

FEDERAL REGISTER

Vol. 88

Friday,

No. 212

November 3, 2023

Pages 75451–76096

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.federalregister.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.govinfo.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$860 plus postage, or \$929, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 88 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Title 3—

Proclamation 10660 of October 31, 2023

The President

Critical Infrastructure Security and Resilience Month, 2023**By the President of the United States of America****A Proclamation**

Throughout our history, America has been a can-do country full of possibilities. Our people are models of grit, drive, and determination, and when we properly prepare ourselves, we can meet any challenge that comes our way and ensure future generations thrive. This Critical Infrastructure Security and Resilience Month, let us recommit to reinforcing our critical infrastructure and remaining vigilant to threats that undermine our collective security and economic prosperity.

That means protecting our investments from all hazards and ensuring the infrastructure that American people rely on every day is secure and resilient. Climate change is making natural disasters more frequent, ferocious, and costly, straining our highways, railways, waterways, and energy systems. These disruptions—whether a natural disaster, a pandemic, or a cyberattack—exploit vulnerabilities in our supply chains and make it more difficult to access critical products when people need them. State and non-state actors, such as criminals and violent extremists, continue to target our power grids, pipelines, health care systems, and water systems—threatening the infrastructure that underpins our economy, public health and safety, and national security. As President, I am committed to building a better future for our country by making America’s critical infrastructure more secure and addressing the threats and hazards that place them at risk.

Bolstering the Nation’s infrastructure is a cornerstone of my Investing in America agenda. With a combination of funding from the American Rescue Plan, Bipartisan Infrastructure Law, the Inflation Reduction Act, and the CHIPS and Science Act, we are investing billions of dollars to enhance the security of our infrastructure by elevating roads and bridges above projected flood zones, supporting community resilience programs, reducing the strain put on our power grids, and so much more. These investments will save lives, protect our families, render a strong and innovative economy, enhance our resilience to disasters, and provide peace of mind to millions of Americans.

We know that to protect our critical infrastructure we must improve our cybersecurity. From the very beginning of my Administration, we have worked tirelessly to strengthen our Nation’s cyber defenses. During my first year in office, I issued an Executive Order on Improving the Nation’s Cybersecurity, a crucial step toward defending against the increasingly malicious cyber campaigns targeting our infrastructure. My Bipartisan Infrastructure Law builds on this progress by investing \$1 billion to bolster cybersecurity for State, local, Tribal, and territorial governments. I am proud to have appointed senior cybersecurity officials who are laser-focused on anticipating and responding to cyber threats and ensuring that the Federal Government leverages all of its resources to improve the cybersecurity of the Nation’s critical infrastructure. These priorities have been catalyzed by my National Cybersecurity Strategy released earlier this year, which lays out our strategy to enhance the cybersecurity and resilience of our Nation’s critical infrastructure and the American people.

While my Administration is investing to protect America's critical infrastructure, we are also working with our international partners to build sustainable, resilient infrastructure around the globe. At the G20 Summit earlier this year, through the Partnership for Global Infrastructure and Investment, I was proud to unveil the launch of the landmark United States partnership with the European Union to develop the Trans-African Corridor. We are working with partners to connect the Democratic Republic of the Congo and Zambia to regional and global trade markets through the Port of Lobito in Angola, including by launching feasibility studies for a new greenfield rail line expansion between Zambia and Angola. This reliable and cost-effective corridor will increase efficiencies, secure regional supply chains, enhance economic unity, generate jobs, and decrease the carbon footprint in both countries. We hope to pursue opportunities to connect our initial investments across the continent to Tanzania and, ultimately, the Indian Ocean. Through quality infrastructure investments in key economic corridors like these, we are creating a better future filled with opportunity, dignity, and prosperity for everyone.

The United States is the only country in the world that becomes stronger after every challenge we face. Time and again, we have seen that when we work together, nothing is beyond our capacity. This Critical Infrastructure Security and Resilience Month, let us come together in common cause to bolster our Nation's critical infrastructure and create a more resilient nation and economy for generations to come.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim November 2023 as Critical Infrastructure Security and Resilience Month. I call upon the people of the United States to recognize the importance of protecting our Nation's infrastructure and to observe this month with appropriate measures to enhance our national security and resilience.

IN WITNESS WHEREOF, I have hereunto set my hand this thirty-first day of October, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-eighth.

A handwritten signature in black ink, appearing to read "Joe Biden", with a long, sweeping horizontal line extending to the left.

Presidential Documents

Proclamation 10661 of October 31, 2023

National Adoption Month, 2023

By the President of the United States of America

A Proclamation

Children are the kite strings that hold our Nation's ambitions aloft, and every one of them deserves to grow up in a safe and loving home. This National Adoption Month, we celebrate all the families made whole through adoption and recommit to ensuring that every child can build a life of happiness and well-being.

Today, more than a hundred thousand children are awaiting adoption in our Nation's foster care system, hoping for the love, connection, and a lasting foundation that a permanent family can provide. To help more families cover the cost of adoption, I have urged the Congress to make the adoption tax credit fully refundable so that every adoptive family benefit, regardless of income, and can focus on building supportive lives together. I have proposed making legal guardians eligible as well so that loving grandparents, aunts, uncles, and others can care for children and keep extended families together. I have also expanded the Military Parental Leave Program, allowing service members to spend more time with their families after a child is born, adopted, or placed with them through long-term foster care. At the same time, my Administration is working to remove barriers that make it harder for LGBTQI+ families to adopt, including by providing State child welfare agencies with training and funds to better support and place LGBTQI+ youth in safe and compassionate environments.

Still, thousands of young people unfortunately will not be adopted before they age out of foster care. To help ease that transition, my latest budget called for \$9 billion to provide housing vouchers to all 20,000 adolescents exiting foster care annually; and I sought another \$1 billion to support job placement, health care, access to higher education, and other programs. My Administration is also working closely with States to help foster youth stay in school, train for jobs, pay their bills, and begin promising adult lives.

During National Adoption Month, we recognize the bonds of love shared by adoptive families across America. We celebrate the millions of adoptive and kinship families who have opened their hearts to provide safe and caring homes. We thank the foster families and dedicated professionals who help so much along the way. We stand with foster youth and adoptees of all ages and want you to know that you are never alone. This month especially, we encourage anyone who is considering adoption to take that brave and loving step forward, growing their families and adding profound meaning to their lives.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim November 2023 as National Adoption Month. I encourage all Americans to honor this month by helping the children and youth in your communities secure their forever homes and find the love and connection that they need to thrive.

IN WITNESS WHEREOF, I have hereunto set my hand this thirty-first day of October, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-eighth.

A handwritten signature in black ink, appearing to read "Joe Biden", with a long, sweeping horizontal line extending to the left.

Proclamation 10662 of October 31, 2023

National Alzheimer's Disease Awareness Month, 2023

By the President of the United States of America

A Proclamation

Over six million Americans live with Alzheimer's disease, a form of dementia that deprives people of their precious memories, thoughts, and identity. During National Alzheimer's Disease Awareness Month, we honor the extraordinary courage, strength, and resilience of people facing this devastating disease. We recognize the support of families and caregivers who stand by their loved one's side and help them age with dignity. We resolve to continue advancing scientific research and treatment options to ensure a brighter future for all Americans facing Alzheimer's.

Today, Alzheimer's remains a leading cause of death in older adults. It exacts an emotional, physical, and financial toll on the entire family of those who are diagnosed—especially for African Americans and Latinos, who are more likely to develop dementias than any other races or ethnicities, and for individuals with Down syndrome, who are at higher risk for Alzheimer's. My Administration has taken numerous actions to help treat and prevent this terrible disease. We worked with the Congress to secure \$2.5 billion in bipartisan funding for the Advanced Research Projects Agency for Health (ARPA-H). This agency is developing critical breakthroughs in preventing, diagnosing, and treating Alzheimer's and other deadly diseases and pioneering partnerships to get those breakthroughs out to clinics and patients.

Earlier this year, the Food and Drug Administration granted the first-ever approval for a prescription drug that can alter the course of Alzheimer's in some people, rather than simply treat symptoms—a sign of hope to so many patients and families affected by this disease. In addition, I was proud to sign an Executive Order on Increasing Access to High-Quality Care and Supporting Caregivers. As a result, the Centers for Medicare and Medicaid Services (CMS) announced a groundbreaking model that will offer a comprehensive package for care management and coordination for people living with Alzheimer's and related dementias, caregiver support and education, and respite services. Meanwhile, CMS continues to offer services that help people access cognitive care assessments, ensuring that those with Alzheimer's receive the care they need. In addition, the Centers for Disease Control and Prevention is creating a uniform national public health infrastructure focused on increasing early detection and diagnosis of Alzheimer's disease and related dementias, reducing dementia risk, preventing avoidable hospitalizations, and supporting caregivers of those living with dementia.

This November, let us honor the memory of those we have tragically lost to Alzheimer's. Let us recognize the millions of Americans who are living with the impact of this condition every day and all the incredible caregivers, doctors, researchers, and advocates supporting them. Let us come together as a Nation; carry forward a spirit of hope; and recommit to doing everything we can to prevent, treat, and eliminate this disease.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim November 2023 as National Alzheimer's Disease Awareness Month. I call on the people

of the United States of America to honor and support those living with Alzheimer's and the many people who continue extraordinary and tireless efforts to combat this disorder. I encourage all Americans to visit www.Alzheimers.gov for evidence-based resources and information.

IN WITNESS WHEREOF, I have hereunto set my hand this thirty-first day of October, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-eighth.

A handwritten signature in black ink, appearing to read "Joe Biden", with a long, sweeping horizontal line extending to the left.

Proclamation 10663 of October 31, 2023

National Diabetes Month, 2023

By the President of the United States of America

A Proclamation

One in ten Americans has diabetes, and of that group, one in five of them do not know that they do. While this chronic condition is becoming more common, there is so much that we can do to help prevent and manage it. During National Diabetes Month, we recommit as a Nation to making treatment more affordable, improving care, and finally finding a cure.

Every day, millions of Americans with diabetes struggle to afford life-saving insulin. It costs drug companies just \$10 a vial to produce, but some charge more than 30 times that amount. Americans across the country have told me how those high prices sometimes force them to ration their medication, too often resulting in dangerous health complications that could have been avoided. Too many of them know what it is like to lay awake at night, staring at the ceiling, wondering how to choose between putting food on the table and buying the insulin they need to stay alive. It is wrong.

I ran for President to rebuild the middle class—and that includes working to make health care a right in this country, not a privilege. For decades, big pharmaceutical companies have blocked efforts to lower prescription drug costs, but together, we took them on and won. Last year, I signed the Inflation Reduction Act, one of the most significant laws ever passed to reduce prescription drug prices, capping insulin at \$35 per month for seniors on Medicare, down from as much as \$400 per month. The Inflation Reduction Act finally gave Medicare the ability to negotiate for lower drug prices, starting this year with ten drugs—including treatments for diabetes—benefiting more than nine million Americans. The law also requires drug companies that raise prices faster than inflation to pay the difference back to the Government, saving seniors up to \$618 per dose of medication. Seniors and other Part D enrollees with high drug spending will have their out-of-pocket drug costs capped at about \$3,500 next year. In 2025, the Inflation Reduction Act will cap total out-of-pocket drug costs for all seniors on Medicare at \$2,000 per year, period. There is more to do, but these steps will put money back in the pockets of millions of families, easing fears and giving them just a little more breathing room.

While we keep working to make diabetes medications more affordable, my Administration is also focused on prevention, early interventions, improving treatments, and finding a cure. Today, one in three American adults has prediabetes, with a risk of developing Type 2 diabetes within 5 years. Diabetes has serious consequences. It is a leading cause of death in the United States, and once diagnosed, increases one's risk of heart attack, stroke, blindness, kidney failure, and loss of toes, feet, or legs. It is important to be aware of diabetes risk factors, many of which relate to nutrition and physical activity deficits. To learn more about risk factors and how to combat prediabetes, visit the Centers for Disease Control and Prevention National Diabetes Prevention Program: <https://www.cdc.gov/diabetes/prevention/index.html>.

Last year, we launched the Advanced Research Project Agency for Health (ARPA-H) to drive breakthroughs in preventing, detecting, and treating deadly diseases, including diabetes. Research advances have already helped develop several new diabetes drugs, including the first that can delay the onset of Type 1 diabetes, giving recently diagnosed people more time before starting insulin. This year, the Food and Drug Administration also approved the first cell therapy for adults with Type 1 diabetes who cannot safely manage their glucose levels with insulin as well as the first new oral medication for children with Type 2 diabetes in over two decades. We remain committed to robust research investment and to providing pathways to drive the development and delivery of additional, effective treatments and much-needed cures.

At the same time, we have expanded health coverage nationwide and lowered health care costs for millions of Americans, including the nearly 15 million Americans who buy their coverage under the Affordable Care Act and are saving \$800 per year on their premiums. We are also cracking down on surprise medical bills and junk health insurance plans that look affordable but then stick consumers with big hidden costs. Last year, we held the first White House Conference on Hunger, Nutrition, and Health in over 50 years where we convened advocates, health care providers, food companies, and officials from every level of government. We have laid out a vision to prevent and reduce the pervasiveness of diet-related disease, like diabetes, across the United States by 2030, outlining a comprehensive strategy to end hunger and put healthy food on the table. Our plan incorporates steps to better prevent and manage diabetes, including by expanding access to nutrition counseling and working with the Congress to make the Medicare Diabetes Prevention Program permanent.

We want all 37 million Americans with diabetes to know that we have their backs and that the historic progress we have made to lower insulin prices is just the first step. This month, we celebrate the courage and resilience of this community; and we honor the medical professionals, loved ones, and advocates who do so much to help support it and keep driving us toward a cure.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim the month of November 2023 as National Diabetes Month. I call upon all Americans, school systems, government agencies, nonprofit organizations, health care providers, research institutions, and other interested groups to join in activities that raise diabetes awareness and help prevent, treat, and manage this disease.

IN WITNESS WHEREOF, I have hereunto set my hand this thirty-first day of October, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-eighth.

A handwritten signature in black ink, appearing to read "Joe Biden", with a long, sweeping horizontal line extending to the left.

Presidential Documents

Proclamation 10664 of October 31, 2023

National Entrepreneurship Month, 2023

By the President of the United States of America

A Proclamation

Whether they are running family restaurants or opening new factories, American entrepreneurs create businesses that are the heart and soul of our communities. This National Entrepreneurship Month, we honor the job creators, business owners, and daring innovators who remind us of the promise of the American Dream.

When I first took office, the American economy was reeling. Small businesses across the Nation were being crushed. Hundreds of thousands of storefronts were closed for good, and millions more were hanging on by a thread. But over the past few years, our economic plan has unlocked extraordinary opportunities for entrepreneurs. In my first 2 years in office, we saw a record 10.5 million new business applications—the most ever recorded in a 2-year period in American history. Asian American-, Black-, and Latino-owned businesses are seeing faster creation rates today than they have in years. The economy has created nearly 14 million new jobs. Our entrepreneurs form the backbone of our Nation's economy, and I remain committed to making sure they have the resources they need to succeed.

As my Administration implements historic legislation that is transforming our economy, we are working to ensure entrepreneurs reap the benefits. My Administration is leveraging American Rescue Plan funds to provide billions of dollars of capital and technical support to small businesses across the country so they can start and scale their businesses in high-growth, high-wage industries. We are also investing in small disadvantaged businesses to provide fair opportunities to entrepreneurs from underserved and underrepresented communities who have historically been left behind, including through the Minority Business Development Agency, which was made permanent through the Bipartisan Infrastructure Law. Last year, the Federal Government awarded a record \$162.9 billion in contracts to small businesses, and \$69.9 billion of that investment went to small disadvantaged businesses. In addition, the Small Business Administration has supported over \$4 billion in loans to Black-owned and Latino-owned small businesses, marking significant increases from 2020. Through the CHIPS and Science Act, we are making strategic, localized investments to drive technology- and innovation-centric growth and create good jobs for American workers from all backgrounds. The Inflation Reduction Act is cutting health insurance and energy costs for entrepreneurs, doubling research-and-development tax credits for small businesses, and incentivizing manufacturers to use American suppliers.

Our entrepreneurs are models of drive, resilience, and determination—the very virtues that built America. From small towns to big cities, these dreamers and doers are the glue that holds our communities together and the fuel that propels our Nation forward. As President, I recognize the critical contributions that our Nation's entrepreneurs make, and I remain committed to giving them the support they need to thrive.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim November 2023

as National Entrepreneurship Month. I call upon all Americans to commemorate this month with appropriate programs and activities and to celebrate November 21, 2023, as National Entrepreneurs' Day.

IN WITNESS WHEREOF, I have hereunto set my hand this thirty-first day of October, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-eighth.

A handwritten signature in black ink, appearing to read "Joe Biden", is written over a horizontal line.

Proclamation 10665 of October 31, 2023

National Family Caregivers Month, 2023

By the President of the United States of America

A Proclamation

How we treat our children, parents, and loved ones and how we value those who care for them are fundamental to who we are as a Nation. Early care and education give young children a strong start in life while long-term care helps older Americans, veterans, and people with disabilities live and work with dignity. During National Family Caregivers Month, we honor the Americans who lift up our communities and our Nation by providing dignified, professional, and invaluable care to the people we cherish the most.

The cost of care in this country is too high, and the pay for care workers is too low. A majority of Americans struggle to find affordable, high-quality care for themselves and their loved ones. At the same time, care workers remain among the lowest-paid workers in the country, though their jobs are some of the most demanding. More than half of long-term care employees and nearly 20 percent of child care workers leave their jobs every year. As a result, many Americans are forced to leave their own jobs behind to care for their loved ones.

No one should have to choose between the parents who raised them, the loved ones who depend on them, or the paycheck they rely on to care for their families. That is why as soon as I got into office, I signed the American Rescue Plan to help millions of families afford child care. Through that law, we provided \$145 million to help the National Family Caregiver Support Program deliver counseling, training, and short-term relief to family caregivers and other informal care providers. We also helped States expand and strengthen Medicaid home care programs, increased Child Care and Development Block Grants that help low-income families afford child care, and provided crucial support to stabilize the child care sector more broadly. Consequently, we were able to keep the doors of 220,000 child care providers open during the pandemic, ensuring nearly 10 million children received care.

Last year, we also issued the first-ever national Strategy to Support Family Caregivers, outlining hundreds of actions that the Federal Government can take to support family caregivers' health, well-being, and financial security. We required companies seeking significant Federal funding from our CHIPS and Science Act to submit a plan on how they will help employees access affordable child care. Further, my Administration proposed a rule that would set a Federal floor for staffing levels in nursing homes. This spring, joined by people with disabilities, family caregivers, long-term care workers, early educators, veterans, and aging advocates, I signed a historic Executive Order that calls for the most comprehensive set of actions of any administration to date to increase access to high-quality child care and long-term care and support for caregivers. The order improves access to home-based care for people with disabilities and veterans, expands access to mental health benefits to care workers and veteran family caregivers, lowers child care costs for hard-working families, builds the supply of high-quality care to provide more options to individuals and families, helps protect workers from exploitation, and much more.

This week, we recognize the love and sacrifice of millions of American caregivers. They are the backbone of our country, caring for young children, aging parents, disabled veterans, injured service members, and others who need support and medical assistance. Let us celebrate and honor our caregivers and renew our efforts to protect their dignity, health, and security. Because when we care for our caregivers, we honor our American ideals and move closer to a future where no one in this Nation is left behind.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim November 2023 as National Family Caregivers Month. I encourage all Americans to reach out to those who provide care for our Nation's family members, friends, and neighbors in need to honor and thank them.

IN WITNESS WHEREOF, I have hereunto set my hand this thirty-first day of October, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-eighth.

A handwritten signature in black ink, appearing to read "Joe Biden", with a long, sweeping horizontal line extending to the left.

Presidential Documents

Proclamation 10666 of October 31, 2023

National Lung Cancer Awareness Month, 2023

By the President of the United States of America

A Proclamation

This year, nearly 250,000 Americans will be diagnosed with lung cancer, the leading cause of cancer death in the United States. During National Lung Cancer Awareness Month, we honor the resilient people who have faced this diagnosis, the loved ones who rally to their side, and the medical professionals who do all they can to help patients survive and heal. We recommit to ending cancer as we know it by investing in new, affordable ways to prevent, detect, and treat this deadly disease.

In recent years, improved treatments, as well as enhanced early detection, have brought us closer toward turning cancer diagnoses from death sentences into treatable diseases. However, challenges persist for patients and their families. It can be challenging to determine the best course of treatment. The treatment itself can be grueling. Medical bills can pile up. For some, progress is still too slow. This includes Black men, who are disproportionately likely to develop and die from lung cancer; people living in rural communities, where mortality rates remain stubbornly high; and women under 50 years old, who are diagnosed with lung cancer at higher rates than men of the same age.

As a Nation, we must come together to change that. That is why the First Lady and I reignited the Cancer Moonshot, setting ambitious goals to cut the cancer death rate by at least half in the next 25 years and improve the experience of patients and families. As a first step, my Administration secured \$2.5 billion in funding for the Advanced Research Projects Agency for Health (ARPA-H). The scientists, innovators, and public health professionals funded by ARPA-H are driving breakthroughs in preventing, detecting, and treating cancer and other deadly diseases. Throughout our history, the United States has led the world in scientific innovation and discovery. We will continue to do so on our way to ending cancer as we know it.

My Administration is also investing in screening and early detection—services that are critical to diagnosing lung cancer in its beginning stages and saving lives. The Centers for Disease Control and Prevention—along with other agencies, community health centers, and partners in the private sector—is providing early detection knowledge and support services to underserved communities. We remain committed to increasing lung cancer screening rates for those most at risk and encourage everyone to talk to their doctor about symptoms.

There are additional steps each of us can take to reduce the impact of lung cancer in our own lives. For many, that starts with quitting smoking, the number one cause of lung cancer and the single-largest driver of cancer deaths in America. This year, our White House Smoking Cessation Forum brought together public health workers, health care providers, people living with cancer and their caregivers, and others to expand access to programs that help people who want to quit and ensure that these programs are accessible to everyone. Last year, the Food and Drug Administration proposed rules to prohibit menthol cigarettes and flavored cigars to help adults who are trying to quit smoking and to prevent children from becoming the

next generation of smokers. Help is available to those who want to quit smoking at www.BeTobaccoFree.gov or www.smokefree.gov or by calling 877-44U-QUIT.

Additionally, my Administration has taken significant steps to make cancer treatments affordable for everyone. Through the Inflation Reduction Act, out-of-pocket drug costs for seniors on Medicare will soon be capped at \$2,000 per year—including expensive cancer drugs that sometimes cost several times that. We strengthened Medicaid and the Affordable Care Act (ACA), expanding health care coverage for millions of Americans and helping nearly 15 million people save an average of \$800 per year on health insurance premiums. I remain committed to maintaining the accessibility of cancer care secured in the ACA, including requiring insurers to pay for cancer screenings and primary care visits and covering cancer survivors and others who have preexisting conditions. I signed the PACT Act into law—one of the most significant laws ever to help veterans exposed to toxic materials, some of whom develop lung cancer and other diseases. This law expands access to benefits and services to veterans, ensuring they have access to health care, free screenings, and benefits through the Department of Veterans Affairs. The law also provides access to survivor benefits for families of veterans who died due to a toxic-related illness. I was also proud to sign the Federal Firefighters Fairness Act, giving more than 10,000 firefighters and their families critical workers' compensation and other benefits by making sure certain kinds of heart problems, lung disease, and cancers are presumed to be caused by the job.

Cancer has touched nearly every family in America—including mine. During National Lung Cancer Awareness Month, the First Lady and I have one message to the Nation: There is hope. We see it in the extraordinary courage and strength of all who are facing this deadly disease and in the families and loved ones who support them. We see it in the researchers who are chasing new breakthroughs and the health care workers who care for their patients with compassion and skill. This month and every month, we must seize the urgency of this moment to find better solutions, treatments, and cures and to unite as one Nation to end cancer as we know it.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim November 2023 as National Lung Cancer Awareness Month. I call upon the people of the United States to speak with their doctors and health care providers to learn more about lung cancer. I encourage citizens, government agencies, private businesses, nonprofit organizations, the media, and other interested groups to increase awareness about what Americans can do to prevent, detect, and treat lung cancer.

IN WITNESS WHEREOF, I have hereunto set my hand this thirty-first day of October, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-eighth.

A handwritten signature in black ink, appearing to read "Joe Biden", is written over a diagonal line that extends from the bottom left towards the top right.

Presidential Documents

Proclamation 10667 of October 31, 2023

National Native American Heritage Month, 2023

By the President of the United States of America

A Proclamation

During National Native American Heritage Month, we recognize the invaluable contributions of Native peoples that have shaped our country and honor the hundreds of Tribal Nations who continue exercising their inherent sovereignty as vital members of the overlapping system of governments in the United States. We also recommit to supporting Tribal sovereignty; upholding the Federal Government's solemn trust and treaty responsibilities; and working in partnership with Tribal Nations to advance prosperity, dignity, and safety for all Native peoples.

Since time immemorial, Native communities have passed down rich cultures, knowledge, traditions, and ways of life. But throughout our history, Native peoples' cultures, identities, and governments were not always seen as a part of this Nation but as a threat to it. Native people were pressured to assimilate, banned from practicing their traditions and sacred ceremonies, and forced from their homes and ancestral homelands. This violence and devastation cost countless lives, tore families apart, and caused lasting damage to Tribal communities and institutions.

Despite centuries of violence and oppression, Native peoples remain resilient and proud. Today, Native Americans are essential to the fabric of the United States. They serve in the United States Armed Forces at higher rates than any other ethnic group. They continue to steward so many of our great lands. Their contributions to science, humanities, arts, public service, and more have brought prosperity for all of us. Their diverse cultures and communities continue to thrive and lead us forward.

Since the beginning of my Administration, I have been determined to help champion a new and better chapter in the story of our Nation-to-Nation relationships. I started by appointing Native Americans to lead in my Administration—including the first Native American Secretary of the Interior Deb Haaland, dozens of Senate-confirmed Native American officials, and over 80 Native American appointees serving across my Administration and in the Federal courts. I restored the annual White House Tribal Nations Summit to advance communication between key members of my Administration and the leaders of hundreds of Tribal Nations. My Administration formally recognized Indigenous Knowledge as one of the many important bodies of knowledge that contributes to the scientific, technical, social, and economic advancements of the United States and our collective understanding of the natural world.

Together with leadership from Tribal Nations, we are making historic investments in Indian Country. Our American Rescue Plan invested \$32 billion in Tribal Nations—the largest one-time direct investment in Indian Country in American history. Our Bipartisan Infrastructure Law invested more than \$13 billion to rebuild infrastructure, the single largest investment in Indian Country infrastructure in history. Our Inflation Reduction Act also made the largest investment ever to combat the existential threat of climate change, including \$700 million dedicated to climate change response in Native communities. Last year, I signed a Presidential Memorandum that improves consultation between the Federal Government and Tribal Nations.

My Administration is also working to address the impacts of harmful Federal policies of the past while ensuring Native communities are safe and healthy. Through the Department of the Interior's Road to Healing initiative, Native language preservation, public safety initiatives, and bold new investments, we are supporting Native American families and their communities as they heal. We are also working to improve public health and safety for Native Americans. I signed an Executive Order that helps us respond more effectively to the epidemic of missing and murdered Indigenous peoples. Last year, when we reauthorized the Violence Against Women Act, I was proud to include historic provisions that reaffirm Tribal sovereignty and restore Tribal jurisdiction. My budget for Fiscal Year 2024 also requested a \$9.1 billion infusion for the Indian Health Service, and I have asked the Congress to make that funding a mandatory part of the Federal budget for the first time in our history.

We are also committed to partnering with Tribal Nations to protect and steward their sacred and ancestral lands and waters. Through Tribal co-stewardship agreements, we work directly with Tribal Nations to make decisions about how to manage those lands that are most precious to them—recognizing and utilizing the invaluable knowledge they have from countless generations. I established new national monuments protecting lands sacred to Tribal Nations at Baaj Nwaavjo I'tah Kukveni in Arizona, the Camp Hale-Continental Divide in Colorado, and Avi Kwa Ame in Nevada. I also restored protections for the Northeast Canyons and Seamounts Marine National Monument in New England and Bears Ears and Grand Staircase-Escalante in Utah.

This month, we celebrate Native American history and culture. We are reminded that with hard work and a commitment to our founding ideals, we can address the wrongs of our past and become a more perfect Union—one that ensures liberty, justice, dignity, and equality for all.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim November 2023 as National Native American Heritage Month. I urge all Americans, as well as their elected representatives at the Federal, State, and local levels, to observe this month with appropriate programs, ceremonies, and activities. Also, I urge all Americans to celebrate November 24, 2023, as Native American Heritage Day.

IN WITNESS WHEREOF, I have hereunto set my hand this thirty-first day of October, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-eighth.

A handwritten signature in black ink, appearing to read "Joe Biden", is written over a diagonal line that extends from the bottom left towards the top right.

Presidential Documents

Proclamation 10668 of October 31, 2023

National Veterans and Military Families Month, 2023

By the President of the United States of America

A Proclamation

The poet John Milton once wrote, “They also serve who only stand and wait.” During National Veterans and Military Families Month, we recognize that our military and veteran families answer our Nation’s call to duty, and we recommit to doing right by their service and sacrifice.

For me, the First Lady, and the entire Biden family: It is personal. When our son Beau was deployed to Iraq, we learned what it meant to pray every day for the safe return of someone you love. Our grandkids learned what it meant to have their dad overseas in a warzone instead of at home, tucking them into bed and reading them a story every night. Millions of Americans have had that experience. To all the mothers and fathers, sisters and brothers, sons and daughters, spouses and partners, and loved ones who stand alongside our veterans and service members: You are the solid steel spine that bears up under every burden and the courageous heart that rises to every challenge.

Our Nation has only one truly sacred obligation—to prepare those we send into harm’s way and care for them and their families while they are deployed and when they return home. Since the beginning of my Administration, fulfilling that obligation has been my top priority. In June, I signed an Executive Order that establishes the most comprehensive set of administrative actions in our Nation’s history to support the economic security of military and veteran spouses, caregivers, and survivors. It encourages all Federal agencies to do more to retain military spouses through flexible policies, improves the ability for spouses to maintain their employment when moving overseas, allows spouses to seek advice on overseas employment issues through military legal assistance offices for the first time, and improves spouses’ access to quality, dependable, and affordable child care.

Since the beginning of my Administration, I have signed more than 30 bipartisan bills to expand the services and benefits that support our veterans and their families, caregivers, and survivors—including the Sergeant First Class Heath Robinson Honoring our Promise to Address Comprehensive Toxics (PACT) Act, the most significant expansion of benefits and services for toxin exposed veterans and survivors in over 30 years. We released a national strategy to reduce military and veteran suicide by tackling some of the root causes of this crisis—like addressing financial insecurity by expanding job training opportunities for transitioning service members and veterans and their spouses and increasing funding to prevent and eliminate homelessness. Further, I signed an Executive Order that implemented historic, bipartisan military justice reforms to transform how the military handles sexual assault and domestic violence cases in order to make our military safer and more just. Earlier this year, I directed the Department of Defense to review pay and benefits for our military members, because our Armed Forces and their families deserve a 21st century compensation system that reflects their service and sacrifice. Additionally, the First Lady’s Joining

Forces initiative is providing support to military and veteran families, caregivers, and survivors by improving economic opportunity for military families, making school transitions easier for military children, and expanding resources to promote health and well-being for this community.

Our fighting force is the greatest in the world—in no small part because, year after year and decade after decade, military and veteran families have had their loved ones' backs. As a country, we owe it to these families to have their backs. This year—as we celebrate 50 years of an all-volunteer force—may we also recognize the bravery and dedication of our military and veteran families and work to repay the debt of gratitude we owe each one of them.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim November 2023 as National Veterans and Military Families Month. I call upon the people of the United States to honor veterans and military families with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this thirty-first day of October, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-eighth.

A handwritten signature in black ink, appearing to read "Joe Biden", with a long, sweeping horizontal line extending to the left.

Notice of November 1, 2023

Continuation of the National Emergency With Respect to the Proliferation of Weapons of Mass Destruction

On November 14, 1994, by Executive Order 12938, the President declared a national emergency with respect to the unusual and extraordinary threat to the national security, foreign policy, and economy of the United States posed by the proliferation of nuclear, biological, and chemical weapons (weapons of mass destruction) and the means of delivering such weapons. On July 28, 1998, by Executive Order 13094, the President amended Executive Order 12938 to respond more effectively to the worldwide threat of weapons of mass destruction proliferation activities. On June 28, 2005, by Executive Order 13382, the President, among other things, further amended Executive Order 12938 to improve our ability to combat proliferation. The proliferation of weapons of mass destruction and the means of delivering them continues to pose an unusual and extraordinary threat to the national security, foreign policy, and economy of the United States. For this reason, the national emergency declared in Executive Order 12938 of November 14, 1994, with respect to the proliferation of weapons of mass destruction and the means of delivering such weapons must continue beyond November 14, 2023. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing for 1 year the national emergency declared in Executive Order 12938, as amended.

This notice shall be published in the *Federal Register* and transmitted to the Congress.

THE WHITE HOUSE,
November 1, 2023.

Rules and Regulations

Federal Register

Vol. 88, No. 212

Friday, November 3, 2023

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–2142; Project Identifier MCAI–2023–01056–T; Amendment 39–22592; AD 2023–22–08]

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2023–04–12, which applied to all Airbus SAS Model A350–941 and –1041 airplanes. AD 2023–04–12 required repetitive detailed inspections of affected cargo sealing tapes and applicable corrective actions. Since the FAA issued AD 2023–04–12, additional locations have been identified that are subject to the unsafe condition. This AD retains the requirements of AD 2023–04–12 and expands the inspection area, as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective November 20, 2023.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of November 20, 2023.

The FAA must receive comments on this AD by December 18, 2023.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to [regulations.gov](https://www.regulations.gov). Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2023–2142; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For EASA material incorporated by reference in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email ADs@easa.europa.eu; website easa.europa.eu. You may find this material on the EASA website at ad.easa.europa.eu.

- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2023–2142.

FOR FURTHER INFORMATION CONTACT: Dat Le, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7317; email Dat.V.Le@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written data, views, or arguments about this final rule. Send your comments to an address listed under **ADDRESSES**. Include “Docket No. FAA–2023–2142; Project Identifier MCAI–2023–01056–T” at the beginning of your comments. The most helpful comments reference a specific portion of the final rule, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this final rule because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to [regulations.gov](https://www.regulations.gov), including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this final rule.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this AD contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this AD, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this AD. Submissions containing CBI should be sent to Dat Le, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7317; email Dat.V.Le@faa.gov. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2023–04–12, Amendment 39–22359 (88 FR 12143, February 27, 2023) (AD 2023–04–12), for all Airbus SAS Model A350–941 and –1041 airplanes. AD 2023–04–12 was prompted by an MCAI originated by EASA, which is the Technical Agent for the Member States of the European Union. EASA issued AD 2023–0011, dated January 17, 2023 (EASA AD 2023–0011), to correct an unsafe condition.

EASA AD 2023–0011 stated that longitudinal sealing tape in the forward and aft cargo compartments had migrated from its original position, possibly due to relative movement between the cargo floor panels and the cargo loading system, combined with compression of the tape.

AD 2023–04–12 required repetitive detailed inspection of the affected parts (*i.e.*, cargo sealing tapes installed between the cargo floor panels and the cargo loading system in longitudinal direction, in the forward and aft cargo compartment area), and, depending on findings, accomplishment of applicable corrective action. The FAA issued AD 2023–04–12 to address migration of the tape, which can affect the tightness of the cargo compartment floor panels that provide an enclosed area to maintain halon concentration in the event of a fire. This condition, if not addressed, could affect the fire extinguishing system efficiency in the cargo compartments, possibly resulting in failure of the system to contain a cargo compartment fire or permanently extinguish a fire.

Actions Since AD 2023–04–12 Was Issued

Since the FAA issued AD 2023–04–12, EASA issued AD 2023–0011R1, dated February 23, 2023 (EASA AD 2023–0011R1) to provide dispatch instructions under the Master Minimum Equipment List. EASA subsequently superseded EASA AD 2023–0011R1 and issued EASA AD 2023–0176, dated October 6, 2023 (EASA AD 2023–0176) (also referred to as the MCAI), to correct an unsafe condition for all Airbus SAS Model A350–941 and –1041 airplanes. The MCAI states that additional parts (cargo sealing tapes installed between the cargo floor panels and the floor structure in transversal direction in the bulk cargo compartment area at frame 82) have been identified as affected by the same potential unsafe condition.

The FAA is issuing this AD to address the unsafe condition on these products. You may examine the MCAI in the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2023–2142.

Explanation of Retained Requirements

Although this AD does not explicitly restate the requirements of AD 2023–04–12, this AD retains all of the requirements of AD 2023–04–12. Those requirements are referenced in EASA AD 2023–0176, which, in turn, is referenced in paragraph (g) of this AD.

Related Service Information Under 1 CFR Part 51

EASA AD 2023–0176 specifies procedures for the following actions:

- Repetitive detailed inspections to detect complete or partial migration of the cargo sealing tapes (including high speed tape and glass cloth tape) and existing repairs of affected parts (*i.e.*, cargo sealing tapes installed between the cargo floor panels and the cargo

loading system in longitudinal direction, in the forward and aft cargo compartment area; and cargo sealing tapes installed between the cargo floor panels and the floor structure in transversal direction, in the bulk cargo compartment area at frame 82).

- Measurement of the maximum migration of partially migrated tape.
- Inspection for incorrect seating or sealant of repaired tape.
- Repair of discrepancies, including cargo sealing tape that has migrated more than 11 millimeters, complete migration of the tape, incorrect seating/condition of the tape in repaired areas, and incorrect sealant condition in repaired areas.

EASA AD 2023–0176 allows deferral of corrective actions through dispatch of the airplane under specified Airbus A350 Master Minimum Equipment List items.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA’s Determination

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this AD after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Requirements of This AD

This AD requires accomplishing the actions specified in EASA AD 2023–0176 described previously, except for any differences identified as exceptions in the regulatory text of this AD.

Explanation of Required Compliance Information

In the FAA’s ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, EASA AD 2023–0176 is incorporated by reference in this AD. This AD requires compliance with EASA AD 2023–0176 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this AD. Using

common terms that are the same as the heading of a particular section in EASA AD 2023–0176 does not mean that operators need comply only with that section. For example, where the AD requirement refers to “all required actions and compliance times,” compliance with this AD requirement is not limited to the section titled “Required Action(s) and Compliance Time(s)” in EASA AD 2023–0176. Service information required by EASA AD 2023–0176 for compliance will be available at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2023–2142 after this AD is published.

Interim Action

The FAA considers that this AD is an interim action. If final action is later identified, the FAA might consider further rulemaking then.

FAA’s Justification and Determination of the Effective Date

Section 553(b)(3)(B) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*) authorizes agencies to dispense with notice and comment procedures for rules when the agency, for “good cause,” finds that those procedures are “impracticable, unnecessary, or contrary to the public interest.” Under this section, an agency, upon finding good cause, may issue a final rule without providing notice and seeking comment prior to issuance. Further, section 553(d) of the APA authorizes agencies to make rules effective in less than thirty days, upon a finding of good cause.

An unsafe condition exists that requires the immediate adoption of this AD without providing an opportunity for public comments prior to adoption. The FAA has found that the risk to the flying public justifies forgoing notice and comment prior to adoption of this rule because migration of the sealing tape can affect the tightness of the cargo compartment floor panels, which provide an enclosed area to maintain halon concentration in the event of a fire. Migration of the sealing tape in the forward and aft cargo compartments could affect the fire extinguishing system efficiency in the cargo compartments and possibly result in failure of the system to contain a cargo compartment fire or permanently extinguish the fire. The additional affected locations in the bulk cargo compartment further increase the effect on the fire extinguishing system efficiency by widening the area in which a halon concentration could perpetuate due to migration of the sealing tape and increasing the likelihood of a failure to contain a cargo

compartment fire or permanently extinguish the fire. Accordingly, notice and opportunity for prior public comment are impracticable and contrary to the public interest pursuant to 5 U.S.C. 553(b)(3)(B).

In addition, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment effective in

less than 30 days, for the same reasons the FAA found good cause to forgo notice and comment.

Regulatory Flexibility Act (RFA)

The requirements of the RFA do not apply when an agency finds good cause pursuant to 5 U.S.C. 553 to adopt a rule without prior notice and comment. Because the FAA has determined that it

has good cause to adopt this rule without notice and comment, RFA analysis is not required.

Costs of Compliance

The FAA estimates that this AD affects 32 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Retained actions from AD 2023-04-12	Up to 1 work-hour × \$85 per hour = \$85	\$0	Up to \$85	Up to \$2,720.
New actions	2 work-hours × \$85 per hour = \$170	0	\$170	\$5,440.

The FAA estimates the following costs to do any necessary on-condition actions that would be required based on

the results of any required actions. The FAA has no way of determining the

number of aircraft that might need these on-condition actions:

ESTIMATED COSTS OF ON-CONDITION ACTIONS

Labor cost	Parts cost	Cost per product
Up to 3 work-hours × \$85 per hour = \$255	Up to \$10	Up to \$265.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a “significant regulatory action” under Executive Order 12866, and

(2) Will not affect intrastate aviation in Alaska.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2023–04–12, Amendment 39–22359 (88 FR 12143, February 27, 2023); and

■ b. Adding the following new AD:

2023–22–08 Airbus SAS: Amendment 39–22592; Docket No. FAA–2023–2142; Project Identifier MCAI–2023–01056–T.

(a) Effective Date

This airworthiness directive (AD) is effective November 20, 2023.

(b) Affected ADs

This AD replaces AD 2023–04–12, Amendment 39–22359 (88 FR 12143, February 27, 2023) (AD 2023–04–12).

(c) Applicability

This AD applies to all Airbus SAS Model A350–941 and –1041 airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by the migration of cargo sealing tape from its original position between the cargo floor panels and the cargo loading system in the longitudinal direction in the forward and aft cargo compartment area, and between the cargo floor panels and the floor structure in the transversal direction in the bulk cargo compartment area at frame 82. The FAA is issuing this AD to address this tape migration, which can affect the tightness of the cargo compartment floor panels that provide an enclosed area to maintain halon concentration in the event of a fire. This condition, if not addressed, could affect the fire extinguishing system efficiency in the cargo compartments, possibly resulting in failure of the system to contain a cargo compartment fire or permanently extinguish a fire.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2023–0176, dated October 6, 2023 (EASA AD 2023–0176).

(h) Exceptions to EASA AD 2023–0176

(1) Where EASA AD 2023–0176 refers to “31 January 2023 [the effective date of EASA AD 2023–0011],” this AD requires replacing those words with “March 14, 2023 (the effective date of AD 2023–04–12).”

(2) Where EASA AD 2023–0176 refers to its effective date, this AD requires using the effective date of this AD.

(3) Where paragraph (2) of EASA AD 2023–0176 specifies accomplishing corrective actions if “discrepancies, as identified in the AOT” are found, for this AD, discrepancies are defined as cargo sealing tape that has migrated more than 11 millimeters, complete migration of the tape as shown in Condition B of the service information reference in EASA AD 2023–0176, incorrect seating/condition of the tape in repaired areas, and incorrect sealant condition in repaired areas.

(4) Where paragraph (2) of EASA AD 2023–0176 specifies accomplishing corrective actions “in accordance with the instructions of the AOT,” for this AD, replace those words with “in accordance with the instructions of the AOT for the FWD and AFT cargo compartment areas and in accordance with the instructions of Airbus AOT A53P016–22, Revision 03, dated September 13, 2023, or later approved revisions for the BULK cargo compartment areas.”

(5) Where the service information referenced in EASA AD 2023–0176 specifies use of cargo sealing tape 398FR, this AD also allows use of cargo sealing tape 398FRP.

(6) This AD does not adopt the “Remarks” section of EASA AD 2023–0176.

(i) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (j) of this AD. Information may be emailed to: 9-AVS-AIR-730-AMOC@faa.gov.

(i) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(ii) AMOCs approved previously for AD 2023–04–12 are approved as AMOCs for the corresponding provisions of EASA AD 2023–0176 that are required by paragraph (g) of this AD.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation

Branch, FAA; or EASA; or Airbus SAS’s EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC)*: Except as required by paragraph (i)(2) of this AD, if any service information referenced in EASA AD 2023–0176 that contains paragraphs that are labeled as RC, the instructions in RC paragraphs, including subparagraphs under an RC paragraph, must be done to comply with this AD; any paragraphs, including subparagraphs under those paragraphs, that are not identified as RC are recommended. The instructions in paragraphs, including subparagraphs under those paragraphs, not identified as RC may be deviated from using accepted methods in accordance with the operator’s maintenance or inspection program without obtaining approval of an AMOC, provided the instructions identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to instructions identified as RC require approval of an AMOC.

(j) Additional Information

For more information about this AD, contact Dat Le, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7317; email Dat.V.Le@faa.gov.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2023–0176, dated October 6, 2023.

(ii) [Reserved]

(3) For EASA AD 2023–0176, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email ADs@easa.europa.eu; website easa.europa.eu. You may find this EASA AD on the EASA website at ad.easa.europa.eu.

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. This material may be found in the AD docket at regulations.gov under Docket No. FAA–2023–2142.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit www.archives.gov/federal-register/cfr/ibr-locationsoremailfr.inspection@nara.gov.

Ross Landes,

Deputy Director for Regulatory Operations, Compliance & Airworthiness Division, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 71**

[Docket No. FAA–2023–1339; Airspace Docket No. 22–ANM–84]

RIN 2120–AA66

Establishment of Class E Airspace; Grand Coulee Dam Airport, Electric City, WA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes Class E airspace extending upward from 700 feet above the surface at Grand Coulee Dam Airport, Electric City, WA, in support of the airport’s transition from visual flight rules (VFR) to instrument flight rules (IFR) operations.

DATES: Effective date 0901 UTC, May 16, 2024. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

ADDRESSES: A copy of the Notice of Proposed Rulemaking (NPRM), all comments received, this final rule, and all background material may be viewed online at www.regulations.gov using the FAA Docket number. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year.

FAA Order JO 7400.11H, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at www.faa.gov/air_traffic/publications/. You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT:

Jeffrey Drasin, Federal Aviation Administration, Western Service Center, Operations Support Group, 2200 S. 216th Street, Des Moines, WA 98198; telephone (206) 231–2248.

SUPPLEMENTARY INFORMATION:**Authority for This Rulemaking**

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority. This rulemaking is promulgated under the authority

described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes Class E airspace to support IFR operations at Grand Coulee Dam Airport, Electric City, WA.

History

The FAA published an NPRM for Docket No. FAA–2023–1339 in the **Federal Register** (88 FR 39384; June 16, 2023), proposing to establish Class E airspace at Grand Coulee Dam Airport, Electric City, WA. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Incorporation by Reference

The Class E5 airspace designation is published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. FAA Order JO 7400.11H is publicly available as listed in the **ADDRESSES** section of this document. These amendments will be published in the next update to FAA Order JO 7400.11.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This action amends 14 CFR part 71 to establish Class E airspace Grand Coulee Dam Airport, Electric City, WA, in support of the airport's transition from VFR to IFR operations.

The airspace design—which extends from the airport reference point (ARP) 10.2 miles east and 9.7 miles southwest—would fully contain departing and missed approach IFR operations until reaching 1,200 feet above the surface on the Area Navigation (RNAV) (Global Positioning System [GPS]) Z Runway (RWY) 22 missed approach and the SINGG (RNAV) obstacle departure procedure (ODP), and arriving IFR operations below 1,500 feet above the surface on the RNAV (GPS) Y RWY 22 and RNAV (GPS) Z RWY 22 approaches.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established

body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures,” paragraph 5–6.5.a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p.389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ANM WA E5 Electric City, WA [New]
Grand Coulee Dam Airport, WA
(Lat. 47°55'19" N, long. 119°4'59" W)

That airspace extending upward from 700 feet above the surface within an area bounded by a line beginning at the airport's 063° bearing at 10.2 miles, then clockwise along the airport's 10.2-mile radius to the 99° bearing at 10.2 miles, to the 172° bearing at 4.7 miles, to the 216° bearing at 9.7 miles, then clockwise along the airport's 9.7-mile radius to the 237° bearing at 9.7 miles to the 329° bearing at 3.6 miles, thence to the point of beginning.

[Docket No. FAA–2023–0866; Airspace
Docket No. 22–AAL–51]

RIN 2120–AA66

Amendment to United States Area Navigation Route Q–46; Point Hope, AK

AGENCY: Federal Aviation
Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends United States Area Navigation (RNAV) Route Q–46 in the vicinity of Point Hope, AK. The FAA is taking this action due to the pending decommissioning of the Point Hope, AK (PHO), Non-Directional Beacon (NDB) navigational aid (NAVAID).

DATES: Effective date 0901 UTC, January 25, 2024. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

ADDRESSES: A copy of the Notice of Proposed Rulemaking (NPRM), all comments received, this final rule, and all background material may be viewed online at www.regulations.gov using the FAA Docket number. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year.

FAA Order JO 7400.11H, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at www.faa.gov/air_traffic/publications/. You may also contact the Rules and Regulations Group, Office of

Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267-8783.

FOR FURTHER INFORMATION CONTACT: Steven Roff, Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267-8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify the route structure as necessary to preserve the safe and efficient flow of air traffic within the National Airspace System (NAS).

History

The FAA published a notice of proposed rulemaking for Docket No. FAA 2023-0866 in the **Federal Register** (88 FR 21139; April 10, 2023), proposing to amend RNAV route Q-46. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Differences From the NPRM

The NPRM published in the **Federal Register** (88 FR 21139, April 10, 2023) contained a typographical error in the proposed legal description. In the proposed legal description, the longitudinal geographical coordinate listed for Barrow, AK, Very High Frequency Omnidirectional Range/Distance Measuring Equipment (VOR/DME) was incorrect. The NPRM listed the longitudinal coordinate for Barrow, AK, VOR/DME as 156°47'18.90" W. The final rule corrects this error by listing the longitudinal coordinate for Barrow, AK, VOR/DME as 156°47'17.22" W.

Incorporation by Reference

United States Area Navigation Routes are published in paragraph 2006 of FAA

Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. FAA Order JO 7400.11H is publicly available as listed in the **ADDRESSES** section of this document. These amendments will be published in the next update to FAA Order JO 7400.11.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This action amends 14 CFR part 71 by amending RNAV route Q-46 in the vicinity of Point Hope, AK due to the pending decommissioning of the Point Hope NDB. The RNAV route amendment action is described below.

Q-46: As amended, Q-46 extends between the VANTY, AK, waypoint (WP) and the Barrow, AK, VOR/DME.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This action of amending RNAV Route Q-46 in the vicinity of Point Hope, AK due to the pending decommissioning of the Point Hope NDB qualifies for categorical exclusion under the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) and its implementing regulations at 40 CFR part 1500, and in accordance with FAA Order 1050.1F, Environmental Impacts: Policies and Procedures, paragraph 5-6.5a, which categorically excludes from further environmental impact review rulemaking actions that designate or modify classes of airspace areas,

airways, routes, and reporting points (see 14 CFR part 71, Designation of Class A, B, C, D, and E Airspace Areas; Air Traffic Service Routes; and Reporting Points); and paragraph 5-6.5.i., which categorically excludes from further environmental impact review the establishment of new or revised air traffic control procedures conducted at 3,000 feet or more above ground level (AGL); procedures conducted below 3,000 feet AGL that do not cause traffic to be routinely routed over noise sensitive areas; modifications to currently approved procedures conducted below 3,000 feet AGL that do not significantly increase noise over noise sensitive areas; and increases in minimum altitudes and landing minima. As such, this action is not expected to result in any potentially significant environmental impacts. In accordance with FAA Order 1050.1F, paragraph 5-2 regarding Extraordinary Circumstances, the FAA has reviewed this action for factors and circumstances in which a normally categorically excluded action may have a significant environmental impact requiring further analysis. Accordingly, the FAA has determined that no extraordinary circumstances exist that warrant preparation of an environmental assessment or environmental impact study.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

* * * * *

Paragraph 2006 United States Area Navigation Routes.

Q-46 VANTY, AK to Barrow, AK (BRW) [Amended]

VANTY, AK	WP	(lat. 68°20'40.64" N, long. 166°48'09.96" W)
Barrow, AK (BRW)	VOR/DME	(lat. 71°16'24.34" N, long. 156°47'17.22" W)

Establishment of Class E Airspace; Tununak Airport, Tununak, AK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes Class E airspace extending upward from 700 feet above the surface at Tununak Airport, Tununak, AK, in support of the airport's transition from visual flight rules (VFR) to instrument flight rules (IFR) operations.

DATES: Effective date 0901 UTC, July 11, 2024. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11, Airspace Designations and Reporting Points, and publication of conforming amendments.

ADDRESSES: A copy of the Notice of Proposed Rulemaking (NPRM), all comments received, this final rule, and all background material may be viewed online at www.regulations.gov using the FAA Docket number. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year.

216th Street, Des Moines, WA 98198; telephone (206) 231–2248.

SUPPLEMENTARY INFORMATION:**Authority for This Rulemaking**

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code (U.S.C.). Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes Class E airspace to support IFR operations at Tununak Airport, Tununak, AK.

History

The FAA published an NPRM for Docket No. FAA–2023–1119 in the **Federal Register** (88 FR 37484; June 8, 2023), proposing to establish Class E airspace at Tununak Airport, AK. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Incorporation by Reference

The Class E5 airspace designation is published in paragraph 6005 of FAA Order JO 7400.11, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. FAA Order JO 7400.11H is publicly available as listed in the **ADDRESSES** section of this document. These amendments will be published in the next update to FAA Order JO 7400.11.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This action amends 14 CFR part 71 to establish Class E airspace at Tununak Airport, Tununak, AK, in support of the airport's transition from VFR to IFR operations.

The Class E airspace will extend upward from 700 feet above the surface

and extends 7.4 miles from the airport reference point to both the north and south with a 3.4-mile western extension. This configuration is designed to fully contain arriving IFR operations below 1,500 feet above the surface on the Area Navigation (RNAV) Global Positioning System (GPS) RWY 34 approach, RNAV (GPS) Y RWY 16 approach, and the RNAV (GPS) Z RWY 16 approach, as well as departing IFR operations until they reach 1,200 feet above the surface on the EZEPU ONE (OBSTACLE) (RNAV) departure.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "significant regulatory action" under Executive Order (E.O.) 12866; (2) is not a "significant rule" under DOT regulatory policies and procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for a categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, Environmental Impacts: Policies and Procedures, paragraph 5–6.5.a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the FAA amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p.389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR part 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

AAL AK E5 Tununak, AK [New]

Tununak Airport, AK

(Lat. 60°34'10" N, long. 165°14'47" W)

That airspace extending upward from 700 feet above the surface within a 3.4-mile radius of the airport between the 258° bearing clockwise to the 306° bearing, and within 2.5 miles east and 2.8 miles west of the 168° bearing extending from the airport to 7.4 miles south, and within 1.9 miles east and 2.3 miles west of the 348° bearing extending from the airport to 7.4 miles north.

Amendment of Multiple Air Traffic Service (ATS) Routes and Establishment of Area Navigation (RNAV) Route T–478 in the Vicinity of Danville, IL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends Jet Route J–84, United States Area Navigation (RNAV) route Q–42, and Very High Frequency Omnidirectional Range (VOR) Federal airways V–171 and V–

251, and establishes United States RNAV route T–478. The FAA is taking this action due to the planned decommissioning of the VOR portion of the Danville, IL (DNV), VOR/Tactical Air Navigation (VORTAC) navigational aid (NAVAID). The Danville VOR is being decommissioned in support of the FAA's VOR Minimum Operational Network (MON) program.

DATES: Effective date 0901 UTC, January 25, 2024. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it modifies the Air Traffic Service (ATS) route structure as necessary to preserve the safe and efficient flow of air traffic within the National Airspace System.

History

The FAA published a notice of proposed rulemaking for Docket No. FAA–2023–1026 in the **Federal Register** (88 FR 29573; May 8, 2023), proposing to amend Jet Route J–84, United States RNAV route Q–42, and VOR Federal airways V–171 and V–251, and establish United States RNAV route T–478 due to the planned decommissioning of the VOR portion of the Danville, IL, VORTAC NAVAID. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal. No comments were received.

Differences From the NPRM

Concurrent with the NPRM, the FAA published a final rule for Docket No. FAA–2022–1586 in the **Federal Register** (88 FR 31607; May 18, 2023), amending VOR Federal airway V–171 by removing the airway segment between the Grand Forks, ND, VOR/Distance Measuring Equipment (VOR/DME) and the Roseau, MN, VOR/DME. That airway amendment, effective August 10, 2023, is included in this rule.

Additionally, subsequent to the NPRM, the FAA determined the STRUK, IL, waypoint (WP) listed in the Q–42 description is not required to be included in the part 71 description of Q–42. The WP is not a beginning or end point of Q–42, is not a point where the route changes one degree or more, is not used as a holding fix, and is not required as the maximum distance allowed between NAVAIDs, fixes, or WPs is not exceeded. As such, this rule removes the STRUK, IL, WP from the Q–42 part 71 description. This is an editorial change only and does not alter the alignment of the Q–42 route.

Finally, in the NPRM, the RIVRS, IL, route point listed in the T–478 description was incorrectly referenced and listed as a Fix. The RIVRS, IL, Fix was updated in the National Airspace System Resource (NASR) database prior to publication of the NPRM and is now described as a WP. This rule corrects that error and lists the RIVRS route point as a WP. This is an editorial change only to match the FAA's NASR database information and does not alter the alignment of the T–478 route.

Incorporation by Reference

Jet Routes are published in paragraph 2004, United States RNAV Routes (Q-routes) are published in paragraph 2006, VOR Federal airways are published in paragraph 6010(a), and United States RNAV Routes (T-routes) are published in paragraph 6011 of FAA Order JO 7400.11, Airspace Designations and

Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. FAA Order JO 7400.11H is publicly available as listed in the **ADDRESSES** section of this document. This amendment action will be published in the next update to FAA Order JO 7400.11.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This action amends 14 CFR part 71 by amending Jet Route J-84, United States RNAV route Q-42, and VOR Federal airways V-171 and V-251, and establishing United States RNAV route T-478. This action is due to the planned decommissioning of the VOR portion of the Danville, IL, VORTAC. The ATS route actions are described below.

J-84: Prior to this final rule, J-84 extended between the Oakland, CA, VOR/DME and the Sidney, NE, VOR/DME; and between the Dubuque, IA, VORTAC and the Danville, IL, VORTAC. The route segment between the Northbrook, IL, VOR/DME and the Danville, IL, VORTAC is removed. As amended, the route now extends between the Oakland VOR/DME and the Sidney VOR/DME and between the Dubuque VORTAC and the Northbrook VOR/DME.

Q-42: Prior to this final rule, Q-42 extended between the Kirksville, MO, VORTAC and the ZIMMZ, PA, Fix. The Kirksville VORTAC route point is replaced with the LEWRP, MO, WP; the Danville, IL, VORTAC route point is replaced with the LCOLN, IL, WP; and the Muncie, IN, VOR/DME route point is replaced with the SNKPT, IN, WP. Editorial corrections are made to the state abbreviation and the type of route point for the ZIMMZ Fix to match the NASR database information. As amended, the route now extends between the LEWRP WP and the ZIMMZ Fix.

V-171: Prior to this final rule, V-171 extended between the Lexington, KY, VOR/DME and the Joliet, IL, VOR/DME; and between the Nodine, MN, VORTAC and the Grand Forks, ND, VOR/DME. The airway segment between the Terre Haute, IN, VORTAC and the Peotone, IL, VORTAC is removed. As amended, the airway now extends between the Lexington VOR/DME and the Terre Haute VORTAC, between the Peotone VORTAC and the Joliet VOR/DME, and between the Nodine VORTAC and the Grand Forks VOR/DME.

V-251: Prior to this final rule, V-251 extended between the Adders, IL, VORTAC and the Boiler, IN, VORTAC. The airway segment between the Champaign, IL, VORTAC and the Boiler, IN, VORTAC is removed. As amended, the airway now extends between the Adders VORTAC and the Champaign VORTAC.

T-478: T-478 is a new RNAV route established between the RIVRS, MO, WP located northeast of Bolling Green, MO, and the BOLRR, IN, WP located near the Boiler, IN, VORTAC. This new T-route mitigates the removal of the V-251 airway segment addressed above between the Champaign, IL, VORTAC and the Lafayette, IN, area to mitigate the removal of the V-251 airway segment addressed above and provides non-radar routing between the RIVRS WP and the Champaign VORTAC, when needed.

All NAVAID radials listed in the VOR Federal airway V-171 description below are unchanged and stated in degrees True north.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action of amending Jet Route J-84, United States RNAV route Q-42, and VOR Federal airways V-171 and V-251, and establishes United States RNAV route T-478, due to the planned decommissioning of the VOR portion of the Danville, IL, VOR/DME NAVAID, qualifies for categorical exclusion under the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) and its implementing regulations at 40 CFR part 1500, and in accordance with FAA Order 1050.1F, Environmental Impacts: Policies and Procedures, paragraph 5-6.5a, which categorically excludes from further environmental impact review

rulemaking actions that designate or modify classes of airspace areas, airways, routes, and reporting points (see 14 CFR part 71, Designation of Class A, B, C, D, and E Airspace Areas; Air Traffic Service Routes; and Reporting Points); and paragraph 5-6.5i, which categorically excludes from further environmental impact review the establishment of new or revised air traffic control procedures conducted at 3,000 feet or more above ground level (AGL); procedures conducted below 3,000 feet AGL that do not cause traffic to be routinely routed over noise sensitive areas; modifications to currently approved procedures conducted below 3,000 feet AGL that do not significantly increase noise over noise sensitive areas; and increases in minimum altitudes and landing minima. As such, this action is not expected to result in any potentially significant environmental impacts. In accordance with FAA Order 1050.1F, paragraph 5-2 regarding Extraordinary Circumstances, the FAA has reviewed this action for factors and circumstances in which a normally categorically excluded action may have a significant environmental impact requiring further analysis. The FAA has determined that no extraordinary circumstances exist that warrant preparation of an environmental assessment or environmental impact study.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 2004 Jet Routes.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 71**

[Docket No. FAA-2023-1014; **Airspace**
Docket No. 23-ACE-2]

RIN 2120-AA66

**Amendment of VOR Federal Airways
V-14 and V-67, and Area Navigation
Route T-272; Vandalia, IL**

AGENCY: Federal Aviation
Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends Very High Frequency Omnidirectional Range (VOR) Federal airways V-14 and V-67, and United States Area Navigation (RNAV) route T-272. The FAA is taking this action due to the planned decommissioning of the VOR portion of the Vandalia, IL (VLA), VOR/Distance

Measuring Equipment (VOR/DME) navigational aid (NAVAID). The Vandalia VOR is being decommissioned in support of the FAA's VOR Minimum Operational Network (MON) program.

DATES: Effective date 0901 UTC, January 25, 2024. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

ADDRESSES: A copy of the Notice of Proposed Rulemaking (NPRM), all comments received, this final rule, and all background material may be viewed online at www.regulations.gov using the FAA Docket number. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year.

FAA Order JO 7400.11H, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at www.faa.gov/air_traffic/publications/. You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation

Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267-8783.

FOR FURTHER INFORMATION CONTACT: Colby Abbott, Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800

Independence Avenue SW, Washington, DC 20591; telephone: (202) 267-8783.

SUPPLEMENTARY INFORMATION:**Authority for This Rulemaking**

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it modifies the Air Traffic Service (ATS) route structure as necessary to preserve the safe and efficient flow of air traffic within the National Airspace System.

History

The FAA published a notice of proposed rulemaking for Docket No. FAA-2023-1014 in the **Federal Register** (88 FR 29580; May 8, 2023), proposing to amend VOR Federal airways V-14 and V-67, and United States RNAV route T-272 due to the planned

decommissioning of the VOR portion of the Vandalia, IL, VOR/DME NAVAID. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal. No comments were received.

Incorporation by Reference

VOR Federal airways are published in paragraph 6010(a) and United States Area Navigation Routes (T-routes) are published in paragraph 6011 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. FAA Order JO 7400.11H is publicly available as listed in the **ADDRESSES** section of this document. This amendment action will be published in the next update to FAA Order JO 7400.11.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This action amends 14 CFR part 71 by amending VOR Federal airways V-14 and V-67, and United States RNAV route T-272 due to the planned decommissioning of the VOR portion of the Vandalia, IL, VOR/DME. The Air Traffic Service (ATS) route actions are described below.

V-14: Prior to this final rule, V-14 extended between the Chisum, NM, VOR/Tactical Air Navigation (VORTAC) and the Tulsa, OK, VORTAC; and between the Springfield, MO, VORTAC and the Flag City, OH, VORTAC. The airway segment between the St. Louis, MO, VORTAC and the Terre Haute, IN, VORTAC is removed. As amended, the airway now extends between the Chisum VORTAC and the Tulsa VORTAC, between the Springfield VORTAC and the St. Louis VORTAC, and between the Terre Haute VORTAC and the Flag City VORTAC.

V-67: Prior to this final rule, V-67 extended between the intersection of the Centralia, IL, VORTAC 010° and Vandalia, IL, VOR/DME 162° radials (CORKI Fix) and the Rochester, MN, VOR/DME. The airway segment between the intersection of the Centralia VORTAC 010° and Vandalia VOR/DME 162° radials (CORKI Fix) and the Spinner, IL, VORTAC is removed. As amended, the airway now extends between the Spinner VORTAC and the Rochester VOR/DME.

T-272: Prior to this final rule, T-272 extended between the Hallsville, MO, VORTAC and the Vandalia, IL, VOR/

DME. The Vandalia, IL, VOR/DME route point is changed to the TYMME, IL, waypoint (WP) which is located approximately 60 feet northeast of the Vandalia VOR/DME. As amended, the route now extends between the Hallsville VORTAC and the TYMME WP. Additionally, the Hallsville, MO, identifier is added to the first line of the route description and the geographic coordinates of each route point are updated to be expressed in degrees, minutes, seconds, and hundredths of a second.

The NAVAID radials contained in the V-14 description listed below in The Amendment section are unchanged and stated in degrees True north.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action of amending VOR Federal airways V-14 and V-67, and United States RNAV route T-272, due to the planned decommissioning of the VOR portion of the Vandalia, IL, VOR/DME NAVAID, qualifies for categorical exclusion under the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) and its implementing regulations at 40 CFR part 1500, and in accordance with FAA Order 1050.1F, Environmental Impacts: Policies and Procedures, paragraph 5-6.5a, which categorically excludes from further environmental impact review rulemaking actions that designate or modify classes of airspace areas, airways, routes, and reporting points (see 14 CFR part 71, Designation of Class A, B, C, D, and E Airspace Areas; Air Traffic Service Routes; and Reporting Points); and paragraph 5-6.5k, which categorically excludes from further environmental impact review publication of existing air traffic control

procedures that do not essentially change existing tracks, create new tracks, change altitude, or change concentration of aircraft on these tracks. As such, this action is not expected to result in any potentially significant environmental impacts. In accordance with FAA Order 1050.1F, paragraph 5-2 regarding Extraordinary Circumstances, the FAA has reviewed this action for factors and circumstances in which a normally categorically excluded action may have a significant environmental impact requiring further analysis. The FAA has determined that no extraordinary circumstances exist that warrant preparation of an environmental assessment or environmental impact study.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6010(a) Domestic VOR Federal Airways.

Docket No. 23-AGL-8]

RIN 2120-AA66

**Amendment of VOR Federal Airways
V-158 and V-172; Polo, IL**

AGENCY: Federal Aviation
Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends Very High Frequency Omnidirectional Range (VOR) Federal airways V-158 and V-172 in the vicinity of Polo, IL. The amendments are due to the planned decommissioning of the VOR portion of the Polo, IL (PLL), VOR/Distance Measuring Equipment (VOR/DME) navigational aid (NAVAID). The Polo VOR is being decommissioned as part of the FAA's VOR Minimum Operational Network (MON) program.

DATES: Effective date 0901 UTC, January 25, 2024. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

ADDRESSES: A copy of the Notice of Proposed Rulemaking (NPRM), all comments received, this final rule, and all background material may be viewed online at www.regulations.gov using the FAA Docket number. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it modifies the Air Traffic Service (ATS) route structure as necessary to preserve the safe and efficient flow of air traffic within the National Airspace System (NAS).

History

The FAA published a notice of proposed rulemaking for Docket No. FAA-2023-0965 in the **Federal Register** (88 FR 23595; April 18, 2023), proposing to amend VOR Federal airways V-158 and V-172 due to the planned decommissioning of the VOR portion of the Polo, IL, VOR/DME NAVAID. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal. One comment was received.

The commenter stated the FAA should keep the Polo VOR and associated VOR Federal airways, V-158 and V-172, because decommissioning them represented an aeronautical navigation challenge to instrument flight rules (IFR) aircraft not yet equipped with an IFR suitable global positioning system (GPS) and as a backup to GPS navigation, since there is

a lack of other suitable VOR navigational aids in the area.

The VOR MON is designed to enable aircraft, having lost Global Navigation Satellite System (GNSS) service, to revert to conventional navigation procedures and enable aircraft to proceed to a MON airport where an Instrument Landing System (ILS) or VOR approach procedure can be flown without the necessity of GPS.

In December 2011, the FAA published a notice of proposed policy and request for comments in the **Federal Register** (76 FR 77939). The notice addressed the FAA's proposed strategy for reducing the current VOR network to a Minimum Operational Network (MON) in support of transitioning the NAS to performance-based navigation (PBN) as part of the Next Generation Air Transportation System (NextGen). The FAA announced that, as part of a NAS Efficient Streamlined Services Initiative, the number of VORs would be reduced while more efficient Area Navigation (RNAV) routes and procedures would be implemented throughout the NAS. The notice stated that the FAA, with assistance of a work group, would develop a candidate list of VORs for discontinuance using relevant operational, safety, cost, and economic criteria.

In response to comments received to the notice of proposed policy, the FAA published a disposition of comments notice in the **Federal Register** (77 FR 50420; August 21, 2012), stating it would develop an initial VOR MON discontinuance plan which would be made publicly available. As a result, the FAA convened a working group for developing the objective criteria to be used to help identify those VORs that would remain operational. Stakeholders, aviation industry, and military services provided further input to the FAA for consideration in developing the criteria to select VORs that needed to be retained as a part of the MON. With this collective input, the FAA developed the criteria to determine which VORs would be retained. The VORs not meeting these criteria were considered discontinuance candidates.

As referenced in the NPRM, the FAA published its VOR MON final policy statement in the **Federal Register** (81 FR 48694; July 26, 2016). In that notice, the

candidate list of VORs to be discontinued was announced. The Polo, MI, VOR was announced as a candidate VOR for discontinuance. The FAA remains committed to its final policy statement and plan to retain an optimized VOR MON that enables pilots to revert from PBN to conventional navigation for approach, terminal, and enroute operations in the event of a GPS outage. This action supports the NAS transition from ground-based to satellite-based navigation consistent with the FAA's NextGen goals and the NAS Efficient Streamlined Services Initiative.

The commenter also stated that if the Polo VOR is decommissioned, there will not be any usable NAVAID between the Moline, IL, VOR and the DuPage, IL, VOR (a distance of 108 nautical miles (NM)) which is outside of the current VOR service volume, nor would there be any usable VOR connecting the Dubuque, IA, VOR/Tactical Air Navigation (VORTAC) with the Chicago area DuPage, IL, and Joliet, IL, VORs. The commenter continued that flying between the Dubuque, IA, VORTAC and the Joliet, IL, VOR/DME would put pilots outside current VOR service volumes due to significant limitations imposed on the Dubuque VOR and the limited ranges of the Davenport and Moline VORs.

In response, the FAA offers that although the route between the Moline VOR/DME and the DuPage, IL, VOR/DME is approximately 108 NM, pilots flying direct between those two VORs today are required to have their aircraft RNAV equipped since the distance, as stated, is beyond the service volume of the two NAVAIDS. However, there are other VOR Federal airway alternatives in the area that allow pilots to navigate between the Moline and DuPage VORs. A pilot could choose to navigate between the Moline and DuPage VORs via V-63 between the Moline VOR/DME and the Davenport, IA, VORTAC, then via V-6 between the Davenport VORTAC and the DuPage VOR/DME.

Likewise, there will continue to be VOR Federal airway alternatives available for navigating between the Dubuque, IA, area and the Chicago area DuPage, IL, and Joliet, IL, VORs. To navigate between the Dubuque VORTAC and DuPage VOR/DME, pilots may navigate via V-129 between the Dubuque and Davenport VORTACs, then via V-6 between the Davenport VORTAC and the DuPage VOR/DME. Alternatively, a pilot could choose to navigate between the Dubuque VORTAC and the Joliet VOR/DME via V-129 between the Dubuque VORTAC and the

GENSO Fix, then via V-8 between the GENSO Fix and the Joliet VOR/DME.

Additionally, pilots may continue to navigate between the Dubuque, IA, area and the Chicago area Northbrook, IL, VOR/DME via V-246 between the Dubuque VORTAC and the Janesville, IL, VOR/DME, then via V-24 between the Janesville VOR/DME and the Northbrook VOR/DME.

Finally, pilots, regardless of flying under instrument flight rules or visual flight rules, may always request radar vectors from air traffic control for navigation assistance in the area or file and fly point-to-point using the Fixes and waypoints that will remain in the area if their aircraft is RNAV equipped.

Lastly, the commenter stated that the FAA's plan to use VORs with the new VOR service volumes, labeled as VOR Low (VL) and VOR High (VH), as a backup plan in the event of a GPS outage did not provide sufficient coverage in the vicinity of the Polo VOR/DME due to the operational limitations imposed on the Dubuque VORTAC and the Northbrook VOR/DME. The commenter thought that the Polo VOR and associated V-158 and V-172 airways segments should be retained until the limitations currently being imposed on the Dubuque and Northbrook VORs can be removed and the service volumes of the Joliet VOR/DME and the Davenport VORTAC can be increased to ensure signal coverage throughout the entire area.

As stated previously, the FAA remains committed to its final policy statement and plan to retain an optimized VOR MON that enables pilots to revert from PBN to conventional navigation for approach, terminal, and enroute operations in the event of a GPS outage. The limitations with the four listed VORs, Dubuque, Northbrook, Joliet, and Davenport, exist today due to the VOR type, user retention requirements, or an increase in tree/terrain blockage occurring over time causing certain radials of the VORs to become unusable. The limitations imposed on these four VORs do not affect the normal operation of the VORs until exceeding 40 NM below 14,500 feet mean seal level (MSL). Whether the Polo VOR remains operational or is decommissioned does not change the existing limitations on the four VORs, nor would it effect the use of the VOR Federal airway alternatives identified for pilots to continue navigating through the affected area. The FAA has determined that with the planned decommissioning of the Polo VOR, there remains sufficient conventional navigation enroute structure in place to enable pilots to navigate from the

Dubuque, IA; Cedar Rapids, IA; or Moline, IL, areas into the Chicago Metropolitan Area.

Incorporation by Reference

VOR Federal airways are published in paragraph 6010(a) of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. FAA Order JO 7400.11H is publicly available as listed in the **ADDRESSES** section of this document. This amendment action will be published in the next update to FAA Order JO 7400.11.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This action amends 14 CFR part 71 by amending VOR Federal airways V-158 and V-172 due to the planned decommissioning of the VOR portion of the Polo, IL, VOR/DME. The airway actions are described below.

V-158: Prior to this final rule, V-158 extended between the Mason City, IA, VOR/DME and the intersection of the Polo, IL, VOR/DME 122° and Davenport, IA, VORTAC 087° radials (SHOOF Fix). The airway segment between the Dubuque, IA, VORTAC and the intersection of the Polo, IL, 122° and Davenport, IA, 087° radials (SHOOF Fix) is removed. As amended, the airway now extends between the Mason City VOR/DME and the Dubuque VORTAC.

V-172: Prior to this final rule, V-172 extended between the Columbus, NE, VOR/DME and the DuPage, IL, VOR/DME. The airway segment between the Cedar Rapids, IA, VOR/DME and the DuPage, IL, VOR/DME is removed. As amended, the airway now extends between the Columbus VOR/DME and the Cedar Rapids VOR/DME.

The NAVAID radials contained in the VOR Federal airway descriptions listed below in The Amendment section are unchanged and stated in degrees True north.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT

Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action of amending VOR Federal airways V-158 and V-172, due to the planned decommissioning of the VOR portion of the Polo, IL, VOR/DME NAVAID, qualifies for categorical exclusion under the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) and its implementing regulations at 40 CFR part 1500, and in accordance with FAA Order 1050.1F, Environmental Impacts: Policies and Procedures, paragraph 5-6.5a, which categorically excludes from further environmental impact review rulemaking actions that designate or modify classes of airspace areas, airways, routes, and reporting points (see 14 CFR part 71, Designation of Class A, B, C, D, and E Airspace Areas; Air Traffic Service Routes; and Reporting Points); and paragraph 5-6.5i, which categorically excludes from further environmental impact review the establishment of new or revised air traffic control procedures conducted at 3,000 feet or more above ground level (AGL); procedures conducted below 3,000 feet AGL that do not cause traffic to be routinely routed over noise sensitive areas; modifications to currently approved procedures conducted below 3,000 feet AGL that do not significantly increase noise over noise sensitive areas; and increases in minimum altitudes and landing minima. As such, this action is not expected to result in any potentially significant environmental impacts. In accordance with FAA Order 1050.1F, paragraph 5-2 regarding Extraordinary Circumstances, the FAA has reviewed this action for factors and circumstances in which a normally categorically excluded action may have a significant environmental impact requiring further analysis. The FAA has determined that no extraordinary circumstances exist that warrant preparation of an environmental assessment or environmental impact study.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6010(a) Domestic VOR Federal Airways.

* * * * *

V-158 [Amended]

From Mason City, IA; INT Mason City 106° and Dubuque, IA, 293° radials; to Dubuque.

* * * * *

V-172 [Amended]

From Columbus, NE; Omaha, IA; INT Omaha 066° and Newton, IA, 262° radials; Newton; to Cedar Rapids, IA.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 73

[Docket No. FDA-2020-C-2131]

Listing of Color Additives Exempt From Certification; Jagua (Genipin-Glycine) Blue

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA or we) is amending the color additive regulations to provide for the safe use of jagua (genipin-glycine) blue as a color additive in various food categories at levels consistent with good

manufacturing practice (GMP). We are taking this action in response to a color additive petition (CAP) submitted by Exponent, Inc. on behalf of Ecoflora SAS (Ecoflora).

DATES: This rule is effective December 4, 2023. See section X for further information on the filing of objections. Either electronic or written objections and requests for a hearing on the final rule must be submitted by December 4, 2023.

ADDRESSES: You may submit objections and requests for a hearing as follows. Please note that late, untimely filed objections will not be considered. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of December 4, 2023. Objections received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic objections in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Objections submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your objection will be made public, you are solely responsible for ensuring that your objection does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your objection, that information will be posted on <https://www.regulations.gov>.

- If you want to submit an objection with confidential information that you do not wish to be made available to the public, submit the objection as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper objections submitted to the Dockets Management Staff, FDA will post your objection, as

well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2020–C–2131 for “Listing of Color Additives Exempt from Certification; Jagua (Genipin-Glycine) Blue.” Received objections, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- **Confidential Submissions**—To submit an objection with confidential information that you do not wish to be made publicly available, submit your objections only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” We will review this copy, including the claimed confidential information, in our consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts, and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Shayla West-Barnette, Center for Food Safety and Applied Nutrition, Food and

Drug Administration, 5001 Campus Dr., College Park, MD 20740–3835, 240–402–1262.

SUPPLEMENTARY INFORMATION:

I. Introduction

In a notification published in the **Federal Register** on November 20, 2020 (85 FR 74304), we announced that we filed a color additive petition (CAP 0C0317) submitted by Ecoflora SAS, c/o Exponent, Inc., 1150 Connecticut Ave. NW, Suite 1100, Washington, DC 20036. The petition proposed to amend the color additive regulations in part 73 (21 CFR part 73), “Listing of Color Additives Exempt from Certification,” to provide for the safe use of jagua (genipin-glycine) blue, derived from the pulp of the unripe jagua fruit (*Genipa americana*), as a color additive at levels consistent with GMP in flavored milk; dairy drinks and substitutes; dairy and dairy alternative yogurt; ice cream, frozen dairy and dairy alternative desserts, puddings, gelatins, ices, sorbets; ready-to-eat multicolored cereals; flavored potato chips, tortilla, corn, and other chips; candy and chewing gum; non-alcoholic fruit based/ flavored drinks, nutritional beverages and smoothies; flavored cream cheese-based spreads; and icings, frostings, jams, syrups, and fruit toppings and fillings.

II. Background

The color additive that is the subject of this petition is a dark blue liquid or powder produced by reacting genipin (CAS Reg. No. 6902–77–8) in the juice of the unripe fruit of *Genipa americana* with an equivalent amount of the amino acid glycine (CAS Reg. No. 56–40–6) using mild heat. The principal coloring component in jagua (genipin-glycine) blue is a genipin-glycine polymer (CAS Reg. No. 1314879–21–4) consisting of repeating dimeric units containing two genipin moieties reacted to add glycine units as side chains. We will subsequently refer to this principal coloring component as “the polymer.” Iridoids, of which genipin is an example, are found in a wide variety of plants, and glycine is a common building block of proteins. The color additive jagua (genipin-glycine) blue also contains three dimers as minor coloring components (CAS Reg. No. 1313734–13–2, CAS Reg. No. 104359–67–3, and CAS Reg. No. 1313734–14–3) that are structural units of the polymer.

The petitioner proposed the following specifications for jagua (genipin-glycine) blue: appearance, dark blue; color value (E10 percent), 240–280 for the powder form and 120–240 for the liquid form; polymer, 20 to 40 percent for the

powder form and 10 to 35 percent for the liquid form; aflatoxins (B1, B2, G1, and G2), not more than 0.01 milligram per kilogram (mg/kg); fumonisin (B1, B2), not more than 0.5 mg/kg; *Escherichia coli*, negative in 1 gram (g); aerobic plate count, not more than 1,000 colony forming units per gram (cfu/g); yeast and mold, not more than 300 cfu/g, and *Staphylococcus aureus*, negative in 1 g.

FDA amended the proposed specifications to add the following: arsenic, not more than 1 mg/kg; cadmium, not more than 1 mg/kg; mercury, not more than 1 mg/kg; and lead, not more than 1 mg/kg (Ref. 1). We also amended the proposed specification for genipin, not more than 20 mg/kg, to be consistent with the petitioner’s analytical results. Furthermore, we concluded that the petitioner’s proposed specifications for appearance, color value, polymer, glycine, the minor coloring components, carbohydrate, modified starch, total fat, total protein, and ash content are not needed in the codified regulation (Ref. 1).

III. Safety Evaluation

Under section 721(b)(4) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 379e(b)(4)), a color additive may not be listed for a proposed use unless the data and information available to FDA establish that the color additive is safe for that use. Our color additive regulations at 21 CFR 70.3(i) define “safe” to mean that there is convincing evidence establishing with reasonable certainty that no harm will result from the intended use of the color additive.

To determine whether a color additive is safe under the general safety clause, the FD&C Act requires FDA to conduct a fair evaluation of the available data and consider, among other relevant factors: (1) probable consumption of, or other relevant exposure from, the additive and of any substance formed in or on food, drugs, devices, or cosmetics because of the use of the additive; (2) cumulative effect, if any, of such additive in the diet of man or animals, taking into account chemically or pharmacologically related substance or substances in such diet; and (3) safety factors recognized by experts as appropriate for the use of animal experimentation data (see section 721(b)(5)(A)(i) through (iii) of the FD&C Act).

As part of our safety evaluation to establish with reasonable certainty that a color additive is not harmful under its intended conditions of use, we consider the additive’s manufacturing and

stability, the projected human dietary exposure to the additive and any impurities resulting from the petitioned use of the additive, the additive's toxicological data, and other relevant information (such as published literature) available to us.

IV. Safety of the Petitioned Use of the Color Additive

A. Dietary Exposure Estimate

The petitioner requested that jagua (genipin-glycine) blue be permitted at levels consistent with GMP and provided the representative maximum use levels for the color additive for each proposed food use. The petitioner used food consumption data from the 2013–2016 National Health and Nutrition Examination Survey (NHANES) to estimate the dietary exposure to jagua (genipin-glycine) blue and to the polymer from the proposed uses. The petitioner stated that the use of the liquid form of jagua (genipin-glycine) blue would be substitutional for the powder form and that, on the polymer basis, the use levels are the same for both forms.

The petitioner estimated the eaters-only (*i.e.*, only those individuals in the population that consume the foods of interest) dietary exposure to jagua (genipin-glycine) blue to be 34 mg/person/day (mg/p/d) at the mean and 78 mg/p/d at the 90th percentile for the U.S. population aged 2 years and older, and 34 mg/p/d at the mean and 76 mg/p/d at the 90th percentile for children aged 2 to 5 years.

The petitioner provided a specification limit of 20 to 40 percent for the polymer in jagua (genipin-glycine) blue powder. We estimated the eaters-only dietary exposure to the polymer to be 14 mg/p/d at the mean and 31 mg/p/d at the 90th percentile for the U.S. population aged 2 years and older, and 14 mg/p/d at the mean and 30 mg/p/d at the 90th percentile for children aged 2 to 5 years (Ref. 2).

B. Toxicological Considerations

To establish that jagua (genipin-glycine) blue is safe for consumption at the proposed levels, the petitioner used aqueous jagua (genipin-glycine) blue containing a specified percentage of the polymer to conduct the following studies: (1) bacterial reverse mutation assay, mouse lymphoma assay, and in vitro mouse micronucleus assay addressing potential mutagenicity and genotoxicity of the polymer; (2) studies conducted in rats to address the potential toxic effects of acute oral exposure to the polymer; (3) 28-day oral toxicity studies in rats and beagle dogs

and 90-day repeated dose oral toxicity studies in rats and beagle dogs to address the potential toxic effects of subchronic oral exposure to the polymer; and (4) 12 months repeated dose toxicity study including in utero exposure in rats to address the potential toxic and/or reproductive effects of chronic oral exposure to the polymer.¹ FDA searched the publicly available literature to identify any new studies that might have examined toxicological effects of jagua (genipin-glycine) blue, or genipin or related compounds; however, no relevant studies were found.

We reviewed the mutagenicity and genotoxicity studies (a bacterial reverse mutation assay, an in vitro mouse lymphoma, and an in vivo mammalian micronucleus induction assay) and concluded that the polymer is not mutagenic or genotoxic under the experimental procedures and conditions applied (Ref. 3).

We reviewed the acute oral toxicity studies and concluded that the oral median lethal dose is greater than 661 mg/kg body weight (bw) of the polymer for the female rats used in the study (Ref. 3).

We reviewed the 28-day studies conducted in rats and in beagle dogs and consider these only as range-finding studies due to the limited number of animals tested per group and other study limitations, and thus not appropriate to establish a no-observed-effect-level (NOEL) or no-observed-adverse-effect-level (NOAEL). We reviewed the 90-day repeated dose oral toxicity study conducted in rats and concur with the study authors that the NOAEL for the rats under the conditions of the study was 330.5 mg/kg bw/d of the polymer for both sexes of the rats. We also reviewed the 90-day repeated dose oral toxicity study in dogs; however, due to the low number of dogs tested per group, and other inadequacies and limitations in the experimental design, we concluded that a NOAEL for the polymer could not be established from this study (Ref. 3).

We reviewed the 12-months repeated dose toxicity study including in utero exposure in rats. The lowest of all the NOAELs for F₀ (parental) generation male rats was 1,127 mg/kg bw/d of polymer² (Ref. 3).

¹ The polymer content of the test material used for toxicological studies varied slightly from batch to batch; therefore, the toxicological evaluation of studies and the resulting safety conclusions were based on the polymer content of the batch used.

² The NOAEL of the polymer (1,127 mg/kg bw/d) was derived from the NOAEL of the test material (3,094.7 mg/kg bw/d) used in the study. The polymer content of this test material was 36.4 percent. The NOAEL of the polymer (1,127 mg/kg

The study chosen to establish an acceptable daily intake (ADI) for the polymer was the 12 months repeated dose toxicity study including in utero exposure to rats over the 90-day study in rats. This study combined the in utero phase and a 1-year chronic toxicity phase of sufficient length and overall complexity to produce information on chronic exposure to the polymer. Based on the NOAEL of the polymer (1,127 mg/kg bw/d) in the 12 months repeated dose toxicity study in rats including in utero exposure, and applying a safety factor of 500 (10 to account for possible increased sensitivity of humans compared to test animals, 10 to account for sensitive individuals in determining safe intake for humans, and 5 for the lack of metabolism and pharmacokinetics and long-term chronic study), the ADI for the polymer is calculated as follows: 1,127 mg/kg bw/d (NOAEL)/500 = 2.3 mg/kg bw/d or 138 mg/p/d (based upon 60 kg bw/p) (Ref. 3).³

The petitioner estimated the highest dietary exposure (37 mg/p/d at 90th percentile based on the polymer) for children aged 6–12 years as well as adolescents aged 13–18 years. The highest estimated dietary exposure value of 37 mg/p/d at the 90th percentile based on the polymer is lower than the ADI value of 138 mg/p/d polymer.

Therefore, we conclude that the proposed use of jagua (genipin-glycine) blue as a color additive at levels consistent with GMP is considered to have reasonable certainty of no harm (Ref. 3).

V. Conclusion

Based on the data and information in the petition and other available relevant information, we conclude that the petitioned use of jagua (genipin-glycine) blue as a color additive in flavored milk; dairy drinks and substitutes; dairy and dairy alternative yogurt; ice cream, frozen dairy and dairy alternative desserts, puddings, gelatins, ices, sorbets; ready-to-eat multicolored cereals, flavored potato chips, tortilla, corn, and other chips; candy and chewing gum; non-alcoholic fruit based/ flavored drinks, nutritional beverages

bw/d) = NOAEL of the test material (3,094.7 mg/kg bw/d) $\times$ 0.364 = 1,127 mg/kg bw/d.

³ The Joint Expert Committee on Food Additives (2020) (Ref. 4) evaluated the 12 months repeated dose toxicity study including in utero exposure in rats with jagua (genipin-glycine) blue and reported that the dietary exposure of jagua (genipin-glycine) blue did not produce any treatment-related effects in this study. Therefore, the committee identified a NOAEL of 3,094.7 mg/kg bw/d (1,127 mg/kg bw/d based on 36.4 percent polymer content) and no effects observed in F₀ parental male rats.

and smoothies; flavored cream cheese-based spreads; and icings, frostings, jams, syrups, and fruit toppings and fillings, provided the amount of jagua (genipin-glycine) blue does not exceed levels consistent with GMP.

We further conclude that this color additive will achieve its intended technical effect and is suitable for the petitioned use. Therefore, we are amending the color additive regulations in part 73 to provide for the safe use of this color additive as set forth in this document. In addition, based on the factors in 21 CFR 71.20(b), we conclude that batch certification of jagua (genipin-glycine) blue is not necessary to protect the public health.

VI. Public Disclosure

In accordance with § 71.15 (21 CFR 71.15), the petition and the documents that we considered and relied upon in reaching our decision to approve the petition will be made available for public disclosure (see **FOR FURTHER INFORMATION CONTACT**). As provided in § 71.15, we will delete from the documents any materials that are not available for public disclosure.

VII. Analysis of Environmental Impact

As stated in the November 20, 2020, **Federal Register** notice of filing, the petitioner claimed that this action is categorically excluded under § 25.32(k) (21 CFR 25.32(k)) because jagua (genipin-glycine) blue would be added directly to food and is intended to remain in the food through ingestion by consumers and is not intended to replace macronutrients in food. We further stated that if FDA determines a categorical exclusion applies, neither an environmental assessment nor an environmental impact statement is required. We did not receive any new information or comments regarding this claim of categorical exclusion. We considered the petitioner's claim of categorical exclusion and determined that this action is categorically excluded under § 25.32(k). Therefore, neither an environmental assessment nor an environmental impact statement is required.

VIII. Paperwork Reduction Act of 1995

This final rule contains no collection of information. Therefore, clearance by the Office of Management and Budget under the Paperwork Reduction Act of 1995 is not required.

IX. Section 301(l) of the FD&C Act

Our review of this petition was limited to section 721 of the FD&C Act. This final rule is not a statement regarding compliance with other

sections of the FD&C Act. For example, section 301(l) of the FD&C Act (21 U.S.C. 331(l)) prohibits the introduction or delivery for introduction into interstate commerce of any food that contains a drug approved under section 505 of the FD&C Act (21 U.S.C. 355), a biological product licensed under section 351 of the Public Health Service Act (42 U.S.C. 262), or a drug or biological product for which substantial clinical investigations have been instituted and their existence has been made public, unless one of the exemptions in section 301(l)(1) to (4) of the FD&C Act applies. In our review of this petition, we did not consider whether section 301(l) of the FD&C Act or any of its exemptions apply to food containing this color additive.

Accordingly, this final rule should not be construed to be a statement that a food containing this color additive, if introduced or delivered for introduction into interstate commerce, would not violate section 301(l) of the FD&C Act. Furthermore, this language is included in all color additive final rules that pertain to food and therefore should not be construed to be a statement of the likelihood that section 301(l) of the FD&C Act applies.

X. Objections

This rule is effective as shown in the **DATES** section, except as to any provisions that may be stayed by the filing of proper objections. If you will be adversely affected by one or more provisions of this regulation, you may file with the Dockets Management Staff (see **ADDRESSES**) either electronic or written objections. You must separately number each objection, and within each numbered objection you must specify with particularity the provision(s) to which you object, and the grounds for your objection. Within each numbered objection, you must specifically state whether you are requesting a hearing on the particular provision that you specify in that numbered objection. If you do not request a hearing for any particular objection, you waive the right to a hearing on that objection. If you request a hearing, your objection must include a detailed description and analysis of the specific factual information you intend to present in support of the objection in the event that a hearing is held. If you do not include such a description and analysis for any particular objection, you waive the right to a hearing on the objection.

Any objections received in response to the regulation may be seen in the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket

at <https://www.regulations.gov>. We will publish notice of the objections that we have received or lack thereof in the **Federal Register**.

XI. References

The following references marked with an asterisk (*) are on display at the Dockets Management Staff (see **ADDRESSES**) and are available for viewing by interested persons between 9 a.m. and 4 p.m., Monday through Friday; they also are available electronically at <https://www.regulations.gov>. References without asterisks are not on public display at <https://www.regulations.gov> because they have copyright restriction. Some may be available at the website address, if listed. References without asterisks are available for viewing only at the Dockets Management Staff. FDA has verified the website addresses, as of the date this document publishes in the **Federal Register**, but websites are subject to change over time.

List of Subjects in 21 CFR Part 73

Color additives, Cosmetics, Drugs, Foods, Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under the authority delegated to the Commissioner of Food and Drugs, 21 CFR part 73 is amended as follows:

PART 73—LISTING OF COLOR ADDITIVES EXEMPT FROM CERTIFICATION

- 1. The authority citation for part 73 continues to read as follows:

Authority: 21 U.S.C. 321, 341, 342, 343, 348, 351, 352, 355, 361, 362, 371, 379e.

■ 2. Add § 73.225 to subchapter A to read as follows:

§ 73.225 Jagua (genipin-glycine) blue.

(a) *Identity.* (1) The color additive jagua (genipin-glycine) blue is a dark blue powder or liquid prepared from the juice of the unripe fruit of *Genipa americana* by reacting the genipin in the juice with glycine using mild heat. The color additive contains a polymer as the principal coloring component and three dimers as minor coloring components.

(2) Color additive mixtures for food use made with jagua (genipin-glycine) blue may contain only those diluents that are suitable and are listed in this subpart as safe for use in color additive mixtures for coloring foods.

(b) *Specifications.* Jagua (genipin-glycine) blue must conform to the following specifications and must be free from impurities, other than those named, to the extent that such other impurities may be avoided by good manufacturing practice:

(1) Arsenic, not more than 1 milligram/kilogram (mg/kg) (1 part per million (ppm)).

(2) Cadmium, not more than 1 mg/kg (1 ppm).

(3) Lead, not more than 1 mg/kg (1 ppm).

(4) Mercury, not more than 1 mg/kg (1 ppm).

(5) Genipin, not more than 20 mg/kg (20 ppm).

(c) *Uses and restrictions.* Jagua (genipin-glycine) blue may be safely used for coloring flavored milk; dairy drinks and substitutes; dairy and dairy alternative yogurt; ice cream, frozen dairy and dairy alternative desserts, puddings, gelatins, ices, sorbets; ready-to-eat multicolored cereals; flavored potato chips, tortilla, corn, and other chips; candy and chewing gum; non-alcoholic fruit based/flavored drinks, nutritional beverages and smoothies; flavored cream cheese-based spreads; and icings, frostings, jams, syrups, and fruit toppings and fillings at levels consistent with good manufacturing practice, except that it may not be used for coloring foods for which standards of identity have been issued under section 401 of the Federal Food, Drug, and Cosmetic Act, unless the use of added color is authorized by such standards.

(d) *Labeling requirements.* The label of the color additive and any mixtures prepared therefrom intended solely or in part for coloring purposes must conform to the requirements of § 70.25 of this chapter.

(e) *Exemption from certification.* Certification of this color additive is not necessary for the protection of the

public health and therefore batches thereof are exempt from the certification requirements of section 721(c) of the Federal Food, Drug, and Cosmetic Act.

Dated: October 30, 2023.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

31 CFR Part 582

Publication of Nicaragua Sanctions Regulations Web General Licenses 1, 2, and 2A

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Publication of Web General Licenses.

SUMMARY: The Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing three general licenses (GLs) issued pursuant to the Nicaragua Sanctions Regulations: GLs 1, 2, and 2A, each of which was previously made available on OFAC's website.

DATES: GLs 1 and 2 were issued on March 5, 2020. See **SUPPLEMENTARY INFORMATION** for additional relevant dates.

FOR FURTHER INFORMATION CONTACT: OFAC: Assistant Director for Licensing, 202–622–2480; Assistant Director for Regulatory Affairs, 202–622–4855; or Assistant Director for Compliance, 202–622–2490.

SUPPLEMENTARY INFORMATION:

Electronic Availability

This document and additional information concerning OFAC are available on OFAC's website: <https://ofac.treasury.gov>.

Background

On March 5, 2020, OFAC issued GLs 1 and 2 to authorize certain transactions otherwise prohibited by the Nicaragua Sanctions Regulations, 31 CFR part 582 (NSR). On March 25, 2020, OFAC issued GL 2A, which superseded GL 2, pursuant to the NSR and the Nicaragua Investment Conditionality Act of 2018 (50 U.S.C. 1701 note) (NICA Act), previously known as the “Nicaragua Human Rights and Anticorruption Act of 2018.” GL 2A expired on May 6, 2020. Also on March 25, 2020, OFAC issued GL 1A pursuant to the NSR and the NICA Act; GL 1A superseded GL 1

and was later incorporated into the NSR (85 FR 43436). Each GL was made available on OFAC's website (<https://ofac.treasury.gov>) when it was issued. The text of GLs 1, 2, and 2A is provided below.

OFFICE OF FOREIGN ASSETS CONTROL

GENERAL LICENSE NO. 2A

Authorizing the Wind Down of Transactions Involving the Nicaraguan National Police

(a) Except as provided in paragraph (b) of this general license, all transactions and activities prohibited by the Nicaragua Sanctions Regulations, 31 CFR part 582 (the NSR) or the Nicaragua Human Rights and Anticorruption Act of 2018 (NHRAA), that are ordinarily incident and necessary to the wind down of transactions involving the Nicaraguan National Police (NNP), or any entity in which the NNP owns, directly or indirectly, a 50 percent or greater interest, including the processing of salary payments from the NNP, or any entity in which the NNP owns, directly or indirectly, a 50 percent or greater interest, to its employees, are authorized through 12:01 a.m. eastern daylight time, May 6, 2020.

(b) This general license does not authorize:

(1) Any debit to an account of the NNP, or any entity in which the NNP owns, directly or indirectly, a 50 percent or greater interest, on the books of a U.S. financial institution; or

(2) Any transactions or activities prohibited by any part of 31 CFR chapter V other than the NSR, or any transactions or activities with any blocked person other than the blocked persons identified in paragraph (a) of this general license.

(c) Effective March 25, 2020, General License No. 2, dated March 5, 2020, is replaced and superseded in its entirety by this General License No. 2A.

Andrea Gacki,
Director, Office of Foreign Assets Control.
Dated: March 25, 2020.

Bradley T. Smith,
Director, Office of Foreign Assets Control.

BILLING CODE 4810-AL-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2023–0366]

RIN 1625-AA00

Safety Zone; Hurricanes, Tropical Storms, and Other Storms With High Winds; Captain of the Port Zone Sector Virginia

AGENCY: Coast Guard, Department of
Homeland Security (DHS).

ACTION: Final rule.

SUMMARY: The Coast Guard is establishing a safety zone for the navigable waters of the Sector Virginia Captain of the Port (COTP) Zone, to be enforced in the event of hurricanes, tropical storms, and other storms with high winds. This action is necessary to ensure the safety of the waters of the Sector Virginia COTP Zone. This rule establishes actions to be completed by industry and vessels within the COTP Zone before hurricanes, tropical storms, and other storms with high winds threatening the State of Virginia make landfall, and afterwards as well.

DATES: This rule is effective December 4, 2023.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to <https://www.regulations.gov>, type USCG–2023–0366 in the search box and click “Search.” Next, in the Document Type column, select “Supporting & Related Material.”

FOR FURTHER INFORMATION CONTACT: If you have questions about this rule, call or email LCDR Ashley Holm, Chief Waterways Management Division U.S. Coast Guard; 757–617–7986, Ashley.E.Holm@uscg.mil.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

Virginia has the potential to be affected by hurricanes and tropical storms on a yearly basis, especially between the months of June and November. Additionally, severe storms generating high winds and rough seas are also common in the winter months.

In response, on September 14, 2023, the Coast Guard published a notice of proposed rulemaking (NPRM) titled “Safety Zone; Hurricanes, Tropical Storms, and Other Storms with High Winds; Captain of the Port Zone Virginia” (88 FR 63042). There, we stated why we issued the NPRM and invited comments on our proposed regulatory action related to this safety zone. During the comment period that ended October 16, 2023, we received one comment.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 46 U.S.C. 70034. The Captain of the Port Sector Virginia (COTP) has determined that potential hazards associated with hurricanes, tropical storms, and other storms pose a safety concern to the maritime community. The purpose of this rule is to ensure safety of vessels and the navigable waters in the safety zone before, during, and after a hurricane, tropical storm, or other storm.

IV. Discussion of Comments, Changes, and the Rule

As noted above, we received one comment that concurred with the proposed rulemaking on our NPRM published September 14, 2023. The comment also addressed the need for Coast Guard Sector Virginia to maintain and update the Port Heavy Weather Plan. The comment is referring to the Maritime Severe Weather Contingency Plan, which advises the maritime community of the sequence and timing of COTP decisions and actions made pursuant to 33 CFR parts 160 and 165 that may be taken when there is the threat of a hurricane. The Plan also recommends actions to be taken to minimize storm related deaths, injury, damage, and threats to the environment. Coast Guard Sector Virginia will review and update the Maritime Severe Weather Contingency Plan as necessary to reflect the promulgation of this rule, and to provide guidance on advisable steps to take in addition to those required by the rule. Aside from adding the word “Sector” to the title of the regulation to conform to 33 CFR 3.25–10, there are no changes in the regulatory text of this rule from the proposed rule in the NPRM.

This rule establishes a safety zone on the navigable waters of the Sector Virginia COTP Zone during hurricanes, tropical storms, and other storms with high winds. This safety zone establishes actions to be completed by local industry and vessels in the COTP zone prior to landfall of hurricanes, tropical storms, and other storms with high

winds threatening Virginia and in the aftermath of landfall. Port Conditions (WHISKEY, X-RAY, YANKEE, ZULU, and RECOVERY) are standardized terms for states of operation instituted by the COTP which are clearly communicated to port facilities, vessels, and members of the Marine Transportation System (MTS).

Ports and waterfront facilities are encouraged to take action when specific Port Conditions are declared. Under Port Condition WHISKEY, ports and waterfront facilities should remove all debris and secure potential flying hazards. Upon a declaration that Port Condition X-RAY is in effect, port facilities should ensure that potential flying debris and hazardous materials are removed, and that loose cargo and cargo equipment is secured. Upon a declaration of Port Condition YANKEE, terminal operators should terminate all cargo operations not associated with storm preparations. All facilities should continue to operate in accordance with approved Facility Security Plans (as defined at 33 CFR 101.105, and as further described in 33 CFR 105.400 to 105.415), and to comply with all applicable requirements of the Maritime Transportation Security Act of 2002 (46 U.S.C. chapter 701).

The COTP retains flexibility in controlling and reconstituting vessel traffic during periods of heavy weather, and it will allow for the expedited resumption of the MTS following such events. The safety zone consists of all waters of the territorial seas within the Sector Virginia COTP Zone, as defined in 33 CFR 3.25–10. Portions of the safety zone might be activated at different times, as conditions dictated. Notice of Port Conditions and their requirements will be given via Marine Safety Information Bulletins and Broadcast Notice to Mariners. The regulatory text appears at the end of this document.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a “significant regulatory action,” under section 3(f) of Executive Order 12866, as amended by Executive Order 14094

(Modernizing Regulatory Review). Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the size, location, duration, and time of day of the regulated area. This regulatory action determination is based on the necessity to protect life, port infrastructure, and the environment during hurricanes, tropical storms, and other storms with high winds. The scope of the regulation is narrow and will only apply when a hurricane, tropical storm, or other storm with high winds impacts the navigable waters of the Virginia COTP Zone. These events are infrequent and of short duration. Regulatory restrictions will be lifted as soon as practicable.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard received no comments from the Small Business Administration on this rulemaking. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule will affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency’s

responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or Tribal Government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not

individually or cumulatively have a significant effect on the human environment. This rule involves a safety zone that prohibits entry in certain waters of the Sector Virginia COTP Zone for the duration needed to ensure safe transit of vessels and industry before and after a hurricane, tropical storm, or other storm with high winds. It is categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023-01-001-01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

- 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051, 70124; 33 CFR 1.05-1, 6.04-1, 6.04-6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.3.

- 2. Add § 165.520 to read as follows:

§ 165.520 Safety Zone; Hurricanes, Tropical Storms, and other Storms with High Winds; Captain of the Port Zone Sector Virginia.

(a) *Regulated areas.* All navigable waters, as defined in 33 CFR 2.36, within the Captain of the Port Zone Sector Virginia, as described in 33 CFR 3.25-10, or some portion of those waters, during specified conditions. Port conditions and safety zone activation may vary for different portions of the regulated area at different times, based on storm conditions and its projected track.

(b) *Definitions.*

Captain of the Port means Commander, Coast Guard Sector Virginia.

Representative means any Coast Guard commissioned, warrant, or petty officer or civilian employee who has been authorized to act on the behalf of the Captain of the Port.

Port Condition WHISKEY means a condition set by the COTP when National Weather Service (NWS) weather advisories indicate sustained gale force winds (39-54 mph/34-47

knots) are predicted to reach the COTP zone within 72 hours.

Port Condition X-RAY means a condition set by the COTP when NWS weather advisories indicate sustained gale force winds (39-54 mph/34-47 knots) are predicted to reach the COTP zone within 48 hours.

Port Condition YANKEE means a condition set by the COTP when NWS weather advisories indicate that sustained gale force winds (39-54 mph/34-47 knots) are predicted to reach the COTP zone within 24 hours.

Port Condition ZULU means a condition set by the COTP when NWS weather advisories indicate that sustained gale force winds (39-54 mph/34-47 knots) are predicted to reach the COTP zone within 12 hours.

Port Condition RECOVERY means a condition set by the COTP when NWS weather advisories indicate that sustained gale force winds (39-54 mph/34-47 knots) are no longer predicted for the regulated area. This port condition remains in effect until the regulated areas are deemed safe and are reopened to normal operations.

(c) *Regulations.* (1) Port Condition WHISKEY. All vessels must exercise due diligence in preparation for potential storm impacts. All oceangoing tank barges and their supporting tugs and all self-propelled oceangoing vessels over 500 gross tons (GT) must make plans to depart no later than setting of Port Condition Yankee unless authorized by the COTP. The COTP may modify the geographic boundaries of the regulated area and actions to be taken under Port Condition WHISKEY, based on the trajectory and forecasted storm conditions.

(2) Port Condition X-RAY. All vessels must ensure that potential flying debris and hazardous materials are removed, and that loose cargo and cargo equipment is secured. Vessels at facilities must carefully monitor their moorings and cargo operations. Additional anchor(s) must be made ready to let go, and preparations must be made to have a continuous anchor watch during the storm. Engine(s) must be made immediately available for maneuvering. Also, vessels must maintain a continuous listening watch on VHF Channel 16. All oceangoing tank barges and their supporting tugs and all self-propelled oceangoing vessels over 500 GT must prepare to depart the port and anchorages within the affected regulated area. These vessels shall depart immediately upon the setting of Port Condition YANKEE. During this condition, slow-moving vessels may be ordered to depart to ensure safe avoidance of the incoming

storm. Vessels that are unable to depart the port must contact the COTP to receive permission to remain in port. Vessels with COTP's permission to remain in port must implement their pre-approved mooring arrangement. The COTP may require additional precautions to ensure the safety of the ports and waterways. The COTP may modify the geographic boundaries of the regulated area and actions to be taken under Port Condition X-RAY based on the trajectory and forecasted storm conditions.

(3) Port Condition YANKEE. Affected ports are closed to all inbound vessel traffic. All oceangoing tank barges and their supporting tugs and all self-propelled oceangoing vessels over 500 GT must have departed the regulated area. The COTP may require additional precautions to ensure the safety of the ports and waterways. The COTP may modify the geographic boundaries of the regulated area and actions to be taken under Port Condition YANKEE based on the trajectory and forecasted storm conditions.

(4) Port Condition ZULU. Cargo operations are suspended, except final preparations that are expressly permitted by the COTP as necessary to ensure the safety of the ports and facilities. Other than vessels designated by the COTP, no vessels may enter, transit, move, or anchor within the regulated area. The COTP may modify the geographic boundaries of the regulated area and actions to be taken under Port Condition ZULU based on the trajectory and forecasted storm conditions.

(5) Port Condition RECOVERY. Designated areas are closed to all vessels. Based on assessments of channel conditions, navigability concerns, and hazards to navigation, the COTP may permit vessel movements with restrictions. Restrictions may include, but are not limited to, preventing, or delaying vessel movements, imposing draft, speed, size, horsepower or daylight restrictions, or directing the use of specific routes. Vessels permitted to transit the regulated area shall comply with the lawful orders or directions given by the COTP or representative.

(6) Regulated Area Notice. The Coast Guard will provide notice of where, within the regulated area, a declared Port Condition is to be in effect via Broadcast Notice to Mariners, Marine Safety Information Bulletins, or by on-scene representatives.

(7) Exception. This regulation does not apply to authorized law enforcement agencies operating within the regulated area.

Dated: October 27, 2023.

J.A. Stockwell,

Captain, U.S. Coast Guard, Captain of the Port, Sector Virginia.

[FR Doc. 2023–24304 Filed 11–2–23; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

RIN 2900–AR44

Presumptive Service Connection for Rare Respiratory Cancers Due to Exposure to Fine Particulate Matter

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: This rulemaking adopts as final, without changes, an interim final rule amending the Department of Veterans Affairs (VA) adjudication regulations to establish presumptive service connection for nine rare respiratory cancers in association with presumed exposure to fine particulate matter. These presumptions apply to Veterans with a qualifying period of service, *i.e.*, who served on active military, naval, or air service in the Southwest Asia theater of operations during the Persian Gulf War (hereinafter Gulf War), from August 2, 1990, onward, as well as in Afghanistan, Syria, Djibouti, or Uzbekistan, on or after September 19, 2001, during the Gulf War. This rulemaking implements a decision by the Secretary of Veterans Affairs that determined there is sufficient evidence to support these cancers as presumptive based on exposure to fine particulate matter during service in the Southwest Asia theater of operations, Afghanistan, Syria, Djibouti, or Uzbekistan during certain periods and the subsequent development of the following rare respiratory cancers: squamous cell carcinoma (SCC) of the larynx, SCC of the trachea, adenocarcinoma of the trachea, salivary gland-type tumors of the trachea, adenosquamous carcinoma of the lung, large cell carcinoma of the lung, salivary gland-type tumors of the lung, sarcomatoid carcinoma of the lung, and typical and atypical carcinoid of the lung. The intended effect of this rulemaking is to ease the evidentiary burden of this population of Veterans who file claims with VA for these nine rare respiratory cancers.

DATES:

Effective date: This rule is effective November 3, 2023.

Applicability date: The provisions of this final rule shall apply to all

applications for service connection for squamous cell carcinoma (SCC) of the larynx, SCC of the trachea, adenocarcinoma of the trachea, salivary gland-type tumors of the trachea, adenosquamous carcinoma of the lung, large cell carcinoma of the lung, salivary gland-type tumors of the lung, sarcomatoid carcinoma of the lung, and typical and atypical carcinoid of the lung based on service in the Southwest Asia theater of operations during the Gulf War, from August 2, 1990, onward, as well as Afghanistan, Syria, Djibouti, or Uzbekistan, on or after September 19, 2001, during the Gulf War, received by VA on or after April 26, 2022, or that were pending before VA, the United States Court of Appeals for Veterans Claims, or the United States Court of Appeals for the Federal Circuit on April 26, 2022.

FOR FURTHER INFORMATION CONTACT:

Bryant Coleman, Regulations Analyst; Robert Parks, Chief, Regulations Staff (211), Compensation Service (21C), 810 Vermont Avenue NW, Washington, DC, (202) 461–9700. (This is not a toll-free telephone number.)

SUPPLEMENTARY INFORMATION: On April 26, 2022, VA published an interim final rule at 87 FR 24421, to amend its adjudication regulations to establish presumptive service connection for nine rare respiratory cancers in association with presumed exposure to fine particulate matter. These presumptions apply to Veterans with a qualifying period of service, *i.e.*, who served on active military, naval, or air service in the Southwest Asia theater of operations during the Gulf War, from August 2, 1990, onward, as well as in Afghanistan, Syria, Djibouti, or Uzbekistan, on or after September 19, 2001, during the Gulf War. The 60-day comment period ended on June 27, 2022.

VA received nine comments from interested individuals and organizations. The comments are discussed below under the appropriate headings. VA made no changes based on comments received. However, we note that changes made to § 3.320 in the final rule for RIN 2900–AR25 are carried forward here and continue to remain in effect. Based on the rationale set forth in the interim final rule and in this final rule, VA adopts the provisions of the interim final rule as a final rule without change.

Confusion Regarding Qualifying Service Dates

VA received three comments that expressed confusion regarding whether service in the Southwest Asia theater of operations during the first Gulf War is

included under the definition of the phrase qualifying period of service. VA agrees with these comments that the rulemaking could have caused some confusion, and acknowledges that additional clarity is needed. So, to clarify, as currently written, the rule applies to those who served in Desert Shield or Desert Storm as part of the Persian Gulf War from August 2, 1990 to February 28, 1991. We note that the definition of qualifying period of service contained in paragraph (a)(5)(i) refers to § 3.2(i), which defines “Persian Gulf War” as: “August 2, 1990, through date to be prescribed by Presidential proclamation or law.” However, VA makes no changes based on these comments because this issue was addressed in the final rule for RIN 2900–AR25, which changes have been carried forward here and continue to remain in effect.

General Comments

One commenter expressed general support for the rulemaking. VA thanks the commenter for their view. VA makes no changes based on this comment.

VA received two comments that addressed time frames and locations that qualify for the presumption of exposure contained in § 3.320. In particular, one commenter stated that he was on an aircraft carrier in the theater of Southwest Asia in July of 1987. He went on to state that “[a]ll Military Service-members should qualify for all exposures during active duty in this theater of operations.” Another commenter asked “is this related to burn pits? If so, why are you just making this available to only veterans who served for that time period?” The commenter went on to state that they served in Beirut, Lebanon in 1982–1983 and were exposed to burning human waste during that time. While VA sympathizes with these commenters, VA’s rulemaking establishes presumptive service connection for nine rare respiratory cancers in association with presumed exposure to fine particulate matter; it does not address the locations or periods of service that qualify for the presumption of exposure to fine particulate matter. Thus, these comments are outside the scope of the present rulemaking.

Additionally, we note that the Secretary has made the decision to limit these presumptive conditions to a timeframe and locations during which VA has evidence of relevant levels of fine particulate matter in the air. When VA created the presumption of exposure to fine particulate matter in 38 CFR 3.320, it was based on scientific and medical studies that focused on the

respiratory effects of fine particulate matter for Veterans who served in the Southwest Asia theater of operations, Afghanistan, Syria, Djibouti, and Uzbekistan during the Gulf War. Veterans began reporting a variety of respiratory health issues during and after the initial Gulf War conflict, and as a result, Congress mandated that VA study the health outcomes of veterans deployed to the Southwest Asia theater of operations. VA then requested the National Academies of Sciences, Engineering, and Medicine (NASEM) to study the evidence regarding respiratory health outcomes in veterans of the Southwest Asia conflicts. The results of that study formed the basis for this rulemaking. As service prior to the Gulf War was not considered in these studies, it cannot be included as part of the qualifying timeframe under 38 CFR 3.320.

While this rulemaking is based on current medical and scientific evidence related to the respiratory health effects of fine particulate matter on Veterans who served during the Gulf War, VA will continue to review new scientific evidence as it develops relating to other exposures and to all health effects resulting from exposure to fine particulate matter. This rulemaking does not limit the future establishment of presumptive service connection for conditions related to respiratory or other body systems, or the establishment of presumptions of exposure for service in other locations or during other time frames. Additionally, VA encourages all Veterans who believe that they are entitled to VA compensation to file a claim with their local VA regional office. VA makes no change to the final rule based on the comment.

One commenter reported that they had filed 3 intent letters and had not received a response. The commenter went on to report that they had been turned down for compensation in the past. VA's rulemaking establishes presumptive service connection for nine rare respiratory cancers in association with presumed exposure to fine particulate matter. This comment, which relates to an individual case, is outside the scope of the present rulemaking. However, VA encourages all Veterans who believe that they are entitled to VA compensation to file a claim with their local VA regional office. VA makes no change to the final rule based on the comment.

One commenter stated that her husband served in the US Army and while serving he died of squamous cell carcinoma of the larynx. While VA sympathizes with this commenter, VA's rulemaking establishes presumptive

service connection for nine rare respiratory cancers in association with presumed exposure to fine particulate matter. This comment refers to a specific case, which is outside the scope of the present rulemaking. However, VA encourages all Veterans and dependents who believe that they are entitled to VA compensation to file a claim with their local VA regional office. VA makes no change to the final rule based on the comment.

Another commenter objected to the rulemaking because it did not cover all diseases and disabilities caused by open air burn pits or the chemical contamination in Gulf War I. Additionally, the commenter stated that the "interim final rule does not clearly define the provisions attaching to Gulf War I. Including coverage dates would eliminate any possible confusion." As noted above, while this rulemaking is based on current medical and scientific evidence related to the respiratory health effects of fine particulate matter on Veterans who served during the Gulf War, VA will continue to review new scientific evidence as it develops relating to other exposures and to all health effects resulting from exposure to fine particulate matter. This rulemaking does not limit the future establishment of presumptive service connection for conditions related to respiratory or other body systems, or the establishment of presumptions of exposure for service in other locations or during other time frames. Also, the potential confusion regarding service during the first Gulf War was addressed in the final rule for RIN 2900-AR25, which changes have been carried forward here and continue to remain in effect. VA makes no change to the final rule based on the comment.

Further, we again note that changes made to § 3.320 in the final rule for RIN 2900-AR25 are carried forward here and continue to remain in effect. Additionally, provisions of the Sergeant First Class Heath Robinson Honoring our Promise to Address Comprehensive Toxics Act of 2022, Public Law 117-168, relevant to this regulation will be the subject of separate and future rulemaking.

Administrative Procedure Act

This document affirms the amendment made by the interim final rule that is already in effect. The Secretary concluded that, pursuant to 5 U.S.C. 553(b)(B) and (d)(3), there was good cause to publish this rule without prior opportunity for public comment and good cause to publish this rule with an immediate effective date. Delay in the implementation of this rule would have been impracticable, unnecessary,

and contrary to public interest, particularly to Veterans.

Executive Orders 12866, 13563, and 14094

Executive Order 12866 (Regulatory Planning and Review) directs agencies to assess the costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, and other advantages; distributive impacts; and equity). Executive Order 13563 (Improving Regulation and Regulatory Review) emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. Executive Order 14094 (Executive Order on Modernizing Regulatory Review) supplements and reaffirms the principles, structures, and definitions governing contemporary regulatory review established in Executive Order 12866 of September 30, 1993 (Regulatory Planning and Review), and Executive Order 13563 of January 18, 2011 (Improving Regulation and Regulatory Review). The Office of Information and Regulatory Affairs has determined that this rulemaking is not a significant regulatory action under Executive Order 12866, as amended by Executive Order 14094. The Regulatory Impact Analysis associated with this rulemaking can be found as a supporting document at www.regulations.gov.

Regulatory Flexibility Act

The Secretary hereby certifies that this final rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (5 U.S.C. 601-612). The certification is based on the fact that no small entities or businesses determine service connection or the rating criteria, or assign evaluations for disability claims. Therefore, pursuant to 5 U.S.C. 605(b), the initial and final regulatory flexibility analysis requirements of sections 603 and 604 do not apply.

Unfunded Mandates

The Unfunded Mandates Reform Act of 1995 requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before issuing any rule that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more (adjusted annually for inflation) in any one year. This final rule will have no

such effect on State, local, and tribal governments, or on the private sector.

Paperwork Reduction Act (PRA)

This final rule contains no provisions constituting a collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521).

Assistance Listing

The Assistance Listing numbers and titles for this rule are 64.101, Burial Expenses Allowance for Veterans; 64.102, Compensation for Service-Connected Deaths for Veterans' Dependents; 64.105, Pension to Veterans, Surviving Spouses, and Children; 64.109, Veterans Compensation for Service-Connected Disability; and 64.110, Veterans Dependency and Indemnity Compensation for Service-Connected Death.

Congressional Review Act

Pursuant to Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (known as the Congressional Review Act) (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this rule as not a major rule, as defined by 5 U.S.C. 804(2).

Signing Authority

Denis McDonough, Secretary of Veterans Affairs, signed and approved this document on August 24, 2023, and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs.

Jeffrey M. Martin,

Assistant Director, Office of Regulation Policy & Management, Office of General Counsel, Department of Veterans Affairs.

PART 3—ADJUDICATION

■ The interim final rule amending 38 CFR part 3 which was published at 87 FR 24421 on April 26, 2022, is adopted as final without change.

[FR Doc. 2023–24195 Filed 11–2–23; 8:45 am]

BILLING CODE 8320–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2022–0391; FRL–11368–02–R4]

Air Plan Approval; North Carolina; Revisions to Miscellaneous Particulate Matter Rules

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a State Implementation Plan (SIP) revision submitted by the State of North Carolina through the North Carolina Division of Air Quality (NCDAQ) via a letter dated April 13, 2021. The SIP revision seeks to modify the State's emission control standards by amending several air quality rules and removing a redundant rule for electric utility boilers. EPA is approving these changes pursuant to the Clean Air Act (CAA or Act).

DATES: This rule is effective December 4, 2023.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2022–0391. All documents in the docket are listed on the www.regulations.gov website. Although listed in the index, some information may not be publicly available, *i.e.*, Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through www.regulations.gov or in hard copy at the Air Regulatory Management Section, Air Planning and Implementation Branch, Air and Radiation Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Pearlene Williams-Miles, Multi-Air Pollutant Coordination Section, Air Planning and Implementation Branch, Air and Radiation Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, GA 30303–8960. The telephone number

is (404) 562–9144. Ms. Williams-Miles can also be reached via electronic mail at WilliamsMiles.Pearlene@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Overview

EPA is approving a SIP revision submitted by North Carolina on April 14, 2021,¹ seeking to amend various air quality rules and to remove one rule from the North Carolina SIP.² Specifically, the SIP revision addresses State regulations amended in 15A North Carolina Administrative Code (NCAC) Subchapter 02D. The submission includes changes to multiple rules in Sections .0400 and .0500 of Subchapter 02D and the removal of Rule 02D .0536, *Particulate Emissions from Electric Utility Boilers*.³ To support the removal of Rule 02D .0536 from the SIP, the submission includes technical support materials to demonstrate that the removal of the rule would not interfere with any applicable requirement concerning attainment and reasonable further progress (RFP) or any other applicable requirement of the CAA.⁴

Through a notice of proposed rulemaking (NPRM) published on September 1, 2023 (88 FR 60424), EPA proposed to approve the April 13, 2021, submission. The details of North Carolina's submission, which amends various air quality rules and removes Rule 02D .0536 from North Carolina's SIP, as well as EPA's rationale for approving the changes, are described in the September 1, 2023, NPRM. Comments on the September 1, 2023, NPRM were due on or before October 2, 2023. No comments were received on the September 1, 2023, NPRM, adverse or otherwise.

II. Incorporation by Reference

In this document, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with the requirements of 1 CFR 51.5, and as discussed in Section I of this preamble, EPA is finalizing the incorporation by reference of the following air quality rules under 15A

¹ EPA notes that the April 14, 2021, submission was received under a cover letter dated April 13, 2021. For clarity, throughout this document EPA will refer to the April 14, 2021, submission by its cover letter date of April 13, 2021.

² On April 13, 2021, North Carolina provided multiple SIP revisions related to other North Carolina SIP-approved rules. These SIP revisions are not addressed in this document. EPA will act or has acted on those SIP revisions in separate rulemakings.

³ EPA will not act on Rule 02D .0503, *Particulates from Fuel Burning Indirect Heat Exchangers*, since this section was withdrawn from EPA consideration in a letter dated January 17, 2023, which is in the docket of this action.

⁴ See 42 U.S.C. 7410(l).

NCAC Subchapter 02D, Air Pollution Control Requirements, state effective on November 1, 2020: 02D .0403, *Total Suspended Particulates*; 02D .0501, *Compliance with Emission Control Standards*; 02D .0504, *Particulates from Wood Burning Indirect Heat Exchangers*; 02D .0506, *Particulates from Hot Mix Asphalt Plants*;⁵ 02D .0507, *Particulates from Chemical Fertilizer Manufacturing Plants*; 02D .0508, *Particulates from Pulp and Paper Mills*; 02D .0509, *Particulates from Mica and Feldspar Processing Plants*; 02D .0510, *Particulates from Sand, Gravel or Crushed Stone Processes*; 02D .0511, *Particulates from Lightweight Aggregate Processes*; 02D .0513, *Particulates from Portland Cement Plants*; 02D .0514, *Particulates from Ferrous Jobbing Foundries*; and 02D .0515, *Particulates from Miscellaneous Industrial Processes*. Also in this document, EPA is finalizing the removal of Rule 02D .0536, *Particulate Emissions from Electric Utility Boilers*, from the North Carolina SIP, which is incorporated by reference in accordance with the requirements of 1 CFR part 51. EPA has made, and will continue to make, the SIP generally available at the EPA Region 4 office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information). Therefore, the revised materials as stated above, have been approved by EPA for inclusion in the SIP, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of EPA's approval, and will be incorporated by reference in the next update to the SIP compilation.⁶

⁵ As noted in the NPRM, EPA is not acting on the removal of the term "elsewhere" in Rule 02D .0506(e) because North Carolina withdrew the removal of this word from EPA consideration in a letter dated January 17, 2023, which is in the docket for this action. The term "elsewhere" is included in the August 1, 2004, state effective version of Rule 02D .0506(e). The April 13, 2021, SIP submittal includes the August 1, 2004, version of the Rule with redline/strikeout changes showing the differences between the August 1, 2004, version of the rule and the November 1, 2020, version of the Rule. Therefore, to implement the State's April 13, 2021, SIP submittal, as amended by the withdrawal letter, EPA is incorporating by reference the version of the Rule state effective on November 1, 2020, except for the phrase "not covered" in paragraph .0506(e), and is incorporating by reference the phrase "not covered elsewhere" from the version of .0506(e) state effective on August 1, 2004. The resulting regulatory text in paragraph .0506(e) in the SIP reads, "Fugitive emissions from sources at a hot mix asphalt plant not covered elsewhere by this Rule shall not exceed 20 percent opacity averaged over six minutes."

⁶ See 62 FR 27968 (May 22, 1997).

III. Final Action

EPA is approving the aforementioned changes to the North Carolina SIP. Specifically, EPA is finalizing the approval of the April 13, 2021, SIP revision which amends various air quality rules under 15A NCAC 02D, Air Pollution Control Requirements, and removes Rule 02D .0536 from North Carolina's SIP.

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. See 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. This action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 14094 (88 FR 21879, April 11, 2023);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a state program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of

Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, February 16, 1994) directs Federal agencies to identify and address "disproportionately high and adverse human health or environmental effects" of their actions on minority populations and low-income populations to the greatest extent practicable and permitted by law. EPA defines environmental justice (EJ) as "the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies." EPA further defines the term fair treatment to mean that "no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies."

NCDQA did not evaluate EJ considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. EPA did not perform an EJ analysis and did not consider EJ in this action. Due to the nature of the action being taken here, this action is expected to have a neutral to positive impact on the air quality of the affected area. Consideration of EJ is not required as part of this action, and there is no information in the record inconsistent with the stated goal of E.O. 12898 of achieving EJ for people of color, low-income populations, and Indigenous peoples.

This action is subject to the Congressional Review Act, and EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 2, 2024. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition

for judicial review may be filed and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. See section 307(b)(2).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Ozone, Particulate matter, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: October 24, 2023.

Jeananne Gettle,

Acting Regional Administrator, Region 4.

For the reasons stated in the preamble, EPA amends 40 CFR part 52 as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart II—North Carolina

■ 2. In § 52.1770(c), amend “Table (1) EPA-Approved North Carolina Regulations” by:

■ a. Under the heading “Section .0400 Ambient Air Quality Standards”, revising the entry for “Rule .0403”;

■ b. Under the heading “Section .0500 Emission Control Standards”, revising the entries for “Rule .0501”, “Rule .0504”, “Rule .0506”, “Rule .0507”, “Rule .0508”, “Rule .0509”, “Rule .0510”, “Rule .0511”, “Rule .0513”, “Rule .0514”, and “Rule .0515”; and removing the entry for “Rule .0536”.

The revisions read as follows:

§ 52.1770 Identification of plan.

* * * * *

(c) * * *

(1) EPA-APPROVED NORTH CAROLINA REGULATIONS

State citation	Title/subject	State effective date	EPA approval date	Explanation
*	*	*	*	*
Section .0400 Ambient Air Quality Standards				
Rule .0403	Total Suspended Particulates ...	11/1/2020	11/3/2023, [Insert citation of publication].	
*	*	*	*	*
Section .0500 Emission Control Standards

ENVIRONMENTAL PROTECTION AGENCY 40 CFR Part 180 [EPA–HQ–OPP–2023–0507; FRL–11517–01–OCSPP] Extension of Tolerances for Emergency Exemptions; Multiple Chemicals AGENCY: Environmental Protection Agency (EPA). ACTION: Final rule.				
SUMMARY: This regulation extends time-limited tolerances for residues of clothianidin, kasugamycin, methyl bromide, and triclopyr in or on various commodities as identified in this document. These actions are in response to EPA’s granting of emergency exemptions under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) authorizing use of these pesticides. In addition, the Federal Food, Drug, and Cosmetic Act (FFDCA) requires EPA to establish a time-limited tolerance or exemption from the requirement for a tolerance for pesticide chemical residues in food that will result from the use of a pesticide under an emergency exemption granted by EPA under FIFRA. Additionally, EPA is removing time-limited tolerances for residues of flupyradifurone in or on sugar cane and sweet sorghum commodities. DATES: This regulation is effective November 3, 2023. Objections and requests for hearings must be received on or before January 2, 2024 and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the SUPPLEMENTARY INFORMATION). ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2023–0507, is available at https://www.regulations.gov or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW, Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room and the OPP Docket is (202) 566–1744. Please review the visitor instructions and additional information about the docket available at https://www.epa.gov/dockets. FOR FURTHER INFORMATION CONTACT: Charles Smith, Director, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; main telephone number: (202) 566–1030; email address: RDfRNotices@epa.gov. SUPPLEMENTARY INFORMATION: I. General Information <i>A. Does this action apply to me?</i> You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include: • Crop production (NAICS code 111). • Animal production (NAICS code 112). • Food manufacturing (NAICS code 311). • Pesticide manufacturing (NAICS code 32532). <i>B. How can I get electronic access to other related information?</i> You may access a frequently updated electronic version of 40 CFR part 180 through the Office of the Federal Register’s e-CFR site at https://www.ecfr.gov/current/title-40. <i>C. How can I file an objection or hearing request?</i> Under FFDCA section 408(g), 21 U.S.C. 346a, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2023–0507 in the subject line on the first page of your submission. All requests must be in writing and must be received by the Hearing Clerk on or before January 2, 2024. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b). In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA–HQ–OPP–2023–0507, by one of the following methods: • <i>Federal eRulemaking Portal:</i> https://www.regulations.gov. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute. • <i>Mail:</i> OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001. • <i>Hand Delivery:</i> To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at https://www.epa.gov/dockets/where-send-comments-epa-dockets. Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at https://www.epa.gov/dockets. II. Background and Statutory Findings EPA previously published final rules establishing time-limited tolerances in the Federal Register for the chemicals and commodities listed below under FFDCA section 408, 21 U.S.C. 346a. EPA established the tolerances because FFDCA section 408(l)(6) requires EPA to establish a time-limited tolerance or exemption from the requirement for a tolerance for pesticide chemical residues in food that will result from the use of a pesticide under an emergency exemption granted by EPA under FIFRA section 18. Such tolerances can be				

established without providing notice or period for public comment.

EPA received requests to extend emergency uses of clothianidin, kasugamycin, methyl bromide, and triclopyr on various commodities for this year's growing season. After having reviewed the submissions, EPA concurs that emergency conditions continue to exist. EPA assessed the potential risks presented by residues of each chemical in or on the pertinent commodities. In doing so, EPA considered the safety standard in FFDCA section 408(b)(2) and decided that the necessary tolerances under FFDCA section 408(l)(6) would be consistent with the safety standard and with FIFRA section 18. The data and other relevant material have been evaluated and were discussed in the final rules originally establishing the time-limited tolerances. Based on those data and information considered, the Agency reaffirms that extensions of the time-limited tolerances will continue to meet the requirements of FFDCA section 408(l)(6). Therefore, the time-limited tolerances are extended until December 31, 2026. Although these tolerances will expire and are revoked on December 31, 2026, under FFDCA section 408(l)(5), residues of the pesticides not in excess of the amounts specified in the tolerances remaining in or on the commodities after that date will not be unlawful, provided the residues are present as a result of an application or use of a pesticide at a time and manner that was lawful under FIFRA, the tolerance was in place at the time of the application, and the residues do not exceed the level that was authorized by the tolerance. EPA will take action to revoke the tolerances earlier if any experience with, scientific data on, or other relevant information on any of these pesticides indicate that the residues are not safe. EPA will publish a document in the **Federal Register** to remove the revoked tolerances from the Code of Federal Regulations (CFR).

Time-limited tolerances for the use of the following pesticide chemicals on specific commodities as noted are being extended:

Clothianidin. Pursuant to a request by the Florida Department of Agriculture and Consumer Services, EPA authorized under FIFRA section 18 the use of clothianidin on citrus for control of the Asian citrus psyllid in Florida. This regulation extends a time-limited tolerance for residues of the insecticide clothianidin and its metabolites and degradates in or on fruit, citrus, group 10–10 at 0.07 parts per million (ppm) for an additional 3-year period. This tolerance will expire and is revoked on

December 31, 2026. The time-limited tolerance was originally published in the **Federal Register** of February 25, 2015 (80 FR 10003) (FRL–9919–59).

Flupyradifurone. The time-limited tolerances are being removed at 40 CFR 180.679(b) for residues of the insecticide flupyradifurone and its metabolites in or on sorghum, syrup at 90.0 ppm and sweet sorghum, forage at 30.0 ppm which expired on December 31, 2022; and in or on sugarcane, cane at 3 ppm and sugarcane, molasses at 90 ppm, which expire on December 31, 2023. The applicant has not submitted a request for further use of flupyradifurone sugarcane; and use on sweet sorghum gained registration under Section 3 of FIFRA. The time-limited tolerances were originally published in the **Federal Register** of June 25, 2021 (86 FR 21944) (FRL–10029–49).

Kasugamycin. Pursuant to a request by the California Department of Pesticide Regulation, EPA authorized under FIFRA section 18 the use of kasugamycin on almonds for control of bacterial blast in California. This regulation extends time-limited tolerances for residues of the pesticide kasugamycin and its metabolites and degradates in or on almond at 0.04 (ppm); and almond hulls at 0.4 ppm for an additional 3-year period. The tolerances will expire and are revoked on December 31, 2026. The time-limited tolerances were originally published in the **Federal Register** of October 8, 2020 (85 FR 63450) (FRL–10013–94).

Methyl bromide. Pursuant to a request by the US Department of Agriculture, Animal and Plant Health Inspection Service, EPA authorized under FIFRA section 18 the use of methyl bromide on certain imported and domestic commodities, post-harvest for control of invasive non-indigenous quarantine plant pests and to prevent the introduction and/or spread of any new or recently introduced foreign pests to the United States. This regulation extends time-limited tolerances for residues of the pesticide methyl bromide, including its metabolites and degradates, in or on the commodities identified in 40 CFR 180.124(b) (and listed in the regulatory text section of this document) at the levels listed for an additional 3-year period. The tolerances will expire and are revoked on December 31, 2026. The time-limited tolerances were originally published in the **Federal Register** of March 1, 2018 (83 FR 8758) (FRL–9971–19) and October 16, 2020 (85 FR 65729) (FRL–10014–31).

Triclopyr. Pursuant to a request by the Louisiana Department of Agriculture

and Forestry, EPA authorized under FIFRA section 18 the use of triclopyr on sugarcane for control of divine nightshade in Louisiana. This regulation extends a time-limited tolerance for residues of the herbicide triclopyr and its metabolites and degradates in or on sugarcane, cane at 40 ppm for an additional 3-year period. The tolerance will expire and is revoked on December 31, 2026. A time-limited tolerance was originally published in the **Federal Register** of June 8, 2017 (82 FR 26599) (FRL–9961–29).

III. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4). The Codex Alimentarius is a joint United Nations Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level.

The Codex has not established any MRLs for flupyradifurone, kasugamycin, methyl bromide, or triclopyr in or on the commodities listed in this document. The Codex has established an MRL for clothianidin in or on citrus at 0.07 ppm, the same as the tolerance established for fruit, citrus, group 10–10 in the United States. Therefore, there are no harmonization issues.

IV. Statutory and Executive Order Reviews

This action establishes tolerances under FFDCA section 408(d). The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled “Regulatory Planning and Review” (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, entitled “Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use” (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled “Protection of Children from Environmental Health Risks and Safety

Risks” (62 FR 19885, April 23, 1997). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled “Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations” (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established in accordance with FFDCA sections 408(e) and 408(l)(6), such as the tolerances in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or Tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or Tribal Governments, on the relationship between the National Government and the States or Tribal

Governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian Tribes. Thus, the Agency has determined that Executive Order 13132, entitled “Federalism” (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled “Consultation and Coordination with Indian Tribal Governments” (65 FR 67249, November 9, 2000) do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

V. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to

publication of the rule in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: October 27, 2023.

Charles Smith,

Director, Registration Division, Office of Pesticide Programs.

Therefore, for the reasons stated in the preamble, EPA is amending 40 CFR chapter I as follows:

PART 180—TOLERANCES AND EXEMPTIONS FOR PESTICIDE CHEMICAL RESIDUES IN FOOD

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.124, revise table 2 to paragraph (b) to read as follows:

§ 180.124 Methyl bromide; tolerances for residues.

* * * * *

(b) * * *

TABLE 2 TO PARAGRAPH (b)

Commodity	Parts per million	Expiration/revocation date
Berry and small fruit, group 13–07	5.0	12/31/26
Cactus	3.0	12/31/26
Coconut, copra	8.0	12/31/26

BILLING CODE 6560–50–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

[Docket No. FWS–HQ–ES–2018–0097; FF09E22000 FXES1113090FEDR 223]

RIN 1018–BD60

Endangered and Threatened Wildlife and Plants; Reinstatement of Endangered Species Act Protections for the Gray Wolf (*Canis Lupus*) in Compliance With Court Order

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), are issuing this final rule to comply with a district court order that vacated our November 3, 2020, rule removing the gray wolf (*Canis lupus*) from the List of Endangered and Threatened Wildlife. As a result of the court’s order, the regulatory protections under the Endangered Species Act of 1973, as amended (Act), apply to the gray wolf in all or portions of the 45 U.S. States and Mexico where the species was listed at the time we issued the delisting

rule. The court order went into effect on February 10, 2022, and is the subject of several consolidated, pending appeals in the Ninth Circuit. While those appeals are pending, the Service is bound by the district court’s order. Thus, this final rule implements the court’s order by correcting the Code of Federal Regulations and officially reinstating threatened status for gray wolf in Minnesota; endangered status for gray wolf in all or portions of the remaining 44 U.S. States and Mexico where the species was listed prior to our November 2020 delisting rule; critical habitat for gray wolf in Minnesota and Michigan; and the rule promulgated under section 4(d) of the Act for gray wolf in Minnesota. Gray wolves in Montana, Idaho, Wyoming, the eastern third of Washington and Oregon, and north-central Utah (collectively, the Northern Rocky Mountains) retain their delisted status and are not affected by this final rule. This rule does not have any effect on the separate listing of the Mexican wolf subspecies (*Canis lupus baileyi*) as endangered under the Act.

DATES: This action is effective November 3, 2023. However, the court order had legal effect immediately upon its filing on February 10, 2022.

ADDRESSES: This final rule is available on the internet at <https://www.regulations.gov> in Docket No. FWS–HQ–ES–2018–0097.

FOR FURTHER INFORMATION CONTACT:

Rachel London, Chief, Branch of Delisting and Foreign Species, Ecological Services, U.S. Fish and Wildlife Service, Headquarters Office, MS:ES, 5275, Leesburg Pike, Falls

Church, VA 22041–3803; telephone (703) 358–2491. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

Background

On November 3, 2020, we published a final rule to remove the gray wolf entities that were listed at that time in the lower 48 United States and Mexico from the Federal List of Endangered and Threatened Wildlife in title 50 of the Code of Federal Regulations (CFR) at 50 CFR 17.11(h) (85 FR 69778; hereafter referred to as “our 2020 delisting rule”). Additional background information on the gray wolf in the lower 48 United States and Mexico and on that rulemaking decision, including previous Federal actions, can be found in our 2020 delisting rule. The rule became effective on January 4, 2021.

Three lawsuits challenging our 2020 delisting rule were filed in the U.S. District Court for the Northern District of California. *Defenders of Wildlife v. U.S. Fish and Wildlife Service*, No. 21–00344 (N.D. Cal.), *WildEarth Guardians v. Bernhardt*, No. 21–00349 (N.D. Cal.), *NRDC v. U.S. Department of the Interior*, No. 21–00561 (N.D. Cal.). On February 10, 2022, the district court vacated and remanded our 2020

delisting rule. That decision reinstated Federal protections that were in place prior to the effective date of our 2020 delisting rule. Therefore, gray wolves are once again listed as threatened in Minnesota and endangered in all or portions of 44 U.S. States and Mexico. See *Effects of the Rule*, below, for a description of the CFR changes resulting from this final rule.

Multiple parties, including the Service, appealed the district court's order to the U.S. Court of Appeals for the Ninth Circuit (Nos. 21–16382, 16383, 16384, 22–15529, 15532, 15534, 15535, 15536, 15537, 15262, 15627, 15628). The parties have been engaged in mediation. On January 26, 2023, the Circuit Mediator issued an order temporarily staying the appeals for administrative purposes until February 2, 2024. During the abeyance, the Service is updating the status review for the gray wolf throughout the lower 48 United States and commencing a stakeholder engagement effort.

Administrative Procedure

To comply with the February 10, 2022, court order, we must reinstate the following:

- Threatened species status for gray wolf in Minnesota,

- Endangered species status for gray wolf in all or portions of 44 U.S. States and Mexico,
- Critical habitat designation for gray wolf in Minnesota and Michigan, and
- A section 4(d) rule for gray wolf in Minnesota.

Therefore, the Director has determined, pursuant to 5 U.S.C. 553(b), that prior notice and opportunity for public comment are impractical and unnecessary. The Director has further determined, pursuant to 5 U.S.C. 553(d), that the agency has good cause to make this rule effective upon publication.

We are also making the following technical revisions to the section 4(d) rule at 50 CFR 17.40(d):

- (1) correcting the misspelling of “Hoodoo Point” in § 17.40(d)(1)(i);
- (2) correcting the misspelling of “the Duluth, Missabe and Iron Range Railroad” in § 17.40(d)(1)(ii);
- (3) substituting a higher quality image of the map of regulatory zones that appears in § 17.40(d)(1)(vi); and
- (4) updating the contact information for providing notifications to the Service in § 17.40(d)(2)(D).

Rather than make these changes in a separate rulemaking, we are combining them with the section 4(d) rule reinstatement for administrative convenience. The Director has

determined, pursuant to 5 U.S.C. 553(b), that prior notice and an opportunity for public comment on these revisions are unnecessary because the changes are insignificant in nature and impact and inconsequential to the public.

Effects of the Rule

As a result of the February 10, 2022, district court order, any and all gray wolves in Minnesota are listed as threatened, and any and all gray wolves in all or portions of 44 U.S. States and Mexico are listed as endangered. In the United States, this includes: all of Alabama, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Massachusetts, Maryland, Maine, Michigan, Missouri, Mississippi, North Carolina, North Dakota, Nebraska, New Hampshire, New Jersey, Nevada, New York, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Virginia, Vermont, West Virginia, and Wisconsin; and portions of Arizona, New Mexico, Oregon, Utah, and Washington (as depicted in figure 1 below and our November 3, 2020, delisting rule; 85 FR 69778 at 69782).

BILLING CODE 4333–15–P

Figure 1. Current legal status of *C. lupus* under the Act in the lower 48 United States and Mexico following the February 10, 2022, court decision. The Northern Rocky Mountains distinct population segment (DPS) and the Mexican wolf nonessential experimental population are not part of the listed entities. All map lines are approximations; see 50 CFR 17.11 and 17.84(k) for exact boundaries.

BILLING CODE 4333–15–C

The reinstated regulations at 50 CFR 17.95(a) designate critical habitat for gray wolf in Minnesota and Michigan, and the reinstated regulations at 50 CFR 17.40(d) govern the regulation of gray wolf in Minnesota. The provisions of these regulations are the same as those in the regulations that were removed by our 2020 delisting rule (November 3, 2020; 85 FR 69778 at 69895).

This rule does not affect the status of gray wolf in Montana, Idaho, Wyoming, the eastern third of Washington and Oregon, and north-central Utah. Wolves in these areas retain their delisted status and will continue to be managed by the States and Tribes. Finally, this rule does not affect the gray wolf's Appendix II status under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES).

Future Actions

By February 2, 2024, the Service intends to submit to the Office of the

Federal Register a proposed rule concerning the listing status of gray wolves in the lower 48 United States under the Act. Our status determination will be based on the best available information as of the time of publication. If the appeals described earlier in this document nonetheless proceed and the district court's order is reversed, then the Service will take appropriate action to comply with and implement the Court of Appeals' judgment, including, if required, publishing another final rule reinstating the Service's 2020 delisting rule.

Authors

The primary authors of this final rule are the staff members of the U.S. Fish and Wildlife Service's Headquarters Office.

List of Subjects in 50 CFR Part 17

Endangered and threatened species, Exports, Imports, Reporting and

recordkeeping requirements, Transportation.

Regulation Promulgation

Accordingly, we amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

- 1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 1531–1544; 4201–4245, unless otherwise noted.

- 2. Amend § 17.11, in paragraph (h), by adding two entries for “Wolf, gray” in alphabetic order under Mammals in the List of Endangered and Threatened Wildlife to read as follows:

§ 17.11 Endangered and threatened wildlife.

■ 3. Amend § 17.40 by adding paragraph (d) to read as follows:

§ 17.40 Special rules—mammals.

(d) Gray wolf (*Canis lupus*) in Minnesota.

(1) *Zones*. For purposes of these regulations, the State of Minnesota is divided into the following five zones:

(i) Zone 1—4,488 square miles. Beginning at the point of intersection of United States and Canadian boundaries in Section 22, Township 71 North, Range 22 West, in Rainy Lake, then proceeding along the west side of Sections 22, 27, and 34 in said Township and Sections 3, 10, 15, 22, 27, and 34 in Township 70 North, Range 22 West and Sections 3 and 10 in Township 69 North, Range 22 West; then east along the south boundaries of Sections 10, 11, and 12 in said Township; then south along the Koochiching and St. Louis Counties line to Highway 53; thence southeasterly along State Highway 53 to the junction with County Route 765; thence easterly along County Route 765 to the junction with Kabetogama Lake in Ash River Bay; thence along the south boundary of Section 33 in Township 69 North, Range

19 West, to the junction with the Moose River; thence southeasterly along the Moose River to Moose Lake; thence along the western shore of Moose Lake to the river between Moose Lake and Long Lake; thence along the said river to Long Lake; thence along the east shore of Long Lake to the drainage on the southeast side of Long Lake in NE 1/4, Section 18, Township 67 North, Range 18 West; thence along the said drainage southeasterly and subsequently northeasterly to Marion Lake, the drainage being in Sections 17 and 18, Township 67 North, Range 18 West; thence along the west shoreline of Marion Lake proceeding southeasterly to the Moose Creek; thence along Moose Creek to Flap Creek; thence southeasterly along Flap Creek to the Vermilion River; thence southerly along the Vermilion River to Vermilion Lake; thence along the Superior National Forest boundary in a southeasterly direction through Vermilion Lake passing these points: Oak Narrows, Muskrat Channel, South of Pine Island, to Hoodoo Point and the junction with County Route 697; thence southeasterly on County Route 697 to the junction with State Highway 169; thence easterly

along State Highway 169 to the junction with State Highway 1; thence easterly along State Highway 1 to the junction with the Erie Railroad tracks at Murphy City; thence easterly along the Erie Railroad tracks to the junction with Lake Superior at Taconite Harbor; thence northeasterly along the North Shore of Lake Superior to the Canadian Border; thence westerly along the Canadian Border to the point of beginning in Rainy Lake.

(ii) Zone 2—1,856 square miles. Beginning at the intersection of the Erie Mining Co. Railroad and State Highway 1 (Murphy City); thence southeasterly on State Highway 1 to the junction with County Road 4; thence southwesterly on County Road 4 to the State Snowmobile Trail (formerly the Alger-Smith Railroad); thence southwesterly to the intersection of the Old Railroad Grade and Reserve Mining Co. Railroad in Section 33 of Township 56 North, Range 9 West; thence northwesterly along the Railroad to Forest Road 107; thence westerly along Forest Road 107 to Forest Road 203; thence westerly along Forest Road 203 to the junction with County Route 2; thence in a northerly direction on County Route 2 to the junction with

Forest Road 122; thence in a westerly direction along Forest Road 122 to the junction with the Duluth, Missabe and Iron Range Railroad; thence in a southwesterly direction along the said railroad tracks to the junction with County Route 14; thence in a northwesterly direction along County Route 14 to the junction with County Route 55; thence in a westerly direction along County Route 55 to the junction with County Route 44; thence in a southerly direction along County Route 44 to the junction with County Route 266; thence in a southeasterly direction along County Route 266 and subsequently in a westerly direction to the junction with County Road 44; thence in a northerly direction on County Road 44 to the junction with Township Road 2815; thence westerly along Township Road 2815 to Alden Lake; thence northwesterly across Alden Lake to the inlet of the Cloquet River; thence northerly along the Cloquet River to the junction with Carrol Trail-State Forestry Road; thence west along the Carrol Trail to the junction with County Route 4 and County Route 49; thence west along County Route 49 to the junction with the Duluth, Winnipeg and Pacific Railroad; thence in a northerly direction along said Railroad to the junction with the Whiteface River; thence in a northeasterly direction along the Whiteface River to the Whiteface Reservoir; thence along the western shore of the Whiteface Reservoir to the junction with County Route 340; thence north along County Route 340 to the junction with County Route 16; thence east along County Route 16 to the junction with County Route 346; thence in a northerly direction along County Route 346 to the junction with County Route 569; thence along County Route 569 to the junction with County Route 565; thence in a westerly direction along County Route 565 to the junction with County Route 110; thence in a westerly direction along County Route 110 to the junction with County Route 100; thence in a north and subsequent west direction along County Route 100 to the junction with State Highway 135; thence in a northerly direction along State Highway 135 to the junction with State Highway 169 at Tower; thence in

an easterly direction along the southern boundary of Zone 1 to the point of beginning of Zone 2 at the junction of the Erie Railroad Tracks and State Highway 1.

(iii) Zone 3—3,501 square miles. Beginning at the junction of State Highway 11 and State Highway 65; thence southeasterly along State Highway 65 to the junction with State Highway 1; thence westerly along State Highway 1 to the junction with State Highway 72; thence north along State Highway 72 to the junction with an un-numbered township road beginning in the northeast corner of Section 25, Township 155 North, Range 31 West; thence westerly along the said road for approximately seven (7) miles to the junction with SFR 95; thence westerly along SFR 95 and continuing west through the southern boundary of Sections 36 through 31, Township 155 North, Range 33 West, through Sections 36 through 31, Township 155 North, Range 34 West, through Sections 36 through 31, Township 155 North, Range 35 West, through Sections 36 and 35, Township 155 North, Range 36 West to the junction with State Highway 89; thence northwesterly along State Highway 89 to the junction with County Route 44; thence northerly along County Route 44 to the junction with County Route 704; thence northerly along County 704 to the junction with SFR 49; thence northerly along SFR 49 to the junction with SFR 57; thence easterly along SFR 57 to the junction with SFR 63; thence south along SFR 63 to the junction with SFR 70; thence easterly along SFR 70 to the junction with County Route 87; thence easterly along County Route 87 to the junction with County Route 1; thence south along County Route 1 to the junction with County Route 16; thence easterly along County Route 16 to the junction with State Highway 72; thence south on State Highway 72 to the junction with a gravel road (un-numbered County District Road) on the north side of Section 31, Township 158 North, Range 30 West; thence east on said District Road to the junction with SFR 62; thence easterly on SFR 62 to the junction with SFR 175; thence south on SFR 175 to the junction with County

Route 101; thence easterly on County Route 101 to the junction with County Route 11; thence easterly on County Route 11 to the junction with State Highway 11; thence easterly on State Highway 11 to the junction with State Highway 65, the point of beginning.

(iv) Zone 4—20,883 square miles. Excluding Zones 1, 2 and 3, all that part of Minnesota north and east of a line beginning on State Trunk Highway 48 at the eastern boundary of the State; thence westerly along Highway 48 to Interstate Highway 35; thence northerly on I-35 to State Highway 23, thence west one-half mile on Highway 23 to State Trunk Highway 18; thence westerly along Highway 18 to State Trunk Highway 65, thence northerly on Highway 65 to State Trunk Highway 210; thence westerly along Highway 210 to State Trunk Highway 6; thence northerly on State Trunk Highway 6 to Emily; thence westerly along County State Aid Highway (CSAH) 1, Crow Wing County, to CSAH 2, Cass County; thence westerly along CSAH 2 to Pine River; thence northwesterly along State Trunk Highway 371 to Backus; thence westerly along State Trunk Highway 87 to U.S. Highway 71; thence northerly along U.S. 71 to State Trunk Highway 200; thence northwesterly along Highway 200, to County State Aid Highway (CSAH) 2, Clearwater County; thence northerly along CSAH 2 to Shevlin; thence along U.S. Highway 2 to Bagley; thence northerly along State Trunk Highway 92 to Gully; thence northerly along CSAH 2, Polk County, to CSAH 27, Pennington County; thence along CSAH 27 to State Trunk Highway 1; thence easterly on Highway 1 to CSAH 28, Pennington County; thence northerly along CSAH 28 to CSAH 54, Marshall County, thence northerly along CSAH 54 to Grygla; thence west and northerly along Highway 89 to Roseau; thence northerly along State Trunk Highway 310 to the Canadian border.

(v) Zone 5—54,603 square miles. All that part of Minnesota south and west of the line described as the south and west border of Zone 4.

(vi) Map of regulatory zones follows:

BILLING CODE 4333-15-P

BILLING CODE 4333-15-C

(2) *Prohibitions.* The following prohibitions apply to the gray wolf in Minnesota.

(i) *Taking.* Except as provided in this paragraph (d)(2)(i) of this section, no person may take a gray wolf in Minnesota.

(A) Any person may take a gray wolf in Minnesota in defense of his own life or the lives of others.

(B) Any employee or agent of the Service, any other Federal land management agency, or the Minnesota Department of Natural Resources, who is designated by his/her agency for such purposes, may, when acting in the course of his or her official duties, take

a gray wolf in Minnesota without a permit if such action is necessary to:

- (1) Aid a sick, injured, or orphaned specimen; or
- (2) Dispose of a dead specimen; or
- (3) Salvage a dead specimen which may be useful for scientific study.

(C) Designated employees or agents of the Service or the Minnesota Department of Natural Resources may

take a gray wolf without a permit in Minnesota, in zones 2, 3, 4, and 5, as delineated in paragraph (d)(l) of this section, in response to depredations by a gray wolf on lawfully present domestic animals: Provided, that such taking must occur within one-half mile of the place where such depredation occurred and must be performed in a humane manner: And provided further, that any young of the year taken on or before August 1 of that year must be released.

(D) Any taking pursuant to paragraph (d)(2)(i)(A), (d)(2)(i)(B), or (d)(2)(i)(C) of this section must be reported by email to the Twin Cities Ecological Service Field Office at twincities@fws.gov within 5 days. The specimen may only be retained, disposed of, or salvaged in accordance with directions from the Service.

(E) Any employee or agent of the Service or the Minnesota Department of Natural Resources, when operating under a Cooperative Agreement with the Service signed in accordance with section 6(c) of the Endangered Species Act of 1973, who is designated by the Service or the Minnesota Department of Natural Resources for such purposes,

may, when acting in the course of his or her official duties, take a gray wolf in Minnesota to carry out scientific research or conservation programs.

(ii) *Export and commercial transactions.* Except as may be authorized by a permit issued under § 17.32, no person may sell or offer for sale in interstate commerce, import or export, or in the course of a commercial activity transport, ship, carry, deliver, or receive any Minnesota gray wolf.

(iii) *Unlawfully taken wolves.* No person may possess, sell, deliver, carry, transport, or ship, by any means whatsoever, a gray wolf taken unlawfully in Minnesota, except that an employee or agent of the Service, or any other Federal land management agency, or the Minnesota Department of Natural Resources, who is designated by his/her agency for such purposes, may, when acting in the course of his official duties, possess, deliver, carry, transport, or ship a gray wolf taken unlawfully in Minnesota.

(3) *Permits.* All permits available under § 17.32 (General Permits—Threatened Wildlife) are available with regard to the gray wolf in Minnesota. All the terms and provisions of § 17.32

apply to such permits issued under the authority of this paragraph (d)(3).

* * * * *

■ 4. Amend § 17.95, in paragraph (a), by adding an entry for “Gray Wolf (*Canis lupus*)” after the entry for “Amargosa Vole (*Microtus californicus scirpensis*)” to read as follows:

§ 17.95 Critical habitat—fish and wildlife.

(a) *Mammals.*
* * * * *

Gray Wolf (*Canis Lupus*)

Michigan. Isle Royale National Park.
Minnesota. Areas of land, water, and airspace in Beltrami, Cook, Itasca, Koochiching, Lake, Lake of the Woods, Roseau, and St. Louis Counties, with boundaries (4th and 5th Principal meridians) identical to those of zones 1, 2, and 3, as delineated in 50 CFR 17.40(d)(l).

Stephen Guertin,
Acting Director, U.S. Fish and Wildlife Service.

Proposed Rules

Federal Register

Vol. 88, No. 212

Friday, November 3, 2023

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 25

[Docket No. FAA–2021–1032; Notice No. 25–23–03–SC]

Special Conditions: Airbus Model A321neo XLR Airplanes; Flight Envelope Protection, Icing and Non-Icing Conditions; High Incidence Protection.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This action proposes special conditions for the Airbus Model A321neo XLR airplane. The airplane will have a novel or unusual design feature when compared to the state of technology envisioned in the airworthiness standards for transport-category airplanes. This design feature is associated with flight-envelope protections, in icing and non-icing conditions, that use high-incidence protection and an alpha-floor system to automatically advance throttles when the airplane angle of attack reaches a predetermined value. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: Send comments on or before December 4, 2023.

ADDRESSES: Send comments identified by Docket No. FAA–2021–1032 using any of the following methods:

Federal eRegulations Portal: Go to <https://www.regulations.gov/> and follow the online instructions for sending your comments electronically.

Mail: Send comments to Docket Operations, M–30, U.S. Department of Transportation (DOT), 1200 New Jersey

Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

Hand Delivery or Courier: Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: Fax comments to Docket Operations at 202–493–2251.

Docket: Background documents or comments received may be read at <https://www.regulations.gov/> at any time. Follow the online instructions for accessing the docket or go to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Troy Brown, Performance and Environment Unit, AIR–621A, Technical Policy Branch, Policy and Standards Division, Aircraft Certification Service, Federal Aviation Administration, 1801 S. Airport Rd., Wichita, KS 67209–2190; telephone and fax 405–666–1050; email troy.a.brown@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites interested people to take part in this rulemaking by sending written comments, data, or views. The most helpful comments reference a specific portion of the proposed special conditions, explain the reason for any recommended change, and include supporting data.

Certification of the Airbus Model A321neo XLR airplane is currently scheduled for December 2023. The substance of these special conditions, in all material respects, has been subject to the notice and public-comment procedure in several prior instances. Therefore, because a delay would significantly affect the applicant's installation of the novel or unusual design feature, and delay certification of the airplane, the FAA is reducing the public-comment period to 30 days.

The FAA will consider all comments received by the closing date for comments, and will consider comments filed late if it is possible to do so without incurring delay. The FAA may change these special conditions based on the comments received.

Privacy

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in title 14, Code of Federal Regulations (14 CFR) 11.35, the FAA will post all comments received without change to <https://www.regulations.gov/>, including any personal information you provide. The FAA will also post a report summarizing each substantive verbal contact received about these special conditions.

Confidential Business Information

Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to these special conditions contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to these special conditions, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and the indicated comments will not be placed in the public docket of these special conditions. Send submissions containing CBI to the individual listed in the **FOR FURTHER INFORMATION CONTACT** section below. Comments the FAA receives, which are not specifically designated as CBI, will be placed in the public docket for these special conditions.

Background

On September 16, 2019, Airbus applied for an amendment to Type Certificate No. A28NM to include the new Model A321neo XLR airplane. These airplanes are twin-engine, transport-category airplanes with seating for 244 passengers and a maximum take-off weight of 222,000 pounds.

Type Certification Basis

Under the provisions of 14 CFR 21.101, Airbus must show that the Model A321neo XLR airplane meets the applicable provisions of the regulations

listed in Type Certificate No. A28NM, or the applicable regulations in effect on the date of application for the change, except for earlier amendments as agreed upon by the FAA.

If the Administrator finds that the applicable airworthiness regulations (e.g., 14 CFR part 25) do not contain adequate or appropriate safety standards for the Airbus Model A321neo XLR airplanes because of a novel or unusual design feature, special conditions are prescribed under the provisions of § 21.16.

Special conditions are initially applicable to the model for which they are issued. Should the type certificate for that model be amended later to include any other model that incorporates the same novel or unusual design feature, or should any other model already included on the same type certificate be modified to incorporate the same novel or unusual design feature, these special conditions would also apply to the other model under § 21.101.

In addition to the applicable airworthiness regulations and special conditions, the Airbus Model A321neo XLR airplane must comply with the fuel-vent and exhaust-emission requirements of 14 CFR part 34, and the noise-certification requirements of 14 CFR part 36.

The FAA issues special conditions, as defined in § 11.19, in accordance with § 11.38, and they become part of the type certification basis under 14 CFR 21.101.

Novel or Unusual Design Features

The Airbus Model A321neo XLR airplane will incorporate the following novel or unusual design feature:

Flight-envelope protections, in icing and non-icing conditions, that use high-incidence protection and an alpha-floor function to automatically advance throttles when the airplane angle of attack (AoA) reaches a predetermined value.

Discussion

The current airworthiness standards do not contain adequate safety standards for the high-incidence protection system and the alpha-floor system for the Airbus Model A321neo XLR series airplanes. This is because the current standards were designed for more traditional electronic flight control systems (EFCS), which involve less advanced envelope protections, such as stick shakers and pushers. These special conditions address the more advanced flight envelope protections, including icing and non-icing conditions, that are

part of the EFCS design of the A321neo XLR airplane.

