Code for regular tax purposes. Paragraph (g) of this section provides rules for adjusting AFSI in certain cases in which foreign stock is distributed by a partnership. Paragraph (h) of this section provides examples illustrating the application of the rules in this section. Paragraph (i) of this section provides the applicability date of this section. See § 1.56A-6 for determining AFSI adjustments under section 56A(c)(3) with respect to controlled foreign corporations. See §§ 1.56A-18 and 1.56A-19 for rules that apply to transactions involving corporations not described in this section.

(b) *Definitions.* The following definitions apply for purposes of this section. Terms used in this section that are not defined in this section have the meanings provided in § 1.56A-1(b).

(1) *Covered asset transaction.* The term *covered asset transaction* means the following:

(i) A component transaction (within the meaning of § 1.56A-18(b)(6)) in which one or more assets are—

(A) Transferred by a foreign corporation in a transfer to which section 311 of the Code applies;

(B) Transferred by a foreign corporation in a transfer that is part of a complete liquidation to which sections 332 and 337 of the Code apply;

(C) Transferred to a foreign corporation in a transfer to which section 351 or section 361 of the Code applies;

(D) Transferred by a foreign corporation in a transfer to which section 361 applies;

(E) Stock, or stock and securities, of a domestic corporation described in section 355(a)(1)(A) of the Code and transferred by a foreign corporation in a transfer to which section 355 applies; or

(F) Securities of a foreign corporation that is a party to a reorganization described in section 368(a)(1) and transferred in a transfer to which section 354 or 356 applies.

(ii) A component transaction (within the meaning of § 1.56A-18(b)(6)) in which one or more assets, at least one of which is stock of a foreign corporation, are—

(A) Transferred by a domestic corporation in a transfer to which section 311 applies;

(B) Transferred by a domestic corporation in a transfer that is part of a complete liquidation to which sections 332 and 337 apply;

(C) Transferred to a domestic corporation in a transfer to section 351 or section 361 applies;

(D) Transferred by a domestic corporation in a transfer to which section 361 applies;

(E) Stock, or stock and securities, of a foreign corporation described in section 355(a)(1)(A) and transferred by a domestic corporation in a transfer to which section 355 applies; or

(F) Securities of a domestic corporation that is a party to a reorganization described in section 368(a)(1) and transferred in a transfer to which section 354 or 356 applies, provided the securities are exchanged for stock or securities of a foreign corporation that is a party to the reorganization.

(2) *Section 338(g) transaction.* The term *section 338(g) transaction* means a purchase, as defined in section 338(h)(3) of the Code, of stock of a foreign corporation with respect to which the purchaser makes an election under section 338(g).

(3) *Transfer.* The term *transfer* (or *transferred* or *transfers* or *transferring*), when used with respect to an asset, means a sale, distribution, exchange, or any other disposition of the asset. If the asset is stock or securities of a corporation, the term *transfer* includes an issuance or a redemption of stock or securities by the corporation.

(c) *Adjustments to AFSI—(1) Adjustments with respect to stock of a foreign corporation.* If a CAMT entity directly owns stock of a foreign corporation, the AFSI of the CAMT entity with respect to its ownership of stock of the foreign corporation is adjusted to—

(i) Disregard any items of income, expense, gain, and loss resulting from ownership of stock of the foreign corporation, including any items that result from acquiring or transferring the stock, reflected in the CAMT entity's FSI; and

(ii) Include any items of income, deduction, gain, and loss for regular tax purposes resulting from ownership of stock of the foreign corporation, including any items that result from acquiring or transferring the stock, other than any items of income, deduction, gain, and loss resulting from the application of section 78, 250, 951, or 951A of the Code.

(2) *Adjustments with respect to covered asset transactions.* If a CAMT entity transfers an asset, other than stock of a foreign corporation, in a covered asset transaction, the AFSI of the CAMT entity must be adjusted to—

(i) Disregard any items of income, expense, gain, and loss with respect to the transferred asset resulting from the covered asset transaction reflected in the CAMT entity's FSI; and

(ii) Include any items of income, deduction, gain, and loss for regular tax purposes with respect to the transferred

asset resulting from the covered asset transaction; however, for this purpose, the amount of each such item is computed by substituting the CAMT entity's CAMT basis in the transferred asset for the CAMT entity's basis in the transferred asset for regular tax purposes.

(3) *Adjustments with respect to section 338(g) transactions.* If stock of a foreign corporation is acquired in a section 338(g) transaction, the AFSI of the foreign corporation is adjusted to include any net gain or loss that results for regular tax purposes with respect to all assets the foreign corporation is treated as selling by reason of the section 338(g) transaction; however, for this purpose, the amount of gain or loss with respect to each asset that the foreign corporation is deemed to have sold by reason of the section 338(g) transaction is computed by substituting the foreign corporation's CAMT basis in the asset for the foreign corporation's basis in the asset for regular tax purposes.

(4) *Adjustments with respect to purchase accounting and push down accounting.* If a CAMT entity acquires the stock of a foreign corporation, then any purchase accounting and push down accounting adjustments, as applicable, with respect to the acquisition of the stock of the foreign corporation are disregarded for purposes of determining the CAMT entity's AFSI.

(d) *Certain rules for determining CAMT basis—(1) Covered asset transactions.* If an asset is transferred in a covered asset transaction, the following rules apply to determine the transferee's CAMT basis in the asset transferred (or the transferee's CAMT basis in the asset retained, in the case of stock of a distributing corporation in certain distributions under section 355)—

(i) If the asset is transferred in a transaction described in section 311, the transferee's CAMT basis in the asset is determined in the manner described in section 301(d) of the Code;

(ii) If the asset is transferred in a transaction described in sections 332 and 337, the transferee's CAMT basis in the asset is determined in the manner described in section 334(b) of the Code, substituting the transferor's CAMT basis in the asset for the transferor's basis in the asset for regular tax purposes;

(iii) If the asset is transferred in a transaction described in section 351 or 361, then—

(A) If the transferor is a CAMT entity, the transferee's CAMT basis in the asset is determined in the manner described in section 362 of the Code, substituting the transferor's CAMT basis in the asset

for the transferor's basis in the asset for regular tax purposes and substituting the amount of gain included in the transferor's AFSI for the amount of gain recognized to the transferor for regular tax purposes; or

(B) If the transferor is not a CAMT entity, the transferee's CAMT basis in the asset is equal to the transferee's basis in the asset for regular tax purposes;

(iv) If the asset transferred is stock or securities of a domestic corporation described in section 355(a)(1)(A) and the asset is transferred by a foreign corporation in a transaction to which section 355 applies, the transferee's CAMT basis in the transferred stock or securities of the domestic corporation is equal to the transferee's basis in such stock or securities for regular tax purposes;

(v) If the asset transferred is stock or securities of a foreign corporation described in section 355(a)(1)(A) and the asset is transferred by a domestic corporation in a transaction to which section 355 applies, the transferee's CAMT basis in the stock or securities of the domestic transferor corporation is determined by applying section 358 of the Code, substituting the transferee's CAMT basis in the stock or securities of the domestic corporation for the transferee's basis in the stock or securities of the domestic corporation for regular tax purposes; and

(vi) If the asset transferred is securities of a foreign corporation that is a party to a reorganization described in section 368(a)(1) and the asset received in exchange for the securities is not stock of a foreign corporation that is a party to the reorganization, the transferee's CAMT basis in the asset received is determined by applying section 358, substituting the transferee's CAMT basis in the securities of the foreign corporation for the transferee's basis in such securities for regular tax purposes.

(vii) If the asset transferred is securities of a domestic corporation that is a party to a reorganization described in section 368(a)(1) and the asset received in exchange for the securities is not stock of a foreign corporation that is a party to the reorganization, the transferee's CAMT basis in the asset received is determined by applying section 358, substituting the transferee's CAMT basis in the securities of the domestic corporation for the transferee's basis in such securities for regular tax purposes.

(2) *Section 338(g) transaction.* If stock of a foreign corporation is acquired in a section 338(g) transaction, immediately after the section 338(g) transaction, the

foreign corporation's CAMT basis in the assets it is deemed to have purchased by reason of the section 338(g) transaction is equal to the foreign corporation's basis in those assets for regular tax purposes.

(3) *Transfers of stock of a foreign corporation involving a partnership.* For rules that adjust a partner's basis in its investment in a partnership for certain transfers of stock of a foreign corporation by the partner to the partnership or by the partnership to the partner, see § 1.56A–5(j)(3)(xi) and (xii).

(4) *Purchase accounting and push down accounting.* If a CAMT entity acquires stock of a foreign corporation, then any purchase accounting and push down accounting adjustments, as applicable, with respect to the acquisition of the stock of the foreign corporation are disregarded for purposes of determining the CAMT basis in the foreign corporation's assets.

(5) *Stock of a foreign corporation.* The CAMT basis in stock of a foreign corporation is equal to the basis in the stock for regular tax purposes.

(e) *Stock of a foreign corporation owned by a partnership.* If a partnership directly owns stock of a foreign corporation, then in determining the AFSI of a CAMT entity that is a partner in the partnership (or an indirect partner, in the case of tiered partnerships), the partner takes into account the items described in paragraph (c)(1)(ii) of this section that are allocated to the partner for regular tax purposes. See also § 1.56A–5(e)(4)(iii).

(f) *AFSI adjustments when basis in foreign stock is determined under section 358—(1) In general.* If a CAMT entity receives stock of a foreign corporation as part of a covered asset transaction, the basis in the stock of the foreign corporation received is determined under section 358 of the Code, and at least one of the requirements in paragraphs (f)(1)(i) and (ii) of this section is satisfied, then to the extent the basis for regular tax purposes in such stock of the foreign corporation is greater than the hypothetical CAMT basis in such stock of the foreign corporation (as determined under paragraph (f)(2) of this section), the CAMT entity increases its AFSI for the taxable year in which such stock is received by the amount of such excess.

(i) *Principal purpose rule.* For purposes of this paragraph (f)(1), the requirement of this paragraph (f)(1)(i) is satisfied if a principal purpose of the covered asset transaction is to avoid treatment of the CAMT entity or another CAMT entity as an applicable

corporation or to reduce or otherwise avoid a liability under section 55(a) of the Code.

(ii) *Two-year rule.* For purposes of this paragraph (f)(1), the requirement of this paragraph (f)(1)(ii) is satisfied if within two years of the date the stock of the foreign corporation is received, the basis in such stock of the foreign corporation is taken into account, in whole or in part, in determining the AFSI of the recipient CAMT entity or another CAMT entity. The principles of this paragraph (f)(1)(ii) apply with respect to any asset whose basis for regular tax purposes is determined in whole or in part by reference to the basis of the foreign stock received.

(2) *Hypothetical CAMT basis.* For purposes of paragraph (f)(1) of this section, the hypothetical CAMT basis in the stock of the foreign corporation received is the basis computed under section 358; however, for this purpose, the CAMT basis is used instead of the basis for regular tax purposes with respect to the property by reference to which the basis in the stock of the foreign corporation for regular tax purposes is determined in whole or in part.

(g) *AFSI adjustments when certain foreign stock is distributed by a partnership—(1) In general.* If a partnership distributes stock of a foreign corporation to a partner that is a related CAMT entity—

(i) If both—

(A) The basis for regular tax purposes in the distributed foreign stock to the related CAMT entity distributee under section 732(b) of the Code exceeds the basis for regular tax purposes in the foreign stock to the distributing partnership immediately before the distribution (distributee step-up amount); and

(B) The distributee step-up amount is greater than the amount, if any, the distributing partnership is required to decrease its basis for regular tax purposes in any remaining foreign stock held by the distributing partnership immediately after the distribution under section 734(b)(2)(B) of the Code (partnership basis decrease amount); then

(ii) The distributing partnership must increase its modified FSI for the taxable year of the distribution by any excess of the distributee step-up amount over the partnership basis decrease amount.

(2) *Related CAMT entity.* For purposes of paragraph (g)(1) of this section, a partner is a related CAMT entity if immediately prior to the distribution, the partner is related to the distributing partnership or any partner in the distributing partnership within the

meaning of section 267(b) or 707(b)(1) of the Code, without regard to section 267(c)(3) of the Code.

(h) *Examples.* The following examples illustrate the application of this section. For purposes of these examples, all entities have a functional currency of the U.S. dollar, each entity uses the calendar year as its taxable year and for AFS purposes, and no covered asset transaction in which stock of a foreign corporation is received is described in paragraph (f) of this section.

(1) *Example 1: Dividend received from a foreign corporation—(i) Facts.* X is a domestic corporation that owns all the stock of FC, a controlled foreign corporation. FC distributes \$100x of earnings and profits described in section 959(c)(3) of the Code to X, and, with respect to the dividend, X qualifies for a \$100x dividends-received deduction under section 245A of the Code. The \$100x dividend received by X does not result in any item of income, expense, gain, or loss being reflected in the FSI of X.

(ii) *Analysis.* Under paragraph (c)(1)(i) of this section, no adjustment is required to the AFSI of X because the \$100x dividend received from FC does not result in any item of income, expense, gain, or loss being reflected in the FSI of X. Under paragraph (c)(1)(ii) of this section, the AFSI of X is adjusted to include the \$100x dividend recognized by X for regular tax purposes. Furthermore, under paragraph (c)(1)(ii) of this section, the AFSI of X is also adjusted to include the \$100x dividends-received deduction under section 245A.

(2) *Example 2: Stock of a foreign corporation owned by a partnership—(i) Facts.* The facts are the same as in paragraph (h)(1)(i) of this section (*Example 1*), except that all the stock of FC is owned by PRS, a partnership in which X is a partner, X is not a United States shareholder with respect to FC, FC makes a distribution of earnings and profits described in section 959(c)(3) to PRS, the \$100x dividend received by PRS does not result in any item of income, expense, gain, or loss being reflected in the FSI of PRS, and X is allocated \$9x of the dividend income for regular tax purposes.

(ii) *Analysis.* Under paragraph (c)(1)(i) of this section, no adjustment to AFSI is required because the \$100x dividend received from FC does not result in any item of income, expense, gain, or loss being reflected in the FSI of PRS. Under § 1.56A–5(e)(3) and (e)(4)(i), the AFSI adjustment provided in paragraph (c)(1)(ii) of this section is not taken into account by PRS in determining its modified FSI and instead the AFSI

adjustment resulting from the dividend is separately stated to the partners. Under paragraph (e) of this section, X's AFSI is increased by \$9x, the amount of the dividend received by PRS that is reported to X for regular tax purposes. Under § 1.56A–5(j)(3)(v), X's CAMT basis in its partnership investment in PRS is increased by \$9x.

(3) *Example 3: Sale of stock of a foreign corporation—(i) Facts.* The facts are the same as in paragraph (h)(1)(i) of this section (*Example 1*), except that FC does not make a distribution and instead X sells all the stock of FC. As a result of the sale, for regular tax purposes, X recognizes \$200x of gain, of which \$100x is recharacterized as a dividend under section 1248 of the Code. X qualifies for (and claims) a \$100x dividends-received deduction under section 245A (see section 1248(j)). X's sale of the stock of FC results in \$150x of gain being reflected in the FSI of X.

(ii) *Analysis.* Under paragraph (c)(1)(i) of this section, the AFSI of X is adjusted to disregard the \$150x of gain reflected in the FSI of X. Under paragraph (c)(1)(ii) of this section, the AFSI of X is adjusted to include the \$100x dividend and \$100x gain recognized by X for regular tax purposes and to include the \$100x dividends-received deduction under section 245A.

(4) *Example 4: Foreign corporation reported on equity method—(i) Facts.* X is a domestic corporation that owns 30% of the single class of stock of FC, a foreign corporation that is not a controlled foreign corporation or a passive foreign investment company (within the meaning of section 1297 of the Code). X reflects FC's income, expense, gain, and loss in X's FSI using the equity method. FC earns \$100x of operating income, \$30x of which is reflected in X's FSI under the equity method.

(ii) *Analysis.* Under paragraph (c)(1)(i) of this section, the AFSI of X is adjusted to disregard the \$30x of FC income reflected in the FSI of X under the equity method. Under paragraph (c)(1)(ii) of this section, there is no adjustment to the AFSI of X.

(5) *Example 5: Section 351 transfer—(i) Facts.* FC1, a foreign corporation, holds stock of a domestic corporation (DC stock) with a basis of \$10x for regular tax purposes, CAMT basis of \$12x, and fair market value of \$15x. FC1 transfers DC stock to FC2, a foreign corporation, solely in exchange for stock of FC2 in an exchange described in section 351(a) of the Code. FC1 reflects \$3x of gain in FSI as a result of the transfer of DC stock to FC2.

(ii) *Analysis.* The transfer of DC stock is a covered asset transaction described in paragraph (b)(1)(i)(C) of this section. Under paragraph (c)(2)(i) of this section, FC1's AFSI is adjusted to disregard the \$3x of gain reflected in its FSI. Under paragraph (c)(2)(ii) of this section, FC1 will not include any gain in its AFSI as a result of the transfer of DC stock because for regular tax purposes, under section 351(a), FC1 does not recognize any gain as a result of the transfer of DC stock. For regular tax purposes, under section 358, FC1's basis in the stock of FC2 received in the exchange is \$10x, which is the amount equal to FC1's \$10x basis in DC stock for regular tax purposes. Under paragraph (d)(5) of this section, FC1's CAMT basis in the stock of FC2 is also \$10x. Upon a subsequent disposition of the stock of FC2, the AFSI consequences to FC1 will be determined under paragraph (c)(1)(ii) of this section by reference to FC1's basis in the stock of FC2 for regular tax purposes. Under paragraph (d)(1)(iii) of this section, FC2's CAMT basis in DC stock is \$12x, which is the amount equal to FC1's \$12x CAMT basis in DC stock.

