobile data traffic in recent years, and continued growth is predicted. Given the continued widespread use and availability of mobile BIAS, we propose to find that mobile BIAS is an interconnected service, and propose to support this finding by applying the Commission’s analysis from the 2015 *Open Internet Order* to today’s marketplace. We seek comment on our proposed approach.

74. We also propose to rely on the Commission’s analysis from the 2015 *Open Internet Order* that mobile BIAS is an interconnected service for the additional reason that it provides users with the capability to communicate with other users of the internet and with people using telephone numbers through VoIP applications. The 2015 *Open Internet Order* found that “users on mobile networks can communicate with users on traditional copper based networks and IP based networks, making more and more networks using different technologies interconnected.” It further identified mobile VoIP, as well as over-the-top mobile messaging, as “among the increasing number of ways in which users communicate indiscriminately between [North American Numbering Plan (NANP)] and IP endpoints on the public switched network.” Since 2015, mobile BIAS users continue to communicate using these tools, with 85 percent of Americans owning a smartphone that offers access to VoIP and over-the-top communications apps. We seek comment on whether there have been any material changes in technology, the marketplace, or other facts that would warrant refinement or revision of the analysis regarding the interconnected nature of mobile BIAS from the 2015 *Open Internet Order*.

75. In connection with this approach, we seek comment on whether we should readopt the 2015 *Open Internet Order*’s revised definition of “interconnected service” in § 20.3 of the Commission’s rules. That *Order* defined “interconnected service” to mean a service that gives subscribers the ability to “communicate to or receive communications from other users of the public switched network,” removing the requirement that such service provide the ability to communicate with *all* other users of the public switched network. It did so to ensure that services that provide the *capability* to access all other users, including through the use of OTT services, but limit that access in

certain limited ways, are not excluded from the definition of “interconnected service.” The *RIF Order* reverted to the prior definition, concluding that “the best reading of ‘interconnected service’ is one that enables communication between its users and all other users of the public switched network” and that the service “must itself provide interconnection to the public switched network using the NANP.” We seek comment on whether it is necessary to return to the definition of “interconnected service” in the 2015 *Open Internet Order* to ensure that all appropriate services are covered by the definition.

76. Because we also propose to reclassify mobile BIAS as a telecommunications service, we believe that classifying it as a commercial mobile service would avoid the inconsistency that would result if the service were both a telecommunications service and a private service. The Commission explained this reasoning in the 2015 *Open Internet Order*, and we propose to adopt a consistent rationale here. The Commission stated that, because it determined mobile BIAS to be a telecommunications service, “designating it also as commercial mobile service subject to Title II is most consistent with Congressional intent to apply common carrier treatment to telecommunications services.” The Commission found that classifying mobile BIAS as a commercial mobile service was necessary “to avoid a statutory contradiction that would result if the Commission were to conclude both that mobile broadband internet access was a telecommunications service and also that it was not a commercial mobile service. A statutory contradiction would result from such a finding because, while the Act requires that providers of telecommunications services be treated as common carriers, it prohibits common carrier treatment of mobile services that do not meet the definition of commercial mobile service. Finding mobile broadband internet access service to be commercial mobile service avoids this statutory contradiction and is most consistent with the Act’s intent to apply common carrier treatment to providers of telecommunication services.” We seek comment on this proposal.

77. In the alternative, to the extent that mobile BIAS falls outside the definition of “commercial mobile service,” we propose to find that it is the functional equivalent of a commercial mobile service and, thus, not private mobile service. The Commission found that mobile BIAS service was functionally equivalent to

commercial mobile service because, “like commercial mobile service, it is a widely available, for profit mobile service that offers mobile subscribers the capability to send and receive communications on their mobile device to and from the public. Although the services use different addressing identifiers, from an end user’s perspective, both are commercial services that allow users to communicate with the vast majority of the public.” The *RIF Order* found that the *2015 Open Internet Order*’s focus on the public’s “ubiquitous access” to mobile BIAS alone was “insufficient” to establish functional equivalency and that the test established in the *Second CMRS Report and Order* provided a more thorough consideration of factors of whether a service is closely substitutable for a commercial mobile service. We seek comment on both of these analyses. As the *RIF Order* acknowledged, however, the Commission has discretion to determine whether services are functionally equivalent. Congress expressly delegated authority to the Commission to determine whether a particular mobile service may be the functional equivalent of a commercial mobile service, defining “private mobile service” as “any mobile service . . . that is not a commercial mobile service or the functional equivalent of a commercial mobile service, as specified by regulation by the Commission.” For the reasons outlined in the *2015 Open Internet Order* and in light of the continued increased use and distribution of mobile broadband services and devices, we propose to find that mobile BIAS is the functional equivalent of commercial mobile service. We seek comment on this proposal and on any other or different definition of “functional equivalent” that the Commission should adopt.

78. We anticipate that returning mobile BIAS to its classification as a commercial mobile service and reinstating openness requirements on a larger set of mobile ISPs will allow mobile providers that would become subject to such rules to continue to be able to compete successfully in the marketplace and continue to have incentives to develop new products and services. For example, the Commission has applied open access rules to upper 700 MHz C Block licensees, including Verizon Wireless, for more than a decade, and the mobile operators subject to these requirements have continued to compete successfully in the marketplace. We seek comment on this view and on any policy

consequences that commenters believe may result from the proposed reclassification of mobile BIAS.

F. Preemption of State and Local Regulation of Broadband Service

79. We seek comment on how best to exercise our preemption authority to ensure that BIAS is governed primarily by a national framework, including a uniform floor of ISP conduct rules. The *RIF Order* adopted an expansive preemption decision, but the D.C. Circuit in *Mozilla* concluded that the *RIF Order* “fail[ed] to ground its sweeping Preemption Directive . . . in a lawful source of statutory authority,” and vacated that preemption action. The D.C. Circuit concluded that “in any area where the Commission lacks the authority to regulate, it equally lacks the power to preempt state law.” A number of states quickly stepped in to fill that void, adopting their own unique regulatory approaches for BIAS, including their own versions of open internet requirements, and even measures like regulation of retail rates that the *2015 Open Internet Order* found unnecessary. We anticipate that our proposed regulatory approach to BIAS will remedy the infirmities the D.C. Circuit identified in the *RIF Order*’s approach, and we seek comment on the best way to use our preemption authority.

80. We seek comment on the best sources of preemption authority for us, if needed. For one, we anticipate that the regulatory approach proposed here would give us authority to oversee BIAS under Title II with forbearance, under Title III in the case of mobile ISPs, as well as under section 706 of the 1996 Act. These sources of authority could enable us to adopt regulations that preempt contrary state requirements. We also expect that our proposed regulatory approach could make it more straightforward to rely on various express preemption provisions in the Act, such as the preemption that accompanies forbearance under section 10(e), the preemption that arises when state requirements hinder provision of services covered under sections 253 or 332(c)(7) of the Act, the preemption of state requirements contrary to federal universal service policies under section 254(f), and other possible preemption provisions. We expect that Commission decisions finding BIAS to be interstate for regulatory purposes largely resolve possible arguments premised on the limitation on FCC authority over state communications services under section 2(b) of the Act that otherwise could arise here. We seek comment on these views and on any additional sources of

statutory authority for preemption, if needed.

81. We seek comment on how far to go in this proceeding in exercising our preemption authority to ensure that BIAS principally is governed by a federal framework. Should we adopt a broad preemption decision like the Commission attempted to do in the *RIF Order*? Or should the Commission proceed more incrementally, such as by only addressing in this proceeding those state or local legal requirements squarely raised in the record, and otherwise deferring to future case-by-case adjudications of preemption? Under an incremental approach, should we identify in this proceeding issues where the Commission will decline to preempt state requirements and thereby share regulatory responsibility with the states, such as state privacy and consumer protection laws? For what issues, if any, is the Commission required to share regulatory responsibility with the states? What are the benefits and drawbacks of permitting state regulation in specific issue areas? What issues may benefit most from shared regulatory responsibility with states?

82. We also seek comment on how best to define the scope of preemption to ensure that BIAS is principally governed by a federal framework. For example, should open internet conduct rules of the sort proposed below be seen not only as an appropriate nationwide floor providing those protections to everyone, but also as an appropriate ceiling to reflect the balancing of relevant policy considerations? The *2015 Open Internet Order* stated that “should a state elect to restrict entry into the broadband market through certification requirements or regulate the rates of BIAS through tariffs or otherwise, we expect that we would preempt such state regulations as in conflict with our regulations.” Should the Commission affirmatively preempt in those scenarios here rather than leaving those scenarios for future case-by-case evaluation as it did in 2015? In addition, how should the Commission define what state or local actions are within the scope of any affirmative preemption it might adopt here? To what extent should these decisions be informed by traditional preemption frameworks, such as express preemption, field preemption, or conflict preemption?

II. Proposed Forbearance

83. We propose to forbear from applying some Title II provisions to BIAS in the event that we reclassify the service, and we seek comment on what

the parameters of such forbearance should be, taking into account as a primary matter that we believe we must enable the Commission to fulfill its responsibility under the Act to protect national security and public safety when executing its other statutory obligations. In the *2015 Open Internet Order*, the Commission accompanied Title II classification with “substantial” forbearance for BIAS in a way that was designed to “strike the right balance at this time of minimizing the burdens on ISPs while still adequately protecting the public, particularly given the objectives of section 706 of the 1996 Act.” We propose to return to largely the same forbearance that was adopted in the *2015 Open Internet Order*, tailored as appropriate in light of any updated conclusions the Commission reaches in this proceeding regarding the need for particular rules, requirements, or sources of authority covering BIAS. Notably, we propose to forbear from Title II provisions insofar as they would support the adoption of *ex ante* rate regulations for broadband internet access service.

84. However, subsequent developments have highlighted the importance of retaining statutory authority to enable the Commission to address national security and public safety concerns that could arise with respect to BIAS. Those considerations provide a leading basis for revisiting the statutory classification of BIAS, and therefore we propose to depart from the forbearance approach reflected in the *2015 Open Internet Order* by declining to forbear from applying section 214 of the Act, and expressly clarifying that our proposed forbearance would not encompass Title III licensing and authorization authorities, given that those statutory provisions could provide important additional tools to advance the Act’s national security and public safety objectives. We seek comment on that proposal and on any issues related to forbearance with respect to BIAS if classified as a Title II service, including the best understanding of the current status of the forbearance granted in the *2015 Open Internet Order*, the appropriate analytical approach to evaluating forbearance, and the substantive scope of forbearance that should be granted. We also seek comment on the impact of our proposed forbearance approach on ISPs, particularly small ISPs.

A. Forbearance Framework

85. As a threshold matter, we seek comment on the best way to interpret the effect of the *RIF Order* on the forbearance previously granted in the

2015 Open Internet Order. The *RIF Order* stated that, due to the reclassification decision there, “the forbearance granted in the [2015 *Open Internet Order*] is now moot,” and that “carriers are no longer permitted to use the [2015 *Open Internet Order*] forbearance framework (i.e., no carrier will be permitted to maintain, or newly elect, the [2015 *Open Internet Order*] forbearance framework).” We seek comment on how to interpret those statements in the *RIF Order*.

86. Next, we seek comment on the appropriate analytical approach to use when evaluating the statutory forbearance criteria. In the *2015 Open Internet Order*, the Commission stated that “[b]ecause the Commission is not responding to a petition under section 10(c), we conduct our forbearance analysis under the general reasoned decision making requirements of the Administrative Procedure Act [(APA)], without the burden of proof requirements that section 10(c) petitioners face.” The Commission explained how its approach to forbearance in the *2015 Open Internet Order* satisfied the statutory forbearance criteria, other relevant statutory objectives such as section 706 of the 1996 Act, and applicable procedural requirements under the Act and the APA, and the D.C. Circuit rejected challenges to that forbearance approach in its *USTA* decision. We propose to follow the same analytical approach here and seek comment on that proposal. We also seek comment on alternative analytical approaches or other ways to effectuate the forbearance analysis.

87. We seek comment on the interplay between our approach to forbearance and the argument in the *RIF Order* that the scope of forbearance granted in the *2015 Open Internet Order* suggests that classification of BIAS as a Title II service is contrary to the statutory scheme. In particular, does such an argument fail to account for important aspects of the approach to forbearance in the *2015 Open Internet Order*? For example, we note that in many cases the *2015 Open Internet Order* evaluated forbearance assuming *arguendo* that particular provisions of the Act or Commission rules apply to BIAS, rather than “first exhaustively determining provision-by-provision and regulation-by-regulation whether and how particular provisions and rules apply to this service.” Do objections to Title II classification premised on the scope of forbearance adequately account for that fact, or do they draw unduly broad conclusions based on simple counts of

rules or statutory provisions subject to the forbearance decision?

88. Separately, we propose to leave ISPs’ broadband transmission services—as distinguished from BIAS that relies on that transmission as an input—subject by default to the framework of the *Wireline Broadband Classification Order* (70 FR 60222 (Oct. 17, 2005)) as the Commission has done previously. The *RIF Order* observed that such services “have never been subject to the [2015 *Open Internet Order*] forbearance framework,” and stated that “carriers that choose to offer transmission service on a common carriage basis are, as under the *Wireline Broadband Classification Order*, subject to the full set of Title II obligations, to the extent they applied before the” *2015 Open Internet Order*. The *2015 Open Internet Order* did, however, allow a provider previously offering broadband transmission on a common carrier basis “to change to offer internet access services pursuant to the construct adopted in” that *Order* subject to filing with and review by the Wireline Competition Bureau of the provider’s proposal for the steps it would take to convert to such an approach. We propose to follow the same approach here, and seek comment on that proposal.

B. Proposed Forbearance

89. We seek comment on the particular statutory provisions and rules that should or should not be subject to forbearance. In this regard, we propose to use the forbearance granted in the *2015 Open Internet Order* as the starting point for our consideration of the appropriate scope of forbearance. There, although the Commission granted broad forbearance, the Commission did not forbear from a number of specific protections or authorities:

- The open internet rules and section 706 of the 1996 Act;
- “[S]ections 201, 202, and 208, along with key enforcement authority under the Act, both as a basis of authority for adopting open internet rules as well as for the additional protections those provisions directly provide”;
- Section 222 of the Act, “which establishes core customer privacy protections”;
- Section 224 of the Act and the Commission’s implementing rules, “which grant certain benefits that will foster network deployment by providing telecommunications carriers with regulated access to poles, ducts, conduits, and rights-of-way”;
- Sections 225, 255, and 251(a)(2) of the Act and the Commission’s implementing rules, “which collectively

advance access for persons with disabilities; except that the Commission forbears from the requirement that providers of broadband internet access service contribute to the Telecommunications Relay Service (TRS) Fund at this time”;

- Section 254 of the Act and “the interrelated requirements of section 214(e), and the Commission’s implementing regulations to strengthen the Commission’s ability to support broadband, supporting the Commission’s ongoing efforts to support broadband deployment and adoption”;

- Requirements governing the wireless licensing process in section 309(b) and (d)(1) of the Act and §§ 1.931, 1.933, 1.939, 22.1110, and 27.10 of the Commission’s rules.

90. We propose to forbear from all provisions of Title II that would permit Commission regulation of BIAS rates. We believe that Commission rate regulation is unnecessary because the tailored approach we adopt here will enable the Commission to promote broadband deployment and competition, and because we will be able to rely on sections 201 and 202 to address non-rate related issues. Therefore, while we do not propose to forbear from sections 201 and 202 of the Act as a general matter, we “do not and cannot envision adopting new *ex ante* rate regulation” or *ex post* rate regulation of BIAS, and we therefore propose to forbear from applying sections 201 and 202 to BIAS insofar as they would support adoption of rate regulations for BIAS. We seek comment on this proposal. With respect to section 254, we propose to forbear in part from the first sentence in section 254(d) and our associated rules “insofar as they would immediately require new universal service contributions associated with” BIAS, as the Commission did in 2015, and seek comment on this proposal.

91. In addition to declining to forbear from applying those specifically enumerated provisions of the Act and Commission rules, the Commission also more generally limited its forbearance to the scope of its section 10 forbearance authority, and thus did not forbear from applying statutory provisions or rules that “are not applied to telecommunications carriers or telecommunications services.” The Commission also did not forbear from applying provisions of the Act or Commission rules that already applied to BIAS irrespective of the Title II classification of that service. The Commission cited illustrative examples falling within one or both of those

categories, including provisions imposing obligations on the Commission, like section 257 of the Act, provisions that simply reserve state authority, and the CALEA requirements in section 229. In addition, the Commission did not forbear from provisions that would benefit ISPs. This would include, for example, preemption provisions such as those in sections 253 and 332(c) of the Act, as well as liability limitation provisions in sections 223, 230, and 231 of the Act. To the extent that forbearance was considered and rejected in the *2015 Open Internet Order* for particular statutory provisions, we propose to once again decline to grant forbearance here, and we seek comment on that proposal. As part of that analysis, we seek updated information and analyses regarding the application of the statutory forbearance criteria regarding these provisions and rules that were not subject to forbearance in the *2015 Open Internet Order*. We also seek comment on any relevant analyses or conclusions in the *RIF Order*.

92. Other than in the specific areas described above, the *2015 Open Internet Order* broadly granted forbearance from applying provisions of the Act and Commission rules that newly applied by virtue of the Title II classification of BIAS. We generally propose to again adopt broad forbearance consistent with that outcome, with the exception of statutory authorities that could enable the Commission to advance the Act’s goals of national security and public safety. For example, section 1 of the Act makes clear that the Commission was established, among other reasons, “for the purpose of the national defense, [and] for the purpose of promoting safety of life and property through the use of wire and radio communications.” Section 4(n) of the Act directs the Commission to take steps to promote the “maximum effectiveness from the use of radio and wire communications in connection with safety of life and property.” In addition, the D.C. Circuit in *Mozilla* emphasized the need to consider the potential benefits of Title II classification of BIAS for the Commission’s authority to protect public safety. Although public safety considerations were an important element of the Commission’s overall decision in the *2015 Open Internet Order*, preserving the Commission’s public safety authority above and beyond that granted in sections 201 and 202 of the Act was not as explicit a focus in much of the Commission’s tailoring of forbearance there. We thus seek comment on what specific provisions should be excluded from the

scope of forbearance here in light of those national security and public safety interests, as discussed in greater detail above.

93. Given the role section 214 of the Act has played in the Commission’s efforts to address national security and law enforcement concerns related to U.S. telecommunications networks, we tentatively conclude that we should exclude that provision from any forbearance granted here. How should the Commission apply its existing procedures for international section 214 authorizations, which include coordination of applications that have reportable foreign ownership with the relevant Executive Branch agencies, to BIAS providers? We seek comment on any implementation issues arising from our tentative conclusion and how we could best address them. For example, would implementation challenges arise if the Commission immediately applied to BIAS providers its existing procedures for international section 214 authorizations, which include coordination of applications that have reportable foreign ownership with the relevant Executive Branch agencies? We note that the *2015 Open Internet Order* recognized that certain implementation issues could arise from the application of section 222 and the Commission’s implementing rules to BIAS, and sought to mitigate those effects pending a rulemaking specifically focused on implementing section 222 for BIAS. Should we proceed in a similar manner with respect to some or all aspects of international section 214 authorizations, whether by adopting temporary forbearance, temporary grants of blanket international section 214 authority, or in some other manner? We also seek comment on any implementation issues concerning our domestic section 214 requirements.

94. We also make clear that our proposed forbearance would not encompass Title III licensing authorities, including sections 301–303, 307–309, 312, and 316 of the Act, which we believe likewise grant us important authority that can be used to advance national security and public safety with respect to the services and equipment subject to licensing. We also seek comment on whether we should exclude from the scope of our forbearance provisions sections 218 and 220 of the Act, which authorize the Commission to obtain information from common carriers, which could provide important tools to investigate public safety and security-related issues that arise. We seek comment on those proposals and on any other provisions of the Act or Commission rules that

likewise should be expressly excluded from the scope of forbearance based on national security and/or public safety considerations, including, for example, sections 305, 310, and 332 of the Act.

95. The D.C. Circuit's *Mozilla* decision also highlighted the potential benefits of Title II classification of BIAS for the Commission's authority to encourage deployment through regulation of pole attachments and to provide universal service support for low income households. In consideration of those interests, the Commission previously excluded sections 224 and 254 of the Act from the scope of its forbearance in the *2015 Open Internet Order*. We seek comment on whether there are additional or different ways those interests should be reflected in the tailoring of forbearance here.

96. We believe that the *RIF Remand Order* was too quick to dismiss concerns regarding public safety, pole attachments, and low income universal service support as speculative or unproven, and we seek comment on that view. Do commenters agree that the *RIF Remand Order* gave insufficient weight to the potential additional benefits that could be achieved through additional authority retained by virtue of Title II classification of BIAS?