The high-incidence protection system prevents the airplane from stalling and, therefore, the stall warning system is not needed during normal flight conditions. However, during failure conditions, which are not shown to be extremely improbable, the requirements of 14 CFR 25.203 and 25.207 apply, although slightly modified. If there are failures not shown to be extremely improbable, the flight characteristics at the angle-of-attack for C_{LMAX} must be suitable in the traditional sense, and stall warning must be provided in a conventional manner. These special conditions address the need for modification during icing conditions and non-icing conditions.

The alpha-floor function automatically advances the throttles on the operating engines under flight circumstances of low speed if the airplane reaches a predetermined high AoA. This function is intended to provide increased climb capability.

These special conditions address these novel or unusual design features on the Airbus Model A321neo XLR and contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

Applicability

As discussed above, these special conditions apply to Airbus Model A321neo XLR airplane. Should Airbus apply later for a change to the type certificate to include another model incorporating the same novel or unusual design feature, the special conditions would apply to that model as well.

Conclusion

This action affects only certain novel or unusual design features on one model series of airplanes. It is not a rule of general applicability.

List of Subjects in 14 CFR Part 25

Aircraft, Aviation safety, Reporting and recordkeeping requirements.

Authority Citation

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40113, 44701, 44702, and 44704.

The Proposed Special Conditions

Accordingly, the Federal Aviation Administration (FAA) proposes the following special conditions as part of the type certification basis for Airbus Model A321neo XLR airplane. These special conditions are issued in lieu of

the paragraphs of 14 CFR part 25 referenced below.

Foreword

In the following paragraphs, “In icing conditions” means with the ice accretions, relevant for the flight phase, as defined in part 25, amendment 121, appendix C.

(a) Definitions

These special conditions address novel or unusual design features of the Airbus A321neo XLR and use terminology that does not appear in part 25. For the purpose of these special conditions, the following terms describe certain aspects of these novel or unusual design features:

High-Incidence Protection System Angle-of-Attack Limiting Function

A system that operates directly and automatically on the airplane's flying controls to limit the maximum angle of attack (AoA) that can be attained to a value below that at which an aerodynamic stall would occur.

Alpha-Floor System

A system that automatically increases thrust on the operating engines when AoA increases through a particular value.

Alpha Limit

The maximum angle of attack at which the airplane stabilizes with the high-incidence protection system operating and the longitudinal control held on its aft stop.

V_{CLmax}

An airspeed calculated from a variety of factors, including load factor normal to the flight path at V_{CLmax} , airplane gross weight, aerodynamic reference wing area, and dynamic pressure.

V_{min}

The minimum steady flight speed in the airplane configuration under consideration with the high-incidence protection system operating.

V_{min1g}

V_{min} corrected to 1g conditions. This is the minimum calibrated airspeed at which the airplane can develop a lift force normal to the flight path and equal to its weight when at an angle of attack not greater than that determined for V_{min} .

(b) Capability and Reliability of the High-Incidence Protection System

Acceptable capability and reliability of the high-incidence protection system can be established by flight test, simulation, and analysis, as appropriate.

The capability and reliability required are as follows:

(1) It must not be possible, during pilot-induced maneuvers, to encounter a stall; and handling characteristics must be acceptable, as required by condition (e) of these Special Conditions.

(2) The airplane must be protected against stalling due to the effects of wind-shears and gusts at low speeds as required by condition (f) of these Special Conditions.

(3) The ability of the high-incidence protection system to accommodate any reduction in stalling incidence must be verified in icing conditions.

(4) The high-incidence protection system must be provided in each abnormal configuration of the high-lift devices that are likely to be used in-flight following system failures.

(5) The reliability of the system and the effects of failures must be acceptable in accordance with § 25.1309.

(c) Minimum Steady Flight Speed and Reference Stall Speed

In lieu of § 25.103, minimum steady flight speed and reference stall speed, the following requirements apply:

(1) The minimum steady flight speed, V_{min} , is the final stabilized calibrated airspeed obtained when the airplane is decelerated until the longitudinal control is on its stop in such a way that the entry rate does not exceed 1 knot per second.

(2) The minimum steady flight speed, V_{min} , must be determined in icing and non-icing conditions with:

- (i) The high-incidence protection system operating normally;
- (ii) Idle thrust and alpha-floor system inhibited;
- (iii) All combinations of flaps setting and landing gear position for which V_{min} is required to be determined;
- (iv) The weight used when the reference stall speed, V_{SR} , is being used as a factor to determine compliance with a required performance standard;
- (v) The most unfavorable center of gravity allowable; and
- (vi) The airplane trimmed for straight flight at a speed achievable by the automatic trim system.

(3) The 1g minimum steady flight speed, V_{min1g} , is the minimum calibrated airspeed at which the airplane can develop a lift force (normal to the flight path) equal to its weight, while at an angle of attack not greater than that at which the minimum steady flight speed of condition (c)(1), above, was determined. It must be determined in icing and non-icing conditions.

(4) The reference stall speed, V_{SR} , is a calibrated airspeed the applicant defines. V_{SR} may not be less than a 1g

stall speed. V_{SR} must be determined in non-icing conditions and expressed as:

$$V_{SR} \geq \frac{V_{CLMAX}}{\sqrt{n_{ZW}}}$$

Where:

V_{CLMAX} = Calibrated airspeed obtained when the load factor corrected lift coefficient ($n_{ZW} W/qS$) is first a maximum during the maneuver prescribed in condition (c)(5)(viii) of these Special Conditions;

n_{ZW} = Load factor normal to the flight path at V_{CLMAX} ;

W = Airplane gross weight;

S = Aerodynamic reference wing area; and

q = Dynamic pressure.

(5) V_{CLMAX} is determined in non-icing conditions with:

(i) Engines idling, or, if that resultant thrust causes an appreciable decrease in stall speed, not more than zero thrust at the stall speed;

(ii) The airplane in other respects (such as flaps and landing gear) in the condition existing in the test or performance standard in which V_{SR} is being used;

(iii) The weight used when V_{SR} is being used as a factor to determine compliance with a required performance standard;

(iv) The center of gravity position that results in the highest value of reference stall speed;

(v) The airplane trimmed for straight flight at a speed achievable by the automatic trim system, but not less than $1.13 V_{SR}$ and not greater than $1.3 V_{SR}$;

(vi) Alpha-floor system inhibited; and

(vii) The high-incidence protection system adjusted, at the option of the applicant, to allow higher incidence than is possible with the normal production system.

(viii) Starting from the stabilized trim condition, apply the longitudinal control to decelerate the airplane so that the speed reduction does not exceed 1 knot per second.

(d) Stall Warning

In lieu of § 25.207, the following requirements apply:

(1) Normal Operation.

If the capabilities of the high-incidence protection system are met, then condition (b) of these Special Conditions are satisfied. These conditions provide an equivalent level of safety to § 25.207, Stall Warning, so the provision of an additional, unique warning device is not required.

(2) High-Incidence Protection System Failure.

(i) In non-icing conditions, following failures of the high-incidence protection system, not shown to be extremely

improbable, such that the capability of the system no longer satisfies conditions (b)(1), (2), and (3) of these Special Conditions, stall warning must be provided in accordance with § 25.207(a), (b), and (f).

(ii) In icing conditions, after a failure leading to the loss of the high-incidence protection system, a safety margin not less than 3 percent or 3 knots between stall warning and stall must be maintained.

(e) Handling Characteristics at High Incidence

(1) High Incidence Handling Demonstrations.

In lieu of § 25.201: High-incidence handling demonstration in icing and non-icing conditions:

(i) Maneuvers to the limit of the longitudinal control, in the nose up sense, must be demonstrated in straight flight and in 30-degree banked turns with:

(A) The high-incidence protection system operating normally.

(B) Initial power conditions of:

(1) Power off.

(2) The power necessary to maintain level flight at $1.5 V_{SR1}$, where V_{SR1} is the reference stall speed with flaps in approach position, the landing gear retracted, and maximum landing weight.

(C) Alpha-floor system operating normally unless more severe conditions are achieved with inhibited alpha floor.

(D) Flaps, landing gear, and deceleration devices in any likely combination of positions.

(E) Representative weights within the range for which certification is requested; and

(F) The airplane trimmed for straight flight at a speed achievable by the automatic trim system.

(ii) The following procedures must be used to show compliance in non-icing and icing conditions:

(A) Starting at a speed sufficiently above the minimum steady flight speed to ensure that a steady rate of speed reduction can be established, apply the longitudinal control so that the speed reduction does not exceed 1 knot per second until the control reaches the stop.

(B) The longitudinal control must be maintained at the stop until the airplane has reached a stabilized flight condition, and must then be recovered through normal recovery techniques.

(C) Maneuvers with increased deceleration rates:

(1) In non-icing conditions, the requirements must also be met with increased rates of entry to the incidence limit, up to the maximum rate achievable.

(2) In icing conditions, with the anti-ice system working normally, the requirements must also be met with increased rates of entry to the incidence limit up to 2 knots per second.

(D) Maneuvers with ice accretion prior to operation of the normal anti-ice system: With the ice accretion prior to operation of the normal anti-ice system, the requirement must also be met in deceleration at 1 knot per second up to full back stick maintained for at least 3 seconds before normal recovery is performed (requirement to be met with and without alpha floor operating).

(2) Characteristics in High-Incidence Maneuvers.

In lieu of § 25.203: Characteristics in High Incidence.

In icing and non-icing conditions:

(i) Throughout maneuvers with a rate of deceleration of not more than 1 knot per second, both in straight flight and in 30-degree banked turns, the airplane's characteristics must be as follows:

(A) The airplane must not exhibit abnormal nose-up pitching.

(B) The airplane must not exhibit uncommanded nose-down pitching, which would be indicative of stall. However, reasonable attitude changes associated with stabilizing the incidence at alpha limit, as the longitudinal control reaches the stop, would be acceptable.

(C) The airplane must not exhibit uncommanded lateral or directional motion, and the pilot must retain good lateral and directional control through conventional use of the controls, throughout the maneuver.

(D) Buffeting:

(1) In non-icing conditions, the airplane must not exhibit buffeting of a magnitude and severity that would act as a deterrent from completing the maneuver specified in condition (e)(1)(i) of these Special Conditions.

(2) In icing conditions, the airplane may exhibit buffeting of a stronger magnitude and severity than in non-icing conditions, provided that the airplane is demonstrated to be free from excessive vibration and buffeting over the range of speeds adequate for normal operation.

(ii) In maneuvers with increased rates of deceleration, some degradation of characteristics are acceptable, associated with a transient excursion beyond the stabilized alpha limit. However, the airplane must not exhibit dangerous characteristics, nor characteristics that would deter the pilot from holding the longitudinal control on the stop for a period of time appropriate to the maneuver.

(iii) The pilot must always be able to reduce incidence through conventional use of the controls.

(iv) The rate at which the airplane can be maneuvered from trim speeds associated with scheduled operating speeds such as V_2 and V_{ref} , up to alpha limit, must not be unduly damped or be significantly slower than can be achieved on conventionally controlled transport airplanes.

(3) Characteristics up to V_{CLmax} .

Maneuvers with a rate of deceleration of not more than 1 knot per second, up to the angle of attack at which V_{CLmax} was obtained as defined in condition (c)(4) of these Special Conditions, must be demonstrated in straight flight and in 30-degree banked turns with:

(i) The high-incidence protection system deactivated or adjusted, at the option of the applicant, to allow higher incidence than is possible with the normal production system,

(ii) Alpha-floor system inhibited,

(iii) Engines idling,

(iv) Flaps and landing gear in any likely combination of positions, and

(v) The airplane trimmed for straight flight at a speed achievable by the automatic trim system.

During such maneuvers, the airplane must not exhibit dangerous characteristics; the pilot must always be able to reduce angle of attack by conventional use of the controls. The pilot must retain good lateral and directional control, by conventional use of the controls, throughout the maneuver.

(f) Atmospheric Disturbances

Operation of the high-incidence protection system must not adversely affect airplane control during expected levels of atmospheric disturbances, nor impede the application of recovery procedures in case of wind shear. This must be demonstrated in non-icing conditions only, and must allow for drawing conclusion for icing conditions without further demonstration.

(g) Speed Associated With Other Requirements

The design must meet the following modified requirements:

a. Section 25.145(a): V_{min} in lieu of "stall identification."

b. Section 25.145(b): V_{min} in lieu of V_{sw} .

c. Section 25.1323(d): "From 1.23 V_{SR} to V_{min} " in lieu of "1.23 V_{SR} to stall warning speed" and "speeds below V_{min} " in lieu of "speeds below stall warning."

(h) Alpha Floor

In icing and non-icing conditions, the alpha-floor setting must be such that the

airplane can be flown at the speeds and bank angles specified in § 25.143(h). The applicant also must show that the alpha-floor setting does not interfere with normal maneuvering of the airplane. In addition, the airplane must exhibit no alpha-floor triggering unless appropriate when the airplane is flown in usual operational maneuvers and in turbulence.

(i) Proof of Compliance

In addition to the requirements in § 25.21(b), the following requirement applies:

The flying qualities will be evaluated at the most unfavorable center-of-gravity (CG) position.

(j) Performance in Icing Conditions

(1) Take-off

In lieu of compliance with § 25.105(a)(2)(i), the following special conditions apply:

(a) In icing conditions, if in the configuration used in showing compliance with § 25.121(b), and with the most critical of the "Take-off Ice" accretion(s) defined in 14 CFR part 25, amendment 121, appendix C:

(i) The V_2 speed scheduled in non-icing conditions does not provide the maneuvering capability specified in § 25.143(h) for the take-off configuration.

Note: This requirement does not apply if the V_{min1g} is increased in icing conditions, with the "Take-off Ice" accretion defined in part 25, amendment 121, appendix C, by less than 2.5 knots or 2.5 percent, whichever is greater.

(2) Climb: one-engine inoperative.

In lieu of compliance with § 25.121(b)(2)(ii)(A), the following special conditions apply:

(a) In icing conditions, with the most critical of the take-off ice accretion(s) defined in appendix C, if in the configuration used to show compliance with § 25.121(b) with this take-off ice accretion:

(i) The V_2 speed scheduled in non-icing conditions does not provide the maneuvering capability specified in § 25.143(h), for the take-off configuration.

Note: This requirement does not apply if the V_{min1g} is increased in icing conditions, with the "Take-off Ice" accretion defined in 14 CFR part 25, amendment 121, appendix C, by less than 2.5 knots or 2.5 percent, whichever is greater.

In lieu of compliance with § 25.121(c)(2)(ii)(A) and (B), the following special conditions apply:

(a) In icing conditions, with the most critical of the final take-off ice accretion(s) defined in appendix C, if in

the configuration used to show compliance with § 25.121(b) with the take-off ice accretion used to show compliance with § 25.111(c)(5)(i):

(i) The V_{FTO} (final take-off speed) scheduled in non-icing conditions does not provide the maneuvering capability, specified in § 25.143(h), for the en-route configuration.

Note: This requirement does not apply if the V_{min1g} is increased in icing conditions, with the “Final Take-off Ice” accretion defined in 14 CFR part 25, amendment 121, appendix C, by less than 2.5 knots or 2.5 percent, whichever is greater.

(ii) The degradation of the gradient of climb, determined in accordance with § 25.121(b), with the take-off ice accretion used in showing compliance with § 25.111(c)(5)(i), is greater than one-half of the applicable actual-to-net take-off flight path gradient reduction defined in § 25.115(b);

In lieu of compliance with 25.121(d)(2)(ii), the following special conditions apply:

(a) In icing conditions, with the most critical of the approach ice accretion(s) defined in 14 CFR part 25, amendment 121, appendix C, as applicable, in a configuration corresponding to the normal all-engines-operating procedure, the V_{min1g} for this configuration does not exceed 110 percent of the V_{min1g} for the related all-engines-operating landing configuration in icing conditions, with a climb speed established with normal landing procedures, but not more than 1.4 V_{SR} (V_{SR} determined in non-icing conditions).

(3) En-route flight paths.

In lieu of compliance with 25.123(b)(2)(i), the following special conditions apply:

(a) In icing conditions with the most critical of the en-route ice accretion(s) defined in 14 CFR part 25, amendment 121, appendix C, if:

(i) The V_{FTO} speed scheduled in non-icing conditions does not provide the maneuvering capability, specified in § 25.143(h), for the en-route configuration.

Issued in in Kansas City, Missouri, on October 27, 2023.

Patrick R. Mullen,

Manager, Technical Policy Branch, Policy and Standards Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 25

[Docket No. FAA–2021–1034; Notice No. 25–23–02–SC]

Special Conditions: Airbus Model A321neo XLR Airplane; Electronic Flight-Control System: Lateral-Directional and Longitudinal Stability, and Low-Energy Awareness.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This action proposes special conditions for the Airbus Model A321neo XLR airplane. The airplane will have a novel or unusual design feature when compared to the state of technology envisioned in the airworthiness standards for transport-category airplanes. This design feature is an electronic flight-control system (EFCS) associated with lateral-directional and longitudinal stability, and low-energy awareness. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: Send comments on or before December 4, 2023.

ADDRESSES: Send comments identified by Docket No. FAA–2021–1034 using any of the following methods:

Federal eRegulations Portal: Go to <https://www.regulations.gov/> and follow the online instructions for sending your comments electronically.

Mail: Send comments to Docket Operations, M–30, U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

Hand Delivery or Courier: Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: Fax comments to Docket Operations at 202–493–2251.

Docket: Background documents or comments received may be read at <https://www.regulations.gov/> at any time. Follow the online instructions for accessing the docket or go to Docket

Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites interested people to take part in this rulemaking by sending written comments, data, or views. The most helpful comments reference a specific portion of the proposed special conditions, explain the reason for any recommended change, and include supporting data.

Certification of the Airbus Model A321neo XLR airplane is currently scheduled for December 2023. The substance of these special conditions, in all material respects, has been subject to the notice and public-comment procedure in several prior instances. Therefore, because a delay would significantly affect the applicant's installation of the new or unusual feature, and delay certification of the airplane, the FAA is reducing the public-comment period to 30 days.

The FAA will consider all comments received by the closing date for comments, and will consider comments filed late if it is possible to do so without incurring delay. The FAA may change these special conditions based on the comments received.

Privacy

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in title 14, Code of Federal Regulations (14 CFR) 11.35, the FAA will post all comments received without change to <https://www.regulations.gov/>, including any personal information you provide. The FAA will also post a report summarizing each substantive verbal contact received about these special conditions.

Confidential Business Information

Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your

comments responsive to these special conditions contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to these special conditions, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as "PROPIN." The FAA will treat such marked submissions as confidential under the FOIA, and the indicated comments will not be placed in the public docket of these special conditions. Send submissions containing CBI to the individual listed in the For Further Information Contact section below. Comments the FAA receives, which are not specifically designated as CBI, will be placed in the public docket for these special conditions.

Background

On September 16, 2019, Airbus applied for an amendment to Type Certificate No. A28NM to include the new Model A321neo XLR airplane. These airplanes are twin-engine, transport-category airplanes with seating for 244 passengers and a maximum takeoff weight of 222,000 pounds.

Static Lateral-Directional Stability

The EFCS on the Airbus Model A321neo XLR airplane contains fly-by-wire control laws that can result in neutral static lateral-directional stability. Therefore, the airplane does not meet the conventional requirements in the regulations which require positive static lateral-directional stability.

Positive static directional stability is defined as the tendency to recover from a skid with the rudder free. Positive static lateral stability is defined as the tendency to raise the low wing in a sideslip with the aileron controls free. These control criteria are intended to accomplish the following:

- (a) Provide additional cues of inadvertent sideslips and skids through control-force changes.
- (b) Ensure that short periods of unattended operation do not result in any significant changes in yaw or bank angle.
- (c) Provide predictable roll and yaw response.
- (d) Provide an acceptable level of pilot attention (workload) to attain and maintain a coordinated turn.

Neutral static lateral-directional stability, conversely, means that the airplane will stay in its new attitude when disturbed by an external force (e.g., crosswind). Therefore, the

regulations under 14 CFR 25.171 for the Airbus Model A321neo XLR airplane are inadequate.

Static Longitudinal Stability

Static longitudinal stability on airplanes with mechanical links to the pitch-control surface means that a pull force on the controller results in a reduction in speed relative to the trim speed, and a push force results in higher than trim speed. Longitudinal stability is required by the regulations for the following reasons:

- (a) Speed-change cues are provided to the pilot through increased and decreased forces on the controller.
- (b) Short periods of unattended control of the airplane do not result in significant changes in attitude, airspeed, or load factor.
- (c) A predictable pitch response is provided to the pilot.
- (d) An acceptable level of pilot attention (workload) to attain and maintain trim speed and altitude is provided to the pilot.
- (e) Longitudinal stability provides gust stability.

The pitch-control movement of the side stick on the Airbus Model A321neo XLR airplane is designed to be a normal load factor, or "g" command, that results in an initial movement of the elevator surface to attain the commanded load factor that is then followed by integrated movement of the stabilizer and elevator to automatically trim the airplane to a neutral, 1g, stick-free stability. The flight path commanded by the initial side-stick input will remain stick-free until the pilot provides another command. This control function is applied during "normal" control law within the speed range, from initiation of the angle-of-attack protection limit, $V_{\alpha_{prot}}$, to V_{MO}/M_{MO} . Once outside this speed range, the control laws introduce the conventional longitudinal static stability as described above.

As a result of neutral static stability, the Airbus Model A321neo XLR airplane does not meet the regulatory requirements for static longitudinal stability during normal operations.

Low Energy Awareness

Past experience on airplanes fitted with a flight-control system providing neutral longitudinal stability reveals insufficient feedback cues to the pilot of excursion below normal operational speeds. The maximum angle-of-attack protection system limits the airplane angle of attack and prevents stall during normal operating speeds, but this EFCS is not sufficient to prevent stall at low-speed excursions below normal

operational speeds. Until intervention, there are no stability cues because the aircraft remains trimmed. Additionally, feedback from the pitching moment due to thrust variation is reduced by the flight-control laws. Low-speed excursions may become more hazardous without the typical longitudinal stability, and recovery is more difficult when the low-speed situation is associated with a low altitude, and with the engines at low thrust or with performance-limiting conditions.

Type Certification Basis

Under the provisions of 14 CFR 21.101, Airbus must show that the Model A321neo XLR airplane meets the applicable provisions of the regulations listed in Type Certificate No. A28NM, or the applicable regulations in effect on the date of application for the change, except for earlier amendments as agreed upon by the FAA.

If the Administrator finds that the applicable airworthiness regulations (e.g., 14 CFR part 25) do not contain adequate or appropriate safety standards for the Airbus Model A321neo XLR airplane because of a novel or unusual design feature, special conditions are prescribed under the provisions of § 21.16.

Special conditions are initially applicable to the model for which they are issued. Should the type certificate for that model be amended later to include any other model that incorporates the same novel or unusual design feature, or should any other model already included on the same type certificate be modified to incorporate the same novel or unusual design feature, these special conditions would also apply to the other model under § 21.101.

In addition to the applicable airworthiness regulations and special conditions, the Airbus Model A321neo XLR airplane must comply with the fuel-vent and exhaust-emission requirements of 14 CFR part 34, and the noise-certification requirements of 14 CFR part 36.

The FAA issues special conditions, as defined in § 11.19, in accordance with § 11.38, and they become part of the type certification basis under § 21.101.

Novel or Unusual Design Features

The Airbus Model A321neo XLR airplane will incorporate the following novel or unusual design feature:

An electronic flight-control system (EFCS) associated with lateral-directional and longitudinal stability, and low-energy awareness.

Discussion

In the absence of positive lateral stability, the curve of lateral control-surface deflections against sideslip angle should be, in a conventional sense and reasonably in harmony with, rudder deflection during steady-heading sideslip maneuvers.

Because conventional relationships between stick forces and control-surface displacements do not apply to the “load-factor command” flight-control system on the Airbus Model A321neo XLR airplane, longitudinal stability characteristics should be evaluated by assessing the airplane’s handling qualities during simulator and flight-test maneuvers appropriate to operation of the airplane. Additionally, there is recognition that under icing and non-icing conditions, there may be a difference in full pedal deflection. This difference may result in changes to testing before reaching full pedal and the special conditions account for these differences.

The airplane must provide adequate awareness cues to the pilot of a low-energy (low-speed/low-thrust/low-height) state to ensure that the airplane retains sufficient energy to recover when flight-control laws provide neutral longitudinal stability significantly below the normal operating speeds. “Adequate awareness” means that information must be provided to alert the crew of unsafe operating conditions and to enable them to take appropriate corrective action. Testing of these awareness cues should occur by simulator and flight test in the operational flight envelope for which certification is requested. Testing should include a sufficient number of tests to allow the level of energy awareness, and the effects of energy-management errors, to be assessed.

These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

Applicability

As discussed above, these special conditions apply to Airbus Model A321neo XLR airplane. Should Airbus apply later for a change to the type certificate to include another model incorporating the same novel or unusual design feature, the special conditions would apply to that model as well.

Conclusion

This action affects only certain novel or unusual design features on one model series of airplanes. It is not a rule of general applicability.

List of Subjects in 14 CFR Part 25

Aircraft, Aviation safety, Reporting and recordkeeping requirements.

Authority Citation

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40113, 44701, 44702, and 44704.

The Proposed Special Conditions

Accordingly, the Federal Aviation Administration (FAA) proposes the following special conditions as part of the type certification basis for Airbus Model A321neo XLR airplane. These special conditions are issued in lieu of the paragraphs of 14 CFR part 25 referenced below.

Static Lateral-Directional Stability

(a) In lieu of compliance with § 25.171, the airplane must have lateral and directional stability characteristics in accordance with § 25.177. In addition, both suitable stability and suitable control feel are required in any condition normally encountered in service.

(b) In lieu of compliance with § 25.177(c), the following requirement must be met for the configurations and speed specified in § 25.177(a).

(1) In straight, steady sideslips over the range of sideslip angles appropriate to the operation of the airplane, the directional control movements and forces must be substantially proportional to the angle of sideslip in a stable sense. The factor of proportionality must lie between limits found necessary for safe operation. During these straight, steady sideslips, necessary lateral control movements and forces must not be in the unstable sense with the exception of speeds above V_{mo}/M_{mo} per § 25.177(b)(2). The range of sideslip angles evaluated must include those sideslip angles resulting from the lesser of:

(i) One-half of the available directional (pedal) control input; and
(ii) A directional (pedal) control force of 180 pounds.

(c) In lieu of compliance with § 25.177(d), the following requirements must be met:

(2) In non-icing conditions, for sideslip angles greater than those prescribed by § 25.177(a), up to the angle at which full rudder control is used or a rudder control force of 180 pounds is obtained, the rudder control forces may not reverse, and increased rudder deflection must be needed for increased angles of sideslip. Compliance with this requirement must be shown using straight, steady sideslips, unless

full lateral control input is achieved before reaching either full rudder control input or a rudder control force of 180 pounds; a straight, steady sideslip need not be maintained after achieving full lateral control input. This requirement must be met at all approved landing gear and flap positions for the range of operating speeds and power conditions appropriate to each landing gear and flap position with all engines operating.

(3) In icing conditions, in the configurations listed below, trim the airplane at the specified speed and conduct steady heading sideslips over the range of sideslip angles appropriate to the operation of the airplane but not less than those obtained with one-half of available rudder control input.

(i) High lift devices retracted configuration: trim at best rate of climb speed but not less than minimum all engines operating climb speed defined for icing conditions.

(ii) Lowest lift take-off configuration: trim at the all engines operating initial climb speed defined for icing conditions.

(iii) Landing configurations: trim at minimum landing speed defined for icing conditions.

Longitudinal Stability

In lieu of compliance with the requirements of §§ 25.171, 25.173, and 25.175, the airplane must be shown to have longitudinal stability characteristics in accordance with the following conditions. In addition, both suitable stability and suitable control feel are required in any condition normally encountered in service, including the effects of atmospheric disturbance.

(a) Strong positive static longitudinal stability (1 pound per 6 knots applied through the sidestick) must be present which provides adequate awareness cues to the crew that the speed is above V_{mo}/M_{mo} or below the minimum speed for hands-free stabilized flight. Static longitudinal characteristics must be shown to be suitable based on the airplane handling qualities, including an evaluation of pilot workload and pilot compensation, for specific test procedures during the flight-test evaluations. These characteristics must be shown for appropriate combinations of airplane configuration (*i.e.*, flaps extended or retracted, gear deployed or stowed) and thrust for climb, cruise, approach, landing and go-around.

(1) Release of the controller at speeds above V_{mo}/M_{mo} , or below the minimum speed for hands-free stabilized flight, must produce a prompt recovery towards normal operating speeds

without resulting in a hazardous condition.

(2) The design must not allow a pilot to re-trim the controller forces resulting from this stability.

Low Energy Awareness

The airplane must provide adequate awareness cues to the pilot of a low-energy (low-speed/low-thrust/low-height) state to ensure that the airplane retains sufficient energy to recover when flight-control laws provide neutral longitudinal stability significantly below the normal operating speeds. This should be accomplished as follows:

(a) Adequate low speed/low thrust cues at low altitude should be provided by a strong positive static stability force gradient (1 pound per 6 knots applied through the sidestick), or

(b) The low energy awareness should be provided by an appropriate warning with the following characteristics. The low-energy awareness should:

(1) Be unique, unambiguous, and unmistakable.

(2) Be active at appropriate altitudes and in appropriate configurations (*i.e.*, at low altitude, in the approach and landing configurations).

(3) Be sufficiently timely to allow recovery to a stabilized flight condition inside the normal flight envelope while maintaining the desired flight path and without entering the flight controls angle-of-attack protection mode.

(4) Not be triggered during normal operation, including operation in moderate turbulence for recommended maneuvers at recommended speeds.

(5) Not be cancelable by the pilot other than by achieving a higher energy state.

(6) Have an adequate hierarchy among the various warnings so that the pilot is not confused and led to take inappropriate recovery action if multiple warnings occur.

Global energy awareness and non-nuisance on low-energy cues must be evaluated by simulator and flight tests in the whole take-off and landing altitude range for which certification is requested. This includes all relevant combinations of weight, center-of-gravity position, configuration, airbrakes position, and available thrust, including reduced and derated take-off thrust operations and engine-failure cases. The tests must assess the level of energy awareness, and the effects of energy-management errors.

Issued in in Kansas City, Missouri, on October 27, 2023.

Patrick R. Mullen,

Manager, Technical Policy Branch, Policy and Standards Division, Aircraft Certification Service.

[FR Doc. 2023–24312 Filed 11–2–23; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–2141; Project Identifier MCAI–2023–00689–T]

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for all Airbus SAS Model A350–941 and –1041 airplanes. This proposed AD was prompted by reports of corrosion on lavatory floor fittings at various locations. This proposed AD would require repetitive general visual inspections of the affected parts, applicable corrective actions, and reporting of the inspection results, as specified in a European Union Aviation Safety Agency (EASA) AD, which is proposed for incorporation by reference (IBR). The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by December 18, 2023.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to [regulations.gov](https://www.regulations.gov). Follow the instructions for submitting comments.

- *Fax:* 202–493–2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2023–2141; or in person at Docket Operations between 9 a.m. and

5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For material that is proposed for IBR in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email ADs@easa.europa.eu; website easa.europa.eu. You may find this material on the EASA website at ad.easa.europa.eu. It is also available at [regulations.gov](https://www.regulations.gov) under Docket No. FAA–2023–2141.

- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

FOR FURTHER INFORMATION CONTACT: Dat Le, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (516) 228–7300; email: 9-avs-nyaco-cos@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include “Docket No. FAA–2023–2141; Project Identifier MCAI–2023–00689–T” at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to [regulations.gov](https://www.regulations.gov), including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial

information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as "PROPIN." The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Dat Le, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (516) 228-7300; email: 9-avs-nyaco-cos@faa.gov. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2023-0102, dated May 31, 2023 (EASA AD 2023-0102) (also referred to as the MCAI), to correct an unsafe condition for all Airbus SAS Model A350-941 and -1041 airplanes. The MCAI states there are reports of corrosion on lavatory floor fittings at various locations on Model A350 airplanes.

The FAA is proposing this AD to address this corrosion, which could lead to lavatory module detachment, with consequent injury to cabin crew and passengers, and possibly resulting in reduced evacuation capacity from the airplane in case of an emergency.

You may examine the MCAI in the AD docket at [regulations.gov](https://www.regulations.gov) under Docket No. FAA-2023-2141.

Related Service Information Under 1 CFR Part 51

EASA AD 2023-0102 specifies procedures for repetitive general visual inspections for corrosion and other damage (including cracks, pitting, discoloration, and dents) of the affected lavatory floor fittings and, depending on findings, corrective actions including repair or replacement. EASA AD 2023-0102 also requires reporting of the inspection results after each inspection.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in ADDRESSES.

FAA's Determination

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in EASA AD 2023-0102 described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD

process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate EASA AD 2023-0102 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2023-0102 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2023-0102 does not mean that operators need comply only with that section. For example, where the AD requirement refers to "all required actions and compliance times," compliance with this AD requirement is not limited to the section titled "Required Action(s) and Compliance Time(s)" in EASA AD 2023-0102. Service information required by EASA AD 2023-0102 for compliance will be available at [regulations.gov](https://www.regulations.gov) under Docket No. FAA-2023-2141 after the FAA final rule is published.

Interim Action

The FAA considers that this proposed AD would be an interim action. If final action is later identified, the FAA might consider further rulemaking then.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 32 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
2 work-hours × \$85 per hour = \$170	\$0	\$170	\$5,440

The FAA estimates the following costs to do any necessary on-condition actions that would be required based on

the results of any required actions. The FAA has no way of determining the

number of aircraft that might need these on-condition actions:

ESTIMATED COSTS OF ON-CONDITION ACTIONS

Labor cost	Parts cost	Cost per product
3 work-hours × \$85 per hour = \$255	\$10	\$265

The FAA has included all known costs in its cost estimate. According to

the manufacturer, however, some or all of the costs of this proposed AD may be

covered under warranty, thereby

reducing the cost impact on affected operators.

Paperwork Reduction Act

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120–0056. Public reporting for this collection of information is estimated to take approximately 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering, and maintaining the data needed, and completing and reviewing the collection of information. All responses to this collection of information are mandatory. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: Information Collection Clearance Officer, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX 76177–1524.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and

responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Would not affect intrastate aviation in Alaska, and
- (3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Airbus SAS: Docket No. FAA–2023–2141; Project Identifier MCAI–2023–00689–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by December 18, 2023.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all Airbus SAS Model A350–941 and –1041 airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 25, Equipment/Furnishings.

(e) Unsafe Condition

This AD was prompted by reports of corrosion on lavatory floor fittings at various locations on Model A350 airplanes. The unsafe condition, if not addressed, could lead to lavatory module detachment, with consequent injury to cabin crew and passengers, and possibly resulting in reduced evacuation capacity from the airplane in case of an emergency.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2023–0102, dated May 17, 2023 (EASA AD 2023–0102).

(h) Exceptions to EASA AD 2023–0102

(1) Where EASA AD 2023–0102 refers to its effective date, this AD requires using the effective date of this AD.

(2) This AD does not adopt the “Remarks” section of EASA AD 2023–0102.

(3) Paragraph (4) of EASA AD 2023–0102 specifies to report inspection results to Airbus within a certain compliance time. For this AD, report inspection results at the applicable time specified in paragraph (h)(3)(i) or (ii) of this AD.

(i) For each inspection done on or after the effective date of this AD: Submit the report within 30 days after the inspection.

(ii) For any inspection done before the effective date of this AD: Submit the report within 30 days after the effective date of this AD.

(4) Where paragraph (2) of EASA AD 2023–0102 specifies “any discrepancy, as defined in the SB, is detected,” this AD requires replacing those words with “any corrosion and other damage is detected.”

(i) No Requirement for Return of Parts

Although the service information referenced in EASA AD 2023–0102 specifies to return parts to the manufacturer, this AD does not include that requirement.

(j) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the International Validation Branch, send it to the attention of the person identified in paragraph (k) of this AD. Information may be emailed to: 9-AVS-AIR-730-AMOC@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or EASA; or Airbus SAS's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC):* Except as required by paragraph (j)(2) of this AD, if any service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified

as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(k) Additional Information

For more information about this AD, contact Dat Le, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (516) 228-7300; email: 9-avs-nyaco-cos@faa.gov.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

BILLING CODE 4910-13-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 180

[Docket No. FDA-2023-N-0937]

RIN 0910-A181

Revocation of Authorization for Use of Brominated Vegetable Oil in Food

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA or we) is

proposing to amend our regulations to revoke the authorization for the use of brominated vegetable oil (BVO) in food. This action is being taken because there is no longer a reasonable certainty of no harm from the continued use of BVO in food. Specifically, the proposed rule would revoke the authorization for the use of BVO as a food ingredient intended to stabilize flavoring oils in fruit-flavored beverages. There are no authorizations for other uses of BVO in food.

DATES: Either electronic or written comments on the proposed rule must be submitted by January 17, 2024.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 17, 2024. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2023-N-0937 for "Revocation of Authorization for Use of Brominated Vegetable Oil in Food." Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." We will review this copy, including the claimed confidential information, in our consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

I. Executive Summary

A. Purpose of the Proposed Rule

The proposed rule would amend our regulations to revoke the authorization for the use of brominated vegetable oil (BVO) in food. We are taking this action because there is no longer a basis to conclude that this use is safe.

BVO is a complex mixture of plant-derived triglycerides that have been reacted to contain atoms of the element bromine bonded to the molecules. BVO is used primarily to help emulsify citrus-flavored soft drinks, preventing them from separating during distribution.

B. Summary of the Major Provisions of the Proposed Rule

The proposed rule would revoke the authorization for the use of BVO as an ingredient in food. Specifically, the proposed rule would remove § 180.30 (21 CFR 180.30).

C. Legal Authority

We are proposing this rule consistent with our authority under the Federal Food, Drug, and Cosmetic Act (FD&C

Act). We discuss our legal authority in greater detail in part V.

D. Costs and Benefits

The costs of this proposed rule come from reformulating products currently manufactured with BVO, relabeling products currently manufactured with BVO, ingredient substitutes for BVO, and possible changes to sensory product properties (which could lead to decreased consumption). The benefits of this proposed rule come in the form of public health gains from reduced exposure to BVO. The annualized costs of this rulemaking (with a discount rate of 7 percent), minus the costs of the baseline of gradual voluntary reduction, are \$0.09 million to \$0.23 million. The first-year costs of the proposed rule are \$6.4 million to \$15.9 million. We estimate the annualized reduction in BVO exposure under the proposed rule relative to the baseline of gradual voluntary reduction to be roughly 0.02 million ounces (oz).

II. Table of Abbreviations/Acronyms Used in This Document

Abbreviation/ acronym	What it means
BVO	Brominated vegetable oil.
CFR	Code of Federal Regulations.
FDA	Food and Drug Administration.
FD&C Act	Federal Food, Drug, and Cosmetic Act.
GRAS	Generally Recognized as Safe.
NCTR	National Center for Toxicological Research.
ppm	parts per million.

III. Background

Brominated vegetable oil has been used as a flavoring oil stabilizer and emulsifier since the 1920s and was generally recognized as safe (GRAS) for this use by FDA. In 1970, FDA concluded that BVO could no longer be regarded as GRAS because of toxicity concerns under the conditions of use at the time, at a level of approximately 150 parts per million (ppm) in beverages (Ref. 1). FDA removed BVO from the list of “Substances generally recognized as safe” in 21 CFR part 121 (now codified under 21 CFR part 182) (35 FR 1049, January 27, 1970). In response, the Flavor and Extract Manufacturers Association submitted a food additive petition (FAP 0A2532) to FDA requesting approval for use of BVO as a food additive in beverages at a maximum use level of 15 ppm. FDA reviewed the petition, including results from unpublished BVO studies, and

while the available information did not indicate an immediate threat to health from the use of BVO in beverages at 15 ppm, we concluded in our petition response that additional long-term studies were needed to support the 15-ppm limit (Ref. 2).

Based on the data available at the time and the history of use of BVO in food without apparent harm, FDA determined in October 1970 that there would be an adequate margin of safety from the use of BVO in beverages at the reduced use level of 15 ppm on an interim basis while additional, longer-term safety studies with BVO were conducted (Ref. 1). FDA established an interim food additive regulation under 21 CFR 121.1234 (now codified at § 180.30) authorizing the use of BVO as a stabilizer for flavoring oils used in fruit-flavored beverages in an amount not to exceed 15 ppm in the finished beverage. FDA initially authorized this use of BVO on a 3-year interim basis pending the receipt of additional data (35 FR 12062, July 28, 1970), and then for an indefinite period to allow for completion of subsequent safety studies (39 FR 36113, October 8, 1974). BVO is not permitted for use in beverages in some jurisdictions, including Australia, the European Union, Japan, and New Zealand. Some BVO-containing products have been reformulated to replace BVO to market the products in jurisdictions that do not permit the use of BVO in those products.

Safe and authorized substitutes for BVO are available and have long been in use for the same functions as BVO. For example, sucrose acetate isobutyrate (SAIB; 21 CFR 172.833), glycerol ester of rosin (ester gum; 21 CFR 172.735), and locust (carob) bean gum (21 CFR 184.1343) are approved food additives or affirmed by FDA as GRAS when used to stabilize or adjust the density of flavoring oils in beverages. To date, FDA has not taken further regulatory action regarding BVO use in food because new data or information had not been available that was sufficient to issue a permanent food additive regulation for this use of BVO in food or to revoke authorization for this use of BVO.

IV. Regulation of Food Additives

Food additives are regulated under section 409 of the FD&C Act (21 U.S.C. 348). A food additive is deemed unsafe under section 402(a)(2)(C) of the FD&C Act (21 U.S.C. 342(a)(2)(C)), unless, in relevant part, the use of the food additive is authorized under a food additive regulation. FDA may not issue such an authorization unless the use of the food additive is safe. FDA defines “safe,” in relevant part, to mean that

there is a reasonable certainty in the minds of competent scientists that the substance is not harmful under the conditions of its intended use (see 21 CFR 170.3(i)). Certain food additives are authorized on an interim basis as provided under 21 CFR 180.1. Section 409(i) of the FD&C Act provides that the procedure by which food additive regulations may be amended or repealed are to be prescribed by FDA regulation and that such procedure must conform to the procedure specified in the statute for promulgating these regulations. Under § 171.130(a) (21 CFR 171.130(a)), FDA may propose the issuance of a regulation amending or repealing a regulation pertaining to a food additive or granting or repealing an exception for such additive.

V. Legal Authority

We are issuing this proposed rule under sections 409(i) and 701(a) of the FD&C Act. The FD&C Act defines “food additive,” in relevant part, as any substance, the intended use of which results or may reasonably be expected to result, directly or indirectly, in it becoming a component of food, if such substance is not generally recognized by qualified experts as safe under the conditions of its intended use (section 201(s) of the FD&C Act (21 U.S.C. 321(s))). Section 409(i) of the FD&C Act provides that the procedure by which food additive regulations may be amended or repealed are to be prescribed by FDA regulation and that such procedure must conform to the procedure specified in the statute for promulgating these regulations. Under § 171.130(a), FDA may propose repealing a regulation pertaining to a food additive. Section 701(a) of the FD&C Act (21 U.S.C. 371(a)) provides the authority to issue regulations for the efficient enforcement of the FD&C Act.

VI. Safety of Brominated Vegetable Oil Consumption

A. 2014 Evaluation of Safety Data

In 2014, as part of our work to reevaluate food and color additives when, for example, new safety information becomes available about an authorized substance, we reviewed all available data and information that were relevant to the safety of BVO used as a food ingredient. For this reevaluation, we also reviewed the memoranda and safety studies in our files regarding BVO and considered current scientific principles and study design practices (Ref. 3).

In our 2014 review, we identified four unresolved safety questions with respect to the use of BVO in food: the potential

for thyroid toxicity, bioaccumulation, developmental neurotoxicity, and reproductive toxicity. We determined that the safety data and information available did not provide evidence of a health threat resulting from the limited permitted use of BVO as a flavoring stabilizer in fruit-flavored beverages, but many studies that we reviewed did not clearly establish safe levels of chronic use (Ref. 3). We identified deficiencies in the existing studies, including poor study design by modern standards, equivocal results, inconsistencies in measured parameters between studies, and suboptimal dose selection (Ref. 3). We concluded that high-quality data from contemporary studies, performed under current guideline standards, were needed to address the knowledge gaps regarding the safety of BVO (Ref. 3).

Therefore, through a collaboration between FDA’s Center for Food Safety and Applied Nutrition, the National Center for Toxicological Research (NCTR), and the National Institute of Environmental Health Sciences’ Division of Translational Toxicology (formerly the Division of the National Toxicology Program), new rodent safety studies on BVO were designed and executed with the goal of addressing two of the unresolved safety questions: the potential for thyroid toxicity and bioaccumulation. We selected these two safety questions to study first because if these studies indicated safety concerns, we would not need to conduct more complex studies on the additional outcomes to take regulatory action.

B. New Findings Do Not Support Safety of BVO Used as a Food Ingredient

The rodent safety studies conducted by NCTR were published in 2022 (Ref. 4) and confirmed previous reports that dietary exposure to BVO is toxic to the thyroid and results in bioaccumulation of lipid-bound bromine in the body at doses relevant to human exposure. To account for uncertainty in translating animal studies to humans, risk assessors evaluate the safety of food ingredients in animal studies at use levels greater than probable human dietary exposure. For example, FDA typically requires food additives to be safe in animal studies at exposures at least 100-fold higher than probable human dietary exposure (21 CFR 170.22) to account for uncertainty in applying results from animal studies to humans. Using the combined 2015–2018 National Health and Nutrition Examination Survey and the conservative assumption that all beverages labeled as containing BVO contain the 15 ppm use level permitted by § 180.30, we estimated mean and 90th percentile dietary exposures of 5

and 9 milligrams (mg) BVO/person (p)/day (d) for the U.S. population aged 2 years and older (Ref. 5), or 0.08 and 0.15 mg/kilogram (kg) body weight (bw)/d on a 60 kg bw basis. The doses of BVO used in the recently published studies more closely approximate levels of dietary exposure to BVO in humans than the doses used in many of the earlier studies.

NCTR’s first 90-day study conducted in rats described adverse effects on the thyroids of test animals following dietary exposure to BVO. Histological changes in the thyroid, specifically follicular cell hypertrophy, were observed in males at all exposure levels and in females at the highest exposure level, suggestive of a sex-specific effect. The incidence of abnormal histopathological findings in male thyroids increased in a dose-dependent manner. This study also demonstrated alterations in hormone signaling along the hypothalamic-pituitary-thyroid axis as a result of dietary exposure to BVO (Ref. 6). Overall, these new data corroborate previous studies in rats and pigs that also reported thyroid toxicity after dietary exposure to BVO (Ref. 3).

Additionally, in both studies, dietary exposure to BVO led to the accumulation of inorganic and organic bromine in test animals (Ref. 6), a finding previously related to the onset of central nervous system toxicity (*i.e.*, lethargy, ataxia, and disorientation) in pigs exposed to BVO (Ref. 3). After 90 days of dietary exposure to BVO, accumulation had not reached steady state, but brominated fatty acids appeared to accumulate in a dose-dependent manner in the heart, liver, and inguinal fat of all animals fed BVO. Based on these study results, we estimated that bioaccumulated brominated fatty acids could persist in test animals for up to 587 days after BVO was removed from the diet (Ref. 6). The observed potential for brominated fatty acids to bioaccumulate in these studies confirms previous studies in laboratory animals and humans that raised safety questions with the use of BVO as a food ingredient (Ref. 3). Importantly, the bioaccumulation of lipid-bound bromine makes it difficult to estimate cumulative dietary exposure to BVO and to interpret subchronic studies that reported no adverse effect from dietary exposure to BVO (Ref. 6).

These studies provide important new data on two of the previously mentioned unresolved safety questions for BVO use in foods. In total, they demonstrate BVO consumption can result in thyroid toxicity in both male and female rats, interference with the hypothalamic-pituitary-thyroid axis in male rats, and

bioaccumulation of lipid-bound bromine in both sexes. As a result of these new data, we can no longer conclude that there is a reasonable certainty of no harm from the use of BVO as a stabilizer for flavoring oils in fruit-flavored beverages. While safety questions remain regarding the potential for developmental and reproductive toxicity resulting from dietary exposure to BVO, we do not believe that addressing these remaining unresolved safety questions is needed to conclude that there is no longer a reasonable certainty of no harm from this use. Therefore, we propose to revoke the interim authorization of BVO as a food additive.

VII. Description of the Proposed Rule

The proposed rule, if finalized, would revoke § 180.30, which authorizes on an interim basis the use of BVO as a stabilizer for flavoring oils generally used in fruit-flavored beverages, for which any applicable standards of identity do not preclude such use, in an amount not to exceed 15 ppm in the finished beverage. As we have previously determined that this use of BVO is not GRAS, the use of BVO in food will no longer be authorized. Our proposal to remove § 180.30 is supported by animal and human data, including those summarized in Ref. 3 and the new safety studies described above, which demonstrate that there is no longer a reasonable certainty of no harm from the authorized use of BVO in food.

VIII. Proposed Effective/Compliance Dates

We propose that any final rule resulting from this rulemaking be effective 30 days after the final rule's date of publication in the **Federal Register**. We also recognize that the food industry would need sufficient time to reformulate products and for these products to work their way through distribution. Therefore, the compliance date for this rule, if finalized, will be 1 year after the effective date, to provide the opportunity for companies to reformulate, relabel, and deplete the inventory of BVO-containing products prior to enforcing the requirements of the final rule.

IX. Preliminary Economic Analysis of Impacts

We have examined the impacts of the proposed rule under Executive Order 12866, Executive Order 13563, Executive Order 14094, the Regulatory Flexibility Act (5 U.S.C. 601–612), and the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4).

Executive Orders 12866, 13563, and 14094 direct us to assess all benefits, costs, and transfers of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). Rules are significant under Executive Order 12866 Section 3(f)(1) (as amended by Executive Order 14094) if they “have an annual effect on the economy of \$200 million or more (adjusted every 3 years by the Administrator of the Office of Information and Regulatory Affairs [OIRA] for changes in gross domestic product); or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, territorial, or tribal governments or communities.” OIRA has determined that this proposed rule is not a significant regulatory action under Executive Order 12866 Section 3(f)(1).

The Regulatory Flexibility Act requires us to analyze regulatory options that would minimize any significant impact of a rule on small entities. Because we estimate that this proposed rule will impact at most 2.5 percent of small businesses within the beverage manufacturing industry, and because we believe that costly disruptions to small entities are likely to be small due to replacement formulas for BVO having been in place and widely used for decades, we propose to certify that the proposed rule will not have a significant economic impact on a substantial number of small entities.

The Unfunded Mandates Reform Act of 1995 (section 202(a)) requires us to prepare a written statement, which includes estimates of anticipated impacts, before proposing “any rule that includes any Federal mandate that may result in the expenditure by State, local, and Tribal Governments, in the

aggregate, or by the private sector, of \$100,000,000 or more (adjusted annually for inflation) in any one year.” The current threshold after adjustment for inflation is \$177 million, using the most current (2022) Implicit Price Deflator for the Gross Domestic Product. This proposed rule would not result in an expenditure in any year that meets or exceeds this amount.

Food producers would not be permitted to use BVO as a food additive if the rule is finalized. For the purposes of this analysis, we assume that all products currently using BVO will be reformulated to use some other kind of stabilizer.

The costs of this proposed rule come from reformulating products currently manufactured with BVO, relabeling products currently manufactured with BVO, ingredient substitutes for BVO, and changes to sensory product properties. The benefits of this proposed rule come in the form of public health gains from reduced exposure to BVO. The annualized costs (with a discount rate of 7 percent) of this rulemaking, minus the costs of the baseline of gradual voluntary reduction, are \$0.09 million to \$0.23 million. The first-year costs of the proposed rule are \$6.4 million to \$15.9 million. We estimate the annualized reduction in BVO exposure under the proposed rule relative to the baseline of gradual voluntary reduction to be roughly 0.02 million ounces (oz). For the proposed rule to be cost effective, it would have to prevent \$0.15 million worth of illness (with a discount rate of 7 percent) on an annual basis to cover the domestic costs to industry. This amounts to almost \$9 worth of public health benefits per oz of reduced BVO exposure.

It is possible that the cost of reformulation and relabeling could be passed on to consumers in the form of higher prices. We do not know what percentage of the costs will be passed on to consumers. However, replacement formulas have been in place for decades and are widely used in beverage products throughout the United States and the world. The time between the publication of our proposal and any subsequent final rule as well as that rule's compliance period should minimize costly disruptions to manufacturers still using BVO.

TABLE 1—SUMMARY OF BENEFITS, COSTS AND DISTRIBUTIONAL EFFECTS OF PROPOSED RULE

Category	Primary estimate	Low estimate	High estimate	Units			Notes
				Year dollars	Discount rate (%)	Period covered	
Benefits:							
Annualized Monetized \$millions/year.					7 3		
Annualized Quantified	0.02 million oz ...	0.01 million oz ...	0.03 million oz ...			2026–2045	The benefits of the proposed rule come in the form of reduction in exposure to BVO.
Qualitative	For the rule to be cost effective, it would have to prevent almost \$9 worth of illness annually per oz of reduced BVO exposure.						
Costs:							
Annualized Monetized \$millions/year.	\$0.15	\$0.09	\$0.23	2022	7	2026–2045	The first-year costs are roughly \$6.4 million to \$15.9 million.

Effects:

State, Local or Tribal Government:

Small Business:

Wages:

Growth:

We have developed a comprehensive Preliminary Economic Analysis of Impacts that assesses the impacts of the proposed rule. We request comment on our estimates of benefits, costs, and transfers of this proposed rule. The full preliminary analysis of economic impacts is available in the docket for this proposed rule (Ref. 7) and at <https://www.fda.gov/about-fda/reports/economic-impact-analyses-fda-regulations>.

X. Analysis of Environmental Impacts

We have determined under 21 CFR 25.32(m) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

XI. Paperwork Reduction Act of 1995

FDA tentatively concludes that this proposed rule contains no collection of information. Therefore, clearance by the

Office of Management and Budget under the Paperwork Reduction Act of 1995 is not required.

XII. Consultation and Coordination with Indian Tribal Governments

We have analyzed this proposed rule in accordance with the principles set forth in Executive Order 13175. We have tentatively determined that the rulemaking does not contain policies that would have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. We invite comments from tribal officials on any potential impact on Indian tribes from this proposed action.

XIII. Federalism

We have analyzed this proposed rule in accordance with the principles set forth in Executive Order 13132. We have determined that the proposed rule

does not contain policies that have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Accordingly, we conclude that the rule does not contain policies that have federalism implications as defined in the Executive order and, consequently, a federalism summary impact statement is not required.

[SATS WY-051-FOR; Docket ID: OSM-2023-0004; S1D1S SS08011000 SX064A000 223S180110; S2D2S SS08011000 SX064A000 22XS501520]

Wyoming Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Proposed rule; public comment period and opportunity for public hearing on proposed amendment.

SUMMARY: We, the Office of Surface Mining Reclamation and Enforcement (OSMRE), are announcing receipt of a proposed regulatory and statutory amendment to the Wyoming coal program (Wyoming program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act). On September 25, 2018 the Wyoming Environmental Quality Council approved a number of revisions to rules governing permitting, operation, and abandonment of Class III underground injection and recovery wells associated with in situ mining of coal. Specifically, the proposed revisions update regulations to be consistent with Environmental Protection Agency Underground Injection Control regulations for class III wells, reorganize the chapter to better correlate with other key Land Quality Division (LQD) regulations and to reference existing LQD regulations and definitions, update regulations to be consistent with other Wyoming regulations pertaining to well construction, well abandonment, and aquifer exemptions, and update regulations to include current best management practices specific to in situ coal mining.

This document gives the times and locations that the Wyoming program and this proposed amendment to that program are available for your inspection, the comment period during which you may submit written comments on the amendment, and the procedures that we will follow for the public hearing, if one is requested.

DATES: We will accept written comments on this amendment until 4 p.m., M.D.T., December 4, 2023. If requested, we may hold a public hearing or meeting on the amendment on November 28, 2023. We will accept requests to speak at a hearing until 4 p.m., M.D.T., on November 20, 2023.

ADDRESSES: You may submit comments, identified by SATS No. WY-051-FOR, by any of the following methods:

- *Mail/Hand Delivery:* OSMRE, Attn: Jeffrey Fleischman, P.O. Box 11018, 100 East B Street, Room 4100, Casper, Wyoming 82602.

- *Fax:* (307) 261-6552.

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name and docket number for this rulemaking. For detailed instructions on submitting comments and additional information on the rulemaking process, see the "Public Comment Procedures" heading of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: For access to the docket to review copies of the Wyoming program, this amendment, a listing of any scheduled public hearings or meetings, and all written comments received in response to this document, you must go to the address listed below during normal business hours, Monday through Friday, excluding holidays. You may receive one free copy of the amendment by contacting OSMRE's Casper Field Office or the full text of the program amendment is available for you to read at www.regulations.gov.

Attn: Jeffrey Fleischman, Field Office Director, Office of Surface Mining Reclamation and Enforcement, 100 East B Street, Casper, Wyoming 82602, Telephone: (307) 261-6550, Email: jfleischman@osmre.gov

In addition, you may review a copy of the amendment during regular business hours at the following location:

Attn: Kyle Wendtland, Administrator, Wyoming Department of Environmental Quality, Land Quality Division, 200 West 17th Street, Suite 10, Cheyenne, Wyoming 82002, Telephone: (307) 777-7046, Email: kyle.wendtland@wyo.gov

FOR FURTHER INFORMATION CONTACT:

Jeffrey Fleischman, Field Office Director, Office of Surface Mining Reclamation and Enforcement, 100 East B Street, Casper, Wyoming 82602, Telephone: (307) 261-6550, Email: jfleischman@osmre.gov

SUPPLEMENTARY INFORMATION:

Table of Contents

- I. Background on the Wyoming Program
- II. Description of the Proposed Amendment
- III. Public Comment Procedures
- IV. Procedural Determinations

I. Background on the Wyoming Program

Subject to OSMRE's oversight, section 503(a) of the Act permits a State to

assume primacy for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands within its borders by demonstrating that its approved State program includes, among other things, State laws and regulations that govern surface coal mining and reclamation operations in accordance with the Act and consistent with the Federal regulations. See 30 U.S.C. 1253(a)(1) and (7).

On the basis of these criteria, the Secretary of the Interior conditionally approved the Wyoming program on November 26, 1980. You can find background information on the Wyoming program, including the Secretary's findings, the disposition of comments, and conditions of approval of the Wyoming program in the November 26, 1980 **Federal Register** 45 FR 78637. You can also find later actions concerning the Wyoming program and program amendments at 30 CFR 950.10.

II. Description of the Proposed Amendment

By letter dated February 14, 2023 (Document ID No. OSM–2023–0004), Wyoming sent us an amendment to its program under SMCRA (30 U.S.C. 1201 *et seq.*). We found Wyoming's proposed amendment administratively complete on March 7, 2023.

Between 1994 and 2002 Wyoming enacted several revisions to the Coal Chapter 18 Rules. On September 25, 2018 the Wyoming Environmental Quality Council approved a number of revisions to the rules governing Class III well associated with in situ mining. The proposed amendment is a state initiative intended to update Chapter 18, which was last revised in 2002. Specifically the proposed revisions: (1) update regulations to be consistent with Environmental Protection Agency Underground Injection Control regulations for class III wells, (2) reorganize the chapter to better correlate with other key LQD regulations and to reference existing LQD regulations and definitions, (3) update regulations to be consistent with other Wyoming regulations pertaining to well construction, well abandonment, and aquifer exemptions, and (4) update regulations to include current best management practices specific to in situ coal mining.

The full text of the program and/or plan amendment is available for you to read at the locations listed above under **ADDRESSES** or at www.regulations.gov.

III. Public Comment Procedures

Under the provisions of 30 CFR 732.17(h), we are seeking your comments on whether the amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If we approve the amendment, it will become part of the State program.

Electronic or Written Comments

If you submit written or electronic comments on the proposed rule during the 30-day comment period, they should be specific, confined to issues pertinent to the proposed regulations, and explain the reason for any recommended change(s). We appreciate any and all comments, but those most useful and likely to influence decisions on the final regulations will be those that either involve personal experience or include citations to and analyses of SMCRA, its legislative history, its implementing regulations, case law, other pertinent State or Federal laws or regulations, technical literature, or other relevant publications.

We cannot ensure that comments received after the close of the comment period (see **DATES**) or sent to an address other than those listed (see **ADDRESSES**) will be included in the docket for this rulemaking and considered.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Public Hearing

If you wish to speak at the public hearing, contact the person listed under **FOR FURTHER INFORMATION CONTACT** by 4 p.m., M.D.T. on November 20, 2023. If you are disabled and need reasonable accommodations to attend a public hearing, contact the person listed under **FOR FURTHER INFORMATION CONTACT**. We will arrange the location and time of the hearing with those persons requesting the hearing. If no one requests an opportunity to speak, we will not hold a hearing.

To assist the transcriber and ensure an accurate record, we request, if possible, that each person who speaks at the public hearing provide us with a written copy of his or her comments. The public hearing will continue on the specified date until everyone scheduled to speak

has been given an opportunity to be heard. If you are in the audience and have not been scheduled to speak and wish to do so, you will be allowed to speak after those who have been scheduled. We will end the hearing after everyone scheduled to speak and others present in the audience who wish to speak, have been heard.

Public Meeting

If only one person requests an opportunity to speak, we may hold a public meeting rather than a public hearing. If you wish to meet with us to discuss the amendment, please request a meeting by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**. All such meetings are open to the public and, if possible, we will post notices of meetings at the locations listed under **ADDRESSES**. We will make a written summary of each meeting a part of the administrative record.

IV. Procedural Determinations

Executive Order 12866—Regulatory Planning and Review, Executive Order 13563—Improving Regulation and Regulatory Review, and Executive Order 14094—Modernizing Regulatory Review

Executive Order 12866, as amended by Executive Order 14094, provides that the Office of Information and Regulatory Affairs in the Office of Management and Budget (OMB) will review all significant rules. Pursuant to OMB guidance, dated October 12, 1993, the approval of State program and/or AML plan amendments is exempted from OMB review under Executive Order 12866, as amended by Executive Order 14094. Executive Order 13563, which reaffirms and supplements Executive Order 12866, retains this exemption.

Other Laws and Executive Orders Affecting Rulemaking

When a State submits a program amendment to OSMRE for review, our regulations at 30 CFR 732.17(h) require us to publish a notice in the **Federal Register** indicating receipt of the proposed amendment, its text or a summary of its terms, and an opportunity for public comment.

We conclude our review of the proposed amendment after the close of the public comment period and determine whether the amendment should be approved, approved in part, or not approved. At that time, we will also make the determinations and certifications required by the various laws and Executive Orders governing the rulemaking process and include them in the final rule.

List of Subjects in 30 CFR Part 950

Intergovernmental relations, Required program amendments, State regulatory program approval, State-Federal cooperative agreement, Surface mining, Underground mining.

David A. Berry,

Regional Director, Unified Regions 5, 7–11.

BILLING CODE 4310–05–P

DEPARTMENT OF AGRICULTURE**Forest Service****36 CFR Part 251**

RIN 0596–AD55

Land Uses; Special Uses; Carbon Capture and Storage Exemption

AGENCY: Forest Service, USDA.

ACTION: Proposed rule; request for public comment.

SUMMARY: The United States Department of Agriculture, Forest Service (Forest Service or Agency), is proposing to amend its special use regulations, which prohibit authorizing exclusive and perpetual use and occupancy of National Forest System lands, to provide an exemption for carbon capture and storage. The Forest Service is also proposing to add a definition for “Carbon capture and storage.”

DATES: Comments on this proposed rule must be received in writing by January 2, 2024.

ADDRESSES: Comments, identified by RIN 0596–AD55, should be sent via one of the following methods:

- *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for sending comments;
- *Mail:* Director, Lands, Minerals, and Geology Management Staff, 201 14th Street SW, Washington, DC 20250–1124; or
- *Hand Delivery/Courier:* Director, Lands, Minerals, and Geology Management Staff, 1st Floor Southeast, 201 14th Street SW, Washington, DC 20250–1124.

Comments should be confined to issues pertinent to the proposed rule, should explain the reasons for any recommended changes, and should reference the specific section and wording being addressed, where possible. All timely comments, including names and addresses when provided, will be placed in the record and will be available for public inspection and copying. The public may inspect comments received on this

proposed rule at the Office of the Director, Lands, Minerals, and Geology Management Staff, 1st Floor Southeast, Sidney R. Yates Federal Building, 201 14th Street SW, Washington, DC, on business days between 8:30 a.m. and 4 p.m. Visitors are encouraged to call ahead at 202–205–1680 to facilitate entry into the building. Comments may also be viewed on the Federal eRulemaking Portal at <https://www.regulations.gov>. In the search box, enter “RIN 0596–AD55,” and click the “Search” button.

FOR FURTHER INFORMATION CONTACT:

Mark Chandler, Realty Specialist, Washington Office Lands, Minerals, and Geology Management Staff, 202–205–1117 or mark.chandler@usda.gov. Individuals who use telecommunication devices for the hearing impaired may call the Federal Relay Service at 800–877–8339 between 8 a.m. and 8 p.m., Eastern Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The Forest Service administers approximately 74,000 special use authorizations for use and occupancy of National Forest System (NFS) lands for a wide variety of purposes, including powerline facilities, communications facilities, outfitting and guiding, campground concessions, and resorts. The activities and facilities authorized by special use authorizations contribute significantly to the national economy and the social and economic foundation of rural communities.

To obtain a special use authorization for a new use or activity, a proponent must submit a special use proposal which meets two sets of screening criteria in the Agency’s existing special uses regulations at 36 CFR 251.54(e)(1) and (5). If the proposal meets all the screening criteria, the proponent may submit a special use application for evaluation by the Forest Service. Per the existing initial screening criterion at 36 CFR 251.54(e)(1)(iv), the Forest Service may not authorize exclusive and perpetual use and occupancy of NFS lands.

Carbon capture and storage entail injecting and storing carbon dioxide in pore spaces below the surface of the earth. Pore spaces are subsurface geological formations that can be used to store fluids from mining, manufacturing, and other industrial processes. Typically, the United States owns the pore spaces below the surface of NFS lands. Storing carbon dioxide in pore spaces is intended to mitigate greenhouse gas emissions and is performed via Class VI underground injection control wells. Carbon dioxide injected in pore spaces may remain for

over 1,000 years after injection and would be tantamount to an exclusive and perpetual use and occupancy if authorized on NFS lands. Therefore, the Forest Service is proposing to amend the initial screening criterion at 36 CFR 251.54(e)(1)(iv) that prohibits authorizing exclusive and perpetual use and occupancy of NFS lands to provide an exemption for carbon capture and storage. The Forest Service is also proposing a definition for “carbon capture and storage” in 36 CFR 251.51.

The United States Environmental Protection Agency (EPA) has excluded carbon capture and storage from classification as a hazardous waste (40 CFR 261.4(h)) if carbon dioxide is captured, transported, and stored in compliance with the requirements for Class VI Underground Injection Control wells and the requirements in 40 CFR parts 144 and 146 of the Underground Injection Control Program of the Safe Drinking Water Act, including the requirements for EPA authorization by rule or by permit. A Class VI Underground Injection Control well is used to inject carbon dioxide into deep rock formations. Before issuing a permit for a Class VI Underground Injection Control well, the EPA conducts a detailed technical review to ensure that the area around the proposed location for the well does not have abandoned wells that could leak carbon dioxide and to determine whether the well would be constructed in a manner that would protect it from seismic activity and from leaking carbon dioxide into the groundwater (40 CFR parts 144 and 146, Underground Injection Control (UIC) Program Class VI Implementation Manual for UIC Program Directors).

The proposed rule would define “carbon capture and storage” as “the capture, transportation, injection, and storage of carbon dioxide in subsurface pore spaces in such a manner as to qualify the carbon dioxide stream for the exclusion from classification as a ‘hazardous waste’ pursuant to United States Environmental Protection Agency regulations at 40 CFR 261.4(h).” Therefore, carbon capture and storage authorized under the proposed rule would not constitute a hazardous waste and would not be inconsistent with the initial screening criterion at 36 CFR 251.54(e)(1)(ix) that prohibits authorizing storage of hazardous substances on NFS lands.

To protect public health and underground sources of drinking water for these wells, including for those that may be sited on NFS lands, the EPA regulates all aspects of the wells, including siting, construction, injection operations, testing and monitoring,

emergency response, financial responsibility, and plugging and closure of the wells and injection sites through permitting, site inspections, required reporting, and compliance reviews. The public may comment on proposed permits for Class VI Underground Injection Control wells, as well as request and attend public hearings and in some cases file appeals with EPA's Environmental Appeals Board regarding permits for Class VI Underground Injection Control wells.

Carbon capture and storage can be used to reduce carbon dioxide emissions to the atmosphere. Possible sources of carbon dioxide include point source emissions from industrial facilities, energy production, and direct air capture from the atmosphere. Authorizing carbon capture and storage on NFS lands would support the Administration's goal to reduce greenhouse gas emissions by 50 percent below the 2005 levels by 2030.

The proposed rule would not authorize carbon capture and storage on NFS lands. Rather, the proposed rule would exempt proposals for carbon capture and storage from the initial screening criterion prohibiting authorization of exclusive use and occupancy of NFS lands, thereby allowing the Forest Service to review proposals and applications for carbon capture and storage and to authorize proposed carbon capture and storage on NFS lands if, where, and as deemed appropriate by the Agency. An exemption for the exclusive and perpetual use and occupancy for carbon capture and storage on NFS lands would be consistent with the intent of EPA's Class VI Well permitting requirement for injecting carbon dioxide for the primary purpose of long-term storage. No other type of exclusive and perpetual use and occupancy would be authorized on NFS lands under the proposed rule.

Proposals for underground storage of carbon dioxide would have to meet all other screening criteria, including but not limited to consistency with the applicable land management plan, potential risks to public health or safety, conflicts or interference with authorized uses of NFS lands or use of adjacent non-NFS lands. Accepted applications for carbon capture and storage would be subject to the requisite environmental analysis.

Regulatory Certifications

Regulatory Planning and Review (Executive Orders 12866 and 13563)

Consistent with Executive Order (E.O.) 12866, the Office of Information

and Regulatory Affairs (OIRA) in the Office of Management and Budget will determine whether proposed, interim, and final rules that impose, eliminate, or modify requirements on non-Forest Service parties are significant and will review any proposed, interim, or final rules that OIRA has designated as significant. This proposed rule has been designated as nonsignificant by OIRA. E.O. 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. The Forest Service has developed the proposed rule consistent with E.O. 13563.

Congressional Review Act

Pursuant to Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (known as the Congressional Review Act) (5 U.S.C. 801 *et seq.*), OIRA has designated this proposed rule as not a major rule as defined by 5 U.S.C. 804(2).

National Environmental Policy Act

This proposed rule would amend the Forest Service's special use regulations at 36 CFR 251.54(e)(1)(iv), which prohibits authorizing exclusive and perpetual use and occupancy of NFS lands, to provide an exemption for carbon capture and storage. Forest Service regulations at 36 CFR 220.6(d)(2) exclude from documentation in an environmental assessment or environmental impact statement "rules, regulations, or policies to establish service-wide administrative procedures, program processes, or instructions." The Forest Service's preliminary assessment is that this proposed rule falls within this category of actions and that no extraordinary circumstances exist which would require preparation of an environmental assessment or environmental impact statement. A final determination will be made upon adoption of the final rule.

Regulatory Flexibility Act Analysis

The Forest Service has considered the proposed rule under the requirements of the Regulatory Flexibility Act (5 U.S.C. 602 *et seq.*). This proposed rule would not have any direct effect on small entities as defined by the Regulatory Flexibility Act. The proposed rule would not impose recordkeeping requirements on small entities; would not affect their competitive position in relation to large entities; and would not affect their cash flow, liquidity, or ability to remain in the market.

Therefore, the Forest Service has determined that this proposed rule would not have a significant economic impact on a substantial number of small entities pursuant to the Regulatory Flexibility Act.

Federalism

The Forest Service has considered this proposed rule under the requirements of E.O. 13132, *Federalism*. The Forest Service has determined that the proposed rule conforms with the federalism principles set out in this E.O.; would not impose any compliance costs on the States; and would not have substantial direct effects on the States, on the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, the Forest Service has concluded that this proposed rule would not have federalism implications.

Consultation and Coordination With Indian Tribal Governments

This proposed rule has been reviewed in accordance with the requirements of E.O. 13175, *Consultation and Coordination with Indian Tribal Governments*. E.O. 13175 requires Federal agencies to consult and coordinate with Tribes on a government-to-government basis on policies that have Tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes. The Forest Service has determined that this proposed rule could have substantial direct effects on one or more Tribes and is subject to Tribal consultation per E.O. 13175 and Forest Service Handbook 1509.13. Accordingly, the Forest Service is conducting Tribal consultation on the proposed rule.

Environmental Justice

The Forest Service has considered the proposed rule under the requirements of E.O. 12898, *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations*. The Forest Service has determined that the proposed rule is not expected to result in disproportionately high and adverse impacts on minority or low-income populations or the exclusion of minority and low-income

populations from meaningful involvement in decision making.

No Takings Implications

The Forest Service has analyzed this proposed rule in accordance with the principles and criteria in E.O. 12630, *Governmental Actions and Interference with Constitutionally Protect Property Rights*. The Forest Service has determined that the proposed rule would not pose the risk of a taking of private property.

Energy Effects

The Forest Service has reviewed this proposed rule under E.O. 13211, *Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*. The Forest Service has determined that the proposed rule would not constitute a significant energy action as defined in E.O. 13211.

Civil Justice Reform

The Forest Service has analyzed this proposed rule in accordance with the principles and criteria in E.O. 12988, *Civil Justice Reform*. After adoption of this proposed rule, (1) all State and local laws and regulations that conflict with this proposed rule or that impede its full implementation would be preempted; (2) no retroactive effect would be given to this proposed rule; and (3) it would not require administrative proceedings before parties may file suit in court challenging its provisions.

Unfunded Mandates

Pursuant to Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538), signed into law on March 22, 1995, the Forest Service has assessed the effects of the proposed rule on State, local, and Tribal governments and the private sector. This proposed rule would not compel the expenditure of \$100 million or more by any State, Tribal, or local government or anyone in the private sector. Therefore, a statement under section 202 of the act is not required.

Controlling Paperwork Burdens on the Public

The proposed rule does not contain any recordkeeping or reporting requirements or other information collection requirements as defined in 5 CFR part 1320 that are not already required by law or not already approved for use and therefore imposes no additional paperwork burden on the public. Accordingly, the review provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR part 1320 do not apply.

List of Subjects in 36 CFR Part 251

Administrative practice and procedure, Alaska, Electric power, Mineral resources, National forests, Public lands-rights-of-way, Reporting and recordkeeping requirements, and Water resources.

Therefore, for the reasons set forth in the preamble, the Forest Service proposes to amend 36 CFR part 251 as follows:

PART 251—LAND USES

Subpart B—Special Uses

- 1. The authority citation for part 251, subpart B, continues to read:

Authority: 16 U.S.C. 460l-6a, 460l-6d, 472, 497b, 497c, 551, 580d, 1134, 3210; 30 U.S.C. 185; 43 U.S.C. 1740, 1761–1772.

- 2. Amend § 251.51 by adding a definition in alphabetical order for “Carbon capture and storage” to read as follows:

* * * * *

Carbon capture and storage—the capture, transportation, injection, and storage of carbon dioxide in subsurface pore spaces in such a manner as to qualify the carbon dioxide stream for the exclusion from classification as a “hazardous waste” pursuant to United States Environmental Protection Agency regulations at 40 CFR 261.4(h).

* * * * *

- 3. Amend § 251.54 by revising paragraph (e)(1)(iv) to read as follows.

§ 251.54 Proposal and application requirements and procedures.

* * * * *

(e) * * *

(1) * * *

(iv) The proposed use will not create an exclusive or perpetual right of use or occupancy, provided that the Forest Service may authorize exclusive and perpetual use and occupancy for carbon capture and storage in subsurface pore spaces.

* * * * *

Andrea Delgado Fink,

Chief of Staff, Natural Resources and Environment.

BILLING CODE 3411–15–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 27

[WT Docket No. 21–333; DA 23–999; FR ID 181482]

Mongoose Works, Ltd., 3.7–4.2 GHz Band Transition Clearinghouse Dispute Referrals and Appeals

AGENCY: Federal Communications Commission.

ACTION: Notification of hearing.

SUMMARY: In this document, the Wireless Telecommunications Bureau (Bureau) of the Federal Communications Commission (Commission) grants Mongoose Works, Ltd.’s (Mongoose) Petition for *De Novo* Review (Petition), and commences a hearing in connection with the 3.7–4.2 GHz Band (C-band) Transition Relocation Payment Clearinghouse’s (RPC or clearinghouse) decision which adjusted downward part of Mongoose’s reimbursement claim based upon its August 12, 2020 lump sum election. The issues designated for hearing are whether the Bureau erred in determining that Mongoose had not met its burden of proof to demonstrate that the RPC erred in its classification of, and reimbursement for, the two antennas at issue; whether the Bureau erred in separately determining that the RPC properly classified the two antennas at issue based on Commission guidance; and whether the reimbursed amount of \$33,994 for the two antennas at issue should be adjusted to restore the disallowed amount of \$69,686.

DATES: Mongoose shall file a written appearance by November 9, 2023, stating its intention to appear on the date fixed for the hearing and present evidence on the issues specified in the *Hearing Designation Order*.

ADDRESSES: Federal Communications Commission, 45 L St. NE, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: For additional information on this proceeding, contact Susan Mort of the Wireless Telecommunications Bureau, at (202) 418–2429 or Susan.Mort@fcc.gov.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission’s Hearing Designation Order, in WT Docket No. 21–333, DA 23–999, adopted and released on October 20, 2023. The full text of this document is available for public inspection online at <https://docs.fcc.gov/public/attachments/DA-23-999A1.pdf>.

1. By this *Hearing Designation Order*, pursuant to §§ 0.131, 0.331, and

27.1421(c) of the Commission's rules, the *3.7 GHz Report and Order*, and the *RPC Appeals Procedures Public Notice*, the Wireless Telecommunications Bureau (Bureau) grants a Petition for *De Novo* Review (Petition), filed on September 14, 2023, by Mongoose Works, Ltd. (Mongoose), and designates this case to be tried as a written proceeding under the Commission's rules for hearing proceedings, with the Administrative Law Judge serving as the presiding officer. As discussed below, the issues designated for hearing relate to the 3.7–4.2 GHz Band (C-band) Transition Relocation Payment Clearinghouse's (RPC or clearinghouse) decision which adjusted downward part of Mongoose's reimbursement claim based upon its August 12, 2020 lump sum election.

2. In the 3.7 GHz Report and Order, the Commission adopted rules to make 280 megahertz of mid-band spectrum available for flexible use throughout the contiguous United States by transitioning existing services out of the lower portion of the band and into the upper 200 megahertz of the C-band. The Commission required new 3.7 GHz Service licensees to reimburse the reasonable relocation costs of eligible Fixed Satellite Service (FSS) space station operators, incumbent FSS earth station operators, and incumbent Fixed Service licensees (collectively, incumbents) to transition out of the band. The 3.7 GHz Report and Order also specified that incumbent FSS earth station operators may accept either: (1) reimbursement for their actual, reasonable relocation costs; or (2) a lump sum reimbursement "based on the average, estimated costs of relocating all of their incumbent earth stations" to the upper 200 megahertz of the C-band.

3. The 3.7 GHz Report and Order further provided for the creation of an independent clearinghouse to administer, subject to the Commission's rules and oversight, the cost-related aspects of the transition in a fair and transparent manner, "to mitigate financial disputes among stakeholders, and to collect and distribute payments in a timely manner." To provide the clearinghouse, incumbents, and new 3.7 GHz Service licensees with a range of reasonable transition costs, the 3.7 GHz Report and Order directed the Bureau to establish a cost catalog of the types of expenses that incumbents were likely to incur. Further, incumbent FSS earth station operators opting to receive a lump sum amount were required to make an irrevocable election and accompanying certification with the Commission by September 14, 2020 with the proviso that the information

contained in such election would be "subject to verification as part of the [c]learinghouse's role to prevent waste, fraud, and abuse" through its claims review process.

4. All reimbursement claims—whether for actual costs or lump sum amounts—must be submitted to the clearinghouse for review pursuant to § 27.1416 of the Commission's rules. The clearinghouse "will determine in the first instance whether costs submitted for reimbursement are reasonable" and whether they comply with the requirements adopted in the 3.7 GHz Report and Order. To the extent a claimant or one or more responsible 3.7 GHz Service licensees wish to dispute the clearinghouse's determination with respect to a submitted claim, they must file a notice of objection as required by § 27.1421(a) of the Commission's rules. The clearinghouse may in the first instance mediate any disputes or refer the disputant parties to alternative dispute resolution fora. Subsequent appeals to the Bureau may be submitted pursuant to the procedures set forth in the *RPC Appeals Procedures Public Notice*. Following a Bureau decision in either a single-party or multi-party dispute, any party to a specific matter wishing to appeal that decision may do so by filing with the Commission, within ten (10) days of the effective date of the Bureau decision, a petition for *de novo* review, whereupon the Commission will set the matter for an evidentiary hearing before an Administrative Law Judge.

5. *Mongoose's Lump Sum Election and RPC Claim*. Mongoose is an earth station operator with multiple antennas registered with the Commission under callsign E191601, which appear on the incumbent earth station list for purposes of the C-band transition. Mongoose filed a lump sum election with the Commission on August 12, 2020 for eight incumbent earth station antennas, and on August 16, 2021, filed a claim with the RPC seeking \$356,052 as its lump sum payment. Specifically, Mongoose requested a lump sum payment for six Small Multi-beam (2–4 beams) Earth Station Antennas (SMBEAs) at \$42,062 each and two Large Multi-beam (5+ beams) Earth Station Antennas (LMBEAs) at \$51,840 each. After review of Mongoose's claim and supplemental information provided by the claimant, the RPC Decisional Memorandum was issued on June 1, 2022, fully approving Mongoose's claim for six SMBEAs. The RPC classified the two remaining antennas as Receive-Only ES Multi-feed Antennas rather than LMBEAs and adjusted Mongoose's claim amount for those antennas from

\$103,680 down to \$33,994. Mongoose filed a notice of objection with the RPC for the downward adjusted portion of its claim on June 25, 2022, seeking restoration of the full amount. On July 7, 2022, Mongoose received payment for the undisputed amount of \$286,366.

6. *Mongoose's Appeal to the Bureau*. Mongoose filed a single-party appeal of the RPC decision on July 31, 2022, asking the Bureau to order the RPC to restore the disallowed amount of \$69,686. The RPC filed its response on August 22, 2022. Mongoose filed its reply on August 29, 2022, and the RPC supplemented its response with an attestation on September 2, 2022. The instant matter arises from the Bureau's denial of Mongoose's appeal of the RPC's decision.

7. Specifically, the Bureau noted that the RPC's underlying Decisional Memorandum determined that two of the earth stations included in Mongoose's lump sum election, for which it sought reimbursement as LMBEAs, were properly classified as Receive-Only ES Multi-feed Antennas pursuant to the Final Cost Catalog Public Notice as the two relevant antennas each had only one C-band feed, and as such, Mongoose was not eligible for the higher lump sum payment for LMBEAs. The Bureau decision denied Mongoose's appeal, finding that it had not met its burden of proof in demonstrating that the RPC erred in its classification of, and reimbursement for, the two antennas at issue. The Bureau separately and independently found that the RPC both correctly interpreted the relevant Commission rules, guidance, and policies and applied them to the antennas in question. The Bureau also found that Mongoose's procedural arguments were unavailing.

8. The *RPC Appeals Procedures Public Notice* allows any party to a specific single-party or multi-party dispute to appeal a Bureau decision on disputed issues relating to an RPC reimbursement decision by petitioning for an evidentiary hearing before an Administrative Law Judge. The petition for a hearing must be filed within ten (10) days of the effective date of the Bureau order.

9. Mongoose filed its appeal of the Bureau's decision within ten (10) days of the effective date thereof, and we thus find that the Petition satisfies the requirements of the *RPC Appeals Procedures Public Notice*. Therefore, the Petition is hereby granted, and the disputed issues are designated for hearing.

10. *Written Hearings Report and Order*. The Commission recently

supplemented its formal hearing processes by adopting rules that, *inter alia*, expand the use of a hearing procedure that relies in appropriate cases on written submissions and documentary evidence. These hearing proceedings shall be resolved on a written record consisting of affirmative case, responsive case, and reply case submissions, along with all associated evidence in the record, including stipulations and agreements of the parties and official notice of material facts. Based on that record, the presiding officer will issue an Initial Decision pursuant to section 409(a) of the Communications Act and §§ 1.267 and 1.274(c) of the Commission's rules. The Bureau finds that this is an appropriate case for use of those procedures.

11. *Notice of Appearance.* Parties to this matter who wish to avail themselves of the opportunity to participate in the hearing proceeding must file a written appearance consistent with § 1.221(d) and (e) of the Commission's rules. The written appearance must be filed within twenty (20) days of the mailing of this Hearing Designation Order and must state, among other things, that they will present evidence on the matters specified in this order, and, if required, appear before a presiding officer at a time and place to be determined (which shall be no earlier than thirty (30) days after receipt of this order).

12. *Initial Case Order.* After release of this Hearing Designation Order, the presiding officer shall promptly release an Initial Case Order. The Initial Case Order shall put all parties on notice that they are expected to be fully cognizant of part 1 of the Commission's rules concerning Practice and Procedure, 47 CFR part 1, subparts A and B. The Initial Case Order shall also set a date for the initial status conference and a date by which each party should file a pre-conference submission that would include: (a) whether discovery is expected in this case, and if so, a proposed discovery schedule; (b) any preliminary motions they are intending to file; and (c) a proposed case schedule. The parties' pre-conference submissions should also indicate whether they request that a Protective Order be entered in this case.

13. *Initial Status Conference and Initial Status Conference Order.* The presiding officer shall set the case schedule, including any deadlines by which the parties should submit the motions they identified in their pre-conference submissions. The presiding officer shall also set the deadlines for the parties' affirmative case, responsive

case, and reply case submissions in accordance with §§ 1.371 through 1.375 of the Commission's rules. If the parties have requested the entrance of a Protective Order, the presiding officer shall also set a deadline by which a joint proposed Protective Order shall be submitted for consideration. In accordance with § 1.248(b) of the Commission's rules, the presiding officer may adopt the case schedule during the status conference or in an order following the conference.

14. Additional status conferences may be scheduled throughout the course of the proceeding at the request of the parties and/or at the discretion of the presiding officer. Any request by a party for a status conference must be made in writing to the presiding officer and shall be copied on all other parties.

15. *Transcripts.* In accordance with § 1.248 of the Commission's rules, an official transcript of all case conferences shall be made, unless the parties and the presiding officer agree to forego a transcript. Transcripts shall be made available to the public as part of the official record in the Commission's Electronic Comment Filing System (ECFS) in WT Docket No. 21–333.

16. *Requests for Admissions.* In accordance with § 1.246 of the Commission's rules, any party may serve upon any other party written requests for the admission of the genuineness of any relevant documents or of the truth of any relevant matters of fact. Such requests shall be served within twenty (20) days after the deadline for filing a notice of appearance unless the presiding officer sets a different time frame.

17. *Available Discovery Methods.* Sections 1.311 through 1.325 of the Commission's rules set forth procedures that may be used for the discovery of relevant facts and/or for the production and preservation of evidence for use in the hearing proceeding. These sections of the Commission's rules provide, *inter alia*, for the taking of depositions, for interrogatories, and for the production of documents and things.

18. *Evidentiary Rules.* In the Written Hearings Report and Order, the Commission amended § 1.351 of the Commission's rules to adopt the evidentiary standard set forth in the formal APA hearing requirements. In relevant part, § 1.351 of the Commission's rules now states, "any oral or documentary evidence may be adduced, but the presiding officer shall exclude irrelevant, immaterial, or unduly repetitious evidence." The parties remain free to make evidentiary arguments based on the Federal Rules of Evidence.

19. *Petitions to Intervene.* Any person or entity seeking status as a party in interest in this proceeding must file a petition to intervene in accordance with § 1.223(a) of the Commission's rules. Any person or entity seeking to participate in this proceeding as a party may file a petition for leave to intervene in accordance with § 1.223(b) of the Commission's rules.

20. *Motions to Enlarge, Change or Delete Issues.* Motions to enlarge, change, or delete issues to be considered in this proceeding shall be allowed, consistent with § 1.229 of the Commission's rules.

21. *Restricted Proceeding.* This hearing proceeding is a "restricted" proceeding pursuant to § 1.1208 of the Commission's rules and thus *ex parte* presentations to or from Commission decision-making personnel, including the presiding officer and her staff and staff of the Commission's Wireless Telecommunications Bureau, are prohibited, except as otherwise provided in the Commission's rules.

22. *Electronic Filing of Documents.* All written submissions such as motions, letters, discovery requests and objections and written responses thereto, excluding confidential and/or other protected material, must be filed in WT Docket No. 21–333 using ECFS. ECFS shall also act as the repository for records of actions taken in this proceeding, excluding confidential and/or other protected material, by the presiding officer and the Commission. Documents responsive to any party's requests for production of documents should not be filed in ECFS. Such responsive documents shall be served directly on counsel for the party requesting the documents and produced either in hard copy or in electronic form (e.g., hard drive, thumb drive) with files named in such a way as it is clear how the documents are organized.

23. *Case Caption.* The caption of any pleading filed in this proceeding, as well as all letters, documents, or other written submissions including discovery requests and objections and responses thereto, shall indicate whether it is to be acted upon by the Commission or the presiding officer. The presiding officer shall be identified by name.

24. *Service.* All documents submitted in this proceeding must also be served on all other parties in accordance with § 1.211 of the Commission's rules and shall be accompanied by a proof of service. Service on the Enforcement Bureau shall be made using the following email address: EBHearings@fcc.gov.

25. *Confidential and/or Otherwise Protected Materials.* To the extent any party to this proceeding wishes to submit materials or information that it would like withheld from the public record, it may do so in accordance with the procedures set forth in § 1.314 of the Commission's rules. The parties may also enter into a Protective Order. As stated above, requests for a Protective Order should be made in the parties' pre-conference submission in accordance with the schedule set forth in the Initial Case Order.

26. *Initial Decision.* The presiding officer shall issue an Initial Decision on the issues set forth herein, as well as any other issues designated for hearing in the course of the proceeding. This Initial Decision shall contain, at a minimum, findings of fact and conclusions of law, as well as the reasons or basis therefor, and the appropriate rule or order or policy and the sanction, relief or denial thereof, as appropriate.

27. Accordingly, *it is ordered* that the Petition for *De Novo* Review, filed on September 14, 2023, by Mongoose, is granted.

28. *it is further ordered* that, pursuant to the *RPC Appeals Procedures Public Notice*, this matter, as described above, is designated for hearing before an Administrative Law Judge, at a time and place to be specified in a subsequent order, on the following issues:

a. To determine whether the Bureau erred in determining that Mongoose had not met its burden of proof to demonstrate that the RPC erred in its classification of, and reimbursement for, the two antennas at issue;

b. To determine whether the Bureau erred in separately determining that the RPC properly classified the two antennas at issue based on Commission guidance; and

c. To determine whether the reimbursed amount of \$33,994 for the two antennas at issue should be adjusted to restore the disallowed amount of \$69,686.

29. *it is further ordered* that the burden of proceeding with the introduction of evidence and the burden of proof with respect to all issues specified herein SHALL BE UPON Mongoose.

30. *it is further ordered*, that Mongoose Works, Ltd. (Mongoose) is made a party to the proceeding pursuant to § 1.221(d) of the Commission's rules, 47 CFR 1.221(d). To avail itself of the opportunity to be heard, pursuant to § 1.221(e) of the Commission's rules, Mongoose, in person or by its attorneys, shall file a written appearance, stating its intention to appear on the date fixed

for the hearing and present evidence on the issues specified in this Hearing Designation Order. Such written appearance shall be filed within twenty (20) days of the mailing of this Order pursuant to Paragraph 32 below. If Mongoose fails to file an appearance within the time specified, it shall, unless good cause for such failure is shown, forfeit its hearing rights.

31. *it is further ordered* that the Chief, Enforcement Bureau, SHALL BE MADE A PARTY to this proceeding without the need to file a written appearance.

32. *it is further ordered* that a copy of this *Hearing Designation Order* shall be sent, via Certified Mail—Return Receipt Requested to: Mongoose Works, Ltd., c/o Mark Derbyshire, 4950 S El Camino Dr, Cherry Hills Village, CO 80111.

33. *it is further ordered* that a copy of each document filed in this proceeding subsequent to the date of adoption of this Hearing Designation Order shall be served on the counsel of record appearing on behalf of the Chief, Enforcement Bureau. Parties may inquire as to the identity of such counsel by calling the Investigations & Hearings Division of the Enforcement Bureau at (202) 418-1420. Electronic service on counsel of record for the Enforcement Bureau shall be made using the following email address: EBHearings@fcc.gov.

34. *it is further ordered* that this *Hearing Designation Order* or a summary thereof SHALL BE PUBLISHED at the earliest practicable date in the **Federal Register**.

Federal Communications Commission.

Amy Brett,

Acting Chief of Staff, Wireless Telecommunications Bureau.

BILLING CODE 6712-01-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[RTID 0648-XD197]

Fisheries of the Exclusive Economic Zone off Alaska; Scallop Specification Process Flexibility

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of fishery management plan amendment; request for comments.

SUMMARY: The North Pacific Fishery Management Council (Council) submitted Amendment 18 to the Fishery Management Plan (FMP) for the Scallop Fishery off Alaska (Scallop FMP) to the Secretary of Commerce for review. If approved, Amendment 18 would revise timing requirements for Stock Assessment and Fishery Evaluation (SAFE) reports to allow more flexibility for non-annual assessments and to set scallop harvest specifications less frequently than on an annual basis. This would reduce the burden on staff and provide more time for the development of new stock assessment methods. Amendment 18 is intended to promote the goals and objectives of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), the Scallop FMP, and other applicable laws.

DATES: Comments must be received no later than January 2, 2024.

ADDRESSES: You may submit comments on this document, identified by NOAA-NMFS-2023-0094, by any of the following methods:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to <https://www.regulations.gov> and enter NOAA-NMFS-2023-0094 in the Search box. Click on the "Comment" icon, complete the required fields, and enter or attach your comments.

- **Mail:** Submit written comments to Gretchen Harrington, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region NMFS, Attn: Records Office. Mail comments to P.O. Box 21668, Juneau, AK 99802-1668.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on <https://www.regulations.gov> without change. All personal identifying information (e.g., name, address), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter "N/A" in the required fields if you wish to remain anonymous).

Electronic copies of proposed Amendment 18 and the draft Analysis prepared for this action may be obtained from <https://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Megan Mackey, 907-586-7228.

SUPPLEMENTARY INFORMATION: The Magnuson-Stevens Act requires that each regional fishery management

council submit any FMP amendment it prepares to NMFS for review and approval, disapproval, or partial approval by the Secretary of Commerce (Secretary). The Magnuson-Stevens Act also requires that NMFS, upon receiving an FMP amendment, immediately publish a notice in the **Federal Register** announcing that the amendment is available for public review and comment. The Council has submitted Amendment 18 to the Secretary for review. This document announces that proposed Amendment 18 is available for public review and comment.

The scallop fishery in the exclusive economic zone off Alaska under the Scallop FMP is jointly managed by NMFS and the State of Alaska. The Council prepared the FMP under the authority of the Magnuson-Stevens Act, (16 U.S.C. 1801 *et seq.*). Regulations governing U.S. fisheries and implementing the FMP appear at 50 CFR parts 600 and 679.

The Scallop FMP delegates many management aspects of the scallop fishery to the State of Alaska but maintains Federal oversight. This authority is limited by the Magnuson-Stevens Act and the FMP. While the FMP includes scallop stocks off the coast of Alaska, including weathervane scallop (*Patinopecten caurinus*), reddish scallop (*Chlamys rubida*), spiny scallop (*Chlamys hastata*), and rock scallop (*Crassadoma gigantea*), the weathervane scallop is the only commercially targeted stock at this time. Commercial fishing for weathervane scallops occurs in the Gulf of Alaska, Bering Sea, and waters off the Aleutian Islands. There is currently no formal stock assessment model for the scallop fishery. Instead, the State sets guideline harvest levels

(GHLs) informed by data collected through the scallop fishery observer program and fishery-independent scallop dredge surveys. Standardized catch per unit effort (CPUE) indices are estimated to account for depth, month, vessel, bed, and season variations.

Previously, the overfishing level (OFL) and acceptable biological catch (ABC) have been set based on the definition of optimal yield (OY). More recently, OFL and ABC have been based on the OY re-defined in 2012 (Amendment 13), when OY was re-defined as 0 to 1.29 million pounds (lb) (585 tons (t)) of shucked scallop meats to include estimated discards over the reference time frame. Annual specifications have been defined as: max OFL = OY, and ABC = 90 percent of OFL. Alaska scallop harvests have not exceeded OY in any year since it was first established.

In the absence of stock-size estimates, the status of the scallop stock relative to its overfished state is unknown. Consistent with assessments since the 2011/12 season, the 2022/23 OFL is set equal to the OY (1.284 million lb.; 582 t) as defined in the Scallop FMP and the 2022/23 ABC is set equal to the maximum ABC control rule value (90 percent of OFL or 1.156 million lb.; 524 t). Estimated total fishing removals (retained and discarded) for the 2021/22 and 2022/23 seasons were 311,978 lb (141.5 t) and 345,690 lb (156.8 t) of shucked meats, respectively (table 1). These estimates are less than 30 percent of the ABC/annual catch limit (ACL) and OFL; therefore, overfishing did not occur in 2021/22 or 2022/23.

Currently, the Scallop FMP requires the SAFE report to be created on an annual basis. The proposed

management measure in Amendment 18 would amend the FMP to allow flexibility for non-annual assessments. This would remove prescriptive language dictating that SAFE reports are produced on an annual basis. Amendment 18 would give the Council flexibility in modifying the assessment cycle with the potential to set multi-year specifications, based on a period of no more than 3 years, that best suit the needs of the stock. If a formal stock assessment model is developed, or there is a decrease in estimated stock abundance, the Council could request that the development of the SAFE report revert to being reviewed annually.

NMFS is soliciting public comments on proposed Amendment 18 through the end of the comment period (see **DATES**). All relevant written comments received by the end of the applicable comment period will be considered by NMFS in the approval/partial approval/disapproval decision for Amendment 18 and addressed in the response to comments in the final decision. Comments received after the end of the applicable comment period will not be considered in the approval/disapproval decision on Amendment 18. To be considered, comments must be received, not just postmarked or otherwise transmitted, by the last day of the comment period (see **DATES**).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: October 31, 2023.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Notices

Federal Register

Vol. 88, No. 212

Friday, November 3, 2023

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

AGENCY FOR INTERNATIONAL DEVELOPMENT

USAID/MEXICO—RFI 2023–003, Local Partner and Sub-Partner Outreach

AGENCY: United States Agency for International Development/Mexico Mission (USAID/Mexico).

ACTION: Notice of information collection; request for comment.

SUMMARY: USAID/Mexico is seeking to increase understanding of the organizational landscape throughout the country to enhance USAID's development approach and understand local organizations' priority topic areas and capacities. USAID is issuing this Request for Information (RFI) to solicit information and potential interest from organizations to diversify USAID's partner and sub-partner base. The goal of the RFI is to better understand the organizational landscape in Mexico; diversify USAID/Mexico's partner and sub-partner base by creating avenues for new and underutilized partners and sub-partners to work with USAID; and brainstorm methods to support partners and sub-partners to become self-reliant and capable of achieving their development goals. The research data will be aggregated and not provide PII or other privacy-related information. USAID/Mexico invites the general public and other Federal agencies to take this opportunity to comment on the following new information collection, as required by the Paperwork Reduction Act of 1995.

DATES: All comments should be submitted within 30 calendar days from the date of this publication.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please access the survey questionnaire at https://docs.google.com/forms/d/e/1FAIpQLSc8c7OMyjoEGV_Rpr8M7q1K9cYUnqz_zYKFCdq-Luz00nbifA/viewform?usp=sharing.

Comments submitted in response to this notice should be submitted electronically through the **Federal Register**.

FOR FURTHER INFORMATION CONTACT:

Written requests for information or comments should be addressed to Andrea Capellan, Director, Office of Acquisition and Assistance, USAID/Mexico via email at Acapellan@usaid.gov.

Verbal requests for information or comments submitted can contact +1 571–277–0121.

SUPPLEMENTARY INFORMATION:

Title of Information Collection: USAID/MEXICO—RFI 2023–003, Local Partner and Sub-Partner Outreach.

Type of Request: Notice for public comment; generic clearance.

Originating Office: USAID/Mexico.

Respondents: Members of Mexican public, members of Mexican civil society organizations, members of Mexican for-profit organizations.

Respondent's Obligation To Respond: Voluntary.

Estimated Number of Respondents: 300.

Average Time per Response: 20 minutes for survey respondents.

Frequency of Response: Approximately every year.

Total Estimated Burden: 90 hours.

Total Estimated Cost: \$3,000.

We are soliciting public comments to permit USAID to:

- Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used.
- Enhance the quality, utility, and clarity of the information to be collected.
- Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

No comments were received during the 60-day notice. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

Please note that comments submitted in response to this Notice are public record.

Andrea Capellan,

Director, Office of Acquisition and Assistance, USAID/Mexico.

[FR Doc. 2023–24286 Filed 11–2–23; 8:45 am]

BILLING CODE 6116–01–P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by December 4, 2023 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it

displays a currently valid OMB control number.

Food and Nutrition Service

Title: Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) Breastfeeding Award of Excellence.

OMB Control Number: 0584–0591.

Summary of Collection: The Healthy, Hunger-Free Kids Act of 2010 (HHFKA) (*Pub. L. 111–296*, Sec 231) requires the U.S. Department of Agriculture (USDA) to implement a program to recognize exemplary breastfeeding support practices at Women, Infants, and Children (WIC) local agencies and clinics. The WIC program, of which the breastfeeding award of excellence is a part, is authorized by the Child Nutrition Act of 1966 (42 *U.S.C.* 1787). The WIC Program provides breastfeeding promotion and support for pregnant and postpartum mothers as a part of its mission to improve the health of the approximately 6 million Americans it serves each month. Breastfeeding is a priority in WIC and WIC mothers are strongly encouraged to breastfeed their infants unless medically contraindicated.

Need and Use of the Information: While HHFKA mandates that the USDA provide a program to recognize exemplary breastfeeding support practices, it is voluntary for the WIC local agencies and clinics to apply for an award. Information is collected from the WIC local agencies to apply for an award and used by the WIC state agencies to evaluate the applications. The award application period is open once annually and has been designed to allow local WIC agencies at different stages of progress in breastfeeding promotion and support program development to apply for an award. The information collection will meet the HHFKA requirement to implement a program to recognize exemplary breastfeeding support practices at WIC local agencies and clinics. The information collected through this program will be used to evaluate components of existing breastfeeding programs and support within WIC local agencies, to recognize local WIC agencies that provide exemplary breastfeeding programs and support services, and to provide examples of model programs to motivate local agencies and clinics to strengthen their breastfeeding promotion and support activities.

Description of Respondents: State, Local, or Tribal Government.

Number of Respondents: 239.

Frequency of Responses: Reporting: Annually.

Total Burden Hours: 514.

Ruth Brown,

Departmental Information Collection Clearance Officer.

[FR Doc. 2023–24264 Filed 11–2–23; 8:45 am]

BILLING CODE 3410–30–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2023–0068]

Addition of Belarus to the List of Regions Affected With Highly Pathogenic Avian Influenza

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that we added Belarus to the list of regions that the Animal and Plant Health Inspection Service considers to be affected by highly pathogenic avian influenza (HPAI). This action follows our imposition of HPAI-related restrictions on avian commodities originating from or transiting Belarus, as a result of reports of HPAI in that country.

DATES: Belarus was added to the list of regions APHIS considers to be affected with HPAI, effective on August 22, 2023.

FOR FURTHER INFORMATION CONTACT: Dr. Heather Sriranganathan, APHIS Veterinary Services, Regionalization Evaluation Services, 4700 River Road, Riverdale, MD 20747; phone: (717) 818–3582; email: AskRegionalization@usda.gov.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR part 94 (referred to below as the regulations) govern the importation of certain animals and animal products into the United States to prevent the introduction of various animal diseases, including Newcastle disease and highly pathogenic avian influenza (HPAI). The regulations prohibit or restrict the importation of live poultry, poultry meat, and other poultry products from regions where these diseases are considered to exist.

Section 94.6 of the regulations contains requirements governing the importation into the United States of carcasses, meat, parts or products of carcasses, and eggs (other than hatching eggs) of poultry, game birds, or other birds from regions of the world where HPAI exists or is reasonably believed to exist. HPAI is an extremely infectious and potentially fatal form of avian

influenza in birds and poultry that, once established, can spread rapidly from flock to flock. The Animal and Plant Health Inspection Service (APHIS) maintains a list of restricted regions it considers affected with HPAI of any subtype on the APHIS website at <https://www.aphis.usda.gov/aphis/ourfocus/animalhealth/animal-and-animal-product-import-information/animal-health-status-of-regions>.

APHIS receives notice of HPAI outbreaks from veterinary officials of the exporting country, from the World Organization for Animal Health (WOAH),¹ or from other sources the Administrator determines to be reliable.

On August 22, 2023, APHIS added Belarus to the list of regions where HPAI exists based on credible media and interagency reports of HPAI outbreaks in poultry in Belarus. On that same day, APHIS issued an import alert notifying stakeholders that APHIS imposed restrictions on the importation of poultry, commercial birds, ratites, avian hatching eggs, unprocessed avian products and byproducts, and certain fresh poultry commodities from Belarus to mitigate risk of HPAI introduction into the United States.

With the publication of this notice, we are informing the public that we added Belarus to the list of regions APHIS considers affected with HPAI of any subtype, effective August 22, 2023. This notice serves as an official record and public notification of this action.

Congressional Review Act

Pursuant to the Congressional Review Act (5 *U.S.C.* 801 *et seq.*), the Office of Information and Regulatory Affairs designated this action as not a major rule, as defined by 5 *U.S.C.* 804(2).

Authority: 7 *U.S.C.* 1633, 7701–7772, 7781–7786, and 8301–8317; 21 *U.S.C.* 136 and 136a; 31 *U.S.C.* 9701; 7 CFR 2.22, 2.80, and 371.4.

Done in Washington, DC, this 30th day of October 2023.

Michael Watson,

Administrator, Animal and Plant Health Inspection Service.

¹ The World Organization for Animal Health internationally follows a British English spelling of “organisation” in its name; also, it was formerly the Office International des Epizooties, or OIE, but on May 28, 2022, the Organization announced that the acronym was changed from OIE to WOAH.

DEPARTMENT OF AGRICULTURE**Forest Service****Notice of Issuance of Final Permanent Seasonal Recreational Shooting Order in the Laramie Ranger District of the Medicine Bow-Routt National Forests and Thunder Basin National Grassland**

AGENCY: Forest Service, Agriculture (USDA).

ACTION: Notice.

SUMMARY: The Forest Service (Forest Service or Agency), United States Department of Agriculture, is issuing a final permanent seasonal order prohibiting recreational shooting annually from March 31 to September 10 in the Pole Mountain area of the Laramie Ranger District in the Medicine Bow-Routt National Forests and Thunder Basin National Grassland, an area which covers approximately 55,714 acres in Albany County, Wyoming.

ADDRESSES: The final permanent seasonal recreational shooting order, map, and justification for the final permanent seasonal order are posted on the Medicine Bow-Routt National Forests and Thunder Basin National Grassland's web page at <https://www.fs.usda.gov/detailfull/mbr/alerts-notices/?cid=stelprdb5139680&width=full>.

FOR FURTHER INFORMATION CONTACT: Frank Romero, District Ranger, 307-745-2337 or frank.e.romero@usda.gov. Individuals who use telecommunication devices for the hearing-impaired may call the Federal Relay Service at 800-877-8339, 24 hours a day, every day of the year, including holidays.

SUPPLEMENTARY INFORMATION: Section 4103 of the John D. Dingell, Jr. Conservation, Management, and Recreation Act of 2019 (Pub. L. 116-9, Title IV (Sportsmen's Access and Related Matters)), hereinafter "the Dingell Act," requires the Forest Service to provide advance notice and opportunity for public comment before temporarily or permanently closing any National Forest System lands to hunting, fishing, or recreational shooting.

The final permanent seasonal order prohibiting recreational shooting annually from March 31 to September 10 in the Pole Mountain area of the Laramie Ranger District in the Medicine Bow-Routt National Forests and Thunder Basin National Grassland has completed the public notice and comment process required under the Dingell Act. The Forest Service is issuing the final permanent seasonal recreational shooting order. The final

permanent seasonal order, the justification for the final permanent seasonal order, and the response to comments on the permanent seasonal order are posted on the Medicine Bow-Routt National Forests and Thunder Basin National Grassland's web page at <https://www.fs.usda.gov/detailfull/mbr/alerts-notices/?cid=stelprdb5139680&width=full>.

Dated: October 30, 2023.

Jacqueline Emanuel,

Associate Deputy Chief, National Forest System.

DEPARTMENT OF AGRICULTURE**Rural Business-Cooperative Service**

[DOCKET #: RBS-23-BUSINESS-0010]

Notice of Solicitation of Applications for Inviting Applications for the Rural Economic Development Loan and Grant Programs for Fiscal Year 2024; Correction

AGENCY: Rural Business-Cooperative Service, USDA.

ACTION: Notice, correction.

SUMMARY: The Rural Business-Cooperative Service (RBCS or Agency), an agency of the United States Department of Agriculture (USDA), published a Notice of Solicitation of Applications in the **Federal Register** (FR) on September 14, 2023, entitled Notice of Solicitation of Applications for Inviting Applications for the Rural Economic Development Loan and Grant Programs for Fiscal Year 2024, to announce that it was accepting applications for Fiscal Year (FY) 24 and the availability of an estimated \$90,000,000 in available funding. In addition, the Notice described requirements that are determined at the time a funding announcement is published as outlined in the program regulation. This notice will amend Section E.2.(c) of the notice to add a third option to request Priority Points under the Addressing Climate Change and Environmental Justice category. RD will work with any applicants that have previously submitted an application for FY 2024 funding to ensure they have the opportunity to utilize this option.

DATES: The deadlines for completed applications to be received in the USDA Rural Development (RD) State Office for quarterly funding competitions is no later than 4:30 p.m. (local time) on: Second Quarter—December 31, 2023,

Third Quarter—March 31, 2024, and Fourth Quarter—June 30, 2024.

FOR FURTHER INFORMATION CONTACT:

Cindy Mason, Program Management Division, Business Programs, Rural Business-Cooperative Service, U.S. Department of Agriculture, 1400 Independence Avenue SW, MS 3226, Room 5160-S, Washington, DC 20250-3226, cindy.mason@usda.gov, or call (202) 720-1400. For further information on this Notice, please contact the USDA RD State Office in the State in which the applicant's headquarters is located. A list of RD State Office contacts is provided at the following link: <https://www.rd.usda.gov/about-rd/state-offices>.

SUPPLEMENTARY INFORMATION:**Correction**

In FR Doc. 2023-19925 of September 14, 2023 (88 FR 63057), on page 63060, in column 1, under Section E.2.(c) the details on how to receive priority points under reducing climate pollution and increasing resilience to the impacts of climate change through economic support to rural communities is being expanded. There will now be a third way to receive priority points. The paragraph and following bullets are being replaced to now read:

“(3) Reducing climate pollution and increasing resilience to the impacts of climate change through economic support to rural communities. Using the Disadvantaged Community and Energy Community Look-Up Map (available at <https://www.rd.usda.gov/priority-points>), applicants may receive priority in three ways:

- If the project is located in or serves a Disadvantaged Community as defined by the Climate and Economic Justice Screening Tool (CEJST), from the White House Council on Environmental Quality (CEQ);
- If the project is located in or serves an Energy Community as defined by the Inflation Reduction Act (IRA); and
- If applicants can demonstrate through a written narrative how the proposed climate-impact projects will improve the livelihoods of community residents and meet pollution mitigation or clean energy goals.

See the website, <https://www.rd.usda.gov/priority-points>, for options.”

BILLING CODE P**DEPARTMENT OF COMMERCE****Foreign-Trade Zones Board****[Order No. 2154]****Reorganization of Foreign-Trade Zone 128 Under Alternative Site Framework**

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, the Foreign-Trade Zones (FTZ) Act provides for “. . . the establishment . . . of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes,” and authorizes the Board to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs and Border Protection ports of entry;

Whereas, the Board adopted the alternative site framework (ASF) (15 CFR 400.2(c)) as an option for the establishment or reorganization of zones;

Whereas, the Lummi Indian Business Council, grantee of Foreign-Trade Zone 128, submitted an application to the Board (FTZ Docket B–32–2023, docketed May 9, 2023) for authority to reorganize under the ASF with a service area that includes all Lummi Nation property which encompasses the Lummi Indian Reservation plus all property owned by the Lummi Nation outside the exterior boundaries of the Lummi Indian Reservation, in and adjacent to the Bellingham Customs and Border Protection port of entry, and FTZ 128’s existing Site 1 would be categorized as a magnet site;

Whereas, notice inviting public comment was given in the **Federal Register** (88 FR 30718, May 9, 2023) and the application has been processed pursuant to the FTZ Act and the Board’s regulations; and,

Whereas, the Board adopts the findings and recommendations of the examiners’ report, and finds that the requirements of the FTZ Act and the Board’s regulations are satisfied;

Now, Therefore, the Board hereby orders:

The application to reorganize FTZ 128 under the ASF is approved, subject to the FTZ Act and the Board’s regulations, including section 400.13, to the Board’s standard 2,000-acre activation limit for the zone.

Dated: October 30, 2023.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance, Alternate Chairman, Foreign-Trade Zones Board.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 2150]

Reorganization of Foreign-Trade Zone 281 (Expansion of Service Area) Under Alternative Site Framework; Miami, Florida

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, the Foreign-Trade Zones (FTZ) Act provides for “. . . the establishment . . . of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes,” and authorizes the Board to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs and Border Protection ports of entry;

Whereas, the Board adopted the alternative site framework (ASF) (15 CFR 400.2(c)) as an option for the establishment or reorganization of zones;

Whereas, Miami-Dade County, grantee of Foreign-Trade Zone 281, submitted an application to the Board (FTZ Docket B–22–2023, docketed March 22, 2023) for authority to expand the service area of the zone to include all of Miami-Dade County, Florida, as described in the application, within the Miami Customs and Border Protection port of entry;

Whereas, notice inviting public comment was given in the **Federal Register** (88 FR 18295–18296, March 28, 2023) and the application has been processed pursuant to the FTZ Act and the Board’s regulations; and,

Whereas, the Board adopts the findings and recommendations of the examiners’ report, and finds that the requirements of the FTZ Act and the Board’s regulations are satisfied;

Now, Therefore, the Board hereby orders:

The application to reorganize FTZ 281 to expand the service area under the ASF is approved, subject to the FTZ Act and the Board’s regulations, including section 400.13, and to the Board’s standard 2,000-acre activation limit for the zone.

Dated: October 30, 2023.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance, Alternate Chairman, Foreign-Trade Zones Board.

Kavakli San St. Fulya, Cad. Hazar Sok. No.14/A Silivri, Istanbul, Turkey.

Pursuant to Section 766.24 of the Export Administration Regulations, 15 CFR parts 730–774 (2021) (“EAR” or “the Regulations”), I hereby grant the request of the Office of Export Enforcement (“OEE”) to renew the temporary denial order issued in this matter on May 5, 2023. I find that

renewal of this order, as modified, is necessary in the public interest to prevent an imminent violation of the Regulations and that renewal for an extended period is appropriate because Mahan Airways has engaged in a pattern of repeated, ongoing and/or continuous apparent violations of the EAR.¹

I. Procedural History

On March 17, 2008, Darryl W. Jackson, the then-Assistant Secretary of Commerce for Export Enforcement (“Assistant Secretary”), signed an order denying Mahan Airways’ export privileges for a period of 180 days on the ground that issuance of the order was necessary in the public interest to prevent an imminent violation of the Regulations. The order also named as denied persons Blue Airways, of Yerevan, Armenia (“Blue Airways of Armenia”), as well as the “Balli Group Respondents,” namely, Balli Group PLC, Balli Aviation, Balli Holdings, Vahid Alaghand, Hassan Alaghand, Blue Sky One Ltd., Blue Sky Two Ltd., Blue Sky Three Ltd., Blue Sky Four Ltd., Blue Sky Five Ltd., and Blue Sky Six Ltd., all of the United Kingdom. The order was issued *ex parte* pursuant to Section 766.24(a) of the Regulations, and went into effect on March 21, 2008, the date it was published in the **Federal Register**.

This temporary denial order (“TDO”) was renewed in accordance with Section 766.24(d) of the Regulations.²

¹ The Regulations, currently codified at 15 CFR parts 730–774 (2023), originally issued pursuant to the Export Administration Act (50 U.S.C. 4601–4623 (Supp. III 2015)) (“EAA”), which lapsed on August 21, 2001. The President, through Executive Order 13222 of August 17, 2001 (3 CFR, 2001 Comp. 783 (2002)), as extended by successive Presidential Notices, continued the Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C. 1701, *et seq.* (2012)) (“IEEPA”). On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which includes the Export Control Reform Act of 2018, 50 U.S.C. 4801–4852 (“ECRA”). While section 1766 of ECRA repeals the provisions of the EAA (except for three sections which are inapplicable here), section 1768 of ECRA provides, in pertinent part, that all orders, rules, regulations, and other forms of administrative action that were made or issued under the EAA, including as continued in effect pursuant to IEEPA, and were in effect as of ECRA’s date of enactment (August 13, 2018), shall continue in effect according to their terms until modified, superseded, set aside, or revoked through action undertaken pursuant to the authority provided under ECRA. Moreover, section 1761(a)(5) of ECRA authorizes the issuance of temporary denial orders.

² Section 766.24(d) provides that BIS may seek renewal of a temporary denial order for additional 180-day renewal periods, if it believes that renewal is necessary in the public interest to prevent an imminent violation. Renewal requests are to be made in writing no later than 20 days before the scheduled expiration date of a temporary denial order. Renewal requests may include discussion of

Subsequent renewals also have issued pursuant to Section 766.24(d), including most recently on May 5, 2023.³ Some of the renewal orders and the modification orders that have issued between renewals have added certain parties as respondents or as related persons, or effected the removal of certain parties.⁴

The September 11, 2009 renewal order continued the denial order as to Mahan Airways, but not as to the Balli Group Respondents or Blue Airways of Armenia.⁵ As part of the February 25, 2011 renewal order, Pejman Mahmood Kosarayanifard (a/k/a Kosarian Fard), Mahmoud Amini, and Gatewick LLC (a/k/a Gatewick Freight and Cargo Services, a/k/a Gatewick Aviation

any additional or changed circumstances, and may seek appropriate modifications to the order, including the addition of parties as respondents or related persons, or the removal of parties previously added as respondents or related persons. BIS is not required to seek renewal as to all parties, and a removal of a party can be effected if, without more, BIS does not seek renewal as to that party. Any party included or added to a temporary denial order as a respondent may oppose a renewal request as set forth in section 766.24(d). Parties included or added as related persons can at any time appeal their inclusion as a related person, but cannot challenge the underlying temporary denial order, either as initially issued or subsequently renewed, and cannot oppose a renewal request. *See also* note 4, *infra*.

³ The May 5, 2023 renewal order was effective upon issuance and published in the **Federal Register** on May 10, 2023 (88 FR 30,078). Prior renewal orders issued on September 17, 2008, March 16, 2009, September 11, 2009, March 9, 2010, September 3, 2010, February 25, 2011, August 24, 2011, February 15, 2012, August 9, 2012, February 4, 2013, July 31, 2013, January 24, 2014, July 22, 2014, January 16, 2015, July 13, 2015, January 7, 2016, July 7, 2016, December 30, 2016, June 27, 2017, December 20, 2017, June 14, 2018, December 11, 2018, June 5, 2019, May 29, 2020, November 24, 2020, May 21, 2021, November 17, 2021, May 13, 2022, November 8, 2022, and May 5, 2023, respectively. The August 24, 2011 renewal followed the issuance of a modification order that issued on July 1, 2011, to add Zarand Aviation as a respondent. The July 13, 2015 renewal followed a modification order that issued May 21, 2015, and added Al Naser Airlines, Ali Abdullah Alhay, and Bahar Safwa General Trading as respondents. Each of the renewal orders and each of the modification orders referenced in this footnote or elsewhere in this order has been published in the **Federal Register**.

⁴ Pursuant to sections 766.23 and 766.24(c) of the Regulations, any person, firm, corporation, or business organization related to a denied person by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may be added as a “related person” to a temporary denial order to prevent evasion of the order.

⁵ Balli Group PLC and Balli Aviation settled proposed BIS administrative charges as part of a settlement agreement that was approved by a settlement order issued on February 5, 2010. The sanctions imposed pursuant to that settlement and order included, *inter alia*, a \$15 million civil penalty and a requirement to conduct five external audits and submit related audit reports. The Balli Group Respondents also settled related charges with the Department of Justice and the Treasury Department’s Office of Foreign Assets Control.

Services) were added as related persons to prevent evasion of the TDO.⁶ A modification order issued on July 1, 2011, adding Zarand Aviation as a respondent in order to prevent an imminent violation.⁷

As part of the August 24, 2011 renewal, Kerman Aviation, Sirjanco Trading LLC, and Ali Eslamian were added as related persons. Mahan Air General Trading LLC, Equipco (UK) Ltd., and Skyco (UK) Ltd. were added as related persons by a modification order issued on April 9, 2012. Mehdi Bahrami was added as a related person as part of the February 4, 2013 renewal order.

On May 21, 2015, a modification order was issued adding Al Naser Airlines, Ali Abdullah Alhay, and Bahar Safwa General Trading as respondents. As detailed in that order and discussed further *infra*, these respondents were added to the TDO based upon evidence that they were acting together to, *inter alia*, obtain aircraft subject to the Regulations for export or reexport to Mahan in violation of the Regulations and the TDO. Sky Blue Bird Group and its chief executive officer, Issam Shammout, were added as related persons as part of the July 13, 2015 renewal order.⁸ On November 16, 2017, a modification order issued to remove Ali Eslamian, Equipco (UK) Ltd., and Skyco (UK) Ltd. as related persons following a request by OEE for their removal.⁹

⁶ *See* note 4, *supra*, concerning the addition of related persons to a temporary denial order. Kosarian Fard and Mahmoud Amini remain parties to the TDO. On August 13, 2014, BIS and Gatewick resolved administrative charges against Gatewick, including a charge for acting contrary to the terms of a BIS denial order (15 CFR 764.2(k)). In addition to the payment of a civil penalty, the settlement includes a seven-year denial order. The first two years of the denial period were active, with the remaining five years suspended conditioned upon Gatewick’s full and timely payment of the civil penalty and its compliance with the Regulations during the seven-year denial order period. This denial order, in effect, superseded the TDO as to Gatewick, which was not included as part of the January 16, 2015 renewal order. The Gatewick LLC Final Order was published in the **Federal Register** on August 20, 2014. *See* 79 FR 49,283 (Aug. 20, 2014).

⁷ Zarand Aviation’s export privileges remained denied until July 22, 2014, when it was not included as part of the renewal order issued on that date.

⁸ The U.S. Department of the Treasury’s Office of Foreign Assets Control (“OFAC”) designated Sky Blue Bird and Issam Shammout as Specially Designated Global Terrorists (“SDGTs”) on May 21, 2015, pursuant to Executive Order 13224, for “providing support to Iran’s Mahan Air.” *See* 80 FR 30,762 (May 29, 2015).

⁹ The November 16, 2017 modification was published in the **Federal Register** on December 4, 2017. *See* 82 FR 57,203 (Dec. 4, 2017). On September 28, 2017, BIS and Ali Eslamian resolved an administrative charge for acting contrary to the terms of the denial order (15 CFR 764.2(k)) that was based upon Eslamian’s violation of the TDO after

The December 11, 2018 renewal order continued the denial of the export privileges of Mahan Airways, Pejman Mahmood Kosarayanifard, Mahmoud Amini, Kerman Aviation, Sirjanco Trading LLC, Mahan Air General Trading LLC, Mehdi Bahrami, Al Naser Airlines, Ali Abdullah Alhay, Bahar Safwa General Trading, Sky Blue Bird Group, and Issam Shammout.

On April 6, 2023, BIS, through OEE, submitted a written request for renewal of the TDO that issued on November 8, 2022. The written request was made more than 20 days before the TDO's scheduled expiration. Notice of the renewal request was provided to Mahan Airways, Al Naser Airlines, Ali Abdullah Alhay, and Bahar Safwa General Trading in accordance with Sections 766.5 and 766.24(d) of the Regulations. No opposition to the renewal of the TDO has been received. Furthermore, no appeal of the related person determinations made as part of the September 3, 2010, February 25, 2011, August 24, 2011, April 9, 2012, February 4, 2013, and July 13, 2015 renewal or modification orders has been made by Kosarian Fard, Mahmoud Amini, Kerman Aviation, Sirjanco Trading LLC, Mahan Air General Trading LLC, Mehdi Bahrami, Sky Blue Bird Group, or Issam Shammout.¹⁰

II. Renewal of the TDO

A. Legal Standard

Pursuant to Section 766.24, BIS may issue or renew an order temporarily denying a respondent's export privileges upon a showing that the order is necessary in the public interest to prevent an "imminent violation" of the Regulations. 15 CFR 766.24(b)(1) and 766.24(d). "A violation may be 'imminent' either in time or degree of likelihood." 15 CFR 766.24(b)(3). BIS may show "either that a violation is about to occur, or that the general circumstances of the matter under investigation or case under criminal or administrative charges demonstrate a likelihood of future violations." *Id.* As to the likelihood of future violations,

BIS may show that the violation under investigation or charge "is significant, deliberate, covert and/or likely to occur again, rather than technical or negligent [.]". *Id.* A "lack of information establishing the precise time a violation may occur does not preclude a finding that a violation is imminent, so long as there is sufficient reason to believe the likelihood of a violation." *Id.*

If BIS believes that renewal of a denial order is necessary in the public interest to prevent an imminent violation, it may file a written request for renewal, with any modifications if appropriate. 15 CFR 766.24(d)(1). The written request, which must be filed no later than 20 days prior to the TDO's expiration, should set forth the basis for BIS's belief that renewal is necessary, including any additional or changed circumstances. *Id.* "In cases demonstrating a pattern of repeated, ongoing and/or continuous apparent violations, BIS may request the renewal of a temporary denial order for an additional period not exceeding one year." ¹¹ *Id.*

B. The TDO and BIS's Requests for Renewal

OEE's request for renewal is based upon the facts underlying the issuance of the initial TDO, and the renewal and modification orders subsequently issued in this matter, including the May 21, 2015 modification order and the renewal order issued on November 8, 2022, and the evidence developed over the course of this investigation, which indicate a blatant disregard of U.S. export controls and the TDO. The initial TDO was issued as a result of evidence that showed that Mahan Airways and other parties engaged in conduct prohibited by the EAR by knowingly re-exporting to Iran three U.S.-origin aircraft, specifically Boeing 747s ("Aircraft 1–3"), items subject to the EAR and classified under Export Control Classification Number ("ECCN") 9A991.b, without the required U.S. Government authorization. Further evidence submitted by BIS indicated that Mahan Airways was involved in the attempted re-export of three additional U.S.-origin Boeing 747s ("Aircraft 4–6") to Iran.

As discussed in the September 17, 2008 renewal order, evidence presented by BIS indicated that Aircraft 1–3 continued to be flown on Mahan Airways' routes after issuance of the TDO, in violation of the Regulations and the TDO itself.¹² It also showed that

Aircraft 1–3 had been flown in further violation of the Regulations and the TDO on the routes of Iran Air, an Iranian Government airline. Moreover, as discussed in the March 16, 2009, September 11, 2009 and March 9, 2010 renewal orders, Mahan Airways registered Aircraft 1–3 in Iran, obtained Iranian tail numbers for them (EP–MNA, EP–MNB, and EP–MNE, respectively), and continued to operate at least two of them in violation of the Regulations and the TDO,¹³ while also committing an additional knowing and willful violation when it negotiated for and acquired an additional U.S.-origin aircraft. The additional acquired aircraft was an MD–82 aircraft, which subsequently was painted in Mahan Airways' livery and flown on multiple Mahan Airways' routes under tail number TC–TUA.

The March 9, 2010 renewal order also noted that a court in the United Kingdom ("U.K.") had found Mahan Airways in contempt of court on February 1, 2010, for failing to comply with that court's December 21, 2009 and January 12, 2010 orders compelling Mahan Airways to remove the Boeing 747s from Iran and ground them in the Netherlands. Mahan Airways and the Balli Group Respondents had been litigating before the U.K. court concerning ownership and control of Aircraft 1–3. In a letter to the U.K. court dated January 12, 2010, Mahan Airways' Chairman indicated, *inter alia*, that Mahan Airways opposes U.S. Government actions against Iran, that it continued to operate the aircraft on its routes in and out of Tehran (and had 158,000 "forward bookings" for these aircraft), and that it wished to continue to do so and would pay damages if required by that court, rather than ground the aircraft.

The September 3, 2010 renewal order discussed the fact that Mahan Airways' violations of the TDO extended beyond operating U.S.-origin aircraft and attempting to acquire additional U.S.-origin aircraft. In February 2009, while subject to the TDO, Mahan Airways participated in the export of computer motherboards, items subject to the Regulations and designated as EAR99, from the United States to Iran, via the United Arab Emirates ("UAE"), in violation of both the TDO and the Regulations, by transporting and/or forwarding the computer motherboards from the UAE to Iran. Mahan Airways' violations were facilitated by Gatewick

his addition to the TDO on August 24, 2011. Equipco (UK) Ltd. and Skyco (UK) Ltd., two companies owned and operated by Eslamian, also were parties to the settlement agreement and were added to the settlement order as related persons. In addition to other sanctions, the settlement provides that Eslamian, Equipco, and Skyco shall be subject to a conditionally suspended denial order for a period of four years from the date of the settlement order.

¹⁰ A party named or added as a related person may not oppose the issuance or renewal of the underlying temporary denial order, but may file an appeal of the related person determination in accordance with section 766.23(c). See also note 2, *supra*.

¹¹ 88 FR 59791 (Aug. 30, 2023).

¹² Engaging in conduct prohibited by a denial order violates the Regulations. 15 CFR 764.2(a) and (k).

¹³ The third Boeing 747 appeared to have undergone significant service maintenance and may not have been operational at the time of the March 9, 2010 renewal order.

LLC, which not only participated in the transaction, but also has stated to BIS that it acted as Mahan Airways' sole booking agent for cargo and freight forwarding services in the UAE.

Moreover, in a January 24, 2011 filing in the U.K. court, Mahan Airways asserted that Aircraft 1–3 were not being used, but stated in pertinent part that the aircraft were being maintained in Iran “in an airworthy condition” and that, depending on the outcome of its U.K. court appeal, the aircraft “could immediately go back into service . . . on international routes into and out of Iran.” Mahan Airways' January 24, 2011 submission to U.K. Court of Appeal, at p. 25, ¶¶ 108, 110. This clearly stated intent, both on its own and in conjunction with Mahan Airways' prior misconduct and statements, demonstrated the need to renew the TDO in order to prevent imminent future violations. Two of these three 747s subsequently were removed from Iran and are no longer in Mahan Airways' possession. The third of these 747s remained in Iran under Mahan's control. Pursuant to Executive Order 13224, this 747 was designated a Specially Designated Global Terrorist (“SDGT”) by the U.S. Department of the Treasury's Office of Foreign Assets Control (“OFAC”) on September 19, 2012.¹⁴ Furthermore, as discussed in the February 4, 2013 Order, open source information indicated that this 747, painted in the livery and logo of Mahan Airways, had been flown between Iran and Syria, and was suspected of ferrying weapons and/or other equipment to the Syrian Government from Iran's Islamic Revolutionary Guard Corps.

In addition, as first detailed in the July 1, 2011 and August 24, 2011 orders, and discussed in subsequent renewal orders in this matter, Mahan Airways also continued to evade U.S. export control laws by operating two Airbus A310 aircraft, bearing Mahan Airways' livery and logo, on flights into and out of Iran.¹⁵ At the time of the July 1, 2011 and August 24, 2011 orders, these Airbus A310s were registered in France, with tail numbers F–OJHH and F–OJHI,

respectively.¹⁶ The August 2012 renewal order also found that Mahan Airways had acquired another Airbus A310 aircraft subject to the Regulations, with MSN 499 and Iranian tail number EP–VIP, in violation of the Regulations.¹⁷ On September 19, 2012, all three Airbus A310 aircraft (tail numbers F–OJHH, F–OJHI, and EP–VIP) were designated as SDGTs.¹⁸

The February 4, 2013 renewal order laid out further evidence of continued and additional efforts by Mahan Airways and other persons acting in concert with Mahan, including Kral Aviation and another Turkish company, to procure U.S.-origin engines—two GE CF6–50C2 engines, with MSNs 517621 and 517738, respectively—and other aircraft parts in violation of the TDO and the Regulations.¹⁹ The February 4, 2013 order also added Mehdi Bahrami as a related person in accordance with Section 766.23 of the Regulations. Bahrami, a Mahan Vice-President and the head of Mahan's Istanbul Office, also was involved in Mahan's acquisition of the original three Boeing 747s (Aircraft 1–3) that resulted in the original TDO, and has had a business

¹⁶ OEE subsequently presented evidence that after the August 24, 2011 renewal, Mahan Airways worked along with Kerman Aviation and others to de-register the two Airbus A310 aircraft in France and to register both aircraft in Iran (with, respectively, Iranian tail numbers EP–MHH and EP–MHI). It was determined subsequent to the February 15, 2012 renewal order that the registration switch for these A310s was cancelled, and that Mahan Airways then continued to fly the aircraft under the original French tail numbers (F–OJHH and F–OJHI, respectively). Both aircraft apparently remain in Mahan Airways' possession.

¹⁷ See note 14, *supra*.

¹⁸ See <http://www.treasury.gov/resource-center/sanctions/OFAC-Enforcement/pages/20120919.aspx>. Mahan Airways was previously designated by OFAC as a SDGT on October 18, 2011. 77 FR 64427 (October 18, 2011).

¹⁹ Kral Aviation was referenced in the February 4, 2013 renewal order as “Turkish Company No. 1.” Kral Aviation purchased a GE CF6–50C2 aircraft engine (MSN 517621) from the United States in July 2012, on behalf of Mahan Airways. OEE was able to prevent this engine from reaching Mahan by issuing a redelivery order to the freight forwarder in accordance with Section 758.8 of the Regulations. OEE also issued Kral Aviation a redelivery order for the second CF6–50C2 engine (MSN 517738) on July 30, 2012. The owner of the second engine subsequently cancelled the item's sale to Kral Aviation. In September 2012, OEE was alerted by a U.S. exporter that another Turkish company (“Turkish Company No. 2”) was attempting to purchase aircraft spare parts intended for re-export by Turkish Company No. 2 to Mahan Airways. See February 4, 2013 renewal order.

On December 31, 2013, Kral Aviation was added to BIS's Entity List, Supplement No. 4 to Part 744 of the Regulations. See 78 FR 75458 (Dec. 12, 2013). Companies and individuals are added to the Entity List for engaging in activities contrary to the national security or foreign policy interests of the United States. See 15 CFR 744.11.

relationship with Mahan dating back to 1997.

The July 31, 2013 renewal order detailed additional evidence obtained by OEE showing efforts by Mahan Airways to obtain another GE CF6–50C2 aircraft engine (MSN 528350) from the United States via Turkey. Multiple Mahan employees, including Mehdi Bahrami, were involved in or aware of matters related to the engine's arrival in Turkey from the United States, plans to visually inspect the engine, and prepare it for shipment from Turkey.

Mahan Airways sought to obtain this U.S.-origin engine through Pioneer Logistics Havacilik Turizm Yonetim Danismanlik (“Pioneer Logistics”), an aircraft parts supplier located in Turkey, and its director/operator, Gulnihal Yegane, a Turkish national who previously had conducted Mahan related business with Mehdi Bahrami and Ali Eslamian. Moreover, as referenced in the July 31, 2013 renewal order, a sworn affidavit by Kosol Surinanda, also known as Kosol Surinandha, Managing Director of Mahan's General Sales Agent in Thailand, stated that the shares of Pioneer Logistics for which he was the listed owner were “actually the property of and owned by Mahan.” He further stated that he held “legal title to the shares until otherwise required by Mahan” but would “exercise the rights granted to [him] exactly and only as instructed by Mahan and [his] vote and/or decisions [would] only and exclusively reflect the wills and demands of Mahan[.]”²⁰

The January 24, 2014 renewal order outlined OEE's continued investigation of Mahan Airways' activities and detailed an attempt by Mahan, which OEE thwarted, to obtain, via an Indonesian aircraft parts supplier, two U.S.-origin Honeywell ALF–502R–5 aircraft engines (MSNs LF5660 and LF5325), items subject to the Regulations, from a U.S. company located in Texas. An invoice of the Indonesian aircraft parts supplier dated March 27, 2013, listed Mahan Airways as the purchaser of the engines and included a Mahan ship-to address. OEE also obtained a Mahan air waybill dated March 12, 2013, listing numerous U.S.-origin aircraft parts subject to the Regulations—including, among other items, a vertical navigation gyroscope, a transmitter, and a power control unit—being transported by Mahan from Turkey to Iran in violation of the TDO.

²⁰ Pioneer Logistics, Gulnihal Yegane, and Kosol Surinanda also were added to the Entity List on December 12, 2013. See 78 FR 75,458 (Dec. 12, 2013).

¹⁴ See <http://www.treasury.gov/resource-center/sanctions/OFAC-Enforcement/pages/20120919.aspx>.

¹⁵ The Airbus A310s are powered with U.S.-origin engines. The engines are subject to the Regulations and classified under Export Control Classification (“ECCN”) 9A991.d. The Airbus A310s contain controlled U.S.-origin items valued at more than 10 percent of the total value of the aircraft and as a result are subject to the Regulations. They are classified under ECCN 9A991.b. The export or reexport of these aircraft to Iran requires U.S. Government authorization pursuant to Sections 742.8 and 746.7 of the Regulations.

The July 22, 2014 renewal order discussed open source evidence from the March–June 2014 time period regarding two BAE regional jets, items subject to the Regulations, that were painted in the livery and logo of Mahan Airways and operating under Iranian tail numbers EP–MOI and EP–MOK, respectively.²¹ In addition, aviation industry resources indicated that these aircraft were obtained by Mahan Airways in late November 2013 and June 2014, from Ukrainian Mediterranean Airline, a Ukrainian airline that was added to BIS's Entity List (Supplement No. 4 to Part 744 of the Regulations) on August 15, 2011, for acting contrary to the national security and foreign policy interests of the United States.²² Open source information indicated that at least EP–MOI remained active in Mahan's fleet, and that the aircraft was being operated on multiple flights in July 2014.

The January 16, 2015 renewal order detailed evidence of additional attempts by Mahan Airways to acquire items subject to the Regulations in further violation of the TDO. Specifically, in March 2014, OEE became aware of an inertial reference unit bearing serial number 1231 (“the IRU”) that had been sent to the United States for repair. The IRU is a U.S.-origin item, subject to the Regulations, classified under ECCN 7A103, and controlled for missile technology reasons. Upon closer inspection, it was determined that IRU came from or had been installed on an Airbus A340 aircraft bearing MSN 056. Further investigation revealed that as of approximately February 2014, this aircraft was registered under Iranian tail number EP–MMB and had been painted in the livery and logo of Mahan Airways.

The January 16, 2015 renewal order also described related efforts by the

Departments of Justice and Treasury to further thwart Mahan's illicit procurement efforts. Specifically, on August 14, 2014, the United States Attorney's Office for the District of Maryland filed a civil forfeiture complaint for the IRU pursuant to 22 U.S.C. 401(b) that resulted in the court issuing an Order of Forfeiture on December 2, 2014. EP–MMB remains listed as active in Mahan Airways' fleet and has been used on flights into and out of Iran as recently as December 19, 2017.

Additionally, on August 29, 2014, OFAC blocked the property and interests in property of Asian Aviation Logistics of Thailand, a Mahan Airways affiliate or front company, pursuant to Executive Order 13224. In doing so, OFAC described Mahan Airways' use of Asian Aviation Logistics to evade sanctions by making payments on behalf of Mahan for the purchase of engines and other equipment.²³

The May 21, 2015 modification order detailed the acquisition of two aircraft, specifically an Airbus A340 bearing MSN 164 and an Airbus A321 bearing MSN 550, that were purchased by Al Naser Airlines in late 2014/early 2015 and were under the possession, control, and/or ownership of Mahan Airways.²⁴ The sales agreements for these two aircraft were signed by Ali Abdullah Alhay for Al Naser Airlines.²⁵ Payment information reveals that multiple electronic funds transfers (“EFT”) were made by Ali Abdullah Alhay and Bahar Safwa General Trading in order to acquire MSNs 164 and 550. The May 21, 2015 modification order also laid out evidence showing the respondents' attempts to obtain other controlled aircraft, including aircraft physically located in the United States in similarly-patterned transactions during the same

recent time period. Transactional documents involving two Airbus A320s bearing MSNs 82 and 99, respectively, again showed Ali Abdullah Alhay signing sales agreements for Al Naser Airlines.²⁶ A review of the payment information for these aircraft similarly revealed EFTs from Ali Abdullah Alhay and Bahar Safwa General Trading that follow the pattern described for MSNs 164 and 550, *supra*. MSNs 82 and 99 were detained by OEE Special Agents prior to their planned export from the United States.

The July 13, 2015 renewal order outlined evidence showing that Al Naser Airlines' attempts to acquire aircraft on behalf of Mahan Airways extended beyond MSNs 164 and 550 to include a total of nine aircraft.²⁷ Four of the aircraft, all of which are subject to the Regulations and were obtained by Mahan from Al Naser Airlines, had been issued the following Iranian tail numbers: EP–MMD (MSN 164), EP–MMG (MSN 383), EP–MMH (MSN 391) and EP–MMR (MSN 416), respectively.²⁸ Publicly available flight tracking information provided evidence that at the time of the July 13, 2015 renewal, both EP–MMH and EP–MMR were being actively flown on routes into

²⁶ Both aircraft were physically located in the United States and therefore are subject to the Regulations pursuant to Section 734.3(a)(1). Moreover, these Airbus A320s are powered by U.S.-origin engines that are subject to the Regulations and classified under Export Control Classification Number ECCN 9A991.d. The Airbus A320s contain controlled U.S.-origin items valued at more than 10 percent of the total value of the aircraft and as a result are subject to the EAR regardless of their location. The aircraft are classified under ECCN 9A991.b. The export or re-export of these aircraft to Iran requires U.S. Government authorization pursuant to Sections 742.8 and 746.7 of the Regulations.

²⁷ This evidence included a press release dated May 9, 2015, that appeared on Mahan Airways' website and stated that Mahan “added 9 modern aircraft to its air fleet [.]” and that the newly acquired aircraft included eight Airbus A340s and one Airbus A321. See <http://www.mahan.aero/en/mahan-air/press-room/44>. The press release was subsequently removed from Mahan Airways' website. Publicly available aviation databases similarly showed that Mahan had obtained nine additional aircraft from Al Naser Airlines in May 2015, including MSNs 164 and 550. As also discussed in the July 13, 2015 renewal order, Sky Blue Bird Group, via Issam Shammout, was actively involved in Al Naser Airlines' acquisition of MSNs 164 and 550, and the attempted acquisition of MSNs 82 and 99 (which were detained by OEE).

²⁸ The Airbus A340s are powered by U.S.-origin engines that are subject to the Regulations and classified under ECCN 9A991.d. The Airbus A340s contain controlled U.S.-origin items valued at more than 10 percent of the total value of the aircraft and as a result are subject to the EAR regardless of their location. The aircraft are classified under ECCN 9A991.b. The export or re-export of these aircraft to Iran requires U.S. Government authorization pursuant to Sections 742.8 and 746.7 of the Regulations.

²¹ The BAE regional jets are powered with U.S.-origin engines. The engines are subject to the EAR and classified under ECCN 9A991.d. These aircraft contain controlled U.S.-origin items valued at more than 10 percent of the total value of the aircraft and as a result are subject to the EAR. They are classified under ECCN 9A991.b. The export or reexport of these aircraft to Iran requires U.S. Government authorization pursuant to Sections 742.8 and 746.7 of the Regulations.

²² See 76 FR 50,407 (Aug. 15, 2011). The July 22, 2014 renewal order also referenced two Airbus A320 aircraft painted in the livery and logo of Mahan Airways and operating under Iranian tail numbers EP–MMK and EP–MML, respectively. OEE's investigation also showed that Mahan obtained these aircraft in November 2013, from Khors Air Company, another Ukrainian airline that, like Ukrainian Mediterranean Airlines, was added to BIS's Entity List on August 15, 2011. Open source evidence indicates the two Airbus A320 aircraft may have been transferred by Mahan Airways to another Iranian airline in October 2014, and issued Iranian tail numbers EP–APE and EP–APF, respectively.

²³ See <http://www.treasury.gov/resource-center/sanctions/OFAC-Enforcement/Pages/20140829.aspx>. See 79 FR 55,073 (Sep. 15, 2014). OFAC also blocked the property and property interests of Pioneer Logistics of Turkey on August 29, 2014. *Id.* Mahan Airways' use of Pioneer Logistics in an effort to evade the TDO and the Regulations was discussed in a prior renewal order, as summarized, *supra*, at 14. BIS added both Asian Aviation Logistics and Pioneer Logistics to the Entity List on December 12, 2013. See 78 FR 75458 (Dec. 12, 2013).

²⁴ Both of these aircraft are powered by U.S.-origin engines that are subject to the Regulations and classified under ECCN 9A991.d. Both aircraft contain controlled U.S.-origin items valued at more than 10 percent of the total value of the aircraft and as a result are subject to the EAR regardless of their location. The aircraft are classified under ECCN 9A991.b. The export or re-export of these aircraft to Iran requires U.S. Government authorization pursuant to Sections 742.8 and 746.7 of the Regulations.

²⁵ The evidence obtained by OEE showed Ali Abdullah Alhay as a 25% owner of Al Naser Airlines.

and out of Iran in violation of the Regulations.²⁹

The January 7, 2016 renewal order discussed evidence that Mahan Airways had begun actively flying EP-MMD on international routes into and out of Iran. Additionally, the January 7, 2016 order described publicly available aviation database and flight tracking information indicating that Mahan Airways continued efforts to acquire Iranian tail numbers and press into active service under Mahan's livery and logo at least two more of the Airbus A340 aircraft it had obtained from or through Al Naser Airlines: EP-MME (MSN 371) and EP-MMF (MSN 376), respectively.

The July 7, 2016 renewal order described Mahan Airways' acquisition of a BAE Avro RJ-85 aircraft (MSN 2392) in violation of the Regulations and its subsequent registration under Iranian tail number EP-MOR.³⁰ This information was corroborated by publicly available information on the website of Iran's civil aviation authority. The July 7, 2016 order also outlined Mahan's continued operation of EP-MMF in violation of the Regulations on routes from Tehran, Iran to Beijing, China and Shanghai, China, respectively.

The December 30, 2016 renewal order outlined Mahan's continued operation of multiple Airbus aircraft, including EP-MMD (MSN 164), EP-MMF (MSN 376), and EP-MMH (MSN 391), which were acquired from or through Al Naser Airlines, as previously detailed in pertinent part in the July 13, 2015 and January 7, 2016 renewal orders. Publicly available flight tracking information showed that the aircraft were operated on flights into and out of Iran, including from/to Beijing, China, Kuala Lumpur, Malaysia, and Istanbul, Turkey.³¹

²⁹ There is some publicly available information indicating that the aircraft Mahan Airways is flying under Iranian tail number EP-MMR is now MSN 615, rather than MSN 416. Both aircraft are Airbus A340 aircraft that Mahan acquired from Al Naser Airlines in violation of the Regulations. Moreover, both aircraft were designated as SDGTs by OFAC on May 21, 2015, pursuant to Executive Order 13224. See 80 FR 30762 (May 29, 2015).

³⁰ The BAE Avro RJ-85 is powered by U.S.-origin engines that are subject to the Regulations and classified under ECCN 9A991.d. The BAE Avro RJ-85 contains controlled U.S.-origin items valued at more than 10 percent of the total value of the aircraft and as a result is subject to the EAR regardless of its location. The aircraft is classified under ECCN 9A991.b, and its export or re-export to Iran requires U.S. Government authorization pursuant to Sections 742.8 and 746.7 of the Regulations.

³¹ Specifically, on December 22, 2016, EP-MMD (MSN 164) flew from Dubai, UAE to Tehran, Iran. Between December 20 and December 22, 2016, EP-MMF (MSN 376) flew on routes from Tehran, Iran to Beijing, China and Istanbul, Turkey, respectively. Between December 26 and December 28, 2016, EP-

The June 27, 2017 renewal order included similar evidence regarding Mahan Airways' operation of multiple Airbus aircraft subject to the Regulations, including, but not limited to, aircraft procured from or through Al Naser Airlines, on flights into and out of Iran, including from/to Moscow, Russia, Shanghai, China and Kabul, Afghanistan. The June 27, 2017 order also detailed evidence concerning a suspected planned or attempted diversion to Mahan of an Airbus A340 subject to the Regulations that had first been mentioned in OEE's December 13, 2016 renewal request.

The December 20, 2017 renewal order presented evidence that a Mahan employee attempted to initiate negotiations with a U.S. company for the purchase of an aircraft subject to the Regulations and classified under ECCN 9A610. Moreover, the order highlighted Al Naser Airlines' acquisition, via lease, of at least possession and/or control of a Boeing 737 (MSN 25361), bearing tail number YR-SEB, and an Airbus A320 (MSN 357), bearing tail number YR-SEA, from a Romanian company in violation of the TDO and the Regulations.³² Open source information indicates that after the December 20, 2017 renewal order publicly exposed Al Naser's acquisition of these two aircraft (MSNs 25361 and 357), the leases were subsequently cancelled and the aircraft returned to their owner.

The December 20, 2017 renewal order also included evidence indicating that Mahan Airways was continuing to operate a number of aircraft subject to the Regulations, including aircraft originally procured from or through Al Naser Airlines, on flights into and out of Iran, including from/to Lahore, Pakistan, Shanghai, China, Ankara, Turkey, Kabul, Afghanistan, and Baghdad, Iraq.

The June 14, 2018 renewal order outlined evidence that Mahan began actively operating EP-MMT, an Airbus A340 aircraft (MSN 292) acquired in 2017 and previously registered in Kazakhstan under tail number UP-A4003, on international flights into and out of Iran.³³ It also discussed evidence

MMH (MSN 391) flew on routes from Tehran, Iran to Kuala Lumpur, Malaysia.

³² The Airbus A320 is powered with U.S.-origin engines, which are subject to the EAR and classified under Export Control Classification ("ECCN") 9A991.d. The engines are valued at more than 10 percent of the total value of the aircraft, which consequently is subject to the EAR. The aircraft is classified under ECCN 9A991.b, and its export or reexport to Iran would require U.S. Government authorization pursuant to Sections 742.8 and 746.7 of the Regulations.

³³ The Airbus A340 is powered by U.S.-origin engines that are subject to the Regulations and

that Mahan continued to operate a number of aircraft subject to the Regulations, including, but not limited to, EP-MME, EP-MMF, and EP-MMH, on international flights into and out of Iran, including from/to Beijing, China.

The June 14, 2018 renewal order also noted OFAC's May 24, 2018 designation of Otik Aviation, a/k/a Otik Havacilik Sanayi Ve Ticaret Limited Sirketi, of Turkey, as an SDGT pursuant to Executive Order 13224, for providing material support to Mahan, as well as OFAC's designation as SDGTs of an additional twelve aircraft in which Mahan has an interest.³⁴ The June 14, 2018 order also cited the April 2018 arrest and arraignment of a U.S. citizen on a three-count criminal information filed in the United States District Court for the District of New Jersey involving the unlicensed exports of U.S.-origin aircraft parts valued at over \$2 million to Iran, including to Mahan Airways.

The December 11, 2018 renewal order detailed publicly available information showing that Mahan Airways had continued operating a number of aircraft subject to the EAR, including, but not limited to, EP-MMB, EP-MME, EP-MMF, and EP-MMQ, on international flights into and out of Iran from/to Istanbul, Turkey, Guangzhou, China, Bangkok, Thailand, and Dubai, UAE.³⁵ It also discussed that OEE's continued

classified under ECCN 9A991.d. The Airbus A340 contains controlled U.S.-origin items valued at more than 10 percent of the total value of the aircraft and as a result is subject to the Regulations regardless of its location. The aircraft is classified under ECCN 9A991.b. The export or re-export of this aircraft to Iran requires U.S. Government authorization pursuant to Sections 742.8 and 746.7 of the Regulations. On June 4, 2018, EP-MMT (MSN 292) flew from Bangkok, Thailand to Tehran, Iran.

³⁴ See 83 FR 27828 (June 14, 2018). OFAC's related press release stated in part that "[o]ver the last several years, Otik Aviation has procured and delivered millions of dollars in aviation-related spare and replacement parts for Mahan Air, some of which are procured from the United States and the European Union. As recently as 2017, Otik Aviation continued to provide Mahan Air with replacement parts worth well over \$100,000 per shipment, such as aircraft brakes." The twelve additional Mahan-related aircraft that were designated are: EP-MMA (MSN 20), EP-MMB (MSN 56), EP-MMC (MSN 282), EP-MMJ (MSN 526), EP-MMV (MSN 2079), EP-MNF (MSN 547), EP-MOD (MSN 3162), EP-MOM (MSN 3165), EP-MOP (MSN 2257), EP-MOQ (MSN 2261), EP-MOR (MSN 2392), and EP-MOS (MSN 2347). See <https://home.treasury.gov/news/press-releases/sm0395>. See also <https://www.treasury.gov/resource-center/sanctions/OFAC-Enforcement/Pages/20180524.aspx>.

³⁵ Flight tracking information showed that on December 10, 2018, EP-MMB (MSN 56) flew from Istanbul, Turkey to Tehran, Iran, and EP-MME (MSN 371) flew from Guangzhou, China to Tehran, Iran. Additionally, on December 6, 2018, EP-MMF (MSN 376) flew from Bangkok, Thailand to Tehran, Iran, and on December 9, 2018, EP-MMQ (MSN 449) flew on routes between Dubai, United Arab Emirates and Tehran, Iran.

investigation of Mahan Airways and its affiliates and agents had resulted in an October 2018 guilty plea by Arzu Sagsoz, a Turkish national, in the U.S. District Court for the District of Columbia, stemming from her involvement in a conspiracy to export a U.S.-origin aircraft engine, valued at approximately \$810,000, to Mahan.

The December 11, 2018 order also noted OFAC's September 14, 2018 designation of Mahan-related entities as SDGTs pursuant to Executive Order 13224, namely, My Aviation Company Limited, of Thailand, and Mahan Travel and Tourism SDN BHD, a/k/a Mahan Travel a/k/a Mihan Travel & Tourism SDN BHD, of Malaysia.³⁶ As general sales agents for Mahan Airways, these companies sold cargo space aboard Mahan Airways' flights, including on flights to Iran, and provided other services to or for the benefit of Mahan Airways and its operations.³⁷

The June 5, 2019 renewal order highlighted Mahan's continued violation of the TDO and the Regulations. An end-use check conducted by BIS in Malaysia in March 2019 uncovered evidence that, on approximately ten occasions, Mahan had caused, aided and/or abetted the unlicensed export of U.S.-origin items subject to the Regulations from the United States to Iran via Malaysia. The items included helicopter shafts, transmitters, and other aircraft parts, some of which are listed on the Commerce Control List and controlled on anti-terrorism grounds. The June 5, 2019 order also detailed publicly available flight tracking information showing that Mahan continued to unlawfully operate a number of aircraft subject to the EAR on flights into and out of Iran, including on routes to and from Damascus, Syria.³⁸

The June 5, 2019 order also described actions taken by both BIS and OFAC to thwart efforts by entities connected to or acting on behalf of Mahan Airways to violate U.S. export controls and sanctions related to Iran. On May 14, 2019, BIS added Manohar Nair, Basha Asmath Shaikh, and two co-located companies that they operate, Emirates Hermes General Trading and Presto Freight International, LLC, to the Entity List pursuant to Section 744.11 of the Regulations, including for engaging in activities to procure U.S.-origin items on Mahan's behalf.³⁹ On January 24, 2019, OFAC designated as SDGTs Flight Travel LLC, which is Mahan's general service agent in Yerevan, Armenia, and Qeshm Fars Air, an Iranian airline which operates two U.S.-origin Boeing 747s⁴⁰ and is owned or controlled by Mahan, and also linked to the Islamic Revolutionary Guard Corps-Qods Force (IRGC-QF).⁴¹

The December 2, 2019 renewal order noted that OEE's on-going investigation revealed that U.S.-origin passenger flight and database management software subject to the Regulations was provided to a company in Turkey and subsequently used to facilitate and service Mahan's operations into and out of Turkey in further violation of the Regulations.

Additionally, open source information, including flight tracking data and news articles published in October 2019, showed that Mahan Airways was now operating a U.S.-origin Boeing 747 on routes between Iranian airports in Tehran, Kish Island, and Mashhad. This aircraft, bearing Iranian tail number EP-MNB, appears to be one of the three aircraft that Mahan illegally acquired via Blue Airways of Armenia and U.K.-based Balli Group that resulted in the issuance of the original TDO.⁴² See *supra* at 10–12.

Evidence was also described in the December 2, 2019 renewal order showing that on or about November 11, 2019, Mahan caused, aided and/or abetted the unlicensed export of a U.S.-origin atomic absorption spectrometer, an item subject to the Regulations, from the United States to Iran via the UAE. Finally, publicly available flight tracking information showed that Mahan continued to unlawfully operate a number of aircraft subject to the EAR on flights into and out of Iran, including on routes to and from Guangzhou, China, Istanbul, Turkey, and Kuala Lumpur, Malaysia.⁴³

The May 29, 2020 renewal order cited Mahan's operation of EP-MMD, EP-MMF, and EP-MMI, aircraft originally acquired from Al Naser Airlines, on international flights into and out of Iran from/to Bangkok, Thailand, Dubai, UAE, and Shanghai, China in violation of the TDO and EAR.⁴⁴ The May 29, 2020 renewal order also detailed the indictment of Ali Abdullah Alhay and Issam Shammout, parties added to the TDO in May and July 2015, respectively, in the United States District Court for the District of Columbia. Alhay and Shammout were charged with, among other violations, conspiring to export aircraft and parts to Mahan in violation of export control laws and the embargo on Iran beginning around August 2012 through May 2015.

In addition to detailing the operation of multiple aircraft in violation of the Regulations,⁴⁵ the November 24, 2020 renewal order discussed a related TDO issued on August 19, 2020, denying for 180 days the export privileges of Indonesia-based PT MS Aero Support ("PTMS Aero"), PT Antasena Kreasi ("PTAK"), PT Kandiyasa Energi Utama ("PTKEU"), Sunarko Kuntjoro, Triadi Senna Kuntjoro, and Satrio Wiharjo Sasmito based on their involvement in the unlicensed export of aircraft parts to Mahan Airways—often in coordination

³⁶ See 83 FR 34301 (July 19, 2018) (designation of Mahan Travel and Tourism SDN BHD on July 9, 2018), and 83 FR 53359 (Oct. 22, 2018) (designation of My Aviation Company Limited and updating of entry for Mahan Travel and Tourism SDN BHD on September 14, 2018).

³⁷ OFAC's press release concerning its designation of My Aviation Company Limited on September 14, 2018, states in part that "[t]his Thailand-based company has disregarded numerous U.S. warnings, issued publicly and delivered bilaterally to the Thai government, to sever ties with Mahan Air." My Aviation provides cargo services to Mahan Airways, including freight booking, and works with local freight forwarding entities to ship cargo on regularly scheduled Mahan Airways' flights to Tehran, Iran. My Aviation has also provided Mahan Airways with passenger booking services. See <https://home.treasury.gov/news/press-releases/sm484>.

³⁸ Specifically, on May 26, 2019, EP-MMJ (MSN 526) flew from Damascus, Syria to Tehran, Iran. In addition, on May 24, 2019, EP-MNF (MSN 547) flew on routes between Moscow, Russia and Tehran, and on May 23, 2019, EP-MMF (MSN 376) flew from Dubai, UAE to Tehran.

³⁹ See 84 FR 21233 (May 14, 2019).

⁴⁰ These 747s are registered in Iran with tail numbers EP-FAA and EP-FAB, respectively.

⁴¹ OFAC's press release concerning these designations states that Qeshm Fars Air was being designated for "being owned or controlled by Mahan Air, as well as for assisting in, sponsoring, or providing financial, material or technological support for, or financial or other services to or in support of, the IRGC-QF," and that Flight Travel LLC was being designated for "acting for or on behalf of Mahan Air." It further states, *inter alia*, that "Mahan Air employees fill Qeshm Fars Air management positions, and Mahan Air provides technical and operational support for Qeshm Fars Air, facilitating the airline's illicit operations." See <https://home.treasury.gov/news/press-releases/sm590>. See also <https://www.treasury.gov/resource-center/sanctions/OFAC-Enforcement/Pages/20190124.aspx>.

⁴² The same open sources indicated this aircraft continued to operate on flights within Iran to include a May 11, 2020 flight from Tehran, Iran to Kerman, Iran.

⁴³ Publicly available flight tracking information shows that on November 23, 2019, EP-MME (MSN 371) flew from Guangzhou, China to Tehran, Iran, and on November 21, 2019, EP-MMF (MSN 376) flew on routes between Istanbul, Turkey and Tehran, Iran. Additionally, on November 20, 2019, EP-MMQ (MSN 449) flew from Kuala Lumpur, Malaysia, to Tehran, Iran.

⁴⁴ Publicly available flight tracking information shows that on May 8, 2020, EP-MMD (MSN 164) flew on routes between Bangkok, Thailand and Tehran, Iran, and on May 10, 2020, EP-MMF (MSN 376) flew on routes between Dubai, UAE and Tehran. In addition, on May 9, 2020, EP-MMI (MSN 416) flew on routes between Shanghai, China and Tehran.

⁴⁵ Publicly available flight tracking information shows that on November 13, 2020, EP-MMQ (MSN 449) flew on routes between Istanbul, Turkey and Tehran, Iran, and on November 15, 2020, EP-MMI (MSN 416) flew on routes between Shenzhen, China and Tehran.

with Mustafa Ovieci, a Mahan executive.⁴⁶ These parties also facilitated the shipment of damaged Mahan parts to the United States for repair and subsequent export back to Iran in further violation of U.S. laws. In both instances, the fact that the items were destined to Iran/Mahan was concealed from U.S. companies, shippers, and freight forwarders.⁴⁷

The November 24, 2020 renewal order also includes actions taken by other U.S. government agencies such as OFAC's August 19, 2020 designation of UAE-based Parthia Cargo, its CEO Amin Mahdavi, and Delta Parts Supply FZC as SDGTs pursuant to Executive Order 13224 for providing "key parts and logistics services for Mahan Air. . . ." The OFAC press release further states, in part, that Mahdavi "has directly coordinated the shipment of parts on behalf of Mahan Air."⁴⁸ In addition, Mahdavi and Parthia Cargo were indicted in the United States District Court for the District of Columbia for violating sanctions on Iran.⁴⁹

Moreover, in October 2020, the U.S. District Court for the District of New Jersey sentenced Joyce Eliasbachus to 18 months of confinement based on her role in a conspiracy to export \$2 million dollars' worth of aircraft parts from the United States to Iran, including to Mahan Airways.⁵⁰

The May 21, 2021 renewal order outlined Mahan's continued operation of a number of aircraft subject to the EAR, including, but not limited to, EP-MMH, EP-MMI, and EP-MMQ, on international flights into and out of Iran from/to Shanghai, China, and Dubai, United Arab Emirates, and Guangzhou, China, respectively.⁵¹

Open source news reporting also indicated that after five years of maintenance, Mahan Air is now operating EP-MNE, a Boeing 747 on

domestic flights within Iran.⁵² In addition to this aircraft being one of the original three Boeing aircraft Mahan obtained in violation of the Regulations, any service or maintenance involving parts subject to the EAR would further violate the TDO.

The November 17, 2021 order details Mahan's continued operation of a number of aircraft subject to the EAR, including, but not limited to EP-MME, EP-MMJ, EP-MMQ, on flights into and out of Iran from/to Istanbul, Turkey, and Dubai, United Arab Emirates, and Shenzhen, China, respectively.⁵³ Additionally, publicly available industry sources showed that EP-MMG (MSN 383), an aircraft that Mahan acquired from Al Naser Air in violation of both the TDO and Regulations, was in a maintenance, repair, overhaul ("MRO") status at Iran's Imam Khomeini International Airport in Tehran, Iran.