(6) *Example 6: Section 351 transfer with boot*—(i) *Facts.* FC1, a foreign corporation, holds an asset other than stock of a corporation (Asset A) with a basis of \$10x for regular tax purposes, CAMT basis of \$12x, and fair market value of \$15x. FC1 transfers Asset A to FC2, a foreign corporation, in exchange for stock of FC2 with a fair market value of \$5x and cash of \$10x. FC1 reflects \$3x of gain in FSI as a result of the transfer of Asset A to FC2.

(ii) *Analysis.* The transfer of Asset A is a covered asset transaction described in paragraph (b)(1)(i)(C) of this section. Under paragraph (c)(2)(i) of this section, FC1's AFSI is adjusted to disregard the \$3x of gain reflected in its FSI as a result of the transfer of Asset A. Under paragraph (c)(2)(ii) of this section, as a result of the transfer of Asset A, FC1's AFSI is adjusted to include gain of \$3x, which is the amount equal to the lesser of FC1's \$3x gain (the sum of \$5x fair market value of the stock of FC2 and \$10x of cash received, less FC1's \$12x CAMT basis in Asset A) and the \$10x of cash received. For regular tax purposes, under section 351(b) of the Code, FC1 recognizes gain of \$5x as a result of the transfer, which is the amount equal to the lesser of its \$5x gain (the sum of \$5x of fair market value of the stock of FC2 and \$10x of cash received, less FC1's \$10x basis in asset for regular tax purposes) and the \$10x of cash received. For regular tax purposes, under section 358, FC1's basis in the stock of FC2 is \$5x, which is equal to its \$10x basis in Asset A for

regular tax purposes, decreased by the \$10x of cash received, and increased by the \$5x of gain recognized for regular tax purposes. Under paragraph (d)(5) of this section, FC1's CAMT basis in the stock of FC2 is also \$5x. Upon a subsequent disposition of the stock of FC2, the AFSI consequences to FC1 will be determined under paragraph (c)(1)(ii) of this section by reference to FC1's basis in the stock of FC2 for regular tax purposes. Under paragraph (d)(1)(iii) of this section, FC2's CAMT basis in Asset A is \$15x, which is the amount equal to FC1's \$12x CAMT basis in Asset A, increased by the \$3x of gain included in FC1's AFSI.

(7) *Example 7: Transfer subject to section 367(a)*—(i) *Facts.* X, a domestic corporation, holds an asset which is not stock or securities in a corporation or intangible property within the meaning of section 367(d)(4) of the Code (Asset A), with basis of \$10x for regular tax purposes, CAMT basis of \$12x, and fair market value of \$15x. X transfers Asset A to FC, a foreign corporation, solely in exchange for stock of FC in an exchange described in section 351(a). X reflects \$3x of gain in FSI as a result of the transfer of Asset A to FC.

(ii) *Analysis.* The transfer of Asset A is a covered asset transaction described in paragraph (b)(1)(i)(C) of this section. Under paragraph (c)(2)(i) of this section, X's AFSI is adjusted to disregard the \$3x of gain reflected in its FSI as a result of the transfer of Asset A. Because section 367(a) of the Code applies to the transfer of Asset A, under paragraph (c)(2)(ii) of this section, X's AFSI is adjusted to include gain of \$3x as a result of the transfer (\$15x fair market value of Asset X less \$12x CAMT basis in Asset A). For regular tax purposes, because section 367(a) applies to the transfer of Asset A, X recognizes gain of \$5x (\$15x fair market value of Asset A less \$10x basis in Asset A for regular tax purposes). For regular tax purposes, X's basis in the stock of FC is \$15x, which is equal to its \$10x basis in Asset A for regular tax purposes, increased by the \$5x of gain recognized for regular tax purposes under section 367(a). Under paragraph (d)(5) of this section, X's CAMT basis in the stock of FC is also \$15x. Upon a subsequent disposition of the stock of FC, the AFSI consequences to X will be determined under paragraph (c)(1)(ii) of this section by reference to X's basis in the stock of FC for regular tax purposes. Under paragraph (d)(1)(iii) of this section, FC's CAMT basis in Asset A is \$15x, which is the amount equal to X's \$12x CAMT basis in Asset A, increased by the \$3x of gain included in FC's AFSI.

(8) *Example 8: Inbound liquidation subject to section 367(b)*—(i) *Facts.* X, a domestic corporation, owns all the stock of FC, a controlled foreign corporation. FC owns a single asset which is not stock or securities of a corporation (Asset A), with basis of \$10x for regular tax purposes, CAMT basis of \$12x, and fair market value of \$15x. Pursuant to a complete liquidation described in sections 332 and 337, FC transfers Asset A to X (FC liquidation). FC has earnings and profits of \$15x, none of which are either previously taxed earnings and profits or earnings and profits (or deficit in earnings and profits) effectively connected with the conduct of a trade or business within the United States (or attributable to a permanent establishment in the United States, in the context of an applicable United States income tax treaty). X's all earnings and profits amount (within the meaning of § 1.367(b)–2(d)(1)) with respect to the stock of FC is \$10x. As a result of the FC liquidation, under § 1.367(b)–3(b)(3)(i), X includes in income a deemed dividend of \$10x. Furthermore, under § 1.367(b)–3(f)(1), no earnings and profits of FC carryover to X under section 381(c)(2) of the Code. FC reflects \$3x of gain in FSI as a result of the transfer of Asset A to X in the FC liquidation, and X reflects \$3x of gain in FSI as a result of the FC liquidation.

(ii) *Analysis.* The FC liquidation is a covered asset transaction described in paragraph (b)(1)(i)(B) of this section. Under paragraph (c)(1)(i) of this section, X's AFSI is adjusted to disregard the \$3x of gain reflected in its FSI as a result of the FC liquidation. Under paragraph (c)(1)(ii) of this section, X's AFSI is adjusted to include the \$10x deemed dividend recognized by X for regular tax purposes. Furthermore, under paragraph (c)(1)(ii) of this section, if X is eligible for the section 245A dividends-received deduction with respect to the deemed dividend, the AFSI of X is also adjusted to include the section 245A dividends-received deduction. Under paragraph (c)(2)(i) of this section, FC's AFSI is adjusted to disregard the \$3x of gain reflected in its FSI as a result of the transfer of Asset A in the FC liquidation. There is no adjustment to FC's AFSI under paragraph (c)(2)(ii) of this section. Under paragraph (d)(1)(ii) of this section, X's CAMT basis in Asset A is \$12x, which is the amount equal to FC's CAMT basis in Asset A. Under § 1.56A–18(c)(7)(i), none of FC's earnings and profits are carried over to X for purposes of determining X's CAMT retained earnings, because none of FC's earnings and profits carryover to X under section 381(c)(2) for regular tax purposes.

(i) *Applicability date*—(1) *In general.* Except as provided in paragraph (i)(2) of this section, this section applies to taxable years of CAMT entities ending after September 13, 2024.

(2) *Rule for transfers.* In the case of rules in this section that apply to transfers, those rules are applicable to transfers occurring after September 13, 2024.

§ 1.56A–5 AFSI adjustments to partner's distributive share of partnership AFSI.

(a) *Overview.* This section provides rules under section 56A(c)(2)(D) of the Code for determining a CAMT entity's AFSI adjustment for its distributive share of AFSI with respect to a partnership investment (that is, a CAMT entity's interest in a partnership). Paragraph (b) of this section provides the general rule regarding adjustments to a CAMT entity's AFSI with respect to its partnership investment. Paragraph (c) of this section describes the applicable method used to adjust a CAMT entity's AFSI with respect to its partnership investment. Paragraph (d) of this section provides rules regarding items reflected in a CAMT entity's FSI with respect to a partnership investment that are not disregarded for AFSI purposes under the applicable method. Paragraph (e) of this section describes how a distributive share amount is determined under the applicable method. Paragraph (f) of this section describes how the applicable method is applied in tiered partnerships. Paragraph (g) of this section provides rules for determining the taxable year in which the CAMT entity includes the distributive share amount in AFSI if the CAMT entity and the partnership have different taxable years. Paragraph (h) of this section describes reporting and filing requirements for a CAMT entity that is a partner in a partnership. Paragraph (i) of this section lists reporting and filing requirements for partnerships with CAMT entities as partners. Paragraph (j) of this section provides rules limiting the use of a CAMT entity's distributive share amount. Paragraph (k) of this section provides examples illustrating the application of the rules in this section. Paragraph (l) of this section provides the applicability date of this section.

(b) *In general.* If a CAMT entity is a partner in a partnership, the CAMT entity's AFSI with respect to its partnership investment is adjusted as required under the applicable method described in paragraph (c) of this section and the rules in § 1.56A–20, regardless of the method the CAMT entity uses to account for its partnership investment for AFS purposes.

(c) *Applicable method.* Under the *applicable method*, a CAMT entity's AFSI with respect to its partnership investment—

(1) First, except for the amounts described in paragraph (d) of this section, is adjusted to disregard any amount the CAMT entity reflects in its FSI with respect to its partnership investment for the taxable year (for example, changes in the fair value of the partnership investment that are reflected in the CAMT entity's FSI under the fair value method, or the CAMT entity's share of the partnership's earnings that are reflected in the CAMT entity's FSI under the equity method);

(2) Second, is adjusted to include the CAMT entity's distributive share amount for the taxable year as computed under paragraph (e) of this section (except for paragraph (e)(5) of this section), taking into account paragraphs (f), (g) and (j) of this section; and

(3) Third, to the extent applicable, is adjusted as required under paragraph (e)(5) of this section.

(d) *FSI amounts with respect to a partnership investment that are not disregarded under paragraph (c)(1) of this section.* For purposes of paragraph (c)(1) of this section, a CAMT entity's AFSI with respect to its partnership investment is not adjusted to disregard any FSI amounts attributable to a transfer, sale or exchange, contribution, distribution, dilution, deconsolidation, change in ownership, or any other transaction between any partners (including the CAMT entity) of a partnership and the partnership, or between any partners of the partnership (including the CAMT entity), that are not derived from, and included in, the partnership's FSI. However, these FSI amounts may be subject to modification or redetermination for AFSI purposes under §§ 1.56A–1(d)(4) and 1.56A–20.

(e) *Distributive share amount*—(1) *In general.* Except as provided in paragraph (e)(6) of this section, for purposes of this section, the *distributive share amount* of a CAMT entity that is a partner in a partnership is computed by—

(i) The CAMT entity determining its distributive share percentage in accordance with paragraph (e)(2) of this section;

(ii) The partnership determining its modified FSI in accordance with paragraph (e)(3) of this section;

(iii) The CAMT entity multiplying its distributive share percentage by the modified FSI of the partnership; and

(iv) The CAMT entity adjusting the amount determined under paragraph (e)(1)(iii) of this section in accordance with paragraph (e)(4)(ii) of this section.

(2) *Computing the distributive share percentage.* The *distributive share percentage* is a fraction, the numerator of which is the FSI amount that is disregarded by a CAMT entity under paragraph (c)(1) of this section, redetermined based on the partnership's taxable year if the taxable year of the partnership and the CAMT entity are different, and the denominator of which is:

(i) In the case of a CAMT entity, other than a CAMT entity described in paragraph (e)(2)(ii), (iii), (iv) or (v) of this section, and a partnership that are members of the same financial statement group, or in the case of a CAMT entity that uses the equity method to account for its partnership investment, 100 percent of the partnership's FSI for the partnership's taxable year.

(ii) In the case of a CAMT entity that uses the fair value method to account for its partnership investment, the total change in the fair value of the partnership during the partnership's taxable year, as determined by the CAMT entity for purposes of determining the CAMT entity's share of the total change in its AFS.

(iii) In the case of a CAMT entity that treats its partnership investment as other than an equity investment for AFS purposes (for example, as debt) (AFS non-partner), 100 percent of the partnership's FSI for the partnership's taxable year plus the FSI amount included in the numerator for the CAMT entity under this paragraph (e)(2) for the taxable year.

(iv) In the case of a CAMT entity that treats itself as owning 100 percent of the equity in the partnership for AFS purposes because the CAMT entity treats all other partners in the partnership as AFS non-partners, 100 percent of the partnership's FSI for the partnership's taxable year plus the sum of any amounts reflected in the partnership's FSI that are treated as paid or accrued to the other partners for the partnership's taxable year.

(v) In the case of a CAMT entity that uses any other AFS method to account for its partnership investment, an amount determined under the principles of paragraphs (e)(2)(i) and (ii) of this section that is reasonable under the facts and circumstances and reflective of the proportionate amount of the partnership's FSI the CAMT entity is reporting for AFS purposes.

(3) *Computing the modified FSI of the partnership.* A partnership's modified FSI is equal to the partnership's FSI for the partnership's taxable year, adjusted for all relevant AFSI adjustments provided in the section 56A regulations

(that is, those AFSI adjustments that can apply to partnerships), except for the AFSI adjustments in §§ 1.56A–4(c)(1)(ii), 1.56A–15(d)(2)(ii) and (iv), and 1.56A–16(d)(2)(ii) and (iv). For purposes of determining a partnership's modified FSI, references to AFSI in other sections of the section 56A regulations (except for the references to AFSI in § 1.56A–1(b)(1)) are treated as references to modified FSI.

(4) *AFSI items that are separately stated*—(i) *In general.* The AFSI items described in §§ 1.56A–4(c)(1)(ii), 1.56A–6(c)(2)(iii), 1.56A–8(c), 1.56A–15(d)(2)(ii) and (iv), and (e)(3)(iii) and (iv), 1.56A–16(d)(2)(ii) and (iv), and (e)(3)(iii) and (iv), 1.56A–20(d)(1)(ii), and 1.56A–21(e)(2)(iii) are separately stated to the partners in the partnership that are CAMT entities (CAMT entity partners) and taken into account by the CAMT entity partners in the manner provided in paragraphs (e)(4)(ii) and (iii) of this section, as applicable.

(ii) *Adjustments to a partner's distributive share amount.* The following separately stated AFSI items are taken into account as adjustments to a CAMT entity partner's distributive share amount of a partnership's modified FSI as provided in paragraph (e)(1)(iv) of this section:

(A) A CAMT entity partner's distributive share of the AFSI items described in §§ 1.56A–15(d)(2)(ii) and (iv) and 1.56A–16(d)(2)(ii) and (iv), which is equal to the CAMT entity partner's distributive share of the items for regular tax purposes for the taxable year;

(B) A CAMT entity partner's distributive share of the AFSI items described in §§ 1.56A–15(e)(3)(iii) and (iv) and 1.56A–16(e)(3)(iii) and (iv), as provided under §§ 1.56A–15(e)(3)(iii) and (iv) and 1.56A–16(e)(3)(iii) and (iv); and

(C) A CAMT entity partner's distributive share of the AFSI items described in § 1.56A–20(d)(1)(ii), which is equal to the CAMT entity partner's allocable share of the items as provided in § 1.56A–20(d)(2)(i) for the taxable year, taking into account any acceleration event described in § 1.56A–20(d)(1)(iii) and (d)(2)(ii).

(iii) *Adjustments to a partner's AFSI.* The separately stated AFSI items described in §§ 1.56A–4(c)(1)(ii), 1.56A–6(c)(2)(iii), 1.56A–8(c), and 1.56A–21(e)(2)(iii) are not taken into account in determining a CAMT entity partner's distributive share amount, and instead are taken into account in determining a CAMT entity partner's AFSI as follows:

(A) The CAMT entity partner takes into account the AFSI items described in § 1.56A–4(c)(1)(ii) that are separately

stated to the CAMT entity partner, as provided under § 1.56A–4(e);

(B) The CAMT entity partner takes into account the AFSI items described in § 1.56A–6(c)(2)(iii) that are separately stated to the CAMT entity partner, as provided under § 1.56A–6(c)(2)(iv);

(C) The CAMT entity partner takes into account the AFSI items described in § 1.56A–8(c) that are separately stated to the CAMT entity partner, as provided under § 1.56A–8(c); and

(D) The CAMT entity partner takes into account the AFSI item described in § 1.56A–21(e)(2)(iii) that is separately stated to the CAMT entity partner, as provided under § 1.56A–21(e)(2)(ii).

(5) *Effect of equity method basis adjustments to a CAMT entity's FSI.* If a CAMT entity partner includes in its FSI any amortization of an equity method basis adjustment with respect to the partnership investment that is attributable to section 168 property or qualified wireless spectrum held by the partnership, and if the CAMT entity partner has a basis adjustment under section 743(b) of the Code with respect to the same property that affects the CAMT entity partner's distributive share amount, then the CAMT entity partner adjusts its AFSI to disregard any such FSI amortization.

(6) *Computing a partner's distributive share amount when the partnership's AFSI is its Federal income tax return*—

(i) *In general.* If a partnership treats as its AFSI the partnership's Federal income tax return under § 1.56A–2(c)(6), a CAMT entity partner's distributive share amount with respect to the partnership for a taxable year is equal to the amount of the CAMT entity partner's FSI that the partner disregards under paragraph (c)(1) of this section for the taxable year (except for any items described in §§ 1.56A–4(c)(1)(i) and 1.56A–8(b) that would otherwise be reflected in such amount).

(ii) *Separately stated AFSI items.* If a CAMT entity partner determines its distributive share amount in accordance with paragraph (e)(6)(i) of this section, paragraphs (e)(4)(iii)(A) through (C) of this section apply to determine the CAMT entity partner's AFSI, but paragraph (e)(4)(iii)(D) of this section does not apply.

(f) *Computation in the case of tiered partnerships.* If a CAMT entity is a partner in a partnership (UTP) that directly or indirectly owns an investment in a lower-tier partnership (LTP), each partnership, starting with the lowest-tier partnership and going in order up the tiered-partnership chain, applies the rules and principles of paragraphs (b) through (e) of this section to determine the distributive share

amounts of each CAMT entity partner in the tiered-partnership chain.

(g) *Taxable year.* The distributive share amount that is required to be included in a CAMT entity's AFSI for a taxable year of the CAMT entity under paragraph (c)(2) of this section with respect to the CAMT entity's partnership investment is based on the modified FSI of the partnership for any taxable year of the partnership ending with or within the taxable year of the CAMT entity.