97. We also seek comment on any additional or different ways that forbearance could be tailored here. For example, the *2015 Open Internet Order* adopted conditional forbearance from common carrier roaming regulations, subject to mobile ISPs complying with the data roaming requirements. Conditioned in that manner, the Commission was able to find the statutory forbearance criteria satisfied. We propose to follow the same approach with respect to our roaming rules here, and also seek comment on whether there are other provisions of the Act or Commission rules where conditional forbearance would satisfy the statutory forbearance criteria, even if unconditional forbearance would not. More generally, we also seek comment on alternative frameworks we might draw upon in deciding on how to tailor forbearance here. For example, in the *2015 Open Internet Order*, the Commission elected to grant broader forbearance despite some calls to limit forbearance just to the scope of relief previously granted to CMRS providers. We seek renewed comment on that approach, as well as any alternative options for tailoring forbearance here based on the regulatory experience in other contexts.

98. We also seek comment on whether forbearance should be differently

tailored in the specific context of the internet traffic exchange portion of BIAS. In the *2015 Open Internet Order*, the Commission's "definition for broadband internet access service include[d] the exchange of internet traffic by an edge provider or an intermediary with the broadband provider's network." Consequently, under the *2015 Open Internet Order*, internet traffic exchange was subject to the same forbearance as BIAS more generally. We propose to continue that uniform approach here, but also seek comment on whether and to what extent the internet traffic exchange component of BIAS should be subject to different tailoring of forbearance.

99. Finally, we also seek comment on any relevant new rules or statutory requirements enacted subsequent to the forbearance analysis in the *2015 Open Internet Order*.

III. Proposed Open Internet Rules

100. Today we propose to return to the basic framework the Commission adopted in 2015 to protect the openness of the internet. In 2015, consistent with its longstanding policy approach to protect internet openness through basic conduct "rules of the road," the Commission adopted a set of carefully tailored conduct rules to prevent specific practices harmful to an open internet—blocking, throttling, and paid prioritization—as well as a strong standard of conduct designed to prevent deployment of new practices that would harm internet openness, and enhancements to the existing transparency rule. In the *RIF Order*, the Commission broke with this longstanding approach by altogether eliminating the open internet conduct rules, which we believe left consumers exposed to behavior that can hinder their ability to access the open internet. Below, we propose to reinstate straightforward, clear rules that are designed to prevent ISPs from engaging in practices harmful to consumers, competition, and public safety, and that would provide the basis for a national regulatory approach toward BIAS.

101. We first propose to reinstate the rules adopted in the *2015 Open Internet Order* that prohibit ISPs from blocking, throttling, or engaging in paid or affiliated prioritization arrangements. We similarly propose to reinstate the general conduct standard adopted in the *2015 Open Internet Order*, which would prohibit practices that cause unreasonable interference or unreasonable disadvantage to consumers or edge providers. Finally, with regard to transparency, we propose to retain the current disclosures, and we

seek comment on the means of disclosure, the interplay between the transparency rule and the broadband label requirements, and any additional enhancements or changes we should consider. The rules we propose today are consistent with numerous other steps the Commission has taken to ensure that this country has access to affordable, competitive, secure, and reliable broadband. The proposed rules would establish clear standards for ISPs to maintain internet openness and would give the Commission a solid basis on which to take enforcement action against conduct that prevents people from fully accessing all of the critical services available through the internet.

A. Need for Rules

102. We believe that the rules we propose today will establish a baseline that the Commission can use to prevent and address conduct that harms consumers and competition when it occurs. Above, we express our belief that consumers perceive and use BIAS as an essential service, critical to accessing healthcare, education, work, commerce, and civic engagement. Because of its importance, we further believe it is paramount that consumers be able to use their BIAS connections without degradation due to blocking, throttling, paid prioritization, or other harmful conduct. The rules we propose today are designed to ensure these protections. Below, we seek comment on particular issues that inspire the need for these rules, including protecting public safety, ISPs' incentives and abilities to harm internet openness, the effects of harmful conduct on consumer demand and edge innovation, reliance on the Commission's communications sector expertise to address harmful conduct, and how the *RIF Order*'s oversight framework addresses harmful conduct. We invite commenters to submit economic analyses that weigh the costs and benefits of the Commission potentially adopting open internet rules.

1. Promoting Innovation and Free Expression

103. In the *2015 Open Internet Order*, the Commission found that internet openness helps promote innovation, investment, and free expression, among other goals. Among other things, the Commission found that the record there "overwhelmingly support[ed] the proposition that the internet's openness is critical to its ability to serve as a platform for speech and civic engagement," facilitate "the development of diverse content,

applications, and services,” and enable “a virtuous cycle of innovation.” We continue to place high importance on innovation, investment, and free expression, and we believe that conduct rules designed to ensure internet openness will better advance those goals, consistent with the reasoning in the 2015 *Open Internet Order*. We seek comment on that view.

104. We are skeptical of the *RIF Order*’s rejection of free expression as a likely benefit of internet conduct rules designed to advance internet openness. The *RIF Order* theorized that competition “will protect values such as free expression, to the extent that consumers value free expression as a service attribute and are aware of how their ISPs’ actions affect free expression.” We question, however, whether the *RIF Order* was correct to place such confidence in the marketplace as sufficient to advance free expression on the internet. Do consumers and the public have information about how ISP actions affect free expression on a sufficiently granular and detailed basis to act on that information? Separately, the *RIF Order* acknowledged that “[t]he competitive process and antitrust would not protect free expression in cases where consumers have decided that they are willing to tolerate some blocking or throttling in order to obtain other things of value.” We doubt that consumers are likely to act uniformly as a single, undifferentiated group, particularly where issues like free expression are concerned. We thus question how well the *RIF Order*’s analysis accounts for the interests of consumers who place different values on free expression. More generally, we seek updated information and analysis about the anticipated effects of internet conduct rules on free expression.

2. Protecting Public Safety

105. We believe that blocking, throttling, paid prioritization, and other potential conduct have the potential to impair public safety communications in a variety of circumstances and therefore harm the public. As discussed above, one of the Commission’s fundamental obligations under the Act is to advance public safety. The *Mozilla* court highlighted this charge and recognized the significance of it, emphasizing that “whenever public safety is involved, lives are at stake.” It went on to note that “[a]ny blocking or throttling of [safety officials’] internet communications during a public safety crisis could have dire, irreversible results.” Similarly, in the 2015 *Open Internet Order*, the Commission

recognized that paid prioritization and peering disagreements can negatively affect public safety communications traveling over the same networks. Above, we detail and seek comment on the wide range of public safety communications and applications that rely on broadband networks and on the related national security concerns implicating broadband service providers. We now seek comment on our belief that maintaining the *RIF Order*’s *ex post* enforcement framework will provide insufficient protection against conduct harms, which includes harms to public safety or national security. We note that the *Mozilla* court expressed specific skepticism about the Commission’s contention in the *RIF Order* that post-activity enforcement is a suitable method to address harmful conduct in the public safety context, emphasizing that “even if discriminatory practices might later be addressed on a post-hoc basis by entities like the Federal Trade Commission, the harm to the public cannot be undone.” We believe that the conduct rules we propose are necessary to prevent and mitigate harms to those public safety uses that would result from blocking, throttling, and other conduct, and we seek comment on our tentative conclusion. Our proposed conduct rules may also support consumer use of telehealth service and remote healthcare monitoring, such as through connected devices, by ensuring consumers can continue to access these services without the threat of blocking, throttling, or other degradation. We seek comment on consumer experiences where they have been harmed.

106. We further believe our proposed conduct rules would have particular benefits for the safety of individuals with disabilities. Above, we highlighted that these individuals increasingly rely on internet-based communications, and that “[t]hese applications often require significant bandwidth, making their use particularly sensitive to data caps and network management practices.” We believe the use of broadband to facilitate internet-based communications by persons with disabilities for public safety purposes, such as to contact emergency service providers, has a higher likelihood of being degraded by prioritization of latency-sensitive applications on the same facilities than less data-intensive uses, such as email, software updates, or cached video. We accordingly believe that our proposed rules would prevent such degradation and seek comment on this proposed analysis.

107. We seek comment on any other public safety harms or unaddressed

concerns that the proposed rules would help to alleviate. For example, would the proposed rules help to improve public safety officials’ ability to communicate via alerting systems to help improve emergency preparedness? Would they help to provide additional necessary bandwidth for IP-based communications to Public Safety Answering Points via 9–1–1? Would such rules help the authorities responding to such calls to have better or more complete information about an emergency to ensure a more comprehensive or timely response? Would such rules help public safety and law enforcement authorities to better communicate with one another during their responses to emergencies? What public safety issues have arisen since the Commission’s prior 2015 and 2018 orders that the proposed rules would help to address?

3. ISPs’ Incentive and Ability To Harm Internet Openness

108. In both the 2010 *Open Internet Order* and 2015 *Open Internet Order*, the Commission concluded that open internet rules were needed because ISPs have the incentive and ability to engage in practices that pose a threat to internet openness. In particular, the Commission found that because ISP networks serve as platforms for internet ecosystem participants to communicate, ISPs “are in a position to act as a ‘gatekeeper’ between end users’ access to edge providers’ applications, services, and devices and reciprocally for edge providers’ access to end users.” The 2015 *Open Internet Order* highlighted several economic incentives ISPs have to exploit this gatekeeper role, “such as preferring their own or affiliated content, demanding fees from edge providers, or placing technical barriers to reaching end users.” This behavior, the Commission found, “has the potential to cause a variety of other negative externalities that hurt the open nature of the internet,” which ISPs do not internalize. The Commission also concluded that ISPs “have the technical ability to act on incentives to harm the open internet.”

109. The *RIF Order* offered several reasons for rejecting the prior rationales, including ISPs’ economic incentives and supposed material competitive restraints. We believe these conclusions presumed that there were other ISPs to which consumers can switch if they were suffering open internet harms, and that the switching costs would not deter such switching. In addition, we tentatively agree with the *Mozilla* court, which found that, “[t]aken together, the Commission fail[ed] to provide a fully

satisfying analysis of the competitive constraints faced by broadband providers.” The Commission also claimed that “from the perspective of many edge providers, end users do not single home, but subscribe to more than one platform (e.g., one fixed and one mobile) capable of granting the end user effective access to the edge provider’s content (i.e., they multi-home),” and “to the extent multihoming occurs in the use of an application, there is no terminating monopoly.” However, consumers may lack access to both fixed and mobile connections, and even when they do have access to both, the Commission did not show that these connections allow consumers to access all edge provider services unhindered, and therefore are truly competitive alternatives. Indeed, the Commission has since concluded that “fixed broadband and mobile wireless broadband are not substitutes in all cases,” finding that each type of service “enables different situational uses.” We seek comment on this analysis.

110. The *RIF Order* also found the Commission’s action in the *2015 Open Internet Order* was unjustified because it lacked evidence of harms to internet openness. Setting aside the several examples of harmful conduct discussed in the *2015 Open Internet Order* and detailed in the record for the *RIF Order*, we believe the *RIF Order*’s conclusion gave inadequate consideration to the effects of the Commission’s consistent efforts to apply and enforce the open internet standards since early 2005, which we believe deterred harmful ISP conduct. Thus, to the extent there is limited evidence of harmful conduct prior to the *2015 Open Internet Order*, we believe that demonstrates the Commission’s consistent efforts to apply and enforce open internet standards since 2005 were effective and are needed, not that the *2015 Open Internet Order* and the protections it adopted were unjustified. We seek comment on this analysis.

111. We tentatively conclude that ISPs continue to have the incentive and ability to engage in practices that pose a threat to internet openness, and seek comment on this tentative conclusion and the above analysis. We also seek to update the record underlying the conclusions in the *2010 Open Internet Order* and *2015 Open Internet Order*. How have changes in the marketplace or technology since 2015 affected ISPs’, including smaller ISPs, incentives and ability to engage in such practices? To what extent do ISPs have economic incentives and mechanisms to block or disadvantage a particular edge provider or class of edge providers? To what

extent do vertically integrated providers have particularized incentives to discriminate—on price, quality, or other bases—in favor of affiliated products? For instance, we believe that many major ISPs are affiliated with OTT services or continue to offer competitive vertically integrated OTT services, and frequently provide consumers with promotional offers that bundle OTT services with BIAS. Do these affiliate relationships and vertically integrated offerings create additional incentive for ISPs to favor those services over others? To what extent should the Commission evaluate the ability and incentives of other intermediaries involved in the exchange of internet traffic, such as middle mile and backbone providers, to engage in conduct harmful to internet openness, particularly with respect to their relationships with ISPs? We seek comment on this analysis.

112. We also seek comment on whether ISPs are incentivized to increase revenues by charging edge providers for access or prioritized access to the ISPs’ end users. Are there justifications for charging fees to edge providers that were not present in 2015? We seek comment on these and other economic incentives and abilities that ISPs may have to limit openness.

113. We seek comment on the state of competition in the BIAS market. We note that the Commission’s *2022 Communications Marketplace Report* found that, as of 2021, approximately 36 percent of households lack a competitive option for fixed broadband at speeds of 100/20 Mbps and that 70 percent of households in rural areas lack such an option. Preliminary FCC staff calculations using December 2022 Broadband Deployment Collection data yield similar results. While competition in the mobile BIAS market is somewhat more significant, fixed and mobile services have not proven to be substitutable. To what extent does the state of competition affect ISPs’ incentives to limit openness? Are there different incentives for small ISPs? Similarly, to what extent does the state of competition affect ISPs’ incentives to innovate and invest in their networks? We seek insight into whether consumers in all areas of the country have adequate choices in the fixed and mobile broadband service market. Also, to what extent do broadband services with substantially different technical characteristics serve as competitive substitutes? How, if at all, do commercial practices differ in places where consumers have only one or two choices, particularly when those choices use different technologies? Although the Commission previously found that its

authority is not predicated on a finding of market power, and this finding has twice been upheld, is there a reason we should engage in a market power analysis now with respect to ISPs and, if so, how? We further seek comment on whether there are other economic theories that we should consider to better understand and assess ISP incentives to engage in practices that affect the internet’s openness. We also seek comment on the extent to which the state of competition in the BIAS market should play a role in our decision as to whether or not to reclassify BIAS as a Title II service.

114. We further seek information on ISP conduct since the *RIF Order* was adopted. Are there examples of conduct that has harmed internet openness? We note that one 2019 study suggested that ISPs regularly throttle video content. Aside from specific examples of harm, could other factors have deterred ISPs from engaging in any behavior that might have violated open internet principles? For instance, while the *RIF Order* was published in the **Federal Register** in February of 2018, it was not until the *Mozilla* case concluded in October of 2019 that it was clear open internet rules would no longer be in effect. To what degree might long-term contracts, and the general difficulty of implementing new business models, also have played a role in making it difficult for ISPs to exploit opportunities the *RIF Order* created? Could the threat of regulation have led ISPs to make voluntary commitments to maintain service consistent with certain conduct rules established in the *2015 Open Internet Order*, as they did, and if so, would this threat have dimmed with time? Because broadband connections were so essential during the pandemic, we believe ISPs have been under increased scrutiny by the Commission, the media, and the public since March 2020, and therefore have had a strong incentive to follow their voluntary commitments. Further, following the *RIF Order*, ISPs have been subject to state laws and executive orders addressing internet conduct. How have state regulations addressing ISP conduct affected ISP conduct nationwide? We also observe that unprecedented consumer demand for BIAS and edge innovation that occurred during the pandemic also led to unprecedented growth for ISPs. How did this growth impact providers’ incentives either to comply with open internet principles or to engage in behavior that might increase their revenues at the expense of internet openness? Are smaller ISPs’ incentives or ability to engage in

conduct that might harm internet openness different from those facing larger ISPs? What are the costs and advantages of waiting to act only after ISPs begin to take actions that might harm internet openness? Would such conduct be immediately identifiable? How quickly could ISPs comply with new rules and what harms would occur in the meantime? Going forward, is there reason to believe that ISPs will engage in conduct that harms the open internet, particularly if the Commission chooses not to adopt open internet rules?

4. Consumer Demand and Edge Innovation

115. We believe that an important byproduct of an open internet is the edge innovation and consumer demand that promotes ISP investment, and seek comment on this position. In the *2015 Open Internet Order*, the Commission recognized that “innovations at the edges of the network enhance consumer demand, leading to expanded investments in broadband infrastructure that, in turn, spark new innovations at the edge.” The Commission referred to this as the “virtuous cycle,” and it was the foundation for the action the Commission took in both the *2010 Open Internet Order* and *2015 Open Internet Order*. The validity of the virtuous cycle was upheld by both the *Verizon* court and the *USTA* court. The *RIF Order*, however, discounted the *2015 Open Internet Order*’s reliance on the virtuous cycle, contending there was a two-sided market in which ISPs acted as platforms and benefited from facilitating interactions between both sides of the market—edge providers and end users—and profits from inducing both sides of the market to use its platform.

116. We tentatively conclude that the *RIF Order*’s explanation of how two-sided markets work does not address a central problem open internet rules are intended to address. When an ISP’s actions harm content creators and edge providers, the impact is distributed across all ISPs, not just the ISP undertaking the action. Yet, each ISP only accounts for the impact on its own operations. Consequently, a profit-making decision from the perspective of the individual ISP creates repercussions across all ISPs that harm the industry and the economy at large. When an ISP makes the profit-maximizing decisions the *RIF Order* describes, it only accounts for the impacts of its decision on its own company. It does not account for the impact of those actions on ISPs that lie outside its geographic market. These constitute the bulk of ISPs. Thus, an ISP, for example, that does not face fully

effective competition, might expect to see higher profits if it sets prices for edge providers that recover in expectation a little more than its long-term costs. However, consistent with the reasoning of the *RIF Order*, it will not set prices for edge providers that are so high that the impact on the quality of edge provider service would cause the ISP to lose more because it would be forced to lower prices to its own consumers. We believe that the difficulty with the *RIF Order* analysis is that in setting its profit-maximizing prices for edge providers, the ISP lowers service quality for all ISPs, but that harm does not feature in the ISP’s profit-maximizing calculation. While the impact on content quality of a single ISP setting prices for edge providers somewhat above the competitive level will be small and spread out over all ISPs, all similarly situated ISPs face similar incentives. Thus, since ISPs have no means of coordinating their behavior, and doing so could be illegal, each will behave in this way with material negative cumulative effects. The result is a breaking of the virtuous cycle described in the *2010 Open Internet Order*: not only will ISPs collectively be worse off, but so will the broader economy. We seek comment on this analysis and other bases for validating or questioning the *RIF Order*’s analysis.

117. We believe it is necessary to secure the open internet to preserve the virtuous cycle wherein market signals on both sides of ISPs’ platforms encourage consumer demand, content creation, and innovation, with each respectively increasing the other, providing ISPs incentives to invest in their networks. We further believe that if innovative edge services are subject to blocking, throttling, paid prioritization, or other conduct by ISPs that harms internet openness, that conduct will reduce edge innovation. This will, in turn, reduce the quality and quantity of edge services available to consumers, and, specifically with blocking and throttling, directly inhibit consumers from accessing the edge services they desire. The impacts on edge services and consumers will reduce demand for broadband connections and ultimately suppress the need for ISPs to invest in upgrades to their networks or new deployments to meet that demand. Stalled ISP network improvements ultimately will undermine new edge innovation and consumer demand. We seek comment on this proposed analysis.

118. We believe the conduct rules we propose will protect edge innovation and the ability of consumers to access

those new and developing services, thereby promoting both edge and ISP investment. We seek comment on this view. In particular, what is the role of the internet’s openness in facilitating consumer demand and edge innovation that encourages edge and ISP investment? We are also interested in understanding the role the open internet may play in the promotion of edge competition or in the reduction or elimination of barriers to edge entry and investment.

5. The Commission’s Ability To Address Conduct That Undermines an Open Internet

119. We believe that, as the expert agency on communications, the Commission is best positioned to safeguard internet openness. The *RIF Order* removed the Commission’s authority to enforce open internet requirements and left to the FTC the responsibility to address harmful ISP conduct. The current Chair of the FTC agrees that the Federal Communications Commission “has the clearest legal authority and expertise to fully oversee internet service providers,” noting specifically that she supports efforts by the Commission “to reassert that authority and once again put in place the nondiscrimination rules, privacy protections, and other basic requirements needed to create a healthier market.” We seek comment on whether the Commission’s longstanding oversight of the communications industry gives it unique technical, economic, and public interest aptitude in evaluating ISP conduct. To what extent does the Commission’s enforcement apparatus provide it with sufficient authority and capabilities to address harmful conduct by ISPs, including by securing administrative relief? What efficiencies would be achieved as a result of the Commission having authority over BIAS along with other communications services (e.g., voice and cable) that providers offer to customers as part of bundled offerings?

6. The *RIF Order*’s Framework

120. When the Commission repealed the open internet rules in the *RIF Order*, it broke from the Commission’s persistent efforts to preserve an open internet. The *RIF Order* did not address the longstanding bipartisan agreement that the Commission should prohibit ISPs from engaging in blocking, throttling, and other conduct that undermines an open internet and—importantly—that it should have the authority to enforce those restrictions. This was echoed by the *Mozilla* court, which was “troubled by the

Commission's failure to grapple with the fact that, for much of the past two decades, ISPs were subject to some degree of open Internet restrictions." The *Mozilla* court explained, that "[w]hile outside observers may associate 'light touch' with a distinct era in regulation and 'open Internet' with another era, the successive Commission majorities have consistently vowed fealty to both." We believe the *RIF Order* failed to ensure the most basic protections for the open internet—prohibitions on blocking and throttling—let alone other threats to the open internet identified in the *2015 Open Internet Order*. We seek comment on this analysis.