The May 13, 2022 renewal order outlines Mahan's continuing violation of the TDO and/or Regulations including, but not limited to the operation of EP-MME, EP-MNO, and EP-MMB on flights into and out of Iran from/to Moscow, Russia, Damascus, Syria, and Guangzhou, China, respectively.⁵⁴ Open source press reports also indicates that as of April 2022, Mahan Air increased its service into Moscow, Russia by adding two weekly flights to Moscow's Sheremetyevo Airport ("SVO") to its current service into Moscow's Vnukovo Airport ("VKO").⁵⁵ Mahan flights into Russia after February 24, 2022 violated the stringent export controls imposed on aviation-related (e.g., Commerce Control List Categories 7 and 9) items to Russia in response to Russia's further invasion of Ukraine. These controls include a license requirement for the export, reexport or transfer (in-country) to Russia of any aircraft or aircraft parts specified in Export Control

Classification Number (ECCN) 9A991 (Section 746.8(a)(1) of the EAR).⁵⁶

The May 13, 2022 renewal order also cited OFAC's recent administrative enforcement action with an Australian freight forwarder resulting in a \$6,131,855 civil penalty, which resolved, in part, allegations of receiving 327 payments from Mahan that were processed through U.S. financial institutions or foreign branches of U.S. financial institutions in apparent violation of OFAC sanctions.⁵⁷

The November 8, 2022 order detailed Mahan Air's continued violation of the TDO and Regulations, including the Russia-related export controls set out in Section 746.8 of the Regulations. On September 19, 2022, BIS publicly identified Mahan's EP-MEE aircraft for its unlicensed reexport to Russia in apparent violation of Section 746.8 of the Regulations.⁵⁸ Additionally, open source evidence showed that Mahan continues to operate EP-MME, EP-MMJ, and EP-MMQ on flights into and out of Iran from/to Moscow, Russia, and Dubai, United Arab Emirates, respectively, without the requisite authorization.⁵⁹

Further, on August 2, 2022, BIS took a related enforcement action against Venezuela-based cargo airline Empresa de Transporte Aéreo cargo del Sur, S.A., a/k/a Aerocargo del Sur Transportation Company, a/k/a EMTRASUR ("EMTRASUR"), for acquiring custody and/or control from Mahan Air of a U.S.-origin Boeing 747 aircraft bearing manufacturer's serial number 23413 ("MSN 23413") in violation of the TDO.⁶⁰ In or around October 2021, Mahan Air transferred custody and control of MSN 23413 to EMTRASUR's parent company, CONVIASA,⁶¹ through an intermediary.

⁵⁶ The TDO prohibits Mahan from being eligible to use license exception Aircraft, Vessels, and Spacecraft (AVS) (Section 740.15 of the EAR).

⁵⁷ https://home.treasury.gov/system/files/126/20220425_toll.pdf.

⁵⁸ <https://bis.doc.gov/index.php/documents/about-bis/newsroom/press-releases/3138-bis-press-release-gp10-iranian-craft-additions/file>.

⁵⁹ Publicly available flight tracking information shows that on October 9, 2022, EP-MME (MSN 376) flew on routes between Tehran, Iran and Moscow, Russia's VTO airport, and on October 26, 2022, EP-MMJ (MSN 526) flew on routes between Tehran, Iran and Moscow, Russia's SVO airport. On October 28, 2022, EP-MMQ (MSN 346) flew on routes between Dubai, United Arab Emirates and Tehran, Iran.

⁶⁰ BIS issued a separate TDO denying the export privileges of EMTRASUR for a period of 180 days. See 87 FR 47,964 (Aug. 5, 2022).

⁶¹ On or about February 7, 2020, U.S. Department of the Treasury's Office of Foreign Assets Control ("OFAC") added CONVIASA, a Venezuelan state-owned airline, to the list of Specially Designated Nationals ("SDN") pursuant to Executive Order (E.O.) 13884. See <https://home.treasury.gov/news/press-releases/sm903>.

⁴⁶ See 85 FR 52321 (Aug. 25, 2020).

⁴⁷ PTMS Aero, PTAK, PTKEU, and Sunarko Kuntjoro were each indicted in December 2019 on multiple counts related to this conspiracy in the United States District Court for the District of Columbia.

⁴⁸ <https://home.treasury.gov/news/press-releases/sm1098>.

⁴⁹ <https://www.justice.gov/opa/pr/iranian-national-and-uae-business-organization-charged-criminal-conspiracy-violate-iranian>.

⁵⁰ Eliasbachus' arrest and arraignment were detailed in the June 14, 2018 renewal order, as described *supra* at 21.

⁵¹ Publicly available flight tracking information shows that on May 14, 2021, EP-MMH (MSN 391) flew on routes between Shanghai, China and Tehran, Iran, and on May 13, 2021, EP-MMI (MSN 416) flew on routes between Dubai, United Arab Emirates and Tehran. In addition, on May 20, 2021, EP-MMQ (MSN 346) flew on routes between Guangzhou, China and Tehran.

⁵² <https://simpleflying.com/mahan-air-747-300-flies-again/>.

⁵³ Publicly available flight tracking information shows that on November 7, 2021, EP-MME (MSN 376) flew on routes between Istanbul, Turkey and Tehran, Iran, and on November 9, 2021, EP-MMJ (MSN 526) flew on routes between Dubai, United Arab Emirates and Tehran, Iran. In addition, on November 8, 2021, EP-MMQ (MSN 346) flew on routes between Shenzhen, China and Tehran, Iran.

⁵⁴ Publicly available flight tracking information shows that on May 2, 2022, EP-MME (MSN 376) flew on routes between Moscow, Russia and Tehran, Iran, and on May 5, 2022, EP-MNO (MSN 595) flew on routes between Damascus, Syria and Tehran, Iran. In addition, on May 6, 2022, EP-MMB (MSN 56) flew on routes between Guangzhou, China and Tehran, Iran.

⁵⁵ <https://centreforaviation.com/news/mahan-air-launches-moscow-sheremetyevo-service-1131185>.

The May 5, 2023 renewal order outlined open source evidence showing Mahan continuing to operate EP-MNF, EP-MMQ, and EP-MME on flights into and out of Iran from/to Guangzhou, China, Kabul, Afghanistan, and Moscow, Russia, respectively, without the requisite authorization.⁶² The renewal order also noted the national security and foreign policy concerns raised by Mahan's intention to start direct flights from Iran to Minsk, Belarus.⁶³ Lastly, the May 3, 2023 renewal order cited publicly available information showing that Russian airline Aeroflot, which is currently subject to its own TDO,⁶⁴ has begun sending its aircraft to Mahan for repairs and/or maintenance.⁶⁵

OEE's October 11, 2023 renewal request and on-going investigation outlines Mahan's continued violation of the TDO by operating aircraft including EP-MME, EP-MMQ, and EP-MMB on flights into and out of Iran from/to Erbil, Iraq, Shanghai, China, Lahore, Pakistan, and Moscow, Russia.⁶⁶ OEE also highlighted its continued investigation into Mahan's recent acquisition of an Airbus A340 (MSN 75) bearing Iranian tail number EP-MJA, which has flown to/from Tehran, Iran and Moscow, Russia as recently as October 25, 2023.

Lastly, public reporting details the on-going national security and foreign policy threats and concerns raised by Mahan's destabilizing activities. Specifically, open source reporting details October 12, 2023 airstrikes at Syria's Damascus and Aleppo airports made in an effort to divert a Mahan A340 (MSN 282 and bearing tail number EP-MMC)⁶⁷ which was in route at the time from Tehran, Iran to Syria and suspected of carrying weapons.⁶⁸

⁶² Publicly available flight tracking information shows that on April 24, 2023, EP-MMQ (MSN 346) flew on routes between Guangzhou, China, and Tehran, Iran, and on April 27, 2023, EP-MNF (MSN 547) flew on routes between Kabul, Afghanistan and Tehran, Iran. On April 28, 2023, EP-MME (MSN 371) flew on routes between Moscow, Russia and Tehran, Iran.

⁶³ <https://iranpress.com/content/76332/mahan-air-launches-direct-flight-from-tehran-minsk>.

⁶⁴ See 88 FR 66807 (Sep. 28, 2023).

⁶⁵ <https://simpleflying.com/aeroflot-airbus-a330-maintenance-iran-mahan-air/>.

⁶⁶ Publicly available flight tracking information shows that on October 24, 2023, EP-MME (MSN 371) flew on routes between Erbil, Iraq and Tehran, Iran, and on October 23, 2023, EP-MMB (MSN 56) flew on routes between Moscow, Russia and Tehran, Iran. On October 21–22, 2023, EP-MMQ (MSN 346) flew on routes between Lahore, Pakistan and Tehran, Iran.

C. Findings

Under the applicable standard set forth in Section 766.24 of the Regulations and my review of the entire record, I find that the evidence presented by BIS convincingly demonstrates that the denied persons have acted in violation of the Regulations and the TDO; that such violations have been significant, deliberate and covert; and that given the foregoing and the nature of the matters under investigation, there is a likelihood of imminent violations. Moreover, I find that renewal for an extended period is appropriate given the pattern of repeated, ongoing and/or continuous apparent violations of the EAR. Therefore, renewal of the TDO is necessary in the public interest to prevent imminent violation of the Regulations and to give notice to companies and individuals in the United States and abroad that they should continue to avoid dealing with Mahan Airways and Al Naser Airlines and the other denied persons, in connection with export and reexport transactions involving items subject to the Regulations and in connection with any other activity subject to the Regulations.

III. Order

It is therefore ordered:

First, that MAHAN AIRWAYS, Mahan Tower, No. 21, Azadegan St., M.A. Jenah Exp. Way, Tehran, Iran; PEJMAN MAHMOOD KOSARAYANIFARD A/K/A KOSARIAN FARD, P.O. Box 52404, Dubai, United Arab Emirates; MAHMOUD AMINI, G#22 Dubai Airport Free Zone, P.O. Box 393754, Dubai, United Arab Emirates, and P.O. Box 52404, Dubai, United Arab Emirates, and Mohamed Abdulla Alqaz Building, Al Maktoum Street, Al Rigga, Dubai, United Arab Emirates; KERMANS AVIATION A/K/A GIE KERMANS AVIATION, 42 Avenue Montaigne 75008, Paris, France; SIRJANCO TRADING LLC, P.O. Box 8709, Dubai, United Arab Emirates; MAHAN AIR GENERAL TRADING LLC, 19th Floor Al Moosa Tower One, Sheik Zayed Road, Dubai 40594, United Arab Emirates; MEHDI BAHRAMI, Mahan Airways-Istanbul Office, Cumhuriye Cad. Sibil Apt No: 101 D:6, 34374 Emadad, Sisli Istanbul, Turkey; AL NASER AIRLINES A/K/A AL-NASER AIRLINES A/K/A AL NASER WINGS AIRLINE A/K/A ALNASER AIRLINES AND AIR FREIGHT LTD., Home 46, Al-Karrada, Babil Region, District 929, St 21, Beside Al Jadiry Private Hospital, Baghdad,

Iraq, and Al Amirat Street, Section 309, St. 3/H.20, Al Mansour, Baghdad, Iraq, and P.O. Box 28360, Dubai, United Arab Emirates, and P.O. Box 911399, Amman 11191, Jordan; ALI ABDULLAH ALHAY A/K/A ALI ALHAY A/K/A ALI ABDULLAH AHMED ALHAY, Home 46, Al-Karrada, Babil Region, District 929, St 21, Beside Al Jadiry Private Hospital, Baghdad, Iraq, and Anak Street, Qatif, Saudi Arabia 61177; BAHAR SAFWA GENERAL TRADING, P.O. Box 113212, Citadel Tower, Floor-5, Office #504, Business Bay, Dubai, United Arab Emirates, and P.O. Box 8709, Citadel Tower, Business Bay, Dubai, United Arab Emirates; SKY BLUE BIRD GROUP A/K/A SKY BLUE BIRD AVIATION A/K/A SKY BLUE BIRD LTD A/K/A SKY BLUE BIRD FZC, P.O. Box 16111, Ras Al Khaimah Trade Zone, United Arab Emirates; and ISSAM SHAMMOUT A/K/A MUHAMMAD ISAM MUHAMMAD ANWAR NUR SHAMMOUT A/K/A ISSAM ANWAR, Philips Building, 4th Floor, Al Fardous Street, Damascus, Syria, and Al Kolaa, Beirut, Lebanon 151515, and 17-18 Margaret Street, 4th Floor, London, W1W 8RP, United Kingdom, and Cumhuriyet Mah. Kavakli San St. Fulya, Cad. Hazar Sok. No.14/A Silivri, Istanbul, Turkey, and when acting for or on their behalf, any successors or assigns, agents, or employees (each a "Denied Person" and collectively the "Denied Persons") may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as "item") exported or to be exported from the United States that is subject to the EAR, or in any other activity subject to the EAR including, but not limited to:

A. Applying for, obtaining, or using any license, license exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the EAR, or engaging in any other activity subject to the EAR; or

C. Benefitting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the EAR, or from any other activity subject to the EAR.

Second, that no person may, directly or indirectly, do any of the following:

A. Export, reexport, or transfer (in-country) to or on behalf of a Denied Person any item subject to the EAR;

B. Take any action that facilitates the acquisition or attempted acquisition by a Denied Person of the ownership, possession, or control of any item subject to the EAR that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby a Denied Person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from a Denied Person of any item subject to the EAR that has been exported from the United States;

D. Obtain from a Denied Person in the United States any item subject to the EAR with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

E. Engage in any transaction to service any item subject to the EAR that has been or will be exported from the United States and which is owned, possessed or controlled by a Denied Person, or service any item, of whatever origin, that is owned, possessed or controlled by a Denied Person if such service involves the use of any item subject to the EAR that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, that, after notice and opportunity for comment as provided in section 766.23 of the EAR, any other person, firm, corporation, or business organization related to a Denied Person by ownership, control, position of responsibility, affiliation or other connection in the conduct of trade or business may also be made subject to the provisions of this Order.

Fourth, that this Order does not prohibit any export, reexport, or other transaction subject to the EAR where the only items involved that are subject to the EAR are the foreign-produced direct product of U.S.-origin technology.

In accordance with the provisions of sections 766.24(e) of the EAR, Mahan Airways, Al Naser Airlines, Ali Abdullah Alhay, and/or Bahar Safwa General Trading may, at any time, appeal this Order by filing a full written statement in support of the appeal with the Office of the Administrative Law Judge, U.S. Coast Guard ALJ Docketing Center, 40 South Gay Street, Baltimore, Maryland 21202-4022. In accordance with the provisions of Sections 766.23(c)(2) and 766.24(e)(3) of the EAR, Pejman Mahmood Kosarayanifard, Mahmoud Amini, Kerman Aviation, Sirjanco Trading LLC, Mahan Air General Trading LLC, Mehdi Bahrami, Sky Blue Bird Group, and/or Issam

Shammout may, at any time, appeal their inclusion as a related person by filing a full written statement in support of the appeal with the Office of the Administrative Law Judge, U.S. Coast Guard ALJ Docketing Center, 40 South Gay Street, Baltimore, Maryland 21202-4022.

In accordance with the provisions of section 766.24(d) of the EAR, BIS may seek renewal of this Order by filing a written request not later than 20 days before the expiration date. A renewal request may be opposed by Mahan Airways, Al Naser Airlines, Ali Abdullah Alhay, and/or Bahar Safwa General Trading as provided in section 766.24(d), by filing a written submission with the Assistant Secretary of Commerce for Export Enforcement, which must be received not later than seven days before the expiration date of the Order.

A copy of this Order shall be provided to Mahan Airways, Al Naser Airlines, Ali Abdullah Alhay, and Bahar Safwa General Trading and each related person, and shall be published in the **Federal Register**.

This Order is effective immediately and shall remain in effect for one year.

Kevin J. Kurland,

Deputy Assistant Secretary of Commerce for Export Enforcement.

International Trade Administration

[A-552-802]

Certain Frozen Warmwater Shrimp From the Socialist Republic of Vietnam: Preliminary Results, Partial Rescission, and Preliminary Determination of No Shipments of Antidumping Duty Administrative Review; 2022-2023

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that no companies under review qualify for a separate rate and that these companies are, therefore, considered part of the Socialist Republic of Vietnam (Vietnam)-wide entity. Additionally, Commerce is partially rescinding this review with respect to companies for which all review requests were timely withdrawn. Further, Commerce preliminarily determines that certain companies had no shipments of subject merchandise during the period

of review (POR), February 1, 2022, through January 31, 2023. Interested parties are invited to comment on these preliminary results.

DATES: Applicable November 3, 2023.

FOR FURTHER INFORMATION CONTACT: Jonathan Schueler, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-9175.

SUPPLEMENTARY INFORMATION:

Background

On February 2, 2023, Commerce published a notice of opportunity to request an administrative review of the antidumping duty order on certain frozen warmwater shrimp from the Vietnam.¹ Commerce received timely requests for an administrative review from AHSTAC (the petitioner),² ASPA (domestic processors),³ and numerous Vietnamese companies. On April 11, 2023, Commerce published in the **Federal Register** a notice of initiation of an administrative review of the Order for the period February 1, 2022, through January 31, 2023, covering 187 companies including multiple companies with name variations/abbreviations in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act) and 19 CFR 351.221(c)(1)(i).⁴

On May 16 and 17, 2023, the petitioner filed timely withdrawals of its review requests of 41 companies.⁵ On May 17, 2023, ASPA filed timely withdrawals of its review requests of 35 companies.⁶ On May 16, 2023, Ngoc Tri Seafood Joint Stock Company, Tai Kim Anh Seafood Joint Stock Corporation, and 49 other Vietnamese producers and

¹ See *Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity to Request Administrative Review*, 88 FR 7071 (February 2, 2023); see also *Notice of Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order: Certain Frozen Warmwater Shrimp from the Socialist Republic of Vietnam*, 70 FR 5152 (February 1, 2005) (Order).

² The petitioner, AHSTAC, is the Ad Hoc Shrimp Trade Action Committee.

³ The domestic processors, ASPA, are the American Shrimp Processors Association.

⁴ See *Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 88 FR 21609 (April 11, 2023) (Initiation Notice).

⁵ See Petitioner's Letters, "Domestic Producers' Partial Withdrawal of Review Requests," dated May 16, 2023; and "Domestic Producers' Partial Withdrawal of Review Requests," dated May 17, 2023.

⁶ See ASPA's Letters, "American Shrimp Processors Association's Partial Withdrawal of Review Requests," dated May 17, 2023; and "American Shrimp Processors Association's Partial Withdrawal of Review Requests," dated May 17, 2023.

or exporters, including Viet I-Mei Frozen Foods Co., Ltd. (Viet I-Mei), withdrew their review requests of themselves.⁷ On May 25, 2023, Kim Anh Company and QNL One Member Company timely withdrew their review requests of themselves.⁸ Therefore, Commerce is rescinding its review with respect to the 66 companies for which all review requests were withdrawn, listed in Appendix II of this notice, as discussed below.

Respondent Selection

On April 27, 2023, only one company, Viet I-Mei, filed a timely separate rate certification.⁹ On May 3, 2023, Commerce released U.S. Customs and Border Protection (CBP) entry data in order to select respondents for individual examination.¹⁰ We received comments regarding respondent selection from the petitioner on May 10, 2023.¹¹ However, Commerce did not select any mandatory respondents for individual examination because the sole company which timely filed a separate rate application and/or certification and was, therefore, eligible for individual examination (*i.e.*, Viet I-Mei) had no remaining review requests on the record, as discussed below.

Scope of the Order

The merchandise subject to the *Order* is certain frozen warmwater shrimp. The product is currently classified under the following Harmonized Tariff Schedule of the United States (HTSUS) item subheadings: 0306.17.0004, 0306.17.0005, 0306.17.0007, 0306.17.0008, 0306.17.0010, 0306.17.0011, 0306.17.0013, 0306.17.0014, 0306.17.0016, 0306.17.0017, 0306.17.0019, 0306.17.0020, 0306.17.0022, 0306.17.0023, 0306.17.0025, 0306.17.0026, 0306.17.0028, 0306.17.0029, 0306.17.0041, 0306.17.0042, 1605.21.10.30, and 1605.29.10.10. Although the HTSUS subheadings are provided for convenience and for customs purposes, the written product description, provided in Appendix I, remains dispositive.

⁷ See Akin Gump's Letter, "Withdrawal of Review Requests," dated May 16, 2023.

⁸ See Akin Gump's Letter, "Withdrawal of Review Requests—Kim Anh Company & QNL One Member Company," dated May 25, 2023.

⁹ See Viet I-Mei's Letter, "Separate Rate Certification of Viet I-Mei Frozen Foods Co., Ltd. ('Viet I-Mei')," dated April 27, 2023.

¹⁰ See Memorandum, "Customs Data of U.S. Imports of Certain Frozen Warmwater Shrimp for Respondent Selection," dated May 3, 2023.

¹¹ See Petitioner's Letter, "Domestic Producers' Comments Regarding Respondent Selection," dated May 10, 2023.

Partial Rescission of Review

Pursuant to 19 CFR 351.213(d)(1), Commerce will rescind an administrative review, in whole or in part, if the party that requested the review withdraws its request within 90 days of the publication of the notice of initiation of the requested review. Because all requests for administrative review of the 66 companies listed in Appendix II were withdrawn by interested parties within 90 days of the date of publication of the *Initiation Notice*, and no other interested party requested a review of them, Commerce is rescinding this review with respect to these companies and their name variations/abbreviations, in accordance with 19 CFR 351.213(d)(1). Commerce will instruct CBP to assess antidumping duties on all appropriate entries at a rate equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, during the period February 1, 2022, through January 31, 2023, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue appropriate assessment instructions to CBP 35 days after the publication of this notice in the **Federal Register**. The administrative review remains active with respect to 121 companies.

Preliminary Determination of No Shipments

Commerce received timely no-shipment certifications from four companies: Bien Dong Seafood Co., Ltd.; Vinh Hoan Corp.; Seavina Joint Stock Company; and BIM Foods Joint Stock Company.¹² To confirm these companies' no-shipment claims, Commerce issued a no-shipment inquiry to CBP and received no contradictory information.¹³ Therefore, we preliminarily determine that these four companies did not have any shipments of subject merchandise during the POR.

¹² See BIM Foods Joint Stock Company's Letter, "No Shipments Certification," dated April 11, 2023; see also Vinh Hoan Corp. and Van Duc Food Export Joint Stock Company's Letter, "No Shipment Certification," dated April 28, 2023; Bien Dong Seafood Co., Ltd.'s Letter, "Notice of No Sales," dated May 9, 2023; and Seavina Joint Stock Company's Letter, "Notice of No Sales," dated May 9, 2023. We omitted Van Duc Export Joint Stock Company from this list because although it timely filed a no-shipment certification, the company is not under review. See *Initiation Notice*, 88 FR at 21617.

¹³ See Memorandum, "No Shipment Inquiry for Multiple Companies During the Period 02/01/2022 through 01/31/2023," dated July 11, 2023 (where CBP confirmed that it found no entries of subject merchandise by Bien Dong Seafood Co., Ltd., Vinh Hoan Corp., Van Duc Food Export Joint Stock Company, Seavina, and Seavina Joint Stock Company, and BIM Foods Joint Stock Company, or BIM Seafood Joint Stock Company).

Consistent with Commerce's practice, we will not rescind the review with respect to these companies, but, rather, will complete the review and issue instructions based on the final results.¹⁴

Vietnam-Wide Entity

Commerce finds that 117 companies (*see* Appendix III) under review have not established eligibility for a separate rate and are considered to be part of the Vietnam-wide entity for these preliminary results. Commerce's policy regarding conditional review of the Vietnam-wide entity applies to this administrative review.¹⁵ Under this policy, the Vietnam-wide entity will not be under review unless a party specifically requests, or Commerce self-initiates, a review of the entity. Because no party requested a review of the Vietnam-wide entity, the entity is not under review and the entity's rate of 25.76 percent is not subject to change.

Preliminary Results of Review

Commerce finds that because no company still under review submitted a timely separate rate application or separate rate certification, no company still under review has established eligibility for a separate rate. Based on the above information, Commerce has not calculated any dumping margins for any companies under review, nor has Commerce granted separate rates to any companies under review. Additionally, as discussed above, Commerce has preliminarily determined that the 117 companies that remain under review but which did not submit no-shipment certifications are subject to the Vietnam-wide entity rate of 25.76 percent (*see* Appendix III).

Disclosure and Public Comment

Normally, Commerce will disclose the calculations used in its analysis to parties in this review within five days of the date of publication of the notice of preliminary results in the **Federal Register**, in accordance with 19 CFR 351.224(b). However, here Commerce only applied the Vietnam-wide rate, which was established in the underlying investigation,¹⁶ to the 117 companies

¹⁴ See *Non-Market Economy Antidumping Proceedings: Assessment of Antidumping Duties*, 76 FR 65694 (October 24, 2011) (NME AD Assessment); see also "Assessment Rates" section, *infra*.

¹⁵ See *Antidumping Proceedings: Announcement of Change in Department Practice for Respondent Selection in Antidumping Duty Proceedings and Conditional Review of the Nonmarket Economy Entity in NME Antidumping Duty Proceedings*, 78 FR 65963 (November 4, 2013).

¹⁶ See *Final Determination of Sales at Less Than Fair Value: Certain Frozen and Canned Warmwater Shrimp from the Socialist Republic of Vietnam*, 69

identified in Appendix III. Thus, there are no calculations to disclose.

Interested parties may submit case briefs no later than 30 days after the date of publication of this notice.¹⁷ Rebuttal briefs, the content of which is limited to the issues raised in the case briefs, must be filed within five days from the deadline date for the submission of case briefs.¹⁸ Parties who submit case or rebuttal briefs in this proceeding are requested to submit with each argument: (1) a statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.¹⁹ Case and rebuttal briefs should be filed electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).²⁰

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS. An electronically-filed document must be received successfully in its entirety by ACCESS by 5 p.m. Eastern Time within 30 days after the date of publication of this notice.²¹ Hearing requests should contain the following information: (1) the party's name, address, and telephone number; (2) the number of participants; (3) whether any participant is a foreign national; and (4) a list of issues to be discussed. Issues raised in the hearing will be limited to issues raised in the briefs. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined.²²

Assessment Rates

Pursuant to section 751(a)(2)(A) of the Act and 19 CFR 351.212(b)(1), Commerce will determine, and CBP shall assess, antidumping duties on all appropriate entries of subject

merchandise covered by this review. For the companies in which Commerce is rescinding this administrative review, Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of this notice in the **Federal Register**. For the remaining companies under review, Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.*, within 90 days of publication).

If we continue to find in the final results no shipments for the companies identified in the "Preliminary Determination of No Shipments" section above, Commerce will instruct CBP to liquidate any suspended entries of subject merchandise that entered under those companies' case numbers at the Vietnam-wide rate.²³

For the final results, if we continue to treat the 117 companies identified in Appendix III as part of the Vietnam-wide entity, we will instruct CBP to apply an *ad valorem* assessment rate of 25.76 percent to all entries of subject merchandise during the POR which were produced and/or exported by those companies. The final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of this review and for future deposits of estimated duties, where applicable.

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for shipments of the subject merchandise from Vietnam entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by sections 751(a)(2)(C) of the Act: (1) for all Vietnam exporters of subject merchandise that have not been found to be entitled to a separate rate, the cash deposit rate will be the existing rate for the Vietnam-wide entity of 25.76 percent; and (2) for all non-Vietnam exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the Vietnam exporter that supplied that non-Vietnam exporter. These cash deposit requirements, when

imposed, shall remain in effect until further notice.

Final Results of Review

Unless otherwise extended, Commerce intends to issue the final results of this administrative review, including the results of its analysis of issues raised by the parties in the written comments, within 120 days of publication of these preliminary results in the *Federal Register*, pursuant to section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(1).

Notification to Importers

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties. This determination is issued and published in accordance with sections 751(a)(1)(B) and 777(i)(1) of the Act and 19 CFR 351.221(b)(4).

Notification to Interested Parties

These preliminary results are issued and published in accordance with sections 751(a)(1)(B) and 777(i)(1) of the Act and 19 CFR 351.221(b)(4).

Dated: October 30, 2023.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Order

The scope of the *Order* includes certain frozen warmwater shrimp and prawns, whether wild-caught (ocean harvested) or farm-raised (produced by aquaculture), head-on or head-off, shell-on or peeled, tail-on or tail-off,²⁴ deveined or not deveined, cooked or raw, or otherwise processed in frozen form.

The frozen warmwater shrimp and prawn products included in the scope of the *Order*, regardless of definitions in the Harmonized Tariff Schedule of the United States (HTSUS), are products which are processed from warmwater shrimp and prawns through freezing and which are sold in any count-size.

The products described above may be processed from any species of warmwater shrimp and prawns. Warmwater shrimp and prawns are generally classified in, but are not limited to, the *Penaeidae* family. Some examples of the farmed and wild-caught warmwater species include, but are not

FR 71005, 71008 (December 8, 2004), and accompanying Issues and Decision Memorandum at Comments 6 and 10C ("we have applied a rate of 25.76 percent, a rate calculated in the initiation stage of the investigation from information provided in the petition . . .").

¹⁷ See 19 CFR 351.309(c)(1)(iii).

¹⁸ See 19 CFR 351.309(d)(1) and (2); see also *Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings*, 88 FR 67069 (September 29, 2023) (*APO and Service Final Rule*).

¹⁹ See 19 CFR 351.309(c)(2) and (d)(2).

²⁰ See *APO and Service Final Rule*.

²¹ See 19 CFR 351.310(c).

²² See 19 CFR 351.310(d).

²³ See *NME AD Assessment*.

²⁴ "Tails" in this context means the tail fan, which includes the telson and the uropods.

limited to, white-leg shrimp (*Penaeus vannamei*), banana prawn (*Penaeus merguensis*), fleshy prawn (*Penaeus chinensis*), giant river prawn (*Macrobrachium rosenbergii*), giant tiger prawn (*Penaeus monodon*), redspotted shrimp (*Penaeus brasiliensis*), southern brown shrimp (*Penaeus subtilis*), southern pink shrimp (*Penaeus notialis*), southern rough shrimp (*Trachypenaeus curvirostris*), southern white shrimp (*Penaeus schmitti*), blue shrimp (*Penaeus stylirostris*), western white shrimp (*Penaeus occidentalis*), and Indian white prawn (*Penaeus indicus*).

Frozen shrimp and prawns that are packed with marinade, spices or sauce are included in the scope of the *Order*. In addition, food preparations, which are not “prepared meals,” that contain more than 20 percent by weight of shrimp or prawn are also included in the scope of the *Order*.

Excluded from the scope are: (1) breaded shrimp and prawns (HTSUS subheading 1605.20.10.20); (2) shrimp and prawns generally classified in the *Pandalidae* family and commonly referred to as coldwater shrimp, in any state of processing; (3) fresh shrimp and prawns whether shell-on or peeled (HTSUS subheadings 0306.23.00.20 and 0306.23.00.40); (4) shrimp and prawns in prepared meals (HTSUS subheading 1605.20.05.10); (5) dried shrimp and prawns; (6) canned warmwater shrimp and prawns (HTSUS subheading 1605.20.10.40); and (7) certain battered shrimp. Battered shrimp is a shrimp-based product: (1) that is produced from fresh (or thawed-from-frozen) and peeled shrimp; (2) to which a “dusting” layer of rice or wheat flour of at least 95 percent purity has been applied; (3) with the entire surface of the shrimp flesh thoroughly and evenly coated with the flour; (4) with the non-shrimp content of the end product constituting between four and 10 percent of the product’s total weight after being dusted, but prior to being frozen; and (5) that is subjected to individually quick frozen (IQF) freezing immediately after application of the dusting layer. When dusted in accordance with the definition of dusting above, the battered shrimp product is also coated with a wet viscous layer containing egg and/or milk, and par-fried.

The products covered by this *Order* are currently classified under the following HTSUS subheadings: 0306.17.0004, 0306.17.0005, 0306.17.0007, 0306.17.0008, 0306.17.0010, 0306.17.0011, 0306.17.0013, 0306.17.0014, 0306.17.0016, 0306.17.0017, 0306.17.0019, 0306.17.0020, 0306.17.0022, 0306.17.0023, 0306.17.0025, 0306.17.0026, 0306.17.0028, 0306.17.0029, 0306.17.0041, 0306.17.0042, 1605.21.10.30, and 1605.29.10.10. These HTSUS subheadings are provided for convenience and for customs purposes only and are not dispositive, but rather the written description of the scope of this *Order* is dispositive.²⁵

²⁵ On April 26, 2011, Commerce amended the antidumping duty order to include dusted shrimp, pursuant to the U.S. Court of International Trade decision in *Ad Hoc Shrimp Trade Action Committee v. United States*, 703 F. Supp. 2d 1330 (CIT 2010) and the U.S. International Trade Commission determination, which found the domestic like product to include dusted shrimp.

Ripe Olives From Spain: Final Results of the Expedited First Sunset Review of the Countervailing Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) finds that revocation of the countervailing duty (CVD) order on ripe olives from Spain would be likely to lead to continuation or recurrence of countervailable subsidies at the levels indicated in the “Final Results of Sunset Review” section of this notice.

DATES: Applicable November 3, 2023.

FOR FURTHER INFORMATION CONTACT: Bryan Hansen, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3683.

SUPPLEMENTARY INFORMATION:

Background

On August 1, 2018, Commerce published in the **Federal Register** the CVD order on ripe olives from Spain.¹ On July 3, 2023, Commerce published in the **Federal Register** the *Initiation Notice* of the first five-year sunset review of the *Order* pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).² In accordance with 19 CFR 351.218(d)(1)(i) and (ii), Commerce received a timely notice of intent to participate in this sunset review from Musco Family Olive Company (Musco), a domestic interested party, within 15 days after the date of publication of the *Initiation Notice*.³ Musco claimed interested party status under section 771(9)(C) of the Act

¹ See *Ripe Olives from Spain: Amended Final Affirmative Countervailing Duty Determination and Countervailing Duty Order*, 83 FR 37469 (August 1, 2018) (*Order*).

² See *Initiation of Five-Year (Sunset) Reviews*, 88 FR 42688 (July 3, 2023) (*Initiation Notice*).

³ See Musco’s Letter, “Notice of Intent to Participate,” dated July 5, 2023.

as a producer of a domestic like product in the United States.⁴

Commerce received a timely and adequate substantive response to the *Initiation Notice* from Musco within the 30-day period specified in 19 CFR 351.218(d)(3)(i).⁵ Commerce received no substantive responses from any other interested parties, including the Government of Spain, nor was a hearing requested. On August 22, 2023, Commerce notified the U.S. International Trade Commission that it did not receive an adequate substantive response from other interested parties.⁶ As a result, in accordance with section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), Commerce conducted an expedited, *i.e.*, 120-day, sunset review of the *Order*.

Scope of the Order

The products covered by the *Order* are certain processed olives, usually referred to as “ripe olives.” The subject merchandise includes all colors of olives; all shapes and sizes of olives, whether pitted or not pitted, and whether whole, sliced, chopped, minced, wedged, broken, or otherwise reduced in size; all types of packaging, whether for consumer (retail) or institutional (food service) sale, and whether canned or packaged in glass, metal, plastic, multi-layered airtight containers (including pouches), or otherwise; and all manners of preparation and preservation, whether low acid or acidified, stuffed or not stuffed, with or without flavoring and/or saline solution, and including in ambient, refrigerated, or frozen conditions.

For a full description of the scope of the *Order*, see the Issues and Decision Memorandum.⁷

Analysis of Comments Received

All issues raised in this sunset review are addressed in the Issues and Decision Memorandum. A list of topics discussed in the Issues and Decision Memorandum is included as Appendix I to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized

Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Final Results of Sunset Review

Pursuant to sections 751(c)(1) and 752(b) of the Act, Commerce determines that revocation of the *Order* would be likely to lead to continuation or recurrence of a countervailable subsidy at the following net countervailable subsidy rates:

Exporter/producer	Subsidy rate (percent <i>ad valorem</i>)
Aceitunas Guadalquivir S.L.U. ⁸	11.87
Agro Sevilla Aceitunas S.Coop.And	7.64
Angel Camacho Alimentación, S.L. ⁹	13.90
All Others	11.32

Administrative Protective Order

This notice serves as the only reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

We are issuing and publishing these final results and notice in accordance with sections 751(c), 752(b), and 777(i)(1) of the Act, and 19 CFR 351.218.

⁸ See *Ripe Olives from Spain: Final Affirmative Countervailing Duty Determination*, 83 FR 28186 (June 18, 2018) (*Final Determination*). Commerce found the following companies to be cross-owned with Aceitunas Guadalquivir S.L.U.: Coromar Inv., S.L., AG Explotaciones Agrícolas, S.L.U., and Grupo Aceitunas Guadalquivir, S.L. See *Ripe Olives from Spain: Preliminary Affirmative Countervailing Duty Determination, and Alignment of Final Determination With Final Antidumping Duty Determination*, 82 FR 56218 (November 28, 2017) (*Investigation Preliminary Determination*), and accompanying Preliminary Decision Memorandum (PDM) at 9, unchanged in *Final Determination*.

⁹ Commerce found the following companies to be cross-owned with Angel Camacho Alimentación, S.L.: Grupo Angel Camacho Alimentación, Cuarterola S.L., and Cucancho S.L. See *Investigation Preliminary Determination PDM* at 11, unchanged in *Final Determination*.

Dated: October 30, 2023.

Certain Non-Refillable Steel Cylinders From the People’s Republic of China: Rescission of Countervailing Duty Administrative Review; 2022

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) is rescinding the administrative review of the countervailing duty order on certain non-refillable steel cylinders (non-refillable cylinders) from the People’s Republic of China (China), covering the period of review (POR) January 1, 2022, though December 31, 2022, because, as explained below, there are no reviewable suspended entries for the two companies subject to this review.

DATES: Applicable November 3, 2023.

FOR FURTHER INFORMATION CONTACT: Kristen Johnson, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4793.

SUPPLEMENTARY INFORMATION:

Background

On May 2, 2023, Commerce published in the *Federal Register* a notice of opportunity to request an administrative review of the countervailing duty order on non-refillable cylinders from China, covering the period January 1, 2022,

⁴ *Id.*

⁵ See Musco’s Letter, “Response to Notice of Initiation,” dated August 2, 2023 (Substantive Response).

⁶ See Commerce’s Letter, “Sunset Reviews for July 2023,” dated August 22, 2023.

⁷ See Memorandum, “Issues and Decision Memorandum for the Final Results of the Expedited First Sunset Review of the Countervailing Duty Order on Ripe Olives from Spain,” dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

though December 31, 2022.¹ On May 31, 2023, Ningbo Eagle Machinery & Technology Co., Ltd. (Ningbo Eagle) and Zhejiang KIN-SHINE Technology Co., Ltd. (Zhejiang KIN-SHINE) timely requested that Commerce conduct an administrative review.² We received no other requests for review.

On July 12, 2023, Commerce published in the **Federal Register** a notice of initiation of an administrative review with respect to Ningbo Eagle and Zhejiang KIN-SHINE, in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act).³ On July 13, 2023, Commerce released a memorandum indicating that there were no entries of subject merchandise during the POR based on a U.S. Customs and Border Protection (CBP) entry data query.⁴ Commerce provided parties an opportunity to submit comments on the data query results.⁵ No party submitted comments to Commerce.

On October 17, 2023, Commerce issued a notice of intent to rescind the 2022 administrative review and provided parties with an opportunity to comment.⁶ No party submitted comments to Commerce.

Rescission of Review

Pursuant to 19 CFR 351.213(d)(3), it is Commerce's practice to rescind an administrative review of a countervailing duty order where it concludes that there were no reviewable entries of subject merchandise during the POR for an exporter or producer.⁷ Normally, upon completion of an administrative review, the suspended entries are liquidated at the countervailing duty assessment rate for the review period.⁸ Therefore, for an administrative review to be conducted, there must be a reviewable, suspended

entry that Commerce can instruct CBP to liquidate at the calculated countervailing duty assessment rate for the review period.⁹ As noted above, there were no entries of subject merchandise from either Ningbo Eagle or Zhejiang KIN-SHINE during the POR. Accordingly, in the absence of reviewable, suspended entries of subject merchandise during the POR, we are rescinding this administrative review, in its entirety, in accordance with 19 CFR 351.213(d)(3).

Cash Deposit Requirements

As Commerce has proceeded to a final rescission of this administrative review, no cash deposit rates will change. Accordingly, the current cash deposit requirements shall remain in effect until further notice.

Assessment Rates

Commerce will instruct CBP to assess countervailing duties on all appropriate entries. Countervailing duties shall be assessed at rates equal to the cash deposit of estimated countervailing duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of this rescission notice in the **Federal Register**.

Administrative Protective Order

This notice serves as a final reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of the APO materials, or conversion to judicial protective order is hereby requested. Failure to comply with regulations and terms of an APO is a violation, which is subject to sanction.

Notification to Interested Parties

This notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.213(d)(4).

Dated: October 30, 2023.

Scot Fullerton,

Associate Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

[A-427-830]

Strontium Chromate From France: Preliminary Results of Antidumping Duty Administrative Review; 2021–2022

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily finds that Société Nouvelle des Couleurs Zinciques (SNCZ) did not make sales of subject merchandise in the United States at less than normal value during the period of review (POR) November 1, 2021, through October 31, 2022.

DATES: Applicable November 3, 2023.

FOR FURTHER INFORMATION CONTACT: Jonathan Schueler, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-9175.

SUPPLEMENTARY INFORMATION:

Background

In accordance with section 751(a)(2) of the Tariff Act of 1930, as amended (the Act), Commerce is conducting an administrative review of the antidumping duty order on strontium chromate from France.¹ On January 3, 2023, in accordance with 19 CFR 251.221(c)(1)(i), we initiated the administrative review of the *Order* on SNCZ.² For a complete description of the events between the initiation of this review and these preliminary results, see the Preliminary Decision Memorandum.³

Scope of the Order

The product covered by the *Order* is strontium chromate from France. The merchandise subject to review is currently classifiable in the Harmonized Tariff Schedule of the United States (HTSUS) under subheading 2841.50.9100. Subject merchandise may also enter under HTSUS subheading

¹ See *Strontium Chromate from Austria and France: Antidumping Duty Orders*, 84 FR 65349 (November 27, 2019) (*Order*).

² See *Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 88 FR 50 (January 3, 2023).

³ See Memorandum, “Strontium Chromate from France: Decision Memorandum for the Preliminary Results of Antidumping Duty Administrative Review; 2021–2022,” dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

¹ See *Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review and Join Annual Inquiry Service List*, 88 FR 27445, 27447 (May 2, 2023).

² See Ningbo Eagle and Zhejiang KIN-SHINE's Letter, “Request for Administrative Review,” dated May 31, 2023.

³ See *Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 88 FR 44262, 44273 (July 12, 2023).

⁴ See Memorandum, “Release of U.S. Customs and Border Protection Query,” dated July 13, 2023.

⁸ See 19 CFR 351.212(b)(2).

3212.90.0050. For a full description of the scope of this *Order*, see the Preliminary Decision Memorandum.⁴

Methodology

Commerce is conducting this review in accordance with section 751(a)(2) of the Act. The export price and constructed export price are calculated in accordance with section 772 of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying these preliminary results, see the Preliminary Decision Memorandum. A list of topics discussed in the Preliminary Decision Memorandum is attached in the appendix to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly on the internet at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Preliminary Results of Review

We preliminarily determine the following weighted-average dumping margin exists for the period November 1, 2021, through October 31, 2022:

Producer and/or exporter	Weighted-average dumping margin (percent)
Société Nouvelle des Couleurs Zincoques	0.00

Assessment Rates

Upon completion of this administrative review, Commerce shall determine, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries. As there are no entered values on the record for SNCZ's sales, pursuant to 19 CFR 351.212(b)(1), we calculated importer-specific per-unit duty assessment rates based on the ratio of the total amount of dumping calculated for the examined sales to the total quantity of those sales. If either SNCZ's weighted-average dumping margin is zero or *de minimis* within the meaning of 19 CFR 351.106(c), or an importer-specific assessment rate is zero or *de minimis*, we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties.

To determine whether an importer-specific per-unit duty assessment rate is *de minimis*, we calculated an estimated entered value.

Commerce clarified its "automatic assessment" regulation on May 6, 2003.⁵ This clarification applies to entries of subject merchandise during the POR produced by SNCZ for which it did not know its merchandise was destined for the United States. In such instances, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.

We intend to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.*, within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective for all shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review, as provided for by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for SNCZ will be equal to the weighted-average dumping margin established in the final results of this review (except, if that rate is *de minimis*, then the cash deposit rate will be zero); (2) for previously reviewed or investigated companies not listed in the final results of this review, including those for which Commerce may determine had no shipments during the POR, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding; (3) if the exporter is not a firm covered in this review or another completed segment of this proceeding, but the producer is, then the cash deposit rate will be the rate established for the most recently completed segment of this proceeding for the producer of the merchandise; and (4) if neither the exporter nor the producer is a firm covered in this or any previously completed segment of this proceeding, then the cash deposit rate will be the

all-others rate of 32.16 percent that was established in the less-than-fair-value investigation.⁶ These deposit requirements, when imposed, shall remain in effect until further notice.

Disclosure and Public Comment

We intend to disclose the calculations performed for these preliminary results of review to interested parties within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Interested parties may submit case briefs no later than 30 days after the date of publication of this notice.⁷ Rebuttal briefs, the content of which is limited to the issues raised in the case briefs, must be filed within five days from the deadline date for the submission of case briefs.⁸ Parties who submit case or rebuttal briefs in this proceeding are requested to submit with each argument: (1) a statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.⁹ Case and rebuttal briefs should be filed electronically via ACCESS. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).¹⁰

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS. An electronically-filed document must be received successfully in its entirety by ACCESS by 5 p.m. Eastern Time within 30 days after the date of publication of this notice.¹¹ Hearing requests should contain information regarding: (1) the party's name, address, and telephone number; (2) the number of participants; (3) whether any participant is a foreign national; and (4) a list of issues to be discussed. Issues raised in the hearing will be limited to issues raised in the briefs. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined.¹²

Commerce intends to issue the final results of this administrative review, including the results of its analysis raised in any written briefs, no later than 120 days after the publication of these preliminary results in the **Federal**

⁶ See *Order*, 84 FR at 65350.

⁴ *Id.* at "Scope of the *Order*."

Register, unless this deadline otherwise extended.¹³

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification to Interested Parties

We are issuing and publishing this notice in accordance with sections 751(a)(1) and 777(i) of the Act, and 19 CFR 351.213(h) and 351.221(b)(4).

Dated: October 30, 2023.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance.

SUPPLEMENTARY INFORMATION:

Background

On June 30, 2023, Commerce published in the **Federal Register** the *Preliminary Results* of the 2021–2022 administrative review of the antidumping duty order on low melt polyester staple fiber (low melt PSF) from the Republic of Korea and invited interested parties to comment.¹ For a complete description of the events that occurred since the *Preliminary Results*, see the Issues and Decision Memorandum.² Commerce conducted this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of the Order³

The merchandise subject to the *Order* is synthetic staple fibers, not carded or combed, specifically bi-component polyester fibers having a polyester fiber component that melts at a lower temperature than the other polyester fiber component (low melt PSF). A complete description of the scope of the *Order* is contained in the Issues and Decision Memorandum.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs submitted by parties in this administrative review are addressed in the Issues and Decision Memorandum and are listed in the appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

¹ See *Low Melt Polyester Staple Fiber from the Republic of Korea: Preliminary Results of Antidumping Duty Administrative Review; 2021–2022*, 88 FR 42300 (June 30, 2022) (*Preliminary Results*).

² See Memorandum, “Issues and Decision Memorandum for the Final Results of the Antidumping Duty Administrative Review; 2021–2022: Low Melt Polyester Staple Fiber from the Republic of Korea,” dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

³ See *Low Melt Polyester Staple Fiber from the Republic of Korea and Taiwan: Antidumping Duty Orders*, 83 FR 40752 (August 16, 2018) (*Order*).

Changes Since the Preliminary Results

Based on a review of the record and comments received from interested parties regarding the *Preliminary Results*, and for the reasons explained in the Issues and Decision Memorandum, Commerce made certain changes to the weighted-average dumping margin calculations for TAK for the final results or review.⁴

Final Results of the Administrative Review

As a result of this review, we determine that the following weighted-average dumping margin exists for the period August 1, 2021, through July 31, 2022.

Producer/exporter	Weighted-average dumping margin (percent)
Toray Advanced Materials Korea, Inc	3.59

Disclosure

Commerce intends to disclose the calculations performed in connection with these final results of review to interested parties within five days after public announcement of the final results or, if there is no public announcement, within five days of the date of publication of the notice of final results in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Act, and 19 CFR 351.212(b)(1), Commerce will determine, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review.

Pursuant to 19 CFR 351.212(b)(1), we calculated importer-specific *ad valorem* duty assessment rates based on the ratio of the total amount of dumping calculated for each importer's examined sales and the total entered value of those sales. Where either the respondent's weighted-average dumping margin is zero or *de minimis*, within the meaning of 19 CFR 351.106(c)(1), or an importer-specific rate is zero or *de minimis*, we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties.

For entries of subject merchandise during the POR produced by TAK for which it did not know that its merchandise was destined for the

⁴ See Issues and Decision Memorandum.

¹³ See section 751(a)(3)(A) of the Act; see also 19 CFR 351.213(h).

United States, we will instruct CBP to liquidate unreviewed entries at the all-others rate established in the less-than-fair-value (LTFV) of 16.27 percent *ad valorem*,⁵ if there is no rate for the intermediate company(ies) involved in the transaction.

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.*, within 90 days of publication).

Cash Deposit Requirements

Upon publication of this notice in the **Federal Register**, the following cash deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication, as provided by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for the company subject to this review will be equal to the weighted-average dumping margin established in the final results of the review; (2) for merchandise exported by producers or exporters not covered in this review but covered in a prior completed segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published in the completed segment for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original LTFV investigation, but the producer has been covered in a prior completed segment of this proceeding, then the cash deposit rate will be the rate established in the completed segment for the most recent period for the producer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 16.27 percent, the all-others rate established in the LTFV investigation for this proceeding.⁶ These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to

comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

Administrative Protective Order

This notice serves as the only reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation subject to sanction.

Notification to Interested Parties

We are issuing and publishing this notice in accordance with sections 751(a)(1) and 777(i) of the Act, and 19 CFR 351.221(b)(5).

Dated: October 30, 2023.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

International Trade Administration

[A-469-817]

Ripe Olives From Spain: Final Results of the Expedited First Sunset Review of the Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) finds that revocation of the antidumping duty order on ripe olives from Spain would be likely to lead to continuation or recurrence of dumping at the levels

indicated in the "Final Results of Expedited Sunset Review" section of this notice.

DATES: Applicable November 3, 2023.

FOR FURTHER INFORMATION CONTACT:

Mary Kolberg, AD/AD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-1785.

SUPPLEMENTARY INFORMATION:

Background

On August 1, 2023, Commerce published in the **Federal Register** the *Order* on ripe olives from Spain.¹ On July 3, 2023, Commerce published in the **Federal Register** the *Initiation Notice* of the first sunset review of *Order* on ripe olives from Spain pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).²

On July 10, 2023, we received a timely notice to participate in this sunset review from Musco Family Olive Company (Musco), a domestic interested party, pursuant to 19 CFR 351.218(d)(1)(i).³ Musco claimed interested party status under section 771(9)(C) of the Act as a manufacturer of a domestic like product in the United States. On August 2, 2023, Musco provided a complete substantive response for this review within the 30-day deadline specified in 19 CFR 351.2218(d)(3)(i).⁴ Commerce did not receive substantive responses from any other interested parties, and no party requested a hearing.

On August 22, 2023, Commerce notified the U.S. International Trade Commission that it did not receive an adequate substantive response from other interested parties.⁵ As a result, in accordance with section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), Commerce conducted an expedited, *i.e.*, 120-day, sunset review of the *Order*.

Scope of the Order

The products covered by the *Order* are certain processed olives, usually referred to as "ripe olives." The subject merchandise includes all colors of

¹ See *Ripe Olives from Spain: Antidumping Duty Order*, 83 FR 37465 (August 1, 2018), as corrected in *Ripe Olives from Spain: Notice of Correction to Antidumping Duty Order*, 83 FR 39691 (August 10, 2018) (collectively, *Order*).

² See *Initiation of Five-Year (Sunset) Reviews*, 88 FR 42688 (July 3, 2023) (*Initiation Notice*).

³ See Musco's Letter, "Notice of Intent to Participate," dated July 10, 2023.

⁴ See Musco's Letter, "Response to Notice of Initiation," dated August 2, 2023.

⁵ See Commerce's Letter, "Sunset Reviews for July 2023," dated August 22, 2023.

⁵ See *Order*.

⁶ See *Order*, 83 FR at 40753.

olives; all shapes and sizes of olives, whether pitted or not pitted, and whether whole, sliced, chopped, minced, wedged, broken, or otherwise reduced in size; all types of packaging, whether for consumer (retail) or institutional (food service) sale, and whether canned or packaged in glass, metal, plastic, multilayered airtight containers (including pouches), or otherwise; and all manners of preparation and preservation, whether low acid or acidified, stuffed or not stuffed, with or without flavoring and/or saline solution, and including in ambient, refrigerated, or frozen conditions. For a full description of the scope of the *Order*, see the Issues and Decision Memorandum.⁶

Analysis of the Comments Received

All issues raised in this sunset review are addressed in the Issues and Decision Memorandum. A list of topics discussed in the Issues and Decision Memorandum is included as the appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Final Results of Expedited Sunset Review

Pursuant to sections 751(c)(1) and 752(c)(1) and (3) of the Act, Commerce determines that revocation of the *Order* would be likely to lead to continuation or recurrence of dumping and that the magnitude of the margins of dumping likely to prevail would be at rates up to 25.50 percent.

Administrative Protective Order

This notice serves as the only reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the

regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

We are issuing and publishing these final results in accordance with sections 751(c), 752(c), and 777(i)(1) of the Act, and 19 CFR 351.218.

Dated: October 30, 2023.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; West Coast Region Highly Migratory Species Vessel Identification Requirements

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on July 3, 2023 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration (NOAA), Commerce.

Title: West Coast Region Highly Migratory Species Vessel Identification Requirements.

OMB Control Number: 0648–0361.

Form Number(s): None.

Type of Request: Regular submission (extension of a current information collection).

Number of Respondents: Non-purse seine respondents: 1,230; Purse seine respondents: 19.

Average Hours per Response: All but purse seine vessels: 45 minutes; purse seine fishing vessels of 400 short tons (362.8 metric tons (mt)) or greater carrying capacity: 1 hour and 30 minutes.

Total Annual Burden Hours: 947 hours.

Needs and Uses: This request is for extension of a current information collection. Regulations at 50 CFR 660.704 require that all commercial fishing vessels with permits issued under authority of the National Marine Fishery Service's (NMFS) Fishery Management Plan for United States (U.S.) West Coast Highly Migratory Species Fisheries display the vessel's official number (U.S. Coast Guard documentation number or state registration number). The numbers must be of a specific size and format and located at specified locations. The official number must be affixed to each vessel subject to this section in block Arabic numerals at least 10 inches (25.40 centimeters in height for vessels more than 25 feet (7.62 meters) but equal to or less than 65 feet (19.81 meters) in length; and 18 inches (45.72 centimeters) in height for vessels longer than 65 feet (19.81 meters) in length. Markings must be legible and of a color that contrasts with the background. The display of the identifying number aids in fishery law enforcement. This requirement does not apply to recreational charter vessels.

Affected Public: Business or other for-profit organizations.

Frequency: Identification markings are required for each vessel.

Respondent's Obligation: Required to obtain or retain benefits, and mandatory.

Legal Authority: Magnuson-Stevens Fishery Conservation and Management Act.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the

⁶ See Memorandum, "Issues and Decision Memorandum for the Final Results of the Expedited First Sunset Review of the Antidumping Duty Order on Ripe Olives from Spain," dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0361.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Northeast Region Dealer Purchase Reports

AGENCY: National Oceanic & Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public’s reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before January 2, 2024.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at Adrienne.thomas@noaa.gov. Please reference OMB Control Number 0648–0229 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to David Ulmer, Fishery Reporting Specialist, Greater Atlantic Regional Fisheries Office, 55 Great Republic Drive, Gloucester, MA 01930, (757–563–3621/978–559–1552), David.Ulmer@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request to extend a currently approved information collection.

The National Oceanic and Atmospheric Administration’s National Marine Fisheries Service (NMFS) is responsible for the stewardship of the Nation’s living marine resources and their habitats within the United States Exclusive Economic Zone (EEZ). The mandates and authorities are derived from numerous statutes, most significantly the Magnuson-Stevens Fishery Conservation and Management Act (MSA), the Endangered Species Act (ESA), and the Marine Mammal Protection Act (MMPA).

Under the MSA, the Secretary of Commerce has the responsibility for conservation and management of the nation’s marine fishery resources. Much of this responsibility has been delegated to NMFS. In an effort to achieve the goals of the MSA, several fisheries are now being managed by harvest limits including quotas, annual target total allowable catches (TAC) and domestic annual harvest (DAH) limits. These fisheries often have short fishing seasons and require in-season management measures, such as closures and trip limits, to ensure that harvest levels established in each Fishery Management Plan (FMP) are not exceeded. Therefore, as more fisheries are being managed by harvest limits, the timely collection of data from dealers and vessel owners and operators is and will continue to be a necessary component of most management regimes, as evidenced in several FMPs.

All federal permitted dealers of Atlantic mackerel, squid, butterfish, Atlantic sea scallop, Atlantic surfclam, ocean quahog, Northeast (NE) multispecies, monkfish, summer flounder, scup, black sea bass, Atlantic bluefish, spiny dogfish, Atlantic herring, skates, tilefish, hagfish, American lobster must have been issued and have in their possession a federal dealer permit in order to purchase such species from fishing vessels. Federal permitted dealers in the above fisheries are required to submit certain information regarding their fish purchases to NMFS. Trip-level (trip by trip) reports provide the comprehensive data that are necessary for successful long-term management of each fishery.

In all fisheries requiring mandatory reporting, ‘negative reporting’ by dealers is required if no fish was purchased during the reporting period. Negative reports are necessary in order to accurately identify dealers who have not

purchased fish as opposed to those who have failed to report their purchases.

All large vessel at-sea processors of Atlantic mackerel that have been issued and have in their possession a federal at-sea processor permit may purchase mackerel from fishing vessels at sea for processing provided the large vessel did not harvest the mackerel. These Federal permitted vessels are also required to submit certain information regarding their fish purchases to NMFS.

The information collected is used by several offices of NMFS, the Northeast Fishery Management Council, the Mid-Atlantic Fishery Management Council, and the Atlantic States Marine Fisheries Commission (ASMFC) to monitor quota-managed species, ensuring that conservation and management actions may be taken in a timely manner.

Accurate and timely landings reports are especially important for monitoring commercial landings by species and evaluating the effectiveness of each FMP in achieving its fishing mortality targets.

In addition to the uses specifically relating to management of individual species, the statistics collected through these reports will be incorporated into the NMFS databases which are used in many analyses by various offices of NMFS, the Regional Fishery Management Councils, the United States Coast Guard (USCG), state fishery enforcement agencies, the Departments of State and Commerce, Office of Management and Budget (OMB), the Corps of Engineers, Congressional staffs, the fishing industry, and the public. The data also serve as inputs to a variety of uses such as biological analyses and stock assessments, and in support of Executive Order (E.O.) 12866 “Regulatory Planning and Review”, quota and allocation selections and monitoring, economic profitability profiles, trade and import tariff decisions, allocation of grant funds among states, and identification of ecological interactions among species. Data used are also utilized for monitoring and evaluating ESA and MMPA actions.

II. Method of Collection

Dealers submit purchase information through an electronic process by one of the following: the web-based system as administered by the Atlantic Coast Cooperative Statistics Program, a computer-based trip ticket program approved by the NMFS or through a NMFS approved proprietary mechanism.

III. Data

OMB Control Number: 0648–0229.
Form Number(s): None.

Type of Review: Regular submission, extension of a current information collection.

Affected Public: Individuals or households; Business or other for-profit organizations; Not-for-profit institutions; State, Local, or Tribal government; Federal government.

Estimated Number of Respondents: 878.

Estimated Time per Response: 4 minutes per trip.

Estimated Total Annual Burden Hours: 28,390

Estimated Total Annual Cost to Public: 536,003.

Respondent's Obligation: Mandatory.

Legal Authority: Magnuson-Stevens Fishery Conservation and Management Act, Code of Federal Regulations Title 50 Part 648.

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Application for State Digital Equity Capacity Grant Program and Tribal Digital Equity Planning and Capacity Programs

AGENCY: National Telecommunications and Information Administration (NTIA), Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed and continuing information collections, which help us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before January 2, 2024.

ADDRESSES: Interested persons are invited to submit written comments by mail to Arica Cox, Telecommunications Policy Analyst, Grants Management and Compliance, Office of Internet Connectivity and Growth, National Telecommunication and Information Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Room 4826, Washington, DC 20230, or by email to broadbandusa@ntia.gov. Please reference "Digital Equity Application Forms Comment" in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or specific questions related to collection activities should be directed to Arica Cox, Telecommunications Policy Analyst, Grants Management and Compliance, via email at acox@ntia.gov; broadbandusa@ntia.gov; or via telephone at (202) 482-2048.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Infrastructure Investment and Jobs Act, 2021 (Infrastructure Act or Act), Public Law 117-58, 135 Stat. 429

(November 15, 2021) (Infrastructure Act or Act), also known as the Bipartisan Infrastructure Law, provided \$65 billion of funding for programs to close the digital divide and ensure that all Americans have access to affordable, reliable, high-speed internet. NTIA administers six broadband connectivity grant programs funded by the Act, including the State Digital Equity Planning Grant (SDEPG) and the State Digital Equity Capacity Grant Program (SDECG). The SDEPG provides federal funding for grants to eligible applicants for the purpose of developing Digital Equity Plans. Through these Plans, entities will, among other things, identify barriers to digital equity in the State and strategies for overcoming those barriers. The purpose of SDECG is to promote the achievement of digital equity, support digital inclusion activities, and build capacity for efforts by States, U.S. territories and possessions, Indian Tribes, Alaska Native entities, and Native Hawaiian organizations relating to the adoption of broadband. The SDECG provides new federal funding for grants to eligible applicants for the purpose of implementing the State Digital Equity Plan and pursuing digital inclusion activities consistent with the State Digital Equity Plan. Further, the Tribal Digital Equity Planning and Capacity Program will provide funding for grants to Indian Tribes, Alaska Native entities, and Native Hawaiian organizations to develop their own digital equity plans and pursue digital inclusion activities, consistent with the SDEPG and the SDECG.

NTIA will use the information collected from each applicant to effectively review the proposed applications and budgets from States and U.S. Territories and Possessions for the State Digital Equity Capacity Program, and from Indian Tribes, Alaska Native entities, and Native Hawaiian organizations for the Tribal Digital Equity Planning and Capacity Program.

II. Method of Collection

NTIA will collect data through both electronic and mail submission.

III. Data

OMB Control Number: 0660-XXXX.

Form Number(s): TBD.

Type of Review: Regular submission for a new information collection.

Affected Public: States, territories or possessions of the United States, Indian Tribes, Alaska Native entities, and Native Hawaiian organizations applying for Infrastructure Act Broadband Grant Program funding.

Estimated Number of Respondents: 56 for State Digital Equity Capacity Grant application, 494 for Tribal Digital Equity Planning & Capacity Grant application.

Estimated Time per Response: 8 hours for State Digital Equity Capacity Grant application, 18 hours for Tribal Digital Equity Planning & Capacity Grant application.

Estimated Total Annual Burden Hours: 7,424.

Estimated Total Annual Cost to Public: \$354,347.52.

Respondent's Obligation: Mandatory.

Legal Authority: Sections 60304(c) and 60304(d) of the Infrastructure Investment and Jobs Act of 2021, Public Law 117–58, 135 Stat. 429 (November 15, 2021).

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed Deletions from the Procurement List.

SUMMARY: The Committee is proposing to delete product(s) from the Procurement List that were previously furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

DATES: *Comments must be received on or before:* December 3, 2023.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 355 E Street SW, Suite 325, Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: For further information or to submit comments contact: Michael R. Jurkowski, Telephone: (703) 785–6404, or email CMTEFedReg@AbilityOne.gov.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503 (a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Deletions

The following product(s) are proposed for deletion from the Procurement List:

Product(s)

NSN(s)—Product Name(s):

7930–01–619–1848—Protectant, Liquid, Water-Based, Vehicle Interior Surface, (4) 1–GL Container/BX

7930–01–619–1849—Protectant, Liquid, Water-Based, Vehicle Interior Surface, 5 GL

7930–01–619–1852—Detergent, Oil and Water Separating, Heavy Duty, Biodegradable, Trucks and Trailers, 5 GL

7930–01–619–1853—Detergent, Liquid, High-foaming, Car and Truck Washing, (4) 1–GL Container/BX

7930–01–619–1854—Detergent, Liquid, High-foaming, Car and Truck Washing, 5 GL

7930–01–619–1855—Liquid Solution, Truck and Trailer Wash, 5 GL

7930–01–619–1856—Detergent, Oil and Water Separating, Heavy Duty,

Biodegradable, Trucks and Trailers, 55 GL
 7930-01-619-1857—Cleaner/Degreaser, Heavy Duty, Biodegradable, Car and Trucks, 5 GL
 7930-01-619-1858—Liquid Solution, Truck and Trailer Wash, 55 GL
 7930-01-619-1859—Cleaner/Degreaser, Heavy Duty, Biodegradable, Car and Trucks, 55 GL
 7930-01-619-1860—Liquid Solution, Concentrated, Vehicle, Wash and Shine, With Wax polymer, (4) 1-GL Container/BX
 7930-01-619-2631—Liquid Solution, Concentrated, Vehicle, Wash and Shine, W/Wax polymer, 5 GL
Mandatory Source of Supply: Central Association for the Blind and Visually Impaired, Utica, NY.
Contracting Activity: GSA/FSS GREATER SOUTHWEST ACQUISITI, FORT WORTH, TX.
NSN(s)—Product Name(s): 7520-01-441-9130—Kit, Fingerprint
Contracting Activity: GSA/FAS ADMIN SVCS ACQUISITION BR(2, NEW YORK, NY.

Michael R. Jurkowski,
Deputy Director, Business & PL Operations.

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Agency Information Collection Activities; Comment Request; AmeriCorps External Reviewer Survey

AGENCY: Corporation for National and Community Service.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Corporation for National and Community Service (operating as AmeriCorps) is proposing to revise an information collection.

DATES: Written comments must be submitted to the individual and office listed in the **ADDRESSES** section by January 2, 2024.

ADDRESSES: You may submit comments, identified by the title of the information collection activity, by any of the following methods:

(1) Electronically through www.regulations.gov (preferred method).
 (2) By mail sent to: AmeriCorps, Attention Patti Stengel, 250 E Street SW, Washington, DC 20525.

(3) By hand delivery or by courier to the AmeriCorps mailroom at the mail address given in paragraph (2) above, between 9 a.m. and 4 p.m. Eastern Time, Monday through Friday, except Federal holidays.

Comments submitted in response to this notice may be made available to the public through regulations.gov. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. Please note that responses to this public comment request containing any routine notice about the confidentiality of the communication will be treated as public comment that may be made available to the public, notwithstanding the inclusion of the routine notice.

FOR FURTHER INFORMATION CONTACT: Patti Stengel, (202) 815-5791, or by email at pstengel@americorps.gov.

SUPPLEMENTARY INFORMATION: *Title of Collection:* AmeriCorps External Reviewer Survey.

OMB Control Number: 3045-0192.

Type of Review: Revision.

Respondents/Affected Public: Organizations and State Governments.
Total Estimated Number of Annual Responses: 300.

Total Estimated Number of Annual Burden Hours: 75.

Abstract: The External Reviewer Survey is used by individuals who have served as External Reviewers or External Panel Coordinators for AmeriCorps to review grant applications. AmeriCorps uses the collected information to assess and make improvements to grant competitions. The information is

collected electronically. The currently approved information collection is due to expire on March 31, 2024.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information. All written comments will be available for public inspection on regulations.gov.

Amy Hetrick,
Acting Director, Office of Grant Administration.

BILLING CODE 6050-28-P

DEPARTMENT OF DEFENSE

Department of the Army

Arlington National Cemetery, Withdrawal of Notice of Intent To Prepare an Environmental Impact Statement Regarding Removal of the Confederate Memorial

AGENCY: Department of the Army, DoD.
ACTION: Notice of intent; withdrawal.

SUMMARY: The Department of the Army is announcing withdrawal of its Notice of Intent (NOI) to prepare an Environmental Impact Statement (EIS).

The August 4, 2023, notice announced the Army's intention to prepare an EIS under the National Environmental Policy Act (NEPA). The EIS would have addressed potential environmental effects associated with the congressionally-mandated removal of the Confederate Memorial from Arlington National Cemetery (ANC). The Army determined the congressionally-mandated removal action is a non-discretionary action. There would be no reasonably foreseeable significant impacts from any discretionary elements of the proposed action. An EIS is therefore not needed to inform any decision-making for this action. The Army will prepare an Environmental Assessment (EA) to analyze and disclose any effects of the discretionary elements of the proposed action, including how to disassemble the Confederate Memorial.

FOR FURTHER INFORMATION CONTACT: Ms. Renea Yates, Director, Office of Army Cemeteries, 1 Memorial Avenue, Arlington, VA 22211; email: anc-commemorative-works@army.mil (Note: This email is for administrative inquiries only. Any comments regarding the proposed action should not be sent to this email address, but should instead be submitted via comment form located at: <https://www.arlingtoncemetery.mil/About/Confederate-Memorial-Removal>); (877) 907-8585.

SUPPLEMENTARY INFORMATION: The NOI was published in the **Federal Register** on August 4, 2023 (88 FR 149).

Congress directed the establishment of the Commission on the Naming of Items of the DoD that Commemorate the Confederate States of America or Any Person Who Served Voluntarily with the Confederate States of America (the Naming Commission) in section 370 of the William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021 (FY21 NDAA). Regarding the Confederate Memorial, the Naming Commission recommended the following:

- “The statue atop . . . the monument should be removed. All bronze elements on the monument should be deconstructed, and removed, preferably leaving the granite base and foundation in place to minimize risk of inadvertent disturbance of graves.”
- “The work should be planned and coordinated with the Commission of Fine Arts and the Historical Review Commission to determine the best way to proceed with removal of the monument.”
- “The Department of [the] Army should consider the most cost-

effective method of removal and disposal of the monument's elements in their planning.”

The FY21 NDAA, section 370(a), requires that “[n]ot later than [January 1, 2024], the Secretary of Defense shall implement the plan submitted by [the Naming Commission] and remove all names, symbols, displays, monuments, and paraphernalia that honor or commemorate the Confederate States of America . . . or any person who served voluntarily with the Confederate States of America from all assets of the Department of Defense.”

The purpose of the proposed action is to remove from ANC a monument that commemorates the Confederate States of America. The need for the proposed action is to comply with non-discretionary congressional direction.

The public scoping process did not reveal evidence of any reasonably foreseeable significant impacts resulting from discretionary actions. Overwhelmingly, public comments during the scoping process focused on the non-discretionary action of removing the Confederate Memorial from ANC. Because removal of the Confederate Memorial from ANC is legally required and non-discretionary, the question of whether to remove the monument is not subject to analysis under NEPA. The Army does not have the authority to take environmental factors into consideration in determining whether to remove the monument.

The Army will prepare an EA to analyze discretionary actions (*i.e.*, how to disassemble and remove the Confederate Memorial's bronze elements). The EA and Draft Finding of No Significant Impact (Draft FONSI) will be published locally and not in the **Federal Register**. The EA and Draft FONSI will also be available online at: <https://www.arlingtoncemetery.mil/About/Confederate-Memorial-Removal>.

James W. Satterwhite Jr.,
U.S. Army Federal Register Liaison Officer.

BILLING CODE 3711-02-P

DELAWARE RIVER BASIN COMMISSION

Notice of Proposed Methodology for the 2024 Delaware River and Bay Water Quality Assessment Report

AGENCY: Delaware River Basin Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the methodology proposed to be used in the 2024 Delaware River and Bay Water Quality Assessment Report is available for review and comment.

DATES: Written comments on the assessment methodology or recommendations for the consideration of data sets will be accepted through 5 p.m. EST on February 1, 2024.

ADDRESSES: Written comments may be submitted through the Commission's web-based comment system, a link to which is provided at www.drbc.gov. All submissions should include the name and address (street address optional) of the commenter. Exceptions to use of the web-based comment system are available based on need, by writing to the attention of the Commission Secretary, DRBC, P.O. Box 7360, 25 Cosey Road, West Trenton, NJ 08628-0360. For assistance, please contact Patricia Hausler at patricia.hausler@drbc.gov.

FOR FURTHER INFORMATION CONTACT: Mr. Jacob Bransky, Senior Aquatic Biologist, jacob.bransky@drbc.gov, 609-477-7230.

SUPPLEMENTARY INFORMATION: The Delaware River Basin Commission (“DRBC” or “Commission”) is a Federal-interstate compact agency that was created in 1961 by concurrent legislation of the States of Delaware, New Jersey, and New York, the Commonwealth of Pennsylvania and the United States Government for purpose of jointly managing the water resources of the Delaware River Basin.

DRBC currently is compiling data for the 2024 Delaware River and Bay Water Quality Assessment Report (“2024 Assessment”) required by the federal Clean Water Act (“CWA”). The 2024 Assessment will present the extent to which waters of the Delaware River and Bay are attaining designated uses in accordance with section 305(b) of the CWA and the Commission's Water Quality Regulations (incorporated by reference at 18 CFR part 410), and will identify impaired waters, which consist of waters in which surface water quality standards are not being met.

The proposed assessment methodology to be used in the 2024 Assessment is available for review at the following URL: <https://www.nj.gov/drbc/library/documents/WQAssessment2024MethodologyDRAFTOct2023.pdf>.

Authority: Delaware River Basin Compact, Public Law 87-328, Approved September 27, 1961, 75 Statutes at Large, 688, sec's 3.6(c), 3.6(h), 3.9, 3.9(a), 3.9(d), and 5.1.

Dated: October 18, 2023.

Pamela M. Bush,

Commission Secretary.

[FR Doc. 2023–24279 Filed 11–2–23; 8:45 am]

BILLING CODE P

DEPARTMENT OF ENERGY

National Nuclear Security Administration

Notice of Availability for the Final Site-Wide Environmental Impact Statement for Continued Operation of the Lawrence Livermore National Laboratory

AGENCY: National Nuclear Security Administration, Department of Energy.

ACTION: Notice of availability.

SUMMARY: The National Nuclear Security Administration (NNSA), a semi-autonomous agency within the United States (U.S.) Department of Energy (DOE), announces the availability of a Final Site-Wide Environmental Impact Statement for Continued Operation of the Lawrence Livermore National Laboratory (Final LLNL SWEIS) (DOE/EIS–0547) in compliance with the National Environmental Policy Act of 1969 (NEPA). NNSA prepared the Final LLNL SWEIS to analyze the potential environmental impacts associated with continuing LLNL operations and foreseeable new and/or modified operations and facilities for approximately the next 15 years. Volume 3 of the Final LLNL SWEIS is a comment response document (CRD), which includes all comments received during the public comment period on the Draft LLNL SWEIS, as well as NNSA's responses to those comments.

DATES: NNSA will not issue any Record of Decision (ROD) on the proposal for a minimum of 30 days after the date that the U.S. Environmental Protection Agency (EPA) publishes its Notice of Availability (NOA) in the **Federal Register**.

ADDRESSES: Requests for additional information related to the Final LLNL SWEIS should be sent to Mr. Tom Grim, NEPA Document Manager, National Nuclear Security Administration, 1000 Independence Ave. SW, Washington, DC 20585; or sent by email to: LLNLSWEIS@nnsa.doe.gov.

The Final LLNL SWEIS is available for viewing and downloading on the NNSA NEPA Reading Room website (www.energy.gov/nnsa/nnsa-nepa-reading-room) and the DOE NEPA website (<https://energy.gov/nepa/nepa-reading-room>).

documents). Copies of the Final LLNL SWEIS will also be available at the Livermore Public Library, 1188 South Livermore Avenue, Livermore, California, and the Tracy Public Library, 20 East Eaton Avenue, Tracy, California.

FOR FURTHER INFORMATION CONTACT: For further information about this notice, please contact Mr. Tom Grim, NEPA Document Manager, National Nuclear Security Administration, 1000 Independence Ave. SW, Washington, DC 20585; call 833–778–0508 to leave a message; or email at: LLNLSWEIS@nnsa.doe.gov.

SUPPLEMENTARY INFORMATION: NNSA is responsible for meeting the national security requirements established by the President and Congress to maintain and enhance the safety, reliability, and performance of the U.S. nuclear weapons stockpile. The continued operation of LLNL is critical to NNSA's Stockpile Stewardship and Management Program, preventing the spread and use of nuclear weapons worldwide, and many other areas that may impact national security and global stability. The Final LLNL SWEIS analyzes two alternatives: (1) the No-Action Alternative and (2) the Proposed Action. The Final LLNL SWEIS also analyzes the new hybrid work environment under both alternatives due to increases in remote work at LLNL. Under the No-Action Alternative, NNSA would continue current facility operations throughout LLNL in support of assigned missions. The No-Action Alternative includes previously approved construction of new facilities; modernization, upgrade, and utility projects; and decontamination, decommissioning, and demolition of excess and aging facilities through 2022.

The Proposed Action includes the scope of the No-Action Alternative and an increase in current facility operations or enhanced operations that may require new or modified facilities and that are reasonably foreseeable over the next 15 years. Continued re-investment in site infrastructure would allow LLNL to meet mission deliverables and sustain science, technology, and engineering excellence to respond to future national security challenges. The Proposed Action includes 75 new projects, totaling 3.3 million square feet, between 2023 and 2035. This comprises 61 proposed projects, totaling 2.9 million square feet, at LLNL's main site in Livermore, California and 14 proposed projects, totaling 385,000 square feet, at LLNL's remote testing site, Site 300, near Tracy, California. In addition, NNSA proposes 20 types of modernization, upgrade, and utility

projects, each involving several facilities. Under the Proposed Action, NNSA would also decontaminate, decommission, and demolish 150 facilities, totaling 1,170,000 square feet. NNSA is also proposing operational changes that would increase the tritium emissions limits in the National Ignition Facility (Building 581) and the Tritium Facility (Building 331), decrease the administrative limit for fuels-grade-equivalent plutonium in the Superblock (Building 332), increase the administrative limits for plutonium-239 at Building 235, and revise the National Ignition Facility radioactive materials administrative limits to be consistent with DOE's Facility Hazard Categorization Standard. The Proposed Action also includes several projects to enhance the resilience of the energy infrastructure and demonstrate renewable power solutions.

This Final LLNL SWEIS contains revisions and new information based in part on comments received on the Draft LLNL SWEIS. These revisions and new information are indicated by sidebars in the margins. Volume 3 of the Final LLNL SWEIS contains summaries of the comments received, images of the comment documents, and NNSA's responses to the comments. NNSA considered all comments received on the Draft LLNL SWEIS in preparing the Final LLNL SWEIS.

NNSA will consider the environmental impact analysis presented in the Final LLNL SWEIS, along with other information, in making decisions regarding how operations will be conducted at LLNL, including construction and operation of new facilities, modification and upgrade of existing facilities and utilities, operational changes, and/or decontamination, decommission and demolition of excess and aging facilities. NNSA will not issue any ROD on the proposal for a minimum of 30 days after the date that EPA publishes its NOA in the **Federal Register**. NNSA will publish any ROD in the **Federal Register**.

Signing Authority

This document of the Department of Energy was signed on October 13, 2023, by Jill Hruby, Under Secretary for Nuclear Security and Administrator, National Nuclear Security Administration, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register

Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on October 27, 2023.

Treena V. Garrett,

*Federal Register Liaison Officer, U.S.
Department of Energy.*

[Project No. 6951-018]

Tallassee Shoals, LLC; Notice of Revised Procedural Schedule for Environmental Assessment for the Proposed Project Relicense

On September 15, 2021, Tallassee Shoals, LLC. filed an application for a new license to continue to operate and maintain the 2.3-megawatt Tallassee Shoals Hydroelectric Project No. 6951 (Tallassee Shoals Project). On September 14, 2022, Commission staff issued a notice of intent to prepare an Environmental Assessment (EA) to evaluate the effects of relicensing the Tallassee Shoals Project. The notice of intent included a schedule for preparing a draft and final EA.

By this notice, Commission staff is updating the procedural schedule for completing a final EA. The revised

schedule is shown below. Further revisions to the schedule may be made as appropriate.

Milestone	Target date
Issue EA	January 2024.

Any questions regarding this notice may be directed to Michael Spencer at (202) 502-6093, or by email at michael.spencer@ferc.gov.

Dated: October 27, 2023.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP23-214-000]

Columbia Gas Transmission, L.L.C.; Notice of Availability of the Environmental Assessment for the Proposed Greenwood and North Greenwood Storage Fields Abandonment Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Greenwood and North Greenwood Storage Fields Abandonment Project (Project), proposed by Columbia Gas Transmission, L.L.C. (Columbia) in the above-referenced docket. Columbia requests authorization to abandon its Greenwood and North Greenwood Storage fields, including nine wells, 3 miles of storage lines, one compressor station, and associated appurtenances in Steuben County, New York.

The EA assesses the potential environmental effects of the Project in accordance with the requirements of the National Environmental Policy Act (NEPA). The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major Federal action significantly affecting the quality of the human environment.

The proposed Project includes the following activities:

- abandoning four injection/withdrawal wells by permanently plugging and abandoning;
- abandoning four observation wells and one disposal well by permanently plugging and abandoning;
- abandoning approximately 3 miles of associated storage lines, consisting of three 8-inch-diameter laterals, and five 4-inch-diameter laterals. About 0.1 mile

would be abandoned by removal and about 2.9 miles would be abandoned in place;

- abandoning by removal the North Greenwood Compressor Station, including all below- and above-ground structures;
- abandoning by removal all above-ground appurtenances; and
- abandoning in place the remaining below-ground brine lines and miscellaneous appurtenances.

The Commission mailed a copy of the *Notice of Availability* to Federal, State, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; and newspapers and libraries in the project area. The EA is only available in electronic format. It may be viewed and downloaded from the FERC's website (www.ferc.gov), on the natural gas environmental documents page (<https://www.ferc.gov/industries-data/natural-gas/environment/environmental-documents>). In addition, the EA may be accessed by using the eLibrary link on the FERC's website. Click on the eLibrary link (<https://elibrary.ferc.gov/eLibrary/search>), select "General Search" and enter the docket number in the "Docket Number" field, excluding the last three digits (*i.e.*, CP23-214). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or toll free at (866) 208-3676, or for TTY, contact (202) 502-8659.

The EA is not a decision document. It presents Commission staff's independent analysis of the environmental issues for the Commission to consider when addressing the merits of all issues in this proceeding. Any person wishing to comment on the EA may do so. Your comments should focus on the EA's disclosure and discussion of potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. The more specific your comments, the more useful they will be. To ensure that the Commission has the opportunity to consider your comments prior to making its decision on this project, it is important that we receive your comments in Washington, DC on or before 5 p.m. eastern time on November 27, 2023.

For your convenience, there are three methods you can use to file your comments to the Commission. The Commission encourages electronic filing of comments and has staff available to

assist you at (866) 208–3676 or FercOnlineSupport@ferc.gov. Please carefully follow these instructions so that your comments are properly recorded.

(1) You can file your comments electronically using the eComment feature on the Commission's website (www.ferc.gov) under the link to FERC Online. This is an easy method for submitting brief, text-only comments on a project;

(2) You can also file your comments electronically using the eFiling feature on the Commission's website (www.ferc.gov) under the link to FERC Online. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on "eRegister." You must select the type of filing you are making. If you are filing a comment on a particular project, please select "Comment on a Filing"; or

(3) You can file a paper copy of your comments by mailing them to the Commission. Be sure to reference the project docket number (CP23–214–000) on your letter. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

Filing environmental comments will not give you intervenor status, but you do not need intervenor status to have your comments considered. Only intervenors have the right to seek rehearing or judicial review of the Commission's decision. At this point in this proceeding, the timeframe for filing timely intervention requests has expired. Any person seeking to become a party to the proceeding must file a motion to intervene out-of-time pursuant to Rule 214(b)(3) and (d) of the Commission's Rules of Practice and Procedures (18 CFR 385.214(b)(3) and (d)) and show good cause why the time limitation should be waived. Motions to intervene are more fully described at <https://www.ferc.gov/how-intervene>.

Additional information about the project is available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC website (www.ferc.gov) using the eLibrary link. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or OPP@ferc.gov.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to <https://www.ferc.gov/ferc-online/overview> to register for eSubscription.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP24–10–000]

Cheniere Creole Trail Pipeline, L.P.; Notice of Request Under Blanket Authorization and Establishing Intervention and Protest Deadline

Take notice that on October 20, 2023, Cheniere Creole Trail Pipeline, L.P. (CTPL), 700 Milam Street, Suite 1900, Houston, TX 77002, filed in the above referenced docket, a prior notice request pursuant to sections 157.205, 157.208, 157.210 of the Commission's regulations under the Natural Gas Act (NGA), and CTPL's blanket certificate issued in Docket No. CP05–358–000, for authorization to construct, own, operate and maintain facilities related to its proposed extension of the existing 42-inch suction headers and addition of two new 775 million cubic feet per day gas filter separators, and other ancillary facilities located at CTPL's existing Gillis Compressor Station. All of the above facilities are located in Beauregard Parish, Louisiana (Gillis Header Project or Project). The Project will allow CTPL to increase operational efficiencies, (including reduced downtime) at the Gillis Compressor Station. The estimated cost for the Project is \$17.9 million, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (www.ferc.gov) using the “eLibrary” link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room. For assistance,

contact the Federal Energy Regulatory Commission at FercOnlineSupport@ferc.gov or call toll-free, (866) 208–3676 or TTY (202) 502–8659.

Any questions concerning this request should be directed to: Joseph Moake, Cheniere Energy, Inc., 700 Milam Street, Suite 1900, Houston, TX 77002, (713) 375–5000, Joseph.Moake@cheniere.com; or Chris Williams, Cheniere Energy, Inc., 700 Milam Street, Suite 1900, Houston, TX 77002, (713) 375–5000, Chris.Williams@cheniere.com.

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file a protest to the project, you can file a motion to intervene in the proceeding, and you can file comments on the project. There is no fee or cost for filing protests, motions to intervene, or comments. The deadline for filing protests, motions to intervene, and comments is 5:00 p.m. Eastern Time on December 29, 2023. How to file protests, motions to intervene, and comments is explained below.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or OPP@ferc.gov.

Protests

Pursuant to section 157.205 of the Commission's regulations under the NGA,¹ any person² or the Commission's staff may file a protest to the request. If no protest is filed within the time allowed or if a protest is filed and then withdrawn within 30 days after the allowed time for filing a protest, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request for authorization will be considered by the Commission.

Protests must comply with the requirements specified in section

¹ 18 CFR 157.205.

² Persons include individuals, organizations, businesses, municipalities, and other entities. 18 CFR 385.102(d).

157.205(e) of the Commission's regulations,³ and must be submitted by the protest deadline, which is December 29, 2023. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

Interventions

Any person has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure⁴ and the regulations under the NGA⁵ by the intervention deadline for the project, which is December 29, 2023. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at <https://www.ferc.gov/resources/guides/how-to-intervene.asp>.

All timely, unopposed motions to intervene are automatically granted by operation of Rule 214(c)(1). Motions to intervene that are filed after the intervention deadline are untimely and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations. A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Comments

Any person wishing to comment on the project may do so. The Commission considers all comments received about the project in determining the appropriate action to be taken. To ensure that your comments are timely

and properly recorded, please submit your comments on or before December 29, 2023. The filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding.

How To File Protests, Interventions, and Comments

There are two ways to submit protests, motions to intervene, and comments. In both instances, please reference the Project docket number CP24–10–000 in your submission.

(1) You may file your protest, motion to intervene, and comments by using the Commission's eFiling feature, which is located on the Commission's website (www.ferc.gov) under the link to Documents and Filings. New eFiling users must first create an account by clicking on "eRegister." You will be asked to select the type of filing you are making; first select "General" and then select "Protest", "Intervention", or "Comment on a Filing"; or⁶

(2) You can file a paper copy of your submission by mailing it to the address below. Your submission must reference the Project docket number CP24–10–000.

To file via USPS: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426

To file via any other method: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852

The Commission encourages electronic filing of submissions (option 1 above) and has eFiling staff available to assist you at (202) 502–8258 or FercOnlineSupport@ferc.gov.

Protests and motions to intervene must be served on the applicant either by mail or email (with a link to the document) at: Joseph Moake, Cheniere Energy, Inc., 700 Milam Street, Suite 1900, Houston, TX 77002, or email, Joseph.Moake@cheniere.com; or Chris Williams, Cheniere Energy, Inc., 700 Milam Street, Suite 1900, Houston, TX 77002, email, Chris.Williams@cheniere.com. Any subsequent submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online.

⁶ Additionally, you may file your comments electronically by using the eComment feature, which is located on the Commission's website at www.ferc.gov under the link to Documents and Filings. Using eComment is an easy method for interested persons to submit brief, text-only comments on a project.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC website at www.ferc.gov using the "eLibrary" link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to www.ferc.gov/docs-filing/esubscription.asp.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER24–228–000]

South Cheyenne Solar, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of South Cheyenne Solar, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and

³ 18 CFR 157.205(e).

⁴ 18 CFR 385.214.

⁵ 18 CFR 157.10.

assumptions of liability, is November 20, 2023.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>) using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID-19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at FERCOnlineSupport@ferc.gov or call toll-free, (886) 208-3676 or TTY, (202) 502-8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP23-544-000]

Northern Border Pipeline Company; Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Bison XPress Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental document, that will discuss the environmental impacts of the Bison XPress Project involving construction and operation of facilities by Northern Border Pipeline Company (Northern Border) in McKenzie, Dunn, and Morton Counties, North Dakota. The Commission will use this environmental document in its decision-making process to determine whether the project is in the public convenience and necessity. Applications by Bison Pipeline, LLC (Docket No. CP23-543-000) and Wyoming Interstate Company, LLC and Fort Union Gas Gathering, LLC (Docket No. CP23-545-000) are associated projects being evaluated under the applicable Commission regulations.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies regarding the project. As part of the National Environmental Policy Act (NEPA) review process, the Commission takes into account concerns the public may have about proposals and the environmental impacts that could result from its action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. This gathering of public input is referred to as "scoping." The main goal of the scoping process is to focus the analysis in the environmental document on the important environmental issues. Additional information about the Commission's NEPA process is described below in the *NEPA Process and Environmental Document* section of this notice.

By this notice, the Commission requests public comments on the scope of issues to address in the environmental document. To ensure that your comments are timely and properly recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00 p.m. Eastern Time on November 29, 2023. Comments may be submitted in written form. Further details on how to submit comments are

provided in the *Public Participation* section of this notice.

Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. Your input will help the Commission staff determine what issues they need to evaluate in the environmental document. Commission staff will consider all written comments during the preparation of the environmental document.

If you submitted comments on this project to the Commission before the opening of this docket on September 15, 2023, you will need to file those comments in Docket No. CP23-544-000 to ensure they are considered as part of this proceeding.

This notice is being sent to the Commission's current environmental mailing list for this project. State and local government representatives should notify their constituents of this proposed project and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The company would seek to negotiate a mutually acceptable easement agreement. You are not required to enter into an agreement. However, if the Commission approves the project, the Natural Gas Act conveys the right of eminent domain to the company. Therefore, if you and the company do not reach an easement agreement, the pipeline company could initiate condemnation proceedings in court. In such instances, compensation would be determined by a judge in accordance with state law. The Commission does not subsequently grant, exercise, or oversee the exercise of that eminent domain authority. The courts have exclusive authority to handle eminent domain cases; the Commission has no jurisdiction over these matters.

Northern Border provided landowners with a fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" which addresses typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. This fact sheet along with other landowner topics of interest are available for viewing on the FERC website (www.ferc.gov) under the Natural Gas, Landowner Topics link.

Public Participation

There are three methods you can use to submit your comments to the Commission. Please carefully follow these instructions so that your comments are properly recorded. The Commission encourages electronic filing of comments and has staff available to assist you at (866) 208-3676 or FercOnlineSupport@ferc.gov.

(1) You can file your comments electronically using the eComment feature, which is located on the Commission's website (www.ferc.gov) under the link to FERC Online. Using eComment is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically by using the eFiling feature, which is located on the Commission's website (www.ferc.gov) under the link to FERC Online. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on "eRegister." You will be asked to select the type of filing you are making; a comment on a particular project is considered a "Comment on a Filing"; or

(3) You can file a paper copy of your comments by mailing them to the Commission. Be sure to reference the project docket number (CP23-544-000) on your letter. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

Additionally, the Commission offers a free service called eSubscription which makes it easy to stay informed of all issuances and submittals regarding the dockets/projects to which you subscribe. These instant email notifications are the fastest way to receive notification and provide a link to the document files which can reduce the amount of time you spend researching proceedings. Go to <https://www.ferc.gov/ferc-online/overview> to register for eSubscription.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available

information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

Summary of the Proposed Project

Northern Border's proposed Bison XPress Project consists of the replacement and expansion of compression facilities at Northern Border's existing compressor stations including Arnegard (No. 4) in McKenzie County, North Dakota, Manning (No. 5) in Dunn County North Dakota, and Glen Ullin (No. 6) in Morton County, North Dakota (Appendix 1). Upon completion, the Bison XPress Project would (a) replace and expand existing compressor facilities with new, more modern and efficient compression facilities; (b) create 300,000 dekatherms per day of incremental mainline natural gas capacity from receipt points between Northern Border's Culbertson (No. 3) Compressor Station and Glen Ullin (No. 6) Compressor Station ("Bakken Receipt Points") to its interconnection with Bison in Morton County, North Dakota (Kurtz Delivery Point); and (c) introduce standby horsepower for the first time on Northern Border's system, as opposed to the previous single compressor unit design at each station.

Land Requirements for Construction

All facility modifications and additions proposed as part of the Bison XPress Project would be entirely on property owned by Northern Border, within Northern Border easements, or on leased space. The Bison XPress Project would require the use of a total of 102.70 acres of land during construction, including 26.86 acres at the Arnegard Compressor Station, 33.15 acres at the Manning Compressor Station, and 42.69 acres at the Glen Ullin Compressor Station. Permanent impacts (a total of 4.11 acres) would only occur at the Manning Compressor Station and would be associated with the expansion of the existing facility fence line and grading to level the land surface. Construction activities at all three of the compressor stations would require temporary workspace both within and directly adjacent to the existing facility fence lines.

Temporary workspace outside of the existing facility fence lines at the compressor stations would be used primarily for the staging, parking, and storage of construction equipment and materials. Temporary workspace at all three of the compressor stations that extends beyond Northern Border's

property would be leased from the landowner during Project construction. Following the completion of construction, temporary workspace outside of the existing facilities would be restored to pre-construction contours and allowed to revegetate.

NEPA Process and the Environmental Document

Any environmental document issued by the Commission will discuss impacts that could occur as a result of the construction and operation of the proposed Bison XPress Project under the relevant general resource areas:

- geology and soils;
- water resources and wetlands;
- vegetation and wildlife;
- threatened and endangered species;
- cultural resources;
- land use;
- environmental justice;
- air quality and noise; and
- reliability and safety.

Commission staff have already identified several issues that deserve attention based on a preliminary review of the proposed facilities and the environmental information provided by Northern Border. This preliminary list of issues may change based on your comments and our analysis:

- environmental justice;
- air quality; and
- cultural resources.

Commission staff will also evaluate reasonable alternatives to the proposed Bison XPress Project or portions of the project and make recommendations on how to lessen or avoid impacts on the various resource areas. Your comments will help Commission staff identify and focus on the issues that might have an effect on the human environment and potentially eliminate others from further study and discussion in the environmental document.

Following this scoping period, Commission staff will determine whether to prepare an Environmental Assessment (EA) or an Environmental Impact Statement (EIS) for the Bison XPress Project. The EA or the EIS will present Commission staff's independent analysis of the issues. If Commission staff prepares an EA, a *Notice of Schedule for the Preparation of an Environmental Assessment* will be issued. The EA may be issued for an allotted public comment period. The Commission would consider timely comments on the EA before making its decision regarding the proposed Bison XPress Project. If Commission staff prepares an EIS, a *Notice of Intent to Prepare an EIS/Notice of Schedule* will be issued, which will open up an additional comment period. Staff will

then prepare a draft EIS which will be issued for public comment. Commission staff will consider all timely comments received during the comment period on the draft EIS and revise the document, as necessary, before issuing a final EIS. Any EA or draft and final EIS will be available in electronic format in the public record through eLibrary¹ and the Commission's natural gas environmental documents web page (<https://www.ferc.gov/industries-data/natural-gas/environmental-environmental-documents>). If eSubscribed, you will receive instant email notification when the environmental document is issued.

With this notice, the Commission is asking agencies with jurisdiction by law and/or special expertise with respect to the environmental issues of this project to formally cooperate in the preparation of the environmental document.² Agencies that would like to request cooperating agency status should follow the instructions for filing comments provided under the *Public Participation* section of this notice.

Consultation Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation's implementing regulations for section 106 of the National Historic Preservation Act, the Commission is using this notice to initiate consultation with the applicable State Historic Preservation Office(s), and to solicit their views and those of other government agencies, interested Indian

tribes, and the public on the project's potential effects on historic properties.³ The environmental document for the project will document findings on the impacts on historic properties and summarize the status of consultations under section 106.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American Tribes; other interested parties; and local libraries and newspapers. This list also includes all affected landowners (as defined in the Commission's regulations) who are potential right-of-way grantors, whose property may be used temporarily for project purposes, or who own homes within certain distances of aboveground facilities, and anyone who submits comments on the project and includes a mailing address with their comments. Commission staff will update the environmental mailing list as the analysis proceeds to ensure that Commission notices related to this environmental review are sent to all individuals, organizations, and government entities interested in and/or potentially affected by the proposed Bison XPress Project.

If you need to make changes to your name/address, or if you would like to remove your name from the mailing list, please complete one of the following steps:

(1) Send an email to GasProjectAddressChange@ferc.gov stating your request. You must include the docket number CP23-544-000 in your request. If you are requesting a change to your address, please be sure to include your name and the correct address. If you are requesting to delete your address from the mailing list, please include your name and address as it appeared on this notice. This email address is unable to accept comments.

OR

(2) Return the attached "Mailing List Update Form" (appendix 2).

Additional Information

Additional information about the project is available from the Commission's Office of External Affairs, at (866) 208-FERC, or on the FERC website at www.ferc.gov using the eLibrary link. Click on the eLibrary link, click on "General Search" and enter the docket number in the "Docket Number" field. Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or (866) 208-3676, or for TTY, contact (202) 502-8659. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

Public sessions or site visits will be posted on the Commission's calendar located at <https://www.ferc.gov/news-events/events> along with other related information.

Dated: October 30, 2023.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

Appendix 1

¹ For instructions on connecting to eLibrary, refer to the last page of this notice.

² The Council on Environmental Quality regulations addressing cooperating agency responsibilities are at title 40, Code of Federal Regulations, section 1501.8.

³ The Advisory Council on Historic Preservation's regulations are at title 36, Code of Federal Regulations, part 800. Those regulations define historic properties as any prehistoric or historic district, site, building, structure, or object included in or eligible for inclusion in the National Register of Historic Places.

Bison XPress Project

Staple or Tape Here

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission**

[Docket No. CP23–535–000]

WBI Energy Transmission, Inc.; Notice of Schedule for the Preparation of an Environmental Assessment for the South Spearfish Project

On August 28, 2023, WBI Energy Transmission, Inc. (WBI Energy) filed an application in Docket No. CP23–535–000 requesting a Certificate of Public Convenience and Necessity pursuant to section 7(c) and Authorization pursuant to section 7(b) of the Natural Gas Act to construct, operate, and abandon certain natural gas pipeline facilities. The proposed project is known as the South Spearfish Project (Project) and would allow for incremental firm transportation capacity from WBI Energy's existing Line Section 15 in western South Dakota to the community of Spearfish, South Dakota for Montana-Dakota Utilities, Company.

On September 11, 2023, the Federal Energy Regulatory Commission (Commission or FERC) issued its Notice of Application for the Project. Among other things, that notice alerted agencies issuing Federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a Federal authorization within 90 days of the date of issuance of the Commission staff's environmental document for the Project.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) for the Project and the planned schedule for the completion of the environmental review.¹

Schedule for Environmental Review

Issuance of EA—February 26, 2024
90-day Federal Authorization Decision
Deadline²—May 26, 2024

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Project Description

WBI Energy proposes the following in Lawrence County, South Dakota:

- modify the Deadwood-Central City Lateral Takeoff Valve Setting adjacent to the Deadwood Mainline Transfer Station on WBI Energy's Line Section 15;
- increase the maximum allowable operating pressure of the 8-inch-diameter Deadwood-Central City Lateral from the Deadwood Mainline Transfer Station to the proposed South Spearfish Town Border Station;
- install two pig launcher/receivers,³ one at each end of the uprated Deadwood-Central City Lateral;
- construct the new South Spearfish Town Border Station adjacent to the existing South Spearfish Lateral Takeoff Valve Setting. The new station would contain the relocated South Spearfish Town Border Station and the new Deadwood Lateral Transfer Station;
- relocate approximately 500 feet of the South Spearfish Lateral adjacent to the South Spearfish Town Border Station and the existing South Spearfish Lateral Takeoff Valve Setting; and
- abandon by sale the existing 5.5-mile-long 4-inch-diameter South Spearfish Lateral and certain town border station equipment, at the existing South Spearfish Town Border Station to Montana-Dakota Utilities, Company upon the commissioning of the new South Spearfish Town Border Station.

Background

On October 13, 2023, the Commission issued a *Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed South Spearfish Project* (Notice of Scoping). The Notice of Scoping was sent to affected landowners; Federal, State, and local government agencies; elected officials; environmental and public interest groups; Native American Tribes; other interested parties; and local libraries. All substantive comments will be addressed in the EA.

Additional Information

In order to receive notification of the issuance of the EA and to keep track of formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription. This service provides automatic notification of filings made to subscribed dockets, document summaries, and direct links to the documents. Go to <https://www.ferc.gov/ferc-online/overview> to register for eSubscription.

³ A "pig" is a tool that the pipeline company inserts into and pushes through the pipeline for cleaning the pipeline, conducting internal inspections, or other purposes. A pig launcher/receiver are facilities where pigs are inserted/retrieved from the pipeline.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or OPP@ferc.gov.

Additional information about the Project is available from the Commission's Office of External Affairs at (866) 208–FERC or on the FERC website (www.ferc.gov). Using the "eLibrary" link, select "General Search" from the eLibrary menu, enter the selected date range and "Docket Number" excluding the last three digits (*i.e.*, CP23–535), and follow the instructions. For assistance with access to eLibrary, the helpline can be reached at (866) 208–3676, TTY (202) 502–8659, or at FERCOnlineSupport@ferc.gov. The eLibrary link on the FERC website also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rule makings.

Dated: October 27, 2023.

Debbie-Anne A. Reese,
Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission****Change In Date for the December Commission Open Meeting**

Take notice that the Commission has changed the date for its December 2023 open meeting. The meeting will now take place on Tuesday, December 19, 2023. The open meeting had been initially scheduled for Thursday, December 21, 2023.¹

Dated: October 26, 2023.

Debbie-Anne A. Reese,
Deputy Secretary.

[FR Doc. 2023–24274 Filed 11–2–23; 8:45 am]

BILLING CODE 6717–01–P

¹ The start time of the meeting remains 10:00 a.m. Eastern Time.

¹ 40 CFR 1501.10 (2020)

² The Commission's deadline applies to the decisions of other Federal agencies, and State agencies acting under federally delegated authority, that are responsible for Federal authorizations, permits, and other approvals necessary for proposed projects under the Natural Gas Act. Per 18 CFR 157.22(a), the Commission's deadline for other agency's decisions applies unless a schedule is otherwise established by Federal law.

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission****[Docket No. AD23–9–000]****Reliability Technical Conference;
Second Supplemental Notice of
Technical Conference**

As announced in the Notice of Technical Conference issued in this proceeding on August 3, 2023, the Federal Energy Regulatory Commission

(Commission) will convene its annual Reliability Technical Conference in the above-referenced proceeding on Thursday, November 9, 2023, from approximately 9:00 a.m. to 5:00 p.m. Eastern time. The conference will include Commissioner-led and staff-led panels. The conference will be held in-person at the Commission's headquarters at 888 First Street NE, Washington, DC 20426 in the Commission Meeting Room.

The purpose of this conference is to discuss policy issues related to the

reliability and security of the Bulk-Power System. The conference will also discuss the impact of the Environmental Protection Agency's proposed rule under section 111 of the Clean Air Act on electric reliability.¹

While the conference is not for the purpose of discussing any specific matters before the Commission, some panel discussions may involve issues raised in proceedings that are currently pending before the Commission. These proceedings include, but are not limited to:

Complaint of Michael Mabee	Docket No. EL21–99–000.
PJM Interconnection, L.L.C.	Docket Nos. ER24–99–000, ER24–98–000.
N. Am. Electric Reliability Corp	Docket No. RR23–1–000.
Midcontinent Independent System Operator, Inc	Docket No. ER23–2977–000, ER22–1640–000.
Southwest Power Pool, Inc	Docket No. ER22–1697–000.

The conference will be open for the public to attend, and there is no fee for attendance. Information on this technical conference will also be posted on the Calendar of Events on the Commission's website, www.ferc.gov, prior to the event.

The conference will also be transcribed. Transcripts will be available for a fee from Ace Reporting, (202) 347–3700.

Commission conferences are accessible under section 508 of the Rehabilitation Act of 1973. For accessibility accommodations, please send an email to accessibility@ferc.gov, call toll-free (866) 208–3372 (voice) or (202) 208–8659 (TTY), or send a fax to (202) 208–2106 with the required accommodations.

For more information about this technical conference, please contact Michael Gildea at Michael.Gildea@ferc.gov or (202) 502–8420. For information related to logistics, please contact Sarah McKinley at Sarah.Mckinley@ferc.gov or (202) 502–8368.

Dated: October 30, 2023.

Debbie-Anne A. Reese,
Deputy Secretary.

**2023 Reliability Technical Conference****Docket No. AD23–9–000****November 9, 2023****9:00 a.m.—5:00 p.m.****Morning Session: Bulk Power System
Reliability and the Evolving Grid**

9:00–9:15 a.m. Opening Remarks and Introductions

9:15–11:00 a.m. Morning Panel 1: State of Bulk Power System Reliability with a Focus on the Changing Resource Mix and Resource Adequacy (Commission Led)

The transformation of the Bulk-Power System is resulting in significant changes to the nation's power supply portfolio. These changes include increased penetrations of inverter-based resources, the increased use and importance of natural gas generating units for system balancing, and the participation of distributed energy resources. Ensuring the adequate supply of electric energy to service loads during

peak hours and during extreme weather conditions is also becoming more challenging in many regions of North America. This panel will explore the current state of grid reliability, and resource and energy adequacy, and efforts that can be undertaken to improve them.

The panel will begin with a presentation by NERC of the findings, conclusions, and recommendations from its annual State of Reliability report.

This panel may include a discussion of the following topics and questions:

(1) What should the Commission's top reliability priorities be for the next one to three years? What are potential actions the Commission could take to improve reliability regarding these priorities?

(2) What trends and risks identified in NERC's 2023 State of Reliability Report and the 2023 ERO Reliability Risk Priorities Report warrant the most attention and effort?

(3) Resource adequacy traditionally has been characterized in terms of planning reserve margin, which assesses the excess generating capacity required to meet peak load. NERC and industry have recently been discussing the notion of energy adequacy, which assesses whether there is sufficient energy—power over time—to meet customers' energy needs. Is energy adequacy a more appropriate metric to characterize reliability risks given the changing grid?

(4) NERC has highlighted essential reliability services (*e.g.*, frequency response, voltage control, and ramping capability) as core to maintaining

¹ New Source Performance Standards for Greenhouse Gas Emissions from New, Modified, and Reconstructed Fossil Fuel-Fired Electric

Generating Units; Emission Guidelines for Greenhouse Gas Emissions from Existing Fossil Fuel-Fired Electric Generating Units; and Repeal of

the Affordable Clean Energy Rule, 88 FR 33,240 (proposed May 23, 2023) (to be codified at 40 CFR part 60).

reliable operation of the grid. How does the changing resource mix and characteristics of load affect the needed amount and provision of these essential reliability services? What actions, and by whom, are necessary to ensure adequate levels of these services?

(5) The electric grid is undergoing its most significant changes in a century. How should reliability oversight adapt to this change? Is the existing reliability oversight model flexible and agile enough to help lead the change?

(6) In recent years, reliance on natural gas as a fuel for electric generation has steadily increased. At the Commission's recommendation, the North American Energy Standards Board (NAESB) held forums between August 2022 and July 2023 to discuss the growing interdependence between the natural gas and electric sectors. NAESB issued recommendations to enhance market coordination to address challenges posed by this growing interdependence. Should the Commission prioritize pursuing any specific NAESB recommendation?

(7) Wildfires are no longer considered only a California or Western states issue for grid reliability, as drought conditions are expanding into additional regions including MISO, ERCOT and SPP creating further reliability impacts. What preparations have you taken (or are you considering) to address emerging wildfire and drought reliability risks in your region?

Panelists:

- *James Robb*, President & CEO, North American Electric Reliability Corporation
- *Nancy Bagot*, Senior Vice President, Electric Power Supply Association
- *Adrienne Collins*, Senior Vice President for Power Delivery, Southern Company, on behalf of Edison Electric Institute
- *Andrew Dressel*, Director of Risk, Compliance & Security, Guidehouse
- *Patricia Jagtiani*, Executive Vice President, National Gas Supply Association
- *Clair J. Moeller*, President & COO, Midcontinent Independent System Operator
- *Abram Klein*, Managing Partner, Appian Way Energy Partners
- *Robert W. Bradish*, Senior Vice President, Regulated Infrastructure Investment Planning, American Electric Power
- *Pam Sporborg*, Director of Transmission and Market Services, Portland General Electric

11:00–11:10 a.m. Break

11:10–12:30 p.m. Morning Panel 2: CIP Reliability Standards and the Evolving Grid (Commission Led)

Cybersecurity vulnerabilities and threats continue to evolve at a pace that tests utility cybersecurity programs. These quickly evolving threats present a challenge when assessing whether security controls, including the CIP Reliability Standards, adequately respond to the latest cyber risks. Most utilities and other electric sector stakeholders with mature cybersecurity programs implement an overarching cybersecurity program to oversee all aspects of their cybersecurity activities, including identification of the assets to be protected, staffing, technology selection and procurement, and compliance with the CIP Reliability Standards. However, ongoing and anticipated changes to the interconnected electric grid, such as the shift in the types of energy sources used to generate electricity may disrupt cyber programs. Utilities are digitizing their grids while managing an increasing number of grid-connected devices. As a consequence, utilities require more advanced tools to process and analyze large amounts of data for grid planning, operations, and security. These changes are also leaving uncertainty as to where these digital assets will fit into the cybersecurity regulatory framework and what tools can be used to effectively manage them or even what the future may bring as cyberattacks continue to grow in sophistication. This panel will discuss how the evolving grid affects cybersecurity, the CIP Reliability Standards and compliance, as well as best practices; the challenges of implementing appropriate oversight; and ways in which industry can address these challenges to improve its response to evolving vulnerabilities and threats to reduce the risk to the Bulk-Power System.

(1) Discuss the primary security issues facing electric utilities and describe the prioritization of resources and investment. What are some lessons learned and best practices?

(2) With regard to evolving cyber threats, describe how your cybersecurity program identifies and responds to such conditions. When responding, how do you assess the risk posed to your systems by the threats?

(3) Describe the benefits and challenges of implementing and maintaining a cybersecurity program as the resource mix continues to evolve. How does this program interact with actions to comply with the CIP Reliability Standards? How does such a program help to identify and prioritize

security concerns, and what actions are taken to address those concerns, including the application of best practices?

(4) Describe how supply chain security and the use of third-party systems, such as cloud services, are addressed in your risk assessments and implemented in the cybersecurity program. What concerns still exist related to supply chain and third-party systems?

(5) What additional actions can the Commission, NERC, and industry take to further protect the grid from security threats, both physical and cyber?

Panelists:

- *Scott Aaronson*, Vice President of Security and Preparedness, Edison Electric Institute
- *Jason Blake*, President & CEO, SERC
- *Manny Cancel*, Senior Vice President & CEO, Electricity Information Sharing and Analysis Center
- *Joseph Mosher*, Portfolio Manager, EDF Renewables
- *Rudolf Pawul*, Vice President of Information & Cyber Security Services, ISO New England
- *Maggy Powell*, Security Assurance for Power & Utility Sector, Amazon Web Services
- *Jonathan Tubb*, Director of Industrial Cyber Security for North America, Siemens Energy

12:30–1:15 p.m. Lunch Break

Afternoon Session: Reliability Implications of EPA's Proposed Rule on "Greenhouse Gas Standards and Guidelines for Fossil Fuel-Fired Power Plants"

On May 23, 2023 the EPA issued a notice of proposed rulemaking under section 111 of the Clean Air Act. Several comments submitted to EPA on the proposed rule indicated that implementation of the proposal would affect electric reliability. The afternoon panels will discuss the possible reliability impacts of the rule and possible mitigations.

1:15–2:15 p.m. Afternoon Panel 1: EPA Presentation of EPA Section 111 Proposed Rule (Commission Led)

Joseph Goffman, Principal Deputy Assistant Administrator for the Office of Air and Radiation (OAR), Environmental Protection Agency (EPA), accompanied by EPA staff, will provide an overview of the Section 111 Proposed Rule, and highlight specific issues relevant to the reliable operation of the electric system.

2:15–4:50 p.m. Afternoon Panels 2 and 3: Discussion of the Proposed Rule (Staff Led)

Afternoon Panels 2 and 3 will present perspectives on reliability aspects of the

proposed rule, followed by an opportunity for questions and answers. Panelists for both Panels 2 and 3 should be prepared to discuss the following topics and questions:

(1) Will the rule, if implemented as proposed, affect electric reliability? In what ways?

(2) What tools and processes should the Commission, other federal and state agencies, and industry consider in order to implement the proposed rule? What authority should the Commission and other federal and state agencies have in order to address potential reliability issues that could arise during implementation of the proposed rule?

(3) What existing processes for coordination will enable federal and state agencies, planning entities, and industry stakeholders to share ongoing developments relevant to the implementation of the proposed rule?

(4) What specific tools are currently available to agencies to consider impacts to retail consumers? Are there additional tools that should be developed to consider these issues?

2:15—3:30 p.m. Electric Industry Stakeholders Panel

Panelists:

- *Michael Bryson*, Senior Vice President of Operations, PJM Interconnection
- *Susan Tierney*, Senior Advisor, Analysis Group
- *Anthony Campbell*, President & CEO, East Kentucky Power Cooperative on behalf of NRECA and East Kentucky Power Cooperative
- *Emily Fisher*, Executive Vice President for Clean Energy & General Counsel, Edison Electric Institute
- *Ric O'Connell*, Executive Director, GridLab
- *Bobby Olsen*, Associate General Manager, SRP on behalf of Large Public Power Council
- *Michelle Bloodworth*, President & CEO, America's Power

3:30—3:40 p.m. Break

3:40—4:50 p.m. Regional, State, and Local Regulatory Entities Panel

Panelists:

- *Julie Fedorchak*, Commissioner, North Dakota Public Service Commission
- *Miles E. Keogh*, Executive Director, National Association of Clean Air Agencies
- *Mary Throne*, Chairman, Wyoming Public Service Commission and Western Interconnection Regional Advisory Board
- *Will Toor*, Executive Director, Colorado Energy Office
- *Jehmal Hudson*, Commissioner, Virginia State Corporation Commission

4:50—5:00 p.m. Closing Remarks

[FR Doc. 2023–24327 Filed 11–2–23; 8:45 am]

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER24–230–000]

New England Power and Light LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of New England Power and Light LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is November 20, 2023.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all

interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>) using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at FERCOnlineSupport@ferc.gov or call toll-free, (886) 208–3676 or TTY, (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or OPP@ferc.gov.

Dated: October 30, 2023.

Comment Date: 5 p.m. ET 11/20/23.

The filings are accessible in the Commission’s eLibrary system (<https://elibrary.ferc.gov/idmws/search/fercgensearch.asp>) by querying the docket number.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission’s Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <http://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission’s Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as

interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202)502-6595 or *OPP@ferc.gov*.

Dated: October 30, 2023.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP22–512–001]

WBI Energy Transmission, Inc.; Notice of Request for Extension of Time

Take notice that on October 25, 2023, WBI Energy Transmission, Inc. (WBI Energy) requested that the Federal Energy Regulatory Commission (Commission) grant an extension of time (2023 Extension of Time Request), until June 1, 2024, to construct to construct and operate a new compressor station, tie-in facilities including pipeline, and associated measurement facilities on its Line Section 27 Expansion Project (Project) to provide incremental natural gas firm transportation service in McKenzie County, North Dakota authorized by the Commission in Docket Nos. CP82–487–000, et al.¹

In its 2023 Extension of Time Request, WBI Energy states that it will not complete all work associated with the project by the November 21, 2023, deadline. Accordingly, WBI Energy requests an extension of time until June 1, 2024, to complete construction of project facilities.

¹ WBI Energy Transmission et al., 30 FERC ¶ 61,143, (1985).

This notice establishes a 15-calendar day intervention and comment period deadline. Any person wishing to comment on WBI Energy's request for an extension of time may do so. No reply comments or answers will be considered. If you wish to obtain legal status by becoming a party to the proceedings for this request, you should, on or before the comment date stated below, file a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10).

As a matter of practice, the Commission itself generally acts on requests for extensions of time to complete construction for Natural Gas Act facilities when such requests are contested before order issuance. For those extension requests that are contested,² the Commission will aim to issue an order acting on the request within 45 days.³ The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension.⁴ The Commission will not consider arguments that re-litigate the issuance of the certificate order, including whether the Commission properly found the project to be in the public convenience and necessity and whether the Commission's environmental analysis for the certificate complied with the National Environmental Policy Act.⁵ At the time a pipeline requests an extension of time, orders on certificates of public convenience and necessity are final and the Commission will not re-litigate their issuance.⁶ The OEP Director, or his or her designee, will act on all of those extension requests that are uncontested.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>) using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number

² Contested proceedings are those where an intervenor disputes any material issue of the filing. 18 CFR 385.2201(c)(1) (2022).

³ *Algonquin Gas Transmission, LLC*, 170 FERC ¶ 61,144, at P 40 (2020).

⁴ *Id.* at P 40.

⁵ Similarly, the Commission will not re-litigate the issuance of an NGA section 3 authorization, including whether a proposed project is not inconsistent with the public interest and whether the Commission's environmental analysis for the permit order complied with NEPA.

⁶ *Algonquin Gas Transmission, LLC*, 170 FERC ¶ 61,144, at P 40 (2020).

field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room. For assistance, contact FERC at FERCOnlineSupport@ferc.gov or call toll-free, (886) 208-3676 or TTY, (202) 502-8659.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and three copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

Comment Date: 5:00 p.m. Eastern Time on, November 14, 2023.

Dated: October 30, 2023.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER24-201-000]

Karbene Energy LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Karbene Energy LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is November 16, 2023.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic

service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>) using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID-19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at FERCOnlineSupport@ferc.gov or call toll-free, (886) 208-3676 or TTY, (202) 502-8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202)502-6595 or OPP@ferc.gov.

Dated: October 27, 2023.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OAR-2012-0103; FRL 10814-01-OAR]

Proposed Information Collection Request Renewal; Comment Request; Clean School Bus (CSB) Rebate Program; EPA ICR No. 2461.05, OMB Control No. 2060-0686 (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) is planning to submit an information collection request (ICR) renewal, "Clean School Bus (CSB) Rebate Program" (EPA ICR No. 2461.05, OMB Control No. 260-0686 (Renewal)) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. Before doing so, EPA is soliciting public comments on specific aspects of the proposed information collection as described below. An Emergency ICR No. 2780.01 was approved by OMB in September 2023 that included additional data necessary to adequately review and administer the CSB Rebate Program. This ICR renewal consolidates all components of the CSB Rebate Program collection and renews the existing ICR No. 2461.04, which is currently approved through August 31, 2025. An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information, unless it displays a currently valid OMB control number.

DATES: Comments must be submitted on or before January 2, 2024.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA-HQ-OAR-2012-0103, online using www.regulations.gov (our preferred method), by email to a-and-r-docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT:

Timothy Thomas, Office of Transportation and Air Quality, (6406A), Environmental Protection Agency, 1200 Pennsylvania Ave. NW,

Washington, DC 20460; telephone number: 734-214-4465; email address: thomas.tim.l@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents that explain in detail the information that EPA will be collecting are available in the public docket for this ICR renewal. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. The ICR renewal package will be submitted to OMB for review and approval.

Abstract:

This supporting statement is for the Information Collection Request (ICR) renewal for the Clean School Bus (CSB) Rebate Program. The CSB Rebate Program currently collects information under an existing ICR; namely the Diesel Emissions Reduction Act (DERA) and Clean School Bus Rebate Program ICR No. 2060-0686. The Environmental Protection Agency (EPA) currently uses ICR No. 2060-0686 to collect information for the CSB Rebate Program to ensure its successful administration and management. An Emergency ICR No. 2780.01 was approved by OMB in September 2023 that included additional data necessary to adequately review and administer the CSB Rebate Program. This ICR renewal consolidates all components of the CSB Rebate Program collection.

School buses collectively travel over four billion miles each year. They provide safe transportation to and from

school for more than 25 million American children every day. While new buses meet the EPA's tighter emission standards, most school buses on the road emit pollutants, including nitrogen oxides (NO_x) and particulate matter (PM), in diesel exhaust. These pollutants can contribute to poor air quality and negatively impact human health, especially for children, as well as for bus drivers, other school staff, and other community members. The CSB Rebate Program funds the replacement of existing school buses with cleaner buses, the operation of which result in better air quality throughout the communities in which they operate.

EPA uses approved procedures and forms to collect necessary information to operate the CSB Rebate Program and has been providing these rebates since 2022. For each rebate program, EPA utilizes three online forms for the three phases of the rebate lifecycle: (1) Application Form, for eligible entities to apply to a new rebate program, (2) Payment Request Form, for selectees to submit order documentation and receive funds, and (3) Close Out Form, for selectees to document completion of the rebate-eligible activity. In Fall 2023, EPA launched the 2023 CSB Rebate Application for applicants, and the 2022 CSB Rebate Close Out Form for existing 2022 program participants; EPA is currently preparing to launch the 2023 CSB Rebate Payment Request Form in early Spring of 2024. EPA will subsequently launch the 2023 CSB Rebate Close Out Form, as well as each rebate form for any future rebate programs (e.g., 2024 CSB Rebate Program). The data collected in these forms are needed to operate the rebate program as authorized by Congress under the CSB statute.

Respondents/affected entities: Entities potentially affected by this action are those interested in applying for a rebate under EPA's CSB Program and include but are not limited to the following NAICS (North American Industry Classification System) codes: 23 Construction; 482 Rail Transportation; 483 Water Transportation; 484 Truck Transportation; 485 Transit and Ground Passenger Transportation; 4854 School and Employee Bus Transportation; 61111 Elementary and Secondary Schools; 61131 Colleges, Universities, and Professional Schools; 9211 Executive, Legislative, and Other Government Support; and 9221 Justice, Public Order, and Safety Activities.

Respondent's obligation to respond: Mandatory for CSB rebate recipients.

Estimated number of respondents: 2,400 applicants annually.

Frequency of response: Once per year.

Total estimated burden: 19,763 hours for applicants annually and 59,289 hours for applicants over the ICR period. Burden is defined at 5 CFR 1320.03(b)

Changes in the estimates: There is an increase of 2,476 hours burden hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This change is due to minor decreases to the respondent count for the Payment Request Form and Close Out Form, offset by increases to the respondents' time burden for all forms to more accurately reflect the time required for program participants to complete the forms given changes in program requirements and changes to the amount of time given to selectees to edit their forms.

Karl Simon,

Director, Transportation and Climate Division, Office of Air and Radiation.

[FR Doc. 2023-24292 Filed 11-2-23; 8:45 am]

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-11464-01-OA]

Request for Nominations of Candidates for the Clean Air Scientific Advisory Committee (CASAC) Nitrogen Oxides (NO_x) Panel

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) Science Advisory Board (SAB) Staff Office requests public nominations of scientific experts for the CASAC NO_x Panel. This panel will provide advice through the chartered CASAC on the scientific and technical bases for the agency's review of the Primary National Ambient Air Quality Standards (NAAQS) for nitrogen oxides.

DATES: Nominations should be submitted by November 24, 2023 per the instructions below.

FOR FURTHER INFORMATION CONTACT: Any member of the public wishing further information regarding this Notice and Request for Nominations may contact Mr. Aaron Yeow, Designated Federal Officer (DFO), SAB Staff Office, by telephone at (202) 564-2050 or via email at yeow.aaron@epa.gov. General information concerning the CASAC can be found on the CASAC website: <https://casac.epa.gov>.

SUPPLEMENTARY INFORMATION:

Background: The CASAC was established pursuant to the Clean Air Act (CAA) Amendments of 1977,

codified at 42 U.S.C. 7409(d)(2), to review air quality criteria and NAAQS and recommend to the EPA Administrator any new NAAQS and revisions of existing criteria and NAAQS as may be appropriate. The CASAC shall also: advise the EPA Administrator of areas in which additional knowledge is required to appraise the adequacy and basis of existing, new, or revised NAAQS; describe the research efforts necessary to provide the required information; advise the EPA Administrator on the relative contribution to air pollution concentrations of natural as well as anthropogenic activity; and advise the EPA Administrator of any adverse public health, welfare, social, economic, or energy effects which may result from various strategies for attainment and maintenance of such NAAQS. As amended, 5 U.S.C. app. section 109(d)(1) of the Clean Air Act (CAA) requires that EPA carry out a periodic review and revision, as appropriate, of the air quality criteria and the NAAQS for the six "criteria" air pollutants, including nitrogen oxides.

The CASAC is a Federal advisory committee chartered under the Federal Advisory Committee Act (FACA). As a Federal Advisory Committee, the CASAC conducts business in accordance with the Federal Advisory Committee Act (FACA) (5 U.S.C. 10) and related regulations. The CASAC and the CASAC NO_x Panel will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies.

Request for Nominations: The SAB Staff Office is seeking nominations of nationally and internationally recognized scientists with demonstrated expertise and research in the field of air pollution related to criteria pollutants. For the CASAC NO_x Panel, experts are being sought in the following fields, especially with respect to NO_x: atmospheric science, human exposure, dosimetry, toxicology, epidemiology, medicine, public health, biostatistics, and risk assessment.

Process and Deadline for Submitting Nominations: Any interested person or organization may nominate qualified individuals in the areas of expertise described above. Individuals may self-nominate. Nominations should be submitted in electronic format (preferred) using the online nomination form under "Public Input on Membership" on the CASAC web page at <https://casac.epa.gov>. To be considered, all nominations should include the information requested below. EPA values and welcomes diversity. All qualified candidates are

encouraged to apply regardless of sex, race, disability or ethnicity. Nominations should be submitted by November 24, 2023.

The following information should be provided on the nomination form: contact information for the person making the nomination; contact information for the nominee; and the disciplinary and specific areas of expertise of the nominee. Nominees will be contacted by the SABSO and will be asked to provide a recent *curriculum vitae* and a narrative biographical summary that includes current position, educational background, research activities, sources of research funding for the last two years, and recent service on other national advisory committees or national professional organizations. Persons having questions about the nomination process, or the public comment process described below, or who are unable to submit nominations through the CASAC website, should contact the DFO, as identified above. The names and biosketches of qualified nominees identified by respondents to this **Federal Register** notice, and additional experts identified by the SAB Staff Office, will be posted in a List of Candidates on the CASAC website at <https://casac.epa.gov>. Public comments on each List of Candidates will be accepted for 21 days from the date the list is posted. The public will be requested to provide relevant information or other documentation on nominees that the SAB Staff Office should consider in evaluating candidates.

For the EPA SAB Staff Office, a balanced review panel includes candidates who possess the necessary domains of knowledge, the relevant scientific perspectives (which, among other factors, can be influenced by work history and affiliation), and the collective breadth of experience to adequately address the charge. In forming this expert panel, the SAB Staff Office will consider public comments on the List of Candidates, information provided by the candidates themselves, and background information independently gathered by the SAB Staff Office. Selection criteria to be used for panel membership include: (a) scientific and/or technical expertise, knowledge, and experience (primary factors); (b) availability and willingness to serve; (c) absence of financial conflicts of interest; (d) absence of an appearance of a lack of impartiality; (e) skills working in committees, subcommittees and advisory panels; and (f) for the panel as a whole, diversity of expertise and viewpoints.

Candidates may be asked to submit the “Confidential Financial Disclosure Form for Special Government Employees Serving on Federal Advisory Committees at the U.S. Environmental Protection Agency” (EPA Form 3110–48). This confidential form is required for Special Government Employees (SGEs) and allows EPA to determine whether there is a statutory conflict between that person’s public responsibilities (which includes membership on an EPA federal advisory committee) as an SGE and private interests and activities, or the appearance of a loss of impartiality, as defined by Federal regulation. The form may be viewed and downloaded through the “Ethics Requirements for Advisors” link on the CASAC home page at <https://casac.epa.gov>. This form should not be submitted as part of a nomination.

V. Khanna Johnston,

Deputy Director, Science Advisory Board Staff Office.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2013–0118; FRL–11429–01–OAR]

Proposed Information Collection Request; Comment Request; Control of Evaporative Emissions From New and In-Use Portable Gasoline Containers (Renewal), ICR 2213.07, OMB 2060–0597

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency is planning to submit an information collection request (ICR), “Control of Evaporative Emissions from New and In-Use Portable Gasoline Containers (Renewal)”, ICR 2213.07, OMB 2060–0597 to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. Before doing so, EPA is soliciting public comment on specific aspects of the proposed information collection request as described below. This notice is a proposed extension of the Portable Fuel Container ICR, which is currently approved through January 31, 2024. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Comments must be submitted on or before January 2, 2024.

ADDRESSES: Submit your comments, referencing the Docket ID No. EPA–HQ–OAR–2013–0118, to the EPA: online using www.regulations.gov (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA’s policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Philip Carlson, Compliance Division, Office of Transportation and Air Quality, U.S. Environmental Protection Agency, 2000 Traverwood, Ann Arbor, Michigan 48105; telephone number: 734–214–4270; fax number 734–214–4869; email address: Carlson.Philip@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting will be available in the public docket, EPA-HQ-OAR-2013-0118, for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave., NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: EPA is required under Section 183(e) of the Clean Air Act to regulate Volatile Organic Compound (VOC) emissions from the use of consumer and commercial products. Under regulations promulgated on February 26, 2007 (72 FR 8428) manufacturers of new portable gasoline containers are required to obtain certificates of conformity with the Clean Air Act, effective January 1, 2009. This ICR covers the burdens associated with this certification process. EPA reviews information submitted in a manufacturer's application for certification to determine if the gasoline container design conforms to applicable regulatory requirements and to verify that the required testing has been performed. The certificate holder is required to keep records on the testing and collect and keep warranty and

defect information for annual reporting on in-use performance of their products. The respondent must also retain records on the units produced, apply serial numbers to individual containers, and track the serial numbers to their certificates of conformity. Any information submitted for which a claim of confidentiality is made is safeguarded according to EPA regulations at 40 CFR 2.201 *et seq.*

Form Numbers: None.

Respondents/affected entities: manufacturers of new portable gasoline containers from 0.25 to 10.0 gallons in capacity.

Respondent's obligation to respond: mandatory 40 CFR part 59, subpart F.

Estimated number of respondents: 9 (total).

Frequency of response: yearly for warranty reports; at least once every five years for certification and certificate renewals.

Total estimated burden: 240 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$29,855.51 (per year), which includes \$21,613.67 annualized capital and operation & maintenance costs.

Changes in Estimates: There is an increase of 33.1 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase of the burden and cost estimates is due to a change in the estimated cost of labor and additional testing requirements for new portable fuel container families to comply with the requirements for evaporative testing promulgated in 40 CFR part 59.

Byron Bunker,

Director, Compliance Division, Office of Transportation and Air Quality, US Environmental Protection Agency.

FARM CREDIT ADMINISTRATION**Sunshine Act Meetings**

TIME AND DATE: 10 a.m., Thursday, November 9, 2023.

PLACE: You may observe this meeting in person at 1501 Farm Credit Drive, McLean, Virginia 22102-5090, or virtually. If you would like to observe, at least 24 hours in advance, visit [FCA.gov](https://www.fca.gov), select "Newsroom," then select "Events." From there, access the linked "Instructions for board meeting visitors" and complete the described registration process.

STATUS: This meeting will be open to the public.

MATTERS TO BE CONSIDERED: The following matters will be considered:

- Approval of Minutes for October 12, 2023
- Office of Equal Employment Opportunity and Inclusion Report Concerning Native Americans and Veterans
- Conservators and Receivers Final Rule

CONTACT PERSON FOR MORE INFORMATION:

If you need more information or assistance for accessibility reasons, or have questions, contact Ashley Waldron, Secretary to the Board. Telephone: 703-883-4009. TTY: 703-883-4056.

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (Act) (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the applications are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at <https://www.federalreserve.gov/foia/request.htm>. Interested persons may express their views in writing on the standards enumerated in paragraph 7 of the Act.

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than November 20, 2023.

A. Federal Reserve Bank of Chicago (Colette A. Fried, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690–1414. Comments can also be sent electronically to Comments.applications@chi.frb.org:

1. *The Orville A. Rehder 2nd Revocable Living Trust, Orville A. Rehder as trustee, Jeffrey A. Rehder, and Steve C. Rehder, all of Hawarden, Iowa*; as a group acting in concert to acquire voting shares of First State Associates, Inc., Hawarden, Iowa, and thereby indirectly acquire voting shares of Rivers Edge Bank, Marion, South Dakota.

OFFICE OF GOVERNMENT ETHICS

OGE Senior Executive Service; Performance Review Board

AGENCY: Office of Government Ethics (OGE).

ACTION: Notice.

SUMMARY: Notice is hereby given of the membership of the OGE Senior Executive Service (SES) Performance Review Board.

DATES: *Applicable date:* November 3, 2023.

FOR FURTHER INFORMATION CONTACT:

Sidney K. Williams, Human Resources Attorney-Advisor, Office of Government Ethics, Suite 500, 1201 New York Avenue NW, Washington, DC 20005–3917; Telephone: 202–482–9209.

SUPPLEMENTARY INFORMATION: 5 U.S.C. 4314(c) requires each agency to establish, in accordance with regulations prescribed by the Office of Personnel Management at 5 CFR part 430, subpart C and § 430.310 thereof in particular, one or more Senior Executive Service performance review boards. As a small executive branch agency, OGE has just one board. In order to ensure an adequate level of staffing and to avoid a constant series of recusals, the designated members of OGE's SES Performance Review Board are being drawn, as in the past, in large measure from the ranks of other executive branch agencies. The board shall review and evaluate the initial appraisal of each OGE senior executive's performance by his or her supervisor, along with any recommendations in each instance to the appointing authority relative to the performance of the senior executive. This notice updates the membership of OGE's SES Performance Review Board as it was most recently published at 88 FR 543134 (July 6, 2023).

The SES Performance Review Board of the Office of Government Ethics is composed of the following officials: Elizabeth Fischmann, Designated Agency Ethics Official, National Credit Union Association; Sean Dent, Senior Deputy General Counsel, Federal Housing Finance Agency; and Peter J. Constantine, Associate Solicitor for Legal Counsel, Office of the Solicitor, Department of Labor.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30Day–24–23DT]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled “Reporting of the Essentials for Childhood (EfC): Preventing Adverse Childhood Experiences through Data to Action Program” to the Office of Management and Budget (OMB) for review and approval. CDC previously published a “Proposed Data Collection Submitted for Public Comment and Recommendations” notice on March 31, 2023 to obtain comments from the public and affected agencies. CDC received one comment related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639-7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395-5806. Provide written comments within 30 days of notice publication.

Proposed Project

Reporting of the Essentials for Childhood (EfC): Preventing Adverse Childhood Experiences through Data to Action Program—New—National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The purpose of the information collection effort is to collect Essentials for Childhood (EfC) program recipient data related to surveillance, implementation, program evaluation, and performance monitoring. This data collection is necessary to ensure that programs are progressing toward achievement of their stated goals and objectives, as well as consistently demonstrating efficient and appropriate use of federal funds. CDC will use the information collected to further understand the facilitators, barriers, and critical factors to implementing specific violence prevention strategies and conducting related program evaluation activities. Data collected will also be

used to inform CDC’s training and technical assistance, program improvement, and the development of future funding opportunities. Data collection is designed to address the following key program evaluation questions:

- To what extent have recipients accomplished the short-term and intermediate-term outcomes outlined in the Logic Model?
- To what extent do recipients effectively implement Adverse Childhood Experience (ACE) prevention strategies during the period of performance?
- To what extent have recipients leveraged multi-sector partnerships and resources among state agencies (additional funding at the local level) and other sectors to prevent ACEs, including forming sustainable systems and partnerships, and realigning/focusing/mobilizing resources to prevent ACEs?
- In what ways has the recipient built or enhanced their state-level surveillance system to monitor ACEs, PCEs, and social determinants of health?
- How has the recipient integrated and addressed racial and health inequities and social determinants of health in preventing ACEs?
- To what extent have recipients enhanced their statewide action plan to implement complementary ACEs prevention strategies (additional funding for implementation at the local level)?
- To what extent have funded recipients enhanced their ability to use ACEs and PCEs surveillance and evaluation data to inform prevention strategy allocation?
- To what extent have recipients enhanced their ability to disseminate and use data to inform partner, policy, or other action?
- To what extent have recipients seen a sustainable increase in capacity and

activities related to routine monitoring of ACEs and PCEs data among youth?

- To what extent have recipients seen a sustainable increase in capacity and activities related to routine monitoring of near real-time surveillance to monitor indicators of ACEs?
- To what extent have recipients demonstrated ability to link ACEs and PCEs data to those on the social determinants of health, and utilize these data to inform prevention strategies (if applicable)?
- What is the reach/exposure to the ACEs prevention program efforts?
- Are ACEs prevention strategies reaching populations at highest risk for ACEs?
- To what extent have recipients demonstrated use of surveillance and evaluation data to inform prevention strategy allocation and implementation to improve health equity?
- What has been the reach/exposure of ACEs and PCEs data dissemination efforts?

Information will be collected annually from recipients through the DVP Partners Portal, a web-based data collection system. The DVP Partners Portal allows recipients to fulfill their annual reporting obligations efficiently by employing user-friendly, easily accessible web-based instruments to collect necessary information for both progress reports and continuation applications. Because information from previous reports will be carried over and pre-populated for the next annual reporting, recipients will only need to enter changes, provide progress updates, and add any new information after the first year of reporting, which will help to reduce recipient burden.

CDC requests OMB approval for an estimated 168 annual burden hours. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Essentials For Childhood Grantees	Annual Performance Report (APR)—Project Leads.	12	1	10
	Key Informant Interview—Principal Investigators.	12	1	1
	Key Informant Interview—Principal Investigator/Implementor.	12	1	1
	Surveillance Capacity Assessment—Surveillance Lead.	12	1	30/60
	Implementation Capacity Assessment	12	1	30/60
	Evaluation and Surveillance Survey—Surveillance Lead or Evaluator.	12	1	1

Jeffrey M. Zirger,

Lead, Information Collection Review Office,
Office of Public Health Ethics and
Regulations, Office of Science, Centers for
Disease Control and Prevention.

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day-24-0006; Docket No. CDC-2023-
0090]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and
Prevention (CDC), Department of Health
and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease
Control and Prevention (CDC), as part of
its continuing effort to reduce public
burden and maximize the utility of
government information, invites the
general public and other Federal
agencies the opportunity to comment on
a proposed and/or continuing
information collection, as required by
the Paperwork Reduction Act of 1995.
This notice invites comment on a
proposed information collection project
titled Statement in Support of
Application for Waiver of
Inadmissibility Under Immigration and
Nationality Act. This information
collection is related to waivers of
inadmissibility on health-related
grounds, specifically mental health
disorders with associated harmful
behavior.

DATES: CDC must receive written
comments on or before January 2, 2024.

ADDRESSES: You may submit comments,
identified by Docket No. CDC-2023-
0090 by either of the following methods:

- **Federal eRulemaking Portal:**
www.regulations.gov. Follow the
instructions for submitting comments.
- **Mail:** Jeffrey M. Zirger, Information
Collection Review Office, Centers for
Disease Control and Prevention, 1600
Clifton Road, NE, MS H21-8, Atlanta,
Georgia 30329.

Instructions: All submissions received
must include the agency name and
Docket Number. CDC will post, without
change, all relevant comments to
www.regulations.gov.

Please note: Submit all comments
through the Federal eRulemaking portal
(www.regulations.gov) or by U.S. mail to
the address listed above.

FOR FURTHER INFORMATION CONTACT: To
request more information on the
proposed project or to obtain a copy of
the information collection plan and
instruments, contact Jeffrey M. Zirger,
Information Collection Review Office,
Centers for Disease Control and
Prevention, 1600 Clifton Road NE, MS
H21-8, Atlanta, Georgia 30329;
Telephone: 404-639-7570; Email: omb@cdc.gov.

SUPPLEMENTARY INFORMATION: Under the
Paperwork Reduction Act of 1995 (PRA)
(44 U.S.C. 3501-3520), Federal agencies
must obtain approval from the Office of
Management and Budget (OMB) for each
collection of information they conduct
or sponsor. In addition, the PRA also
requires Federal agencies to provide a
60-day notice in the **Federal Register**
concerning each proposed collection of
information, including each new
proposed collection, each proposed
extension of existing collection of
information, and each reinstatement of
previously approved information
collection before submitting the
collection to the OMB for approval. To
comply with this requirement, we are
publishing this notice of a proposed
data collection as described below.

The OMB is particularly interested in
comments that will help:

1. Evaluate whether the proposed
collection of information is necessary
for the proper performance of the
functions of the agency, including
whether the information will have
practical utility;
2. Evaluate the accuracy of the
agency's estimate of the burden of the
proposed collection of information,
including the validity of the
methodology and assumptions used;
3. Enhance the quality, utility, and
clarity of the information to be
collected;
4. Minimize the burden of the
collection of information on those who
are to respond, including through the
use of appropriate automated,
electronic, mechanical, or other
technological collection techniques or
other forms of information technology,
e.g., permitting electronic submissions
of responses; and
5. Assess information collection costs.

Proposed Project

Statement in Support of Application
for Waiver of Inadmissibility Under
Immigration and Nationality Act (OMB
Control No. 0920-0006, Exp. 12/31/
2023)—Revision—National Center for
Emerging and Zoonotic Infectious
Diseases (NCEZID), Centers for Disease
Control and Prevention (CDC).

Background and Brief Description

The goal of this proposed collection is
to provide Centers for Disease Control
and Prevention (CDC) with adequate
information to fulfill its responsibilities
with regard to the processing of
applications for waivers of
inadmissibility on health-related
grounds, specifically mental health
disorders with associated harmful
behaviors. Section 212 (a) of the
Immigration and Nationality Act (INA)
states that aliens with specific health-
related grounds are ineligible to receive
visas and ineligible for admission into
the United States. The conditions are
listed in subsections as follows:

(i) aliens who have a communicable
disease of public health significance,

(iii) (I) aliens who have a physical or
mental disorder and behavior associated
with the disorder that may pose, or has
posed, a threat to the property, safety, or
welfare of the alien or others; or

(iii) (II) aliens who have had a
physical or mental disorder and a
history of behavior associated with the
disorder, which behavior has posed a
threat to property, safety, or welfare of
the alien or others and which behavior
is likely to recur or lead to other
harmful behavior.

However, section 212(g) of the INA
authorizes the Attorney General to
waive certain Class A inadmissible
health-related grounds which would
allow an alien to overcome his/her
inadmissibility. The CDC may provide
consultation to the U.S. Department of
Homeland Security (DHS) for requests
for waivers under section 212(a)(1)(A)(i)
or section 212(a)(1)(A)(iii)(I) or (II), as
indicated in the regulations (8 CFR
212.7 Waiver of certain grounds of
excludability) if: "the alien or the alien's
sponsoring family member shall submit
a statement to the consular or Service
office. The statement must be from a
clinic, hospital, institution, school, or
other specialized facility or specialist in
the United States . . . who will
complete the evaluation and provide an
evaluation report to the Centers for
Disease Control and Prevention."

Waiver requests under section
212(a)(1)(A)(i) are processed on DHS
forms I-601 and I-602. Waiver requests
under section 212(a)(1)(A)(iii)(I) or (II)
are processed under CDC form 4.422-1.
Respondents to this data collection
include U.S. medical facilities and
specialists who complete Part II of CDC
form 4.422-1 for waiver applicants
based on physical or mental disorders
and submit the appropriate evaluation
report. Respondents also include the
applicant or sponsoring family member

who complete Part III of CDC form 4.422–1

CDC requests OMB approval for an estimated 33 annual burden hours.

There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Physician	CDC 4.422–1	200	1	10/60	33
Total					33

Jeffrey M. Zirger,

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30Day–24–23AX]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled “Assessing Knowledge, Attitudes, and Practices (KAPs) of Hispanic/Latina Women of Reproductive Age (WRA) about Folic Acid Fortification and Supplementation” to the Office of Management and Budget (OMB) for review and approval. CDC previously published a “Proposed Data Collection Submitted for Public Comment and Recommendations” notice on November 22, 2022, to obtain comments from the public and affected agencies. CDC received one comment related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information,

including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Assessing Knowledge, Attitudes, and Practices (KAPs) of Hispanic/Latina Women of Reproductive Age (WRA) about Folic Acid Fortification and Supplementation—New—National Center on Birth Defects and Developmental Disabilities (NCBDDD), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Consuming 400 micrograms (mcg) of folic acid daily in the periconceptional period can reduce the risk of having a pregnancy affected by a neural tube defect (NTD), a severe birth defect of the

brain and spine. To increase the amount of folic acid consumed in the U.S. population, the U.S. Food and Drug Administration (FDA) mandated fortification of enriched cereal grain products with folic acid in 1998. Although strides have been made in preventing neural tube defects, ethnic disparities remain. Hispanic women in the U.S. have the highest risk of having a child affected by a NTD, with birth prevalence of approximately seven NTDs per 10,000 live births. In addition, prior studies have found that Hispanic women: (1) have lower levels of folate in their blood compared to non-Hispanic white women; (2) are more likely than non-Hispanic white and non-Hispanic black women to have the MTHFR C677T gene variant; (3) are less likely to know about the benefits of folic acid; and (4) are less likely to get folic acid from fortified foods or take a multivitamin with folic acid in it, particularly those women who primarily speak Spanish, were born outside of the United States, and have lived in the United States for a shorter period of time.

To effectively reach Hispanic women of reproductive age (WRA) and increase their knowledge and intake of folic acid for NTD prevention, a contemporary understanding of cultural factors in the decision-making process and how these women obtain information is needed. Previous research highlighted important nuances in potential cultural beliefs regarding folic acid. A study of Spanish-speaking Hispanic women in the southwest U.S. found no cultural barriers to incorporating folic-acid rich foods into their diets; however, focus groups of Mexican American women did find several cultural barriers. These included: (1) misperceptions of the term folic acid as an illegal substance, as the word “acid” is like LSD; (2) its importance for NTD prevention since their healthcare providers did not talk to them about folic acid; (3) its absence in injectable form at the pharmacy; and (4) mistaken belief that birth defects are not preventable (resulting from an act of

God). Studies have found contradictory findings, suggesting that Mexican American women have increased awareness of the association between folate and birth defects compared to English-speaking women. More research is needed to determine cultural factors in the decision-making process around folic acid intake for Hispanic WRA, though several studies have examined beliefs and best practices for promoting folic acid consumption.

The purpose of this project is to conduct formative research with Hispanic/Latina women of reproductive age to examine folic acid and fortified food awareness, food and supplement use practices, as well as messaging and channels to reach Hispanic/Latina women. The resulting data are expected to be used for developing new messaging and communication products to improve knowledge, awareness, and practices regarding folic acid fortification and supplementation

among Hispanic/Latina women of reproductive age. Additionally, the findings from the project will inform future intervention activities to prevent neural tube defects among Hispanic women of reproductive age.

This information collection will involve focus groups with Hispanic/Latina WRA. CDC requests OMB approval for an estimated 122 annual burden hours. There are no costs to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Hispanic/Latina Women of Reproductive Age (WRA).	Knowledge, Attitudes, and Practices (KAPs) of Hispanic/Latina Women of Reproductive Age: Focus Group Moderator Guide (English/Spanish).	81	1	90/60

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–24–24AL; Docket No. CDC–2023–0089]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Occupational exposures to surgical smoke in veterinary personnel which will characterize occupational exposure to surgical smoke and related respiratory health effects in clinical veterinary settings and provide guidance on

engineering controls to improve air quality in veterinary medicine/animal care personnel's work environment by reducing exposure to surgical smoke.

DATES: CDC must receive written comments on or before January 2, 2024.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2023–0089 by either of the following methods:

- *Federal eRulemaking Portal:* www.regulations.gov. Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road, NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to www.regulations.gov.

Please note: Submit all comments through the Federal eRulemaking portal (www.regulations.gov) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road, NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: omb@cdc.gov.

SUPPLEMENTARY INFORMATION:

Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of

information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected;
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses; and
5. Assess information collection costs.

Proposed Project

Occupational Exposures to Surgical Smoke in Veterinary Personnel—New—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Surgical smoke produced during tissue cutting and cauterizing tissues and blood vessels generates hazardous gaseous compounds and aerosols that are associated with cancer and respiratory irritation; however, no research has characterized surgical smoke generated from animal tissue in clinical veterinary settings. Surgical smoke exposure is an emerging concern in human operating rooms, and several states have either passed or are considering bills requiring surgical smoke evacuation systems in human operating rooms to mitigate this occupational hazard. Surgical suites in

veterinary clinics are often multiple bay suites or have less effective ventilation systems than human operating rooms, potentially leading to higher exposure levels, yet no research has examined barriers and aids to the use of surgical smoke evacuation systems among veterinary medicine/animal care (VM/AC) personnel.

The proposed project will characterize occupational exposure to surgical smoke and related respiratory health effects in clinical veterinary settings. Data will be used to examine: (1) work-related factors that contribute to exposure to surgical smoke in clinical veterinary settings; (2) relationships between surgical smoke exposure in clinical veterinary settings and respiratory health; and (3) barriers and aids to implementing surgical smoke extraction systems that reduce occupational exposures to surgical smoke. Findings from this study will

help to provide guidance on engineering controls to improve air quality in VM/AC personnel's work environment by reducing exposure to surgical smoke.

Three veterinary teaching hospitals and a national network of community veterinary clinics have been recruited to participate in this research.

Participating VM/AC personnel at collaborating field study sites will complete: (1) a baseline questionnaire that collects data on demographics, work history, job tasks, exposures to respiratory hazards (including surgical smoke), use of personal protective equipment, workplace safety climate, and respiratory health and symptoms; and (2) a post-shift questionnaire assessing acute respiratory symptoms and job tasks during the work shift.

CDC requests OMB approval for an estimated 59 annual burden hours. There are no costs to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
VM/AC personnel	Baseline Questionnaire	33	1	28/60	15
VM/AC personnel	Post-shift Questionnaire	33	10	8/60	44
Total					59

Jeffrey M. Zirger,

Lead, Information Collection Review Office, Office of Public Health Ethics and Regulations, Office of Science, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES**Centers for Medicare & Medicaid Services****Privacy Act of 1974; Matching Program**

AGENCY: Center for Consumer Information and Insurance Oversight (CCIIO), Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Notice of a new matching program.

SUMMARY: In accordance with the Privacy Act of 1974, as amended, the Department of Health and Human Services (HHS), Centers for Medicare & Medicaid Services (CMS) is providing notice of the re-establishment of a computer matching program between

CMS and the Office of Personnel Management (OPM), “Verification of Eligibility of Minimum Essential Coverage Under the Patient Protection and Affordable Care Act through an Office of Personnel Management Health Benefit Plan.”

DATES: The deadline for comments on this notice is December 4, 2023. The re-established matching program will commence not sooner than 30 days after publication of this notice, provided no comments are received that warrant a change to this notice. The matching program will be conducted for an initial term of 18 months (from approximately December 8, 2023 to June 7, 2025) and within three months of expiration may be renewed for up to one additional year if the parties make no change to the matching program and certify that the program has been conducted in compliance with the matching agreement.

ADDRESSES: Interested parties may submit comments on this notice to the CMS Privacy Act Officer by mail at: Division of Security, Privacy Policy & Governance, Information Security & Privacy Group, Office of Information Technology, Centers for Medicare &

Medicaid Services, Location: N1–14–56, 7500 Security Blvd., Baltimore, MD 21244–1850 or by email at Barbara.Demopoulos@cms.hhs.gov.

FOR FURTHER INFORMATION CONTACT: If you have questions about the matching program, you may contact Anne Pesto, Senior Advisor, Marketplace Eligibility and Enrollment Group, Center for Consumer Information and Insurance Oversight, Centers for Medicare & Medicaid Services, at 443–955–9966, by email at anne.pesto@cms.hhs.gov, or by mail at 7500 Security Blvd., Baltimore, MD 21244.

SUPPLEMENTARY INFORMATION: The Privacy Act of 1974, as amended (5 U.S.C. 552a) provides certain protections for individuals applying for and receiving federal benefits. The law governs the use of computer matching by federal agencies when records in a system of records (meaning, federal agency records about individuals retrieved by name or other personal identifier) are matched with records of other federal or non-federal agencies. The Privacy Act requires agencies involved in a matching program to:

1. Enter into a written agreement, which must be prepared in accordance

with the Privacy Act, approved by the Data Integrity Board of each source and recipient federal agency, provided to Congress and the Office of Management and Budget (OMB), and made available to the public, as required by 5 U.S.C. 552a(o), (u)(3)(A), and (u)(4).

2. Notify the individuals whose information will be used in the matching program that the information they provide is subject to verification through matching, as required by 5 U.S.C. 552a(o)(1)(D).

3. Verify match findings before suspending, terminating, reducing, or making a final denial of an individual's benefits or payments or taking other adverse action against the individual, as required by 5 U.S.C. 552a(p).

4. Report the matching program to Congress and the OMB, in advance and annually, as required by 5 U.S.C. 552a(o) (2)(A)(i), (r), and (u)(3)(D).

5. Publish advance notice of the matching program in the **Federal Register** as required by 5 U.S.C. 552a(e)(12).

This matching program meets these requirements.

Barbara Demopolus,
*Privacy Act Officer, Division of Security,
Privacy Policy and Governance, Office of
Information Technology, Centers for Medicare
& Medicaid Services.*

Participating Agencies

The Department of Health and Human Services (HHS), Centers for Medicare & Medicaid Services (CMS) is the recipient agency, and the Office of Personnel Management (OPM) is the source agency.

Authority for Conducting the Matching Program

The principal authority for the matching program is 42 U.S.C. 18001, *et seq.*

Purpose(s)

The purpose of the matching program is to provide CMS with OPM data which CMS and state Administering Entities (AEs) need to determine individuals' eligibility for financial assistance in paying for private health insurance coverage, under provisions of the Patient Protection and Affordable Care Act. In this matching program, OPM provides CMS with monthly data identifying each active federal employee's status as enrolled in or eligible for coverage under an OPM Health Benefit Plan, and an annual premium spread index file identifying the lowest premium available to a federal employee in each of 32 premium localities. CMS and AEs use the OPM data to verify whether an individual

who is applying for or is enrolled in private health insurance coverage under a qualified health plan through a federally-facilitated or state-based health insurance exchange is eligible for coverage under an OPM health benefit plan, for the purpose of determining if the individual is eligible for financial assistance (including an advance tax credit and cost sharing reduction, which are types of insurance affordability programs) in paying for the private coverage. OPM health benefit plans provide minimum essential coverage, and eligibility for such plans precludes eligibility for financial assistance in paying for private coverage.

Categories of Individuals

The categories of individuals whose information is involved in the matching program are: (1) active federal employees, and (2) consumers who apply for or are enrolled in a qualified health plan through an exchange established under the Patient Protection and Affordable Care Act and receive determinations of eligibility for insurance affordability programs.

Categories of Records

The categories of records used in the matching program are identity information about the above consumers, which are maintained by CMS, and identity information and minimum essential coverage period records about all active federal employees, and annual premium information, maintained by OPM. The data elements provided to CMS by OPM are as follows:

- Monthly status file:
 - a. Record type;
 - b. Record number;
 - c. Unique person ID;
 - d. Social security number;
 - e. Last name;
 - f. Middle name;
 - g. First name;
 - h. Last name suffix;
 - i. Gender;
 - j. Date of birth; and
 - k. Health plan code.
- Annual Premium Spread Index File:
 - a. State;
 - b. Plan;
 - c. Option;
 - d. Enrollment code;
 - e. Current total bi-weekly premium;
 - f. Future total bi-weekly premium;
 - g. Future government pays bi-weekly premium;
 - h. Future employee pays bi-weekly premium
 - i. Future change in employee payment bi-weekly premium;
 - j. Current total monthly premium;
 - k. Future total monthly premium;
 - l. Future government pays monthly premium;

m. Future employee pays monthly premium; and

n. Future change in employee payment monthly premium.

CMS will not send any data about individual applicants or enrollees to OPM in order to receive this data from OPM.

System(s) of Records

The records used in the matching program are maintained in these systems of records:

A. System of Records Maintained by CMS

CMS Health Insurance Exchanges System (HIX), System No. 09–70–0560, last published in full at 78 FR 63211 (Oct. 23, 2013), and amended at 83 FR 6591 (Feb. 14, 2018).

B. System of Records Maintained by OPM

OPM/GOVT–1 General Personnel Records, last published in full at 77 FR 79694 (Dec. 11, 2012), and amended at 80 FR 74815 (Nov. 30, 2015) and 87 FR 5874 (Feb. 2, 2022). The disclosures of OPM data to CMS are authorized by Routine Use “rr”.

[FR Doc. 2023–24331 Filed 11–2–23; 8:45 am]

BILLING CODE 4120–03–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–10558]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed

information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by January 2, 2024.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to <http://www.regulations.gov>. Follow the instructions for "Comment or Submission" or "More Search Options" to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number: _____, Room C4-26-05, 7500 Security Boulevard, Baltimore, Maryland 21244-1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: <https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing>.

FOR FURTHER INFORMATION CONTACT: William N. Parham at (410) 786-4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS-10558 Machine Readable Data for Provider Network and Prescription Formulary Content for FFM QHPs

Under the PRA (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR

1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. *Type of Information Collection Request:* Extension of currently approved collection; *Title of Information Collection:* Machine Readable Data for Provider Network and Prescription Formulary Content for FFM QHPs; *Use:* Under 45 CFR 156.122(d)(1)(2), 156.230(b), and 156.230(c), as finalized in the rule, the Patient Protection and Affordable Care Act; HHS Notice of Benefit and Payment Parameters for 2018 (CMS-9934-F), established standards for qualified health plan (QHP) issuers for the submission of provider and formulary data in a machine-readable format to the Department of Health and Human Services. (HHS) and for posting the data on issuer websites. These standards provide greater transparency for consumers, including by allowing software developers to access formulary and provider data to create innovative and informative tools. On September 30, 2015, the Office of Management and Budget (OMB) granted approval to the data collection Information Collection for Machine Readable Data for Provider Network and Prescription Formulary Content for FFE QHPs under OMB control number 0938-1284. OMB approval was granted again on November 3, 2017 and March 22, 2021. The Centers for Medicare and Medicaid Services (CMS) is continuing that information collection request (ICR) in connection with these machine-readable standards. This ICR serves as a formal request for the renewal of the data collection clearance. The burden estimate for the ICR included in this package reflects the time and effort for QHP and SADP issuers to update and publish the appropriate data and submit it to CMS. *Form Number:* CMS-10558 (OMB control number: 0938-1284); *Frequency:* Annually; *Affected Public:* Private Sector, State, Business, and Not-for Profits; *Number of Respondents:* 434; *Number of Responses:* 434; *Total Annual Hours:* 39,126. (For questions

regarding this collection, contact Ana Alza at (667) 290-8569, ext. 70008569).

Dated: October 31, 2023.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

[FR Doc. 2023-24371 Filed 11-2-23; 8:45 am]

BILLING CODE 4120-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Community Living

Agency Information Collection Activities; Submission for OMB Review; Public Comment Request; Assessment and Evaluation of ACL's American Indian, Alaska Natives, and Native Hawaiian Programs Older Americans Act Title VI (OMB Control Number 0985-0059)

AGENCY: Administration for Community Living, HHS.

ACTION: Notice.

SUMMARY: The Administration for Community Living is announcing that the proposed collection of information listed above has been submitted to the Office of Management and Budget (OMB) for review and clearance as required under the Paperwork Reduction Act of 1995. This 30-day notice collects comments on the information collection requirements related to the Assessment and Evaluation of ACL's American Indian, Alaska Natives, and Native Hawaiian Programs Older Americans Act Title VI (OMB Control Number 0985-0059).

DATES: Submit written comments on the collection of information by December 4, 2023.

ADDRESSES: Submit written comments and recommendations for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find the information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function. By mail to the Office of Information and Regulatory Affairs, OMB, New Executive Office Bldg., 725 17th St. NW, Rm. 10235, Washington, DC 20503, Attn: OMB Desk Officer for ACL.

FOR FURTHER INFORMATION CONTACT: Amanda Cash at Amanda.Cash@acl.hhs.gov or (202) 795-7369.

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, the Administration for Community Living (ACL) has submitted the following

proposed collection of information to OMB for review and clearance.

The Administration for Community Living (ACL) is requesting approval for data collection associated with the Assessment and Evaluation of ACL's American Indian, Alaska Natives, and Native Hawaiian Programs Older Americans Act Title VI (OMB Control Number 0985–0059). OAA Title VI establishes grants to Native Americans for nutrition services, supportive services, and family caregiver support services.

The purpose of Title VI is “to promote the delivery of supportive services, including nutrition services, to American Indians, Alaskan Natives, and Native Hawaiians that are comparable to services provided under Title III” (42 U.S.C. 3057), which provides nutrition, caregiver and supportive services to the broader U.S. population. Title VI is comprised of three parts; Part A provides nutrition and supportive services to American Indians and Alaska Natives, Part B provides nutrition and supportive services to Native Hawaiians, and Part C provides caregiver services to any programs that have Part A/B.

The previous data collection for this project entailed a series of interviews and focus groups with Title VI program staff, elders, and caregivers. American Indian, Alaska Native, and Native Hawaiian (AI/AN/NH) populations experience significant health and socioeconomic disparities compared to the rest of the U.S. population. The AI/AN population has the highest rate of disabilities and the lowest life expectancy compared to the averages for the overall population (Centers for Disease Control and Prevention [CDC], 2008; Goins, Moss, Buchwald, & Guralnik, 2007). While 18% of the non-Hispanic white population is 65 years or older, just 8% of Native Hawaiians and

10% of the AI/AN population is 65 years or older (AoA, 2015). However, as overall life expectancy increases, the proportion of older AI/AN adults is expected to increase. By 2050, the percentage of non-Hispanic white adults is expected to decrease by 20%, while the population of older minority population adults, including AI/AN/NH, is expected to increase by 110% (AoA, 2015; CDC, 2013). For AI/AN populations, this translates to a 93% increase in the number of older adults. In addition, the population aged 75 and older needing long-term care is expected to double by the year 2030 (AoA, 2015; CDC 2013; Goins et al., 2007).

In fiscal year 2023, ACL awarded 290 Title VI three-year grants to tribes/tribal organizations elders for the provision of nutrition and supportive services, and a portion of awardees also received funds for the Native American Caregiver Support Program. The Assessment and Evaluation of the Title VI Programs will examine the effects of the program on:

1. Older Indians, their families and caregivers
2. Tribal communities
3. Intergenerational connections in tribal communities
4. Management of the Title VI program

Additionally, the assessment will examine how using COVID supplemental funds impacted Title VI services provided to older adults. This work will help ACL better understand and document the impact of these funds, how service provision changed over time, and what gaps existed despite the additional funding.