(h) *Reporting and filing requirements for a CAMT entity that is a partner in a partnership*—(1) *In general.* If a CAMT entity is a partner in a partnership, and if the CAMT entity cannot determine its distributive share of the partnership's AFSI without receiving certain information from the partnership, the CAMT entity must request such information from that partnership by the 30th day after the close of the taxable year of the partnership to which the information request relates, except as provided in paragraph (i)(2)(iii) of this section. The CAMT entity must maintain the information, and requests made for the information, in its books and records. After the first taxable year in which the CAMT entity requests information from the partnership, the partnership must continue to provide the information to the CAMT entity each subsequent taxable year of the partnership unless the partnership receives written notification from the CAMT entity that the information is not required.

(2) *Failure to obtain information*—(i) *In general.* If a partnership fails to furnish the information requested by a CAMT entity that is a partner in the partnership under paragraph (h)(1) of this section, the CAMT entity must determine its distributive share amount with respect to the partnership investment by making a required good-faith estimate in accordance with paragraph (h)(2)(ii) of this section.

(ii) *Required estimate.* If a CAMT entity is required to estimate its distributive share amount under paragraph (h)(2)(i) of this section with respect to a partnership investment, it must base its estimate on whatever information it can reasonably obtain, if received before the expiration of the period of limitations under section 6501 of the Code, and it must continue to use its best efforts to obtain the requested information from the partnership. Except as provided in paragraph (h)(2)(iii)(B) of this section, once the CAMT entity receives the information from the partnership, the CAMT entity (if not also an applicable corporation) should report the information to its

partners, including any UTP (which would then report the information to its partners), until the information is received by an applicable corporation. A partnership that fails to furnish the required information may be subject to penalties and adjustment in accordance with paragraph (i)(6) of this section.

(iii) *Partnerships subject to subchapter C of chapter 63 of the Code*—(A) *Required estimate.* If a partnership is subject to the centralized partnership audit regime in subchapter C of chapter 63 of the Code (BBA partnership), a CAMT entity that is a partner in the partnership must file a notice of inconsistent treatment in accordance with section 6222 of the Code if making the required estimate requires the CAMT entity to treat a partnership-related item, as defined in § 301.6241–1(a)(6)(ii) of this chapter, inconsistently with how the partnership treated the partnership-related item on its partnership return.

(B) *Information obtained after the filing of the partnership return.* If a BBA partnership previously filed its partnership return for the taxable year, and if the due date for filing the partnership return has passed, the BBA partnership must file an administrative adjustment request (AAR) in accordance with section 6227 of the Code in order to adjust any partnership-related items, including as part of furnishing information to a CAMT entity that is a partner in a partnership. Any such adjustment is determined and taken into account in accordance with section 6227 and the regulations.

(i) *Reporting and filing requirements for partnerships in which a CAMT entity is a partner*—(1) *Requirement to file information with the IRS and to furnish information to a CAMT entity.* If a CAMT entity that is a partner in a partnership requests information from the partnership in accordance with paragraph (h) of this section, the partnership must file such information with the IRS as the Commissioner may require in forms, instructions, or other guidance for the Commissioner to determine that the partnership and its partners have complied with the rules of this section. The partnership also must furnish the information to the CAMT entity in such manner as the Commissioner may require in forms, instructions, or other guidance. This information includes—

(i) Information necessary to determine the denominator for the distributive share percentage under paragraph (e)(2) of this section;

(ii) The partnership's modified FSI as determined under paragraph (e)(3) of this section;

(iii) Information required for the CAMT entity to make the adjustments provided in paragraph (e)(4) of this section;

(iv) If the CAMT entity is a United States shareholder, information required for the CAMT entity to make the adjustments provided in § 1.56A–6(b); and

(v) If the CAMT entity is a controlled foreign corporation, information required for the United States shareholders of the controlled foreign corporation to make the adjustments provided in § 1.56A–6(b).

(2) *Special rules for tiered structures*—(i) *Requirement to request information.* If a UTP requires information from an LTP to meet the UTP's reporting and filing requirements under this section (including any information required to be furnished under paragraph (i)(1) of this section to a CAMT entity that is a partner in UTP), the UTP must request the information from the LTP.

(ii) *Requirement to furnish and file information.* If information is requested from an LTP under paragraph (i)(2)(i) of this section, the LTP must file the information with the IRS and must furnish the information to the UTP as required under paragraph (i)(1) of this section.

(iii) *Timing of requesting information.* A UTP described in paragraph (i)(2)(i) of this section must request any necessary information by the later of—

(A) The 30th day after the close of the taxable year of the partnership to which the information request relates; or

(B) 14 days after the date the UTP receives a request for the information from another UTP.

(3) *Timing of furnishing information*—(i) *In general.* Except as provided in paragraph (i)(3)(ii) of this section, requested information must be furnished by the date on which the partnership is required to furnish information under section 6031(b) of the Code.

(ii) *Late requests.* Except as provided in paragraph (h)(2)(iii)(B) of this section, information with respect to a taxable year that is requested by a UTP after the date that is 14 days prior to the due date for an LTP to furnish and file information under section 6031(b) must be furnished and filed in the time and manner prescribed by forms, instructions, or other guidance.

(iii) *Partnership not required to furnish information to a CAMT entity until it has notice of a request.* A partnership is not required to furnish information to a CAMT entity that is a partner in the partnership under this paragraph (i)(3)(iii) until it has notice of

a request. For purposes of this paragraph (i)(3)(iii), a partnership has notice of a request when—

(A) The partnership has received a request in the manner described in paragraph (h)(1) of this section from the CAMT entity; or

(B) The partnership has an obligation to continue providing information to a CAMT entity partner under paragraph (h)(1) of this section due to a request made by the CAMT entity in a prior taxable year.

(4) *Manner of furnishing information.* Information may be furnished in any written manner, including electronically, that is agreed to by the parties.

(5) *Recordkeeping requirement.* Any partnership receiving a request for information must retain a copy of the request and calculations related to distributive share amounts, and the date the request was received, in its books and records.

(6) *Penalties.* The information required to be furnished under this paragraph (i) also is required to be furnished under section 6031(b). See also section 6722 of the Code.

(j) *Limitation on allowance of negative distributive share amount*—(1) *In general.* If a CAMT entity's distributive share amount (as determined under paragraph (e) of this section) with respect to a partnership investment is negative for a taxable year, the CAMT entity includes the negative distributive share amount in its AFSI for the taxable year only to the extent the negative distributive share amount does not exceed the CAMT entity's CAMT basis in its partnership investment (as determined under paragraph (j)(3) of this section) at the end of the partnership taxable year in which the negative distributive share amount occurred. Ordering rules similar to the rules in § 1.704–1(d)(2) apply in computing a CAMT entity's CAMT basis in its partnership investment for purposes of applying the rules in this section.

(2) *Carryover of suspended negative distributive share amount.* Any negative distributive share amount that is not allowed for a taxable year under paragraph (j)(1) of this section is included in determining the CAMT entity's distributive share amount (as determined under paragraph (e) of this section) in the succeeding taxable year, subject to the limitation provided in paragraph (j)(1) of this section.

(3) *CAMT basis in a partnership investment.* For purposes of the section 56A regulations, a CAMT entity's CAMT basis in its partnership investment is equal to the CAMT entity's AFS basis in

the partnership investment as of the first day of the partnership's first taxable year ending after December 31, 2019, in which the CAMT entity held its interest in the partnership, adjusted for the following items for each taxable year of the partnership ending after December 31, 2019 (but not adjusted below zero), as applicable—

(i) Include any amounts reflected in the AFS basis of the CAMT entity's partnership investment that are not derived from, and included in, the partnership's FSI (for example, amounts described in paragraph (d) of this section);

(ii) Increase by the CAMT entity's distributive share amount included in its AFSI, if the distributive share amount is positive;

(iii) Decrease by the CAMT entity's distributive share amount included in its AFSI, if the distributive share amount is negative;

(iv) Increase or decrease, as appropriate, to take into account the treatment of contributions of property by the CAMT entity under § 1.56A–20(c)(3)(ii);

(v) Increase or decrease, as appropriate, to take into account any adjustments that are separately stated under paragraph (e)(4)(iii) of this section and made to the basis in the CAMT entity's partnership investment for regular tax purposes under section 705 of the Code;

(vi) Decrease to take into account any adjustments made to the basis in the CAMT entity's partnership investment for regular tax purposes under § 1.1017–1(g)(2) in accordance with § 1.56A–21(e);

(vii) Increase or decrease, as appropriate, to take into account any adjustments made to the basis in the CAMT entity's partnership investment for regular tax purposes under section 961(a) or (b) of the Code;

(viii) Decrease to take into account any adjustments made to the basis in the CAMT entity's partnership investment for regular tax purposes under section 50(c)(5) of the Code;

(ix) Exclude any FSI amortization disallowed in the calculation of the CAMT entity's AFSI under paragraph (e)(5) of this section;

(x) Increase to take into account any adjustments described in § 1.56A–21(e) that are separately stated to the CAMT entity under paragraph (e)(4)(iii) of this section;

(xi) Exclude any amounts that are included in the AFS basis of the CAMT entity's partnership investment as a result of a contribution of stock of a foreign corporation and increase to take into account any adjustments made to

the basis in the CAMT entity's partnership investment for regular tax purposes under section 722 of the Code resulting from a contribution of stock of a foreign corporation; and

(xii) Include any amounts that are excluded from the AFS basis of the CAMT entity's partnership investment as a result of a non-liquidating distribution of stock of a foreign corporation and decrease to take into account any adjustments made to the basis of the CAMT entity's partnership investment for regular tax purposes under section 733 of the Code resulting from a non-liquidating distribution of stock of a foreign corporation.

(k) *Examples.* The following examples illustrate the application of the rules in this section.

(1) *Example 1: Adjustment of AFSI with respect to a partnership investment accounted for using the equity method—(i) Facts.* PRS1 is a partnership, X is a corporation, and A is an individual. PRS1 is owned by X and A. PRS1 and X have the same tax and AFS years, and both use the calendar year as its taxable year and for AFS purposes. For 2024, X has FSI of \$250x, consisting of \$200x from its direct operations and \$50x from its investment in PRS1, which it accounts for under the equity method. Also, for 2024, PRS1 has \$100x of FSI which includes \$20x of income from a covered benefit plan and \$10x of covered book depreciation expense, as defined in § 1.56A–15(b)(3). For regular tax purposes, the \$20x of income from the covered benefit plan is excludable from gross income and the \$10x of covered book depreciation expense is equal to deductible tax depreciation, as defined in § 1.56A–15(b)(5), with respect to section 168 property. Under the equity method, X includes 50% of PRS1's FSI for 2024 on its AFS.

(ii) *Analysis.* The following steps are used to compute X's distributive share amount from PRS1 for 2024:

(A) *Step 1: Disregard FSI amount with respect to partnership investment for the taxable year.* Under paragraph (c)(1) of this section, X disregards the \$50x of FSI it includes on its AFS with respect to its investment in PRS1 for 2024.

(B) *Step 2: Calculate the distributive share percentage.* Under paragraph (e)(2)(i) of this section, X must compute a fraction, the numerator of which is \$50x (the amount disregarded under paragraph (c)(1) of this section) and the denominator of which is \$100x (100% of PRS1's FSI for 2024). The resulting distributive share percentage is 50% (\$50x/\$100x).

(C) *Step 3: Compute the modified FSI of the partnership.* Under paragraph

(e)(3) of this section, PRS1's FSI of \$100x must be adjusted under § 1.56A–13(b) to disregard the \$20x of income from the covered benefit plan within the meaning § 1.56A–13(c)(1) that was included for AFS purposes, and to include none of the gross income from the covered benefit plan since it was all excluded from gross income for regular tax purposes. PRS1's FSI must also be adjusted to disregard the covered book depreciation expense, or \$10x, under § 1.56A–15(d)(1)(iii), and reduced by the deductible tax depreciation, or \$10x, under § 1.56A–15(d)(1)(ii). Accordingly, PRS1's modified FSI is \$80x (\$100x – \$20x + \$10x – \$10x).

(D) *Step 4: Multiply the distributive share percentage by the modified FSI of the partnership.* Under paragraph (e)(1)(iii) of this section, X must multiply its distributive share percentage (50%) by the modified FSI of PRS1, or \$80x, resulting in \$40x of modified FSI for X.

(E) *Step 5: Adjust the share of modified FSI by separately stated adjustments.* Under paragraphs (e)(1)(iv) and (e)(4) of this section, X must adjust its share of PRS1's modified FSI by any separately stated amounts listed in paragraph (e)(4)(ii) of this section. Because there are none, X's distributive share amount of PRS1's AFSI for 2024 is \$40x.

(F) *Step 6: Include distributive share amount in AFSI.* Under paragraph (c)(2) of this section, X includes in its AFSI the \$40x distributive share amount from PRS1. Thus, after reducing X's AFSI from \$250x to \$200x (Step 1), it is increased to \$240x for 2024.

(2) *Example 2: Adjustment of AFSI with respect to a partnership investment accounted for using the hypothetical liquidation at book value under the equity method—(i) Facts.* PRS1 is a partnership, X is a corporation, and A is an individual. PRS1 is owned by X and A. PRS1 and X have the same tax and AFS years. For 2024, X has FSI of \$250x, consisting of \$190x from its direct operations and \$60x from its investment in PRS1, which it accounts for under the hypothetical liquidation at book value method under the equity method. Also, for 2024, PRS1 has \$100x of FSI which includes \$20x of income from a covered benefit plan and \$10x of covered book depreciation expense, as defined in § 1.56A–15(b)(3). For regular tax purposes, the \$20x of income from the covered benefit plan is excludable from gross income and the \$10x of covered book depreciation expense is equal to deductible tax depreciation, as defined in § 1.56A–15(b)(5), with respect to section 168 property.

(ii) *Analysis.* The following steps are used to compute X's distributive share amount from PRS1 for 2024:

(A) *Step 1: Disregard FSI amount with respect to partnership investment for the taxable year.* Under paragraph (c)(1) of this section, X disregards the \$60x of FSI it includes on its AFS with respect to its investment in PRS1 for 2024.

(B) *Step 2: Calculate the distributive share percentage.* Under paragraph (e)(2)(i) of this section, X must compute a fraction, the numerator of which is \$60x (the amount disregarded under paragraph (c)(1) of this section) and the denominator of which is \$100x (100% of PRS1's FSI for 2024). The resulting distributive share percentage is 60% (\$60x/\$100x).

(C) *Step 3: Compute the modified FSI of the partnership.* Under paragraph (e)(3) of this section, PRS1's FSI of \$100x must be adjusted under § 1.56A-13(b) to disregard the \$20x of income from the covered benefit plan within the meaning § 1.56A-13(c)(1) that was included for AFS purposes, and to include none of the gross income from the covered benefit plan since it was all excluded from gross income for regular tax purposes. PRS1's FSI must also be adjusted to disregard the covered book depreciation expense, or \$10x, under § 1.56A-15(d)(1)(iii) and reduced by the deductible tax depreciation, or \$10x, under § 1.56A-15(d)(1)(ii). Accordingly, PRS1's modified FSI is \$80x (\$100x - \$20x + \$10x - \$10x).

(D) *Step 4: Multiply the distributive share percentage by the modified FSI of the partnership.* Under paragraph (e)(1)(iii) of this section, X must multiply its distributive share percentage (60%) by the modified FSI of PRS1, or \$80x, resulting in \$48x of modified FSI for X.

(E) *Step 5: Adjust the share of modified FSI by separately stated adjustments.* Under paragraphs (e)(1)(iv) and (e)(4) of this section, X must adjust its share of PRS1's modified FSI by any separately stated amounts listed in paragraph (e)(4)(ii) of this section. Because there are none, X's distributive share amount of PRS1's AFSI for 2024 is \$48x.

(F) *Step 6: Include distributive share amount in AFSI.* Under paragraph (c)(2) of this section, X includes in its AFSI the \$48x distributive share amount from PRS1. Thus, after reducing X's AFSI from \$250x to \$190x (Step 1), it is increased to \$238x for 2024.

(3) *Example 3: Adjustment of AFSI with respect to a partnership investment accounted for using the hypothetical liquidation at book value under the equity method and involving a loss on the investment—(i) Facts.* PRS1 is

owned by X, a corporation and a tax-equity investor in PRS, and A, an individual developer. For 2024, X has FSI of \$50x, consisting of \$200x of income from its direct operations and \$150x of loss from its investment in PRS1, which it accounts for under the hypothetical liquidation at book value method under the equity method. Also, for 2024, PRS1 has - \$100x of FSI which includes \$20x of income from a covered benefit plan and \$10x of covered book depreciation expense, as defined in § 1.56A-15(b)(3). For regular tax purposes, the \$20x of income from the covered benefit plan is excludable from gross income and the \$10x of covered book depreciation expense is deductible tax depreciation, as defined in § 1.56A-15(b)(5), with respect to section 168 property.

(ii) *Analysis.* The following steps are used to compute X's distributive share amount from PRS1 for 2024:

(A) *Step 1: Disregard FSI amount with respect to partnership investment for the taxable year.* Under paragraph (c)(1) of this section, X disregards the - \$150x of FSI it includes on its AFS with respect to its investment in PRS1 for 2024.

(B) *Step 2: Calculate the distributive share percentage.* Under paragraph (e)(2)(i) of this section, X must compute a fraction, the numerator of which is - \$150x (the amount disregarded under paragraph (c)(1) of this section) and the denominator of which is - \$100x (100% of PRS1's FSI for 2024). The resulting distributive share percentage is 150% (- \$150x/- \$100x).

(C) *Step 3: Compute the modified FSI of the partnership.* Under paragraph (e)(3) of this section, PRS1's FSI of - \$100x must be adjusted under § 1.56A-13(b) to disregard the \$20x of income from the covered benefit plan within the meaning § 1.56A-13(c)(1) that was included for AFS purposes, and to include none of the gross income from the covered benefit plan since it was all excluded from gross income for regular tax purposes. PRS1's FSI must also be adjusted to disregard the covered book depreciation expense, or \$10x, under § 1.56A-15(d)(1)(iii) and reduced by the deductible tax depreciation, or \$10x, under § 1.56A-15(d)(1)(ii). Accordingly, PRS1's modified FSI is - \$120x (- \$100x - \$20x + \$10x - \$10x).