121. We believe that the *2015 Open Internet Order* was consistent with Commission precedent by applying a light-touch regulatory framework to preserve an open internet. When the *Verizon* court struck down the *2010 Open Internet Order*, the Commission sought to implement a solution to preserve longstanding open internet standards that supported the unprecedented growth in fixed and mobile subscribership, edge innovation, and network investment that occurred up to that point. The Commission determined that classifying BIAS as a Title II service was not only more consistent with a modern assessment of how the definition of "telecommunications service" applies to current BIAS offerings, but would also enable it to apply and enforce open internet rules. Thus, in establishing open internet rules using a light-touch application of Title II, we believe the *2015 Open Internet Order* ensured maintenance of the status quo that had existed for more than ten years prior to that *Order*. As such, we tentatively conclude that the action we propose today restores the status quo that had existed up until the Commission adopted the *RIF Order*, in which clear rules of the road ensure that edge innovation and investment flourish and consumers can access all lawful content they see fit. We seek comment on our proposed assessment.

122. *Transparency*. The Commission's transparency rule requires ISPs to publicly disclose the network practices, performance characteristics, and commercial terms of the BIAS they offer, including disclosure of any blocking, throttling, and affiliated or paid prioritization practices. We recognize that transparency is a valuable tool to protect the open internet, but that it is only one element of a comprehensive framework that prevents consumers from experiencing harms that inhibit their access to an open

internet. While the transparency requirements currently in place provide consumers and edge providers the ability to make informed decisions, we believe their effectiveness is limited because they do not restrict ISPs from engaging in activities that have long enjoyed bipartisan opposition—blocking, throttling, and discrimination—let alone other conduct that has the potential to cause harm, such as paid prioritization. Indeed, the *RIF Order* only requires that companies disclose their blocking, throttling, and paid or affiliated prioritization in their transparency disclosures; it does not prohibit companies from engaging in these practices. We tentatively conclude that these are the types of conduct that require *ex ante* intervention to ensure they do not happen in the first instance, and therefore tentatively conclude that the comprehensive set of conduct rules that we propose today are needed to protect consumers from this conduct. We seek comment on this tentative conclusion.

123. *Consumer Protection and Antitrust Law*. We seek comment on whether, in practice, consumer protection and antitrust laws provide sufficient protections against blocking, throttling, paid prioritization, and other conduct that harms the open internet, as the *RIF Order* asserted. The *Mozilla* court explained that the *RIF Order* "theorized why antitrust and consumer protection law is preferred to *ex ante* regulations but failed to provide any meaningful analysis of whether these laws would, in practice, prevent blocking and throttling." The *RIF Order* also seems to concede that blocking, throttling, and discrimination may be permitted under its chosen oversight and enforcement framework, and that paid prioritization may be found to be permissible in many instances.

124. We seek comment on the application of consumer protection laws by the FTC. Notably, a 2021 Supreme Court ruling restricted the FTC's ability to seek monetary relief on behalf of consumers, thereby reducing the deterrent effect of the FTC's actions. Congress has also created other exceptions to the FTC's consumer protection authority and assigned consumer protection responsibilities to other agencies that have expertise in both consumer protection and the relevant industry. Finally, we also observe that while the FTC has generally proceeded through *ex post* enforcement actions and public guidance, reclassification would allow the Commission to proceed by establishing *ex ante*, commonly applicable rules. We seek comment on

the benefits and burdens of such an approach.

125. We also seek comment on whether the FTC's and Department of Justice's (DOJ) antitrust enforcement authority is limited in its ability to protect against open internet harms. The *RIF Order* claims that antitrust would be effective because harmful conduct would be evaluated under the "rule of reason," which it claims amounts to a "consumer welfare test." However, the "rule of reason" analysis includes a subjective determination about whether alleged economic benefits outweigh recognized consumer harms. Because the analysis focuses on economic factors, does it provide sufficient weight to important non-economic factors, which courts have recognized are appropriate to consider under the public interest standard of the Act? Even if strict application of antitrust law does not reveal a violation of section 1 or section 2 of the Sherman Act, could there still be market distortions and power asymmetries, both between ISPs and other market players and between ISPs and consumers, that require *ex ante* intervention in the public interest, at least in instances where the Commission may find that conduct is unjust, unreasonable, or unreasonably discriminatory? For example, would regulatory intervention be necessary in instances when there is a high likelihood of harm to consumers and the likelihood or availability of effective remedies for consumers is speculative?

126. *Consumer Relief*. Even if the *RIF Order's* oversight and enforcement framework were to provide some protection, we seek comment on whether it gives consumers a meaningful opportunity to secure relief. The *RIF Order* concluded that its framework "ensures that consumers have means to take remedial action if an ISP engages in behavior inconsistent with an open Internet." It appears that consumers' primary means for seeking recourse under that framework is to submit complaints to the FTC with the goal of spurring the agency to direct its resources to investigate and address the alleged harms. With antitrust, in particular, it appears that to pursue relief, consumers must submit complaints that describe conduct that inhibits their access to the internet, attempt to tie that conduct to anticompetitive behavior that harms other entities, and otherwise rely on the FTC or other entities to bring suits alleging anticompetitive conduct that also harms the open internet. We seek comment on whether consumers can effectively use these mechanisms to obtain relief, and do so in a timely

manner, and we seek comment generally regarding consumers' experiences obtaining relief following the *RIF Order*.

127. Aside from the remedies offered by law, we seek comment on the adequacy of other methods the *RIF Order* offers that consumers can use to secure relief. First, the *RIF Order* suggests that consumers may be able to seek service from another ISP if they are experiencing harmful conduct, but as discussed above, it is not clear there is adequate local competition in many areas, especially rural areas, to give consumers a meaningful choice among providers, and we seek comment on this assessment. For instance, 36 percent of households lack a competitive option for broadband at speeds of 100/20 Mbps and 70 percent of households in rural areas lack such an option. At higher speeds, the level of competition becomes non-existent in most areas with approximately 96 percent of households lacking a competitive option for gigabit broadband service. Even when consumers have access to another provider not engaging in behavior that is inconsistent with an open Internet, to what extent is their choice between providers often negated because the alternatives charge significantly higher prices or provide lower performance and quality of service? Second, the *RIF Order* states that if ISPs engage in conduct that harms the open internet, public attention from consumer backlash would police their behavior, but it seems to assume that the harmful conduct by ISPs would be obvious or widespread—rather than surreptitious or sporadic—such that a sufficient number of consumers would be aware of the conduct and vocal in their objections to have the necessary force to influence ISP conduct. Third, even if ISP conduct was sufficiently egregious to result in a consumer backlash, how would that backlash police ISP behavior? We seek comment on the foregoing.

128. Further, to the extent the *RIF Order*'s oversight and enforcement framework can address harmful conduct when it occurs, we seek comment on whether the framework will still result in fewer instances where ISPs will be subject to enforcement action for conduct that is clearly harmful to an open internet. If the *RIF Order*'s framework becomes the settled approach, will consumers suffer a greater amount of harmful conduct than would exist under the open internet rules we propose, and receive fewer remedies when that harm occurs? Even when remedies are achieved, will they provide sufficient redress to harms

resulting from ISPs' conduct? Does the *RIF Order*'s regulatory framework adequately serve the public interest, given how essential broadband is to full participation in today's society and economy?

129. *Edge Provider Protections.* We believe the *RIF Order*'s reliance on antitrust protections undermines the virtuous cycle by failing to protect the small edge services that comprise an important part of the internet. While antitrust protections would apply where, for example, an ISP favored its own edge provider, or sought to harm a competing edge provider, antitrust protections do not forbid the unjust or unreasonable exercise of market powers. But it is exactly those practices that could unravel the virtuous cycle. As part of its justification for reliance on antitrust law, the *RIF Order* expresses particular concern about the effect of regulations on small ISPs. But we believe that there are far more edge services that are small—typically many times smaller than the smallest ISPs—which the *RIF Order* does not acknowledge or evaluate. We seek comment on this belief and on the extent to which providers of these edge services would have any leverage in negotiations with ISPs of any size, let alone large, vertically integrated ISPs. Should large, or even small, ISPs begin seeking paid prioritization arrangements, for example, would this disproportionately harm small edge providers, for example, because larger edge providers could use their own countervailing power to better manage the situation? Would this increase entry barriers, harming edge provider competition and innovation, for example, by discouraging new entry against larger established edge providers? In all of these cases, what legal case would a harmed edge provider be able to bring under antitrust law and what would the likelihood of success be? The *RIF Order* argues that ISPs have incentives to support nascent competition as more edge provider competition will reduce the countervailing power of large, entrenched ISPs. We seek comment on whether this is accurate, and in particular whether any efforts or investments by an ISP to help nascent edge providers would produce diffuse benefits to all ISPs, and thus whether any single ISP would have appropriate incentives to help develop edge provider competition.

130. Research in innovation economics suggests that edge innovation is heterogeneous. Some types of edge innovation will thrive under general purpose open networks. Such

innovations could have significant positive spillover effects that benefit the broader internet ecosystem. However, other types of edge innovation, especially during the early phases of the innovation process, may be facilitated by quality of service differentiation of the network. This suggests that a forward-looking open internet policy will be most supportive of innovation if it protects the openness of the access platforms for innovations with high spillover effects while at the same time allowing non-discriminatory forms of network differentiation to support edge innovations that are facilitated by such support. We seek comment on this proposed analysis.

131. *Costs of Oversight Regime.* We seek comment generally on the costs to ISPs resulting from the *RIF Order*'s chosen oversight regime. The *RIF Order* claims that its approach would lower compliance costs for ISPs. We reiterate, however, that because the *RIF Order*'s preemption directive was vacated by the D.C. Circuit in *Mozilla*, ISPs are now subject to a patchwork of state requirements for BIAS, rather than a national regulatory framework. We seek comment on the costs of this patchwork approach.

132. We also seek comment on the costs of the *RIF Order*'s consumer protection and antitrust oversight framework. We observe that whether an act is unfair or deceptive under consumer protection law each depends on its own three-prong subjective test, which can result in unforeseen outcomes, and the antitrust rule of reason relies on a case-by-case evaluation. In light of these factors, we seek comment on whether the *RIF Order*'s removal of bright-line, *ex ante* rules can result in significant compliance cost for ISPs. Relatedly, what are the costs to ISPs for having to evaluate the risks of their planned conduct under this consumer protection and antitrust oversight framework?

B. Conduct Rules

133. We propose to adopt rules to prohibit ISPs from blocking, throttling, or engaging in paid or affiliated prioritization arrangements, and also seek comment on the adoption of a proposed general conduct standard for ISPs. The last several years have demonstrated not only broadband's essential value, but also the consequences to consumers of its absence or degradation, and we therefore believe it important to establish clear, bright-line rules. We seek comment on the proposals and analyses herein.

134. The conduct rules we propose track the language of the rules the Commission adopted in the *2015 Open Internet Order*. In 2015, the Commission found that blocking, throttling, and paid prioritization arrangements were three practices that “in particular demonstrably harm the open internet.” The Commission adopted rules to ban these three practices, finding that they are “inherently unjust and unreasonable, in violation of section 201(b) of the Act, and that these practices threaten the virtuous cycle of innovation and investment that the Commission intends to protect under its obligation and authority to take steps to promote broadband deployment under section 706 of the 1996 Act.” Even while eliminating these protections in 2018, the *RIF Order* still recognized the harms of blocking and throttling practices and required disclosure of such practices under its revised transparency rule. Below, we seek comment on how experience since the *RIF Order* would help inform the scope and language of prohibitions on blocking, throttling, and paid prioritization arrangements. At the outset, however, we seek comment at a broader level on whether these three practices are still the key threats to internet openness.

135. We do not anticipate that the open Internet rules we propose today will have a harmful effect on investment. ISP investment was not inhibited from 2005 through 2016, when the Commission consistently sought to impose and enforce open internet standards. We also believe that many ISP investment decisions over the next several years will be significantly influenced by the influx of federal and state funding allocated to ISPs to support infrastructure deployment and broadband connectivity. In light of these facts, we do not expect that adopting open internet rules will change ISP investment decisions. Do commenters agree? Furthermore, we believe that “[w]ithout an open Internet, there would be less broadband investment and deployment” because of the expected harm to the virtuous cycle. As the Commission concluded in the *2015 Open Internet Order*, “to the extent that our decision might in some cases reduce providers’ investment incentives, we believe any such effects are far outweighed by positive effects on innovation and investment in other areas of the ecosystem that our core broadband policies will promote.” We seek comment on these views.

1. Preventing Blocking of Lawful Content, Applications, Services, and Non-Harmful Devices

136. We propose to adopt a bright-line rule prohibiting ISPs from blocking lawful content, applications, services, or non-harmful devices. In 2015, the Commission found that ISPs function as gatekeepers for both their end-user customers who access the internet, and for various transit providers, CDNs, and edge providers attempting to reach the broadband provider’s end-user subscribers. The Commission concluded that ISPs have the economic incentives and technical ability to engage in practices that pose a threat to internet openness by harming other network providers, edge providers, and end users. Reversing course in 2018, the Commission determined, in contrast, that “ISPs have strong incentives to preserve internet openness, and these interests typically outweigh any countervailing incentives an ISP might have.” As discussed above, we tentatively conclude that ISPs continue to have the incentive and ability to engage in practices that threaten internet openness, and as such, we believe rules are needed to protect a consumer’s right to access lawful content, applications, and services, and to use non-harmful devices. We seek comment on this proposed analysis.

137. As the Commission found in the *2010 Open Internet Order* and the *2015 Open Internet Order*, we believe that “the freedom to send and receive lawful content and to use and provide applications and services without fear of blocking is essential to the Internet’s openness.” To that end, we propose to adopt the following no-blocking rule applicable to both fixed and mobile providers of BIAS, which tracks the language of the prohibition adopted by the *2015 Open Internet Order*:

A person engaged in the provision of broadband Internet access service, insofar as such person is so engaged, shall not block lawful content, applications, services, or non-harmful devices, subject to reasonable network management.

We seek comment on this proposed rule and whether this remains the best formulation of a no-blocking principle for ISPs. As in 2015, we intend that the phrase “content, applications, and services” refers to all traffic transmitted to or from end users of a broadband internet access service, including traffic that may not fit clearly into any of these categories. Is this language expansive enough to encompass all types of internet traffic, or are there additional categories that we should include? We also propose to make clear that the no-

blocking rule would prohibit ISPs from charging edge providers a fee to avoid having the edge providers’ content, service, or application blocked from reaching the broadband provider’s end-user customers. As in 2015, we also propose that this prohibition will apply to transmission of lawful content only and does not prevent or restrict an ISP from refusing to transmit unlawful material. We seek comment on these proposals. What other consequences of a no-blocking rule should we consider?

138. As far back as the Commission’s *Internet Policy Statement* in 2005, major ISPs have broadly accepted a no-blocking principle. Even after the repeal of the no-blocking rule, many ISPs continue to advertise a commitment to open internet principles on their websites, which include commitments not to block traffic except in certain circumstances. Rather than reflect a lack of potential harm to consumers and the open internet, we believe that these continued commitments to no-blocking principles emphasize their importance to the internet as we know it. We believe that codifying this principle in the Commission’s rules is necessary to protect consumers and internet openness against any ISP’s decision in the future to move away from this widely accepted principle. Furthermore, because this principle is so widely accepted, including by ISPs, we anticipate compliance costs will be minimal. We seek comment on this analysis. We seek comment on whether the predictive reasoning underlying the Commission’s repeal of the no-blocking rule in 2018 proved accurate. We also seek specific comment regarding any instances of an ISP blocking lawful content, applications, services or non-harmful devices in the years since the Commission repealed the no-blocking rule. Finally, we seek comment on the costs and benefits of a no-blocking rule.

2. Preventing Throttling of Lawful Content, Applications, Services, and Non-Harmful Devices

139. Next, we propose to adopt a rule to prevent ISPs from throttling lawful content, applications, services, and non-harmful devices. As part of the no-blocking rule that the Commission adopted in the *2010 Open Internet Order*, the Commission prohibited ISPs from “impairing or degrading particular content, applications, services, or non-harmful devices so as to render them effectively unusable (subject to reasonable network management),” because such conduct “can have the same effects as outright blocking.” In 2015, the Commission concluded that a standalone prohibition was required to

prevent ISPs from impairing or degrading lawful internet traffic. The Commission used the term “throttling” to refer to such conduct that is not outright blocking, but that inhibited the delivery of particular content, applications, or services, or particular classes of content, applications, or services.

140. We propose to adopt the following no-throttling rule applicable to both fixed and mobile providers of BIAS, which tracks the language of the Commission’s *2015 Open Internet Order*, and seek comment on our proposal:

A person engaged in the provision of broadband internet access service, insofar as such person is so engaged, shall not impair or degrade lawful internet traffic on the basis of internet content, application, or service, or use of a non-harmful device, subject to reasonable network management.

As in 2015, we intend this rule to prohibit conduct that impairs or degrades lawful traffic to a non-harmful device or class of devices, which includes any conduct by an ISP to impair, degrade, slow down, or render effectively unusable particular content, services, applications, or devices, that is not reasonable network management. We also propose to give the same meaning to “content, applications, and services” as we propose in the context of the no-blocking rule, and we seek comment on this proposal. Have there been any technological changes or advancements in network management since 2015 that we should reflect in the proposed rule? As written, does the proposed rule provide clear guidance to ISPs and customers on what is considered prohibited conduct? As in 2015, we propose that transfers of unlawful content or unlawful transfers of content would not be protected by the no-throttling rule. Further, as with our proposed no-blocking rule, we propose to prohibit ISPs from imposing a fee on edge providers to avoid having the edge providers’ content, service, or application throttled. We seek comment on these proposals. What other aspects and consequences of a no-throttling rule should we consider?

141. As in 2015, we propose that while a no-throttling rule would address instances in which an ISP targets particular content, applications, services, or non-harmful devices, it would not address the practice of slowing down an end user’s connection to the internet based on a choice clearly made by the end user. For example, an ISP may offer a data plan in which a subscriber receives a set amount of data at one speed tier and any remaining data at a lower tier. We seek comment on our

proposal to maintain this distinction. We do not intend to leave such data plans without oversight, however, and therefore propose to allow the Commission to review the particulars of a certain data plan, as required by sections 201 and 202 of the Act, which prohibit unjust and unreasonable charges and practices, or our proposed general conduct standard, discussed below.

142. As discussed above, because BIAS connections were so essential during the pandemic, we believe ISPs have been under increased scrutiny by the Commission, the media, and the public since March 2020, and therefore have had a strong incentive to follow their voluntary commitments to maintain service consistent with certain conduct rules established in the *2015 Open Internet Order*. We believe that this, coupled with unprecedented consumer demand for BIAS during the pandemic and state regulations addressing ISP conduct, helped to constrain ISPs from engaging in conduct that could harm internet openness. These constraints, however, are neither permanent nor uniform, and we believe that incentives for ISPs to degrade competitors’ content, applications, or devices remain; as such, we propose that rules are needed to protect consumers’ right to access lawful internet traffic of their choice without impairment or degradation. We seek comment on this proposed analysis, and invite comment on ISPs’ incentives to engage in throttling conduct harmful to internet openness. As the Commission recognized in the *RIF Order*, “[t]he potential consequences of blocking and throttling lawful content on the internet ecosystem are well-documented in the record and in Commission precedent.” Even after the repeal of the no-throttling rule, ISPs continue to advertise on their websites that they do not throttle traffic except in limited circumstances. As a result, we anticipate that prohibiting throttling of lawful internet traffic will impose a minimal compliance burden on ISPs. Do commenters agree? We seek comment on specific costs or technical concerns that our proposed rule would impose on ISPs, including small providers. We also seek comment on the reasoning underlying the Commission’s repeal of the no-throttling rule in 2018. We seek specific comment regarding any instances of an ISP throttling lawful content, applications, services, or non-harmful devices in the years since the no-throttling rule was repealed.

3. No Paid or Affiliated Prioritization

143. We next propose to ban arrangements in which an ISP accepts

consideration (monetary or otherwise) from a third party to manage its network in a manner that benefits particular content, applications, services, or devices. Under this proposal, we would also prohibit arrangements in which a provider manages its network in a manner that favors the content, applications, services, or devices of an affiliated entity. The Act defines “affiliate” as “a person that (directly or indirectly) owns or controls, is owned or controlled by, or is under common ownership or control with, another person. For purposes of this paragraph, the term ‘own’ means to own an equity interest (or the equivalent thereof) of more than 10 percent.” In 2015, the Commission adopted a rule banning these type of paid or affiliated prioritization agreements, finding that such practices “harm consumers, competition, and innovation, as well as create disincentives to promote broadband deployment.” We tentatively conclude that this reasoning remains applicable today. We seek comment on this proposal and the underlying analysis.