The Need for Assessment and Evaluation

The Assessment and Evaluation of the Title VI Programs is authorized under Section 206(a, c) of Title II of the OAA, which directs ACL to “. . . measure and evaluate the impact of all programs

authorized by this Act, their effectiveness in achieving stated goals in general, and in relation to their cost, their impact on related programs, their effectiveness in targeting for services under this Act unserved older individuals with greatest economic need (including low-income minority individuals and older individuals residing in rural areas) and unserved older individuals with greatest social need (including low-income minority individuals and older individuals residing in rural areas), and their structure and mechanisms for delivery of services, including, where appropriate, comparisons with appropriate control groups composed of persons who have not participated in such programs.”

Consistent with requirements of the Government Performance Results Modernization Act (GPRMA), ACL's Administration on Aging (AoA) integrates its strategic priorities and plans with performance measurement criteria. The AoA has three major performance measures: improve program efficiency, improve client outcomes, and improve effective targeting of vulnerable elders. Through program assessments, ACL seeks a better understanding of key programs, such as the programs under Title VI of the OAA for AI/AN/NH. Having completed most of the data collection, the Assessment and Evaluation of the Title VI Programs has an interest in adding a data collection activity to do a follow-up interview with grantees after they have completed the current evaluation cycle to understand which components of the technical assistance, they have received have been the most useful for them.

Table 1 provides an overview of the Assessment and Evaluation of the Title VI Program data collection activity.

Data Collection Activities

TABLE 1

Activity	Purpose, respondents, method, and relevant study
Title VI Program Staff Follow-up Interviews.	The Program Staff Follow-up Interviews will assess how the Title VI Programs have been utilizing and implementing the Technical Assistance they have received from the contractor around the practice of evaluation. Data will include how evaluation practice is being implemented and on what occurring basis, as well as perceptions of met and unmet needs around evaluation; and barriers to using evaluation. Up to 2 local staff (e.g., program director and evaluation staff person) will participate in each interview. The interviews will be conducted via telephone in Year 4 with up to 12 evaluation grantees, for a maximum of 24 participants, and will take 60 minutes to complete. <i>See Attachment A (Title VI Program Staff Consent Form and Interview Guide).</i>

Use of Information Collected

ACL's strategic priorities are to empower older people and their families to (1) make informed decisions

about, and easily access, health and long-term care options and (2) enable seniors to remain in their own homes through the provision of home and community-based services.

Central to these priorities is the pursuit of consistent and effective approaches to support older adults in their own homes and communities, and to coordinate the provision of

supportive services to seniors and their caregivers in an integrated system of long-term care. Information gathered through the Assessment and Evaluation of the Title VI Programs will inform ACL and its partners, other Federal agencies and administrators, current grantees, policymakers, and the field about ways to improve service delivery for elders and their caregivers and helping them to remain in their homes for as long as possible. For example,

information gathered through the evaluation will be used to identify gaps and challenges in service delivery, as well as areas of further need.

Without this assessment and evaluation, Federal and local officials will not be able to determine whether the Title VI Programs are having the intended impact on AI/AN/NH elders and whether the grantees are meeting the individual goals of the programs. The new proposed data collection will further allow ACL to understand how

successful the training and technical assistance provided to Title VI evaluation grantees was for their practice of data collection and use.

Comments in Response to the 60-Day Federal Register Notice

A notice published in the **Federal Register 88 FR 56633** on August 18, 2023. There were no public comments received during the 60-day FRN.

Estimated Program Burden:

ESTIMATED PROGRAM BURDEN

Respondent type	Form name	Number of annual respondents	Number of responses per respondent	Average burden (in hours) per response	Annual burden hours
Program director	Program staff follow-up interview guide	12	1	1	12

Dated: October 30, 2023.

Alison Barkoff,

Principal Deputy Administrator for the Administration for Community Living, performing the duties of the Administrator and the Assistant Secretary for Aging.

BILLING CODE 4154-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2023-N-4372]

Enforcement Policy for Clinical Electronic Thermometers; Guidance for Industry and Food and Drug Administration Staff; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA, Agency, or we) is announcing the availability of a final guidance entitled “Enforcement Policy for Clinical Electronic Thermometers.” This guidance applies to clinical electronic thermometers, which are regulated as class II devices. This guidance has been implemented without prior comment, but it remains subject to comment in accordance with the Agency’s good guidance practices.

DATES: The announcement of the guidance is published in the **Federal Register** on November 3, 2023.

ADDRESSES: You may submit either electronic or written comments on Agency guidances at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and

identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA-2023-N-4372 for “Enforcement Policy for Clinical Electronic Thermometers.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80

FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

You may submit comments on any guidance at any time (see § 10.115(g)(5) (21 CFR 10.115(g)(5))).

An electronic copy of the guidance document is available for download from the internet. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidance. Submit written requests for a single hard copy of the guidance document entitled "Enforcement Policy for Clinical Electronic Thermometers" to the Office of Policy, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your request.

FOR FURTHER INFORMATION CONTACT: David Wolloscheck, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 2416, Silver Spring, MD 20993-0002, 301-796-1480.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a final guidance entitled "Enforcement Policy for Clinical Electronic Thermometers." During the Coronavirus Disease 2019 (COVID-19) public health emergency (PHE), FDA issued certain enforcement policies for non-invasive remote monitoring devices and clinical electronic thermometers. The policies regarding the modification of previously FDA-cleared clinical electronic thermometers within product code FLL were originally included in FDA's guidance "Enforcement Policy for Non-Invasive Remote Monitoring Devices Used to Support Patient Monitoring During the Coronavirus Disease 2019 (COVID-19) Public Health Emergency" first issued in March 2020, and subsequently revised in June 2020, October 2020, and March 2023. The policies regarding the distribution and use of clinical electronic thermometers not previously cleared under section

510(k) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 360(k)) were outlined in FDA's guidance "Enforcement Policy for Clinical Electronic Thermometers During the Coronavirus Disease 2019 (COVID-19) Public Health Emergency" issued in April 2020 and revised in March 2023.

At the time, FDA stated that the policies described in these guidances were intended to remain in effect only for the duration of the PHE related to COVID-19 declared by the Secretary of Health and Human Services in accordance with section 319 of the Public Health Service Act (42 U.S.C. 247d). On March 13, 2023, FDA announced in the **Federal Register** notice "Guidance Documents Related to Coronavirus Disease 2019 (COVID-19)" (88 FR 15417) that these guidance documents were being revised to continue in effect for 180 days after the expiration of the COVID-19 PHE declaration, and that, during that time, FDA would further revise these guidances, among others. Consistent with what we said in the **Federal Register** notice of March 13, 2023, FDA has revised and consolidated the policies that apply to clinical electronic thermometers in this guidance. Elsewhere in this issue of the **Federal Register**, FDA is proposing to exempt certain clinical electronic thermometers—specifically clinical thermometers without telethermography or continuous temperature measurement functions—from premarket notification requirements under section 510(m) of the FD&C Act (see the **Federal Register** document "Medical Devices; Exemptions from Premarket Notification: Class II Devices; Clinical Electronic Thermometers; Request for Comments"). FDA intends to withdraw this guidance after any final exemption document has been published in the **Federal Register**.

The policies outlined in this guidance are organized by clinical thermometer type. The guidance describes enforcement policies that are intended to help foster compliance with certain applicable legal requirements for these devices.

The enforcement policies in this guidance apply to clinical electronic thermometers, which are regulated as class II devices under 21 CFR 880.2910, product code FLL. These devices include both contact and non-contact clinical electronic thermometers. This guidance supersedes "Enforcement Policy for Clinical Electronic Thermometers During the Coronavirus Disease 2019 (COVID-19) Public Health Emergency" issued in April 2020 and updated in March 2023.

This guidance is being implemented without prior public comment because FDA has determined that prior public participation for this guidance is not feasible or appropriate (see section 701(h)(1)(C) of the FD&C Act (21 U.S.C. 371(h)(1)(C)) and § 10.115(g)(2)). FDA has determined that this guidance document presents a less burdensome policy that is consistent with public health. Although this policy is being implemented immediately without prior comment, it remains subject to comment in accordance with FDA's good guidance practices regulation (§ 10.115). FDA will consider all comments received and revise the guidance document as appropriate.

This guidance is being issued consistent with FDA's good guidance practices regulation (§ 10.115). The guidance represents the current thinking of FDA on "Enforcement Policy for Clinical Electronic Thermometers." It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Electronic Access

Persons interested in obtaining a copy of the guidance may do so by downloading an electronic copy from the internet. A search capability for all Center for Devices and Radiological Health guidance documents is available at <https://www.fda.gov/medical-devices/device-advice-comprehensive-regulatory-assistance/guidance-documents-medical-devices-and-radiation-emitting-products>. This guidance document is also available at <https://www.regulations.gov> or <https://www.fda.gov/regulatory-information/search-fda-guidance-documents>. Persons unable to download an electronic copy of "Enforcement Policy for Clinical Electronic Thermometers" may send an email request to CDRH-Guidance@fda.hhs.gov to receive an electronic copy of the document. Please use the document number GUI00020021 and complete title to identify the guidance you are requesting.

III. Paperwork Reduction Act of 1995

While this guidance contains no new collection of information, it does refer to previously approved FDA collections of information. The previously approved collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3521). The collections of information in the following table have been approved by OMB:

21 CFR part; guidance; or FDA form	Topic	OMB control No.
807, subpart E "Requests for Feedback and Meetings for Medical Device Submissions: The Q-Submission Program".	Premarket notification Q-Submissions and Early Payor Feedback Request Programs for Medical Devices.	0910-0120 0910-0756
800, 801, 809, and 830	Medical Device Labeling Requirements; Unique Device Identification.	0910-0485
806	Medical Devices; Reports of Corrections and Removals	0910-0359
807, subparts A through D	Medical Device Registration and Listing	0910-0625
820	Current Good Manufacturing Practice, Quality Systems	0910-0073

Dated: October 31, 2023.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2023-N-4372]

Medical Devices; Exemptions From Premarket Notification: Class II Devices; Clinical Electronic Thermometers; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; request for comments.

SUMMARY: The Food and Drug Administration (FDA or the Agency) has identified certain class II clinical electronic thermometers that, when finalized, will be exempt from premarket notification requirements, subject to certain limitations. FDA is publishing this notice of that determination and requesting public comment in accordance with the procedures established by the 21st Century Cures Act. FDA will review any comments submitted within the 60-day comment period and will consider whether any modifications should be made to the exemption for certain clinical electronic thermometers prior to publication of its final determination in the **Federal Register**.

DATES: Either electronic or written comments on the notice must be submitted by January 2, 2024.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 2, 2024. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2023-N-4372 for "Medical Devices; Exemptions from Premarket Notification: Class II Devices; Clinical Electronic Thermometers; Request for Comments." Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket

and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

FOR FURTHER INFORMATION CONTACT: Madhusoodana Nambiar, Center for Devices and Radiological Health, Food

and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5519, Silver Spring, MD 20993, 301–796–5837, Madhusoodana.Nambiar@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Under section 513 of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 360c), FDA must classify devices into one of three regulatory classes: class I, class II, or class III. FDA classification of a device is determined by the amount of regulation necessary to provide a reasonable assurance of safety and effectiveness. Under the Medical Device Amendments of 1976 (1976 amendments) (Pub. L. 94–295), and the amendments of the Safe Medical Devices Act of 1990 (Pub. L. 101–629), devices are to be classified into class I (general controls) if there is information showing that the general controls of the FD&C Act are sufficient to assure safety and effectiveness; into class II (special controls), if general controls, by themselves, are insufficient to provide reasonable assurance of safety and effectiveness, but there is sufficient information to establish special controls to provide such assurance; and into class III (premarket approval), if there is insufficient information to support classifying a device into class I or class II and the device is a life sustaining or life supporting device or is for a use which is of substantial importance in preventing impairment of human health or presents a potential unreasonable risk of illness or injury.

Most generic types of devices that were on the market before the date of the 1976 amendments (May 28, 1976) (generally referred to as preamendments devices) have been classified by FDA under the procedures set forth in section 513(c) and (d) of the FD&C Act through the issuance of classification regulations into one of these three regulatory classes. Devices introduced into interstate commerce for the first time on or after May 28, 1976 (generally referred to as postamendments devices) are classified through the premarket notification process under section 510(k) of the FD&C Act (21 U.S.C. 360(k)). Section 510(k) of the FD&C Act and the implementing regulations, part 807 of Title 21 of the Code of Federal Regulations (CFR), require persons who intend to market a new device to submit a premarket notification (510(k)) containing information that allows FDA to determine whether the new device is “substantially equivalent” within the meaning of section 513(i) of the FD&C

Act to a legally marketed device that does not require premarket approval.

The 21st Century Cures Act (Cures Act) (Pub. L. 114–255) was signed into law on December 13, 2016. Section 3054 of the Cures Act amended section 510(m) of the FD&C Act. As amended, section 510(m)(1)(A) of the FD&C Act requires FDA to publish in the **Federal Register** a notice containing a list of each type of class II device that FDA determines no longer requires a report under section 510(k) of the FD&C Act to provide reasonable assurance of safety and effectiveness. FDA is required to publish this notice within 90 days of the date of enactment of the Cures Act and at least once every 5 years thereafter, as FDA determines appropriate. Additionally, FDA must provide at least a 60-day comment period for any such notice published under section 510(m)(1)(A) of the FD&C Act.

FDA published the initial notice within the 90-day time frame in the **Federal Register** of March 14, 2017 (82 FR 13609) and issued its final determination of exemption of the devices in such notice in accordance with section 510(m)(1)(B) of the FD&C Act in the **Federal Register** of July 11, 2017 (82 FR 31976). FDA is publishing this notice and requesting public comment in accordance with section 510(m)(1)(A) of the FD&C Act. In a future final action, and after considering comments, FDA intends to amend the codified language in the clinical electronic thermometer regulation to reflect the final determination with respect to exemption.

II. Factors FDA May Consider for Exemption

There are a number of factors FDA may consider to determine whether a 510(k) is necessary to provide reasonable assurance of the safety and effectiveness of a class II device. These factors are discussed in the January 21, 1998, **Federal Register** notice (63 FR 3142) and subsequently in the guidance the Agency issued on February 19, 1998, entitled “Procedures for Class II Device Exemptions from Premarket Notification, Guidance for Industry and CDRH Staff” (“Class II 510(k) Exemption Guidance”) (Ref. 1). Accordingly, FDA generally considers the following factors to determine whether premarket notification is necessary for class II devices: (1) the device does not have a significant history of false or misleading claims or of risks associated with inherent characteristics of the device; (2) characteristics of the device necessary for its safe and effective performance are well established; (3) changes in the

device that could affect safety and effectiveness will either (a) be readily detectable by users by visual examination or other means such as routine testing, before causing harm, or (b) not materially increase the risk of injury, incorrect diagnosis, or ineffective treatment; and (4) any changes to the device would not be likely to result in a change in the device’s classification. FDA may also consider that, even when exempting devices, these devices would still be subject to the limitations on exemptions.

III. Limitations on Exemptions

FDA has determined that premarket notification is not necessary to provide a reasonable assurance of safety and effectiveness for certain class II clinical electronic thermometers subject to the limitations outlined in table 1. This determination is based, in part, on the Agency’s knowledge of the device, including past experience and relevant reports or studies on device performance (as appropriate), the applicability of general and special controls, and the Agency’s ability to limit an exemption.

A. General Limitations of Exemptions

FDA’s proposal to grant an exemption from premarket notification applies only to those devices that have existing or reasonably foreseeable characteristics of commercially distributed devices within that generic type. After comment and issuance of a notice announcing FDA’s final determination, a manufacturer of a clinical electronic thermometer would still be required to submit a premarket notification to FDA before introducing a device or delivering it for introduction into commercial distribution when the device meets any of the conditions described in § 880.9 (21 CFR 880.9).

B. Partial Limitations of Exemptions

In addition to the general limitations, FDA may also partially limit an exemption from premarket notification requirements to specific devices within a listed device type when the initial Agency assessment determines that the factors laid out in the Class II 510(k) Exemption Guidance (Ref. 1) do not weigh in favor of exemption for all devices within a generic type of device. In such situations where a partial limitation of the exemption has been identified, FDA has determined that premarket notification is necessary to provide a reasonable assurance of safety and effectiveness for devices that fall outside of the limitations. In table 1, for example, FDA is listing the proposed exemption of clinical electronic thermometers but limits the exemption

to devices that are appropriately tested in accordance with specific FDA-recognized standards (as outlined in the limitations) and excludes clinical electronic thermometers with telethermographic and continuous temperature measurement functions.

Most contact and non-contact clinical electronic thermometers that are appropriately tested in accordance with specific FDA-recognized standards are well-understood devices; however, FDA

considers premarket notification requirements for clinical thermometers with telethermographic and continuous temperature measurement functions to be necessary to provide a reasonable assurance of safety and effectiveness because such thermometers include newer technology that may require additional testing beyond that specified in FDA-recognized standards and have additional biocompatibility, interoperability, electromagnetic

compatibility, electrical safety, and sterility considerations compared to clinical electronic thermometers without these types of functions.

IV. Class II Device

FDA is identifying the following class II device that, if finalized, would no longer require premarket notification under section 510(k) of the FD&C Act, subject to the general limitations to the exemptions found in § 880.9:

TABLE 1—CLASS II DEVICES

21 CFR section	Device description	Product code	Partial exemption limitation
880.2910	Clinical electronic thermometer	FLL	Exemption is limited to the following: 1. Device is not a clinical thermometer with telethermography functions; 2. Device is not a clinical thermometer with continuous temperature measurement functions; and 3. Appropriate analysis and testing (such as outlined in the currently FDA-recognized editions of <i>ISO 80601–2–56 Medical electrical equipment—Part 2–56: Particular requirements for basic safety and essential performance of clinical thermometers for body temperature measurement</i> , or <i>ASTM E1965 Standard Specification for Infrared Thermometers for Intermittent Determination of Patient Temperature</i> , or <i>ASTM E1112 Standard Specification for Electronic Thermometer for Intermittent Determination of Patient Temperature</i> , or <i>ASTM E1104 Standard Specification for Clinical Thermometer Probe Covers and Sheaths</i>) must validate specifications and performance of the device.

FDA will assign new product codes to clinical electronic thermometers with telethermography functions and those with continuous temperature measurement functions in order to ensure that these devices can be identified distinctly from devices that will be exempt subject to the partial limitations under the existing product code (*i.e.*, exempt and non-exempt devices within a device type will have different product codes).

V. Reference

The following reference is on display in the Dockets Management Staff (see **ADDRESSES**) and is available for viewing by interested persons between 9 a.m. and 4 p.m., Monday through Friday; it is also available electronically at <https://www.regulations.gov>. FDA has verified the website address, as of the date this document publishes in the **Federal Register**, but websites are subject to change over time.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request; Standardized Work Plan Form for Use With Applications to the Bureau of Health Workforce Research and Training Grants and Cooperative Agreements OMB No. 0906–0049—Extension

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, HRSA submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period. OMB may act on HRSA’s ICR only after the 30-day comment period for this notice has closed.

DATES: Comments on this ICR should be received no later than December 4, 2023.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email Joella Roland, the HRSA Information Collection Clearance Officer, at paperwork@hrsa.gov or call (301) 443–3983.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the ICR title for reference.

Information Collection Request Title: Standardized Work Plan (SWP) Form for Use with Applications to the Bureau of Health Workforce (BHW) Research and Training Grants and Cooperative Agreements OMB No. 0906–0049—Extension

Abstract: HRSA’s BHW requires applicants for training and research grants and cooperative agreements to submit work plans via the SWP form.

Information in the SWP describes the timeframes and progress required during the grant period of performance to address each of the needs detailed in the Purpose and Need section of the application, as required in the Notice of Funding Opportunity announcement. Applicants use the SWP form when they submit their proposals, and award recipients and Project Officers use the SWP information to assist in monitoring progress once HRSA makes the awards. After awards are made, recipients complete a Quarterly Progress Update (QPU) to provide information to BHW on a quarterly basis on each activity listed in the SWP.

A 60-day notice published in the **Federal Register** on August 25, 2023, vol. 88, No. 164; pp. 58284–85. There were no public comments.

Need and Proposed Use of the Information: Information collected by the SWP form and QPUs standardizes and streamlines the data used by HRSA in reviewing applications and monitoring awardees. The form asks applicants to provide a description of the activities or steps the applicant will take to achieve each of the objectives proposed during the entire period of performance. The current standardized format and data submission by

applicants increases efficiency in reviewing, awarding, and monitoring each project.

The QPU is completed via HRSA's Electronic Handbook system and prompts recipients to report on progress of activities that were submitted using the SWP in the original application. The QPU automatically populates activities from the recipient's SWP form on a quarterly basis. For each activity listed in the submitted SWP for any particular quarter within the project period, recipients select and submit a single selection response for each activity status from a pull-down menu with five options: Activity is on Schedule, Activity is Complete, Timing is off track, Activity will be missed if action is not taken, and Activity cannot be achieved. Information provided is utilized by the program staff to regularly assess overall progress of program requirements and analyze data in order to monitor award recipient compliance and track progress against proposed targets and goals. Information gathered allows an improved and more efficient method for identifying whether projects' goals are being advanced or achieved, as set forth in 45 CFR 75.342. Program staff also use information provided over the period of performance to see emerging

trends and to assess whether an award recipient requires technical assistance to address challenges that the award recipient may be experiencing with the implementation of the project. Seeking OMB extension approval comports with the regulatory requirement imposed by 45 CFR 75.206(a), Paperwork clearances.

Likely Respondents: Respondents are applicants for, and recipients of, BHW's research and training grants and cooperative agreements.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total annual burden hours
Standardized Work Plan (SWP)	1,000	1	1,000	1.00	1,000
Quarterly Progress Update (QPU) Form	1,000	4	4,000	.10	400
Total	¹ 1,000		5,000		1,400

¹ The 1,000 SWP respondents reflects the number of new grant applications submitted annually. The 1,000 QPU respondents reflects the current volume of funded, active grants.

Maria G. Button,

Director, Executive Secretariat.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Center for Scientific Review; Notice of Closed Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5 U.S.C.,

as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Advancing Therapeutics II.

Date: November 14, 2023.

Time: 11:00 a.m. to 1:30 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Lystranne Alysia Maynard Smith, Ph.D., Scientific Review Officer, Center for Scientific Review, National

Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, 301–402–4809, lystranne.maynard-smith@nih.gov.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

(Catalogue of Federal Domestic Assistance Program Nos. 93.306, Comparative Medicine; 93.333, Clinical Research, 93.306, 93.333, 93.337, 93.393–93.396, 93.837–93.844, 93.846–93.878, 93.892, 93.893, National Institutes of Health, HHS)

Dated: October 30, 2023.

Miguelina Perez,

Program Analyst, Office of Federal Advisory Committee Policy.

BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES**National Institutes of Health****Proposed Collection; 60-Day Comment Request; Office of Programs To Enhance Neuroscience (OPEN) Workforce Tracker (National Institute of Neurological Disorders and Stroke)**

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995, to provide opportunity for public comment on proposed data collection projects, the National Institute of Neurological Disorders and Stroke (NINDS), will publish periodic summaries of proposed projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

DATES: Comments regarding this information collection are best assured of having their full effect if received within 60 days of the date of this publication.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and instruments, contact: Dr. Cara Long, Health Science Policy Analyst, Office of Science Policy and Planning, NINDS, NIH, 31 Center Drive, Building 31, Room 8A52, Bethesda, MD 20892, or call non-toll-free number (301) 496-9271, or Email your request, including your address to: cara.long@nih.gov. Formal requests for additional plans and instruments must be requested in writing.

SUPPLEMENTARY INFORMATION: Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires: written comments and/or suggestions from the public and affected agencies are invited to address one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated,

electronic, mechanical, or other technological collection techniques or other forms of information technology.

Proposed Collection Title: The Office of Programs to Enhance Neuroscience (OPEN) Workforce Tracker, 0925-New, National Institute of Neurological Disorders and Stroke (NINDS), National Institutes of Health (NIH).

Need and Use of Information Collection: The OPEN Workforce Tracker database will gather and store information on neuroscience research trainees who have received NINDS support. The NINDS OPEN will use this information to analyze diversity-targeted career development program outcomes, to make improvements to these programs, and to build and foster a user-friendly community that will allow NINDS to communicate information and opportunities to current and former awardees, including those from groups that may be underrepresented and underserved within federal programs and awards. The OPEN Workforce Tracker will help NINDS collect structured information that is specific to the requirements of NINDS programs and that reflects outcome metrics used to assess program effectiveness. This information includes career stage, position, publications, degrees, and information related to NIH funding and external funding received, as well as protected class identifiers (race and ethnicity, sexual identification, gender, and disability) important for understanding program participation and outcomes across diverse groups.

The tracker follows minimization principles: it only collects relevant and necessary information to accomplish the purposes of program evaluation and communication, and it will interface with and pull in relevant information from existing NIH database systems database systems to minimize reporting burden. The database grants NINDS awardees the right to access their data held by NINDS and the ability to copy and correct any information errors. The information collection is consistent with NINDS's mission and mandate to conduct and support training in neuroscience (Public Health Service Act, 42 U.S.C. 285(j)). Also, this database aligns with the NIH-wide strategic plan to advance diversity, equity, inclusion, and accessibility (DEIA) through research and support analyses to identify and remove potential barriers to the implementation and expansion of promising and effective DEIA practices, policies, and procedures (Objective 3).

OMB approval is requested for 3 years. There are no costs to respondents

other than their time. The total estimated annualized burden hours are 167.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total annual burden hour
Individuals ("trainees")	500	1	20/60	167
Total		500		167

Dated: October 31, 2023.

Paul A. Scott,

Project Clearance Liaison, National Institute of Neurological Disorders and Stroke, National Institutes of Health.

BILLING CODE 4140-01-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA-2023-0002; Internal Agency Docket No. FEMA-B-2377]

Proposed Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: Comments are to be submitted on or before February 1, 2024.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for

each community are available for inspection at both the online location <https://hazards.fema.gov/femaportal/prelimdownload> and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at <https://msc.fema.gov> for comparison.

You may submit comments, identified by Docket No. FEMA-B-2377, to Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacibit@fema.dhs.gov.

FOR FURTHER INFORMATION CONTACT: Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacibit@fema.dhs.gov; or visit the FEMA Mapping and Insurance eXchange (FMIX) online at https://www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP.

The communities affected by the flood hazard determinations are

provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at https://www.floodsrp.org/pdfs/srp_overview.pdf.

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location <https://hazards.fema.gov/femaportal/prelimdownload> and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at <https://msc.fema.gov> for comparison.

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA-2023-0002; Internal Agency Docket No. FEMA-B-2383]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice.

SUMMARY: This notice lists communities where the addition or modification of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or the regulatory floodway (hereinafter referred to as flood hazard determinations), as shown on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports, prepared by the Federal Emergency

Management Agency (FEMA) for each community, is appropriate because of new scientific or technical data. The FIRM, and where applicable, portions of the FIS report, have been revised to reflect these flood hazard determinations through issuance of a Letter of Map Revision (LOMR), in accordance with Federal Regulations. The currently effective community number is shown in the table below and must be used for all new policies and renewals.

DATES: These flood hazard determinations will be finalized on the dates listed in the table below and revise the FIRM panels and FIS report in effect prior to this determination for the listed communities.

From the date of the second publication of notification of these changes in a newspaper of local circulation, any person has 90 days in which to request through the community that the Deputy Associate Administrator for Insurance and Mitigation reconsider the changes. The flood hazard determination information may be changed during the 90-day period.

ADDRESSES: The affected communities are listed in the table below. Revised flood hazard information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at <https://msc.fema.gov> for comparison.

Submit comments and/or appeals to the Chief Executive Officer of the community as listed in the table below.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacbibit@fema.dhs.gov; or visit the FEMA Mapping and Insurance eXchange (FMIX) online at https://www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: The specific flood hazard determinations are not described for each community in this notice. However, the online

location and local community map repository address where the flood hazard determination information is available for inspection is provided.

Any request for reconsideration of flood hazard determinations must be submitted to the Chief Executive Officer of the community as listed in the table below.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65.

The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in

effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. The flood hazard determinations are in accordance with 44 CFR 65.4.

The affected communities are listed in the following table. Flood hazard determination information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at <https://msc.fema.gov> for comparison.

[FR Doc. 2023-24334 Filed 11-2-23; 8:45 am]

BILLING CODE 9119-12-P

DEPARTMENT OF HOMELAND SECURITY**Federal Emergency Management Agency**

[Docket ID FEMA-2023-0002; Internal Agency Docket No. FEMA-B-2381]

Proposed Flood Hazard Determinations**AGENCY:** Federal Emergency Management Agency, Department of Homeland Security.**ACTION:** Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: Comments are to be submitted on or before February 1, 2024.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for inspection at both the online location <https://hazards.fema.gov/femaportal/prelimdownload> and the respective

Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at <https://msc.fema.gov> for comparison.

You may submit comments, identified by Docket No. FEMA-B-2381, to Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacibit@fema.dhs.gov.

FOR FURTHER INFORMATION CONTACT: Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacibit@fema.dhs.gov; or visit the FEMA Mapping and Insurance eXchange (FMIX) online at https://www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the

revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at https://www.floodsrp.org/pdfs/srp_overview.pdf.

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location <https://hazards.fema.gov/femaportal/prelimdownload> and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at <https://msc.fema.gov> for comparison. BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY**Federal Emergency Management Agency****[Docket ID FEMA–2023–0002; Internal Agency Docket No. FEMA–B–2382]****Changes in Flood Hazard Determinations****AGENCY:** Federal Emergency Management Agency, Department of Homeland Security.**ACTION:** Notice.

SUMMARY: This notice lists communities where the addition or modification of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or the regulatory floodway (hereinafter referred to as flood hazard determinations), as shown on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports, prepared by the Federal Emergency Management Agency (FEMA) for each community, is appropriate because of new scientific or technical data. The FIRM, and where applicable, portions of the FIS report, have been revised to reflect these flood hazard determinations through issuance of a Letter of Map Revision (LOMR), in accordance with Federal Regulations. The currently effective community number is shown in the table below and must be used for all new policies and renewals.

DATES: These flood hazard determinations will be finalized on the dates listed in the table below and revise the FIRM panels and FIS report in effect prior to this determination for the listed communities.

From the date of the second publication of notification of these changes in a newspaper of local circulation, any person has 90 days in which to request through the community that the Deputy Associate Administrator for Insurance and Mitigation reconsider the changes. The flood hazard determination information may be changed during the 90-day period.

ADDRESSES: The affected communities are listed in the table below. Revised flood hazard information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at <https://msc.fema.gov> for comparison.

Submit comments and/or appeals to the Chief Executive Officer of the community as listed in the table below.

FOR FURTHER INFORMATION CONTACT: Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646–7659, or (email) patrick.sacibit@fema.dhs.gov; or visit the FEMA Mapping and Insurance eXchange (FMIX) online at https://www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: The specific flood hazard determinations are not described for each community in this notice. However, the online location and local community map repository address where the flood hazard determination information is available for inspection is provided.

Any request for reconsideration of flood hazard determinations must be submitted to the Chief Executive Officer

of the community as listed in the table below.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65.

The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. The flood hazard determinations are in accordance with 44 CFR 65.4.

The affected communities are listed in the following table. Flood hazard determination information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at <https://msc.fema.gov> for comparison.

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY**Federal Emergency Management Agency**

[Docket ID FEMA-2023-0002]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice.

SUMMARY: New or modified Base (1-percent annual chance) Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, and/or regulatory floodways (hereinafter referred to as flood hazard determinations) as shown on the indicated Letter of Map Revision (LOMR) for each of the communities listed in the table below are finalized. Each LOMR revises the Flood Insurance Rate Maps (FIRMs), and in some cases the Flood Insurance Study (FIS) reports, currently in effect for the listed communities.

DATES: Each LOMR was finalized as in the table below.

ADDRESSES: Each LOMR is available for inspection at both the respective Community Map Repository address

listed in the table below and online through the FEMA Map Service Center at <https://msc.fema.gov>.

FOR FURTHER INFORMATION CONTACT: Rick Sacibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacibit@fema.dhs.gov; or visit the FEMA Mapping and Insurance eXchange (FMIX) online at https://www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final flood hazard determinations as shown in the LOMRs for each community listed in the table below. Notice of these modified flood hazard determinations has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Insurance and Mitigation has resolved any appeals resulting from this notification.

The modified flood hazard determinations are made pursuant to section 206 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65. The currently effective community number is shown and must be used for all new policies and renewals.

The new or modified flood hazard information is the basis for the floodplain management measures that

the community is required either to adopt or to show evidence of being already in effect in order to remain qualified for participation in the National Flood Insurance Program (NFIP).

This new or modified flood hazard information, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities.

This new or modified flood hazard determinations are used to meet the floodplain management requirements of the NFIP. The changes in flood hazard determinations are in accordance with 44 CFR 65.4.

Interested lessees and owners of real property are encouraged to review the final flood hazard information available at the address cited below for each community or online through the FEMA Map Service Center at <https://msc.fema.gov>.

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY**Federal Emergency Management Agency****[Docket ID FEMA-2023-0002]****Final Flood Hazard Determinations**

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice.

SUMMARY: Flood hazard determinations, which may include additions or modifications of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or regulatory floodways on the Flood Insurance Rate Maps (FIRMs) and where applicable, in the supporting

Flood Insurance Study (FIS) reports have been made final for the communities listed in the table below. The FIRM and FIS report are the basis of the floodplain management measures that a community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the Federal Emergency Management Agency's (FEMA's) National Flood Insurance Program (NFIP).

DATES: The date of March 13, 2024 has been established for the FIRM and, where applicable, the supporting FIS report showing the new or modified flood hazard information for each community.

ADDRESSES: The FIRM, and if applicable, the FIS report containing the final flood hazard information for each community is available for inspection at the respective Community Map Repository address listed in the tables

below and will be available online through the FEMA Map Service Center at <https://msc.fema.gov> by the date indicated above.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacbibit@fema.dhs.gov; or visit the FEMA Mapping and Insurance eXchange (FMIX) online at https://www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the new or modified flood hazard information for each community listed. Notification of these changes has been published in newspapers of local circulation and 90 days have elapsed since that

publication. The Deputy Associate Administrator for Insurance and Mitigation has resolved any appeals resulting from this notification.

This final notice is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone

areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the new or revised FIRM and FIS report available at the address cited below for each community or online through the FEMA Map Service Center at <https://msc.fema.gov>.

The flood hazard determinations are made final in the watersheds and/or communities listed in the table below.

BILLING CODE 9110–12–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7071–N–25]

60-Day Notice of Proposed Information Collection: Green and Resilient Retrofit Program (GRRP) Supporting Documents and Processing Requirements; OMB Control No.: 2502–NEW

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* January 2, 2024.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Written comments and recommendations for the proposed information collection can be submitted within 60 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting, “Currently under 60-day Review—Open for Public Comments” or by using the search function. Interested persons are also invited to submit comments regarding this proposal by name and/or OMB Control Number and can be sent to: Anna Guido, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Room 8210, Washington, DC 20410–5000 or email at PaperworkReductionActOffice@hud.gov.

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Colette.Pollard@hud.gov or telephone

202–402–3400. This is not a toll-free number. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>. Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Green and Resilient Retrofit Program (GRRP) Supporting Documentation.

OMB Approval Number: Pending.

OMB Expiration Date: TBD

Type of Request: New collection.

Form Numbers: TBD. While numbers have not yet been assigned, the covered forms include Transaction Plan Templates, Commitment Templates, Escrow Deposit Agreement template, Use Agreement, Surplus Cash loan agreement, Grant Agreement, Surplus Cash Loan Note, Amortizing Loan Note, Surplus Cash Loan Mortgage, Amortizing Loan Mortgage, Addendum to Assistance Contract template including efficiency add-on, Resilience Survey and Completion Certification.

Description of the need for the information and proposed use: The Green and Resilient Retrofit Program (“GRRP”) is funded through Title III of the Inflation Reduction Act of 2022, H.R. 5376 (IRA), in section 30002 titled “Improving Energy Efficiency or Water Efficiency or Climate Resilience of Affordable Housing” (the “IRA”), authorizing HUD to make loans, grants to improve energy or water efficiency; enhance indoor air quality or sustainability; implement the use of zero-emission electricity generation, low-emission building materials or processes, energy storage, or building electrification strategies; or address climate resilience of eligible HUD-assisted multifamily properties. The program leverages significant technological advancements in utility efficiency and adds a focus on preparing for climate hazards—both reducing

residents’ and properties’ exposure to hazards and protecting life, livability, and property when disaster strikes. With its dual focus, GRRP is the first program to consider, at the national scale, how best to approach both green and energy efficiency upgrades simultaneously with investment in climate resilience strategies in multifamily housing. HUD is taking a multi-faceted approach to deploy these funds multiple funding rounds and for properties at different development stages.

Funding under this program will be made through multiple cohorts under one or multiple Notices of Funding Opportunity (NOFOs) that will detail the application process for eligible applicants. This collection is necessary in order to receive applications requesting funding under this program and to complete processing requirements for multifamily owners selected under one of the GRRP cohorts (Elements, Leading Edge & Comprehensive). Documents will include information an owner may need to collect, maintain, or submit to ensure GRRP programmatic and statutory compliance with eligibility requirements and documentation required for HUD approval of any legal and financial obligations including:

- Award eligibility requirements as described in the GRRP Notices.
- Information needed to determine compliance with program requirements.
- Information the Department may require in order to exercise discretionary judgment authorized under the GRRP Notice.
- Demonstration of transaction closing preparedness, including, as applicable:
- Documentation required for HUD approval for any financial information relative to GRRP grants and loans.
- Maintenance of other information that could be requested such as utility and energy consumption and efficiency, and other viable green and retrofitting components.

Respondents: HUD-assisted multifamily owners.

Estimated Number of Respondents: 583.

Estimated Number of Responses: 583.
Frequency of Response: Once per application and awardee package.

Average Hours per Response: 34.5 hours.

Total Estimated Burden: 8,952.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. chapter 35.

Jeffrey D. Little,

General Deputy Assistant Secretary, Office of Housing.

[FR Doc. 2023–24319 Filed 11–2–23; 8:45 am]

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–R7–SM–2023–N084;
FXFR1335070640–234–FF07J00000; OMB
Control Number 1018–0075]

Agency Information Collection Activities; Submission to the Office of Management and Budget; Federal Subsistence Regulations and Associated Forms

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we, the U.S. Fish and Wildlife Service (Service), are proposing to renew a currently approved information collection, without change.

DATES: Interested persons are invited to submit comments on or before December 4, 2023.

ADDRESSES: Written comments and recommendations for the proposed information collection should be submitted within 30 days of publication of this notice at <https://www.reginfo.gov/public/do/PRAMain>. Find this particular information collection by selecting “Currently under Review—Open for Public Comments” or by using the search function. Please provide a copy of your comments to the Service Information Collection Clearance Officer, U.S. Fish and Wildlife Service, MS: PRB (JAO/3W), 5275 Leesburg Pike, Falls Church, VA 22041–3803 (mail); or by email to Info_Coll@fws.gov. Please reference “1018–0075” in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT:

Madonna L. Baucum, Service Information Collection Clearance Officer, by email at Info_Coll@fws.gov, or by telephone at (703) 358–2503. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act (PRA; 44 U.S.C. 3501 *et seq.*) and its implementing regulations in the Code of Federal Regulations (CFR) at 5 CFR 1320, all information collections require approval under the PRA. We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

On February 27, 2023, we published in the **Federal Register** (88 FR 12285) a proposed rule (RIN 1018–BG72) containing a notice of our intent to request that OMB approve the existing and new information collections contained in that rulemaking. We solicited comments for 60 days, ending on April 28, 2023. We did not receive any comments addressing the information collection requirements contained in that proposed rule. The Service plans to publish the associated final rule, which will request OMB approval of the new information collections, in the spring of 2024. However, due to this collection expiring before the anticipated publication of that final rule, we are now requesting OMB approve an extension, without change, to this collection.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again inviting the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your that your entire comment—including your personal identifying information—may be publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: The Alaska National Interest Lands Conservation Act (ANILCA; 16 U.S.C. 3111–3126), and regulations in the Code of Federal Regulations (CFR) at 50 CFR part 100 and 36 CFR part 242, require persons engaged in taking fish, shellfish, and wildlife on public lands in Alaska for subsistence uses to apply for and obtain a permit to do so, and comply with reporting provisions of that permit.

We currently use four forms in the recruitment and selection of members for regional advisory councils:

- Form 3–2300, “Federal Subsistence Regional Advisory Council Membership Incumbent Application.”

- Form 3–2321, “Federal Subsistence Regional Advisory Council Membership Application/Nomination.”

- Form 3–2322, “Regional Advisory Council Candidate Interview.”

- Form 3–2323, “Regional Advisory Council Reference/Key Contact Interview.”

The member selection process begins with the information that we collect on the application. Ten interagency review panels interview all applicants and nominees, their references, and regional key contacts. These contacts are based on the information that the applicant provides on the application form. The information that we collect through the application form and subsequent interviews is the basis of the Federal Subsistence Board’s recommendations to the Secretaries of the Interior and Agriculture for appointment and reappointment of council members.

We use the following forms to collect information from qualified rural residents for subsistence harvest:

- Form 3–2326, “Federal Subsistence Hunt Application, Permit, and Report.”

- Form 3–2327, “Designated Hunter Permit Application, Permit, and Report.”

- Form 3–2328, “Federal Subsistence Fishing Application, Permit, and Report.”

- Form 3–2378, “Designated Fishing Permit Application, Permit, and Report.”

- Form 3–2379, “Federal Subsistence Customary Trade Recordkeeping Form.”

We use the information collected to evaluate:

- Eligibility of applicant.
- Subsistence harvest success.
- Effectiveness of season lengths, harvest quotas, and harvest restrictions.
- Hunting patterns and practices.
- Hunter use.

The Federal Subsistence Board uses the harvest data, along with other information, to set future season dates and harvest limits for Federal subsistence resource users. These seasons and harvest limits are set to meet the needs of subsistence users without adverse impact to the health of existing animal populations.

In addition to the above forms, regulations at 50 CFR part 100 and 36 CFR part 242 contain requirements for the collection of information. We collect nonform information on:

- Repeal of Federal subsistence rules and regulations (50 CFR 100.14 and 36 CFR 242.14).

- Proposed changes to Federal subsistence regulations (50 CFR 100.18 and 36 CFR 242.18).

- Special action requests (50 CFR 100.19 and 36 CFR 242.19).

- Requests for reconsideration (50 CFR 100.20 and 36 CFR 242.20).

- Requests for permits and reports, such as traditional religious/cultural/educational permits, fishwheel permits, fyke net permits, and under-ice permits (50 CFR 100.25–27 and 36 CFR 242.25–27).

Title of Collection: Federal Subsistence Regulations and Associated Forms, 50 CFR 100 and 36 CFR 242.

OMB Control Number: 1018–0075.

Form Numbers: FWS Forms 3–2300, 3–2321 through 3–2323, 3–2326 through 3–2328, and 3–2378 through 3–2379.

Type of Review: Extension of the currently approved collection.

Respondents/Affected Public:

Individuals; private sector; and State, local, and Tribal governments. Most respondents are individuals who are federally defined rural residents in Alaska.

Total Estimated Number of Annual Respondents: 15,242.

Total Estimated Number of Annual Responses: 15,242.

Estimated Completion Time per Response: Varies from 15 minutes to 4 hours, depending on activity.

Total Estimated Number of Annual Burden Hours: 6,769.

Respondent’s Obligation: Required to obtain or retain a benefit.

Frequency of Collection: On occasion.

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Madonna Baucum,

Information Collection Clearance Officer, U.S. Fish and Wildlife Service.

[FR Doc. 2023–24376 Filed 11–2–23; 8:45 am]

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–HQ–ES–2023–0148; FF09E42000–FXES11609BFEDR–234]

John H. Chafee Coastal Barrier Resources System; Florida, Georgia, Louisiana, Maine, and New York; Draft 5-Year Review Boundaries

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: The Coastal Barrier Resources Act (CBRA) requires the Secretary of the

Interior to review the maps of the John H. Chafee Coastal Barrier Resources System (CBRS) at least once every 5 years and make any minor and technical modifications to the boundaries of the CBRS as are necessary to reflect changes that have occurred in the size or location of any unit as a result of natural forces. We, the U.S. Fish and Wildlife Service (Service), have conducted this review for CBRS units in Florida, Georgia, Louisiana, Maine, and the Great Lakes region of New York. With this notice, we announce the findings of our review and invite comments on the draft revised boundaries from Federal, State, and local officials.

DATES: To ensure consideration, we must receive your written comments by December 4, 2023.

ADDRESSES:

Accessing Files: The draft revised boundaries may be viewed in a web mapping application accessed from the Service’s website at <https://www.fws.gov/project/cbrs-5-year-review>. For more information, see Request for Comments under **SUPPLEMENTARY INFORMATION**.

Submitting Comments: You may submit written comments by one of the following methods:

- *Internet:* Go to: <https://www.regulations.gov>. Search for and submit comments on Docket No. FWS–HQ–ES–2023–0148.

- *U.S. mail or hand-delivery:* Public Comments Processing, Attn: Docket No. FWS–HQ–ES–2023–0148, U.S. Fish and Wildlife Service, 5275 Leesburg Pike, MS: PRB/3W, Falls Church, VA 22041–3808.

We request that you send comments by only one of the methods described above. We will post all information received on <https://www.regulations.gov>. If you provide personal identifying information in your comment, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so.

FOR FURTHER INFORMATION CONTACT:

Katie Niemi, Coastal Barriers Coordinator, via telephone at 703–358–2071 or email at CBRA@fws.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The Coastal Barrier Resources Act (CBRA; 16 U.S.C. 3501 *et seq.*) requires the Secretary of the Interior (Secretary) to review the maps of the CBRS at least once every 5 years and make, in consultation with the appropriate Federal, State, and local officials, such minor and technical modifications to the boundaries of the CBRS as are necessary solely to reflect changes that have occurred in the size or location of any unit as a result of natural forces (16 U.S.C. 3503(c)).

The Service's review included:

- Six of the 137 total units located in Florida
- All 13 units located in Georgia
- Fifteen of the 21 total units located in Louisiana
- All 34 units located in Maine
- All 21 units located in the Great Lakes region of New York

The remaining Louisiana and New York (Long Island) units were not included in this review because they are part of separate comprehensive mapping projects (the related maps are awaiting adoption by Congress through legislation). The remaining Florida units were not included in this review but are planned for review in the future.

Of the 89 total units reviewed, the Service revised 13 units that changed in size or location as a result of natural forces since they were last mapped. The Service's review of these areas also found two CBRS units that require modifications to correct administrative errors made in the past on maps for Lee County, Florida.

Background and Methodology

Background information on the 5-year review effort and the methodology used to produce the revised boundaries can be found in a notice the Service published in the **Federal Register** on November 22, 2022 (87 FR 71352).

Prior to the Service's "digital conversion" effort for the CBRS maps (carried out during the period 2013–2016), the official CBRS maps had significant limitations due to their age, scale, and the now antiquated techniques used to create them. On August 29, 2013 (78 FR 53467), the Service published a notice in the **Federal Register** describing the limitations of those original maps, along with the methodology that was used to transcribe the boundaries from those maps to new base map imagery for the purposes of the 5-year review. In that notice, the Service also described limited circumstances under which CBRS boundaries may be modified to correct administrative errors made in

the past, either in (a) the transcription of the boundaries from maps that were reviewed and approved by Congress to the official CBRS maps on file with the Service or (b) the inclusion of unqualifying areas to the CBRS through a map modification to account for natural changes under 16 U.S.C. 3503(c). We found two administrative errors in Units P19 and P19P that were introduced through the digital conversion and 5-year review effort in Florida in 2016. Minor corrections to these two units are described below.

Proposed Modifications to the CBRS

In accordance with CBRA's requirement to update the CBRS maps at least once every 5 years to account for natural changes, the Service has conducted a review of certain unit boundaries in Florida, Georgia, Louisiana, Maine, and the Great Lakes region of New York.

The Service made modifications due to natural changes in the size or location of a total of 13 CBRS units (of the 89 units reviewed). In addition, two units in Florida were modified to correct administrative errors made in the past on maps for Lee County, Florida. Below is a summary of those changes and the results of our review.

Florida

The Service's review found that five of the six CBRS units in Florida that are included in this review (Units FL–70, FL–70P, P19, P19P, P20, and P20P) require changes due to natural forces. In addition, two units in Florida, P19 and P19P, were modified to correct administrative errors. The imagery that was used on the currently effective maps is dated 2013. The imagery that was used for this review, and will be used for the revised maps, is dated 2022. Other CBRS units in Florida were not assessed as part of this review.

For Unit P19, the administrative errors affect three privately owned structures that were inadvertently added to the unit when the Service modified the boundary in a prior 5-year review. Additionally, one adjustment was needed to correct an error in the transcription of a portion of the boundary of Unit P19P along the excluded area at the northern end of North Captiva Island affecting one structure. These errors are corrected as described below under these two units.

Otherwise Protected Area (OPA) Unit P19P is made up of 15 discrete segments on North Captiva Island that are interspersed with System Unit P19. We are only modifying the northernmost segment of Unit P19P to reflect changes from natural forces. Although erosion

has been occurring along the other 14 segments, we found that modifications beyond the scope of this project and our 5-year review authority are needed to first address significant misalignments in the locations of the OPA boundaries and the Cayo Costa State Park parcels they were intended to follow. These alignment errors were already present on the map adopted by Congress in 2000 via Public Law 106–360 and can be attributed to imprecise information regarding the location of the parcel boundaries at the time the CBRS map was produced. However, because these other errors are not of the administrative nature described in the Background and Methodology section above, they cannot be corrected administratively by the Service. Rather, such changes must be made through the comprehensive remapping process, which is described in more detail in a notice the Service published in the **Federal Register** on January 4, 2021 (86 FR 118).

FL–70P: GASPARILLA ISLAND. Unit FL–70P has two discrete segments, but modifications to account for natural changes were only necessary in the western segment. The western boundary of the excluded area of this segment has been modified to account for natural changes in the shoreline between the Boca Grande Rear Range Lighthouse and Sea Grape Beach.

P19: NORTH CAPTIVA ISLAND. The boundary along the western side of North Captiva Island that is coincident with the northernmost segment of Unit P19P has been modified to account for natural changes in the shoreline along the Gulf of Mexico. The excluded area boundary at the northern tip of North Captiva Island has been modified to account for natural changes in the shoreline along the Gulf of Mexico and Captiva Pass.

In addition, two segments of the boundary along the excluded area have been modified to correct an administrative error made during the previous 5-year review for this unit that affected three existing structures. That boundary was modified in 2016 to account for natural changes in the shoreline. However, that boundary modification was not included in the description of the 5-year review changes included in the **Federal Register** notices associated with this unit dated November 17, 2015 (80 FR 71826) and March 14, 2016 (81 FR 13407). The 2016 boundary change inadvertently resulted in adding to the unit three existing structures along the beach in the North Captiva Dunes subdivision. The boundary has been modified so that the structures will no longer be located within the unit.

P19P: NORTH CAPTIVA ISLAND.

Unit P19P has 15 discrete segments that are all coincident with Unit P19. In the northernmost segment of Unit P19P, the western boundary coincident with Unit P19 has been modified to account for natural changes in the shoreline along the Gulf of Mexico.

Additionally, an adjustment has been made to correct an administrative error in the transcription of the boundary from the CBRS map dated October 27, 2000, to the official map dated January 11, 2016, for this unit. We found that when we digitized the southern boundary of the excluded area on North Captiva Island for the purposes of the 5-year review in 2015–2016, we did not properly follow the boundary transcription methodology described in the notice published in the **Federal Register** (August 29, 2013; 78 FR 53467).

This transcription error resulted in small portions of six privately owned parcels, including one existing structure, being incorrectly depicted as within the unit in 2016. The southern boundary of the excluded area (part of the northern boundary of Unit P19P) is adjusted to correct this error and maintain the relationship between the OPA boundary, and the boundary of Cayo Costa State Park as established by Congress via Public Law 106–360 in 2000 and clearly indicated by legislative history and our background records on Unit P19P.

P20: CAYO COSTA. The coincident boundary between Units P20 and P20P at the northern tip of Cayo Costa has been modified to account for natural changes in the shoreline along Boca Grande Pass.

P20P: CAYO COSTA. Unit P20P has 13 discrete segments, but modifications to account for natural changes were only necessary in the northernmost segment. The coincident boundary between Units P20 and P20P at the northern tip of Cayo Costa has been modified to account for natural changes in the shoreline along Boca Grande Pass.

Georgia

The Service's review found that 4 of the 13 CBRS units in Georgia require changes due to natural forces. The imagery that was used on the currently effective map is dated 2013. The imagery that was used for this review, and will be used for the revised map, is dated 2021.

GA-05P: ALTAMAHA/WOLF ISLANDS: The coincident boundary between Units GA-05P and N03 has been modified to account for accretion at the northern tip of Little St. Simons Island.

N03: LITTLE ST. SIMONS ISLAND: The coincident boundary between Units GA-05P and N03 has been modified to account for accretion at the northern tip of Little St. Simons Island.

N06: CUMBERLAND ISLAND: Unit N06 has five discrete segments, but modifications to account for natural changes were only necessary in the southernmost segment. The coincident boundary between Units N06 and N06P along Beach Creek near its confluence with Cumberland Sound has been modified to account for natural changes in the shoreline.

N06P: CUMBERLAND ISLAND: Unit N06P has six discrete segments, but modifications to account for natural changes were only necessary in the southernmost segment. The coincident boundary between Units N06 and N06P along Beach Creek near its confluence with Cumberland Sound has been modified to account for natural changes in the shoreline.

Louisiana

The Service's review found that 3 of the 15 CBRS units in Louisiana that are included in this review (Units LA-03P, LA-04P, LA-05P, LA-07, LA-08P, LA-09, LA-10, S01, S01A, S02, S03, S08, S09, S10, and S11) require changes due to natural forces. The imagery that was used on the currently effective maps is dated 2013. The imagery that was used for this review, and will be used for the revised maps, is dated 2021.

The remaining six Louisiana units were not assessed as part of this review because they are part of a separate comprehensive mapping project (the related maps are awaiting adoption by Congress through legislation).

LA-05P: MARSH ISLAND/RAINEY. The boundary of the unit has been modified to account for wetland erosion along Vermilion Bay and West Cote Blanche Bay. Due to the significant rate of erosion in this area, some of the boundary has been generalized (*i.e.*, simplified so that the map is clear, and the boundary is not overly detailed).

LA-10: CALCASIEU PASS. A portion of the northern boundary of the unit has been modified to account for wetland erosion along West Cove. Due to the significant rate of erosion in this area, some of the boundary has been generalized (*i.e.*, simplified so that the map is clear, and the boundary is not overly detailed).

S10: MERMENAU RIVER. The southern boundary of the excluded area at the western end of the unit has been modified to account for shoreline erosion along the Gulf of Mexico.

Maine

The Service's review found that the 34 CBRS units in Maine do not need to be modified due to changes from natural forces. The imagery that was used on the currently effective maps is dated 2011 and/or 2012, with the exception of one map that also utilizes imagery dated 2003–2005. The imagery that was used for this review, and will be used for the revised maps, is dated 2021.

New York (Great Lakes)

The Service's review found that 1 of the 21 CBRS units in the Great Lakes region of New York (the only CBRS units in New York that were part of this review) requires changes due to natural forces. The imagery that was used on the currently effective maps is dated 2013. The imagery that was used for this review, and will be used for the revised maps, is dated 2022.

The remaining CBRS units in the Long Island region of New York were not assessed as part of this review because they are part of a separate comprehensive mapping project related to Hurricane Sandy (the related maps are awaiting adoption by Congress through legislation).

NY-62: GRENADIER ISLAND. The eastern lateral boundary of the unit has been modified to account for the accretion of a sand spit that has migrated outside the unit.

Request for Comments

CBRA requires consultation with the appropriate Federal, State, and local officials on the proposed CBRS boundary modifications to reflect changes that have occurred in the size or location of any unit as a result of natural forces (16 U.S.C. 3503(c)). We therefore invite interested Federal, State, and local officials to review and comment on the draft revised boundaries for Florida, Georgia, Louisiana, Maine, and the Great Lakes region of New York. The Service is specifically notifying the following stakeholders concerning the availability of the draft revised boundaries: (1) the Chair and Ranking Member of the House of Representatives Committee on Natural Resources, the Chair and Ranking Member of the Senate Committee on Environment and Public Works, and the members of the Senate and House of Representatives for the affected areas; (2) the governors of the affected areas; (3) State and local officials with floodplain management and/or land use responsibilities for the affected areas; and (4) Federal officials with knowledge of the coastal geomorphology within the affected areas.

Federal, State, and local officials may submit written comments and accompanying data as described in **ADDRESSES**, above. Comments regarding specific CBRS unit(s) should reference the appropriate unit number(s) and unit name(s). Please note that boundary modifications through the 5-year review process can only be made to reflect changes that have occurred in the size or location of any CBRS unit as a result of natural forces. Other requests for changes to the CBRS outside of the Service's administrative authorities (16 U.S.C. 3503(c)–(d)) will not be considered at this time. We must receive comments on or before the date listed above in **DATES**.

The draft revised boundaries may be viewed in a web mapping application accessed from the Service's website at <https://www.fws.gov/project/cbrs-5-year-review>. A shapefile of the draft revised CBRS boundaries, which can be used with GIS software, is also available for download. The shapefile is best viewed using the base imagery to which the boundaries were drawn; the base imagery sources and dates are included in the metadata for the shapefile. The Service is not responsible for any misuse or misinterpretation of the shapefile.

Interested parties who are unable to access the draft revised boundaries or other information online may contact the individual identified in **FOR FURTHER INFORMATION CONTACT**, above, and reasonable accommodations will be made.

Next Steps

Following the close of the comment period, the Service will review all comments received on the draft revised boundaries; adjust the boundaries, as appropriate; prepare final revised maps; and publish a notice in the **Federal Register** to announce the availability of the final revised maps. The revised maps will take effect upon the date of publication of that notice in the **Federal Register**.

Authority

Coastal Barrier Resources Act (CBRA); 16 U.S.C. 3501 *et seq.*

Gary Frazer,

Assistant Director for Ecological Services.

[FR Doc. 2023–23864 Filed 11–2–23; 8:45 am]

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[Docket No. BOEM–2023–0047]

Notice of Availability of a Joint Record of Decision for the Proposed Coastal Virginia Offshore Wind Commercial Project

AGENCY: Bureau of Ocean Energy Management (BOEM), Interior; National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Record of decision (ROD); notice of availability.

SUMMARY: BOEM announces the availability of the joint ROD on the Final Environmental Impact Statement (EIS) for the construction and operations plan (COP) submitted by Virginia Electric and Power Company (dba Dominion Energy) for its proposed Coastal Virginia Offshore Wind Commercial Project (Project), offshore Virginia Beach, Virginia. The joint ROD includes the Department of the Interior's (DOI) decision regarding the COP and NMFS' plans for decision, pending completion of all statutory processes, regarding Dominion Energy's requested Incidental Take Regulations (ITR) and an associated Letter of Authorization (LOA) under the Marine Mammal Protection Act (MMPA). NMFS has adopted the final EIS to support its decision of whether or not to issue the requested ITR under the MMPA. The joint ROD concludes the National Environmental Policy Act process for each agency.

ADDRESSES: The joint ROD and associated information are available on BOEM's website at <https://www.boem.gov/renewable-energy/state-activities/CVOW-C>.

FOR FURTHER INFORMATION CONTACT: For information related to BOEM's action, contact Jessica Stromberg, BOEM Office of Renewable Energy Programs, 45600 Woodland Road, VAM–OREP, Sterling, Virginia 20166, (703) 787–1730, or jessica.stromberg@boem.gov; For information related to NMFS' action, contact Katherine Renshaw, NOAA Office of General Counsel, (302) 515–0324.

SUPPLEMENTARY INFORMATION: Dominion Energy seeks approval to construct, operate, and maintain the Project: a wind energy facility and the associated export cables on the Outer Continental Shelf (OCS) offshore Virginia. The Project would be developed within the range of design parameters outlined in

the COP, subject to applicable mitigation measures.

The Project as proposed in the COP would include up to 202 wind turbine generators (WTGs); 3 offshore, high voltage, alternating current substations; inter-array cables linking the individual turbines to the offshore substations; substation interconnector cables linking the substations to each other; offshore export cables; an onshore export cable system; an onshore switching station north of Harpers Road (Harpers Switching Station) or north of Princess Anne Road (Chicory Switching Station) in Virginia Beach, Virginia; and an overhead power line connection to the existing electrical grid at the Fentress Substation in Chesapeake, Virginia.

The WTGs, offshore substations, inter-array cables, and substation interconnector cables would be located on the OCS approximately 24 nautical miles (27 statute miles) east of Virginia Beach, Virginia, within the area defined by Renewable Energy Lease OCS–A–0483. The offshore export cables would be buried below the seabed surface on the OCS and Commonwealth of Virginia-owned submerged lands. The onshore export cables, substations, and grid connections would be located in Princess Anne County, Virginia.

After carefully considering public comments on the draft EIS and the alternatives described and analyzed in the final EIS, DOI selected Alternative B, “Revised Layout to Accommodate the Fish Haven and Navigation,” in combination with Alternative D–1, “Onshore Habitat Impact Minimization Alternative.” This combination of alternatives B and D–1 is the preferred alternative identified in the final EIS. The anticipated mitigation, monitoring, and reporting requirements, which will be included in BOEM's COP approval as terms and conditions, are included in the ROD, which is available at: <https://www.boem.gov/renewable-energy/state-activities/CVOW-C>.

NMFS has adopted BOEM's final EIS to support its decision of whether or not to promulgate the requested ITR and issue the associated LOA to Dominion Energy. NMFS' final decision of whether or not to promulgate the requested ITR and issue the LOA will be documented in a separate Decision Memorandum prepared in accordance with internal NMFS policy and procedures. The final ITR and a notice of issuance of the LOA, if issued, will be published in the **Federal Register**. The LOA would authorize Dominion Energy to take small numbers of marine mammals incidental to Project construction and would set forth permissible methods of incidental

taking; means of affecting the least practicable adverse impact on the species and their habitat; and requirements for monitoring and reporting. Pursuant to section 7 of the Endangered Species Act, NMFS issued a final Biological Opinion to BOEM on September 18, 2023, evaluating the effects of the proposed action on ESA-listed species. The proposed action in the Biological Opinion includes the associated permits, approvals, and authorizations that may be issued.

Authority: National Environmental Policy Act of 1969, as amended, (42 U.S.C. 4321 *et seq.*); 40 CFR 1505.2.

Karen Baker,

Chief, Office of Renewable Energy Programs,
Bureau of Ocean Energy Management.

BILLING CODE 4340-98-P

OFFICE OF MANAGEMENT AND BUDGET

Request for Comments on Advancing Governance, Innovation, and Risk Management for Agency Use of Artificial Intelligence Draft Memorandum

AGENCY: Office of Management and Budget.

ACTION: Notice of public comment period.

SUMMARY: The Office of Management and Budget (OMB) is seeking public comment on a draft memorandum titled *Advancing Governance, Innovation, and Risk Management for Agency Use of Artificial Intelligence (AI)*. As proposed, the memorandum would establish new agency requirements in areas of AI governance, innovation, and risk management, and would direct agencies to adopt specific minimum risk management practices for uses of AI that impact the rights and safety of the public. The full text of the draft memorandum is available for review at <https://www.ai.gov/input> and <https://www.regulations.gov>.

DATES: Written comments must be received on or before December 5, 2023.

ADDRESSES: Please submit comments via <https://www.regulations.gov>, a Federal website that allows the public to find, review, and submit comments on documents that agencies have published in the **Federal Register** and that are open for comment. Simply type “OMB–2023–0020” in the search box, click “Search,” click the “Comment” button underneath “Request for Comments on Advancing Governance, Innovation, and Risk Management for Agency Use of

Artificial Intelligence Memorandum,” and follow the instructions for submitting comments. The OMB System of Records Notice, OMB Public Input System of Records, OMB/INPUT/01, includes a list of routine uses associated with the collection of this information.

Privacy/FOIA Notice: Comments submitted in response to this notice may be publicly available and are subject to disclosure under the Freedom of Information Act. For this reason, please do not include in your comments information of a confidential nature, such sensitive personal information or proprietary information, or any other information that you would not want publicly disclosed.

FOR FURTHER INFORMATION CONTACT:

Please direct questions regarding this Notice to Cindy Martinez at OFCIO_AI@OMB.eop.gov with “AI Memo Request for Comment” in the subject line, or by phone at 202–395–0379. Please direct media inquiries to OMB OFCIO’s Office of Public Affairs, email: MBX.OMB.Media@OMB.eop.gov.

SUPPLEMENTARY INFORMATION: The Administration has undertaken numerous efforts to advance responsible AI innovation and secure protections for people’s rights and safety. This work spans targeted sector-specific initiatives, such as the Department of Health and Human Services’ proposed rule to protect patients from discriminatory algorithms in health care,ⁱ as well as more broadly applicable guidance from the Department of Justice and Equal Employment Opportunity Commission to help employers avoid AI-enabled disability discrimination in employment.ⁱⁱ Significant efforts have also yielded the development of landmark voluntary frameworks such as the National Institute of Standards and Technology’s (NIST) AI Risk Management Framework and White House Office of Science and Technology Policy’s Blueprint for an AI Bill of Rights. To build upon this body of policy, and in accord with President Biden’s Executive Order of October 30, 2023 (Safe, Secure, and Trustworthy Development and Use of Artificial Intelligence), OMB has prepared a draft memorandum that would direct Federal agencies to strengthen their AI governance and innovation programs while managing risks from the use of AI,

particularly when that use affects the safety and rights of the public. This memorandum also would carry out provisions of the AI in Government Act of 2020, secs. 101–104, Div. U, Public Law 116–260, and the Advancing American AI Act, secs. 7221–7228, Public Law 117–263.

Requests for Comment

Through this Request for Comment, OMB hopes to gather information on the questions posed below. However, this list is not intended to limit the scope of topics that may be addressed. Commenters are invited to provide feedback on any topic believed to have implications for the content or implementation of the proposed memorandum.

When responding to one or more of the questions below, please note in the text of your response the number of the question to which you are responding. Commenters should include a page number on each page of their submissions. Commenters are not required to respond to all questions.

OMB is requesting feedback related to the following:

1. The composition of Federal agencies varies significantly in ways that will shape the way they approach governance. An overarching Federal policy must account for differences in an agency’s size, organization, budget, mission, organic AI talent, and more. Are the roles, responsibilities, seniority, position, and reporting structures outlined for Chief AI Officers sufficiently flexible and achievable for the breadth of covered agencies?
2. What types of coordination mechanisms, either in the public or private sector, would be particularly effective for agencies to model in their establishment of an AI Governance Body? What are the benefits or drawbacks to having agencies establishing a new body to perform AI governance versus updating the scope of an existing group (for example, agency bodies focused on privacy, IT, or data)?
3. How can OMB best advance responsible AI innovation?
4. With adequate safeguards in place, how should agencies take advantage of generative AI to improve agency missions or business operations?
5. Are there use cases for presumed safety-impacting and rights-impacting AI (Section 5 (b)) that should be included, removed, or revised? If so, why?
6. Do the minimum practices identified for safety-impacting and rights-impacting AI set an appropriate baseline that is applicable across all agencies and all such uses of AI? How

ⁱ Section 1557 of the Patient Protection and Affordable Care Act; 42 U.S.C. 18116, <https://www.hhs.gov/civil-rights/for-individuals/section-1557/index.html>.

ⁱⁱ *Algorithms, Artificial Intelligence, and Disability Discrimination in Hiring*, Department of Justice and Equal Employment Opportunity Commission, <https://www.ada.gov/resources/ai-guidance/>.

can the minimum practices be improved, recognizing that agencies will need to apply context-specific risk mitigations in addition to what is listed?

7. What types of materials or resources would be most valuable to help agencies, as appropriate, incorporate the requirements and recommendations of this memorandum into relevant contracts?

8. What kind of information should be made public about agencies' use of AI in their annual use case inventory?

Clare Martorana,

U.S. Federal Chief Information Officer, Office of the Federal Chief Information Officer, Office of Management Budget.

[FR Doc. 2023-24269 Filed 11-2-23; 8:45 am]

BILLING CODE 3110-05-P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[NOTICE: 23-110]

Name of Information Collection: Property Inventory Report—Grants With Educational and Nonprofit Entities

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice of information collection.

SUMMARY: The National Aeronautics and Space Administration, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections.

DATES: Comments are due by January 2, 2024

ADDRESSES: Written comments and recommendations for this information collection should be sent within 60 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 60-day Review-Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Bill Edwards-Bodmer, NASA Clearance Officer, NASA Headquarters, 300 E Street SW, JF0000, Washington, DC 20546, 757-864-7998, or b.edwards-bodmer@nasa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

The information submitted by recipients is an annual report of

Government-owned property in the possession of educational or nonprofit institutions holding NASA grants. In addition to the annual report, a property report may also be required at the end of the grant, or on the occurrence of certain events. The collected information is used by NASA to effectively maintain an appropriate internal control system for equipment and property provided or acquired under grants and cooperative agreements with institutions of higher education and other nonprofit organizations, and to comply with statutory requirements.

II. Methods of Collection

Grant and Cooperative Agreement awardees submit annual property reports via an automated NASA Form 1018 by way of the NASA Electronic Submission System (NESS).

III. Data

Title: Property Inventory Report—Grants with Educational and Nonprofit Entities.

OMB Number: 2700-0047.

Type of review: Reinstatement without change.

Affected Public: Educational and not-for-profit institutions.

Estimated Annual Number of Activities: 238.

Estimated Number of Respondents per Activity: 1.

Annual Responses: 238.

Estimated Time Per Response: 8.33 hours.

Estimated Total Annual Burden Hours: 1,983 hours.

IV. Request for Comments

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of NASA, including whether the information collected has practical utility; (2) the accuracy of NASA's estimate of the burden (including hours and cost) of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including automated collection techniques or the use of other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the request for OMB approval of this information collection.

They will also become a matter of public record.

William Edwards-Bodmer,
NASA PRA Clearance Officer.

[FR Doc. 2023-24267 Filed 11-2-23; 8:45 am]

BILLING CODE 7510-13-P

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Institute of Museum and Library Services

Submission for OMB Review, Comment Request, Proposed Collection: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery

AGENCY: Institute of Museum and Library Services, National Foundation on the Arts and the Humanities.

ACTION: Submission for OMB review, request for comments, collection of information.

SUMMARY: The Institute of Museum and Library Services announces that the following information collection request has been submitted to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. This Notice proposes the approval of the Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery for the next three years. A copy of the proposed information collection request can be obtained by contacting the individual listed below in the **FOR FURTHER INFORMATION CONTACT** section of this Notice.

DATES: Written comments must be submitted to the office listed in the **ADDRESSES** section below on or before December 03, 2023.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be sent within 30 days of publication of this Notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection request by selecting "Institute of Museum and Library Services" under "Currently Under Review;" then check "Only Show ICR for Public Comment" checkbox. Once you have found this information collection request, select "Comment,"

and enter or upload your comment and information. Alternatively, please mail your written comments to Office of Information and Regulatory Affairs, Attn.: OMB Desk Officer for Education, Office of Management and Budget, Room 10235, Washington, DC 20503, or call (202) 395-7316.

OMB is particularly interested in comments that help the agency to:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submission of responses).

FOR FURTHER INFORMATION CONTACT: Jake Soffronoff, Institute of Museum and Library Services, 955 L'Enfant Plaza North SW, Suite 4000, Washington, DC 20024-2135. Mr. Soffronoff may be reached by telephone at 202-653-4648, or by email at jsoffronoff@imls.gov. Persons who are deaf or hard of hearing (TTY users) may contact IMLS at 202-207-7858 via 711 for TTY-Based Telecommunications Relay Service.

SUPPLEMENTARY INFORMATION: The Institute of Museum and Library Services is the primary source of federal support for the nation's libraries and museums. We advance, support, and empower America's museums, libraries, and related organizations through grant making, research, and policy development. To learn more, visit www.imls.gov.

Current Actions: This Notice proposes the approval of the Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery for the next three years. It will garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. By qualitative feedback, we mean information that provides useful insights on perceptions and opinions but not statistical surveys that yield quantitative results that can be

generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences, and expectations; provide an early warning of issues with service; and/or focus attention on areas where communication, training, or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. They will also allow feedback to contribute directly to the improvement of program management.

Feedback collected under this generic clearance will provide useful information, but it will not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield statistically reliably actionable results, such as monitoring trends over time or documenting generalizable program performance. Such data uses require more rigorous designs that address the target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

The 60-day Notice was published in the **Federal Register** on September 6, 2023 (88 FR 60989). No comments were received under this Notice.

Agency: Institute of Museum and Library Services.

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

OMB Control Number: 3137-0081.

Agency Number: 3137.

Respondents/Affected Public:

Individuals and Households; Businesses and Organizations; State, Local or Tribal Governments; Museums; Libraries.

Average Expected Annual Number of Activities: 11.

Total Number of Annual Respondents: 9,975.

Frequency of Response: Once per request.

Average Minutes per Response: 18.

Total Estimated Number of Annual Burden Hours: 2,975.

Total Annualized Capital/Startup Costs: n/a.

Cost Burden (dollars): \$90,619.

Total Annual Federal Costs: \$51,590.

Dated: October 31, 2023.

Suzanne Mbollo,

Grants Management Specialist, Institute of Museum and Library Services.

BILLING CODE 7036-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-395; NRC-2023-0152]

Notice of Intent To Conduct Scoping Process and Prepare Environmental Impact Statement; Dominion Energy South Carolina, Inc.; Virgil C. Summer Nuclear Station, Unit 1

AGENCY: Nuclear Regulatory Commission.

ACTION: Intent to conduct scoping process and prepare environmental impact statement; public scoping meeting, and request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) will conduct a scoping process to gather information necessary to prepare an environmental impact statement (EIS) to evaluate the environmental impacts for the subsequent license renewal (SLR) of Renewed Facility Operating License No. NPF-12 for Virgil C. Summer Nuclear Station, Unit 1 (V.C. Summer). The NRC is seeking public comment on this action and has scheduled two public scoping meetings on this action.

DATES: The NRC will hold two public scoping meetings: one through an online webinar and teleconference call and one in-person meeting near the V.C. Summer facility. Both meetings will include a presentation on the license renewal process and a transcribed public comment session. The online webinar will be held on November 9, 2023, at 2 p.m. eastern time (ET). The in-person meeting will be held on November 14, 2023, at 6 p.m. ET at the McCrorey-Liston School of Technology, 1978 State Highway 215, Blair, SC 29015. Details on both meetings can be found on the NRC's Public Meeting Schedule at <https://www.nrc.gov/pmns/mtg>. Submit comments on the scope of the EIS by December 4, 2023. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. See Section IV, "Public

Scoping Meeting,” of this notice for additional information.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal rulemaking website:* Go to <https://regulations.gov> and search for Docket ID NRC–2023–0152. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: Stacy.Schumann@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *Email comments to:* SummerEnvironmental@nrc.gov.

- *Mail comments to:* Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see “Obtaining Information and Submitting Comments” in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Kim Conway, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–1335; email: Kimberly.Conway@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2023–0152 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking website:* Go to <https://www.regulations.gov> and search for Docket ID NRC–2023–0152.

- *NRC’s Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to PDR.Resource@nrc.gov. The ADAMS accession number for each document referenced in this document (if it is available in ADAMS) is provided the first time that it is referenced.

- *NRC’s PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. ET, Monday through Friday, except Federal holidays.

- *Public Library:* A copy of the SLR application for V.C. Summer, including the environmental report (ER), is available for public review at the following public library location: Fairfield County Library, 300 W Washington St., Winnsboro, SC 29180.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC–2023–0152 in the subject line of your comment submission in order to ensure that the NRC is able to make your comment submission available to the public in this docket.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <https://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Discussion

On August 17, 2023, Dominion Energy South Carolina, Inc. submitted to the NRC an application for SLR of Renewed Facility Operating License No. NPF–12 for V.C. Summer, Unit 1, for an additional 20 years of operation (ADAMS Accession No. ML23233A172). This submission initiated the NRC’s proposed action of determining whether to grant the SLR application. The V.C. Summer unit is a pressurized-water reactor designed by Westinghouse and is located near Jenkinsville, South Carolina. The current operating license

for V.C. Summer expires August 6, 2042. The SLR application was submitted pursuant to part 54 of title 10 of the *Code of Federal Regulations* (10 CFR), “Requirements for Renewal of Operating Licenses for Nuclear Power Plants,” and seeks to extend the renewed facility operating license for V.C. Summer Unit 1 to midnight on August 6, 2062. A notice of receipt of the SLR application was published in the **Federal Register** on September 11, 2023 (88 FR 62409). A notice of acceptance for docketing of the application and opportunity to request a hearing was published in the **Federal Register** on October 16, 2023 (88 FR 71384) and is available on the Federal rulemaking website (<https://www.regulations.gov>) by searching for Docket ID NRC–2023–0152.

III. Request for Comment

This notice informs the public of the NRC’s intention to conduct environmental scoping and prepare an EIS related to the SLR application for V.C. Summer, and to provide the public an opportunity to participate in the environmental scoping process, as defined in 10 CFR 51.29, “Scoping-environmental impact statement and supplement to environmental impact statement.”

The regulations in 36 CFR 800.8, “Coordination with the National Environmental Policy Act,” allow agencies to use their National Environmental Policy Act of 1969 (42 U.S.C. 4321, *et seq.*) (NEPA) process to fulfill the requirements of Section 106 of the National Historic Preservation Act of 1966 (54 U.S.C. 300101, *et seq.*) (NHPA). Therefore, pursuant to 36 CFR 800.8(c), the NRC intends to use its process and documentation required for the preparation of the EIS on the proposed action to comply with Section 106 of the NHPA in lieu of the procedures set forth at 36 CFR 800.3 through 800.6.

In accordance with 10 CFR 51.53(c) and 10 CFR 54.23, V.C. Summer submitted an ER as part of the SLR application. The ER was prepared pursuant to 10 CFR part 51, “Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions,” and is available in ADAMS under Accession No. ML23233A174. The ER will also be available for viewing at <https://www.nrc.gov/reactors/operating/licensing/renewal/subsequent-license-renewal.html>. In addition, the SLR application, including the ER, is available for public review at the Fairfield County Library, 300 W Washington St., Winnsboro, SC 29180.

The NRC intends to gather the information necessary to prepare a site-specific EIS related to the SLR application for V.C. Summer. The site-specific EIS will evaluate the environmental impacts of subsequent license renewal for V.C. Summer and reasonable alternatives thereto. Possible alternatives to the proposed action include the no action alternative and reasonable alternative energy sources. This notice is being published in accordance with NEPA and the NRC's regulations at 10 CFR part 51.

As part of its environmental review, the NRC will first conduct a scoping process for the site-specific EIS and, as soon as practicable thereafter, will prepare a draft site-specific EIS for public comment. Participation in this scoping process by members of the public and local, State, Tribal, and Federal government agencies is encouraged. The scoping process for the site-specific EIS will be used to accomplish the following:

- a. Define the proposed action that is to be the subject of the site-specific EIS;
- b. Determine the scope of the site-specific EIS and identify the significant issues to be analyzed in depth;
- c. Identify and eliminate from detailed study those issues that are peripheral or are not significant or that have been covered by prior environmental review;
- d. Identify any environmental assessments and other EISs that are being or will be prepared that are related to, but are not part of, the scope of the site-specific EIS under consideration;
- e. Identify other environmental review and consultation requirements related to the proposed action;
- f. Indicate the relationship between the timing of the preparation of the environmental analyses and the NRC's tentative planning and decision-making schedule;
- g. Identify any cooperating agencies and, as appropriate, allocate assignments for preparation and schedules for completing the site-specific EIS to the NRC and any cooperating agencies; and
- h. Describe how the site-specific EIS will be prepared, including any contractor assistance to be used.

The NRC invites the following entities to participate in scoping:

- a. The applicant, Dominion Energy South Carolina, Inc.;
- b. Any Federal agency that has jurisdiction by law or special expertise with respect to any environmental impact involved or that is authorized to develop and enforce relevant environmental standards;

- c. Affected State and local government agencies, including those authorized to develop and enforce relevant environmental standards;
- d. Any affected Indian Tribe;

- e. Any person who requests or has requested an opportunity to participate in the scoping process; and
- f. Any person who has petitioned or intends to petition for leave to intervene under 10 CFR 2.309.

IV. Public Scoping Meeting

In accordance with 10 CFR 51.26(b), the scoping process for an EIS may include a public scoping meeting to help identify significant issues related to the proposed action and to determine the scope of issues to be addressed in the EIS.

The NRC is announcing that it will hold an online webinar and teleconference call and an in-person public scoping meeting for the V.C. Summer SLR site-specific EIS. Both meetings will include a presentation on the license renewal process and a transcribed public comment session. The online webinar will be held on November 9, 2023, at 2 p.m. ET. The in-person meeting will be held on November 14, 2023, at 6 p.m. ET at the McCrorey-Liston School of Technology, 1978 State Highway 215, Blair, SC 29015. Details on both meetings can be found on the NRC's Public Meeting Schedule at <https://www.nrc.gov/pmns/mtg>. A court reporter will transcribe all comments received during each public scoping meeting. To be considered, comments must be provided either at a transcribed public meeting or in writing, as discussed in the **ADDRESSES** section of this notice.

Persons interested in attending this meeting should monitor the NRC's Public Meeting Schedule website at <https://www.nrc.gov/pmns/mtg> for additional information and the agenda for the meeting. Please contact the environmental project manager, Kim Conway, no later than November 6, 2023, if accommodations or special equipment is needed to attend or to provide comments, so that the NRC staff can determine whether the request can be accommodated.

The public scoping meeting will include: (1) an overview by the NRC staff of the environmental and safety review processes, the proposed scope of site-specific EIS, and the proposed review schedule; and (2) the opportunity for interested government agencies, organizations, and individuals to submit comments or suggestions on environmental issues or the proposed scope of the V.C. Summer SLR site-specific EIS.

Participation in the scoping process for the V.C. Summer SLR site-specific EIS does not entitle participants to become parties to the proceeding to which the site-specific EIS relates. Matters related to participation in any hearing are outside the scope of matters to be discussed at this public meeting.

Dated: October 31, 2023.

For the Nuclear Regulatory Commission.

Theodore B. Smith,

Chief, Environmental Review License Renewal Branch, Division of Rulemaking, Environment, and Financial Support, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-445 and 50-446; NRC-2022-0183]

Vistra Operations Company LLC; Comanche Peak Nuclear Power Plant, Units 1 and 2

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft supplemental environmental impact statement; public meeting and request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment draft Supplement 60, License Renewal, to the Generic Environmental Impact Statement (GEIS) for License Renewal of Nuclear Plants, NUREG-1437, regarding the renewal of Facility Operating License Nos. NPF-87 and NPF-89 for an additional 20 years of operation for Comanche Peak Nuclear Power Plant, Units 1 and 2 (CPNPP). The CPNPP facility is in Somervell County, Texas. Possible alternatives to the proposed action (license renewal) include no action and reasonable replacement power alternatives.

DATES: The staff will hold a local public meeting on the draft Supplemental Environmental Impact Statement on December 7, 2023, from 7:00 p.m. to 9:00 p.m. central time, including a presentation on the preliminary findings and a transcribed public comment session. The public meeting details will be announced in the near future on the NRC's Public Meeting Schedule at <https://www.nrc.gov/pmns/mtg>. Members of the public are invited to submit comments by December 18, 2023. Comments received after this date will be considered, if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal rulemaking website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2022-0183. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301-415-0624; email: Stacy.Schumann@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *Mail comments to:* Office of Administration, Mail Stop: TWFN-7-A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see "Obtaining Information and Submitting Comments" in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Tam Tran, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-3617; email: Tam.Tran@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC-2022-0183 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document by any of the following methods:

- *Federal Rulemaking Website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2022-0183.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may access publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff by email to PDR.Resource@nrc.gov. Draft Supplement 60, License Renewal, to the GEIS for License Renewal of Nuclear Plants, NUREG-1437, is available in ADAMS under Accession No. ML23299A252.

- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open

by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1-800-397-4209 or 301-415-4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

- *Public Library:* A copy of draft Supplement 60, License Renewal, to the GEIS for License Renewal of Nuclear Plants, NUREG-1437, will be available at the following locations: Somervell County Library, 108 Allen Dr., Glen Rose, TX 76043 and Hood County Library, 222 N Travis St., Granbury, TX 76048.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal Rulemaking website (<https://www.regulations.gov>). Please include Docket ID NRC-2022-0183 in the subject line of your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <https://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Discussion

The NRC is issuing for public comment draft Supplement 60, License Renewal, to the GEIS for License Renewal of Nuclear Plants, NUREG-1437, regarding the renewal of Facility Operating License Nos. NPF-87 and NPF-89 for an additional 20 years of operation for CPNPP. Draft Supplement 60, License Renewal, to the GEIS includes the preliminary analysis that evaluates the environmental impacts of the proposed action and alternatives to the proposed action. The NRC staff's preliminary recommendation is that the adverse environmental impacts of license renewal for CPNPP are not so great that preserving the option of

license renewal for energy-planning decisionmakers would be unreasonable.

Dated: October 31, 2023.

For the Nuclear Regulatory Commission.

John M. Moses,

Deputy Director, Division of Rulemaking, Environmental, and Financial Support, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590-01-P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270-139, OMB Control No. 3235-0128]

Proposed Collection; Comment Request; Extension: Rule 12f-1

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549-2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 ("PRA") (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") is soliciting comments on the existing collection of information provided for in Rule 12f-1 (17 CFR 240.12f-1), under the Securities Exchange Act of 1934 ("Act") (15 U.S.C. 78a *et seq.*). The Commission plans to submit this existing collection of information to the Office of Management and Budget ("OMB") for extension and approval.

Rule 12f-1 ("Rule"), originally adopted in 1979 pursuant to Sections 12(f) and 23(a) of the Act, and as further modified in 1995 and 2005, sets forth the requirements for filing an exchange application to reinstate unlisted trading privileges ("UTP") in a security in which UTP has been suspended by the Commission pursuant to Section 12(f)(2)(A) of the Act. Under Rule 12f-1, an exchange must submit one copy of an application for reinstatement of UTP to the Commission that contains specified information, as set forth in the Rule. The application for reinstatement, pursuant to the Rule, must provide the name of the issuer, the title of the security, the name of each national securities exchange, if any, on which the security is listed or admitted to unlisted trading privileges, whether transaction information concerning the security is reported pursuant to an effective transaction reporting plan contemplated by Rule 601 of Regulation NMS, the date of the Commission's suspension of unlisted trading privileges in the security on the exchange, and any other pertinent

information related to whether the reinstatement of UTP in the subject security is consistent with the maintenance of fair and orderly markets and the protection of investors. Rule 12f-1 further requires a national securities exchange seeking to reinstate its ability to extend unlisted trading privileges in a security to indicate that it has provided a copy of such application to the issuer of the security, as well as to any other national securities exchange on which the security is listed or admitted to unlisted trading privileges.

The information required by Rule 12f-1 enables the Commission to make the necessary findings under the Act prior to granting applications to reinstate unlisted trading privileges. This information is also made available to members of the public who may wish to comment upon the applications. Without the Rule, the Commission would be unable to fulfill these statutory responsibilities.

There are currently 24 national securities exchanges subject to Rule 12f-1. The burden of complying with Rule 12f-1 arises when a potential respondent seeks to reinstate its ability to extend unlisted trading privileges to any security for which unlisted trading privileges have been suspended by the Commission, pursuant to Section 12(f)(2)(A) of the Act. The staff estimates that each application would require approximately one hour to complete. Thus, each potential respondent would incur on average one burden hour in complying with the Rule.

The Commission staff estimates that there could be as many as 24 responses annually for an aggregate annual hour burden for all respondents of approximately 24 hours (24 responses $\times$ 1 hour per response). Each respondent's related internal cost of compliance for Rule 12f-1 would be approximately \$242.00 (the cost of one hour of professional work of a paralegal needed to complete the application). The total annual cost of compliance for all potential respondents, therefore, is approximately \$5,808 (24 responses $\times$ \$242.00 per response).

Compliance with Rule 12f-1 is mandatory. Rule 12f-1 does not have a record retention requirement *per se*. However, responses made pursuant to Rule 12f-1 are subject to the recordkeeping requirements of Rules 17a-3 and 17a-4 of the Act. Information received in response to Rule 12f-1 shall not be kept confidential; the information collected is public information.

Written comments are invited on: (a) whether the proposed collection of information is necessary for the proper

performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted by January 2, 2024.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

Please direct your written comments to: David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or send an email to: PRA_Mailbox@sec.gov.

Dated: October 31, 2023.

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-98826; File No. SR-PEARL-2023-59]

Self-Regulatory Organizations; MIAx PEARL, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the MIAx Pearl Equities Fee Schedule To Extend the Sunset Period for the Step-Added Liquidity Rebate

October 30, 2023.

Pursuant to the provisions of section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that on October 18, 2023, MIAx PEARL, LLC ("MIAx Pearl" or "Exchange") filed with the Securities and Exchange Commission ("Commission") a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend the fee schedule (the "Fee Schedule") applicable to MIAx Pearl Equities, an equities trading facility of the Exchange.

The text of the proposed rule change is available on the Exchange's website at <https://www.miaxglobal.com/markets/us-options/pearl-options/rule-filings>, at MIAx Pearl's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Section 1)f) of the Fee Schedule to modify the expiration month (referred to herein as the "sunset period") of the required criteria of the Step-Up Added Liquidity Rebate table. This table provides that Equity Members³ who satisfy the required criteria will receive the Step-Up Added Liquidity Rebate (described below). The Exchange originally filed this proposal on October 12, 2023, (SR-PEARL-2023-57). On October 18, 2023, the Exchange withdrew SR-PEARL-2023-57 and resubmitted this proposal.

Background

The Exchange currently provides a standard rebate of (\$0.0024)⁴ per share for executions of orders in securities priced at or above \$1.00 per share that add displayed liquidity to the Exchange. The Exchange also currently offers various volume-based tiers and incentives through which an Equity Member may receive an enhanced

³ The term "Equity Member" is a Member authorized by the Exchange to transact business on MIAx Pearl Equities. See Exchange Rule 1901.

⁴ Rebates are indicated by parentheses. See the General Notes Section of the Fee Schedule.

rebate for executions of orders that add displayed liquidity to the Exchange by achieving the specified criteria that corresponds to a particular tier/incentive.

In particular, the Exchange adopted a volume based pricing incentive, referred to as the “Step-Up Added Liquidity Rebate,” in which qualifying Equity Members receive an enhanced rebate of (\$0.0031) per share for executions of orders in securities priced at or above \$1.00 per share that add displayed liquidity to the Exchange.⁵ The enhanced rebate provided by the Step-Up Added Liquidity Rebate applies to Liquidity Indicator Codes AA (adds liquidity, displayed order, Tape A), AB (adds liquidity, displayed order, Tape B) and AC (adds liquidity, displayed order, Tape C).⁶

On September 27, 2023, the Exchange filed SR-PEARL-2023-50 which amended the baseline month from May 2023 to July 2023 and extended the sunset period from September 29, 2023 to January 31, 2024. These changes were scheduled to become effective on October 1, 2023. However, prior to these changes becoming effective the Exchange filed SR-PEARL-2023-54 which superseded SR-PEARL-2023-50 and reverted the baseline month back to May 2023 and changed the sunset period to November 30, 2023, with an effective implementation date of October 1, 2023. Insofar as Equity Members are concerned, the baseline month has not changed, as it was May 2023 for the month of September and remains May 2023 for the month of October. The only substantive change for Equity Members is the extension of the sunset period from September 2023 to November 2023.

Equity Members qualify for the Step-Up Added Liquidity Rebate by achieving a “Step-Up ADAV as a % of TCV”⁷ of at least 0.03% over the baseline month of May 2023. Average daily added volume (“ADAV”) means average daily added volume calculated as the number of shares added per day and average daily volume (“ADV”) means average daily volume calculated as the number of shares added or

removed, combined, per day. ADAV and ADV are calculated on a monthly basis.⁸ Total consolidated volume (“TCV”) means total consolidated volume calculated as the volume in shares reported by all exchanges and reporting facilities to a consolidated transaction reporting plan for the month for which the fees apply.⁹ For example, if an Equity Member had an ADAV as a percent of TCV of 0.01% in May 2023, then that Equity Member has to achieve an ADAV as a percent of TCV equal to or greater than 0.04% in any subsequent month in order to qualify for the Step-Up Added Liquidity Rebate.

Proposal

The Exchange now proposes to amend Section 1(f) of the Fee Schedule to modify the required criteria for Equity Members to receive the Step-Up Added Liquidity Rebate. In particular, the Exchange proposes that the criteria to qualify for the Step-Up Added Liquidity Rebate will expire no later than November 30, 2023.¹⁰ The Exchange will issue an alert to market participants should the Exchange determine that the Step-Up Added Liquidity Rebate will expire earlier than November 30, 2023, or if the Exchange determines to amend the criteria or rate applicable to the Step-Up Added Liquidity Rebate prior to the end of the sunset period. The Exchange notes that at least one other competing equities exchange provides a similar “sunset period” for one of its enhanced rebates subject to the same baseline month as the Exchange proposes.¹¹

⁸ The Exchange excludes from its calculation of ADAV and ADV shares added or removed on any day that the Exchange’s system experiences a disruption that lasts for more than 60 minutes during regular trading hours, on any day with a scheduled early market close, and on the “Russell Reconstitution Day” (typically the last Friday in June). Routed shares are not included in the ADAV or ADV calculation. With prior notice to the Exchange, an Equity Member may aggregate ADAV or ADV with other Equity Members that control, are controlled by, or are under common control with such Equity Member (as evidenced on such Equity Member’s Form BD). See the Definitions Section of the Fee Schedule.

⁹ The Exchange excludes from its calculation of TCV volume on any given day that the Exchange’s system experiences a disruption that lasts for more than 60 minutes during Regular Trading Hours, on any day with a scheduled early market close, and on the “Russell Reconstitution Day” (typically the last Friday in June). See the Definitions Section of the Fee Schedule.

¹⁰ The Exchange notes that at the end of the sunset period, the Step-Up Added Liquidity Rebate will no longer apply unless the Exchange files another 19b-4 Filing with the Commission to amend the criteria terms.

¹¹ See Securities Exchange Act Release No. 97662 (June 7, 2023), 88 FR 38576 (June 13, 2023) (SR-MEMX-2023-09); see also MEMX LLC (“MEMX”) Fee Schedule, Liquidity Provision Tiers, Tier 6,

The Exchange does not propose any other changes to the qualifying criteria for Equity Members to receive the Step-Up Added Liquidity Rebate. The Exchange also does not propose to amend the amount of the enhanced rebate of (\$0.0031) per share for Equity Members that qualify for the Step-Up Added Liquidity Rebate. Finally, the Exchange does not propose to change the baseline ADAV of 0.00% of TCV used for firms that become Equity Members of the Exchange after May 2023 for the purpose of the Step-Up Added Liquidity Rebate calculation.

The purpose of this proposed change is to simply extend the sunset period two months, from September 2023 to November 2023. The Exchange believes that the Step-Up Added Liquidity Rebate will continue to provide an incentive for Equity Members to strive for higher ADAV on the Exchange (above their ADAV in the baseline month of May 2023) to receive the enhanced rebate for qualifying executions of orders in securities priced at or above \$1.00 per share that add displayed liquidity to the Exchange. The Exchange believes that with the extension of the sunset period the Step-Up Added Liquidity Rebate will continue to encourage the submission of additional displayed added liquidity to the Exchange, thereby promoting price discovery and contributing to a deeper and more liquid market, which benefits all market participants and enhances the attractiveness of the Exchange as a trading venue. The Exchange notes that earlier this year, MEMX filed a proposal to use May 2023 as the baseline month for one of its enhanced Liquidity Provision Tiers (Tier 6) for MEMX’s members to receive an enhanced rebate and used November 30, 2023, as the sunset period.¹² The purpose of including the proposed sunset period in the Fee Schedule is to provide clarity to Equity Members that, unless the Exchange determines to amend or otherwise modify the Step-Up Added Liquidity Rebate, the Step-Up Added Liquidity Rebate will expire at the end of the sunset period.

Implementation

The proposed changes will become immediately effective.

2. Statutory Basis

The Exchange believes that its proposal to amend its Fee Schedule is consistent with section 6(b) of the Act¹³

available at <https://info.memxtrading.com/fee-schedule/> (last visited September 29, 2023).

¹² See *id.*

¹³ 15 U.S.C. 78f(b).

⁵ See Securities Exchange Act Release No. 95614 (August 26, 2022), 87 FR 53813 (September 1, 2022) (SR-PEARL-2022-33).

⁶ See Fee Schedule, Section 1(b), Liquidity Indicator Codes and Associated Fees.

⁷ The term “Step-Up ADAV as a % of TCV” means ADAV as a percent of TCV in the relevant baseline month subtracted from the current month’s ADAV as a percent of TCV. See the Definitions Section of the Fee Schedule. The Exchange notes that the Step-Up Added Liquidity Rebate does not apply to executions of orders in securities priced below \$1.00 per share or executions of orders that constitute added non-displayed liquidity.

in general, and furthers the objectives of section 6(b)(4) of the Act¹⁴ in particular, in that it is an equitable allocation of reasonable fees and other charges among its Equity Members and issuers and other persons using its facilities and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange operates in a highly fragmented and competitive market in which market participants can readily direct their order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. More specifically, the Exchange is only one of sixteen registered equities exchanges, and there are a number of alternative trading systems and other off-exchange venues, to which market participants may direct their order flow. As of September 29, 2023, based on publicly available information, no single registered equities exchange currently has more than approximately 15–16% of the total market share of executed volume of equities trading for the month of September 2023.¹⁵ Thus, in such a low-concentrated and highly competitive market, no single equities exchange possesses significant pricing power in the execution of order flow, and the Exchange represents approximately 1.79% of the overall market share as of September 29, 2023, for the month of September 2023.¹⁶ The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and also recognized that current regulation of the market system “has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.”¹⁷

The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can shift order flow or discontinue to reduce use of certain categories of products, in response to new or different pricing structures being introduced into the market. Accordingly, competitive forces

constrain the Exchange’s transaction fees and rebates, and market participants can readily trade on competing venues if they deem pricing levels at those other venues to be more favorable. The Exchange believes the proposal reflects a reasonable and competitive pricing structure designed to incentivize market participants to direct additional orders that add liquidity to the Exchange, which the Exchange believes would deepen liquidity and promote market quality on the Exchange to the benefit of all market participants.

The Exchange notes that volume-based incentives and discounts (such as tiers) have been widely adopted by exchanges (including the Exchange), and believes they are reasonable, equitable and not unfairly discriminatory because they are available to all Equity Members on an equal basis, provide additional benefits or discounts that are reasonably related to the value of an exchange’s market quality associated with higher levels of market activity (such as higher levels of liquidity provision and/or growth patterns), and the introduction of higher volumes of orders into the price and volume discovery process.

The Exchange believes that the Step-Up Added Liquidity Rebate, as modified by the proposed change to the sunset period, is reasonable, equitable and not unfairly discriminatory as the Step-Up Added Liquidity Rebate will continue to be available to all Equity Members on an equal basis, and is reasonably designed to encourage Equity Members to maintain or increase their order flow in liquidity-adding volume. The Exchange believes this will continue to promote price discovery, enhance liquidity and market quality, and contribute to a more robust and well-balanced market ecosystem on the Exchange to the benefit of all Equity Members and market participants. The Exchange also notes that MEMX filed a proposal which also uses May 2023 as the baseline month as well as November 2023 as its expiration month, for one of its enhanced Liquidity Provision Tiers (Tier 6) for its members to receive an enhanced rebate.¹⁸

The Exchange believes it is reasonable, equitable and not unfairly discriminatory to amend the sunset period in the Fee Schedule for the Step-Up Added Liquidity Rebate because it will provide clarity to Equity Members that, unless the Exchange determines to amend or otherwise modify the Step-Up Added Liquidity Rebate, the Step-Up Added Liquidity Rebate will expire at

the end of the sunset period. This will allow Equity Members to take into account that the enhanced rebate provided for by the Step-Up Added Liquidity Rebate may be discontinued at the end of sunset period unless the Exchange announces otherwise and files a revised proposal with the Commission. The Exchange further notes that it will issue an alert to market participants should the Exchange determine that the Step-Up Added Liquidity Rebate will expire earlier than November 30, 2023, or if the Exchange determines to amend the criteria or rate applicable to the Step-Up Added Liquidity Rebate prior to the end of the sunset period. At least one other competing equities exchange provided a similar sunset period in its fee schedule for one of its enhanced rebates.¹⁹

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange believes that the proposed change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Intramarket Competition

The Exchange does not believe that the proposal will impose any burden on intramarket competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes the Step-Up Added Liquidity Rebate, as modified by this proposal, will continue to incentivize Equity Members to submit additional orders that add liquidity to the Exchange, thereby contributing to a deeper and more liquid market and promoting price discovery and market quality on the Exchange to the benefit of all market participants and enhancing the attractiveness of the Exchange as a trading venue, which the Exchange believes, in turn, would continue to encourage market participants to direct additional order flow to the Exchange. Greater liquidity benefits all Equity Members by providing more trading opportunities and encourages Equity Members to send additional orders to the Exchange, thereby contributing to robust levels of liquidity, which benefits all market participants. As described above, the opportunity to qualify for the proposed new Step-Up Added Liquidity Rebate, and thus receive the proposed rebate for qualifying executions of orders in securities priced at or above \$1.00 per share that add displayed volume will continue to be available to all Equity Members that meet the associated volume requirement, and the

¹⁷ See Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37499 (June 29, 2005).

¹⁸ See *supra* note 11.

¹⁹ See *id.*

Exchange believes the proposed extension of the sunset period is reasonably related to the enhanced market quality that the Step-Up Added Liquidity Rebate is designed to promote. As such the Exchange does not believe the proposed changes would impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purpose of the Act.

The Exchange believes its proposal to extend the sunset period in the Fee Schedule for the Step-Up Added Liquidity Rebate will not impose any burden on intramarket competition not necessary or appropriate in furtherance of the purposes of the Act because it will provide clarity to Equity Members that, unless the Exchange determines to amend or otherwise modify the Step-Up Added Liquidity Rebate, the Step-Up Added Liquidity Rebate will be discontinued at the end of the sunset period. This will allow Equity Members to take into account that the enhanced rebate provided for by the Step-Up Added Liquidity Rebate may be discontinued at the end of the sunset period unless the Exchange announces otherwise. The Exchange further notes that it will issue an alert to market participants should the Exchange determine that the Step-Up Added Liquidity Rebate will expire earlier than November 30, 2023, or if the Exchange determines to amend the criteria or rate applicable to the Step-Up Added Liquidity Rebate prior to the end of the sunset period. At least one other competing equities exchange provided a similar sunset period in its fee schedule for one of its enhanced rebates.²⁰

Intermarket Competition

The Exchange believes its proposal will benefit competition, and the Exchange notes that it operates in a highly competitive market. The Exchange notes that by extending its sunset period to November 2023, its program has a sunset period similar to that of at least one other equities exchange.²¹ Equity Members have numerous alternative venues they may participate on and direct their order flow to, including fifteen other equities exchanges and numerous alternative trading systems and other off-exchange venues. As noted above, as of September 29, 2023, based on publicly available information, no single registered equities exchange currently has more than approximately 15–16% of the total market share of executed volume of equities trading for the month of

September 2023.²² Thus, in such a low-concentrated and highly competitive market, no single equities exchange possesses significant pricing power in the execution of order flow, and the Exchange represents approximately 1.79% of the overall market share as of September 29, 2023 for the month of September 2023.²³ Moreover, the Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can shift order flow in response to new or different pricing structures being introduced to the market. Accordingly, competitive forces constrain the Exchange's transaction fees and rebates generally, including with respect to the criteria for Equity Members to achieve the Step-Up Added Liquidity Rebate, and market participants can readily choose to send their orders to other exchanges and off-exchange venues if they deem rebate criteria at those other venues to be more favorable.

As described above, the proposed changes represent a competitive proposal through which the Exchange is seeking to continue to encourage additional order flow to the Exchange through a volume-based incentive that is comparable to the criteria for volume-based incentives adopted by at least one other competing exchange that has a similar sunset period for a specific enhanced rebate that adds liquidity to that market.²⁴ Accordingly, the Exchange believes that its proposal would not burden, but rather promote, intermarket competition by enabling it to better compete with other exchanges that offer similar pricing incentives to market participants that achieve certain volume criteria and thresholds.

Additionally, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system “has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.”²⁵ The fact that this market is competitive has also long been recognized by the courts. In *NetCoalition v. Securities and*

Exchange Commission, the D.C. circuit stated: “[n]o one disputes that competition for order flow is ‘fierce.’ . . . As the SEC explained, ‘[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their routing agents, have a wide range of choices of where to route orders for execution’; [and] ‘no exchange can afford to take its market share percentages for granted’ because ‘no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers’ . . .”²⁶ Accordingly, the Exchange does not believe its proposed pricing changes impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A)(ii) of the Act,²⁷ and Rule 19b-4(f)(2)²⁸ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or

²⁰ See *NetCoalition v. SEC*, 615 F.3d 525, 539 (D.C. Cir. 2010) (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74782–83 (December 9, 2008) (SR–NYSE–2006–21)).

• Send an email to rule-comments@sec.gov. Please include file number SR-PEARL-2023-59 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-PEARL-2023-59. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-PEARL-2023-59 and should be submitted on or before November 24, 2023.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁹

Sherry R. Haywood,

Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #20026 and #20027;
FLORIDA Disaster Number FL-20000]

Administrative Declaration of a Disaster for the State of Florida

AGENCY: Small Business Administration.

ACTION: Notice.

SUMMARY: This is a notice of an Administrative declaration of a disaster for the State of Florida dated 10/30/2023.

Incident: Tornado.

Incident Period: 10/12/2023.

DATES: Issued on 10/30/2023.

Physical Loan Application Deadline Date: 12/29/2023.

Economic Injury (EIDL) Loan Application Deadline Date: 07/30/2024.

ADDRESSES: Submit completed loan applications to: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT:

Alan Escobar, Office of Disaster Recovery & Resilience, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205-6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the Administrator's disaster declaration, applications for disaster loans may be filed at the address listed above or other locally announced locations.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: Citrus.

Contiguous Counties:

Florida: Hernando, Levy, Marion, Sumter.

The Interest Rates are:

	Percent
<i>For Physical Damage:</i>	
Homeowners with Credit Available Elsewhere	5.000
Homeowners without Credit Available Elsewhere	2.500
Businesses with Credit Available Elsewhere	8.000
Businesses without Credit Available Elsewhere	4.000
Non-Profit Organizations with Credit Available Elsewhere ...	2.375
Non-Profit Organizations without Credit Available Elsewhere	2.375
<i>For Economic Injury:</i>	
Business and Small Agricultural Cooperatives without Credit Available Elsewhere	4.000
Non-Profit Organizations without Credit Available Elsewhere	2.375

The number assigned to this disaster for physical damage is 20026C and for economic injury is 200270.

The State which received an EIDL Declaration is Florida.

²⁹ 17 CFR 200.30-3(a)(12).

BILLING CODE 8026–09–P

SOCIAL SECURITY ADMINISTRATION

[Docket No. SSA–2023–2011]

Privacy Act of 1974; Matching Program

AGENCY: Social Security Administration (SSA).

ACTION: Notice of a new matching program.

SUMMARY: In accordance with the provisions of the Privacy Act, as amended, this notice announces a new matching program with the Centers for Medicare & Medicaid Services (CMS). Under this matching program, the CMS will disclose to SSA certain individuals' admission and discharge information for care received in a nursing care facility covered by the agreement. SSA will use this information to administer the Supplemental Security Income (SSI) program efficiently and to identify Special Veterans' Benefits (SVB) beneficiaries who are no longer residing outside of the United States.

DATES: The deadline to submit comments on the proposed matching program is December 4, 2023.

The matching program will be applicable on December 20, 2023, or once a minimum of 30 days after publication of this notice has elapsed, whichever is later. The matching program will be in effect for a period of 18 months.

ADDRESSES: You may submit comments by any one of three methods—internet, fax, or mail. Do not submit the same comments multiple times or by more than one method. Regardless of which method you choose, please state that your comments refer to Docket No. SSA–2023–2011 so that we may associate your comments with the correct regulation.

Caution: You should be careful to include in your comments only information that you wish to make publicly available. We strongly urge you not to include in your comments any personal information, such as Social Security numbers or medical information.

1. *Internet:* We strongly recommend that you submit your comments via the internet. Please visit the Federal eRulemaking portal at <https://www.regulations.gov>. Use the *Search* function to find docket number SSA–2023–2011 and then submit your comments. The system will issue you a tracking number to confirm your submission. You will not be able to view your comment immediately because we must post each submission manually. It may take up to a week for your comments to be viewable.

2. *Fax:* Fax comments to 1(833) 410–1631.

3. *Mail:* Matthew Ramsey, Executive Director, Office of Privacy and Disclosure, Office of the General Counsel, Social Security Administration, G–401 WHR, 6401 Security Boulevard, Baltimore, MD 21235–6401, or emailing Matthew.Ramsey@ssa.gov. Comments are also available for public viewing on the Federal eRulemaking portal at <https://www.regulations.gov> or in person, during regular business hours, by arranging with the contact person identified below.

FOR FURTHER INFORMATION CONTACT:

Interested parties may submit general questions about the matching program to Cynthia Scott, Division Director, Office of Privacy and Disclosure, Office of the General Counsel, Social Security Administration, G–401 WHR, 6401 Security Boulevard, Baltimore, MD 21235–6401, at telephone: (410) 966–1943, or send an email to Cynthia.Scott@ssa.gov.

SUPPLEMENTARY INFORMATION: None.

Matthew Ramsey,

Executive Director, Office of Privacy and Disclosure, Office of the General Counsel.

PARTICIPATING AGENCIES:

SSA and CMS.

AUTHORITY FOR CONDUCTING THE MATCHING PROGRAM:

This matching agreement between CMS and SSA is executed pursuant to the Privacy Act of 1974, 5 U.S.C. 552a, as amended by the Computer Matching and Privacy Protection Act of 1988, Public Law 100–503, and the regulations promulgated thereunder.

Legal authority for the SSI portion of the matching program is contained in sections 1611(e)(1) and 1631(f) of the Social Security Act (Act) (42 U.S.C. 1382(e)(1) and 1383(f)), and 20 Code of Federal Regulations (CFR) 416.211. Section 1611(e)(1)(B) of the Act (42 U.S.C. 1382(e)(1)(B)) limits the amount of SSI benefits that eligible individuals or their eligible spouse may receive when that individual is, throughout any month, in a medical treatment facility receiving payments (with respect to such individual or spouse), under a State plan approved under title XIX of the Act, or the amount of benefits an eligible child under the age of 18 may receive who is receiving payments under any health insurance policy issued by a private provider.

Sections 801 and 806(a) and (b) of the Act (42 U.S.C. 1001 and 1006(a) and (b)) contain the legal authorities for the SVB portion of the matching program.

Section 1631(f) of the Act (42 U.S.C. 1383(f)) requires CMS to provide SSA with “such information as the Commissioner of [SSA] needs for purposes of determining eligibility for or amount of benefits, or verifying other information with respect thereto.”

Additional legal authority for CMS’ disclosures under this agreement is 45 CFR 164.512(a) (“Standard: Uses and disclosures required by law,” also referred to as the Health Insurance Portability and Accountability Act of 1996 Privacy Rule). The legal authority for SSA to reimburse CMS under this interagency transaction is the Economy Act, 31 U.S.C. 1535.

PURPOSE(S):

This matching program establishes the conditions under which CMS will disclose to SSA certain individuals’ admission and discharge information for care received in a nursing care facility covered by the agreement. SSA will use this information to administer the SSI program efficiently and to identify SVB beneficiaries who are no longer residing outside of the United States.

CATEGORIES OF INDIVIDUALS:

The individuals whose information is involved in this matching program are recipients of SSI and SVB benefits.

CATEGORIES OF RECORDS:

SSA will provide CMS with a monthly finder file, which will be extracted from SSA’s SSI and SVB’s records. The finder file will consist of data elements related to an individual’s SSI/SVB eligibility. CMS will match the SSA finder file against data maintained pursuant to the Long Term Care-Minimum Data Set (LTC/MDS) systems of records.

SYSTEM(S) OF RECORDS:

SSA will provide CMS with a monthly finder file, which will be extracted from SSA’s SSI and SVB’s records, 60–0103, last fully published on January 11, 2006 (71 FR 1830); and amended on December 10, 2007 (72 FR 69723), July 3, 2018 (83 FR 31250–31251), and November 1, 2018 (83 FR 54969).

CMS will match the SSA finder file against data maintained pursuant to the LTC/MDS (System Number 09–70–0528) SOR, last fully published on March 19, 2007 (72 FR 12801), and amended on April 23, 2013 (78 FR 23938), May 29, 2013 (78 FR 32257), and February 14, 2018 (83 FR 6591); and submit its response file to SSA.

BILLING CODE 4191–02–P

SURFACE TRANSPORTATION BOARD

Release of Waybill Data

The Surface Transportation Board has received a request from Andrew Sweeting and Louis Preonas of University of Maryland (WB23–57–10/26/23) for permission to use data from the Board’s annual 1984–2021 unmasked Carload Waybill Sample. A copy of this request may be obtained from the Board’s website under docket no. WB23–57.

The waybill sample contains confidential railroad and shipper data; therefore, if any parties object to these requests, they should file their objections with the Director of the Board’s Office of Economics within 14 calendar days of the date of this notice. The rules for release of waybill data are codified at 49 CFR 1244.9.

Contact: Alexander Dusenberry, (202) 245–0319.

Regena Smith-Bernard,
Clearance Clerk.

DEPARTMENT OF TRANSPORTATION

Maritime Administration

Decommissioning and Disposition of the National Historic Landmark Nuclear Ship Savannah; Notice of Public Meeting

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Notice.

SUMMARY: The Maritime Administration (MARAD) announces a public meeting of the Peer Review Group (PRG) which will be held online or by phone only. The PRG was established pursuant to the requirements of the National Historic Preservation Act (NHPA) and its implementing regulations to plan for the decommissioning and disposition of the Nuclear Ship Savannah (NSS). PRG membership is comprised of officials from the U.S. Department of Transportation, MARAD, the U.S. Nuclear Regulatory Commission (NRC), the Advisory Council on Historic Preservation (ACHP), and the Maryland State Historic Preservation Officer (SHPO) and other consulting parties. The public meeting affords the public an opportunity to participate in PRG activities, including reviewing and providing comments on draft deliverables. MARAD encourages public participation and provides the PRG meeting information below.

DATES: The meeting will be held on Tuesday, November 21, 2023, from 2:30 p.m. to 4 p.m. Eastern Standard Time (EST). Requests to attend the meeting virtually must be received by 5 p.m. EST, Tuesday, November 14, 2023, to receive instructions to participate online. Requests for accommodations for a disability must also be received by Tuesday, November 14, 2023.

ADDRESSES: The meeting will be held online or by phone.

FOR FURTHER INFORMATION CONTACT:

Erhard W. Koehler, (202) 680–2066 or via email at marad.history@dot.gov. You may send mail to N.S. Savannah/Savannah Technical Staff, Pier 13 Canton Marine Terminal, 4601 Newgate Avenue, Baltimore, MD 21224, ATTN: Erhard Koehler.

SUPPLEMENTARY INFORMATION:

I. Background

The decommissioning and disposition of the NSS is an Undertaking under Section 106 of the NHPA. Section 106 requires that Federal agencies consider views of the public regarding their Undertakings; therefore, in 2020, MARAD established a Federal docket at <https://www.regulations.gov/docket/MARAD-2020-0133> to provide public notice about the NSS Undertaking. The Federal docket was also used in 2021 to solicit public comments on the future uses of the NSS. MARAD is continuing to use this same docket to take in public comment, share information, and post agency actions.

The NHPA Programmatic Agreement (PA) for the Decommissioning and Disposition of the NSS is available on the MARAD docket located at www.regulations.gov under docket id “MARAD–2020–0133.” The PA stipulates a deliberative process by which MARAD will consider the disposition of the NSS. This process requires MARAD to make an affirmative, good-faith effort to preserve the NSS. The PA also establishes the PRG in Stipulation II. The PRG is the mechanism for continuing consultation during the effective period of the PA and its members consist of the signatories and concurring parties to the PA, as well as other consulting parties. The PRG members will provide individual input and guidance to MARAD regarding the implementation of stipulations in the PA. PRG members and members of the public are invited to provide input by attending bi-monthly meetings and reviewing and commenting on deliverables developed as part of the PA.

II. Agenda

The agenda will include (1) welcome and introductions; (2) program update; (3) status of PA stipulations; (4) other business; and (5) date of next meeting. The agenda topic titled PA stipulations involves deliverables identified in the PA. MARAD will provide status updates for the following items: the Disposition Alternatives Study; the Notice of Availability/Request for Information; the License Termination Plan; the Collections Management Plan, and the Historic Context. The agenda will also be posted on MARAD's website at <https://www.maritime.dot.gov/outreach/history/maritime-administration-history-program> and on the MARAD docket located at www.regulations.gov under docket id "MARAD-2020-0133."

III. Public Participation

The meeting will be open to the public. Members of the public who wish to attend online must RSVP to the person listed in the **FOR FURTHER INFORMATION CONTACT** section with your name and affiliation. Members of the public may also call-in using the following number: 312-600-3163 and conference ID: 930 866 814#.

Special services. The U.S. Department of Transportation is committed to providing all participants equal access to this meeting. If you need alternative formats or services such as sign language, interpretation, or other ancillary aids, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

(Authority: 49 CFR 1.81 and 1.93; 36 CFR part 800; 5 U.S.C. 552b.)

By Order of the Maritime Administrator.

T. Mitchell Hudson, Jr.,

Secretary, Maritime Administration.

BILLING CODE 4910-81-P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Actions

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of one or more persons that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied.

All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

DATES: See **SUPPLEMENTARY INFORMATION** section for applicable date(s).

FOR FURTHER INFORMATION CONTACT:

OFAC: Associate Director for Global Targeting, tel.: 202-622-2420; Assistant Director for Licensing, tel.: 202-622-2480; Assistant Director for Regulatory Affairs, tel.: 202-622-4855; or Assistant Director for Sanctions Compliance & Evaluation, tel.: 202-622-2490.

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website (<https://www.treasury.gov/ofac>).

Notice of OFAC Actions

A. Blocking of Property and Interests in Property Pursuant to E.O. 14014

On October 31, 2023, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons are blocked under the relevant sanctions authority listed below.

Individuals

1. AUNG, Swe Swe, Burma; DOB 1960; nationality Burma; Gender Female (individual) [BURMA-EO14014].

Designated pursuant to section 1(a)(iii)(B) of Executive Order 14014 of February 10, 2021, "Blocking Property With Respect to the Situation in Burma", 86 FR 9429 ("E.O. 14014") for being or having been a leader or official of the Government of Burma on or after February 2, 2021.

2. MIN, Zaw, Burma; DOB 1970; nationality Burma; Gender Male (individual) [BURMA-EO14014].

Designated pursuant to section 1(a)(iii)(B) of E.O. 14014 for being or having been a leader or official of the Government of Burma on or after February 2, 2021.

3. THAN, Charlie, Room No 23, Building No 25, Palm Village Villa, Yankin Yanshin Street, Yangon, Burma; DOB 1950; nationality Burma; Gender Male (individual) [BURMA-EO14014].

Designated pursuant to section 1(a)(iii)(B) of E.O. 14014 for being or having been a leader or official of the Government of Burma on or after February 2, 2021.

4. AYE, Maung Maung (a.k.a. "AYE, Mg Mg"), Burma; DOB 1962; POB Burma; nationality Burma; Gender Male (individual) [BURMA-EO14014].

Designated pursuant to section 1(a)(iii)(A) of E.O. 14014 for being or having been a leader or official the military or security forces of Burma, or any successor entity to any of the foregoing.

5. ZAW, Kan, Burma; DOB 11 Oct 1954; POB Salin Township, Magwe Region, Burma;

nationality Burma; Gender Male (individual) [BURMA-EO14014].

Designated pursuant to section 1(a)(iii)(B) of E.O. 14014 for being or having been a leader or official of the Government of Burma on or after February 2, 2021.

Entities

1. SKY ROYAL HERO COMPANY LIMITED (a.k.a. SKY ROYAL HERO LTD; a.k.a. "SKY ROYAL HERO"), No. LB-B2-14A, B, Sagawah Street, Malikha Housing, 14/Bawamyint Quarter, Thingangyun Township, Yangon, Burma; Organization Established Date 28 Nov 2019; Organization Type: Non-specialized wholesale trade; Business Registration Number 123614291 (Burma) [BURMA-EO14014].

Designated pursuant to section 1(a)(i) of E.O. 14014 for operating in the defense sector of the Burmese economy.

2. SUNTAC TECHNOLOGIES COMPANY LIMITED (a.k.a. SUNTAC GROUP; a.k.a. SUNTAC TECHNOLOGIES; a.k.a. SUNTAC TECHNOLOGIES CO., LTD.), Room 5, 7, 8, Building 5, Building 8, MICT Park, Hlaing Township, Yangon Region, Burma; Bldg 5, Room 5/7/8/12 Myanmar ICP Park, Hlaing Po 1052 Township, Yangon, Burma; Organization Established Date 28 Dec 2000; Organization Type: Mining of hard coal; alt. Organization Type: Mining of lignite; Business Registration Number 181472561 (Burma) [BURMA-EO14014] (Linked To: AUNG, Sit Taing).

Designated pursuant to section 1(a)(vii) of E.O. 14014 for being owned or controlled by, or having acted or purported to act for or on behalf of, directly or indirectly, Sit Taing Aung, a person whose property and interests in property are blocked pursuant to E.O. 14014.

3. SUNTAC INTERNATIONAL TRADING COMPANY LIMITED (a.k.a. SUN TAC INTERNATIONAL TRADING CO., LIMITED; a.k.a. SUN TEC INTERNATIONAL TRADING CO., LIMITED; a.k.a. SUNTAC GROUP; a.k.a. BILLING CODE 4810-AL-P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Form 8946

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Internal Revenue Service (IRS), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on continuing information collections, as required by the Paperwork Reduction Act of 1995. The IRS is soliciting comments concerning the PTIN Supplemental Application For Foreign Persons Without a Social Security Number. **DATES:** Written comments should be received on or before January 2, 2024 to be assured of consideration.

ADDRESSES: Direct all written comments to Andres Garcia, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or by email to pra.comments@irs.gov.

Please reference the "OMB number 1545-2189" in the subject line of the message.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the form and instructions should be directed to Sara Covington, (202) 317-5744 or Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington DC 20224, or through the internet, at Sara.L.Covington@irs.gov.

SUPPLEMENTARY INFORMATION:

Title: PTIN Supplemental Application For Foreign Persons Without a Social Security Number.

OMB Number: 1545-2189.

Form Number: 8946.

Abstract: Form 8946 is used by foreign persons without a social security number (SSN) who want to prepare tax returns for compensation. Foreign persons who are tax return preparers must obtain a preparer tax identification number (PTIN) to prepare tax returns for compensation. Generally, the IRS requires an individual to provide an SSN to get a PTIN. Because foreign persons cannot get an SSN, they must file Form 8946 to establish their identity and status as a foreign person.

Current Actions: There were editorial edits made to the internal only box of form 8946. However, these edits did not affect the burden estimates.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profit organizations.

Estimated Number of Respondents: 4,466.

Estimated Time per Respondent: 5.27 hrs.

Estimated Total Annual Burden Hours: 23,536.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) whether the collection of information

is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: October 30, 2023.

Sara L. Covington,

IRS Tax Analyst.

BILLING CODE 4830-01-P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Extension of Information Collection Request Submitted for Public Comment; Comment Request Relating to the Employee Plans Determination Letter Program

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Internal Revenue Service, as part of its continuing effort to reduce paperwork and respondent burden, invites the public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. The IRS is soliciting comments concerning the application form for a determination letter for Employee Benefit Plans.

DATES: Written comments should be received on or before January 2, 2024 to be assured of consideration.

ADDRESSES: Direct all written comments to Andres Garcia, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or by email to pra.comments@irs.gov. Please include "OMB Number 1545-0197" in the subject line of the message.

Requests for additional information or copies of the regulations should be directed to Sara Covington, at (202) 317-5744 or Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or through the internet, at sara.l.covington@irs.gov.

SUPPLEMENTARY INFORMATION:

Title: Employee Plans Determination Letter Program.

OMB Control Number: 1545–0197.
Form Number: 5300.

Abstract: Internal Revenue Code sections 401(a) and 501(a) set out requirements for qualification of employee benefit trusts and the tax-exempt status of these trusts. Form 5300 is used to request a determination letter from the IRS for the qualification of a defined benefit or a defined contribution plan and the exempt status of any related trust.

Current Actions: There is no change to the burden previously approved by OMB. This request is being submitted for renewal purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations and individuals.

Estimated Number of Respondents: 85,000.

Estimated Time per Respondent: 84 hours, 43 min.

Estimated Total Annual Burden Hours: 7,201,200.

The following paragraph applies to all the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number.

Books or records relating to a collection of information must be retained if their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Desired Focus of Comments: The Internal Revenue Service (IRS) is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., by

permitting electronic submissions of responses.

Comments submitted in response to this notice will be summarized and/or included in the ICR for OMB approval of the extension of the information collection; they will also become a matter of public record.

Approved: October 30, 2023.

Sara L. Covington,

IRS Tax Analyst.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Requesting Comments on Employer's Annual Federal Unemployment Forms

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Internal Revenue Service, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. The IRS is soliciting comments concerning Form 940, Employer's Annual Federal Unemployment (FUTA) Tax Return, Form 940–PR, Planilla para la Declaración Federal Anual del Patrono de la Contribución Federal para el Desempleo (FUTA), and their associated forms and schedules.

DATES: Written comments should be received on or before January 2, 2024] to be assured of consideration.

ADDRESSES: Direct all written comments to Andres Garcia, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or by email to pra.comments@irs.gov. Include OMB Control No. 1545–0028 in the subject line of the message.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this collection should be directed to Jon Callahan, (737) 800–7639, at Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or through the internet at jon.r.callahan@irs.gov.

SUPPLEMENTARY INFORMATION: The IRS is currently seeking comments concerning the following information collection tools, reporting, and record-keeping requirements:

Title: Employer's Annual Federal Unemployment (FUTA) Tax Return.

OMB Number: 1545–0028.

Form Numbers: Form 940, Form 940–PR, Form 940–V, Form 940–V (PR), Schedule A (Form 940), Schedule R (Form 940), and Anexo A (Formulario 940–PR).

Abstract: Internal Revenue Code section 3301 imposes a tax on employers based on the first \$7,000 of taxable wages paid to each employee. The tax is computed and reported on Forms 940 and 940–PR (Puerto Rico employers only). The IRS uses the information on Forms 940 and 940–PR to ensure that employers have reported and figured the correct FUTA wages and tax.

Current Actions: There is no change to the existing collection. However, the estimated number of responses has been updated based on current filing data. Corrections were also made to the burden calculations for the 940–PR forms and schedules.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profit organizations, individuals, or households, and farms.

Estimated Number of Responses: 7,128,700.

Estimated Time Per Respondent: 12 hours, 22 minutes.

Estimated Total Annual Burden Hours: 88,115,561.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of

information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: October 30, 2023.

Jon R. Callahan,

Senior Tax Analyst.

UNIFIED CARRIER REGISTRATION PLAN

Sunshine Act Meetings

TIME AND DATE: November 9, 2023, 12:00 p.m. to 3:00 p.m., Eastern time.

PLACE: This meeting will be accessible via conference call and via Zoom Meeting and Screenshare. Any interested person may call (i) 1–929–205–6099 (US Toll) or 1–669–900–6833 (US Toll), Meeting ID: 996 3685 6347, to listen and participate in this meeting. The website to participate via Zoom Meeting and Screenshare is <https://kellen.zoom.us/join/99636856347>.

STATUS: This meeting will be open to the public.

MATTERS TO BE CONSIDERED: The Unified Carrier Registration Plan Audit Subcommittee (the “Subcommittee”) will continue its work in developing and implementing the Unified Carrier Registration Plan and Agreement. The subject matter of this meeting will include:

Proposed Agenda

I. Call to Order—UCR Audit Subcommittee Chair

The UCR Audit Subcommittee Chair will welcome attendees, call the meeting to order, call roll for the Audit Subcommittee, confirm whether a quorum is present, and facilitate self-introductions.

II. Verification of Publication of Meeting Notice—UCR Executive Director

The UCR Executive Director will verify the publication of the meeting notice on the UCR website and distribution to the UCR contact list via email followed by the subsequent publication of the notice in the **Federal Register**.

III. Review and Approval of Subcommittee Agenda and Setting of Ground Rules—UCR Audit Subcommittee Chair

For Discussion and Possible Subcommittee Action

The agenda will be reviewed, and the Subcommittee will consider adoption.

Ground Rules

Subcommittee action only to be taken in designated areas on the agenda.

IV. Review and Approval of Subcommittee Minutes From the August 10, 2023 Meeting—UCR Audit Subcommittee Chair

For Discussion and Possible Subcommittee Action

Draft minutes from the August 10, 2023, Subcommittee meeting via teleconference will be reviewed. The Subcommittee will consider action to approve.

V. Discuss Options To Replace the Retreat Audit Program With a Program That Relies on the NRS Roadside Inspection Data—UCR Audit Subcommittee Chair, UCR Audit Subcommittee Vice-Chair, DSL Transportation Representative, and Seikosoftware Representative

For Discussion and Possible Subcommittee Action

The UCR Audit Subcommittee Chair, UCR Audit Subcommittee Vice-Chair, DSL Transportation Representative, and Seikosoftware Representative will lead a discussion on options to replace the Retreat Audit Program currently utilized by the States with an automated roadside inspection data driven audit for non-IRP and IRP plated commercial motor vehicles (CMVs) and the motor carriers operating this type of registered equipment. The Subcommittee may take action to recommend to the Board a modification to the current retreat audit program to one that relies on NRS roadside inspection data.

VI. Announcement of the Vice-Chair Position for the Audit Subcommittee—UCR Audit Subcommittee Chair and UCR Audit Subcommittee Vice-Chair

For Discussion and Possible Subcommittee Action

The UCR Audit Subcommittee Chair and UCR Audit Subcommittee Vice-Chair will announce the Subcommittee member receiving the most votes for the position of Vice-Chair of the Audit Subcommittee and address questions. The Subcommittee may take action to recommend that the UCR Board Chair appoint the Subcommittee member receiving the most votes to the position of Vice-Chair of the Audit Subcommittee.

VII. General Discussion on a Policy To Close a Participating and Non-Participating Focused Anomaly Review (FAR)—UCR Audit Subcommittee Chair, UCR Audit Subcommittee Vice-Chair, and DSL Transportation Representative

For Discussion and Possible Subcommittee Action

The UCR Audit Subcommittee Chair, UCR Audit Subcommittee Vice-Chair, and DSL Transportation Representative will lead a discussion on required steps to close both participating and non-participating state FARs. The Subcommittee may take action to recommend to the Board a required policy for the closing of FARs from participating and non-participating states.

VIII. General Discussion of Hot Shot Auto Transporters and the Negative Impact They Have on the UCR and Safety—UCR Audit Subcommittee Chair, UCR Audit Subcommittee Vice-Chair, and DSL Transportation Representative

The UCR Audit Subcommittee Chair, UCR Audit Subcommittee Vice-Chair, and DSL Transportation Representative will lead a discussion on options to address the potential underpayment of hot shot transporters.

IX. 2021 UCR Financial Audit Update—UCR Executive Director and Kellen Representative

The UCR Executive Director and Kellen Representative will provide an update on the 2021 UCR financial audit conducted by Warren Averett.

X. Update on the Quarterly Question and Answer Session for State Auditors—UCR Audit Subcommittee Chair, UCR Audit Subcommittee Vice-Chair, and UCR Executive Director

The UCR Audit Subcommittee Chair, UCR Audit Subcommittee Vice-Chair and UCR Executive Director will lead discussion of possible future items for discussion for the quarterly question and answer session for state auditors, and also its overall value and continuation.

XI. Other Business—UCR Audit Subcommittee Chair

The UCR Audit Subcommittee Chair will call for any other items Subcommittee members would like to discuss.

XII. Adjournment—UCR Audit Subcommittee Chair

The UCR Audit Subcommittee Chair will adjourn the meeting.

The agenda will be available no later than 5:00 p.m. Eastern time, November 1, 2023 at: <https://plan.ucr.gov>.

CONTACT PERSON FOR MORE INFORMATION:

Elizabeth Leaman, Chair, Unified Carrier Registration Plan Board of Directors, (617) 305–3783, eleaman@board.ucr.gov.

Alex B. Leath,

Chief Legal Officer, Unified Carrier Registration Plan.

BILLING CODE 4910–YL–P

DEPARTMENT OF VETERANS AFFAIRS

Findings of Research Misconduct

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Department of Veterans Affairs (VA) gives notice, pursuant to Veterans Health Administration (VHA) Handbook 1058.02, Research Misconduct, dated February 7, 2014,

paragraph 6.k., that the Department has made findings of research misconduct against Hee-Jeong Im Sampen, Ph.D., a research biologist at the Jesse Brown VA Medical Center (VAMC) in Chicago, Illinois. The findings were upheld on appeal per VHA Handbook 1058.02, paragraph 25, which is the version of the applicable VHA policy that was in effect at the time the research misconduct investigation commenced.

FOR FURTHER INFORMATION CONTACT: Shara Kabak, Research Misconduct Officer, Office of Research Oversight (10RO), 810 Vermont Avenue NW, Washington, DC 20420, 202-632-7620 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: VA has made final findings of research misconduct against Hee-Jeong Im Sampen, Ph.D. (“Respondent”), a research biologist at the Jesse Brown VAMC in Chicago, Illinois.

Based on the recommended findings of a joint investigation conducted by Rush University and Jesse Brown VAMC, the Department found that the Respondent engaged in research misconduct by intentionally, knowingly and/or recklessly falsifying/fabricating data included in the following three published papers, unpublished manuscript, poster presentation and grant application:

- PKC δ Null Mutations in a Mouse Model of Osteoarthritis Alter Osteoarthritic Pain Independently of Joint Pathology by Augmenting NGF/TrkA-Induced Axonal Outgrowth. *Annals of the Rheumatic Diseases*. 2016 Dec;75(12):2133–2141. doi: 10.1136/annrheumdis-2015-208444 (hereafter “*Ann Rheum Dis*. 2016”);
- Environmental Disruption of Circadian Rhythm Predisposes Mice to

Osteoarthritis-Like Changes in Knee Joint. *Journal of Cellular Physiology*. 2015 Sep;230(9):2174–2183. doi: 10.1002/jcp.24946 (hereafter “*J Cell Physiol*. 2015a”);

- Development of an Experimental Animal Model for Lower Back Pain by Percutaneous Injury-Induced Lumbar Facet Joint Osteoarthritis. *Journal of Cellular Physiology*. 2015 Nov;230(11):2837–2847. doi: 10.1002/jcp.25015 (hereafter “*J Cell Physiol*. 2015b”);

- “NGF Selective Inhibition Therapy on Facet Joint Pain”—DRAFT manuscript for *Arthritis and Rheumatism* (hereafter “*Arthritis Rheum* manuscript”);

- “Inhibition of Glial NF κ B Abolished Pain in a Knee Osteoarthritis Model”—2016 poster for the Osteoarthritis Research Society International (hereafter “OARSI presentation 2016”); and

- VA Biomedical Laboratory Research and Development (BLR&D) Merit Award proposal, I01 BX002647–01, “Osteoarthritis and Knee Joint Pain,” submitted on September 18, 2013 (hereafter “VA Merit Award proposal”).

Specifically, the Department found that the Respondent intentionally, knowingly and/or recklessly committed research misconduct by:

- Fabricating/falsifying images in Figures 1A and 1C, and inflating the “n” (sample size) values in Figures 1B and 1E, of *Ann Rheum Dis*. 2016;
- Fabricating/falsifying images in Figure 4A of *J Cell Physiol*. 2015a;
- Fabricating/falsifying images in Figures 7A and 7B, and inflating the “n” values in Figure 4A, of *J Cell Physiol*. 2015b;

- Fabricating/falsifying an image and inflating the “n” values in Figure 1A of the *Arthritis Rheum* manuscript;

- Fabricating/falsifying data and inflating “n” values in Figures in the OARSI presentation 2016; and

- Fabricating/falsifying images in Figures 1A, 4A, 6, 9, 12, and 17B of the VA Merit Award proposal.

Based on these findings of research misconduct, upheld by the Under Secretary for Health on appeal in a decision dated April 24, 2023, the Department has imposed the following corrective actions:

- (1) Permanent prohibition from conducting VA research;
- (2) Publication of VA’s findings of research misconduct;
- (3) Notification to the relevant Federal funding agencies of the findings;
- (4) Requesting retraction of the affected publications;
- (5) Prohibition from publishing the *Arthritis Rheum* manuscript; and
- (6) Prohibition from re-presenting the content of the OARSI presentation 2016.

Signing Authority

Denis McDonough, Secretary of Veterans Affairs, approved and signed this document on October 26, 2023, and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs.

Luvenia Potts,

Regulation Development Coordinator, Office of Regulation Policy & Management, Office of General Counsel, Department of Veterans Affairs.

FEDERAL REGISTER

Vol. 88

Friday,

No. 212

November 3, 2023

Part II

Securities and Exchange Commission

17 CFR Part 240

Reporting of Securities Loans; Final Rule

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

[Release No. 34–98737; File No. S7–18–21]

RIN 3235–AN01

Reporting of Securities Loans

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Securities and Exchange Commission (“SEC” or “Commission”) is adopting a new rule under the Securities Exchange Act of 1934 (“Exchange Act”) to increase the transparency and efficiency of the securities lending market by requiring certain persons to report information about securities loans to a registered national securities association (“RNSA”). The new rule also requires certain confidential information to be reported to an RNSA to enhance an RNSA’s oversight and enforcement functions. Further, the new rule requires that an RNSA make certain information it receives, along with daily information pertaining to the aggregate transaction activity and distribution of loan rates for each reportable security, available to the public.

DATES:

Effective date: January 2, 2024.

Compliance date: The applicable compliance dates are discussed in Part VIII of this release.

FOR FURTHER INFORMATION CONTACT:

Elizabeth Sandoe, Senior Special Counsel, James Curley, Special Counsel, Elisabeth Van Derslice, Attorney-Advisor, Theresa Hajost, Special Counsel, Brendan McLeod, Attorney-Advisor, Roland Lindmayer, Attorney-Advisor, Josephine J. Tao, Assistant Director, Office of Trading Practices, or Carol McGee, Associate Director, Office of Derivatives Policy and Trading Practices, Division of Trading and Markets, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–7010, at (202) 551–5777.

SUPPLEMENTARY INFORMATION: The Commission is adopting 17 CFR 240.10c–1a (“final Rule 10c–1a” or “final rule”) under the Exchange Act, which requires covered persons to provide to an RNSA information concerning certain securities loans, in the format and manner required by an RNSA, and within specified time periods. The final rule requires an RNSA to make publicly available certain information it receives, within specified time periods, and to keep confidential

certain information it receives. The final rule contains requirements regarding an RNSA’s data retention and availability and permits an RNSA to establish and collect reasonable fees.

I. Introduction

The securities lending market is opaque.¹ There is a general lack of comprehensive information on current market conditions in the securities lending market. Although various market participants, such as certain registered investment companies (“investment companies”), are required to periodically make certain disclosures regarding their securities lending activities,² parties to securities lending

¹ See *Reporting of Securities Loans*, Release No. 34–93613 (Nov. 18, 2021), 86 FR 69802 (Dec. 8, 2021) (“Proposing Release”), 86 FR 69804–21.

² See, e.g., Form N–CEN, Item C.6 (requiring general disclosures relating to an investment company’s securities lending activities); Form N–PORT, Items B.4 and C.12 (requiring disclosure by certain investment companies of certain aggregate information on borrowers of loaned securities and collateral received for loaned securities); 17 CFR 274.101; 17 CFR 274.150. See also *Investment Company Reporting Modernization*, Release No. 34–79095 (Oct. 13, 2016), 81 FR 81870 (Nov. 18, 2016) (discussing, among other things, requirements for securities lending disclosures on Form N–PORT by certain investment companies).

transactions are not currently required to report the material terms of those transactions.³ The lack of public information and data gaps creates inefficiencies in the securities lending market. The gaps in securities lending data render it difficult for end borrowers and lenders alike to ascertain market conditions and to know whether the terms that they receive are consistent with market conditions. These gaps also impact the ability of the Commission, RNSAs and other self-regulatory organizations (“SROs”), and other Federal financial regulators to oversee transactions that are vital to fair, orderly, and efficient markets.⁴ Indeed, the size of the U.S. securities lending market can only be estimated as the data currently available with respect to securities lending transactions are “spotty and incomplete.”⁵ Further, the FSOC 2020 Annual Report noted data gaps in certain important financial markets including transaction data for securities lending arrangements.⁶

Private vendors have attempted to address the opacity in the securities lending market by offering systems that provide data to borrowers and lenders of securities, such as systems that are only available to those who voluntarily provide their transaction data to the

data vendor.⁷ However, data gaps remain despite the private vendor attempts to address opacity in the securities lending market. The private systems are limited to voluntary submissions of data. Further, the data captured by these private vendors is not available to the general public without a subscription, and is not available in one centralized location. Only subscribers to the private vendor have access to such data, which only provides a limited view into securities lending activity. No single vendor has access to pricing information that reflects all securities lending transactions that take place. In addition, data from certain private vendors is limited to loans from a lending program to a broker or dealer and do not capture loans from a broker or dealer to an end borrower. There have also been calls from industry observers and market participants for the Commission to consider measures to provide additional transparency in the securities lending market.⁸

II. Background

Securities lending is the market practice by which securities are transferred temporarily from one party, a securities lender, to another, a securities borrower, for a fee.⁹ A securities loan is typically a fully collateralized transaction. Securities lenders are generally large institutional investors including investment companies, central banks, sovereign wealth funds, pension funds, endowments, and insurance companies.¹⁰ Owners of large, static, unleveraged portfolios, mainly pension funds, increasingly cite securities lending as an important income-enhancing strategy with minimal, or at least controlled, risk.¹¹ This incremental income not only helps defined-benefit pension funds to generate income, but also provides investment company investors with additional returns.¹²

Traditionally, securities lending and borrowing transactions have been conducted on a bilateral basis.¹³ Generally, when an end investor wishes to borrow securities, it may obtain a loan from its broker or dealer from the broker's or dealer's inventory or through customer margin accounts, or the broker

or dealer will borrow the securities from a lending agent with whom it has a relationship and will then re-lend the securities to its customer. Loans from lending programs to brokers or dealers occur in what is referred to by market participants as the “Wholesale market,” while loans from a broker or dealer to the end borrower occur in what is referred to by market participants as the “Customer market” (sometimes also known as the “retail market”). Obtaining a securities loan often involves an extensive search for counterparties by brokers or dealers.¹⁴

Brokers and dealers are the primary borrowers of securities; they borrow for their market making activities or on behalf of their customers.¹⁵ Brokers and dealers who borrow securities typically re-lend those securities or use the securities to cover fails to deliver or short sales arising from proprietary or customer transactions.¹⁶ While the identities of the ultimate securities borrowers are usually unknown, anecdotally, hedge funds rank among the largest securities borrowers and access the lending market mainly through their prime brokers.¹⁷ Brokers and dealers may also lend securities that are owned by the broker or dealer, customer securities that have not been fully paid for (*i.e.*, have been purchased with a margin loan from the broker or dealer), and the securities of customers who have agreed to participate in a fully paid securities lending program offered by their broker or dealer.¹⁸

Other securities lending transactions are often facilitated by a third party. Custodian banks have traditionally been the primary lending agent or intermediary¹⁹ and lend securities on behalf of their customers for a fee.²⁰ Advances in technology and operational efficiency have made it easier to separate securities lending services from custody services. Such developments have given rise to specialist third party agent lenders, who have established themselves as an alternative to custodian banks.²¹ Agent lenders provide potential borrowers with the inventory of securities available for lending on a daily basis.²²

³ See Proposing Release, 86 FR 69803.

⁴ In its 2021 Annual Report, the Financial Stability Oversight Council (“FSOC”) provides that “[c]entralized monitoring of securities lending activities is difficult due to the lack of comprehensive, standardized statistics on securities lending activities . . . the estimated value of securities on loan globally was \$3.1 trillion at the end of September 2021, up from \$2.5 trillion at the end of September 2020 . . . U.S. securities continue to account for the majority of global securities on loan, accounting for 58 percent of global securities on loan as of the end of September 2021.” See FSOC 2021 Annual Report, at 46, available at <https://home.treasury.gov/system/files/261/FSOC2021AnnualReport.pdf>. III. Statutory Mandate

Section 984(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank Act”) added section 10(c) to the Exchange Act to provide the Commission with authority over securities lending.²³ Section 984(b) of the Dodd-Frank Act mandates that the Commission increase transparency of information available to brokers, dealers, and investors.²⁴

On November 18, 2021, to supplement the publicly available information involving securities lending, close the data gaps in this market, and minimize information asymmetries between market participants, the Commission proposed Rule 10c–1 under the Exchange Act (“proposed Rule 10c–1” or “proposed rule”).²⁵ Proposed Rule 10c–1 was designed to provide investors and other market participants with access to pricing and other material information regarding securities lending transactions in a timely manner. The Commission stated that the data collected and made available by the proposed rule would improve price discovery in the securities lending market and lead to a reduction of the information asymmetry faced by end borrowers and beneficial owners in the securities lending market.²⁶ In addition, the Commission stated its preliminary belief that the proposed rule would close securities lending data gaps, increase market efficiency, and lead to increased competition among providers of securities lending analytics services and reduced administrative costs for broker-

dealers and lending programs.²⁷ On balance, the final rule requirements are designed to achieve the objectives of the proposed rule,²⁸ as discussed below, in Parts VII and IX, and are designed to increase the transparency of information available to brokers, dealers, and investors with respect to loans or borrowing securities.

IV. Proposed Rule 10c–1

The Commission proposed that any person that loans a security on behalf of itself or another person (a “Lender”) provide certain securities lending information (“Rule 10c–1 information”) to an RNSA²⁹ in the time periods specified by the proposed rule (*e.g.*, transaction data elements and confidential data elements would be reported within 15 minutes after each loan is effected).³⁰ As proposed, all securities would be within the scope of the rule.³¹

The proposed rule stated that a bank, clearing agency, broker, or dealer that acts as an intermediary to a loan of securities (lending agent) on behalf of a person that owns the loaned securities (beneficial owner) shall provide the Rule 10c–1 information to an RNSA on behalf of the beneficial owner within the time periods specified by the proposed rule or enter into a written agreement with a broker or dealer that agrees to provide the Rule 10c–1 information to an RNSA (reporting agent) in accordance with the proposed rule’s requirements.³² The proposed rule also provided that a beneficial owner would not be required to provide Rule 10c–1 information to an RNSA if a lending agent acts as an intermediary to the loan of securities on behalf of the beneficial owner.³³

The proposed rule would have permitted persons required to report (including intermediaries) to enter into a written agreement with a reporting agent that is a broker or dealer to provide the Rule 10c–1 information to an RNSA.³⁴ Such a reporting agent would be required to establish, maintain, and enforce policies and procedures as well as preserve

records.³⁵ The reporting agent would also be required to provide an RNSA with an updated list of persons on whose behalf the reporting agent is providing information under the proposed rule.³⁶

The proposed rule would have required that an RNSA make certain reported information publicly available as soon as practicable but no later than the next business day.³⁷ To track the securities lending transaction, the proposed rule would require an RNSA to assign each securities lending transaction with a unique transaction identifier.³⁸ Loan modifications would be provided to an RNSA if the modifications to the loan involved any of the terms required to be reported.³⁹ The terms of the loan modification, but not the parties to the loan, would be made public.⁴⁰ In addition, proposed Rule 10c–1 required that by the end of each business day information concerning securities “on loan” and “available to loan” would be provided to an RNSA.⁴¹ Such information would be made publicly available by an RNSA on an aggregated basis per security.⁴²

Not all information reported to an RNSA would have been made publicly available under the proposed rule. Certain information reported to an RNSA would be necessary for regulatory functions, but would not have been made publicly available due to the likelihood that it would identify market participants or reveal investment decisions.⁴³ Proposed Rule 10c–1 would have required an RNSA to keep certain information confidential, subject to the provisions of applicable law.⁴⁴

The proposed rule would have allowed an RNSA to charge fees to lenders, but prohibited an RNSA from charging for or limiting the use of the publicly reported data. Specifically, the proposed rule would have required an RNSA to make the published information available without use restrictions and without charge, for at least five years.⁴⁵

In response to the Proposing Release, the Commission received numerous comments expressing a diversity of

²³ Section 984(a) of the Dodd-Frank Act, now section 10(c)(1) of the Exchange Act, makes it unlawful for any person, directly or indirectly, by the use of any means or instrumentality of interstate commerce or of the mails, or of any facility of any national securities exchange to effect, accept, or facilitate a transaction involving the loan or borrowing of securities in contravention of such rules and regulations as the Commission may prescribe as necessary or appropriate in the public interest or for the protection of investors. 15 U.S.C. 78j(c)(1). Section 10(c)(2) of the Exchange Act states that nothing in section 10(c)(1) may be construed to limit the authority of the appropriate Federal banking agency (as defined in 12 U.S.C. 1813(q)), the National Credit Union Administration, or any other Federal department or agency having a responsibility under Federal law to prescribe rules or regulations restricting transactions involving the loan or borrowing of securities in order to protect the safety and soundness of a financial institution or to protect the financial system from systemic risk. 15 U.S.C. 78j(c)(2).

²⁴ Section 984(b) of the Dodd-Frank Act directs the SEC to “promulgate rules that are designed to increase the transparency of information available to brokers, dealers, and investors with respect to loan or borrowing securities.” Public Law 111–203, sec. 984(b), 124 Stat. 1376 (2010).

perspectives,⁴⁶ which are discussed in detail below. Many commenters supported enhanced transparency of information about securities loans.⁴⁷

⁴⁶ Comment letters to the proposed rule are available at <https://www.sec.gov/comments/s7-18-21/s71821.htm>.

⁴⁷ See, e.g., Letter from Jaime Klima, Chief Regulatory Officer, NYSE Group, Inc. (Jan. 7, 2022) (“NYSE Letter 2”), at 1 (stating that “regulatory oversight of the securities lending market will be meaningfully enhanced if Rule 10c–1 is adopted”); Letter from Marcia E. Asquith, Executive Vice President, FINRA, (Jan. 7, 2022) (“FINRA Letter”), at 1 (stating that “the public dissemination of securities lending information under the Proposal will, among other benefits, improve price discovery in the securities lending market, reduce information asymmetries, close data gaps, and increase market efficiency”); Letter from Kevin Kennedy, Senior Vice President, Nasdaq, Inc. (Jan. 11, 2022) (“Nasdaq Letter”), at 3 (supporting the proposal to make “certain data elements publicly available, thereby increasing the transparency of the securities lending market and reducing competitive advantages that may exist in the marketplace”); Letter from Andrew Park, Americans for Financial Reform Education Fund (Jan. 7, 2022) (“AFREF Letter 1”), at 1, 3 (stating “there is an urgent need to require securities lenders to provide greater details of their loans to a registered national securities association (RNSA) . . . [m]arket participants and regulators alike will greatly benefit from the greater transparency that comes from reporting every securities lending transaction as a result of the proposed changes to Rule 10c–1 . . .”); Letter from Stephen W. Hall, Legal Director and Securities Specialist, and Jason Grimes, Senior Counsel, Better Markets, Inc. (Jan. 7, 2022) (“Better Markets Letter”), at 5 (stating that “increasing transparency into the securities lending market, as the Proposal would do, is sound public policy. It will increase the transparency that investors, other market participants, and regulators (including the SEC) have into the opaque securities lending market.”); Letter from James J. Angel, Ph.D., CFP, CFA, Associate Professor of Finance, McDonough School of Business, Georgetown University (Jan. 4, 2022) (“James J. Angel Letter”), at 2 (stating that “increasing transparency in the securities lending market will reduce the price dispersion seen in the market. Better information about the price and availability of securities lending will allow asset owners . . . to make sure that they are getting proper value for their securities lending.”); Letter from Gregory Babyak, Global Head of Regulatory Affairs, Bloomberg L.P. (Jan. 31, 2022) (“Bloomberg L.P. Letter”), at 1 (stating “[w]e appreciate the Commission’s endeavor to improve the transparency and efficiency of the securities lending market by increasing the availability of information regarding securities lending transactions.”); see also Letter from Brian Lamb, CEO, Equilend Holdings, LLC (Mar. 29, 2022) (“Equilend Letter”) (expressing general support for the proposed rule); Letter from Chris Iacovella, Chief Executive Officer, American Securities Association (Jan. 7, 2022) (“ASA Letter”), at 1 (stating “investors, especially retail investors, have no idea what the cost to borrow a security in the market is at any given time. The SEC and the public need transparency into what a loan costs . . .”); Letter from Aron Szapiro, Head of Retirement Studies and Public Policy, Morningstar, Inc. (Jan. 7, 2022) (“Morningstar Letter”), at 4 (expressing general support for increasing transparency in the securities lending market and that the public will obtain a “well-informed view” of the securities lending market from the proposed data publication); Letter from Joseph P. Kamnik, Chief Regulatory Counsel, Options Clearing Corp. (Jan. 7, 2022) (“OCC Letter”); Form Letter from John Burkle, et al. (Aug. 16, 2022) (expressing support for

Other commenters did not support the rule.⁴⁸ Certain commenters addressed the scope of the proposed rule and the timing for reporting information to an RNSA as discussed below, in Parts VII.A through VII.G.

V. Overview of Final Rule

The final rule requires covered persons⁴⁹ to provide securities loan information concerning reportable securities⁵⁰ to an RNSA,⁵¹ in the format and manner required by an RNSA,⁵² and within specified time periods⁵³ (“Rule 10c–1a information”).⁵⁴ The term “covered person” is defined to mean: (1) any person that agrees to a covered securities loan on behalf of a lender (“intermediary”); (2) any person that agrees to a covered securities loan as a lender when an intermediary is not used unless 17 CFR 240.10c–1a(j)(1)(iii) (“final Rule 10c–1a(j)(1)(iii)”) applies to a broker or dealer borrowing fully paid or excess margin securities;⁵⁵ or (3) a broker or dealer when borrowing fully paid or excess margin securities.⁵⁶ In addition, 17 CFR 240.10c–1a(a) (“final

increased transparency in the securities lending market); Letter from Aaron Swaney (Jan. 4, 2022) (“Requiring entities with significant involvement in the markets to report their activities . . . is quite reasonable and very necessary.”); Letter from Peter Antosh, Lawyer (Jan. 4, 2022) (“ . . . the information received and shared via this proposed rule would also . . . increase the public’s access to reliable pertinent market information, improving overall market efficiency”); Letter from Tim DG (Aug. 16, 2022) (“This rule is essential to give retail and more importantly, the regulators more insight to keep fraudulent behaviors at bay.”); Letter from Adam Slee (Aug. 16, 2022) (“We need greater transparency in the market to help ordinary people be able to better understand what is going on[.] this is a good step in the right direction.”); Letter from Tim R. (Aug. 16, 2022) (“This proposal will help true price discovery.”); Letter from Don M. Cromer (Oct. 31, 2022) (“I believe strongly in the transparency of our markets, and I feel that this rule is a strong step in the right direction, and I hope to see many more like it.”).

⁴⁸ See, e.g., Letter from Kevin To, Data Boiler Technologies, LLC (Jan. 7, 2022) (“Data Boiler Technologies Letter”), at 4; Letter from Stephen John Berger, Managing Director, Global Head of Government & Regulatory Policy, Citadel (Apr. 4, 2022) (“Citadel Letter”).

⁴⁹ See *infra* Part VII.A (discussing the definition of the term “covered person”).

⁵⁰ See 17 CFR 240.10c–1a(j)(3) (“final Rule 10c–1a(j)(3)”).

⁵¹ See 17 CFR 240.10c–1a(j)(5) (“final Rule 10c–1a(j)(5)”).

⁵² See 17 CFR 240.10c–1a(f) (“final Rule 10c–1a(f)”).

⁵³ See 17 CFR 240.10c–1a(c) (“final Rule 10c–1a(c)”); 17 CFR 240.10c–1a(d) (“final Rule 10c–1a(d)”); 17 CFR 240.10c–1a(e) (“final Rule 10c–1a(e)”).

⁵⁴ The change in designation from proposed Rule 10c–1 to final Rule 10c–1a conforms with **Federal Register** requirements for rule designations.

⁵⁵ See Proposing Release, 86 FR 69803 n.9.

⁵⁶ See 17 CFR 240.10c–1a(j)(1)(i) (“final Rule 10c–1a(j)(1)(i)”); 17 CFR 240.10c–1a(j)(1)(ii) (“final Rule 10c–1a(j)(1)(ii)”); final Rule 10c–1a(j)(1)(iii).

Rule 10c–1a(a)”) specifies that any covered person that agrees to a covered securities loan must comply with the rule.⁵⁷

If any person agrees to a covered securities loan on behalf of the lender (an “intermediary”), the intermediary has the obligation to provide Rule 10c–1a information to an RNSA.⁵⁸ If an intermediary is not used, the lender is required to provide Rule 10c–1a information to an RNSA.⁵⁹ If a covered securities loan consists of a broker or dealer borrowing fully paid or excess margin securities, only the broker or dealer is required to provide the Rule 10c–1a information to an RNSA, not the lender.⁶⁰

However, in a change from the proposed rule, as discussed below, in Part VII.A, the final rule excludes from the definition of the term “covered person” a clearing agency when providing only the functions of a central counterparty as defined pursuant to 17 CFR 240.17Ad–22(a)(3) (“Rule 17Ad–22(a)(2)”) of the Exchange Act or a central securities depository as defined pursuant to 17 CFR 240.17Ad–22(a)(3) (“Rule 17Ad–22(a)(3)”) of the Exchange Act.⁶¹ Thus, a clearing agency is not required to report Rule 10c–1a information to an RNSA for a covered securities loan when acting in the capacity or engaged in activities as a central counterparty or a central securities depository in connection with a covered securities loan.

The final rule permits a covered person to rely on a reporting agent that is a broker, dealer, or registered clearing agency to provide Rule 10c–1a information to an RNSA to fulfill such covered person’s reporting obligation.⁶² To do so, the covered person must enter into a written agreement with a reporting agent, that agrees to provide Rule 10c–1a information to an RNSA, and provide such reporting agent with timely access to such information.⁶³ If the reporting agent receives the Rule 10c–1a information from the covered person on a timely basis, the reporting agent assumes responsibility for

⁵⁷ In addition, as discussed below, in Part VII.E, the use of the term “agrees to a covered securities loan” clarifies that the Rule 10c–1a information is not limited to securities loans that have been settled. If there are multiple lenders to the same loan, to avoid duplicative reporting, the parties could coordinate to file a single, combined report.

⁵⁸ See final Rule 10c–1a(j)(1)(i).

⁵⁹ See final Rule 10c–1a(j)(1)(ii).

⁶⁰ See final Rule 10c–1a(j)(1)(iii).

⁶¹ See final Rule 10c–1a(j)(1)(i).

⁶² See 17 CFR 240.10c–1a(a)(2) (“final Rule 10c–1a(a)(2)”).

⁶³ See 17 CFR 240.10c–1a(a)(2)(i) (“final Rule 10c–1a(a)(2)(i)”); 17 CFR 240.10c–1a(a)(2)(ii) (“final Rule 10c–1a(a)(2)(ii)”).

compliance with the reporting requirements under the final rule.

The final rule defines a “covered securities loan” as a transaction in which any person on behalf of itself or one or more other persons, lends a “reportable security” to another person (except for a position at a clearing agency that results from certain central counterparty or central securities depository services).⁶⁴ In addition, the use of margin securities, as defined in 17 CFR 240.15c3–3(a)(4) (“Rule 15c3–3(a)(4)”), by a broker or dealer is not a covered securities loan for purposes of the final rule unless the broker or dealer lends such margin securities to another person.⁶⁵

The term “reportable security” is defined as any security or class of an issuer’s securities for which information is reported or required to be reported to the consolidated audit trail as required by Rule 613 of the Exchange Act and the CAT NMS Plan (“CAT”), the Financial Industry Regulatory Authority’s Trade Reporting and Compliance Engine (“TRACE”), or the Municipal Securities Rulemaking Board’s (“MSRB”) Real-Time Transaction Reporting System (“RTRS”), or any reporting system that replaces one of these systems.⁶⁶

The final rule requires a covered person, directly or indirectly through a reporting agent, to report three types of data, which together comprise the Rule 10c–1a information. The first type of data concerns the material terms of the covered securities loan and must be provided to an RNSA by the end of the day on which the covered securities loan is effected (“data elements”).⁶⁷ The second type of data concerns modifications to a covered securities loan and must be provided to an RNSA by the end of the day on which a covered securities loan is modified, if the modification occurs after other information about the covered securities loan has already been provided to an RNSA, and results in a change to such information.⁶⁸ The third type of data concerns confidential information in connection with a covered securities loan and must be provided to an RNSA by the end of the day on which a covered securities loan is effected.⁶⁹ The final rule requires that an RNSA keep the third type of information

confidential subject to applicable law.⁷⁰ The final rule also requires an RNSA to make the Rule 10c–1a information available to the Commission; or other persons as the Commission may designate by order upon a demonstrated regulatory need.⁷¹

An RNSA is required to make publicly available the following information not later than the morning of the business day⁷² after the covered securities loan is effected:⁷³ (1) the unique identifier assigned to a covered securities loan by an RNSA⁷⁴ and the security identifier;⁷⁵ (2) the data elements, except for loan amount;⁷⁶ and (3) information pertaining to the aggregate transaction activity and the distribution of rates among loans and lenders (“distribution of loan rates”) ⁷⁷ for each reportable security and related unique identifier.⁷⁸ An RNSA is also required to make publicly available the loan amount on the twentieth business day after the covered securities loan is effected along with loan and security identifying information.⁷⁹

In addition, an RNSA is required to make publicly available any modification to the data elements, except for modification to the loan amount, not later than the morning of the business day after the covered securities loan is modified.⁸⁰ An RNSA is also required to make publicly

available modifications to the loan amount on the twentieth business day after the loan amount is modified along with loan and security identifying information.⁸¹

The final rule requires an RNSA to implement rules regarding the format and manner of its collection of information and make publicly available such information in accordance with rules promulgated pursuant to 15 U.S.C. 78s(b) (“section 19(b)”) and 17 CFR 240.19b–4 (“Rule 19b–4”) of the Exchange Act.⁸² The final rule also contains requirements regarding an RNSA’s data retention and availability.⁸³ Specifically, an RNSA must maintain the information on its website or a similar means of electronic distribution, without use restrictions, for a period of at least five years.⁸⁴ In addition, the final rule permits an RNSA to establish and collect reasonable fees pursuant to rules promulgated pursuant to section 19(b) and Rule 19b–4.⁸⁵

Final Rule 10c–1a is designed to provide access to timely, comprehensive securities loan information to market participants, the public, and regulators, which will help provide borrowers and lenders with better tools to assess the terms of their securities loans and enhance the ability of regulators to oversee the securities lending market. In addition, the final rule will result in the public availability of new information for investors and other market participants to consider in the mix of information about the securities lending market and the securities markets generally to better inform their decisions.⁸⁶ The final rule will also provide regulators with information that may be used in conjunction with other

⁷⁰ See 17 CFR 240.10c–1a(g)(4) (“final Rule 10c–1a(g)(4)”).

⁷¹ See 17 CFR 240.10c–1a(h)(2) (“final Rule 10c–1a(h)(2)”).

⁷² Similar to the proposed rule, the final rule does not specify, for purposes of compliance with the final rule, exactly what time is the “end of the business day,” “morning of the business day,” or what holidays should not be considered a “business day,” to give an RNSA the discretion to structure its systems and processes as it sees fit and implement its rules accordingly. See, e.g., *Proposing Release*, 86 FR 69816 n.104. The Commission did not receive any comments addressing this point. As an example, for times set by an RNSA for other reporting regimes, an RNSA has set reporting for 6 p.m. (see, e.g., <https://www.finra.org/filing-reporting/regulatory-filing-systems/short-interest>) or times depending on whether transactions are executed during or after system hours or on non-business days (see, e.g., <https://www.finra.org/rules-guidance/rulebooks/finra-rules/6730>).

⁷³ See 17 CFR 240.10c–1a(g)(1) (“final Rule 10c–1a(g)(1)”).

⁸² See final Rule 10c–1a(f).

⁸³ See 17 CFR 240.10c–1a(h) (“final Rule 10c–1a(h)”).

⁸⁴ See 17 CFR 240.10c–1a(h)(3) (“final Rule 10c–1a(h)(3)”).

⁸⁵ See 17 CFR 240.10c–1a(i) (“final Rule 10c–1a(i)”) and section 19(b). See also 15 U.S.C. 78o–3 (“section 15A”).