(D) *Step 4: Multiply the distributive share percentage by the modified FSI of the partnership.* Under paragraph (e)(1)(iii) of this section, X must multiply its distributive share percentage (150%) by the modified FSI of PRS1, or - \$120x, resulting in - \$180x of modified FSI for X.

(E) *Step 5: Adjust the share of modified FSI by separately stated adjustments.* Under paragraphs (e)(1)(iv) and (e)(4) of this section, X must adjust its share of PRS1's modified FSI by any separately stated amounts listed in paragraph (e)(4)(ii) of this section. Because there are none, X's distributive share amount of PRS1's AFSI for 2024 is - \$180x.

(F) *Step 6: Include distributive share amount in AFSI.* Under paragraph (c)(2) of this section, X includes in its AFSI the - \$180x distributive share amount from PRS1 (subject to the rules in paragraph (j)(1) of this section). Thus, after increasing X's AFSI from \$50x to \$200x (Step 1), it is decreased to \$20x for 2024.

(4) *Example 4: Determining distributive share percentage for AFS non-partner—(i) Facts.* PRS1 is treated as a partnership for Federal income tax purposes owned by X and Y, each of which is a corporation. X is subject to the CAMT. For AFS purposes, X treats itself as a creditor to PRS1 and PRS1 treats itself as a debtor to X. For 2024, under their methods of financial accounting and under the terms of the loan, X reports on its AFS \$50 of interest income from its investment in PRS1, and PRS1 reports on its AFS \$50 of interest expense paid to X. Also, for 2024, PRS1 has \$75x of FSI after deducting its interest expense paid to X.

(ii) *Analysis.* Under § 1.56A-1(f), the classification of PRS1 for regular tax purposes applies for purposes of the section 56A regulations. Accordingly, X must determine its distributive share percentage with respect to PRS1 under paragraph (e)(2)(iii) of this section by computing a fraction, the numerator of which is \$50x (the amount disregarded under paragraph (c)(1) of this section) and the denominator of which is \$125x (100% of PRS1's FSI for 2024 plus the FSI amount included in the numerator for X's distributive share percentage). The resulting distributive share percentage is 40% (\$50x/\$125x).

(5) *Example 5: Determining distributive share percentage for entity that treats itself as owning 100 percent of the equity in the partnership for AFS purposes because the CAMT entity treats all other partners in the partnership as AFS non-partners—(i) Facts.* PRS1 is treated as a partnership for Federal income tax purposes owned by X and Y, each of which is a corporation. For AFS purposes, X treats itself as owning 100% of the equity in PRS1. X also treats Y as a creditor with respect to PRS1 and treats PRS1 as a debtor with respect to Y. X is subject to the CAMT. For 2024, X reports on its AFS \$75x of FSI from its investment in

PRS1. Also, for 2024, PRS1 has \$75x of FSI after deducting its interest expense paid to Y. As such, under their methods of financial accounting, X reports on its AFS \$75 from its equity investment in PRS1, Y reports on its AFS \$50 of interest income from its investment in PRS1, and PRS1 reports on its AFS \$50 of interest expense paid to Y.

(ii) *Analysis.* Under § 1.56A–1(f), the classification of PRS1 for regular tax purposes applies for purposes of the section 56A regulations. Accordingly, X must determine its distributive share percentage with respect to PRS1 under paragraph (e)(2)(iv) of this section by computing a fraction, the numerator of which is \$75x (the amount disregarded under paragraph (c)(1) of this section) and the denominator of which is \$125x (100% of PRS1's FSI for 2024 plus the sum of any amounts reflected in the PRS1's FSI that are treated as paid or accrued to Y). The resulting distributive share percentage is 60% (\$75x/\$125x).

(6) *Example 6: Adjustment of AFSI with respect to a partnership investment accounted for using the equity method in a tiered partnership structure—(i) Facts.* The facts are the same as in paragraph (k)(1)(i) of this section (*Example 1*), except that included in PRS1's \$100x of FSI is \$50x of FSI from its investment in PRS2, a partnership owned by PRS1 and A. PRS1 and PRS2 have the same taxable year and AFS year. For AFS purposes, PRS1 accounts for its interest in PRS2 using the equity method. For 2024, PRS2 has FSI of \$150x, which includes \$15x of covered book depreciation expense. For regular tax purposes, PRS2 has \$45x of deductible tax depreciation with respect to section 168 property. Under the equity method, PRS1 includes 33⅓% of PRS2's FSI for 2024 on its AFS.

(ii) *Analysis: Computation beginning with respect to lowest-tier partnership.* The following steps are used to compute X's distributive share amount from PRS1 for 2024, beginning with respect to the lowest-tier partnership. Under paragraphs (e)(3) and (f) of this section, PRS1 must determine its distributive share amount with respect to its investment in PRS2 in accordance with this section before X determines its distributive share amount with respect to PRS1.

(A) *Step 1: Disregard FSI amount with respect to partnership investment for the taxable year.* Under paragraph (c)(1) of this section, PRS1 disregards the \$50x of FSI included on its AFS with respect to its investment in PRS2.

(B) *Step 2: Calculate the distributive share percentage.* Under paragraph (e)(2)(i) of this section, PRS1 computes a fraction, the numerator of which is

\$50x (the amount disregarded under paragraph (c)(1) of this section) and the denominator of which is \$150x (100% of PRS2's FSI). The resulting distributive share percentage is 33⅓% (\$50x/\$150x).

(C) *Step 3: Compute the modified FSI of the partnership.* Under paragraph (e)(3) of this section, PRS2's FSI of \$150x must be adjusted to disregard the covered book depreciation expense, or \$15x, under § 1.56A–15(d)(1)(iii) and reduced by the deductible tax depreciation, or \$45x, under § 1.56A–15(d)(1)(ii). Accordingly, PRS2's modified FSI is \$120x (\$150x + \$15x – \$45x).

(D) *Step 4: Multiply the distributive share percentage by the modified FSI of the partnership.* Under paragraph (e)(1)(iii) of this section, PRS1 must multiply its distributive share percentage (33⅓%) by the modified FSI of PRS2, or \$120x, resulting in an amount of \$40x.

(E) *Step 5: Adjust the share of modified FSI by separately stated adjustments.* Under paragraph (e)(1)(iv) and (e)(4) of this section, PRS1 must adjust its share of PRS2's modified FSI by any separately stated amounts listed in paragraph (e)(4)(ii) of this section. Because there are none, PRS1's distributive share amount of PRS2's AFSI for Year 1 is \$40x.

(F) *Step 6: Include distributive share amount in AFSI (or modified FSI if a CAMT entity is a partnership).* Under paragraph (c)(2) of this section, PRS1 includes in its modified FSI the \$40x distributive share amount from PRS2. Thus, after reducing PRS1's modified FSI from \$100x to \$50x, it is increased to \$90x.

(iii) *Analysis: Computation with respect to PRS1.* Under paragraphs (e)(3) and (f) of this section, because PRS1 is the last partnership in the chain, X determines its distributive share amount with respect to its investment in PRS1.

(A) *Step 1: Disregard FSI amount with respect to partnership investment for the taxable year.* Under paragraph (c)(1) of this section, X disregards the \$50x of FSI it includes on its AFS with respect to its investment in PRS1 for Year 1.

(B) *Step 2: Calculate the distributive share percentage.* Under paragraph (e)(2)(i) of this section, X computes a fraction, the numerator of which is \$50x (the amount disregarded under paragraph (c)(1) of this section) and the denominator of which is \$100x (100% of PRS1's FSI for Year 1). The resulting distributive share percentage is 50% (\$50x/\$100x).

(C) *Step 3: Compute the modified FSI of the partnership.* Under paragraph (e)(3) of this section, PRS1's FSI of

\$100x must be adjusted under § 1.56A–13(b) to disregard the \$20x of income from the covered benefit plan within the meaning of § 1.56A–13(c)(1) that was included for AFS purposes. PRS1's FSI must also be adjusted to disregard the covered book depreciation expense, or \$10x, under § 1.56A–15(d)(1)(iii) and reduced by the deductible tax depreciation, or \$10x under § 1.56A–15(d)(1)(ii). PRS1's FSI must further be adjusted to exclude its \$50x of FSI with respect to its investment in PRS2 and to include its distributive share amount with respect to PRS2 of \$40x, as determined in paragraph (k)(6)(ii)(F) of this section. Accordingly, PRS1's modified FSI is \$70x (\$100x – \$20x + \$10x – \$10x – \$50x + \$40x).

(D) *Step 4: Multiply the distributive share percentage by the modified FSI of the partnership.* Under paragraph (e)(1)(iii) of this section, X must multiply its distributive share percentage, or 50%, by the modified FSI of PRS1, or \$70x, resulting in X having a share of \$35x of the modified FSI of PRS1.

(E) *Step 5: Adjust the share of modified FSI by separately stated adjustments.* Under paragraphs (e)(1)(iv) and (e)(4) of this section, X must adjust its share of PRS1's modified FSI by any separately stated amounts listed in paragraph (e)(4)(ii) of this section. Because there are none, X's distributive share amount of PRS1's AFSI for 2024 is \$35x.

(F) *Step 6: Include distributive share amount in AFSI.* Under paragraph (c)(2) of this section, X includes in its AFSI the \$35x distributive share amount from PRS1. Thus, after reducing X's AFSI from \$250x to \$200x, it is increased to \$235x for 2024.

(7) *Example 7: Adjustment of AFSI with respect to a partnership investment accounted for using the equity method with a basis adjustment under section 743(b) related to section 168 property—(i) Facts.* The facts are the same as in paragraph (k)(1)(i) of this section (*Example 1*), except that X has a basis adjustment under section 743(b) with respect to its investment in PRS1, in turn with respect to section 168 property owned by PRS1. As result of the section 743(b) basis adjustment, X is allocated an additional \$10x of deductible tax depreciation from PRS1's section 168 property. X does not have a corresponding equity interest method basis adjustment for financial statement purposes.

(ii) *Analysis.* The analysis is the same as in paragraphs (k)(1)(ii)(A) through (D) of this section (*Example 1*), and the remaining steps are as follows:

(A) *Step 5: Adjust the share of modified FSI by separately stated adjustments.* Under paragraphs (e)(1)(iv) and (e)(4) of this section, X must adjust its share of PRS1's modified FSI by its section 704(b) of the Code distributive share amount of PRS1's deductible tax depreciation for section 168 property from its section 743(b) basis adjustment with respect to its investment in PRS1, or \$10x. X's distributive share amount of PRS1's AFSI for 2024 is \$30x (\$40x – \$10x).

(B) *Step 6: Include distributive share amount in AFSI.* Under paragraph (c)(2) of this section, X includes in its AFSI the \$30x distributive share amount with respect to its investment in PRS1. Thus, after reducing X's AFSI from \$250x to \$200x, it is increased to \$230x for 2024.

(8) *Example 8: Adjustment of AFSI with respect to a partnership investment accounted for using the fair value method—(i) Facts—(A) General facts.* PRS3 is a partnership, Y is a corporation, and B is an individual. PRS3 is directly owned by Y and B. PRS3 and Y have the same taxable year and AFS year. For 2024, Y has FSI of \$275x, consisting of \$200x from its direct operations and \$75x from its investment in PRS3, which it accounts for using the fair value method of accounting pursuant to which the FSI reported on its AFS with respect to PRS3 reflects the net change in the fair value of its investment in PRS3 during the taxable year.

(B) *Facts: PRS3.* PRS3 has an interest in PRS4. PRS4 is a partnership. For 2024, PRS3 has FSI of \$100x, which includes \$14x of covered book depreciation expense and \$50x from its investment in PRS4. PRS3 uses the fair value method to account for its assets and its FSI includes the total change in the fair value with respect to its assets. The FSI reported by PRS3 on its AFS with respect to its investment in PRS4 reflects the net change in the fair value of its investment in PRS4 during the taxable year, including changes in cash amounts. For regular tax purposes, PRS3 has deductible tax depreciation with respect to section 168 property of \$36x per year for ten years. PRS3 and PRS4 have the same taxable year and AFS year.

(C) *Facts: PRS4.* PRS4 uses the fair value method to account for its investment in its assets. The FSI reported on its AFS with respect to those assets reflects the net change in fair value of the assets during the taxable year, including changes in cash amounts. For Year 1, PRS4 has FSI of \$150x, consisting of a \$100x increase to cash amounts and a \$50x increase to the value of certain property. PRS4 has no

covered book depreciation expense for the section 168 property. For regular tax purposes, PRS4 has deductible tax depreciation with respect to section 168 property of \$18x per year for ten years.

(ii) *Analysis: Begin computation with respect to lowest-tier partnership.* Under paragraphs (e)(3) and (f) of this section, PRS3 must determine its distributive share amount with respect to its investment in PRS4 in accordance with this section before Y determines its distributive share amount with respect to PRS3.

(A) *Step 1: Disregard FSI amount with respect to partnership investment for the taxable year.* Under paragraph (c)(1) of this section, PRS3 disregards the \$50x of FSI it includes on its AFS with respect to its investment in PRS4 for 2024.

(B) *Step 2: Calculate the distributive share percentage.* Under paragraph (e)(2)(ii) of this section, PRS3 must compute a fraction, the numerator of which is \$50x (the amount disregarded under paragraph (c)(1) of this section) and the denominator of which is \$150x (the total change in the fair value of PRS4's assets, including changes in cash amounts and increases in the value of property, for PRS4's taxable year). The resulting distributive share percentage is $33\frac{1}{3}\%$ ($\$50x/\$150x$).

(C) *Step 3: Compute the modified FSI of the partnership.* Under paragraph (e)(3) of this section, PRS4's FSI of \$150x is reduced by the deductible tax depreciation, or \$18x, under § 1.56A–15(d)(1)(ii). As a result, PRS4's modified FSI is \$132x ($\$150x - \$18x$).

(D) *Step 4: Multiply the distributive share percentage by the modified FSI of the partnership.* Under paragraph (e)(1)(iii) of this section, PRS3 multiplies its distributive share percentage ($33\frac{1}{3}\%$) by the modified FSI of PRS4, or \$132x, resulting in PRS3 having a share of \$44x of the modified FSI of PRS4.

(E) *Step 5: Adjust the share of modified FSI by separately stated adjustments.* Under paragraphs (e)(1)(iv) and (e)(4) of this section, PRS3 must adjust its share of PRS4's modified FSI by any separately stated amounts listed in paragraph (e)(4)(ii) of this section. Because there are none, PRS3's distributive share amount of PRS4's AFSI for 2024 is \$44x.

(F) *Step 6: Include distributive share amount in AFSI (or modified FSI if a CAMT entity is a partnership).* Under paragraph (c)(2) of this section, PRS3 includes in its modified FSI the \$44x distributive share amount from PRS4. Thus, after reducing PRS3's modified FSI with respect to its investment in

PRS4 from \$100x to \$50x, it is increased to \$94x for 2024.

(iii) *Analysis: Computation with respect to PRS3.* Under paragraph (e)(3) of this section, because PRS3 is the last partnership in the chain, Y determines its distributive share amount with respect to its investment in PRS3.

(A) *Step 1: Disregard FSI amount with respect to partnership investment for the taxable year.* Under paragraph (c)(1) of this section, Y disregards the \$75x of FSI it includes on its AFS with respect to its investment in PRS3 for 2024.

(B) *Step 2: Calculate the distributive share percentage.* Under paragraph (e)(2)(ii) of this section, Y must compute a fraction, the numerator of which is \$75x (the amount disregarded under paragraph (c)(1) of this section) and the denominator of which is \$100x (the total change in the fair value of PRS3's assets, including changes in cash amounts, during the PRS3's taxable year). The resulting distributive share percentage is 75% ($\$75x/\$100x$).

(C) *Step 3: Compute the modified FSI of the partnership.* Under paragraph (e)(3) of this section, PRS3's FSI of \$100x must be adjusted to disregard the covered book depreciation expense, or \$14x, under § 1.56A–15(d)(1)(iii), and reduced by the deductible tax depreciation, or \$36x, under § 1.56A–15(d)(1)(ii). PRS3's FSI must further be adjusted to exclude its \$50x of FSI with respect to its investment in PRS4 and to include its distributive share amount with respect to PRS4, or \$44x, as determined under paragraph (k)(4)(ii) of this section. Accordingly, PRS3's modified FSI is \$72x ($\$100x + \$14x - \$36x - \$50x + \$44x$).

(D) *Step 4: Multiply the distributive share percentage by the modified FSI of the partnership.* Under paragraph (e)(1)(iii) of this section, Y must multiply its distributive share percentage, or 75%, by the modified FSI of PRS3, or \$72x, resulting in Corporation Y having a share of \$54x of modified FSI of Partnership C.

(E) *Step 5: Adjust the share of modified FSI by separately stated adjustments.* Under paragraphs (e)(1)(iv) and (e)(4) of this section, Y must adjust its share of PRS3's modified FSI of \$54x by any separately stated amounts listed in paragraph (e)(4)(ii) of this section. Because there are none, Y's distributive share amount of PRS3's AFSI for 2024 is \$54x.

(F) *Step 6: Include distributive share amount in AFSI.* Under paragraph (c)(2) of this section, Y includes in its AFSI the \$54x distributive share amount from PRS3. Thus, after reducing Y's AFSI from \$275x to \$200x, it is increased to \$254x for 2024.

(9) *Example 9: Computation of CAMT basis in partnership investment—(i) Facts.* The facts are the same as in paragraph (k)(1)(i) of this section (*Example 1*), except that PRS1 is formed on January 1, 2024, at which time X and A each contributes \$50x to PRS. During 2024, X and A each contributes an additional \$10x to PRS1 to meet its respective capital contribution requirement under the terms of the PRS1 agreement.