144. Tracking the language of the Commission’s *2015 Open Internet Order*, we propose to adopt the following definition of “paid prioritization” and rule banning such arrangements:

A person engaged in the provision of broadband internet access service, insofar as such person is so engaged, shall not engage in paid prioritization. “Paid prioritization” refers to the management of a broadband provider’s network to directly or indirectly favor some traffic over other traffic, including through use of techniques such as traffic shaping, prioritization, resource reservation, or other forms of preferential traffic management, either (a) in exchange for consideration (monetary or otherwise) from a third party, or (b) to benefit an affiliated entity.

In adopting a ban on paid prioritization in 2015, the Commission sought to prevent the bifurcation of the internet into a “fast” lane for those with the means and will to pay and a “slow” lane for everyone else. This development, the Commission reasoned, would introduce artificial barriers to entry, distort the market, harm competition, harm consumers, discourage innovation, undermine public safety and universal service, and harm free expression. The Commission was concerned that preferential treatment arrangements would create a chilling effect, disrupting the internet’s virtuous cycle of innovation, consumer demand, and investment, and that the widespread use of paid prioritization practices would cause damage to

internet openness that would be difficult to reverse and challenging to track. We tentatively conclude that these concerns remain valid today, and we seek comment on this conclusion. What are some examples of harms or categories of harms that paid prioritization arrangements might cause to the open internet and to consumers? Does the language of the proposed rule make clear the scope of this proposed prohibition? What other aspects or consequences of a ban on paid prioritization practices should we consider?

145. Previously, the Commission has found it well-established that ISPs have both the incentive and the ability to engage in paid prioritization. In its *Verizon* opinion, the D.C. Circuit noted the powerful incentives ISPs have to accept fees from edge providers in return for excluding their competitors or for granting prioritized access to end users. Some ISPs continue to advertise that they do not engage in paid or affiliated prioritization practices. Even with similar promises from ISPs in 2015, the Commission concluded that the potential harm to the open internet was too significant to rely on mere promises from ISPs because “the future openness of the internet should not turn on the decision of a particular company.” We tentatively conclude that this reasoning remains valid today, and we seek comment on this tentative conclusion, and any alternatives we should consider.

146. In choosing to repeal the ban on paid prioritization in 2018, the Commission found that the costs of a ban outweighed the benefits, and that the transparency rule and the enforcement of existing antitrust and consumer protection laws would sufficiently address many of the concerns regarding the dangers of paid prioritization arrangements. We seek comment on that assessment from 2018. In weighing the costs and benefits, the Commission did not identify specific compliance costs, but rather identified the costs in the form of forgone benefits. While we do not dispute that some potential benefits may result from paid prioritization arrangements, we tentatively conclude that the potential harms to consumers and the open internet outweigh any speculative benefits. Do commenters agree? Why or why not? What compliance costs might ISPs incur as a result of such a ban, including small providers? The Commission also found in 2018 that paid prioritization could be a tool in helping to close the digital divide by reducing BIAS subscription prices for consumers. Do commenters agree with

this assessment? We tentatively conclude that the Commission’s 2018 finding that existing antitrust and consumer protection laws, in conjunction with some form of a transparency rule, offer enough protection against the potential harms caused by paid prioritization arrangements was erroneous. We seek comment on this tentative conclusion.

147. As part of a rule prohibiting paid prioritization arrangements, we also propose to adopt a rule concerning waiver of such a ban that establishes a balancing test. Under our waiver rules, the Commission may waive any rule in whole or in part, “for good cause shown.” A general waiver of the Commission’s rules is only appropriate if special circumstances warrant a deviation from the general rule and such a deviation will serve the public interest. In 2015, the Commission found that it was appropriate to adopt specific rules concerning the factors that it will use to examine a waiver request of the paid prioritization ban. We tentatively conclude that it remains appropriate to accompany a rule prohibiting paid prioritization arrangements with specific guidance on how the Commission would evaluate subsequent waiver requests. We seek comment on this conclusion. Tracking the language of the *2015 Open Internet Order*, we propose to adopt the following rule, and seek comment on this proposal:

The Commission may waive the ban on paid prioritization only if the petitioner demonstrates that the practice would provide some significant public interest benefit and would not harm the open nature of the internet.

148. Following the framework the Commission established in 2015, we propose to require an applicant seeking a waiver of our proposed rule to prohibit paid prioritization arrangements to make two related showings. First, the applicant would need to demonstrate that the practice will have some significant public interest benefit. The applicant could make such a showing by providing evidence that the practice furthers competition, innovation, consumer demand, or investment. Second, the applicant would need to demonstrate that the practice does not harm the nature of the open internet. This second showing would include, but is not limited to, providing evidence that the practice: (i) does not materially degrade or threaten to materially degrade the BIAS of the general public; (ii) does not hinder consumer choice; (iii) does not impair competition, innovation, consumer demand, or investment; and

(iv) does not impede any forms of expression, types of service, or points of view. We seek comment on the continued relevance of these four examples. Should the Commission consider other factors when considering a request to waive our proposed ban on paid prioritization arrangements? Do commenters agree that this language creates a “high bar” for potential applicants to meet, ensuring that the Commission would only grant waiver relief in exceptional cases?

4. General Conduct Rule

149. We propose to adopt a general conduct standard, which would prohibit practices that unreasonably interfere with or disadvantage consumers or edge providers. In 2015, the Commission adopted a standard to prohibit, on a case-by-case basis, practices that unreasonably interfere with or unreasonably disadvantage the ability of consumers to reach the internet content, services, and applications of their choosing or of edge providers to access consumers using the internet. The Commission reasoned that while the bright-line rules against blocking, throttling, and paid prioritization arrangements would act as “critical cornerstone[s] in protecting and promoting the open internet,” it also needed a mechanism to respond to “other current or future practices that cause the type of harms our rules are intended to address.” The general conduct standard was necessary, in other words, to ensure that ISPs did not find a technical or economic means to evade these bright line bans to wield their gatekeeper power in a way that would compromise the open internet. We agree with the Commission’s conclusion in 2015 that it is “critical that access to a robust, open internet remains a core feature of the communications landscape, but also that there remains leeway for experimentation with innovative offerings.” We believe that this reasoning continues to support the adoption of a general conduct standard to operate as the catch-all backstop to the three bright-line prohibitions, and we seek comment on this analysis.

150. We propose to adopt a general conduct standard that tracks the language of the *2015 Open Internet Order*, and we seek comment on this proposal:

Any person engaged in the provision of broadband internet access service, insofar as such person is so engaged, shall not unreasonably interfere with or unreasonably disadvantage (i) end users’ ability to select, access, and use broadband internet access service or the lawful internet content,

applications, services, or devices of their choice, or (ii) edge providers' ability to make lawful content, applications, services, or devices available to end users. Reasonable network management shall not be considered a violation of this rule.

In 2015, the Commission found that careful application of this standard would act to not only balance the benefits of innovation against the harms to end users and edge providers, but also act to protect free expression. If adopted, we anticipate that this general conduct standard would accomplish these same goals going forward, and we seek comment on this prediction. Does the proposed language capture the scope of behaviors that the Commission might need to address? Have there been any technical or market developments that should affect our approach? Is there an alternative standard we should adopt to establish a general conduct rule?

151. Consistent with the Commission's 2015 approach, we propose to enforce this standard with a framework and in a manner that would provide certainty and flexibility to the industry and encourage innovation, while best protecting the open internet. First, we propose to follow a case-by-case approach that would consider the totality of the circumstances when analyzing whether conduct satisfies the standard. Second, we propose a non-exhaustive list of factors that we would consider to aid in our analysis. These factors would include: (i) whether a practice allows end-user control and enables consumer choice; (ii) whether a practice has anti-competitive effects in the market for applications, services, content, or devices; (iii) whether a practice affects consumers' ability to select, access, or use lawful broadband services, applications, or content; (iv) the effect a practice has on innovation, investment, or broadband deployment; (v) whether a practice threatens free expression; (vi) whether a practice is application agnostic; and (v) whether a practice conforms to best practices and technical standards adopted by open, broadly representative, and independent internet engineering, governance initiatives, or standards-setting organizations. Do all of these factors remain relevant in today's internet ecosystem? If not, why not? Are there other factors we should consider including in this non-exhaustive list that would aid with industry compliance or Commission enforcement?

152. We believe that the general conduct standard we propose today, mirroring that adopted in the *2015 Open Internet Order*, provides sufficient guidance to ISPs for purpose of

compliance, a conclusion affirmed by the D.C. Circuit. Nonetheless, in 2018, the Commission repealed the general conduct standard because it found that it was "vague and ha[d] created regulatory uncertainty in the marketplace hindering investment and innovation." We seek comment on whether there are additional steps we should take to ensure that ISPs understand the types of conduct and practices that might be prohibited under our proposal. Are there any specific practices that would or would not violate this proposed rule, and if so, should we provide examples of those practices? For example, are there any zero rating or sponsored data practices that raise particular concerns under the proposed general conduct standard? What would the compliance costs be for ISPs, particularly small providers? How would our proposed general conduct standard affect current and future ISP business practices? What other aspects or consequences of imposing a general conduct standard should we consider? We seek comment on whether the Commission's prediction in 2018 that eliminating the internet conduct standard will "benefit consumers, increase competition, and eliminate regulatory uncertainty that has a 'corresponding chilling effect on broadband investment and innovation'" has been borne out. Is it reasonable to attribute any growth and development in broadband markets and services to elimination of the general conduct rule, or is such a potential connection too attenuated? The *RIF Order* also found that "the benefits of the internet conduct standard provides approximately zero additional benefits" when compared to the antitrust and consumer protection enforcement in place through the FTC, while imposing negative benefits in the form of delayed or never-brought-to-market innovations. We seek comment on whether elimination of the general conduct rule has resulted in new innovations which would not have been permissible under the general conduct rule.

153. In the alternative, we seek comment on whether we should instead rely on the "just and reasonable" standards in sections 201 and 202 of the Act. In 2015, the Commission explained that the general conduct rule was its interpretation of sections 201 and 202 in the broadband context. We seek comment on whether it remains necessary to enunciate a specific rule, like the proposed general conduct standard described above, by interpreting sections 201 and 202 in the context of broadband, or whether it

would be sufficient to rely on sections 201 and 202 alone to address potential harmful practices and behaviors. Would the latter alternative approach provide sufficient certainty and clarity to ISPs regarding what practices would violate the Act's standard? If we choose not to adopt a general conduct rule, are there other ways for us to aid our enforcement efforts related to sections 201 and 202 in the broadband context?

C. Transparency Rule

154. Policymakers have consistently recognized the importance of transparency regarding the terms and service characteristics of broadband offerings, even as certain details of the Commission's transparency requirements have changed over time. This includes not only transparency requirements that have been in place since they originally were adopted in the *2010 Open Internet Order*, but also the broadband label the Commission adopted in 2022, which gives consumers a convenient tool to research and compare broadband offerings. We propose to build upon the foundation of our existing transparency rule, informed by our recent experience in adopting broadband label requirements, and we seek comment on possible modifications or additions to update the transparency rule to ensure that end users, edge providers, the broader internet community, and the Commission have the information they need to assess ISPs' terms and conditions for BIAS in a timely and effective manner.

1. Policy Benefits of Transparency Requirements

155. We anticipate transparency requirements are likely to continue playing a key role in the broadband marketplace. In the *2010 Open Internet Order*, the Commission adopted its original BIAS transparency rule, explaining that "[e]ffective disclosure of broadband providers' network management practices and the performance and commercial terms of their services promotes competition—as well as innovation, investment, end-user choice, and broadband adoption." The Commission echoed this policy judgment in the *2015 Open Internet Order*, going on to adopt additional clarifications and enhancements to the transparency rule—along with a broadband label safe harbor—to "better enable end-user consumers to make informed choices about broadband services by providing them with timely information tailored more specifically to their needs," and to "provide edge providers with the information necessary to develop new content,

applications, services, and devices that promote the virtuous cycle of investment and innovation.” In discussing transparency in the *RIF Order*, the Commission noted that “[d]isclosure supports innovation, investment, and competition by ensuring that entrepreneurs and other small businesses have the technical information necessary to create and maintain online content, applications, services, and devices, and to assess the risks and benefits of embarking on new projects.” In that *Order*, however, the Commission elected to “return, with minor adjustments, to the transparency rule adopted in the *2010 Open Internet Order*,” under the theory that such an approach would “provide[] consumers and the Commission with essential information while minimizing the burdens imposed on ISPs.” We seek comment on how the Commission can ensure that its transparency rule most effectively advances these longstanding policy goals.

156. In 2021, Congress enacted and the President signed the Infrastructure Act, which, in relevant part, directs the Commission “to promulgate regulations to require the display of broadband consumer labels,” using as an initial point of reference the broadband label established in connection with the enhanced transparency rule adopted in the *2015 Open Internet Order*. The Infrastructure Act recognizes the benefits of a label “to disclose to consumers information regarding broadband internet access service plans,” further observing that consumers need the ability to “evaluate broadband internet access service plans” through information that is “available, effective, and sufficient” to meet that need. In November 2022, the Commission adopted the broadband consumer label rules and sought further comment in the accompanying *Broadband Label Further Notice*. These broadband label requirements promote “consumer access to clear, easy-to-understand, and accurate information about the cost for broadband services and will empower consumers to choose services that best meet their needs and match their budgets and ensures that they are not surprised by unexpected charges or service quality that falls short of their expectations.” We seek comment on the interplay between the broadband label requirements adopted in the *Broadband Label Order*, the possible amendments raised in the *Broadband Label Further Notice*, and any modifications to the transparency rule that we might adopt here. For example, to the extent that the content

of the required disclosures under the two requirements diverge, how can we avoid any undue duplication of effort in making each required disclosure, particularly for small providers? Should the broadband label requirements and the transparency rule as it might be modified here be legally distinct, or legally interrelated, requirements?

2. Content of Required Disclosures

157. We seek comment on what, if any, additional disclosures should be required under the transparency rule. As a starting point, we believe that the disclosures required under the current transparency rule are an appropriate baseline, and we propose to retain them in the transparency rule going forward. We seek comment on this proposal. As the Commission recently explained when adopting broadband label requirements, “the transparency rule seeks to enable a deeper dive into details of broadband internet service offerings, which could be relevant not only for consumers as a whole, but also for consumers with particularized interests or needs, as well as a broader range of participants in the internet community—notably including the Commission itself.” Are the current requirements of the transparency rule sufficient to enable that deeper dive into details of broadband internet service offerings?

158. We seek comment on whether enhancements to the content of disclosures required by the transparency rule under the *2015 Open Internet Order* should be incorporated in a revised transparency rule here. With respect to required disclosure of commercial terms, the *2015 Open Internet Order* provided additional specifications regarding ISPs’ disclosures about price and related terms and their relationship with disclosures regarding privacy and redress options. Regarding the disclosure of performance characteristics, the *2015 Open Internet Order* provided additional specifications regarding the disclosure of network performance and network practices. The *RIF Order* eliminated those enhancements under the theory that their burdens to ISPs exceeded their benefits. The *Broadband Label Order*, on the other hand, required ISPs to disclose in the broadband labels their typical upload and download speeds and typical latency metrics associated with their broadband services, noting that speed in particular “remains the network performance metric of greatest interest to the consumer.” The Commission similarly found that low delay or latency is important to any application involving users interacting

with each other, a device, or an application. We seek comment on these assessments, including updated evidence regarding the relative costs and benefits of the transparency enhancements based on experience following the *RIF Order*. To the extent that the transparency requirements were intended to provide needed information not only to consumers but also edge providers, the broader internet community, and the Commission, how should that affect our assessment of the overall benefits of the enhanced transparency requirements? Would the enhancements to the transparency rule adopted in the *2015 Open Internet Order*, or other modifications to the current transparency rule, assist the Commission in monitoring and enforcing compliance with the conduct rules proposed here? Are there any metrics that are particularly important to some subset of consumers that we should consider including despite those metrics not being of significant value to the average consumer?

159. In addition, we seek comment on other considerations relevant to possible changes to the content ISPs may be required to disclose under the transparency rule. For one, we seek comment on whether we should revise the transparency rule to incorporate the Commission’s clarifications and guidance regarding prior versions of the transparency rule. For example, a 2011 Public Notice (*2011 Advisory Guidance*) provided “examples of approaches to disclosure that would satisfy the transparency rule,” discussing point-of-sale disclosures, service descriptions, the extent of required disclosures, disclosures for the benefit of edge providers, and disclosures regarding security measures. A 2014 Public Notice (*2014 Advisory Guidance*) summarized the applicability and requirements of the transparency rule and the potential enforcement consequences if it were violated, and emphasized the importance of consistency between ISPs’ disclosures under the transparency rule and their advertising claims or other public statements. And a 2016 Public Notice (*2016 Advisory Guidance*) provided guidance regarding acceptable methodologies for disclosure of network performance information and point-of-sale disclosures consistent with the *2015 Open Internet Order*. The *RIF Order* subsequently eliminated the enhancements adopted in 2015, and the clarifications in the *2016 Advisory Guidance* along with it. The *RIF Order* endorsed the clarifications in the *2011 Advisory Guidance*, but neither endorsed nor disclaimed the

clarifications in the *2014 Advisory Guidance*. We seek comment on whether and to what extent the Commission should reaffirm, reject, or elaborate on any of that prior guidance in connection with any modification of the transparency rule here. Are there other areas where additional clarification or guidance would be beneficial either under the existing transparency rule or a revised transparency rule?

160. We also seek comment on the availability of information that ISPs can or should use to comply with the content of disclosures required under the current or modified transparency rule. For example, the *RIF Order* allowed fixed ISPs participating “in the Measuring Broadband America (MBA) program [to] disclose their results as a sufficient representation of the actual performance their customers can expect to experience.” Should we continue that approach here, or make use of the MBA program in some other way? To what extent can or should we allow ISPs to use other specific information sources or measurement approaches to provide transparency disclosures? Should we clarify that certain sources of information are permissible to rely on in making the required disclosures? Or should we go further in particular cases and require the use of certain data sources for reasons of uniformity, reliability, or otherwise? Should the Commission require ISPs to include additional information in transparency disclosures regarding their measurement methodologies and practices?

161. Finally, we seek comment on any other considerations relevant to our evaluation of the appropriate content of required disclosures under the transparency rule. Is there additional content that we should require? For example, the *2015 Open Internet Order* considered, but ultimately did not adopt, additional disclosure requirements regarding “the source, location, timing, or duration of network congestion,” packet corruption and jitter, and “disclosures that permit end users to identify application-specific usage or to distinguish which user or device contributed to which part of the total data usage.” In light of subsequent experience, should we revisit the decisions not to require such disclosures? Should the Commission consider requiring more detailed disclosures regarding the requirements, restrictions, or standards for enforcement of data caps, and if so, how? We also seek comment on whether different content disclosures should be required for mobile ISPs than for fixed ISPs.

3. Means of Disclosure

162. We seek comment on how best to ensure that the content of the required disclosures is made available in a timely and effective manner without undue burdens on ISPs, both as a general matter and in the specific respects discussed below. In the *RIF Order*, the Commission allowed providers to make the required disclosures either “on a publicly available, easily accessible website,” or by “transmit[ing] their disclosures to the Commission,” which would then make them “available on a publicly available, easily accessible website.” We seek comment on practical experiences with that approach, and whether that approach should be retained in its current form, modified, or eliminated in favor of disclosures required specifically on provider websites—as had been the case under prior versions of the transparency rule. When the Commission recently adopted broadband label rules, it required ISPs to display labels on their websites, as well as at other points of sale. While it “aim[ed] to give providers flexibility in how they display labels,” the Commission also sought “to ensure that the labels are prominently displayed on any device on which the consumer accesses and views the labels, including mobile devices” and in a uniform format that will best assist consumers in comparing pricing, fees, performance characteristics, and data allowances across different providers. Are there lessons from the Commission’s recent experience crafting broadband label requirements that should inform our approach to the manner of making disclosures under the transparency rule?

163. We also seek comment on whether any additional requirements are warranted regarding ISPs’ website disclosures under the transparency rule. For ISPs electing to make the required disclosures on a “publicly available, easily accessible website,” the *RIF Order* “reaffirm[ed] the means of disclosure requirement from the [2010] *Open Internet Order* and the clarification found in the *2011 Advisory Guidance*.” Should the approach reflected in the current transparency rule, as informed by the *2010 Open Internet Order* and *2011 Advisory Guidance*, be retained or modified? Should we require the disclosures to be in machine-readable format, akin to the Commission’s recently-adopted approach for broadband consumer labels?

164. We also seek comment on whether disclosures under the transparency rule should be required in

additional locations. For instance, are there places on an ISP’s website besides a point of sale where disclosures should be made?