⁸⁶ As discussed in the *Proposing Release*, currently available data on the securities lending market are incomplete, as private vendors do not have access to pricing information that reflects all transactions. This, in part, reflects the voluntary submission of transaction information by subscribers to vendors and is compounded by the uncertain comparability of data due to, among other things, the variability of the transaction terms disseminated, as well as how those terms are defined. As no single vendor has information for all securities lending transactions that take place, some persons pay to subscribe to multiple vendors’ systems in order to capture as much of the currently available data as they determine to purchase, which can be expensive. See *Proposing Release*, 86 FR 69807 (citing Beneficial Owners Demand Independent Benchmarking, Global Inv., 2017 WLNR 5380098 (Feb. 2, 2017)).

⁶⁴ See 17 CFR 240.10c–1a(j)(2)(i) (“final Rule 10c–1a(j)(2)(i)”); 17 CFR 240.10c–1a(j)(2)(ii) (“final Rule 10c–1a(j)(2)(ii)”).

⁶⁵ See 17 CFR 240.10c–1a(j)(2)(iii) (“final Rule 10c–1a(j)(2)(iii)”).

VI. Overview of Changes From Proposed Rule

The Commission is adopting final Rule 10c-1a with certain modifications from the proposed rule made in response to comments. The final rule:

- Modifies the scope of persons required to report by:
 - Specifying the persons who have a reporting obligation with a new definition of “covered person” to distinguish persons who have a reporting obligation from those persons who do not;⁸⁷ specifically, requiring reporting by any person that agrees to a covered securities loan on behalf of the lender, any person that agrees to a covered securities loan as a lender if an intermediary is not used, or a broker or dealer when borrowing fully paid or excess margin securities, and providing that an intermediary need not be a certain type of entity;
 - Excluding clearing agencies from the new definition of “covered person” when engaged only in certain central counterparty or central securities depository activities;
 - Separating the requirements for covered persons and reporting agents into distinct paragraphs;⁸⁸ and
 - Adding a new definition for “reporting agent” to specify that a covered person may rely on a reporting agent that is a broker, dealer, or registered clearing agency⁸⁹ provided there is a written agreement between the covered person and the reporting agent under which the reporting agent agrees to establish, maintain, and enforce policies and procedures to ensure compliance with the final rule and if the covered person provides timely information to the reporting agent.⁹⁰
 - Modifies the scope of securities for which loans must be reported by adding a new definition for “reportable security” to mean any security or class of an issuer’s securities for which information is reported or required to be reported to the CAT, TRACE, or RTRS, or any reporting system that replaces one of these systems;⁹¹ and
 - Specifies the type of loan transaction to which the final rule applies by defining a new term “covered securities loan,” which excludes the use of margin securities by a broker or

dealer (e.g., rehypothecation) other than the lending of such margin securities by a broker or dealer, as well as a position at a clearing agency that results from certain central counterparty or central securities depository services.⁹²

- Streamlines information required to be reported by:
 - Removing the requirements in paragraph (e) of the proposed rule to provide securities “available to loan” and securities “on loan” information to an RNSA and the requirement for an RNSA to make such information public;⁹³ and
 - Replacing the requirement to report a description of the loan modification with a requirement to report the specific modification and the specific data element being modified.⁹⁴
 - Specifies that all data elements for covered securities loans that were not required to be reported on the date agreed to or on the date last modified, but which subsequently become covered securities loans, must be reported when the covered securities loan is modified.⁹⁵
 - Modifies the timing of reporting by:
 - Replacing the requirements to report data elements and confidential data elements to an RNSA within 15 minutes after each loan is effected with requirements to report such elements by the end of the day on which a covered securities loan is effected;⁹⁶ and
 - Replacing the requirement to report loan modification data elements to an RNSA within 15 minutes after each loan is modified with a requirement to report such elements by the end of the day on which a covered securities loan is modified.⁹⁷
 - Specifies the treatment of open-ended loans in existence prior to the final rule.⁹⁸
 - Modifies the responsibilities of an RNSA by:
 - Defining the term “RNSA” to specify that such term refers to an association of brokers and dealers that is registered as a national securities association pursuant to 15 U.S.C. 78o-3 (“section 15A”) of the Exchange Act;⁹⁹
 - Separating an RNSA’s data publication requirements into new paragraph (g) of the final rule to more

clearly delineate an RNSA’s requirements from the reporting requirements applicable to covered persons and reporting agents;¹⁰⁰

- Replacing the requirement for an RNSA to publish the loan amount (as well as any modifications to loan amount) as soon as practicable and instead: (1) make the loan amount public on the twentieth business day after the covered security loan is effected (or modified), and (2) make specified loan and security identifying information public on the twentieth business day after the covered security loan is effected (or modified);¹⁰¹
- Adding a new requirement to paragraph (g) of the final rule for an RNSA to publish, on a daily basis, information pertaining to the aggregate transaction activity and distribution of loan rates for each reportable security in order to provide market participants with timely access to loan rate information that incorporates information about loan sizes;¹⁰² and
- Removing the requirement in paragraph (g) of the proposed rule that collected information be made available to the public “without charge,” and removing the requirement in paragraph (h) of the proposed rule that fees only be paid from persons who provide Rule 10c-1a information directly to an RNSA.¹⁰³

In addition, the final rule includes some technical modifications, such as modifying the rule designation to conform with **Federal Register** requirements as well as additional technical or conforming modifications that are minor and not substantive. Responses to comments requesting clarification about the cross-border scope of the rule are also provided below, in Part VII.M. Further, the Commission is providing compliance dates requiring that: (1) RNSAs propose rules pursuant to final Rule 10c-1a(f) within four months of the effective date of final Rule 10c-1a; (2) the proposed RNSA rules are effective no later than 12 months after the effective date of final Rule 10c-1a; (3) covered persons report Rule 10c-1a information to an RNSA starting on the first business day 24 months after the effective date of final Rule 10c-1a (the “reporting date”); and (4) RNSAs publicly report Rule 10c-1a information pursuant to final Rules 10c-1a(g) and (h)(3) within 90 calendar days of the reporting date.

VII. Discussion of the Final Rule

A. Scope of Persons With Reporting Obligations—10c–1a(j)(1)

Proposed Rule

The proposed rule would have required that any person that loans a security on behalf of itself or another person shall provide Rule 10c–1 information to an RNSA.¹⁰⁴ The Proposing Release stated that the term “person,” for purposes of the Exchange Act, means a natural person, company, government, or political subdivision, agency, or instrumentality of a government.¹⁰⁵

The proposed rule also stated that “a bank, clearing agency, broker, or dealer, that acts as an intermediary to a loan of securities (lending agent) on behalf of a person that owns the loaned securities (beneficial owner) shall . . . provide the Rule 10c–1 information to an RNSA”¹⁰⁶ However, if a person loaned a security on behalf of itself, and an intermediary did not act on its behalf, such person would be the one required to provide the Rule 10c–1 information to an RNSA.¹⁰⁷

The Commission proposed that when “a bank, clearing agency, broker, or dealer” acts as an intermediary (or “lending agent”) on behalf of a person that owns loaned securities the lending agent would have the reporting obligation.¹⁰⁸ When discussing the rationale for this requirement, the Commission stated that lending agents are in the best position to know when securities have been loaned from the portfolios that the lending agent represents, and that the owner may not know that the lending agent has lent securities from their portfolio until after the time prescribed by proposed Rule 10c–1 to provide Rule 10c–1 information to an RNSA.¹⁰⁹ The Proposing Release also stated that custodian banks have traditionally been the primary lending agent or intermediary and lend securities on behalf of their customers.¹¹⁰

The Commission proposed a single-sided approach of only applying the rule’s reporting requirements to

securities lenders and intermediaries acting on behalf of lenders, and not to borrowers. The Proposing Release explained that such an approach could avoid the potential double counting of transactions.¹¹¹ It also explained that lenders are more likely to have access to the Rule 10c–1 information, but a borrower may not be privy to all of the information required to be provided to an RNSA under the proposed rule.¹¹² The Commission also stated that to the extent smaller entities engage in securities lending, they generally employ lending agent intermediaries, which would relieve them from having to provide proposed Rule 10c–1 information to an RNSA.¹¹³ Accordingly, the Commission stated its preliminary belief that requiring only securities lenders or intermediaries to a loan of securities to provide the proposed Rule 10c–1 information will alleviate the potential for the double counting of transactions and limit the burdens of proposed Rule 10c–1 to larger institutions.¹¹⁴

Final Rule

Many commenters requested additional clarity regarding the market participants that would be required to provide the proposed Rule 10c–1 information to an RNSA.¹¹⁵ As

discussed below in this part, to address commenter concerns, and to specify which persons are required to provide Rule 10c–1a information to an RNSA, the final rule defines the term “covered person” to mean: (1) any person that agrees to a covered securities loan on behalf of a lender (“intermediary”) other than a clearing agency when providing only the functions of a central counterparty or central securities depository; (2) any person that agrees to a covered securities loan as a lender when an intermediary is not used, unless the borrower is a broker or dealer borrowing fully paid or excess margin securities; or (3) a broker or dealer when borrowing fully paid or excess margin securities.¹¹⁶ Accordingly, if a person uses an intermediary, such as a lending agent that is a custodian bank, to run its lending program to lend securities to other persons on its behalf, the custodian bank is the covered person for purposes of the final rule.¹¹⁷ If,

However, the final rule allows persons other than banks, brokers, dealers, and clearing agencies to act as intermediaries (*i.e.*, lending agents), which could increase competition among such entities. The final rule also permits covered persons to use third party vendors to help facilitate the fulfillment of their reporting obligation. These elements of the final rule should address some of the implementation costs raised by the commenter. As the Commission stated in the Proposing Release, lending agents are in the best position to know when securities have been loaned from the portfolios that the lending agent represents. Indeed, a beneficial owner might not know that the lending agent has lent securities from the portfolio until after the time prescribed by final Rule 10c–1a to provide Rule 10c–1a information to an RNSA. *See* Proposing Release, 86 FR 69809. Expanding reporting requirements further, as the commenter suggests, could reduce the timeliness of the information required to be reported.

¹¹⁶ *See* final Rule 10c–1a(j)(1). The final rule’s approach of requiring reporting by an intermediary if one is used, and by the lender if an intermediary is not used, is comparable to one commenter’s recommendation “to include a set reporting hierarchy . . . to determine the counterparty that will be responsible to report the required information.” *See* Letter from Linklaters LLP (Apr. 1, 2022) (“Linklaters Letter”), at 5.

¹¹⁷ One commenter recommended that “[lending] agents should not be liable for the failure to report any information that they do not control as the intermediary unless such information has been provided to them by the principal in a timely manner. The rule should also reflect that a lending agent should not be liable for the content of information provided to it by a principal unless the agent has actual knowledge that the information is inaccurate.” *See* Letter from Briget Polichene, Chief Executive Officer, Institute of International Bankers (Jan. 7, 2022) (“IIB Letter”), at 10. However, the Commission continues to believe that lending agents, as parties to the loan, are well positioned to provide the required Rule 10c–1a information and often are in possession of more information concerning the loan than the principal (or beneficial owner). *See* Proposing Release, 86 FR 69109–10 (“responsibility for failing to provide 10c–1 information to an RNSA should be on the lending agent and not the beneficial owners because the lending agent is directly responsible for the loan of securities”).

¹⁰⁴ *See* proposed Rule 10c–1(a). *See also* Proposing Release, 86 FR 69807.

¹⁰⁵ *See* Proposing Release, 86 FR 69807 (citing 15 U.S.C. 78c(a)(9)).

¹⁰⁶ *See* proposed Rules 10c–1(a)(1)(i)(A)(1) and 10c–1(a)(1)(i)(B) (stating that “[a] beneficial owner is not required to provide the Rule 10c–1 information to an RNSA if a lending agent acts as an intermediary to the loan of securities on behalf of the beneficial owner”).

¹⁰⁷ *See* proposed Rule 10c–1(a)(1).

¹⁰⁸ *See* proposed Rule 10c–1(a)(1)(i)(A).

¹⁰⁹ *See* Proposing Release, 86 FR 69809.

¹¹⁰ *See* Proposing Release, 86 FR 69805.

¹¹¹ *See* Proposing Release, 86 FR 69807.

¹¹² *See* Proposing Release, 86 FR 69807.

¹¹³ *See* Proposing Release, 86 FR 69808.

¹¹⁴ *See* Proposing Release, 86 FR 69808.

¹¹⁵ *See* Letter from Susan Olson, General Counsel, and Sarah A. Bessin, Associate General Counsel, Investment Company Institute (Jan. 7, 2022) (“ICI Letter 1”), at 8 (“there is a lack of clarity in the Proposal regarding the concepts of ‘lender,’ ‘beneficial owner,’ ‘lending agent,’ and ‘reporting agent’”); Letter from Peter J. Germain, Chief Legal Officer, Federated Hermes, Inc. (Jan. 7, 2022) (“Federated Hermes Letter”), at 2; Letter from Elizabeth Kent, Managing Director, Global Public Policy Group, and Roland Villacorta, Managing Director, Securities Lending, BlackRock (Jan. 7, 2022) (“BlackRock Letter”), at 2 (“We recommend the Commission provide more clarity on the scope of lenders and loans subject to the proposed requirements.”). In addition, one commenter stated that empowering the owner of the securities to determine the manner of reporting would reduce the implementation costs for lenders and mitigate the risk of inaccurate data being reported. The commenter further stated that responsibility for reporting obligations would then be included in either the master securities lending agreement between lender and borrower or in the securities lending agent agreement between lender and lending agent, or both. *See* Letter from Jennifer W. Han, Executive Vice President, Chief Counsel & Head of Global Regulatory Affairs, Managed Funds Association (Aug. 4, 2023) (“MFA Letter 3”), at 7. The final rule permits covered persons to contract with reporting agents that are brokers, dealers, or registered clearing agencies under certain conditions intended to ensure that the reporting obligations are met. A beneficial owner cannot assign the reporting obligation when an intermediary is used, as the intermediary has the reporting obligation under final Rule 10c–1a(j)(1)(i).

however, a person does not use an intermediary to lend securities on their behalf, such person is the covered person for purposes of the final rule. For example, a fund is a covered person for purposes of the final rule if that fund runs its own lending program and lends securities to other persons without the use of an intermediary, such as custodian bank. Further, a broker or dealer who borrows fully paid or excess margin securities from its customer is the covered person for purposes of the final rule, and the customer of the broker or dealer is not a covered person.

The definition of “covered person” uses the term “agrees to” instead of “loans a security” as proposed to make clear that a customer of a broker or dealer that loans a reportable security to the broker or dealer in a fully paid lending arrangement is not required to comply with the final rule. Instead, the broker or dealer that borrows the reportable security is required to comply with the final rule and must report Rule 10c–1a information on the covered securities loan. Further, as discussed below, in Part VII.E, the term “agrees to a covered securities loan” also provides that Rule 10c–1a information is not limited to covered securities loans that have been settled.

One commenter recommended that the Commission not “limit permitted ‘lending agents’ for purposes of the rule to banks, clearing agencies, brokers, or dealers, as proposed,” but instead “permit any lending agent that acts as an intermediary to a loan of securities to report on behalf of a beneficial owner.”¹¹⁸ The commenter stated that as long as a lending agent could meet the requirements of the proposed rule, such an expansion would “reflect the variety of lending agents that funds use” and “would facilitate reporting by beneficial owners that prefer to use non-broker-dealer lending agents to report their securities loans.”¹¹⁹ The Commission agrees, and has modified the final rule to define “covered person” to encompass “[a]ny person that agrees to a covered securities loan on behalf of the lender.”¹²⁰

One commenter sought clarification of whether a “branch or the entity” would be responsible for proposed Rule 10c–1 information reporting if the branch

enters into a covered securities loan, although the commenter did not define the terms “branch” or “entity.”¹²¹ Determining the “person” required to report in complex organizational structures will depend on the facts and circumstances. A branch or office of a covered person, as opposed to a subsidiary or affiliate, may not constitute a distinct covered person, but rather different parts of the same covered person.¹²² The designation of a business unit as a branch, office, or otherwise, is not dispositive of whether such business unit has the obligation to report Rule 10c–1a information.¹²³ One commenter sought confirmation that a clearing agency’s provision of depository or central clearing services, including novation, processing, settlement, netting, and incidental services, do not make the clearing agency an intermediary to a loan of securities.¹²⁴ The Commission agrees that a clearing agency’s provision of depository or central clearing services¹²⁵ to securities lending transactions is not the type of activity that final Rule 10c–1a is designed to cover. By acting as a central counterparty, including by novating a loan, a clearing agency steps into the shoes of the parties to the loan and technically may become a person that

agrees to a loan on its own behalf or on behalf of another person. However, requiring reporting by a registered clearing agency providing such central counterparty or securities depository services would not provide additional transparency and would be duplicative of the reporting requirements that apply to the loan’s lender or intermediary prior to it being cleared. Accordingly, the final rule specifically excludes from the “covered person” definition a clearing agency when providing only the functions of a central counterparty pursuant to 17 CFR 240.17Ad–22(a)(2) (“Rule 17Ad–22(a)(2)”) or a central securities depository pursuant to 17 CFR 240.17Ad–22(a)(3) (“Rule 17Ad–22(a)(3)”).¹²⁶ The exclusion would not apply when the clearing agency is acting in a different capacity (e.g., as an intermediary providing the services of a lending agent).¹²⁷

Certain commenters supported the proposed single-sided reporting structure (i.e., requiring reporting by any person that loans a security on behalf of itself or another person, but not requiring reporting by the borrower) to alleviate concerns about double counting loans of securities.¹²⁸ One

¹²¹ See Letter from Mary Jane Schuessler, Canadian Securities Lending Association (Jan. 12, 2022) (“CASLA Letter”), at 3.

¹²² See Regulation SBSR—Reporting and Dissemination of Security-Based Swap Information, Release No. 34–74244 (Feb. 11, 2015), 80 FR 14564, 14652 n.813 (Mar. 19, 2015) (discussing foreign branches and stating that “because a branch or office has no separate legal existence under corporate law, the branch or office would be an integral part of the U.S. person itself”). See also *infra* Part VII.M (discussing the cross-border application of final Rule 10c–1a).

¹²³ See *infra* Part VII.M.

¹²⁴ See Letter from Michele Hillery, Managing Director, General Manager of Equity Clearing and DTC Settlement Service, DTCC (Jan. 7, 2022) (“DTCC Letter”), at 3–4. See also DTCC Letter, at 1 (stating that “requiring the clearing agency to assume the obligations of traditional lending agents for providing [traditional securities depository, central counterparty, or incidental services] would misplace the burden of responsibility and result in double reporting.”); OCC Letter, at 9 (recommending that a clearing agency should not assume the reporting obligations as an intermediary to a loan of securities under the proposed rule when it is not actively involved with the lending of securities of beneficial owners or for their own account, but providing only central counterparty services).

¹²⁵ See DTCC Letter, at 2–3 (stating that it is “a central securities depository that . . . holds securities on behalf of its participants and effects transfers between participant accounts by book entry, including to facilitate the settlement of securities lending transactions.” Also, that “depository activities and related incidental services do not affect supply or demand in the securities lending market, the pricing of securities lending transactions, or other relevant data regarding the securities lending market”).

¹²⁶ See final Rule 10c–1a(j)(1)(i). Rule 17Ad–22(a)(2) of the Exchange Act defines “central counterparty” to mean a clearing agency that interposes itself between the counterparties to securities transactions, acting functionally as the buyer to every seller and the seller to every buyer. Rule 17Ad–22(a)(3) of the Exchange Act defines “central securities depository” to mean a clearing agency that is a securities depository as described in section 3(a)(23)(A) of the Exchange Act. Section 3(a)(23)(A) describes a securities depository as a person who: (i) acts as a custodian of securities in connection with a system for the central handling of securities whereby all securities of a particular class or series of any issuer deposited within the system are treated as fungible and may be transferred, loaned, or pledged by bookkeeping entry without physical delivery of securities certificates; or (ii) otherwise permits or facilitates the settlement of securities transactions or the hypothecation or lending of securities without physical delivery of securities certificates.

¹²⁷ The Commission understands that clearing agencies do not currently provide services related to securities loans beyond acting as a central counterparty or central securities depository. Registered clearing agencies that wish in the future to expand services relating to securities loans, will be required to submit rule filings under section 19(b) and Rule 19b–4 in which they will be required to describe how the proposed changes would comply with existing federal securities laws, including the final rule. Clearing agencies that are operating under an exemption from registration will be required to seek modifications to their exemptions that are compliant with the final rule in order to expand the services they provide in relation to securities loans. See section 19(b) and Rule 19b–4 of the Exchange Act.

¹²⁸ See, e.g., ICI Letter 1, at 5; Letter from Phoebe Papageorgiou, Vice President, Trust Policy, American Bankers Association (Jan. 7, 2023) (“ABA Letter”), at 2–3; Letter from Thomas Deinet, Executive Director, The Standards Board of

¹¹⁸ See ICI Letter 1, at 5.

¹¹⁹ See ICI Letter 1, at 5.

¹²⁰ See final Rule 10c–1a(j)(1)(i). Although the Commission is not limiting who can act as an intermediary for the purposes of this rule, other regulatory requirements may apply to persons who intermediate transactions such as loans of securities. See, e.g., 15 U.S.C. 240.78o (section 15(b) of the Exchange Act) (registration requirements); 15 U.S.C. 240.78c (sections 3(a)(4) and (5) of the Exchange Act) (definitions of broker and dealer).

commenter stated that “we strongly support the Proposal’s approach of requiring single-sided reporting . . . the approach would reduce the potential for double counting of securities lending transactions and limit the burden on lenders. A single-sided reporting regime avoids problems with reconciling reports by each party to a transaction.”¹²⁹ Other commenters supported the application of the final rule’s reporting requirements to all lenders to facilitate a comprehensive view of the securities lending market.¹³⁰ In consideration of these comments, the final rule generally employs a single-sided approach to reporting, with the Rule 10c–1a information reporting obligations placed on either an intermediary that agrees to a covered securities loan on behalf of the lender, or any person that agrees to a covered securities loan as a lender when an intermediary is not used.¹³¹ Consistent with the proposed rule, this approach is designed to avoid the potential for the double counting of transactions that could arise if both sides, borrowers and lenders, were required to report final Rule 10c–1a information to an RNSA.¹³²

However, one commenter opposed the proposed single-sided reporting approach, and recommended that the final rule require reporting by SEC-registered brokers or dealers only and for transactions in which they act as borrowers, lenders, or lending agents.¹³³ The commenter stated that “whether

acting as borrower or lender acting in a principal or agency capacity, [requiring SEC-registered broker-dealers to report] would substantially reduce overall implementation costs, would not impose costs on a single side of the market and would still provide for sufficient market data.”¹³⁴ The commenter reasoned that reporting costs would be lower, due to brokers or dealers having existing reporting infrastructure and connectivity.¹³⁵ The commenter cited to the Office of the Financial Research Pilot Survey (“OFR Pilot Survey”)¹³⁶ to support the view that although such a structure would be “less comprehensive than lender reporting, the data loss entailed should not be substantial” and “would be substantially captured” and “sufficient.”¹³⁷ The commenter also stated that its proposed structure “would also provide better data integrity as broker-dealers are better positioned than beneficial owners and Lending Agents to evaluate whether a securities loan is made for the purpose of facilitating short sales or settlement of fails rather than some other purpose.”¹³⁸

The Commission is not adopting the commenter’s recommended reporting structure. Requiring reporting by brokers or dealers acting as borrowers, lenders, or lending agents introduces the same double counting problem that the final rule’s single-sided reporting approach is designed to address.¹³⁹ Additionally, under the final rule brokers or dealers are permitted to act as reporting agents provided specified requirements are met. The Commission also does not agree with the commenter that the data lost if its recommended reporting structure were adopted would not be substantial. The OFR Pilot Survey cited by the commenter states that banks, credit unions, pension funds, and hedge funds, all of whom

would not be required to report covered securities loans under the commenter’s proposed structure, are the borrowers of nearly 15 percent of the value of all outstanding securities loans.¹⁴⁰ Based on the survey, the Commission estimated that brokers or dealers facilitate between 60 percent and 90 percent of transactions in the equity lending market.¹⁴¹ Accordingly, while the Commission acknowledges that the precise percentage of broker or dealer facilitated transactions is unknown, the survey indicates that a significant percentage of transactions in the equity lending market, between 10 percent and 40 percent, are facilitated by non-brokers or dealers.¹⁴² Therefore, the commenter’s recommended approach would exclude a significant percentage of securities lending transactions from being reported. Any improved “data integrity” achieved by the commenter’s proposed structure would be undermined by its exclusion of securities loans that do not involve an SEC-registered broker or dealer acting as borrower, lender, or lending agent. Additionally, excluding certain types of entities from reporting would create incentives for market participants to agree to covered securities loans through such excluded entities, which would further diminish the comprehensiveness of the reported information. Instead, the Commission agrees with one commenter’s statement that, “all lenders (or their lending or reporting agents) should be required to report, whether or not they are registered with the Commission. Otherwise, the data will be incomplete.”¹⁴³ As such, the final rule’s definition of “covered person” is not limited to brokers or dealers.

One possible alternative to address double counting under the commenter’s

Alternative Investments (Jan. 21, 2022) (“SBAI Letter”), at 1 (“We support single-sided reporting, i.e., requiring the lenders (or their agents) to report, but not duplicating the framework by requiring borrowers to report as well.”); Letter from Joseph J. Barry, Senior Vice President and Global Head of Regulatory Affairs, State Street Corp. (Apr. 1, 2022) (“State Street Letter”), at 3 (stating that “we do not object to the imposition of a single-sided reporting obligation on the lender of a security (or its agent)”).

suggestion of requiring only brokers or dealers to report as lenders and borrowers would be to require identification (such as using a flag) of loans reported by borrowers and loans reported by lenders. However, this would not address the lack of securities loan data from persons that are not brokers or dealers, or the incentives to avoid reporting by migrating to such persons. Further, expanding the reporting obligation generally to all lenders and borrowers, and requiring each to identify whether they are reporting as a lender or borrower, would increase burdens unnecessarily, resulting in the collection of duplicative (albeit identified) data by more persons.

One commenter suggested that “it would be appropriate for the borrower broker-dealer (not the lender customer) to provide the Rule 10c–1 information to an RNSA where such broker-dealer borrows a customer’s fully paid securities.”¹⁴⁴ The Commission agrees with this recommendation. Such an approach would help avoid placing a reporting obligation on customers who, upon lending fully paid or excess margin securities, may not have timely access to the required information and less familiarity with reporting information to RNSAs than their broker or dealer.¹⁴⁵ Therefore, the definition of the term “covered person” under the final rule generally does not apply to a borrower,¹⁴⁶ except in the instance of a broker or dealer borrowing fully paid or excess margin securities from a customer.¹⁴⁷ The definition specifically includes a broker or dealer when borrowing fully paid or excess margin securities pursuant to 17 CFR 240.15c3–3(b)(3) (“Rule 15c3–3(b)(3)”).¹⁴⁸ This

definition will result in a broker or dealer (as opposed to the customer) being responsible for reporting Rule 10c–1a information to an RNSA if it borrows fully paid or excess margin shares from one of its customers. Pursuant to final Rule 10c–1a, the broker or dealer would also be responsible for reporting Rule 10c–1a information to an RNSA should the broker or dealer act as a lender of those shares to a third-party.¹⁴⁹

B. Reporting Agent Overview

1. Use of a Reporting Agent—Rule 10c–1a(2)

Proposed Rule

The Commission proposed that “[a] person required to provide Rule 10c–1 information . . . including a lending agent, may enter into a written agreement with a broker or dealer that agrees to provide the Rule 10c–1 information to an RNSA (reporting agent).”¹⁵⁰ The proposed rule stated that a “reporting agent is required to provide the Rule 10c–1 information to an RNSA if it has entered into [the required] written agreement . . . and is provided timely access to the Rule 10c–1 information.”¹⁵¹ The proposed rule also stated that “[a]ny person that enters into [the required] written agreement . . . with a reporting agent is not required to provide the Rule 10c–1 information to an RNSA if the reporting agent is provided timely access to the Rule 10c–1 information.”¹⁵² Therefore, under the proposed rule, only when a person fulfilled the requirements of: (i) entering into a written agreement with a broker or dealer that agrees to provide the Rule 10c–1 information;¹⁵³ and (ii)

providing the reporting agent with timely access to the Rule 10c–1 information,¹⁵⁴ would the person shift its Rule 10c–1 information reporting obligation for a loan of securities from itself to a reporting agent.

The Commission in the Proposing Release stated its preliminary belief that it is appropriate that lenders, including a lending agent, be able to enter into a written agreement with a broker or dealer acting as a reporting agent to provide Rule 10c–1 information to an RNSA on behalf of the lender because such an arrangement would ease burdens on lenders, including lending agents, that do not have and do not want to establish connectivity to an RNSA.¹⁵⁵ The Commission also stated that the use of reporting agents could reduce the costs for non-RNSA-members, because rather than incurring the costs associated with directly reporting Rule 10c–1 information, such persons would have the option to use a third-party to provide the Rule 10c–1 information to an RNSA.¹⁵⁶

Final Rule

The Commission received broad support from commenters for the proposed rule’s provisions permitting covered persons to use a reporting agent if certain conditions are met.¹⁵⁷ One commenter stated that it “agree[s] with the Commission that permitting the use of reporting agents to report 10c–1 information will ‘ease burdens on Lenders, including lending agents, that do not have or do not want to establish connectivity to an RNSA.’”¹⁵⁸ The Commission continues to believe it is appropriate to permit a covered person to use a reporting agent to help fulfill Rule 10c–1a information reporting obligations. Furthermore, many entities that may act as reporting agents may have existing RNSA connectivity, experience with reporting information to an RNSA, and economies of scale that could benefit covered persons with final Rule 10c–1a reporting obligations.

Thus, consistent with the proposed rule, the final rule requires that, in order to use a reporting agent to fulfill its Rule 10c–1a information reporting obligations, a covered person must: (1) enter into a written agreement with the reporting agent, and (2) provide the reporting agent with timely access to the

¹⁴⁴ See Letter from Kenneth E. Bentsen, Jr., President and CEO, SIFMA (Jan. 7, 2022) (“SIFMA Letter 1”), at 18 n.66 (stating that it “understands this would apply where a broker-dealer borrows securities it carries in a customer’s account”).

¹⁴⁵ For example, a lender may not necessarily know when a broker or dealer has borrowed securities from its fully paid or excess margin account if it has not reviewed the schedule of borrowed securities provided to it pursuant to 17 CFR 240.15c3–3(b)(3)(ii) (“Rule 15c3–3(b)(3)(ii)”) or if the collateral for the securities loan is not provided to the lender before the close of the business day pursuant to 17 CFR 240.15c3–3(b)(3)(iii)(A) (“Rule 15c3–3(b)(3)(iii)(A)”), whereas the broker or dealer will know that such securities have been lent by the customer upon the broker or dealer borrowing them. See 17 CFR 240.15c3–3 (“Rule 15c3–3”). See also SIFMA Letter 1, at 13 (stating that “in fully paid lending arrangements, collateral is not required to be delivered until the end of the business day on which the loan is entered into”).

¹⁴⁶ See final Rules 10c–1a(j)(1)(i) and (ii).

¹⁴⁷ See final Rule 10c–1a(j)(1)(iii).

¹⁴⁸ See final Rule 10c–1a(j)(1)(iii). Paragraph (b)(3) of Rule 15c3–3 under the Exchange Act addresses a broker-dealer’s borrowing of fully paid or excess margin securities of a customer. This rule

requires, among other things, that a broker-dealer borrowing fully paid or excess margin securities from a customer to enter into a written agreement with the customer that, among other things, specifies that the broker-dealer must undertake to: (1) provide the lender collateral that fully secures the loan consisting of cash, U.S. Treasuries, an irrevocable letter of credit issued by a bank, or such other collateral as the Commission designates as permissible; (2) mark the loan to market not less than daily and provide additional collateral as necessary to fully collateralize the loan; and (3) notify the lender that the provisions of the Securities Investor Protection Act may not protect the lender and that, therefore, the collateral delivered to the lender may constitute the only source of satisfaction of the broker-dealer’s obligation to return the securities. In the adopting release for these requirements, the Commission stated that the rule will “compel the firm to turn over the collateral physically to the lender.” See *Net Capital Requirements for Brokers and Dealers*, Release No. 34–18737 (May 13, 1982), 47 FR 21759, 21768 (May 20, 1982).

¹⁴⁹ See final Rule 10c–1a(j)(1)(ii).

¹⁵⁰ See proposed Rule 10c–1a(1)(ii)(A).

¹⁵¹ See proposed Rule 10c–1a(1)(ii)(B).

¹⁵² See proposed Rule 10c–1a(1)(ii)(C).

¹⁵³ See proposed Rule 10c–1a(1)(ii)(C).

¹⁵⁴ See proposed Rule 10c–1a(1)(ii)(C).

¹⁵⁵ See Proposing Release, 86 FR 69810.

¹⁵⁶ See Proposing Release, 86 FR 69809.

¹⁵⁷ See, e.g., *infra* note 173 (listing commenters that requested an expansion of the types of entities that could act as reporting agents under the final rule).

¹⁵⁸ See DTCC Letter, at 4.

required Rule 10c–1a information.¹⁵⁹ Requiring a written agreement between the covered person and the reporting agent will memorialize the contractual obligations for the reporting agent to provide the Rule 10c–1a information to an RNSA.¹⁶⁰ Consistent with the Proposing Release, for purposes of final Rule 10c–1a, “timely access” means that the reporting agent has access to the Rule 10c–1a information with sufficient time to provide such information to an RNSA (*i.e.*, in the format and manner required by the rules of an RNSA and within the time periods specified in paragraphs (c) through (e) of the final rule). However, this definition of “timely access” differs from the Proposing Release in that the timing of the required reporting of certain securities loan information to an RNSA has changed (*i.e.*, to no longer require reporting “within the fifteen minutes after the securities loan is effected or the terms of the loan are modified”).¹⁶¹ As discussed below, in Part VII.G, the required timing for the reporting of data elements pursuant to final Rules 10c–1a(c), (d), and (e) is now by the end of the day on which a covered securities loan is effected or modified.¹⁶²

If the reporting agent is unable to provide Rule 10c–1a information to an RNSA because it lacks timely access to it, the covered person who enters into the written agreement with the reporting agent is responsible for providing such information to an RNSA.¹⁶³ Ultimately, responsibility for non-compliance will be a facts and circumstances determination. For instance, if the covered person fails to provide the reporting agent with access to accurate Rule 10c–1a information, then the covered person remains responsible for compliance with Rule 10c–1a.¹⁶⁴ However, if the reporting agent that receives timely and accurate information from the covered person provides late or inaccurate information to an RNSA, as discussed below in Part VII.C.1, the reporting agent is

responsible for compliance with final Rule 10c–1a.¹⁶⁵

2. Reporting Agent Definition—Rule 10c–1a(j)(4)

Proposed Rule

The Commission proposed that, “[a] person required to provide Rule 10c–1 information . . . may enter into a written agreement with a broker or dealer that agrees to provide the Rule 10c–1 information to an RNSA (reporting agent) within the time periods specified in Rule 10c–1.”¹⁶⁶ The Proposing Release stated that limiting who can act as a reporting agent to a broker or dealer that is regulated directly by the Commission, would aid the Commission in overseeing compliance with proposed Rule 10c–1 and provide RNSAs with the ability to oversee the activity of its members that perform a reporting agent function.¹⁶⁷ The Proposing Release also stated that if reporting agents were to include other, non-broker or dealer entities, the Commission might lack an efficient way to oversee how the entity is complying with its responsibility to provide Rule 10c–1 information to an RNSA.¹⁶⁸

Final Rule

The Commission received numerous comments discussing what types of entities should be permitted to act as a reporting agent, including differing views on the proposed rule’s restriction to only brokers or dealers.¹⁶⁹ The Commission also received comment stating that there was a lack of clarity in the Proposing Release around the term “reporting agent.”¹⁷⁰

The Commission received a comment supporting the requirement that reporting agents be registered brokers or dealers and stating that it “would allow an RNSA to oversee the activity of reporting agents and enable it to fulfill an essential regulatory function that promotes just and equitable principles of trade.”¹⁷¹ Another commenter

expressed support for permitting brokers or dealers to act as reporting agents.¹⁷² However, other commenters recommended that entities other than brokers or dealers should be eligible to act as reporting agents.¹⁷³

One commenter recommended that registered clearing agencies should be eligible to serve as a reporting agent because such agencies are subject to regulation and examination by the Commission and have experience providing the infrastructure that would be used by, and function as, a reporting agent.¹⁷⁴ Another commenter suggested that reporting agents should include clearing agencies that operate stock lending platforms.¹⁷⁵ Having considered the commenters’ recommendations, the Commission agrees that registered clearing agencies should be permitted to act as reporting agents on behalf of covered persons, and therefore be included under the final rule’s definition of the term “reporting agent.”¹⁷⁶ Allowing registered clearing agencies to act as reporting agents will facilitate cost-effective and efficient reporting.¹⁷⁷ Additionally, like brokers and dealers, registered clearing agencies are subject to the Commission’s direct oversight and examination functions.¹⁷⁸

¹⁷² See Equilend Letter, at 1 (stating that it “maintains two FINRA registered and SEC registered broker-dealers . . . and welcomes the opportunity to act as a reporting agent for the Proposed Rule”).

¹⁷³ See, e.g., FIF Letter, at 7 (stating that “[f]or other reporting systems established by the Commission (such as CAT), vendors that are not broker-dealers are permitted to submit reports on behalf of reporting parties. The same approach should apply for the proposed securities loan reporting system”); James J. Angel Letter, at 6; IIB Letter, at 10; IHS Markit Letter, at 4–5; Sharegain Letter, at 2 (stating that “the qualification criteria and application process to become a broker-dealer go far beyond the scope of reporting services under the proposed Rule and would unfairly restrict the market”); Letter from Tyler Gellasch, Executive Director, Healthy Markets Association (Mar. 2, 2022) (“HMA Letter”), at 8 (stating that “by opening up the reporting agent role to non-broker entities, the Proposal could promote more competition amongst intermediaries—including lending agents—in the securities lending marketplace”); DTCC Letter, at 4 (“we do not believe it is necessary to limit the scope of entities that may be reporting agents exclusively to broker-dealers”).

¹⁷⁴ See DTCC Letter, at 4.

¹⁷⁵ See James J. Angel Letter, at 6 (stating that lending platforms operated by clearing agencies “could provide low-cost reporting solutions to market participants”).

¹⁷⁶ See final Rule 10c–1a(j)(4).

¹⁷⁷ See IHS Markit Letter, at 15 (stating that “[a]llowing entities other than FINRA-registered broker-dealers to facilitate reporting is a cost-effective and efficient way to achieve the SEC’s objectives The Commission should encourage a variety of organizations to provide innovative and cost-effective solutions to meet this regulation.”)

¹⁷⁸ See, e.g., 15 U.S.C. 240.78q(b) (section 17(b) of the Exchange Act).

¹⁵⁹ See final Rule 10c–1a(a)(2).

¹⁶⁰ See Proposing Release, 86 FR 69822 n.129.

¹⁶¹ See Proposing Release, 86 FR 69810.

¹⁶² See final Rules 10c–1a(c), (d), and (e).

¹⁶³ For example, if a reporting agent establishes an automated system that pulls Rule 10c–1a information directly from the records management system of a beneficial owner, but the beneficial owner disables the connectivity to the automated system for any reason, the reporting agent would not have access to the Rule 10c–1a information. As a result, the beneficial owner is required to provide Rule 10c–1a information to an RNSA under final Rule 10c–1a(a)(2).

¹⁶⁴ See 17 CFR 240.10c–1a(a)(1) (“final Rule 10c–1a(a)(1)”).

¹⁶⁵ See 17 CFR 240.10c–1a(b) (“final Rule 10c–1a(b)”).

¹⁶⁶ See proposed Rule 10c–1(a)(1)(ii)(A).

Marhefka, Managing Director, Global Head of Equities Data and Analytics, IHS Markit (Jan. 4, 2022) (“IHS Markit Letter”), at 4; Letter from Robert Zekraus, COO & Head of Americas, Pirum Systems Limited (Jan. 7, 2022) (“Pirum Letter”), at 4–5; Letter from Robert Sloan, Managing Partner, S3 Partners, LLC (Apr. 1, 2022) (“S3 Partners Letter”), at 12; Letter from Boaz Yaari, CEO, Sharegain Ltd. (Jan. 7, 2022) (“Sharegain Letter”), at 2. *But see* RMA Letter, at 13.

¹⁷⁰ See ICI Letter 1, at 8.

¹⁷¹ See Nasdaq Letter, at 2.

Some commenters stated that allowing non-brokers or dealers to act as reporting agents could facilitate low-cost service providers.¹⁷⁹ Another commenter stated that “by opening up the reporting agent role to non-broker entities, the Proposal could promote more competition amongst intermediaries—including lending agents—in the securities lending marketplace.”¹⁸⁰ One commenter stated that limiting the reporting agents to only brokers or dealers would unfairly restrict the market for such services.¹⁸¹ Other commenters specifically stated that certain non-brokers or dealers have existing technological capability to be able to act as a reporting agent (e.g., data vendors and entities that report information for other regulatory purposes).¹⁸² One such commenter supported leveraging the existing technology of non-broker-dealers to reduce implementation time and staff training costs relating to the implementation of proposed Rule 10c–1.¹⁸³

Allowing clearing agencies, as well as brokers or dealers, to act as reporting agents should help facilitate low-cost service providers, introduce more competition, and not unduly restrict the market for reporting agent services to only brokers or dealers.¹⁸⁴ Expanding the definition of reporting agent to include registered clearing agencies strikes a balance between increasing participation and competition in the marketplace for such services, while only applying the definition to entities over which the Commission has direct oversight.¹⁸⁵ Limiting who can act as a

reporting agent to brokers, dealers, and registered clearing agencies, all of which are regulated directly by the Commission, will assist the Commission in overseeing compliance with final Rule 10c–1a. Including other entities would leave the Commission without an efficient way to oversee how the entity is complying with its responsibility to provide Rule 10c–1a information to an RNSA on behalf of a covered person. Two commenters stated that some non-brokers or dealers should be eligible to serve as reporting agents because they are already permitted to report information in connection with other Commission reporting regimes and have experience doing so.¹⁸⁶ The commenters identified the CAT, TRACE, and FINRA’s Large Options Positions Report (“LOPR”) as examples of reporting regimes that allow brokers or dealers to use non-brokers or dealers as reporting agents. In each of the reporting regimes identified by the commenters, the reporting requirements apply to entities that are registered with the Commission or are a member of an RNSA or an exchange,¹⁸⁷ and that retain legal liability for compliance notwithstanding the existence of an agreement for a third party to provide connectivity services on behalf of the registrant.¹⁸⁸

The Commission is also clarifying that the ability to use a reporting agent does not prevent covered persons from contracting privately with third-party vendors to assist in reporting. The

regulatory organizations (“SROs”) and on-site examinations by Commission staff. The Commission also oversees registered clearing agencies through regular contact, including onsite visits, by Commission staff with clearing agency senior management and other personnel and ongoing interactions of Commission staff with the registered clearing agencies regarding current and expected proposed rule changes under section 19(b) of the Exchange Act.”).

¹⁸⁶ See FIF Letter, at 7–8; S3 Partners Letter, at 12.

¹⁸⁷ See FINRA Rule 6810(u) (“‘Industry Member’ means a member of a national securities exchange or a member of a national securities association that is required to record and report information pursuant to the CAT NMS Plan and this Rule 6800 Series”); FINRA Rule 6730(a) (applying the TRACE reporting obligations to FINRA members); FINRA Rule 2360(b)(5)(A)(i)b (“FINRA member firms that conduct a business in standardized options but are not themselves members of the options exchange on which such options are listed and traded . . . are required under FINRA Rule 2360(b)(5)(A)(i)b to report to the LOPR system positions in standardized options covering the same underlying security or index that meet the 200 contract reporting threshold.”).

¹⁸⁸ See, e.g., Nasdaq Rulebook, General Equity and Options Rules—General 7: Consolidated Audit Trail Compliance, at section 8(c)(3), available at, <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>. See also FINRA Regulatory Notice 21–29 (Aug. 13, 2021), available at, <https://www.finra.org/rules-guidance/notices/21-29> (FINRA guidance on outsourcing to third party vendors and the retention of responsibility by the FINRA member).

proposed rule required that “[a]ny person that loans a security on behalf of itself . . . shall provide to a [RNSA] the [Rule 10c–1 information].”¹⁸⁹ However, the proposed rule did not address the use of a third-party vendor by a lender to help facilitate its reporting obligations. The rule as adopted does not prohibit the use of third-party vendors by covered persons. The use of third-party vendors by covered persons to help facilitate the reporting of Rule 10c–1a information should allow covered persons flexibility and decrease costs,¹⁹⁰ and help address a commenter’s concerns with the ability of certain covered persons to report.¹⁹¹ The difference between a covered person relying on a reporting agent to fulfill its Rule 10c–1a reporting requirements and using a third-party vendor to help facilitate its Rule 10c–1a reporting is solely with respect to liability and responsibility under final Rule 10c–1a. When a covered person uses a reporting agent and meets the conditions of the rule, the covered person may rely on a reporting agent to fulfill its reporting obligations.¹⁹² However, the use of other third-party vendors that are not reporting agents would not relieve a covered person of its obligation to report Rule 10c–1a information to an RNSA, as reliance on a reporting agent would.¹⁹³

Some commenters stated that providing the proposed Rule 10c–1 information to a reporting agent that is a broker or dealer could reveal confidential information to such broker or dealer relating to covered securities loans.¹⁹⁴ One such commenter stated that “[w]ithout an alternative, beneficial owners would either be forced to build their own direct reporting to RNSAs to mitigate these concerns, thereby significantly increasing their costs, or to exit the market entirely, thereby

¹⁸⁹ See proposed Rule 10c–1(a)(1). See also Proposing Release, 86 FR 69809 (stating that a lender that did not use a lending agent or reporting agent to provide Rule 10c–1 information to an RNSA must directly provide such information to an RNSA).

¹⁹⁰ See *infra* Parts IX.C.3 and IX.E.6. Additionally, the use of third party vendors by covered persons could enable the innovation and development of novel reporting services, such as the data trusts described by one commenter. See Advanced Securities Consulting Letter, at 1–3.

¹⁹¹ See ICI Letter 1, at 12 (stating that “beneficial owners will not have the infrastructure to report”).

¹⁹² See final Rule 10c–1a(a)(1).

¹⁹³ See final Rule 10c–1a(a)(2) (stating that “a covered person may rely on a reporting agent to fulfill its reporting obligations under paragraph (a)(1)” of the final rule, if certain conditions are met).

¹⁹⁴ See S3 Partners Letter, at 12; IHS Markit Letter, at 4; Advanced Securities Consulting Letter, at 1–3.

¹⁷⁹ See IIB Letter, at 10 (stating that many lenders already rely on non-broker or dealer third-party vendors to “perform similar functions, and such vendors would likely be willing to provide securities lending reporting services and be low-cost providers”). See also Letter from Edmon Blount, Executive Director, Advanced Securities Consulting (Jan. 7, 2022) (“Advanced Securities Consulting Letter”), at 1.

¹⁸⁰ See HMA Letter, at 8.

¹⁸¹ See Sharegain Letter, at 2.

¹⁸² See S3 Partners Letter, at 12; Sharegain Letter, at 2; IIB Letter, at 10.

¹⁸³ See S3 Partners Letter, at 12.

¹⁸⁴ See *infra* Part IX.E.6 (stating that “expanding reporting agents to entities other than broker-dealers would serve to increase the number of entities that would compete to provide lenders and lending agents with reporting services. Thus, expanding the eligibility of reporting agents would serve to promote more competition in this market, potentially leading to lower fees for lenders and lending agents that would rely on these reporting agents for these services.”).

¹⁸⁵ See *Standards for Covered Clearing Agencies*, Release No. 34–71699 (Mar. 12, 2014), 79 FR 29508, 29510 (May 22, 2014) (“If the Commission registers a clearing agency, the Commission oversees the clearing agency to facilitate compliance with the Exchange Act using various tools that include, among other things, the rule filing process for self-

reducing overall liquidity.”¹⁹⁵ Another commenter mentioned operational and confidentiality considerations involved with appointing a reporting agent.¹⁹⁶

Brokers, dealers, and clearing agencies, like all persons, are subject to prohibitions on misuse of material non-public information. Brokers, dealers, and clearing agencies are subject to Commission examination for compliance with this,¹⁹⁷ and other, requirements. To the extent that a covered person may, nonetheless, be concerned about providing sensitive information to another person, it may elect to hire third party vendors for specific tasks to help with compliance obligations. As noted above, the covered person would retain legal responsibility for reporting.

One commenter appeared to believe that all reporting required by the proposed rule must be done through members of FINRA (the only currently existing RNSA).¹⁹⁸ The final rule does not require that all covered persons that are required to report Rule 10c-1a information to an RNSA be members of that RNSA.¹⁹⁹ The final rule requires only that reporting agents, if relied upon by a covered person to fulfill its reporting obligations, must be a broker, dealer, or registered clearing agency.²⁰⁰ Covered persons, including persons that are not RNSA members, that elect not to use a reporting agent, are responsible for providing the Rule 10c-1a information to an RNSA directly and may do so without becoming RNSA members.²⁰¹

Having considered the commenters' recommendations discussed above, in this part, and for the foregoing reasons, the final rule defines the term “reporting agent” to mean “a broker, dealer, or registered clearing agency that enters into a written agreement with a covered person under paragraph (a)(2) of [the final rule].”²⁰² Therefore, the final rule adds “registered clearing agencies” to the proposed rule's scope of entities that are permitted to act as reporting agents, which was limited to brokers or dealers.²⁰³

C. Reporting Agent Requirements—Rule 10c-1a(b)

1. Reporting Agent Reporting Requirements—Rule 10c-1a(b)

Proposed Rule

As discussed above, in Part VII.B, paragraph (a)(1)(ii)(B) of the proposed rule required the reporting agent to provide the Rule 10c-1 information to an RNSA if the reporting agent had entered into a written agreement (with the covered person) to provide the Rule 10c-1 information to an RNSA pursuant to paragraph (a)(1)(ii)(A).²⁰⁴ of the proposed rule and the reporting agent had been provided timely access to such Rule 10c-1 information by the covered person. The proposed rule, in paragraphs (a)(2)(i) through (a)(2)(iv),²⁰⁵ also included requirements for the reporting agent to assist both an RNSA and the Commission with surveillance and compliance with RNSA requirements and proposed Rule 10c-1.²⁰⁶ In proposing the specific requirements for reporting agents, the Commission preliminarily believed it was appropriate for a reporting agent to be responsible for providing Rule 10c-1 information to an RNSA, provided the reporting agent has contractually agreed to provide such information to an RNSA and the reporting agent has also been provided with timely access to such information.²⁰⁷

In addition, the proposed rule's requirement that the reporting agent enter into a written agreement with an RNSA was intended to evidence the explicit permission the reporting agent has to provide Rule 10c-1 information on behalf of the covered person.²⁰⁸ Similarly, the reporting agent would also have been required to provide an RNSA with a list of each covered person on whose behalf the reporting agent would be providing the Rule 10c-1 information (and also to update the list by the end of the day when the list

changes).²⁰⁹ As the Commission explained in the Proposing Release, requiring the reporting agent to provide the identities of each covered person on whose behalf the reporting agent is providing Rule 10c-1 information to an RNSA is intended to provide the Commission with the ability to obtain the identities of the covered persons from an RNSA in order to aid the Commission with its oversight of the covered persons that have entered into agreements with reporting agents, including with their compliance with the proposed rule.²¹⁰ In addition, the proposed requirement for a reporting agent to have written policies and procedures was intended to provide regulators with a means to examine and enforce a reporting agent's compliance with proposed Rule 10c-1. Moreover, the proposed recordkeeping requirements were intended to help facilitate the Commission's oversight of reporting agents and to review the reporting agents' compliance with the requirements to provide the Rule 10c-1 information to an RNSA.²¹¹

Final Rule

The Commission sought specific comment regarding the role and requirements of a reporting agent. The Commission received a number of reporting agent-related comments in response; however, most of these comments focused primarily on a covered person's use of a reporting agent or the eligibility requirements for a reporting agent, as discussed above, in Part VII.B.2, rather than the requirements of an already eligible reporting agent, as relevant here.²¹² The Commission is adopting the specific reporting agent requirements, substantially as proposed, but with some non-substantive modifications.

First, the requirements are relocated into a separate paragraph (b) under the final rule.²¹³ This non-substantive, technical modification is intended to streamline and simplify the proposed rule text, by combining into one paragraph, the requirements specific to a reporting agent (as distinguished from the requirements applicable to the covered person) in order to help clarify which party is ultimately responsible

²⁰⁰ See final Rule 10c-1a(j)(4).

²⁰¹ See final Rule 10c-1a(a)(1).

²⁰² See final Rule 10c-1a(j)(4).

²⁰³ See proposed Rule 10c-1a(1)(ii)(A).

²⁰⁴ See Proposing Release, 86 FR 69810 (stating “[s]uch written agreements under proposed Rule 10c-1(a)(1)(ii)(A) would memorialize and provide proof of the contractual obligations for the reporting agent to provide the Rule 10c-1 information to an RNSA.”).

²⁰⁵ The reporting-related requirements specific to the reporting agent, as proposed, included: paragraph (a)(2)(i) of the proposed rule's policies and procedures requirement; paragraph (a)(2)(ii) of the proposed rule's written agreement with an RNSA requirement; and, paragraph (a)(2)(iii) of the proposed rule's list of names requirement. See proposed Rules 10c-1(a)(2)(i) through (a)(2)(iii). Proposed paragraph (a)(2)(iv) is discussed below, in Part VII.C.2, regarding a reporting agent's recordkeeping requirements.

²⁰⁶ See Proposing Release, 86 FR 69809.

²⁰⁷ See Proposing Release, 86 FR 69810.

²⁰⁸ See Proposing Release, 86 FR 69810.

²⁰⁹ See Proposing Release, 86 FR 69810.

²¹⁰ See Proposing Release, 86 FR 69810–11.

²¹¹ See Proposing Release, 86 FR 69811.

²¹² One commenter, however, stated that it is clearer and more efficient to impose the obligation directly on the lending and reporting entities when the conditions of the proposed rule are satisfied. See ICI Letter 1, at 4 (discussing a reporting agent's role in terms of its obligation to report for purposes of compliance with the requirements of the proposed rule).

²¹³ See final Rules 10c-1a(b) through (b)(5).

for providing the Rule 10c–1a information to an RNSA.

Second, to reduce redundancy and complexity in the proposed rule text, paragraph (b) of the final rule requires that “any reporting agent” that assumes the reporting obligation on behalf of the covered person, pursuant to paragraph (a)(2) of the final rule, comply with the specific requirements in paragraph (b) of the final rule.²¹⁴ A covered person that enters into a written agreement with a reporting agent to provide the Rule 10c–1a information to an RNSA on behalf of the covered person as required by the final rule, and that provides the reporting agent with timely access to the Rule 10c–1a information, may rely on the reporting agent to fulfill the covered person’s reporting obligations under paragraph (a)(1) of the final rule.

Lastly, the final rule combines the reporting-related requirements that were previously located in paragraphs (a)(1)(ii)(B) and (a)(2) of the proposed rule with the proposed reporting agent recordkeeping requirements in paragraphs (a)(1)(ii)(A) and (a)(1)(ii)(B), into paragraph (b) in the final rule.²¹⁵

Paragraph (b) of the final rule’s specific inclusion of the term “reporting agent,” which is defined in final Rule 10c–1a(j)(4) to mean a broker, dealer, or registered clearing agency that enters into a written agreement with a covered person under paragraph (a)(2) of the final rule, as well as inclusion of the “assumes the reporting obligation” language, sets forth the reporting agent’s ultimate responsibility for reporting Rule 10c–1a information to an RNSA. The final rule provides that a reporting agent will be required to provide the Rule 10c–1a information to an RNSA under the new reporting regime only when the covered person has both: (1) entered into the required written agreement with the reporting agent, and (2) provided the reporting agent with timely access to the Rule 10c–1a information.²¹⁶ Thus, if a reporting agent is unable to provide the Rule 10c–1a information to an RNSA because it lacks timely access to it, the covered person who enters into the written agreement with the reporting agent

under paragraph (a)(2)(i) of the final rule remains responsible for providing the required Rule 10c–1a information to an RNSA, consistent with the proposed rule.

Additionally, the Commission is adopting: 17 CFR 240.10c–1a(b)(1) (“final Rule 10c–1a(b)(1)”; 17 CFR 240.10c–1a(b)(2) (“final Rule 10c–1a(b)(2)”; and 17 CFR 240.10c–1a(b)(3) (“final Rule 10c–1a(b)(3)”) as new paragraphs (b)(1) through (b)(3) of the final rule, the specific reporting-related requirements²¹⁷ of a reporting agent, substantially as they were proposed in paragraphs (a)(2)(i) through (a)(2)(iii) of the proposed rule.²¹⁸ Paragraph (b)(2) of final Rule 10c–1a will require a reporting agent to establish, maintain, and enforce written policies and procedures that are reasonably designed to provide Rule 10c–1a information to an RNSA. However, in the final rule, as modified with non-substantive, technical, or clarifying changes to the rule text consistent with the other changes made to the overall final rule text, such Rule 10c–1a information is provided (by the reporting agent) to an RNSA on behalf of a “covered person” (which is a newly defined term in the final rule, rather than the term “another person,” as was used in the proposed rule); and, also consistent with the proposed rule, such information is to be provided “in the format and manner required by the applicable rule(s) of an RNSA, and within the time periods specified in paragraphs (c) through (e)”²¹⁹ (which is designed to clarify the proposed rule text, “in the manner, format, and time consistent with Rule 10c–1”²²⁰). Apart from the aforementioned changes, the policies and procedures requirement of the reporting agent remains unchanged from the proposed rule.

Additionally, consistent with the proposed rule, paragraph (b)(3) of the final rule requires the reporting agent to enter into a written agreement with an

RNSA that permits the reporting agent to provide the required Rule 10c–1a information to an RNSA (e.g., establish the required connectivity with such RNSA) on behalf of a covered person. More specifically, the final rule provides that a reporting agent shall “[e]nter into a written agreement with an RNSA that permits the reporting agent to provide Rule 10c–1a information to an RNSA on behalf of a covered person.”²²¹ Other than replacing the proposed term “another person” with the newly defined term “covered person” in the final rule, the written agreement requirement of the reporting agent remains unchanged from the proposed rule.

Moreover, the Commission is adopting 17 CFR 240.10c–1a(b)(4) (“final Rule 10c–1a(b)(4)”), which requires the reporting agent to “provide an RNSA with a list naming each covered person on whose behalf the reporting agent is providing Rule 10c–1a information to an RNSA,” consistent with the proposed rule, although paragraph (b)(4) of final Rule 10c–1a adds the term “naming” to replace the less-descriptive term “of,” as was used in the proposed rule. For consistency, the final rule also includes the newly defined term “covered person” in place of “person and lending agent,” as was used in paragraph (a)(2)(iii) of the proposed rule. Moreover, paragraph (b)(4) of the final rule clarifies the proposed rule by streamlining the text, “provide an RNSA with any updates to the list of such persons by the end of the day such list changes,” by removing the extra “on the day” in the sentence. Also, the final rule slightly modifies the rule text “an updated list” to read instead “any updates to the list” to clarify that any updates (or changes) to the list (and the updated list itself) must be provided to an RNSA “by the end of the day such list changes.”²²² A reporting agent’s written policies and procedures will need to address the above requirements.

2. Recordkeeping Requirements of a Reporting Agent—Rule 10c–1a(b)(5)

Proposed Rule

Paragraph (a)(2)(iv) of the proposed rule would have required that the reporting agent maintain certain information for a period of three years, the first two in an easily accessible place.²²³ The information required to be maintained included the Rule 10c–1 information provided by the covered

²¹⁴ See final Rule 10c–1a(j)(4), defining “reporting agent” to mean a broker, dealer, or registered clearing agency that enters into a written agreement with a covered person under paragraph (a)(2) of final Rule 10c–1a.

²¹⁵ See final Rule 10c–1a(b). Paragraph (b)(1) of the final rule clarifies that the reporting agent is required to comply with the rules of an RNSA in terms of the format and manner of reporting the required information to an RNSA and comply with the specific time periods set forth in paragraphs (c) through (e) of final Rule 10c–1a.

²¹⁶ See final Rule 10c–1a(b)(1). See also final Rule 10c–1a(a)(2).

²¹⁷ See *supra* note 205 regarding paragraph (a)(2)(i) of the proposed rule’s policies and procedures requirement; paragraph (a)(2)(ii) of the proposed rule’s written agreement with an RNSA requirement; and paragraph (a)(2)(iii) of the proposed rule’s list of names requirement.

²¹⁸ Specifically, once the covered person enters into the required written agreement with the reporting agent, and the covered person provides the reporting agent with timely access to the Rule 10c–1a information, paragraph (b)(1) of the final rule specifically requires the reporting agent to provide the Rule 10c–1a information to an RNSA on behalf of a covered person (in the format and manner required by the rule(s) of such RNSA and within the time periods specified in paragraphs (c) through (e) of final Rule 10c–1a). See final Rule 10c–1a(b)(1).

²¹⁹ See final Rule 10c–1a(b)(2).

²²⁰ See proposed Rule 10c–1(a)(2)(i).

²²¹ See final Rule 10c–1a(b)(3) (replacing term “another person” from paragraph (a)(2)(ii) of the proposed rule with the term “covered person”).

²²² See final Rule 10c–1a(b)(4).

²²³ See proposed Rule 10c–1(a)(2)(iv).

person to the reporting agent, including the time of receipt, as well as the Rule 10c-1 information that the reporting agent provided to an RNSA, and time of transmission. Additionally, under the proposed rule, the reporting agent would have to retain the written agreements between the reporting agents and beneficial owners, lending agents, and an RNSA.²²⁴ As the Commission explained, the proposed recordkeeping requirements were designed to help facilitate the Commission's oversight of reporting agents and review the reporting agents' compliance with the requirement to provide the Rule 10c-1 information to an RNSA.²²⁵

Final Rule

One commenter stated that it was redundant and unnecessary for the reporting agent to retain data, as FINRA already has the data.²²⁶ However, pursuant to 17 CFR 240.10c-1a(b)(5) ("final Rule 10c-1a(b)(5)"), the reporting agent would not only be required to retain data that it submitted to an RNSA (including time of transmission), but would also be required to retain the data it received from the covered person (including time of receipt), which would demonstrate compliance with the timeliness requirements of the rule or whether the reporting agent itself received the data in an untimely manner from the covered person, as well as the written agreements required in order to be eligible as a reporting agent. Such records would be helpful to regulators in identifying and reconstructing the reasons for missing, incomplete, or untimely data (e.g., whether it was the result of untimely receipt by the reporting agent or issues with the reporting agent's operations). The data would also help reporting agents respond to Commission inquiries as to whether the reporting agent or the covered person appropriately complied with the final rule. The records of data submitted to an RNSA would provide context for such inquiries, as well as allow for a comparison of data received (by the reporting agent) and submitted to an RNSA, to the data published by an RNSA, allowing regulators to determine whether there are issues with an RNSA's processing of data received.

Accordingly, the Commission is adopting, in paragraph (b)(5) of final Rule 10c-1a without substantive changes, the proposed recordkeeping requirements contained in paragraphs (a)(2)(iv)(A) and (B) of the proposed rule

that provide for the reporting agent to preserve for a period of not less than three years, the first two years in an easily accessible place, both the Rule 10c-1a information obtained by the reporting agent from the covered person pursuant to paragraph (a)(2) of the final rule, including the time of receipt, and the corresponding Rule 10c-1a information provided by the reporting agent to an RNSA, including the time of transmission to an RNSA²²⁷; and, the written agreements as required under paragraphs (a)(2) and (b)(3) of the final rule.²²⁸

D. Scope of Securities Required To Be Reported—Rule 10c-1a(j)(3)

Proposed Rule

In the Proposing Release, the Commission stated its preliminary belief that proposed Rule 10c-1 should apply to all securities "to ensure that a complete picture of transactions involving the loan of securities is provided to the RNSA."²²⁹ Accordingly, the proposed rule would have required the reporting of loans of any security (e.g., both equity and debt).²³⁰

Specifically, the Commission stated that, "if the Commission were to limit the scope of the proposed Rule (e.g., to only equity securities) then a significant number of securities lending transactions would be excluded and the market efficiencies and reduction of information asymmetry that the Commission anticipates will result from proposed Rule 10c-1 would not accrue to non-equity securities."²³¹

Final Rule

In response to proposed Rule 10c-1, some commenters expressed general support for increased transparency and price discovery in the securities lending market by increasing the amount and availability of data in the market.²³²

²²⁷ See final Rule 10c-1a(b)(5); 17 CFR 240.10c-1a(b)(5)(i) ("final Rule 10c-1a(b)(5)(i)"); 17 CFR 240.10c-1a(b)(5)(ii) ("final Rule 10c-1a(b)(5)(ii)").

²²⁸ While the term "Rule 10c-1a information" has stayed the same in the final rule, as also explained below, in Part VII.F, the scope of the information required by the final rule has been modified with the deletion of the proposed requirement to provide information regarding the total amount of "securities on loan" and "available to lend" data, as was originally proposed.

²²⁹ See Proposing Release, 86 FR 69808.

²³⁰ See proposed Rule 10c-1(a)(1). See also Proposing Release, 86 FR 69808. See, e.g., 17 CFR 230.902 (defining "Debt securities" as "any security other than an equity security" and an "equity security" as defined in 17 CFR 230.405).

²³¹ See Proposing Release, 86 FR 69808 (citing *A Pilot Survey of Agent Securities Lending Activity*, Off. Of Fin. Research, Working Paper No. 16-08, 2016, at 8, available at https://www.financialresearch.gov/working-papers/files/OFRwp-2016-08_Pilot-Survey-of-Securities-Lending.pdf).

²³² See *supra* note 47.

Other commenters offered support for the inclusion of all loans of securities.²³³ Another commenter expressed the view that "[t]here is an urgent need to require securities lenders to provide greater details of their loans to a RNSA as outlined by the proposed changes to Rule 10c-1 . . . [m]arket participants and regulators alike will greatly benefit from the greater transparency that comes from reporting every securities lending transaction as a result of the proposed changes to Rule 10c-1, just as they have from the trade-by-trade reporting that was instituted in the corporate bond market since TRACE was introduced."²³⁴

One commenter recommended that the Commission make explicit "the types of securities loans to which Rule 10c-1 applies so that market participants have clarity as to which types of securities loans must be reported."²³⁵ The final rule makes explicit the types of transactions to which the final rule applies and the securities that are within the scope of the final rule through two newly defined terms: "covered securities loan" and "reportable security." The definition of the term "covered securities loan" in paragraph (j)(2) of the final rule makes explicit the types of loans to which the final rule applies, as discussed below, in Part VII.E. The definition of the term "covered securities loan" refers to a transaction in which any person on behalf of itself or one or more other persons, lends a "reportable security" to another person.²³⁶ The final rule defines the term "reportable security" as "any security or class of an issuer's securities for which information is reported or required to be reported to the consolidated audit trail as required by § 242.613 ("Rule 613") of the Exchange Act and the CAT NMS Plan ("CAT"), the Financial Industry Regulatory Authority's Trade Reporting and Compliance Engine ("TRACE"), or the Municipal Securities Rulemaking Board's Real Time Reporting System ("RTRS"), or any reporting system that replaces one of these systems."²³⁷ The definition of the term "reportable security" aligns the securities for which loans must be reported with securities for which transactions are currently being reported to existing reporting regimes, specifically, the CAT, TRACE, and RTRS. At this time, data on

²³³ See Nasdaq Letter, at 2; Morningstar Letter, at 4.

²³⁴ See AFREF Letter 1, at 3.

²³⁵ ICI Letter 1, at 7.

²³⁶ Final Rule 10c-1a(j)(2).

²³⁷ Final Rule 10c-1a(j)(3).

²²⁴ See Proposing Release, 86 FR 69811.

²²⁵ See Proposing Release, 86 FR 69811.

²²⁶ See James J. Angel Letter, at 7.

securities loans should be consistent with existing reporting regimes for other transactions in the same securities.

Aligning the scope of securities for covered securities loans with existing transaction reporting systems will provide a number of benefits. For instance, such alignment will allow regulators to obtain a more complete view across the different types of transactions for the same securities. In addition, many market participants are already familiar with the existing systems, either as reporting entities or, in the case of TRACE and RTRS, as users of the data.

Presently, securities that fall outside of the existing reporting regimes include: (1) for TRACE: fixed-income transactions in securities with a maturity of one calendar year or less, such as money market instruments,²³⁸ and non-U.S. dollar-denominated debt are excluded from reporting requirements in TRACE;²³⁹ (2) for the CAT: equity transactions in “restricted securities,” as that term is defined in 17 CFR 230.144(a)(3) (“Rule 144”) of the Securities Act,²⁴⁰ are generally not reportable to the CAT because they are not subject to prompt last sale reporting rules;²⁴¹ and (3) for RTRS: municipal securities transactions excepted under

MSRB Rule G–14,²⁴² including a small number of transactions for securities without assigned Committee on Uniform Securities Identification Procedure (“CUSIP”) numbers, municipal fund securities (*i.e.*, 529 Plans, ABLE programs, local government investment pools), and inter-dealer transactions ineligible for comparison of trade settlement date at a clearing agency.²⁴³ To provide consistency with existing reporting regimes, final Rule 10c–1a also incorporates these exclusions.

The Commission also received comments with suggestions to limit the scope of securities for which loans must be reported under the proposed rule.²⁴⁴ One commenter favored narrowing the proposed scope of securities to only equity securities that transact in significant volume in the U.S., namely equity securities listed or traded on a national securities exchange “to avoid uncertainty for non-U.S. borrowers and lenders transacting in securities that are primarily relevant in non-U.S. markets and to provide for a measured approach in introducing data reporting and dissemination into the marketplace.”²⁴⁵ Investors will also benefit from the increased transparency into loans of equity securities that are not listed or

traded on a national securities exchange (*i.e.*, loans of equities that are traded over-the-counter (“OTC”)) provided by the final rule. The Commission understands that existing lending transparency systems currently include information about loans of exchange-listed and OTC securities. Thus, lenders should generally already be accustomed to providing and receiving such data. Further, OTC securities tend to be less liquid and publicly available information about an issuer of an OTC security may be limited or nonexistent,²⁴⁶ and thus such securities may be harder to borrow. Accordingly, data concerning loans of less liquid securities, such as OTC securities, will be beneficial to market participants by reducing information asymmetries and improving pricing efficiency by facilitating benchmarking for the loans of less liquid securities.²⁴⁷

Commenters also requested clarification regarding which types of securities would be reportable,²⁴⁸ and some suggested limiting the scope of reportable securities. For example, one commenter suggested limiting the scope to equities for a period of time while the Commission evaluates whether to expand the scope of reporting to additional asset classes.²⁴⁹ Another commenter stated that the final rule should “capture the most relevant and appropriate securities for the reporting regime [referring to equity securities] while not precluding the inclusion of other securities over time as the SEC and market participants gain more experience with the reporting regime.”²⁵⁰ The definition of the term “reportable security” in the final rule is not limited to equities for the reasons discussed below, in this part. The definition of the term “reportable

²³⁸ See, e.g., FAQ 3.1.43, available at <https://www.finra.org/filing-reporting/trace/faq> (“[a]s stated in Rule 6710(a), the definition of TRACE-Eligible Security does not include a Money Market Instrument. Under recent amendments to Rule 6710(o) pertaining to discount notes, “Money Market Instrument” means a debt security that at issuance has a maturity of one calendar year or less, or, if a discount note issued by an Agency, as defined in Rule 6710(k), or a Government-Sponsored Enterprise, as defined in Rule 6710(n), a maturity of one calendar year and one day or less (*i.e.*, not later than 366 days from the date of issuance, or if a leap year, not later than 367 days from the date of issuance).”).

²³⁹ See, e.g., <https://www.finra.org/filing-reporting/trace/trace-foreign-sovereign-debt>.

²⁴⁰ See, e.g., <https://www.catsnmsplan.com/faq> (see FAQ B11 describing the types of products in scope for reporting to the CAT).

²⁴¹ Under the CAT NMS Plan, “Eligible Security” includes: (i) all NMS Securities, meaning “any security or class of securities for which transaction reports are collected, processed, and made available pursuant to an effective transaction reporting plan, or an effective national market system plan for reporting transactions in Listed Options,” and (ii) all OTC Equity Securities, meaning “any equity security, other than an NMS Security, subject to prompt last sale reporting rules of a registered national securities association and reported to one of such association’s equity trade reporting facilities.” Further, while the CAT NMS Plan does not define “prompt last sale reporting rules,” the Operating Committee has determined that transactions in “restricted securities” (as defined by Rule 144(a)(3)) are not reportable to the CAT because they are not subject to prompt last sale reporting rules. However, transactions in direct participation programs must be reported to the CAT in Phase 2c of Industry Member reporting.

²⁴² Brokers, dealers, and municipal securities dealers (“municipal dealers”) must report transactions in municipal securities pursuant to MSRB Rule G–14. Pursuant to Rule G–14, each municipal dealer reports to the MSRB or its designee information about each purchase and sale transaction effected in municipal securities to RTRS in the manner prescribed by Rule G–14, available at <https://www.sec.gov/rules/sro/msrb/2018/34-83038-ex5.pdf>.

²⁴³ See, e.g., Specifications for Real-Time Reporting of Municipal Securities Transactions (Nov. 2022), at 15 (“1.2.1 Securities that Must be Reported[:] In the real-time environment, all customer trades in municipal securities issues that have CUSIP numbers assigned by the CUSIP Service Bureau of Standard & Poor’s must be reported, except municipal fund securities. Dealers should not report (a) customer transactions in issues ineligible for CUSIP number assignment and (b) municipal fund securities. For inter-dealer trades, transactions must be reported in all municipal securities issues eligible for comparison in RTTM [the National Securities Clearing Corporation’s (“NSCC”) Real-Time Trade Matching (“RTTM”) web-based trade input method]. In addition, Rule G–14 requires that the role of a clearing broker in RTTM-eligible agency transactions effected by an introducing broker against the principal positions of the clearing broker shall be reported If an issue is not RTTM-eligible (because of the lack of a CUSIP number for the security or other reasons), inter-dealer trades in the issue are not subject to the reporting requirement.”) (footnotes omitted), available at <https://www.msrb.org/sites/default/files/RTRS-Specifications.pdf>.

²⁴⁵ See, e.g., RMA Letter, at 15.

²⁴⁶ See, e.g., *Publication or Submission of Quotations Without Specified Information*, Release No. 34–89891 (Sept. 16, 2020), 85 FR 68124 at 68125 (Oct. 27, 2020) (Adopting Release) (“However, in other cases, there is no or limited current public information available about certain issuers of quoted OTC securities to allow investors or other market participants to make informed investment decisions.”).

²⁴⁷ See *infra* Part IX.C.1 (discussing the benefits of increased transparency in less liquid lending markets).

²⁴⁸ See, e.g., BlackRock Letter, at 2 (“as securities lending market dynamics differ by the asset class, we recommend the Commission provide further clarity on which asset classes are in scope”); ICI Letter 1, at 6.

²⁴⁹ See ICI Letter 1, at 7.

²⁵⁰ See RMA Letter, at 17 (supporting an initial definition of “securities” to include “equity securities that are part of the national market system” because that definition “captures the most relevant and appropriate securities for the reporting regime while not precluding the inclusion of other securities over time as the SEC and market participants gain more experience with the reporting regime”).

security” in paragraph (j)(3) of the final rule will help provide certainty to non-U.S. borrowers and lenders regarding the securities that are within the scope of the final rule (*i.e.*, securities or any class of an issuer’s securities for which information is reported or required to be reported to the CAT, TRACE, or RTRS, or any reporting system that replaces one of these systems). In addition, Part VII.M below discusses the domestic application of the final rule, which should also help provide certainty to non-U.S. borrowers and lenders transacting in securities that are primarily relevant in non-U.S. markets about the application of the final rule. With respect to taking a measured approach in introducing data reporting and dissemination into the marketplace, the Commission is establishing the specific compliance dates discussed below in Part VIII. Such compliance dates should provide adequate time for covered persons to implement systems for data reporting and for RNSAs to implement data dissemination systems. Another commenter recommended that the Commission begin with reporting requirements for loans of U.S. equity securities because such loans “mostly occur on electronic trading platforms, making the generation of trade data for these loans more straightforward than loans of other asset classes.”²⁵¹ As discussed above, the Commission has provided a compliance date that will provide adequate time for covered persons to comply with the final rule, even for loans of securities that may not occur on an electronic trading platform, and will not further delay transparency for OTC investors, which are primarily retail.²⁵²

Some commenters requested a phased approach to the overall implementation of the final rule, which is discussed below, in Part VIII, including a recommendation that implementation of the final rule begin with loans of equity securities.²⁵³ However, current lending systems include data on loans of fixed income securities.²⁵⁴ Thus, lenders should generally be accustomed to providing and analyzing data on loans of fixed income securities. Further, as discussed below, in Part VIII, such a phased approach is not provided for in

the final rule because it would unduly delay the public availability of Rule 10c–1a information and limit the initial benefits of the final rule.

One commenter suggested excluding debt from the proposed rule, particularly corporate debt and asset-backed securities, which the commenter described as having small issuance sizes, diverse characteristics, and a small number of lending transactions.²⁵⁵ However, information about loans on such securities will be beneficial to lenders, investors, and regulators precisely because of such characteristics. Data on such loans may be useful for lenders to assess rates and for regulators and investors to understand the lending market for such securities. For example, market participants will be able to use the information made publicly available by the final rule and pool such information across debt securities to help market participants compare the terms of a loan of one debt security with loans of other debt securities that have similar characteristics or time horizons. Thus, including debt securities in the final rule will help improve the ability of market participants to benchmark their loans of debt securities.

The Commission also received comment regarding the size of the debt market. One commenter stated that “[w]hile the number of publicly traded equity securities of U.S. issuers is around 3,600, there are over two million unique issuances of corporate and government bonds and asset-backed securities in circulation.”²⁵⁶ The same commenter stated that utilization rates decrease as products become more individualized and there is only a small market for shorting bonds.²⁵⁷ Less liquid markets should benefit from the increased transparency provided by the final rule because improving securities lending transparency, even in the debt market, can lead to reduced information asymmetry and increased pricing efficiency.²⁵⁸

One commenter suggested excluding government securities from the proposed rule because “there is sufficient liquidity and demand for these securities on platforms and venues that have a high degree of transparency,” but did not provide details regarding the transparency of the platforms and venues.²⁵⁹ As discussed below, in Part IX.B.2, there is some

transparency in the government securities lending market, but some information may not be as timely or as robust (*i.e.*, the data may contain aggregated volume information) as under the final rule. The final rule includes loans of U.S. Government securities between market participants to help ensure that comprehensive and timely information about these loans is made publicly available so that market participants in the government securities lending market benefit from increased transparency.

Some commenters requested clarification on whether “crypto assets” or as some commenters referred to them, “cryptocurrencies” would be covered by proposed Rule 10c–1.²⁶⁰ A crypto asset, which is also sometimes referred to as a “digital asset,” may meet the definition of a “security” under the federal securities laws.²⁶¹ As defined in the final rule, paragraph 10c–1a(j)(3) applies to reportable securities, which are securities for which transactions are reported to the CAT, TRACE, and RTRS. Accordingly, if a crypto asset is a security that meets one of these same criteria, the crypto asset is a reportable security.

One commenter believed that infrequent lending of debt securities could result in a “far greater risk of loss of anonymity and the use of such data to anticipate or reverse engineer the trading of competitors.”²⁶² The final rule’s requirements for end-of-day reporting of data elements and loan modification data elements in paragraphs (c) and (d) and delaying the publication of loan amount and modifications to loan amount in paragraph (g) should help reduce the potential to anticipate and reverse engineer the trading of competitors. In addition, paragraph (g)(4) of the final rule requires that following the receipt of confidential information pursuant to paragraph (e) “an RNSA shall keep such information confidential, in accordance with the provisions of paragraph (h) of this section and applicable law.”²⁶³ Further, 17 CFR 240.10c–1a(h)(4) (“final Rule 10c–1a(h)(4)”) requires that an RNSA “[e]stablish, maintain, and enforce reasonably designed written

policies and procedures to maintain the security and confidentiality of confidential information required by paragraph (e) of this section.”²⁶⁴ Thus, the only existing RNSA’s experience with managing nonpublic information, coupled with the explicit requirements for protecting confidential information in paragraphs (g)(4) and (h)(4) of the final rule, will help ensure that an RNSA implements data security measures that will protect anonymity.

E. Scope of Transactions Required To Be Reported—Rule 10c-1a(j)(2)

Proposed Rule

The Commission proposed that any person that “loans a security” on behalf of itself or another person shall provide Rule 10c-1 information to an RNSA.²⁶⁵ The Commission did not define the term “loans a security,” but requested comment on whether a definition was necessary.²⁶⁶ In the Proposing Release, the Commission stated its preliminary belief that any person that loans a security on behalf of itself or another person should be required to provide the material terms to an RNSA to ensure that proposed Rule 10c-1 is appropriately “designed to increase the transparency of information available to brokers, dealers, and investors, with respect to the loan or borrowing of securities.”²⁶⁷

Final Rule

Many commenters requested clarification of the scope of securities loan transactions to which the rule’s reporting requirements would apply.²⁶⁸ One commenter stated that the proposed rule sought to regulate “a host of transactions that do not involve the ‘loan or borrowing of securities.’”²⁶⁹ Other commenters recommended that a definition of the term “loans a security” refer only to lending for a particular purpose.²⁷⁰ Some of those commenters expressed concerns about including data for loans that were not considered traditional loans in the industry, particularly loans for which the parties did not enter into a written contract or transfer collateral, and that such loans

might “skew the data and negatively impact the utility of the information provided.”²⁷¹ Other commenters recommended that the final rule include a defined term for the types of transactions that are covered by the rule.²⁷²

To address commenters seeking greater clarity and commenters recommending a definition as to what types of transactions are required to be reported, the final rule includes a definition of the term “covered securities loan” to mean “a transaction in which any person on behalf of itself or one or more other persons, lends a reportable security to another person,” with certain exceptions.²⁷³ As discussed below, in this part, the exceptions remove from the scope of the final rule’s reporting requirements certain clearing agency positions²⁷⁴ and certain uses of margin securities by a broker or dealer²⁷⁵ that are not consistent with, or traditionally recognized as, securities lending transactions.

The Commission received a comment recommending that the term “loans a security” be limited to lending to unaffiliated borrowers.²⁷⁶ Other commenters suggested that information on securities lending transactions between affiliates not be disseminated under the rule,²⁷⁷ with one stating that, “loans between a broker-dealer and its affiliates, may not represent the actual rates available in the securities lending market and therefore could cause confusion and lead to misinterpretation if published.”²⁷⁸ The Commission does not agree that it would be appropriate to exclude loans to affiliated borrowers from the scope of the final rule. Inter-affiliate loans may be arms-length transactions and excepting such loans

would result in the loss of data relevant to the lending market.²⁷⁹

In addition, an exclusion for inter-affiliate loans could result in market practices to circumvent reporting obligations. For instance, in arranged financing, a broker or dealer “may offer arranged financing programs (sometimes called ‘enhanced lending’ or ‘short arranging products’) through which a customer can borrow shares from the firm’s domestic or foreign affiliate and use those shares to close out a short position in the customer’s account.”²⁸⁰ In describing arranged financing, a market participant has stated that “[w]ith respect to . . . arranged financing/enhanced lending models at member firms, certain ones may involve the loan of shares to customers from domestic affiliates and others may involve the loan of shares to customers from foreign affiliates.”²⁸¹ Thus, if the broker or dealer agrees to provide a customer the covered securities loan through an affiliate, such as a foreign affiliate, an exclusion for inter-affiliate loans could exclude the securities loan entirely. Moreover, one researcher has observed that “owners of large portfolios . . . often conduct their own lending programs with an affiliated agent lender”²⁸² An exclusion for inter-affiliate loans would not capture such loans. Therefore, under the final rule a covered person is required to report covered securities loans with affiliates.

Certain commenters recommended that a definition of the term “loans a security” refer only to transactions made pursuant to a written lending agreement²⁸³ or documented as a securities loan on the lender’s books

²⁷⁰ See, e.g., CASLA Letter, at 2 (recommending “a definition of ‘securities loan’ . . . based on the purpose of a loan”).

and records.²⁸⁴ One commenter stated that such an approach would “ensure consistent reporting and avoid confusion and misinterpretation of data by the public.”²⁸⁵ Another commenter stated that it could avoid “the public dissemination of incomplete, inaccurate, and misleading information that could have an adverse impact on the securities lending market.”²⁸⁶ The Commission disagrees that the definition of the term “covered securities loan” should require that the transaction be agreed to pursuant to a written securities lending agreement such as the Master Securities Loan Agreement, or a transaction documented as a securities loan on a lender’s books and records. Such a requirement could provide an easy way to avoid the requirement, particularly for unregulated entities not otherwise subject to documentation and books and records requirements. Moreover, such a requirement could cause competitive harm to entities that are subject to such requirements or who follow such practices as risk management tools. Requiring the reporting of only securities loans made pursuant to a written agreement or subject to a covered person’s books and records requirements would create confusion by introducing such distinctions, which may be interpreted or applied differently across the different types of persons that meet the definition of “covered person.” Additionally, such requirements would result in data that excludes reporting by covered persons that do not use written agreements or have books and records requirements. Such gaps in the data could contribute to the misinterpretation of data by the public, instead of ameliorating it as the commenter suggests.²⁸⁷ Thus, the final rule covers a wide variety of loans without limitation as to a particular loan’s design or structure by including all loans that occur when a covered person “agrees to a covered securities loan.”²⁸⁸

²⁸⁴ See, e.g., SIFMA Letter 1, at 3; SIFMA AMG Letter, at 9.

²⁸⁵ See SIFMA Letter 1, at 3.

²⁸⁶ SIFMA AMG Letter, at 2.

²⁸⁷ See SIFMA Letter 1, at 3.

²⁸⁸ See final Rule 10c–1a(a). The final rule’s requirement that a covered person who “agrees to” a covered securities loan must report Rule 10c–1a information to an RNSA (or rely on a reporting agent to do so) is designed to be broad regarding when a securities loan is required to be reported. This is designed to ensure that differently structured securities loans are captured by the final rule to prevent evasion (e.g., by not including specific characteristics, like a written agreement, that can be easily avoided), and to prevent undue delay of reporting (e.g., by not requiring that the loan be settled, which may take days or longer after

Some commenters recommended that the term “loans a security” specifically refer to the temporary lending of securities against a transfer of collateral.²⁸⁹ One of the commenters stated that such a provision would help “ensure consistent reporting and avoid confusion and misinterpretation of data by the public.”²⁹⁰ Another stated that defining the term “loan of securities” to include a transfer of collateral would “better achieve the Commission’s goals” by avoiding “the public dissemination of incomplete, inaccurate, and misleading information.”²⁹¹ Such a definition would have been consistent with the Proposing Release’s statement that a securities loan is typically a fully collateralized transaction.²⁹² However, the proposed rule did not limit the application of its reporting requirements to securities loans that were fully collateralized, as it was designed to capture all loans of securities and provide a more complete and timely picture of trading for securities loans.²⁹³ While the provision of collateral is currently a common industry practice for securities loans, it is not necessarily a characteristic of all securities loans. For example, some lenders may structure securities loans to include a bank guaranty, insurance policy, or other credit enhancement in lieu of collateral.²⁹⁴ Therefore, limiting the scope of loans covered by the final rule to only include lending against a transfer of collateral could leave certain loans out of the scope of the final rule’s reporting requirements. The exclusion of uncollateralized loans could decrease the availability of pricing and activity information in the securities lending market, resulting in the reporting and dissemination of incomplete, inaccurate, and misleading information for which the commenters voiced concern.²⁹⁵ Furthermore, the reporting of uncollateralized loans would provide additional data to market participants,

the material terms of a securities loan have been agreed to).

²⁸⁹ See, e.g., SIFMA Letter 1, at 16; SIFMA AMG Letter, at 9; RMA Letter, at 15.

²⁹⁰ See SIFMA Letter 1, at 3.

²⁹¹ See SIFMA AMG Letter, at 2.

²⁹² See Proposing Release, 86 FR 69804.

²⁹³ See Proposing Release, 86 FR 69812.

²⁹⁴ See, e.g., 17 CFR 240.15c3–3(b)(3)(iii) (“Rule 15c3–3(b)(3)(iii)”) (stating that a broker or dealer borrowing fully paid or excess margin securities “[m]ust provide to the lender, upon the execution of the agreement or by the close of the business day of the loan if the loan occurs subsequent to the execution of the agreement, collateral, which fully secures the loan of securities, consisting exclusively of cash or United States Treasury bills and Treasury notes or an irrevocable letter of credit issued by a bank”).

²⁹⁵ See SIFMA AMG Letter, at 2; SIFMA Letter 1, at 3.

and would not result in misleading duplicative information like other types of transactions that are discussed below in this part (e.g., loans arising from certain clearing agency services). Additionally, such a restriction could incentivize market participants to use credit enhancement mechanisms that differ from collateral (e.g., bank guaranties or insurance policies) in order to avoid the final rule’s reporting requirements. Therefore, the scope of final Rule 10c–1a’s reporting requirements is not limited to only include loans against a transfer of collateral.²⁹⁶

One commenter recommended that the Commission limit the scope of the rule’s reporting requirements to securities loans where a lender seeks to earn compensation or a return from the transaction.²⁹⁷ The commenter stated that, “[l]imiting the scope in such a way would help focus reporting on primary transactions of interest, where the borrower is seeking to ‘gain access to the security itself,’ and distinguish it from repurchase and other agreements, which are ‘typically used for short-term financing.’”²⁹⁸ Another commenter proposed limiting the scope of securities loans to transactions in which a borrower obtains use of the securities for a fee.²⁹⁹ However, a limitation of the final rule’s reporting requirements to only securities loans made by a lender seeking to earn compensation or a return from the transaction, or for a fee could potentially result in evasion, as securities loans could be structured (e.g., via over-collateralization, haircuts, or use of non-cash collateral with varying maturities, credit ratings, or income characteristics) to avoid the identification of a fee. At the very least, such a requirement could result in confusion or inconsistent reporting as market participants may interpret differently the loan structures that incorporate a fee or are made by lenders

²⁹⁶ But see *supra* note 148 (discussing requirements for the provision of collateral by borrowers in the instance of fully paid and excess margin securities).

²⁹⁷ See, e.g., ABA Letter, at 3 (recommending “[t]he SEC should define covered securities lending transactions to those where the lender is seeking to earn compensation from the transaction”).

²⁹⁸ See ABA Letter, at 3–4 (quoting the Proposing Release, 86 FR 69844 n.246). See also *infra* in this part, a discussion of final Rules 10c–1a(f)(2)(iii) and (j)(2)(iii)(A) and the exclusion from the final rule’s reporting requirements of certain uses of margin securities by a broker or dealer, which can include “funding trades,” repurchase agreements, and uses of margin securities that are not a loan to another person (e.g., rehypothecation).

²⁹⁹ See BlackRock Letter, at 7 (recommending “the SEC should limit the scope to traditional securities lending transactions where the parties have entered into the loan transaction in order for a borrower to obtain use of the securities for a fee”).

seeking to earn compensation or a return from the transaction. If the final rule only applied to securities loans agreed to for compensation, a fee, or for the purpose of earning a return, securities loans made to affiliates could be structured to fall outside the final rule's reporting requirement (*i.e.*, made without an expectation of return or for no fee), while a loan still would have occurred, and the affiliate would still benefit from possession of the loaned securities. Further, the final rule does not exclude securities loans based on the purpose or duration of the loan, such as for "short-term financing," in order to capture a wide variety of loans regardless of purpose or duration. Finally, the final rule provides that a covered securities loan is a transaction in which a person *lends* a reportable security, which distinguishes covered securities loans from other agreements.

Multiple commenters were concerned that the proposed rule would require that short sales or short positions be reported as securities loans. Such commenters requested clarification of whether the proposed rule would treat short sales as loans of securities.³⁰⁰ To provide such clarification, under the final rule covered persons will not be required to report short sales as defined

by 17 CFR 242.200(a) ("Rule 200(a)"),³⁰¹ but will be required to report loans that are used for short sales.

The Commission stated in the Proposing Release that it was not proposing to include repurchase and sale agreements (commonly known as "repos") within the scope of the proposed rule because section 984 of the Dodd-Frank Act focuses on the loan or borrowing of securities.³⁰² The Proposing Release detailed distinctions between the typical securities lending and repo markets, including that repos typically are primarily used for short-term financing while other securities loans typically are used to gain access to the security itself, and that loans generally allow the lender to recall the security on demand while repos do not.³⁰³ Some commenters agreed with the Commission, recommending that repos should not fall within the meaning of the term "loans a security" in the proposed rule.³⁰⁴ One commenter suggested that loans of a security should be distinguished from repos.³⁰⁵ However, one commenter stated that there is "significant overlap in the functionality between repos and securities lending transactions."³⁰⁶ The commenter also suggested "a broad anti-evasion provision that prohibits any person from engaging in any practice intended to evade the rule's reporting requirements."³⁰⁷ The same commenter recommended defining the term "securities loan" to include repos.³⁰⁸

³⁰¹ Rule 200(a) provides, "The term short sale shall mean any sale of a security which the seller does not own or any sale which is consummated by the delivery of a security borrowed by, or for the account of, the seller."

³⁰² See Proposing Release, 86 FR 69803 n.2.

³⁰³ See Proposing Release, 86 FR 69843 n.246.

³⁰⁴ See, e.g., SIFMA Letter 1, at 9 (noting that "the Commission is not intending to include within the scope of the Proposed Rule the entry into repurchase agreements, which we believe is the proper approach"); SIFMA Letter 2, at 3; BlackRock Letter, at 2 (describing securities lending market trades as "transactions whereby a lender lends securities to a borrower in exchange for collateral but excluding repurchase transactions where the purpose of the trade is to provide cash financing in exchange for non-cash collateral").

³⁰⁵ See ABA Letter, at 3–4 (stating that "[t]he SEC should define covered securities lending transactions . . . and distinguish it from repurchase and other agreements").

³⁰⁶ See Better Markets Letter, at 10. See also James J. Angel Letter, at 6–7.

³⁰⁷ See Better Markets Letter, at 10. See also S3 Partners Letter, at 11 (expressing concern with securities lending transactions being repapered as repos); James J. Angel Letter, at 7 (stating that "[t]he final rule needs to define securities lending in such a way that it deters such evasion, while not ensnaring normal repo in the reporting requirements").

³⁰⁸ See Better Markets Letter, at 10 ("Accordingly the SEC should consider . . . a definition of 'securities loan' or 'securities lending' that will ensure sufficient coverage of relevant transactions,

The Office of Financial Research ("OFR") recently proposed a rule to collect data on repos.³⁰⁹ Accordingly, at this time, it is not necessary to include repos within the scope of the final rule's information reporting requirements, as a potential OFR rule, if adopted, could address any potential reporting gaps, thereby reducing the incentives to evade final Rule 10c–1a.

The Commission also received comment requesting that the final rule "make clear that the novation and processing of a securities lending transaction by a registered clearing agency does not give rise to a new loan or the modification of an existing loan subject to reporting under Rule 10c–1."³¹⁰ The same commenter also stated that "[n]ovation is . . . the legal mechanism through which NSCC guarantees to each counterparty the performance of the obligations under a transaction that the counterparties already negotiated and executed away from the NSCC and that was already subject to a reporting obligation."³¹¹ Another commenter directly responded to the Proposing Release's request for comment asking whether the Commission should define what it means to "loan a security."³¹² The commenter stated that the definition should "expressly exclude loan positions that result from the central counterparty novation function that a clearing agency like OCC provides to securities loans."³¹³ The commenter, which is an SEC-registered clearing agency, also stated that it "does not have access to the majority of information sought under proposed Rule 10c–1 . . . and, therefore could not report such information to an RNA." ³¹⁴ The Commission agrees with the commenters' recommendations that positions that result from central counterparty services by a clearing agency, including the novation and processing of a securities lending transaction, should not give rise to any

i.e., those where securities are temporarily transferred from one party to another, for compensation, with a commitment to return those securities in the future").

³⁰⁹ See, e.g., OFR Factsheet: OFR's Proposed Data Collection (Mar. 2023), available at https://www.financialresearch.gov/data/files/NCCBR_factsheet.pdf; Office of Financial Research Releases Proposal to Collect Data on Certain Repo Transactions (Jan. 5, 2023), available at <https://www.financialresearch.gov/press-releases/2023/01/05/office-of-financial-research-releases-proposal-to-collect-data-on-certain-repo-transactions>.

³¹⁰ See DTCC Letter, at 3; See also OCC Letter, at 10.

³¹¹ See DTCC Letter, at 4.

³¹² See Proposing Release, 86 FR 69808 (Question 8).

³¹³ See OCC Letter, at 12.

³¹⁴ See OCC Letter, at 12.

³⁰⁰ See Citadel Letter, at 4 (stating that "[t]he scope of the Commission's proposal is unclear" and that "[c]ustomer short sales . . . are not typically documented under securities lending agreements, booked as securities loans, or treated as securities loans for financial reporting purposes"); See also Fidelity Letter, at 3 (stating that "inclusion of short positions in the required reporting . . . would be inappropriate from a securities lending market perspective, as well as potentially misleading, as it could result in inaccurate double counting of loans"); IHS Markit Letter, at 3 (stating that securities loans and short sales "are two separate and distinct markets with different drivers, participants, and data points and should not be conflated"); SIFMA Letter 1, at 9–12 (recommending that the Commission exclude short positions from the scope of loans required to be reported to an RNA); AIMA Letter 1, at 3–4; Letter from Jiri Król, Deputy CEO, Global Head of Government Affairs, Alternative Investment Management Association (Apr. 1, 2022) ("AIMA Letter 2"), at 3 (short positions would be reported under the rule proposed by the Commission pursuant to section 929X of the Dodd-Frank Act); Letter from Richard Karoly, Managing Director, Legal, Charles Schwab & Co., Inc. (Jan. 7, 2022) ("Charles Schwab Letter"), at 1–2 (short positions are already reported under other reporting regimes such as FINRA's Rule 4560. Short-Interest Reporting); MFA Letter 3, at 4 (stating that the Commission should "distinguish short positions from stock loans"). The Commission agrees with commenters who stated that short positions are not subject to a written securities lending agreement, nor carried on a firm's books and records as securities loans, nor treated as securities loans for financial reporting purposes. See, e.g., FIF Letter, at 2–3; See also SIFMA AMG Letter, at 5 (stating that short positions are "similar in some respects but are outside of the securities lending activity" targeted by the proposed rule).

reporting obligation under the final rule, including the requirement to report loan modification data elements under paragraph (d) of the final rule. As discussed above, in Part VII.A, clearing agencies providing the functions of a central counterparty or central securities depository do not lend or borrow shares on their own behalf, but instead novate or process the loans of lenders and borrowers (*i.e.*, central counterparty or central securities depository services) for the purpose of efficient clearance and settlement.³¹⁵ Although novation of the loan by the clearing agency technically creates a new loan in which the clearing agency would step into the shoes of the counterparties,³¹⁶ the clearing agency would not be modifying the key terms of the loan (other than changing the identities of the counterparties to that of the clearing agency), such as the rate or size, and requiring clearing agencies to report such loans would result in the misleading appearance of additional loan volume containing otherwise duplicative loan information.³¹⁷ Therefore, the final rule excludes from the “covered securities loan” definition “a position at a clearing agency that results from central counterparty services pursuant to Rule 17Ad-22(a)(2) of the Exchange Act or central securities depository services pursuant to Rule 17Ad-22(a)(3) of the Exchange Act.”³¹⁸

The Commission also received a comment stating that “it is not uncommon for a lending agent to pool together available supply of a given security across multiple lenders in their lending program” to satisfy a large loan of securities and reallocate such loan among the lenders in the program, as the inventory of individual lenders changes, to avoid recalling a loan.³¹⁹

³¹⁵ See DTCC Letter, at 1 (stating that the “processing of a securities loan transaction, including through novation and netting, does not constitute a modification or a new transaction for reporting purposes. Such processing does not constitute new market activity or modify the material economic terms of the transaction, which the parties will have already reported” and that “[n]ovation is simply the legal mechanism through which NSCC guarantees to each counterparty the performance of the obligations under a transaction that the counterparties already negotiated and executed away from NSCC and that was already subject to a reporting obligation”).

³¹⁶ Under Rule 17Ad-22(a)(2), a clearing agency performs the functions of a central counterparty when it interposes itself between the counterparties to securities transactions, acting functionally as the buyer to every seller and the seller to every buyer.

³¹⁷ See final Rule 10c-1a(j)(2)(ii). If a clearing agency acted on behalf of the beneficial owner of the loaned security to effect a covered securities loan, then the clearing agency would be a “covered person” under paragraph (j)(1)(i) of the final rule.

³¹⁸ See final Rule 10c-1a(j)(2)(ii).

³¹⁹ See BlackRock Letter, at 7. See also, SIFMA AMG Letter, at 10 (stating that “for bulk loans,

The commenter also stated that, in such instances, “[g]iven no change in the economics of the trade or any physical movement of securities, these intraday record entries are not market trades and should not be reported as such.”³²⁰ However, the proposed rule did not limit its information reporting requirements to securities loans arising from “market trades” or the “physical movement of securities,” neither of which the commenter has defined or described in the context of the securities lending market. Changing the party or parties to a covered securities loan, which is required to be confidentially reported under 17 CFR 240.10c-1(e)(1) (“final Rule 10c-1a(e)(1)”), creates a new covered securities loan that would require reporting as a new covered securities loan to an RNSA under final Rule 10c-1a(a)(1), and not as a modification under final Rule 10c-1a(d). The identity of the lender or lenders is a material term of a covered securities loan.³²¹ The identity of the lender is not made public, but is important information for regulatory purposes, such as surveillance of activity pertaining to the individual loan.³²² Whether the parties to a covered securities loan change for purposes of the reporting requirements under final Rule 10c-1a(e)(1) depends on how a pool³²³ or lending program is structured (*e.g.*, whether the pool or lending program itself or the individual underlying participants are the party or parties identified as the lender for the loan). For example, if a lending program as an individual entity is the party that is the lender of the covered securities loan, changes to the underlying participants, inventory providers, or customers of that lending program will not constitute a change to the parties of the covered securities loan. In that instance, unlike the lending program, the individual participants will not be

reporting at the lending agent level rather than the beneficial owner would reflect the actual market loan and would avoid the reporting of loan components which may shift throughout the allocation process”).

³²⁰ BlackRock Letter, at 7.

³²¹ See final Rule 10c-1a(e)(1).

³²² If the covered person is a pool (and thus is a lender of covered securities), it is the pool that is required to be confidentially reported as the party to the covered securities loan pursuant to final Rule 10c-1a(e)(1). See also Proposing Release, 86 FR 69804 (“The data elements provided to an RNSA . . . are also designed to provide the RNSA with data that could be used for important regulatory functions, including facilitating and improving its in-depth monitoring of member activity and surveillance of securities markets.”).

³²³ The term “pool” is used here in the same manner it is described by the commenter quoted above in this paragraph. See BlackRock Letter, at 6–7 (also using the term “pooled pass-through account”).

lenders directly to the borrower of the covered securities loan. In that case, where a covered securities loan remains open and the only change that occurs is a reallocation among the pool’s underlying constituents, that is not a change that will require reporting as a new covered securities loan or as a modification under paragraph (d) because there will be no change to a data element in paragraph (c) of the final rule.

However, if the multiple, individual participants are all parties identified as lenders to the loan, with no lending program or other entity interposed between them and the borrower, a change in their composition (the removal or addition of a lender) would constitute an assignment of the loan and therefore would require reporting as a new loan pursuant to final Rule 10c-1a(a)(1). Whether a reallocation of a loan among participants in a lending program requires the reporting of a new covered securities loan depends upon the facts and circumstances, including the structure of such lending program.

One commenter recommended a definition of the term “loans a security” that would apply at a minimum “any time the lender loses the right to vote the securities during the time of the loan.”³²⁴ Voting rights do not provide an adequate criterion to define what a securities loan is because not all reportable securities necessarily carry voting rights (*e.g.*, some preferred stock, options, fixed-income securities, and treasuries). However, the facts and circumstances, including the loss of voting rights, may be an indicator as to whether a transaction is a loan.

The Commission also received comment letters expressing support for limiting the reporting required under the proposed rule to the Wholesale market³²⁵ of the securities lending market.³²⁶ Some commenters

³²⁴ See Morningstar Letter, at 4.

³²⁵ Traditionally, securities lending and borrowing transactions have been conducted on a bilateral basis. Generally, when an end investor wishes to borrow securities, and its broker-dealer does not have those securities available in its own inventory or through customer margin accounts to loan, the broker-dealer will borrow the securities from a lending agent with whom it has a relationship. The broker-dealer will then re-lend the securities to its customer. Loans from lending programs to broker-dealers occur in what is referred to by market participants as the Wholesale market, while loans from a broker-dealer to the end borrower occur in what is referred to by market participants as the Customer market (also known as the “retail market”). See Proposing Release, 86 FR 69805. For purposes of this release, this market is referred to as the Customer market. See *supra* Part II.

³²⁶ See AIMA Letter 1, at 2; AIMA Letter 2, at 3; Citadel Letter, at 11; SBAI Letter, at 2; Letter from John L. Thornton, Co-Chair, Hal S. Scott, President,

recommended narrowing the scope of loans to the Wholesale market due to what they characterized as potential negative effects on short selling from data that could be revealed through loans in the Customer market.³²⁷ One of the commenters stated that “immediately publicly disclosing short selling activity would signal to all other market participants that a short position is being established.”³²⁸ Such concerns are largely addressed by requiring that an RNSA delay public disclosure of the loan amount by 20 business days. This modification should significantly reduce the novelty of the information disseminated under the final rule regarding short sellers’ positions, such that it is less timely than pre-existing sources of short selling transparency, such as FINRA’s bimonthly short interest data.

Another commenter suggested that retail loans may not be structured as securities lending, but rather structured as brokerage agreements, and thus may not be suitable for standardized data collection.³²⁹ This commenter may be referring to the use of margin securities by a broker or dealer in which the broker or dealer does not lend such margin securities to another person (*e.g.*, a rehypothecation).³³⁰ The final rule’s exclusion of such uses from the definition of “covered securities loan,” as discussed below, in this part, should address the commenter’s concern.

A commenter stated that the Commission had not fully explained why greater transparency, or transaction-by-transaction data, in the Customer market would be valuable.³³¹

More broadly, limiting data to Wholesale market loans would significantly reduce the benefits of the rule stemming from increased transparency into the securities lending market. In the Proposing Release, the Commission stated that the rule “is designed to address . . . inefficiencies in the securities lending market by making more comprehensive information regarding securities lending transactions publicly available, which could better protect investors by eliminating certain information asymmetries.”³³² Data regarding Customer market loans will, for example, provide end-borrowers with valuable information as to the competitiveness of the rates they are being charged for their loans. Such data will also provide information to customers that have agreed to loan their fully paid securities as to the competitiveness of the rates they are receiving from brokers or dealers borrowing such securities. Excluding such a fundamental part of the securities lending market from the scope of transactions to which the rule’s reporting requirements apply is inconsistent with the Commission’s stated goal of making comprehensive information regarding securities loans publicly available. Therefore, the definition of “covered securities loan” in the final rule does not distinguish between the Wholesale market and Customer market and is not limited to Wholesale market transactions.

One commenter recommended that the term “loans a security” specifically refer to securities loaned “for a permitted purpose pursuant to Regulation T of the Board of Governors of the Federal Reserve System.”³³³ However, limiting the final rule’s reporting requirements to only securities loans made for permitted purposes pursuant to Regulation T of the Board of Governors of the Federal Reserve System, would be overly narrow as the principal purpose of Regulation T is to regulate extensions of credit by brokers and dealers.³³⁴ As the commenter states, the “permitted purposes” contemplated under section 220.10(a) of Regulation T are limited to “allowing the borrower to make delivery of the borrowed securities in the case of short sales, failure to receive securities required to be delivered, or other similar situations.”³³⁵ Regulation T states that “[i]ts principal purpose is to regulate

extensions of credit by brokers and dealers; it also covers related transactions within the Board’s authority under the Act. It imposes, among other obligations, initial margin requirements and payment rules on certain securities transactions.”³³⁶ However, the securities loan market includes lenders other than brokers and dealers and may involve loans of securities for purposes other than short sales, failures to receive securities required to be delivered, and similar situations.³³⁷ Furthermore, the purpose of final Rule 10c–1a is to increase the transparency of information available to broker, dealers, and investors, with respect to the loan and borrowing of securities without limitation to the purpose of the loan or borrow, whereas the stated purpose of Regulation T is regulating extensions of credit. Thus, Regulation T does not provide an appropriate framework to limit final Rule 10c–1a’s information reporting requirements.

The Commission also received comment expressing support for a *de minimis* threshold for reporting loans of securities.³³⁸ In some contexts, reporting thresholds may be useful to reduce burdens on persons required to report, or to reduce the possibility that strategies or identities of reporters will be revealed. However, a *de minimis* reporting threshold is not necessary in light of modifications from the proposed rule to require end-of-day³³⁹ (versus 15 minute) reporting, as well as the delay³⁴⁰ in publication of size information,³⁴¹ which are expected to reduce the possibility that strategies or identities of reporting entities will be revealed. Including a *de minimis* threshold, which would primarily affect data for smaller securities loans, could provide the public with a distorted view of securities loan activity. For example, a large volume of relatively small securities loans could constitute a significant amount of the overall lending activity for an individual security. Alternatively, a single, small securities loan could constitute the only outstanding loan for an issuer, and its

³⁴¹ See final Rule 10c–1a(c).

exclusion would leave market participants without information about the lending market for the security. The Proposing Release stated that “granular information about certain material terms of securities lending transactions would allow investors, including borrowers and lenders, to evaluate not only the rates for such transactions, but also any signals that such rates provide.”³⁴² The public disclosure of information for securities lending transactions of all sizes will help improve price discovery in the securities lending market.³⁴³ Additionally, providing a de minimis threshold could result in avoidance of the final rule’s reporting requirements if industry participants structure otherwise reportable securities loans into smaller tranches in order to fit below a reporting threshold.

The Commission received a comment recommending that the final rule not capture a “broker-dealer hypothecation of customer margin³⁴⁴ securities.”³⁴⁵ Another commenter stated that it understood the proposed rule to exclude rehypothecation of a customer’s margin securities.³⁴⁶ When a broker or dealer hypothecates (or uses) customer margin securities, the customer is not loaning them to the broker or dealer as the customer has already pledged the securities in a margin account to the broker or dealer, as collateral for a margin loan.³⁴⁷ Accordingly, the final rule excludes hypothecation of securities, but provides that the loan of such customer margin securities by a broker or dealer to another person is a covered securities loan.³⁴⁸ Specifically, the definition of the term “covered securities loan” under the final rule includes the provision that, “the use of margin securities, as defined in Rule 15c3–3(a)(4) of the Exchange Act, by a broker or dealer will not be a covered

securities loan for purposes of this rule.”³⁴⁹ It also provides that “if a broker or dealer lends such margin securities to another person, the loan to the other person is a covered securities loan” for purposes of the final rule.³⁵⁰ Therefore, should a broker or dealer use a customer’s margin securities for purposes other than to lend them to another person, such a transaction would not fall within the definition of the term “covered securities loan” under the final rule. Additionally, if a broker or dealer borrows fully paid or excess margin securities from a customer, that loan is a covered securities loan,³⁵¹ and the broker or dealer borrowing the fully paid securities is responsible for reporting the loan to an RNSA.³⁵²

The Commission also received comment recommending that the final rule not apply to “funding trades.”³⁵³ The commenter further stated its belief that such transactions, which are defined as loans of cash against securities being pledged as collateral, are not the type of activity that should be captured through the proposed rule.³⁵⁴ To the extent that such funding transactions constitute a use of margin securities by a broker or dealer pursuant to paragraph (j)(2)(iii), they would not fall within the final rule’s definition of “covered securities loan.” Otherwise, commenters were not specific as to whether there would be variations of transactions used to “fund trades.” The final rule does not specifically exclude transactions to “fund trades.” Whether a transaction to “fund trades” is a

covered securities loan will depend on the facts and circumstances of each transaction.³⁵⁵

After considering commenters’ concerns and perspectives regarding the proposed scope of transactions for which proposed Rule 10c–1 reporting would have been required, the final rule defines the term “covered securities loan” to mean “[a] transaction in which any person on behalf of itself or one or more other persons, lends a reportable security to another person.”³⁵⁶ Further, in paragraph (a) of the final rule, the term “loans a security” is replaced with the phrase “agrees to a covered securities loan” in its reporting requirement for covered persons.³⁵⁷ In response to commenters’ request for clarification as to whether a loan should be reported before or after it is settled, the term “agrees to” clarifies that covered securities loans are required to be reported after the parties agree to the loan, which is before settlement.³⁵⁸

For the reasons described above, in this part, the definition of the term “covered securities loan” in the final rule further provides that “a position at a clearing agency that results from central counterparty services pursuant to Rule 17Ad–22(a)(2) of the Exchange Act or central securities depository services pursuant to Rule 17Ad–22(a)(3) of the Exchange Act will not be a covered securities loan for purposes of this rule.”³⁵⁹ The final rule also provides that “the use of margin securities, as defined in Rule 15c3–3(a)(4) of the Exchange Act, by a broker or dealer, will not be considered a covered securities loan for purposes of this rule,” provided, however, that “if a broker or dealer loans such margin securities, such loan will be considered a covered securities loan for purposes of this rule.”³⁶⁰

The definition of the term “covered securities loan,” in conjunction with the definition of the term “reportable security,” discussed above, in Part VII.D,³⁶¹ sets forth the scope of the final

³⁴² See also Proposing Release, 86 FR 69804.

³⁴³ See *infra* Part IX.C.1 (stating that “increased information will result in benefits in the form of . . . improved market stability and price discovery both in the securities lending market and the market for the underlying security”). See also Proposing Release, 86 FR 69804.

³⁴⁴ Margin securities are securities carried for the account of a customer in a margin account, as well as securities carried in any other account other than securities that are fully paid securities. See 17 CFR 240.15c3–3(a)(3) (“Rule 15c3–3(a)(3)”) and Rule 15c3–3(a)(4) of the Exchange Act defining the terms “fully paid securities” and “margin securities.”

³⁴⁵ See SIFMA AMG Letter, at 5.

³⁴⁶ See SIFMA Letter 1, at 9 n.39.

³⁴⁷ This distinction is made only within the context of a broker or dealer’s hypothecation (or rehypothecation) of customer margin securities. It does not imply that a hypothecation or use of securities in a different context could not constitute a loan of securities.

³⁴⁸ See final Rule 10c–1a(j)(2)(iii); 17 CFR 240.10c–1a(j)(2)(iii)(A) (“final Rule 10c–1a(j)(2)(iii)(A)”).

³⁴⁹ See final Rule 10c–1a(j)(2)(iii).

³⁵⁰ See final Rule 10c–1a(j)(2)(iii)(A).

³⁵¹ A broker or dealer must maintain the physical possession or control of all fully paid securities and excess margin securities carried by the broker or dealer for the accounts of customers. See 17 CFR 240.15c3–3(b)(1) (“Rule 15c3–3(b)(1)”). Additionally, a broker or dealer must enter into a written agreement pursuant to Rule 15c3–3(b)(3) in order to not be deemed to be in violation of the provisions of Rule 15c3–3(b)(1) when borrowing fully paid or excess margin securities from any person. See Rule 15c3–3(b)(3).

³⁵² See final Rule 10c–1a(j)(1)(iii).

³⁵³ See SIFMA AMG Letter, at 5. See also SIFMA Letter, at 15; BlackRock Letter, at 7 (stating that “the SEC should limit the scope to traditional securities lending transactions where the parties have entered into the loan transaction in order for a borrower to obtain use of the securities for a fee, rather than to provide a lender with cash financing that is collateralized with non-cash collateral”).

³⁵⁴ See SIFMA AMG Letter, at 9 (stating that “[a] ‘non-purpose’ transfer of securities against cash collateral, economically resembles a borrowing of cash by the security’s ‘lender’ against a pledge of securities collateral to the securities ‘borrower.’ However, such transactions are more properly categorized as ‘funding’ transactions (as loans of cash against securities being pledged as collateral) and, therefore, are not the type of activity SIFMA AMG believes the SEC is, or should be, seeking to capture through the Proposed Rule.”).

³⁵⁵ See final Rule 10c–1a(j)(2)(i).

³⁵⁶ See final Rule 10c–1a(j)(2)(i).

³⁵⁷ See final Rule 10c–1a(a).

³⁵⁸ See HMA Letter, at 9 (recommending that reporting should include effected, but not-yet-settled loans, and stating that “the Commission and FINRA rules have long required reporting of securities orders, modification, and trades, not just settled transactions, because all of that information is relevant to understanding the markets”). But see Fidelity Letter, at 2 (requesting that the Commission clarify when a loan can be considered “effected” for purposes of report, and stating that “in the marketplace, a securities loan is not considered ‘effected’ by the parties until the loan has been contractually booked and settled”).

³⁵⁹ See final Rule 10c–1a(j)(2)(ii).

³⁶⁰ See final Rule 10c–1a(j)(2)(iii).

³⁶¹ See final Rule 10c–1a(j)(3).

rule and distinguishes “covered securities loans” from other types of transactions that are not required to be disclosed under final Rule 10c–1a. The final rule’s definition of the term “covered securities loan” will facilitate the public availability of information regarding securities lending transactions. The definition’s scope, encompassing transactions in which any person, on behalf of itself or one or more other persons, lends a reportable security to another person, is designed to provide market participants, the public, and regulators with information that broadly captures activity in the securities lending market. The defined scope of transactions required to be reported to an RNSA under final Rule 10c–1a will contribute to better decision-making by investors, reduced costs of business for brokers or dealers, improved performance and reduced costs for lending programs, new business opportunities for data vendors, improvements to shareholder monitoring, and improved market stability and price discovery in the securities lending market.³⁶² Additionally, the exceptions to the definition of “covered securities loan” under the final rule should help prevent the double counting of securities loans and support the integrity of publicly available data by excluding redundant and potentially misleading information.

F. Information To Be Provided to an RNSA

To facilitate transparency of the securities lending market, the Commission proposed Rules 10c–1(b) through (e) to require certain loan-level data elements (*i.e.*, specified material terms of securities loans) to be provided to an RNSA.³⁶³ Because an RNSA would be required to implement rules regarding the format and manner to administer the collection of

information,³⁶⁴ proposed Rule 10c–1 lists the data elements that persons would be required to provide to an RNSA, but does not specify granular instructions for data elements or the formatting required for submission of the information to an RNSA.³⁶⁵

1. Loan Data Elements—Rule 10c–1a(c) Proposed Rule

To facilitate transparency in the securities lending market, the proposed rule required certain loan transaction data elements to be provided to an RNSA, on a transaction-by-transaction basis, within 15 minutes of the loan being effected, followed by an RNSA assigning each loan a unique transaction identifier, and then making such information publicly available as soon as practicable. The proposed rule included twelve transaction data elements required to be provided to an RNSA.³⁶⁶

In proposing the list of loan data elements required to be provided to an RNSA, the Commission explained that the data elements in paragraphs (b)(1) through (b)(5) of the proposed rule, which include the legal name and legal entity identifier (“LEI”) of the issuer; ticker symbol, International Securities Identification Number (“ISIN”), CUSIP, or Financial Instrument Global Identifier (“FIGI”) or other security identifier; date and time loan was effected; and platform or venue loan was effected, identify each loan of securities.³⁶⁷ In particular, the Commission explained, they contain material terms that are not negotiated between the parties but are elements that would provide important

information to allow market participants and regulators to track, understand, and perform analyses on the negotiated terms contained in paragraphs (b)(6) through (b)(12) of the proposed rule, which include the amount of security loaned; securities lending fee or rate (or any other fee or charges); type of collateral used; rebate rate (or any other fee or charges); percentage of collateral to value of loaned securities; termination date of loan; and, whether the borrower is a broker/dealer/customer/clearing agency/bank/custodian/other person.³⁶⁸ The Commission also explained that the proposed data elements in paragraphs (b)(1) through (b)(5) of the proposed rule would provide an RNSA with enough information to create a unique transaction identifier as required by the proposed rule.³⁶⁹

In proposing the negotiated data elements in paragraphs (b)(6) through (b)(12) of the proposed rule, the Commission explained that, because the data elements reflect material terms that are negotiated when securities loans are arranged, increasing the transparency of information will provide market participants with meaningful data that could be used when structuring, pricing, or evaluating loans of securities.³⁷¹ The Commission also explained that increasing transparency would allow market participants to analyze signals obtained from the securities lending market when considering investment or trading decisions for a security; and, would also permit an RNSA to perform in-depth monitoring and surveillance of securities lending transactions to

³⁶² See *infra* Part IX.C.1.

³⁶³ While pricing-related data elements regarding collateralized loans were included in the loan-level data elements proposed to be required to be reported to an RNSA, the proposed rule did not require that securities lenders or their agents report information on how they used collateral. Some commenters stated that because of the potential threats to financial stability arising from collateral re-use, the Commission should consider requiring that securities lenders and their agents report information on how they use collateral. See, e.g., Better Markets Letter, at 7–8. (commenter stating support for requiring disclosure regarding the type of collateral); See Sharegain Letter, at 3 (stating that “[c]ollateral information is essential to understanding fees—e.g., a loan collateralized with equities would typically command a higher fee than a loan collateralized with US treasuries”); see also IHS Markit Letter, at 6–7 (recommending that proposed data elements include reporting of a “trade reference” and “lending agent trade indicator”).

³⁶⁴ See proposed Rule 10c–1(f).

³⁶⁵ See proposed Rule 10c–1(b). See also Proposing Release, 86 FR 69813. This is done in order to allow an RNSA the necessary flexibility to propose and implement rules regarding the format and manner with respect to the collection of information. One commenter stated that the proposed rule does not “provide any details as to the format of such data, whether it would be presented loan-by-loan, the manner in which rates would be presented, whether the loan had its inception as an open-ended loan or a term loan, whether the loan was the subject of a portfolio-based auction, or whether it was part of a conduit lending program.” See Sharegain Letter, at 3. Consistent with the Proposing Release, the Commission is not specifying the details as to the format of the required data, the manner in which rates would be presented, or other detailed information requested, to give an RNSA the discretion to structure its systems and processes as it sees fit and propose rules accordingly, provided they are consistent with the final rule as adopted as well as other requirements of the Exchange Act applicable to an RNSA. See, e.g., Proposing Release, 86 FR 69816 n.104.

³⁶⁶ See Proposing Release, 86 FR 69813–14, 69851–52 (describing each of the proposed transaction data elements).

³⁶⁷ See Proposing Release, 86 FR 69813.

³⁶⁸ See Proposing Release, 86 FR 69814.

³⁶⁹ See Proposing Release, 86 FR 69813. As stated by the Commission in the Proposing Release, “[p]aragraphs (1) and (2) of proposed Rule 10c–1 identify the particular security being lent. Paragraph (1) is designed to provide information on the issuer, and paragraph (2) is designed to provide information on the particular security. These paragraphs are designed to be flexible and comprehensive so that every security that can be loaned is able to be identified. In particular, with respect to paragraph (b)(1), the Commission preliminarily believes that an issuer that lacks an LEI would have a legal name. With respect to paragraph (b)(2), the Commission preliminarily believes that securities usually would have at least one of the items listed assigned to it. If not, the RNSA could require an “other identifier” for further flexibility under paragraph (2).” *Id.*

³⁷⁰ See Proposing Release, 86 FR 69814. In proposing the data element in paragraph (b)(6) “the amount of the security loaned”—the Commission did not specify the parameters of “the amount of the security” in order to allow an RNSA flexibility to propose rules that identify, for different types of securities, what information constitutes the “amount of the security.”

³⁷¹ See Proposing Release, 86 FR 69814.

identify trends and any anomalous market patterns.³⁷²

Final Rule

The Commission sought comment with respect to each of the proposed transaction data elements.³⁷³ In response, commenters were generally supportive of the Commission's stated goals of increasing transparency and price discovery in the securities lending market by increasing the amount and availability of data in the market.³⁷⁴ For example, one commenter stated in support of the proposed rule that, "certain data elements [should be made] publicly available, thereby increasing transparency of the securities lending market and reducing competitive advantages that may exist in the marketplace."³⁷⁵ Another commenter also stated in support that the proposed public dissemination of securities lending information will, among other things, improve price discovery in the securities lending market, reduce information asymmetries, close data gaps, and increase market efficiency.³⁷⁶ Another commenter stated that, "Proposed Rule 10c-1 represents a properly-tailored way to bring more transparency to this dark area of the market."³⁷⁷ According to this commenter, "[t]he Proposal would establish a system for the reporting and dissemination of the material terms of

securities lending transactions without attribution, providing issuers, investors, and regulators the necessary data . . . while protecting the identity and intellectual property of any individual market participant."³⁷⁸ Another commenter expressed support for the proposed rule's inclusion of standards as part of the proposed data elements to be reported, as well as the Commission's efforts to include the LEI in the data elements for the identification of issuers and parties to a lending transaction.³⁷⁹ Another commenter supported the proposal allowing a choice in use of identifiers, such as the [FIGI], as a possible required data element to be collected and disseminated by an RNSA.³⁸⁰ Another commenter, in response to the Commission's specific request for comment, stated that retail investors/borrowers without LEIs should not be required to obtain a LEI as "[r]egulators can easily identify who we are by going to our brokers."³⁸¹ Another commenter suggested that the Commission should modify the proposal to require "lending agent" be a reported field (instead of requiring the lender's LEI to be disclosed) "to avoid

the potentially confusing appearance of tens or even hundreds of individual loans that are, in reality, part of the same overall loan transaction negotiated between a borrower and a lending agent or third-party intermediary on behalf of the underlying lender(s) for an aggregate notional amount."³⁸²

With regard to the proposed "rebate rate or any other fee or charges" data element for cash collateralized loans,³⁸³ several commenters pointed out that the relevant data point is actually the lending spread to the reference rate (most commonly the Overnight Bank Funding Rate or "OBFR") as the rebate rate will change daily based on the current level of the reference rate, even as the negotiated lending spread remains fixed.³⁸⁴ Thus, commenters requested that the Commission clarify (where applicable) that pricing data may be reported as a spread to a benchmark rate and, as discussed below in Part F.2, that such pricing data element does not need to be updated for changes in the value of the benchmark rate.³⁸⁵

Another commenter expressed concern that fee and rebate data could be misleading in the absence of additional contextual information, stating that "[f]ee/rebate data, without consideration of firm(s) collateral requirements, counterparty/asset exposure(s), applied lending restrictions or jurisdictional obligations, may create an unrealistic and misleading portrayal

³⁷² NYSE Letter 1, at 1–2.

³⁷³ See Letter from Stephen Wolf, CEO, Global Legal Entity Identifier Foundation, at 3 (stating that the Commission and an RNSA may benefit from the data that accompanies an LEI, *i.e.*, company legal name can be retrieved automatically or verified from a LEI record).

³⁷⁴ See Bloomberg L.P. Letter, at 1; *see also* HMA Letter, at 9 (agreeing with using publicly available methods to identify financial instruments beyond CUSIPs). Consistent with the proposed rule, the data elements required in paragraphs (b)(1) and (b)(2) of the proposed rule are designed to be flexible as well as comprehensive so that every loaned security is able to be identified. *See* Proposing Release, 86 FR 69813. In the Proposing Release, the Commission stated with respect to paragraph (b)(1), that it "preliminarily believes that an issuer that lacks an LEI would have a legal name. With respect to paragraph (b)(2), the Commission preliminarily believes that securities usually would have at least one of the items listed assigned to it. If not, the RNSA could require an "other identifier" for further flexibility under paragraph (2)." *See* Proposing Release, 86 FR 69813. Thus, consistent with the Proposing Release, the Commission is not determining whether and how all of the items in paragraph (c)(2) in the final rule must be reported, to give an RNSA the discretion to structure its systems and processes as it sees fit and propose rules accordingly, provided they are consistent with the final rule as adopted as well as other requirements of the Exchange Act applicable to an RNSA. *See id.*

³⁷⁵ See James J. Angel Letter, at 7 (expressing strong support for the proposed rule but encouraged the Commission not to micromanage the contractual terms between the reporting agents and an RNSA). As this commenter explained, "let FINRA work out the details, as they have the experience, resources, and capability to do a good job and the flexibility to update terms based on experience." *Id.* at 7. In response, the final rule, as modified to streamline and clarify rule text, and the modifications to update or modernize the reporting requirements as needed are responsive to the commenter.

³⁷⁶ *See, e.g.*, BlackRock Letter, at 3–4; *see also* FIF Letter, at 9 (stating that reporting an LEI is duplicative and likely not useful).

³⁷⁷ *See* proposed Rule 10c-1(b)(9).

³⁷⁸ *See* ICI Letter 1, at 5 n.19 (providing this as another example of how the SEC's understanding of the securities lending market structure appears to be inaccurate); *see also* BlackRock Letter, at 2 (recommending that, to improve the transaction level data collected, the transaction record for cash collateralized loans should include the name of the reference rate used and the spread to that reference rate instead of reporting the rebate rate). According to this commenter, while there is a market convention of using the OBFR as the reference rate, this is a negotiable term between the parties to the lending transaction. *See id.* Moreover, according to this commenter, the price negotiation centers on the spread to that reference rate, not the rebate, and the rebate will fluctuate daily as the reference rate value changes. *See id.* *See also* MFA Letter 3, at 5 (recommending that the SEC pare back several of the granular reporting elements that would be difficult to apply and/or misleading, such as pricing, stating that "the Proposed Securities Lending Rule's requirements, for example, requires the rebate rate to be reported in the pricing field, even though the rebate rate will fluctuate potentially daily, as the reference rate—typically the OBFR—changes, and as such would be subject to frequent amendment that could be confusing to market participants").

³⁷⁹ *See, e.g.*, BlackRock Letter, at 2; RMA Letter, at 4; *see also* FIF Letter, at 9 (stating that "[f]or securities loans that are priced based on a spread to a benchmark, the Commission should provide reporting parties the option to report pricing by reference to the benchmark and the spread").

³⁷² *See* Proposing Release, 86 FR 69814. Additionally, the Commission explained that the data element in proposed paragraph (b)(11), regarding termination date, is intended to provide market participants with an understanding of the potential future demand and supply of securities; whereas proposed paragraph (b)(12), which requires the borrower type for each transaction, is intended to provide context for evaluating, and also enhance the transparency provided by, the other data elements.

³⁷³ The language "transaction data elements" in proposed Rule 10c-1(b) has been revised to "covered securities loan data elements" in final Rule 10c-1a(c) to be consistent with the use of the newly defined term "covered securities loan," to which the elements refer, in the final rule.

³⁷⁴ *See, e.g.*, SBAI Letter, at 1 (agreeing with the Commission's assessment of the important role of the securities lending market, as well as supporting the Commission's objective to increase transparency in this area).

³⁷⁵ Nasdaq Letter, at 3.

³⁷⁶ *See* FINRA Letter, at 1 (stating that the proposed rule will provide the Commission and other regulators with data that would be used for important regulatory, *i.e.*, monitoring and surveillance, functions); *see also* AFREF Letter 1, at 1, 3 (stating "[t]here is an urgent need to require securities lenders to provide greater details of their loans to an RNSA as outlined by the proposed changes to Rule 10c-1 . . . market participants and regulators alike will greatly benefit from the greater transparency that comes from reporting every securities lending transaction as a result of the proposed changes to Rule 10c-1").

³⁷⁷ Letter from Hope M. Jarkowski, General Counsel, NYSE Group, Inc. (Jan. 6, 2022) ("NYSE Letter 1"), at 2.

of prevailing rates.”³⁸⁶ The final rule requires pricing information in 17 CFR 240.10c–1a(c)(8) (“final Rule 10c–1a(c)(8)”) and 17 CFR 240.10c–1a(c)(9) (“final Rule 10c–1a(c)(9)”) because pricing is a material term of a covered securities loan. Further, paragraph (g)(5) of the final rule requires that an RNSA will make a distribution of loan rates for each reportable security publicly available to help market participants compare the pricing of their covered securities loan against the pricing of other covered securities loans. Information about the distribution of loan rates recognizes that the cost-to-borrow securities can be influenced by a number of factors and can give market participants information to help compare the pricing of their loan against other loans. Another commenter requested clarification that only one identifier for a security is required to be reported under the rule (*i.e.*, ticker or ISIN or CUSIP or FIGI) rather than all of them.³⁸⁷ The final rule permits a covered person to determine which identifier to report, or if it prefers, it may also report multiple identifiers, but one identifier is required to be reported. Further, the final rule also permits the covered person to report a different identifier than the ticker symbol, ISIN, CUSIP, or FIGI. In addition, this commenter requested further clarification on what type of system would represent a “platform or venue” for purposes of proposed paragraph (b)(5).³⁸⁸ The final rule does not specify

what type of systems are a “platform or venue” for purposes of the data elements required to be reported under 17 CFR 240.10c–1a(c)(5) (“final Rule 10c–1a(c)(5)”). The terms are intended to capture a wide variety of potential vehicles that covered persons might use to transact securities loans. Further, an RNSA has discretion to determine, pursuant to rules that would be subject to the section 19(b) and Rule 19b–4 process, whether to categorize such vehicles (*e.g.*, on-line venue, exchange, OTC).

Many commenters suggested that the proposed transaction-by-transaction reporting requirement be replaced with an aggregated-only requirement (*i.e.*, with some of the commenters wanting both the reporting and publishing of the data elements to be on an aggregated basis only, while other commenters were supportive of reporting to an RNSA on a transaction-by-transaction basis, but then any dissemination to the public must be made by an RNSA on an aggregated-only basis).³⁸⁹ For instance, one commenter recommended “transaction-by-transaction data be

reported to an RNSA and made available to regulators, but that the RNSA analyze and normalize the reported transaction data to provide aggregated and, where appropriate, averaged transaction terms that do not expose firm and customer investment strategies, and that better reflect the transaction terms available to lenders and borrowers in the securities lending market.”³⁹⁰ Another commenter stated that the Commission should narrow the scope of transaction data information to be reported to an RNSA (and thereafter made public by an RNSA) to only aggregated transaction data.³⁹¹ Some of the comments appeared to be focused on an RNSA’s publication or dissemination obligations when they stated that the final rule should require an RNSA to publish aggregated pricing and volume data (rather than transaction-by-transaction data).³⁹² However, this was not always clear as many of the comments received were less specific in that their comments on aggregated disclosure were phrased in reference to the proposed rule’s reporting requirement³⁹³ or “reveal short selling trading strategies”³⁹⁴ or disclosing all individual customer short selling positions on a transaction-by-transaction basis.³⁹⁵

The requirements in paragraph (b) of final Rule 10c–1a are limited in scope to the reporting agent’s obligation to provide certain specified data elements to an RNSA on behalf of a covered person. As such, the discussion in this part is limited to the reporting agent’s provision of the Rule 10c–1a information directly and solely to an RNSA, which does not involve or require any public disclosure or public dissemination of such information. By contrast, the dissemination or disclosure of the required information is the obligation of an RNSA, and paragraph (g) of the final rule, and Part VII.] below, discuss an RNSA’s responsibilities with respect to disseminating certain Rule 10c–1a information to the public.

After considering the comments received recommending that the final rule require only aggregated pricing and volume data to be publicly disclosed (discussed below in Part VII.J), the

³⁸⁶ Letter from Adrian Dale, Head of Regulation, Digital & Market Practice, ISLA (Jan 7, 2022) (“ISLA Letter”), at 2 (suggesting that such fee/rebate data could not be relied upon to support price discovery in the same manner as other markets).

³⁸⁷ See, *e.g.*, FIF Letter, at 9. Consistent with the Proposing Release, paragraph (b)(2) in the final rule states, “securities usually will have at least one of the items listed assigned to it. If not, the RNSA will be able to require an ‘other identifier’ for further flexibility under paragraph (2).” See Proposing Release, 86 FR 69813. As such, the Commission is not providing further details concerning the required data elements in order to give an RNSA the discretion to structure its systems and processes as it sees fit and propose rules accordingly, provided they are consistent with the rule as adopted as well as other requirements of the Exchange Act applicable to an RNSA. See also *supra* notes 369 and 380. See Letter from Robert Toomey, Head of Capital Markets, Managing Director & Associate General Counsel, SIFMA (May 15, 2023) (“SIFMA Letter 3”), at 4–5 (stating that “[m]any of the granular reporting elements for securities loan transactions proposed by the SEC are not applicable to short positions, or do not apply to short positions in the same way as they apply to securities loans, and would necessarily lead to incomplete, inaccurate, and misleading data (*e.g.*, percentage of collateral to value of loaned securities required to secure the loan, type of collateral, and lending fee/rebate fee)).

³⁸⁸ See FIF Letter, at 10 (stating that FIF members request further clarification on what type of system would represent “a platform or venue” for purposes of proposed paragraph (b)(5)’s data element).

³⁸⁹ Although it seems as though the terms “reporting” and “dissemination” (or “disclosure”) are used interchangeably by some of the commenters, there appears to be agreement by commenters that it is the public disclosure of the data elements by an RNSA that should be required on an aggregated-only basis (rather than requiring disclosure on a transaction-by-transaction basis). See, *e.g.*, ICI Letter 1, at 11 (although the commenter states, for confidentiality reasons, that the Commission should only require “reporting” on an aggregated basis at the end of the day (and to avoid front running risks and other predatory trading practices), from the context of the letter, it appears to be the case that concern is focused on information being disclosed to the public/market); SBAI Letter, at 2; AIMA Letter 1, at 5; RMA Letter, at 18; See also Letter from Matthew R. Cohen, CEO, Provable Markets LLC (Jan. 7, 2022) (“PM Letter 2”) (while highly supportive of the proposal’s objective to increase transparency of information available to brokers, dealers, and investors, commenter expressed concerns that the Commission carefully consider and describe the context of the information provided publicly to the market, and the underlying benefits of each category published to the proposed consolidated tape (similar reproduction of data) to the market). However, one group of commenters disfavored any public dissemination of information (*i.e.*, before a study of the collected data are conducted by the Commission and the Commission consults stakeholders before making any determinations about the specifics of a public dissemination regime) and stated the concern that the “proposals could compromise the [rule’s] objectives by revealing sensitive and potentially misleading information to the public . . . [and that the Commission should] adopt an approach that requires reporting solely for regulatory purposes.” See Letter from Members of the U.S. House of Representatives Frank D. Lucas, David Scott, Blaine Luetkemeyer, Bill Foster, Glenn “GT” Thompson, Alma S. Adams, Ph.D., Bill Huizenga, Vicente Gonzalez, Andy Barr, Josh Gottheimer, Ann Wagner, Wiley Nickel, and Bryan Steil (July 12, 2023) (“Letter from Representative Lucas, et al.”), at 1. See *infra* Part VIII regarding the implementation period for the final rule.

³⁹⁰ See SIFMA Letter 2, at 4.

³⁹¹ See SIFMA AMG Letter, at 6–7.

³⁹² See, *e.g.*, RMA Letter, at 4; IIB Letter, at 10; EBF Letter, at 2 (commenters use the terms “public dissemination” or “publicly disseminating” when referring to aggregated information or transaction data).

³⁹³ See generally Letter from Jennifer Han, Executive Vice President, Chief Counsel & Head of Regulatory Affairs, Managed Funds Association (Apr. 1, 2022) (“MFA Letter 2”).

³⁹⁴ See SIFMA AMG Letter, at 7.

³⁹⁵ See CCMR Letter, at 5.

Commission has determined not to modify the proposed transaction-by-transaction reporting requirement with respect to the provision of Rule 10c-1a information to an RNSA. Such a modification to paragraph (c) of the final rule is unnecessary because the requirement involves reporting of the information directly and only to an RNSA (and not to the public). As such, the reporting requirement does not present the concerns raised by commenters that would warrant requiring the reporting of the data elements on an aggregated-only basis, as was suggested by some commenters.³⁹⁶ Likewise, another commenter suggested that, to decrease the likelihood that published data will be potentially misleading or confusing or that it could reveal short trading strategies that could prompt short sellers to exit the market, the Commission should adjust the information that is made publicly available by an RNSA to be only aggregated securities lending data, including, among other things, a volume-weighted average borrowing fee aggregated across all firms, for each security loaned.³⁹⁷ Similarly, for the same aforementioned reasons, it is unlikely that providing data information directly and solely to an RNSA will reveal such short trading strategies or mislead or confuse the public to warrant such a modification to the final rule. Instead, because paragraph (c) of the final rule only requires the reporting of information to an RNSA (rather than to disclose the information to the public), the risk of revealing short trading strategies or confusing the public is not applicable. Moreover, an RNSA's responsibilities with respect to the subsequent publication of certain Rule 10c-1a information are subject to the requirements and limitations set forth in paragraph (g) of the final rule,³⁹⁸ which are discussed below, in Part VII.J.³⁹⁹

³⁹⁶ See *infra* Part VII.J, for discussion regarding the responsibilities of an RNSA with respect to the dissemination of certain Rule 10c-1a information (particularly with respect to the amount, such as size, volume, or both of the reportable securities loaned) that an RNSA receives.

³⁹⁷ See SIFMA Letter 1, at 18–19. The commenter further stated that it does not object to the proposal to report by the end of the day information on “securities on loan.” See *id.*

³⁹⁸ See final Rule 10c-1a(g).

³⁹⁹ Some commenters stated that requiring public disclosure of securities lending activity on a transaction-by-transaction basis, especially within the proposed 15-minute timeframe, would reduce overall short selling activity by inhibiting and increasing the cost of building short positions and, thus, negatively affect market liquidity and pricing efficiency (*i.e.*, by making it more costly to build short positions and thus inhibit market participants from doing so). See, *e.g.*, SIFMA AMG Letter, at 5–7; see also CCMR Letter, at 5 (stating the disclosure of such activity would increase the costs associated

Thus, the Commission is adopting the proposed requirement to report Rule 10c-1a information, on a transaction-by-transaction basis, directly and solely to an RNSA.⁴⁰⁰

In addition, the Commission is adopting, essentially unchanged, the twelve data elements originally set forth in paragraphs (b)(1) through (b)(12) in the proposed rule, except the Commission is making the following non-substantive changes to the language of some of the proposed data elements.⁴⁰¹ Specifically, the Commission is modifying the language of the “the amount of the security loaned” data element in paragraph (b)(6) of the proposed rule (*i.e.*, by adding the language “such as the size, volume, or both”) so that it instead reads, as adopted, “the amount, such as size, volume, or both, of the reportable securities loaned.”⁴⁰² This change will help ensure the compliance and accuracy of the Rule 10c-1a information submissions to an RNSA, by specifying in the final rule that the term “amount” means “size, volume, or both.”⁴⁰³

with establishing a short position through information leakage and slippage; or lead to copycat short selling activity, which could also increase the cost to borrow the security due to increased demand or could facilitate “short squeezes”). However, as discussed above, modifying the required timeframe for reporting the data elements to an RNSA, and an RNSA's dissemination of such information to the public, as discussed below, in Part VII.J, should help to address the disclosure-related concerns raised by the commenters.

⁴⁰⁰ See also *infra* Part VII.J regarding the responsibilities of an RNSA, particularly with respect to the dissemination of Rule 10c-1a information (including with respect to the amount, such as size, volume, or both, of the reportable security loaned) an RNSA receives, keeping together in the release the various RNSA-related provisions.

⁴⁰¹ The proposed time periods for reporting the specified information to an RNSA are discussed below, in Part VII.G.

⁴⁰² With respect to the covered securities loan data element in paragraph (b)(6) of the final rule, the amount of the security loaned or borrowed, other than to add the clarifying language “such as size, volume, or both” the Commission is not “specifying the parameters of ‘the amount of the security’ to allow an RNSA flexibility to propose rules that identify for different types of securities what information constitutes the ‘amount of the security.’ For example, an RNSA could propose rules that require the number of shares be provided for equity securities and the par value of debt securities to accommodate differences in the markets for these securities.” See *Proposing Release*, 86 FR 69814.

⁴⁰³ See final Rule 10c-1a(c)(6) (requiring reporting of “the amount, such as size, volume, or both, of the reportable security loaned.”). Modifying this loan data element to clarify that the “amount” means “size, volume, or both” helps to address the concern raised by a commenter that had suggested a “unit” field to accompany the proposed “amount” data element in paragraph (b)(6) of the proposed rule so as to allow the “amount” to be defined “unambiguously as a quantity, a notional value or similar as appropriate.” See Letter from Jim Kaye, Americas Regional Director, FIX Trading

The Commission also is modifying proposed paragraph (b)(6) by changing “security” to “securities” (thus, making it plural, consistent with the term “securities” in paragraph (b)(10)); and, also modifying both proposed paragraphs (b)(6) and (b)(10) by adding the term “reportable” to each, so that they are both consistent with the final rule's newly defined term, “reportable securities.” The Commission also is modifying language in proposed paragraph (b)(1) by changing the term “active LEI” to “non-lapsed LEI” for accuracy (*i.e.*, by focusing more precisely on the status of the application for the LEI-indicator, rather than on the entity itself).⁴⁰⁴ The Commission has modified proposed paragraph (b)(2) by providing the full names of specified security identifiers and retaining the corresponding abbreviations within a parenthetical with quotes to 17 CFR 240.10c-1a(c)(2) (“final Rule 10c-1a(c)(2)”).

The required pricing data, “[f]or a loan collateralized by cash, the rebate rate or any other fee or charges,” in paragraph (c)(8) of the final rule generally should include when the pricing data element is negotiated or agreed-to as a spread to an identified benchmark or reference rate.⁴⁰⁵ The Commission recognizes that the pricing data element is a material term of the loan that is often negotiated or agreed to between the parties. Consistent with paragraph (b)(9) of the proposed rule, as well as the final rule, this benchmark type of pricing, as described by the commenter, will be captured by the final rule text language “the rebate rate or any other fee or charges.”⁴⁰⁶ For the aforementioned reasons, negotiated or agreed-to pricing data, including as a spread to an identified benchmark or reference rate, is required to be reported to an RNSA pursuant to the rule as adopted.⁴⁰⁷ This requirement should generally help to address commenters' concerns that may stem from an overly narrow application of the pricing data element in paragraph (b)(9) of the

Community (Jan. 4, 2022) (“FIX Trading Letter”), at 2 (requesting further clarification on and the use of common standards for details of the data to be published, similar to the technical standards used by ESMA and SFTR, and a “security id” filed to accompany “security identifier” as certain crypto assets do not have ISINs so the list of eligible securities identifier types needs to allow for this, *i.e.*, support ISO standards for digital token identifiers).

⁴⁰⁴ See 17 CFR 240.10c-1a(c)(1) (“final Rule 10c-1a(c)(1)”).

⁴⁰⁵ See proposed Rule 10c-1(b)(9).

⁴⁰⁶ See final Rule 10c-1a(c)(8).

⁴⁰⁷ See final Rule 10c-1a(c)(8).

proposed rule.⁴⁰⁸ However, because there are various pricing terms or arrangements that can be negotiated or agreed to by parties to a securities loan, the final rule does not specify or endorse one particular pricing method over another and, thus, is adopting the sufficiently broad pricing data element rule text for purposes of the final rule without modification from the proposed rule text.⁴⁰⁹ An RNSA, nevertheless, could address in its rules details regarding the manner in which pricing data must be reported, such as further clarifying how lending cost information is to be reported. As such, an RNSA has the necessary flexibility and discretion to structure its systems and processes as it determines, consistent with its obligations under the final rule as well as other applicable provisions of the Exchange Act.

2. Loan Modification Data Elements—Rule 10c–1a(d)

Proposed Rule

Subject to terms agreed to by the parties, covered securities loans may be modified after they are made. To ensure that the loan data elements reported pursuant to proposed Rule 10c–1(b) would accurately reflect currently outstanding covered securities loans and to prevent evasion, proposed Rule 10c–1(c) required that certain loan modification data elements be provided to an RNSA within 15 minutes after each loan is modified if the modification resulted in a change to information required to be provided to an RNSA under paragraph (b) of the proposed rule (and then for an RNSA to make such information available to the public as soon as practicable).⁴¹⁰ More specifically, the proposed loan modification data elements in paragraphs (c)(1) through (c)(3) of the proposed rule required the following data elements to be provided to an RNSA: (1) the date and time of the modification; (2) a description of the modification; and (3) the unique transaction identifier of the original loan.⁴¹¹

In the Proposing Release, the Commission explained that it preliminarily believed the proposed

loan modification data elements in proposed paragraph (c) are necessary to allow an RNSA to identify which loan was being modified, categorize the type of modification, and make information about the modification publicly available.⁴¹² In addition, as proposed, the requirement to provide the loan modification information to an RNSA was conditioned on the modification resulting in a change to the Rule 10c–1 information required to be provided to an RNSA under paragraph (b) of the proposed rule.⁴¹³

Final Rule

The Commission is adopting the loan modification data elements substantially as proposed.⁴¹⁴ However, the final rule includes a change to the loan modification data elements requirement in response to commenters.⁴¹⁵ Other commenters sought clarification as to when loan modifications should be reported, which is discussed below. In addition, the final rule has been modified to address comments regarding loans that pre-exist the reporting date.

Paragraphs (d)(1)(i) through (iii) of the final rule set forth the data elements that a covered person must report by the end of the day on which a covered securities loan is modified. Paragraph (d)(1)(i) requires covered persons to report “[t]he date and time of the modification;” paragraph (d)(1)(ii) requires covered persons to report “[t]he specific

modification and the specific data element in paragraph (c) of this section being modified; and paragraph (d)(1)(iii) requires the covered person to report “[t]he unique identifier assigned to the original covered securities loan under paragraphs (g)(1) or (g)(3) of this section.”⁴¹⁶

With respect to paragraph (d)(1)(ii), to help ensure the provision of relevant and useful loan modification reports to an RNSA, the Commission has revised this loan modification data element from the proposed requirement by removing the phrase “[a] description of” and, instead, adding both “the specific modification” as well as “and specific data element in paragraph (c) being modified” (*i.e.*, with respect to the loan modification data element being reported to an RNSA). The revised language “the specific modification” makes explicit that the actual modification must be reported (*e.g.*, the amount of the security loaned increased by 200 shares), not a vague description of the modification (*e.g.*, the amount of the security loaned was increased). The Commission is making this change because it will result in the collection of more accurate and useful information concerning the modification being reported. The Commission is also modifying paragraph (d)(1)(iii) to require the reporting of a previously assigned unique identifier whether assigned at the time of execution of the loan, or, with respect to a pre-existing securities loan as discussed below in this section, at the time of the modification. As a result, the Commission is adopting paragraph (d)(1)(iii) of the final rule, with a slight modification from the proposal such that the rule text of (d)(1)(iii) will require the unique identifier assigned to the original covered securities loan under paragraphs (g)(1) or (g)(3) of this section.”⁴¹⁷

The Commission also received comment seeking clarity regarding how to report various modifications to a loan.⁴¹⁸ Other commenters who discussed the loan modification data elements discussed the different types of modifications that can occur frequently throughout the day,⁴¹⁹ or

⁴¹² See Proposing Release, 86 FR 69815.

⁴¹³ See Proposing Release, 86 FR 69815.

Consistent with the Proposing Release, an example of a modification that will trigger a reporting requirement under paragraph (d) of the final rule includes: the termination of an open-ended loan that results in a reduction of the quantity of the securities initially provided to an RNSA for that loan under paragraph (c)(6)’s data element—*i.e.*, amount of the security loaned. See also Proposing Release, 86 FR 69815. An example of a modification that will not trigger the loan modification data element reporting requirement in paragraph (d) of the final rule is if a borrower posts additional collateral in response to an increase in the value of the loaned securities. *Id.* Under such circumstance, information about this change will not be required to be reported under paragraph (d) because, while paragraph (c)(11) requires the covered person to provide the percentage of collateral to value of loaned securities required to secure such loan, it does not require information about the value of collateral posted in dollar terms. See also *id.* at n.96.

⁴¹⁴ See 17 CFR 240.10c–1a(d)(1)(i) (“final Rule 10c–1a(d)(1)(i)”); 17 CFR 240.10c–1a(d)(1)(ii) (“final Rule 10c–1a(d)(1)(ii)”); 17 CFR 240.10c–1a(d)(1)(iii) (“final Rule 10c–1a(d)(1)(iii)”).

⁴¹⁵ The Commission also received comments that relate to the two loan modification data elements in paragraphs (d)(1)(i) and (d)(1)(iii) of the final rule. These comments are addressed separately below, in Parts VII.G.2 and VII.J, with respect to the timing modifications to paragraph (d) in the proposed rule, and regarding an RNSA’s obligations with respect to assigning the unique identifiers in compliance with the final rule.

⁴¹⁶ See final Rules 10c–1a(d)(1)(i) and (d)(1)(iii).

⁴¹⁷ See final Rules 10c–1a(d)(1)(i) and (d)(1)(iii).

⁴¹⁸ See FIX Trading Letter, at 3. The commenter provided hypotheticals, including: (1) as a result of a corporate action, a loan is closed and two or more loans are created; (2) a consolidation of multiple loans with the same counterparty and for the same security into one loan; and (3) the splitting of a single loan into multiple loans where the lender requires the return of some of the shares.

⁴¹⁹ Comments received by the Commission that focus primarily on the proposed 15-minute timing

⁴⁰⁸ See *supra* note 385 (citing commenters who requested that the Commission clarify, where applicable, that pricing data may be reported as a spread to a benchmark rate).

⁴⁰⁹ See *supra* note 385 and accompanying text (commenters requesting the Commission to clarify, where applicable, that pricing data may be reported as a spread to a benchmark rate, and that such pricing does not need to be updated for changes in the value of the benchmark rate).

⁴¹⁰ See proposed Rule 10c–1(c).

⁴¹¹ Proposed Rule 10c–1(c).

sought further information on what types of modifications would likely trigger a loan modification reporting obligation under the final rule.⁴²⁰ One commenter stated that, in the context of cash collateralized loans, the rebate will fluctuate daily as the reference rate value changes, but suggested that loans where the selected reference rate and spread to that reference rate do not change should be deemed out of scope of the required loan modification reporting.⁴²¹ As an example, this commenter stated that, where a loan is collateralized by cash and the negotiated pricing data element is a spread to a benchmark rate, such pricing does not need to be updated for changes in the value of the benchmark rate (*i.e.*, not a reportable loan modification for purposes of the final rule).⁴²² The same commenter stated more generally that certain modifications to loan information that has already been provided to an RNSA pursuant to proposed Rule 10c–1 should not be required to be provided to an RNSA, claiming that could make data that was already made public potentially misleading.⁴²³ As discussed above, in Part VII.F.1, the pricing data elements required to be reported by paragraph (c)(8) include benchmark pricing, such as a reference to the OBFR in a manner determined by an RNSA. Paragraph (d) of the final rule, requiring reporting of modifications to a paragraph (c) data element, including pricing in paragraph (c)(8), will also capture benchmark pricing. The extent to which the commenter's concern is realized will be

requirement for reporting required loan modification information—including commenters' recommendations with respect to the final rule's timing requirement—are discussed separately, below, in Part VII.G.1.

⁴²⁰ See, *e.g.*, Pirum Letter, at 2 (discussing that for modifications to previously reported loan transactions, a significant number of these will typically happen in “batch” processes at specific times throughout the day, stating one of the most common modifications is the daily marked-to-market exercise whereby the price of the loan (loan value and required collateral value) and potentially the associated collateral amounts are adjusted to reflect market value changes in the underlying security on loan).

⁴²¹ See BlackRock Letter, at 2.

⁴²² See BlackRock Letter, at 2.

⁴²³ See BlackRock Letter, at 7. According to this commenter, open loans are commonly marked-to-market to the closing price of the relevant security from the previous business day, plus margin and rounding. See *id.* As a result, the actual modification of open loans tends to happen across all positions the next day and at relatively common times across the market. See *id.* The Commission recognizes that, subject to terms agreed to by the parties, covered securities loans may be modified after they are made or are often not finalized until the end of the day. The end-of-day timing modifications to the final rule, as discussed below, in Part VII.G, will help to reduce these concerns raised by the commenters.

determined by how an RNSA chooses to structure the reporting of this variable. For instance, if an RNSA chooses to allow market participants to report a spread and a benchmark, then no modifications will be required to be reported from day to day unless there were a change in the negotiated spread or benchmark. However, if an RNSA chooses to require market participants to report the total fee, then market participants will be required to report changes to the fee if the benchmark changes, which can require daily revisions.⁴²⁴ However, the Commission does not expect that this will cause confusion. The Commission understands that market participants know that rebates can change regularly and, thus, revisions would not be unexpected. Further, gathering loan modification data is important to facilitate the accurate computation of statistics regarding the cost to borrow by an RNSA and other market participants.

One commenter suggested that the termination of a loan should be reported based on the return of securities by the borrower.⁴²⁵ Under the final rule, if a borrower returns a portion of loaned shares, the reduction in the amount of shares remaining on loan will be reported as a modification.⁴²⁶ Similarly, under the final rule, a termination of a covered securities loan is a modification for which information, including the termination date and the reduction of the loaned shares (if any), is required to be reported to an RNSA.⁴²⁷

Events such as consolidations and splitting of loans are required to be

reported. A consolidation would be reported as the termination (and therefore modification) of existing loans and entry into a new loan, including the reporting of all required data elements for those modifications and for the new loan. Similarly, the splitting of an existing loan into separate loans could be reported as a modification and termination of the original loan and entry into multiple separate loans.⁴²⁸ However, that there may be certain life-cycle events in the course of an open-ended loan that some market participants may view as a modification to an existing loan that other market participants might view as a termination of an existing loan and the entry into a new loan. For example, when all outstanding loaned securities are returned to the lender and additional (or the same) shares are subsequently lent under an open-ended loan, one lender may view that event as a termination (and therefore a modification) of an existing loan and a creation of a new loan, whereas another lender may view a similar transaction as two modifications (the return of, and subsequent loan of, securities under the same open-ended loan). In such cases, the lender (or lending agent or reporting agent) may elect to report the required information as either a modification (and termination), or as two modifications to an open-ended loan.

Reporting of Data Elements for Pre-Existing Securities Loans

The Commission also received comment seeking clarification on what some commenters called day-one loans, or loans that are agreed to prior to the reporting date of the final rule.⁴²⁹ One commenter described the day-one problem and stated, “we suggest the Commission find a solution to ensure these loans do not go unreported under a new reporting regime.”⁴³⁰ Other commenters stated that the Commission

⁴²⁸ In addition, to help reduce concerns about potential confusion and misinterpretation of the data, an RNSA could determine to develop methodologies to identify events as a consolidation or the splitting of existing covered securities loans.

⁴²⁹ See BlackRock Letter, at 3, 9; AIMA Letter 1, at 5; ICI Letter 1, at 13 n.45 (stating that, given the difficulties the EU faced with “day one” issue regarding implementation of SFTR, ICI recommends that the SEC or FINRA provide clarity regarding applicability of any final rule to securities loans that are outstanding on the rule's implementation date); FIX Trading Letter, at 3 (stating “It is not clear how the rule handles loans created prior to the rule coming into effect but modified after the rule comes into effect We recommend some wording be added to the rule to clarify a) whether loans already in existence prior to the rule coming into effect need to be reported, b) how modifications should be handled for such loans.”).

⁴³⁰ AIMA Letter 1, at 5.

⁴²⁴ See *infra* Part IX.C.1 (discussing an RNSA's discretion with respect to benchmark pricing).

⁴²⁵ See FIF Letter, at 10 (stating “termination of a securities loan should be reported based on the return of securities by the borrower against the return of the collateral by the lender. The same approach as proposed for reporting new loans and loan terminations should apply for reporting loan modifications.”).

⁴²⁶ Under the final rule, a reduction (or increase) in the loan amount is required to be reported to an RNSA under paragraph (d) of the final rule as a modification to the loan amount in paragraph (c)(6). If the parties to the covered securities loan regard/treat the reduction as termination of the covered securities loan, that is also required to be reported to an RNSA under paragraph (d) of the final rule as a modification to the termination date of the covered securities loan in 17 CFR 240.10c–1a(c)(11) (“final Rule 10c–1a(c)(11)”). Moreover, if the parties to the covered securities loan terminate their loan and such termination involves a reduction in the loan size, this would qualify as a reportable modification under paragraph (d) of the final rule as a modification resulting in a change to the amount or size data element in paragraph (c)(6).

⁴²⁷ See also Proposing Release, 86 FR 69815 (stating “a termination of a loan would be a modification for which information would need to be provided to an RNSA . . . because the termination would result in a reduction of the quantity of securities initially provided to an RNSA for that loan under paragraph (b)(6)”).

should consider ways to report and identify such loans.⁴³¹

Certain commenters stated that many loans are open-ended and continuously modified,⁴³² and sought clarity regarding the treatment of loans in existence prior to the final rule's reporting date for covered persons that are subsequently modified, which commenters characterized as the day-one problem.⁴³³ For example, one commenter stated that the proposal does not consider a key implementation question regarding the day-one problem for reporting existing loans, specifically, that "most loans are open-ended without a set termination date. Accordingly, loans are continually resized and rerated until either the lender or the borrower recalls or returns all shares, respectively. Given the longevity of the average loan, there will be a substantial number of loans that exist prior to the implementation date of the reporting requirements, and such loans will likely continue to be modified as long as they remain outstanding."⁴³⁴ This commenter provided three possible paths for handling such day-one loans: "(1) report each loan the first time it is modified after the implementation date as if it were a new loan, (2) provide all existing loans with an identifier on the day of implementation, or (3) exclude all existing loans from all reporting obligations, including reporting of modifications made to those loans after implementation date."⁴³⁵

The commenter's first alternative for reporting each "day-one" loan the first time it is modified provides an appropriate means of on-boarding data for such loans, as discussed below.⁴³⁶

⁴³¹ See, e.g., Letter from JD Cumpson (Mar. 14, 2022), at 1 (stating "[t]his should be required to be back-dated for all current lending; no hidden 'legacy' deals that are underreported"); BlackRock Letter, at 3 (stating "the Commission should consider ways to report and identify open securities loans initiated before the first day any new requirements are effective; this is the 'day-one problem' . . . either the Commission or the designated RNSA will need to devise a solution for appropriately incorporating them into the data set").

⁴³² See, e.g., BlackRock Letter, at 9; AIMA Letter 1, at 5.

⁴³³ See, e.g., BlackRock Letter, at 9; AIMA Letter 1, at 5; ICI Letter 1, at 13.

⁴³⁴ BlackRock Letter, at 9.

⁴³⁵ BlackRock Letter, at 9.

⁴³⁶ See *infra* note 974 (stating that the Commission does not expect significant additional costs to result from this requirement as it is not expected to impact the need for reporting agents to develop and maintain systems for reporting securities lending information but will simply require the inclusion of some additional data transfers that occur largely around the reporting date. Since the cost of individual transmissions are expected to be small, this aspect of the final rule is expected to have a small impact on the

As discussed below, in Part IX.C.1, the lack of information about these loans would harm data quality because it would render the data less complete and would thus limit market participants' ability to determine conditions in the lending market. Accordingly, paragraph (d)(2) of the final rule provides that if a modification is made to a covered securities loan for which reporting under paragraph (a) of the final rule was not required on the date the loan was agreed to or last modified (a "pre-existing covered securities loan") and results in a change to any of the data elements in paragraph (c) of the final rule, there is an obligation to report each of the data elements in paragraph (c) of the final rule as of the date of the modification.⁴³⁷ Paragraph (d)(2) will provide a snap shot of a pre-existing covered securities loan the first time it is modified on or after the reporting date. If, for example, under the final rule, a pre-existing covered securities loan is first modified two months after the reporting date and the modification results in a change to a data element in paragraph (c) of the final rule, the covered person must provide each of the data elements under paragraph (c) to an RNSA, including the date and time the pre-existing covered securities loan was effected pursuant to 17 CFR 240.10c-1a(c)(3) ("final Rule 10c-1a(c)(3)") and 17 CFR 240.10c-1a(c)(4) ("final Rule 10c-1a(c)(4)"), which will indicate that this is a pre-existing covered securities loan. Reporting of the date and time that the pre-existing covered securities loan was originally effected will provide market participants and regulators with a more complete picture as to the duration of the outstanding loan that is being modified.

In addition to the date and time that the pre-existing covered securities loan was effected (*i.e.*, information in paragraphs (c)(3) and (c)(4)), the covered person must also provide information in paragraphs (c)(1), (c)(2), and (c)(5)

compliance costs of the final rule). See also *infra* note 1029 (The requirement to report information once a loan modification occurs after that loan qualifies for reporting will further support the benefits of the final rule, including reduced information asymmetries and enhanced price competition, by helping to ensure a level playing field during the earlier phases of implementation. This provision will prevent lenders, that have a higher number of long-term loans that did not initially qualify for final Rule 10c-1a reporting, from gaining a competitive advantage by being able to see the loans of other market participants without disclosing the terms of their own loans).