(ii) *Analysis—(A) Compute the CAMT basis in the partnership investment.* Under paragraph (j)(3) of this section, X's initial CAMT basis in its PRS1 investment is equal to X's AFS basis in its PRS1 investment as of the first day of the partnership's first taxable year ending after December 31, 2019. Accordingly, because PRS1 was formed on January 1, 2024, X's initial AFS and CAMT basis under paragraph (j)(3) of this section is \$0x. Under § 1.56A–20(c)(3)(ii) and paragraph (j)(3)(iv) of this section, X's \$50x contribution results in X having an initial CAMT basis in its PRS1 investment of \$50x on January 1, 2024, which is equal to its AFS basis in its PRS1 investment following the contribution. Under § 1.56A–20(c)(3)(ii) and paragraph (j)(3)(iv) of this section, X's CAMT basis in its PRS1 investment of \$50x is increased by \$10x at the time of X's additional \$10x contribution in 2024.

(B) *Increase by the CAMT entity's positive distributive share amount under paragraph (j)(3)(ii) of this section or decrease (but not below zero) by its negative distributive share amount paragraph (j)(3)(iii) of this section for the taxable year.* Under paragraph (j)(3)(ii) of this section, X must increase its CAMT basis in PRS1 by its distributive share amount of \$40x (computed in paragraph (k)(1)(ii)(E) of this section) resulting in X having a CAMT basis of \$100x (\$60x + \$40x) in its PRS 1 investment at the end of 2024.

(10) *Example 10: Limitation of negative distributive share amount in excess of CAMT basis—(i) Facts.* The facts are the same as in paragraph (k)(9)(i) of this section (*Example 9*). In 2025, X's distributive share amount with respect to its investment in PRS1, determined under paragraph (e) of this section, is –\$120x. Further, in 2025 each of X and A contributes \$10x to meet its respective capital contribution requirement under the terms of the PRS1 agreement.

(ii) *Analysis—(A) Limitation on allowance of negative distributive share.* Under paragraph (j)(1) of this section, X must limit its 2025 negative distributive share amount with respect to its

investment in PRS1 to its CAMT basis in the partnership.

(B) *Computation of CAMT basis in partnership investment.* X must compute its CAMT basis in its investment in PRS1 for 2025. Under paragraph (j)(3) of this section, X's CAMT basis is adjusted by the items described in paragraph (j)(3) of this section for each taxable year and prior taxable years ending after December 31, 2019. Under paragraph (j)(3)(iv) of this section, X increases its CAMT basis of \$100x as of the end of 2024 (which includes all of X's paragraph (j)(3) of this section items for 2024) by its 2025 contribution of \$10x to \$110x. Under paragraph (j)(3)(iii) of this section, X must decrease its CAMT basis (but not below zero) by its 2025 negative distributive share amount of –\$120x.

(C) *Carryover of suspended negative distributive share amount.* Under paragraph (j)(1) of this section, X includes the –\$120x distributive amount in its AFSI for the 2025 taxable year only to the extent it does not exceed its CAMT basis in its partnership investment. Under paragraph (j)(2) of this section, X's excess negative distributive share amount of –\$10x (\$110x – \$120x) is included in determining X's distributive share amount in the subsequent taxable year, subject to the limitation in paragraph (j)(1) of this section.

(l) *Applicability dates—(1) In general.* Except as provided in paragraph (l)(2) of this section, this section applies to partnership taxable years ending after [DATE OF PUBLICATION OF FINAL RULE IN THE **Federal Register**] and to taxable years of CAMT entities that are partners in which or with which such partnership taxable years end.

(2) *Exceptions—(i) Paragraph (d).* Paragraph (d) of this section applies to taxable years of a CAMT entity ending after [DATE OF PUBLICATION OF FINAL RULE IN THE **Federal Register**].

(ii) *Coordination with certain other provisions during prior years—(A) Information reporting during prior years.* A partnership must furnish to the IRS and any CAMT entity that is a partner in the partnership the information described in paragraphs (i)(1)(iv) and (v) of this section in a manner consistent with paragraphs (h) and (i) of this section.

(B) *Certain basis adjustments during prior years.* A CAMT entity that is a partner in a partnership must make adjustments to the CAMT basis in its partnership investment consistent with those described in paragraphs (j)(3)(v), (vii), (xi), and (xii) of this section.

(C) *Certain adjustments during prior years.* A CAMT entity's AFSI with

respect to a partnership investment is determined without regard to any items included in the partnership's FSI that are described in § 1.56A–4(c)(1)(i) or 1.56A–8(b)(2).

(iii) *Applicability dates for rules described in paragraph (l)(2)(ii).* The following are the applicability dates for the rules described in paragraph (l)(2)(ii) of this section:

(A) Paragraph (l)(2)(ii)(A) of this section applies to taxable years of partnerships ending after September 13, 2024 and on or before [DATE OF PUBLICATION OF FINAL RULE IN THE **Federal Register**];

(B) Paragraph (l)(2)(ii)(B) of this section applies to taxable years of CAMT entities ending after September 13, 2024 and on or before [DATE OF PUBLICATION OF FINAL RULE IN THE **Federal Register**]; and

(C) Except as provided in paragraph (l)(2)(iii)(D) of this section, paragraph (l)(2)(ii)(C) of this section applies to taxable years of partnerships ending after September 13, 2024 and on or before [DATE OF PUBLICATION OF FINAL RULE IN THE **Federal Register**].

(D) When the items described in paragraph (l)(2)(ii)(C) of this section result from the occurrence of transfers (as defined in § 1.56A–4(b)(3)), paragraph (l)(2)(ii)(C) of this section applies to transfers occurring after September 13, 2024 and on or before [DATE OF PUBLICATION OF FINAL RULE IN THE **Federal Register**].

§ 1.56A–6 AFSI adjustments with respect to controlled foreign corporations.

(a) *Overview.* This section provides rules under section 56A(c)(3) of the Code for determining adjustments to AFSI with respect to controlled foreign corporations. Paragraph (b) of this section provides rules for determining a CAMT entity's adjustment to AFSI with respect to controlled foreign corporations in which the CAMT entity is a United States shareholder. Paragraph (c) of this section provides rules for computing a controlled foreign corporation's adjusted net income or loss. Paragraph (d) of this section defines the type of dividends excluded from a controlled foreign corporation's adjusted net income or loss. Paragraph (e) of this section provides examples illustrating the application of the rules in this section. Paragraph (f) of this section provides the applicability date of this section.

(b) *Section 56A(c)(3) adjustment to AFSI—(1) Aggregate adjustment.* Except as provided under paragraph (b)(3) of this section, for any taxable year, a CAMT entity that is a United States shareholder of one or more controlled

foreign corporations makes a single adjustment to its AFSI for its taxable year that is equal to the aggregate of its pro rata share of the adjusted net income or loss of each such controlled foreign corporation, with such aggregate amount reduced as provided under paragraphs (b)(2) and (4) of this section. The CAMT entity's pro rata share of the adjusted net income or loss of a controlled foreign corporation is determined for the taxable year of the controlled foreign corporation that ends with or within the taxable year of the CAMT entity and is determined under the principles of section 951(a)(2) of the Code (including the aggregation rules in § 1.958-1(d)).

(2) *Tax reduction.* An applicable corporation that does not choose to have the benefits of subpart A of part III of subchapter N of chapter 1 for the taxable year reduces the amount of the adjustment otherwise determined under paragraph (b)(1) of this section by the amount that would be described in § 1.59-4(d)(3) if the applicable corporation were to choose to have such benefits, reduced to reflect the suspensions and disallowances described in § 1.59-4(b)(1) that apply at the level of the United States shareholder.

(3) *Aggregate negative adjustment.* If the adjustment determined under paragraph (b)(1) of this section with respect to a taxable year of a United States shareholder would be negative (after taking into account the reduction provided under paragraph (b)(2) of this section but before taking paragraph (b)(4) of this section into account), then there is no adjustment under paragraph (b)(1) of this section for the taxable year.

(4) *Reduction for utilization of a CFC adjustment carryover.* If the adjustment determined under paragraph (b)(1) of this section with respect to a taxable year of a United States shareholder would be positive (after taking into account the reduction provided under paragraph (b)(2) of this section but before taking this paragraph (b)(4) into account), then the adjustment under paragraph (b)(1) of this section (after taking into account the reduction provided under paragraph (b)(2) of this section) is reduced by the aggregate amount of CFC adjustment carryovers to the taxable year (as determined under paragraph (b)(5) of this section), but not below zero.

(5) *CFC adjustment carryover mechanics.* A CFC adjustment carryover for any taxable year (including a taxable year in which the corporation is not an applicable corporation) is carried forward to each taxable year following the taxable year in which the CFC

adjustment carryover arose. The amount of a CFC adjustment carryover carried forward to a taxable year is the amount of the CFC adjustment carryover remaining (if any) after the application of paragraph (b)(4) of this section. CFC adjustment carryovers are used in the order of the taxable years in which the CFC adjustment carryovers arose. For purposes of determining the amount of a CFC adjustment carryover carried forward to the first taxable year a corporation is an applicable corporation (and any subsequent taxable year), paragraph (b)(4) of this section applies to reduce the CFC adjustment carryover in taxable years beginning after the taxable year the CFC adjustment carryover arose and before the first taxable year in which the corporation is an applicable corporation.

(6) *Definition of CFC adjustment carryover.* The term *CFC adjustment carryover* means, with respect to a United States shareholder for any taxable year ending after December 31, 2019, the amount of the negative adjustment, if any, described in paragraph (b)(3) of this section.

(7) *Tax consolidated groups.* Members of a tax consolidated group are treated as a single entity for purposes of this paragraph (b). *See also* § 1.1502-56A(a)(2). For rules regarding the use of CFC adjustment carryovers by a tax consolidated group, *see* § 1.1502-56A(h).

(c) *Computing the adjusted net income or loss of a controlled foreign corporation—(1) In general.* A controlled foreign corporation's adjusted net income or loss is equal to the controlled foreign corporation's FSI for the taxable year of the controlled foreign corporation, adjusted for all AFSI adjustments provided under the section 56A regulations, except as provided under paragraphs (c)(2) through (5) of this section. For purposes of determining a controlled foreign corporation's adjusted net income or loss, references to AFSI in other sections of the section 56A regulations, except for references to AFSI in § 1.56A-1(b)(1) and (e), are treated as references to adjusted net income or loss. Adjusted net income or loss must be expressed in U.S. dollars. Any item included in adjusted net income or loss that is not expressed in U.S. dollars must be translated from the relevant currency to U.S. dollars using the relevant weighted average exchange rate, as defined in § 1.989(b)-1, for the controlled foreign corporation's taxable year.

(2) *Adjustments relating to ownership of stock of a foreign corporation—(i) In general.* Adjustments in this paragraph (c)(2) apply in lieu of the adjustments

described in § 1.56A-4(c)(1) (providing adjustments to AFSI with respect to ownership of stock in a foreign corporation).

(ii) *Amounts relating to ownership of stock of a foreign corporation reflected in controlled foreign corporation's FSI.* Adjusted net income or loss of a controlled foreign corporation excludes any items of income, expense, gain, and loss resulting from ownership of stock of a foreign corporation, including acquiring or disposing of such stock, reflected in the controlled foreign corporation's FSI.

(iii) *Amounts relating to ownership of stock of a foreign corporation included for regular tax purposes—(A) In general.* Except as provided under paragraph (c)(2)(iii)(B) of this section, adjusted net income or loss of a controlled foreign corporation includes any items of income, deduction, gain, and loss resulting from the controlled foreign corporation's ownership of stock of a foreign corporation, including acquiring or transferring such stock, for regular tax purposes (taking into account section 961(c) of the Code).

(B) *Dividends received from another foreign corporation.* Adjusted net income or loss of a controlled foreign corporation does not include the amount of any dividend received from another foreign corporation to the extent the dividend is a CAMT excluded dividend as defined in paragraph (d) of this section.

(iv) *Stock of a foreign corporation owned by a partnership.* If a partnership directly owns stock of a foreign corporation, then in determining the adjusted net income or loss of a controlled foreign corporation that is a partner in the partnership (or an indirect partner, in the case of tiered partnerships), the partner takes into account the items described in paragraph (c)(2)(iii) of this section (including taking into account the exception provided in paragraph (c)(2)(iii)(B) of this section) that are allocated to the partner by the partnership for regular tax purposes.

(3) *Controlled foreign corporations engaged in a U.S. trade or business.* A controlled foreign corporation's adjusted net income or loss is not limited to amounts taken into account in determining AFSI under § 1.56A-7 (providing that the AFSI of a foreign corporation is limited to income that is effectively connected with the conduct of a trade or business within the United States). If a controlled foreign corporation is an applicable corporation, the controlled foreign corporation's adjusted net income or loss is reduced by the amount of AFSI

of the controlled foreign corporation (such as FSI determined by taking § 1.56A–7 into account).

(4) *Foreign income tax expense.* The AFSI adjustment provided under § 1.56A–8(c) does not apply in computing a controlled foreign corporation's adjusted net income or loss.

(5) *FSNOL carryovers.* The AFSI adjustment provided under § 1.56A–23(c) (providing a reduction to AFSI for FSNOL carryovers) does not apply in computing a controlled foreign corporation's adjusted net income or loss.

(d) *Definition of CAMT excluded dividend.* The term *CAMT excluded dividend* means a dividend received by a controlled foreign corporation to the extent the dividend is excluded from—

(1) The recipient controlled foreign corporation's gross income under section 959(b) of the Code; or

(2) Both—

(i) The recipient controlled foreign corporation's foreign personal holding company income under section 954(c)(3) (relating to certain income received from related persons) or 954(c)(6) (relating to certain amounts received from related controlled foreign corporations) of the Code; and

(ii) The recipient controlled foreign corporation's gross tested income under § 1.951A–2(c)(1)(iv) (relating to dividends received from related persons).

(e) *Examples.* The following examples illustrate the application of the rules in this section. For purposes of these examples, no entity is a member of a tax consolidated group, each entity's functional currency is the U.S. dollar, and each entity uses the calendar year as its taxable year and for AFS purposes.

(1) *Example 1: Dividend received by a controlled foreign corporation from another controlled foreign corporation—*

(i) *Facts.* X is a domestic corporation that owns all the stock of FC1, a controlled foreign corporation, which owns all the stock of FC2, a controlled foreign corporation. FC2 distributes \$100x of earnings and profits described in section 959(c)(3) to FC1, and the dividend qualifies for the exception to foreign personal holding company income under section 954(c)(6) and the exception to gross tested income under § 1.951A–2(c)(1)(iv). The \$100x dividend received by FC1 does not result in any item of income, expense, gain, or loss being reflected in the FSI of FC1.

(ii) *Analysis.* Under paragraph (b)(1) of this section, X's AFSI includes the sum of X's pro rata shares of the adjusted net income or loss of each of

FC1 and FC2, because X is a United States shareholder of FC1 and FC2, both of which are controlled foreign corporations. For purposes of computing FC1's adjusted net income or loss, there is no adjustment under paragraph (c)(2)(ii) of this section, because the dividend received by FC1 does not result in any item of income, expense, gain, or loss being reflected in the FSI of FC1. Under paragraph (c)(2)(iii) of this section, the entire dividend is excluded from FC1's adjusted net income or loss because the dividend is a CAMT excluded dividend. The dividend is a CAMT excluded dividend because the dividend qualifies for the exception to subpart F income under section 954(c)(6) and the exception to tested income under § 1.951A–2(c)(1)(iv).

(2) *Example 2: Sale of stock of lower-tier controlled foreign corporation—*(i) *Facts.* The facts are the same as in paragraph (e)(1) of this section (*Example 1*), except that FC2 does not pay a dividend to FC1, and instead FC1 sells all the stock of FC2 to a third party for cash. For regular tax purposes, FC1 recognizes \$100x of gain, all of which is recharacterized as a dividend under section 964(e)(1) of the Code and treated as subpart F income of FC1 under section 964(e)(4)(A)(i). Furthermore, under section 964(e)(4)(A)(iii), X qualifies for a \$100x dividends-received deduction under section 245A of the Code. FC1's sale of the stock of FC2 results in \$100x of gain being reflected in the FSI of FC1.

(ii) *Analysis.* Under paragraph (c)(2)(ii) of this section, the \$100x of gain reflected in the FSI of FC1 is excluded from FC1's adjusted net income or loss. Under paragraph (c)(2)(iii) of this section, FC1's adjusted net income or loss includes the \$100x of recharacterized dividend income because the dividend is included in FC1's subpart F income and therefore is not a CAMT excluded dividend. Under § 1.56A–4(c)(1)(ii), X's AFSI is reduced by \$100x as a result of the dividends-received deduction under section 245A.

(3) *Example 3: Controlled foreign corporation held through a partnership—*(i) *Facts.* X is a domestic corporation that owns 20% of the partnership interests in PRS, a domestic partnership. PRS owns all the stock of FC, a controlled foreign corporation. In Year 1, FC's adjusted net income or loss is \$100x and X's pro rata share of FC's adjusted net income or loss is \$20x.

(ii) *Analysis.* Under paragraph (b)(1) of this section, a CAMT entity's pro rata share of the adjusted net income or loss of a controlled foreign corporation is determined under the principles of

section 951(a)(2). Under these principles, a partnership is not treated as owning stock of a controlled foreign corporation for purposes of determining pro rata share under paragraph (b)(1) of this section. See §§ 1.951–1(a)(4) (directing taxpayers to § 1.958–1(d) for rules regarding the ownership of stock of a foreign corporation through a domestic partnership for purposes of section 951) and 1.958–1(d) (providing generally that for purposes of applying section 951, a domestic partnership is not treated as owning stock of a foreign corporation). Accordingly, PRS is not treated as owning stock of FC, and no adjustment is made to PRS's modified FSI under paragraph (b)(1) of this section. However, under paragraph (b)(1) of this section, in Year 1, X's AFSI includes X's pro rata share of the adjusted net income or loss of FC, because X is a United States shareholder of FC, a controlled foreign corporation. Therefore, in Year 1, X includes in its AFSI \$20x of FC's adjusted net income or loss.