165. Ensuring that disclosures under the transparency rule are accessible to individuals with disabilities is a priority. The *RIF Order* explained that ISPs making website disclosures under the transparency rule must make them “in a manner accessible by people with disabilities.” Has this direction been adequate, or are additional requirements warranted to ensure that disclosures under the transparency rule are accessible to individuals with disabilities? For example, should we encourage or require that website disclosures under the transparency rule follow guidance developed by the Web Accessibility Initiative? Most recently, the Commission required ISPs to post broadband label information on their websites in an accessible format, and strongly encouraged them to use the most current version of the Web Content Accessibility Guidelines (WCAG). In the *Broadband Label Further Notice*, it sought comment on whether to adopt specific criteria, based on the WCAG standard. Are there other industry guidelines that providers should be encouraged or required to follow? To the extent that we ultimately require transparency disclosures in locations other than websites and in alternative formats besides websites, is there additional guidance or requirements we should adopt to ensure accessibility to individuals with disabilities?

166. Further, we seek comment on possible “direct notification” requirements, including the costs and benefits of such requirements. The *2015 Open Internet Order* had imposed such an obligation, but the *RIF Order* eliminated that requirement. The Commission also recently declined to adopt a direct notification requirement in the context of its broadband label rules, finding that the broadband labels are specifically intended to inform consumers at the time of purchase. We note, however, the broader purpose of the transparency rule compared to the broadband labels. We therefore seek further comment and updated information on the benefits and burdens of such a requirement in the specific context of the transparency rule, in light of this more recent experience.

167. Finally, we seek comment on any other changes to our transparency rule regarding the means of disclosure. Are there additional requirements regarding the means of disclosure under the transparency rule that the Commission should adopt to ensure that information is available in a timely and effective

manner? Conversely, are there existing requirements regarding the means of disclosure that commenters believe impose burdens that outweigh their benefits, and thus should be eliminated?

4. Implementation and Other Issues

168. We seek comment on any implementation issues associated with potential modifications to the transparency rule, and whether we should consider additional time for compliance by small providers.

169. We also seek comment on whether the Commission should adopt new safe harbors for compliance with the transparency rule. Are there particular data sources or methodologies for complying with particular elements of the transparency rule, whether in its current form or as it may be modified, that the Commission should treat as a safe harbor or otherwise presumptively reasonable? Are there safe harbors the Commission should adopt for compliance with the transparency rule as a whole, akin to the broadband label safe harbor adopted in the *2015 Open Internet Order*?

170. Further, we seek comment on whether we should adopt recordkeeping requirements governing the types of information or records ISPs rely upon to support the content of their disclosures made under the transparency rule. Would such a requirement be helpful to our enforcement of the transparency rule by enabling us to evaluate the reasonableness of ISPs' claims? Would such requirements help inform our evaluation of the effectiveness of the rule and the need for changes over time? This requirement could, for example, help to identify and account for particular data sources or methodologies that prove to be especially reliable or unreliable. In the *Broadband Label Order*, the Commission required ISPs to maintain an archive of all labels no longer posted on their websites and at alternate sales channels, along with evidence sufficient to support the accuracy of the labels' content. Given that ISPs must have a basis for the claims made in their disclosures under the transparency rule, are there particular ways of retaining that information that could minimize the burden on ISPs? If we elect to adopt recordkeeping requirements, what period of time would best balance the benefits to the Commission from having the information available against the compliance burden for ISPs?

171. In addition, we seek comment on the overall cost effectiveness of modifications we might adopt to the transparency rule. What are the most cost-effective ways of ensuring that

consumers and edge providers receive the information they need in a timely and effective manner? How can we minimize implementation and compliance burdens for ISPs, consistent with those goals?

D. Scope of Open Internet Rules

172. *Internet Traffic Exchange.* We propose to decline to apply any open internet rules to internet traffic exchange. We tentatively conclude, consistent with the *2015 Open Internet Order* and as discussed further below, that case-by-case review under sections 201 and 202 is "an appropriate vehicle for enforcement where disputes are primarily over commercial terms and that involve some very large corporations, including companies like transit providers and CDNs, that act on behalf of smaller edge providers." We believe that the best approach with respect to internet traffic exchange is to "watch, learn, and act as required" but to not intervene with prescriptive rules. We seek comment on our proposed approach.

173. *Reasonable Network Management.* We also propose that reasonable network management would not be considered a violation of prohibitions on blocking and throttling, or the general conduct rule, and seek comment on our proposal. In 2015, the Commission concluded that a reasonable network management exception to the conduct rules was necessary for ISPs to optimize overall network performance and maintain a consistent quality experience for consumers while carrying a variety of traffic over their networks. We tentatively conclude this analysis remains equally applicable today and seek comment on this tentative conclusion. Is excluding reasonable network management practices still both necessary and advisable? In the *RIF Order*, the Commission defined "reasonable network management" to mean "a practice 'appropriate and tailored to achieving a legitimate network management purpose, taking into account the particular network architecture and technology of the broadband internet access service,'" returning to the definition the Commission adopted in the *2010 Open Internet Order*. In 2015, the Commission had slightly modified that definition, adding that "a network management practice is a practice that has a primarily technical network management justification, but does not include other business practices." We seek comment on how we should define "reasonable network management" for the purposes of our proposed open

internet rules, and invite commenters to provide examples of how this term is best interpreted with regard to management of today's broadband networks. Is it necessary for the Commission to provide further guidance on the reasonable network management exception to provide certainty for ISPs? How can we ensure that the reasonable network management exception is not used to circumvent the proposed rules, while also providing regulatory certainty to ISPs and enabling them to appropriately manage their networks?

E. Enforcement of Open Internet Rules

174. We seek comment on the best framework for enforcing any potential open internet rules. Our aims are to enable effective and timely conflict resolution and to provide clear guidance on allowed and prohibited practices. We seek comment on what enforcement regime will be most efficient and least burdensome for customers, edge providers, and ISPs, including small entities.

175. In 2010, the Commission adopted a multipart framework to ensure prompt and effective enforcement of the open internet rules and encouraged informal and private resolution of matters. The first component involved informal complaints filed under § 1.41 of the Commission's rules. The Commission noted that this vehicle was "already available" and that "no filing fee is required." "Although individual informal complaints will not typically result in written Commission orders," the Commission explained that the Enforcement Bureau "will examine trends or patterns in [informal] complaints to identify potential targets for investigation and enforcement action." Should informal or other means fail to resolve a dispute, the Commission adopted new procedures for filing formal complaints that would "permit anyone—including individual end users and edge providers—to file a claim alleging that another party has violated a statute or rule, and asking the Commission to rule on the dispute." The Commission opted to base the formal complaint rules on the Part 76 cable access complaint rules, finding that those rules are "more streamlined and thus preferable." Citing sections 403 and 503(b) of the Act, the Commission further observed that it has the authority to initiate enforcement actions on its own motion, including the issuance of forfeitures.

176. *Advisory Opinions and Enforcement Advisories.* In 2015, the Commission concluded that the use of advisory opinions, similar to those issued by DOJ's Antitrust Division,

would be in the public interest and had the potential to provide clarity, guidance, and predictability concerning the Commission's open internet rules. The *RIF Order* eliminated the advisory opinion process established in the *2015 Open Internet Order*, reasoning that without conduct rules, advisory opinions were no longer necessary, and concluding that the advisory opinion process did not diminish regulatory uncertainty, particularly for small providers, but rather added costs, caused uncertain timelines, and inhibited innovations. The elimination of the advisory opinion process was based on predictive comments in the record because no ISP had yet requested an advisory opinion through the Commission's process. When the D.C. Circuit in *USTA* rejected the challenge to the *2015 Open Internet Order's* general conduct standard as being unconstitutionally vague, the Court relied in part on the advisory opinion process the Commission had created in that *Order*. The D.C. Circuit found that the opportunity for parties to obtain prospective guidance through the advisory opinion process "provide[d] regulated entities with relief from [remaining] uncertainty."

177. In light of the D.C. Circuit's reasoning in *USTA*, and to advance our goal of legal certainty in the enforcement of any potential open internet rules, we propose to adopt an advisory opinion process if we adopt a general conduct standard. We seek comment on this proposal. In practice, we believe that advisory opinions have the potential to lower costs for providers by creating certainty up front, rather than risking potentially costly formal complaint litigation, remediation, or fines after the fact. Do commenters agree? Are there examples of other federal or state advisory opinion processes from which the Commission could learn? Are there specific barriers that would prevent smaller ISPs from engaging with the advisory opinion process, and if so, how could we address them? We seek comment on whether we should adopt the mechanisms delineated in the *2015 Open Internet Order* for the issuance of advisory opinions and enforcement advisories. What changes, if any, should we make to the process the Commission established in the *2015 Open Internet Order*? As an alternative to adopting an advisory opinion process, would a detailed explanation of the factors the Commission would use when analyzing potential violations of the general conduct standard be sufficient under the D.C. Circuit's reasoning to provide fair

warning to regulated entities of what the standard requires?

F. Investigations and Complaints

178. We next seek comment on whether it would be beneficial to re-establish a formal complaint process for complaints arising under our open internet rules, as the Commission did in 2015. In 2015, the Commission preserved the three avenues for enforcement of its open internet rules that the Commission had created in the *2010 Open Internet Order*: (i) parties could file informal complaints under § 1.41 of the Commission's existing rules; (ii) parties could file formal complaints under a new process that the Commission had created for this purpose; or (iii) the Commission could initiate enforcement actions on its own motion. While the informal complaint process under § 1.41 of the Commission's rules would remain available to parties with respect to any concerns arising out of any open internet rules that may be ultimately adopted, we seek comment on whether we should also adopt a formal complaint process. Is there value in providing parties with both of these options? Is our formal complaint process established pursuant to section 208 of the Act sufficient for this purpose, or is it necessary to establish a standalone formal complaint process? The Commission eliminated the open internet-specific formal complaint process in 2018. If we were to adopt a formal complaint process, should we implement one that returns to the rules the Commission adopted in the *2010 Open Internet Order* and preserved in the *2015 Open Internet Order*? If not, what alternatives do commenters recommend? The section 208 formal complaint rules were modified in 2018 and consolidated with the Commission's pole attachment rules. Should we use these existing rules for open internet disputes? We also seek comment on whether the Commission's informal complaint mechanism would be sufficient to resolve disputes under our proposed open internet rules.

G. Legal Authority

179. We seek comment on our authority to adopt open internet rules, including both the proposed conduct rules and any revised transparency rules. With respect to our proposed conduct rules, we propose to rely on the same sources of authority that the Commission relied upon when it adopted rules in the *2015 Open Internet Order*. As discussed below, we propose to return to our prior interpretation, upheld by the D.C. Circuit, that sections

706(a) and (b) of the 1996 Act are grants of regulatory authority and rely on that as a basis for our open internet rules. We also propose to rely on our authority under Title II of the Act with forbearance where appropriate under section 10 of the Act, insofar as we reclassify BIAS as a Title II service. And we propose to once again rely on our broad spectrum management authority under Title III of the Act as additional authority specifically in the case of mobile providers. With respect to any modifications to the transparency rule, we propose to rely on those same sources of authority along with section 257 (and associated authority now in section 13) of the Act, consistent with the reasoning of the *2010 Open Internet Order* and the *RIF Order*. We seek comment on those proposals, and any additional sources of authority for our proposed open internet rules, both as a general matter and in the specific respects discussed below. We also seek comment on how policy goals enumerated in the Act or other federal statutes should inform our exercise of regulatory authority here.

1. Section 706 of the 1996 Act

180. We seek comment on returning to an interpretation of section 706 of the 1996 Act as granting the Commission regulatory authority and, in turn, relying on that authority as a basis for open internet rules. In particular, although the *RIF Order* departed from the Commission's prior interpretation of section 706 and instead concluded that the provision was merely hortatory, we propose to return to the Commission's prior view and interpret sections 706(a) and (b) of the 1996 Act as grants of regulatory authority. We propose to do so in light of the considerations that persuaded the Commission to adopt such interpretations in the past, and that persuaded courts to affirm those interpretations. Consistent with that prior approach, we propose to rely on section 706(a) as part of our authority for open internet rules. We also propose to rely on section 706(b), in the event that the Commission were to conclude under section 706(a) that advanced telecommunications capability is not being deployed to all Americans in a reasonable and timely fashion. We seek comment on those proposals generally.

181. First, we seek comment on the grounds for returning to the prior judicially affirmed interpretations of sections 706(a) and (b) of the 1996 Act as granting the Commission regulatory authority. The *RIF Order* principally grounded its rationale for changing the interpretation of section 706 on its view that section 706 was better interpreted

as hortatory, rather than as a grant of regulatory authority. To the extent that we instead believe that interpreting sections 706(a) and (b) as grants of regulatory authority represent the better reading of the statute, we believe that likewise should provide a basis for us to change our interpretation. We seek comment on this view. In addition, we seek comment on any other arguments bearing on whether and to what extent we should return to the prior interpretation of sections 706(a) and (b) as grants of regulatory authority.

182. Second, we seek comment on specific rationales for interpreting sections 706(a) and (b) of the 1996 Act as grants of regulatory authority. In the *2010 Open Internet Order*, the Commission explained why sections 706(a) and (b) each represent a grant of regulatory authority to the Commission after considering the statutory text, regulatory and judicial precedent, and legislative history, and rejecting objections to that interpretation. In addition, in the *2015 Open Internet Order*, the Commission built on the foundation of its explanations in the *2010 Open Internet Order*, rejecting various objections to the interpretation of sections 706(a) and (b) as grants of regulatory authority and elaborating on the Commission's authority to adopt rules implementing that provision, and to enforce those rules. We seek comment on that reasoning and conclusions regarding the interpretation and implementation of section 706, and on the extent to which we should rely on that today. We also seek comment on whether and to what extent we also should draw upon the reasoning of court decisions affirming the Commission's interpretation of section 706 of the 1996 Act as granting regulatory authority—in particular, the D.C. Circuit's 2014 decision in *Verizon* and its 2016 decision in *USTA*, as well as the Tenth Circuit's 2014 decision in *In re FCC 11-161*.

183. Third, to the extent that we interpret sections 706(a) and (b) of the 1996 Act as grants of regulatory authority, we propose to use that authority to adopt open internet rules here. The Commission previously concluded in the *2015 Open Internet Order* and *2010 Open Internet Order* that open internet rules were a reasonable way to implement Commission authority under sections 706(a) and (b), and the nexus between open internet rules and the directives in sections 706(a) and (b) was affirmed by the D.C. Circuit in *Verizon*. For those same reasons, we believe the open internet rules we seek comment on here would be a reasonable exercise of

section 706(a) authority. We likewise believe that, in the event that the Commission concludes that advanced telecommunications capability is not being deployed to all Americans in a reasonable and timely fashion under section 706(b), the open internet rules we seek comment on here would be a reasonable exercise of authority under that provision as well.

184. Finally, we seek comment on any other issues bearing on our interpretation and implementation of section 706 of the 1996 Act here, including possible objections to the interpretation of sections 706(a) and (b) as grants of regulatory authority. For example, when the D.C. Circuit concluded that the *RIF Order* permissibly reinterpreted section 706 as hortatory, rather than as a grant of regulatory authority, the court focused on the recognized ambiguity of the statutory language and the Commission's justification "that Section 706 lacks details 'identify[ing] the providers or entities whose conduct could be regulated,' whereas other provisions of the Act that unambiguously grant regulatory authority do specify such details." We seek comment on that rationale. How is section 706 of the 1996 Act distinct in this regard from other provisions understood as grants of authority in the Telecommunications Act of 1996, the Communications Act of 1934, or other federal statutes? The *RIF Order* itself recognized that, in relying on section 257 of the Act as authority for the transparency rule, it was interpreting that provision as a grant of authority notwithstanding its lack of any identified universe of entities from which information could be obtained, explaining that "other aspects of section 257 persuade us that our interpretation of that provision as a grant of authority." To what extent do other aspects of section 706 bear on the reasonableness of interpreting sections 706(a) and (b) as grants of authority?

185. We also seek comment on other theories discussed in the *RIF Order* as a basis for why section 706 of the 1996 Act not just permissibly could, but affirmatively should, be interpreted as merely hortatory, rather than a grant of regulatory authority to the Commission. For example, the *RIF Order* contended that interpreting sections 706(a) and (b) as grants of regulatory authority would allow the Commission "to impose duties or adopt regulations equivalent to those directly addressed by the provisions of the Communications Act focused on promoting competition and/or deployment that go beyond the entities, contexts, and circumstances

that bounded the Communications Act provisions." The *RIF Order* also argued that if sections 706(a) and (b) were interpreted as grants of regulatory authority that would enable the internet and information services to be heavily regulated in a manner inconsistent with policy goals reflected in the Act. We seek comment on those theories. The *RIF Order* acknowledged that the Commission's prior interpretation of section 706 was, by its own terms, constrained to be consistent with the Act, but claimed that such constraints did not adequately address the *Order's* statutory concerns. In the view of the *RIF Order*, seemingly the only outcomes of interpreting section 706 as granting regulatory authority would be extreme results where those constraints had little meaning and left the Commission with essentially unbounded authority or were such severe limitations as to render section 706 of little possible use. We tentatively conclude that this view is unfounded and invite more robust analysis of these issues in the record here, along with any related arguments.

186. The *RIF Order* also cited concerns about the Commission's ability to enforce rules implementing section 706 of the 1996 Act as further grounds for interpreting it as merely hortatory. The *Order* did not reject the theory that section 706 could be read to include implicit enforcement authority, but contended that such implicit authority "might enable actions like declaratory rulings or cease-and-desist orders, but would not appear to encompass authority to impose penalties given the absence of statutory language clearly granting that authority." We seek comment on this understanding of the scope of potential enforcement authority that could be implicit in section 706. Even assuming *arguendo* that scope of enforcement authority were accurate, why should we conclude that the resulting scope of our enforcement authority is so insignificant as to counsel against interpreting sections 706(a) and (b) as grants of regulatory authority? Further, the *RIF Order* rejected the view that the use of section 4(i) of the Act to adopt rules implementing section 706 of the 1996 Act would be sufficient to bring those rules within the purview of the Commission's enforcement authority under section 503 of the Act. The *RIF Order* reasoned that enforcement authority under section 503 is limited to rules based on substantive regulatory authority under the Act itself, rather than the rulemaking authority in section 4(i). We seek comment on the merits of this interpretation.

2. Title II of the Act With Forbearance

187. As in the *2015 Open Internet Order*, we propose again to rely on sections 201, 202, and 208 of the Act, along with the related enforcement authorities of sections 206, 207, 209, 216, and 217, as additional legal authority for the proposed open internet rules. And consistent with the *2010 Open Internet Order* and the *RIF Order*, and as affirmed by the D.C. Circuit in *Mozilla*, we propose also to rely on section 257 of the Act (now in conjunction with section 13 of the Act) as additional legal authority for the transparency rule, as we may modify it. We seek comment on these proposals.

188. We also seek comment on any additional sources of authority under Title II of the Act that could serve as authority for open internet rules. For example, the *RIF Order* cataloged arguments about other possible sources of Title II authority for open internet rules in sections 251(a), 256, and 275 of the Act identified in the record there. The Commission at the time ultimately declined to rely on those sources of authority due to perceived shortcomings in the record regarding the justification for their use, and also took the view that they would not, even in the aggregate, provide authority for the Commission to adopt open internet rules addressing the full array of ISPs. We seek comment on those possible sources of authority, including both more-developed explanations for how and when they could serve as regulatory authority for open internet rules and whether there would be grounds for exercising that authority under the regulatory approach we propose here.

3. Title III of the Act for Mobile Providers

189. As in the *2015 Open Internet Order*, we propose to rely on our broad legal authority under Title III of the Act to protect the public interest through spectrum licensing and regulations—including sections 303 and 316 of the Act—as additional legal authority for the proposed open internet rules in the case of mobile BIAS. The *RIF Order* conceded the viability of Title III authority in this regard, but declined to exercise that authority because it would be limited to rules for mobile ISPs, rather than providing authority for rules governing all ISPs. We do not believe that concern of the *RIF Order* is likely to arise under our proposed regulatory approach here, and we seek comment on that understanding. We recognize that the D.C. Circuit's *Mozilla* decision includes a brief statement as part of its review of the *RIF Order*'s preemption

decision stating that BIAS is not “radio transmission,” so Title III does not apply. But the *RIF Order* did not attempt to apply (or justify applying) Title III, and the *Mozilla* decision did not develop any reasoning in support of that assertion. Particularly given that backdrop, we do not believe the court's statement should be read to call into question the Commission's prior recognition that mobile BIAS falls within the scope of Title III. We seek comment on these views and on any additional provisions in Title III of the Act that could serve as authority for open internet rules in the case of mobile BIAS or otherwise.

4. Other Possible Sources of Legal Authority

190. We seek comment on any other possible sources of legal authority for open internet rules. For example, the *2010 Open Internet Order* relied on additional sources of authority apart from section 706 of the 1996 Act and Titles II and III of the Act—in particular, sources under Title VI of the Act. The *RIF Order* expressly declined to rely on those sources of authority given what that *Order* identified as limitations regarding the justification for the use of those authorities, as well as the *RIF Order*'s view that they would not, even in the aggregate, provide authority for the Commission to adopt open internet rules addressing the full array of ISPs. We seek more developed comment on that possible Title VI authority and on any other possible sources of authority under the Act.