⁴³⁷ See final Rule 10c-1a(d)(2). This approach also responds to the various requests from commenters, including ICI and BlackRock, requesting that the SEC or FINRA provide clarity regarding the applicability of the final rule to day-one loans (*i.e.*, securities loans that are outstanding on implementation data).

through 17 CFR 240.10c-1a(c)(12) ("final Rule 10c-1a(c)(12)") as of the date of the modification. The date and time of the modification will provide market participants with specificity and context regarding the terms of the modifications, including the rates available for modification at that date and time (which may be different than rates available for new loans). Including the date and time will be important because it will indicate if a report of a modification is not filed in a timely fashion.

If, for example, a pre-existing covered securities loan is first modified, either on or after the reporting date, and it is a modification to the loan amount, the covered person will be required to report the number of shares as modified under paragraph (c)(6) of the final rule to an RNSA, as well as each of the other data elements in paragraph (c), including the date and time the pre-existing covered securities loan was effected, by the end of the day on which such loan was modified. In that same example, the date and time of the modification will be required to be reported. Recognizing that a unique identifier will not yet exist for the loan and no data about the loan was previously reported or made publicly available under the final rule, the data elements in (d)(1)(ii) and (d)(1)(iii) will not be required to be reported for such pre-existing covered securities loans.⁴³⁸ However, any subsequent modifications going forward will be subject to the modification reporting requirements under paragraph (d)(1) of the final rule such that only the information in paragraphs (d)(1)(i) through (iii) of paragraph (d) will be required to be reported to an RNSA. Pre-existing covered securities loans that do not have a modification to a data element in paragraph (c) will not be subject to the reporting obligation under paragraph (d)(2) of the final rule.⁴³⁹

The Commission is not adopting the commenter's alternative of requiring reporting of all pre-existing covered securities loans on the first reporting date. Such an alternative would result in costs and burdens for an RNSA to build out the capacity to handle a much larger number of reports on the first reporting date. The Commission is also not adopting the commenter's alternative of omitting all pre-existing covered securities loans, as the data regarding such loans will be useful to investors as well as regulators and the on-boarding of data for such loans when modified will help reduce information

⁴³⁸ See final Rule 10c-1a(d)(2).

⁴³⁹ See final Rule 10c-1a(d)(2).

asymmetries.⁴⁴⁰ These modifications to the final rule address the concerns of other commenters seeking certainty regarding such day one loans.

The commenter also recommended “provid[ing] all existing loans with an identifier on the day of implementation.”⁴⁴¹ However, simply providing an identifier to a pre-existing loan without data about the loan would not provide transparency about the terms of the loan. Instead, the final rule requires that an RNSA assign a unique identifier to the pre-existing covered securities loan when it is reported to an RNSA.

Specifically, 17 CFR 240.10c-1a(g)(3) (“final Rule 10c-1a(g)(3)”) requires that an RNSA assign a unique identifier to a pre-existing covered securities loan that is reported to it pursuant to paragraph (d)(2). Consistent with covered securities loans, an RNSA is also required to make publicly available the data elements in paragraphs (c) and (d)(1)(i) reported to it, other than loan amount data element in paragraph (c)(6), not later than the morning of the business day after the covered securities loan is modified.⁴⁴² In addition, an RNSA is required to make the loan amount publicly available on the twentieth business day after the pre-existing covered securities loan is modified.⁴⁴³ These requirements for pre-existing covered securities loans that are modified after the reporting date are necessary so that the data reported regarding these modified loans are also made publicly available in a manner similar to loans that are covered securities loans under paragraph (g) of the final rule.

3. Confidential Data Elements—Rule 10c-1a(e)

Proposed Rule

The Commission also proposed certain material transaction data elements to be provided to, and retained by, an RNSA, but not made public (“confidential data elements”). As proposed, the confidential data elements provision of the rule is designed to have certain data information used solely by regulators to better understand securities lending, including interest in short selling and price discovery for securities lending, yet without identifying market participants or revealing sensitive

information about their internal operations to the rest of the market. Paragraph (d) of the proposed rule also required the confidential data elements to be provided to an RNSA within 15 minutes after each securities loan was effected (and then an RNSA would be required to keep such information confidential, subject to the provisions of applicable law).

As proposed, the confidential data elements included:

(i) The legal name of each party to the securities loan; where applicable, CRD or IARD Number, MPID, and the LEI of each party to the transaction, and whether such person is the lender/borrower/intermediary between the lender and the borrower (if known);⁴⁴⁴

(ii) If the person lending securities is a broker or dealer and the borrower is its customer, to report whether the security is loaned from a broker’s or dealer’s securities inventory to a customer of such broker or dealer;⁴⁴⁵ and

(iii) If known, whether the securities loan is being used to close out a fail to deliver either pursuant to 17 CFR 242.204 (“Rule 204”) of Regulation SHO or outside of Regulation SHO.

Final Rule

The Commission sought and received comment regarding the proposed provision that would require lenders or their agents⁴⁴⁶ to provide the confidential data items to an RNSA within 15 minutes after each loan is effected.⁴⁴⁷ Commenters stated that the Commission should impose explicit confidentiality obligations on FINRA so

as to protect the confidential securities lending information that would be reported.⁴⁴⁸ Paragraph (h)(4) of the final rule requires that an RNSA establish, maintain, and enforce reasonably designed written policies and procedures to maintain the security and confidentiality of the collected information, which should enhance protection of the confidential data that it collects under the final rule.

One commenter suggested that the final rule include masking or further additional redactions to better protect an individual’s personal non-public information.⁴⁴⁹ Another commenter stated that a retail client has increased confidentiality concerns compared to an institutional client.⁴⁵⁰ These concerns appear to arise primarily from the potential identification of a broker or dealer’s individual fully paid customers. Paragraph (e)(1) of the final rule specifies that a broker or dealer is not required to provide the legal name of (or otherwise make identifiable) the customer when reporting loans of fully paid excess margin securities pursuant to Rule 15c3-3(b)(3). Thus, a broker or dealer may redact or mask such information prior to submitting the information to an RNSA.

Another commenter supported the Commission’s proposed requirement that lenders provide to an RNSA the identities of borrowers of securities loans (although they would not be publicly disclosed), explaining that this information is essential for effective market oversight, and failure to collect this information would materially

⁴⁴⁴ In proposed Rule 10c-1(d)(1), the Commission stated its preliminary belief that provision of this first data element to an RNSA would allow regulators to understand buildups in risk at market participants. It would also provide an RNSA with information that would be required to administer the collection of all data elements provided to it under paragraphs (b) and (d) of proposed Rule 10c-1, such as ensuring the completeness of submissions, contacting persons that have errors in their provided data, and troubleshooting person-specific technical issues. *See* Proposing Release, 86 FR 69815.

⁴⁴⁵ In proposed Rule 10c-1(d)(2), the Commission stated its preliminary belief that this second data element would provide regulators with information on the strategies that broker-dealers use to source securities that are lent to their customers. The Commission also explained that this data element would not apply to lenders that are not broker-dealers. The Commission also stated that it preliminarily believed that making this information available to the public would be detrimental because it may reveal confidential information about the internal operations of a broker-dealer. *See* Proposing Release, 86 FR 69815-16.

⁴⁴⁶ The term “lenders or their agents” in proposed Rule 10c-1 is replaced in the final rule by the term “covered person” (as defined in final Rule 10c-1a(j)). *See also* discussion of “covered person” above, in Part VII.A.

⁴⁴⁷ *See* proposed Rule 10c-1(d).

⁴⁴⁸ ICI Letter 1, at 11 (stating that, “to protect the confidential securities lending information that would be reported to FINRA under proposed rule 10c-1, the SEC should impose explicit confidentiality obligations on FINRA . . . [and] should also ensure that FINRA implements adequate data security measures, given that FINRA will serve as a repository of a large amount of sensitive and non-public securities lending data.”). *See also* Federated Hermes Letter, at 2 (stating that it fully endorses and supports the ICI’s comments, particularly ICI’s proposal to protect confidential data, which, as described includes imposing explicit confidentiality obligations on FINRA and ensuring that FINRA implements adequate data security measures, given that FINRA will serve as a repository of a large amount of sensitive and non-public securities lending data); ISLA Letter, at 2 (expressing concern that if there is too much disclosure of information it could lead to less securities lending activity, particularly if the required data are disproportional or considered unreasonable); MFA Letter 3, at 8 (recommending “that the Commission exercise its regulatory oversight of FINRA to ensure that FINRA implements adequate data security measures”). *See, e.g.,* IIB Letter, at 3 (recommending that the final rule require RNSAs to adopt certain data security measures, including masking or encryption); Charles Schwab Letter, at 2.

⁴⁴⁹ *See* Charles Schwab Letter, at 2; *see also* FIF Letter, at 7.

⁴⁵⁰ *See* Charles Schwab Letter, at 2.

⁴⁴⁰ *See supra* note 436 (discussing costs that result from the requirement to report information once a loan modification occurs after the loan qualifies for reporting).

⁴⁴¹ BlackRock Letter, at 9.

⁴⁴² *See* final Rule 10c-1a(g)(3)(i).

⁴⁴³ *See* final Rule 10c-1a(g)(3)(ii).

weaken the efficacy of the rule.⁴⁵¹ Under the final rule, the names and identities of lenders (other than customers in a fully paid lending arrangement) will be required to be reported to an RNSA. This data will be fully captured by the final rule requiring a broker or dealer (as the “borrower” under the “fully paid” exception) to report such loans. With regard to fully paid arrangements, the final rule requires the broker or dealer to report such loans as the borrower. Although brokers or dealers will not be required to report the customer names to an RNSA, the brokers or dealers will be required to retain such information and make it available to the Commission and its representatives⁴⁵² and will be required to retain per RNSA rules.⁴⁵³

Another commenter suggested that, to make the rule more useful to investors, in addition to loan characteristics, there should also be a requirement to publicly disclose the legal names of the parties to the loan (in contrast to keeping that information confidential).⁴⁵⁴ In fact, multiple retail investor commenters stated that real reform for securities lending must include notifying the public about who is borrowing and lending shares (not just which company’s shares are being borrowed or lent).⁴⁵⁵ One commenter stated that

there is no reason for any of the information that is proposed to be provided to an RNSA to be restricted from public view and, thus, it should be made public.⁴⁵⁶ However, making this information available to the public could be detrimental because it could identify specific market participants or reveal confidential information about the internal operations or investment decisions of specific market participants.⁴⁵⁷

Others commented more generally on the importance of the securities lending disclosure requirements not adversely impacting the market (*e.g.*, by revealing investors’ short selling strategies). To avoid such adverse impacts, these commenters stated that there should be more prescriptive measures (than requiring policies and procedures, for instance) to prevent an RNSA, or the reporting agent, from releasing any of the confidential transaction data that are provided, under the final rule.⁴⁵⁸ Paragraph (h)(4) of the final rule sets forth a multi-part requirement that mandates: (1) written policies and procedures; (2) that such policies and procedures must be reasonably designed; and (3) that an RNSA establishes, maintains, and enforces such policies and procedures. This approach is intended to provide flexibility to an RNSA to tailor policies and procedures that will appropriately maintain the security and confidentiality of the confidential information required by paragraph (e) of the final rule, based on its experience with the multiple types of sensitive and confidential trading data that it

routinely handles as an RNSA. Policies and procedures generally are regularly monitored, tested, reviewed, and, if needed, updated to ensure that they remain continuously effective and, thus, should be particularly useful in helping to ensure that an RNSA adjusts to ever-changing technologies intended to circumvent data safeguards. Further, an RNSA’s policies and procedures are subject to Commission oversight.⁴⁵⁹

Some commenters expressed concerns about reporting agents maintaining confidential data received from covered persons.⁴⁶⁰ Consistent with the proposed rule, a covered person has the option of whether or not to entrust its confidential information with a reporting agent or to report such information directly to an RNSA. Further, paragraph (a)(2)(i) of the final rule requires that a covered person who relies on a reporting agent to fulfill its reporting obligations under the final rule must enter into a written agreement with such reporting agent. Such agreement could be used by the covered person and reporting agent to memorialize any measures that they agree to regarding the protection of the covered person’s Rule 10c–1a information. Further, registered brokers and dealers and registered clearing agencies are subject to provisions such as section 15(g) of the Exchange Act and thus, have experience with implementing, maintaining, and enforcing policies and procedures and other means of protecting and preventing the misuse of information.⁴⁶¹

One commenter recommended that the proposed rule be modified to permit an RNSA to confidentially provide regulatory-related information to SROs that are not RNSAs, such as NYSE Regulation, without first obtaining a Commission order.⁴⁶² Under the final

⁴⁵¹ See, *e.g.*, HMA Letter; NYSE Letter 1, at 2 (supporting the proposed confidential treatment of the proposed confidential data elements, particularly the parties to each transaction and further stating that “[p]roposed Rule 10c–1(c)(3) guards against this concern by providing that all identifying information about lending agents, reporting agents, and other persons using reporting agents, will not be made publicly available and the RNSA will be required to keep such information confidential. Thus, the investment strategies of market participants will be appropriately protected through reporting and dissemination of securities lending transactions on an unattributed basis.”).

⁴⁵² See, *e.g.*, 15 U.S.C. 78q (section 17(b) of the Exchange Act; see also 17 CFR 240.17a–4(j) (“Rule 17a–4(j)”) (requiring a broker-dealer to furnish records promptly to the Commission); Rule 15c3–3(b)(3) (requiring a broker-dealer to enter into a written agreement with each fully paid lending customer); 17 CFR 240.17a–4(b)(7) (“Rule 17a–4(b)(7)”) (requiring the broker-dealer to retain written agreements relating to its business as broker-dealer).

⁴⁵³ See, *e.g.*, FINRA Rule 4511 (regarding preservation of records), available at <https://www.finra.org/rules-guidance/key-topics/books-records>.

⁴⁵⁴ See Morningstar Letter, at 3. However, if the Commission decides not to require public disclosure of legal names to the public, this commenter suggested, as an alternative, the Commission require detailed information about the fund type and borrower type be provided to the public by an RNSA. See Morningstar Letter, at 3.

⁴⁵⁵ See, *e.g.*, Letter from Susanne Trimboth, STP Advisory Services (Dec. 3, 2021) (whose remarks/comments have been extensively quoted/paraphrased by a multitude of commenters on the Proposing Release, *i.e.*, Form A Letters and Form B Letters) (“Trimboth Letter”).

⁴⁵⁶ See Letter from Jimit Raithatha (Oct. 11, 2022).

⁴⁵⁷ See Proposing Release, 86 FR 69815.

⁴⁵⁸ See, *e.g.*, Letter from Managed Funds Association (Jan. 7, 2022) (“MFA Letter 1”), at 4 (suggesting the Commission explicitly require an RNSA to maintain strict confidentiality and information security standards. While the commenter applauded the Commission’s efforts to ensure that FINRA has policies and procedures in place to protect the confidentiality of information that is submitted to it, the commenter believes that the Commission should require, among other things, more prescriptive measures similar to Rule 613 of Regulation NMS (consolidated audit trail) to ensure the security and confidentiality of information, as well as information barriers, information security systems, user confirmation, and access audits.); MFA Letter 3, at 3. Given the confidential and proprietary nature of some of the information that an RNSA will be collecting, this commenter stated it is imperative that the Commission ultimately ensure that FINRA adopt more prescriptive confidentiality and information security in connection with any final rule. As discussed above, the requirements of paragraph (h)(4) of the final rule provide an appropriate level of flexibility to an RNSA regarding specific prescriptive measures to use to maintain the security and confidentiality of the confidential information required by paragraph (e) of the final rule while, at the same time, placing strict requirements around such choices.

⁴⁵⁹ See also ICI Letter 1, at 11 (suggesting a proposal to protect confidential data to include imposing explicit confidentiality obligations on FINRA and ensuring that FINRA implements adequate data security measures, given that FINRA will serve as a repository of a large amount of sensitive and non-public securities lending data); ISLA Letter, at 2 (expressing concern that if there is too much disclosure of information it could lead to less securities lending activity, particularly if the required data are disproportional or considered unreasonable).

⁴⁶⁰ See S3 Partners Letter, at 12; IHS Markit Letter, at 4; Pirum Letter, at 5; BlackRock Letter, at 9.

⁴⁶¹ See 15 U.S.C. 78o.

⁴⁶² See, *e.g.*, NYSE Letter 2, at 1–3; Nasdaq Letter, at 3–4 (supporting regulators having access to information that is not publicly available and advocating for the SEC to make non-public information available to other regulators). See also paragraph (h)(2) of final Rule 10c–1a regarding an RNSA making certain information available to the Commission; or other persons as the Commission

rule, an RNSA is required to establish, maintain, and enforce policies and procedures specifically tailored to protect the confidential information enumerated in the final rule. To address commenters' concerns regarding the potential market impact of loan information required to be provided to an RNSA by the final rule, the Commission may designate by order upon a demonstrated regulatory need, dissemination to persons other than an RNSA. Thus, as discussed further below, in Part VII.K, it is appropriate to provide such information to persons (other than the Commission) by order, on a case-by-case basis, upon a demonstrated regulatory need. Such case-by-case determination strikes the proper balance between protecting confidential information and facilitating the regulatory function, such as those of an SRO. Another commenter requested that the Commission clarify whether the "if known" parenthetical, included at the end of paragraph (d)(1) of the proposed rule, was meant to apply to each of the confidential data elements (*i.e.*, CRD, IARD, MPID) in that paragraph.⁴⁶³ In reviewing this provision, the Commission recognizes that the proposed rule text, by locating the "if known" language at the end of paragraph (d)(1) in the proposed rule (rather than at the beginning as was done with other "if known" language that was used for the confidential data elements in paragraph (d)(3) of the proposed rule), the scope of this "if known" language with respect to the individual confidential data elements in paragraph (d)(1) was not entirely clear. Thus, the placement of the "if known" language similarly at the beginning of the paragraph (e)(1) of the final rule clarifies that each piece of information enumerated in that paragraph (*i.e.*, following the "if known" language) is required to be reported only to the extent that piece of information is known by the covered person. To clarify this intent, it is appropriate to modify proposed paragraph (d)(1) by moving the placement of the "if known" language that is currently proposed at the end of paragraph (d)(1) (in the proposed rule), and relocating it to the beginning of paragraph (e)(1) in the final rule, consistent with the same "if known" language at the beginning of 17 CFR 240.10c–1a(e)(3) ("final Rule 10c–1a(e)(3)").

To the extent the data elements of final Rule 10c–1a(e)(1) are known, providing these data elements to an

RNSA will allow regulators to understand buildups in risk at market participants and may otherwise assist an RNSA in monitoring and surveilling the security markets. The data elements will also provide an RNSA with the necessary information to administer the collection of all the other data elements provided to it under final Rules 10c–1a(c) and (d), such as ensuring the completeness of submissions, contacting persons that have errors in their provided data, and troubleshooting person-specific technical issues.⁴⁶⁴

The Commission also proposed requiring that information be reported (but not publicly disclosed) on whether the securities loan is being used to close out a fail to deliver pursuant to Rule 204 of Regulation SHO⁴⁶⁵ or to close out a fail to deliver outside of Regulation SHO. Rule 204 of Regulation SHO generally requires closing a firm's fail to deliver position in equity securities at a registered clearing agency by purchasing or borrowing securities of like kind and quantity. Accordingly, under the final rule, this data element will provide regulators with information both about the loans used by brokers or dealers to close out fails to deliver as required by Regulation SHO, as well as additional insight into the use of loans, particularly the extent that loans are used to cover account-level fail to deliver positions in reportable securities.

Several commenters were supportive of this confidential data element, as proposed, with one commenter noting the benefits of such data for regulatory oversight,⁴⁶⁶ and yet other commenters requested that this data element be required to be publicly reported.⁴⁶⁷

⁴⁶⁴ See, *e.g.*, Proposing Release, 86 FR 69815 (regarding information collected pursuant to paragraphs (c) through (e) of the final rule available to the Commission; or other persons as the Commission may designate by order upon a demonstrated regulatory need).

⁴⁶⁵ 17 CFR 242.204.

⁴⁶⁶ See FINRA Letter, at 2 n.4 (stating that fail to deliver data in particular "would significantly enhance FINRA's Regulation SHO surveillance programs"). This commenter stated that it agrees that the proposed rule will provide the Commission, FINRA, and other regulators with data that could be used for important regulatory functions, including facilitating and improving FINRA's in-depth monitoring of members' activity and surveillance of the securities markets in stating, "this additional data would facilitate better surveillance by FINRA for regulatory compliance by its members" and improve FINRA's ability to enforce relevant regulations. See *id.* at 1–2. More specifically, "the additional data, including in particular the identification of whether a loan will be used to close out a fail to deliver, would significantly enhance FINRA's Regulation SHO surveillance programs." *Id.* at 4.

⁴⁶⁷ See, *e.g.*, Hindley Letter ("In my opinion, this data not being made publicly available is wrong."); Erick R. Letter ("I believe the terms . . . should also be made public.").

Final Rule 10c–1a(e)(3), adopts this data element as proposed. The Commission has elected to adopt without modification (*i.e.*, not requiring public dissemination) this specific data element in paragraph (d)(3) of the proposed rule because, as a commenter stated,⁴⁶⁸ such information could be abused and is designed to be primarily useful for regulatory purposes.⁴⁶⁹ As the Commission has stated, fails to deliver may result from long sales as well as short sales, and may be closed out by either purchasing or borrowing shares. Fails to deliver can occur for various reasons, such as "human or mechanical errors or processing delays can result from transferring securities in custodial or other form rather than book-entry form, thereby causing a fail to deliver on a long sale."⁴⁷⁰ Such data will be useful to regulators in determining both the extent of the use of securities loans for fails to deliver, as well as how and when fails to deliver are being addressed by securities loans. However, the Commission agrees with the commenter that such information, if made public, could be abused. For example, market participants that become aware of fails to deliver may seek to short squeeze the security knowing that the person failing to deliver has a time-sensitive need to cover its short position.

Another commenter stated that, in addition to the data elements in paragraph (d)(1) of the proposed rule, it will not have knowledge of whether the loan was used to cover a fail to deliver at the time of providing the confidential report to an RNSA, as would be required by paragraph (d)(3) of the proposed rule.⁴⁷¹ The final rule adopts as proposed the requirement that such information must be reported if known.⁴⁷²

As non-substantive changes to the rule, the Commission is replacing the word "person" with the defined term "covered person" as discussed above, in Part VII.A. Thus, as adopted, paragraph (e) of final Rule 10c–1a requires, consistent with the Proposing Release, that "[i]f required by paragraph (a) of this section, a covered person directly,

⁴⁶⁸ See Citadel Letter, at 11.

⁴⁶⁹ See FINRA Letter, at 1–2.

⁴⁷⁰ *Amendments to Regulation SHO*, Release No. 34–60388 (July 17, 2009); 74 FR 38266, 38271 (July 31, 2009) (Adopting Release).

⁴⁷¹ See OCC Letter, at 9 (stating that OCC does not know the CFT, IARD, MPID, or LEI of the lending or borrowing clearing members or whether the lending or borrowing clearing members are acting as intermediaries—and does not know if the loan is being used to close out a fail to deliver pursuant to SEC Regulation SHO or otherwise). may designate by order upon a demonstrated regulatory need.

⁴⁶³ See OCC Letter, at 9.

or indirectly using a reporting agent shall provide the following information to an RNA, if applicable, by the end of the day on which a covered securities loan is effected.”⁴⁷³ As non-substantive changes to the rule, the Commission is replacing the word “person” with the defined term “covered person” as discussed above, in Part VII.A. Thus, as adopted, paragraph (e) of final Rule 10c–1a requires, consistent with the Proposing Release, that “[a] covered person shall provide the following information to an RNA, if applicable, by the end of the day on which a covered securities loan is effected.”⁴⁷⁴

4. Removal of Securities Available to Loan Data Element

Proposed Rule

Among the securities lending data elements required to be reported to an RNA, the Commission included in the proposed rule a requirement to report the total amount of each security that is not subject to legal or other restrictions that prevent it from being lent (“available to lend”).⁴⁷⁵ The Commission also required that certain identifying information, including the legal name of the security, and the ticker symbol or other identifier, be reported with the available to lend data.⁴⁷⁶ The Commission stated in the Proposing Release that it designed the securities available to loan data elements to allow for the calculation of a “utilization rate” for each security.⁴⁷⁷ The utilization rate, which could be calculated by dividing the total number of shares on loan by the total number of shares available for loan, could then be used by market participants to evaluate whether the security will be difficult or costly to borrow.⁴⁷⁸

Final Rule

The Commission received numerous comments regarding the “available to lend” data element⁴⁷⁹ of the proposed rule. Certain commenters expressed

concern that such data could be inaccurate,⁴⁸⁰ with some highlighting a variety of limitations on securities lending that could make the data unreliable.⁴⁸¹ Commenters expressed concern that the available to lend data could be underreported if it omitted data from persons that were not required to provide information to an RNA or that did not have an open securities loan.⁴⁸² One commenter stated that “data would be particularly misleading for large international banking organizations with substantial operations outside of the United States.”⁴⁸³ Other commenters expressed general concern that the proposed “available to lend” data element could discourage securities lending.⁴⁸⁴ Two

⁴⁸⁰ See RMA Letter, at 11; IIB Letter, at 8; SIFMA Letter 1, at 15; ICI Letter 1, at 8–9; SIFMA AMG Letter, at 8; State Street Letter, at 4–5; Fidelity Letter, at 4; ABA Letter, at 4; CASLA Letter, at 2; Federated Hermes Letter, at 2; S3 Partners Letter, at 11–12; Sharegain Letter, at 3; Linklaters Letter, at 5; MFA Letter 3, at 6–7; EBF Letter, at 2 (expressing general support for comments from SIFMA and IIB addressing the reporting of “available to lend” data).

⁴⁸¹ See, e.g., State Street Letter, at 4 (“Although clients who participate in securities lending programs generally agree to lend all portfolio assets, or categories of assets, securities lending authorization agreements typically place limits on both portfolio and counterparty exposure. Furthermore, the actual supply of available securities may be impacted by additional client instruction resulting from various idiosyncratic or market events, as well as discretionary transfers in and out of investment portfolios.”). See also IIB Letter, at 8 (“Portfolio limits, concentration limits and simple lending preferences and strategies may substantially limit both the individual securities that a party may be willing to lend and the amount of lending that they are willing to provide on aggregate.”); ICI Letter 1, at 2 n.8 (“A fund may not have on loan at any time securities representing more than one-third of the fund’s total value.”). Further stating that “[t]his restriction stems from section 18 of the Investment Company Act.”); SBAI Letter, at 2 (“However, funds managed under 1940 Act regulations have restrictions on their approach to securities lending (e.g., limit on lending: A fund may not have on loan at any time securities representing more than one-third of the fund’s total value), thereby not allowing an accurate calculation of ‘securities available to lend’ on an individual security basis.”); RMA Letter, at 12 (“... securities lending in a portfolio provided to a Lending Agent by a beneficial owner may be limited by (i) negotiated or legal portfolio limits that impact the amounts and types of securities that may be lent, (ii) ad hoc or periodic beneficial owner instructions to limit lending in particular ways based on idiosyncratic preferences . . . or external factors and (iii) discretionary transfers in and out of custody accounts unrelated to securities lending interest, and other factors.”); Linklaters Letter, at 5; James J. Angel Letter, at 4.

⁴⁸² See, e.g., IIB Letter, at 8. See also RMA Letter, at 11.

⁴⁸³ See IIB Letter, at 8.

⁴⁸⁴ See, e.g., State Street Letter, at 5 (stating that “[i]n our experience, the prospect of being obligated to disclose, even in aggregate form, all portfolio holdings may be enough to drive certain clients out of the securities lending market, with important implications for liquidity”). See also ICI Letter 1, at 8; IIB Letter, at 8–9; RMA Letter, at 13; IHS Markit

commenters recommended replacing the “available to lend” metric for the calculation of a utilization rate with publicly available information on the issuer’s total share float.⁴⁸⁵ However, other commenters supported the reporting of “available to lend” data.⁴⁸⁶

One of the Commission’s goals in proposing the “available to lend” data requirements was “to allow for the calculation of a ‘utilization rate’ for each particular security,” which in turn “could be used by market participants to evaluate whether the security will be difficult or costly to borrow.”⁴⁸⁷ The Commission stated in the Proposing Release that “the information provided under paragraph (e) [of the proposed rule] should allow market participants to calculate a utilization rate that is likely to be reliable.”⁴⁸⁸ However, many commenters expressed concerns that there may be significant challenges to the accurate reporting of “available to lend” data.⁴⁸⁹ One commenter stated, before highlighting barriers to obtaining accurate “available to lend” data, that the “[c]alculation of the utilization rate requires an accurate measure of the ‘securities available to lend’ for all market participants.”⁴⁹⁰

Upon consideration, the Commission agrees with commenters’ concerns with the potential for underreported or inaccurate “available to lend” data being reported. Therefore, final Rule 10c–1a has been amended from the proposed rule to remove the reporting of “available to lend” data, as described under proposed Rules 10c–1(e)(1)(iii) and (e)(2)(iii), and to remove the

Letter, at 11 (stating that “[b]eneficial owners, especially sovereign wealth funds and other sensitive investors, may have policies that could force them to withdraw from securities lending if they are required to submit available to lend data to a broker-dealer”).

⁴⁸⁶ See HMA Letter, at 7 (stating that such information “is essential to building a comprehensive view of the markets”); FINRA Letter, at 2 (stating that “the information subject to reporting under the Proposal regarding the aggregate quantity of shares . . . available to loan would provide useful information in monitoring the levels of short selling activity occurring in a security and determining when a security is hard to borrow”); ASA Letter, at 3.

⁴⁸⁷ See Proposing Release, 86 FR 69817 (stating that the utilization rate “would be calculated by dividing the total number of shares on loan by the total number of shares available for loan”).

⁴⁸⁸ See Proposing Release, 86 FR 69817 n.113.

⁴⁸⁹ See, e.g., ICI Letter 1, at 8–9; Federated Hermes Letter, at 2; ABA Letter, at 4; RMA Letter, at 11; State Street Letter, at 4–5; IIB Letter, at 8; SBAI Letter, at 2; Sharegain Letter, at 3.

⁴⁹⁰ See SBAI Letter, at 2 (stating that “funds managed under 1940 Act regulations have restrictions on their approach to securities lending . . . thereby not allowing an accurate calculation of ‘securities available to lend’ on an individual security basis”).

⁴⁷³ See final Rule 10c–1a(e) (referring to “Confidential data elements” in paragraphs (e)(1) through (3)).

⁴⁷⁴ See final Rule 10c–1a(e) (referring to “Confidential data elements” in paragraphs (e)(1) through (3)).

⁴⁷⁵ See proposed Rule 10c–1(e)(1)(iii).

⁴⁷⁶ See proposed Rules 10c–1(e)(1)(i) and (ii).

⁴⁷⁷ See Proposing Release, 86 FR 69817.

⁴⁷⁸ See Proposing Release, 86 FR 69817.

⁴⁷⁹ The term “available to lend data” refers to both the “total amount of each security that is not subject to legal or other restrictions that prevent it from being lent” information proposed to be reported by a lending agent under proposed Rule 10c–1(e)(1)(iii), and the “total amount of each specific security that is owned by the person and available to lend” information proposed to be reported by persons that do not use a lending agent under proposed Rule 10c–1(e)(2)(iii).

corresponding requirement that an RNSA make such information publicly available, as described under proposed Rule 10c-1(e)(3). Additionally, final Rule 10c-1a removes the reporting requirements for the identifying information (*e.g.*, legal name of the security, LEI of the issuer, ticker symbol, ISIN, CUSIP, FIGI, or other identifier) of such “available to lend” securities, as listed under proposed Rules 10c-1(e)(1)(i) and (ii) and 10c-1(e)(2)(i) and (ii). Therefore, final Rule 10c-1a does not include a requirement that “available to lend” data be reported to an RNSA, by a lending agent, a person that does not employ a lending agent, or otherwise. The elimination of this requirement from the proposed rule responds to commenter concerns, will limit the burden of the final rule’s reporting requirements on covered persons, and will preempt the potential for inaccurate or unreliable data to be made publicly available to market participants.

5. Removal of Securities On Loan Data Element

Proposed Rule

The Commission proposed a requirement that, by the end of each business day that a lending agent was required to provide Rule 10c-1 information to an RNSA or had an open securities loan about which it was required to provide information to an RNSA, the lending agent shall provide to an RNSA the total amount of each security on loan that has been contractually booked and settled (“security on loan”).⁴⁹¹ The proposed rule also required that by the end of each business day that a person that does not use a lending agent provides Rule 10c-1 information to an RNSA, or had an open securities loan about which it was required to provide information to an RNSA, the person shall also provide to an RNSA the total amount of each security on loan that has been contractually booked and settled (“security on loan”).⁴⁹² The Commission also proposed that “[f]or each security about which the RNSA receives [such] information The RNSA shall make available to the public only aggregated information for that security.”⁴⁹³

The Commission stated its preliminary belief that securities on loan data could help market participants plan their borrowing activity.⁴⁹⁴ The Commission also stated that it designed

the proposed securities on loan data element to allow for the calculation of a “utilization rate” for each particular security.⁴⁹⁵ The utilization rate could then be used by market participants to evaluate whether the security will be difficult or costly to borrow.⁴⁹⁶

Final Rule

Commenters provided differing views on the proposed reporting requirement for the securities on loan data element. Certain commenters supported or did not object to the requirement to report securities on loan data⁴⁹⁷ in the proposed rule.⁴⁹⁸ One commenter recommended that more granular securities on loan data be made available, including that the “total number of shares of each stock on loan [should be] disaggregated by lender.”⁴⁹⁹ Multiple commenters supported the proposed requirement for an RNSA to make securities on loan data publicly available on an aggregate basis,⁵⁰⁰ with one recommending that “[f]or each security, FINRA could disseminate the total volume of securities on loan by shares or principal value (as applicable) and as a percentage of the shares or principal value (as applicable) of all securities that are outstanding.”⁵⁰¹ Another commenter disapproved of the proposed securities on loan data reporting requirement, expressing concerns that the data “may be misleading,” and recommended removing it.⁵⁰² The commenter stated that some brokers use approaches to calculating securities on loan data that

“routinely misrepresent the true number of borrowed shares.”⁵⁰³

Similar to the concerns described above, in Part VII.F.4, about the proposed securities available to loan data element, the Commission agrees with the commenters that there may be challenges to the collection of accurate securities on loan data.⁵⁰⁴ Additionally, aggregated information similar to the proposed securities on loan data will be made available by RNSAs, without the additional, potentially duplicative, reporting requirements of proposed Rule 10c-1(e)(1)(iv) and (e)(2)(iv).⁵⁰⁵ Under the final rule, RNSAs will be required to design and provide not only information pertaining to the aggregate transaction activity⁵⁰⁶ for each reportable security, but also distribution of loan rates for each reportable security.⁵⁰⁷ These requirements should provide market participants with information to help plan their borrowing activity, while avoiding potentially duplicative reporting obligations. Such aggregated data would be consistent with some commenters’ support for requiring RNSAs to make “securities on loan” data available on an aggregated basis.⁵⁰⁸ Additionally, RNSAs will be required to make the disaggregated “amount of the security loan” data publicly available,⁵⁰⁹ comparable to the disaggregated “securities on loan” data recommended by one commenter.⁵¹⁰ However, as discussed below, in Part VII.J, such disaggregated data will only be publicly available on a delayed basis, on the twentieth business day after the covered securities loan is effected, in order to protect the sensitive nature of individual securities lending “amount” information (*e.g.*, such as size or volume).⁵¹¹ Furthermore, for the reasons described above, in Part VII.F.4, final Rule 10c-1a will not require the reporting of an available to loan data element, which therefore would not be available to pair with the proposed securities on loan data element in order

⁴⁹⁵ See Proposing Release, 86 FR 69817.

⁴⁹⁶ See Proposing Release, 86 FR 69817.

⁴⁹⁷ The term “securities on loan data” refers to both the “total amount of each security on loan that has been contractually booked and settled” information proposed to be reported by lending agents under proposed Rule 10c-1(e)(1)(iv), and the “total amount of each specific security that is owned by the person” information proposed to be reported by persons that do not use a lending agent under proposed Rule 10c-1(e)(2)(iv).

⁴⁹⁸ See SIFMA Letter 1, at 4 n.9; SIFMA AMG Letter, at 11; FINRA Letter, at 2 (stating that “the information subject to reporting under the Proposal regarding the aggregate quantity of shares on loan . . . would provide useful information in monitoring the levels of short selling activity occurring in a security and determining when a security is hard to borrow.”); Better Markets Letter, at 6.

⁴⁹⁹ See Letter from Americans for Financial Reform Education Fund, at 3 (Apr. 1, 2022) (“AFREF Letter 2”).

⁵⁰⁰ See FIF Letter, at 11; ICI Letter 1, at 11.

⁵⁰¹ See FIF Letter, at 11.

⁵⁰² See S3 Partners Letter, at 12 (stating that “prime brokers often use their own internal inventory of shares which means no actual ‘borrowing’ takes place. By failing to take this ‘internalization’ into account, approaches that use ‘securities on loan’ routinely misrepresent the true number of borrowed shares.”).

⁵⁰³ See S3 Partners Letter, at 12.

⁵⁰⁴ See FIF Letter, at 10; S3 Partners Letter, at 11–12; Linklaters Letter, at 5–6.

⁵⁰⁵ See final Rule 10c-1a(c).

⁵⁰⁶ See final Rule 10c-1a(g)(5). The term “aggregate transaction activity” used in the final rule refers to information pertaining to the absolute value of transactions such that net position changes could not be discerned in the data. The addition of the term “aggregate transaction activity” in the final rule limits the possibility of publishing proprietary information while still providing volume transparency to market participants.

⁵⁰⁷ See final Rule 10c-1a(g)(5).

⁵⁰⁸ See SIFMA Letter 1, at 18–19; SIFMA AMG Letter, at 10.

⁵⁰⁹ See final Rule 10c-1a(g).

⁵¹⁰ See AFREF Letter 2, at 3.

⁵¹¹ See final Rule 10c-1a(g)(2).

⁴⁹¹ See proposed Rule 10c-1(e)(1)(iv).

⁴⁹² See proposed Rule 10c-1(e)(2)(iv).

⁴⁹³ See proposed Rule 10c-1(e)(3).

⁴⁹⁴ See proposed Rule 10c-1(e)(3).

to calculate a “utilization rate” metric.⁵¹² Therefore, while certain benefits derived by market participants from the reporting and disclosing of securities available to lend data and securities on loan data elements together may not be realized, market participants may benefit from the public availability of aggregate transaction activity and distribution of loan rates.⁵¹³

For the foregoing reasons, final Rule 10c-1a has been changed from the proposed rule to remove the reporting of securities on loan data, as described under proposed Rule 10c-1(e)(1)(iv) and (e)(2)(iv), and to remove the corresponding requirement that an RNSA make such information publicly available, as described under proposed Rule 10c-1(e)(3). Therefore, final Rule 10c-1a does not include a requirement that a lending agent or other covered person report securities on loan data to an RNSA.

G. Timing of Required Reporting to an RNSA

1. Timing of Reporting of Loans

Proposed Rule

As discussed above, in Part VII.F.1, paragraph (b) of the proposed rule would have required certain loan transaction data elements to be reported to an RNSA, on a transaction-by-transaction basis, within 15 minutes of the loan being effected, followed by an RNSA assigning each loan a unique transaction identifier and then making such information publicly available as soon as practicable. As part of the proposed rule, the Commission sought specific comment as to the proposed 15-minute requirement for reporting specified data elements to an RNSA.

Final Rule

While the proposed 15-minute reporting requirement received some support,⁵¹⁴ most of the comments

received by the Commission from larger institutional market participants strongly opposed the proposed rule’s requirement that the specified data elements be reported to an RNSA within 15 minutes after a loan is effected (*i.e.*, in addition to the data being publicly disseminated on a transaction-by-transaction basis). For example, most of these larger market participants explained that the terms of securities loans change during the day and are generally not finalized until the end of the day.⁵¹⁵ These changes include reallocations of securities loans among lenders, re-pricings, and changes in collateral.⁵¹⁶ As a result, the commenters stated that requiring transaction-by-transaction reporting, particularly on a 15-minute/intraday basis, would result in significant unintended negative consequences, including the public dissemination of incomplete or misleading information, which could adversely impact the securities/lending markets.⁵¹⁷ Another commenter also stated that the proposed

hiding in loopholes). In fact, one commenter stated that at a minimum “the final rule should significantly shorten the 15-minute reporting timeframe.” Better Markets Letter, at 8. This commenter urged the Commission to finalize the proposed rule without undue delay and without diluting the proposal in any way absent credible, specific evidence that such dilution will not have an impact on the utility of the data reported. *See id.* This commenter also stated that “the SEC should also shorten the required timeframes for the reporting” and identified “potential shortcomings of these timeframes, including how they hamper real-time regulatory oversight or allow manipulative activity based on information leakage or other means of exploiting the 15-minute reporting delay . . . for public disclosure.” *Id.* Other commenters expressed support for the proposed rule and specifically noted that it is a leading provider of data and analytics in the securities lending market and is currently able to do intraday reporting. *See, e.g.*, Equilend Letter; *see also* Morningstar Letter, at 4 (stating its support for the proposed 15-minute reporting requirement). The Commission acknowledges the above benefits stated by these commenters regarding the proposed 15-minute reporting requirement and has considered the comments that argued in favor of end-of-day reporting. As discussed below, in this part, the Commission has determined to replace the proposed intraday 15-minute reporting requirement with an end of day requirement that will allow covered persons additional time in which to collect and report their Rule 10c-1a information in compliance with final Rule 10c-1a’s requirements.

⁵¹⁵ *See* Fidelity Letter, at 2–3 (stating that “[t]he reporting timeframe for transactions should be no earlier than end of day”). *See also* MFA Letter 1, at 8; MFA Letter 2.

⁵¹⁶ *See* FIF Letter, at 3.

⁵¹⁷ *See, e.g.*, SIFMA AMG Letter, at 3 (stating that the proposed 15-minute requirement would lead to the reporting of superfluous information benefitting neither market transparency nor regulatory oversight). *See also* SIFMA Letter 1, at 13–14; SIFMA Letter 2, at 5. *See also* State Street Letter, at 2–3 (stating the 15-minute reporting requirement will result in incomplete or error prone information because it ignores that loans are usually finalized by the end of day). *See also* AIMA Letter 1, at 4; ICI Letter 1, at 6.

15-minute reporting requirement is impractical and logistically challenging and would “create noise and misleading information in the market.”⁵¹⁸ In addition commenters stated that there would be costs to participants to create and maintain an entirely new infrastructure for loan data reporting and dissemination.⁵¹⁹

Other commenters stated that the proposed 15-minute reporting time period would exponentially increase the number of execution (and modification) reports that would be required to be filed.⁵²⁰ Another commenter stated that requiring reporting every 15 minutes gives away too much proprietary information to the market regarding closely guarded trading strategies, risking exposures to short squeezes, front running, reverse-engineering—particularly with hard-to-borrow securities.⁵²¹ Another commenter raised the concern that a 15-minute reporting requirement may be unnecessarily frequent and that there did not appear to be any stated rationale in the Proposing Release for how a 15-minute reporting interval would be helpful to market participants or why this frequency is appropriate.⁵²²

⁵¹⁸ *See, e.g.*, CCMR Letter, at 5 (stating that disclosing securities loan activity on a transaction-by-transaction basis as soon as 15 minutes after they are effected would likely signal to the market that a short selling position is being actively established in that security, which could have potential negative effects on short sellers, increase costs associated with establishing a short position through information leakage and slippage; or lead to “short squeezes”). *See also* SBAI Letter, at 2; AIMA Letter 1, at 3–4 n.11; RMA Letter, at 18.

⁵¹⁹ *See* MFA Letter 1, at 3.

⁵²⁰ *See also* RMA Letter, at 9.

⁵²¹ *See* AIMA Letter 1, at 4–5 (stating that in response to the proposed rule market participants may adjust their trading strategies or exit the borrowing market when they otherwise would be active participants thereby reducing liquidity and increasing volatility).

⁵²² *See* Letter from Tom Quaadman, Executive Vice President, Center for Capital Markets Competitiveness, U.S. Chamber of Commerce (Jan. 7, 2022) (“Chamber of Commerce Letter”). *But see* Nasdaq Letter, at 3 (stating “the data reported should be made available to investors within a reasonable timeframe to utilize the information effectively to make informed investment decisions. To that end, it is unclear whether the fifteen-minute timeframe for reporting certain data is optimal and is supported by sufficient research or other justification. When compared to the speed at which markets operate, the fifteen-minute delay may be excessive and, on the other hand, there may be little benefit to investors in receiving such information after a fifteen-minute delay as opposed to a longer period, such as the end of the day. . . .”). *See also* RMA Letter, at 9 (stating that “[r]equiring reporting on an intraday basis as proposed would be operationally impractical in many respects and would provide little to no incremental value compared to end-of-day reporting”). *See also* Federated Hermes Letter, at 1 (stating that “the requirement to report securities loans within 15 minutes of ‘being effected’ or modified does not

Continued

⁵¹² *See* Proposing Release, 86 FR 69817 (“The utilization rate, which would be calculated by dividing the total number of shares on loan by the total number of shares available for loan, could be used by market participants to evaluate whether the security will be difficult or costly to borrow.”).

⁵¹³ *See* Proposing Release, 86 FR 69817.

⁵¹⁴ Some commenters did express support for the proposed 15-minute reporting requirement. These commenters were primarily smaller retail investors who stressed the benefits of real-time intraday reporting. *See, e.g.*, Letter from Nick Morgan (May 4, 2023) (advocating for transaction-by-transaction reporting and the 15-minute reporting requirement, as well as promoting transparency in securities lending, which will benefit retail investors and strengthen the SEC’s ability to fulfill its mandate while also guarding against economic fragility and potential national security threats). *See also* Letter from Edwin Liew (May 4, 2023) (supporting the 15-minute reporting requirement saying the cost and effort are justified to prevent fraud and prevent

To address these concerns, commenters offered possible modifications for the final rule. Many of the commenters who suggested an alternative approach favored an “end-of-day” reporting requirement.⁵²³ They explained that end-of-day reporting would make more sense and result in more worthwhile information being reported as it takes into account that most securities loan trades are not finalized until end of day.⁵²⁴ One of the commenters explained how most securities loan market participants already use/rely on “end-of-day” data because they view it as the most relevant and reliable measurement of market activity.⁵²⁵ This commenter also stated that, even though intraday data may already be available from service providers, it is still widely seen as indicative in nature and subject to frequent correction.⁵²⁶

Other commenters suggested reporting by end of the next day (*i.e.*, on a T+1 basis similar to what the EU/UK’s Securities Financing Transactions

appear to reflect the reality that the terms of securities loans are fluid and frequently modified throughout a business day”). Thus, the commenter states it is difficult to identify a particular intraday point that a given loan has been “effected.” *See id.* According to the commenter, even if it were possible to determine such an intraday point, 15 minutes is too short of a timeframe to collect and accurately report the required transaction data. Thus, the commenter stated that given the imprecision of defining the exact intraday moment at which a lending transaction is effected, and the frequency with which the transaction’s details are modified, new reporting requirements will be expensive and operationally difficult to implement. *See id.* *See also* IHS Markit Letter, at 2 (opposing the proposed 15-minute reporting requirement and stating “the frequency with which loans would be reported and disseminated would be both an immense hurdle and costly burden for the industry and could also lead to reduced market liquidity and participants withdrawing from lending altogether”).

⁵²³ *See, e.g.*, FIF Letter, at 4 (stating that reporting should be end of day; however, the letter still discusses implementation challenges for broker-dealers and complexity in requiring even end of day reporting).

⁵²⁴ *See* SIFMA Letter 1, at 3; *see also* ASA Letter, at 2–3 (stating an “end-of-day requirement to report securities lending transactions would be appropriate and provide investors with sufficient transparency regarding the terms of these transactions”); ICI Letter 1, at 6 (claiming any information reported within 15 minutes risks being misleading to investors and “noise” as it would not reflect the parties’ final terms); Sharegain Letter, at 4 (stating its support for a longer reporting time period than 15 minutes, “[i]n our view, decreasing the frequency of reporting to twice a day, or end-of-day reporting, would render compliance with the timing requirement much more reasonable”).

⁵²⁵ *See* IHS Markit Letter, at 5.

⁵²⁶ *See* IHS Markit Letter, at 2 (stating that “[i]ntraday data is also difficult to ingest and analyze and therefore accessible to only the largest and most sophisticated participants in the securities lending market”); *see also* ICI Letter 1, at 6 n.22 (stating “it is well understood by market participants . . . that intraday data may be incomplete and is subject to change”).

Regulation (“SFTR”) reporting regime requires).⁵²⁷ For example, one commenter stated it did not believe there is any additional value to investors in providing intraday data, given the nature of pricing for securities lending transactions, the potential for intraday data to confuse investors, and the unnecessary costs and burdens it would pose to market participants.⁵²⁸ Another commenter who favored next day reporting maintained that it was a way to avoid the operational challenges, disproportionate costs, and compliance complexities associated with the proposed 15-minute reporting requirement.⁵²⁹ Another commenter asked the Commission to amend the 15-minute reporting requirement in favor of end-of-day reporting on a next day (T+1) basis and stated that the 15-minute reporting requirement would be impractical, and that a T+1 standard would address transparency, reduce implementation costs, and align with the existing SFTR securities loan reporting regime.⁵³⁰ Another commenter suggested that the proposed rule be modified to allow the lending agent to have until the following business day to make the required report to avoid reporting errors.⁵³¹

⁵²⁷ *See, e.g.*, SIFMA AMG Letter, at 3 (suggesting “end of next day, T+1, or at least no more frequently than by the end of each business day”); *See also* BlackRock Letter, at 2–3 (requesting a T+1 reporting requirement); *see also* IIB Letter, at 2 (suggesting “end-of-day” reporting on a T+1 basis instead of intraday reporting); ABA Letter, at 4 (suggesting “until the following business day”); RMA Letter, at 3 (suggesting “end-of-day reporting on a next day, T+1 basis” instead of a 15-minute reporting requirement because it aligns with the existing SFTR securities loans reporting regime); S3 Partners Letter, at 3 (stating the Commission should revise the proposed rule to require aggregate, not transaction level, reporting on T+1). *See also* EBF Letter, at 2 (stating that it supports IIB’s and SIFMA’s EOD and T+1 reporting comments); Citadel Letter, at 2 (referencing the significant costs associated with transaction-by-transaction reporting and the Commission’s conclusion [albeit in another SEC release] that aggregated and delayed disclosure of short sale positions was preferable to transaction-by-transaction and intraday disclosure). *See also* MFA Letter 3, at 5 (stating “the SEC’s proposal to require the reporting of the material terms of a securities loan within 15 minutes of a loan “being effected” is unworkable in a securities loan context”). According to this commenter, securities loans do not involve an outright purchase or sale but may be on-loan for extended periods, can be returned at any time, and may subsequently be re-lent. The terms of a securities loan are typically negotiated throughout the day and often not finalized until the end of the day or the next day.” *Id.* at 5. *See also* Morningstar Letter, at 2–4 (stating support for loan-level data to be made publicly available by next business day in order to provide investors with a more transparent and complete depiction of a fund’s lending activities).

⁵²⁸ *See* BlackRock Letter, at 2–4.

⁵²⁹ *See* Pirum Letter, at 2.

⁵³⁰ *See* RMA Letter, at 3.

⁵³¹ *See* ABA Letter, at 4.

Commenters also stated that next day or T+1 reporting would provide more appropriate flexibility for developing systems and processes for reporting at substantially lower cost.⁵³² Some commenters expressed support for modifying the reporting requirement to require next business day (*i.e.*, on T+1 basis) but also for an earlier reporting requirement (*i.e.*, end of the same day) provided that the Commission provides clarity regarding the precise time period for such reporting (*e.g.*, the exact point in time that will constitute “end of day” for purposes of the final rule) so that market participants will have the clarity and certainty they will need to comply and report accurately.⁵³³

After reviewing and considering the public comments and recommendations regarding the proposed 15-minute reporting requirement, the Commission is adopting final Rule 10c–1a(c), substantially as proposed, but with targeted modifications to the proposed rule’s reporting period to address commenters’ concerns about the proposed timing requirement being unworkable and overly burdensome by replacing the proposed 15-minute reporting period with end-of-day reporting, as well as bringing the different regulatory regimes in closer alignment with the final rule’s public dissemination requirements. Adopting the final rule with an end-of day reporting requirement will help reduce the concerns raised by the commenters, while still furthering the underlying objectives of the final rule.⁵³⁴

As modified, the final rule’s end-of-day reporting requirement will help prevent an excessive number of incomplete or slightly modified reports that otherwise would occur throughout the day yet without providing any incremental value. Thus, in modifying the final rule to include an end-of-day reporting requirement, rather than requiring frequent intraday reporting, the Commission understands the frequency with which parties to a securities loan may agree to some of the

⁵³² *See, e.g.*, RMA Letter 1, at 11 (stating next-day reporting would provide more appropriate flexibility for developing systems and processes for reporting at substantially lower cost).

⁵³³ *See* ICI Letter 1, at 6 (stating that for anything earlier than T+1, the SEC should provide clarity regarding the timeframe for such reporting to ensure it is feasible).

⁵³⁴ Consistent with the proposed rule, the Commission is not specifying the time that will be the “end of each business day” or what holidays are a “business day” to give an RNSA the discretion to structure its systems and processes as it sees fit and propose rules accordingly, provided they are consistent with the rule as adopted. *See also* Proposing Release, 86 FR 69816 n.104. *See supra* note 72 (regarding an example for times set by an RNSA for other reporting regimes).

basic terms initially, but that some or many of the securities loan terms may not be agreed to (or may be updated throughout the day and, thus, not finalized) until the end of the day.⁵³⁵ Nonetheless, whether or not a loan has been effected is a legal/factual question and a delay in settlement (or if one of the agreed to loan terms is modified the next day) does not impact the initial requirement to report all loans (and modifications) within the required timeframes under the final rule.⁵³⁶

As adopted, paragraph (c) of the final rule requires a covered person (directly, or indirectly using a reporting agent) to provide the Rule 10c-1a information, if applicable, to an RNSA “by the end of the day on which a covered securities loan is effected.”⁵³⁷ By replacing the proposed 15-minute reporting requirement with a more flexible end-of-day (or “EOD”) reporting requirement in final Rule 10c-1a(c), the Commission recognizes that many covered securities loans are not likely to be finalized within that 15-minute time period or until the end of the day. Unlike SFTR in Europe, final Rule 10c-1a’s reporting requirement (*i.e.*, to an RNSA) will not extend until the next day, on a T+1 basis. While final Rule 10c-1a and the SFTR both deal with securities lending, they are two unique and different regulatory regimes, with differences in their underlying objectives and scope of regulations. Final Rule 10c-1a, however, does allow an RNSA until the morning of the next business day (thus on T+1, the same as SFTR) to disseminate the Rule 10c-1a information it receives the night before. This allows an RNSA sufficient time it needs between receipt of the Rule 10c-1a information and its dissemination to the public, which necessitates the Rule

10c-1a information being collected no later than the night before.

2. Timing of Reporting of Loan Modification

Proposed Rule

As discussed above, in Part VII.F.2, paragraph (c) of the proposed rule would have required that certain loan modification data elements be provided to an RNSA within 15 minutes after each loan is modified if the modification results in a change to the Rule 10c-1 information that is already required to be provided to an RNSA under paragraph (b) of the proposed rule (and for an RNSA to make such information available to the public as soon as practicable).⁵³⁸ In issuing the proposed rule, the Commission sought comment specifically regarding the proposed timing requirement in paragraph (c), which would have required specified loan modification data elements to be reported to an RNSA within 15 minutes after a loan is modified.

Final Rule

Most of the comments received by the Commission on the proposed loan modification data elements in paragraph (c) of the proposed rule were focused on the proposed 15-minute loan modification reporting requirement, with many of the commenters suggesting that it be replaced with end-of-day reporting (*i.e.*, similar to the end-of-day timing modification discussed above with respect to the securities loan data elements information originally reported to an RNSA).

In addition to the comments discussed above, in Part VII.F.2, commenters opposing the proposed 15-minute reporting requirement also raised concerns that new trades can be executed for market delivery at any time during the day before the close of settlement at DTC and, as a result, that some market participants will book trades in “batches” or at their discretion, as opposed to individually when agreed.⁵³⁹ Some commenters stated that other reporting regimes do not require intraday reporting, as certain activity reported intraday might

ultimately not result in an executed trade.⁵⁴⁰

Reporting the loan modification data elements for each covered securities loan that is modified is important to ensure that data elements previously reported to an RNSA accurately reflect currently outstanding covered securities loans and to prevent evasion of the rule. However, in response to commenters’ concerns, particularly with respect to operational difficulties associated with the proposed 15-minute loan modification reporting requirement and uncertainties as to the scope of its intended application, the Commission is adopting the loan modification data elements provision in paragraph (d) of the final rule, substantially as proposed, but with a modification as to the timing of the reporting period and some clarifying changes to the proposed rule text.

More specifically, to promote the integrity and consistency of the reporting under the final rule, the Commission has determined to remove the proposed requirement to report loan modification data elements to an RNSA within 15 minutes after each loan is modified and to replace it with the same end-of-day reporting the Commission is requiring for the original loan data elements under paragraph (c) of the final rule.⁵⁴¹ For the same reasons discussed above, in Part VII.F.1, allowing covered persons until the end of the day to report any required loan modification data information to an RNSA is appropriate because it will help to address commenters’ concerns and operational difficulties with frequent intraday reporting while still furthering the transparency objectives of the final rule.

As modified, the final rule requires the specified loan modification data elements to be provided by the covered person (directly or indirectly using a reporting agent) to an RNSA, by the end of the day on which a covered securities loan is modified.⁵⁴² By replacing the proposed 15-minute reporting requirement with a more flexible end-of-day reporting requirement in final Rule 10c-1a(d), the timing modification should help reduce the concerns raised by commenters, that is, by allowing covered persons and reporting agents

⁵³⁵ See RMA Letter, at 10 (expressing the concern that, “data reported during the course of the day would fluctuate substantially, would be incomplete in many respects and would likely include meaningful levels of exception reporting, outcomes that could be mitigated by giving borrowers and lenders the ability to conduct reconciliations at the end of the day prior to reporting”). According to this commenter, most market participants would prefer (trust) verified data with a time delay, which the commenter believed would likely be more accurate than real-time data. See *id.*

⁵³⁶ Under final Rule 10c-1a, in those instances where a covered securities loan is not settled or finalized until the next day, *i.e.*, T+1, a covered person will still be required to report the covered securities loan by the end of the day on which such covered securities loan is effected by the parties. It will not need to be reported again when it does settle the next day, on T+1—unless the reported covered securities loan is modified the next day, on T+1, when it does settle. See final Rules 10c-1a(c) and (d).

⁵³⁷ Final Rule 10c-1a(c). See also *infra* note 541 and accompanying text.

⁵³⁸ See proposed Rule 10c-1(c).

⁵³⁹ See, e.g., Pirum Letter, at 2 (explaining the batch process and how the majority of the data are processed and received in batches and, thus, end-of-day reporting, rather than the proposed 15-minute reporting requirement, will thereby allow sufficient time for necessary control processes to take place to ensure the accuracy of data submissions).

⁵⁴⁰ See, e.g., SIFMA Letter 1, at 14; SIFMA Letter 2, at 5 (supporting concerns raised in the SIFMA Letter 1, at 14); ICI Letter 1, at 6; RMA Letter, at 9; MFA Letter 1, at 9; Fidelity Letter, at 3; IIB Letter, at 6–7; IHS Markit Letter, at 10.

⁵⁴¹ See final Rules 10c-1a(c) through (e) (as modified, and for consistency, all three data elements paragraphs require end-of-day reporting, rather than the proposed 15-minute reporting requirement).

⁵⁴² See final Rule 10c-1a(d).

additional time (until the end of each day, rather than just within 15 minutes), to report any required loan modification information to an RNSA and also to help reduce the overall implementation cost for market participants, and allow such participants to better manage the flow of data in line with the existing internal processes for reporting.⁵⁴³

3. Timing of Reporting of Confidential Data Elements

Proposed Rule

As discussed above, in Part VII.F.3, the Commission also proposed that certain confidential data elements would be provided to, and retained by an RNSA,⁵⁴⁴ but not made publicly available by an RNSA.⁵⁴⁵ Such confidential data was intended to provide regulators with specific information about the loan (such as the identity of the parties to the loan) that would be kept confidential due to concerns about potential misuse of such information. The Commission proposed that such information be reported to an RNSA within 15 minutes after the loan is effected.

Final Rule

The Commission is modifying the proposed timing requirement for reporting the confidential data elements, as adopted in paragraph (e) of the final rule, similar to the timing revisions the Commission made with respect to the proposed loan and loan modification data elements adopted in paragraphs (c) and (d) of the final rule (*i.e.*, by replacing the proposed 15-minute reporting requirement with the similar end-of-day reporting period). As modified, and otherwise consistent with the rule as proposed, paragraph (e) of the final rule will continue to require that any confidential data elements be reported to an RNSA;⁵⁴⁶ however, an RNSA will be required to keep such information confidential, “in accordance with the provisions of

paragraph (h) of this section and applicable law.”⁵⁴⁷

H. Definition of Registered National Securities Association—10c–1a(j)(5)

Proposed Rule

The Commission proposed that any person that loans a security on behalf of itself or another person shall provide to an RNSA certain specified information.⁵⁴⁸ However, the Commission did not include a definition of the term “RNSA.” The Proposing Release stated that the only existing RNSA has experience establishing and maintaining systems that are designed to capture transaction reporting, similar to the requirements of final Rule 10c–1a.⁵⁴⁹

Final Rule

The Commission received comments stating that FINRA, as the only existing RNSA, is best positioned for such a role.⁵⁵⁰ To provide additional clarity regarding the regulatory body that Rule 10c–1a information must be reported to, the final rule defines the term “RNSA” to mean “an association of brokers and dealers that is registered as a national securities association pursuant to 15 U.S.C. 78o–3 (‘section 15A’) of the Exchange Act.”⁵⁵¹ This definition applies to any association of brokers and dealers that is registered as a national securities association pursuant to section 15A of the Exchange Act now or in the future.⁵⁵²

I. RNSA Rules To Administer the Collection of Information—Rule 10c–1a(f)

Proposed Rule

The Commission proposed that “[t]he RNSA shall implement rules regarding the format and manner to administer the collection of information in paragraphs

(b) through (d) of [the proposed rule] and distribute such information in accordance with the rules approved by the Commission pursuant of section 19(b) of the Exchange Act and Rule 19b–4 thereunder.”⁵⁵³ In the Proposing Release the Commission stated its preliminary belief that permitting an RNSA to implement rules regarding the administration of the collection of securities lending transactions would enable an RNSA to maintain and adapt potential technological specifications and any changes that might occur in the future.⁵⁵⁴ The Commission also affirmed that it would retain oversight of an RNSA’s adoption of rules to administer the collection of information under proposed Rule 10c–1.⁵⁵⁵

Final Rule

The Commission asked in the Proposing Release whether Rule 10c–1 should require that lenders provide material information to an entity other than an RNSA.⁵⁵⁶ One commenter stated that FINRA, the only existing RNSA, is best positioned to serve in such a role due to its expertise and experience in administering trade reporting rules.⁵⁵⁷ Other commenters also supported the role of RNSAs in collecting and distributing information under the proposed rule,⁵⁵⁸ with one specifically stating that the format and manner through which information will be provided to an RNSA should be defined by an RNSA and should not be specified in proposed Rule 10c–1.⁵⁵⁹ The Commission agrees with the commenters that an RNSA is well positioned to define, consistent with section 19(b) and Rule 19b–4 of the Exchange Act as well as an RNSA’s own internal business requirements and systems designs, the format and manner in which it collects Rule 10c–1a information.

Alternatively, another commenter recommended that the Commission should eventually transition the collection and dissemination of the data collected under proposed Rule 10c–1 to an internal process at the Commission to enhance enforcement of the proposed rule and allow the Commission to share

⁵⁴³ See, e.g., Proposing Release, 86 FR 69815 n.96 (providing an example of a modification that would not trigger as the requirement in paragraph (c) of the proposed rule (*i.e.*, when a borrower posts additional collateral in response to an increase in value of the loaned securities). Information about this change would not have needed to be provided under proposed paragraph (c) because, while proposed paragraph (b)(10) requires the Lender to provide the percentage of collateral to value of loaned securities required to secure such loan, it did not require information about the value of collateral posted in dollar terms. See also *supra* note 413 (discussing an example of a non-qualifying modification).

⁵⁴⁴ See proposed Rule 10c–1(c).

⁵⁴⁵ See proposed Rule 10c–1(g).

⁵⁴⁶ See final Rules 10c–1a(e)(1) through (e)(3).

⁵⁴⁷ See final Rule 10c–1a(g)(4). Similar to the other data element provisions under the final rule, modifying paragraph (e)’s reporting time period in this manner will not only help to ensure market participants’ compliance with final Rule 10c–1a’s confidential transaction data requirements but will respond to many of the concerns raised by commenters regarding a more frequent and burdensome intraday timeframe, as was originally proposed.

⁵⁴⁸ See proposed Rule 10c–1a(1).

⁵⁴⁹ See Proposing Release, 86 FR 69808.

⁵⁵⁰ See, e.g., OCC Letter, at 12 (stating that “FINRA is currently best positioned to serve in this role given FINRA’s experience and expertise to date in administering other trade reporting systems”). See also HMA Letter, at 7; Nasdaq Letter, at 3–4; IHS Markit Letter, at 1; FINRA Letter, at 2; AFREF Letter 1, at 4 (stating that FINRA “is the only RNSA that exists now, and the Commission should rely on FINRA to aggregate and disseminate the additional data on the securities lending market”).

⁵⁵¹ See final Rule 10c–1a(j)(5).

⁵⁵² See 15 U.S.C. 78o–3.

⁵⁵³ See proposed Rule 10c–1(f).

⁵⁵⁴ See Proposing Release, 86 FR 69819.

⁵⁵⁵ 15 U.S.C. 78s(b).

⁵⁵⁶ See Proposing Release, 86 FR 69809 (Question 13).

⁵⁵⁷ See OCC Letter, at 12 (stating that it “believes that FINRA is currently best positioned to serve in this role given FINRA’s experience and expertise to date in administering other trade reporting systems”).

⁵⁵⁸ See HMA Letter, at 7. See also Nasdaq Letter, at 3–4.

⁵⁵⁹ See IHS Markit Letter, at 11.

relevant data.⁵⁶⁰ However, in addition to providing securities lending information to the public, the final rule is intended to provide additional tools to RNSAs to enhance RNSAs' surveillance over the securities markets. An RNSA is appropriately suited for collecting and analyzing such data for such surveillance purposes.

Some commenters expressed concerns or provided recommendations for an RNSA's administration of information collected under the final rule. One commenter stated the importance of RNSAs' compliance with section 19(b) and Rule 19b-4 of the Exchange Act when implementing RNSA rules required by final Rule 10c-1a.⁵⁶¹ Consistent with the proposed rule,⁵⁶² any proposed changes to an RNSA's rules required by final Rule 10c-1a, including its Rule 10c-1a information collection and dissemination practices, will also be subject to notice, public comment, and Commission review pursuant to section 19(b) and Rule 19b-4 prior to implementation. This requirement, including the notice and opportunity for public comment, will help the Commission ensure that the direct reporting to an RNSA by covered persons is logistically feasible, prior to the effectiveness and implementation of such RNSA rule, and that its methodology helps ensure the accuracy and quality of the reported data.

Another commenter expressed concern that the proposed rule "would provide no mechanism for quality assurance."⁵⁶³ An RNSA could choose to include mechanisms for quality assurance in its rules to implement the system under the final rule. Further, all RNSA rules implementing the system under the final rule will be subject to notice, public comment, and Commission review under section 19(b) and Rule 19b-4.

Another commenter stated that the Commission "should ensure that direct reporting to the RNSA is logistically feasible for entities that are not broker-dealers."⁵⁶⁴ The final rule permits such entities to enter into agreements with reporting agents that are brokers, dealers, or registered clearing agencies to fulfill their reporting obligations on their behalf, should they determine that

direct reporting is not the most appropriate choice for them.⁵⁶⁵

One commenter recommended that the collection, maintenance, and publication of securities lending data, which an RNSA was required to perform under the proposed rule, be subject to a competitive bidding process to select a technology vendor or vendors to provide such services.⁵⁶⁶ However, the oversight that the Commission maintains over RNSAs, including oversight of their rules to administer the collection of Rule 10c-1a information pursuant to section 19(b) and Rule 19b-4, would not apply to the more general population of "technology vendors" that the commenter proposes should participate in a competitive bidding process to collect, maintain, and distribute Rule 10c-1a information.⁵⁶⁷ The commenter's proposed approach would not be appropriate in the absence of such oversight. The Commission agrees with one commenter's statement that the existing RNSA is well positioned to serve in this role under final Rule 10c-1a given its expertise in administering other trade reporting systems.⁵⁶⁸

Having considered commenters' submissions, for the foregoing reasons, the Commission is adopting the requirement that an RNSA shall implement rules regarding the format and manner to administer the collection and dissemination of certain information, substantially as proposed. The final rule includes minor changes to reflect that the relevant Rule 10c-1a information paragraphs have been renumbered to align with the format of the final rule,⁵⁶⁹ to provide citations to the statutory provision and regulation that such rules must be promulgated pursuant to, the term "distribute such information" has been modified to "make publicly available such information" to more accurately reflect an RNSA's responsibilities for the publication of data under final Rule 10c-1a(g), and the term "approved by the Commission" has been modified to "promulgated" to more accurately reflect the process by which RNSA rules are implemented pursuant to section 19(b) and Rule 19b-4 of the Exchange Act.

J. RNSA Publication of Data—10c-1a(g) Proposed Rule

The proposed rule would have required an RNSA to make available to the public the information required by proposed paragraph (b), including the legal name of the security issuer, and the LEI of the issuer, if the issuer has an active LEI,⁵⁷⁰ and the ticker symbol, ISIN, CUSIP, or FIGI of the security, if assigned, or other identifier.⁵⁷¹ In addition, modifications that resulted in a change to the data elements required to be provided to an RNSA under paragraph (b) of the proposed rule would also have been made public by an RNSA.⁵⁷² An RNSA would have also provided identifying information for each security for which aggregate information would be made public.⁵⁷³ Paragraph (e)(3) of the proposed rule further required that an RNSA keep identifying information about lending agents, reporting agents, and other persons using reporting agents confidential, subject to applicable law.⁵⁷⁴ In addition, the confidential data elements in proposed Rules 10c-1(d)(1) through (3) would be kept confidential so as to not identify market participants or reveal information about the internal operations of market participants.⁵⁷⁵ The proposed rule also required an RNSA to assign a unique transaction identifier to each loan.⁵⁷⁶

Final Rule

The Commission received many comments that expressed support for increasing transparency and price discovery in the securities lending market by increasing the amount and availability of data to the public.⁵⁷⁷ Commenters were generally supportive of the requirement that an RNSA be responsible for making reportable data publicly available.⁵⁷⁸

The proposed rule combined reporting requirements with RNSA

⁵⁷⁰ See proposed Rule 10c-1(b)(1).

⁵⁷¹ See proposed Rule 10c-1(b)(2).

⁵⁷² See proposed Rule 10c-1(c).

⁵⁷³ See proposed Rule 10c-1(g).

⁵⁶⁷ See S3 Partners Letter, at 12-13.

⁵⁶⁸ See OCC Letter, at 12.

⁵⁶⁹ See final Rule 10c-1a(g). References to the relevant collected information in paragraphs (b) through (e) of the proposed rule have been amended to reference paragraphs (c) through (e) of the final rule.

publication requirements, which resulted in commenters addressing these respective requirements in conjunction with one another.⁵⁷⁹ The Commission did not intend to conflate the requirements. The final rule separates an RNSA's publication responsibilities from a covered person's reporting requirements to improve the structure of the final rule. Therefore, final Rule 10c-1a is modified to separate the requirements of an RNSA from the reporting requirements applicable to covered persons and reporting agents. Final Rule 10c-1a now places an RNSA's publication of data elements into new paragraph (g).

In response to the comments received that the disclosure of reported information by an RNSA on a transaction-by-transaction basis could increase the risk of revealing short sale strategies,⁵⁸⁰ final Rule 10c-1a bifurcates paragraph (g) requirements such that certain data elements will be made publicly available on a transaction-by-transaction basis and aggregate transaction activity and distribution of loan rates) will also be made publicly available in an aggregated format for each reportable security. With respect to aggregated data, the final rule includes a new requirement for an RNSA to make "information pertaining to the aggregate transaction activity and distribution of loan rates for each reportable security and the security identifier(s) under paragraphs (c)(1) or (2) of the final rule for which an RNSA determines is appropriate to identify" publicly available "as soon as practicable, and not later than the morning of the business day after the covered securities loan is effected or modified."⁵⁸¹ The term "aggregate transaction activity," as used in the final rule, refers to information pertaining to the absolute value of transactions such that net position changes should not be discernable in the data, and is intended to help ensure that only aggregate information about net positions changes, rather than individualized information, is provided to the public. The addition of the term "aggregate transaction activity" responds to commenters' concerns about the potential exposure of proprietary information, while still providing volume transparency to market participants. Providing information

about the distribution of loan rates⁵⁸² for each security recognizes that the cost-to-borrow for loans of securities is influenced by a number of factors (e.g., counterparty-creditworthiness) and, thus, information about loan rates on a transaction-by-transaction basis may not facilitate a perfect comparison of such rates between loans of the same security. Consequently, knowing the distribution of loan rates for a given security can give market participants information to help market participants compare the pricing of their covered securities loan against the pricing of other covered securities loans. This can facilitate conversations between beneficial owners and their lending agents or end borrowers with their brokers or dealers regarding the terms of their loan.

Additionally, the final rule delays an RNSA's publication of loan amount, on a transaction-by-transaction basis in paragraph (c)(6), to the twentieth business day after the covered securities loan is effected along with the loan and security identifying information specified in paragraphs (g)(1)(i)(A) and (C) of this section.⁵⁸³ The final rule also delays an RNSA's publication of a modification to loan amount, on a transaction-by-transaction basis, in paragraph (c)(6), to the twentieth business day after the covered securities loan is modified with the loan and security identifying information specified in paragraphs (g)(1)(i)(A) and (C).⁵⁸⁴

For purposes of compliance with the final rule, the countdown to the "twentieth business day" starts the day after the covered securities loan is effected. For example, if a covered securities loan were effected at 4:00 p.m. on a Wednesday, and the applicable Rule 10c-1a information is received by an RNSA by the end of that day, that Thursday after the Wednesday on which the covered securities loan is effected will start the 20-business day period, assuming that Thursday is not a holiday.

The final rule contains requirements for an RNSA to make data elements other than loan amount publicly available as soon as practicable, and not later than the morning of the business

day after the covered securities loan is effected.⁵⁸⁵ Similarly, the final rule requires an RNSA to make loan modifications, excluding modifications to loan amount, publicly available, as soon as practicable, and not later than the morning of the business day after the covered securities loan is modified.⁵⁸⁶ The final rule also requires that an RNSA make the data elements in paragraph (c) of the final rule, other than loan amount, publicly available as soon as practicable, and not later than the morning of the business day after the covered securities loan is effected, if a securities loan is modified when such covered securities loan is a pre-existing covered securities loan (*i.e.*, a covered securities loan for which reporting under paragraph (a) was not required on the date the loan was agreed to or last modified).⁵⁸⁷ This requirement is designed to provide transparency for covered securities loans that have not been previously reported to an RNSA prior to having a data element of paragraph (c) modified. As discussed above, in Part VII.F.2, the final rule also requires that an RNSA make publicly available the data elements in paragraph (c) of the final rule for pre-existing covered securities loans. The final rule also contains a requirement for an RNSA to keep confidential data elements confidential, in accordance with subparagraph (h) and consistent with applicable law.⁵⁸⁸ Final Rule 10c-1a also contains updated terminology from the proposed Rule 10c-1, including that the "unique transaction identifier" is updated to "unique identifier;" and references to "loan" are updated to "covered securities loan."⁵⁸⁹ Revisions to final Rule 10c-1a(g) are updated with the relevant paragraphs renumbered to align with the format of the final rule.⁵⁹⁰

Final Rule 10c-1a requires an RNSA to assign each covered securities loan a unique identifier in paragraphs (g)(1)(i)(A) and (g)(3). The final rule makes a revision to terminology by replacing the term "unique transaction identifier" assigned by an RNSA to the original loan, as used in the proposed rule, with "unique identifier" assigned by an RNSA to the original covered securities loan. The removal of "transaction" is to avoid confusion with the defined term "covered securities loan," which is the accurate description

⁵⁷⁹ See, e.g., proposed Rule 10c-1(b).

⁵⁸⁰ See, e.g., *supra* note 399 and accompanying text.

⁵⁸¹ See final Rule 10c-1a(g)(5).

⁵⁸² "Loan rate" refers to aggregate fee and rebate information provided to an RNSA in final Rule 10c-1a(c)(8) and final Rule 10c-1a(c)(9). The loan rate for a security is reported differently depending on whether the securities loan is cash or non-cash collateralized. For cash-collateralized loans, the "loan rate" is indicated by the rebate rate (as reflected in final Rule 10c-1a(c)(8)); for non-cash-collateralized loans, the "loan rate" is the lending fee (as reported in final Rule 10c-1a(c)(9)).

⁵⁸³ See final Rule 10c-1a(g)(2).

⁵⁸⁴ See final Rule 10c-1a(g)(3).

⁵⁸⁵ See final Rule 10c-1a(g)(1).

⁵⁸⁶ See final Rule 10c-1a(g)(3).

⁵⁸⁸ See final Rule 10c-1a(g)(4).

⁵⁸⁹ See final Rule 10c-1a(g).

⁵⁹⁰ See final Rules 10c-1a(g)(3)(i) and (ii).

of what the “unique identifier” represents.

While the final rule continues to require an RNSA to “assign each covered securities loan a unique identifier,” a general theme received from commenters was about the operational efficiency of allowing market participants to create and submit their own unique identifiers.⁵⁹¹ In response to the Proposing Release, one commenter stated that “beneficial owners or those reporting on their behalf should have flexibility to generate their own Transaction Identifiers provided they meet minimum standards for integrity and identification” and that “this Transaction Identifier [be used] in connection with any loan modification reporting in connection with the relevant loan.”⁵⁹² Another commenter recommended that “allowance is made for the UTI to be provided to the RNSA by the reporting party, with an on-receipt issuance model only available should firms have no existing UTI for a reportable transaction.”⁵⁹³ Another commenter agreed that firms should be allowed to internally assign UTIs and report them to an RNSA, but alternatively suggested that if the UTI is required to be assigned by an RNSA then an RNSA should return this internal identifier to the reporting firm along with an RNSA-assigned UTI in order to link a modification to the original reported loan.⁵⁹⁴ This commenter also recommended that, under either approach, UTIs should be different in the U.S. and other jurisdictions, as applicable.⁵⁹⁵ Another commenter stated that under the final rule, if there was a loan that was reported to both an RNSA and the SFTR, the loan would have an identifier for each system and prevent global aggregation.⁵⁹⁶

The Commission understands that for many reporting entities, obtaining a unique identifier from an RNSA on a post-trade basis and then tagging it to the trade for accurate reporting may add complication and expense and introduces operational risk for post-trade errors in aligning trades with transaction identifiers (particularly if a trade has been modified during the course of intraday trade reporting). According to one commenter, “the objective of a Transaction Identifier is to

uniquely identify a particular transaction; so long as that objective is satisfied, the SEC should be neutral as to the manner in which the Transaction Identifier is produced.”⁵⁹⁷ Doing so, the commenter suggests, “would [provide] the flexibility to an RNSA to allow reporting parties to provide their own Transaction Identifiers [which] would likely materially reduce costs for any such parties.”⁵⁹⁸ According to the commenter, this approach has been successfully deployed in Europe, under the SFTR, and the U.S. in connection with security-based swap reporting rules.⁵⁹⁹ Accordingly, this commenter urged the Commission to permit the reporting agent to generate the transaction identifiers prior to reporting to an RNSA, with an RNSA available to provide Transaction Identifiers as a back-up for those reporting parties who are unable, for whatever reason, to generate their own transaction identifiers.⁶⁰⁰ Another commenter stated that while the data elements required to be reported are sufficient to allow for an RNSA to identify loans and to create a unique transaction identifier, the Commission should specify how such identifier will be shared with the reporter.⁶⁰¹

Having a unique identifier assigned to each covered securities loan is necessary for an RNSA to easily track the loan and facilitate the identification and reporting of any subsequent modifications to a particular covered securities loan. The Commission agrees with the comment that the objective is to have a unique identifier for tracking and that the Commission should be neutral as to the manner in which the unique identifier is produced,⁶⁰² and that it is appropriate to allow administrative details of the process to be left to the discretion of an RNSA, rather than dictated by the Commission.⁶⁰³ It is appropriate to require an RNSA to assign a unique identifier to the loan, even if such loan already has an identifier that is reported to the SFTR, for consistency with an RNSA’s rules and systems. Further, the final rule requires an RNSA to create a system capable of generating unique identifiers, but does not preclude market participants from creating their

own unique identifiers when submitting information to an RNSA.

The Commission agrees that FINRA, as the sole existing RNSA, has the experience and controls to implement an appropriate system for market participants, including, if appropriate, how an identifier will be shared with a reporter. Structuring the final rule to provide an RNSA with flexibility to accept unique identifiers and/or use an RNSA assigned unique identifier to publish data is operationally practical. Accordingly, final Rule 10c–1a(g) maintains that an RNSA shall assign a unique identifier to the covered securities loan and make publicly available as soon as practicable, and not later than the morning of the business day after the covered securities loan is effected.⁶⁰⁴

K. RNSA Data Retention, Availability, Fees, and Security

1. Data Retention—Rule 10c–1a(h)(1) Proposed Rule

Under the proposed rule the Commission required that RNSAs retain the information collected pursuant to paragraphs (b) through (e) of the proposed rule in a convenient and usable standard electronic data format that is machine readable and text searchable without any manual intervention for a period of five years.⁶⁰⁵ In the Proposing Release, the Commission stated that requiring an RNSA to retain records for five years was consistent with other retention obligations of records that Exchange Act rules impose on an RNSA.⁶⁰⁶ As examples, the Commission identified Rule 17a–1⁶⁰⁷ and 17 CFR 242.613(e)(8) (“Rule 613(e)(8)”) of Regulation NMS, both of which require RNSAs to keep documents for a period of not less than five years.

Final Rule

The Commission received limited comments concerning this element of the proposed rule. One commenter stated that a retention period of six years plus the current year would simplify GDPR and UK tax compliance.⁶⁰⁸ The Commission recognizes the importance of compliance with other regulatory regimes; however, requiring RNSAs to retain records for not less than five years is consistent with other record retention obligations that Exchange Act rules

⁵⁹¹ See, e.g., State Street Letter, at 6; ABA Letter, at 4.

⁵⁹² See RMA Letter, at 1, 19.

⁵⁹³ Pirum Letter, at 4.

⁵⁹⁴ See FIF Letter, at 8–9.

⁵⁹⁵ See FIF Letter, at 9.

⁶⁰⁰ See RMA Letter, at 19.

⁶⁰¹ See IHS Markit Letter, at 8.

⁶⁰² See RMA Letter, at 19.

⁶⁰³ See OCC Letter, at 12 (stating that “FINRA is currently best positioned to serve in this role given [its] experience and expertise to date in administering other trade reporting systems.”).

⁶⁰⁴ See final Rule 10c–1a(g).

⁶⁰⁵ See proposed Rule 10c–1(g)(1).

⁶⁰⁶ See Proposing Release, 86 FR 69819.

⁶⁰⁷ See 17 CFR 240.17a–1.

⁶⁰⁸ See Letter from Andrew Robinson (Jan. 7, 2022) (“Robinson Letter”), at 12.

impose on RNSAs.⁶⁰⁹ Including a retention period that is consistent with other rules applicable to RNSAs could reduce the burden for an RSA to comply with the retention requirements in proposed Rule 10c–1 because RNSAs will have developed experience and controls around administering similar record retention programs.⁶¹⁰ Therefore, the Commission is adopting RSA data retention requirements as proposed (*i.e.*, in a convenient and usable standard electronic data format that is machine readable and text searchable without any manual intervention for a period of five years), with the relevant paragraphs renumbered to align with the format of the final rule.⁶¹¹

2. Data Availability to the Public—Rule 10c–1a(h)(3)

Proposed Rule

The Commission proposed that RNSAs make certain data⁶¹² available to the public in a convenient and usable standard electronic data format on its website or similar means of electronic distribution, without charge and without use restrictions, for at least a five-year period.⁶¹³ The Commission stated its preliminary belief that requiring an RSA to provide certain information to the public would further the direction by Congress in section 984(b) of the Dodd-Frank Act for the Commission to promulgate rules that are designed to increase the transparency of information to brokers-dealers and investors, with respect to the loan or borrowing of securities.⁶¹⁴ The Commission acknowledged that establishing and maintaining a system to provide public access to Rule 10c–1 information is not without cost, and expressed the preliminary belief that such costs should be borne by an RSA in the first instance and be permitted to be recouped by an RSA from market

participants who report securities lending transactions to an RSA.⁶¹⁵ The Commission also stated its belief that any restrictions on how the publicly available Rule 10c–1 information is used could impede the utility of such information and limit the ability of investors, commercial vendors, and other third parties, such as academics, from developing uses and analyses of the information.⁶¹⁶

Final Rule

It is appropriate to remove the phrase “without charge” from an RSA’s availability of information requirements in final Rule 10c–1a(h)(3). Some commenters supported the Commission making certain securities lending information available without charge, as proposed.⁶¹⁷ One commenter stated generally that it would be extremely helpful to have freely available data.⁶¹⁸ The Commission agrees that having access to securities lending data without charge will benefit market participants. As discussed below, in Part VII.K.3, the Commission received comment recommending that RNSAs be permitted to charge fees to entities other than lending agents and beneficial owners.⁶¹⁹ After considering commenter input, the Commission is removing the “without charge” requirement from the final rule to provide RNSAs with greater flexibility to structure reasonable fees. As discussed below, in Part VII.K.3, and as proposed,⁶²⁰ any such fees will have to be filed with the Commission pursuant to section 19(b) of the Exchange Act and Rule 19b–4, and would be published for notice and public comment. Additionally, consistent with the Proposing Release,⁶²¹ and the provisions that govern RNSAs under the Exchange Act,⁶²² the final rule requires that RNSAs may only establish and collect fees that are reasonable.⁶²³ Furthermore, as proposed, the final rule prohibits use restrictions on the publicly available information.⁶²⁴ Any restrictions on how the publicly available Rule 10c–1a information is used could impede its utility and limit the ability of investors, commercial vendors, and other third

parties, such as academics, from developing uses and analyses of the information.⁶²⁵

The Proposing Release included a request for comment asking if a period of five years is the appropriate length of time for an RSA to make information available to the public.⁶²⁶ One commenter responded, stating that, “transparency is a good thing, and lessons can be learned from history, ‘in perpetuity’ would be the ideal period of time.”⁶²⁷ The Commission acknowledges the value of historical studies of securities markets, and the final rule does not preclude an RSA from making certain reported data public in perpetuity. However, requiring that RNSAs make certain information publicly available indefinitely could prove unduly burdensome on RNSAs when compared with the utility of old and potentially less informative data. Furthermore, making information available in a convenient and usable standard electronic data format indefinitely would necessitate that RNSAs retain the data indefinitely, which would be inconsistent with the final rule’s data retention requirements⁶²⁸ and other retention obligations of records that Exchange Act rules impose on RNSAs.⁶²⁹ Five years is the appropriate length of time for an RSA to be required to make information available to the public, because such a time period will provide broker-dealers and investors with an opportunity to identify trends occurring in the market and in individual securities based on changes to the material terms of securities lending transactions.

For the foregoing reasons the Commission is adopting the collected information availability requirements for RNSAs, with respect to making certain collected information available to the public, substantially as proposed, with the phrase “without charge” removed and the relevant paragraphs renumbered to align with the format of the final rule.⁶³⁰

⁶⁰⁹ See Proposing Release, 86 FR 69819. Rule 17a–1 requires RNSAs to keep documents for a period of not less than five years. Similarly, Rule 613(e)(8) of Regulation NMS, on which the retention period for proposed Rule 10c–1 is modeled, requires the central repository to retain information in a convenient and usable standard electronic data format that is directly available and searchable electronically without any manual intervention for a period of not less than five years.

⁶¹⁰ See Proposing Release, 86 FR 69819.

⁶¹¹ See 17 CFR 240.10c–1a(h)(1) (“final Rule 10c–1a(h)(1)”). References to the relevant collected information in paragraphs (b) through (e) of the proposed rule have been updated to accurately reflect their place in paragraphs (c) through (f) of the final rule.

⁶¹² See proposed Rule 10c–1(g)(3) (specifically including the information collected under paragraphs (b) and (c) of the proposed rule and the aggregate of the information provided pursuant to paragraph (e) of the proposed rule).

⁶¹³ See proposed Rule 10c–1(g)(3).

⁶¹⁴ See Proposing Release, 86 FR 69819.

⁶¹⁵ See Proposing Release, 86 FR 69819–20.

⁶¹⁶ See Proposing Release, 86 FR 69820.

⁶¹⁷ See James J. Angel Letter, at 3; Morningstar Letter, at 4 (stating that an “RSA’s free and unrestricted disclosures to the public increase transparency”).

⁶¹⁸ See James J. Angel Letter, at 2.

⁶¹⁹ See ABA Letter, at 2–3.

⁶²⁰ See Proposing Release, 86 FR 69820.

⁶²¹ See proposed Rule 10c–1(h).

⁶²² See 15 U.S.C. 78o(b) (section 15A(b) of the Exchange Act).

⁶²³ See final Rule 10c–1a(i).

⁶²⁴ See final Rule 10c–1a(h)(3).

⁶²⁵ The requirement to provide the Rule 10c–1a information in the same manner such information is maintained pursuant to final Rule 10c–1a(h)(1) and without use restrictions is not intended to preclude an RSA from creating alternative means to provide information to the public or subscribers. For example, an RSA might choose to file with the Commission proposed rules to establish data feeds of the Rule 10c–1a information that vendors might subscribe to (including fee-based subscriptions) and repackage for onward distribution.

⁶²⁶ See Proposing Release, 86 FR 69820 (Question 58).

⁶²⁷ See Robinson Letter, at 12.

⁶²⁸ See final Rule 10c–1a(h)(1).

⁶²⁹ See *supra* note 609.

⁶³⁰ See final Rule 10c–1a(h)(3). References to the relevant collected information in paragraphs (b) and

3. RNSA Fees—Rule 10c–1a(i)

Proposed Rule

The Commission proposed that RNSAs may establish and collect reasonable fees, pursuant to rules that are effective pursuant to section 19(b) of the Exchange Act and Rule 19b–4 thereunder, from each person who provides any data set forth in paragraphs (b) through (e) of this section directly to an RNSA.⁶³¹ Under the Exchange Act, RNSAs are allowed to adopt rules that impose the equitable allocation of reasonable fees among members and issuers, and other persons that use an RNSA facility or system.⁶³² In the Proposing Release the Commission stated its preliminary belief that it would be appropriate to establish and collect reasonable fees from each person who directly provides the information set forth in the rule to an RNSA.

Final Rule

One commenter supported an RNSA acting in accordance with section 19(b) of the Exchange Act and Rule 19b–4 thereunder when implementing rules regarding fees.⁶³³ Another commenter recommended that reporting costs should not only be borne by persons who provide data directly to an RNSA and recommended that “costs incurred by FINRA . . . be shared among all those that benefit from securities lending activity, not solely on lending agents and beneficial owner clients.”⁶³⁴ Similarly, another commenter recommended “that the costs incurred by the RNSA to establish and operate the reporting system for securities

lending data should be equitably shared by both borrowers and lenders, along with a tiered fee structure that eliminates costs for General Collateral (“GC”) transactions.”⁶³⁵

The Commission recognizes that additional flexibility may be warranted in how costs incurred by an RNSA are recouped. To provide more flexibility in the establishment and collection of reasonable fees by RNSAs, the final rule has been amended from the proposed rule to remove the requirement that fees only be collected “from each person who provides any data set forth in paragraphs (b) through (e) of this section directly to the RNSA.”⁶³⁶ The final rule provides that an RNSA may “establish and collect reasonable fees, pursuant to rules that are promulgated pursuant to section 19(b) and Rule 19b–4 of the Exchange Act.”⁶³⁷ These changes from the proposed rule will provide RNSAs with greater flexibility to structure reasonable fees, including permitting the charging of fees to entities that use certain value-added services, as discussed above in Part VII.K.2, when accessing the information made publicly available by an RNSA.⁶³⁸

4. Data Security—Rule 10c–1a(h)(4)

Proposed Rule

The Commission proposed a requirement that RNSAs establish, maintain, and enforce reasonably designed written policies and procedures to maintain the security and confidentiality of certain confidential information required by the proposed rule.⁶³⁹ In the Proposing Release the Commission stated its preliminary belief that an RNSA needs to protect Rule 10c–1 information from intentional or inadvertent disclosure to protect investors that provide such information by establishing reasonably designed written policies and procedures because the distribution of such information would identify market participants or could reveal information about the internal operations of market participants, which could be adverse to those providing information to an RNSA.⁶⁴⁰

⁶³⁵ See State Street Letter, at 2.

⁶³⁶ See proposed Rule 10c–1(h).

⁶³⁷ Final Rule 10c–1a(i).

⁶³⁸ See *supra* Part VII.K.2 (discussing the removal of the phrase “without charge” from proposed Rule 10c–1(g)(3) concerning the requirements for RNSAs to make certain information available to the public).

⁶³⁹ See proposed Rule 10c–1(h)(4) (specifically including the information collected pursuant to paragraphs (d) and (e)(3) of the proposed rule).

⁶⁴⁰ See Proposing Release, 86 FR 69820.

Final Rule

For the reasons discussed above, in Part VII.F.3, the Commission is adopting the final rule as proposed and requiring an RNSA to establish, maintain, and enforce written policies and procedures to maintain the confidentiality of the confidential data elements collected under the final rule.⁶⁴¹

L. Data Availability to the Commission and Other Persons—Rule 10c–1a(h)(2)

Proposed Rule

The Commission proposed that RNSAs be required to make certain information, including confidential information, collected pursuant to the proposed rule available to the Commission or other persons as the Commission may designate by order upon a demonstrated regulatory need.⁶⁴²

Final Rule

Two commenters recommended that the final rule require RNSAs to make collected confidential information available to SROs without obtaining an SEC order.⁶⁴³ However, another commenter recommended that access to such information by securities exchanges should require a clear regulatory purpose.⁶⁴⁴ The Commission recognizes that other regulators and SROs may require access to the confidential information reported to RNSAs pursuant to final Rule 10c–1a for regulatory purposes. However, it is appropriate to only provide such information by order of the Commission upon a demonstrated regulatory need.⁶⁴⁵ Imposing this condition on access to reported information should help ensure the security of the reported data elements, while taking into account that other regulators may require access. For the foregoing reasons the Commission is adopting the requirement that RNSAs make collected information available to the

⁶⁴¹ See final Rule 10c–1a(h)(4).

⁶⁴² See proposed Rule 10c–1(g)(2) (specifically including the information collected pursuant to paragraph (a)(2)(iii) and paragraphs (b) through (e) of the proposed rule).

⁶⁴³ See NYSE Letter 2, at 2 (stating that “[t]here may be NYSE inquiries or investigations where securities lending information would be important, and where time could be of the essence”); Nasdaq Letter, at 4.

⁶⁴⁴ See HMA Letter, at 11 (stating that any access by exchanges “must be narrowly tailored to achieve a clear, specific regulatory purpose, and subject to significant oversight by the Commission”).

⁶⁴⁵ See Proposing Release, 86 FR 69852. See also final Rule 10c–1a(h)(2). Restrictions on the availability of reported Rule 10c–1a information to other persons is subject to applicable law, as an RNSA could be compelled to provide information pursuant to a court order or other legal authority (such as a subpoena).

(c) of the proposed rule have been updated to reference paragraphs (c) and (d) of the final rule. The proposed rule’s reference to “the aggregate of the information provided pursuant to paragraph (e) of this section” has been removed from the final rule as discussed above, in Parts VII.F.4 and VII.F.5. Additionally, the word “provide” at the beginning of proposed Rule 10c–1(g)(3) has been replaced by “make” in final Rule 10c–1a(h)(3) for consistency.

⁶³¹ See proposed Rule 10c–1(h).

⁶³² See 15 U.S.C. 78o–3(b)(5) (“The rules of the association provide for the equitable allocation of reasonable dues, fees, and other charges among members and issuers and other persons using any facility or system which the association operates or controls.”).

⁶³³ See Bloomberg L.P. Letter, at 3 (stating that “[t]he rules of an RNSA, including those pertaining to any fees, should thus comport with the requirements of the Exchange Act”). See also HMA Letter, at 7 and 10 (stating that “it will be essential for the Commission to ensure that the RNSA’s . . . fees related to the development and operations of the reporting and dissemination systems contemplated by the Proposal are subject to meaningful scrutiny” and recommending “that any fees are imposed pursuant to filings that are subject to Commission review, and approved only if determined to be consistent with the Exchange Act and Commission Rules”).

⁶³⁴ See ABA Letter, at 3.

Commission, and make it available to other persons as the Commission may designate by order upon a demonstrated regulatory need, with a technical edit.⁶⁴⁶ with the relevant paragraphs renumbered to align with the format of the final rule.⁶⁴⁷

M. Cross-Border Application of Rule 10c-1a

The Commission received a number of comments about the rule's intended cross-border application.⁶⁴⁸ Many of these comments requested that the Commission provide cross-border guidance to help promote legal certainty and competitive equity, and that in doing so the Commission rely on existing definitions for U.S. and non-US

⁶⁴⁶ The Commission is also making a technical edit to specify that its own access to the information collected pursuant to paragraph (b)(1)(iv) and paragraphs (c) through (e) is not limited. Final Rule 10c-1a(h)(2) has been formatted to distinguish the Commission's access from "other persons as the Commission may designate."

⁶⁴⁷ See final Rule 10c-1a(h)(2). References to the relevant collected information in paragraphs (a)(2)(iii) and (b) through (e) of the proposed rule have been updated to reference paragraphs (b)(4) and (c) through (e) of the final rule.

⁶⁴⁸ See, e.g., Letter from Mark A. Steffensen, Senior Executive Vice President and General Counsel for HSBC North American Holdings Inc. and HSBC Bank USA, N.A. (Jan. 24, 2023) ("HSBC Letter 1"), at 1-2 (expressing concern that the cross-border application of the proposed rule is unclear and overbroad, which makes it difficult for firms to assess the scope of the new reporting obligations and challenging to implement internal programs, policies, procedures to ensure compliance with the new reporting regime. Further, an expansive cross-border application could lead to questions regarding the Commission's authority to promulgate the rule, and its commitment to respecting the decisions of peer EU/UK regulators.). See also Linklaters Letter, at 2 (stating that, "because the proposed rule would apply to 'any person,' 'the scope of the proposed rule, particularly outside the U.S., is unclear and potentially overbroad'"). The commenter, however, offered suggestions for clarifying the proposed rule's extraterritorial scope, including recommending that the Commission clarify that the proposed rule "does not apply to non-U.S. persons that do not use any U.S. jurisdictional means in connection with a securities lending transaction or, alternatively, exclude Canadian institutions from the scope of the proposed rule." See *id.* To provide legal certainty as to its cross-border application, the commenter also suggested that the Commission should clarify that, given that it would be promulgated under section 10(c)(1) of the Exchange Act, final Rule 10c-1a would not apply to non-U.S. persons that do not use any U.S. jurisdictional means to effect, accept, or facilitate a securities lending transaction. See *id.* at 2-3. See also ICI Letter 1, at 7-8 (encouraging the Commission to analyze and clarify the cross-border implications of the final rule to ensure that the final rule does not have inappropriate cross-border reach). See also IIB Letter, at 4-5; RMA Letter, at 17-18; Federated Hermes Letter, at 2 (agreeing with ICI's comment regarding the Commission needing to clarify the cross-border ramifications of the final rule); EBF Letter, at 1-2 (stating that the SEC needs to clarify the cross-border reach of the proposed rule by following the same approach as used for foreign broker-dealer registration, with the goal of being able to define the precise territorial scope of the proposed rule).

market participants to avoid new documentation requirements.⁶⁴⁹ Among other things, these commenters requested clarification or specific guidance as to when non-U.S. persons would be subject to the final rule⁶⁵⁰ and clarity as to the circumstances under which a securities loan will be deemed to be within the U.S. market for purposes of applying reporting requirements.⁶⁵¹ Some commenters stated that because the rule would apply broadly to "any person" that loans a security on behalf of itself or another person, that could mean the rule would

⁶⁴⁹ See RMA Letter, at 18.

⁶⁵⁰ One commenter stated that it believed the rule should not apply to non-U.S. persons who do not facilitate, effect, or accept loans in the U.S. That commenter also suggested the Commission consider taking a risk-based approach that advances the goals of section 984 of the Dodd-Frank Act by more precisely targeting the segment of the securities lending market that presents the greatest risks to the U.S. financial system, by excluding certain categories of market participants, such as Canadian Institutions. The commenter did not further explain the parameters of their suggested approach. See Linklaters Letter, at 3. The cross-border scope of the rule should be focused on facilitating, effecting, or accepting loans in the U.S. rather than the alternative approach the commenter suggests that would exclude Canadian Institutions and thereby limit transparency regarding loans of securities that are facilitated, effected, or accepted in the U.S. Another commenter stated that, despite the legislative history of section 10(c) and the Commission's statements in the proposal, "the intent of proposed Rule 10c-1 was to increase transparency of securities lending information with respect to the U.S. markets for the benefit of U.S. brokers, dealers, and investors" but that the reach of the rule to all lenders is broader. See ICI Letter 1, at 7-8. See also SIFMA Letter 1, at 19-20. See MFA Letter 3, at 6 (stating that the Commission should "clarify the cross-border implications of any final securities lending reporting rule it adopts," and also stated that "it would be inappropriate to apply the Proposed Securities Lending Rules to non-U.S. entities such as UCITS, AIFs, or other funds that are subject to reporting under SFTR and not otherwise subject to U.S. regulatory requirements"). See also HSBC Letter 1, at 2 (stating that, "[g]iven that complying with any new reporting regime is likely to be costly and operationally complex regardless of its ultimate scope—especially for large firms with global operations . . . it is essential that the Commission clarify the cross-border application and certain other aspects of each of the proposed rules in line with the Commission's authority to promulgate rules only where necessary and appropriate in the U.S. public interest or for the protection of U.S. investors"). Another commenter urged the Commission to define the jurisdictional scope of the transactions to be reported under the final rule, including which securities must be reported and which parties are required to report. See FIF Letter, at 8.

⁶⁵¹ See, e.g., RMA Letter, at 17 (stating that, "[w]ithout such definition, non-U.S. beneficial owners and agent lenders would be left with substantial legal uncertainty"). According to this commenter, the "reach of the reporting requirements should be limited territorially, setting explicit rules on when transactions involving non-U.S. entities are deemed to be within scope." *Id.* See also IHS Markit Letter, at 3 (requesting clarity regarding whether international broker-dealers lending U.S. securities are within the scope of the proposed rule).

apply to "all lenders"⁶⁵² regardless of whether the lender loans a U.S. security or a non-U.S. security and whether or not the lender was a U.S. person or not.⁶⁵³ Other commenters, in contrast, warned that, because a significant amount (up to 18 percent) of lender transactions in the U.S. market are provided by funds outside of the U.S., the Commission risks not capturing this considerable volume of activity if it does not clarify cross-border scope of the final rule.⁶⁵⁴ Many of these commenters raised questions about the scope of the Commission's cross-border regulatory authority under section 10(c).⁶⁵⁵

Although the Proposing Release did not propose rule text addressing the cross-border aspects of proposed Rule 10c-1 or otherwise discuss the rule's cross-border reach, the Commission is addressing commenters' contentions about the Commission's cross-border authority under section 10(c) and offering general guidance as to the rule's cross-border scope. As an initial matter, the Commission advises that final Rule 10c-1a is intended to reach the full scope of the cross-border authority provided for by section 10(c).⁶⁵⁶

Turning to the cross-border scope of section 10(c), the Commission's understanding of that provision's cross-

⁶⁵² See, e.g., SIFMA AMG Letter, at 3 (urging the Commission to "address extraterritorial issues such as the scope of securities (US or non-US) and lenders (US or non-US) as the present drafting potentially addresses all securities (US and non-US) lent by US lenders and/or all US securities lent by all lenders (US and non-US)"). See also Pirum Letter, at 3 (stating that, as proposed, any person that loans a security on behalf of itself or another person has a reporting requirement yet without the rule specifying whether it is the domicile of the person lending the security, the security itself or a combination of both, which brings a transaction into scope for reporting).

⁶⁵³ See, e.g., ICI Letter 1, at 7-8 (stating that the rule's cross-border reach needs to be clarified because the proposed rule currently applies to "any person" (very broad) and it is unclear whether it could apply to non-U.S. entities). In requesting this clarification, this commenter points out the legislative history of section 10(c) and its focus on U.S. markets and increasing transparency for the benefit of U.S. broker-dealers. See *id.*

⁶⁵⁴ See ISLA Letter, at 2.

⁶⁵⁵ See, e.g., MFA Letter 1, at 12 (suggesting the Commission limit the scope of the proposed rule to U.S. securities and stating that applying the rule to all securities irrespective of the jurisdiction that principally regulates such offerings goes beyond what is intended by section 10(c). According to this commenter, Congress did not intend to capture cross-border lending activities when it added section 10(c) to the Exchange Act, and capturing such activities would not further the transparency goals of the proposed rule but, instead, could inadvertently result in market participants segregating their foreign lending activities so as to limit U.S. assertion of jurisdiction activities).

⁶⁵⁶ Because final Rule 10c-1a is co-extensive with the full cross-border authority of section 10(c), by definition, it cannot exceed the cross-border authority that Congress afforded.

border reach is based on the territorial approach that the Commission has applied when crafting rules to implement other provisions of the Exchange Act.⁶⁵⁷ Consistent with that territorial approach (which is based on Supreme Court precedent, including *Morrison v. National Australia Bank, Ltd.* and its progeny) the Commission examined the relevant statutory provision to determine the domestic conduct that is covered by the provision.⁶⁵⁸ By its terms, section 10(c) requires reporting when, directly or indirectly, a person has “effect[ed], accept[ed], or facilitat[e]” a transaction involving the loan or borrowing of securities. Based on that language, the Commission concludes that the relevant domestic conduct that triggers the Commission’s regulatory authority under section 10(c) is conduct within the U.S. that comprises (in whole or in part) effecting, accepting, or facilitating of a borrowing or lending transaction. Because the Commission intends final Rule 10c–1a to be co-extensive with the regulatory scope of section 10(c), the Commission is of the view that the rule’s reporting requirements will generally be triggered whenever a covered person effects, accepts, or facilitates (in whole or in part) in the U.S. a lending or borrowing transaction.

One significant exclusion proposed by commenters concerned non-U.S. residents. Having considered those comments, such an exclusion would not be appropriate. Section 10(c) is focused on increasing transparency regarding lending and borrowing transactions that are effected, accepted, or facilitated (in whole or in part) within the U.S. Excluding borrowing and lending transactions by non-U.S. persons when those transactions are effected, accepted, or facilitated (in whole or in part) within the U.S. could impact the completeness of the data, providing less transparency and potentially resulting in U.S. market participants receiving misleading information as a result of those omissions. Moreover, the exclusion of non-U.S. persons suggested by the commenters could cause competitive harm to U.S. market

participants as it would allow non-U.S. persons engaging in the same activities as U.S. persons to benefit from the transparency about the U.S. securities lending market provided by final Rule 10c–1a without contributing to that transparency. For these reasons, the Commission declines to adopt such an exclusion.

Commenters suggested several other exclusions from final Rule 10c–1a that the Commission has also decided not to adopt, including that the final rule should apply only to loans of U.S.-exchange traded securities offered by a U.S. lender.⁶⁵⁹ One commenter stated “that market participants—particularly those outside of the United States—might determine to limit or cease trading or interacting with U.S. intermediaries, or leave the U.S. markets altogether” in order to prevent public disclosure of their transactions.⁶⁶⁰ Another commenter stated that capturing such activities would not further the transparency goals of the rule but, instead, could inadvertently result in market participants segregating their foreign lending activities so as to avoid reporting under final Rule 10c–1a.⁶⁶¹ Other commenters suggested that final Rule 10c–1a should apply only to loans of securities in which: (1) the country of issue and primary trading market of the securities is the U.S., and (2) the beneficial owner/lender or Lending Agent is a U.S. person.⁶⁶² Having considered these comments, as a policy matter, it is not appropriate to exclude any of these categories of lending transactions. Each of these types of transactions could have a potential direct impact upon U.S. markets and U.S. market participants and, thus,

consistent with the breadth of the cross-border scope of section 10(c) it is appropriate to retain these categories of transactions within the rule’s reporting requirements so as to enhance overall transparency in the U.S. securities market.⁶⁶³

Finally, some commenters asked the Commission to consider the issue of potential overlap with the SFTR that is already implemented in the EU and UK.⁶⁶⁴ These commenters stated that the SFTR uses the domicile of the transacting entities (*i.e.*, both the lender and the borrower) to determine which entity has the reporting obligation and expressed concern about potential adverse impacts from regulatory overlap with Rule 10c–1a to the extent it covers non-U.S. persons.⁶⁶⁵ One commenter suggested that the Commission, at a minimum, include a carve-out from proposed Rule 10c–1 (or allow for substituted compliance with respect to the rule) for loans by EU or UK lenders that are subject to reporting under the EU or UK SFTR.⁶⁶⁶ The Commission acknowledges that there will be some overlap with the SFTR, however, the overlap that may occur with respect to entities established in the EU or UK (or to the EU or UK branch of a non-EU/UK entity) is not sufficient to warrant an exclusion. To the extent transactions are subject to both the EU or UK SFTR reporting rules and Rule 10c–1a, this overlap will be due to the occurrence

⁶⁶³ The Commission acknowledges some market participants may seek to restructure their activities to avoid reporting, but on balance it is appropriate that the rule operate within the full scope of the cross-border authority that Congress established when it adopted section 10(c).

⁶⁶⁴ See, *e.g.*, BlackRock Letter, at 3 (stating that, when determining scope, the SEC should look to avoid overlap or duplication with SFTR reporting in Europe and encouraging the SEC to minimize the number of individual loans required to be reported under both regimes); IIB Letter, at 5 (expressing the concern that the SEC should provide clear guidelines, as well as follow the registered broker-dealer registration model).

⁶⁶⁵ See Pirum Letter, at 3; Fidelity Letter, at 4 (expressing the concern that the Commission does not address whether the proposed rule is intended to require the reporting of loans of non-U.S. securities and recommending that the final rule not require the reporting of loans of non-U.S. securities as such loans are already subject to reporting under the EU’s SFTR); See Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 Nov. 2015 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012; see also ICI Letter 1, at 12–13 (expressing concern regarding the apparent broad reach of the rule and how it potentially could apply to non-U.S. entities, including those entities already subject to SFTR’s reporting regime and citing Article 4 of (EU) 2015/2365, available at <https://www.esma.europa.eu/policy-activities/post-trading/sftr-reporting>). See also CASLA Letter, at 3 (stating that the SEC should clarify if the domicile of the underlying client/agent lender would apply from territorial approach scope perspective).

⁶⁶⁶ See HSBC Letter 2, at 1.

⁶⁵⁷ See, *e.g.*, *Regulation SBSR—Reporting and Dissemination of Security-Based Swap Information*, Release No. 34–74244 (Feb. 11, 2015), 80 FR 14563, 14649 (Mar. 19, 2015) (discussing the territorial approach to the cross-border application of Title VII requirements for regulatory reporting and public dissemination of security-based swap transactions).

⁶⁵⁸ 561 U.S. 247. See, *e.g.*, *Abitron Austria GmbH v. Hetronix Int’l, Inc.*, 600 U.S. 412, 418 (June 29, 2023) (stating that “[t]he Supreme Court has] repeatedly and explicitly held that courts must ‘identif[y] ‘the statute’s ‘focus’ and as[k] whether the conduct relevant to that focus occurred in United States territory”).

⁶⁵⁹ See, *e.g.*, HSBC Letter 1, at 3; Mark A. Steffensen, Senior Executive Vice President and General Counsel, HSBC Bank USA, N.A. (Feb. 5, 2023) (“HSBC Letter 2”), at 1–2; SIFMA Letter 1, at 4; SIFMA Letter 2, at 3; see also MFA Letter 1, at 12; MFA Letter 3, at 12.

⁶⁶⁰ HSBC Letter 1, at 5. *But see* HSBC Letter 2, at 1 (stating, in response to a question regarding whether the rule should be limited to U.S. lenders that the commenter “would expect the depth and liquidity of the U.S. market to act as a disincentive for U.S. asset managers to avoid U.S. lenders altogether, and [the commenter] cannot envision any incentive for U.S. asset managers to prefer non-U.S. lenders that are themselves subject to similar reporting requirements in their home jurisdictions”).

⁶⁶¹ See MFA Letter 1, at 12. The commenter stated that applying the rule to all securities irrespective of the jurisdiction that principally regulates such offerings goes beyond what is intended by section 10(c), but for the reasons already discussed the Commission does not agree.

⁶⁶² See SIFMA Letter 1, at 19–20 (stating that proposed Rule 10c–1 should “apply only to loans of securities where (i) the country of issue and primary trading market of the securities are the U.S. and (ii) the beneficial owner lender or lending agent is a U.S. person”). See also FIF Letter, at 8.

within the U.S. of the relevant domestic activities as specified by section 10(c). For the reasons discussed above, related to transparency and competition within the U.S. market, Rule 10c–1a will apply to those transactions notwithstanding any potential overlap and resulting adverse impacts.

N. Additional Comments

One commenter stated that the Commission has already exhausted its rulemaking authority under section 984(b) of the Dodd-Frank Act, that the authority to promulgate rulemaking has expired, and that the Commission is seeking to regulate transactions outside the scope of the intended Congressional authority.⁶⁶⁷ Section 984(a) of the Dodd-Frank Act, codified in section 10(c)(1) of the Exchange Act, has no deadline for Commission action. Although, section 984(b) includes such a date, the “[p]assage of the statutory action deadline does not deprive the agency of the power to act.”⁶⁶⁸ Section 984(b) of the Dodd-Frank Act provides that the Commission shall promulgate “rules” and does not limit the number of any such rules. The Commission did not “exhaust” its authority under sections 984(a) and (b) by adopting the Investment Company Reporting Modernization rules.⁶⁶⁹

The commenter also stated that, by “linking” securities loan transactions entered into in order to fulfill delivery obligations arising from customer short sales,⁶⁷⁰ the Commission would be exceeding the scope of its rulemaking authority.⁶⁷¹ With regard to authority, section 10(c)(1) of the Exchange Act confers the Commission with plenary authority over both short sales and the loan or borrowing of securities, with a limited exception to authority over securities loans related to the safety and soundness or systemic risk of certain financial institutions such as banks and credit unions.⁶⁷² A loan of a security may be used for short sales or other purposes, and the use of a securities loan to facilitate a short sale is separate and distinct from the short sale itself. While it is possible that some persons

may seek out short sale information through securities lending information that will be provided under this rule, the modifications made from the proposed rule, in particular delaying the publication of the amount of the loan, should make it more difficult for such persons to succeed at such efforts, thereby addressing the potential negative consequences of such “linking” of securities loan information to short sale information (e.g., short sellers seeking to use securities lending information to alter their short selling strategies, thereby potentially reducing liquidity and harming investors) raised by the commenter.

Some commenters urged the Commission to take additional or different regulatory and non-regulatory actions than the approaches that were proposed, including actions that the Commission did not propose. These suggestions covered a variety of areas, including: notifications to retail investors;⁶⁷³ securities lending transaction terms;⁶⁷⁴ other SEC regulations;⁶⁷⁵ SEC enforcement actions and penalty provisions;⁶⁷⁶ studies, audits, and roundtables;⁶⁷⁷ reporting technologies;⁶⁷⁸ broker-dealer

revenue;⁶⁷⁹ and “onward lending.”⁶⁸⁰ These issues are outside the scope of the proposal, and the final amendments appropriately further the Commission’s objectives of promoting investor protection, enhancing market efficiency, and facilitating capital formation by implementing the requirements of section 984(b) of the Dodd-Frank Act and enhancing the transparency of securities lending and borrowing.

VIII. Compliance Date

The Proposing Release did not include a specific proposed compliance date for the final rule, but commenters expressed a range of views on the length and structure of an implementation period.⁶⁸¹

The Commission received several comments recommending an implementation period that runs from the time that technical specifications are published by an RNSA.⁶⁸² One commenter proposed an “initial compliance period of at least 18 months to develop necessary systems and otherwise prepare for compliance.”⁶⁸³ Another commenter proposed a period of “at least 18 months after publication of technical specifications by the registered national securities association to come into compliance with the new

⁶⁸¹ With respect to the compliance period, several commenters requested the Commission to consider interactions between the proposed rule and other recent Commission rules. In determining compliance periods, the Commission considers the benefits of the rules as well as the costs of delayed compliance periods and potential overlapping compliance periods. For the reasons discussed throughout this release, to the extent that there are costs from overlapping compliance periods, the benefits of the rule justify such costs. See *infra* Part IX.B for a discussion of the interactions of the final rule with certain other Commission rules.

⁶⁸² See FIF Letter, at 2; BlackRock Letter, at 9 (recommending a timeline that allows persons that make covered securities loans to establish internal reporting regimes “after the designated RNSA has completed their technology database and requisite testing”); EBF Letter, at 2 (recommending a period of “at least 18 months after publication of technical specifications by the [RNSA] to come into compliance with the new requirements”); SIFMA Letter 1, at 20 (recommending “that market participants . . . be given a minimum of 18 months following the RNSA’s finalization of the technical specifications for reporting”). See also ASA Letter, at 2 (stating that “[v]endors would need time to modify and upgrade their technology systems to comply with any new standards”).

requirements.”⁶⁸⁴ Another commenter recommended that the Commission “provide a minimum two-year implementation period” for the final rule.⁶⁸⁵ One commenter stated that ample time should be provided for covered persons to develop “procedures and protocols and properly train their compliance and trading personnel before subjecting them to additional regulation.”⁶⁸⁶ However, other commenters encouraged the Commission to expedite the adoption of the final rule.⁶⁸⁷

Certain commenters requested a phased approach to implementation, including a recommendation that the implementation of the final rule begin only with loans of U.S. equity securities.⁶⁸⁸ Other commenters recommended initially reporting only securities listed or traded on a U.S. exchange and reporting other U.S. equity securities or debt securities after further study.⁶⁸⁹ Other commenters recommended deferring public dissemination of data to allow the Commission to gain experience with the data.⁶⁹⁰ Similarly, one commenter supported “an approach to implementation that requires confidential reporting for regulatory

purposes to give the SEC experience with the data to refine it as necessary to ensure it serves its purpose. Any further stages that would require public dissemination of the data should only be considered following additional economic analysis and public consultation.”⁶⁹¹

Another commenter recommended that “[a]ny proposed timeline should carefully consider the universe of entities required to report transactions for the first time.”⁶⁹² The Commission recognizes that covered persons may have differing degrees of expertise and familiarity with existing RNSA reporting systems, and that lacking such familiarity could increase the time needed to prepare for compliance with final Rule 10c-1a’s requirements. However, the Commission also recognizes that the final rule permits the use of reporting agents, as well as other third party vendor service providers, either of which could help facilitate preparation for fulfillment of the final rule’s reporting requirements by less experienced covered persons. For example, some commenters stated that existing third party vendors have experience and technological capacity to be able to provide reporting-related services (e.g., data vendors and entities that report information for other regulatory purposes).⁶⁹³

Another commenter proposed means of expediting the implementation of the final rule, including initially: (1) applying it to only larger market participants; (2) requiring only certain data elements; and (3) not enforcing it for several years.⁶⁹⁴ However, limiting the reporting of Rule 10c-1a information (*i.e.* to larger market participants or only requiring certain data elements) would provide the public with a narrow and incomplete view of the securities lending market activity.⁶⁹⁵

⁶⁹¹ See Letter from Members of the U.S. House of Representatives Alma S. Adams, Ph.D., Frank D. Lucas, Madeleine Dean, Bill Huizenga, Bill Foster, Blaine Luetkemeyer, Vicente Gonzalez, Ann Wagner, Josh Gottheimer, Andy Barr, Al Lawson, French Hill, David Scott, Tom Emmer, and Bryan Steil (Nov. 22, 2022), at 2. See also Letter from Representative Lucas, et al., at 1; MFA Letter 3, at 8.

⁶⁹² See BlackRock Letter, at 7–8.

⁶⁹³ See S3 Partners Letter, at 12; Sharegain Letter, at 2; IIB Letter, at 10.

⁶⁹⁴ See James J. Angel Letter, at 10.

⁶⁹⁵ See Proposing Release, 86 FR 69807 (stating that “available data are incomplete, as private vendors do not have access to pricing information that reflects all transactions. This, in part, reflects the voluntary submission of transaction information by subscribers to vendors”); *id.* at 69807 (stating that “participation in the give-to-get data product is purely voluntary, meaning that the data could be missing observations in a systematic fashion, thus biasing the impression it creates of the lending market”).

Similarly, not enforcing the rule for several years could incentivize non-reporting and skew the reported data to disproportionately represent market participants that voluntarily report.

Taking into consideration commenters’ wide-ranging recommendations, the following compliance dates strike an appropriate balance between making securities loan information publicly available and providing adequate time for industry participants to come into compliance. Specifically, the final rule’s compliance dates require that: (1) an RNSA propose rules pursuant to final Rule 10c-1a(f) within four months of the effective date of final Rule 10c-1a; (2) the proposed RNSA rules are effective no later than 12 months after the effective date of final Rule 10c-1a; (3) covered persons report Rule 10c-1a information to an RNSA starting on the first business day 24 months after the effective date of final Rule 10c-1a (the “reporting date”); and (4) RNSAs publicly report Rule 10c-1a information pursuant to final Rules 10c-1a(g) and (h)(3) within 90 calendar days of the reporting date for covered persons to report Rule 10c-1a information to an RNSA. Additionally, upon the reporting date requiring covered persons to report Rule 10c-1a information to an RNSA, RNSAs are required to fulfill the data retention and availability requirements—including relevant information security policies and procedures—pursuant to paragraphs (h)(1), (h)(2), and (h)(4), and may establish and collect reasonable fees pursuant to paragraph (i) of final Rule 10c-1a.

This approach to the final rule’s compliance dates balances the Commission’s goal of increasing transparency in the securities lending market with providing RNSAs and market participants with adequate time to implement systems and processes to comply with the final rule’s reporting requirements. The Commission has also taken into consideration that the technology to collect and disseminate Rule 10c-1a information already exists. Specifically, FINRA, which is currently the only RNSA, already operates facilities that collect and disseminate transaction information, including TRACE.⁶⁹⁶ FINRA’s extensive experience in developing and operating such facilities will enable it to design and propose rules regarding the format and manner of its collection of

⁶⁹⁶ See FINRA Letter, at 2 (stating that “FINRA has extensive experience establishing and maintaining systems that are designed to capture and disseminate transaction information—similar to the system contemplated by the Commission under the Proposal”).

⁶⁸⁴ See EBF Letter, at 2.

⁶⁸⁵ See Fidelity Letter, at 2. The commenter also recommended that “[t]he Commission should also provide necessary guidance to market participants on the final rule a full year in advance of the implementation date.” An RNSA may elect to provide updates as it develops its rules for compliance with final Rule 10c-1a. As discussed below in this part, the compliance date for covered persons, referred to throughout this release as the “reporting date”, will be the first business day 24 months after the effective date of final Rule 10c-1a. See also Nasdaq Letter, at 2 (stating that “a two-year implementation period would provide adequate time for market participants to comply with the Proposal”).

⁶⁸⁶ See S3 Partners Letter, at 5.

⁶⁸⁷ See HMA Letter, at 1 (stating that the Commission should “revise and adopt the Proposal without delay”); Better Markets Letter, at 1 (recommending that the Commission “finalize this long-overdue, mandatory rulemaking without delay or dilution”).

⁶⁸⁸ See, e.g., BlackRock Letter, at 3; ICI Letter 1, at 7; Federated Hermes Letter, at 2; AIMA Letter, at 5; MFA Letter 3, at 6; SIFMA AMG Letter, at 11 (recommending that “[o]nce the SEC and the RNSA become familiar with the data they are receiving and can assess the data’s potential utility to the market, the SEC could then propose rules on making data available to the public”); ABA Letter, at 4 (“The SEC should limit covered securities lending transactions, at least during the initial stages of reporting, to National Market System equity securities and not include fixed-income securities, such as government securities.”); S3 Partners Letter, at 15 (recommending “that the Commission phase-in implementation in a manner consistent with best practices in technology and policy implementation”).

⁶⁸⁹ See CASLA Letter, at 2; RMA Letter, at 15–17. See also SBAI Letter, at 2; MFA Letter 3, at 6.

⁶⁹⁰ See CASLA Letter, at 2; RMA Letter, at 17; MFA Letter 3, at 7.

information within four months following the effective date of the final rule. Additionally, requiring that RNSA rules are effective no later than 12 months after the effective date of final Rule 10c-1a will help to ensure that information improving the transparency of the securities lending market is made available to the public without unnecessary delay.

A reporting date for covered persons of 24 months after the effective date of final Rule 10c-1a is sufficient for covered persons (and eligible reporting agents) to prepare for compliance with the final rule's reporting requirements. Two commenters recommended an implementation period of two years,⁶⁹⁷ and another commenter recommended a compliance period of at least 18 months.⁶⁹⁸ One commenter's proposed implementation period of eighteen months after publication of technical specifications by an RNSA could provide more or less implementation time to covered persons than the final rule does. Depending on when an RNSA adopts rules pursuant to final Rule 10c-1a(f), covered persons could potentially have more than 12 months to begin reporting Rule 10c-1a information, including more than the 18 months the commenter recommends. Further, the final rule has been modified to reduce certain burdens, such as requiring end-of-day reporting rather than reporting in 15-minute increments, and removal of the available to lend and securities on loan requirements, which should reduce the amount of time required to prepare for compliance. As stated above, in this part, the reporting date for covered persons strikes a balance between making securities loan information publicly available and providing industry participants with sufficient time to come into compliance. Covered persons' permitted reliance on reporting agents and ability to use third party vendors⁶⁹⁹ to help facilitate the fulfillment of reporting obligations will allow for the outsourcing of certain

functions to prepare for and comply with the final rule's requirements.

A compliance date that requires RNSAs to publicly report Rule 10c-1a information within 90 calendar days of the reporting date for covered persons reporting Rule 10c-1a information to an RNSA will help ensure the utility of such data once it is made publicly available. Providing RNSAs with up to 90 calendar days between covered persons being required to publicly report Rule 10c-1a information and RNSAs being required to make such information available to the public pursuant to final Rules 10c-1a(g) and (h)(3) will help RNSAs resolve any initial issues with collecting, aggregating, and publishing Rule 10c-1a information following the reporting date for covered persons. Additionally, upon the reporting date for covered persons an RNSA is required to fulfill the data retention and availability requirements—including relevant information security policies and procedures—pursuant to paragraphs (h)(1), (h)(2), and (h)(4), and may establish and collect reasonable fees pursuant to paragraph (i) of final Rule 10c-1a.

IX. Economic Analysis

A. Introduction and Market Failure

1. Introduction

The Commission has considered the economic effects of final Rule 10c-1a and, wherever possible, the Commission has quantified the likely economic effects of the final rule.⁷⁰⁰ The Commission is providing both a qualitative assessment and quantified estimates of the potential economic effects of the final rule where feasible. The Commission has incorporated data and other information to assist it in the analysis of the economic effects of the final rule. However, as explained in more detail below, because the Commission does not have, and in certain cases does not believe it can reasonably obtain, data that may inform the Commission on certain economic effects, the Commission is unable to

quantify certain economic effects.⁷⁰¹ Further, even in cases where the Commission has some data, quantification is not practicable due to the number and type of assumptions necessary to quantify certain economic effects, which render any such quantification unreliable. Our inability to quantify certain costs, benefits, and effects does not imply that such costs, benefits, or effects are less significant.

Commenters raised a number of concerns with the analyses and conclusions in the Proposing Release. The Commission reviewed all of the comments received and, in a few instances, have modified the subsequent economic analysis in response to additional information provided by commenters. We have also conducted analyses of changes to the proposed rule text.

The Commission believes that the final rule will increase transparency in the securities lending market by making available the public portion of Rule 10c-1a information, which is more comprehensive than existing data, and by making such data available to a wider range of market participants and other interested persons than currently are able to access existing data.

The subsequent benefits include a reduction of the information disadvantage faced by end borrowers and beneficial owners in the securities lending market, improved price discovery in the securities lending market, increased competition among providers of securities lending analytics services, reduced costs associated with tracking market conditions for broker-dealers and lending programs, and improved decision-making by investors, beneficial owners and other market participants.⁷⁰² The Commission believes that final Rule 10c-1a will also likely reduce the borrowing costs of some securities,⁷⁰³ which will improve price discovery, liquidity, and capital formation in the underlying security markets. The Commission also believes the final rule will benefit investors by increasing the ability of regulators to surveil, study, and provide oversight of

⁶⁹⁷ See Fidelity Letter, at 2 (recommending that the "Commission should provide a two-year implementation period for any final rulemaking on the Proposal"); Nasdaq Letter, at 2 ("a two-year implementation period would provide adequate time for market participants to comply with the Proposal").

⁶⁹⁸ See IIB Letter, at 3 (recommending that the "SEC should provide reporting entities an initial compliance period of at least 18 months to develop necessary systems and otherwise prepare for compliance with the requirements of the rule").

⁶⁹⁹ Numerous commenters have mentioned their experience in the market for reporting services. See, e.g., IHS Markit Letter, at 1; Pirum Letter, at 1; DTCC Letter, at 4; Sharegain Letter, at 2. See also Equilend Letter, at 1 (stating that it "welcomes the opportunity to act as a reporting agent for the Proposed Rule").

⁷⁰⁰ Section 3(f) of the Exchange Act requires the Commission, whenever it engages in rulemaking and is required to consider or determine whether an action is necessary or appropriate in the public interest, to consider, in addition to the protection of investors, whether the action would promote efficiency, competition, and capital formation. Additionally, section 23(a)(2) of the Exchange Act requires the Commission, when making rules under the Exchange Act, to consider the impact such rules would have on competition. Section 23(a)(2) of the Exchange Act prohibits the Commission from adopting any rule that would impose a burden on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act.

⁷⁰¹ For example, while the Commission believes that certain currently available securities lending data products may be biased due to missing observations, the extent of the biases cannot be quantified as the data that would be needed to assess the extent of the bias are missing. See *infra* note 759 and corresponding text for further discussion.

⁷⁰² See *infra* Part IX.C.1 for further discussion of the expected benefits of final Rule 10c-1a.

⁷⁰³ See *infra* Part IX.C.1 for further discussion of the expected effects of final Rule 10c-1a on short selling. See *infra* note 853 and corresponding text for further discussion of why the effects discussed above are likely to be concentrated among stocks that have higher borrowing costs.

both the securities lending market and individual market participants.

The Commission believes that the final Rule 10c-1a will result in costs. The final rule will lead to direct compliance costs as entities providing Rule 10c-1a information to an RNSA will have to build or adjust systems to meet the requirements of the final rule. The entities that provide Rule 10c-1a information to an RNSA may absorb these costs in the form of lower profits or may pass them on to their customers in the form of increased fees for broker-dealer services or lending program services. The final rule will also impose direct costs on an RNSA responsible for collecting, maintaining, and distributing the data, who may pass on these costs by imposing fees on entities that provide Rule 10c-1a information to an RNSA and/or consumers of Rule 10c-1a data ("Rule 10c-1a data"). Additionally, the Commission believes that the final rule could render existing securities lending data services less valuable, potentially leading to less revenue for the firms currently compiling and distributing these data for a fee.⁷⁰⁴ Also, broker-dealers and lending programs will have costs in the form of lost information advantage when dealing with beneficial owners and end borrowers in the securities lending market. For securities lending data that are currently not reported, or to which access is limited, making the data public may affect the profitability of certain trading strategies as investors use the data to learn about market sentiment and adjust their trading strategies accordingly.

2. Market Failures

In the securities lending market, the cost to borrow a given security depends on a number of factors, including the current demand for the security, the length of the loan, and the type and amount of collateral used, among others.⁷⁰⁵ Information about loan prices along with information about loan characteristics helps inform market participants about whether the price of a given securities loan is consistent with the current market rate. At the same time, the securities lending market is characterized by information frictions that stem from the fact that access to timely securities lending data is limited for some market participants.⁷⁰⁶ This

means that, at any point in time, there is incomplete information on market conditions and some market participants have better information than others on borrowing costs and transactions. Such incomplete information and asymmetric information may lead to inefficient prices for securities loans (including loans of equity securities and fixed income securities).⁷⁰⁷

There is a general lack of comprehensive information on current market conditions in the securities lending market. Most providers of commercial securities lending data currently focus on loans from lending programs to broker-dealers ("Wholesale" loans)⁷⁰⁸ and largely use a "give-to-get" model, where entities who wish to obtain securities lending data are typically required to: (1) be participants in the Wholesale lending market themselves, with data that they could provide, and (2) provide their data to the commercial vendor in order to access the full dataset provided by the vendor. This means that only those market participants with data to report for themselves are able to access the

lending market. In response to commenters, the Baseline has been expanded to include a more robust discussion of data products that are currently available from commercial data vendors. *See infra* Part IX.B.5 for additional discussion.

⁷⁰⁷ The Commission believes that the issues discussed in this part regarding a need for additional market transparency apply to all reportable securities, though, as pointed out by commenters (*see, e.g.,* RMA Letter, at 16 and IIB Letter, at 6) and discussed below in Part IX.B.2, the market for securities lending may currently be more transparent for some reportable securities as compared to others. The Commission recognizes that, to the extent that crypto asset securities qualify as reportable securities under final Rule 10c-1a(j)(3), the benefits and costs of the final Rule 10c-1a in the market for crypto asset security lending may vary based on the characteristics of that market. The Commission is unable to describe the lending market in reportable crypto asset securities, however, in part because there is insufficient reporting of crypto asset security transactions to the CAT, TRACE, or RTRS to allow for meaningful analysis.

⁷⁰⁸ The Proposing Release defined "Retail" loans as those from a broker-dealer to an end borrower, while loans from lending programs to broker dealers constitute "Wholesale" loans (*See* Proposing Release, 86 FR 69805, 69831). To avoid confusion with the common use of the term "retail" to refer to a non-institutional (*i.e.,* individual) investor, this release will refer to loans from a broker-dealer to an end borrower as "Customer" loans or loans in the Customer market, and loans from a lending program to a broker-dealer or others as "Wholesale" loans, or loans in the Wholesale market. One commenter expressed concern that the Proposing Release did not adequately address the implications of the Rule for Short Sale Linked Activity (*see* Citadel Letter, at 5), by which the commenter stated that they are referring to what the Proposing Release calls the "retail market" (*see* Citadel Letter, at 1). The Economic Analysis uses the terms Wholesale market and Customer market to make clear the implications of the final rule for the different segments of the market.

data, and other market participants have a very limited view into the Wholesale market. Furthermore, participation in give-to-get data products is voluntary, meaning that relevant observations could be missing from the data in a systematic fashion, thus biasing the impression it creates of the lending market.⁷⁰⁹

Some commenters disagreed with the Commission's assessment of the current opacity of the securities lending market. One commenter pointed out that there are some commercial securities lending datasets that are available to all subscribers,⁷¹⁰ and another commenter stated that "the 'give-to-get' model is not the only model for commercial data for securities lending."⁷¹¹ Based on the Commission's experience, the collection of data for these currently available commercial datasets that are not give-to-get largely relies on surveying asset managers, and potentially others, in the Customer segment of the market about their borrowing experiences.⁷¹² To differentiate this data from the give-to-get data, this type of dataset will be referred to going forward as "Customer market survey" data.

One commenter stated that "the Commission does not explain why [Customer market] survey data is inadequate or unavailable."⁷¹³ The Commission acknowledges that Customer market survey data may be more widely available, as access to these datasets is generally not restricted in terms of which entities can purchase the data. However, the Commission believes that Customer market survey datasets are inadequate for two reasons. First, since they rely on surveys of borrowers in the Customer segment of the market, they lack comprehensiveness and have limited insight into the Wholesale market.⁷¹⁴ Second, similar to the give-to-get datasets, Customer market survey datasets may also contain biases as they rely on voluntary submissions of data from a potentially limited subset of

⁷⁰⁹ *See infra* Part IX.B.2 for further discussion of the potential for biases related to selection issues in commercial securities lending databases.

⁷¹⁰ *See* S3 Partners Letter, at 5.

⁷¹¹ *See* Citadel Letter, at 8.

⁷¹² *See* Proposing Release, 86 FR 69832, referring to this data by stating "Other firms provide a different approach to securities lending data by surveying fund managers about their borrowing experience, such as the fees they paid to borrow, from which they provide estimates of lending fees." *See* Antonio Garango, *Short Selling Activity and Future Returns: Evidence from FinTech Data* (Nov. 2020), at 1, 3, available at https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3775338 (retrieved from SSRN Elsevier database) ("Garango 2020").

⁷¹³ *See* Citadel Letter, at 8.

⁷¹⁴ *See supra* note 708 for a definition of "Customer" loans.

⁷⁰⁴ *See supra* Part IX.D.2 discussing why existing data providers may retain certain advantages in the market for securities lending data and analytics.

⁷⁰⁵ *See infra* note 723 and corresponding text for a discussion of factors that could be important drivers of borrowing costs.

⁷⁰⁶ *See infra* Part IX.B.2 for further discussion of the current state of transparency in the securities

market participants.⁷¹⁵ As discussed above, these two types of datasets differ in terms of the market segments that they cover, and in terms of their accessibility.⁷¹⁶

One commenter stated that the Commission “has overstated the level of opacity in the securities lending market,” that both the number of data vendors and the detail of their data products have increased over time, and that market participants generally have access to one or more securities lending datasets.⁷¹⁷ However, based on the Commission’s experience, the commercial securities lending data products that are currently available lack comprehensiveness and likely suffer from biases.⁷¹⁸ Furthermore, while some market participants could potentially have access to multiple datasets, this would generally be possible only for a limited set of market participants who have access to give-to-get data, and who may find it cumbersome or costly to combine different types of data.⁷¹⁹ The Commission is not aware of any commercially available securities lending dataset that currently provides securities lending data as comprehensive, accessible, and informative about all segments of the securities lending market (*i.e.*, both the Wholesale market and Customer market), as the data provided by the final rule.⁷²⁰

One commenter stated that lending agents frequently provide their clients with benchmark reports based on market data, and that beneficial owners currently benefit from substantial information obtained from lending agents.⁷²¹ However, the Commission believes that, even if some lending agents or broker-dealers are incentivized to provide their clients with information about the quality of their securities

lending services, it is unlikely that they have incentives to provide information in a standardized fashion. Therefore, it is unlikely that market participants would be able to use this information to compare the quality of securities lending services across lending agents or broker-dealers.

The Commission believes that the problems of incomplete information and information asymmetries in the securities lending market are unlikely to be solved by market forces. Specifically, these information problems are unlikely to be solved by the availability of commercial securities lending data products. Firstly, there is a general lack of incentives to improve the accessibility of give-to-get datasets. This is because market participants may be discouraged from contributing their data to give-to-get datasets if these datasets are widely available, *e.g.*, to sophisticated investors such as hedge funds who could use this information to learn about the other participants’ trading or hedging strategies.⁷²² Therefore, for give-to-get data vendors, restricting access is likely seen as necessary in order to persuade market participants to contribute to the vendors’ data products, and information asymmetry would be expected to persist as a result. Secondly, and more generally, as commercial data vendors lack the authority to mandate the reporting of securities loans, both the commercial data products that currently exist (both give-to-get and Customer market survey models), as well as any new commercial data product that could presumably emerge, can only be based on the voluntary contribution of data. Market participants who choose not to contribute data may so choose because they believe it is in their interest to keep their data out of public view. This makes it unlikely that any securities lending data vendor will be able to produce a securities lending data product that is comprehensive and free from biases.⁷²³ Thirdly, as discussed above, the information that lending agents or broker-dealers are incentivized to provide to their clients is unlikely to be standardized and thus useful for comparing the quality of securities lending services across lending agents or broker-dealers. Thus, the availability of this information would also be unlikely to solve the problems of

incomplete and asymmetric information in the securities lending market.

A. Economic Baseline

The baseline against which the costs, benefits, and the effects on efficiency, competition, and capital formation of the final rule are measured consists of the current state of the securities lending market, current practice as it relates to securities lending and availability of data about securities lending, and the current regulatory framework. The economic analysis appropriately considers existing regulatory requirements, including recently adopted rules, as part of its economic baseline against which the costs and benefits of the final rule are measured.⁷²⁴

Several commenters requested the Commission to consider interactions between the economic effects of the proposed rule and other recent Commission rules.⁷²⁵ The Commission

⁷²⁴ See, *e.g.*, *Nasdaq v. SEC*, 34 F.4th 1105, 1111–15 (D.C. Cir. 2022). This approach also follows SEC staff guidance on economic analysis for rulemaking. See Staff’s “Current Guidance on Economic Analysis in SEC Rulemaking,” (Mar. 16, 2012), available at https://www.sec.gov/divisions/riskfin/rsfi_guidance_econ_analy_secrulemaking.pdf (“The economic consequences of proposed rules (potential costs and benefits including effects on efficiency, competition, and capital formation) should be measured against a baseline, which is the best assessment of how the world would look in the absence of the proposed action.”); *Id.* at 7 (“The baseline includes both the economic attributes of the relevant market and the existing regulatory structure.”). The best assessment of how the world would look in the absence of the proposed or final action typically does not include recently proposed actions, because that would improperly assume the adoption of those proposed actions.

⁷²⁵ See, *e.g.*, AIMA Letter 3, at 4 (“Because the . . . Proposals have aggregate and overlapping effects, they should be considered holistically and their potential adoption should be appropriately sequenced”); Letter from Eric J. Pan, President and CEO, Investment Company Institute, Aug. 17, 2023 (“ICI Letter 2”), at 1 (“The Commission has issued a wide range of interconnected rule proposals . . . [that] in the aggregate warrant further analysis by the Commission.”). Commenters indicated there could be interactions between this rulemaking and the following rules: *Enhanced Reporting of Proxy Votes by Registered Management Investment Companies; Reporting of Executive Compensation Votes by Institutional Investment Managers*, Release Nos. 34–93169, IC–34389 (Sept. 29, 2021) 86 FR 57478 (Oct. 15, 2021) (“Amendments to Form N-PX Proposal”) (see, *e.g.*, HMA Letter, at 4); *Short Position and Short Activity Reporting by Institutional Investment Managers*, Release No. 34–94313 (Feb. 25, 2022) 87 FR 14950 (Mar. 16, 2022) (see, *e.g.*, Overdahl Letter, at 14; AIMA Letter 3, at 2); *Prohibition Against Fraud, Manipulation, or Deception in Connection With Security-Based Swaps; Prohibition Against Undue Influence Over Chief Compliance Officers; Position Reporting of Large Security-Based Swap Positions*, Release No. 34–93784 (Dec. 15, 2021) 87 FR 6652 (Feb. 4, 2022) (see, *e.g.*, Overdahl Letter, at 14; AIMA Letter 3, at 2; ICI Letter 2, at n. 13); *Modernization of Beneficial Ownership Reporting*, Release Nos. 33–11030, 34–94211 (Feb. 10, 2022) 87 FR 13846 (Mar. 10, 2022) (see, *e.g.*, Overdahl Letter,

⁷¹⁵ See *infra* Part IX.B.2 for further discussion of the potential for biases related to selection issues in commercial securities lending databases.

⁷¹⁶ See *infra* Part IX.B.2 for additional discussion of the characteristics of, and differences between, customer market survey data and give-to-get data.

⁷¹⁷ Specifically, the commenter stated that “the level of detail in the data provided by data vendors has improved drastically” and “the number of data vendors present in the market has been growing,” such that “the vast majority of parties involved in the lending of securities have access to at least one securities lending data vendor, and in many cases multiple vendors.” See IHS Markit Letter, at 13.

⁷¹⁸ See *infra* Part IX.B.2 for further discussion of the biases and lack of comprehensiveness in commercial securities lending datasets.

⁷¹⁹ See *infra* notes 768 through 770 and corresponding text for further discussion of limitations related to combining multiple securities lending datasets.

⁷²⁰ See *infra* Part IX.B.2 for an additional discussion of this data.

⁷²¹ See RMA Letter, at 5–6.

⁷²² See *infra* Part IX.B.2 for further discussion of market participants’ incentives to provide data to give-to-get data vendors.

⁷²³ See *infra* Part IX.B.2 for further discussion of the potential for biases related to selection issues in commercial securities lending databases.

recently adopted four of the rules mentioned by commenters as potentially impacting the economic effects of the final Rule 10c–1a, namely the recent Amendments to Form N–PX Adoption,⁷²⁶ the Settlement Cycle Adoption,⁷²⁷ the May 2023 SEC Form PF Amending Release,⁷²⁸ and the Beneficial Ownership Amending Release.⁷²⁹ These recently adopted rules

at 14; ICI Letter 2, at n.13); *Private Fund Advisers; Documentation of Registered Investment Adviser Compliance Reviews*, Release No. IA–5955 (Feb. 9, 2022) 87 FR 16886 (Mar. 24, 2022) (“SEC Private Fund Advisers Proposal”) (see, e.g., Overdahl Letter, at 14); and *Amendments to Form PF to Require Event Reporting for Large Hedge Fund Advisers and Private Equity Fund Advisers and to Amend Reporting Requirements for Large Private Equity Fund Advisers*, Release No. IA–5950 (Jan. 26, 2022) 87 FR 9106 (Feb. 17, 2022) (“February 2022 SEC Form PF Proposing Release”) (see Overdahl Letter, at 14); *Shortening the Securities Transaction Settlement Cycle*, Release Nos. 34–94196, IA–5957 (Feb. 9, 2022) 87 FR 10436 (Feb. 24, 2022) (see SIFMA Letter 1, at 20–21). See also Citadel Letter, at 10 (stating that Rule 10c–1a “must be assessed along with the additional public disclosure contemplated in recent Commission proposals regarding large security-based swap positions, beneficial ownership reporting and short position and activity reporting”).

⁷²⁶ *Enhanced Reporting of Proxy Votes by Registered Management Investment Companies; Reporting of Executive Compensation Votes by Institutional Investment Managers*, Release Nos. 33–11131, 34–96206, IC–34745 (Nov. 2, 2022) 87 FR 78770 (Dec. 22, 2022) (“Amendments to Form N–PX Adoption”). The Form N–PX amendments require funds to report publicly their proxy voting records on an annual basis, and apply to most registered management investment companies. The effective date is July 1, 2024.

⁷²⁷ Settlement Cycle Adoption, *supra* note 738. The Settlement Cycle amendments shorten the standard settlement cycle for most broker-dealer transactions from two business days after the trade date to one business day after the trade date (“T+1”). The implementation date, May 28, 2024, will occur before the implementation of these rules, and we therefore expect that all reports made pursuant to this rule will occur after the implementation of the T+1 settlement cycle. Further, because of the need for an RNA to develop and implement rules before reporting can begin, we believe that the May 2024 implementation date for T+1 will precede any significant compliance costs incurred by market participants pursuant to this final rule.

⁷²⁸ *Form PF; Event Reporting for Large Hedge Fund Advisers and Private Equity Fund Advisers; Requirements for Large Private Equity Fund Adviser Reporting*, Release No. IA–6297 (May 3, 2023) 88 FR 38146 (June 12, 2023) (“May 2023 SEC Form PF Amending Release”). The Form PF amendments require large hedge fund advisers and all private equity fund advisers to file reports upon the occurrence of certain reporting events. The compliance dates are December 11, 2023, for the event reports in Form PF sections 5 and 6, and June 11, 2024, for the remainder of the Form PF amendments.

⁷²⁹ *Modernization of Beneficial Ownership Reporting*, Release Nos. 33–11253, 34–98704 (Oct. 10, 2023) (“Beneficial Ownership Amending Release”). Among other things, the amendments shorten the filing deadlines for beneficial ownership reports filed on Schedules 13D and 13G. The compliance dates are 90 days after the effective date, for Schedule 13D amended filing deadlines; September 30, 2024, for the Schedule 13G amended

were not included as part of the baseline in the Proposing Release because they were not adopted at that time. In response to commenters, this economic analysis considers potential economic effects arising from the extent to which there is any overlap between the compliance period for final Rule 10c–1a and the compliance periods for each of these four adopted rules.⁷³⁰

Other rules mentioned by commenters remain at the proposal stage. To the extent those proposals are adopted, the baseline in those subsequent rulemakings will reflect the regulatory landscape that is current at that time.

1. Securities Lending

A securities loan is typically a fully collateralized transaction whereby the lender, also known as the beneficial owner, temporarily transfers legal right to a security to the borrower, the counterparty, in exchange for compensation. The form of compensation depends on the type of collateral used to secure the transaction. There are two general types of collateral: cash and non-cash.

In the U.S., the most common form of collateral for equity security loans is cash. The borrower of the security deposits collateral, typically 102 percent or 105 percent of the current value of the asset being loaned. The lender then reinvests this collateral, usually in low-risk interest-bearing securities, then rebates a portion of the interest earned back to the borrower. The difference between the interest earned and what is

filing deadlines; and December 18, 2024, for the structured data requirement. We anticipate that the implementation of amendments to Schedules 13D and 13G will precede any significant compliance costs incurred by market participants pursuant to final Rule 10c–1a.

⁷³⁰ Since proposing this rule, the Commission adopted another proposed rule identified by a commenter, the SEC Private Fund Advisers Proposal. See Overdahl Letter at 14; *Private Fund Advisers; Documentation of Registered Investment Adviser Compliance Reviews*, Release No. IA–6383 (Aug. 23, 2023) 88 FR 63206 (Sep. 14, 2023) (“SEC Private Fund Advisers Adopting Release”). However, the Commission believes there are no potential significant effects from overlapping requirements to comply with final Rule 10c–1a. Specifically, one of the rules from the SEC Private Fund Advisers Adopting Release requires registered investment advisers to private funds to, among other things, provide transparency to their investors regarding the fees and expenses and other terms of their relationship with private fund advisers and the performance of such private funds. The Commission anticipates that most registered investment advisers would either not face any reporting obligations under final Rule 10c–1a(a) or, to the extent they are involved in the lending of securities, would not report loans directly, but would do so through a reporting agent. As a result, the Commission does not anticipate the compliance costs associated with final Rule 10c–1a to be incurred directly by those who are impacted by the SEC Private Fund Advisers Adopting Release.

rebated to the borrower is the lending fee earned by the lender. The portion of the interest earned on the reinvested collateral that is returned to the borrower is called the rebate rate, and is a guaranteed amount set forth in the terms of the loan. It is possible for the lender to lose money on the loan if the interest earned on the reinvestment of the collateral does not exceed the rebate rate. If the security is in high demand in the borrowing market, the rebate rate may be negative, indicating that the borrower does not receive any rebate and must also provide additional compensation to the lender. In contrast, borrowers of loans that are collateralized other than with cash typically must pay a lending fee. The following will refer to “cost to borrow” or “borrowing costs” being higher when rebate rates are lower (or negative) in the case of cash-collateralized loans, and lending fees are higher in the case of non-cash-collateralized loans.⁷³¹

Borrowing costs are influenced by the current demand for the given security, the potential difficulty a particular broker-dealer may face finding an alternative source of loans, the length of the loan, the collateral used, the creditworthiness of the counterparty, and the relative bargaining power of the parties involved, among other factors.⁷³² Consequently, there is usually a significant range of borrowing costs for loans of the same security on the same day to different entities.⁷³³

In the Wholesale market, securities loans are most commonly obtained through bilateral negotiations between lending programs and broker-dealers, often with a phone call.⁷³⁴ Generally, when an end investor wishes to borrow a share, and their broker-dealer does not have the share available in their own inventory or through customer margin

⁷³¹ In many datasets, rebate rates for loans collateralized by cash are converted to fees using the conventional method of subtracting the rebate rate from the Federal funds rate; see, e.g., the footnote in Table 1.

⁷³² Among other factors that can influence borrowing costs, commenters also pointed out that the size and stability of the lender’s position (see HMA Letter, at 2), the lender’s propensity to recall the loan (see Overdahl Letter, at 6), interest rate stability and supply concentration (see SIFMA AMG Letter, at 6), and factors idiosyncratic to the parties, such as capital and opportunity costs (see RMA Letter, at 6). One commenter pointed out that fees in the Customer market can depend on additional factors, such as whether a borrower/client has exclusive access to a lenders’ portfolio, the volume of a client’s borrow business, and other prime brokerage services being offered, among others (see MFA Letter 1, at 5).

⁷³³ See *infra* Part IX.B.3 for statistics on the range of borrowing costs.

⁷³⁴ Most broker dealers are regulated by FINRA and are subject to securities lending rules such as FINRA Rules 4314, 4320, and 4330.

accounts to loan,⁷³⁵ their broker-dealer will borrow a share from a lending agent with whom they have a relationship. Obtaining a securities loan often involves extensive search for counterparties by broker-dealers.⁷³⁶

Investors borrow securities in the Customer market for a variety of reasons. In the equity market, a primary reason for borrowing shares is to facilitate a short sale. Investors use short sales to take a directional position in a security, or to hedge an existing position.⁷³⁷ When investors execute a short sale, they do not borrow the shares on the day of the short sale. Rather, because the stock market settles up to two business days after a transaction occurs (“T+2”) and the lending market has same-day settlement, the loan actually occurs on the settlement day.⁷³⁸

Options market activity can also be a source of demand for security loans as short selling is a critical component of delta hedging. Delta hedging occurs when options market participants, particularly options market makers, holding directional positions hedge their inventory exposure by taking offsetting positions in the underlying stock.⁷³⁹ Equity options markets are often significantly less liquid than the markets for their underlying securities. Delta hedging a long call or short put position requires short selling, which in turn requires borrowing the underlying asset.

Equity security loans can also occur to close out a fail to deliver. Fail to delivers occur when one party of a transaction is unable to deliver at settlement the security that they previously sold. Fail to delivers can occur for multiple reasons.⁷⁴⁰ Rule 204

of Regulation SHO generally requires a participant of a registered clearing agency to close out any fail to deliver at the registered clearing agency by purchasing or borrowing securities of like kind and quantity. Thus, a broker or dealer that is required to close out a fail to deliver can borrow shares in the lending market to comply with Rule 204 of Regulation SHO.⁷⁴¹ Doing so allows more time for the individual to source the shares or purchase them in the open market.

The financial management activity of banks also drives securities loans, particularly in the Wholesale fixed-income securities lending market. It is the Commission’s understanding that a significant fraction of debt security loans occurs as banks manage liquidity on their balance sheets. Securities loans help banks manage liquidity on their balance sheets because when a security is on loan, legal claim to the security transfers to the borrower.⁷⁴² Thus, banks lacking sufficient high-quality liquid assets on their balance sheet may borrow such high-quality assets to bolster their liquidity ratios.⁷⁴³ U.S. Treasury/Agency bonds are often lent for this purpose, and consequently are the most commonly lent securities.⁷⁴⁴

Also, the Commission understands that some financial entities may use securities loans to obtain the type of collateral required for other agreements they are trying to enter into. For example, if a contract requires a certain kind of fixed income security as collateral, a firm may borrow that security to collateralize the contract.

While a security is on loan, the borrower is the legal owner of the security and receives any dividends, interest payments, and, in the case of equity security loans, holds the voting rights associated with the shares.⁷⁴⁵ Voting rights remain with the borrower until the loaned securities are returned. Usually, the terms of the loan stipulate that dividends and interest payments must be passed back to the beneficial owner in the form of so-called “substitute dividends.” Because dividends and substitute dividends are

sometimes taxed differently, an investor for whom a substitute dividend is taxed at a lower rate than a dividend may loan its shares to an investor for whom dividends are taxed at a lower rate than substitute dividends.⁷⁴⁶

Several commenters pointed out additional reasons for borrowing securities. One commenter stated that there are many reasons for securities lending that are unrelated to short selling.⁷⁴⁷ Another commenter purported that securities lending can be used to gain influence in the voting of equity securities.⁷⁴⁸

However, the Commission expects that the majority of equity securities lending, particularly in the Customer market, occurs to facilitate short selling. Investors’ ability to use securities loans for purposes other than short selling is limited by the “permitted purpose requirement” of the Board of Governors of the Federal Reserve System’s Regulation T. Regulation T broadly governs the lending activities of broker-dealers, and specifies that a broker-dealer may generally borrow or lend U.S. securities from or to a (non-broker-dealer) customer solely “for the purpose of making delivery of the securities in the case of short sales, failure to receive securities required to be delivered, or other similar situations,” unless an exemption applies.⁷⁴⁹ This limitation results in a close correlation between information about aggregate Customer loan sizes and short interest.⁷⁵⁰

2. Current State of Transparency in Securities Lending

As described above, currently available securities lending data are produced by commercial data vendors, and are based on voluntary data contributions, either using a give-to-get model or from Customer market surveys.⁷⁵¹ Some commenters expressed their belief that the Proposing Release did not adequately analyze the impact of Customer market survey data.⁷⁵² This

⁷³⁵ See *infra* Part IX.B.4 for further discussion of the sourcing of shares by broker-dealers for securities loans.

⁷³⁶ See, e.g., Adam C. Kolasinski, et al., *A Multiple Lender Approach to Understanding Supply and Search in the Equity Lending Market*, 68 J. Fin. 559, 559–95 (2013) (“Kolasinski (2013)”) (providing an examination of the effect of high search cost in the securities lending market).

⁷³⁷ Market makers in the equity market also use short selling to facilitate liquidity provision in the absence of sufficient inventory. However, these short sales are not considered here because they are almost always reversed intraday and thus do not result in a securities loan.

⁷³⁸ Equity settlement moves to T+1 on May 28, 2024; See *Shortening the Securities Transaction Settlement Cycle*, Release Nos. 34–96930, IA–6239 (Feb. 15, 2023), 88 FR 13872 (Mar. 6, 2023) (“Settlement Cycle Adoption”).

⁷³⁹ For a given option contract, a quantity known as the “delta” captures the sensitivity of the option’s price to a \$1 increase in the price of the underlying security. When hedging inventory, the market maker determines the appropriate position size in the underlying stock according to the delta.

⁷⁴⁰ See, e.g., *Amendments to Regulation SHO*, Release No. 34–58775 (Oct. 14, 2008), 73 FR 61690 n.8 (Oct. 17, 2008).

⁷⁴¹ See 17 CFR 242.204.

⁷⁴² See, e.g., *Concept Release on the U.S. Proxy System*, Release No. 34–62495 (July 13, 2010), 75 FR 42982, 42994 (July 22, 2010) (“When an institution lends out its portfolio securities, all incidents of ownership relating to the loaned securities, including voting rights, generally transfer to the borrower for the duration of the loan”).

⁷⁴³ These loans are generally collateralized with securities instead of cash. A market participant can increase the liquidity of their portfolio by borrowing highly liquid securities and collateralizing the loan with less liquid securities.

⁷⁴⁴ See OFR Pilot Survey, at 7; *supra* note 136.

⁷⁴⁵ See, e.g., OFR Reference Guide, *supra* note 4.

⁷⁴⁶ This is known as dividend arbitrage. While the IRS has issued regulations to try to combat this type of dividend arbitrage, there is evidence that it still occurs. See Peter N. Dixon, et al., *To Own or Not to Own: Stock Loans around Dividend Payments*, 140 J. Fin. Econ 539, 539–59 (2021) (“Dixon, et al., (2021)”).

⁷⁴⁷ See IHS Markit Letter, at 3.

⁷⁴⁸ See HMA Letter, at 3.

⁷⁴⁹ See 12 CFR 220.10(a).

⁷⁵⁰ See *infra* Part IX.B.6 for further discussion of the correlation between securities loan information and short interest.

⁷⁵¹ See *supra* Part IX.A.2 for a description of these types of datasets.

⁷⁵² For example, one commenter stated that, while they agree “with the Commission’s concerns regarding the inadequacy and information asymmetry issues inherent in the give-to-get model,” the give-to-get model is “is not the industry

baseline, and the discussion following have been expanded to provide a more detailed discussion of the Customer market survey data and its impact on securities lending transparency. The available data have limitations. Specifically, they lack comprehensiveness in that they are based on voluntary data contributions. The reliance on voluntary data contributions increases the likelihood that data are missing in a non-random manner which can introduce biases into the data. Lastly, not all market participants have access to all existing commercial datasets resulting in information asymmetries between market participants.

Some commercial data vendors obtain information on Wholesale loans using a give-to-get model.⁷⁵³ Access to data collected using a give-to-get model is largely restricted, as only certain entities can purchase the data. The Commission understands entities with access to the give-to-get Wholesale market data access that data using various means such as an application programming interface (API), spreadsheet add-in applications, file downloads, or directly from the distributor's website. It is the Commission's understanding that some large institutional investors who would like the give-to-get data, such as hedge funds, cannot access it, even for a fee, because they do not provide lending data to the commercial vendors and so are not qualified to purchase the data. Additionally, distributing the data to these investors may discourage other market participants from contributing their data to the data vendors. Because securities loans are often entered into to facilitate various trading and hedging strategies, if the give-to-get data providers expanded access to their data, some securities lending market participants may be discouraged from contributing data. Consequently, if sophisticated traders such as hedge funds can access the data, then some market participants may be leery of contributing data to the give-to-get data vendors for fear of hedge funds learning about their trading or hedging strategies. Additionally, while some data vendors do allow non-lending market participants, such as academics and regulators, to access the data for a fee, they sometimes place usage restrictions on the data that make it unusable for regulatory and some academic

functions.⁷⁵⁴ The Commission believes, based on conversations with industry participants and our staff's use of some of the data, that the coverage and timeliness of the three biggest give-to-get Wholesale data vendors are roughly comparable.⁷⁵⁵

Other commercial data vendors provide a different approach to securities lending data by surveying asset managers and others in the Customer segment of the market about their borrowing experience, such as their costs to borrow, from which they provide estimates of lending fees.⁷⁵⁶ One commenter stated that the Commission "offers no reason to believe that the [Customer market] survey and 'give-to-get' data are materially different."⁷⁵⁷ Customer market survey data have some characteristics that make them distinct from the give-to-get data provided by the vendors of Wholesale market data discussed above. First, Customer market survey data vendors generally aggregate information from respondents in the Customer market—that is, the end borrowers that engage in securities borrowing to facilitate short selling—and thus cover a different segment of the securities lending market.⁷⁵⁸ Second, while Wholesale market data are mostly available only on a restricted basis, Customer market survey data are generally available to any purchaser. However, despite these differences, Customer market survey data face a similar issue to the give-to-get data, in that they only contain information about the subset of those end borrowers that choose to provide data. Since it is unlikely that the full universe of lending programs and borrowers contribute all data to any given data vendor, the Commission believes that both give-to-

get and Customer market survey data lack comprehensiveness.

Furthermore, as stated in the Proposing Release and restated here, the Commission believes that the give-to-get data are likely biased due to non-random omissions that result from the voluntary nature of data submissions.⁷⁵⁹ The Commission also believes that, since Customer market survey data are also based on voluntary submissions, these data also suffer from bias due to non-random omissions. As will be further detailed below, data based on voluntary submissions can contain biases because market participants that choose not to disclose their data likely make that choice because it is in their strategic interest not to disclose, resulting in non-random omissions.

One commenter stated that the Commission's statements in the Proposing Release that give-to-get data could be systematically biased has "no basis beyond mere speculation."⁷⁶⁰ The Commission disagrees. It is true that it is not possible to empirically analyze or quantify the extent of this bias using existing data because there currently does not exist a complete dataset with which to compare the existing data, and comparing a biased sample to an unbiased sample is generally the only data-based means of determining the extent of the bias in a non-random sample. Instead, the determination that data are likely to not contain a representative sample is routinely made in economic studies (as well as data analysis generally) based on an understanding of how the sample is created, which alone can be sufficient to determine the likely validity of the sample. The fact that non-random data omissions result in biased data is well established in statistics and data science, and simply stems from the logic that, if the reporting subsample is systematically different from the population, then statistics based on the reporting sample will only reflect the reporting sample, and will not be reflective of the whole population.⁷⁶¹

In the context of commercial securities lending datasets, the

⁷⁵⁴ For example, some data providers retain the right to review and reject any use of the data at their own discretion.