(f) *Applicability date—*(1) *In general.* Except as described in paragraph (f)(3) of this section, if the conditions described in paragraphs (f)(2)(i) and (ii) of this section are not satisfied, this section applies to taxable years of CAMT entities that are United States shareholders ending after September 13, 2024, and to taxable years of controlled foreign corporations that end with or within such taxable years.

(2) *Multiple United States shareholders with different taxable years.* Except as described in paragraph (f)(3) of this section, this section applies to taxable years of controlled foreign corporations ending after September 13, 2024, and to taxable years of CAMT entities that are United States shareholders in which or with which such taxable years end, if:

(i) More than one CAMT entity that is a United States shareholder but not a domestic partnership owns (within the meaning of section 958(a)) stock in the controlled foreign corporation; and

(ii) At least one, but not all, of the United States shareholders referred to in paragraph (f)(2)(i) has a taxable year ending after September 13, 2024 and the controlled foreign corporation's taxable year that ends with or within such taxable year ends on or before September 13, 2024.

(3) *Transactions involving foreign stock.* To the extent a controlled foreign corporation's adjusted net income or loss would include an item resulting from the occurrence of a transfer (as defined in § 1.56A–4(b)(3)), this section applies to transfers occurring after September 13, 2024.

§ 1.56A-7 AFSI adjustments with respect to effectively connected income.

(a) *Overview.* This section provides rules under section 56A of the Code for determining the AFSI of a foreign corporation engaged in (or treated as engaged in) a trade or business within the United States. Paragraph (b) of this section provides rules under section 56A(c)(4) of the Code for determining a foreign corporation's AFSI. Paragraph (c) of this section provides the applicability date of this section.

(b) *Adjusted financial statement income of foreign corporations.* A foreign corporation determines its AFSI by applying the principles of section 882 of the Code. The AFSI of a foreign corporation is adjusted to take into account only amounts and items of FSI that would be included in income effectively connected with the conduct of a trade or business within the United States or allowable as a deduction by such corporation for purposes of section 882(c) had such amount or item accrued for regular tax purposes in the taxable year.

(c) *Applicability date.* This section applies to taxable years of foreign corporations ending after September 13, 2024.

§ 1.56A-8 AFSI adjustments for certain Federal and foreign income taxes.

(a) *Overview.* This section provides rules under section 56A(c)(5) of the Code for adjusting AFSI with regard to certain income taxes. Paragraph (b) of this section provides general rules for adjusting AFSI with regard to certain income taxes. Paragraph (c) of this section provides a rule for applicable corporations that do not choose to have the benefits of subpart A of part III of subchapter N of chapter 1 of the Code. Paragraph (d) of this section provides rules for determining if an income tax is considered to be taken into account in an AFS. Paragraph (e) of this section provides examples illustrating the application of the rules in this section. Paragraph (f) of this section provides the applicability date of this section.

(b) *AFSI adjustment for applicable income taxes—(1) In general.* AFSI is adjusted to disregard any applicable income taxes, as defined in paragraph (b)(2) of this section, that are taken into account (within the meaning of paragraph (d) of this section) in a CAMT entity's AFS.

(2) *Definition of applicable income taxes.* The term *applicable income taxes* means Federal income taxes and foreign income taxes that are taken into account (within the meaning of paragraph (d) of this section) in a CAMT entity's AFS as current tax expense (or benefit), as

deferred tax expense (or benefit), or through increases or decreases to other AFS accounts of the CAMT entity (for example, AFS accounts used to account for FSI from investments in other CAMT entities, AFS accounts used to account for section 168 property, or AFS accounts used to account for other items of income and expense).

(c) *Applicable corporations that choose not to credit foreign income taxes.* An applicable corporation that does not choose to have the benefits of subpart A of part III of subchapter N of chapter 1 for the taxable year reduces its AFSI for the taxable year by an amount equal to the deduction for foreign income taxes allowed to the applicable corporation for regular tax purposes under section 164 of the Code (taking into account all other relevant provisions) for the taxable year. For purposes of the immediately preceding sentence, foreign income taxes allowed to the applicable corporation for regular tax purposes include foreign income taxes paid or accrued by a disregarded entity if the applicable corporation is the owner for regular tax purposes, any creditable foreign tax expenditures (within the meaning of § 1.704-1(b)(4)(viii)) of a partnership that are allocated to the applicable corporation as a partner or indirect partner in a tiered partnership, and any other foreign income taxes that are allocated to the applicable corporation as an owner of any other type of pass-through entity.

(d) *Requirements for an applicable income tax to be considered taken into account in an AFS.* For purposes of paragraph (b) of this section and § 1.59-4, the following rules apply—

(1) Applicable income taxes are considered taken into account in an AFS of a CAMT entity if any journal entry has been recorded in the books and records used to determine an amount in the AFS of the CAMT entity for any year, or in another AFS that includes the CAMT entity, to reflect the taxes;

(2) Such applicable income taxes are considered taken into account in an AFS of a CAMT entity even if the taxes do not increase or decrease the CAMT entity's FSI at the time of the journal entry; and

(3) If applicable income taxes are taken into account in a partnership's AFS, they also are considered taken into account in any AFS of the partnership's partners.

(e) *Examples.* The following examples illustrate the application of the rules in this section. For purposes of these examples, each of X and Y is a domestic corporation that uses the calendar year

as its taxable year and has a calendar-year financial accounting period.

(1) *Example 1—(i) Facts.* X does not choose to have the benefits of subpart A of part III of subchapter N of chapter 1 for its 2024 taxable year. In 2024, X pays \$200x of foreign income taxes to Country G, for which X claims a deduction for regular tax purposes under section 164. In X's 2024 AFS, X records a current foreign income tax expense of \$200x for the foreign income taxes paid to Country G. X also records in its 2024 AFS a deferred Federal income tax expense of \$50x with respect to an installment sale that occurred in 2024.

(ii) *Analysis.* Under paragraph (b) of this section, X adjusts its AFSI to disregard the \$200x of current foreign income tax expense for Country G taxes and the \$50x of deferred Federal income tax expense from the installment sale that are reflected in X's FSI for the 2024 taxable year because both such taxes are applicable income taxes. If X is an applicable corporation for the 2024 taxable year, then for purposes of determining its tentative minimum tax under section 55(b)(2)(A) of the Code for the 2024 taxable year, X also reduces AFSI under paragraph (c) of this section by an amount equal to the \$200x deduction for regular tax purposes under section 164 for the Country G taxes because X does not choose to have the benefits of subpart A of part III of subchapter N of chapter 1 for the 2024 taxable year.

(2) *Example 2—(i) Facts.* X is an applicable corporation for its 2024 taxable year and chooses to have the benefits of subpart A of part III of subchapter N of chapter 1 for the 2024 taxable year. In 2024, X pays \$100x of foreign income taxes to Country G for which X is eligible to claim a credit under section 901 of the Code. X also pays \$75x of foreign income taxes to Country H, a country with which the United States has severed diplomatic relations. X is not allowed to claim a credit for the taxes paid to Country H under section 901(j) but is allowed to take a deduction for regular tax purposes under section 164 for those taxes. Both taxes are taken into account as current tax expense in X's 2024 AFS.

(ii) *Analysis.* In determining X's AFSI for its 2024 taxable year, under paragraph (b) of this section, X adjusts AFSI to disregard both the \$100x of Country G taxes and the \$75 of Country H taxes because both such taxes are applicable income taxes. Because X chooses to have the benefits of subpart A of part III of subchapter N of chapter 1 for the 2024 taxable year, paragraph (c) of this section does not apply and

therefore X is not allowed to reduce AFSI by an amount equal to the deduction taken for the \$75x of Country H taxes.

(3) *Example 3—(i) Facts.* X and Y are applicable corporations for the 2024 taxable year. X and Y each own a 50% interest in PRS, a domestic partnership that uses the calendar year as its taxable year. In 2024, PRS paid \$300x of foreign income taxes to Country G, which PRS accounted for as a current tax expense on its AFS. The \$300x of foreign income taxes paid to Country G are creditable foreign tax expenditures (within the meaning of § 1.704–1(b)(4)(viii)) of PRS. For the 2024 taxable year, X chooses to have the benefits of subpart A of part III of subchapter N of chapter 1, and therefore claims a credit under section 901 for the \$150x of Country G taxes that are allocated to X as a partner. Y does not choose to have the benefits of subpart A of part III of subchapter N of chapter 1 for its 2024 taxable year, and therefore takes a deduction for regular tax purposes for the \$150x of Country G taxes that are allocated to Y as a partner.

(ii) *Analysis.* For purposes of determining PRS's modified FSI under § 1.56A–5(e)(3), PRS disregards the \$300x of current tax expense for Country G taxes that are reflected in PRS's FSI. Under paragraph (c) of this section, Y (not PRS) reduces its AFSI by an amount equal to the \$150x deduction for regular tax purposes under section 164 for the Country G taxes allocated to Y as a partner. Paragraph (c) of this section does not apply to X because X chooses to have the benefits of subpart A of part III of subchapter N of chapter 1 for its 2024 taxable year.

(f) *Applicability date.* This section applies to taxable years ending after September 13, 2024.

§ 1.56A–9 AFSI adjustments for owners of disregarded entities or branches.

(a) *Overview.* This section provides rules under section 56A(c)(6) of the Code for determining the AFSI of a CAMT entity that owns a disregarded entity or branch.

(b) *Rules for determining the FSI and AFSI of a CAMT entity that owns a disregarded entity or branch—(1) In general.* A disregarded entity or branch and the CAMT entity that owns the disregarded entity or branch (including through other disregarded entities or branches) are treated as a single CAMT entity for purposes of the section 56A regulations. Thus, except as otherwise provided in the section 56A regulations (for example, in § 1.56A–21), for purposes of the section 56A regulations, a CAMT entity that owns a disregarded entity or branch is treated as—

(i) Directly owning the assets of the disregarded entity or branch;

(ii) Being directly liable for the liabilities of the disregarded entity or branch; and

(iii) Directly earning or incurring any income, expense, gain, loss, or other similar item of the disregarded entity or branch.

(2) *Transactions disregarded.* For purposes of determining the FSI and AFSI of a CAMT entity that owns a disregarded entity or branch (CAMT entity owner)—

(i) Transactions between the disregarded entity or branch and the CAMT entity owner (or between disregarded entities or branches owned by the same CAMT entity owner) are disregarded; and

(ii) Any balance sheet account or income statement account that reflects the CAMT entity owner's investment in the disregarded entity or branch (or a disregarded entity's or branch's investment in another disregarded entity or branch that is ultimately owned by the same CAMT entity owner) is disregarded.

(3) *Certain disregarded entities or branches subject to the rules in § 1.56A–2(h).* If a disregarded entity or branch is required to determine its own AFS under § 1.56A–2(h), then for purposes of the section 56A regulations, the CAMT entity that owns the disregarded entity or branch treats the separate AFS of the disregarded entity or branch (as determined under § 1.56A–2(h)) as part of the CAMT entity's own AFS, and applies the rules of this section by reference to that separate AFS.

(c) *Applicability date.* This section applies to taxable years ending after September 13, 2024.

§ 1.56A–10 AFSI adjustments for cooperatives.

(a) *Overview.* This section provides rules under section 56A(c)(7) of the Code for adjusting the AFSI of a cooperative.

(b) *AFSI adjustments for cooperatives.* In the case of a cooperative to which section 1381 of the Code applies, the AFSI of the cooperative is reduced by the amounts referred to in section 1382(b) of the Code and the regulations under section 1382(b) (relating to patronage dividends and per-unit retain allocations), but only to the extent such amounts were not otherwise taken into account in determining the AFSI of the cooperative.

(c) *Applicability date.* This section applies to taxable years ending after September 13, 2024.

§ 1.56A–11 AFSI adjustments for Alaska Native Corporations.

(a) *Overview.* This section provides rules under section 56A(c)(8) of the Code for adjusting the AFSI of Alaska Native Corporations. Paragraph (b) of this section provides definitions that apply for purposes of this section. Paragraph (c) of this section provides rules for adjusting AFSI for cost recovery and depletion with respect to certain property held by an Alaska Native Corporation. Paragraph (d) of this section provides rules for adjusting AFSI for certain payments made by an Alaska Native Corporation. Paragraph (e) of this section provides the applicability date of this section.

(b) *Definitions.* For purposes of this section:

(1) *Alaska Native Corporation.* The term *Alaska Native Corporation* has the meaning provided in section 3 of the Alaska Native Claims Settlement Act (43 U.S.C. 1602(m)).

(2) *ANCSA property.* The term *ANCSA property* means property the basis of which is determined under 43 U.S.C. 1620(c).

(3) *Specified payments.* The term *specified payments* means amounts payable made pursuant to 43 U.S.C. 1606(i) or (j).

(c) *Cost recovery and depletion.* The AFSI of an Alaska Native Corporation is—

(1) Reduced by cost recovery and depletion attributable to ANCSA property (including cost recovery that occurs as part of the computation of gain or loss) upon the disposition of ANCSA property) to the extent of the amount recovered for regular tax purposes for the taxable year; and

(2) Adjusted to disregard any cost recovery and depletion attributable to ANCSA property (including cost recovery that occurs as part of the computation of gain or loss upon the disposition of ANCSA property) reflected in the FSI of the Alaska Native Corporation.

(d) *Deduction for specified payments.* The AFSI of an Alaska Native Corporation is—

(1) Reduced by deductions for specified payments to the extent of the amount allowed as deduction for regular tax purposes for the taxable year; and

(2) Adjusted to disregard expenses or other FSI reductions reflected in the Alaska Native Corporation's FSI with respect to specified payments.

(e) *Applicability date.* This section applies to taxable years ending after September 13, 2024.

§ 1.56A–12 AFSI adjustments with respect to certain tax credits.

(a) *Overview.* This section provides rules under section 56A(c)(9) of the Code for adjusting AFSI with regard to amounts described in section 56A(c)(9) and certain other amounts related to credits to which sections 48D, 6417, and 6418 of the Code apply. Paragraph (b) of this section provides rules for adjusting AFSI with regard to proceeds from credits to which sections 48D, 6417, and 6418 apply. Paragraph (c) of this section provides rules for adjusting the AFSI of a CAMT entity that acquires a credit to which section 6418 applies. Paragraph (d) of this section provides rules for adjusting AFSI with regard to amounts recaptured under sections 6417 and 6418. Paragraph (e) of this section provides the applicability date of this section.

(b) *Proceeds from certain credits excluded from AFSI.* AFSI is adjusted to disregard the following amounts, provided that any such amount (or portion thereof) is not otherwise disregarded under § 1.56A–8—

(1) Any amount treated as a payment against the tax imposed by subtitle A pursuant to an election under section 48D(d) or 6417;

(2) Any amount received from the transfer of an eligible credit, as defined in section 6418(f)(1)(A), that is not includible in the gross income of the CAMT entity by application of section 6418(b) or that is treated as tax exempt income under section 6418(c)(1)(A); and

(3) Any amount received pursuant to an election under section 48D(d)(2) or 6417(c) that is treated as tax exempt income under section 48D(d)(2)(A)(i)(III) or 6417(c)(1)(C).

(c) *Treatment of transferee taxpayer.* If a transferee taxpayer, as defined in section 6418(a), is a CAMT entity, AFSI is adjusted to disregard—

(1) Any amount paid by the transferee taxpayer to the eligible taxpayer, as defined in section 6418(f)(2), as consideration for the transfer of the eligible credit, as defined in section 6418(f)(1)(A), provided that the amount is not otherwise disregarded under § 1.56A–8; and

(2) Any increase in the transferee taxpayer's FSI resulting from the utilization of the eligible credit, provided that the increase is not otherwise disregarded under § 1.56A–8.

(d) *Recapture disregarded as expense in determining AFSI.* AFSI is adjusted to disregard any decrease in FSI resulting from an increase in tax under section 48D(d)(5), 50(a)(3), 6417(g), or 6418(g)(3) of the Code, provided that the decrease in FSI is not otherwise disregarded under § 1.56A–8.

(e) *Applicability date.* This section applies to taxable years ending after [DATE OF PUBLICATION OF FINAL RULE IN THE Federal Register].

§ 1.56A–13 AFSI adjustments for covered benefit plans.

(a) *Overview.* This section provides rules under section 56A(c)(11) of the Code for adjusting AFSI with respect to covered benefit plans. Paragraph (b) of this section provides for adjustments to AFSI with respect to covered benefit plans. Paragraph (c) of this section defines a covered benefit plan for purposes of this section. Paragraph (d) of this section provides the applicability date of this section.

(b) *Adjustments to AFSI for covered benefit plans.* AFSI is—

(1) Adjusted to disregard any amount of income, cost, expense, gain, or loss that otherwise would be included on a CAMT entity's AFS in connection with any covered benefit plan;

(2) Increased by any amount of income in connection with any covered benefit plan that is included in gross income for the taxable year under any provision of chapter 1; and

(3) Reduced by deductions allowed for the taxable year under any provision of chapter 1 with respect to any covered benefit plan.

(c) *Covered benefit plan—(1) General definition.* For purposes of section 56A(c)(11), a *covered benefit plan* is a plan described in paragraph (c)(2), (3), or (4) of this section.

(2) *Qualified defined benefit pension plan.* A plan is described in this paragraph (c)(2) if the plan is—

(i) A defined benefit plan for which the trust that is part of the plan is an employees' trust described in section 401(a) of the Code that is exempt from tax under section 501(a) of the Code; and

(ii) Not a multiemployer plan described in section 414(f) of the Code.

(3) *Qualified foreign plan.* A plan is described in this paragraph (c)(3) if the plan is a qualified foreign plan as defined in section 404A(e) of the Code.

(4) *Other defined benefit plan.* A plan is described in this paragraph (c)(4) if, under the accounting standards that apply to the AFS, the plan is treated as a defined benefit plan that provides post-employment benefits other than pension benefits.