191. In addition, we seek comment on additional sources of authority outside the Act. For example, the recent bipartisan Infrastructure Act built upon the foundation of the transparency rule and broadband label requirements from the *2015 Open Internet Order* to require the Commission to adopt new broadband label rules. Does that law provide additional authority for rules here, particularly as it relates to possible modifications of the transparency rule?

192. We also seek comment on whether the Commission should rely on ancillary authority in conjunction with other primary sources of legal authority in adopting open internet rules in any respects. To the extent that commenters advocate such an approach, they should explain how the prerequisites for ancillary authority would be met, particularly by explaining why the action would help effectuate regulatory authority granted to the Commission under other statutory provisions. To exercise ancillary authority “two conditions [must be] satisfied: (1) the Commission's general jurisdictional

grant under Title I [of the Communications Act] covers the regulated subject and (2) the regulations are reasonably ancillary to the Commission's effective performance of its statutorily mandated responsibilities.”

H. Other Laws and Considerations

193. The *2015 Open Internet Order* discussed the relationship between the open internet rules adopted there and ISPs' rights or obligations with respect to other laws, safety and security considerations, or the ability of ISPs to make reasonable efforts to address transfers of unlawful content and unlawful transfers of content. We propose continuing that approach in the case of the rules upon which we seek comment here, and seek comment on that proposal, along with specific language for open internet rules intended to achieve the objectives discussed below, and any additional ways in which we should account for similar interests in the codified rules.

194. Consistent with the *2015 Open Internet Order*, we propose that the open internet rules upon which we seek comment here would not expand or contract ISPs' rights or obligations with respect to other laws or preclude them from responding to safety and security considerations—including the needs of emergency communications and law enforcement, public safety, and national security authorities. The *2015 Open Internet Order* specifically highlighted examples of other laws imposing requirements in these respects, such as the Communications Assistance for Law Enforcement Act, the Foreign Intelligence Surveillance Act, and the Electronic Communications Privacy Act, and we again seek comment as to those specific laws along with any others that should inform our analysis. We propose to adopt the same rule language in this regard as was adopted in the *2015 Open Internet Order*:

Nothing in this part supersedes any obligation or authorization a provider of broadband internet access service may have to address the needs of emergency communications or law enforcement, public safety, or national security authorities, consistent with or as permitted by applicable law, or limits the provider's ability to do so.

We seek comment on this approach and on alternative approaches to protecting these interests, including whether the rule should capture other possible emergency communications and safety and security scenarios. For example, the *2015 Open Internet Order* elected not to expand the application of its rule in this regard to public utilities and other critical infrastructure

operators, reasoning that those interests otherwise were protected under the approach it adopted. Is that same approach appropriate here, or should we address safety and security interests related to public utilities and other critical infrastructure operators in some other way in any rules we may adopt here? Should our rules go further to affirmatively require ISPs to take certain steps to address the needs of emergency communications or law enforcement, public safety, or national security authorities? For example, should the rules go further in addressing the categories of concerns raised before the Commission on remand of the RIF Order, such as the needs of public safety personnel; concerns about particular harms to public safety that could result from blocking, throttling, or paid prioritization; concerns about public safety needs for individuals with disabilities; or concerns related to critical infrastructure?

195. Also consistent with the *2015 Open Internet Order*, we propose that the open internet rules upon which we seek comment here would protect only lawful content, and would not be intended to inhibit efforts by ISPs to address unlawful transfers of content or transfers of unlawful content. We propose to adopt the same rule language in this regard as was adopted in the *2015 Open Internet Order*:

Nothing in this part prohibits reasonable efforts by a provider of broadband internet access service to address copyright infringement or other unlawful activity.

We seek comment on that approach and on alternative approaches to protecting these interests, including whether the rule should capture other possible scenarios where ISPs might seek to address unlawful transfers of content or transfers of unlawful content.

196. We also seek comment on whether there are other categories of otherwise-applicable laws or legal requirements that should be addressed through comparable rules as those we propose to address emergency communications and safety and security scenarios and efforts by ISPs to address unlawful transfers of content or transfers of unlawful content. For example, the *RIF Remand Order* noted comments expressing concern about the possible interplay between ISPs' practices and laws protecting individuals with disabilities. Given that the regulatory approach proposed here differs significantly from the one at issue in the *RIF Remand Order*, would such concerns still be relevant here? If so, would it be appropriate to address them through a rule specifically focused

on those categories of laws? Are there additional otherwise-existing legal requirements imposed on ISPs that we should expressly accommodate in any rules we adopt?

IV. Constitutional Considerations

197. Consistent with the constitutional considerations the Commission has evaluated in connection with its regulatory approach to BIAS in the past, we seek comment on First Amendment speech issues and Fifth Amendment takings issues. In addition, we also seek comment on any other constitutional considerations that should inform our evaluation of the issues raised in this proceeding.

A. First Amendment

198. We seek comment on any First Amendment implications of the issues raised in this proceeding, both as a general matter and in the specific respects discussed below. Consistent with prior Commission analyses, we believe our open internet conduct rule proposals and any modifications to the transparency rule are permissible exercises of authority under the First Amendment.

1. Free Speech Rights

199. We anticipate that our proposals would withstand any review under the First Amendment for the same reasons explained by the Commission in the *2015 Open Internet Order*. In particular, as explained in that *Order*, and ultimately affirmed by the D.C. Circuit in *USTA*, under traditional First Amendment doctrine there are no First Amendment concerns raised by the conduct regulation of common carriers. We think the same reasoning is likely to apply here, and seek comment on that view.

200. Even if a court departed from the traditional common carrier First Amendment precedent, we believe that our proposed conduct rules are likely to satisfy First Amendment scrutiny for the same reasons further identified in the *2015 Open Internet Order*. Consistent with the explanation there, we believe the conduct rules are likely to be seen as content-neutral and thus subject to intermediate First Amendment scrutiny in this scenario. We also find it likely that the proposed rules readily could survive that level of scrutiny—advancing an important or substantial government interest unrelated to limiting speech without burdening more speech than necessary—based on the same governmental interests and nexus to the conduct rules identified by the Commission in the *2015 Open Internet Order*. We seek comment on that view

and on any additional evidence and arguments bearing on the potential application of the First Amendment in the case of the conduct rules proposed here.

201. Because the *2015 Open Internet Order* was limited to offers of “mass-market” broadband access to “all or substantially all internet endpoints,” it would not have applied to offerings that were clearly as advertised as providing only “filtered” internet access catering to a particular audience or as providing access only to curated content. We propose to adopt the same approach here and we seek comment on this proposal. We also seek comment on whether or to what extent ISPs engage in content moderation, curation, or otherwise limit or exercise control over what third-party content their users are able to access on the internet. We are aware that some social media platforms and other edge providers purport to engage in various forms of content moderation or editorial control over content they host or transmit, and typically announce that they engage in such practices in their terms of service or user agreements; is there any record of ISPs announcing and engaging in comparable activity?

202. We also seek comment on the competing First Amendment views expressed by judges in separate opinions accompanying the D.C. Circuit's denial of requests to rehear the *USTA* case *en banc*. On one hand, then-Judge Kavanaugh's dissent expressed First Amendment concerns with the *2015 Open Internet Order* on the theory that “the First Amendment bars the Government from restricting the editorial discretion of internet service providers, absent a showing that an internet service provider possesses market power in a relevant geographic market”—a showing that the Commission had not made there. On the other hand, Judges Srinivasan and Tatel, concurring in the denial of rehearing *en banc*, responded to the dissent by arguing that “no Supreme Court decision supports the counterintuitive notion that the First Amendment entitles an ISP to engage in the kind of conduct barred by the net neutrality rule—*i.e.*, to hold itself out to potential customers as offering them an unfiltered pathway to any web content of *their* own choosing, but then, once they have subscribed, to turn around and limit their access to certain web content based on the *ISP's* own commercial preferences.” We seek comment on those views.

203. Referencing statements in the First Amendment analysis in Judges Srinivasan's and Tatel's concurrence,

the *RIF Order* contended that the *2015 Open Internet Order* “allows ISPs to offer curated services, which would allow ISPs to escape the reach of the [2015 Open Internet Order] and to filter content on viewpoint grounds.” We seek comment on the accuracy of that characterization and how it should inform our analysis and approach here.

2. Compelled Disclosure

204. We also believe that any modifications to the transparency rule are likely to satisfy the First Amendment for the same reasons relied on by the Commission in its justification of the transparency rules at issue in the *2015 Open Internet Order* and the *RIF Order*. As a threshold matter, as explained in the *RIF Order*, we believe the speech addressed by our transparency rule is likely to be limited to commercial speech. We seek comment on that view.

205. We also believe that our transparency rule, as we may modify it, is likely to be understood by a court as limited to compelling the disclosure of factual, noncontroversial information under circumstances that fall within the *Zauderer* First Amendment framework, consistent with the Commission’s analysis in the *2015 Open Internet Order*. Also consistent with the analysis in the *2015 Open Internet Order*, we believe any modifications to the transparency rule are likely to be a reasonable way of advancing government interests in preventing consumer deception, among other things, and thus would satisfy the *Zauderer* standard. We believe any modifications to the disclosures in our transparency rule would be the sort of “purely factual and uncontroversial information about the terms under which . . . services will be available” to which *Zauderer* applies. We seek comment on the continued applicability of that analysis from the *2015 Open Internet Order*.

206. Alternatively, to the extent that a court evaluated any modifications to the transparency rule under the *Central Hudson* framework, which applies generally to commercial speech, we believe it also likely would satisfy First Amendment scrutiny under that standard for the same reasons given in that regard in the *RIF Order*. We believe any modifications to the transparency rule are likely to directly advance substantial government interests and be no more extensive than necessary, for reasons such as those identified in the *RIF Order*. We seek comment on these views and any other First Amendment considerations.

B. Fifth Amendment Takings

207. Consistent with the conclusions in the *2015 Open Internet Order*, we do not believe the proposals in this Notice—either the proposed classification decisions or the proposed rules—are likely to result in *per se* takings because we do not anticipate that they would grant third parties a right to physical occupation of the ISPs’ property. And as the *2015 Open Internet Order* recognized, where private parties voluntarily open their networks to end users and edge providers, reasonable regulation of the use of their property poses no takings issue. We seek comment on the continued applicability of those analyses here and any other considerations relevant to possible *per se* takings arguments.

208. Also consistent with the conclusions in the *2015 Open Internet Order*, we do not believe the proposals in this Notice—either the proposed classification decisions or the proposed rules—are likely to result in regulatory takings. Outside of *per se* takings cases, courts analyze putative government takings through “essentially ad hoc, factual inquiries” into a variety of unweighted factors such as the “economic impact of the regulation,” the degree of interference with “investment-backed expectations,” and “the character of the government action.” The *2015 Open Internet Order* weighed these factors and concluded that the actions taken there did not constitute regulatory takings, and we believe the same is likely to be true of our proposals here. We seek comment on these views.

V. Procedural Matters

209. *Ex Parte Rules*. This proceeding shall be treated as a “permit-but-disclose” proceeding in accordance with the Commission’s *ex parte* rules. Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter’s

written comments, memoranda, or other filings in the proceeding, the presenter may provide citations to such data or arguments in his or her prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph numbers where such data or arguments can be found) in lieu of summarizing them in the memorandum. Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with Rule 1.1206(b). In proceedings governed by Rule 1.49(f) or for which the Commission has made available a method of electronic filing, written *ex parte* presentations and memoranda summarizing oral *ex parte* presentations, and all attachments thereto, must be filed through the electronic comment filing system available for that proceeding, and must be filed in their native format (e.g., .doc, .xml, .ppt, searchable .pdf). Participants in this proceeding should familiarize themselves with the Commission’s *ex parte* rules.

210. *Initial Regulatory Flexibility Analysis*. Pursuant to the Regulatory Flexibility Act (RFA), the Commission has prepared an Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on small entities of the policies and actions considered in this *NPRM*. Written public comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments on the *NPRM*. The Commission’s Office of the Secretary, Reference Information Center, will send a copy of the *NPRM*, including the IRFA, to the Chief Counsel for Advocacy of the Small Business Administration.

211. *Paperwork Reduction Act of 1995 Analysis*. This document contains proposed new or modified information collection requirements. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public and the Office of Management and Budget (OMB) to comment on the information collection requirements contained in this document, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, we seek specific comment on how we might further reduce the information collection burden for small business concerns with fewer than 25 employees.

VI. Initial Regulatory Flexibility Analysis

212. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), the Commission has prepared this Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on a substantial number of small entities from the policies and rules proposed in the *Notice of Proposed Rulemaking (Notice)*. Written public comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments provided on the first page of the *Notice*. The Commission will send a copy of the *Notice*, including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA). In addition, the *Notice* and IRFA (or summaries thereof) will be published in the **Federal Register**.

A. Need for, and Objectives of, the Proposed Rules

213. In the *Notice*, we propose to reestablish the Commission's authority over broadband internet access service (BIAS) by classifying BIAS as a telecommunications service under Title II of the Communications Act of 1934, as amended (Act). We further propose to reclassify mobile BIAS as a commercial mobile service. The COVID-19 pandemic showed how essential BIAS connections are for consumers' participation in today's society and economy, for work, health, education, community, and everyday life. In light of this reality, we believe that looking anew at the classification of BIAS is necessary and timely given the critical importance of ensuring the Commission's authority to fulfill policy objectives and responsibilities to protect this vital service. Notable among these is enabling the Commission to safeguard the fair and open internet through a national regulatory approach. The Commission also has an important statutory mandate to protect "life and property" by supporting national security and public safety.

214. Restoring Title II authority will allow the Commission to safeguard and secure the open internet in three significant ways. First, this authority will allow the Commission to protect consumers, including by issuing straightforward, clear rules to prevent internet service providers from engaging in practices harmful to consumers, competition, and public safety, and by establishing a national regulatory approach rather than disparate requirements that vary state-by-state. Second, reclassification will strengthen

the Commission's ability to secure communications networks and critical infrastructure against national security threats. Third, the reclassification will enable the Commission to protect public safety during natural disasters and other emergencies. We also anticipate that the proper classification of BIAS as a telecommunications service will enhance the Commission's ability to advance other important interests, including protection of consumers' privacy and data security interests and consumers' ability to access BIAS. Beyond these areas, we believe that classification of BIAS as a telecommunications service represents the best reading of the text of the Act in light of the marketplace reality of how the service is offered and perceived today.

215. To protect the openness of the internet, we propose to return to the basic framework the Commission adopted in 2015 by reinstating straightforward, clear rules that are designed to prevent internet service providers (ISPs) from engaging in practices harmful to consumers, competition, and public safety, and that would provide the basis for a national regulatory approach toward BIAS, consistent with the Commission's longstanding policy approach to protect internet openness prior to the *RIF Order*. We first propose to reinstate the rules adopted in the *2015 Open Internet Order* that prohibit ISPs from blocking, throttling, or engaging in paid or affiliated prioritization arrangements. We similarly propose to reinstate the general conduct standard adopted in the *2015 Open Internet Order*, which would prohibit practices that cause unreasonable interference or unreasonable disadvantage to consumers or edge providers. Finally, with regard to transparency, we propose to retain the current disclosures, and we seek comment on the means of disclosure, the interplay between the transparency rule and the broadband label requirements, and any additional enhancements or changes we should consider. We believe that the rules we propose today will establish a baseline that the Commission can use to prevent and address conduct that harms consumers and competition when it occurs.

B. Legal Basis

216. The proposed action is authorized pursuant to sections 1, 2, 4(i)–(j), 13, 201, 202, 208, 257, 303, and 316, of the Communications Act of 1934, as amended, and section 706 of the Telecommunications Act of 1996, as amended, 47 U.S.C. 151, 152, 154(i)–(j),

163, 201, 202, 208, 257, 303, 316, and 1302.

C. Description and Estimate of the Number of Small Entities to Which the Proposed Rules Would Apply

217. The RFA directs agencies to provide a description of, and where feasible, an estimate of the number of small entities that may be affected by the proposed rules, if adopted. The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction." In addition, the term "small business" has the same meaning as the term "small-business concern" under the Small Business Act. A "small-business concern" is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA).

1. Total Small Entities

218. *Small Businesses, Small Organizations, Small Governmental Jurisdictions.* Our actions, over time, may affect small entities that are not easily categorized at present. We therefore describe, at the outset, three broad groups of small entities that could be directly affected herein. First, while there are industry specific size standards for small businesses that are used in the regulatory flexibility analysis, according to data from the SBA's Office of Advocacy, in general a small business is an independent business having fewer than 500 employees. These types of small businesses represent 99.9% of all businesses in the United States, which translates to 33.2 million businesses.

219. Next, the type of small entity described as a "small organization" is generally "any not-for-profit enterprise which is independently owned and operated and is not dominant in its field." The Internal Revenue Service (IRS) uses a revenue benchmark of \$50,000 or less to delineate its annual electronic filing requirements for small exempt organizations. Nationwide, for tax year 2020, there were approximately 447,689 small exempt organizations in the U.S. reporting revenues of \$50,000 or less according to the registration and tax data for exempt organizations available from the IRS.

220. Finally, the small entity described as a "small governmental jurisdiction" is defined generally as "governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand." U.S. Census

Bureau data from the 2017 Census of Governments indicate there were 90,075 local governmental jurisdictions consisting of general purpose governments and special purpose governments in the United States. Of this number, there were 36,931 general purpose governments (county, municipal, and town or township) with populations of less than 50,000 and 12,040 special purpose governments— independent school districts with enrollment populations of less than 50,000. Accordingly, based on the 2017 U.S. Census of Governments data, we estimate that at least 48,971 entities fall into the category of “small governmental jurisdictions.”

2. Wired Broadband Internet Access Service Providers

221. *Wired Broadband Internet Access Service Providers (Wired ISPs).* Providers of wired broadband internet access service include various types of providers except dial-up internet access providers. Wireline service that terminates at an end user location or mobile device and enables the end user to receive information from and/or send information to the internet at information transfer rates exceeding 200 kilobits per second (kbps) in at least one direction is classified as a broadband connection under the Commission’s rules. Wired broadband internet services fall in the Wired Telecommunications Carriers industry. The SBA small business size standard for this industry classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees.

222. Additionally, according to Commission data on internet access services as of June 30, 2019, nationwide there were approximately 2,747 providers of connections over 200 kbps in at least one direction using various wireline technologies. The Commission does not collect data on the number of employees for providers of these services, therefore, at this time we are not able to estimate the number of providers that would qualify as small under the SBA’s small business size standard. However, in light of the general data on fixed technology service providers in the Commission’s 2022 *Communications Marketplace Report*, we believe that the majority of wireline internet access service providers can be considered small entities.

3. Wireline Providers

223. *Wired Telecommunications Carriers.* The U.S. Census Bureau defines this industry as establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired communications networks. Transmission facilities may be based on a single technology or a combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including Voice-over Internet Protocol (VoIP) services, wired (cable) audio and video programming distribution, and wired broadband internet services. By exception, establishments providing satellite television distribution services using facilities and infrastructure that they operate are included in this industry. Wired Telecommunications Carriers are also referred to as wireline carriers or fixed local service providers.

224. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 4,590 providers that reported they were engaged in the provision of fixed local services. Of these providers, the Commission estimates that 4,146 providers have 1,500 or fewer employees. Consequently, using the SBA’s small business size standard, most of these providers can be considered small entities.

225. *Incumbent Local Exchange Carriers (Incumbent LECs).* Neither the Commission nor the SBA have developed a small business size standard specifically for incumbent local exchange carriers. Wired Telecommunications Carriers is the closest industry with an SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms in this industry that operated for the entire year. Of this number, 2,964 firms operated with fewer than 250

employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 1,212 providers that reported they were incumbent local exchange service providers. Of these providers, the Commission estimates that 916 providers have 1,500 or fewer employees. Consequently, using the SBA’s small business size standard, the Commission estimates that the majority of incumbent local exchange carriers can be considered small entities.

226. *Competitive Local Exchange Carriers (Competitive LECs).* Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to local exchange services. Providers of these services include several types of competitive local exchange service providers. Wired Telecommunications Carriers is the closest industry with an SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 3,378 providers that reported they were competitive local exchange service providers. Of these providers, the Commission estimates that 3,230 providers have 1,500 or fewer employees. Consequently, using the SBA’s small business size standard, most of these providers can be considered small entities.

227. *Interexchange Carriers (IXCs).* Neither the Commission nor the SBA have developed a small business size standard specifically for Interexchange Carriers. Wired Telecommunications Carriers is the closest industry with an SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms that operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 127 providers that reported they were engaged in the provision of interexchange services. Of these providers, the Commission estimates

that 109 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, the Commission estimates that the majority of providers in this industry can be considered small entities.

228. *Operator Service Providers (OSPs)*. Neither the Commission nor the SBA has developed a small business size standard specifically for operator service providers. The closest applicable industry with an SBA small business size standard is Wired Telecommunications Carriers. The SBA small business size standard classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 3,054 firms in this industry that operated for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 20 providers that reported they were engaged in the provision of operator services. Of these providers, the Commission estimates that all 20 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, all of these providers can be considered small entities.