⁷⁵⁵ See *infra* note 812 for evidence of this from the academic literature. The Commission expressed this belief in the Proposing Release (See Proposing Release, 86 FR 69832) and specifically requested comment regarding the baseline of the economic analysis as well as specific comment about "sources of insight" into securities lending activity (See Proposing Release, 86 FR 69849, questions 77 and 78). The Commission did not receive comment on this point and thus continues to believe that the data from the three biggest give-to-get Wholesale data vendors are roughly comparable.

⁷⁵⁶ See Garango 2020, *supra* note 712.

⁷⁵⁷ See Citadel Letter, at 8.

⁷⁵⁸ For reasons below *infra* note 769, there is uncertainty regarding the strength of the correlation between Wholesale and Customer borrowing costs, particularly for stocks that are not hard-to-borrow. Therefore, it is unclear whether customer survey data could be used to glean information about the Wholesale market.

⁷⁵⁹ See Proposing Release, 86 FR 69832.

⁷⁶⁰ See Citadel Letter, at 8. Similarly, another commenter asked for an assessment of the current accuracy of existing data; See S3 Partners Letter, at 4. However, neither commenter provided any supplemental analysis challenging the assumption of non-random omissions, nor did they provide additional insight into the nature of any bias. Neither did either commenter provide a pathway to overcoming obstacles related to such an empirical analysis.

⁷⁶¹ See, e.g., James J. Heckman, *Selection Bias and Self-Selection*, in *ECONOMETRICS*, 201–224 (John Eatwell, et al., eds., Palgrave Macmillan, London 1990) ("Heckman (1990)").

standard." See S3 Partners Letter, at 5. Similarly, another commenter stated that "the 'give-to-get' model is not the only model for commercial data for securities lending." See Citadel Letter, at 8.

⁷⁵³ See *supra* Part IX.A.2 for a description of the give-to-get model of data collection.

Commission believes that, because market participants can choose whether or not they want to contribute data to commercial datasets,⁷⁶² it is likely that the sample of securities lending data that is reported to commercial data vendors is, on average, different from the sample that is not reported. As such, there are well-established theoretical reasons as to why these data are likely biased. These reasons are largely based on the fact that market participants that voluntarily contribute data to commercial datasets “self-select” the data that they would like to be included in the dataset. The practice of having entities under study “self-select” into the dataset used to study them is widely acknowledged in the empirical economics literature to be very likely to lead to biased data.⁷⁶³ This is because the incentives to provide data are likely connected to the incentives that drive the behavior under study, such that the behavior of those market participants that do contribute data are likely to be systematically different from the behavior of those that do not contribute. Trying to draw inferences from such a dataset about the entire population of market participants would thus result in a biased view of the market.

The Commission has identified examples of such incentives that would likely introduce such “self-selection biases” into commercially available securities lending datasets. First, there may be competitive reasons for market participants to selectively choose which loans to contribute to a securities lending dataset. For example, to attract more beneficial owner customers, lending programs would like their average terms to appear better than the benchmark average terms. Thus, they are incentivized to voluntarily contribute information about their lending activity for loans with higher-than-average borrowing costs—skewing the average cost to borrow in the resulting dataset up and making the lender’s performance appear better than it actually was.⁷⁶⁴ This could lead the

reported borrowing costs in commercial datasets to be systematically higher than the actual borrowing costs in the securities lending market.⁷⁶⁵

Similarly, some market participants may choose not to voluntarily contribute data to securities lending datasets for their own strategic reasons, such as a desire to keep their activity private. The decision to not to participate is, in itself, indicative that such market participants are likely not reflective of those who do choose to participate. For example, market participants that choose not to contribute data may be more likely to be sophisticated investors with greater incentives to protect their trading and hedging strategies. This matters because the terms of securities loans are influenced by the characteristics of the parties involved,⁷⁶⁶ and so it follows that the borrowing costs for market participants that do not voluntarily contribute data are systematically different than the borrowing costs for market participants that do contribute data.

In addition to the issue of self-selection bias, currently there is no securities lending dataset that contains information about both the Customer and Wholesale segments of the market. The give-to-get datasets lack significant coverage of the Customer segment of the market, while the Customer market survey data lack significant coverage of the Wholesale segment of the market.⁷⁶⁷

⁷⁶⁵ Note that the reverse could also be true, as lenders, in order to attract more customers in the market for borrowers, may be incentivized to voluntarily contribute information about loans with lower-than-average borrowing costs, which would skew the average cost to borrow downwards. Ultimately, the Commission is not able to determine the potential direction of the self-selection bias, which could also vary over time. This would complicate any attempt to adjust for the bias when performing analyses on the data.

⁷⁶⁶ See *infra* Part IX.B.3 for further discussion of the factors that influence the prices of securities loans.

⁷⁶⁷ One industry publication noted in an interview with a market participant engaged in Wholesale market lending that they feel unable to benchmark the performance of their lending programs using commercial data because they have very little insight into the Customer market. See, e.g., Bob Currie, *The Power of Reinvention*, Sec. Fin. Times (Aug. 31, 2021), at 20, available at https://www.securitiesfinancetimes.com/slimes/SFT_issue_285.pdf, interviewing Matthew Chessum, who stated that “as a lender, we monitor fees paid to us by the agent, but we only see one side of the trade. We have no sight of the pricing paid by a hedge fund or prime broker, for example, when they borrow those securities.” One commenter questioned the applicability of this citation and stated their opinion that, “[t]hat a single person would like to see certain data is not evidence that requiring the disclosure of that data is worth the massive cost,” the commenter also states that “the Commission neglects to estimate the number of market participants that are seeking the same disclosure” (see Citadel Letter, at 10). The

While some, but not all, market participants could potentially gain access to data on both the Wholesale markets and Customer markets by subscribing to both give-to-get and Customer market survey datasets, this would generally be possible only for market participants that contribute data (and thus have access) to give-to-get datasets and would also not surmount the problems of incomplete or potentially biased data. Different types of data may also be cumbersome to combine.⁷⁶⁸ There are also limitations to using the Customer market survey data to assess conditions in the Wholesale market.⁷⁶⁹ Furthermore, the need to subscribe to multiple datasets increases market participants’ overall costs of data access.⁷⁷⁰

As an additional source of securities lending data, some market participants that have many connections within the securities lending market, such as large broker-dealers and lending programs, can query other market participants directly about current conditions. These centrally connected market participants are also likely to have access to both give-to-get Wholesale data and customer

Commission received numerous comment letters from industry members and organizations expressing support for the public disclosure of securities lending data. See, e.g., Nasdaq Letter, at 1–2; AFREF Letter 1, at 1; Better Markets Letter, at 1; NYSE Letter 1, at 1–2; ASA Letter, at 1; and Morningstar Letter, at 2; The Commission also received letters from academics and individuals supporting additional transparency. See, e.g., James J. Angel Letter, at 1; Letter from Carl Nyborg (Dec. 15, 2021), at 1; Letter from Eric Olsen (Jan. 24, 2022); Letter from Scott Clark (Jan. 22, 2022).

⁷⁶⁸ For example, commercial data vendors often convert rebate rates (for cash collateralized loans) into fees, in order to combine with information about lending fees for non-cash collateralized loans and cash collateralized loans; see, e.g., *infra* note 786. Different commercial data vendors may use different methodologies for this conversion, which would make it difficult to combine and compare information about borrowing costs across different datasets.

⁷⁶⁹ Borrowing costs in the Customer market are often contractually negotiated in the brokerage agreement between a customer and their broker-dealer. It is common for these brokerage agreements to stipulate a fixed rate for general collateral stocks and some predetermined process to determine rates for stocks on special, such as referencing Wholesale market rates plus some mark-up. For this reason, there is uncertainty regarding how strong the correlation might be between Wholesale and Customer borrowing costs, particularly for general collateral stocks.

⁷⁷⁰ One commenter stated that, “while the Proposal stated that purchasing multiple vendor systems is expensive, there was no quantification of actual vendor costs. Nor was there data provided on how many firms actually use multiple vendors” (see S3 Partners Letter, at 4). The Commission cannot provide such analysis because we do not have, and commenters did not provide, typical costs paid to vendors for such data. The Commission understands that such pricing is dynamic and individualized, and is generally not aware of publicly available price lists or client lists.

⁷⁶² See *infra* of this part for a discussion of investors’ incentives related to voluntarily contributing data to commercial datasets, and why this may result in systematic differences between those that choose to contribute as compared to those that do not.

⁷⁶³ See Heckman (1990), *supra* note 761.

⁷⁶⁴ One commenter stated that lending agents frequently provide their clients with benchmark reports based on market data, and that beneficial owners currently benefit from substantial information obtained from lending agents. See RMA Letter, at 2; see also *supra* note 721 and *infra* note 772 and corresponding text. However, even if this is the case, many beneficial owners do not have access to securities lending data, particularly give-to-get Wholesale data, and so could likely not independently benchmark transactions.

market survey data. Consequently, the largest and most centrally connected broker-dealers and lending programs likely have access to better information about the current state of the lending market than other participants, including their customers, the beneficial owners, and end borrowers. This asymmetric information between those on the periphery of the lending market and those in the center, who have access to both Wholesale and Customer market commercial datasets as well as queried data from their connections, may lead to inferior terms for those on the periphery in the form of lower performance and less favorable prices for beneficial owners and end borrowers.⁷⁷¹ Because of the above-described issues with the comprehensiveness and accessibility of existing commercial datasets, the availability of commercial data products for the securities lending market does not alleviate this information asymmetry.

One commenter disagreed with the Commission's view that there are information asymmetries between those in the center of the lending markets and beneficial owners and borrowers on the periphery, because beneficial owners benefit from the information obtained by their lending agents.⁷⁷² However, the Commission believes that, even if lending agents provide beneficial owners with benchmark reports based on commercial securities lending data, this would not eliminate all information asymmetries. The lending agent, or other centrally located entity, has access to the raw data, as well as the potential to influence that data through their own contributions of data to commercial data vendors, whereas the beneficial owner would need to rely on a subset of the processed data that their lending agent chooses to provide to them, if any.

In addition to the specific problem of information asymmetry between various market participants, the lack of comprehensive and widely available data on securities lending activity likely means that the prices at which

securities loans take place are not efficient, relative to the hypothetical case in which complete information about securities lending activity were widely available. Asymmetric information in general deters outsiders from entering the market, as they anticipate not being able to transact on the same terms. This limits both liquidity (because fewer participants enter to transact) and price discovery (because not all information enters prices). Moreover, even lenders with many connections in the securities lending market lack a complete picture of the lending market, implying that the loan prices that they quote may not be completely efficient.

Commenters stated that the lending market for U.S. Government securities is already transparent "because there is sufficient liquidity and demand for loans of these types of securities on platforms and venues that have a high degree of transparency."⁷⁷³ However, the commenters did not provide additional explanation as to why a high degree of liquidity would entail a transparent market, or additional details regarding the transparency of the platforms and venues that trade in U.S. Government securities.

The Commission believes that information asymmetries may still be present in the lending market for U.S. Government securities. Some information about U.S. Government securities loans is available from the commercial securities lending datasets described above. In addition, the Commission understands that information about loans of U.S. Government securities that are awarded to primary dealers through the Federal Reserve Bank of New York's System Open Market Account (SOMA) portfolio is available from the Federal Reserve Bank of New York.⁷⁷⁴ While volume

and rate information from these auctions may be informative to participants about benchmark lending rates, these data do not contain information about activity in the broader U.S. Government securities lending market. Furthermore, certain aggregate data from the Federal Reserve's FR 2004 reports, which collect weekly and daily position, transaction, financing, and fails data of primary dealers in U.S. Government securities and other selected fixed income securities, are published in the Federal Reserve Bank of New York's press release, "Weekly Release of Primary Dealer Transactions."⁷⁷⁵ This dataset contains aggregate volume information about securities lent and borrowed by primary dealers. It does not contain information about lending rates, and also does not contain information about the U.S. Government loans of market participants other than primary dealers.

Furthermore, some market participants may be able to infer some information about the securities lending market from the market for repos;⁷⁷⁶ this is particularly the case for securities with a very active repo market, such as U.S. Government securities. A fixed-

collateral amount, and the identity of the counterparty, *see* Fed. Res. Bank of N.Y., "Historical Transaction Data," available at https://www.newyorkfed.org/markets/omo_transaction_data, last visited Aug. 23, 2023.

⁷⁷⁵ The Federal Reserve's weekly Form FR 2004 provides weekly volume statistics about primary dealers' financing activity in U.S. Government securities, including aggregated volumes in securities lending and repo. *See* Fed. Res. Bank of N.Y., "Primary Dealer Statistics," available at <https://www.newyorkfed.org/markets/courtparties/primary-dealers-statistics>, last visited Aug. 23, 2023.

⁷⁷⁶ In a repo, one party sells an asset, usually a Treasury security or other fixed-income security, to another party with an agreement to repurchase the asset at a later date at a slightly higher price. Repos are a common form of short-term corporate financing. In a repo, the party selling the security is similar to the lender in a securities lending agreement; the party purchasing the security is similar to a borrower in cash collateralized securities lending. In both cases, the transaction is facilitated by cash transferring from the purchaser (borrower) to the seller (lender). In a securities loan, the cash is in the form of collateral while in a repo transaction the cash is payment for the security. In both cases, the purchaser or borrower becomes the legal owner of the security. To unwind the repo or securities loan, cash transfers back to the purchaser in terms of the repurchase cost for a repo or in the form of returned collateral in a securities loan. Repos and securities loans differ in that repos typically are primarily used for short-term financing while securities loans typically are used to gain access to the security itself. Also loans generally allow the lender to recall the security on demand while repos do not. Additionally, the cash received by the seller of a repo is often not re-invested but is used to finance the operations of a company whereas the cash received in a securities loan is generally re-invested in low risk fixed-income securities for the life of the loan. *See, e.g.,* Gary Gorton & Andrew Metrick, *Securitized Banking and the Run on Repo*, 104 J. Fin. Econ 425 (2012).

⁷⁷¹ For example, broker-dealers acting on behalf of customers have an incentive to lend from their inventory, even if lower cost borrowing options exists, because they keep the whole lending fee in such a transaction. The limited data available to the end borrower about the state of the lending market make it difficult for the end borrower to monitor the performance of its broker-dealer for situations like this.

⁷⁷² *See* RMA Letter, at 6 (stating "[w]hile the Proposing Release repeatedly asserts that information asymmetries exist between those 'in the center' of the lending markets and beneficial owners and borrowers on the 'periphery,' in point of fact beneficial owners currently benefit from substantial information obtained by Lending Agents acting on their behalf and pricing remains highly competitive").

⁷⁷³ *See, e.g.,* RMA Letter, at 16; IIB Letter, at 6.

⁷⁷⁴ Through its System Open Market Account (SOMA) portfolio, the Federal Reserve Bank of New York awards U.S. Government securities loans to primary dealers (*i.e.*, financial institutions that are permitted to trade directly with the Federal Reserve System) that have elected to participate in the program based on competitive bidding in a multiple price auction held each business day at noon. Participation by primary dealers is entirely voluntary and summary results are released to the public following each day's auction. *See* Fed. Res. Bank of N.Y., "Securities Lending," available at <https://www.newyorkfed.org/markets/domestic-market-operations/monetary-policy-implementation/securities-lending>, last visited Aug. 23, 2023. For a list of current primary dealers, *see* <https://www.newyorkfed.org/markets/primarydealers>. These data include both daily and historical data on aggregate volumes and rates, as well as transaction-by-transaction data disseminated with a two-year lag. The latter dataset contains identifying information for the security lent (*e.g.*, CUSIP), as well as the lending fee,

term cash collateralized securities loan is economically similar to a repo. Consequently, an investor wishing to gather information about fixed-term loans in the securities lending market could use prevailing terms in the repo market to infer information about borrowing costs for the same securities. However, as majority of securities loans do not have a fixed term,⁷⁷⁷ information from the repo market would only be useful for a small subset of securities loans.

3. Characteristics of the Securities Lending Market

The value of securities available to be loaned generally far exceeds the total value on loan. The OFR Pilot Survey documents that in 2015 only about 10 percent of the value of securities available for lending were on loan.⁷⁷⁸ However, for a specific security it is not always the case that shares available to loan far exceeds shares on loan. For some securities, particularly highly shorted securities, it can be extremely difficult and expensive to find securities to borrow. Securities that are difficult to borrow are said to be “on special” and can have average borrowing costs many times higher than a security that is not on special.⁷⁷⁹

Securities loans also exhibit a wide range of borrowing costs for the same security on the same day. The range of borrowing costs for the same security can be influenced by a number of characteristics, such as the creditworthiness of the borrower, the type of collateral used, and the terms of

the loan.⁷⁸⁰ As discussed in further detail below, the range of borrowing costs likely also represents asymmetric information between the parties to the loan negotiation, such that one party is able to charge a higher price than would be possible if the other party had better information regarding the current loan prices for that security.⁷⁸¹ It may also represent a general lack of price efficiency stemming from incomplete information, as market participants operate without a clear view of the market as a whole.

Table 1 provides descriptive statistics illustrating these characteristics of the securities lending market. The data come from Fidelity National Information Services, Inc. (FIS) and reflect conditions in the Wholesale market for U.S. equity loans on the same days as the OFR Pilot Survey,⁷⁸² for the sample of lenders that provide data to FIS.⁷⁸³

Panel A of Table 1 provides the distribution of utilization rates (defined as the percent of shares currently on loan relative to the total number of shares available for lending). This panel highlights that utilization rates are highly positively skewed. For most stocks supply significantly outstrips demand with median utilization rates of approximately 12 percent. For stocks at the 90th percentile, utilization rates are near 70 percent, implying that an investor seeking to find shares of such a stock to borrow may have a difficult time doing so.

Table 1 only presents utilization rates for equity lending transactions.

However, at least one commenter states that utilization rates vary significantly across asset classes, stating that data from the OFR Pilot Survey show that utilization rates are lower for more individualized securities, such as corporate bonds.⁷⁸⁴ Meanwhile, referencing the OFR Pilot Survey, the commenter pointed out that the utilization rate for U.S. Treasuries and agencies is higher than that of equities.⁷⁸⁵

Panel B of Table 1, which presents borrowing costs in term of lending fees,⁷⁸⁶ shows that the lending fees paid for equity loans exhibit a wide range.⁷⁸⁷ Stocks that are on special can have fees many times higher than the median stock. Specifically, stocks at the 90th percentile of lending fees have an average lending fee of 7 percent per year while the median stock has a lending fee of about 0.6 percent per year. Even when loans involve the same stock, and on the same day, there can be a significant range in fees paid to borrow securities.

Panel C of Table 1 highlights the range of lending fees charged for the same stock on the same day. The range in fees is defined as the difference in the maximum and minimum fees reported to FIS for loans of the same stock on the same day. This range can be quite substantial. For the median stock the range is about three percentage points, or approximately five times the median fee charged for securities lending transactions.

TABLE 1—DISTRIBUTION OF LENDING FEES FOR U.S. COMMON STOCKS *

	p10	p20	p30	p40	Median	Mean	p60	p70	p80	p90	N
Panel A: Distribution of Utilization Rates											
9–Oct–15	1.02	2.94	5.42	8.28	12.06	22.70	17.21	24.83	39.35	68.98	3,638

⁷⁷⁷ The OFR Pilot Survey (*supra* note 136, at 9) estimates that 81% of the loans in their data were open loans for which no maturity date is specified.

⁷⁷⁸ See OFR Pilot Survey, *supra* note 136. Note that the number of shares available for loan must be interpreted carefully. The Commission understands that some beneficial owners may report a supply of shares available that, if borrowed, would exceed the total amount of securities lending they are willing to engage in, so that not all shares reported as available could in fact be borrowed at once. Investment companies that engage in securities lending consistent with SEC staff's current guidance generally limit securities lending to no more than one third of the value of their portfolio on loan at a given point in time. Some investment companies may set individual portfolio limits lower.

⁷⁷⁹ In contrast, easy-to-borrow stocks are often referred to as “general collateral” stocks, which tend to have lower borrowing costs.

⁷⁸⁰ See *supra* note 732 for additional factors pointed out by commenters that could be important drivers of borrowing costs.

⁷⁸¹ See *supra* Part IX.B.2 for a discussion of information asymmetries in the securities lending market, specifically between end borrowers and broker-dealers and between beneficial owners and lending programs. See also *supra* note 771 for an example.

⁷⁸² We limited our sample to the same period of time as the OFR Pilot Survey (Oct. 9, 2015, Nov. 10, 2015, and Dec. 31, 2015) for ease of comparison. Additionally, while the data presented here is limited to equity loans, final Rule 10c–1a applies to loans of both equity and fixed-income securities. The Commission believes that there is a similar lack of transparency for fixed-income loans and equity loans, and thus the same economic structure likely applies to both the fixed-income and equity lending markets.

⁷⁸³ FIS data are collected using a give-to-get model and thus is unavailable for many entities other than those that provide their data to FIS.

⁷⁸⁴ The commenter states that “the corporate and asset-backed debt markets in particular are characterized by relatively small issuance sizes and substantial differences in instrument characteristics,” and that “while the number of publicly traded equity securities of U.S. issuers is around 3,600, there are over two million unique issuances of corporate and government bonds and asset-backed securities in circulation.” See RMA Letter, at 16.

⁷⁸⁵ See RMA Letter, at 16.

⁷⁸⁶ FIS converts rebate rates to fees using by subtracting the rebate rate from the Federal funds rate. See *supra* note 731 and the footnote of Table 1.

⁷⁸⁷ This result is consistent with the academic literature. See, e.g., Dixon, et al., (2021), *supra* note 746. Also consistent with the academic literature, average fees for each stock each day are computed by FIS as the share weighted average fee across all loans outstanding reported to FIS for a given stock on a given day. Stocks are sorted by average fee and percentiles are determined.

TABLE 1—DISTRIBUTION OF LENDING FEES FOR U.S. COMMON STOCKS*—Continued

	p10	p20	p30	p40	Median	Mean	p60	p70	p80	p90	N

* This table provides descriptive statistics using data from FIS on securities lending fees and utilization rates for U.S. Common stocks during sample period that matches the OFR Pilot Survey's sample dates (Oct. 9, 2015, Nov. 10, 2015, and Dec. 31, 2015). For loans collateralized by cash, rebate rates are converted to fees using the conventional method of subtracting the rebate rate from the Federal funds rate. Fees are converted to annual percent. N reports the number of observations from which FIS has reported the relevant statistics. Panel A shows the distribution of utilization rates, where the utilization rate is computed as the percent of shares on loan relative to total shares available for lending. Panel B provides estimates of the distribution of average lending fees for each stock and provides percentile thresholds for lending fees. Since there is a distribution of fees levied for the same stock on the same day, the average fee is computed as the value weighted average fee across all loans for a given stock on a given day. Panel C shows statistics for the range of fees levied for the same stock on the same day defined as the maximum fee minus the minimum fee. In all panels 'Mean' is equal-weighted.

One commenter argued that the Proposing Release offered “no evidence to suggest that lending fees broker-dealers charge are so meaningfully different (after controlling for various commercial factors).”⁷⁸⁸ As the Commission acknowledged in the Proposing Release and continues to acknowledge here, there are a number of factors that can drive variations in borrowing costs including, *e.g.*, the creditworthiness of the borrower.⁷⁸⁹ However, the Commission is unaware of the existence of data that would allow for a full analysis of all possible factors contributing to borrowing costs, and the commenter did not provide any roadmap for performing such an analysis accurately. That the observed range in borrowing costs is likely driven, at least in part, by asymmetric information and a general lack of price efficiency in the securities lending market is supported by academic literature, which finds that asymmetric information drives dispersion in prices, particularly in opaque markets with limited transparency.⁷⁹⁰ One

implication of the results from this literature is that price dispersion should be higher when transparency is lower. Indeed, there is evidence that the dispersion in borrowing costs is higher in securities lending markets with less transparency, in which information asymmetry is expected to be higher. For example, the OFR Pilot Survey shows that the range of lending fees is higher in the U.S. equity lending market than it is in the U.S. Treasury/Agency lending market, where transparency is arguably higher.⁷⁹¹

Furthermore, the Commission views it as unlikely that one of the pricing factors frequently mentioned by commenters, namely the creditworthiness or counterparty risk of the borrower,⁷⁹² can fully explain the large range in borrowing costs. Table 1 shows that the median range of fees is about 400 percent larger than the median fee itself—implying that some investors were paying at least four times as much to borrow the same security on

the same day as other investors.⁷⁹³ Based on staff experience, securities loans are virtually always fully collateralized, and so counterparty risk is unlikely to be sufficient to explain such a large dispersion in borrowing costs.

Other commenters expressed support for the notion that price dispersions in the securities lending market were due to information asymmetries and a lack of informational efficiency.⁷⁹⁴ While at least one commenter questioned the need to improve transparency in the corporate bond and U.S. Treasury/Agency lending market due to structural differences between those markets and the equity market,⁷⁹⁵ there is evidence that there is a dispersion of borrowing costs within these asset classes as well. Information from the OFR Pilot Survey indicate a large dispersion of lending fees and rebates across all asset classes, including for U.S. Treasury/Agency and corporate bond securities.⁷⁹⁶ For the reasons discussed above, the Commission believes that the observed variation in borrowing costs in these

⁷⁸⁸ See Citadel Letter, at 10.

⁷⁸⁹ See Proposing Release, 86 FR 69833.

⁷⁹⁰ See, *e.g.*, Richard C. Green, *Presidential Address: Issuers, Underwriter Syndicates, and Aftermarket Transparency*, 62 J. Fin. 1529 (2007), whose theoretical model shows that, in opaque dealer markets, if the costs of gathering price information are high for some investors, this can result in price dispersion. One key feature of this model is that “the dealings of a particular customer with a dealer are not transparent to other customers,” at 1542. See also Richard C. Green, et al., *Dealer Intermediation and Price Behavior in the Aftermarket for New Bond Issues* (EFA 2006 Zurich Meetings Paper, June 17, 2006) 86 J. Fin. Econ 643, available at <https://ssrn.com/abstract=909352> (retrieved from SSRN Elsevier database), who argue

that differences in investors’ access to information about municipal bond prices leads to a high level of price dispersion.

⁷⁹¹ Specifically, using data from Table 8 of the OFR Pilot Survey and defining the range in lending fees as the difference between the 95th percentile and the 5th percentile, the range in lending fees, averaged across the three days in the OFR Pilot Survey sample, is around 303% of the mean lending fee in the equity lending market, and 234% of the mean lending fee in the Treasury lending market. See *supra* Part IX.B.2 for further discussion of why transparency may be higher in the Treasury lending market.

⁷⁹² See, *e.g.*, HMA Letter at 2, Overdahl Letter at 6, and ISLA Letter at 2.

⁷⁹³ The OFR Pilot Survey at Table 8 provides similar statistics and finds similar dispersion for U.S. Equities.

⁷⁹⁴ See, *e.g.*, James J. Angel Letter, at 2 (expressing his belief that the increased transparency of the rule would reduce price dispersion in the securities lending market implying that a lack of transparency currently causes some of the currently experienced dispersion in fees).

⁷⁹⁵ See RMA Letter, at 16.

⁷⁹⁶ See Table 8 and Table 9 in the OFR Pilot Survey which shows, for example that on October 9, 2015, the dispersion between the 5th and 95th percentile fee for treasuries was 200% of the mean fee, for corporate bonds it was 111%, and for equities it was 319%.

markets is likely also at least partially driven by asymmetric information and a general lack of price efficiency in the securities lending market.

4. Structure of the Securities Lending Market

The securities lending market is made up of borrowers, lenders, and intermediaries that can facilitate a transaction. End borrowers can borrow securities either through their broker-dealers, or by themselves if they maintain their own relationships with lending programs. If they borrow through their broker-dealer, then they transact in the Customer market. If they maintain their own relationships and borrow directly from lending programs, then they transact in the Wholesale market.⁷⁹⁷ Beneficial owners can either supply shares to the lending market by contracting with a lending program, or they can run their own lending program and lend directly to entities such as large hedge funds with which they maintain relationships. In either case,

such a transaction occurs in the Wholesale market. Lenders can also be broker-dealers who lend to end borrowers. These lenders transact in the Customer market.

A market participant such as a short seller wishing to borrow shares usually does so through its broker-dealer, who offers to find shares to borrow as part of its suite of services offered to customers. A broker-dealer may start by providing a security loan to its customer with shares from its own inventory or out of another customer's margin account.⁷⁹⁸ The Commission understands that in order to facilitate the amount of borrowing customers wish to do, a broker-dealer will sometimes have to find other sources of shares. To that end, broker-dealers maintain securities lending relationships with customers in fully paid accounts as well as relationships with various external lending programs.

Additionally, some large institutions, such as banks, credit unions, pension funds, and hedge funds, choose to

maintain their own relationships with lending programs. These entities bypass broker-dealers to search for borrowable shares themselves. This option is not feasible for smaller institutions, who lack both the scale to make it cost effective, and the creditworthiness to be an acceptable counterparty for the lending programs in the absence of an intermediary, *e.g.*, a broker-dealer.

The OFR Pilot Survey estimated that there were approximately \$1 trillion of shares on loan.⁷⁹⁹ The OFR primarily focused on the Wholesale market, and consequently the overwhelming majority of borrowers were broker-dealers; the OFR Pilot Survey does not provide much insight into who the end borrowers are for securities lent by broker-dealers. Figure 1 provides the fraction of total securities on loan by type of borrower based on the OFR Pilot Survey across three trading days in 2015.⁸⁰⁰

Figure 1 Fraction of shares on loan by borrower type (2015)

Source: OFR Pilot Survey of Agent Securities Lending Activity

There is currently no common source that those seeking security loans can use to find shares available to lend, which is why broker-dealers rely on relationships with lending programs to secure loans. This situation has

contributed to high search costs in this market.⁸⁰¹ High search costs imply that transactions cannot take place without a costly effort to find a favorable counterparty. The need for such costly effort can inhibit market efficiency.

One commenter stated that the level of opacity in the securities lending

market does not lead to high search cost or inhibit the efficiency of the securities lending market, because the level of detail in data provided by data vendors has improved drastically, the number of data vendors in the market has been growing, and the vast majority of parties in securities lending markets have

⁷⁹⁷ See *supra* note 708 for further discussion of the distinction between Wholesale and Customer loans.

⁷⁹⁸ The notion that broker-dealers will first source shares from internal inventory before accessing lending markets was mentioned in the Proposing

Release (see Proposing Release, 86 FR 69834) and was supported by at least one comment. See, *e.g.*, James J. Angel Letter, at 4 (stating that if "the broker has shares available for lending from its customer margin accounts, it does not need to go out and borrow any more shares.").

⁷⁹⁹ See OFR Pilot Survey at Table 1.

⁸⁰⁰ These dates are Oct. 9, 2015, Nov. 10, 2015, and Dec. 31, 2015.

⁸⁰¹ See, *e.g.*, Kolasinski (2013), *supra* note 736.

access to one or more sources of data.⁸⁰² While these facts are generally associated with declining search costs and increased efficiency, they do not, by themselves, imply low search costs or an efficient market. As discussed above, the Commission continues to believe that the datasets provided by commercial data vendors are characterized by incomplete and potentially biased data.⁸⁰³ As a result, market participants that want information on whether a given loan price or quote is competitive, or how a given lending agent or broker-dealer is performing relative to a benchmark, may need to consult multiple datasets, if they have access to such data, or request and receive multiple quotes in order to confirm that a given quote is consistent with market conditions. A need to consult multiple sources of information implies high search costs. When the cost of acquiring additional information is high, it may not be economical to acquire the information, resulting in less efficient terms for loans. The Proposing Release also cited academic research characterizing the securities lending market as having high search costs, which was not rebutted by the commenter.⁸⁰⁴ Consequently, the Commission continues to believe that, despite the availability of commercial datasets, opacity in the securities lending market contributes to high search costs and inefficiencies in that market.⁸⁰⁵

Broker-dealers possess some market power over their customers. Generally, broker-dealers assist investors in finding shares to borrow as part of a suite of services and the cost of switching to a new broker-dealer can be high. This relationship can make it difficult for investors to change broker-dealers if they underperform in one area because it is not just a securities lending relationship that would be changed, but the whole suite of broker-dealer services that would be affected.⁸⁰⁶

Additionally, the relationship nature of the lending market favors larger

broker-dealers who can maintain high-volume relationships with more lending programs. The limited availability of comprehensive data makes it difficult for customers to evaluate the performance of broker-dealers.⁸⁰⁷ Customers as well as lenders thus rely on relationships and reputation, a situation that also tends to favor larger broker-dealers.

The primary sources of shares to loan in the Wholesale market are long-term investors such as investment firms, pension and endowment funds, governmental entities, and insurance companies. These entities generally make their shares available to lend either through a lending program run by a lending agent or by running their own lending program. Broker-dealers borrow shares from lending programs in order to facilitate clearing and settlement on a net-basis, though they may additionally source shares for this purpose from their own inventory, from fully paid shares, and from customer margin accounts.⁸⁰⁸

As described above, a beneficial owner seeking to lend shares will generally provide those shares to a lending agent, who runs a lending program. There are two broad categories of lending programs: custodian banks and third-party lending programs. In the case of custodian banks, the lending program is generally offered as part of their general custodian services.

Both types of lending programs will generally pool shares across accounts with which they have lending agreements to create a common pool of shares available to lend. As shares are lent out, the revenue earned from the pool of shares is generally distributed across all accounts contributing shares to the pool of shares on loan on a pro-rata basis. Pooled lending programs generally split the fees generated from lending with the beneficial owners. Based on the staff's experience, the Commission believes that the lending program will usually take about a third of the fees earned. In the case of

custodian banks, the custodian bank may, rather than return the lending revenue directly to the beneficial owner, instead apply the beneficial owner's portion of the lending revenue to other fees charged by the custodian bank for other services.

Lending programs typically indemnify the beneficial owner from default by the borrower. This indemnity gives the lending program an incentive to ensure the creditworthiness of the borrower, and a lending program may assess higher fees to borrowers it deems as less creditworthy.

Over the past two decades, auction-based security lending has become an alternative for lender-borrower interactions. In this setting, unlike with the directed lending programs, positions of different beneficial owners are not pooled to cater to security-specific demand from borrowers. Instead, after determining the desired income streams, the lender's entire portfolio, or its segments, are offered via blind single-bid auctions.

In some cases, a beneficial owner may choose to set up its own lending program. This course is more common among very large funds that have the resources to build up the expertise necessary to operate a lending program.⁸⁰⁹

The current relationship and network structure of lending programs and broker-dealers favors larger lending programs that have the resources to maintain relationships with more and larger broker-dealers. Thus, the Commission believes that the market for lending services is likely dominated by a few large lending programs, including those run by the large custodian banks.

The OFR Pilot Survey estimated that as of the latter part of 2015 there were approximately \$9.5 trillion worth of shares available for lending.⁸¹⁰ Figure 2 provides a breakout of the percent of shares available for lending provided by the various entities.

⁸⁰² See IHS Markit Letter, at 13.

⁸⁰³ See *supra* Part IX.B.2 for further discussion of issues related to the current availability and comprehensiveness of securities lending data.

⁸⁰⁴ See Kolasinski (2013), *supra* note 736, cited in the Proposing Release with regard to search costs. See Proposing Release, 86 FR 69805, 69831, and 69832.

⁸⁰⁵ See discussion on this point in *supra* Parts IX.B.2 and IX.B.3.

⁸⁰⁶ Some entities, such as some hedge funds, have multiple prime brokers. For such institutions it

would be less difficult to switch between broker-dealers if one is performing poorly as they could redirect securities lending business to their top performing prime-broker.

⁸⁰⁷ See *supra* Part IX.B.2 for further discussion of issues related to the current availability and comprehensiveness of securities lending data.

⁸⁰⁸ See *supra* note 798 and corresponding text for further discussion of broker-dealers' sources of shares for securities loans.

⁸⁰⁹ Based on a review of N-CEN reports, the Commission estimates that 226 (out of 684) lenders do not employ a lending agent. See *infra* Part X.

Most of these lenders are likely to operate their own lending programs.

⁸¹⁰ Commercial vendors typically report a value for securities available to loan that is larger than what is reported in the OFR Pilot Survey. This difference is likely due to sample construction. The commercial vendors likely have a larger sample of lending programs to draw from, particularly the lending programs based outside of the U.S. See also *supra* note 778 for a discussion of issues related to estimating the number of shares available for lending.

Figure 2: Sources of lendable shares (2015)

Source: OFR Pilot Survey of Agent Securities Lending Activity

5. Structure of the Market for Securities Lending Data and Analytics

The market to collect and disseminate securities lending data is an outgrowth of the market for securities lending market analytics.⁸¹¹ This market consists of a few established vendors that specialize in geographic areas (*i.e.*, U.S. and non-U.S.) but seek to compete in all geographic areas. Most vendors collect the data to support the analysis business in which they provide data-based service to institutions and other lending programs. Others collect data through their facilitation of security loans. As such, the data vendor business is often an outgrowth of another business. The Commission understands that the current practice by commercial data vendors is to provide preliminary statistics on the same day based on the intraday data collected by the vendors, while the main data are disseminated one day later.

The Commission believes that the data provided by the various data vendors operating in the give-to-get Wholesale data market are largely comparable.⁸¹² However, the entities

providing data to the vendors are also their customers. This relationship limits the market power of the vendors with respect to their clients who provide data but results in the clients' incentives limiting the competitiveness of the market.⁸¹³ This results in the market being largely inaccessible for many entities that could use the data for their own benefit or the benefit of the market as a whole.⁸¹⁴

The give-to-get model for securities lending data is a significant barrier to entry to any firm seeking to provide analytics services regarding Wholesale loans. Firms cannot provide analytics services without data, and the biggest three data vendors have established relationships with data contributors to collect data. Such data contributors have an incentive to also control who can access that data. Consequently, the Commission understands that the market for securities lending data and securities lending analytics in the Wholesale space is largely concentrated among the three biggest data vendors.

One commenter stated that the give-to-get model is "is not the industry standard" in the securities lending data market and pointed out that there are some commercial securities lending datasets that are available to all subscribers.⁸¹⁵ The Commission

understands that the collection of these data largely relies on surveying Customer market participants about their borrowing experiences. Data vendors then aggregate and sell these data, or derivative products that combine the survey data with other data sources to provide derived metrics in areas such as short selling. For example, the Commission staff understands that, based on interactions with vendors of such data, that the customer market survey data are used largely as an input to proprietary algorithms that combine information from multiple data sources—such as FINRA's bimonthly short interest—to produce a short selling metric that is then used by consumers.⁸¹⁶ Building relationships with a large number of Customer market participants is a significant barrier to entry and thus the Commission understands that data provision and analytics regarding customer market survey data is concentrated among the top two biggest data vendors.

6. Short Selling Transparency

Multiple commenters stated that granular securities lending data generally provide information about investors' short selling positions and strategies.⁸¹⁷ This section provides

⁸¹¹ See the business model descriptions in IHS Markit's 2021 comment letter responding to FINRA's Regulatory Notice 21-19, available at https://www.finra.org/sites/default/files/NoticeComment/IHS%20Markit_Paul%20Wilson_21-19_9.30.2021%20-%20IHS%20Cmt%20Ltr%20re%20FINRA%20RFC%20Short%20Interest%20Position%20Reporting.pdf.

⁸¹² See Truong X. Duong, et al., *The Information Value of Stock Lending Fees: Are Lenders Price Takers?*, 21 Rev. Fin. 2353, 2353–2377 (2017) ("Duong, et al., (2017)"), who provide a comparative analysis of the datasets of two of the main

commercial data vendors and find very high correlations between the values presented in the different datasets.

⁸¹³ See *supra* Part IX.B.2 for further discussions of data providers' incentives when providing data to data vendors under a give-to-get model.

⁸¹⁴ See *supra* Part IX.B.2 for further discussion of the current limits to transparency in the securities lending market.

⁸¹⁵ See S3 Partners Letter, at 5.

⁸¹⁶ See *infra* Part IX.B.6 for further discussion of FINRA's bimonthly short interest data.

⁸¹⁷ See, e.g., Overdahl Letter, at 4, 9; Citadel Letter, at 5–6. One commenter stated their belief that the rule would not provide further transparency into the short interest market because "not all securities loan trades facilitate a short sale, and that the securities lending market is not a mirror of the short interest market"; See IHS Markit Letter, at 3. See *supra* Part IX.B.1 for a discussion

information about existing sources of short selling data to facilitate an analysis of the impact of the Rule on short selling transparency.

Securities Lending Data

Because of the need to borrow securities to facilitate a short sale, securities lending data can be used to gain insight into short interest and short sentiment, and market participants use both give-to-get Wholesale data and customer market survey data on Customer loans to gain insights into short selling. For example, some academics have used securities lending data to study short selling in published research.⁸¹⁸ Additionally, while access to Wholesale market data is generally limited,⁸¹⁹ the Commission understands that some third-party data providers combine Wholesale market data with other sources of short selling data, such as bimonthly short interest data, to provide retail clients with estimated short selling metrics. The Commission also understands that commercial data vendors use securities lending data as an input to proprietary algorithms that combine information from multiple data sources—such as biweekly short interest—to produce a short selling metric that is then used by consumers.

Data on Wholesale securities loans provide only a noisy approximation of short interest at the security level. This is because Wholesale loans are made largely to facilitate clearing and settlement on a net basis at a clearing broker, rather than by transaction or position. Thus, Wholesale loans are not traceable to individual short sellers. Further, the Commission understands that broker-dealers will usually source shares to meet their net clearing and settlement requirements from other sources before engaging in Wholesale loans.⁸²⁰

of the potential reasons for borrowing and lending securities apart from to facilitate a short trade.

⁸¹⁸ See, e.g., Steven Lecce, et al., *The Impact of Naked Short Selling on the Securities Lending and Equity Market* (Macquarie Business School Research Paper, Feb. 1, 2012) at 83, available at <https://ssrn.com/abstract=3591994> (retrieved from SSRN Elsevier database) stating that “securities lending is a commonly used proxy for the level of covered short selling”; see also, e.g., Gene D’Avolio, *The Market for Borrowing Stock*, 66 J. Fin. Econ. 271 (2002).

⁸¹⁹ See *supra* Part IX.B.2 for further discussion of the give-to-get model.

⁸²⁰ These sources include, e.g., their own inventory, customer margin accounts, and fully paid accounts at the broker-dealer with lending agreements in place. See *supra* note 798 and corresponding text for further discussion. Also, the fact that give-to-get Wholesale market data are not comprehensive (see *supra* Part IX.B.2 for further discussion), means that there is additional noise with regards to using Wholesale market data to estimate short sale information.

The Commission believes that information about Customer loans is more likely to be informative about short selling activity than information about Wholesale loans.⁸²¹ This is because, unlike Wholesale loans, Customer loans are used to facilitate individual short positions. The size of a Customer loan when first created is the same as the size of a short position as of the end of the day on which the short position was created. Should the customer increase or decrease the size of their short position, the Commission understands that the original loan would be modified accordingly. Thus, individual Customer loans can be tracked to reveal the size and changes in individual short positions. However, existing Customer market datasets, like Wholesale market datasets, lack comprehensiveness.⁸²²

Most commercially available datasets are currently produced with a one-day lag. As a result of the difference in settlement cycles between the equity and securities lending market, there is therefore typically a three-day lag between the availability of the securities lending data and the change in short interest that corresponds to the securities loans.⁸²³

Bimonthly Short Interest Data From FINRA

One of the primary data sources for information about aggregate short positions is the bimonthly short interest data collected by FINRA.⁸²⁴ FINRA collects aggregate short interest information in individual securities on a bimonthly basis as the total number of shares sold short in a given stock as of

⁸²¹ This is also supported by one commenter, who states that, “there is a perfect correlation between a short sale and the associated Short Sale Linked Activity, which facilitates the customer fulfilling the delivery obligations arising from the short sale.” See Citadel Letter, at 5. The commenter states that by “Short Sale Linked Activity,” they are referring to what the Proposing Release calls the “retail market.” See Citadel Letter, at 1. This is equivalent to what is referred to as the Customer market in this release.

⁸²² See *supra* Part IX.B.2 for further discussion of why the Commission believes that Customer market survey datasets are not comprehensive.

⁸²³ See *supra* note 738 and corresponding text. This lag will decrease to two days when equity settlement moves to T+1 on May 28, 2024.

⁸²⁴ See, e.g., Division of Economic and Risk Analysis, *Short Sale Position and Transaction Reporting* 6–7, (June 5, 2014), at 17–18, available at <https://www.sec.gov/files/short-sale-position-and-transaction-reporting0.pdf>. This is a study of the Staff of the U.S. Securities and Exchange Commission, which represents the views of Commission staff, and is not a rule, regulation, or statement of the Commission. The Commission has neither approved nor disapproved the content of this study and, like all staff statements, it has no legal force or effect, does not alter or amend applicable law, and creates no new or additional obligations for any person.

the middle and end of each month.⁸²⁵ In the case of U.S. exchange-listed stocks, FINRA shares the data with the listing exchange.⁸²⁶ FINRA then publishes short interest data for all exchange-listed and OTC equity securities on its Equity Short Interest Data page free for the investing public.⁸²⁷ Specifically, aggregate positions in each security are provided for publication on the seventh business day after the reporting settlement date.⁸²⁸

FINRA computes short interest using information it receives from its broker-dealer members pursuant to FINRA Rule 4560 reflecting all trades cleared through clearing broker-dealers.⁸²⁹ FINRA Rule 4560 generally requires that broker-dealers that are FINRA members report “short positions” in customer and proprietary firm accounts in all equity securities twice a month through FINRA’s web-based Regulation Filing Applications (RFA) system.⁸³⁰ FINRA defines “short positions” for this purpose simply as those resulting from “short sales” as defined in Rule 200(a) of Regulation SHO under the Exchange Act.⁸³¹ Member firms must report their short positions to FINRA regardless of position size.⁸³²

These short interest data are widely available and are used by academics and other market participants. These short interest data are found to predict future stock and market returns over the

⁸²⁵ Specifically, the mid-month short interest report is based on short positions held on the settlement date of the 15th of each month or, if the 15th falls on a weekend or holiday, the previous business day. The end-of-month short interest report is based on short positions held on the last business day of the month on which transactions settle. See FINRA, *Equity Short Interest Data Catalog*, available at <https://www.finra.org/finra-data/browse-catalog/equity-short-interest>, last visited Aug. 23, 2023.

⁸²⁶ See FINRA, *Short Interest—What It Is, What It Is Not* (Jan. 25, 2023), available at <http://www.finra.org/investors/insights/short-interest>.

⁸²⁷ See *id.* See also FINRA, *Equity Short Interest Data*, available at <https://www.finra.org/finra-data/browse-catalog/equity-short-interest/data>, last visited Aug. 24, 2023.

⁸²⁸ See FINRA *Equity Short Interest Data Catalog*, *supra* note 825. See also FINRA, *Short Interest Reporting*, available at <https://www.finra.org/filing-reporting/regulatory-filing-systems/short-interest>.

⁸²⁹ *Id.* (Short interest for a listed security at any date reported by FINRA is “a snapshot of the total open short positions in a security existing on the books and records of brokerage firms on a given date.”).

⁸³⁰ FINRA Rule 4560 excludes short sales in “restricted equity securities,” as defined in Rule 144, from the reporting requirement.

⁸³¹ See FINRA Rule 4560(b)(1). See *supra* note 301 for the definition of a short sale.

⁸³² See FINRA, *Short Interest Reporting Instructions* (reporting instructions to FINRA member firms), available at <https://www.finra.org/filing-reporting/short-interest/regulation-filing-applications-instructions>, last visited Aug. 23, 2023.

monthly and annual horizons, suggesting that the bimonthly short interest data capture short selling strategies based on fundamental research.⁸³³ However, the transparency offered by these data is limited in at least two ways. First, the information content is delayed by at least seven business days, and also does not provide insight into the timing with which short positions are established or covered within the two-week reporting period. This precludes the possibility of understanding the behavior of aggregate short selling in the two weeks leading up to the reporting date of the positions. Second, given that the data are aggregated at the security level, they prevent the public from understanding certain aspects of the underlying proprietary short selling strategies. For example, the data can't inform on whether short positions are distributed across a large or small number of market participants.

Short Selling Volume and Transaction Data From SROs

This section discusses data that exist on daily and intraday short volume data, which provide different information relative to the bimonthly short interest data discussed above.⁸³⁴ The bimonthly short interest data provides an aggregate measure of outstanding short interest whereas the data discussed in this section provides information about the flow of short sales in the market. It is less useful in determining total short interest outstanding because it is not accompanied by data regarding when short sales are covered but allows market participants to observe the actual trades of short sellers.

Since 2009, many SROs have been publishing two short selling datasets, including same-day publication of daily aggregated short sale volume in individual securities⁸³⁵ and publication

of short sale transaction information with a delay of up to two months.⁸³⁶ Some SROs make the historical daily short volume data available to market participants at a fee.⁸³⁷

Despite offering higher granularity, there is a concern that the SRO short volume data may over-represent the total volume of short sales occurring in the market. This is because Regulation SHO provides specific criteria regarding what is a long sale.⁸³⁸ If a market participant is unclear whether their trade would meet all the requirements at settlement to be marked a long sale, then they may choose to mark the trade as short to not run afoul of Regulation SHO requirements, even if the trade is likely economically equivalent to a long sale.⁸³⁹ For instance, the market

security on all short sale trades executed and reported to a FINRA reporting facility during normal market hours) and FINRA, *Information Notice: Publication of Daily and Monthly Short Sale Reports* (Sept. 29, 2009), available at <http://www.finra.org/web/groups/industry/@ip/@reg/@notice/documents/notices/p120044.pdf>.

⁸³⁶ See FINRA, *Monthly Short Sale Transaction Files*, available at <https://www.finra.org/finra-data/browse-catalog/short-sale-volume-data/monthly-short-sale-volume-files> (providing detailed trade activity of all short sale trades reported to a consolidated tape), last visited Aug. 24, 2023. See also Investor.gov, *Short Sale Volume and Transaction Data*, available at <https://www.sec.gov/answers/shortsalevolume.htm>. Additional transaction data have been available at various times, including transaction data from the Regulation SHO Pilot, which have been discontinued by most exchanges in July 2007 when the uptick rule was removed. See Release No. 34-55970 (June 28, 2007), 72 FR 36348 (July 3, 2007), available at <https://www.sec.gov/rules/final/2007/34-55970.pdf>. The Pilot data comprised short selling records available from each of nine markets: American Stock Exchange, Archipelago Exchange, Boston Stock Exchange, Chicago Stock Exchange, NASD, Nasdaq Stock Market, New York Stock Exchange, National Stock Exchange, and the Philadelphia Stock Exchange. See SEC Division of Trading and Markets, *Regulation SHO Pilot Data FAQ*, available at <https://www.sec.gov/spotlight/shopilot.htm#pilotfaq>.

⁸³⁷ See, e.g., NYSE.com, *TAQ Group Short Sale & Short Volume*, available at <https://www.nyse.com/market-data/historical/taq-nyse-group-short-sales> (for short sale data relating to all NYSE owned exchanges). See *Nasdaqtrader.com*, *Short Sale Volume and Transaction Reports*, available at <https://nasdaqtrader.com/Trader.aspx?id=shortsale> (for short sale data for Nasdaq exchanges); See also Chicago Board Options Exchange (Cboe.com), *U.S. Equity Short Volume and Trades* (for Cboe exchanges), available at <https://datashop.cboe.com/us-equity-short-volume-and-trades>.

⁸³⁸ Rule 200(g) of Regulation SHO specifies when an order can be marked as long. See also Section III.B (adopting release of Regulation SHO), available at <https://www.sec.gov/rules/final/34-50103.htm#VI>.

⁸³⁹ See *Proposed rule: Short Position and Short Activity Reporting by Institutional Investment Managers*, Release No. 34-94313 (Feb. 25, 2022) 87 FR 14950, 14989 (Mar. 16, 2022) at note 230 (citing 2009 Letter from SIFMA commenting on an alternative short sale price test, and expressing concern that compliance with Regulation SHO short selling marking requirements “will result in a substantial over-marking of orders as “short” in

participant may be deemed to own the security but does not reasonably believe they can deliver the security in time for settlement, and thereby must mark the order as short regardless of their ownership of the security. Aggregate short selling volume data and short selling transactions data typically have different lags with which they are available, though aggregate short selling volume data can be disseminated as early as the same day of the short sale.⁸⁴⁰

B. Economic Effects of the Final Rule

1. Benefits of Increased Transparency in the Securities Lending Market

The Commission believes that the primary impact of final Rule 10c-1a will be to increase transparency in the securities lending market through improvements to the comprehensiveness, breadth, accuracy,⁸⁴¹ and accessibility of securities lending data. These impacts will reduce information asymmetries in the securities lending market and improve informational efficiency leading to a more efficient securities lending market.⁸⁴²

Final Rule 10c-1a will reduce information asymmetries and improve informational efficiency in three ways. First, the data provided by final Rule 10c-1a will be more comprehensive than the data currently offered by commercial data vendors because it will not rely on voluntary data submissions but will result from mandated disclosure from both the Wholesale and Customer segments of the market.⁸⁴³ Second, Rule 10c-1a data will improve

situations where firms are, in fact, “long” the securities being sold”).

⁸⁴⁰ For example, FINRA posts daily aggregate short volume data for each security no later than 6:00 p.m. ET of the same day on the relevant trade date; see FINRA, *Daily Short Sale Volume Files*, *supra* note 835. Meanwhile, FINRA posts files including the transaction time, price, and number of shares for every off-exchange short sale transaction in an exchange-listed stock only on a monthly basis; see FINRA, *Monthly Short Sale Volume Files*, *supra* note 836. See also FINRA, *Information Notice 5/10/19: Understanding Short Sale Volume Data on FINRA's website* (May 10, 2019), available at <https://www.finra.org/rules-guidance/notices/information-notice-051019>.

⁸⁴¹ Accuracy in this sense refers to less potential bias in the loans reported and thus in the statistics obtained from the loans reported. See *supra* Part IX.B.2 for a discussion of bias in existing securities lending datasets and how this can lead to inaccurate inference.

⁸⁴² The Commission expects that the benefits of final Rule 10c-1a will be similar for all reportable securities lending markets that have a similar need for additional market transparency. It is possible that some markets may be more transparent than others. See *infra* note 958 for further discussion.

⁸⁴³ See *supra* Part IX.B.2 for further discussion of selection issues in commercial securities lending databases based on voluntary data submissions.

⁸³³ See, e.g., Peter N. Dixon & Eric K. Kelley, *Business Cycle Variation in Short Selling Strategies: Picking During Expansions and Timing During Recessions*, 57 J. Fin. Quantitative Analysis 3018 (2022); see also Ekkehart Boehmer, et al., *The Good News in Short Interest*, 96 J. Fin. Econ., 80–97 (2010); Stephen Figlewski, *The Informational Effects of Restrictions on Short Sales: Some Empirical Evidence*, 16 J. Fin. Quantitative Analysis 463 (1981).

⁸³⁴ See *supra* Part IX.B.6 for more information about FINRA's bimonthly short interest data.

⁸³⁵ See Division of Economic Research and Analysis, Securities and Exchange Commission (DERA), *Short Sale Volume and Transaction Data* (June 5, 2014), available at <https://www.sec.gov/answers/shortsalevolume.htm>; (showing hyperlinks to the websites where SROs publish these data). See also FINRA, *Daily Short Sale Volume Files*, available at <https://www.finra.org/finra-data/browse-catalog/short-sale-volume-data/daily-short-sale-volume-files> (providing aggregated volume by

informational efficiency by including certain data fields that are not currently offered by commercial data vendors, contributing to the breadth of available securities lending data. In addition, Rule 10c-1a data will contain detailed security loan modification information. Third, the final rule will expand the accessibility of the data by allowing all market participants to access Rule 10c-1a data, possibly subject to a fee.⁸⁴⁴

The increased transparency from final Rule 10c-1a will result in several notable economic benefits. First, the final rule will reduce information asymmetries, which will benefit investors by reducing borrowing costs, increasing price efficiency, and increasing competition between broker-dealers and lending programs.⁸⁴⁵ Second, by reducing the borrowing costs for some securities, the final rule will lower the cost of short selling these securities and improve market efficiency. Third, improvements in the information available to various market participants will lead to a variety of benefits for these participants, including increased profits and reduced costs of business due to easier access to information and more informed decisions.

Reduction in Information Asymmetry

The Commission believes that the transparency created by final Rule 10c-1a will reduce information asymmetries between more centrally connected securities lending market participants and those on the periphery. Specifically, it will reduce the information asymmetries between broker-dealers and end borrowers, and between beneficial owners and lending programs. This will result in increased competition between dealers and between lending programs, ultimately leading to better loan terms for some securities.⁸⁴⁶

The Commission believes that the transparency created by the final rule will benefit end borrowers by reducing the information disadvantage they have with their broker-dealers when borrowing shares. Most security loans

obtained by end borrowers are facilitated through broker-dealers.⁸⁴⁷ Rule 10c-1a data will allow end borrowers to determine the extent to which their broker-dealers are obtaining terms that are better, worse, or consistent with current market conditions for loans with similar characteristics. It will facilitate this comparison by providing comprehensive transaction-by-transaction information about the cost to borrow and other loan characteristics that are currently mostly unavailable to end borrowers.⁸⁴⁸ For example, end borrowers will be able to compare the lending terms provided by their broker-dealers to the terms of similar loans, such as loans with the same collateral and borrower types. End borrowers will also be able to compare loans of similar sizes, though with a delay of 20 business days. The Commission believes that, despite the delay in dissemination, loan size information will still be useful for end borrowers, who can use this information to compare the prices of their loans to other loans with similar terms (e.g., size, collateral type, loan type, etc.), that were effected approximately one month prior. Additionally, to the extent that an RNSA publicly disseminates daily volume-weighted cost-to-borrow statistics as part of its requirement to disseminate daily aggregate information, these statistics will provide end borrowers with access to information about loan prices that incorporates information about loan size information even prior to the public dissemination of loan sizes.⁸⁴⁹

Similarly, the Commission believes that the final rule will benefit beneficial owners by reducing their information

disadvantage with respect to their lending programs. By allowing beneficial owners to more easily benchmark their lending programs through access to data on loan prices and other characteristics of recently transacted security loans, as well as the statistics provided by an RNSA on the next business day, the final rule will provide beneficial owners with an improved ability to determine the quality of the loans that their lending program executes on their behalf relative to other loans with similar characteristics. The ability to view the cost to borrow in both the Customer markets and Wholesale markets will also provide beneficial owners with additional information that they can use to benchmark the performance of their lending programs.⁸⁵⁰

Financial institutions such as banks and broker-dealers use the securities lending market in order to manage collateral needed for other transactions.⁸⁵¹ These entities can face the same asymmetric information concerns as do end borrowers and beneficial owners, and thus an increase in market transparency may lead financial institutions to receive better loan terms, and thus improve their ability to manage collateral. Banks also borrow securities to manage their balance sheets,⁸⁵² and the Commission believes that this too will become easier as a result of the final Rule 10c-1a due to a more competitive lending market, leading to the benefit of improved balance sheet management by banks.

At the same time, as access to securities lending data increases, competition for securities lending analytics may increase as well.⁸⁵³ Increased competition for and availability of securities lending analytics would further reduce information asymmetries by reducing the cost of and increasing access to securities lending analytics for both end borrowers and beneficial owners.

If an end borrower or beneficial owner believes that a particular broker-dealer or lending agent is consistently underperforming, the final rule will provide that market participant with the

⁸⁴⁴ See *infra* Part IX.C.3 for a discussion of the fees that an RNSA could charge to data consumers. See also *supra* Part VII.K.3 for further discussion of final Rule 10c-1a(i), which allows an RNSA to “establish and collect reasonable fees, pursuant to rules that are promulgated pursuant to section 19(b) and Rule 19b-4 of the Exchange Act.”

⁸⁴⁵ Consequently, some market participants may see returns decrease due to more competitive fee pricing, which may lower securities lending revenues for some lenders. See *infra* Part IX.C.4 for further discussion.

⁸⁴⁶ A reduction in the cost to borrow may result in lower securities lending revenues for some lenders. See *infra* Part IX.C.4 for further discussion.

⁸⁴⁷ See *supra* Part IX.B.4 for further information about the market for borrowing services.

⁸⁴⁸ See *supra* Part IX.B.2 discussing the lack of comprehensiveness of both Customer market data collected through Customer market surveys and Wholesale market data collected using a give-to-get model, the latter of which is also often unavailable to end borrowers due to usage restrictions.

⁸⁴⁹ See final Rule 10c-1a(g)(5), requiring an RNSA to disseminate aggregated daily information. In general, the ability of market participants to use the aggregate information provided by an RNSA to compare loan rates across similar loans may depend on the specific form of loan rate information that an RNSA chooses to publish. For example, if an RNSA chooses to publish cost to borrow statistics that are very granular (e.g., it provides separate statistics for Customer and Wholesale loans and/or according to other loan characteristics), then end borrowers would be able to benchmark their transactions to these statistics with increased accuracy. To the extent that an RNSA chooses to publish less granular statistics, then the end borrower could still benchmark relative to the cost to borrow statistics provided by an RNSA, but the benchmark would be noisier. See also *infra* Part IX.C.1 for further discussion of the Commission’s uncertainty related to an RNSA’s discretion.

⁸⁵⁰ See, e.g., *supra* note 767 and corresponding text describing how a market participant engaged in Wholesale lending stated in an interview that they feel unable to benchmark the performance of their lending programs using commercial data because they have very little insight into the Customer market.

⁸⁵¹ See *supra* Part IX.B.1 for further discussion of financial institutions’ use of securities loans for collateral and balance sheet management.

⁸⁵² See *id.*

⁸⁵³ See *infra* Part IX.D.2 for a discussion of the expected impact of the final rule on competition for securities lending data analytics services.

tools to identify such underperformance and address it with their broker-dealer or lending agent, or to find a new broker-dealer or lending agent.⁸⁵⁴ For example, a beneficial owner or end borrower could use the transaction-by-transaction Rule 10c-1a data to create a bespoke benchmark of recently transacted loans that are similar to a loan they wish to effect, and compare this benchmark to the terms offered by their lending agent or broker dealer for that loan. A beneficial owner or end borrower could also use the daily information disseminated by an RNSA about the distribution of loan prices to assess how the terms offered by their broker-dealer or lending agent compare more generally to the distribution of recently transacted loans in the same security. An increased ability to compare loan performance will increase competition between broker-dealers and between lending agents, which will ultimately improve lending terms for both end borrowers and beneficial owners.⁸⁵⁵

The Commission expects improved terms to be concentrated among securities that are “on special” and have higher borrowing costs. This is because general collateral securities lending is a low margin business and lending supply for these securities far outstrips lending demand.⁸⁵⁶ Combined, these two factors mean that there is likely not much room for fees to improve for general collateral securities.⁸⁵⁷ As securities become on special (*i.e.*, harder to borrow), lending rates and utilization rates increase. Higher utilization rates mean that there are fewer shares available to borrow and lend. In this environment, high search

costs and asymmetric information are significant contributors to both the level and dispersion of fees, and reducing asymmetric information has a better chance of leading to better terms.⁸⁵⁸ Beneficial owners that currently lend shares of hard-to-borrow securities for rates that are consistently below the market average could receive higher lending rates for these securities as their lending agents both have better access to information and become more accountable for their performance due to beneficial owners also having access to the same information. Similarly, end borrowers whose borrowing costs are currently higher than the market average for hard-to-borrow securities may see their borrowing costs decrease as both their broker-dealers’ information access and their ability to monitor to their broker-dealers improve. These two effects suggest that the dispersion of borrowing costs for hard-to-borrow securities will diminish.

That transparency can result in improved market quality is consistent with the experience in other markets. The implementation of TRACE improved transparency in the corporate bond market, and research has shown that TRACE lowered the average cost of transacting and increased competition between dealers in this market.⁸⁵⁹ Additionally, recent research from Brazil has shown that improving securities lending transparency led to lower fees, increased liquidity, and

increased price efficiency in that country.⁸⁶⁰ In both cases, researchers have identified reduced information asymmetry as a key mechanism leading to improved market outcomes.⁸⁶¹

While some commenters supported the applicability of evidence from TRACE,⁸⁶² other commenters questioned the applicability of evidence from TRACE⁸⁶³ and from the Brazilian policy change.⁸⁶⁴ Specifically, commenters argued that, because bond transactions are irrevocable and fungible, the identity and characteristics of the counterparty are less relevant to prices in bond transactions than in securities loans, and thus the Commission’s reliance on TRACE studies to draw inferences about the securities lending market is misplaced.⁸⁶⁵ At least one commenter disputed the Commission’s use of the Brazilian policy change to draw inferences about the potential benefits of proposed Rule 10c-1 because the Brazilian policy “did not involve the trade-by-trade disclosure of stock lending terms” and is thus not comparable to the Rule.⁸⁶⁶ The Commission continues to believe that both events provide meaningful information about the potential impacts of the final Rule 10c-1, as evidence from both events illustrates how a reduction in asymmetric information between market participants has the effect of improving market quality.

First, the introduction of TRACE, which introduced transaction-by-transaction transparency into a market that previously did not have such transparency, represents a policy change that is markedly similar to that under the final Rule 10c-1a. The Commission acknowledges that the market setting for TRACE is different from that of final Rule 10c-1a, for example, because of the

⁸⁵⁸ See, e.g., Kolasinski (2013) (finding that when demand for lendable shares outstrips supply, lending fees increase and the dispersion of lending fees is high, particularly when search costs are high).

⁸⁵⁹ See, e.g., Amy K. Edwards, et al., *Corporate Bond Market Transaction Costs and Transparency*, 62 J. Fin. 1421, 1421–1451 (2007); Michael Goldstein, et al., *Transparency and Liquidity: A Controlled Experiment on Corporate Bonds*, 20 Rev. Fin. Stud. 235 (2007); Hendrik Bessembinder, et al., *Market Transparency, Liquidity Externalities, and Institutional Trading Costs in Corporate Bonds*, 82 J. Fin. Econ. 251 (2006); and Hendrik Bessembinder & William Maxwell, *Markets: Transparency and the Corporate Bond Market*, 22 J. Econ. Perspectives 217 (2008) (“Bessembinder & Maxwell (2008)”). In addition to these papers, the Proposing Release also cited a paper showing a lower dispersion of transaction costs in the corporate bond market following the introduction of TRACE; see Proposing Release, 86 FR 69837 note 222 and corresponding text. Since the Proposing Release the Commission has become aware that this result has been removed from a more recent version of the paper after results suggested “that reduced price dispersion is more likely attributable to market changes other than transparency”; see Michael A. Goldstein, et al., *Dealer Behavior and the Trading of Newly Issued Corporate Bonds*, (June 21, 2021), at 19 n.21, available at <https://ssrn.com/abstract=1022356> (retrieved from SSRN Elsevier database). Nonetheless, the general result that information asymmetries can lead to price dispersion in fixed-income and dealer markets has been well-documented in other literature; see, e.g., the papers cited in *supra* note 790.

⁸⁵⁴ One commenter questioned the usefulness of transaction-by-transaction reporting and asserted that the Proposing Release did not explain how an investor would make use of these data (see Citadel Letter, at 9). This part, along with Part VI.C.1.a in the Proposing Release, discuss the ways in which investors could use the data. The Commission acknowledges that not every factor affecting prices, such as counterparty risk, is accounted for in the data provided by the final rule. See *infra* in this part for further discussion. Furthermore, the ability of end borrowers to switch broker-dealers may be limited by switching costs; see *infra* in this part for further discussion on switching costs. At least one commenter expressed concern that the proposed rule may result in increased costs when switching lending agents. See CSFME Letter 1, at 5. See *infra* Part IX.C.4 for further discussion.

⁸⁵⁵ See *infra* Part IX.D.2 for a discussion of the expected impact of the final rule on competition between broker-dealers and between lending programs.

⁸⁵⁶ See, e.g., State Street Letter, at 5; See also RMA Letter, at 5, 8 (discussing low margins in securities lending more generally); See also *infra* Part IX.C.4 for additional discussion.

⁸⁵⁷ See Panel A of Table 1 in *supra* Part IX.B.3, showing that for most stocks the lending supply significantly outstrips demand with median utilization rates of approximately 12%.

⁸⁶⁰ See Fábio Cereda, et al., *Price Transparency in OTC Equity Lending Markets: Evidence from a Loan Fee Benchmark*, 143 J. Fin. Econ. 569, 569–592 (2022) (“Cereda (2022)”).

⁸⁶¹ See, e.g., Bessembinder & Maxwell (2008), at 226, stating that the results from the academic literature on the introduction of TRACE shows that it “reduced dealers’ information advantage relative to customers,” and that, “with transaction reporting, customers are able to assess the competitiveness of their own trade price by comparing it to recent and subsequent transactions in the same and similar issues.” See also Cereda (2022), at 587, stating that their results are consistent with the idea that “[g]ood benchmarks mitigate search frictions by lowering the informational asymmetry among market participants.”

⁸⁶² See James J. Angel Letter, at 2.

⁸⁶³ See, e.g., Overdahl Letter, at 6; Citadel Letter, at 8. At least one commenter stated that the evidence from TRACE was applicable.

⁸⁶⁴ See Overdahl Letter, at 5–7.

⁸⁶⁵ See Overdahl Letter, at 6.

⁸⁶⁶ See Overdahl Letter, at 7.

importance of counterparty risk in securities loans prices as compared to prices of corporate bonds.⁸⁶⁷ However, the fact that corporate bond prices are less sensitive to the identities of the counterparties than securities loans does not invalidate using TRACE to illustrate the effect of decreasing information asymmetry. Instead, it simply implies that the baseline dispersion in corporate bond prices prior to TRACE was likely less than it currently is in the securities lending market.⁸⁶⁸

Second, while the Brazilian study takes place in a similar market setting as Rule 10c-1a (*i.e.*, the securities lending market) it is true that the policy details differ. In particular, the Brazilian policy change involved an increase in transparency not through the creation of a transaction-by-transaction report, but through an increase in the informativeness of an available loan fee “benchmark.”⁸⁶⁹ However, despite the differences in details, the policy had a similar target to that of Rule 10c-1a: namely, an improvement in the transparency of the securities lending market.⁸⁷⁰ The Brazilian study shows that this increase in transparency

improved market quality through the economic channel of reduced information asymmetry. This study is thus directly relevant for final Rule 10c-1a, as the Commission expects that many of the economic effects of the rule will be realized through the same economic channel (*i.e.*, a reduction in information asymmetry).

Additionally, in support of their concern over the applicability of TRACE research, one commenter stated that, “while there is no reason for the supply of corporate bonds to decrease in response to increased trade transparency, greater transparency in the securities lending market may well reduce the lending supply.”⁸⁷¹ This commenter cited industry research showing that increased short selling transparency can decrease beneficial owners’ willingness to lend shares,⁸⁷² as well as academic research calling into question the applicability of TRACE to securities lending “since greater loan fee transparency could reduce the lending supply.”⁸⁷³

The Commission believes that the industry study cited by the commenter has empirical limitations that make it difficult to extract robust empirical conclusions from the study. These limitations are acknowledged by the author of the study; specifically, the author states that, during the sample period, which occurs during the height of the 2008 financial crisis, “equity markets were in a relatively disordered state,” and that “such extreme change in markets has the consequence of making it complicated to establish a control group of stocks such that all variables, except regulatory variables, remain constant. This, in effect, makes it difficult to attribute causality solely to the regulatory variables.”⁸⁷⁴ The Commission agrees that the extreme market volatility during 2008–2009 increases the likelihood that the decrease in beneficial owners’ appetite to lend out shares documented by the author may have been driven by other market events concurrent to but distinct from changes to regulatory regime for

short selling and, as a result, “causality is still difficult to prove.”⁸⁷⁵

The Brazilian study, also cited by the commenters, occurred during a less volatile period rendering potentially cleaner empirical results. The authors of that study indeed suggest that the loan supply could decrease “if the lower loan fees received by lenders were not sufficient to cover the potential losses from not selling a stock when shorting activity increases.”⁸⁷⁶ However, later in that same paragraph, the authors reject this hypothesis and conclude that their results were not consistent with increased transparency affecting liquidity in the lending market.⁸⁷⁷

Improved Market Quality Due to Lower Short Selling Costs

The Commission expects that final Rule 10c-1a will produce countervailing effects through its impact on short selling, but ultimately that the net result will be positive. On one hand, the final rule will benefit short sellers by lower borrowing costs for securities that are hard to borrow, which will improve market quality through increased price efficiency, managerial oversight, and liquidity.⁸⁷⁸ On the other hand, the final rule could potentially harm market quality by making it easier for other investors to discern short sellers’ trading strategies, thereby discouraging the costly fundamental research that underlies some short selling strategies.⁸⁷⁹ On balance, the Commission expects that the final rule, which delays the dissemination of loan volume information by 20 business days, is not likely to significantly expand market participants’ abilities to discern short selling strategies.

The Commission expects that final Rule 10c-1a will lower short selling costs by decreasing borrowing costs, especially for hard-to-borrow securities.⁸⁸⁰ Academic research

⁸⁶⁷ See, e.g., discussions in *supra* Part IX.B.3, acknowledging that a variety of factors can drive the pricing of securities loans, including counterparty risk. The Commission also acknowledged this in the Proposing Release by noting that counterparty characteristics played a role in pricing loans; See Proposing Release, 86 FR 69831. See also Proposing Release, 86 FR 69837, stating that “the data would allow end borrowers to determine the extent to which their broker-dealer is obtaining terms that are better, worse, or consistent for current market conditions for loans with *similar* characteristics” (emphasis added).

⁸⁶⁸ See *supra* note 790 for a discussion of theoretical and empirical evidence that information asymmetry drives dispersion in prices. It could also be the case that securities lending transactions are more sensitive to idiosyncratic factors, such as “the identities of the transacting parties” as mentioned by a commenter (see Overdahl Letter, at 6), because there is a lack of transparency in the market about what a standardized price for a given set of loan characteristics should be, which could drive idiosyncrasies in loan prices. If prevailing market prices become more generally available, it could be the case that an increase in competition lessens the importance of idiosyncratic factors for the pricing of securities loans. In this case, final Rule 10c-1a may make the securities lending market behave more similarly to more fungible markets such as the corporate bond market, making an analysis of TRACE more applicable to the securities lending market.

⁸⁶⁹ According to the authors, this loan fee benchmark is publicly reported by a centralized platform maintained by the Brazilian Stock Exchange, on which all securities lending transactions are registered by brokers. See Cereda (2020), at 570.

⁸⁷⁰ See Cereda (2020), at 570, referencing statements from the Brazilian stock exchange that “. . . the purpose of this change is to make the securities lending service ever more transparent, in order to attract more securities lenders and borrowers and to meet the demand of institutional investors.”

⁸⁷¹ See Overdahl Letter, at 6.

⁸⁷² See Overdahl Letter, at 6, citing *The Effects of Short-Selling Public Disclosure Regimes on Equity Markets* (2010), OliverWyman.com, at 4, 16–17, available at <https://www.oliverwyman.com/our-expertise/insights/2010/feb/the-effects-of-short-selling-public-disclosure-regimes-on-equity.html>.

⁸⁷³ See Overdahl Letter, at 9, citing Cereda et al. (2022).

⁸⁷⁴ See Oliver Wyman, *supra* note 872, at 11. Specifically, the report examines a short selling ban that took place in the UK between Sept. 18, 2008, and Jan. 16, 2009, and compares this to a “pre-ban” period between Jan. 1, 2008, and Sept. 17, 2008, and a “post-ban” period beginning on Jan. 17, 2009.

⁸⁷⁵ See *id.*

⁸⁷⁶ See Cereda (2022), at 571. Specifically, the authors state that their “findings, however, indicate that the increased transparency had positive effects overall; it reduced loan fees, increased lending volume, did not affect lenders’ total revenue, and favored more efficient lenders.”

⁸⁷⁷ See *id.*

⁸⁷⁸ See *supra* in this part for a discussion on why the Commission expects the economic effects of the final rule to be concentrated among hard-to-borrow stocks.

⁸⁷⁹ See, e.g., Overdahl Letter, at 3; Citadel Letter, at 5–7, 11; MFA Letter 3, at 3–4, 8.

⁸⁸⁰ See discussions in above and below in this part regarding the impact of the final rule on borrowing costs. This effect may be concentrated among stocks that are “on special” and have higher borrowing costs, in which there are more opportunities for an increase in price efficiency to lower fees. See *supra* in this part for a discussion on why the Commission expects the economic

indicates that, when short selling costs diminish, investors increase their fundamental research because it is easier to trade on any negative information that they uncover (e.g., poor earnings).⁸⁸¹ This increase in fundamental research may in turn lead to better investment decisions by these investors.⁸⁸² Additionally, by facilitating more research, the final rule will benefit market participants by improving price discovery. Academic research shows that short sellers, through their research, contribute to price efficiency by gathering and trading on relevant private information.⁸⁸³

Short sellers also serve as valuable monitors of management. Extant research has demonstrated that when management knows that short sellers may be studying their firms, they are less likely to engage in inappropriate or value-destroying behavior.⁸⁸⁴ Research also indicates that when short selling becomes easier the effectiveness of short sellers as monitors increases.⁸⁸⁵

Reducing the costs of short selling may also have the benefit of increasing liquidity in the underlying securities markets. Short sellers are key contributors to liquidity in both equity and options markets and existing research shows that, when short selling is constrained by tightness in the securities lending market, the stock market is less liquid.⁸⁸⁶ Lower short selling costs could have potential benefits for options market liquidity as well. Securities lending affects liquidity in the options market through its impact

on how easily options market makers can delta hedge.⁸⁸⁷ Less costly delta hedging may therefore increase liquidity in the options market. Also, since some price discovery occurs in the options market, to the extent that the final rule increases the ease with which investors can trade in options, the proposal may further enhance price efficiency in the options market.⁸⁸⁸

Commenters to the proposed Rule 10c-1, which did not include a delay in the dissemination of any information that would be collected under the rule, expressed concern that the dissemination of Rule 10c-1a data could harm short sellers, and thus U.S. financial and capital markets in general, and that this outcome was not analyzed in the Proposing Release.⁸⁸⁹ Some commenters expressed concern that information about Customer loans collected under the rule in particular could be used to determine individual short positions with a high degree of accuracy,⁸⁹⁰ and that this could result in harm to short sellers,⁸⁹¹ resulting in

negative outcomes for market quality, such as reductions in liquidity, price efficiency and shareholder engagement.⁸⁹²

The Commission acknowledges these commenters' concerns about the effect of proposed Rule 10c-1 on short sellers, and believes that these concerns are mitigated by the final rule's inclusion of a delay in disseminating loan size information.⁸⁹³ Specifically, the Commission acknowledges that activity in certain segments of the securities lending market are tightly linked to short selling positions, in particular the market for Customer loans.⁸⁹⁴ Thus, the sum of loans identified in Rule 10c-1a data as being to "a customer (if the person lending securities is a broker or dealer)"⁸⁹⁵ could give a strong indication of aggregate short interest. However, under the final rule, this information will only be directly available to Rule 10c-1a data consumers after a delay of 20 business days,⁸⁹⁶ which significantly reduces the novelty of this information compared to the proposed rule. In particular, this delay means that the loan size information, which is the portion of the data most

effects of the final rule to be concentrated among hard-to-borrow stocks.

⁸⁸¹ See Dixon, et al., (2021), *supra* note 746 and Peter Dixon, *Why Do Short Selling Bans Increase Adverse Selection and Decrease Price Efficiency?* Rev. Asset Pricing Stud. 122 (2021) ("Dixon (2021)"). It is not necessary that the information uncovered by this research be negative in nature for this to be true. The possibility of easier securities borrowing ensures that if the information happens to be negative, it will still be profitable. Thus, the risk of engaging in costly research decreases and more information, both positive and negative, is uncovered as a result.

⁸⁸² See *infra* this part for further discussion on how increased information for participants in the securities lending market may increase the profitability of some investors' trading strategies more generally.

⁸⁸³ See, e.g., Jesse Blocher, et al., *Connecting Two Markets: An Equilibrium Framework for Shorts, Longs and Stock Loans*, 108 J. Fin. Econ. 302, 302–22 (2021) and Dixon (2021) *supra* note 881.

⁸⁸⁴ See, e.g., Eric C. Chang, et al., *Does Short-Selling Threat Discipline Managers in Mergers and Acquisitions Decisions?*, J. Acct. & Econ. 101223 (2019). See also Massimo Massa, et al., *The Invisible Hand of Short Selling: Does Short Selling Discipline Earnings Management?*, 28 Rev. Fin. Stud. 1701 (2015).

⁸⁸⁵ See, e.g., Vivian W. Fang, et al., *Short Selling and Earnings Management: A Controlled Experiment*, 71 J. Fin. 1251 (2016).

⁸⁸⁶ See Dixon, et al. (2021), *supra* note 746.

⁸⁸⁷ See *supra* Part IX.B.1 for a discussion of option market makers' use of securities lending markets to engage in delta hedging.

⁸⁸⁸ See, e.g., David Easley, et al., *Option Volume and Stock Prices: Evidence on Where Informed Traders Trade*, 53 J. Fin. 431, 431–65 (1998); Jun Pan & Allen M. Potoshman, *The Information in Option Volume for Future Stock Prices*, 19 Rev. Fin. Stud. 871 (2006); Sophie Ni, et al., *Stock Price Clustering on Option Expiration Dates*, 78 J. Fin. Econ. 49 (2005).

⁸⁸⁹ See, e.g., Overdahl Letter, at 9–11; Citadel Letter, at 5–7; AIMA Letter 2, at 2; CCMR Letter, at 1; AIMA Letter 3, at 2; MFA Letter 3, at 3–4, 8. The Proposing Release acknowledged that the Rule could diminish the value of collecting and trading on negative information by revealing some new short selling information to the market, and that these dynamics could mitigate some of the benefits discussed. See Proposing Release, Part VI.C.1.c.

⁸⁹⁰ See, e.g., Citadel Letter, at 5; Overdahl Letter, at 4; SIFMA AMG Letter, at 5. Other commenters expressed concern that the data provided under proposed Rule 10c-1 could allow for reverse engineering of trading strategies more generally; see, e.g., MFA Letter 1, at 8; MFA Letter 2, at 5; RMA Letter, at 18.

⁸⁹¹ Commenters pointed to a number of ways that short sellers could be harmed, including increased costs to establishing short positions, particularly large positions that require time to build up (see, e.g., Citadel at 6), and increased risks of copycat strategies (see, e.g., Overdahl Letter, at 9–10; Citadel Letter, at 6; MFA Letter 1, at 7; AIMA Letter 2, at 2–3), frontrunning (see, e.g., SBAI Letter, at 2), issuer retaliation (see, e.g., Citadel Letter, at 6), negative impacts on activities that rely on short selling for hedging purposes (see, e.g., Citadel Letter, at 6), and short squeezes (see, e.g., Citadel Letter, at 6; Overdahl Letter, at 11; MFA Letter 1, at 7; S3 Partners Letter, at 7). One commenter cites a number of academic studies supporting the notion that disclosure of short selling positions can be harmful to markets, including Truong X. Duong et al., *The Costs and Benefits of Short Sale Disclosure*, 53 J. Banking & Fin. 124 (2015) and Stephan Jank, et al., *Flying Under the Radar: The Effects of Short-Sale Disclosure Rules on Investor Behavior and Stock Prices*, J. Fin. Econ. 209 (2021) (see Overdahl Letter, at 8).

⁸⁹² See, e.g., Citadel Letter, at 6; MFA Letter 1, at 2 and 7; SIFMA AMG Letter, at 5 and 7; SIFMA Letter 1, at 12, 15; AIMA Letter 1, at 2; Overdahl Letter, at 4; CCMR Letter, at 1. One commenter referred to increased short selling disclosure as a wealth transfer that is not necessarily welfare enhancing. See Overdahl Letter, at 3.

⁸⁹³ The proposed rule, which commenters expressed concern, would have required market participants to report transactions to an RNSA within 15 minutes of the terms being settled with an RNSA disseminating the data to the public as soon as practicable thereafter.

⁸⁹⁴ See *supra* Part IX.B.6 for further discussion of why the market for Customer loans is tightly linked to short selling positions.

⁸⁹⁵ See 17 CFR 240.10c-1a(c)(7) ("final Rule 10c-1a(c)(7)"), which requires a covered person to report, for a covered securities loan, whether the borrower is a broker or dealer, a customer (if the person lending securities is a broker or dealer), a clearing agency, a bank, a custodian, or other person. While most loans that facilitate short sales will likely be associated the category of borrowers that are "a customer (if the person lending securities is a broker or dealer)," not all will. Some large market participants do not use broker-dealers as an intermediary when sourcing loans; instead, they maintain relationships directly with lending programs to source shares when they wish to sell short. These transactions would show up in the data as a loan to "other person." Lastly, to the extent that a broker-dealer borrows shares to facilitate their own short selling, the loan would show up in the data as a loan to a "broker or dealer." However, by summing up all loans to "a customer (if the person lending securities is a broker or dealer)" and "other person," market participants could likely estimate outstanding short interest with considerable accuracy.

⁸⁹⁶ Note that, the difference in settlement cycles between the equity and lending markets means that the size of equity loans that facilitate short sales won't be made public until approximately 22 business days after the short sale occurs in the stock market. See *supra* note 738 and corresponding text.

directly related to short selling activity, disseminated under final Rule 10c-1a will generally be less timely than pre-existing sources of short selling transparency, such as FINRA's bimonthly short interest data.⁸⁹⁷

Additionally, the Commission does not believe that market participants will have more timely access to indicators of aggregate short interest from the daily information disseminated by an RNSA pertaining to the aggregate transaction activity for each reportable security.⁸⁹⁸ This is because the term "aggregate transaction activity" refers to information pertaining to the absolute value of transactions, and excludes information that could reveal net transaction activity information.⁸⁹⁹ Therefore, it would not be possible to use this information to discern information about, for example, changes in net short sale positions.

The loan amount data disseminated under final Rule 10c-1a will provide some novel information about short positions, although only on a look-back basis after the 20-business-day dissemination delay has lapsed. In particular, since each loan likely relates to a unique market participant, the public dissemination of such transaction-by-transaction volume data under final Rule 10c-1a, albeit delayed, will provide an indication of the distribution of short sentiment, *i.e.*, whether short interest is concentrated among a few short sellers with large positions, or whether it is spread out over many short sellers.⁹⁰⁰ It can also give an indication about when individual market participants increased or decreased their short positions by examining the change in the size of a loan from the reported data. As most currently available sources of short selling information only contain information about aggregated short selling activity,⁹⁰¹ this could represent an increase in the granularity of market participants' information about past short positions and, in this way, could provide information about short sellers' strategies. Specifically, market

participants could examine the historical securities lending data to try to identify factors that may be indicative of short selling activity. However, it is not clear that such an analysis, which would be inherently noisy, would provide actionable insights into future short selling activity that could harm short sellers' abilities to profit from negative information.

Economic Effects From Improved Securities Lending Data Quality

The Commission believes that final Rule 10c-1a will increase the information about the state of the securities lending markets that is generally available to market participants. As discussed in this section, increased information will result in benefits in the form of better decision-making by investors, beneficial owners and other market participants, reduced costs of business for broker-dealers, improved performance and reduced costs for lending programs, new business opportunities for data vendors, improvements to shareholder monitoring and, ultimately, improved market stability and price discovery both in the securities lending market and the market for the underlying security.⁹⁰²

Overall, the data provided by the final rule will significantly improve market participants' views into lending rates for various securities. It does so first through the comprehensiveness of the data. By mandating the disclosure of certain information about all securities loans, the data provided by the Rule will be comprehensive and thus not prone to biases that occur due to non-random observations.⁹⁰³ Comprehensive reporting also means that the data provided by the final rule covers both the Wholesale and Customer segments of the market, allowing market participants to compare trends in both markets simultaneously. The data will also be more granular than existing data. In addition to information about the size

of the loan and the loan fee, the data provided by the final rule contains a number of other data fields which allow market participants to parse the data to analyze the subset of transactions that are most relevant to their needs.

There are a few dimensions where data provided by commercial data providers may be similar to or provide information not provided by the Rule. The data provided by the final rule is disseminated next day, which is similar to the timeliness of much of the data provided by the commercial data providers except that some commercial data providers offer subsets of intraday transaction data that is timelier than the data provided by the final rule. Additionally, the data provided by the Rule masks loan size for 20 business days. Consequently, existing data providers' information regarding shares on loan will be considerably timelier than the data provided by the Rule. Lastly, the Rule does not provide information about utilization rates, and so market participants wishing to observe utilization rates will need to maintain access to commercial datasets.

First, the improvement in securities lending rate information and the ability to create bespoke benchmarks will improve the quality of information that market participants rely on to make decisions regarding investment strategies that require borrowing securities and the cost of those strategies.⁹⁰⁴ An increase in the quality of information regarding the costs of borrowing a security may decrease risk and thereby increase the risk-adjusted profits of pursuing investment strategies that require borrowing securities, such as short sales.⁹⁰⁵ For example, prior to a short sale transaction, the end borrower will be able to get a better sense of the likely costs associated with such an investment strategy by examining the data regarding recently transacted securities loans, as well as information provided by an RNSA about aggregate transaction activity and cost to borrow.⁹⁰⁶

Access to Rule 10c-1a data may also benefit investors by enabling them to make more informed decisions about whether to buy, hold, or sell a given

⁸⁹⁷ See *supra* Part IX.B.6 for a discussion of the FINRA bimonthly short interest data which are made available for publication on the seventh business day after the reporting settlement dates, which occurs bimonthly.

⁸⁹⁸ See final Rule 10c-1a(g)(5), requiring an RNSA to disseminate aggregated daily information.

⁸⁹⁹ See *supra* Part VII.J for further discussion.

⁹⁰⁰ Note that this may only be possible with noise to the extent that some borrowers, such as institutional investors, break their loans up across multiple prime brokers. See *supra* note 806 for more information about the use of multiple prime brokers by some institutional investors.

⁹⁰¹ See discussion of the FINRA bimonthly short interest data and SRO short selling volume and transaction data above in Part IX.B.6.

⁹⁰² One commenter expressed concern that the Proposing Release did not explain how market participants would use the data (See Citadel Letter, at 9). However, the Proposing Release provided specific examples of how the data could be used (See Proposing Release, 86 FR 69829, 69836, 69840). These examples, and more, are also provided throughout the current Economic Analysis and particularly in this part. Similarly, some commenters expressed concern that the Proposing Release did not identify who, other than regulators, would benefit from certain data (see, e.g., ICI Letter 1, at 9). However, the same discussions of how market participants would use the data also provide discussions of how various market participants would benefit from the data. In this vein, this part discusses a variety of uses and benefits of Rule 10c-1a data.

⁹⁰³ See *supra* Part IX.B.2 for additional discussion of bias in existing securities lending data.

⁹⁰⁴ See *supra* in this part for a discussion of how the final rule will improve transparency through increased comprehensiveness, breadth, and accessibility of securities lending data.

⁹⁰⁵ See *supra* this part for further discussion of the expected economic effects of the final rule through its impact on short selling.

⁹⁰⁶ See *infra* this part for a discussion of the Commission's uncertainty regarding how the aggregated information disseminated by an RNSA will compare to currently available data and the range of analyses that market participants will be able to perform using this information.

security. This will occur as they will have increased certainty regarding lending rates and which securities are most likely to be profitably lent or not, leading to better risk allocations, investment decisions, and ultimately risk-adjusted returns. Extant research has demonstrated that securities lending data have information relevant to the prices of the underlying security.⁹⁰⁷ By making securities lending information both more granular and more accessible for market participants, final Rule 10c–1a will enable investors to utilize data to gain insights into the underlying security. As investors become more informed, their investment decisions are expected to improve.

Additionally, an improved view of current lending market conditions for various securities may help inform beneficial owners in making better decisions concerning which shares to make available for lending, potentially leading to more profitable lending. For example, to the extent that beneficial owners do not currently have a clear means of determining which securities have high average lending rates Rule 10c–1a data may alert them about securities with high borrowing costs, which would enable them to better optimize which shares in their portfolio to make available for lending.⁹⁰⁸ Furthermore, as a result of having better access to information about the securities lending market, financial institutions will be able to improve their collateral and balance sheet management.⁹⁰⁹

Second, a clearer understanding of lending market conditions, and specifically lending market rates, facilitated by the dissemination of Rule 10c–1a data may benefit broker-dealers by decreasing the search costs incurred to obtain a locate in order to facilitate

a short sale on behalf of a customer.⁹¹⁰ The increase in transparency under the final rule will allow broker-dealers to better ascertain current prevailing lending rates for security loans with certain characteristics prior to calling lending programs to get competing quotes. Broker-dealers tend to find loans for their customers through the network of lending programs with which they have relationships, after they have exhausted their own inventory and customer margin accounts.⁹¹¹ Rule 10c–1a data will enable them to determine with greater ease whether a quote from a lending program is competitive. It is possible that new broker-dealers may choose to enter the market for lending services⁹¹² because of this reduction in cost, which may further increase competition between broker-dealers.⁹¹³

Third, final Rule 10c–1a will benefit lending programs by providing a means by which they may improve the performance of their lending. Rule 10c–1a data will provide lending programs with a source of securities lending market data that is more comprehensive than existing commercial data. With these data, the lending programs will have an improved ability to determine prevailing market conditions as they compete to lend shares, which may improve their lending performance.

Fourth, more comprehensive, granular, and accessible securities lending information may also lead to additional business opportunities for commercial securities lending data vendors.⁹¹⁴ In addition to data products, commercial data vendors also provide analytics to their customers,⁹¹⁵ and may be able to support these analytics data services with the data provided by the final rule. Further, because the commercial data vendors would be less dependent on their data providers for data, they may be able to provide

analytics to more market participants. This may result in increased competition for data analytics services as the barriers to entry for providing analytics services decline and new entrants compete to provide analytics services.⁹¹⁶ While this effect may lower what the data vendors can charge for analytics services, to the extent that the commercial data vendors offer their customers other securities lending services, such as execution services, the final rule may enhance their other business lines by providing more comprehensive data to support other securities lending market services. To the extent that there is a demand for covered persons to contract privately with third party vendors to assist in reporting under final Rule 10c–1a, this would likely also lead to additional business opportunities for commercial securities lending data vendors, as these vendors already have experience with handling and disseminating securities lending data and could leverage that experience to offer such services to customers.⁹¹⁷

Ultimately, the improved information access will result in improved market quality in the security lending market. More informed investment decisions facilitated by the final rule may improve market stability by allowing investors to better manage risk. Furthermore, as all participants in the securities lending market will be able to obtain better data on that market, utilize the insights contained in the data, and then improve their decisions based on it, the price discovery process will improve. This will lead to more efficient prices for securities loans.⁹¹⁸ This improved information access may also improve price discovery in the market for the securities underlying the security loans, as information about the underlying security will have a greater opportunity to incorporate into the price of the underlying security.⁹¹⁹

The requirement to report all of the data elements under paragraph (c) the first time the modification of a “day-one” loan (that is, loans in existence

⁹⁰⁷ See Duong, et al. (2017) *supra* note 812. This study shows that, after controlling for the level of short selling, securities lending fees are predictive of future stock returns with higher fees associated with lower future returns. These results imply that, all things equal, lenders charge higher fees to lend their shares when they have negative information about a company. See also Kaitlin Hendrix & Gavin Crabb, *Borrowing Fees and Expected Stock Returns* (Nov. 6, 2020), available at https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3726227 (retrieved from SSRN Elsevier database).

⁹⁰⁸ This decision can be important because beneficial owners that engage in securities lending activities consistent with the SEC staff's current guidance limit the portion of their portfolios that can be on loan at any point in time. See *supra* note 778. This additional information may help a beneficial owner that is close to its program limit optimally choose which shares to make available for lending.

⁹⁰⁹ See *supra* Part IX.B.1 for further discussion of the use of securities lending by financial institutions for collateral and balance sheet management.

⁹¹⁰ Regulation SHO requires a broker-dealer to have reasonable grounds to believe that a security can be borrowed so that it can be delivered on the date delivery is due before effecting a short sale order in any equity security. This “locate” must be made and documented prior to effecting the short sale. See 17 CFR 242.203(b)(1) and (2). See also Key Points about Regulation SHO, available at <https://www.sec.gov/investor/pubs/regsho.htm>.

⁹¹¹ See *supra* note 798 discussing broker-dealers' preferences for sourcing shares for loans. See also *supra* Parts IX.B.1 and IX.B.4 discussing the role of broker-dealers in facilitating borrowing by customers.

⁹¹² See *supra* Part IX.B.4 for further discussion of the market for lending services.

⁹¹³ See *infra* Part IX.D.2 for further discussion of the expected effects of the final rule on competition between broker-dealers.

⁹¹⁴ The Commission acknowledges that the final rule may also result in lost revenue for commercial securities lending data vendors. See *infra* Part IX.C.4 for further discussion.

⁹¹⁵ See *supra* Part IX.B.5.

⁹¹⁶ See *infra* Part IX.D.2 for further discussion of the expected effects of the final rule on competition for securities lending data analytics services.

⁹¹⁷ While covered persons can use third party vendors to help prepare their reports, such vendors would not be reporting agents under final Rule 10c–1a. See *supra* Part VII.B.2.

⁹¹⁸ This effect may be concentrated among stocks that are “on special” and have higher borrowing costs, in which there are more opportunities for an increase in price efficiency to lower fees. See *supra* in this part for a discussion on why the Commission expects the economic effects of the final rule to be concentrated among hard-to-borrow stocks.

⁹¹⁹ See *infra* Part IX.D.1 for further discussion of the expected effects of the final rule on price efficiency.

prior to the final rule's reporting date for covered persons) occurs will avoid the exclusion of certain loan information during the early phases of implementation.⁹²⁰ This will enhance the extent to which Rule 10c–1a data improves informational efficiency during the earlier phases of implementation. In the Wholesale market lending largely facilitates clearing and settlement, and for commonly lent securities it is possible that a broker dealer could have a continuous need to borrow the security. In this case the broker dealer likely would enter into a loan that is kept open for an extended period of time, but with frequent size and/or rate modifications to match their ongoing settlement needs and market conditions.⁹²¹ Therefore, absent such a requirement, all the terms of such a lending arrangement would not be fully reportable unless the existing loan is closed out and a new one is opened. It could take a considerable amount of time for this to occur and thus the data collected by the Rule would lack the full context for such loans until they were closed and then re-entered into. The lack of information about these loans would harm data quality because it would render the data less complete and would thus limit market participants' ability to determine conditions in the lending market and would thus mitigate the benefits described in this section. Ensuring that these loans are included upon their first modification improves the quality of the data in the earlier phases of reporting which would in turn speed up the time when the benefits articulated will become fully available to market participants.

Potential Limits to Benefits and Sources of Uncertainty

Commenters mentioned a number of factors that may limit the extent to which the rule increases transparency in the securities lending market, and thereby limit the associated benefits as well. However, despite these potential limitations, the Commission expects that final Rule 10c–1a will improve the transparency and efficiency of the securities lending market, which will improve market participants' access to

information and lower their information asymmetry.

Commenters noted that loan fees are determined by a variety of factors, some of which are not directly included in Rule 10c–1a data.⁹²² Though the Commission believes that the final rule will improve market participants' ability to compare loans, the Commission recognizes that the data provided will not include information about all of the factors that are relevant to the pricing of securities loans. As such, two loans may appear to be similar based on the Rule 10c–1a data but may not have the same fees due to factors not recorded in the data, such as the counterparty risk or the stability of the portfolio. Some commenters expressed concern that failing to provide all information relevant to pricing would lead the data to be either not useful, potentially misleading, or even harmful.⁹²³

The Commission recognized in the Proposing Releases and continues to acknowledge that Rule 10c–1a data will not contain all information needed to perfectly price loans.⁹²⁴ However, compared to the baseline level of information available to market participants, the more granular,

comprehensive, and accessible data provided by the final rule will improve market participants' abilities to compare loans and provide numerous benefits to market participants.⁹²⁵ The Commission does not believe that this information will be misleading or harmful because, as the commenters make clear, it is well understood in this market that the pricing of loans is determined by many factors.⁹²⁶ Knowing this, beneficial owners and end borrowers will be able to use this information to create, for example, an expected range of borrowing costs and use these data to facilitate conversations with their lending agent or broker dealer about why certain loans have prices that they do, or why a specific loan falls where it does in the distribution of similar loans. Further, to the extent that the distribution of borrowing costs provides information that is relevant to stock prices, this information alone could improve price efficiency in the underlying securities market.⁹²⁷

One commenter questioned the utility of information about borrowing costs, asserting their belief that the cost to borrow is not as important to the execution of short sale strategies as whether there are shares available to borrow.⁹²⁸ The Proposing Release acknowledged that information on shares available is useful to markets.⁹²⁹ Rule 10c–1a data will not specifically provide information on shares available. Market participants seeking such information may need to contract with current commercial data vendors, if they can, for estimates of shares available and utilization rates. However, since borrowing costs are correlated with the ease of locating securities to borrow, the improved access to fee information provided by the final rule will provide market participants with increased information regarding the availability of shares to lend.⁹³⁰

⁹²⁰ Several commenters sought clarification on issues related to "day-one" loans. See *supra* note 429 and corresponding text for a discussion of and response to these commenters.

⁹²¹ For example, FIS data on returned securities suggest that while the average security returned in the Wholesale market had been on loan for about a month, some loans were open for up to a year or more. See also Blackrock Letter, at 9 and *supra* note 434 and surrounding text.

⁹²² See, e.g., Citadel Letter, at 9; Overdahl Letter, at 6; RMA Letter, at 6; MFA Letter 1, at 5; SIFMA Letter 1, at 15. See also *supra* note 780 and corresponding text.

⁹²³ See, e.g., Citadel Letter, at 9, stating that the "Commission does not explain why it would be useful for one investor to know what another investor paid on a loan without knowing any of the material facts of the other investor's relationship with its broker-dealer." Similarly, see RMA Letter, at 6 (stating that "there is no reason to believe that securities lending transactions are fully fungible or that pricing can be represented in a single 'spot' market price"); see Overdahl Letter, at 6 (stating that "the fact that one market participant borrowed a security at a certain rate is not necessarily informative about the value of a loan with a different market participant."). Furthermore, several commenters expressed concern that such information could be misleading. See, e.g., MFA Letter 1, at 9 (stating that, since "rates in the [Customer] Market are based on many variables specific to a broker-dealer-client contractual relationship," transaction-by-transaction loan data "may actually result in a distorted representation of the actual market."). See also ISLA Letter, at 2, who similarly state that fee/rebate data "may create an unrealistic and misleading portrayal of prevailing rates." See also SIFMA Letter 1, at 14, stating that "intraday loan-by-loan data can be misleading based on circumstances unique to certain securities loan transactions." See also *supra* note 732 and corresponding text for a discussion of the variety of factors that can affect the pricing of securities loans. Other commenters expressed their opinion that pricing information would be valuable to market participants. See, e.g., James J. Angel Letter, at 2–3.

⁹²⁴ See, e.g., Proposing Release, 86 FR 69839, recognizing that benefits would be somewhat limited by the fact that the data does not contain "all information necessary to perfectly compare the fees on different loans," but concluding that "the proposed Rule improves the ability to compare loans."

⁹²⁵ See *supra* in this part for a discussion of these benefits.

⁹²⁶ See, e.g., the information provided by commenters in *supra* note 732.

⁹²⁷ See, e.g., Duong, et al. (2017), who find that information derived from securities lending data can be used to predict stock returns.

⁹²⁸ See S3 Partners Letter, at 9 (stating that "We do not believe the Commission has explored if the costs to borrow are material to the execution of a short sale strategy. We believe a bigger issue may be the lack of shares to borrow, not the cost of borrowing."); Other commenters, however, did believe that loan pricing information would provide useful and meaningful information. See, e.g., PM Letter 2, at 3; and James J. Angel Letter, at 1.

⁹²⁹ See, e.g., Proposing Release, 86 FR 69834, 69840.

⁹³⁰ See Kolasinski (2013) *supra* note 736 (writing on the link between the cost to borrow and availability of shares to lend).

Some commenters expressed concern that the data may be too granular to be directly usable by market participants,⁹³¹ and at least one commenter expressed concern that the final rule could increase information asymmetries if the complexity of the data are such that only the largest and most sophisticated market participants would be able to benefit.⁹³² The Commission is mindful that the reports prepared according to the final rule will contain a large volume of statistical data, and as a result it may be difficult for some market participants to review and digest the reports. However, by requiring reporting entities to report transaction-level information in a uniform manner rather than aggregated data, the final rule will make it possible for market participants and other interested parties to make their own determinations about how to group securities or loans when comparing across loan transactions. Requiring more detailed data will also help ameliorate potential concerns about overly general statistics, or about the specific categorization of loans and selection of aggregated metrics, by allowing market participants and other interested parties to conduct their own analysis based on alternative categorizations of the underlying data. Should certain market participants not have the means to directly analyze the detailed statistics, third parties, such as commercial securities lending data vendors, likely will respond to the needs of investors by analyzing the disclosures and producing more digestible information using the data.⁹³³ Additionally, this concern is mitigated somewhat by the requirement that an RNSA provide information about the distribution of loan rates at the security level,⁹³⁴ which could be more easily used similar to current data models.

One commenter suggested that the inclusion of short positions data would lead to double counting and could confuse market participants.⁹³⁵ Short positions are not required to be reported, but loans from a broker-dealer to an end customer—such as might support a short position—will be marked in the data as loans to a

“customer (if the lender is a broker-dealer).” The Commission does not believe that the inclusion of such data constitutes double counting because a loan from a broker-dealer to their customer (e.g., to facilitate a short sale and where the broker-dealer is the lender) is a distinct economic activity from a loan that the broker-dealer may engage in as the borrower (e.g., to meet their own clearing and settlement obligations).⁹³⁶ The Commission does not believe that such data will lead to confusion because these loans are marked in the data in a way that allows market participants to separate customer loans from other loans in their analysis.

One commenter suggested that including rebate data could lead to confusion because rebates are often fixed to benchmarks that can change from day to day, potentially leading to many, perhaps daily, modifications of the loan needing to be submitted and that the volume of these data could confuse market participants.⁹³⁷ The extent to which the commenter’s concern is realized will be determined by how an RNSA chooses to structure the reporting of this variable.⁹³⁸ For instance, if an RNSA chooses to allow market participants to report a spread and a benchmark, then no modifications would be required to be reported from day to day unless there were a change in the negotiated spread or benchmark. However, if an RNSA chooses to require market participants to report the total fee, then market participants would be required to report changes to the fee if the benchmark changes, which could require daily revisions.⁹³⁹ However, the Commission does not believe that this will cause confusion. The Commission expects that market participants know that rebates can change regularly and thus revisions would not be unexpected. Further, gathering loan modification data is important to facilitate the accurate computation of statistics regarding the cost to borrow by an RNSA and other market participants.

At least one commenter suggested that some of the benefits of the Rule from reducing information asymmetries may be limited as a result of switching costs.⁹⁴⁰ The Commission acknowledges

that the cost of switching to a new broker-dealer can be high,⁹⁴¹ and that high switching costs may make it more difficult for some end borrowers to easily switch their broker-dealer for one that would offer them better terms on a loan.⁹⁴² However, at the same time, by increasing end borrowers’ access to comprehensive information about the securities lending market, final Rule 10c–1a will improve end borrowers’ ability to determine which broker-dealers are offering better loan terms, as well as to negotiate better terms with broker-dealers. Both of these will increase the benefits to end borrowers from switching broker-dealers. Holding switching costs constant,⁹⁴³ final Rule 10c–1a could thus still result in more end borrowers finding it beneficial to switch to better-performing broker-dealers. Furthermore, as discussed in the Proposing Release,⁹⁴⁴ even for those borrowers for which switching broker-dealers would not be cost effective, the data would provide benchmark statistics that may enable smaller borrowers to select higher performing broker-dealers initially.

The benefits of the final rule may be limited if the rule results in a reduction

acknowledges this possibility and discusses further below in Part IX.C.4. *See also* S3 Partners Letter, at 9, stating “[p]rice transparency does not change a borrower’s need to execute a short sale strategy with the brokers that they already have existing agreements with.” *See also supra* in this part for a discussion of studies of the introduction of TRACE and the impact of transparency on price.

⁹⁴¹ *See supra* Part IX.B.4 for a discussion of costs related to switching broker-dealers.

⁹⁴² However, several factors may mitigate high switching costs. For example, some institutional investors are likely to have multiple prime brokers, which would facilitate the transfer of business to better-performing broker-dealers (*see supra* note 806), and, for individual investors, transferring between retail brokers may be less costly, for example, because some retail brokers will compensate new customers for transfer fees that their outgoing broker-dealer may charge them. *See, e.g.,* Chad Morris, *ACAT Fee: Account Transfer Fee in 2023*, Brokerage-Review.com, available at <https://www.brokerage-review.com/discount-broker/acat-account-transfer-fees.aspx>, last visited Aug. 28, 2023 (providing a list of fees for different brokers). The effect of switching costs on competition may also depend on the variability of the quality of broker-dealers’ lending services over time. For example, if the quality of any broker-dealer’s lending quality varies significantly over time, customers of those broker-dealers may find it optimal to switch between broker-dealers with some frequency, which would increase their overall switching costs. On the other hand, if the quality of broker-dealers’ lending services is relatively constant over time, the number of times that a customer would optimally want to switch between broker-dealers would likely be more limited, and in this case switching costs may be a relatively small and/or short-term friction.

⁹⁴³ At least one commenter expressed concern that the proposed rule may result in increased costs when switching lending agents. *See* CSFME Letter 1, at 5.

⁹⁴⁴ *See* Proposing Release, 86 FR 69837 n.221.

⁹³¹ *See, e.g.,* IHS Markit Letter, at 13; RMA Letter, at 18.

⁹³² *See* IHS Markit Letter, at 14.

⁹³³ *See supra* Part IX.B.5 for a discussion of commercial data vendors’ current offering of securities lending data analytics services, and above in this part for a discussion of the expected effects of the final rule on creating new business opportunities for providers of securities lending data analytics services.

⁹³⁴ *See* final Rule 10c–1a(g)(5), requiring an RNSA to disseminate aggregated daily information.

⁹³⁵ *See* MFA Letter 3, at 4.

⁹³⁶ *See supra* Part IX.B.2.

⁹³⁷ *See* MFA Letter 3, at 5.

⁹³⁸ *See supra* Part VII.F.1 for additional discussion of the reporting of this data.

⁹³⁹ *See* the last paragraph of Part VII.F.1 and surrounding text for additional discussion of the latitude granted to an RNSA in determining the specific format required for the loan cost information.

⁹⁴⁰ *See, e.g.,* Citadel Letter, at 8. One commenter suggested that switching costs between lenders and lending agents could increase because of the rule; *See* CSFME Letter 1, at 5. The Commission

in the supply of securities loans. A lower supply of securities loans, for example, could weaken or even counteract the rule's expected effect on lowering borrowing costs.⁹⁴⁵ As previously discussed, the Commission believes that the empirical evidence does not show an increase in securities lending transparency would result in a decrease in the supply of securities loans.⁹⁴⁶ However, another possibility that was pointed out by commenters is that the supply of securities loans could decrease if compliance costs are passed on to lenders and beneficial owners, who are then less willing or able to participate in the securities lending market as a result.⁹⁴⁷ The Commission recognizes that some market participants, including beneficial owners, may experience reduced revenue from securities lending as a result of the rule.⁹⁴⁸ However, the Commission expects that beneficial owners and lenders will for the most part benefit from the final rule, as a result of increased information about the securities lending market and reduced information asymmetry.⁹⁴⁹ This benefit, which could even encourage more beneficial owners and lenders to enter the securities lending market, would serve to mitigate an increase in cost and a subsequent decrease in lending, to the extent that it would occur.

One commenter stated that securities lending data would be less useful for corporate bonds and asset-backed securities (ABS) because, due to the "the greater diversity of bond characteristics, data from one set of bonds cannot be as easily used as benchmarks for others," and as a result "there is little indication that data from corporate bond or ABS lending transactions would be sufficiently useful to justify the reporting costs."⁹⁵⁰ As discussed above, the Commission acknowledges that the data provided will not include information about all of the factors that are relevant to the pricing of securities loans. It is possible

that this limitation on the benefits may be higher for certain infrequently loaned securities, such as corporate bonds. However, the Commission believes that, even for less liquid lending markets, Rule 10c-1a will still reduce information asymmetries and improve pricing efficiency by facilitating better benchmarking than is currently possible, and thus will represent an improvement relative to the baseline similar to other assets discussed. For example, market participants will be able to use Rule 10c-1a data to pool information across similar securities and/or similar time horizons to create their own bespoke benchmarks for loan terms.

The commenter also stated that securities lending data would be less useful for U.S. Government securities because "the market for these products is already fairly transparent," and thus "imposing reporting obligations would not provide sufficient additional data to justify the compliance burden."⁹⁵¹ As discussed in the Baseline, the Commission believes that information asymmetries in the lending market for U.S. Government securities loans are unlikely to be fully addressed by the currently available datasets, and thus this market will ultimately still benefit from an increase in transparency.⁹⁵²

While the adoption of final Rule 10c-1a will lead to benefits from an overall increase in transparency, the Commission acknowledges that, in some areas, there is uncertainty as to how the information content of Rule 10c-1a data will compare to that of existing data. The requirement for an RNSA to disseminate daily information about aggregate transaction activity and distribution of loan rates will also provide market participants with information about the securities lending market.⁹⁵³ However, how the aggregate information disseminated by an RNSA will compare to the information available from current commercially available datasets, and the range of analyses that market participants will be

able to perform using this information, will depend on the specific aggregate statistics that an RNSA chooses to publish.

The Commission bases its estimates on an RNSA providing daily information that is at least as informative as comparable statistics that are currently provided by the commercial datasets. This is because, consistent with section 19(b) of the Exchange Act, any changes to an RNSA rules required by final Rule 10c-1a, including its Rule 10c-1a information collection and dissemination practices, would have to be filed with the Commission pursuant to section 19(b) and Rule 19b-4 prior to implementation.⁹⁵⁴ Such rules would also be subject to public comment.⁹⁵⁵ This process offers market participants the opportunity to provide feedback on the potential specific statistical form of the aggregated daily information based on, *e.g.*, their experience using information from commercial datasets. As such, the daily information provided by an RNSA could be at least as informative as those statistics provided by current data providers. Therefore, at a minimum, the Commission expects that the final rule will result in a positive benefit to market participants in the form of increased securities lending market transparency. This is because, while the aggregate information released by an RNSA may be the same or similar to what is currently provided by commercial datasets, the comprehensiveness and accessibility of the Rule 10c-1a data is expected to be better than that of commercial data, such that aggregate information produced using Rule 10c-1a data can be expected to be better than that produced using currently available commercial data.⁹⁵⁶

2. Regulatory Benefits

Final Rule 10c-1a will improve upon current data sources by providing an RNSA (*i.e.*, FINRA)⁹⁵⁷ and the

⁹⁴⁵ See *supra* in this part for discussions of the Commission's expectation that the final rule will lower borrowing costs for some securities.

⁹⁴⁶ See *supra* in this part for further discussion for this literature.

⁹⁴⁷ See, *e.g.*, State Street Letter, at 4, stating that "greater costs are also likely to create additional disincentives for institutional investors to participate in the securities lending market, with broadly negative implications for liquidity."

⁹⁴⁸ See *infra* Part IX.C.4 for further discussion of the expected effect of the final rule on securities lending revenues.

⁹⁴⁹ See *supra* in this part for a discussion of the expected benefits of the final rule from reduced information asymmetry between beneficial owners and lending programs.

⁹⁵⁰ See RMA Letter, at 16.

⁹⁵¹ See RMA Letter, at 16.

⁹⁵² See *supra* Part IX.B.2 for further discussion of the Commission's understanding of the current state of transparency in the market for U.S. Government securities lending. The Commission also acknowledges that, in addition to the market for U.S. Government securities lending, there may be other securities lending markets with higher transparency. However, the Commission believes the regulatory benefits discussed in this part will still apply, as will the benefits for data consumers from the additional context provided by the Rule 10c-1a data, such as information about whether the borrower is a broker or dealer, a customer (if the person lending securities is a broker or dealer), a clearing agency, a bank, a custodian, or other person.

⁹⁵³ See final Rule 10c-1a(g)(5).

⁹⁵⁴ See *supra* Part II.J for further discussion of how the final rule handles RNSA Rules to administer the collection of information.

⁹⁵⁵ 15 U.S.C. 78s(b). See also FINRA, *FINRA Rulemaking Process*, available at <https://www.finra.org/rules-guidance/rulemaking-process>, last visited Aug. 24, 2023.

⁹⁵⁶ See *supra* Part IX.B.2 for a discussion of issues related to the currently available commercial securities lending datasets. For example, in contrast to commercial datasets, since it is not based on voluntary submissions, final Rule 10c-1a data will be less likely to be prone to bias, and thus aggregate information that is constructed using final Rule 10c-1a data will be less prone to biases as well.

⁹⁵⁷ Currently, FINRA is the only RNSA. Although the final rule applies to "an RNSA," this portion of our analysis describes benefits to and involving

Commission access to securities lending information that identifies the parties to the loans, indicates when a broker-dealer loans its own securities to its customers, and indicates whether the purpose of such a loan was to close out a failure to deliver.⁹⁵⁸ Further, the improved access and comprehensiveness and reduced bias of the publicly available data will also accrue to FINRA and the Commission, as well as any other regulators using these data. This access will benefit investors by enhancing regulatory tools employed to promote fair and orderly securities markets. In particular, investors may benefit from improved surveillance and enforcement uses, market reconstruction uses, and market research uses.

Surveillance and Enforcement Uses

The party identities and purpose information⁹⁵⁹ may facilitate better surveillance by FINRA for regulatory compliance by its members, and may improve its ability to enforce such regulations. Additionally, FINRA will be able to notify another regulator as permitted.

For example, for FINRA, the information on whether the security is loaned from a broker-dealer's securities inventory to its customer⁹⁶⁰ may assist FINRA in determining whether a broker-dealer is charging lending fees or paying rebates commensurate with the market. Thus, beneficial owners and end borrowers, who engage in securities lending transactions, will be better protected against potential unfair pricing of securities loans by broker-dealers. In addition, FINRA can use the data more generally to assist in its surveillance of FINRA Rules 4314, 4320, and 4330 regarding securities lending and short selling that primarily intend to reduce information asymmetry in the securities lending markets. For instance, the final rule can help FINRA identify broker-dealers who tend to lend to or borrow from non-FINRA members to examine compliance with provisions of FINRA Rules 4314 and 4330 that entail agreement, disclosure, and other requirements for this activity. In addition, the information on how much borrowing particular FINRA members engage in can assist FINRA in identifying which broker-dealers to examine for compliance with FINRA Rule 4320, which contains short sale delivery requirements. These types of

activities will better protect investors by helping to ensure that entities engaging in certain securities lending transactions are authorized to do so and are in compliance with applicable regulations. FINRA can also use the information to monitor when broker-dealers are building up risk, thereby protecting broker-dealers' customers against potential instabilities. FINRA can use data on the identity and activity of its members to provide an early warning with regard to the behavior of its members during a short squeeze.

Additionally, the information on whether the loan is being used to close out a fail to deliver⁹⁶¹ is relevant to Rule 204 compliance. Importantly, being able to estimate the securities lending revenues and costs of particular participants may help to fine tune disgorgement estimations. The Commission and FINRA can also use Rule 10c-1a data to oversee broker-dealer compliance with Exchange Act Rule 15c3-3.⁹⁶²

The Commission believes that the requirement pursuant to Rule 10c-1a to identify all parties to securities lending transactions with LEIs, if such parties have LEIs, will facilitate the Commission and FINRA's efforts to monitor securities lending.⁹⁶³ Reporting of LEIs by legal entity securities loan participants that have LEIs will help provide a more precise and consistent means of identification for loan participants as compared to using loan participant names and, if available, CRDs, IARD Numbers, or MPIDs.⁹⁶⁴ In that regard, obtaining an LEI requires that an entity's identity be verified by a third party upon issuance of the LEI and upon annual renewal of the LEI.⁹⁶⁵ Additionally, LEIs contain "Level 2"

information about the linkages between the entities being identified and their parent and child entities,⁹⁶⁶ which can better enable Commission staff and market participants to understand the relationships between various firms with an eye toward potential aggregations of risk. Furthermore, requiring LEI disclosure for loan participants that have LEIs also will facilitate the linkage of data reported about securities loans with any relevant data, such as data on short sales or positions, from other sources.⁹⁶⁷ However, because the Commission is not requiring loan participants without LEIs to obtain and report them, the aforementioned benefits will only arise for reported securities loans in which participants have LEIs.

One commenter expressed concern that, to the extent that there is a wide variance in interpretation of data, the rule could result in "false positive" enforcement actions.⁹⁶⁸ Conversely, the Commission believes that improvements in securities lending data will enhance the ability of FINRA and the Commission to oversee the securities lending market and more efficiently detect potential rule violations, such as those described above. This will result in more targeted actions, which will benefit market participants by resulting in more efficient oversight.

Market Reconstruction Uses

Final Rule 10c-1a may help regulators reconstruct market events. For example, in January 2021, trading in so-called "meme" stocks led to many questions about securities lending being asked by lawmakers, investors, and the media as well as calls by some for increased regulation in some areas.⁹⁶⁹ Rule 10c-1a data will allow for more detailed evaluations of such events in the future

⁹⁶¹ See final Rule 10c-1a(e)(3).

⁹⁶² See 17 CFR 240.15c3-3.

⁹⁶³ Examples of other regulatory entities and jurisdictions that use LEIs include the U.S. Commodity Futures Trading Commission ("CFTC"), Alberta Securities Commission (Canada), European Markets and Securities Authority, and Monetary Authority of Singapore. See Global LEI Foundation, *Regulatory Use of the LEI* (Aug. 21, 2023), available at <https://www.gleif.org/en/lei-solutions/regulatory-use-of-the-lei>.

⁹⁶⁴ More than 2.2 million LEIs have been issued. See Office of Fin. Res., Legal Entity Identifier, available at <https://www.financialresearch.gov/data/legal-entity-identifier/>, last visited Aug. 23, 2023.

⁹⁶⁵ See *Global LEI System*, LEIROC.com, available at <https://www.leiroc.org/lei.htm>, last visited Aug. 23, 2023. Information associated with the LEI includes the "official name of the legal entity as recorded in the official registers[.]" the entity's address, country of incorporation, and the "legal form of the entity." See Financial Stability Board ("FSB"), *Options to Improve Adoption of the LEI, in Particular for Use in Cross-Border Payments* (July 7, 2022), available at <https://www.fsb.org/2022/07/options-to-improve-adoption-of-the-lei-in-particular-for-use-in-cross-border-payments/>.

⁹⁶⁶ See Global LEI Foundation, *Level 2 Data: Who Owns Whom*, available at <https://www.gleif.org/en/lei-data/access-and-use-lei-data/level-2-data-who-owns-whom>, last visited Aug. 22, 2023.

⁹⁶⁷ For example, the European Union's SFTR requires legal entity parties to securities financing transactions to provide their own LEIs and the LEIs of their counterparties to trade repositories. See *ESMA Updates Its Statement on the Implementation of LEI Requirements for Third-Country Issuers Under the SFTR Reporting Regime* (Apr. 13, 2021), available at <https://www.esma.europa.eu/press-news/esma-news/esma-updates-its-lei-statement>. The EU has numerous LEI requirements for entities operating in its securities markets, including, inter alia, for credit and financial institutions (pursuant to the Capital Requirements Regulation) and for fund and fund managers (pursuant to the Alternative Investment Funds Directive). See *id.* Likewise, as mentioned, the CFTC requires counterparties identify themselves to the agency with LEIs in connection with swap trades, including long-and-short equity index swap trades. See 17 CFR 45.6.

⁹⁶⁸ See S3 Partners Letter, at 8.

⁹⁶⁹ See, e.g., Proposing Release, 86 FR 69803 n.11.

FINRA so that we can discuss specific FINRA Rules and practices that will be affected.

⁹⁵⁸ See final Rule 10c-1a(e).

⁹⁵⁹ See *id.*

⁹⁶⁰ See 17 CFR 240.10c-1a(e)(2) ("final Rule 10c-1a(e)(2)").

than was possible with existing data during January 2021. For example, January 2021 information on market participants' securities lending activity would have provided FINRA and Commission staff a more timely and comprehensive view of who was entering into new loans and who was no longer borrowing securities. This would have facilitated a deeper understanding of how the events were or were not impacting market participants. Such analyses can help determine if further regulatory intervention in markets is warranted and can inform the nature of any intervention.

Market Research Uses

Greater access and more comprehensive data on the securities

lending market will improve the quality and expand the scope of research by both academics and regulators, which will better inform the regulators. In particular, improving the information available for their policy decisions will promote fair, orderly, and efficient markets and the protection of investors. For example, the data could facilitate research on the effectiveness of regulations such as Regulation SHO or FINRA Rules 4320 and 4330.

Additionally, research conducted by academic researchers and market participants could also improve the value of public comment letters on Commission and FINRA proposals, which will also better inform policy decisions.

3. Direct Compliance Costs

Final Rule 10c–1a will require various entities to enter into contracts and develop recording and reporting systems to comply with the final rule. This section provides estimates of those costs. We note that the Commission has provided certain estimates for purposes of compliance with the Paperwork Reduction Act of 1995 (“PRA”), as further discussed below, in Part X. Those estimates, while useful to understanding the collection of information burden associated with the final rules, do not purport to reflect the full economic costs associated with making the required disclosures.

TABLE 2—TOTAL QUANTIFIED COMPLIANCE COSTS

	#	Total initial industry cost	Total annual industry cost
Covered Persons and Reporting Agents	609	^a \$522,590,000	^b \$233,260,000
RNSA	1	^c 3,880,000	^d 2,760,000

^a\$522,590,000 = sum of estimates in *infra* Table 3 note m and Table 4 note h. The Commission estimates the wage rate associated with these burden hours based on salary information for the securities information compiled by SIFMA. The estimated wage figure for attorneys, for example, is based on published rates for attorneys, modified to account for a 1,800 hour work-year and multiplied by 5.35 to account for bonuses, firm size, employee benefits, and overhead yielding an effective hourly rate for 2013 of \$380 for attorneys. See Securities Industry and Financial Markets Association, Management & Professional Earnings in the Securities Industry—2013. These estimates are adjusted for an inflation rate of 29.89% based on the Bureau of Labor Statistics data on CPI-U between Sept. 2013 and May 2023. See U.S. Bureau of Labor Statistics, *CPI Inflation Calculator*, available at https://www.bls.gov/data/inflation_calculator.htm. Therefore, the current inflation-adjusted effective hourly wage rates are estimated at \$494 ($\$380 \times 1.2989$) for attorneys, \$409 ($\$315 \times 1.2989$) for compliance managers, \$338 ($\$260 \times 1.2989$) for senior systems analysts, and \$83 ($\$64 \times 1.2989$) for compliance clerks.

^b\$233,260,000 = estimate in *infra* Table 3 note n.

^c10,924 hours $\times$ (0.75 $\times$ \$338/hour + 0.25 $\times$ \$409/hour) = \$3,880,000. See *infra* note 1196 and note a.

^d7739.5 hours $\times$ (0.75 $\times$ \$338/hour + 0.25 $\times$ \$409/hour) + 52 hours $\times$ \$83/hour = \$2,760,000. See *infra* note 1199 and note a.

Table 2 shows that the Commission believes that final Rule 10c–1a will impose a one-time cost of \$3.88 million and ongoing expenses of \$2.76 million on FINRA, the only RNSA. An RNSA will incur these costs to develop systems to take and disseminate data required by the final rule. These include larger costs associated with creating and maintaining the infrastructure to enable providing covered persons and reporting agents to provide an RNSA with Rule 10c–1a information and

entering into written agreements with providing covered persons and reporting agents, as well as smaller costs associated with providing such information to the public.⁹⁷⁰ These costs will be somewhat mitigated by the fact that final Rule 10c–1a requires an RNSA to disseminate the data “as soon as practicable,”⁹⁷¹ which gives an RNSA some flexibility to build systems that mitigate costs.

Table 2 also shows that covered persons and reporting agents will, in

aggregate, incur roughly \$523 million in initial costs and \$233 million annually in ongoing costs to comply with the final rule.⁹⁷² These costs come from costs to develop and maintain systems and from costs to enter into agreements.⁹⁷³ Tables 3 and 4 break these costs down by those incurred by reporting agents, and by covered persons based on the decision by covered persons to self-report or use a reporting agent.

⁹⁷⁰ As discussed in *supra* Part VII.B.2, covered persons, including persons that are not RNSA members, that elect not to use a reporting agent are responsible for providing the Rule 10c–1a information to an RNSA directly and may do so without becoming RNSA members. Therefore, these costs may include costs to an RNSA of establishing connections to persons that are not members of an RNSA.

⁹⁷¹ See final Rule 10c–1a(g)(1).

⁹⁷² As discussed in *supra* Part VII.A, the Commission is adopting an exception to the general approach that reporting requirements do not apply to the borrower in a securities lending transaction,

specifying that the borrower is responsible for the reporting obligation in the instance of a broker or dealer borrowing fully paid or excess margin securities from a customer; see final Rule 10c–1a(j)(1). Absent this exception, reporting obligations may have fallen on broker-dealer customers who may not have timely access to the required information, and may have less familiarity with reporting information to an RNSA than their broker or dealer; see *supra* note 145.

⁹⁷³ The Commission expects that the costs associated with developing a reporting system to be lower under the final rule as compared to the proposed rule as a result of the change from the

proposed rule to impose an end-of-day reporting requirement. As described by some commenters, an intraday reporting framework would have required substantial technology development and cost for those providing covered persons and reporting agents that may have lacked the capacity to do so. See, e.g., SBAI Letter, at 1, and IHS Markit, at 13. Removing the intraday reporting requirement removes the need for those providing covered persons to acquire this capacity, thus lowering at least their initial burden associated with system design and configuration. See *supra* Part IX.B.1 for further discussion.

TABLE 3—QUANTIFIED COMPLIANCE COSTS FOR SYSTEMS DEVELOPMENT AND MAINTENANCE INCURRED BY LENDERS AND REPORTING AGENTS

	#	Total initial industry cost (millions)	Total annual industry cost (millions)
Providing Covered Persons ^a	^b 255	^c \$272.01	^d \$122.40
Non-Providing Covered Persons ^e	^f 248	^g 132.27	^h 59.52
Reporting Agents ⁱ	^j 106	^k 113.07	^l 51.34
Total	609	^m 517.34	ⁿ 233.26

^a Providing covered persons would provide information directly to an RNSA.

^b The estimated number of providing covered persons includes 4 broker-dealer intermediaries, 217 persons that effect a covered securities loan as the lender when an intermediary is not used, and 34 broker-dealers borrowing fully paid or excess margin securities. *See infra* Part X.

^c 3,000 hours × 255 × (0.75 × \$338/hour + 0.25 × \$409/hour) ≈ \$272,010,000. *See infra* note 1157 and *supra* Table 2 note a.

^d 1,350 hours × 255 × (0.75 × \$338/hour + 0.25 × \$409/hour) ≈ \$122,400,000. *See infra* note 1161 and *supra* Table 2 note a.

^e Non-providing covered persons would use a reporting agent to provide information to an RNSA.

^f The estimated number of non-providing covered persons would include 31 non-broker-dealer intermediaries and 217 persons that effect a covered securities loan as the lender when an intermediary is not used. *See infra* Part X.

^g 1,500 hours × 248 × (0.75 × \$338/hour + 0.25 × \$409/hour) ≈ \$132,270,000. *See infra* note 1163 and *supra* Table 2 note a.

^h 675 hours × 248 × (0.75 × \$338/hour + 0.25 × \$409/hour) ≈ \$59,520,000. *See infra* note 1167 and *supra* Table 2 note a.

ⁱ Reporting agents would provide information directly to an RNSA.

^j The number of reporting agents includes 97 broker-dealers and 9 clearing agencies. *See infra* Part X.

^k 3,000 hours × 106 × (0.75 × \$338/hour + 0.25 × \$409/hour) ≈ \$113,070,000. *See infra* note 1180 and *supra* Table 2 note a.

^l 1,350 hours × 106 × (0.75 × \$338/hour + 0.25 × \$409/hour) + 52 hours × 106 × \$83/hour ≈ \$51,340,000. *See infra* notes 1181 and 1191 *supra* Table 2 note a.

^m \$517.34 million ≈ sum of estimates in *supra* notes c, g, and k.

ⁿ \$233.26 million ≈ sum of estimates in *supra* notes d, h, and l.

Table 3 shows that covered persons and reporting agents would incur an aggregate of roughly \$517 million in initial costs and \$233 million annually in ongoing costs to develop and maintain systems for reporting securities lending information. These include larger costs associated with developing and reconfiguring their current systems to capture the required data elements, as well as smaller costs

associated with implementing changes and monitoring systems, most of which would be incurred by covered persons who provide the Rule 10c-1a information to an RNSA instead of relying on a reporting agent to do so.⁹⁷⁴ It is possible that some providing covered persons could privately contract with third party vendors to assist them with their reporting obligations.⁹⁷⁵ The potential for third

party vendors, such as existing securities lending data vendors, to leverage their existing experience with collecting and disseminating securities lending data as well as economics of scale could result in lower compliance costs. If this is the case, the compliance costs for providing covered persons could be lower than what is reflected in Table 3.

TABLE 4—QUANTIFIED COMPLIANCE COSTS OF ENTERING INTO AGREEMENTS

	#	Agreement counterparty	Total initial industry cost	Total annual industry cost
Non-Providing Covered Persons ^a	^b 248	Reporting Agent	^c \$3,670,000	\$0
Reporting Agents ^d	^d 106	Person who Provides 10c-1a Information	^f 1,570,000	0
		RNSA	^g 8,800	0
Total	354		^h 5,250,000	0

^a *See supra* note Table 3 note e.

^b *See supra* note Table 3 note f.

^c 30 hours × 248 × \$494/hour ≈ \$3,670,000. *See infra* note 1171 and *supra* Table 2 note a.

^d *See supra* note Table 3 note i.

^e *See supra* note Table 3 note j.

^f 30 hours × 106 × \$494/hour ≈ \$1,570,000. *See infra* note 1185 and *supra* Table 2 note a.

^g 1 hour × 106 × \$83/hour ≈ \$8,800. *See infra* note 1188 and *supra* Table 2 note a.

^h \$5,250,000 ≈ sum of estimates in *supra* notes c, f, and g.

⁹⁷⁴ In addition, there may be costs for reporting entities associated with determining whether a loan is a covered securities loan according to final Rule 10c-1a(f)(2), including whether a particular security is a reportable security. However, these costs are likely to be negligible, as many covered persons and reporting agents, including broker-dealers, are already required to determine whether a security is reportable to the CAT, TRACE, or RTRS are part of their compliance with other regulatory obligations. The Commission believes that many covered persons that do not have the resources or expertise to determine whether a security is a reportable security will be likely to use reporting agents, who, as broker-dealers and/or clearing agencies, will

likely have access to this information. These costs may also include costs to covered persons that are not members of an RNSA of establishing connections to an RNSA. *See supra* note 970. We do not expect significant additional costs to result from the requirement to report information once a loan modification occurs after that loan qualifies for reporting. This is because the primary costs associated with the rule are those associated with developing and reconfiguring their current systems to capture the required data elements. The variable cost of each individual transmission to an RNSA is expected to be very small. This requirement is not expected to impact the need for reporting agents to develop and maintain systems for reporting

securities lending information, because reporting agents will be required to develop these systems to meet the other provisions of the final rule. Rather, this will simply require the inclusion of some additional data transfers that occur largely around the reporting date. Since the cost of individual transmissions are expected to be small, this aspect of the final rule is expected to have a small impact on the compliance costs of the rule.

⁹⁷⁵ Note that, while covered persons can use third party vendors to help prepare their reports, such vendors would not be reporting agents under final Rule 10c-1a. *See supra* Part VII.B.2.

Table 4 shows that covered persons and reporting agents will incur an aggregate of \$5.25 million in initial costs and \$0 annually in ongoing costs to enter into agreements for reporting securities lending information. These include costs associated with drafting, negotiating, and executing agreements with counterparties, most of which will be incurred by covered persons that directly employ a reporting agent. There will not be ongoing costs because, once an agreement is signed, there will be no need to modify the written agreement or take additional action after it is executed.

One commenter expressed concern some of the compliance costs incurred by lending agents could be passed along to lenders and beneficial owners, including funds and their shareholders.⁹⁷⁶ The Commission acknowledges that it is possible that some compliance costs may be passed along to beneficial owners, for instance, in the form of higher fees charged for lending services or lower pro-rated lending revenue.⁹⁷⁷ Compliance costs may also be passed along by broker-dealers to end borrowers in the form of higher borrowing costs.⁹⁷⁸ Ultimately, the extent to which either beneficial owners or end borrowers may bear some of the costs of complying with final Rule 10c-1a will depend on the extent to which covered persons, including lending agents and broker-dealers, pass on their compliance costs to their customers and/or split these costs across different types of customers. However, this effect is expected to be mitigated by the fact that the projected compliance costs of the final rule as a fraction of an estimate of the total lending fee revenue generated is likely small enough to be within the bounds of a positive profit margin.⁹⁷⁹

In addition to the above enumerated costs, the estimated 361 reporting entities (*i.e.*, providing covered persons and reporting agents), as well as subscribers to Rule 10c-1a data, may be

required to pay fees to an RNSA.⁹⁸⁰ The fees that these entities may be required to pay will depend on a number of factors, including the number of reporting entities and subscribers, along with how an RNSA will choose to split any such fees between these different types of entities.

Some commenters expressed concern that an RNSA would have monopoly pricing power over the resulting data.⁹⁸¹ However, any fee that an RNSA would charge must be consistent with the Exchange Act and rules thereunder, and are subject to Commission review, notice and public comment.⁹⁸² Consequently, the Commission believes that an RNSA is unlikely to exert monopoly pricing in terms of fees for the data, and that their fees will be reasonably related to costs. As shown in Table 2, the Commission expects an RNSA to incur ongoing costs of \$2.76 million per year. If the 361 providing covered persons and reporting agents were the only entities to subscribe to the data, dividing the cost incurred by an RNSA by the 361 entities results in an annual fee per reporting entity of approximately \$7,600, or approximately \$633 per month. This cost would decrease to the extent that entities other than covered persons choose to subscribe to Rule 10c-1a data, which would allow an RNSA to spread its costs across more entities. At the same time, this estimate represents a lower bound on the estimated fees levied by an RNSA as an RNSA likely will need to recoup some of the initial fixed costs associated with administering the data.⁹⁸³

⁹⁸⁰ One commenter stated that the “the estimated costs are understood to be incomplete” in the Proposing Release because “the RNSA (*i.e.*, FINRA) is also entitled to recover its costs from market participants who report securities lending transactions to the RNSA.” See CSFME Letter 1, at 4. However, this possibility was acknowledged by the Commission in the Proposing Release. See Proposing Release, 86 FR 69843, stating that “the estimated 409 reporting entities would also be required to pay reporting fees to the RNSA.”

⁹⁸¹ See, *e.g.*, Bloomberg L.P. Letter, at 4; HMA Letter, at 11.

⁹⁸² RNSA rule filings are subject to notice, comment and Commission review pursuant to section 19(b) of the Exchange Act and Rule 19b-4. An RNSA must demonstrate that proposed fees satisfy the Exchange Act requirements under section 15A(b), including that such proposed fees equitably allocate reasonable dues, fees and other charges among members and issuers and other persons using the SRO’s facilities. Further, such proposed fees cannot not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act.

⁹⁸³ The numbers provided in this section are estimates. To the extent the Commission has over- or underestimated burden hours or hourly costs, or the number of entities subject to each reporting requirement, the actual compliance costs may be higher or lower. However, the Commission views

One commenter stated that, by considering proposed Rule 10c-1 “in isolation” from other recent Commission rules, “the Commission is not providing a comprehensive picture of the compliance and other direct costs,” and that “these costs will aggregate and will burden market participants with higher costs when considered jointly.”⁹⁸⁴ But, consistent with its long-standing practice, the Commission’s economic analysis in each adopting release considers the incremental benefits and costs for the specific rule—that is, the benefits and costs stemming from that rule compared to the baseline. In doing so, the Commission acknowledges that in some cases resource limitations can lead to higher compliance costs when the compliance period of the rule being considered overlaps with the compliance period of other rules. In determining compliance periods, the Commission considers the benefits of the rules as well as the costs of delayed compliance periods and potential overlapping compliance periods.

We considered here whether recently adopted rules identified by commenters that affect market participants subject to the final rule⁹⁸⁵ have overlapping implementation timeframes with the final rule. We found, however, that the compliance dates for these rules do not

the estimates provided herein as best estimates based on the information currently available to the Commission.

⁹⁸⁴ See Overdahl Letter, at 15. Another commenter stated that because “[t]he resources of market participants are not infinite,” that commenter “believe[s] that unnecessary and aggressively timed regulatory changes will impact costs, complexity, competition and the ability of smaller market participants to enter into or remain in the markets.” ICI Letter 2, at 12. See also AIMA Letter 3, at 4 (recommending that rule adoptions “should be appropriately sequenced and their compliance periods appropriately aligned” so that “market participants” will not face “unnecessary costs”); Citadel Letter, at 10 (noting the Commission “has not assessed the cumulative impact of its myriad of recent position and activity disclosure-related proposals on market participants”).

⁹⁸⁵ Specifically, we considered the Amendments to Form N-PX Adoption, the Settlement Cycle Adoption, the May 2023 SEC Form PF Amending Release, and the Beneficial Ownership Amending Release. We expect that few if any entities subject to the May 2023 SEC Form PF Amending Release will face direct reporting obligations, and thus incur compliance costs, under final Rule 10c-1a. Form PF is required for private fund advisers. See *supra* Part IX.B. We do not expect private fund advisers to face direct implementation costs under final Rule 10c-1a, although we acknowledge that their lending programs and/or broker-dealers may pass along compliance costs to them. Entities subject to the Amendments to Form N-PX Adoption, the Settlement Cycle Adoption, or the Beneficial Ownership Amending Release could have reporting obligations under final Rule 10c-1a; however we anticipate no or little overlap between the implementation periods for those rules and this one.

⁹⁷⁶ See, *e.g.*, ICI Letter 1, at 10 (stating that “fund shareholders will absorb part of the substantial costs of Rule 10c-1 . . . these costs ultimately will come directly out of the pockets of beneficial owners, including funds and their shareholders, to the detriment of their long-term interests”). See also State Street Letter, at 5 (stating that the rule “approach has the practical effect of imposing all systems-related cost for the new reporting mandate solely on agent lenders and their clients (*i.e.*, institutional investors, such as pension plans and mutual funds)”).

⁹⁷⁷ See *supra* Part IX.B.4 for a description of the market for lending services.

⁹⁷⁸ This possibility is discussed further in *infra* Part IX.C.4.

⁹⁷⁹ See estimates in *infra* note 993.

significantly overlap with the expected industry compliance dates of final Rule 10c-1a,⁹⁸⁶ and therefore we do not expect significant effects on compliance costs arising from overlapping compliance periods. We acknowledge that to the extent such overlap occurs, there could be costs, but we do not expect these to be significant costs.⁹⁸⁷

The Commission does not believe that loan participants will incur costs associated with obtaining and renewing LEIs, because only those loan participants that have non-lapsed LEIs will be required to report them. One commenter stated that borrowers should be required to obtain an LEI if they do not already have one, because the lack of an LEI would make it more challenging to identify entities.⁹⁸⁸ We agree that wider LEI adoption and reporting would likely lead to more consistent and precise identification of legal entities, which could enhance analysis of the reported information.⁹⁸⁹ We also recognize that any mandatory LEI reporting requirement for LEI-eligible loan participants would also generate additional costs for loan participants that do not currently have them, although such costs would likely be modest.⁹⁹⁰

4. Other Costs

Increase in Borrowing Costs

The Commission acknowledged in the Proposing Release that increased compliance costs could lead to some consolidation in the securities lending market and impose some costs on market participants, including potentially higher prices associated with reduced competitive pressures.⁹⁹¹ However, the Commission believes that this effect by itself is unlikely to lead to

higher overall borrowing costs due to the fact that the value of securities available to be loaned generally far exceeds the total value on loan.⁹⁹² For general collateral securities, which make up the majority of loans, a modest decline in shares available to lend would not eliminate the slack in the market and thus would not likely increase fees. For securities “on special” with less available supply relative to demand, it is possible that a decline in shares available to lend could result in higher borrowing costs for some securities. However, the Commission believes that, to the extent that it occurs, these fee increases would likely be small and have minimal downstream economic effects. This minimal effect is expected for two reasons. First, the projected compliance cost of the final rule is a relatively small fraction of the likely total lending fee revenue generated, which makes it likely that most broker-dealers and lending programs would continue to earn a positive profit margin after accounting for these costs.⁹⁹³ Second, academic research suggests that very small increases in lending fees are unlikely to result in significant downstream economic effects.⁹⁹⁴ As a result, the

Commission expects that any increase in borrowing costs that may result from consolidation among broker-dealers or lending programs would be minimal, and therefore likely offset by a simultaneous decrease in borrowing costs due to improved transparency and efficiency in the securities lending market which, as described above, are expected to concentrate among stocks that are on special.⁹⁹⁵

Lower Revenues From Securities Lending

Commenters expressed concern that, to the extent that lenders are not able to pass on compliance costs to borrowers through increased fees, the rule could lead to decreased profit from securities lending for some market participants.⁹⁹⁶ However, the Commission estimates that, as the projected compliance cost of the final rule is a relatively small fraction of the likely total lending fee revenue generated, most market participants will continue to be able to earn a positive profit margin from securities lending.⁹⁹⁷

In addition, as acknowledged in the Proposing Release, a reduction in information asymmetry may result in reduced revenue for some broker-dealers and lending programs in at least two ways.⁹⁹⁸ First, a reduction in securities lending revenues could occur

⁹⁹² See Panel A of Table 1 above in Part IX.B.3, showing that for most stocks the lending supply significantly outstrips demand with median utilization rates of approximately 12%.

⁹⁹³ Averaging the fees across all three surveyed days from Table 8 of the OFR Pilot Survey and then multiplying those fees by the average dollar value of securities lent across all three days surveyed produces an estimated \$2.7 billion in lending fees collected in 2015. These fees only account for the Wholesale market, so multiplying this estimate by two to, conservatively, account for fees collected in the Customer market yields an estimate of \$5.4 billion in lending fees collected annually. See *supra*, in Part IX.C.3, the total direct compliance costs associated with the Rule are approximately \$236 million per year. Under a conservative assumption that 100% of the direct compliance costs will be transferred to borrowers in the form of higher fees spread equally across all loans, this would increase lending fees by \$236 million/\$5.4 billion ~ 4.7%. For perspective, for U.S. equities the OFR Pilot Survey reports the average lending fee across the three days surveyed was approximately 33 basis points (bps). A 4.7% increase in this lending fee would be an increase of 1.44 basis points. For U.S. Treasury/Agency securities, the average lending fee reported in the OFR Pilot Survey was approximately 16 bps. A 4.7% increase in this lending fee would be 0.70 bps. These numbers are estimates and could be somewhat higher or lower depending on various assumptions. If lenders absorb some of the direct compliance costs, the increase in fees will be smaller; if the total size of shares on loan increases, the increase would be smaller still. If the increase becomes concentrated among just a subset of stocks, such as general collateral stocks, the increase in fees would be larger. Regardless, these calculations illustrate that the economic magnitude of an increase in lending fees is likely to be small.

⁹⁹⁴ Research shows that an exogenous shock to the lending supply affects loan prices, but that the downstream effects of these fee changes are modest

or non-identifiable. See Dixon, et al. (2021), *supra* note 746. See also Steven N. Kaplan, Tobias J. Moskowitz, & Berk A. Sensoy, *The Effects of Stock Lending on Security Prices: An Experiment*, 68 J. Fin. 1891 (2013). The loan fee effects reported in these studies tend to be multiples of the potential loan fee effects discussed in this section. Consequently, the resulting economic impact of any such fee increase would also likely be correspondingly smaller.

⁹⁹⁵ See *supra* Part IX.C.1 discussing the expected effects of the final rule on lowering borrowing costs for investors, as well as for a discussion on why the Commission expects the economic effects of the final rule to be concentrated among hard-to-borrow stocks.

⁹⁹⁶ See, e.g., State Street Letter, at 5 (stating that “there is, in our view, no practical way for agent lenders to try to recuperate even a portion of these new costs from borrowers through changes to existing market pricing conventions. In effect therefore, the costs associated with the establishment and maintenance of the reporting system for securities lending transactions envisioned by the Commission will substantially narrow, if not eliminate, existing revenue streams for agent lenders and their clients in what is already a low margin business.”); See also RMA Letter, at 8 (stating that “for structural reasons, Lending Agents are also unlikely to be able to fully pass on the costs of implementation to borrowers.”); CSFME Letter 1, at 4–5 (stating that “most beneficial owners participate in securities lending to generate marginal income. If lenders are forced to bear the final cost of compliance with Rule 10c-1, they may find their margins so thin that they can no longer justify their lending activities, pulling their liquidity from the market.”).

⁹⁹⁷ See *supra* note 993 for a description of this estimate.

⁹⁹⁸ See Proposing Release, 86 FR 69837.

⁹⁸⁶ See *supra* Part VIII on the compliance date for this final rule, and *supra* notes 726 through 728 for compliance dates of other recent rules discussed here.

⁹⁸⁷ See also *infra* Part IX.D.2 (discussing possible effects of overlap on competition).

⁹⁸⁸ See IHS Markit Letter, at 9.

⁹⁸⁹ We note in this regard the recently enacted Financial Data Transparency Act of 2022, which directs the Commission and other financial regulators to establish data standards for collections of information. See James M. Inhofe National Defense Authorization Act for Fiscal Year 2023, 117–263, tit. LVIII, 136 Stat. 2395, 3421–39 (2022).

⁹⁹⁰ A U.S. entity can currently obtain and renew an LEI from one of eleven LEI operating units. See Global Legal Entity Identifier Foundation, *Get an LEI: Find LEI Issuing Organizations*, available at <https://www.gleif.org/en/about-lei/get-an-lei-find-lei-issuing-organizations>, last visited Aug. 29, 2023. One LEI operating unit currently discloses an initial fee of \$60 and a renewal fee of \$40. See Bloomberg LEI, *Frequently Asked Questions*, “Fees, Payments & Taxes,” Bloomberg LEI v. 1.4.71, available at <https://lei.bloomberg.com/docs/faq/what-fees-are-involved>, last visited Aug. 29, 2023.

⁹⁹¹ See Proposing Release, 86 FR 69843.

because end borrowers and beneficial owners will have more information about the state of the lending market. As a result, broker-dealers and lending programs who consistently underperform, the market may lose customers to better-performing broker-dealers and lending programs or begin offering better terms to their customers. Both possibilities represent a reduction in revenue for some broker-dealers and lending programs. It is possible that some broker-dealers and lending programs may choose to exit some or all of the market for lending services as a result of this loss of revenue.⁹⁹⁹ The loss of revenue will in part be a transfer to the end borrowers and beneficial owners that switch to better-performing lending programs and better-performing broker-dealers, as well as the better-performing lending programs and broker-dealers that attract additional customers. The Commission is not able to quantify the potential loss in revenue that could occur for underperforming broker-dealers and lending programs because the Commission is not able to quantify the extent to which these broker-dealers and lending programs' current revenues are driven by asymmetric information.¹⁰⁰⁰

Second, lending programs may also experience reduced profitability through the lower rates offered by broker-dealers to their customers.¹⁰⁰¹ If a given lending program has become skilled in cultivating relationships with broker-dealers currently willing to pay higher fees, then the increased competition that broker-dealers face as a result of the rule may lead to lower overall fees being

charged for security loans—lowering the total lending revenue produced by securities lending.¹⁰⁰² While the Commission expects that beneficial owners will benefit from the final Rule as a result of the reduction in information asymmetry,¹⁰⁰³ in some cases lower lending revenues and potentially increased costs may reduce the revenue earned by some beneficial owners.¹⁰⁰⁴ As acknowledged in the Proposing Release, this would represent a partial transfer from beneficial owners to the end borrowers who may receive better terms on average as a result of decreased information asymmetries.¹⁰⁰⁵ Ultimately, the Commission is not able to quantify the net impact of the rule on beneficial owners' lending revenues, as the Commission is not able to quantify, among other items, the extent to which end borrowers may receive better terms on average as a result of decreased information asymmetries.¹⁰⁰⁶

Lower Revenues for Securities Lending Data Vendors

Commenters expressed concern that the increase in securities lending information provided by the rule will also result in costs in the form of lost revenue for commercial securities lending data vendors, which could lead some data vendors to pare back their product offerings.¹⁰⁰⁷ The Commission acknowledges that this may occur for a number of reasons. First, commercial data vendors may pare back their offerings if demand for their products decreases because their customers switch to using Rule 10c–1a data. Second, some market participants who currently contribute data under a give-to-get model may find it less worthwhile to do so when the rule provides an alternative source of data. This effect would diminish the quality of the give-to-get data currently provided by commercial data vendors and may lead to fewer market participants being willing to purchase the data. Both of these effects could result in lower revenues. To the extent that data

vendors do pare back their product offerings and/or if the quality of their data products are diminished, then this could reduce transparency in the securities lending market in cases where these datasets contain information that is not collected and disseminated by the final rule, such as utilization rates and shares available to lend.

The Commission believes that a potential mitigating factor that may reduce or even offset the severity of this loss in revenue will be that commercial data vendors may offset some of the impact of lowered demand for their data by enhancing their related data analytics businesses using Rule 10c–1a data.¹⁰⁰⁸ Furthermore, to the extent that customers value the availability of information about securities available to lend and utilization rates, the fact that commercial data vendors will continue to have superior access to this information¹⁰⁰⁹ will likely mitigate or even offset a decrease in demand, as investors would continue to purchase commercial datasets in order to gain access to this information. The Commission is unable to quantify the potential impact of the final rule on securities lending data vendors' revenues because this would require knowledge of the baseline level of such revenues, which the Commission does not have access to and about which commenters did not provide information.

Miscellaneous Costs

Some commenters expressed concern that the rule requires the reporting of sensitive information and thus could present a risk to individuals in the case of a data breach.¹⁰¹⁰ The Commission recognizes that the final rule collects sensitive information and that the costs of a data breach could be substantial.¹⁰¹¹ These costs include, but

⁹⁹⁹ See *infra* Part IX.D.2 for a discussion of the implications of the final rule for competition between broker-dealers.

¹⁰⁰⁰ As discussed in *supra* Part IX.B.3, the observed dispersion in loan fees may give a rough upper bound on the extent to which loan fees are driven by asymmetric information, which may provide some insights into a potential loss in revenue due to the reduction of asymmetric information. For example, the results from Table 1 showed that the most that some borrowers pay above the median market loan price for loans of the same security is around 400%. However, this would be an extreme upper bound, as the vast majority of borrowers, to the extent they overpay, would overpay less than 400% above median market prices, the dispersion loan fees is likely driven by factors other than asymmetric information (see *supra* note 789), and it is not necessarily the case that the final rule will fully eliminate the impact of asymmetric information on loan fees.

¹⁰⁰¹ See, e.g., ICI Letter 1, at 10 (stating that “fund shareholders will absorb part of the substantial costs of Rule 10c–1. . . these costs ultimately will come directly out of the pockets of beneficial owners, including funds and their shareholders, to the detriment of their long-term interests.”). Furthermore, while the Commission expects the net impact of the final rule on borrowing costs to be negative, see *supra* Part IX.C.4 for a discussion of the possibility that compliance costs may increase borrowing costs.

¹⁰⁰² See *id.*

¹⁰⁰³ See *supra* Part IX.C.1 for a discussion of how a decrease in information asymmetries will benefit end borrowers and beneficial owners.

¹⁰⁰⁴ See *supra* note 976 and corresponding text for a discussion of how compliance costs may affect beneficial owners to the extent that they are passed on to them by lending programs.

¹⁰⁰⁵ See Proposing Release, 86 FR 69837. See *supra* Part IX.C.1 for a discussion of the expected effects of the final rule on reducing information asymmetries between end borrowers and broker-dealers.

¹⁰⁰⁶ See *supra* note 1000 for further discussion of a potential rough estimate of the extent to which securities lending prices are driven by asymmetric information.

¹⁰⁰⁷ See, e.g., Overdahl Letter, at 4.

¹⁰⁰⁸ See *supra* Part IX.C.1 for further discussion of the expected effects of the final rule in creating new business opportunities for providers of securities lending data analytics services.

¹⁰⁰⁹ Note, however, that the information about shares available to lend collected by commercial data vendors is likely subject to the issues discussed in *supra* Part IX.B.2, including self-selection biases and a lack of comprehensiveness.

¹⁰¹⁰ See, e.g., IIB Letter, at 11; Charles Schwab Letter, at 2.

¹⁰¹¹ See, e.g., *Proposed Rule, Cybersecurity Risk Management Rule for Broker-Dealers, Clearing Agencies, Major Security-Based Swap Participants, the Municipal Securities Rulemaking Board, National Securities Associations, National Securities Exchanges, Security-Based Swap Data Repositories, Security-Based Swap Dealers, and Transfer Agents* (“Proposed Cybersecurity Rule”), 88 FR 20212 (Apr. 5, 2023) (“In 2020, the average loss in the financial services industry was \$18.3 million, per company per incident. The average cost of a financial services data breach was \$5.85

are not limited to, the following: (1) trading losses that could occur due to the revelation of private trading strategies or economic positions which may enable identifying and trading opportunistically around such strategies, such as facilitating a short squeeze; (2) business disruptions that could occur if the data breach results in temporary system down time; (3) data breach response costs as market participants must devote resources to determining how to respond to the data breach; and (4) reputational harm to an RNSA. While the potential costs of a breach, to the extent that one occurs could be severe, RNSAs, as well as ATSS and SROs, are currently subject to existing regulations that aim to improve the resiliency and oversight of securities market technology infrastructure, such as Regulation Systems Compliance and Integrity (“Regulation SCI”).¹⁰¹² Adherence to regulations that seek to ensure the resiliency and integrity of technology systems can reduce the probability of a data breach and mitigate the costs associated with a breach, should it occur.

Some commenters expressed concern that the rule could inhibit innovation in securities lending, such as the potential adoption of blockchain technology, by diverting resources away from innovation and towards compliance.¹⁰¹³ While such diversion is possible, we expect that market participants will continue to pursue innovation that creates a competitive advantage or for which there is a market demand. One commenter suggested that innovations such as blockchain technology could obviate the need for transaction reporting systems.¹⁰¹⁴ The Commission acknowledges this possibility; however, such innovations would need to overcome the market failures described earlier in this analysis.¹⁰¹⁵

One commenter expressed concern that, “with lenders dependent upon their agents for reporting to the RNSA, the rule could make it more difficult for lenders to switch agents.”¹⁰¹⁶ To the extent that there would be any bespoke reporting services offered by lending agents, it is possible that the final rule

could increase a lender’s dependence on their lending agent, and thus marginally increase their costs of switching agents. However, the Commission expects this increased cost, to the extent it occurs, to be minimal. The Commission expects that many covered persons, including lending agents, will rely on reporting agents to provide the Rule 10c–1a information directly to an RNSA. This would generally result in an unbundling of lending and reporting services, such that an increased dependence on a lending agent for their reporting services would be unlikely. To the extent that a lender requests or requires bespoke reporting services from their lending agent, that lender could examine such a service among the package of lending services—including reporting services—that a prospective agent offers, and decide accordingly while taking into account the potentially higher costs of switching to a new lending agent.

To the extent that there are entities that would like to serve as reporting agents but are not currently registered as broker-dealers,¹⁰¹⁷ the cost of registering as a broker-dealer may be another cost associated with the final rule.¹⁰¹⁸ However, the final rule does not require any entity to serve as a reporting agent, and as such this cost would only accrue to those entities that make the business decision to become a reporting agent. It is likely that an entity that is not currently registered as a broker or dealer will only make the business decision to become a reporting agent if they believe that the cost of registering as a broker-dealer is more than offset by the revenue that they will earn as a reporting agent.

5. Reduced Benefits From Alternative Arrangements

Economically Similar Arrangements

The Commission recognizes a risk that the comprehensiveness of Rule 10c–1a data, and hence the benefits that accrue due to the comprehensive nature of the data, could be diminished to the extent that market participants choose to use arrangements that are economically similar to securities lending agreements. For example, market participants may substitute repo for securities lending agreements.¹⁰¹⁹ This substitution may occur because a fixed term cash collateralized securities loan is economically very similar to a

repo.¹⁰²⁰ While the Commission is unaware of short sales of equities currently being facilitated by repo contracts, the Commission understands that in fixed-income it is fairly common for entities wishing to short sell a bond to facilitate that transaction with a repo instead of a securities loan.

The Commission believes that this risk varies across asset classes. In equities, the Commission believes that the current risk of such migration may be minimal because of the lack of a well-developed repo market for equities. However, this risk may increase if the market for equity repos becomes more developed in the future.¹⁰²¹ Among fixed-income securities the risk is substantially greater due to a well-developed repo market for fixed-income securities and the established practice of using both securities loans and repo transactions to facilitate short sales of fixed-income securities. In all asset classes, if the final Rule 10c–1a leads to improvements in the functioning of the securities lending market, then the risk of migration may diminish to the extent that improved efficiency in the securities lending market diminishes the incentive to transfer activity to potentially less developed repo markets.

Should this substitution affect a significant volume of securities lending, certain benefits and costs discussed above may decline. The less comprehensive data could reduce the extent to which the Rule reduces any biases or gaps in the data. For instance, market participants who use the data to price securities loans will have a less accurate and potentially biased view of the market, which will limit the benefits from increased transparency.¹⁰²² Additionally, regulators using the data to determine lending market conditions at the time of, for example, a Reg SHO

¹⁰²⁰ See *supra* note 777 for evidence of this from the OFR Pilot Survey.

¹⁰²¹ The Commission views it as unlikely that the equity repo market will develop to a similar extent as the fixed income repo market in the near future. Repos are primarily used for short term finance and due to the volatility of equities relative to fixed-income securities, equities are a significantly riskier collateral type, limiting their appeal as “collateral” for short term finance.

¹⁰²² See *supra* Part IX.C.1 for a discussion of expected benefits from the final rule related to increasing the transparency of the securities lending market. One commenter states that the benefits of the rule are likely to be limited for fixed-income (see RMA Letter, at 16; see also *supra* note 950), which, as discussed in this section, is also the asset class most likely to see circumvention through the use of repo markets. As discussed in *supra* Part IX.C.1, the Commission expects the fixed-income market to benefit from the final rule. However, to the extent that this asset class sees lower overall benefits from final Rule 10c–1a, this would also serve to limit the amount to which the benefits of final Rule 10c–1a would be lowered as a result of circumvention.

million.”) (citing Jennifer Rose Hale, *The Soaring Risks of Financial Services Cybercrime: By the Numbers*, Diligent (Apr. 9, 2021).

¹⁰¹² See 79 FR 72252. See also SEC, *Spotlight on Regulation SCI*, available at <https://www.sec.gov/spotlight/regulation-sci>.

¹⁰¹³ See, e.g., RMA Letter, at 8; ISLA Letter, at 3.

¹⁰¹⁴ See, e.g., RMA Letter, at 8 (stating that “financial technologies like blockchain that could ultimately obviate the need for special transaction reporting systems and make transactions viewable on their native ledgers.”).

¹⁰¹⁵ See *supra* Part IX.A.2.

¹⁰¹⁶ See CSFME Letter 1, at 5.

¹⁰¹⁷ One commenter that is not a broker-dealer requested that the Commission allow non-broker-dealers to become reporting agents because they already have connections to firms for the reporting of securities loans. See S3 Partners Letter, at 12.

¹⁰¹⁸ See final Rule 10c–1a(ii)(A), requiring a reporting agent to be a broker or dealer.

¹⁰¹⁹ See *supra* note 776 for a definition and discussion of repo contracts.

violation will be using less precise data—limiting the benefits of Reg SHO enforcement. On the other hand, such substitution could reduce compliance costs for some. Obviously, those substituting into repo will incur lower compliance costs from the final rule, including one-time implementation costs if they replace all securities lending with repo. Further, a significant substitution will reduce the ongoing costs of an RNSA because an RNSA will not have to collect and process as many transaction reports.

Cross-Border Application

One commenter expressed concern that “an overly broad or ambiguous reach of Proposed Rule 10c–1 could reduce liquidity and place U.S. intermediaries . . . at a competitive disadvantage,” because “market participants—particularly those outside of the United States—might determine to limit or cease trading or interacting with U.S. intermediaries (or leave the U.S. markets all together) in order to prevent public disclosure of their transactions.”¹⁰²³ The Commission acknowledges some market participants could be incentivized to restructure their activities to avoid reporting. Specifically, in an effort to avoid having their lending activities fall within the reach of section 10(c), participants could relocate overseas any of their current U.S.-based conduct that constitutes effecting, accepting, or facilitating a lending transaction. However, the Commission believes that this risk is low. As pointed out by the same commenter, there are disincentives for market participants to move lending activity outside of the U.S. market, including “the depth and liquidity of the U.S. market,” as well as few incentives for “U.S. asset managers to prefer non-U.S. lenders that are themselves subject to similar reporting requirements in their home jurisdictions.”¹⁰²⁴

C. Impact on Efficiency, Competition, and Capital Formation

1. Efficiency

In the securities lending market, the availability of Rule 10c–1a data for market participants will lead to more efficient prices for securities loans.¹⁰²⁵

¹⁰²³ See *supra* note 660, citing HSBC Letter 1.