(d) *Applicability date.* This section applies to taxable years ending after September 13, 2024.

§ 1.56A–14 AFSI adjustments for tax-exempt entities.

(a) *Overview.* This section provides rules under section 56A(c)(12) of the

Code for adjusting the AFSI of tax-exempt entities.

(b) *AFSI adjustments for tax-exempt entities.* In the case of an organization subject to tax under section 511 of the Code, AFSI is adjusted to take into account only the AFSI (if any) of an unrelated trade or business (as defined in section 513 of the Code) of such organization, subject to the modifications to unrelated business taxable income described in section 512(b) of the Code. AFSI determined under the preceding sentence includes any unrelated debt-financed income determined under section 514 of the Code. *See* section 512(b)(4).

(c) *Applicability date.* This section applies to taxable years ending after September 13, 2024.

§ 1.56A–15 AFSI adjustments for section 168 property.

(a) *Overview.* This section provides rules under section 56A(c)(13) of the Code for determining AFSI adjustments with respect to section 168 property. Paragraph (b) of this section provides definitions that apply for purposes of this section. Paragraph (c) of this section provides rules for determining the extent to which property (or an expenditure with respect to property) is section 168 property. Paragraph (d) of this section provides rules for adjusting AFSI for depreciation and other amounts with respect to section 168 property. Paragraph (e) of this section provides rules for adjusting AFSI upon the disposition of section 168 property. Paragraph (f) of this section provides the applicability date of this section.

(b) *Definitions.* For purposes of this section:

(1) *Covered book inventoriable depreciation.* The term *covered book inventoriable depreciation* means any of the following items that are included in inventoriable cost (or capitalized as part of the cost of non-inventory property held for sale) in a CAMT entity's AFS with respect to section 168 property—

(i) Depreciation expense;

(ii) Other recovery of AFS basis (including from an impairment loss) that occurs prior to the taxable year in which the disposition of section 168 property occurs for regular tax purposes; or

(iii) Impairment loss reversal.

(2) *Covered book COGS depreciation.* The term *covered book COGS depreciation* means any of the following items that are taken into account as part of cost of goods sold (or as part of the computation of gain or loss from the sale or exchange of property held for sale) in FSI with respect to section 168 property—

(i) Depreciation expense;
 (ii) Other recovery of AFS basis (including from an impairment loss) that occurs prior to the taxable year in which the disposition of section 168 property occurs for regular tax purposes; or

(iii) Impairment loss reversal.
 (3) *Covered book depreciation expense.* The term *covered book depreciation expense* means any of the following items other than covered book COGS depreciation that are taken into account in FSI with respect to section 168 property—

(i) Depreciation expense;
 (ii) Other recovery of AFS basis (including from an impairment loss) that occurs prior to the taxable year in which the disposition of section 168 property occurs for regular tax purposes; or

(iii) Impairment loss reversal.
 (4) *Covered book expense.* The term *covered book expense* means an amount, other than covered book COGS depreciation and covered book depreciation expense, that—

(i) Reduces FSI; and
 (ii) Is reflected in the unadjusted depreciable basis, as defined in § 1.168(b)–1(a)(3), of section 168 property for regular tax purposes.

(5) *Deductible tax depreciation.* The term *deductible tax depreciation* means tax depreciation, as defined in paragraph (b)(8) of this section, that is allowed as a deduction in computing taxable income, including tax depreciation that is capitalized and subsequently recovered as a deduction in computing taxable income (even if the deduction is allowed under a provision of the Code other than section 167 of the Code).

(6) *Section 168 property.* The term *section 168 property* means property to which section 168 of the Code applies, as described in paragraph (c) of this section.

(7) *Tax COGS depreciation.* The term *tax COGS depreciation* means—

(i) Tax depreciation that is capitalized to inventory under section 263A of the Code and is recovered as part of cost of goods sold in computing gross income; and

(ii) Tax depreciation that is capitalized under section 263A to the basis of property described in section 1221(a)(1) of the Code that is not inventory and is recovered as part of the computation of gain or loss from the sale or exchange of such property in computing taxable income.

(8) *Tax depreciation.* The term *tax depreciation* means depreciation deductions allowed under section 167 with respect to section 168 property.

(9) *Tax depreciation section 481(a) adjustment.* The term *tax depreciation section 481(a) adjustment* means the net amount of the adjustments required under section 481(a) of the Code for a change in method of accounting for depreciation for any item of section 168 property. The term also includes an adjustment (or portion thereof) required under section 481(a) for any other change in method of accounting (other than a change in method of accounting described in paragraph (b)(10) of this section) that impacts the timing of taking into account depreciation with respect to section 168 property in computing taxable income (for example, a change in method of accounting involving a change from deducting depreciation with respect to section 168 property to capitalizing such depreciation under section 263A or another capitalization provision, or vice versa).

(10) *Tax capitalization method change.* The term *tax capitalization method change* means a change in method of accounting for regular tax purposes involving a change from capitalizing and depreciating costs as section 168 property (including costs that were capitalized to such property under section 263A or another capitalization provision) to deducting the costs (or vice versa).

(11) *Tax capitalization method change AFSI adjustment.* The term *tax capitalization method change AFSI adjustment* means an adjustment to AFSI that is required under paragraph (d)(1) of this section if a CAMT entity makes a tax capitalization method change. The tax capitalization method change AFSI adjustment is computed separately for each tax capitalization method change and equals the difference between the following amounts computed as of the beginning of the tax year of change—

(i) The cumulative amount of adjustments to AFSI under paragraph (d)(1) of this section with respect to the cost(s) subject to the tax capitalization method change that were made with respect to taxable years beginning after December 31, 2019, and before the tax year of change; and

(ii) The cumulative amount of adjustments to AFSI under paragraph (d)(1) of this section with respect to the cost(s) subject to the tax capitalization method change that would have been made with respect to taxable years beginning after December 31, 2019, and before the tax year of change, if the new method of accounting for the cost(s) had been applied for regular tax purposes in those taxable years.

(c) *Property to which section 168 applies*—(1) *In general.* For purposes of section 56A(c)(13) and this section, property to which section 168 applies consists of the following (but only to the extent provided in this paragraph (c))—

(i) MACRS property, as defined in § 1.168(b)–1(a)(2), that is depreciable under section 168;

(ii) Computer software that is qualified property as defined in § 1.168(k)–1(b)(1) or 1.168(k)–2(b)(1), as applicable, and depreciable under section 168; and

(iii) Other property depreciable under section 168 that is—

(A) Qualified property as defined in § 1.168(k)–2(b)(1); and

(B) Described in § 1.168(k)–2(b)(2)(i)(E), (F), or (G).

(2) *Property to which section 168 applies includes only the portion of property for which a depreciation deduction is allowable under section 167.* If a CAMT entity deducts or otherwise recovers the cost of property described in paragraph (c)(1) of this section (or a portion thereof) under sections 179, 179C, or 181 of the Code, or any similar provision, property to which section 168 applies is limited to the unadjusted depreciable basis, as defined in § 1.168(b)–1(a)(3), of such property.

(3) *Deductible expenditures are not property to which section 168 applies.* Property to which section 168 applies does not include any expenditure (or portion thereof) that is deducted for regular tax purposes, even if the expenditure is made with respect to property to which section 168 applies. For example, an expenditure to repair property to which section 168 applies that is deducted for regular tax purposes but capitalized and depreciated as an improvement for FSI purposes is not property to which section 168 applies.

(4) *Property to which section 168 applies does not include property that is not depreciable under section 168 for regular tax purposes.* Except as provided in paragraph (c)(5) of this section, property to which section 168 applies does not include property that is not depreciable under section 168 for regular tax purposes. For example, if a foreign corporation other than a controlled foreign corporation is not subject to U.S. taxation, then property owned by the foreign corporation is not treated as property to which section 168 applies.

(5) *Effect of election out of additional first year depreciation.* Property to which section 168 applies includes property described in paragraph (c)(1) of this section regardless of whether the CAMT entity makes an election out of

the additional first year depreciation deduction under section 168(k) with respect to such property.

(6) *Property placed in service in taxable years beginning before the CAMT effective date.* Notwithstanding § 1.56A–1(d)(3), property to which section 168 applies includes property placed in service by the CAMT entity in any taxable year, including taxable years ending on or before December 31, 2019.

(d) *AFSI adjustments for depreciation and other amounts with respect to section 168 property—(1) In general.* The AFSI of a CAMT entity for a taxable year is—

(i) Reduced by tax COGS depreciation with respect to section 168 property, but only to the extent of the amount recovered—

(A) As part of cost of goods sold in computing gross income for the taxable year; or

(B) As part of the computation of gain or loss from the sale or exchange of non-inventory property described in section 1221(a)(1) that is included in taxable income, or deducted in computing taxable income, respectively, for the taxable year;

(ii) Reduced by deductible tax depreciation with respect to section 168 property, but only to the extent of the amount allowed as a deduction in computing taxable income for the taxable year;

(iii) Adjusted to disregard covered book COGS depreciation, covered book depreciation expense, covered book expense, and amounts described in paragraph (e)(6) of this section with respect to section 168 property, including section 168 property placed in service for regular tax purposes in a taxable year subsequent to the taxable year the property is treated as placed in service for AFS purposes;

(iv) Reduced by any tax depreciation section 481(a) adjustment with respect to section 168 property that is negative, but only to the extent of the amount of the adjustment that is taken into account in computing taxable income for the taxable year;

(v) Increased by any tax depreciation section 481(a) adjustment with respect to section 168 property that is positive, but only to the extent of the amount of the adjustment that is taken into account in computing taxable income for the taxable year;

(vi) Increased or decreased, as appropriate, by any tax capitalization method change AFSI adjustment in accordance with paragraph (d)(4) of this section; and

(vii) Adjusted for other items as provided in IRB guidance the IRS may publish.

(2) *Special rules for section 168 property held by a partnership—(i) In general.* If section 168 property is held by a partnership, see § 1.56A–5(e) for the manner in which the adjustments provided in paragraph (d)(1) of this section are taken into account by the partnership and its CAMT entity partners under the applicable method described in § 1.56A–5(c).

(ii) *Basis adjustment under section 743(b) of the Code.* If section 168 property is held by a partnership, the adjustments provided in paragraphs (d)(1)(i), (ii), and (iv) through (vii) of this section do not include amounts resulting from any basis adjustment under section 743(b) of the Code attributable to the section 168 property that are treated as increases or decreases to tax depreciation or a tax depreciation section 481(a) adjustment for regular tax purposes. See § 1.743–1(j)(4). Instead, such amounts resulting from any basis adjustment under section 743(b) attributable to the section 168 property that would have been included in the adjustments provided in paragraphs (d)(1)(i), (ii), and (iv) through (vii) of this section are separately stated to the CAMT entity partners under § 1.56A–5(e)(4)(i) and are taken into account by the CAMT entity partners in the manner provided in § 1.56A–5(e)(4)(ii)(A).

(iii) *Basis adjustment under section 734(b) of the Code.* If section 168 property is held by a partnership, the adjustments provided in paragraphs (d)(1)(i), (ii), and (iv) through (vii) of this section include amounts resulting from any basis adjustment under section 734(b) of the Code attributable to the section 168 property that are treated as increases or decreases to tax depreciation or a tax depreciation section 481(a) adjustment for regular tax purposes. See § 1.734–1(e).

(iv) *Basis adjustment under § 1.1017–1(g)(2).* If section 168 property is held by a partnership, the adjustments provided in paragraphs (d)(1)(i), (ii), and (iv) through (vii) of this section do not include any decreases in tax depreciation or income amounts for regular tax purposes, as applicable, resulting from any basis adjustment under § 1.1017–1(g)(2) attributable to section 168 property (as calculated under § 1.743–1(j)(4)(ii)). Instead, such decreases in tax depreciation or income amounts, as applicable, resulting from any basis adjustment under § 1.1017–1(g)(2) attributable to section 168 property that would have been included in the adjustments provided in paragraphs (d)(1)(i), (ii), and (iv) through (vii) of this section are separately stated to the CAMT entity partners under § 1.56A–5(e)(4)(i) and are

taken into account by the CAMT entity partners in the manner provided in § 1.56A–5(e)(4)(ii)(A).

(3) *Special rules for determining tax COGS depreciation and covered book COGS depreciation adjustments—(i) In general.* Except as provided in paragraph (d)(3)(ii) of this section, a CAMT entity is required—

(A) To apply the method(s) of accounting under section 263A that the CAMT entity uses for regular tax purposes (and, in the case of inventory property, the method(s) of accounting that the CAMT entity uses to identify and value inventories under sections 471 and 472 of the Code) to determine the tax COGS depreciation adjustments under paragraph (d)(1)(i) of this section; and

(B) To apply the method(s) of accounting the CAMT entity uses for FSI purposes to determine the covered book COGS depreciation adjustments under paragraph (d)(1)(iii) of this section.

(ii) *Simplifying methods.* A CAMT entity is permitted to use the simplifying methods of determining depreciation in ending inventory provided in this paragraph (d)(3)(ii) to determine the tax COGS depreciation and covered book COGS depreciation adjustments under paragraphs (d)(1)(i) and (iii) of this section, respectively.

(A) *Tax depreciation in inventory for FIFO method taxpayers.* For a CAMT entity that uses the First-In-First-Out (FIFO) method to identify inventories for regular tax purposes, the tax depreciation in additional section 263A costs in ending inventory may be computed by multiplying the section 471 costs in ending inventory by the ratio of the tax depreciation in additional section 263A costs incurred during the taxable year to the section 471 costs incurred during the taxable year (tax depreciation absorption ratio). See § 1.263A–1(d)(2) and (3), respectively, for the definitions of section 471 costs and additional section 263A costs.

(B) *Tax depreciation in inventory for LIFO method taxpayers.* For a CAMT entity that uses the LIFO method to identify inventories for regular tax purposes, the tax depreciation in section 471 costs in a LIFO increment may be computed by multiplying the tax depreciation in section 471 costs incurred during the taxable year by the ratio of the section 471 costs in the increment to the section 471 costs incurred during the taxable year (tax increment to current-year cost ratio). The tax depreciation in additional section 263A costs in a LIFO increment may be computed by multiplying the tax

depreciation in additional section 263A costs incurred during the taxable year by the tax increment to current-year cost ratio. The total tax depreciation that remains in a LIFO increment after a decrement is determined by multiplying the tax depreciation in the section 471 costs and the tax depreciation in additional section 263A costs in the LIFO increment before the decrement by the ratio of the section 471 costs in the increment after the decrement to the section 471 costs in the LIFO increment before the decrement. See § 1.263A–1(d)(2) and (3), respectively, for the definitions of section 471 costs and additional section 263A costs.

(C) *Covered book inventoriable depreciation in inventory for LIFO method taxpayers.* For a CAMT entity that uses the LIFO method to identify inventories for AFS and FSI purposes, the covered book inventoriable depreciation in a LIFO increment may be computed by multiplying the covered book inventoriable depreciation incurred during the taxable year by the ratio of inventoriable costs in the increment in the CAMT entity's AFS to the inventoriable costs incurred during the taxable year in the CAMT entity's AFS (book increment to current-year cost ratio). The covered book inventoriable depreciation that remains in a LIFO increment after a decrement is determined by multiplying the covered book inventoriable depreciation in the LIFO increment before the decrement by the ratio of the inventoriable costs in the increment after the decrement to the inventoriable costs in the LIFO increment before the decrement.

(4) *Adjustment period for tax capitalization method change AFSI adjustments.* A tax capitalization method change AFSI adjustment that is negative reduces AFSI under paragraph (d)(1)(vi) of this section in the tax year of change by the full amount of the adjustment. A tax capitalization method change AFSI adjustment that is positive increases AFSI under paragraph (d)(1)(vi) of this section ratably over four taxable years beginning with the tax year of change. For purposes of this paragraph (d)(4), if any taxable year during the four-year spread period for a tax capitalization method change AFSI adjustment that is positive is a short taxable year, the CAMT entity takes the adjustment into account as if that short taxable were a full 12-month taxable year. If, in any taxable year, a CAMT entity ceases to engage in the trade or business to which the tax capitalization method change AFSI adjustment relates, the CAMT entity includes in AFSI for such taxable year any portion of the

adjustment not included in AFSI for a previous taxable year.

(5) *Examples.* The following examples illustrate the application of the rules in this paragraph (d). For purposes of paragraphs (d)(5)(i) through (viii) of this section (*Examples 1 through 8*), each of X and Y is a corporation that uses the calendar year as its taxable year and has a calendar-year financial accounting period. Unless otherwise stated, each of X and Y has elected out of additional first year depreciation under section 168(k), and the tax depreciation with respect to any section 168 property is not required to be capitalized under any capitalization provision in the Code.

(i) *Example 1: Tax COGS depreciation and covered book COGS depreciation adjustments under FIFO method—(A) General facts.* X is a manufacturer that uses the FIFO method to identify inventories and values inventories at the lower of cost or market for regular tax and FSI purposes. X uses the simplified service cost method to determine capitalizable mixed service costs under § 1.263A–1(h) and the modified simplified production method to allocate additional section 263A costs to ending inventory under § 1.263A–2(c)(3). X determines both the type and amount of section 471 costs by reference to its financial statements in accordance with § 1.263A–1(d)(2)(iii)(A). All depreciation for regular tax and FSI purposes is attributable to section 168 property. There were no write downs of inventory for regular tax purposes and no disposition or book impairment losses for FSI purposes in 2024. X uses the same method(s) of allocating section 471 costs to ending inventory for regular tax purposes that it uses to allocate inventoriable costs to ending inventory for AFS purposes, so the tax depreciation in section 471 costs in ending inventory and the covered book inventoriable depreciation in ending inventory are equal.

(B) *Facts: Beginning inventory for 2024.* X's beginning inventory for 2024 is \$2,500,000x, consisting of \$2,000,000x of section 471 costs and \$500,000x of additional section 263A costs. The section 471 costs in beginning inventory include \$100,000x of book depreciation based on X's financial statement method of accounting. The additional section 263A costs in beginning inventory include \$10,000x of tax depreciation computed under the simplifying method in paragraph (d)(3)(ii) of this section for the preceding year.