229. *Other Toll Carriers*. Neither the Commission nor the SBA has developed a definition for small businesses specifically applicable to Other Toll Carriers. This category includes toll carriers that do not fall within the categories of interexchange carriers, operator service providers, prepaid calling card providers, satellite service carriers, or toll resellers. Wired Telecommunications Carriers is the closest industry with an SBA small business size standard. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms in this industry that operated for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 90 providers that reported they were engaged in the provision of other toll services. Of these providers, the Commission estimates that 87 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

4. Wireless Providers—Fixed and Mobile

230. The broadband internet access service provider category covered by this *Notice* may cover multiple wireless firms and categories of regulated wireless services. Thus, to the extent the wireless services listed below are used by wireless firms for broadband internet access services, the proposed actions may have an impact on those small businesses as set forth above and further below. In addition, for those services subject to auctions, we note that, as a general matter, the number of winning bidders that claim to qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Also, the Commission does not generally track subsequent business size unless, in the context of assignments and transfers or reportable eligibility events, unjust enrichment issues are implicated.

231. *Wireless Broadband internet Access Service Providers (Wireless ISPs or WISPs)*. Providers of wireless broadband internet access service include fixed and mobile wireless providers. The Commission defines a WISP as “[a] company that provides end-users with wireless access to the internet[.]” Wireless service that terminates at an end user location or mobile device and enables the end user to receive information from and/or send information to the internet at information transfer rates exceeding 200 kilobits per second (kbps) in at least one direction is classified as a broadband connection under the Commission's rules. Neither the SBA nor the Commission have developed a size standard specifically applicable to Wireless Broadband internet Access Service Providers. The closest applicable industry with an SBA small business size standard is Wireless Telecommunications Carriers (except Satellite). The SBA size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms in this industry that operated for the entire year. Of that number, 2,837 firms employed fewer than 250 employees.

232. Additionally, according to Commission data on internet access services as of June 30, 2019, nationwide there were approximately 1,237 fixed wireless and 70 mobile wireless providers of connections over 200 kbps in at least one direction. The Commission does not collect data on the number of employees for providers of these services, therefore, at this time we

are not able to estimate the number of providers that would qualify as small under the SBA's small business size standard. However, based on data in the Commission's 2022 *Communications Marketplace Report* on the small number of large mobile wireless nationwide and regional facilities-based providers, the dozens of small regional facilities-based providers and the number of wireless mobile virtual network providers in general, as well as on terrestrial fixed wireless broadband providers in general, we believe that the majority of wireless internet access service providers can be considered small entities.

233. *Wireless Telecommunications Carriers (except Satellite)*. This industry comprises establishments engaged in operating and maintaining switching and transmission facilities to provide communications via the airwaves. Establishments in this industry have spectrum licenses and provide services using that spectrum, such as cellular services, paging services, wireless internet access, and wireless video services. The SBA size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms in this industry that operated for the entire year. Of that number, 2,837 firms employed fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 594 providers that reported they were engaged in the provision of wireless services. Of these providers, the Commission estimates that 511 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

234. *Wireless Communications Services*. Wireless Communications Services (WCS) can be used for a variety of fixed, mobile, radiolocation, and digital audio broadcasting satellite services. Wireless spectrum is made available and licensed for the provision of wireless communications services in several frequency bands subject to part 27 of the Commission's rules. Wireless Telecommunications Carriers (except Satellite) is the closest industry with an SBA small business size standard applicable to these services. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer

than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

235. The Commission's small business size standards with respect to WCS involve eligibility for bidding credits and installment payments in the auction of licenses for the various frequency bands included in WCS. When bidding credits are adopted for the auction of licenses in WCS frequency bands, such credits may be available to several types of small businesses based on average gross revenues (small, very small, and entrepreneur) pursuant to the competitive bidding rules adopted in conjunction with the requirements for the auction and/or as identified in the designated entities section in part 27 of the Commission's rules for the specific WCS frequency bands.

236. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

237. *Wireless Resellers.* Neither the Commission nor the SBA have developed a small business size standard specifically for Wireless Resellers. The closest industry with an SBA small business size standard is Telecommunications Resellers. The Telecommunications Resellers industry comprises establishments engaged in purchasing access and network capacity from owners and operators of telecommunications networks and reselling wired and wireless telecommunications services (except satellite) to businesses and households. Establishments in this industry resell telecommunications and they do not operate transmission facilities and infrastructure. Mobile virtual network operators (MVNOs) are included in this industry. Under the SBA size standard for this industry, a business is small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that 1,386 firms in this industry provided resale services during that year. Of that

number, 1,375 firms operated with fewer than 250 employees. Thus, for this industry under the SBA small business size standard, the majority of providers can be considered small entities.

238. *1670–1675 MHz Services.* These wireless communications services can be used for fixed and mobile uses, except aeronautical mobile. Wireless Telecommunications Carriers (except Satellite) is the closest industry with an SBA small business size standard applicable to these services. The SBA size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

239. According to Commission data as of November 2021, there were three active licenses in this service. The Commission's small business size standards with respect to 1670–1675 MHz Services involve eligibility for bidding credits and installment payments in the auction of licenses for these services. For licenses in the 1670–1675 MHz service band, a "small business" is defined as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding \$40 million for the preceding three years, and a "very small business" is defined as an entity that, together with its affiliates and controlling interests, has had average annual gross revenues not exceeding \$15 million for the preceding three years. The 1670–1675 MHz service band auction's winning bidder did not claim small business status.

240. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

241. *Wireless Telephony.* Wireless telephony includes cellular, personal communications services, and specialized mobile radio telephony carriers. The closest applicable industry with an SBA small business size standard is Wireless Telecommunications Carriers (except Satellite). The size standard for this industry under SBA rules is that a business is small if it has 1,500 or fewer employees. For this industry, U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 331 providers that reported they were engaged in the provision of cellular, personal communications services, and specialized mobile radio services. Of these providers, the Commission estimates that 255 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

242. *Broadband Personal Communications Service.* The broadband personal communications services (PCS) spectrum encompasses services in the 1850–1910 and 1930–1990 MHz bands. The closest industry with an SBA small business size standard applicable to these services is Wireless Telecommunications Carriers (except Satellite). The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

243. Based on Commission data as of November 2021, there were approximately 5,060 active licenses in the Broadband PCS service. The Commission's small business size standards with respect to Broadband PCS involve eligibility for bidding credits and installment payments in the auction of licenses for these services. In auctions for these licenses, the Commission defined "small business" as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding \$40 million for the preceding three years, and a "very small business" as an entity that, together with its affiliates and controlling interests, has had

average annual gross revenues not exceeding \$15 million for the preceding three years. Winning bidders claiming small business credits won Broadband PCS licenses in C, D, E, and F Blocks.

244. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

245. *Specialized Mobile Radio Licenses.* Special Mobile Radio (SMR) licenses allow licensees to provide land mobile communications services (other than radiolocation services) in the 800 MHz and 900 MHz spectrum bands on a commercial basis including but not limited to services used for voice and data communications, paging, and facsimile services, to individuals, Federal Government entities, and other entities licensed under Part 90 of the Commission's rules. Wireless Telecommunications Carriers (except Satellite) is the closest industry with an SBA small business size standard applicable to these services. The SBA size standard for this industry classifies a business as small if it has 1,500 or fewer employees. For this industry, U.S. Census Bureau data for 2017 show that there were 2,893 firms in this industry that operated for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 95 providers that reported they were of SMR (dispatch) providers. Of this number, the Commission estimates that all 95 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, these 119 SMR licensees can be considered small entities.

246. Based on Commission data as of December 2021, there were 3,924 active SMR licenses. However, since the Commission does not collect data on the number of employees for licensees providing SMR services, at this time we are not able to estimate the number of licensees with active licenses that

would qualify as small under the SBA's small business size standard. Nevertheless, for purposes of this analysis the Commission estimates that the majority of SMR licensees can be considered small entities using the SBA's small business size standard.

247. *Lower 700 MHz Band Licenses.* The lower 700 MHz band encompasses spectrum in the 698–746 MHz frequency bands. Permissible operations in these bands include flexible fixed, mobile, and broadcast uses, including mobile and other digital new broadcast operation; fixed and mobile wireless commercial services (including FDD- and TDD-based services); as well as fixed and mobile wireless uses for private, internal radio needs, two-way interactive, cellular, and mobile television broadcasting services. Wireless Telecommunications Carriers (except Satellite) is the closest industry with an SBA small business size standard applicable to licenses providing services in these bands. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

248. According to Commission data as of December 2021, there were approximately 2,824 active Lower 700 MHz Band licenses. The Commission's small business size standards with respect to Lower 700 MHz Band licensees involve eligibility for bidding credits and installment payments in the auction of licenses. For auctions of Lower 700 MHz Band licenses the Commission adopted criteria for three groups of small businesses. A very small business was defined as an entity that, together with its affiliates and controlling interests, has average annual gross revenues not exceeding \$15 million for the preceding three years, a small business was defined as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding \$40 million for the preceding three years, and an entrepreneur was defined as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding \$3 million for the preceding three years. In auctions for Lower 700 MHz Band licenses seventy-two winning bidders claiming a small business classification won 329 licenses, twenty-six winning bidders claiming a small business classification

won 214 licenses, and three winning bidders claiming a small business classification won all five auctioned licenses.

249. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

250. *Upper 700 MHz Band Licenses.* The upper 700 MHz band encompasses spectrum in the 746–806 MHz bands. Upper 700 MHz D Block licenses are nationwide licenses associated with the 758–763 MHz and 788–793 MHz bands. Permissible operations in these bands include flexible fixed, mobile, and broadcast uses, including mobile and other digital new broadcast operation; fixed and mobile wireless commercial services (including FDD- and TDD-based services); as well as fixed and mobile wireless uses for private, internal radio needs, two-way interactive, cellular, and mobile television broadcasting services. Wireless Telecommunications Carriers (except Satellite) is the closest industry with an SBA small business size standard applicable to licenses providing services in these bands. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of that number, 2,837 firms employed fewer than 250 employees. Thus, under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

251. According to Commission data as of December 2021, there were approximately 152 active Upper 700 MHz Band licenses. The Commission's small business size standards with respect to Upper 700 MHz Band licensees involve eligibility for bidding credits and installment payments in the auction of licenses. For the auction of these licenses, the Commission defined a "small business" as an entity that, together with its affiliates and

controlling principals, has average gross revenues not exceeding \$40 million for the preceding three years, and a “very small business” as an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than \$15 million for the preceding three years. Pursuant to these definitions, three winning bidders claiming very small business status won five of the twelve available licenses.

252. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA’s small business size standard.

253. *700 MHz Guard Band Licensees.* The 700 MHz Guard Band encompasses spectrum in 746–747/776–777 MHz and 762–764/792–794 MHz frequency bands. Wireless Telecommunications Carriers (*except Satellite*) is the closest industry with an SBA small business size standard applicable to licenses providing services in these bands. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

254. According to Commission data as of December 2021, there were approximately 224 active 700 MHz Guard Band licenses. The Commission’s small business size standards with respect to 700 MHz Guard Band licensees involve eligibility for bidding credits and installment payments in the auction of licenses. For the auction of these licenses, the Commission defined a “small business” as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding \$40 million for the preceding three years, and a “very small business” as an entity that, together with its affiliates and

controlling principals, has average gross revenues that are not more than \$15 million for the preceding three years. Pursuant to these definitions, five winning bidders claiming one of the small business status classifications won 26 licenses, and one winning bidder claiming small business won two licenses. None of the winning bidders claiming a small business status classification in these 700 MHz Guard Band license auctions had an active license as of December 2021.

255. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA’s small business size standard.

256. *Air-Ground Radiotelephone Service.* Air-Ground Radiotelephone Service is a wireless service in which licensees are authorized to offer and provide radio telecommunications service for hire to subscribers in aircraft. A licensee may provide any type of air-ground service (*i.e.*, voice telephony, broadband internet, data, etc.) to aircraft of any type, and serve any or all aviation markets (commercial, government, and general). A licensee must provide service to aircraft and may not provide ancillary land mobile or fixed services in the 800 MHz air-ground spectrum.

257. The closest industry with an SBA small business size standard applicable to these services is Wireless Telecommunications Carriers (*except Satellite*). The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

258. Based on Commission data as of December 2021, there were approximately four licensees with 110 active licenses in the Air-Ground Radiotelephone Service. The

Commission’s small business size standards with respect to Air-Ground Radiotelephone Service involve eligibility for bidding credits and installment payments in the auction of licenses. For purposes of auctions, the Commission defined “small business” as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding \$40 million for the preceding three years, and a “very small business” as an entity that, together with its affiliates and controlling interests, has had average annual gross revenues not exceeding \$15 million for the preceding three years. In the auction of Air-Ground Radiotelephone Service licenses in the 800 MHz band, neither of the two winning bidders claimed small business status.

259. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, the Commission does not collect data on the number of employees for licensees providing these services therefore, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA’s small business size standard.

260. *Advanced Wireless Services (AWS)*—(1710–1755 MHz and 2110–2155 MHz bands (AWS–1); 1915–1920 MHz, 1995–2000 MHz, 2020–2025 MHz and 2175–2180 MHz bands (AWS–2); 2155–2175 MHz band (AWS–3); 2000–2020 MHz and 2180–2200 MHz (AWS–4). Spectrum is made available and licensed in these bands for the provision of various wireless communications services. Wireless Telecommunications Carriers (*except Satellite*) is the closest industry with an SBA small business size standard applicable to these services. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus, under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

261. According to Commission data as of December 2021, there were

approximately 4,472 active AWS licenses. The Commission's small business size standards with respect to AWS involve eligibility for bidding credits and installment payments in the auction of licenses for these services. For the auction of AWS licenses, the Commission defined a "small business" as an entity with average annual gross revenues for the preceding three years not exceeding \$40 million, and a "very small business" as an entity with average annual gross revenues for the preceding three years not exceeding \$15 million. Pursuant to these definitions, 57 winning bidders claiming status as small or very small businesses won licenses.

262. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

263. *3650–3700 MHz band.* Wireless broadband service licensing in the 3650–3700 MHz band provides for nationwide, non-exclusive licensing of terrestrial operations, utilizing contention-based technologies, in the 3650 MHz band (*i.e.*, 3650–3700 MHz). Licensees are permitted to provide services on a non-common carrier and/or on a common carrier basis. Wireless broadband services in the 3650–3700 MHz band fall in the Wireless Telecommunications Carriers (*except* Satellite) industry with an SBA small business size standard that classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

264. The Commission has not developed a small business size standard applicable to 3650–3700 MHz

band licensees. Based on the licenses that have been granted, however, we estimate that the majority of licensees in this service are small internet access service providers. As of November 2021, Commission data shows that there were 902 active licenses in the 3650–3700 MHz band. However, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

265. *Fixed Microwave Services.* Fixed microwave services include common carrier, private-operational fixed, and broadcast auxiliary radio services. They also include the Upper Microwave Flexible Use Service (UMFUS), Millimeter Wave Service (70/80/90 GHz), Local Multipoint Distribution Service (LMDS), the Digital Electronic Message Service (DEMS), 24 GHz Service, Multiple Address Systems (MAS), and Multichannel Video Distribution and Data Service (MVDDS), where in some bands licensees can choose between common carrier and non-common carrier status. Wireless Telecommunications Carriers (*except* Satellite) is the closest industry with an SBA small business size standard applicable to these services. The SBA small size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of fixed microwave service licensees can be considered small.

266. The Commission's small business size standards with respect to fixed microwave services involve eligibility for bidding credits and installment payments in the auction of licenses for the various frequency bands included in fixed microwave services. When bidding credits are adopted for the auction of licenses in fixed microwave services frequency bands, such credits may be available to several types of small businesses based on average gross revenues (small, very small, and entrepreneur) pursuant to the competitive bidding rules adopted in conjunction with the requirements for the auction and/or as identified in Part 101 of the Commission's rules for the specific fixed microwave services frequency bands.

267. In frequency bands where licenses were subject to auction, the

Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

268. *Broadband Radio Service and Educational Broadband Service.* Broadband Radio Service systems, previously referred to as Multipoint Distribution Service (MDS) and Multichannel Multipoint Distribution Service (MMDS) systems, and "wireless cable," transmit video programming to subscribers and provide two-way high speed data operations using the microwave frequencies of the Broadband Radio Service (BRS) and Educational Broadband Service (EBS) (previously referred to as the Instructional Television Fixed Service (ITFS)). Wireless cable operators that use spectrum in the BRS often supplemented with leased channels from the EBS, provide a competitive alternative to wired cable and other multichannel video programming distributors. Wireless cable programming to subscribers resembles cable television, but instead of coaxial cable, wireless cable uses microwave channels.

269. In light of the use of wireless frequencies by BRS and EBS services, the closest industry with an SBA small business size standard applicable to these services is Wireless Telecommunications Carriers (*except* Satellite). The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

270. According to Commission data as of December 2021, there were approximately 5,869 active BRS and EBS licenses. The Commission's small business size standards with respect to BRS involves eligibility for bidding credits and installment payments in the

auction of licenses for these services. For the auction of BRS licenses, the Commission adopted criteria for three groups of small businesses. A very small business is an entity that, together with its affiliates and controlling interests, has average annual gross revenues that exceed \$3 million and did not exceed \$15 million for the preceding three years, a small business is an entity that, together with its affiliates and controlling interests, has average gross revenues that exceed \$15 million and did not exceed \$40 million for the preceding three years, and an entrepreneur is an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding \$3 million for the preceding three years. Of the ten winning bidders for BRS licenses, two bidders claiming the small business status won four licenses, one bidder claiming the very small business status won three licenses, and two bidders claiming entrepreneur status won six licenses. One of the winning bidders claiming a small business status classification in the BRS license auction has an active license as of December 2021.

271. The Commission's small business size standards for EBS define a small business as an entity that, together with its affiliates, its controlling interests, and the affiliates of its controlling interests, has average gross revenues that are not more than \$55 million for the preceding five (5) years, and a very small business is an entity that, together with its affiliates, its controlling interests, and the affiliates of its controlling interests, has average gross revenues that are not more than \$20 million for the preceding five (5) years. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

5. Satellite Service Providers

272. *Satellite Telecommunications.* This industry comprises firms "primarily engaged in providing

telecommunications services to other establishments in the telecommunications and broadcasting industries by forwarding and receiving communications signals via a system of satellites or reselling satellite telecommunications." Satellite telecommunications service providers include satellite and earth station operators. The SBA small business size standard for this industry classifies a business with \$38.5 million or less in annual receipts as small. U.S. Census Bureau data for 2017 show that 275 firms in this industry operated for the entire year. Of this number, 242 firms had revenue of less than \$25 million. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 65 providers that reported they were engaged in the provision of satellite telecommunications services. Of these providers, the Commission estimates that approximately 42 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, a little more than half of these providers can be considered small entities.

273. *All Other Telecommunications.* This industry is comprised of establishments primarily engaged in providing specialized telecommunications services, such as satellite tracking, communications telemetry, and radar station operation. This industry also includes establishments primarily engaged in providing satellite terminal stations and associated facilities connected with one or more terrestrial systems and capable of transmitting telecommunications to, and receiving telecommunications from, satellite systems. Providers of internet services (e.g. dial-up ISPs) or VoIP services, via client-supplied telecommunications connections are also included in this industry. The SBA small business size standard for this industry classifies firms with annual receipts of \$35 million or less as small. U.S. Census Bureau data for 2017 show that there were 1,079 firms in this industry that operated for the entire year. Of those firms, 1,039 had revenue of less than \$25 million. Based on this data, the Commission estimates that the majority of "All Other Telecommunications" firms can be considered small.

6. Cable Service Providers

274. *Cable and Other Subscription Programming.* The U.S. Census Bureau defines this industry as establishments primarily engaged in operating studios and facilities for the broadcasting of

programs on a subscription or fee basis. The broadcast programming is typically narrowcast in nature (e.g., limited format, such as news, sports, education, or youth-oriented). These establishments produce programming in their own facilities or acquire programming from external sources. The programming material is usually delivered to a third party, such as cable systems or direct-to-home satellite systems, for transmission to viewers. The SBA small business size standard for this industry classifies firms with annual receipts less than \$41.5 million as small. Based on U.S. Census Bureau data for 2017, 378 firms operated in this industry during that year. Of that number, 149 firms operated with revenue of less than \$25 million a year and 44 firms operated with revenue of \$25 million or more. Based on this data, the Commission estimates that a majority of firms in this industry are small.

275. *Cable Companies and Systems (Rate Regulation).* The Commission has developed its own small business size standard for the purpose of cable rate regulation. Under the Commission's rules, a "small cable company" is one serving 400,000 or fewer subscribers nationwide. Based on industry data, there are about 420 cable companies in the U.S. Of these, only seven have more than 400,000 subscribers. In addition, under the Commission's rules, a "small system" is a cable system serving 15,000 or fewer subscribers. Based on industry data, there are about 4,139 cable systems (headends) in the U.S. Of these, about 639 have more than 15,000 subscribers. Accordingly, the Commission estimates that the majority of cable companies and cable systems are small.