¹⁰²⁴ See *supra* note 660, citing HSBC Letter 2.

¹⁰²⁵ See *supra* Part IX.C.1 for a discussion of how an increase in transparency in the securities lending market will improve market efficiency. More efficient prices do not imply that all securities loans will have the same price. There are many factors that affect the cost of a securities loan and can lead to a range of prices for securities loans. See *supra* note 780 and corresponding text.

The reduction in asymmetric information in the market for lending programs and broker-dealers may also make those markets more efficient.¹⁰²⁶ Additionally, the Commission believes that final Rule 10c–1a may have secondary effects that will increase price efficiency in the underlying securities markets and option markets.¹⁰²⁷ Also, the increased ease with which banks and other financial institutions will be able to manage collateral and balance sheets as a result of the final rule¹⁰²⁸ could lead to increased efficiency in their functioning and in those markets in which they play a role.

2. Competition

The Commission believes that the net impact of final Rule 10c–1a on competition is difficult to predict, in that some aspects will likely increase competition and some aspects will likely reduce competition. Competition will likely be impacted in the markets for broker-dealer services, lending programs, and securities lending data vendors.

The Commission believes that one effect from the final rule’s reduction of information asymmetry between end borrowers and broker-dealers, and between beneficial owners and lending programs, will be to increase competition between broker-dealers and between lending programs.¹⁰²⁹ A reduction in information asymmetry will permit better monitoring of the performance of these entities by their respective customers, and will likely force these entities to do more to match the performance of their competitors, to

¹⁰²⁶ See *supra* Part IX.C.1 for a discussion of the final rule’s expected benefits from reducing asymmetric information in the securities lending market.

¹⁰²⁷ See *supra* Part IX.C.1 for a discussion of the final rule’s expected benefits for markets related to the securities lending market, and for a discussion of the final rule’s benefits for the underlying securities market from reducing short selling costs.

¹⁰²⁸ See *supra* Part IX.C.1 for a discussion of the final rule’s expected benefits from improved financial management for financial institutions.

¹⁰²⁹ See *supra* Part IX.C.1 for a discussion of the expected effects of the rule in terms of reducing information asymmetries between end borrowers and broker-dealers, and between beneficial owners and lending programs. See also *supra* note 855 and corresponding text. The requirement to report information once a loan modification occurs after that loan qualifies for reporting will further support the benefits of the final rule, including reduced information asymmetries and enhanced price competition, by helping to ensure a level playing field during the earlier phases of implementation. This provision will prevent lenders that have a higher number of long-term loans that did not initially qualify for final Rule 10c–1a reporting from gaining a competitive advantage by being able to see the loans of other market participants without disclosing the terms of their own loans. See *supra* Part IX.C.1.

the extent that they do not already do so. One commenter stated that the effect of the final rule on competition between broker-dealers may be attenuated by the presence of high switching costs.¹⁰³⁰ The Commission does not believe that switching costs for most market participants are high enough such that this is a likely outcome.¹⁰³¹

Furthermore, the increased ability for broker-dealers to monitor conditions in the lending market may encourage new broker-dealers to enter the market, further increasing competition for broker-dealer services. This same argument may be true for platforms that engage in securities lending. Improved data may allow for better evaluation of the performance of such platforms and may also lower barriers to entry for new platforms, thus enhancing competition among securities lending platforms.

Commenters expressed concern that competition in the securities lending market could decrease if lenders are driven out of the market because of compliance costs.¹⁰³² The Commission does not believe that compliance costs are such that this would be a likely scenario because the projected compliance costs associated with final Rule 10c–1a are likely to be a relatively small fraction of total lending fee revenues.¹⁰³³ At the same time, the reduction in asymmetric information in the securities lending market that will result from the final rule may diminish broker-dealer and lending program profits to the extent that it reduces their current information advantage over their customers.¹⁰³⁴ To this end, some broker-dealers and lending programs whose profitability primarily depends on economic inefficiencies associated with asymmetric information may exit the market for facilitating securities loans.

The Commission also recognizes that, given the significant fixed costs of implementing the systems required by the final rule for lending programs to report to an RNSA, some smaller¹⁰³⁵

¹⁰³⁰ See Citadel Letter, at 8.

¹⁰³¹ See *supra* Part IX.C.1 for a discussion of why switching costs may be limited.

¹⁰³² See, e.g., RMA Letter, at 5.

¹⁰³³ See *supra* note 993 and corresponding text for an estimate of compliance costs as a fraction of securities lending revenues.

¹⁰³⁴ See *supra* Part IX.C.4 for further discussion. This was also acknowledged by the Commission in the Proposing Release; See Proposing Release, 86 FR 69837, stating that a “reduction in information asymmetry could result in reduced revenue for some broker-dealers and lending programs.”

¹⁰³⁵ The term “smaller” in the Economic Analysis does not mean that these are “small businesses” or “small entities” for purposes of the Regulatory Flexibility Act. See *infra* Part XI. Rather, smaller is meant to convey the size of these entities in relation

lending programs and broker-dealers may consolidate or exit the lending market. The Commission believes that a mitigating factor leading to less consolidation is that the current relationship and network structure of lending programs and broker-dealers already favors larger lending programs and broker-dealers who have the resources to maintain relationships with more and larger securities lending counterparties. Consequently, the Commission believes that the market for lending programs and broker-dealer security borrowing services is already likely dominated by larger lending programs and broker-dealers that the Commission does not believe will cease operating as a result of these fixed costs.¹⁰³⁶ The Commission recognizes that smaller lending agents may have unique business models that are not currently offered by competitors, but the Commission believes a competitor could create similar business models if demand were adequate.¹⁰³⁷

The Commission believes that the dissemination of Rule 10c-1a data collected under the final rule will change the competitive landscape for securities lending data analytics services by increasing opportunities for enhancing products and services that depend on securities lending data and lowering barriers to entry concerning who can provide those services.¹⁰³⁸ Increased competition in this space will likely lead to more options for consumers of analytics services, lower prices, and improved analytics services. The new information available through an RNA as a result of the final rule will

to larger market participants engaged in securities lending transactions.

¹⁰³⁶ An additional mitigating factor in the case of broker-dealers is that the Commission views it as likely that smaller broker-dealers currently contract with larger broker-dealers to help facilitate securities loans for their customers, and thus, may be able to easily contract with these larger broker-dealers to also act as a reporting agent on their behalf. This dynamic may limit the potential for new entrants to the broker-dealer space to compete with established broker-dealers.

¹⁰³⁷ The Commission believes that this effect will be enhanced under the final rule as compared to the proposed rule. While proposed Rule 10c-1 only allowed a “bank, clearing agency, broker, or dealer” to act as a lending agent or “intermediary” (see proposed Rule 10c-1(a)(1)(i)(A)), the final rule applies the term “intermediary” more broadly to “any person that effects a covered securities loan on behalf of the lender” (see final Rule 10c-1a(j)(1)(i)). Permitting other types of persons who can act as lending agents in addition to banks, clearing agencies, brokers, or dealers will support the ability of new lending agents to enter the market, promoting competition in the market for lending services.

¹⁰³⁸ See *supra* note 853 and corresponding text. However, the Commission acknowledges that the final rule may result in some loss of revenue or product quality for some commercial data vendors. See *supra* Part IX.C.4.

produce an alternative to existing data vendors’ commercial securities lending data products. Existing data vendors may retain a competitive advantage, however, as they will likely continue to have access to information on utilization rates and shares available for lending, which are not provided by the final rule.

Some commenters expressed concern that the rule would cause lending activity to migrate overseas to avoid the reporting obligation under final Rule 10c-1a, which would make the U.S. securities lending market less competitive.¹⁰³⁹ While it is possible that some market participants could move their activity to other jurisdictions in attempt to circumvent the reporting obligation of final Rule 10c-1a, the Commission believes that it is unlikely that this would occur on a large scale. This is because the final Rule imposes a reporting obligation on any qualifying loan regardless of whether the person is located abroad or is a non-U.S. person when the transaction occurs.¹⁰⁴⁰

In addition, as stated above, some commenters requested the Commission consider interactions between the economic effects of the proposed rule and other recent Commission rules, as well as practical realities such as implementation timelines. One commenter stated that because “[t]he resources of market participants are not infinite,” that commenter “believe[s] that [u]nnecessary and aggressively timed regulatory changes will impact costs, complexity, competition and the ability of smaller market participants to enter into or remain in the markets.”¹⁰⁴¹ As discussed above, the Commission acknowledges that simultaneous compliance periods may in some cases increase costs. This may be particularly true for smaller entities with more limited compliance resources. This effect can negatively impact competition because these entities may be less able to absorb or pass on these additional costs, making it more difficult for them to remain in business or compete. However, we determined that the rules highlighted by commenters either did not impose implementation costs on the same entities as this final rule and/or had compliance dates that did not significantly overlap with the expected industry compliance dates of this final rule, and therefore we do not expect these effects on competition to be

¹⁰³⁹ See, e.g., HSBC Letter 1, at 5.

¹⁰⁴⁰ See *supra* Part VII.M for further discussion of the cross-border applicability of final Rule 10c-1a.

¹⁰⁴¹ See ICI Letter 2, at 12. See also *supra* Part IX.B.6 for a description of related comments.

significant.¹⁰⁴² We acknowledge that to the extent such overlap (in scope or timing) occurs, there could be costs which could affect competition, but we do not expect these costs to be significant.

3. Capital Formation

The Commission believes that the impact of final Rule 10c-1a will have mostly positive effects on capital formation. In particular, improved price discovery in securities markets¹⁰⁴³ and improved balance sheet management by financial institutions¹⁰⁴⁴ could facilitate improvements in the provision of capital. In addition, to the extent that the final rule reduces the costs of short selling it may facilitate more effective discovery of negative information that in turn could lead to more efficient allocation of capital.¹⁰⁴⁵ However, to the extent that the Rule increases the cost of short selling for some stocks in some situations, it could also lead to less efficient allocation of capital in these instances.¹⁰⁴⁶

D. Alternatives

1. Report Loan Sizes Without a Delay

The Commission considered an alternative requiring that an RNA disseminate loan sizes at the same time as it disseminates all other loan information (*i.e.*, without a 20-business-day delay). This alternative would increase the timeliness of securities lending information available to the public, which could improve market quality by reducing information asymmetries as well as providing additional transparency to the securities lending market. However, it could also harm market quality by providing novel information about short positions with a greater timeliness than the short selling information that is currently available.¹⁰⁴⁷

To the extent that the aggregate cost-to-borrow statistics that an RNA publicly disseminates are volume-weighted, these statistics will provide end borrowers with access to

¹⁰⁴² See also *supra* Part IX.C.3.

¹⁰⁴³ See *supra* Part IX.C.1 for further discussion of the expected benefits of the final rule from increased transparency in the securities lending market, including improvements in price discovery. See also *supra* Part IX.D.1.

¹⁰⁴⁴ See *supra* Part IX.C.1 for further discussion of the expected benefits of the final rule related to improved financial management for financial institutions.

¹⁰⁴⁵ See *supra* Part IX.C.1.

¹⁰⁴⁶ See *supra* Part IX.C.1 discussing instances where the cost of short selling could increase, consistent with the views of some commenters.

¹⁰⁴⁷ See *supra* Part IX.B.6 for further discussion of the timeliness of current sources of short selling information.

information about loan prices that incorporates information about loan sizes even prior to the public dissemination of loan sizes.¹⁰⁴⁸ However, disseminating securities loan sizes as well as modifications of securities loan sizes on the next business day after a loan is effected or modified would allow market participants to produce their own custom cost-to-borrow metrics that are most tailored to their business needs. This would allow market participants to focus on the aspects of the market that are most relevant to their business needs. This effect would increase the benefits of final Rule 10c-1a from increased transparency in the securities lending market.¹⁰⁴⁹

However, the information could also be used to estimate short selling positions with more accuracy than is possible under the final rule. A market participant wishing to gain insight into short selling sentiment could aggregate the sizes of all open loans that are associated with categories of borrowers that are likely to be short sellers.¹⁰⁵⁰ If information about these loans is available the day after the loans are effected then, given the settlement cycles for equity short sales and equity loans,¹⁰⁵¹ this would be equivalent to three business days after an equity short sale took place. These data would be considerably timelier than existing short interest data such as the FINRA data. Additionally, market participants could follow individual short positions with a three-business-day lag for equity short positions. This is a capacity that is not possible using existing data. This could be accomplished by tracking individual loans that are marked as being to a customer if the lender is a broker dealer. While the identity of the borrower would not be available to the public, market participants could discern

whether changes in short interest were due to changes across many positions or few.

This additional information that market participants could extract about short selling could enable copycat investing strategies that seek to mimic what the short sellers do. This could increase the costs of establishing a short position, thus making it costlier for short sellers to profit from their research. If the profitability of research diminishes, there is the risk that less market research could be performed and, if this occurs, there could be negative impacts on market quality and corporate monitoring.¹⁰⁵²

2. Alternative Timeframes for Reporting or Dissemination

The Commission also considered an alternative requiring different timeframes for reporting or disseminating the securities lending transaction information.

First, the Commission considered requiring covered persons to provide an RNA with Rule 10c-1a information earlier than the end of each business day on which a covered securities loan is affected.¹⁰⁵³ For example, the Commission could require covered persons to provide an RNA with information about a loan within a fixed period after the loan has been effected, such as 15 minutes. This alternative would increase the timeliness of securities lending information, potentially increasing some of the benefits of final Rule 10c-1a, such as regulators' access to this information for regulatory and surveillance use.¹⁰⁵⁴ Furthermore, if an RNA were required to make the information publicly available as soon as practicable after an, e.g., 15-minute reporting timeframe, this could increase the benefits of the final rule for transparency in the securities lending market by making the data available up to one business day sooner than under the final rule.¹⁰⁵⁵ It would, however, likely increase compliance costs to an RNA as they would be required to build out systems capable of intraday dissemination.

At the same time, several commenters pointed out numerous costs associated with more timely and frequent reporting. For example, some

commenters suggested many loan terms are not finalized until the end of the day,¹⁰⁵⁶ and so a 15 minute reporting requirement increases the risk that the data provided by the final rule could be less accurate and more prone to errors that would later have to be corrected, which would mitigate the usefulness of the final rule. This alternative would also require greater compliance costs because, as commenters also pointed out, securities lending systems would need greater adaptations to comply with a more stringent reporting time horizon.¹⁰⁵⁷

The Commission could also require covered persons to provide an RNA with Rule 10c-1a information later than the end of each business day on which a covered securities loan is effected, for example, by the end of the next business day after a covered securities loan is effected. This alternative may lead to lower compliance costs, as reporting entities would have more time to prepare the Rule 10c-1a information for reporting; however, the Commission believes that longer reporting horizons would likely not decrease the cost substantially due to the automated nature of the securities lending transactions and the need to build out systems regardless. Furthermore, a longer reporting horizon would delay the dissemination and availability of securities loan information, potentially reducing some of the benefits of the final rule.

In general, because securities loan terms cannot be disseminated until after they are reported, alternative reporting timeframes reflect different tradeoffs between the value of disseminating security loan terms close to the time that the loan is effected, and the compliance costs associated with reporting loans at shorter time horizons.

The Commission also considered alternatives requiring an RNA to distribute the collected data required in paragraph (c) at different horizons, such

¹⁰⁴⁸ If an RNA chooses to publish cost to borrow statistics that are very granular and, for example, provide separate statistics for Customer and Wholesale loans and/or according to other loan characteristics, then end borrowers would be able to benchmark their transactions to these statistics with increased accuracy. To the extent that an RNA chooses to publish less granular statistics, then the end borrower could still benchmark relative to the cost to borrow statistics provided by an RNA, but the benchmark would be noisier.

¹⁰⁴⁹ See *supra* Part IX.C.1 for further discussion of the expected benefits of the final rule from increasing the transparency of the securities lending market.

¹⁰⁵⁰ See *supra* note 895 and corresponding text for more information about, since activity in the Customer market for securities loans are tightly linked to short selling positions, the sum of loans identified in the Rule 10c-1a data as being to "a customer (if the person lending securities is a broker or dealer)" could give a strong indication of aggregate short interest.

¹⁰⁵¹ See *supra* note 738 and corresponding text.

¹⁰⁵² See *supra* Part IX.C.1 for further discussion of the potential negative consequences of revealing short sellers' strategies.

¹⁰⁵³ See final Rule 10c-1a(c).

¹⁰⁵⁴ See *supra* Part IX.C.2 for further discussion of the regulatory benefits of the final rule.

¹⁰⁵⁵ See *supra* Part IX.C.1 for further discussion of the expected benefits of the final rule from increasing transparency in the securities lending market.

¹⁰⁵⁶ See, e.g., SIFMA AMG Letter, at 4 (stating that "the securities lending market is not an 'intraday market,' as the terms are not settled at the exact time a loan 'is agreed to by the parties.' Rather, terms such as collateral type, fees, and even loan size are worked out between the parties before ultimately being settled, typically at the end of the business day"); Charles Schwab Letter, at 2 (stating that "some loans are not finalized until the end of the trading day"); BlackRock Letter, at 2 (stating that "the nature of the securities lending markets poses a number of logistical hurdles that will make intraday reporting impractical").

¹⁰⁵⁷ See, e.g., IHS Markit Letter, at 13 (stating that "most lenders will not be able to meet the 15-minute requirement without substantial technology development and cost"); Charles Schwab Letter, at 2 (stating that "the proposed 15-minute reporting window would . . . [create] a significant operational burden on firms").

as by the end of the following day.¹⁰⁵⁸ This alternative would allow an RNSA to process the data during regular business hours, potentially limiting the amount of data validation an RNSA could perform prior to distributing the data. However, this would delay market participants' abilities to benefit from Rule 10c-1a data by at least a business day. Furthermore, given the automated nature of the data, the compliance costs associated with this alternative are not likely to be significantly lower than those associated with the final rule. Alternative dissemination timeframes reflect different tradeoffs between price discovery and price efficiency benefits on one hand and harmful information leakage on the other, as well as the cost of reporting at a faster or slower horizon.

An alternative dissemination timeline could require delayed dissemination of size information about large loans (*i.e.*, loans larger than a certain size threshold) while disseminating size information about smaller loans the next business day. This alternative would provide more information to the market than the final rule because it would not mask the size of smaller loans, and thus could enhance the final rule's benefits due to increased transparency.¹⁰⁵⁹ However, this alternative would increase the amount of novel information about short positions that the market could learn from Rule 10c-1a data, which would increase the risk of negative effects due to over-exposing short selling information.¹⁰⁶⁰ This alternative would also increase the complexity of the Rule as determinations would need to be made regarding the optimal threshold size level, as well as how to handle loan modifications that could potentially move a given loan size above or below the given threshold.

3. Only Require Dissemination of Aggregate or Wholesale Statistics

The Commission also considered an alternative whereby an RNSA would produce only aggregate statistics and no transaction-by-transaction reports.¹⁰⁶¹

Specifically, an RNSA could aggregate transaction data elements and produce various aggregated statistics at the end of the business day following the date that the loans were effectuated, without disseminating the raw transaction-by-transaction data.

This alternative would not change the reporting requirements for covered persons relative to the final rule and thus would have the same initial and ongoing compliance costs as the final rule for covered persons. This alternative would be somewhat less costly to implement for an RNSA than the final rule, which requires an RNSA to produce daily aggregate information,¹⁰⁶² similar to this alternative, but also requires dissemination of loan-by-loan information, which this alternative would not do.

This alternative would increase the amount of information available to the public relative to the baseline and thus would mitigate information asymmetries relative to the baseline. Aggregate statistics would also make it more difficult for market participants to use the data to discern information about short positions, which would reduce the risk of exposing short selling strategies relative to the adopted Rule.¹⁰⁶³

However, only having daily aggregate data would not provide the same transparency benefits as final Rule 10c-1a. Without comprehensive transaction data, it would be more difficult for market participants to study and understand pricing dynamics in the securities lending market. The alternative would also make it more difficult for end investors to determine if the terms that their broker-dealer offers are consistent with current market terms for similar loans, rendering it more difficult for investors to evaluate the performance of their broker-dealer. Similarly, without transaction data, beneficial owners would be hampered in their ability to determine whether the terms for loans secured by their lending agents were consistent with market conditions for loans with similar characteristics, rendering it more difficult for beneficial owners to evaluate the performance of their lending agents. A lack of publicly disseminated transaction data may also hinder broker-dealers from determining if the terms being offered by a lending agent for a loan are consistent with market conditions for similar loans.

These effects would reduce the benefits of final rule for improved competition.

The diminished transparency of this alternative relative to the final rule may also lead to less improvement in the efficiency of the securities lending market, leading to fewer benefits for traders in the form of increased trading profits.¹⁰⁶⁴ This alternative would also hamper research into the securities lending market by some market participants and academics, relative to the final rule, by preventing researchers from performing analysis using individual transactions.

The Commission also considered several alternatives related to the applicability of the rule to market for Customer loans, including an alternative in which Customers loan are excluded from reporting requirements, and an alternative in which Customer loans are reported, but not disseminated to the public. One commenter stated that "the Commission should limit the Proposal to the 'wholesale' market," because including Customer market loans in a securities lending reporting regime would be akin to a "transaction-by-transaction short sale public reporting regime."¹⁰⁶⁵

The Commission believes that limiting the applicability of the rule for Customer loans would significantly limit the benefits of the rule for increasing transparency in the securities lending market. In particular, end borrowers would not benefit from a reduction in their information disadvantage vis-à-vis their broker-dealers in the securities lending market.¹⁰⁶⁶ As a result, the effects of the rule on competition between broker-dealers, which would be expected to lower borrowing costs for hard-to-borrow stocks and thus reduce costs for short sellers, would not materialize.¹⁰⁶⁷ Market participants would also not be able to use Rule 10c-1a data to compare trends in both the Wholesale and

¹⁰⁶⁴ See *supra* Part IX.C.1 for a discussion of how improvement in securities lending information could lead to increased profits for some investors by increasing their certainty regarding investment strategies that require borrowing securities.

¹⁰⁶⁵ See Citadel Letter, at 11. The commenter refers to Short Sale Linked Activity, by which the commenter stated that they are referring to what the Proposing Release calls the "retail market" (see Citadel Letter, at 1). The Economic Analysis uses the terms Wholesale market and Customer market to make clear the implications of the final rule for the different segments of the market. See also MFA Letter 3, at 4 (stating that "it is critical that the Proposed Securities Lending Rules be revised to capture only wholesale securities lending activity").

¹⁰⁶⁶ See *supra* Part IX.C.1 for a discussion of the expected effects of the final rule on reducing information asymmetry.

¹⁰⁶⁷ See *supra* Part IX.C.1 for a discussion of the expected effects of the final rule on short sellers.

¹⁰⁵⁸ The final rule requires an RNSA to disseminate transaction-level information (apart from loan size) as soon as practicable, but no later than the morning of the business day after the covered securities loan is affected. See final Rule 10c-1a(g). For a discussion of an alternative in which loan size information is released without a delay, see *supra* Part IX.E.1.

¹⁰⁵⁹ See *supra* Part IX.C.1.

¹⁰⁶⁰ See *supra* Part IX.C.1 for further discussion of the potential negative consequences of revealing short sellers' information.

¹⁰⁶¹ This was suggested by some commenters. See, e.g., RMA Letter, at 4; SIFMA Letter 1, at 3-4; MFA Letter 3, at 4-5.

¹⁰⁶² See final Rule 10c-1a(g)(5).

¹⁰⁶³ See *supra* Part IX.C.1 for further discussion of the potential negative consequences of revealing short sellers' information.

Customer markets simultaneously.¹⁰⁶⁸ Furthermore, while the Commission acknowledges that information about Customers loans can correspond closely to information about short positions,¹⁰⁶⁹ the Commission believes that concerns about whether the dissemination of Customer loan information will harm short sellers are largely addressed by requiring that an RNSA delay public disclosure of the loan amount by 20 business days. This modification should significantly reduce the novelty of the information disseminated under the final rule regarding short sellers' positions, such that it is less timely than pre-existing sources of short selling transparency, such as FINRA's bimonthly short interest data.¹⁰⁷⁰

Second, excluding Customer loans from reporting requirements altogether would not only reduce the benefits of the rule from increased transparency as described above, but would also reduce the regulatory benefits of the rule, as the Commission and FINRA would no longer benefit from an improved ability to use Rule 10c–1a data for surveillance and enforcement, market reconstruction, and market research in Customer segment of the lending market.¹⁰⁷¹ Furthermore, it is unclear whether the costs of the rule for short sellers would be significantly reduced by the exclusion of Customer loans from reporting requirements compared to excluding them from dissemination, as the commenter's concerns related to the inclusion of Customer loans stem primarily from the public dissemination of this information.

4. Require Reporting of Shares Available to Lend and Shares on Loan

The Commission also considered an alternative requiring market participants to report shares available to lend and shares on loan to an RNSA. An RNSA would then produce aggregate statistics by security regarding shares available to loan and shares on loan. This alternative would increase the amount of information available to market participants regarding conditions in the securities lending market, which would increase the benefits of the rule from

increased transparency.¹⁰⁷² It could also benefit consumers of Rule 10c–1a data by lowering barriers to entry for firms to start providing securities lending analytics services, as they could incorporate shares available into their analysis without purchasing data from the current commercial data vendors. This could lead to benefits in the form of increased competition for securities lending analytics.¹⁰⁷³

However, commenters opposed the inclusion of shares available on the grounds that any measure of shares available would be inherently noisy.¹⁰⁷⁴ The Commission does not believe that requiring reporting entities to report shares available would result in a measure that is inherently noisier than the current estimates provided by commercial data vendors, which research shows can be informative.¹⁰⁷⁵ As such a measure would be more comprehensive than existing estimates, it would likely be more informative than existing data estimates. However, the Commission acknowledges that any estimate of shares available to lend would be noisy for numerous reasons, including the reasons mentioned by commenters,¹⁰⁷⁶ and that this noise limits the benefits of requiring the reporting of information about shares available to lend.

This alternative would also increase the costs to the commercial data vendors that currently offer utilization rate and shares available information because it would provide market participants with alternate access to such information. This effect could

lower demand for the data currently provided by commercial data vendors, leading to a loss of business for these data vendors.¹⁰⁷⁷

Regarding shares on loan information, the Commission believes that the benefit of requiring covered person to report aggregate information about shares on loan would also be limited, as this information is rendered somewhat redundant by the requirement that an RNSA disseminate aggregated transaction activity information for each security.¹⁰⁷⁸ At the same time, requiring covered persons to report aggregate information about both shares on loan and shares available would increase the compliance costs relative to the final rule by requiring an additional report (*i.e.*, a report on aggregated securities lending activities) to be reported to an RNSA in addition to the transaction-by-transaction securities lending data.

5. Restrict Covered Persons to Broker-Dealers

The Commission also considered an alternative requiring only broker-dealers, rather than any person that qualifies as a "covered person" under the definition in the rule,¹⁰⁷⁹ to report securities lending transactions to an RNSA. The Commission believes that this alternative would be less costly overall than final Rule 10c–1a. Specifically, covered persons that are not broker-dealers would not incur any of the costs of reporting. As a result, fewer entities would incur costs. Further, most broker-dealers already have connections to FINRA, the only RNSA, so the overall implementation costs associated with connecting to an RNSA for the purposes of reporting would be lower.

In addition, because most broker-dealers currently have relationships with FINRA, the Commission preliminarily believes that this alternative could be implemented sooner, allowing the market and market participants to benefit from an increase securities lending transparency sooner.¹⁰⁸⁰

However, under this alternative, Rule 10c–1a data would not provide a comprehensive view into the securities lending market. Even though broker-dealer activity makes up a significant

¹⁰⁶⁸ See *supra* Part IX.C.1 for a discussion of this benefit.

¹⁰⁶⁹ See *supra* Part IX.B.6 for further discussion of why the market for Customer loans is tightly linked to short selling positions.

¹⁰⁷⁰ See *supra* Part IX.B.6 for a discussion of the FINRA bimonthly short interest data which are made available for publication on the seventh business day after the reporting settlement dates, which occur bimonthly.

¹⁰⁷¹ See *supra* Part IX.C.2 for a discussion of the expected regulatory benefits associated with final Rule 10c–1a.

¹⁰⁷² See *supra* Part IX.C.1 for further discussion of the expected effects of the final rule on increase transparency in the securities lending market.

¹⁰⁷³ See *supra* Part IX.D.2 for further discussion of the final rule's expected effects on competition between securities lending data analytics firms.

¹⁰⁷⁴ See, *e.g.*, AIMA Letter 1, at 2; SIFMA AMG Letter, at 8, 11; CASLA Letter, at 2; MFA Letter 3, at 6–7.

¹⁰⁷⁵ See, *e.g.*, Dixon, et al. (2021) *supra* note 746.

¹⁰⁷⁶ See, *e.g.*, SBAI Letter, at 2 (stating that "funds managed under 1940 Act regulations have restrictions on their approach to securities lending (*e.g.*, limit on lending: A fund may not have on loan at any time securities representing more than one-third of the fund's total value), thereby not allowing an accurate calculation of 'securities available to lend' on an individual security basis"); MFA Letter 1, at 10 (stating that "while a lender's portfolio holdings may be eligible securities for lending, they are unlikely to be 'available to lend' at all times."); See also SIFMA Letter 1, at 15 (stating that "the number of securities in accounts of customers who have agreed to participate in a fully paid lending program and margin customer accounts will lead to a gross over-inflation of the number of securities available to lend. Customer margin inventory can be impacted due to volatility of customers (*e.g.*, market makers and hedge funds) who often move positions in and out quickly. Customer balances often change and can also swing between debits/credits, resulting in positions being locked/released.").

¹⁰⁷⁷ See *supra* Part IX.C.4 for further discussion of the final rule's expected effects on securities lending data vendors' revenues.

¹⁰⁷⁸ See final Rule 10c–1a(g)(5).

¹⁰⁷⁹ See final Rule 10c–1a(j)(1) for a definition of "covered person."

¹⁰⁸⁰ See *supra* Part IX.C.1 for further discussion of the expected benefits from the final rule stemming from increased transparency in the securities lending market.

percentage of securities lending transactions in the Customer market, the alternative would exclude market participants such as lending programs that are significant players in the securities lending market, particularly in the Wholesale market.¹⁰⁸¹ Thus, the alternative would obscure a large swath of the Wholesale market, making it more difficult for lending institutions, for example, to benefit from securities lending transparency because the included data would provide a less relevant benchmark.

Requiring only broker-dealers to report data could also create a competitive advantage for non-broker-dealer entities that engage in securities lending. Such entities would not be required to report their transactions and thus would have lower costs. They would also be in a position to attract business from borrowers or beneficial owners seeking to keep their transactions out of the public view, further tilting the competitive landscape in their favor. This could create an uneven playing field for entities engaged in the securities lending market, diminishing the benefits of the rule for competition and transparency.

6. Expand Reporting Agents Beyond Broker-Dealers and Clearing Agencies

The Commission also considered an alternative expanding who can act as a reporting agent to entities other than broker-dealers and clearing agencies.¹⁰⁸² Commenters expressed concern that restricting reporting agents to only broker-dealers would result in conflicts of interest between broker-dealers acting as reporting agents on the one hand, and beneficial owners and lenders who transact with these broker-dealers in the primary market on the other.¹⁰⁸³ Since information about an entities' lending activities is likely to correspond closely to that entities' inventory levels, it is possible that such a risk of information leakage may be a significant cost for some lenders and lending agents who are "highly concerned about visibility into inventory levels."¹⁰⁸⁴

Furthermore, expanding reporting agents to entities other than broker-dealers and clearing agencies would serve to increase the number of entities that would compete to provide lenders

and lending agents with reporting services. Thus, expanding the eligibility of reporting agents would serve to promote more competition in this market,¹⁰⁸⁵ potentially leading to lower fees for lenders and lending agents that would rely on these reporting agents for these services.

However, the Commissions believes that expanding reporting agent eligibility beyond broker-dealers and clearing agencies would increase the costs associated with the rule. The Commission's oversight over reporting agents that are neither broker-dealers nor clearing agencies could be limited, which could shift the costs of monitoring reporting agents for accuracy and compliance onto the lenders and lending agents that would hire them. This would serve to increase covered persons' ongoing costs.

In addition, to the extent that covered persons are concerned about contracting with broker-dealers as reporting agents because of potential conflicts of interest, to the extent that there are clearing agencies that would act as reporting agents, these covered persons could contract with these entities.

Furthermore, covered persons are not restricted from contracting privately to use third-party vendors to assist in reporting.¹⁰⁸⁶ Therefore, those market participants that are concerned about revealing sensitive inventory information to broker-dealers but would still benefit from reporting assistance could privately contract with third-party vendors. Since covered persons could not rely on third-party vendors to fulfill their regulatory obligations,¹⁰⁸⁷ contracting with a third-party vendor for assistance in reporting may require covered persons to incur some amount of monitoring costs; however, this option should provide covered persons with additional flexibility and a way to potentially mitigate reporting costs.¹⁰⁸⁸

7. Publicly Releasing the Information in 10c-1a(e)

The Commission also considered an alternative requiring public disclosure of the information in Rule 10c-1a(e), namely available identifiers for each

party to the transaction, whether the security is loaned from a broker's or dealer's securities inventory to a customer of such broker or dealer, and if known whether the loan is being used to close out a fail to deliver.

Information on who the parties to the transaction are and whether a broker or dealer is lending to its own customer could refine the context around the other data elements in Rule 10c-1a that are public. Such refinement would be likely to alter trading strategies, which could have both positive and negative effects on market quality. For example, this information could allow the market to identify the positions of large short sellers. Empirical studies support the idea that short sellers are informed, suggesting that additional information about short selling could help investors better value securities.¹⁰⁸⁹ Professional traders might seek to profit by developing trading strategies based on signals from the identities of those borrowing securities, particularly those borrowing a high volume. In addition, the information could be used to reduce the search costs in the securities lending market.

However, the information on whether the security loan is being used to close out a fail to deliver may be of little use to anyone other than regulators. At this time, the Commission is unaware of potential non-regulatory uses of such information that would be beneficial to the market.

The alternative would result in higher costs to an RNA, to those who access the data, and to participants in the securities lending market. An RNA would incur higher costs to release the greater volume of data and those who access the data would incur higher costs to import and process the data. Trading strategies incorporating the identities of borrowers and lenders could negatively impact those borrowers and lenders in ways that could ultimately degrade price efficiency. In particular, identifying large short sellers could facilitate "copycat strategies" that seek to profit by copying the activity of others believed to have better information or by trading ahead of them.¹⁰⁹⁰ If it facilitates such trading

¹⁰⁸¹ See, e.g., Table 3 in the OFR Pilot Survey, which estimates that loans from broker-dealers only account for around 1.57% of shares on loan and around 1.33% of shares available to loan in the Wholesale market.

¹⁰⁸² See final Rule 10c-1a(j)(4) for a definition of "reporting agent."

¹⁰⁸³ See, e.g., IHS Markit Letter, at 2, 10-11; S3 Partners Letter, at 12.

¹⁰⁸⁴ See IHS Markit Letter, at 2.

¹⁰⁸⁵ This was supported by commenters. See, e.g., HMA Letter, at 8 (stating that "having separate reporting agents who are not brokers may enable lenders to more freely shop amongst multiple, competing lending agents").

¹⁰⁸⁶ Note that, while covered persons can use third party vendors to help prepare their reports, such vendors would not be reporting agents under final Rule 10c-1a. See *supra* Part VII.B.2.

¹⁰⁸⁷ See *id.*

¹⁰⁸⁸ See *supra* Part IX.C.3 for a further discussion about how contracting with third party vendors may allow covered persons to lower their compliance costs.

¹⁰⁸⁹ See, e.g., Joseph E. Engleberg, et al., *How are Shorts Informed?: Short Sellers, News, and Information Processing*, 105 J. Fin. Econ. 260 (2012); David E. Rapach, et al., *Short Interest and Aggregate Stock Returns*, 121 J. Fin. Econ. 46 (2016). However, one academic study finds that prices react to short sales even when short sales are not transparent to the market. See Michael J. Aitken, et al., *Short Sales Are Almost Instantaneously Bad News: Evidence from the Australian Stock Exchange*, 53 J. Fin. 2205 (1998).

¹⁰⁹⁰ See SEC Division of Economic Research and Analysis (DERA), *Short Sale Position and*

strategies, releasing the identities of short sellers could act as a constraint on fundamental short selling, reducing the incentives to conduct fundamental research.¹⁰⁹¹ Less fundamental research could potentially result in over- or underpricing, because prices would not incorporate information short sellers would have otherwise collected and traded on. Revealing the identities of participants and when they are borrowing to close failures to deliver in the securities lending market could also result in pressure on lenders to recall loans or negative campaigns against short sellers.¹⁰⁹²

8. Additional Information in the Reported or Disseminated Information

The Commission also considered alternatives requiring additional data fields to be reported and requiring an RNSA to compute derived fields for public dissemination.

For example, the Commission could require entities to report in their lending transactions whether a given loan was transacted on their own behalf, or on behalf of a customer, *i.e.*, whether the loan was transacted on a principal or agent basis. This alternative would allow FINRA and the Commission to oversee compliance with various regulations. These data could allow for the review of transactions that occur by an entity on a principal and agent basis to look for systematically different terms between the two different types of transactions by the same broker-dealer. Such differences may flag to regulators that broker-dealers are not fulfilling their obligations and may be in violation of existing rules. Requiring such data would add complexity and additional cost to the rule. However, these costs may be minimal for broker-dealers, who are FINRA members, as the Commission understands that FINRA members already collect much of this information.¹⁰⁹³ The Commission is unaware of any regulation or rule requiring non-FINRA members to collect this information, and this alternative may significantly increase costs for non-FINRA members who would be required to build out systems to collect and report such information.

As discussed in the Proposing Release,¹⁰⁹⁴ the Commission considered including in Rule 10c–1a(e) information on whether, if the lender is a broker or dealer, the securities are borrowed from customers who have agreed to participate in fully paid lending programs or from securities owned in its margin customers' accounts. Such information could help protect investors by improving the efficiency of surveillance of, for example, compliance with Rule 15c3–3(b)(3) related to providing the lender collateral to secure the loans of securities when broker-dealers lend shares from fully paid or excess margin securities from customers. However, the Commission has since come to understand that it may not be feasible for broker-dealers to identify which customers' shares are being loaned.¹⁰⁹⁵

9. Only Allow an RNSA To Charge Fees to Data Reporters

The Commission also considered an alternative that would allow an RNSA to charge fees to reporters of Rule 10c–1a information, but not to subscribers to access the securities lending data. The effect on costs of this alternative would be that any fees levied by an RNSA to help pay for costs to collect and disseminate the data would shift onto covered persons providing data to an RNSA. The Commission believes that many of the market participants providing data to an RNSA under the final rule will also be consumers of the data. If all 361 entities providing data were the only entities to subscribe to the data, for these market participants it is unclear how much difference this shift in fees would make. However, to the extent that more market participants subscribe to the data, prohibiting an RNSA from this additional source of revenue would likely result in higher reporting fees than under the final rule.

This alternative would potentially increase the benefits of the final rule for increased transparency, in that providing access to Rule 10c–1a data for free may increase the number of market participants who access it.¹⁰⁹⁶ However, TRACE has been successful in mitigating inefficiencies in the corporate bond market despite the fact that it is

only available for fee.¹⁰⁹⁷ Furthermore, the Commission expects that most of the entities likely in a position to affect the securities lending market or to use information from the securities lending market to affect other markets would subscribe to the data regardless of whether there was a cost to subscribing. Therefore, the Commission does not believe that disallowing an RNSA from charging fees to data subscribers would result in significant additional benefits to the securities lending market relative to the final rule.

10. Longer Holding Period Requirement

The Commission also considered an alternative requiring an RNSA to retain and make publicly available the data for a period longer than the 5 years specified (*e.g.*, 10 or 20 years). This alternative would ensure that the data are available to regulators and market participants at longer horizons. For instance, if regulators or market participants wanted to evaluate how the lending market reacts to different market events, such as across the business cycle, then five years of data may not be sufficient. The average business cycle is 3–5 years, and so to study the dynamics of the lending market across the business cycle would require at least 10 years, if not more, of data. Additionally, because there is likely persistence in conditions in the securities lending market, a five-year time horizon may not be sufficient for certain statistical analyses.¹⁰⁹⁸ Improved understanding of the dynamics of the securities lending market across various market conditions may benefit both regulators and investors by providing more precise information with which to make regulatory and investment decisions—enhancing many of the benefits described above.¹⁰⁹⁹ For example, longer term data may enable superior statistical analysis by market participants of the dynamics of the securities lending market in various environments, which in turn may lead to better investment decisions and thus improved market performance. Additionally, the Commission could use longer term data to provide more precise estimates of damages in, for example Reg SHO violations or violations of

Transaction Reporting (May 5, 2014), available at <https://www.sec.gov/files/short-sale-position-and-transaction-reporting%2C0.pdf>, at 52–53.

¹⁰⁹² See *supra* Part IX.C.1 for further discussion of the potential negative consequences of revealing short sellers' information.

¹⁰⁹³ See, *e.g.*, FINRA Rule 4314.

¹⁰⁹⁴ See Proposing Release, 86 FR 69846.

¹⁰⁹⁵ See, *e.g.*, James J. Angel Letter, at 3 (stating that shares available for lending from a brokerage firm's customers' margin accounts are in “fungible bulk” and that “the firm may not even have identified which customer's shares are being loaned out when it makes its delivery” to the DTC to settle its net delivery obligation).

¹⁰⁹⁶ See *supra* Part IX.C.1 for further discussion of the expected benefits from the final rule on increased transparency in the securities lending market.

¹⁰⁹⁷ See *supra* Part IX.C.1 for a discussion of empirical evidence that the introduction of TRACE improved efficiencies in the corporate bond market.

¹⁰⁹⁸ Persistence in conditions implies that observations are not independent. When this is the case even relatively large datasets may lack statistical power for some modeling applications, such as factor models. The solution in such cases is to significantly increase the sample size.

¹⁰⁹⁹ See *supra* Parts IX.C.1 and IX.C.2.

Exchange Act Rule 15c3–3 (Customer Protection Rule), to calculate disgorgement.

The Commission believes that the alternative would impose additional costs on an RNSA not required by the final rule in terms of storing and maintaining historical data. However, since the final rule already requires an RNSA to build systems to collect and disseminate five years of data, these costs would likely be relatively small because the Commission understands that the cost of storing data is relatively small compared to the cost of producing and maintaining the systems needed to collect, process, and disseminate the data.

While the final rule allows FINRA to destroy the data after five years, the Commission believes that it is unlikely that FINRA would do so. This is because the cost of retaining the data is likely relatively small and the data may have commercial value. For instance, an RNSA could levy additional fees for access to historical data. If this is the case, and an RNSA chooses to keep the historical data under the final rule, then the cost difference to an RNSA between the final rule and this alternative would likely be minimal given that this alternative would require an RNSA to comply with a requirement that they may already choose to do on their own.

11. Longer Implementation Period

The Commission considered alternatives that would allow for a longer implementation period. Several commenters requested implementation periods of 18 or 24 months,¹¹⁰⁰ which may be longer than the final rule's implementation period.¹¹⁰¹ Some commenters requested a phased-in approach to implementation, for example, by first only requiring information to be reported for certain types of securities, or initially delaying the public dissemination of data.¹¹⁰² The Commission recognizes that a longer implementation period would give reporting entities additional time and flexibility while building out the systems necessary to facilitating the reporting required under the final rule,

which may allow a more efficiency allocation and resources and thus reduce their implementation costs. Similarly, delaying the public dissemination of data would give an RNSA additional time and flexibility to build out systems related to dissemination, which may reduce their implementation costs.

However, the Commission also recognizes that any delay in the implementation period would also delay the realization of the benefits of final Rule 10c–1a, both those related to increased transparency in the securities lending market,¹¹⁰³ as well as the regulatory benefits.¹¹⁰⁴ Furthermore, while an initial delay in the public dissemination of the data would maintain the regulatory benefits of the rule, as regulators would still have access to the data, other market participants' access to the information would be delayed, which would delay the benefits of the Rule related to increased transparency. Thus, a choice of implementation period requires balancing the need to allow for sufficient time to build out reporting systems, on the one hand, and ensuring that market participants have timely access to Rule 10c–1a information on the other.

12. Report to the Commission Rather Than to an RNSA

The Commission also considered an alternative requiring that covered persons disclose Rule 10c–1a information directly to the Commission—for example, through EDGAR, rather than to an RNSA. Such an alternative could alter which entities incur costs and would likely increase overall costs relative to the final rule because, for example, many entities who possess reporting capabilities to an RNSA, *e.g.*, members of FINRA, would need to establish comparable reporting relationships with the Commission. In particular, many broker-dealers already have connectivity to FINRA systems that support the kind of submission process required for providing Rule 10c–1a information.¹¹⁰⁵ Establishing similar connectivity with EDGAR may require additional effort for covered persons compared to the proposal. Additionally, FINRA has expertise creating repositories similar to that called for in the final rule, suggesting

that the final rule will likely be more efficient than this alternative.

The Commission is uncertain of how some benefits of this alternative would compare to certain benefits of the final rule. Specifically, while this alternative would not alter the content of the data in the final rule, the accessibility and timeliness of the data under this alternative depend on how the Commission would develop the functionality for distributing the data. In particular, we cannot at this time assess whether the alternative would result in more or less timely or accessible data or if the differences would be meaningful. For example, data obtained from the Commission could be less accessible if the Commission could not develop functionality allowing market participants to access the data with the same ease an RNSA could provide, given an RNSA has more experience collecting and disseminating similar data (*e.g.*, TRACE). Thus, this alternative could result in significantly higher compliance costs than the final rule.

Additionally, the regulatory benefits of the alternative relative to the final rule will depend on whether the Commission chose to grant an RNSA direct access to the confidential data. If the Commission chose to do so, then the regulatory benefits of this alternative would be the same as the current proposal. If the Commission chose not to grant an RNSA access to the confidential data, then the regulatory benefits would decline significantly as many of the regulatory benefits, such as improved monitoring of broker-dealers for compliance with various legal requirements, require access to the confidential data.¹¹⁰⁶ Thus, the regulatory benefits of the rule could be severely diminished.

13. Report Through an NMS Plan

Because the nature of securities lending data is similar to the transaction data governed by the NMS data plans, such as the CT Plan,¹¹⁰⁷ the Commission considered proposing a new NMS Plan to set up a reporting and dissemination process that mirrors the CT Plan. Reporting entities could report the data to Transaction Reporting Facilities operated by competing

¹¹⁰⁰ See, *e.g.*, SIFMA Letter, at 4 (recommending “an 18-month build-out period following the RNSA’s finalization of the technical specifications for reporting”); Fidelity Letter, at 5 (recommending a two-year implementation period).

¹¹⁰¹ See final Rule 10c–1a(f) and *supra* Part VIII for additional discussion of the implementation timeline.

¹¹⁰² See, *e.g.*, Chamber of Commerce Letter, at 4 (recommending at “phased implementation by asset class”) and SIFMA Letter 1, at 4 (recommending “a staged reporting regime to allow regulators sufficient time to analyze collected data before public dissemination of any information”).

¹¹⁰³ See *supra* Part IX.C.1 for a discussion of the benefit of the final rule related to increased transparency in the securities lending market.

¹¹⁰⁴ See *supra* Part IV.C.2 for a discussion of the regulatory benefits of the final rule.

¹¹⁰⁵ For example, FINRA’s TRACE system.

¹¹⁰⁶ See *supra* Part IX.C.2 for further discussion of the expected regulatory benefits of the final rule.

¹¹⁰⁷ *Joint Industry Plan; Order Approving, as Modified, a National Market System Plan Regarding Consolidated Equity Market Data*, Release No. 34–92586, 86 FR.44142 (Aug. 11, 2021), available at <https://www.sec.gov/rules/sro/nms/2021/34-92586.pdf>, appeal filed, *Nasdaq Stock Market LLC v. SEC*, No. 21–1167 (D.C. Cir. Aug. 9, 2021).

consolidators,¹¹⁰⁸ who would consolidate and distribute the data for a fee. The NMS Plan would set the fee paid by (or rebate collected by) the reporting entities to (or from) the competing consolidators for the collection of the data.¹¹⁰⁹ We did not receive public comments addressing this alternative.

This alternative is more likely than the final rule to improve the competitiveness of the market for securities lending data. Under this alternative, current data vendors, who have experience collecting and disseminating securities lending information, could compete as competing consolidators for securities lending data and have the same access to the supply of consolidated data as any other competing consolidator, including an RNSA or SRO. Conversely, as final Rule 10c-1a gives RNSAs the authority to implement rules regarding the format and manner of collection and dissemination of Rule 10c-1a data,¹¹¹⁰ the final rule may be more likely to result in a situation in which a current vendor may need to compete with an RNSA that has exclusive access to the raw Rule 10c-1a data. However, since final Rule 10c-1a does not require the reporting of shares available to lend,¹¹¹¹ to the extent that commercial data vendors' superior access to information about shares available to lend and utilization rates provides them with a competitive advantage under the final rule,¹¹¹² it may not necessarily be the case that this alternative would result in significantly better outcomes for current data vendors than the final rule. This alternative would, however, reduce the barriers to entry in the market for securities lending data because all new

entrants would have access to the same data for consolidation and distribution.

This alternative could provide for the public dissemination of securities lending transaction information without the reliance on an RNSA alone. It could also leverage the processes of the NMS Plan, but would require compliance costs by one or more SROs that chose to set up and operate a Transaction Reporting Facility. Fees for reporting transactions could offset such compliance costs. While the Commission cannot be sure how these fees under this alternative would compare to the fees under the final rule, competition between competing consolidators could result in reporting facilities that are more efficient than that of an RNSA. However, as most SROs (including all of the national securities exchanges) do not necessarily have expertise that is specific to the dissemination of securities lending data, compliance costs may be higher than those proposed under the CT Plan, for which national securities exchanges do have relevant experience as they disseminate equity market data through their proprietary data feeds. A need to coordinate between multiple SROs in order to establish an NMS Plan may also imply higher coordination costs in this alternative as compared to the final rule.

X. Paperwork Reduction Act

Certain provisions of final Rule 10c-1a contain "collection of information" requirements within the meaning of the Paperwork Reduction Act of 1995 ("PRA").¹¹¹³ The hours and costs associated with complying with the final rule's reporting requirements, RNSA rule implementation requirements, publication of data requirements, and data retention requirements, as applicable, constitute PRA burdens.

In accordance with the PRA, the Commission is submitting the final rule amendments to the Office of Management and Budget ("OMB") for review.¹¹¹⁴ The Commission published a notice requesting comment on these collections of information requirements in the Proposing Release and submitted these requirements to the OMB for review in accordance with the PRA. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number. The title and control number

for these collections of information are OMB Control No. 3235-0788.

The Commission received limited comments on the PRA burden estimates included in the Proposing Release.¹¹¹⁵ One commenter stated that the Commission has covered most of the impacts of the proposed rule.¹¹¹⁶ Another commenter stated that the proposed rule's reporting regime would require considerable time to develop, test, launch, and monitor.¹¹¹⁷ Comments on specific parts of the Proposing Release's PRA burden estimates are discussed below, in this part, as they relate to the particular PRA burden estimates that are the subject of those comments. The Commission acknowledges the PRA burdens that will be assumed by covered persons, reporting agents, and RNSAs in complying with the final rule, and its estimates of the collection of information for the amendments, as adopted, have been updated from the estimates included in the Proposing Release, as appropriate, with the updated estimates based on the modifications in the final rule, comments received, and more recently available data.

The information collections are necessary to remediate certain issues present in the securities lending market. As discussed above, in Part I, the Commission is adopting amendments to close securities lending data gaps and increase market efficiency. Final Rule 10c-1a is designed to increase the transparency of information available to brokers, dealers, and investors with respect to the loan or borrowing of securities. Additionally, final Rule 10c-1a is designed to provide an RNSA with data that might be used for in-depth monitoring and surveillance. Further, the data elements are designed to provide regulators with information to understand whether broker-dealers are building up risk; what strategies broker-dealers use to source securities that are lent to their customers; and what loans broker-dealers provide to their customers with fail to deliver positions.

To achieve these objectives, the Commission is adopting the requirements discussed above, in Parts VII.A through M. Under final Rule 10c-1a, certain persons are required to report information about securities loans to an RNSA. The final rule also requires that an RNSA make certain information provided to an RNSA, along with daily information pertaining to the aggregate

¹¹⁰⁸ A competing consolidator is a "securities information processor required to be registered pursuant to 17 CFR 242.614 ("Rule 614") or a national securities exchange or national securities association that receives information with respect to quotations for and transactions in NMS stocks and generates a consolidated market data product for dissemination to any person." 17 CFR 242.600(b)(16).

¹¹⁰⁹ The Proposing Release described this alternative slightly differently, with the data collected by an SRO rather than by competing consolidators. On further consideration we believe the scenario described here is more likely because it is similar to the Market Data Infrastructure rule, but both scenarios would result in economic competition on data price, and we considered both versions of this alternative.

¹¹¹⁰ See *supra* Part VII.I for further discussion.

¹¹¹¹ See *supra* Part IX.C.1 for further discussion related to the fact that Rule 10c-1a data will not specifically provide information on shares available.

¹¹¹² See *supra* Part IX.D.2 for further discussion of the impact of the final rule on competition in the market for securities lending data and analytics.

¹¹¹³ 44 U.S.C. 3501 through 3521. The burdens associated with the information collection requirements are referred to as "PRA burdens."

¹¹¹⁴ See 44 U.S.C. 3507(d); 5 CFR 1320.11.

¹¹¹⁵ See, e.g., CSFME Letter 1, at 3; IHS Markit Letter, at 13.

¹¹¹⁶ IHS Markit Letter, at 13.

¹¹¹⁷ See MFA Letter 3, at 8.

transaction activity and distribution of loan rates for each reportable security, publicly available. Further, the final rule requires certain confidential information to be reported to an RNSA to enhance RNSA oversight and enforcement functions.

A. Respondents

As a preliminary matter, the opacity of the securities lending market makes estimating the number of respondents difficult. Indeed, as discussed above, an objective of Rule 10c–1a is to close the data gaps in this market.¹¹¹⁸ Despite these data gaps, the Commission has estimated the number of respondents who are a covered person, reporting agent, or RNSA.

As described in detail below, in this part, the respondents under final Rule 10c–1a are: (1) covered persons and (2) reporting agents capturing the applicable Rule 10c–1a information and providing it to an RNSA, in the format and manner required by the applicable rule(s) of such RNSA, and within the time periods specified in paragraphs (c) through (e) of the final rule, as applicable to the covered securities loan;¹¹¹⁹ and (3) an RNSA complying with the final rule's requirements to implement rules regarding the format and manner of its collection of Rule 10c–1a information, publish the information specified in final Rule 10c–1a(g) in accordance with the time frames required for such publication, and retain and make available to the Commission, or any other persons designated by the Commission, certain specified information. Given the differences in the information collections applicable to these parties, as discussed below, in this part, the discussion of burdens applicable to covered persons and reporting agents are separated from the discussion of those applicable to an RNSA.

1. Covered Persons

As discussed above, in Part VII.A, under final Rule 10c–1a(j)(1), a covered person is any intermediary other than a clearing agency when providing only the functions of a central counterparty

pursuant to Rule 17Ad–22(a)(2) of the Exchange Act or a central securities depository pursuant to Rule 17Ad–22(a)(3) of the Exchange Act; any person that agrees to a covered securities loan as a lender when an intermediary is not used unless paragraph (j)(1)(iii) of the final rule applies; or a broker or dealer when borrowing fully paid or excess margin securities pursuant to Rule 15c3–3(b)(3) of the Exchange Act.

In the Proposing Release, the Commission estimated, based on a review of Forms N–CEN filed with the Commission that identify the lending agents used by investment companies, that there would be 37 lending agent intermediaries, 3 of which would provide information directly to an RNSA and 34 of which would provide information to a reporting agent.¹¹²⁰ Using updated figures based on a review of Forms N–CEN filed with the Commission, it is estimated that there are 35 intermediaries. Of the 35 intermediaries identified, four are broker-dealers. Broker-dealers have experience providing information directly to RNSAs. The Commission estimates that those four intermediaries would provide information directly to an RNSA. The other 31 intermediaries are not broker-dealers. Therefore, the Commission estimates that they would provide information to a reporting agent rather than establish connectivity directly to an RNSA.

In the Proposing Release, the Commission estimated, based on the number of funds within investment companies that do not employ a lending agent based on a review of Forms N–CEN filed with the Commission, that there would be 278 lenders that would not employ a lending agent, 139 of which would provide information to an RNSA and 139 of which would provide information to a reporting agent.¹¹²¹ One commenter stated that this was an underestimate that accounted for only those lenders that are registered with the Commission.¹¹²² The Commission agrees with the commenter and is updating the estimate regarding unregistered entities, which comprise approximately 67 percent of the securities available for lending.¹¹²³ The unregistered portion of the securities lending market, therefore, is estimated to be 1,389 entities.¹¹²⁴ However,

according to the OFR Pilot Survey, only about 15 percent of securities loans are not intermediated and go directly to end borrowers.¹¹²⁵ Therefore, it is estimated that the number of unregistered lenders that would not use an intermediary is 208 entities.¹¹²⁶ Accordingly, the Commission estimates that there are 434 persons that agree to a covered securities loan as the lender when an intermediary is not used, based on a review of Forms N–CEN filed with the Commission showing the number of investment companies that do not employ an intermediary.¹¹²⁷ Consistent with the estimated ratio included in the Proposing Release,¹¹²⁸ of these 434 persons, the Commission estimates that 217 persons will provide information to an RNSA (including by using a third-party vendor) and that 217 persons will provide information to a reporting agent.

As discussed above, in Part VII.A, paragraph (j)(1)(iii) was added to the proposed rule to specify that, if a broker or dealer is borrowing fully paid or excess margin securities in the covered securities loan, the broker or dealer is required to provide the Rule 10c–1a information to an RNSA. Based on a review of FOCUS Reports Part II, Item 4350, it is estimated that there are 34 brokers or dealers borrowing fully paid or excess margin securities pursuant to Rule 15c3–3(b)(3) of the Exchange Act. Consistent with the estimate for the number of intermediaries who are brokers or dealers and would provide information directly to an RNSA, the Commission estimates that the 34 brokers or dealers borrowing fully paid or excess margin securities would provide information directly to an RNSA.

Consistent with the estimate included in the Proposing Release,¹¹²⁹ the Commission is not estimating that persons who agree to a covered securities loan on behalf of themselves or another person and employ a lending agent assume any PRA burdens because those persons would not be responsible for providing information to an RNSA. Accordingly, the Commission estimates that 503 covered persons¹¹³⁰ will be

¹¹¹⁸ See *supra* Part I; see also *supra* Part IX.B.2.

¹¹¹⁹ The Proposing Release separated such persons into the following categories: lending agents, reporting agents, and lenders that would not employ a lending agent. The final rule differs from the proposed rule in that different categories of persons are used to describe those who have or may have a reporting requirement, as applicable, and as discussed above, in Parts VII.A and VII.B.

Therefore, the categories of persons included herein, as well as the estimates, vary from those included in the Proposing Release. For instance, this release uses the term “intermediaries,” which is comparable to the Proposing Release’s use of the term “lending agents.”

¹¹²⁰ Proposing Release, 86 FR 69822.

¹¹²¹ Proposing Release, 86 FR 69822–23.

¹¹²² See CSFME Letter 1, at 3.

¹¹²³ See OFR Pilot Survey, Table 2, at 7. (((\$2.519 trillion + \$1.563 trillion + \$663 billion + \$1.585 trillion)/\$9.443 trillion * 100% = 67%).

¹¹²⁴ (684 registered investment companies that agree to a covered securities loan as the lender × (0.67/0.33) = 1,389 unregistered entities.

¹¹²⁵ See OFR Pilot Survey, at 7–8.

¹¹²⁶ 1,389 unregistered entities × 0.15 = 208 unregistered entities.

¹¹²⁷ 226 registered investment companies that agree to a covered securities loan as the lender when an intermediary is not used + 208 unregistered entities = 434 persons that effect a covered securities loan as the lender when an intermediary is not used.

¹¹²⁸ Proposing Release, 86 FR 69823.

¹¹²⁹ See Proposing Release, 86 FR 69822.

¹¹³⁰ 35 intermediaries + 434 persons that agree to a covered securities loan as the lender when an intermediary is not used + 34 brokers or dealers

subject to PRA burdens under final Rule 10c–1a(a). As set forth in paragraph (a)(1) of the final rule, any covered person who agrees to a covered securities loan on behalf of itself or another person is required to provide Rule 10c–1a information directly to an RNSA;¹¹³¹ however, a covered person may enter into a written agreement with a reporting agent for the reporting agent to provide information to an RNSA.¹¹³² Of the 503 covered persons, the Commission estimates that 255 are providing covered persons¹¹³³ and that 248 are non-providing covered persons.¹¹³⁴

2. Reporting Agents

Under the proposed rule, the term “reporting agent” referred specifically to certain broker-dealers. In the Proposing Release, the Commission estimated, based on the number of broker-dealers that lent securities in 2020, that there would be 94 reporting agents.¹¹³⁵ Under final Rule 10c–1a(j)(4), a reporting agent means a broker, dealer, or registered clearing agency that enters into a written agreement with a covered person under final Rule 10c–1a(a)(2). Based on the number of broker-dealers that lent securities as of December 2022 (97),¹¹³⁶ as well as the number of registered clearing agencies in 2023 (9),¹¹³⁷ it is estimated that there are 106

borrowing fully paid or excess margin securities pursuant to Rule 15c3–3(b)(3) of the Exchange Act = 503 covered persons.

¹¹³¹ For the purposes of the PRA estimates included in this release, such covered person is referred to as a “providing covered person.”

¹¹³² For the purposes of the PRA estimates included in this release, such covered person is referred to as a “non-providing covered person.”

¹¹³³ 4 broker-dealer intermediaries + 217 persons that agree to a covered securities loan as the lender when an intermediary is not used and will provide information to an RNSA + 34 brokers or dealers borrowing fully paid or excess margin securities = 255 providing covered persons.

¹¹³⁴ 31 non-broker-dealer intermediaries + 217 persons that agree to a covered securities loan as the lender when an intermediary is not used and will provide information to a reporting agent = 248 non-providing covered persons.

¹¹³⁵ Proposing Release, 86 FR 69822.

¹¹³⁶ These persons likely have experience providing RNSAs with information through other trade-reporting requirements and have experience with securities lending. It is possible that some of these broker-dealers may choose not to be a reporting agent and that other persons may choose to be a reporting agent. Given uncertainty and a lack of granular data about the current market, however, the Commission continues to believe that an estimate based on the number of broker-dealers that lent securities in is reasonable with regard to the estimate of the number of reporting agents. See Proposing Release, 86 FR 69822.

¹¹³⁷ See *Cybersecurity Risk Management Rule for Broker-Dealers, Clearing Agencies, Major Security-Based Swap Participants, the Municipal Securities Rulemaking Board, National Securities Associations, National Securities Exchanges, Security-Based Swap Data Repositories, Security-*

reporting agents¹¹³⁸ that may be subject to PRA burdens under final Rule 10c–1a(b).

3. RNSA

Under final Rule 10c–1a(j)(5), an RNSA is an association of brokers and dealers that is registered as a national securities association pursuant to section 15A of the Exchange Act. Consistent with the estimate included in the Proposing Release,¹¹³⁹ it is estimated that there is one RNSA that will be subject to PRA burdens under paragraphs (f), (g), and (h) of the final rule.

B. Collection of Information Related to Covered Persons

Final Rule 10c–1a applies to any covered person who agrees to a covered securities loan on behalf of itself or another person. Under final Rule 10c–1a(a)(1), a covered person who agrees to a covered securities loan on behalf of itself or another person shall provide to an RNSA the Rule 10c–1a information, in the format and manner required by the applicable rule(s) of such RNSA, and within the time periods specified in paragraphs (c) through (e) of the final rule. As discussed above, in this part, this type of covered person is referred to as a providing covered person. However, a covered person may rely on a reporting agent to fulfill the covered person’s reporting obligations under final Rule 10c–1a(a) if the covered person: (1) enters into a written agreement with the reporting agent that agrees to provide the Rule 10c–1a information to an RNSA on behalf of such covered person, in accordance with the requirements set forth in Rule 10c–1a(b)(1), and (2), provides the reporting agent with timely access to the Rule 10c–1a information. As discussed above, in this part, this type of covered person is referred to as a non-providing covered person.

One commenter stated that the Commission should consider that not all “reporters” have licenses to multiple instrument identifiers required for reporting, meaning that smaller firms

Based Swap Dealers, and Transfer Agents, Release No. 34–97142 (Mar. 15, 2023), 88 FR 20212 (Apr. 5, 2023), 88 FR 20294. For purposes of this PRA burden estimate, all registered clearing agencies are included as respondents who are reporting agents. A registered clearing agency may elect not to be a reporting agent, in which case the PRA burden estimate may decrease due to the decrease in number of respondents.

¹¹³⁸ 97 broker-dealers that lent securities + 9 registered clearing agencies = 106 reporting agents. This estimate differs from that included in the Proposing Release because the final rule adds registered clearing agencies to the list of persons who are eligible to be reporting agents.

¹¹³⁹ See, e.g., Proposing Release, 86 FR 69829.

would need to purchase additional data licenses and thereby add to their cost structure.¹¹⁴⁰ As discussed above, in this part, unlike providing covered persons who are estimated to have experience in providing information directly to an RNSA, persons who do not have the necessary licenses and systems are estimated to use a reporting agent as non-providing covered persons for purposes of the PRA estimates. Therefore, as non-providing covered persons, they are not estimated to acquire any additional licenses for purposes of compliance with the final rule.

The below analysis is separated into categories of persons who may provide the Rule 10c–1a information to an RNSA.¹¹⁴¹ These categories are providing covered persons and non-providing covered persons.¹¹⁴² Both providing covered persons and non-providing covered persons assume PRA burdens in complying with final Rule 10c–1a(a)(1).

1. Providing Covered Persons

In the Proposing Release, the Commission estimated that lending agents who would be required to provide Rule 10c–1 information to an RNSA and lenders who run their own securities lending program rather than employ a lending agent and provide Rule 10c–1 information directly to an RNSA would assume certain burdens related to developing and reconfiguring their current systems to capture the required Rule 10c–1 information. The Proposing Release referred to such persons as “providing lending agents” and “self-providing lenders,” respectively. The PRA burden estimates for providing lending agents and self-providing lenders are summarized in PRA Table 1 of the Proposing Release.¹¹⁴³

a. Initial Burden

Providing covered persons assume PRA burdens related to developing and

¹¹⁴⁰ See IHS Markit Letter, at 13.

¹¹⁴¹ As more fully discussed below, there would be some variation between covered persons that are in the same category. The analysis provided herein is organized so that the discussion of covered persons who share commonalities allows for a logical presentation and discussion of burdens. This structure for the analysis is consistent with that provided in the PRA included in the Proposing Release. See Proposing Release, 86 FR 69822 n.130.

¹¹⁴² As an example of variability between covered persons in the same category, the parties within the intermediary category and a person that agrees to a covered securities loan as a lender when an intermediary is not used may choose to employ a reporting agent. As discussed below, this choice will result in information collection burdens being different for covered persons within the same category.

¹¹⁴³ Proposing Release, 86 FR 69827.

reconfiguring their current systems to capture the required Rule 10c–1a information.¹¹⁴⁴ Providing covered persons, in complying with the final rule, will also be required to establish connections that will allow them to provide the information to an RNSA, which involves establishing connections with an RNSA and the persons on whose behalf they are lending securities.

As stated in the Proposing Release,¹¹⁴⁵ the PRA burden for this requirement is similar to that of establishing the appropriate systems and processes required for collection and transmission of the required information in complying with the CAT.¹¹⁴⁶ Because of the general similarity between the systems established under that rule and the systems that would be required to be established under final Rule 10c–1a. One commenter argued that the Proposing Release’s operational PRA burden estimates were inappropriate because the CAT would not capture loan modifications.¹¹⁴⁷ However, the PRA burden estimates included in the Proposing Release accounted for loan modifications.¹¹⁴⁸ Further, the Commission continues to believe that the CAT-related burden estimates serve as an appropriate basis for the PRA burdens associated with compliance with the final rule, as both the CAT and final Rule 10c–1a require the provision of trade information to a third-party information repository.¹¹⁴⁹ The systems complying with final Rule 10c–1a will be significantly less complex than those required by the CAT because the systems required for compliance with final Rule 10c–1a will need to capture less information overall.¹¹⁵⁰

¹¹⁴⁴ While providing covered persons may already track the data elements as a part of the regular course of business, capturing this information would be a new regulatory requirement.

¹¹⁴⁵ See Proposing Release, 86 FR 69823.

¹¹⁴⁶ See *Joint Industry Plan, Order Approving the National Market System Plan Governing the Consolidated Audit Trail*, Release No. 34–79318 (Nov. 15, 2016), 81 FR 84696 (Nov. 23, 2016) (“CAT Approval Order”), 81 FR 84921.

¹¹⁴⁷ CSFME Letter 1, at 3.

¹¹⁴⁸ See, e.g., Proposing Release, 86 FR 69822.

¹¹⁴⁹ The burden estimates included in the CAT Approval Order are based on a study of cost estimate calculations. See CAT Approval Order, 81 FR 84857.

¹¹⁵⁰ 17 CFR 242.613 (“Rule 613(c)(1)”) of the Exchange Act requires the CAT NMS Plan to provide for an accurate, time-sequenced record of certain orders beginning with the receipt or origination of an order by a broker-dealer, and further documenting the life of the order through the process of routing, modification, cancellation, and execution (in whole or in part) of the order. Final Rule 10c–1a requires the reporting of loan modification data, as applicable, but does not

The PRA burden estimates for systems development and monitoring are based on the burdens applicable to non-Order Audit Trail System (“OATS”) reporters under the CAT.¹¹⁵¹ The Commission determined to use this estimate due to the factors it considered, as part of the CAT Approval Order, in categorizing firms and estimating burdens.¹¹⁵² Non-OATS reporters were estimated to assume the least amount of burdens under the CAT NMS Plan due to the limited scope of their reportable activity.¹¹⁵³ In addition, non-OATS reporters assumed new reporting burdens in complying with the CAT, similar to how providing covered persons will assume new PRA burdens in complying with the final rule’s reporting requirements. Based on the overall size of the securities lending market and the number of providing covered persons that may provide information directly to an RNSA, the Commission believes that the volume of securities lending transactions for providing covered persons will be, on average, of a similar scope to the volume of reports estimated by non-OATS reporters under the CAT Approval Order.

In the Proposing Release, the Commission, estimated that each providing lending agent and self-providing lender would assume 3,600 PRA burden hours in developing and reconfiguring their current systems to capture the required data elements, with a total industry-wide burden of 511,200 hours.¹¹⁵⁴ One commenter stated that most lenders will not be able to meet the proposed 15 minute reporting requirement without substantial technology development and cost.¹¹⁵⁵ As discussed above, in Part VII.G.1, the change from the proposed rule to impose an end-of-day reporting requirement should help to reduce the number and frequency of reports that would otherwise be required to be provided to an RNSA throughout the day. An intraday reporting system would have required a level of automation and data processing capacity that some providing covered persons would not currently have

require that order information be provided to an RNSA. Additionally, more trades that are reportable to the CAT are executed than securities lending transactions.

¹¹⁵¹ CAT Approval Order, 81 FR 84887.

¹¹⁵² See Proposing Release, 86 FR 69823.

¹¹⁵³ The CAT Approval Order estimated that non-OATS reporters would have fewer than 350,000 reportable events each month. CAT Approval Order, 81 FR 84928.

¹¹⁵⁴ 10,800 hours assumed by providing lending agents + 500,400 hours assumed by self-providing lenders = 511,200 total hours.

¹¹⁵⁵ IHS Markit Letter, at 13.

implemented. Implementing an end-of-day reporting requirement in place of the intraday reporting requirement removes the need for those providing covered persons to acquire this level of automation and processing capacity, thus lowering at least their initial burden associated with system design and configuration. Therefore, the Commission estimates that providing covered persons each will assume 3,000 PRA burden hours in developing and reconfiguring their current systems to capture the required data elements,¹¹⁵⁶ with a total industry-wide burden of 765,000 hours.¹¹⁵⁷

b. Ongoing Annual Burden

Once a providing covered person has established the appropriate systems and processes required for the collection and provision of the Rule 10c–1a information to an RNSA,¹¹⁵⁸ it is estimated that providing covered persons will assume ongoing annual PRA burdens associated with, among other things, providing the Rule 10c–1a information to an RNSA, monitoring systems, implementing systems changes, and troubleshooting errors. The Commission estimates that the ongoing annual PRA burden will be equivalent to the ongoing burden estimated for non-OATS reporters in the CAT Approval Order, as adjusted for the change from the proposed intraday reporting requirement to the end-of-day reporting requirement, for the same reasons discussed above with respect to automation and processing. In the Proposing Release, the Commission, estimated that each providing lending agent and self-providing lender would assume 1,350 PRA burden hours associated with monitoring systems,

¹¹⁵⁶ In the CAT Approval Order, the Commission estimated that, on average, the initial burden for non-OATS reporters would be two full-time-equivalent (“FTE”) employees working for one year (2 FTEs × 1,800 working hours per year = 3,600 hours). See CAT Approval Order, 81 FR 84938. Consistent with the estimate included in the Proposing Release, the estimate used in this release is based on the CAT Approval Order’s estimate for non-OATS reports due to the similarities between the requirements applicable to providing covered persons under final Rule 10c–1a and the requirements applicable to non-OATS reporters under the CAT Approval Order. However, in light of the change from the proposed intraday reporting requirement to an end-of-day reporting requirement, as discussed above, in this paragraph, it is appropriate to adjust the estimate to the following: 2 FTEs × 150 working hours per month × 10 months = 3,000 burden hours. The figure for 150 working hours was determined by dividing 1,800 working hours by 10 months.

¹¹⁵⁷ 3,000 hours × 255 providing covered persons = 765,000 hours.

¹¹⁵⁸ Such process of providing the applicable Rule 10c–1a information to an RNSA is estimated to be highly automated, so the Commission is including the burden for doing so in this estimate.

implementing systems changes, and troubleshooting errors, with a total industry-wide burden of 191,700 hours.¹¹⁵⁹ Consistent with the Proposing Release, it is estimated that each providing covered person will assume 1,350 PRA burden hours per year,¹¹⁶⁰ leading to a total industry-wide ongoing annual burden of 344,250 hours.¹¹⁶¹

2. Non-Providing Covered Persons

In the Proposing Release, the Commission estimated that lending agents who enter into a written agreement with a reporting agent to provide information to an RNSA (“non-providing lending agents”) and lenders that directly employ a reporting agent would assume certain burdens related to developing and reconfiguring their current systems to capture the required Rule 10c–1a information, as well as in entering into an agreement with a reporting agent. The PRA burden estimates for non-providing lending agents and lenders that directly employ a reporting agent are summarized in PRA Table 1 of the Proposing Release.¹¹⁶² As discussed above, in Part IX.A.1, in light of the rule text changes from the proposed rule, the PRA burdens included in the Proposing Release with regard to such persons are estimated in this release with regard to non-providing covered persons.

Non-providing covered persons will assume distinct PRA burdens from those applicable to providing covered persons. First, non-providing covered persons will assume fewer initial and ongoing PRA burdens related to systems development and monitoring because non-providing covered persons will not, for purposes of compliance with final Rule 10c–1a(a), need to establish connectivity to an RNSA and may have flexibility with regard to the format in which it provides the Rule 10c–1a information to the reporting agent. Second, non-providing covered persons will assume the initial burden of negotiating and executing a written agreement with the reporting agent, as

required by final Rule 10c–1a(a)(2) but are not estimated to assume an ongoing annual PRA burden associated with such written agreement.

a. Systems Development and Monitoring

i. Initial Burden

Non-providing covered persons will assume the initial burden of developing and reconfiguring their current systems to capture Rule 10c–1a information. Non-providing covered persons will assume fewer PRA burdens than providing covered persons will because non-providing covered persons may have the flexibility to collaborate with a reporting agent to determine the most efficient means of establishing systems that comply with the final rule’s reporting requirements. For example, if agreed to by both the non-providing covered person and the reporting agent, the non-providing covered person could have the flexibility to provide to the reporting agent the applicable Rule 10c–1a information that does not meet the specific format requirements of an RNSA if the reporting agent is able to reformat the information once received. Given these and other potential efficiencies, the Commission estimates that a non-providing covered person will assume half of the initial burden hours that a providing covered person will assume to develop and reconfigure their current systems to capture the Rule 10c–1a information. The Commission, therefore, estimates that each non-providing covered person will assume an initial PRA burden of 1,500 hours, leading to a total industry-wide initial PRA burden for this requirement of 372,000 hours.¹¹⁶³ This method of deriving the burden hours for non-covered persons is consistent with that used in the Proposing Release with regard to non-providing lending agents and lenders that directly employ a lending agent.¹¹⁶⁴ However, as discussed above, in Part IX.B.1, the estimated number of initial burden hours assumed has been lowered in light of the change from the proposed intraday reporting requirement to an end-of-day reporting requirement.

¹¹⁶³ 1,500 hours × 248 non-providing covered persons = 372,000 hours.

¹¹⁶⁴ See Proposing Release, 86 FR 69824, 69826. The estimated PRA burden included in the Proposing Release was 1,800 hours per providing lending agent or Lender that would directly employ a reporting agent, with an initial industry-wide PRA burden of 311,400 hours. 61,200 hours for non-providing lending agents + 250,200 hours for lenders that would directly employ a reporting agent = 311,400 total hours.

ii. Ongoing Annual Burden

Once a non-providing covered person has established the necessary systems and processes for the collection and provision of the Rule 10c–1a information to the reporting agent, such person will assume ongoing annual PRA burdens associated with, among other things, providing the data to the reporting agent, monitoring systems, implementing systems changes, and troubleshooting errors.¹¹⁶⁵ As with the initial PRA burden estimate for the systems development and monitoring requirement, the ongoing annual PRA burden estimate for non-providing covered persons is estimated to be less than that for providing covered persons because non-providing covered persons may have the flexibility to collaborate with a reporting agent to determine the most efficient means of establishing systems for purposes of compliance with the final rule. For example, the reporting agent could design programs that create direct links to a non-providing covered person’s systems to facilitate the gathering of information such that ongoing intervention would not be required by the non-providing covered person. In addition, non-providing covered persons and reporting agents could negotiate terms that may allow the non-providing covered person to avoid providing certain Rule 10c–1a information that can be gleaned from another data element, such as an issuer’s legal name if a security has a valid CUSIP.

Given these and other potential efficiencies, the Commission estimates that a non-providing covered person will assume half of the ongoing annual PRA burden that a providing covered person will assume with regard to the development and reconfiguration of current systems to capture the Rule 10c–1a information. The Commission, therefore, estimates that each non-providing covered person will assume an ongoing annual PRA burden of 675 hours,¹¹⁶⁶ leading to a total industry-wide ongoing annual PRA burden for this requirement of 167,400 hours.¹¹⁶⁷ This method of deriving the ongoing burden hours for non-providing covered persons is consistent with that used in the Proposing Release with regard to non-providing lending agents and

¹¹⁶⁵ See final Rule 10c–1a(a)(2)(ii) (requiring that the covered person provide the reporting agent with timely access to the Rule 10c–1a information).

¹¹⁶⁶ 1,350 hours (ongoing burden applicable to providing covered persons) × 50% = 675 hours.

¹¹⁶⁷ 675 hours × 248 non-providing covered persons = 167,400 hours.

¹¹⁵⁹ 4,050 hours assumed by providing lending agents + 187,650 hours assumed by self-providing lenders = 191,700 hours.

¹¹⁶⁰ In the CAT NMS Plan Release, the Commission estimated that, on average, the ongoing annual burden non-OATS reporters would be 0.75 FTE employees (0.75 FTEs × 1,800 working hours per year = 1,350 burden hours). See CAT Approval Order, 81 FR 84938. The Commission is using this estimate because of the similarities between the requirements applicable to providing covered persons under the final rule and the requirements applicable to non-OATS reporters under the CAT NMS Plan.

¹¹⁶¹ 1,350 hours × 255 providing covered persons = 344,250 hours.

¹¹⁶² Proposing Release, 86 FR 69827.

lenders that directly employ a reporting agent.¹¹⁶⁸

b. Entering Into Written Agreement With Reporting Agent

Final Rule 10c–1a(a)(2)(i) requires a covered person to enter into a written agreement with a reporting agent in order to rely on the reporting agent to fulfill the covered person's reporting obligations under paragraph (a)(1) of the final rule. In meeting this requirement, non-providing covered persons may assume initial PRA burdens associated with drafting, negotiating, and executing the agreements.

These agreements are estimated to be standardized across the industry because the data elements are consistent for all persons.¹¹⁶⁹ The Commission estimates that the only terms that may require negotiation are price and the format in which the information will be provided. To account for negotiation and any administrative tasks related to processing and executing agreements, the Commission is estimating that non-providing covered persons will spend 30 hours on this task.¹¹⁷⁰ Accordingly, the Commission estimates that the total industry-wide initial PRA burden attributed to this requirement is 7,440 hours.¹¹⁷¹ However, consistent with the Proposing Release, there should be no associated ongoing annual PRA burden once the agreement is signed, as the final rule does not separately impose a requirement to modify the written agreement or take additional action after the agreement is executed.

D. Collection of Information Related to Reporting Agents

Under final Rule 10c–1a(b), any reporting agent that assumes the reporting obligation on behalf of a

covered person pursuant to Rule 10c–1a(a)(2) shall do all of the following: (1) provide such Rule 10c–1a information to an RNSA, in the format and manner required by the applicable rule(s) of such RNSA, and within the time periods specified in paragraphs (c) through (e) of the final rule;¹¹⁷² (2) establish, maintain, and enforce written policies and procedures that are reasonably designed to provide the Rule 10c–1a information to an RNSA on behalf of the covered person in the format and manner required by the applicable rule(s) of an RNSA, and within the time periods specified in paragraphs (c) through (e) of the final rule;¹¹⁷³ (3) enter into a written agreement with an RNSA that permits the reporting agent to provide Rule 10c–1a information to an RNSA on behalf of the covered person;¹¹⁷⁴ (4) provide an RNSA with a list naming each covered person on whose behalf the reporting agent is providing Rule 10c–1a information to an RNSA and provide an RNSA with any updates to the list of such persons by the end of the day such list changes;¹¹⁷⁵ and (5) preserve for a period of not less than three years, the first two years in an easily accessible place, the Rule 10c–1a information obtained by the reporting agent from the covered person pursuant to Rule 10c–1a(a)(2), including the time of receipt, and the corresponding Rule 10c–1a information provided by the reporting agent to an RNSA, including the time of transmission to an RNSA, and the written agreements under paragraphs (a)(2) and (b)(3) of the final rule.¹¹⁷⁶

Reporting agents will assume PRA burdens associated with their compliance with three requirements in final Rule 10c–1a(b).¹¹⁷⁷ First, to

facilitate the provision of Rule 10c–1a information to an RNSA, reporting agents will assume burdens related to the development and monitoring of systems. This includes establishing, maintaining, and enforcing written policies and procedures that are reasonably designed to provide the Rule 10c–1a information to an RNSA on behalf of the covered person in the format and manner required by the applicable rule(s) of an RNSA, and within the time periods specified in paragraphs (c) through (e) of the final rule. It also includes the provision of an updated list of persons on whose behalf they are providing Rule 10c–1a information. Second, reporting agents will assume burdens in entering into written agreements with non-providing covered persons. Third, reporting agents will assume burdens in entering into agreements with an RNSA to provide Rule 10c–1a information on behalf of a non-providing covered person.

1. Systems Development and Monitoring

Reporting agents will provide Rule 10c–1a information to an RNSA on behalf of non-providing covered persons. In doing so, because reporting agents will need to change their internal systems to collect the Rule 10c–1a information, they will assume initial PRA burdens related to developing and reconfiguring their current systems to capture the required data elements. In addition, reporting agents will need to establish, maintain, and enforce written policies and procedures that are reasonably designed to provide Rule 10c–1a information to an RNSA on behalf of non-providing covered persons, in the format and manner required by the applicable rule(s) of an RNSA, and within certain time periods specified paragraphs (c) through (e) of the final rule.¹¹⁷⁸ Because reporting agents will provide to an RNSA the same type of Rule 10c–1a information that providing covered persons will provide,¹¹⁷⁹ the Commission estimates that the initial and ongoing annual PRA burdens related to the development and monitoring of systems that facilitate the provision of Rule 10c–1a information to an RNSA are the same. Therefore,

reporting agents and providing covered persons, as discussed above, because they both must provide Rule 10c–1a information to an RNSA in complying with final Rule 10c–1a. Accordingly, and consistent with the PRA burden estimates included in the Proposing Release, the PRA burden estimates for reporting agents are not being adjusted incrementally from the estimates for providing covered persons. See Proposing Release, 86 FR 69825 n.156.

¹¹⁷⁸ See final Rule 10c–1a(b)(2).

¹¹⁷⁹ See final Rules 10c–1a(a)(1) and (b)(1).

¹¹⁶⁸ See Proposing Release, 86 FR 69824, 69826. The estimated PRA burden included in the Proposing Release was 675 hours per providing lending agent or lender that would directly employ a reporting agent, with an ongoing industry-wide PRA burden of 116,775 hours. 22,950 hours for non-providing lending agents + 93,825 hours for lenders that would directly employ a reporting agent = 116,775 total hours.

¹¹⁶⁹ See final Rules 10c–1a(c) through (e).

¹¹⁷⁰ Each covered person is estimated to execute one such agreement because of the efficiencies gained from using only one reporting agent and the commoditized information that would be provided. Accordingly, the estimate of 30 hours would be the initial PRA burden required for one agreement. This estimate is consistent with that used in the Proposing Release. See Proposing Release, 86 FR 69824.

¹¹⁷¹ 30 hours × 248 non-providing covered persons = 7,440 hours. This method of deriving the initial burden hours for non-providing covered persons is consistent with that used in the Proposing Release with regard to non-providing lending agents and Lenders that directly employ a lending agent. See Proposing Release, 86 FR 69824, 69826–27.

¹¹⁷² See final Rule 10c–1a(b)(1).

¹¹⁷³ See final Rule 10c–1a(b)(2).

¹¹⁷⁴ See final Rule 10c–1a(b)(3).

¹¹⁷⁵ See final Rule 10c–1a(b)(4).

¹¹⁷⁶ See final Rules 10c–1a(b)(1) through (b)(5).

¹¹⁷⁷ The Rule 10c–1a information provided to an RNSA would be the same; however, certain aspects of the requirements applicable to reporting agents differ slightly from those applicable to providing covered persons. For example, reporting agents, unlike providing covered persons, will need to design systems to establish connectivity with the non-providing covered persons on whose behalf they are providing information to an RNSA. In addition, reporting agents, unlike providing covered persons, are required under final Rule 10c–1a(b)(4) to provide to an RNSA the identity of the person on whose behalf it is providing Rule 10c–1a information. Further, reporting agents, unlike either type of covered person—providing covered person or non-providing covered person—are required to establish, maintain, and enforce reasonably designed written policies and procedures to provide information to an RNSA. See final Rule 10c–1a(b)(2). Despite these differences, the estimates used in the CAT approval Order are an appropriate basis from which to estimate the burdens for

consistent with the Commission's estimate included above, in Part IX.B.1, the Commission estimates that each reporting agent will assume an initial PRA burden of 3,000 hours in developing and reconfiguring current systems to capture the required data elements. Accordingly, the industry-wide initial PRA burden is estimated to be 318,000 hours.¹¹⁸⁰

Once a reporting agent has established the appropriate systems and processes required for the collection and provision of the applicable Rule 10c-1a information, the reporting agent will assume ongoing annual PRA burdens associated with providing such information to an RNSA, in addition to an updated list of persons on whose behalf they are providing information, monitoring systems, implementing changes, and troubleshooting errors. As discussed above, in this part, because reporting agents provide to an RNSA the same information that providing covered persons provide, the Commission estimates that each reporting agent will assume an ongoing annual PRA burden of 1,350 hours related to this requirement. Accordingly, the total industry-wide ongoing annual PRA burden is estimated to be 143,100 hours.¹¹⁸¹

2. Entering Into Written Agreements With Non-Providing Covered Persons

To fulfill a covered person's reporting obligation under final Rule 10c-1a(a), any reporting agent must enter into a written agreement with the covered person on whose behalf they are providing Rule 10c-1a information to an RNSA.¹¹⁸² In meeting this requirement, reporting agents will assume initial PRA burdens related to drafting, negotiating, and executing such an agreement. Compliance with this requirement, however, should not create any ongoing annual burdens once the agreement is executed. This is because the final rule does not impose any requirement for reporting agents to modify the written agreement or take additional action after the agreement is executed.

¹¹⁸⁰ 3,000 hours × 106 reporting agents = 318,000 hours. The estimated initial burden per reporting agent is reduced from that included in the Proposing Release in light of the final rule's inclusion of an end-of-day reporting requirement as opposed to an intraday reporting requirement, as discussed above, in Part IX.B.1.

¹¹⁸¹ 1,350 hours × 106 reporting agents = 143,100 hours. This methodology is consistent with that used in the Proposing Release with respect to reporting agents. See Proposing Release, 86 FR 69825.

¹¹⁸² See final Rule 10c-1a(a)(2)(i).

These agreements are estimated to be standardized across the industry because the data elements are consistent for all persons.¹¹⁸³ The only terms (of an agreement between a non-providing covered person and a reporting agent) that may require negotiation are the price and the format in which the information would be provided. This process is estimated to be highly automated. Reporting agents are estimated to require the same amount of time to comply with this requirement as non-providing covered persons will require. Accordingly, the Commission estimates that each reporting agent will spend 30 hours on this task.¹¹⁸⁴ As a result, the total industry-wide initial PRA burden related to this requirement is estimated to be 3,180 hours.¹¹⁸⁵

3. Entering Into Written Agreements With an RNSA

Any reporting agent that assumes the reporting obligation on behalf of a covered person pursuant to final Rule 10c-1a(a)(2) must also enter into a written agreement with an RNSA that permits the reporting agent to provide Rule 10c-1a information to an RNSA on behalf of the covered person.¹¹⁸⁶ Because the Rule 10c-1a information is standardized for all reporting agents, there are no terms of these agreements that will need to be negotiated. Instead, an RNSA may create a form agreement for all reporting agents. Because these agreements are estimated to be standardized, the Commission estimates that reporting agents will assume a one-hour initial PRA burden to account for any administrative tasks related to processing and executing these agreements.¹¹⁸⁷ Reporting agents that enter into written agreements with an RNSA should not incur any ongoing annual burden to comply with this requirement once the agreement is executed, as the Rule 10c-1a information is standardized. Accordingly, the Commission estimates that the industry-wide initial PRA burden for this requirement is 106 hours.¹¹⁸⁸

¹¹⁸³ See *supra* note 1169 and accompanying text.

¹¹⁸⁴ See *supra* note 1170 and accompanying text.

¹¹⁸⁵ 30 hours × 106 reporting agents = 3,180 hours. This methodology is consistent with that used in the Proposing Release with respect to reporting agents. See Proposing Release, 86 FR 69825.

¹¹⁸⁶ See final Rule 10c-1a(b)(3).

¹¹⁸⁷ For example, a reporting agent may need to enter the written agreement into a contract management system or scan an executed paper agreement into an electronic format.

¹¹⁸⁸ 1 hour × 106 reporting agents = 106 hours. This methodology is consistent with that used in

4. Record Preservation Requirement

Any reporting agent that assumes the reporting obligation on behalf of a covered person pursuant to final Rule 10c-1a(a)(2) must also preserve for a period of not less than three years, the first two years in an easily accessible place, the Rule 10c-1a information it obtained from the covered person pursuant to paragraph (a)(2) of the final rule, including the time of receipt, and the corresponding Rule 10c-1a information provided by the reporting agent to an RNSA, including the time of transmission to an RNSA, and the written agreements that the reporting agent entered into with the covered person and with an RNSA.¹¹⁸⁹ The initial PRA burden associated with preserving the collected Rule 10c-1a information is related to the reporting agent's burden of developing and reconfiguring its current systems to capture the required data elements. Therefore, an initial burden associated with the preservation of information under final Rule 10c-1a(b)(5) is not separately estimated.

Compliance with this record preservation requirement is estimated to be highly automated. The Commission, therefore, estimates that reporting agents will spend one hour per week on upkeep and testing of records to ensure accuracy in complying with this requirement. Reporting agents each will assume an ongoing annual PRA burden of 52 hours per year.¹¹⁹⁰ Accordingly, the Commission estimates that the industry-wide ongoing annual PRA burden for this requirement is 5,512 hours.¹¹⁹¹

the Proposing Release with respect to reporting agents. See Proposing Release, 86 FR 69825.

¹¹⁸⁹ See final Rule 10c-1a(b)(5).

¹¹⁹⁰ This estimate is consistent with the ongoing annual burden estimate for national securities exchanges and RNSAs regarding the data collection and reporting for Rule 17a-1, which requires that every national securities exchange, national securities association, registered clearing agency, and the MSRB keep on file for a period of not less than five years, the first two years in an easily accessible place, at least one copy of all documents, including all correspondence, memoranda, papers, books, notices, accounts, and other such records made or received by it in the course of its business as such and in the conduct of its self-regulatory activity. See Paperwork Reduction Act Extension Notice for Exchange Act Rule 17a-1, 84 FR 57920 (Oct. 29, 2019), 84 FR 57921.

¹¹⁹¹ 52 hours × 106 reporting agents = 5,512 hours. This methodology is consistent with that used in the Proposing Release with respect to reporting agents. See Proposing Release, 86 FR 69825-26.

PRA TABLE 1—SUMMARY OF ESTIMATED BURDENS FOR COVERED PERSONS AND REPORTING AGENTS

Type of respondent	Rule 10c–1a requirement	Type of PRA burden	Number of entities impacted	Total initial industry burden (hours)	Total annual industry burden (hours)
Providing Covered Persons ...	Systems Development and Monitoring.	Third-Party Disclosure	255	765,000	344,250
Non-providing Covered Persons.	Systems Development and Monitoring.	Third-Party Disclosure	248	372,000	167,400

Reporting Agents	Entering into Agreement with RNSA.	Third-Party Disclosure	106	106	0
Reporting Agents	Record Preservation Requirement.	Recordkeeping	106	0	5,512

E. Collection of Information Related to RNSAs

RNSAs will assume new PRA burdens in complying with final Rule 10c–1a(f) through (h). The PRA burdens associated with an RNSA's compliance with paragraphs (f) through (h) are discussed below. All estimates included in this Part X are consistent with the Commission's estimates included in the Proposing Release for an RNSA.¹¹⁹²

1. Burden Estimates Related to RNSA Rule Implementation

Under final Rule 10c–1a(f), an RNSA is required to implement rules regarding the format and manner of its collection of Rule 10c–1a information and make publicly available such information in accordance with rules promulgated pursuant to section 19(b) and Rule 19b–4 of the Exchange Act. The PRA burden associated with filing any proposed rule changes by an RNSA is already included under the collection of information requirements contained in Rule 19b–4 under the Exchange Act.¹¹⁹³ Therefore, a separate PRA burden estimate is not included for the purposes of the PRA included for this rulemaking.

2. Burden Estimates Related to the Publication of Data

As discussed above, in Part VII.J, an RNSA will be required, following the receipt of information pursuant to paragraph (c) or (d) of the final rule, to assign a unique identifier to the covered securities loan and make certain information publicly available (on its website or similar means of electronic

distribution, without use restrictions, for a period of at least five years)¹¹⁹⁴ within the time frames specified in paragraph (g) of the final rule. In complying with these requirements, an RNSA will need to create, implement, and maintain the infrastructure to enable providing covered persons and reporting agents to provide an RNSA with the Rule 10c–1a information. This includes establishing technical requirements and specifications for such infrastructure, creating a system that can generate unique identifiers, meeting with industry participants to gather feedback on the proposed infrastructure, drafting written policies and procedures to protect the confidentiality of certain information, and entering into written agreements with providing covered persons and reporting agents. In addition, the infrastructure employed will need to comply with paragraphs (h)(1) and (h)(2) of the final rule, which require an RNSA to retain the collected Rule 10c–1a information in a convenient and usable standard electronic data format that is machine readable and text searchable without any manual intervention, for a period of five years, and to make the information collected pursuant to paragraphs (b)(4) and (c) through (e) of the final rule available to the Commission, or other persons as the Commission may designate by order upon a demonstrated regulatory need, respectively.

The initial burden assumed by an RNSA in creating and implementing the infrastructure for providing covered persons and reporting agents to provide the applicable Rule 10c–1a information to an RNSA, and for an RNSA to make such information publicly available, is

similar to the initial burden assumed by national securities exchanges and RNSAs in complying with the requirement to establish the appropriate systems and processes for the collection and transmission of the required information under the CAT. However, the systems that are implemented to comply with Rule 10c–1a should be significantly less complex than those that are implemented to comply with the CAT. This is because the Rule 10c–1a systems will need to capture less information overall than what the CAT requires.¹¹⁹⁵ Further, as discussed above, in Part IX.A.3, there is only one RNSA that will need to create and implement the infrastructure for providing covered persons and reporting agents to provide Rule 10c–1a information, in contrast to the multiple national securities exchanges that create systems to comply with the CAT. In addition, an RNSA will have internal staff that can create and implement the infrastructure for providing covered persons and reporting agents to provide Rule 10c–1a information, unlike certain tasks required under the CAT that may require outsourcing. Accordingly, the PRA burden estimates for this collection of information are substantially reduced as compared to those for the CAT, as discussed below, in this part.

The Commission estimates that it would take an RNSA approximately 10,924 hours of internal legal, compliance, information technology, and business operations time to develop the infrastructure to enable providing covered persons and reporting agents to provide the Rule 10c–1a information to an RNSA, and for an RNSA to assign a unique identifier to the covered

¹¹⁹² See Proposing Release, 86 FR 69827–29.

¹¹⁹³ See Proposed Rule Changes of Self-Regulatory Organizations, Release No. 34–50486 (Oct. 5, 2004), 69 FR 60287 (Oct. 8, 2004), 69 FR 60293.

¹¹⁹⁴ See final Rule 10c–1a(h)(3).

¹¹⁹⁵ See *supra* note 1150 and accompanying text.

securities loan and make the specified information publicly available.¹¹⁹⁶ The RNSA is not estimated to assume external costs for the implementation of the infrastructure to enable providing covered persons and reporting agents to provide the Rule 10c–1a information, assign a unique identifier to the covered securities loan, and make the final rule's specified information publicly available. This is because the sole RNSA currently existing, FINRA, has experience in implementing systems to collect information from its member broker-dealers.¹¹⁹⁷ Therefore, the Commission estimates that the average one-time initial PRA burden related to developing the infrastructure to enable providing covered persons and reporting agents to provide the Rule 10c–1a information, assign a unique identifier to the covered securities loan, and make the final rule's

specified information publicly available is 10,924 hours.¹¹⁹⁸

Once an RNSA has developed the infrastructure to enable providing covered persons and reporting agents to provide the Rule 10c–1a information, assign a unique identifier to the covered securities loan, and make the final rule's specified information publicly available, the Commission estimates that an RNSA will assume ongoing annual PRA burdens of 7,739.5 hours related to ensuring that the infrastructure is up-to-date and remains in compliance with the final rule, for an estimated annual ongoing burden of 7,739.5 hours.¹¹⁹⁹

3. Burden Estimates Related to Data Retention and Availability

Under final Rule 10c–1a(h)(1), an RNSA must retain the collected Rule 10c–1a information in a convenient and

usable standard electronic data format that is machine readable and text searchable without any manual intervention for a period of five years. The initial burden associated with retaining the collected Rule 10c–1a information is assumed in an RNSA's burdens related to implementing and maintaining the infrastructure for providing covered persons and reporting agents to provide Rule 10c–1a information to an RNSA, as discussed above, in Part X.2. Therefore, the Commission is not separately assessing an initial burden associated with the retention of collected Rule 10c–1a information. The Commission, however, estimates that an RNSA will assume an ongoing annual PRA burden of 52 hours to retain the collected information,¹²⁰⁰ for an estimated annual industry-wide burden of 52 hours.

PRA TABLE 2—SUMMARY OF ESTIMATED BURDENS FOR RNSA

Rule 10c–1a requirement	Type of PRA burden	Number of entities impacted	Total initial industry burden hours	Total annual industry burden hours
Publication of Data	Reporting and Third-Party Disclosure	1	10,924	7,739.5
Data Retention and Availability	Recordkeeping	1	0	52

F. Collection of Information Is Mandatory

Each collection of information discussed above is a mandatory collection of information.

G. Confidentiality of Responses to Collection of Information

The Commission may receive confidential information as a result of this collection of information, such as the identity of covered persons. The final rule does not permit an RNSA to make such information publicly available.¹²⁰¹ Aside from this information, the collection of information is broadly expected to be publicly available information. To the

extent the Commission receives confidential information pursuant to this collection of information, through its examination and oversight program, through an investigation, or by some other means, such information will be kept confidential, subject to the provisions of applicable law.

H. Retention Period for Record Preservation Requirement

Pursuant to final Rule 10c–1a(h)(1), an RNSA is required to retain the collected Rule 10c–1a information in a convenient and usable standard electronic data format that is machine readable and text searchable without any manual intervention for a period of

five years. Pursuant to final Rule 10c–1a(b)(5), a reporting agent that assumes the reporting obligation on behalf of a covered person pursuant to paragraph (a)(2) of the final rule is required to preserve the Rule 10c–1a information obtained by the reporting agent from the covered person pursuant to final Rule 10c–1a(a)(2), including the time of receipt, and the corresponding Rule 10c–1a information provided by the reporting agent to an RNSA, including the time of transmission to an RNSA, as well as the written agreements under paragraphs (a)(2) and (b)(3) of the final rule, for a period of not less than three years, the first two years in an easily accessible place.

¹¹⁹⁶ This estimate is based on the Commission's initial burden estimate for national securities exchanges and RNSAs regarding the data collection and reporting for the consolidated audit trail which was approximately 43,696.80 burden hours in total. See CAT Approval Order, 81 FR 84921. Given the size of the overall equity market in comparison to the size of the securities lending market, the Commission believes equating the PRA burden hours (to develop the infrastructure for the provision of Rule 10c–1a information and for an RNSA to assign a unique identifier to the covered securities loan and make the specified information publicly available) with the CAT burden hours would overestimate the burden hours. The initial burden in complying with final Rule 10c–1a's requirements related to an RNSA's publication of data should be calculated based on the size of the securities lending market in comparison to the size of the equities market. Consistent with the

Commission's estimate in the Proposing Release, the Commission estimates that the average daily dollar value of securities lending transactions is approximately \$120 billion dollars compared to the average daily equity trading volume of \$475 billion. See Proposing Release, 86 FR 69828. Accordingly, the size of the securities lending market is approximately 25% of the U.S. equity market. Therefore, it is estimated that the initial PRA burden to develop and implement the needed systems changes to capture and publish the Rule 10c–1a information is 25% of the burden hours for the CAT, which is 10,924 burden hours.

¹¹⁹⁷ See, e.g., *supra* Part VII.H.

¹¹⁹⁸ 1 RNSA × 10,924 hours = 10,924 hours.

¹¹⁹⁹ The PRA burdens assumed in complying with this requirement are similar to the burdens assumed by national securities exchanges and RNSAs in complying with the data collection and reporting requirements for the CAT. This was

estimated to be approximately 30,958.20 total hours. See CAT Approval Order, 81 FR 84922. Consistent with the Commission's initial PRA burden estimates related to an RNSA's publication of data in accordance with the proposed rule, as such burden estimate relates to the Commission's estimates in the CAT Approval Order, the Commission estimates for purposes of compliance with the final rule that the annual ongoing burden related to the publication of the specified data is similarly 25% of the hours required for compliance with CAT. This is estimated to be 7,739.5 hours.

¹²⁰⁰ See *supra* note 1190. The resulting burden hours that are assumed in addition to those that already exist for Rule 17a–1, for purposes of this PRA estimate, are appropriate because an RNSA may be required to retain records related to Rule 10c–1a information provided by covered persons or reporting agents that are not RNSA members.

¹²⁰¹ See final Rule 10c–1a(g)(4).

XI. Regulatory Flexibility Act Certification

The Regulatory Flexibility Act (“RFA”) ¹²⁰² requires Federal agencies, in promulgating rules, to consider the impact of those rules on “small entities,” ¹²⁰³ a term that includes “small businesses.” ¹²⁰⁴ Section 603(a) ¹²⁰⁵ of the Administrative Procedure Act, ¹²⁰⁶ as amended by section 604(a) of the RFA, requires the Commission to undertake a final regulatory flexibility analysis of rules it is adopting, unless the Commission certifies that the rules would not have a significant impact on a substantial number of small entities. ¹²⁰⁷

Small entities include broker-dealers with total capital (net worth plus subordinated liabilities) of less than \$500,000 on the date in the prior fiscal year as of which its audited financial statements were prepared pursuant to 17 CFR 240.17a–5(d) (“Rule 17a–5(d)”), or, if not required to file such statements, a broker-dealer who had total capital (net worth plus subordinated liabilities) of less than \$500,000 on the last day of the preceding fiscal year (or in the time it has been in business, if shorter), and is not affiliated with any person (other than a natural person) who is not a small business or small organization. ¹²⁰⁸ A small business or small organization, for purposes of “issuers” or “person” other than an investment company, is defined as a person who, on the last day of its most recent fiscal year, had total assets of \$5 million or less. ¹²⁰⁹ In the Proposing Release, the Commission certified, pursuant to section 605(b) of the RFA, that the proposed rule would not have a significant economic impact on a substantial number of small entities. ¹²¹⁰ The Commission requested but did not receive any comments on the

certification as it related to the entities impacted by the proposed rule.

Based on the Commission’s analysis of the existing information relating to persons who are subject to the final rule, it is unlikely that any broker-dealer, clearing agency, investment company, or bank categorized as a “small business” or “small organization” under Rule 0–10 would serve as a covered person, reporting agent, or RNSA, as they would almost certainly have insufficient capital to participate in lending activities involving a covered securities loan or would register with the Commission as a national securities association. Accordingly, the Commission believes it is unlikely that, in the future, a substantial number of small entities may become impacted by the final rule. This is because broker-dealers who have a reporting obligation or elect to serve as a reporting agent are likely to have at least \$500,000 in total capital; as described above, investment companies, together with other investment companies in the same group of related investment companies, who have a reporting obligation are likely to have net assets of over \$50 million as of the end of its most recent fiscal year; banks who have a reporting obligation are likely to have total assets of over \$5 million; ¹²¹¹ clearing agencies who elect to serve as reporting agents are likely to have compared, cleared, and settled at least \$500 million in securities transactions during the preceding fiscal year and have had a least \$200 million of funds and securities in its custody or control at all times during the preceding fiscal year (or at any time that it has been in business, if shorter); ¹²¹² or such persons are likely to be affiliated with a person who is not a small business or small organization as defined under Rule 0–10.

For the foregoing reason, the Commission certifies, pursuant to section 605(b) of Title 5 of the U.S. Code, that final Rule 10c–1a will not have a significant economic impact on a substantial number of small entities.

XII. Other Matters

If any of the provisions of the final rule, or application thereof to any person or circumstances, is held to be invalid, such invalidity shall not affect other provisions or application of such provisions to other persons or circumstances that can be given effect without the invalid provision or application.

Pursuant to the Congressional Review Act, ¹²¹³ the Office of Information and Regulatory Affairs has designated these rules as a “major rule,” as defined by 5 U.S.C. 804(2).

Statutory Authority

The Commission is adopting final Rule 10c–1a pursuant to Sections 3, 10(b), 10(c), 15(c), 15(h), 15A, 17(a), 23(a) of the Securities Exchange Act of 1934, 15 U.S.C. 78c, 78j(b), 78j(c), 78k–1, 78o(c), 78o(g), 78o–3, 78q(a), and 78w(a), and Public Law 111–203, 984(b), 124 Stat. 1376 (2010).

List of Subjects in 17 CFR Part 240

Administrative practice and procedure, Reporting and recordkeeping requirements, Securities.

Text of Rule Amendments

For the reasons set out in the preamble, the Commission is amending title 17, chapter II of the Code of Federal Regulations as follows:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

■ 1. The general authority citation for part 240 continues to read as follows:

Authority: 15 U.S.C. 77c, 77d, 77g, 77j, 77s, 77z–2, 77z–3, 77eee, 77ggg, 77nnn, 77sss, 77ttt, 78c, 78c–3, 78c–5, 78d, 78e, 78f, 78g, 78i, 78j, 78j–1, 78j–4, 78k, 78k–1, 78l, 78m, 78n, 78n–1, 78o, 78o–4, 78o–10, 78p, 78q, 78q–1, 78s, 78u–5, 78w, 78x, 78dd, 78ll, 78mm, 80a–20, 80a–23, 80a–29, 80a–37, 80b–3, 80b–4, 80b–11, and 7201 *et seq.*, and 8302; 7 U.S.C. 2(c)(2)(E); 12 U.S.C. 5221(e)(3); 18 U.S.C. 1350; Pub. L. 111–203, Sec. 939A, 124 Stat. 1376 (2010); and Pub. L. 112–106, Sec. 503 and 602, 126 Stat. 326 (2012), unless otherwise noted.

* * * * *

Section 240.10c–1a also issued under 15 U.S.C. 78j(c), and Pub. L. 111–203, 984(b), 124 Stat. 1376 (2010).

* * * * *

■ 2. Add § 240.10c–1a immediately following § 240.10b–21 to read as follows:

§ 240.10c–1a Securities lending transparency.

(a) *Reporting requirements for covered persons.* Any covered person who agrees to a covered securities loan on behalf of itself or another person shall:

(1) Provide to a registered national securities association (“RNSA”) the information in paragraphs (c) through (e) of this section (“Rule 10c–1a information”), in the format and manner required by the applicable rule(s) of such RNSA, and within the time periods

¹²⁰² 5 U.S.C. 601 *et seq.*

¹²⁰³ 5 U.S.C. 605(b).

¹²⁰⁴ Although section 601(b) of the RFA defines the term “small business,” the statute permits agencies to formulate their own definitions. The Commission has adopted definitions for the term “small business” for the purposes of Commission rulemaking in accordance with the RFA. Those definitions, as relevant to this rulemaking, are set forth in 17 CFR 240.0–10 (“Rule 0–10”). Rule 0–10 also provides that the Commission may, if warranted by the circumstances, use a different definition for particular rulemakings. See 17 CFR 240.0–10.

specified in paragraphs (c) through (e) of this section.

(2) Provided, however, a covered person may rely on a reporting agent to fulfill its reporting obligations under paragraph (a)(1) of this section if such covered person:

(i) Enters into a written agreement with a reporting agent that agrees to provide the Rule 10c–1a information to an RNA on behalf of such covered person in accordance with the requirements in paragraph (b) of this section; and,

(ii) Provides such reporting agent with timely access to the Rule 10c–1a information.

(b) *Reporting agent requirements.* Any reporting agent that assumes the reporting obligation on behalf of a covered person pursuant to paragraph (a)(2) of this section shall:

(1) Provide such Rule 10c–1a information to an RNA, in the format and manner required by the applicable rule(s) of such RNA, and within the time periods specified in paragraphs (c) through (e) of this section;

(2) Establish, maintain, and enforce written policies and procedures that are reasonably designed to provide Rule 10c–1a information to an RNA on behalf of a covered person in the format and manner required by the applicable rule(s) of an RNA, and within the time periods specified in paragraphs (c) through (e) of this section;

(3) Enter into a written agreement with an RNA that permits the reporting agent to provide Rule 10c–1a information to an RNA on behalf of a covered person;

(4) Provide an RNA with a list naming each covered person on whose behalf the reporting agent is providing Rule 10c–1a information to an RNA and provide an RNA with any updates to the list of such persons by the end of the day such list changes; and

(5) Preserve for a period of not less than three years, the first two years in an easily accessible place:

(i) The Rule 10c–1a information obtained by the reporting agent from the covered person pursuant to paragraph (a)(2) of this section, including the time of receipt, and the corresponding Rule 10c–1a information provided by the reporting agent to an RNA, including the time of transmission to an RNA; and

(ii) The written agreements under paragraphs (a)(2) and (b)(3) of this section.

(c) *Data elements.* A covered person shall provide the following information, if applicable, to an RNA, by the end of the day on which a covered securities loan is effected:

(1) The legal name of the security issuer, and the Legal Entity Identifier (“LEI”) of the issuer, if the issuer has a non-lapsed LEI;

(2) The ticker symbol, International Securities Identification Number (“ISIN”), Committee on Uniform Securities Identification Procedures (“CUSIP”), or Financial Instrument Global Identifier (“FIGI”) of the security, or other security identifier;

(3) The date the covered securities loan was effected;

(4) The time the covered securities loan was effected;

(5) The name of the platform or venue where the covered securities loan was effected;

(6) The amount, such as size, volume, or both, of the reportable securities loaned;

(7) The type of collateral used to secure the covered securities loan;

(8) For a covered securities loan collateralized by cash, the rebate rate or any other fee or charges;

(9) For a covered securities loan not collateralized by cash, the securities lending fee or rate, or any other fee or charges;

(10) The percentage of collateral to value of reportable securities loaned required to secure such covered securities loan;

(11) The termination date of the covered securities loan; and

(12) Whether the borrower is a broker or dealer, a customer (if the person lending securities is a broker or dealer), a clearing agency, a bank, a custodian, or other person.

(d) *Loan modification data elements.* A covered person shall provide the following information to an RNA by the end of the day on which a covered securities loan is modified:

(1) If the modification occurs after the data elements under paragraph (c) of this section for such covered securities loan are provided to an RNA, and results in a change to information previously required to be provided to an RNA under paragraph (c) of this section:

(i) The date and time of the modification;

(ii) The specific modification and the specific data element in paragraph (c) of this section being modified; and

(iii) The unique identifier assigned to the original covered securities loan under paragraph (g)(1) or (g)(3) of this section;

(2) If the modification is to a covered securities loan for which reporting under paragraph (a) was not required on the date the loan was agreed to or last modified and results in a change to any of the data elements in paragraphs (c)(1) through (12) of this section:

(i) The data elements in paragraphs (c)(1) through (12) of this section as of the date of modification and the date and time of the modification.

(ii) [Reserved]

(e) *Confidential data elements.* A covered person shall provide the following information to an RNA, if applicable, by the end of the day on which a covered securities loan is effected:

(1) If known, the legal name of each party to the covered securities loan, other than the customer from whom a broker or dealer borrows fully paid or excess margin securities pursuant to § 240.15c3–3(b)(3) (“Rule 15c3–3(b)(3)”) of the Exchange Act, Central Registration Depository (“CRD”) or Investment Adviser Registration Depository (“IARD”) Number, market participant identification (“MPID”), and the LEI of each party to the covered securities loan, and whether such person is the lender, the borrower, or an intermediary between the lender and the borrower;

(2) If the person lending securities is a broker or dealer and the borrower is its customer, whether the security is loaned from a broker’s or dealer’s securities inventory to a customer of such broker or dealer; and

(3) If known, whether the covered securities loan is being used to close out a fail to deliver pursuant to § 242.204 of this chapter (“Rule 204 of Regulation SHO”) or to close out a fail to deliver outside of §§ 242.200 through 242.204 of this chapter (“Regulation SHO”).

(f) *RNA rules.* An RNA shall implement rules regarding the format and manner of its collection of information described in paragraphs (c) through (e) of this section and make publicly available such information in accordance with rules promulgated pursuant to 15 U.S.C. 78s(b) (“section 19(b)”) and § 240.19b–4 (“Rule 19b–4”) of the Exchange Act.

(g) *RNA publication of data.* An RNA shall:

(1) Following receipt of information pursuant to paragraph (c) of this section, as soon as practicable, and not later than the morning of the business day after the covered securities loan is effected, assign a unique identifier to the covered securities loan and make publicly available the following information:

(i) For each covered securities loan effected on the previous business day:

(A) The unique identifier assigned by an RNA;

(B) The information it receives under paragraphs (c)(1) through (5) and (7) through (12) of this section; and

(C) The security identifier(s) under paragraphs (c)(1) or (2) of this section

that an RNSA determines is appropriate to identify the relevant reportable security.

(2) Following receipt of information pursuant to paragraph (c) of this section, on the twentieth business day after the covered securities loan is effected, make publicly available the information specified in paragraph (c)(6) of this section along with the loan and security identifying information specified in paragraphs (g)(1)(i)(A) and (C) of this section.

(3) Following receipt of information pursuant to paragraph (d) of this section, assign a unique identifier to the covered securities loan if one was not assigned pursuant to paragraph (g)(1)(i)(A) of this section; and:

(i) As soon as practicable, and not later than the morning of the business day after the covered securities loan is modified, make publicly available information pertaining to any modification to the data specified in paragraphs (c)(1) through (5) and (7) through (12) of this section; provided however, for a covered securities loan for which paragraph (c) information is reported to an RNSA pursuant to paragraph (d)(2) of this section, make publicly available the data specified in paragraphs (c)(1) through (5) and (7) through (12); and

(ii) On the twentieth business day after the covered securities loan is modified, make publicly available the data specified in paragraph (c)(6) of this section along with the loan and security identifying information specified in paragraphs (g)(1)(i)(A) or (g)(3), as applicable, and (g)(1)(i)(C) of this section.

(4) Following receipt of information pursuant to paragraph (e) of this section, keep such information confidential, in accordance with the provisions of paragraph (h) of this section and applicable law.

(5) Following the receipt of information specified in paragraphs (c) and (d) of this section, as soon as practicable, and not later than the morning of the business day after covered securities loans are effected or modified, make publicly available, on a daily basis, information pertaining to the aggregate transaction activity and distribution of loan rates for each reportable security and the security

identifier(s) under paragraphs (c)(1) or (2) of this section for which an RNSA determines is appropriate to identify.

(h) *Data retention and availability.* An RNSA shall:

(1) Retain the information collected pursuant to paragraphs (c) through (e) of this section in a convenient and usable standard electronic data format that is machine readable and text searchable without any manual intervention for a period of five years;

(2) Make the information collected pursuant to paragraphs (b)(4) and (c) through (e) of this section available to the Commission; or other persons as the Commission may designate by order upon a demonstrated regulatory need;

(3) Make the information collected under paragraphs (c) and (d) of this section available to the public in the same manner such information is maintained pursuant to paragraph (h)(1) of this section on an RNSA's website or similar means of electronic distribution, without use restrictions, for a period of at least five years; and

(4) Establish, maintain, and enforce reasonably designed written policies and procedures to maintain the security and confidentiality of confidential information required by paragraph (e) of this section.

(i) *RNSA fees.* An RNSA may establish and collect reasonable fees, pursuant to rules that are promulgated pursuant to section 19(b) and Rule 19b-4 of the Exchange Act.

(j) *Definitions.* For purposes of this section:

(1) The term *covered person* means:

(i) Any person that agrees to a covered securities loan on behalf of a lender ("intermediary") other than a clearing agency when providing only the functions of a central counterparty pursuant to § 240.17Ad-22(a)(2) ("Rule 17Ad-22(a)(2)") of the Exchange Act or a central securities depository pursuant to § 240.17Ad-22(a)(3) ("Rule 17Ad-22(a)(3)") of the Exchange Act; or

(ii) Any person that agrees to a covered securities loan as a lender when an intermediary is not used unless paragraph (j)(1)(iii) of this section applies; or

(iii) A broker or dealer when borrowing fully paid or excess margin securities pursuant to Rule 15c3-3(b)(3) of the Exchange Act.

(2) The term *covered securities loan* means:

(i) A transaction in which any person on behalf of itself or one or more other persons, lends a reportable security to another person.

(ii) Notwithstanding paragraph (j)(2)(i) of this section, a position at a clearing agency that results from central counterparty services pursuant to Rule 17Ad-22(a)(2) of the Exchange Act or central securities depository services pursuant to Rule 17Ad-22(a)(3) of the Exchange Act will not be a covered securities loan for purposes of this rule.

(iii) Notwithstanding paragraph (j)(2)(i) of this section, the use of margin securities, as defined in § 240.15c3-3(a)(4) ("Rule 15c3-3(a)(4)") of the Exchange Act, by a broker or dealer will not be a covered securities loan for purposes of this rule.

(A) Provided, however, if a broker or dealer lends such margin securities to another person, the loan to the other person is a covered securities loan for purposes of this rule.

(B) [Reserved]

(3) The term *reportable security* means any security or class of an issuer's securities for which information is reported or required to be reported to the consolidated audit trail as required by § 242.613 ("Rule 613") of the Exchange Act and the CAT NMS Plan ("CAT"), the Financial Industry Regulatory Authority's Trade Reporting and Compliance Engine ("TRACE"), or the Municipal Securities Rulemaking Board's Real-Time Transaction Reporting System ("RTRS"), or any reporting system that replaces one of these systems.

(4) The term *reporting agent* means a broker, dealer, or registered clearing agency that enters into a written agreement with a covered person under paragraph (a)(2) of this section.

(5) The term *RNSA* means an association of brokers and dealers that is registered as a national securities association pursuant to 15 U.S.C. 78o-3 ("section 15A") of the Exchange Act.

By the Commission.

Dated: October 13, 2023.

J. Matthew DeLesDernier,
Deputy Secretary.

Resolution Operations**

AGENCY: Office of Personnel Management; Internal Revenue Service, Department of the Treasury; Employee Benefits Security Administration, Department of Labor; Centers for Medicare & Medicaid Services, Department of Health and Human Services.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document sets forth proposed rules related to certain provisions of the No Surprises Act regarding the Federal independent dispute resolution (IDR) process, which was established as part of the Consolidated Appropriations Act, 2021 (CAA). These proposed rules would set forth new requirements relating to the disclosure of information that group health plans and health insurance issuers offering group or individual health insurance coverage must include along with the initial payment or notice of denial of payment for certain items and services subject to the surprise billing protections in the No Surprises Act. These proposed rules would also require plans and issuers to communicate information by using claim adjustment reason codes (CARCs)

and remittance advice remark codes (RARCs), as specified in guidance, when providing any paper or electronic remittance advice to an entity that does not have a contractual relationship with the plan or issuer. This document also proposes to amend certain requirements related to the open negotiation period preceding the Federal IDR process, the initiation of the Federal IDR process, the Federal IDR dispute eligibility review, and the payment and collection of administrative fees and certified IDR entity fees. This document also proposes to define bundled payment arrangements, amend requirements related to batched items and services, and amend the rules for extensions of timeframes due to extenuating circumstances. Additionally, this document proposes to require plans and issuers to register in the Federal IDR portal. In accordance with Federal law, a summary of these rules may be found at <https://www.regulations.gov/>.

DATES: To be assured consideration, comments must be received at one of the addresses provided below by January 2, 2024.

ADDRESSES: Written comments may be submitted to the addresses specified below. Any comment that is submitted will be shared among the Department of the Treasury, the Department of Labor, the Department of Health and Human Services (the Departments), and the Office of Personnel Management. Please do not submit duplicates.

Comments will be made available to the public. **Warning:** Do not include any personally identifiable information (such as name, address, or other contact information) or confidential business information that you do not want publicly disclosed. Comments are posted on the internet exactly as received and can be retrieved by most internet search engines. No deletions, modifications, or redactions will be made to the comments received, as they are public records. Comments may be submitted anonymously.

In commenting, refer to file code RIN 0938-AV15. Because of staff and resource limitations, the Departments cannot accept comments by facsimile (FAX) transmission.

Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to <https://www.regulations.gov>. Follow the "Submit a comment" instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare &

Medicaid Services, Department of Health and Human Services, Attention: CMS-9897-P, P.O. Box 8016, Baltimore, MD 21244-8016.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-9897-P, Mail Stop C4-26-05, 7500 Security Boulevard, Baltimore, MD 21244-1850.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Padma Babubhai Shah, Office of Personnel Management, at 202-606-4056; Shira B. McKinlay, Internal Revenue Service, Department of the Treasury, at 202-317-5500; Elizabeth Schumacher or Shannon Hysjulien, Employee Benefits Security Administration, Department of Labor, at 202-693-8335; Zarah Ghiasuddin or Bryan Kirk, Centers for Medicare & Medicaid Services, Department of Health and Human Services, at 301-492-4308.

Customer Service Information: Information from the Office of Personnel Management (OPM) on health benefits plans offered under the Federal Employees Health Benefits (FEHB) Program can be found on the OPM website (<http://www.opm.gov/healthcare-insurance/healthcare/>). Individuals interested in obtaining information from the Department of Labor (DOL) concerning employment-based health coverage laws may call the Employee Benefits Security Administration (EBSA) Toll-Free Hotline at 1-866-444-EBSA (3272) or visit the DOL's website (www.dol.gov/agencies/ebsa). In addition, information from the Department of Health and Human Services (HHS) on private health insurance coverage and coverage provided by non-Federal governmental group health plans can be found on the Centers for Medicare & Medicaid Services (CMS) website (<http://www.cms.gov/marketplace>), information on health care reform can be found at <http://www.healthcare.gov>, and information on surprise medical bills can be found at <http://www.cms.gov/nosurprises>.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: Comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential

business information that is included in a comment. The Departments post comments received before the close of the comment period on the following website as soon as possible after they have been received: <http://www.regulations.gov>. Follow the search instructions on that website to view public comments. The Departments will not post on *Regulations.gov* public comments that make threats to individuals or institutions or suggest that the commenter will take actions to harm an individual. The Departments continue to encourage individuals not to submit duplicative comments. The Departments will post acceptable comments from multiple unique commenters even if the content is identical or nearly identical to other comments.

I. Background

A. Preventing Surprise Medical Bills and Establishing the Federal IDR Process Under the Consolidated Appropriations Act, 2021

On December 27, 2020, the Consolidated Appropriations Act, 2021 (CAA) was enacted.¹ Title I, also known as the No Surprises Act, and title II (Transparency) of Division BB of the CAA amended chapter 100 of the Internal Revenue Code (Code), Part 7 of the Employee Retirement Income Security Act (ERISA), and title XXVII of the Public Health Service Act (PHS Act). The No Surprises Act provides Federal protections against surprise billing by limiting out-of-network cost sharing and prohibiting balance billing in many of the circumstances in which surprise bills most frequently arise. In particular, the No Surprises Act added new provisions applicable to group health plans and health insurance issuers offering group or individual health insurance coverage. Section 102 of the No Surprises Act added section 9816 of the Code, section 716 of ERISA, and section 2799A–1 of the PHS Act, which contain limitations on cost sharing and requirements regarding the timing of initial payments and notices of denial of payment by plans and issuers for emergency services furnished by nonparticipating providers and nonparticipating emergency facilities, and for non-emergency services furnished by nonparticipating providers with respect to patient visits to participating health care facilities, generally defined as hospitals, hospital outpatient departments, critical access

hospitals, and ambulatory surgical centers.²

Section 103 of the No Surprises Act established a Federal IDR process that plans and issuers and nonparticipating providers and facilities may utilize to resolve certain disputes regarding out-of-network rates under section 9816 of the Code, section 716 of ERISA, and section 2799A–1 of the PHS Act.

Section 105 of the No Surprises Act added section 9817 of the Code, section 717 of ERISA, and section 2799A–2 of the PHS Act. These sections contain limitations on cost sharing and requirements for the timing of initial payments and notices of denial of payment by plans and issuers for air ambulance services furnished by nonparticipating providers of air ambulance services and allow plans and issuers and nonparticipating providers of air ambulance services to utilize the Federal IDR process.

The No Surprises Act also added provisions to title XXVII of the PHS Act in a new part E that apply to health care providers, facilities, and providers of air ambulance services, such as prohibitions on balance billing for certain items and services and requirements related to disclosures about balance billing protections.

The Departments of the Treasury, Labor, and HHS (the Departments), along with the Office of Personnel Management (OPM), are issuing regulations in phases that implement provisions of the No Surprises Act and have issued multiple rulemakings since 2021 to implement various provisions. More specifically relevant to this proposed rulemaking, the Departments and OPM issued interim final rules (July 2021 interim final rules³ and October 2021 interim final rules),⁴ and the Departments issued final rules (August 2022 final rules)⁵ implementing provisions of sections 9816 and 9817 of the Code, sections 716 and 717 of ERISA, and sections 2799A–1 and 2799A–2 of the PHS Act. These rules implement provisions to protect consumers from surprise medical bills

for emergency services, non-emergency services furnished by nonparticipating providers with respect to patient visits to participating facilities⁶ in certain circumstances, and air ambulance services furnished by nonparticipating providers of air ambulance services. These rules also implement provisions to establish a Federal IDR process to determine payment amounts when there is a dispute between plans or issuers and providers, facilities, or providers of air ambulance services about the out-of-network rate for these services in cases where a specified State law or an applicable All-Payer Model Agreement does not provide a method for determining the total amount payable.

The July 2021 interim final rules and October 2021 interim final rules generally apply to plans and issuers (including grandfathered health plans) for plan years (in the individual market, policy years) beginning on or after January 1, 2022, and to health care providers, facilities, and providers of air ambulance services for items and services furnished during plan years (in the individual market, policy years) beginning on or after January 1, 2022.⁷ The August 2022 final rules became effective October 25, 2022, and are applicable for items and services provided or furnished on or after October 25, 2022, for plan years (in the individual market, policy years) beginning on or after January 1, 2022. As discussed in sections I.D and I.F of this preamble, certain provisions of these rules relating to the methodology for calculating the qualifying payment amount (QPA), the information that a certified IDR entity must consider in making a payment determination, the establishment of the administrative fee to use the IDR process, and certain restrictions on the qualified IDR items or services that may be considered jointly as part of a batched determination have been vacated⁸ by

⁶ References to a “participating facility” in this preamble mean a “participating health care facility,” as defined at 26 CFR 54.9816–3T, 29 CFR 2590.716–3, and 45 CFR 149.30.

⁷ The interim final rules also include interim final regulations under 5 U.S.C. 8902(p) issued by OPM that specify how certain provisions of the No Surprises Act apply to health benefit plans offered by carriers under the Federal Employees Health Benefits Act. These provisions apply to carriers in the FEHB Program with respect to contract years beginning on or after January 1, 2022. The disclosure requirements at 45 CFR 149.430 regarding patient protections against balance billing are applicable as of January 1, 2022.

Continued

¹ Public Law 116–260 (Dec. 27, 2020).

² Section 102(d)(1) of the No Surprises Act amended the Federal Employees Health Benefits Act, 5 U.S.C. 8901 *et seq.*, by adding a new subsection (p) to 5 U.S.C. 8902. Under this new provision, each FEHB Program contract must require a carrier to comply with requirements described in sections 9816 and 9817 of the Code, sections 716 and 717 of ERISA, and sections 2799A–1 and 2799A–2 of the PHS Act (as applicable) in the same manner as these provisions apply with respect to a group health plan or health insurance issuer offering group or individual health insurance coverage.

³ 86 FR 36872 (July 13, 2021).

⁴ 86 FR 55980 (Oct. 7, 2021).

⁵ 87 FR 52618 (Aug. 26, 2022).

the United States District Court for the Eastern District of Texas (District Court). On September 26, 2023, the Departments published the Federal IDR Process Administrative Fee and Certified IDR Entity Fee Ranges Proposed Rules (IDR Process Fees proposed rules)⁹ to amend the administrative fee and certified IDR entity fee provisions in the October 2021 interim final rules to provide additional guidance and promote transparency in the administrative fee calculation and certified IDR fee ranges. If finalized, the rules would apply for disputes initiated on or after the later of the effective date or January 1, 2024.

B. July 2021 Interim Final Rules

The July 2021 interim final rules implement sections 9816(a)–(b) and 9817(a) of the Code, sections 716(a)–(b) and 717(a) of ERISA, and sections 2799A–1(a)–(b), 2799A–2(a), 2799A–7, 2799B–1, 2799B–2, 2799B–3, and 2799B–5 of the PHS Act.

The No Surprises Act directs the Departments to specify the information that a plan or issuer must share with a nonparticipating provider or nonparticipating emergency facility when determining the QPA. Therefore, 26 CFR 54.9816–6T(d), 29 CFR 2590.716–6(d), and 45 CFR 149.140(d) require that plans and issuers make certain disclosures about the QPA with each initial payment or notice of denial of payment, and that plans and issuers provide certain additional information upon the request of the provider, facility, or provider of air ambulance services. This information must be provided in writing, either on paper or electronically, to a nonparticipating provider, facility, or provider of air ambulance services, as applicable, when the QPA serves as the recognized amount.

With an initial payment or notice of denial of payment, a plan or issuer must provide the QPA for each item or service involved, as well as a statement certifying that based on the determination of the plan or issuer: (1) the QPA applies for purposes of the recognized amount (or, in the case of air ambulance services, for calculating the participant's, beneficiary's, or enrollee's cost sharing), and (2) each QPA shared with the provider, facility, or provider of air ambulance services was determined in compliance with the

methodology outlined in the July 2021 interim final rules.¹⁰

A plan or issuer is also required to provide a statement that if the provider, facility, or provider of air ambulance services wishes to initiate a 30-day open negotiation period for purposes of determining the amount of total payment, the provider, facility, or provider of air ambulance services may contact the appropriate person or office to initiate open negotiation, and that if the 30-day open negotiation period does not result in an agreement on the payment amount, generally, the provider, facility, or provider of air ambulance services may initiate the Federal IDR process within 4 days after the end of the open negotiation period.¹¹ The plan or issuer must provide contact information, including a telephone number and email address, for the appropriate office or person for the provider, facility, or provider of air ambulance services to contact to initiate open negotiation for purposes of determining a payment amount (inclusive of cost sharing) for the item or service.¹²

In addition, upon request by the provider or facility,¹³ a plan or issuer must provide in a timely manner information about whether the QPA includes contracted rates that were not set on a fee-for-service basis for the specific items and services and whether the QPA for those items and services was determined using underlying fee schedule rates or a derived amount.¹⁴ If

Under the July 2021 interim final rules, plans and issuers are required to calculate the QPA using underlying fee schedule rates or derived amounts when the plan or issuer has sufficient information to calculate the median of its contracted rates but the payments under the contractual agreements are not on a fee-for-service basis (such as bundled or capitation payments). 86 FR 36893; 26 CFR 54.9816–6T(b)(2)(iii), 29 CFR 2590.716–6(b)(2)(iii), 45 CFR

an eligible database was used to determine the QPA, upon request by the provider or facility, the plan or issuer must provide information to identify which database was used.¹⁵ Similarly, if a related service code was used to determine the QPA for an item or service billed under a new service code, upon request by the provider or facility the plan or issuer must provide information to identify which related service code was used.¹⁶

Finally, upon request by the provider or facility, the plan or issuer must provide a statement, if applicable, that the plan's or issuer's contracted rates include risk-sharing, bonus, penalty, or other incentive-based or retrospective payments or payment adjustments that were excluded for purposes of calculating the QPA for the items and services involved.¹⁷

C. October 2021 Interim Final Rules and Related Guidance

The October 2021 interim final rules implement the Federal IDR process under sections 9816(c) and 9817(b) of the Code, sections 716(c) and 717(b) of ERISA, and sections 2799A–1(c) and 2799A–2(b) of the PHS Act. The Federal IDR process may be used by group health plans and health insurance issuers offering group or individual health insurance coverage and nonparticipating providers, facilities, and providers of air ambulance services to determine the out-of-network rate for certain items and services. These are emergency services, non-emergency services furnished by nonparticipating providers for patient visits to certain participating facilities (unless an individual has been provided notice and waived the individual's balance billing protections, in accordance with 45 CFR 149.410 or 149.420, as applicable), and air ambulance services furnished by nonparticipating providers of air ambulance services, for situations in which neither an All-Payer Model Agreement under section 1115A of the Social Security Act nor a specified State law as defined in 26 CFR 54.9816–3T, 29 CFR 2590.716–3, and 45 CFR 149.30 applies.

To implement the Federal IDR process, the October 2021 interim final

149.140(b)(2)(iii). Plans and issuers are not otherwise permitted to use underlying fee schedule rates or derived amounts to calculate the QPA.

Human Servs., Case No. 6:22–cv–450–JDK (E.D. Tex. Aug. 24, 2023) (*TMA III*), and *Tex. Med. Ass'n, et al. v. U.S. Dep't of Health and Human Servs.*, Case No. 6:23–cv–00059–JDK, (E.D. Tex. Aug. 3, 2023) (*TMA IV*).

⁹ 88 FR 65888 (Sept. 26, 2023).

rules include requirements governing the 30-business-day open negotiation period; the initiation of the Federal IDR process; the Federal IDR process following initiation, including the selection of a certified IDR entity, submission of offers, payment determinations, and written decisions; costs of the Federal IDR process; certification of IDR entities, including the denial or revocation of certification of an IDR entity; and the collection of information related to the Federal IDR process from certified IDR entities to satisfy reporting requirements under the statute.

To be eligible for the Federal IDR process, the subject of the dispute must be a qualified IDR item or service as defined in 26 CFR 54.9816–8T(a)(2)(xi), 29 CFR 2590.716–8(a)(2)(xi), and 45 CFR 149.510(a)(2)(xi). The October 2021 interim final rules define “qualified IDR item or service” to mean an emergency service furnished by a nonparticipating provider or nonparticipating facility subject to the protections of 26 CFR 54.9816–4T, 29 CFR 2590.716–4, or 45 CFR 149.110, for which the exception under 45 CFR 149.410(b) (regarding receipt of notice and consent to waive surprise billing protections) does not apply. A qualified IDR item or service may also be an item or service furnished by a nonparticipating provider at a participating health care facility subject to the requirements of 26 CFR 54.9816–5T, 29 CFR 2590.716–5, and 45 CFR 149.120, for which the exception under 45 CFR 149.420(c)–(i) (regarding receipt of notice and consent to waive surprise billing protections) does not apply. For an item or service to be considered a qualified IDR item or service, the provider, facility, or provider of air ambulance services or plan or issuer, as applicable, must submit a valid notice of IDR initiation through the Federal IDR portal for the item or service. The notice of IDR initiation is not valid if the 30-business-day open negotiation period under 26 CFR 54.9816–8T(b)(1), 29 CFR 2590.716–8(b)(1), and 45 CFR 149.510(b)(1) has not elapsed or an agreement on the payment amount has been reached. The term “qualified IDR item or service” also includes air ambulance services furnished by nonparticipating providers of air ambulance services subject to the protections of 26 CFR 54.9817–1T, 29 CFR 2590.717–1, and 45 CFR 149.130, as these services are defined in 26 CFR 54.9816–3T, 29 CFR 2590.716–3, and 45 CFR 149.30, for which the open negotiation period under 26 CFR 54.9816–8T(b)(1), 29 CFR 2590.716–8(b)(1), and 45 CFR 149.510(b)(1) has

elapsed, no agreement on the payment amount has been reached, and a valid notice of IDR initiation has been submitted after the 30-business-day open negotiation period has been satisfied.

The term “qualified IDR item or service” does not include items and services for which the out-of-network rate is determined by an All-Payer Model Agreement under section 1115A of the Social Security Act or by reference to a specified State law. Additionally, this term does not include an item or service submitted by the initiating party that is subject to the 90-calendar-day suspension period (also referred to as the “cooling-off period”) under 26 CFR 54.9816–8T(c)(4)(vii)(B), 29 CFR 2590.716–8(c)(4)(vii)(B), and 45 CFR 149.510(c)(4)(vii)(B) except to the extent that it is submitted during the subsequent 30-business-day period, as allowed under the October 2021 interim final rules.¹⁸

The open negotiation period may be initiated by either party during the 30-business-day period beginning on the day the nonparticipating provider, facility, or nonparticipating provider of air ambulance services receives either an initial payment or a notice of denial of payment for an item or service.¹⁹ In order for a plan, issuer, provider, facility, or provider of air ambulance services to know when it is a party to an open negotiation and the item or service for which the payment is to be negotiated, the party initiating the open negotiation period must provide written notice to the other party of its intent to negotiate using a standardized form, referred to as an open negotiation notice. The open negotiation notice must include information sufficient to identify the item or service subject to negotiation, including the date the item or service was furnished, the service code, the initial payment amount or notice of denial of payment, as applicable, an offer for the out-of-network rate, and the contact information of the party sending the open negotiation notice. The open negotiation notice must be sent during

¹⁸ In the case of a determination made by a certified IDR entity, the party that submitted the initial notification initiating the Federal IDR process may not submit a subsequent notification involving the same other party with respect to a claim for the same or similar item or service that was the subject of the initial notification during the 90-calendar-day period following the determination (the “cooling off period”).

¹⁹ As clarified in the July 2021 interim final rules, the initial payment should be an amount that the plan or issuer reasonably intends to be payment in full based on the relevant facts and circumstances, prior to the beginning of any open negotiations or initiation of the Federal IDR process. See 86 FR 36900–36901.

the 30-business-day period beginning on the day the initial payment or notice of denial of payment from the plan or issuer regarding such item or service was received and must be provided in writing. The party sending the open negotiation notice may satisfy this requirement by providing the notice to the opposing party electronically (such as by email) if the following two conditions are satisfied: (1) the party sending the open negotiation notice has a good faith belief that the electronic method is readily accessible to the other party; and (2) the notice is provided in paper form free of charge upon request. The 30-business-day open negotiation period begins on the day on which the open negotiation notice is first sent by a party.

As stated in the preamble to the October 2021 interim final rules, parties should be able to provide effective notice because the parties have already made initial contact (that is, the provider, facility, or provider of air ambulance services has transmitted a bill to the plan or issuer, and the plan or issuer sent an initial payment or a notice of denial of payment to the provider, facility, or provider of air ambulance services).²⁰ The Departments encouraged the parties to take reasonable measures to ensure that actual notice is provided, such as by confirming that the email address is correct, and cautioned that if the open negotiation notice is not properly provided to the other party (and no reasonable measures have been taken to ensure actual notice has been provided), the Departments or a certified IDR entity may determine that the 30-business-day open negotiation period has not begun. In such a case, any subsequent payment determination from a certified IDR entity may be unenforceable due to the failure of the party sending the open negotiation notice to meet the open negotiation requirement of the October 2021 interim final rules. In guidance, the Departments clarified how a provider, facility, or provider of air ambulance services should proceed if the plan or issuer fails to disclose information necessary to initiate the open negotiation period when providing the initial payment or notice of denial of payment and whether providers, facilities, or providers of air ambulance services are required to use a plan’s or issuer’s online portal to submit an open negotiation notice.²¹

Continued

The October 2021 interim final rules provide that if the parties have not negotiated an agreement on the out-of-network rate by the last day of the open negotiation period, either party may initiate the Federal IDR process during the 4-business-day period beginning on the 31st business day after the start of the open negotiation period.²² To initiate the Federal IDR process, the initiating party must submit the standard notice of IDR initiation to the other party and to the Departments. As stated in the preamble of the October 2021 interim final rules, this notice must be provided to the Departments and the other party on the same day.²³ The notice of IDR initiation must include: (1) information sufficient to identify the qualified IDR items and services (and whether the qualified IDR items or services are designated as batched items and services), including the furnishing date(s) and location(s) of the item or service, the type of qualified IDR item or service (such as emergency services, post-stabilization professional services, hospital-based services), corresponding service and place-of-service code(s), the amount of cost sharing allowed, and the amount of the initial payment made by the plan or issuer for the qualified IDR item or service, if applicable; (2) the names and contact information of the parties involved, including email addresses, phone numbers, and mailing addresses; (3) the State where the qualified IDR item or service was furnished; (4) the commencement date of the open negotiation period; (5) the initiating party's preferred certified IDR entity; (6) an attestation that the item or service is a qualified IDR item or service within the scope of the Federal IDR process; (7) the QPA; (8) information about the QPA as described in 26 CFR 54.9816-6T(d), 29 CFR 2590.716-6(d), and 45 CFR 149.140(d); and (9) general information describing the Federal IDR process as specified by the Departments.²⁴ The general information should include a description of the scope of the Federal IDR process and key deadlines in the Federal IDR process, including the dates to initiate the Federal IDR process, how to select a certified IDR entity, and the

process for selecting an offer.²⁵ The Departments have developed a form that parties must use to satisfy this requirement to provide general information describing the Federal IDR process.

Under section 9816(c)(1)(B) of the Code, section 716(c)(1)(B) of ERISA, and section 2799A-1(c)(1)(B) of the PHS Act, the date of initiation of the Federal IDR process is the date of the submission of the notice of IDR initiation or another date specified by the Departments that is not later than the date of receipt of the notice of IDR initiation by both the other party to the dispute and the Departments. The October 2021 interim final rules establish that the initiation date of the Federal IDR process is the date of receipt of the notice of IDR initiation by the Departments.²⁶

Under the October 2021 interim final rules, the plan or issuer and the nonparticipating provider, nonparticipating emergency facility, or nonparticipating provider of air ambulance services (as applicable) may jointly select a certified IDR entity no later than 3 business days following the date of the IDR initiation.²⁷ As previously stated, the initiating party will select its preferred certified IDR entity in the notice of IDR initiation. The party in receipt of the notice of IDR initiation (non-initiating party) may agree or object to the preferred certified IDR entity identified by the initiating party in the notice of IDR initiation. If the non-initiating party does not object within 3 business days of the date of initiation of the Federal IDR process, the preferred certified IDR entity identified in the notice of IDR initiation will be the selected certified IDR entity, provided that the certified IDR entity does not have a conflict of interest. If the non-initiating party objects, that party must timely notify the initiating party of the objection and propose an alternative preferred certified IDR entity. The initiating party must then agree or object to the alternative preferred certified IDR entity. If the initiating party fails to object to the alternative preferred certified IDR entity within 3 business days of the date of initiation of the Federal IDR process, the alternative preferred certified IDR entity proposed by the non-initiating party will be the selected certified IDR entity, provided that the certified IDR entity does not have a conflict of interest. If both parties

agree on and select a certified IDR entity or fail to agree upon a certified IDR entity within the specified timeframe, the initiating party must notify the Departments by electronically submitting the notice of the certified IDR entity selection or failure to select (as applicable), no later than 1 business day after the end of the 3-business-day period (or in other words, 4 business days after the date of initiation of the Federal IDR process) through the Federal IDR portal. If the parties fail to jointly select a certified IDR entity, the Departments will then randomly select a certified IDR entity not later than 6 business days after the date of initiation of the Federal IDR process and will notify the parties of the selection. In addition, in instances in which the non-initiating party believes that an item or service is not eligible for the Federal IDR process, the non-initiating party must notify the Departments through the Federal IDR portal within the same timeframe that the notice of certified IDR entity selection or failure to select is required (or in other words, 4 business days after the date of initiation of the Federal IDR process) and provide information that demonstrates why an item or service is not eligible for the Federal IDR process.

After being notified of selection (either by the parties or the Departments), certified IDR entities are required within 3 business days of selection to attest that they do not have a conflict of interest as specified under 26 CFR 54.9816-8T(c)(1)(ii), 29 CFR 2590.716-8(c)(1)(ii), and 45 CFR 149.510(c)(1)(ii). Certified IDR entities are also required to review the information submitted in the notice of IDR initiation and any additional requested information to determine whether the dispute is for a qualified IDR item or service, as defined in 26 CFR 54.9816-8T(a)(2)(xi), 29 CFR 2590.716-8(a)(2)(xi), and 45 CFR 149.510(a)(2)(xi), that is eligible for the Federal IDR process, including whether an All-Payer Model Agreement or specified State law applies. If an item or service is not a qualified IDR item or service eligible for the Federal IDR process, certified IDR entities must notify the Departments and the parties within 3 business days of making this determination.

The October 2021 interim final rules provide that, not later than 30 business days after the selection of a certified IDR entity, the certified IDR entity must select one of the offers submitted by either party to the dispute to be the out-of-network rate for the qualified IDR

Care Act and Consolidated Appropriations Act, 2021 Implementation Part 55, Q20 and Q21 (Aug. 19, 2022), available at <https://www.dol.gov/sites/dolgov/files/EBSA/about-ebsa/our-activities/resource-center/faqs/aca-part-55.pdf> and <https://www.cms.gov/files/document/faqs-part-55.pdf>.

item or service.²⁸ For each qualified IDR item or service, the total plan or coverage payment is the amount by which this out-of-network rate exceeds the cost-sharing amount for the qualified IDR item or service (with any initial payment made by the plan or issuer counted toward the total plan or coverage payment).

The October 2021 interim final rules also provided that, after considering the QPA, the statutory factors under sections 9816(c)(5)(C)(ii) and 9817(b)(5)(C)(ii) of the Code, sections 716(c)(5)(C)(ii) and 717(b)(5)(C)(ii) of ERISA, and sections 2799A–1(c)(5)(C)(ii) and 2799A–2(b)(5)(C)(ii) of the PHS Act, additional information requested by the certified IDR entity from the parties, and all of the additional credible information submitted by the parties that was not prohibited information under 26 CFR 54.9816–8T(c)(4)(v), 29 CFR 2590.716–8(c)(4)(v), and 45 CFR 149.510(c)(4)(v), the certified IDR entity must select the offer closest to the QPA, unless the certified IDR entity determined that the credible information submitted by the parties clearly demonstrated that the QPA was materially different from the appropriate out-of-network rate, or the offers were equally distant from the QPA but in opposing directions.²⁹ In those situations, the October 2021 interim final rules required the certified IDR entity to select the offer that the certified IDR entity determined best represented the value of the item or service, which could be either party's offer.³⁰ However, as discussed in sections I.D. and I.F. of this preamble, the District Court vacated portions of these rules related to certified IDR entity determinations.³¹

The October 2021 interim final rules also provide that not later than 30 business days after the selection of the certified IDR entity, the certified IDR entity must notify parties to the dispute of the selection of the offer and provide a written decision,³² which must be submitted to the parties and the Departments through the Federal IDR portal.³³

Section 9816(c)(3)(A) of the Code, section 716(c)(3)(A) of ERISA, and

section 2799A–1(c)(3)(A) of the PHS Act direct the Departments to specify criteria under which multiple qualified IDR items and services are permitted to be considered jointly as part of a single determination (“batched determination” or “batched dispute”) by a certified IDR entity for purposes of encouraging the efficiency (including minimizing costs) of the Federal IDR process. These sections further require that items and services may be considered as part of a batched determination only if the items and services are furnished by the same provider or facility; payment for the items and services is required to be made by the same group health plan or health insurance issuer; such items and services are related to the treatment of a similar condition; and the items and services were furnished during the 30-day period following the date on which the first item or service included in the batched determination was furnished, or during an alternative period as determined by the Departments, for use in limited situations, such as by the consent of the parties or in the case of low-volume items and services, to encourage procedural efficiency and minimize health plan and provider administrative costs. The October 2021 interim final rules implemented these requirements for batched determinations at 26 CFR 54.9816–8T(c)(3)(i), 29 CFR 2590.716–8(c)(3)(i), and 45 CFR 149.510(c)(3)(i), which are subject to the certified IDR entity fee for batched determinations.³⁴

The October 2021 interim final rules also establish requirements related to the costs of the Federal IDR process. Under the October 2021 interim final rules, each party must pay a non-refundable administrative fee for participating in the Federal IDR process.³⁵ The certified IDR entity may invoice the parties for the administrative fee at the time the certified IDR entity is selected, and the parties must pay the administrative fee by the time of offer submission.³⁶ The administrative fee is paid by each party to the certified IDR entity and remitted to the Departments.³⁷ Under the October

2021 interim final rules, the administrative fee was to be established annually through guidance in a manner such that the total administrative fees collected for a year are estimated to be equal to the amount of expenditures estimated to be made by the Departments to carry out the Federal IDR process for that year.

Additionally, under the October 2021 interim final rules, each party must also pay a certified IDR entity fee to the certified IDR entity at the time that the party submits its offer.³⁸ However, the non-prevailing party is ultimately responsible for the full certified IDR entity fee, which is retained by the certified IDR entity for the services it performed.³⁹ The certified IDR entity fee that was paid by the prevailing party is returned to the prevailing party by the certified IDR entity within 30 business days following the date of the payment determination.⁴⁰ If the parties reach an agreement after initiating the Federal IDR process but before the certified IDR entity makes a payment determination, the certified IDR entity fee is split evenly between the parties, unless the parties agree on an alternative method for allocating the certified IDR entity fee.⁴¹ Similarly, if the initiating party withdraws a dispute after a certified IDR entity has been assigned but before the certified IDR entity makes a payment determination, responsibility for the certified IDR entity fee is split evenly between the parties.⁴² In the case of batched determinations, the certified IDR entity may make different payment determinations for each qualified IDR item or service under dispute. In these cases, the party with the fewest determinations in its favor is considered the non-prevailing party and is responsible for the full certified IDR entity fee. If each party prevails in an equal number of determinations, the certified IDR entity fee is split evenly between the parties. Under the October 2021 interim final rules, the

Surprises Act directed the Departments to jointly establish one Federal IDR process. To operationalize the Federal IDR process, HHS collects administrative fees for all disputes initiated under the Federal IDR process, including the administrative fees paid in connection with the Federal IDR process for health plans that are subject to the Code or ERISA.

D. Litigation Regarding the July 2021 and October 2021 Interim Final Rules and Related Guidance

On October 28, 2021, the Texas Medical Association, a trade association representing physicians, and a Texas physician filed a lawsuit against the Departments and OPM (*TMA I*),⁴³ stating that certain provisions of the October 2021 interim final rules relating to the certified IDR entities' consideration of the QPA, as well as additional factors related to items and services that are not air ambulance services, should be vacated. Plaintiffs argued that the October 2021 interim final rules ignored Congress's intent that certified IDR entities weigh the QPA and other factors without favoring any factor, and the plaintiffs stated that as a result, the rules would skew IDR results in favor of plans and issuers. On February 23, 2022, the District Court issued a memorandum opinion and order that vacated portions of the October 2021 interim final rules governing aspects of the Federal IDR process related to non-air ambulance qualified IDR items or services including: (1) the definition of "material difference"; (2) the requirement that a certified IDR entity must select the offer closest to the QPA unless the certified IDR entity determines that credible information submitted by either party under 26 CFR 54.9816–8T(c)(4)(i), 29 CFR 2590.716–8(c)(4)(i), and 45 CFR 149.510(c)(4)(i) clearly demonstrates that the QPA is materially different from the appropriate out-of-network rate for non-air ambulance qualified IDR items or services, or if the offers are equally distant from the QPA but in opposing directions; (3) the requirement that the certified IDR entity may only consider the additional information submitted by either party to the extent that the credible information related to the circumstances under 26 CFR 54.9816–8T(c)(4)(i), 29 CFR 2590.716–8(c)(4)(i), and 45 CFR 149.510(c)(4)(i) clearly demonstrates that the QPA is materially different from the appropriate out-of-network rate for non-air ambulance qualified IDR items or services; (4) the dispute resolution examples; and (5) the requirement that, if the certified IDR entity does not choose the offer closest to the QPA, the certified IDR entity's written decision must include an explanation of the credible information that the certified IDR entity determined demonstrated that the QPA was

materially different from the appropriate out-of-network rate, based on the factors certified IDR entities are permitted to consider for the qualified IDR item or service.⁴⁴

On April 27, 2022, LifeNet, Inc., a provider of air ambulance services, filed a lawsuit against the Departments and OPM (*LifeNet*)⁴⁵ seeking the vacatur of additional provisions of the October 2021 interim final rules applicable to air ambulance services. In particular, LifeNet alleged that the requirement codified in the last sentence of 26 CFR 54.9817–2T(b)(2), 29 CFR 2590.717–2(b)(2), and 45 CFR 149.520(b)(2), which specifies the certified IDR entity may consider information submitted by a party only if the information "clearly demonstrate[s] that the qualifying payment amount is materially different from the appropriate out-of-network rate," should be vacated. On July 26, 2022, the District Court issued a memorandum opinion and order vacating this language.⁴⁶

On November 30, 2022, the Texas Medical Association, Tyler Regional Hospital, and a Texas physician filed a lawsuit (*TMA III*)⁴⁷ against the Departments and OPM, asserting that the July 2021 interim final rules, including the provisions of the regulations governing the methodology for calculating the QPA, and certain related guidance documents were in conflict with the statutory language. On August 24, 2023, the District Court issued a memorandum opinion and order⁴⁸ that vacated certain portions of the July 2021 interim final rules and associated regulatory provisions⁴⁹ and portions of guidance documents,⁵⁰ including portions related to the methodology for calculating the QPA and interpretations for certified IDR entities related to the processing of disputes for air ambulance services.

⁴⁷ *Tex. Med. Ass'n., et al. v. U.S. Dep't of Health and Human Servs.*, Case No. 6:22–cv–00450–JDK (E.D. Tex. November 30, 2022).

⁴⁸ See Memorandum Opinion and Order, *Tex. Med. Ass'n., et al. v. U.S. Dep't of Health and Human Servs.*, No. 6:22–cv–00450–JDK (E.D. Tex. August 24, 2023).

⁴⁹ Specifically, the District Court vacated certain provisions of 54.9816–6T and 54.9817–1T, 29 CFR 2590.716–6 and 2590.717–1, and 45 CFR 149.130 and 149.140. The District Court also vacated 5 CFR 890.114(a), insofar as it requires compliance with the vacated regulations and guidance.

⁵⁰ Specifically, the District Court vacated *FAQs about Affordable Care Act and Consolidated Appropriations Act, 2021 Implementation Part 55* (Aug. 19, 2022), Q14 and 15, as well as portions of *Technical Guidance for Certified IDR Entities at 2–3* (Aug. 18, 2022).

On January 30, 2023, the Texas Medical Association, Houston Radiology Associated, Texas Radiological Society, Tyler Regional Hospital, and a Texas physician filed a lawsuit (*TMA IV*)⁵¹ against the Departments and OPM, asserting that the December 2022 fee guidance⁵² and the October 2021 interim final rules were unlawfully issued without notice and comment rulemaking and were arbitrary and capricious.⁵³ On August 3, 2023, the District Court issued a memorandum opinion and order⁵⁴ that vacated the portion of the December 2022 fee guidance increasing the administrative fee for the Federal IDR process to \$350 per party for disputes initiated during the calendar year beginning January 1, 2023. The District Court also vacated certain provisions of the October 2021 interim final rules setting forth the batching criteria under which multiple IDR items or services are treated as related to the "treatment of a similar condition."⁵⁵ In light of the *TMA IV* order, on August 3, 2023, the Departments instructed certified IDR entities to pause all work in the Federal IDR portal until the Departments updated Federal IDR process guidance, systems, and related documents to make them consistent with the *TMA IV* order. Subsequently, on August 7, 2023, the Departments directed certified IDR entities to resume processing all single and bundled disputes for which the administrative fee had already been paid and all batched disputes for which the certified IDR entity had already determined the dispute eligible and

⁵³ See Motion for Summary Judgment and Reply in Support of Summary Judgment, p. 1, *Tex. Med. Ass'n., et al. v. U.S. Dep't of Health and Human Servs.*, No. 6:23–cv–00059–JDK (E.D. Tex. March 27, 2023).

⁵⁴ See Memorandum Opinion and Order, *Tex. Med. Ass'n. v. U.S. Dep't of Health and Hum. Servs.*, No. 6:23–cv–00059–JDK (E.D. Tex. August 3, 2023).

⁵⁵ Specifically, the District Court vacated the requirement under 26 CFR 54.9816–8T(c)(3)(i)(C), 29 CFR 2590.716–8(c)(3)(i)(C), and 45 CFR 149.510(c)(3)(i)(C) that for a qualified IDR item and service to be considered the same or similar item and service, it must be billed under the same service code or a comparable code under a different procedural code system, such as the Current Procedural Terminology (CPT) codes with modifiers, if applicable, Healthcare Common Procedure Coding System (HCPCS) with modifiers, if applicable, or Diagnosis-Related Group (DRG) codes with modifiers, if applicable.

⁴³ *Tex. Med. Ass'n., et al. v. U.S. Dep't of Health and Human Servs.*, 587 F. Supp. 3d 528 (E.D. Tex. 2022).

administrative fees had been paid (or the deadline for collecting fees had expired) before August 3, 2023.⁵⁶ On August 8, 2023, the Departments directed certified IDR entities to resume processing single and bundled disputes initiated in 2022 for which the administrative fee had not been paid before August 3, 2023. On August 11, 2023, the Departments released guidance to reflect the *TMA IV* order related to the administrative fee and to clarify the administrative fee amount for 2023.⁵⁷ On the same date, the Departments directed certified IDR entities to resume processing single and bundled disputes initiated in 2023 for which the administrative fees had not been paid before August 3, 2023.

As a result of the *TMA III* order issued on August 24, 2023, the Departments again paused all IDR-related activities in order to evaluate the District Court's order and review current Federal IDR processes, templates, and system functions necessary to comply with the order. On September 5, 2023, the Departments directed certified IDR entities to resume making eligibility and conflict-of-interest determinations for all single and bundled disputes submitted on or before August 3, 2023, and encouraged disputing parties to continue engaging in open negotiations. On September 21, 2023, the Departments directed certified IDR entities to resume processing all single and bundled disputes submitted on or before August 3, 2023. On October 6, 2023, the Departments and OPM released "FAQs About Consolidated Appropriations Act, 2021 Implementation Part 62"⁵⁸ to provide

guidance in light of the *TMA III* order. On the same day, the Departments reopened the Federal IDR portal for the initiation of certain new single and bundled disputes. At the time of this proposed rulemaking and in accordance with the *TMA III* and *TMA IV* orders, the Departments plan to release guidance to clarify how certified IDR entities should determine whether a dispute is appropriately batched.

E. August 2022 Final Rules

The August 2022 final rules included amendments to remove from the regulations the language vacated by the District Court in *TMA I* and *LifeNet*,⁵⁹ as described in section I.D. of this preamble. In addition, the August 2022 final rules amended and finalized certain disclosure requirements related to information that plans and issuers must share about the QPA under the July 2021 interim final rules.⁶⁰ The August 2022 final rules also amended and finalized select provisions of the October 2021 interim final rules on the information to be considered by a certified IDR entity when it makes a payment determination under the Federal IDR process.⁶¹

Specifically, the Departments amended and finalized parts of the July 2021 and October 2021 interim final rules related to: (1) the information that must be disclosed about the QPA under 26 CFR 54.9816–6T(d), 29 CFR 2590.716–6(d), and 45 CFR 149.140(d) to address downcoding; (2) the certified IDR entity's consideration of the statutory factors when making a payment determination under the Federal IDR process at 26 CFR 54.9816–8T(c)(4)(iii)–(iv) and 54.9817–2T(b)(2), 29 CFR 2590.716–8(c)(4)(iii)–(iv) and 2590.717–2(b)(2), and 45 CFR 149.510(c)(4)(iii)–(iv) and 149.520(b)(2); and (3) the certified IDR entity's written decision at 26 CFR 54.9816–8T(c)(4)(vi)(B), 29 CFR 2590.716–8(c)(4)(vi)(B), and 45 CFR 149.510(c)(4)(vi)(B).

For the information that must be disclosed with the QPA, the August 2022 final rules require that if a QPA is based on a downcoded service code or modifier, in addition to the information already required to be provided with an initial payment or notice of denial of payment, a plan or issuer must provide

a statement that the service code or modifier billed by the provider, facility, or provider of air ambulance services was downcoded; an explanation of why the claim was downcoded, including a description of which service codes were altered, if any, and which modifiers were altered, added, or removed, if any; and the amount that would have been the QPA had the service code or modifier not been downcoded. The August 2022 final rules define the term "downcode," as described in the preamble to the October 2021 interim final rules, to mean the alteration by a plan or issuer of a service code to another service code, or the alteration, addition, or removal by a plan or issuer of a modifier, if the changed code or modifier is associated with a lower QPA than the service code or modifier billed by the provider, facility, or provider of air ambulance services.⁶²

The August 2022 final rules also provided that in determining which offer to select during the Federal IDR process, the certified IDR entity must consider the QPA for the applicable year for the same or similar item or service and then must consider all additional information submitted by a party to determine which offer best reflects the appropriate out-of-network rate, provided that the information relates to the party's offer for the payment amount for the qualified IDR item or service that is the subject of the payment determination and does not include information that the certified IDR entity is prohibited from considering in making the payment determination under section 9816(c)(5)(D) of the Code, section 716(c)(5)(D) of ERISA, and section 2799A–1(c)(5)(D) of the PHS Act. For this purpose, the preamble to the August 2022 final rules stated that information requested by a certified IDR entity, or submitted by a party, would be information relating to a party's offer if it tends to show that the offer best represents the value of the item or service under dispute. The August 2022 final rules required the certified IDR entity to evaluate whether the information relates to the offer submitted by either party for the payment amount for the qualified IDR item or service that is the subject of the payment determination. The August 2022 final rules clarified that in considering this additional information, the certified IDR entity should evaluate whether the information that is offered is credible and should not give weight to information that is not credible. The appropriate out-of-network rate must be the offer that the certified IDR entity