276. *Cable System Operators (Telecom Act Standard).* The Communications Act of 1934, as amended, contains a size standard for a "small cable operator," which is "a cable operator that, directly or through an affiliate, serves in the aggregate fewer than one percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed \$250,000,000." For purposes of the Telecom Act Standard, the Commission determined that a cable system operator that serves fewer than 677,000 subscribers, either directly or through affiliates, will meet the definition of a small cable operator based on the cable subscriber count established in a 2001 Public Notice. Based on industry data, only six cable system operators have more than 677,000 subscribers. Accordingly, the Commission estimates that the majority of cable system

operators are small under this size standard. We note however, that the Commission neither requests nor collects information on whether cable system operators are affiliated with entities whose gross annual revenues exceed \$250 million. Therefore, we are unable at this time to estimate with greater precision the number of cable system operators that would qualify as small cable operators under the definition in the Communications Act.

7. Other

277. Electric Power Generators, Transmitters, and Distributors. The U.S. Census Bureau defines the utilities sector industry as comprised of “establishments, primarily engaged in generating, transmitting, and/or distributing electric power. Establishments in this industry group may perform one or more of the following activities: (1) operate generation facilities that produce electric energy; (2) operate transmission systems that convey the electricity from the generation facility to the distribution system; and (3) operate distribution systems that convey electric power received from the generation facility or the transmission system to the final consumer.” This industry group is categorized based on fuel source and includes Hydroelectric Power Generation, Fossil Fuel Electric Power Generation, Nuclear Electric Power Generation, Solar Electric Power Generation, Wind Electric Power Generation, Geothermal Electric Power Generation, Biomass Electric Power Generation, Other Electric Power Generation, Electric Bulk Power Transmission and Control, and Electric Power Distribution.

278. The SBA has established a small business size standard for each of these groups based on the number of employees which ranges from having fewer than 250 employees to having fewer than 1,000 employees. U.S. Census Bureau data for 2017 indicate that for the Electric Power Generation, Transmission and Distribution industry there were 1,693 firms that operated in this industry for the entire year. Of this number, 1,552 firms had less than 250 employees. Based on this data and the associated SBA size standards, the majority of firms in this industry can be considered small entities.

279. All Other Information Services. This industry comprises establishments primarily engaged in providing other information services (except news syndicates, libraries, archives, internet publishing and broadcasting, and Web search portals). The SBA small business size standard for this industry classifies

firms with annual receipts of \$30 million or less as small. U.S. Census Bureau data for 2017 show that there were 704 firms in this industry that operated for the entire year. Of those firms, 556 had revenue of less than \$25 million. Consequently, we estimate that the majority of firms in this industry are small entities.

280. Internet Service Providers (Non-Broadband). Internet access service providers using client-supplied telecommunications connections (e.g., dial-up ISPs) as well as VoIP service providers using client-supplied telecommunications connections fall in the industry classification of All Other Telecommunications. The SBA small business size standard for this industry classifies firms with annual receipts of \$35 million or less as small. For this industry, U.S. Census Bureau data for 2017 show that there were 1,079 firms in this industry that operated for the entire year. Of those firms, 1,039 had revenue of less than \$25 million. Consequently, under the SBA size standard a majority of firms in this industry can be considered small.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

281. In the *Notice*, we largely seek to reestablish the framework the Commission previously adopted in the 2015 *Open Internet Order*. We first propose to reclassify BIAS as a telecommunications service under Title II of the Act and to reclassify mobile BIAS as a commercial mobile service. We also propose to reestablish rules to prevent ISPs from engaging in practices harmful to consumers, competition, and public safety and that provide the foundation for a national regulatory approach toward BIAS. Specifically, we propose to adopt rules to prohibit ISPs from blocking, throttling, or engaging in paid or affiliated prioritization arrangements. We further propose to reinstate the general conduct standard adopted in the 2015 *Open Internet Order*, which would prohibit practices that cause unreasonable interference or unreasonable disadvantage to consumers or edge providers. Additionally, we propose to retain current disclosure obligations for ISPs, and seek comment on the means of disclosure, the interplay between the transparency rule and current broadband label requirements, as well as any additional enhancements or changes the Commission should consider. While we expect the proposals in the *Notice* will impose new or additional reporting, recordkeeping and/or other compliance obligations on

small and other entities, we also anticipate that the burden for small and other entities to comply with the reclassification and rules will be minimal, as they will be entering a regulatory framework with which they are already and recently familiar. At this time however, the Commission is not in a position to determine whether, if adopted, our proposals and the matters upon which we seek comment will require small entities to hire professionals to comply with the proposed rules in the *Notice*, and cannot quantify the cost of compliance with the potential rule changes discussed herein. We seek comment from small entities that have concerns about potential hardships or other matters related to our proposed rules, and with compliance, should they be adopted.

282. Certain compliance obligations regarding the content of transparency disclosures that we discuss in the *Notice* and seek comment on are beyond those that currently exists. For instance, we seek comment on additional disclosure specifications that were established in the 2015 *Open Internet Order* and repealed by the *RIF Order*, including commercial terms about price and related terms and their relationship with disclosures regarding privacy and redress options, and about performance characteristics related to network performance and network practices. We also seek comment on whether ISPs should disclose additional information regarding their performance measurement methodologies and practices. We discuss additional disclosure requirements that were not adopted in the 2015 *Open Internet Order*, such as those regarding the source, location, timing, or duration of network congestion, packet corruption and jitter, or disclosures that permit end users to identify application-specific usage or to distinguish which user or device contributed to which part of the total data usage. We also ask if ISPs should be required to make more detailed disclosures regarding the requirements, restrictions, or standards for enforcement of data caps. Further, we seek comment on whether to incorporate into the transparency rule the Commission’s clarifications and guidance regarding prior versions of the transparency rule, such as point-of-sale disclosures, service descriptions, disclosures for the benefit of edge providers, disclosures regarding security measures, and consistency between ISPs’ disclosures under the transparency rule and their advertising claims or other public statements. We also discuss how providers would make the required

disclosures, such as via a publicly available website, by transmitting disclosures directly to the Commission, and by additional locations or means. Additionally, we seek comment on whether such disclosures should be in a machine-readable format and regarding the accessibility of such disclosures to individuals with disabilities. Lastly, we explore what, if any, recordkeeping requirements we should implement as a means for ISPs to provide the types of information or records needed to support the content of their disclosures.

283. The Commission seeks comment on all of the above proposals to evaluate whether compliance with these requirements would cause an undue burden on small or other entities, if adopted. We therefore expect the information we receive in comments, including cost and benefit data, to help the Commission further identify and evaluate relevant matters for small entities, such as compliance costs, and other burdens that may result from the proposals and inquiries we make in the *Notice*.

E. Steps Taken To Minimize the Significant Economic Impact on Small Entities, and Significant Alternatives Considered

284. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its proposed approach, which may include (among others) the following four alternatives: (1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for such small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for such small entities.

285. At the outset of the reclassification discussion, we request information on the benefits and burdens of the proposed reclassification, and specifically request feedback on the impact on small businesses and small ISPs. We also request feedback on the proposed conduct rules prohibiting ISPs from blocking or throttling the information transmitted over their networks, or engaging in paid or affiliated prioritization arrangements, and the general conduct rule, all of which, as we discuss in the *Notice*, track the specific language from the *2015 Open Internet Order*. We believe our proposal to reestablish the framework from the Commission's 2015 decision

could minimize the economic impact for small entities that already have experience operating under, and complying with, the *2015 Open Internet Order*.

286. We also believe and tentatively conclude that the proposed reclassification of BIAS as a telecommunications service will enhance the Commission's ability to continue to advance national security and preserve public safety by protecting the nation's communications networks from potential entities, equipment, and services that pose threats to national security and law enforcement. However, in the alternative to reclassification, we consider, inquire, and seek comment on whether there is other authority that can be used by the Commission that would allow it to protect the nation's communications networks against ISPs that pose threats national security and law enforcement. To the extent there is such an alternative available to the Commission, in the *Notice*, we request that commenters specify the statutory authority, and how this authority can be used by the Commission to address national security and law enforcement concerns. We believe reclassification also will protect the information of small and other telecommunications carriers, equipment manufacturers, and other entities that interact with ISPs that are potential national security threats, or are owned or controlled by, or subject to the jurisdiction or direction of foreign adversaries. Accordingly, we seek comment on how reclassification of BIAS will affect ISPs as well as telecommunications carriers and equipment manufacturers, and other entities that interact with ISPs, if adopted.

287. In the *Notice*, we indicate that as part of our proposal to reinstate the reclassification of BIAS as a telecommunications service, we will continue to define BIAS as defined in part 8 of the Commission's rules and "mass market" as defined in the *2015 Open Internet Order* and *RIF Order*. We consider whether there are reasons for the Commission to modify these definitions. Similarly, we consider whether there is any reason to depart from our tentative conclusion that BIAS is a telecommunications service and our supporting analysis. Further, while we propose to reinstate the classification of mobile BIAS as a commercial mobile service as adopted in the *2015 Open Internet Order*, alternatively, we propose to find that mobile BIAS is the functional equivalent of a commercial mobile service and, therefore, not private mobile service, even if mobile BIAS does not meet the definition of

"commercial mobile service." The *Notice* seeks comment on these matters.

288. The specific conduct rules we propose in the *Notice* would prohibit ISPs from blocking, throttling, or engaging in paid or affiliated prioritization arrangements. In the alternative, we consider whether the need to prohibit any of these practices has been eliminated by any new technical advancements or market developments. We also consider whether our proposed no-blocking rule which tracks the language of the rule we adopted *2015 Open Internet Order*, and would apply to both fixed and mobile ISPs, continues to be the best no-blocking principle for ISPs. The no-blocking rule is a broadly accepted principle in the industry, including by ISPs, and many ISPs continue to advertise a commitment to open internet principles on their websites, which includes commitments not to block traffic except in certain circumstances, notwithstanding the 2017 repeal of the no-blocking rule. Similarly, after the repeal of the no-throttling rule, ISPs continue to advertise on their websites that they do not throttle traffic except in limited circumstances. As a result, we believe the economic impact on, and costs to comply with the proposed no-blocking rule, and the no throttling of lawful internet traffic rule, will be minimal for small ISPs. We however seek information on specific costs and burdens these rules would impose for small ISPs.

289. Regarding our proposed ban on paid prioritization practices, we take steps to minimize the economic impact for small ISPs by requesting information on the compliance costs small ISPs would incur as a result of such a ban, and by exploring whether there are alternatives we can take to protect consumers, and the open internet from the harms of paid prioritization practices that should be considered as an alternative to a flat ban. Similarly, we consider whether there is another standard we should adopt to establish a general conduct rule, as an alternative to the general conduct standard for ISPs we propose in the *Notice* that tracks the *2015 Open Internet Order*. We specifically inquire whether we should instead rely on the "just and reasonable" and "unreasonable discrimination" standards in sections 201 and 202 of the Act. The *Notice* seeks comment on these matters.

290. We further propose to build upon the foundation of our existing transparency requirement adopted in the *2010 Open Internet Order*, and the new broadband label requirements the Commission put in place to give

consumers a convenient tool to research and compare broadband offerings. We propose possible modifications or additions to the requirements pertaining to the content of required disclosure and the means of disclosure to update the transparency rule, to ensure that sufficient information is made available to end users, edge providers, the broader internet community, and the Commission, which allows for the timely and effective assessment of ISPs' terms and conditions for BIAS. Specific disclosure modification alternatives we consider, and seek comment on include whether to: (1) require disclosures regarding the source, location, timing, or duration of network congestion, packet corruption and jitter, or disclosures that permit end users to identify application-specific usage or to distinguish which user or device contributed to which part of the total data usage, (2) require more detailed disclosures regarding the requirements, restrictions, or standards for enforcement of data caps; (3) require specific content of particular relevance to edge providers, the broader internet community, or the Commission, and (4) require different disclosures tailored to different audiences, and specifically, whether different content disclosures should be required for mobile ISPs than for fixed ISPs. Further, as an alternative to modifications that only add disclosure requirements, we inquire, and seek comment on whether under the current transparency rule there is certain content that is required to be disclosed that should no longer be required after weighing the relevant policy considerations at stake.

291. As we discuss in the *Notice*, our objectives for proposing modifications to the means of disclosure requirements for ISPs is to ensure that we are taking the appropriate steps to facilitate the availability of the content of the required disclosures in a timely and effective manner, without undue burdens on ISPs. Thus, while we consider and seek comment on alternatives to modify the means of disclosure requirements for ISPs such as, (1) whether any additional requirements are warranted regarding ISPs' website disclosures under the transparency rule, (2) whether disclosures under the transparency rule should be required in additional locations, and (3) possible direct notification requirements, we also consider whether there are existing means of disclosure requirements that should be eliminated because the burdens imposed by these requirements outweigh their benefits. We believe that to the extent that there are content and/

or means of disclosure requirements that can be removed, removal of these requirements could reduce the impact for small entities of any additional requirements that may be adopted.

292. Our assessment of how to implement any rules we may adopt relating to the transparency rule seeks to identify any implementation issues for small and other ISPs that may be associated with potential modifications. We specifically seek to understand the impacts for small ISPs, such as whether smaller ISPs need extra time to implement any modifications to the transparency rule.

293. More generally we consider implementation alternatives that include, (1) whether the Commission should adopt new safe harbors for compliance with the transparency rule, (2) whether there are safe harbors the Commission should adopt for compliance with the transparency rule as a whole, similar to the broadband label safe harbor adopted in the *2015 Open Internet Order*, and (3) whether the Commission should adopt recordkeeping requirements governing the types of information or records ISPs rely upon to support the content of their disclosures made under the transparency rule. With regard to any recordkeeping requirements, we seek information on specific ways information could be retained that could minimize the burden on small and other ISPs, and what recordkeeping timeframe would best balance the benefits to the Commission of having the required information available against the compliance burden for small and other ISPs. Overall, the Commission's objective is to determine the most cost-effective ways of ensuring that consumers, and edge providers receive the information they need in a timely and effective manner, while minimizing the implementation and compliance burdens for small and other ISPs, consistent with these goals.

294. In the *Notice* and summarized above, we discuss the potential effects our rule proposals and alternatives could have on small entities, and seek comment on these matters. We also discuss that the Commission envisions the proposed BIAS reclassification as a means to provide the basis for a national regulatory approach rather than a patchwork of state requirements, which could help streamline and minimize regulatory requirements for small entities. Further, we propose broad forbearance from statutory requirements and Commission regulations for ISPs, and note that the proposed forbearance could substantially lessen the economic impact of the proposed actions on small

entities. Accordingly, before reaching final conclusions, and taking action in this proceeding, the Commission expects to further consider the economic impact on small entities, and additional alternatives that are consistent with its goal of safeguarding and securing the open internet, while also imposing minimal burdens on small entities, based on comments filed in response to the *Notice* and this IRFA.

F. Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rules

295. None.

VII. Ordering Clauses

296. Accordingly, *it is ordered*, pursuant to the authority contained in sections 1, 2, 3, 4(i)–(j), 10, 13, 201, 202, 208, 218, 230, 251, 254, 256, 257, 301, 303, 304, 307, 309, 316, 332, 403, 501, 503, 522, 536, and 548 of the Communications Act of 1934, as amended, and section 706 of the Telecommunications Act of 1996, as amended, 47 U.S.C. 151, 152, 153, 154(i)–(j), 160, 163, 201, 202, 208, 218, 230, 251, 254, 256, 257, 301, 303, 304, 307, 309, 316, 332, 403, 501, 503, 522, 536, 548, and 1302, that this Notice of Proposed Rulemaking *is adopted*.

297. *It is further ordered* that, pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415 and 1.419, interested parties may file comments on the Notice of Proposed Rulemaking on or before December 14, 2023, and reply comments on or before January 17, 2024.

298. *It is further ordered* that the Office of the Secretary, Reference Information Center *shall send* a copy of this Notice of Proposed Rulemaking, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

List of Subjects in 47 CFR Parts 8 and 20

Communications, Common carriers, Reporting and recordkeeping requirements, Telecommunications, Telephone.

Federal Communications Commission.

Marlene Dortch,
Secretary.

Proposed Rules

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR parts 8 and 20 as follows:

PART 8—[AMENDED]

■ 1. The authority citation for part 8 is revised to read as follows:

Authority: 47 U.S.C. 151, 152, 153, 154, 160, 163, 201, 202, 208, 218, 230, 251, 254, 256, 257, 301, 303, 304, 307, 309, 316, 332, 403, 501, 503, 522, 536, 548, 1302, 1753.

■ 2. Amend part 8 by revising the part heading to read as follows:

PART 8—SAFEGUARDING AND SECURING THE OPEN INTERNET

■ 3. Add § 8.2 to read as follows:

§ 8.2 Conduct-based rules.

(a) *Definitions.* For purposes of this section:

(1) *Broadband internet access service* means a mass-market retail service by wire or radio that provides the capability to transmit data to and receive data from all or substantially all internet endpoints, including any capabilities that are incidental to and enable the operation of the communications service, but excluding dial-up internet access service. This term also encompasses any service that the Commission finds to be providing a functional equivalent of the service described in the previous sentence or that is used to evade the protections set forth in this part.

(2) *Edge provider* means any individual or entity that provides any content, application, or service over the internet, and any individual or entity that provides a device used for accessing any content, application, or service over the internet.

(3) *End user* means any individual or entity that uses a broadband internet access service.

(4) *Reasonable network management* means a network management practice that has a primarily technical network management justification, but does not include other business practices. A network management practice is reasonable if it is primarily used for and tailored to achieving a legitimate network management purpose, taking into account the particular network architecture and technology of the broadband internet access service.

(b) *No blocking.* A person engaged in the provision of broadband internet access service, insofar as such person is so engaged, shall not block lawful content, applications, services, or non-harmful devices, subject to reasonable network management.

(c) *No throttling.* A person engaged in the provision of broadband internet

access service, insofar as such person is so engaged, shall not impair or degrade lawful internet traffic on the basis of internet content, application, or service, or use of a non-harmful device, subject to reasonable network management.

(d) *No paid prioritization.* (1) A person engaged in the provision of broadband internet access service, insofar as such person is so engaged, shall not engage in paid prioritization. “Paid prioritization” refers to the management of a broadband provider’s network to directly or indirectly favor some traffic over other traffic, including through use of techniques such as traffic shaping, prioritization, resource reservation, or other forms of preferential traffic management, either:

(i) In exchange for consideration (monetary or otherwise) from a third party, or

(ii) To benefit an affiliated entity.

(2) The Commission may waive the ban on paid prioritization only if the petitioner demonstrates that the practice would provide some significant public interest benefit and would not harm the open nature of the internet.

(e) *General conduct standard.* (1) Any person engaged in the provision of broadband internet access service, insofar as such person is so engaged, shall not unreasonably interfere with or unreasonably disadvantage:

(i) End users’ ability to select, access, and use broadband internet access service or the lawful internet content, applications, services, or devices of their choice, or

(ii) Edge providers’ ability to make lawful content, applications, services, or devices available to end users.

(2) Reasonable network management shall not be considered a violation of this rule.

(f) *Effect on other obligations or authorizations.* Nothing in this part supersedes any obligation or authorization a provider of broadband internet access service may have to address the needs of emergency communications or law enforcement, public safety, or national security authorities, consistent with or as permitted by applicable law, or limits the provider’s ability to do so. Nothing in this part prohibits reasonable efforts by a provider of broadband internet access service to address copyright infringement or other unlawful activity.

PART 20—COMMERCIAL MOBILE SERVICES

■ 4. The authority citation for part 20 continues to read as follows:

Authority: 47 U.S.C. 151, 152(a), 154(i), 155, 157, 160, 201, 214, 222, 251(e), 301, 302, 303, 303(b), 303(r), 307, 307(a), 309, 309(j)(3), 316, 316(a), 332, 610, 615, 615a, 615b, and 615c, unless otherwise noted.

■ 5. In § 20.3 amend paragraph (b) by revising the definitions of “*Commercial mobile radio service*” and “*Public Switched Network*” to read as follows:

§ 20.3 Definitions.

* * * * *

Commercial mobile radio service. A mobile service that is:

(1)(i) Provided for profit, *i.e.*, with the intent of receiving compensation or monetary gain;

(ii) An interconnected service; and

(iii) Available to the public, or to such classes of eligible users as to be effectively available to a substantial portion of the public; or

(2) The functional equivalent of such a mobile service described in paragraph (1) of this definition, including a mobile broadband internet access service as defined in § 8.2 of this chapter.

(3) A variety of factors may be evaluated to make a determination whether the mobile service in question is the functional equivalent of a commercial mobile radio service, including: Consumer demand for the service to determine whether the service is closely substitutable for a commercial mobile radio service; whether changes in price for the service under examination, or for the comparable commercial mobile radio service, would prompt customers to change from one service to the other; and market research information identifying the targeted market for the service under review.

(4) Unlicensed radio frequency devices under part 15 of this chapter are excluded from this definition of Commercial mobile radio service.

* * * * *

Public Switched Network. The network that includes any common carrier switched network, whether by wire or radio, including local exchange carriers, interexchange carriers, and mobile service providers, that uses the North American Numbering Plan, or public IP addresses, in connection with the provision of switched services.

* * * * *