(C) *Facts: Current-year costs for 2024.* During 2024, X incurs \$11,000,000x of inventoriable costs, consisting of \$10,000,000x of section 471 costs and

\$1,000,000x of additional section 263A costs. The section 471 costs include \$500,000x of book depreciation based on X's financial statement method of accounting and the additional section 263A costs include \$40,000x of tax depreciation, which is comprised of book depreciation in capitalizable mixed service costs determined under the simplified service cost method, as well as the excess of tax depreciation over book depreciation under § 1.263A–1(d)(2)(iii)(B) related to the book depreciation in section 471 costs and capitalizable mixed service costs.

(D) *Facts: Ending inventory for 2024.* X's ending inventory for 2024 is \$3,300,000x, consisting of \$3,000,000x of section 471 costs and \$300,000x of additional section 263A costs computed under the modified simplified production method. The section 471 costs include \$150,000x of book depreciation based on X's financial statement method of accounting.

(E) *Facts: Cost of goods sold for 2024.* X's cost of goods sold for 2024 is \$10,200,000x (\$2,500,000x beginning inventory + \$11,000,000x inventoriable costs incurred during the year – \$3,300,000x ending inventory).

(F) *Analysis: Ending inventory for 2024.* X determines the tax depreciation in additional section 263A costs in ending inventory for 2024 using the simplifying method in paragraph (d)(3)(ii)(A) of this section as follows: X's tax depreciation absorption ratio is 0.4% (\$40,000x tax depreciation in additional section 263A costs incurred during the year/\$10,000,000x section 471 costs incurred during the year) and its tax depreciation in additional section 263A costs in ending inventory is \$12,000x (tax depreciation absorption ratio of 0.4% x \$3,000,000x of section 471 costs remaining in ending inventory).

(G) *Analysis: Taxable year 2024: Tax COGS depreciation.* X's tax COGS depreciation for 2024 is \$488,000x (\$100,000x tax depreciation in section 471 costs in beginning inventory + \$10,000x tax depreciation in additional section 263A costs in beginning inventory + \$500,000x tax depreciation in section 471 costs incurred during the year + \$40,000x tax depreciation in additional section 263A costs incurred during the year – \$150,000x tax depreciation in section 471 costs in ending inventory – \$12,000x of tax depreciation in additional section 263A costs in ending inventory). Pursuant to paragraph (d)(1)(i)(A) of this section, X reduces AFSI by \$488,000x, the tax COGS depreciation for taxable year 2024.

(H) *Analysis: Taxable year 2024: Covered book COGS depreciation.* X's covered book COGS depreciation for 2024 is \$450,000x (\$100,000x covered book inventoriable depreciation in beginning inventory + \$500,000x covered book inventoriable depreciation incurred during the year – \$150,000x covered book inventoriable depreciation in ending inventory). Pursuant to paragraph (d)(1)(iii) of this section, X adjusts AFSI to disregard the covered book COGS depreciation by increasing AFSI by \$450,000x for 2024.

(ii) *Example 2: Tax COGS depreciation and covered book COGS depreciation adjustments under LIFO method—(A) General facts.* The facts are the same as in paragraph (d)(5)(i) of this section (*Example 1*), except that X uses the same dollar-value LIFO method to identify inventory for regular tax and AFS purposes. X uses the simplifying method in paragraph (d)(3)(ii)(B) of this section to determine the tax depreciation in section 471 costs and the tax depreciation in additional section 263A costs in its LIFO increments for purposes of computing tax COGS depreciation. X also uses the simplifying method in paragraph (d)(3)(ii)(C) of this section to determine the covered book inventoriable depreciation in its LIFO increments for purposes of computing covered book COGS depreciation. Based on X's methods of accounting for determining and allocating section 471 costs for regular tax purposes described in paragraph (d)(5)(i) of this section (*Example 1*), X's section 471 costs (including tax depreciation) incurred for the taxable year and X's inventoriable costs (including covered book inventoriable depreciation) incurred for the taxable year in X's AFS are equal, and X's section 471 costs (including tax depreciation) in any LIFO increment and the inventoriable costs (including covered book inventoriable depreciation) in such increment in X's AFS are equal.

(B) *Facts: Beginning inventory for 2024.* X's beginning inventory for 2024 is \$2,500,000x, consisting of a base layer of \$2,000,000x and a 2023 increment of \$500,000x. The base layer consists of \$1,800,000x of section 471 costs and \$200,000x of additional section 263A costs and the 2023 increment consists of \$450,000x of section 471 costs and \$50,000x of additional section 263A costs. The base layer includes \$100,000x of tax depreciation (\$90,000x of tax depreciation in section 471 costs + \$10,000x of tax depreciation in additional section 263A costs) and the 2023 increment includes \$25,000x of tax depreciation (\$22,500x of tax

depreciation in section 471 costs + \$2,500x of tax depreciation in additional section 263A costs), computed under the simplifying method in paragraph (d)(3)(ii)(B) of this section for the preceding year. The covered book inventoriable depreciation in X's beginning inventory for 2024 computed under the simplifying method in paragraph (d)(3)(ii)(C) of this section equals the tax depreciation in section 471 costs in X's beginning inventory for 2024 computed under the simplifying method in paragraph (d)(3)(ii)(B) of this section (that is, the covered book inventoriable depreciation in the base layer equals \$90,000x and covered book inventoriable depreciation in the 2023 increment equals \$22,500x).

(C) *Facts: Current-year costs for 2024.* During 2024, X incurs \$11,000,000x of inventoriable costs, consisting of \$10,000,000x of section 471 costs and \$1,000,000x of additional section 263A costs. The section 471 costs include \$500,000x of book depreciation based on X's financial statement method of accounting and the additional section 263A costs include \$40,000x of tax depreciation, which includes book depreciation in capitalizable mixed service costs determined under the simplified service cost method, as well as for the excess of tax depreciation over book depreciation under § 1.263A–1(d)(2)(iii)(B) related to the book depreciation in section 471 costs and capitalizable mixed service costs.

(D) *Facts: Ending inventory for 2024.* X's ending inventory for 2024 is \$2,750,000x, consisting of the base layer of \$2,000,000x, the 2023 increment of \$500,000x, and a 2024 increment of \$250,000x. The 2024 increment consists of \$225,000x of section 471 costs and \$25,000x of additional section 263A costs.

(E) *Facts: Cost of goods sold for 2024.* X's cost of goods sold for 2024 is \$10,750,000x (\$2,500,000x beginning inventory + \$11,000,000x inventoriable costs incurred during the year – \$2,750,000x ending inventory).

(F) *Analysis: Ending inventory for 2024.* X determines the tax depreciation in section 471 costs and the tax depreciation in additional section 263A costs in the 2024 increment under the simplifying method in paragraph (d)(3)(ii)(B) of this section as follows: X computes a tax increment to current-year cost ratio of 2.25% by dividing the section 471 costs in the increment, or \$225,000x, by the section 471 costs incurred during the year, or \$10,000,000x. X determines the tax depreciation in section 471 costs for the 2024 increment of \$11,250x by multiplying the tax increment to

current-year cost ratio, or 2.25%, by the tax depreciation in section 471 costs incurred during the year, or \$500,000x. X determines the tax depreciation in additional section 263A costs for the 2024 increment of \$900x by multiplying the tax increment to current-year cost ratio, or 2.25%, by the tax depreciation in additional section 263A costs incurred during the year, or \$40,000x. X determines the covered book inventoriable depreciation in the 2024 increment under the simplifying method in paragraph (d)(3)(ii)(C) of this section as follows: X computes a book increment to current-year cost ratio of 2.25% by dividing the inventoriable costs in the increment in X's AFS, or \$225,000x, by the inventoriable costs incurred during the taxable year in X's AFS, or \$10,000,000x. X determines the covered book inventoriable depreciation for the 2024 increment of \$11,250x by multiplying the book increment to current-year cost ratio, or 2.25%, by covered book inventoriable depreciation incurred for the year, or \$500,000x.

(G) *Analysis: Taxable year 2024: Tax COGS depreciation.* X's tax COGS depreciation for 2024 of \$527,850x is equal to the tax depreciation in section 471 costs in beginning inventory of \$112,500x (\$90,000x from the base layer + \$22,500x from the 2023 increment), plus the tax depreciation in additional section 263A costs in beginning inventory of \$12,500x (\$10,000x from the base layer + \$2,500x from the 2023 increment), plus the \$500,000x of tax depreciation in section 471 costs incurred during the year, plus the \$40,000x of tax depreciation in additional section 263A costs incurred during the year, less the tax depreciation in section 471 costs in ending inventory of \$123,750x (\$90,000x from the base layer + \$22,500x from the 2023 increment + \$11,250x from the 2024 increment), less the tax depreciation in additional section 263A costs in ending inventory of \$13,400x (\$10,000x from the base layer + \$2,500x from the 2023 increment + \$900x from the 2024 increment). Pursuant to paragraph (d)(1)(i)(A) of this section, X reduces AFSI by \$527,850x, the tax COGS depreciation for taxable year 2024.

(H) *Analysis: Taxable year 2024: Covered book COGS depreciation.* X's covered book COGS depreciation for 2024 of \$488,750x is equal to the covered book inventoriable depreciation in beginning inventory of \$112,500x (\$90,000x from the base layer + \$22,500x from the 2023 increment), plus the \$500,000x of covered book inventoriable depreciation incurred during the year, less the \$123,750x of

covered book inventoriable depreciation in ending inventory (\$90,000x from the base layer + \$22,500x from the 2023 increment + \$11,250x from the 2024 increment). Pursuant to paragraph (d)(1)(iii) of this section, X adjusts AFSI to disregard the covered book COGS depreciation by increasing AFSI by \$488,750x for 2024.

(iii) *Example 3: Tax COGS depreciation and covered book COGS depreciation adjustments under LIFO method*—(A) *General facts.* The facts are the same as in paragraph (d)(5)(ii) of this section (*Example 2*), except that X continues to use the dollar-value LIFO method for regular tax and AFS purposes for 2025.

(B) *Facts: Current-year costs for 2025.* During 2025, X incurs \$13,250,000x of inventoriable costs, consisting of \$12,000,000x of section 471 costs and \$1,250,000x of additional section 263A costs. The section 471 costs include \$750,000x of book depreciation based on X's financial statement method of accounting and the additional section 263A costs include \$100,000x of tax depreciation which is comprised of book depreciation in capitalizable mixed service costs determined under the simplified service cost method and a positive book-to-tax adjustment for the excess of tax depreciation over book depreciation under § 1.263A-1(d)(2)(iii)(B) related to the book depreciation in section 471 costs and capitalizable mixed service costs.

(C) *Facts: Ending inventory for 2025.* X incurs a LIFO decrement in 2025 that eliminates the entire 2024 increment and a portion of the 2023 increment. X's ending inventory is \$2,250,000x, consisting of the base layer of \$2,000,000x and a remaining 2023 increment of \$250,000x. The base layer consists of \$1,800,000x of section 471 costs and \$200,000x of additional section 263A costs. The remaining portion of the 2023 increment consists of \$225,000x of section 471 costs and \$25,000x of additional section 263A costs.

(D) *Facts: Cost of goods sold for 2025.* X's cost of goods sold for 2025 is \$13,750,000x (\$2,750,000x beginning inventory + \$13,250,000x inventoriable costs incurred during the year – \$2,250,000x ending inventory).

(E) *Analysis: Ending inventory for 2025.* X determines the tax depreciation in section 471 costs and the tax depreciation in additional section 263A costs that remain in the 2023 increment under the simplifying method in paragraph (d)(3)(ii)(B) of this section as follows: After taking into account the 2025 decrement, 50% of the 2023 increment remains (\$225,000x of section

471 costs in the increment after the decrement/\$450,000x of section 471 costs in the increment before the decrement). The tax depreciation in section 471 costs that remains in the 2023 increment is \$11,250x (50% surviving proportion of the increment x \$22,500x tax depreciation in section 471 costs in the 2023 increment before the decrement). X's tax depreciation in additional section 263A costs that remains in the 2023 increment is \$1,250x (50% surviving proportion of the increment x \$2,500x tax depreciation in additional section 263A costs in the 2023 increment before the decrement, or \$2,500x). X determines the covered book inventoriable depreciation that remains in the 2023 increment under the simplifying method in paragraph (d)(3)(ii)(C) of this section as follows: After taking into account the 2025 decrement, 50% of the 2023 increment remains (\$225,000x of inventoriable costs in the increment in X's AFS after the decrement/\$450,000x of inventoriable costs in the increment before the decrement). The covered book inventoriable depreciation that remains in the 2023 increment is \$11,250x (50% surviving proportion of the increment x \$22,500x of covered book inventoriable depreciation in the 2023 increment before the decrement).

(F) *Analysis: Taxable year 2025: Tax COGS depreciation.* X's tax COGS depreciation for 2025 of \$874,650x is equal to the tax depreciation in section 471 costs in beginning inventory of \$123,750 (\$90,000x from the base layer + \$22,500x from the 2023 increment + \$11,250x from the 2024 increment), plus the tax depreciation in additional section 263A costs in beginning inventory of \$13,400x (\$10,000x from the base layer + \$2,500x from the 2023 increment + \$900x from the 2024 increment), plus \$750,000x of tax depreciation in section 471 costs incurred during the year, plus \$100,000x of tax depreciation in additional section 263A costs incurred during the year, less the tax depreciation in section 471 costs in ending inventory of \$101,250x (\$90,000x from the base layer + \$11,250x from the 2023 increment), less the tax depreciation in additional section 263A costs in ending inventory of \$11,250x (\$10,000x from the base layer + \$1,250x from the 2023 increment). Pursuant to paragraph (d)(1)(i)(A) of this section, B reduces AFSI by \$874,650x, the tax COGS depreciation for taxable year 2025.

(G) *Analysis: Taxable year 2025: Covered book COGS depreciation.* X's covered book COGS depreciation for 2025 of \$772,500x is equal to the

covered book inventoriable depreciation in beginning inventory of \$123,750x (\$90,000x from the base layer + \$22,500x from the 2023 increment + \$11,250x from the 2024 increment), plus the \$750,000x of covered book inventoriable depreciation incurred during the year, less \$101,250x of covered book inventoriable depreciation in ending inventory (\$90,000x from the base layer + \$11,250x from the 2023 increment). Pursuant to paragraph (d)(1)(iii) of this section, X adjusts AFSI to disregard the covered book COGS depreciation by increasing AFSI by \$772,500x for 2025.

(iv) *Example 4: Net positive tax depreciation section 481(a) adjustment*—(A) *Facts.* Y timely files a Form 3115, *Application for Change in Accounting Method*, under Rev. Proc. 2015-13 (2015-5 I.R.B. 419) for the calendar year ending December 31, 2024, to change its method of accounting for depreciation for an item of section 168 property, and the Commissioner consents to the change. The adjustment required under section 481(a) to implement the change is positive because the total amount of depreciation taken by Y with respect to the section 168 property under its present method was \$1,000x greater than the total amount of depreciation allowable under the new method of accounting. Y takes the \$1,000x net positive section 481(a) adjustment into account in computing taxable income ratably over the section 481(a) adjustment period of 4 taxable years, beginning with the year of change (2024 through 2027).

(B) *Analysis: Taxable years 2024 through 2027.* Pursuant to paragraph (d)(1)(v) of this section, Y takes the \$1,000x net positive tax depreciation section 481(a) adjustment into account in determining AFSI under section 56A(c)(13) for taxable years 2024 through 2027. Because the adjustment is positive, A increases AFSI by \$250x each year.

(v) *Example 5: Change in method of accounting to treat the replacement of a portion of section 168 property as a deductible repair*—(A) *Facts: Taxable years 2024 through 2026.* On January 1, 2024, Y replaces a component of section 168 property (replacement property), at a cost of \$10,000x. For regular tax purposes, Y capitalized the cost of the replacement property and depreciates it under the general depreciation system by using the 200 percent declining balance method, the half-year convention, and a 5-year recovery period. For regular tax purposes, Y claims \$2,000x (\$10,000x cost x 20%) of deductible tax depreciation in 2024,

\$3,200x ($\$10,000x \times 32\%$) of deductible tax depreciation in 2025, and \$1,920x ($\$10,000x \times 19.2\%$) of deductible tax depreciation in 2026. For AFS purposes, Y depreciates the replacement property over 10 years using the straight-line method and the half-year convention. Y takes into account \$500x ($\$10,000x \text{ cost} / 10 \text{ years} / 2$) of covered book depreciation expense in 2024, and \$1,000x ($\$10,000x \text{ cost} / 10 \text{ years}$) of covered book depreciation expense in each of 2025 and 2026.

(B) *Facts: Taxable year 2027.* Y timely files a Form 3115, *Application for Change in Accounting Method*, under Rev. Proc. 2015–13 for the calendar year ending December 31, 2027, to change its method of accounting from capitalizing and depreciating the cost of the replacement property to deducting those costs as a repair under section 162, and the Commissioner consents to the change. The section 481(a) adjustment to implement the method change is negative \$2,880x (the difference between the total amount of tax depreciation Y claimed under its present method of \$7,120x ($\$2,000x + \$3,200x + \$1,920x$) and the \$10,000x repair expense deductible under Y's new method of accounting). Y takes the \$2,880x negative section 481(a) adjustment into account in computing taxable income for regular tax purposes in 2027, the year of change.

(C) *Analysis: Adjustment to AFSI under paragraph (d)(1) of this section.* Because repair expenditures deductible under section 162 are not property to which section 168 applies, the replacement property is no longer section 168 property. Accordingly, the negative section 481(a) adjustment of \$2,880x does not reduce AFSI for 2027 under paragraph (d)(1)(ii) or (iv) of this section because the negative section 481(a) adjustment is neither tax depreciation nor a tax depreciation section 481 adjustment (that is, it is not attributable to change in method of accounting for depreciation with respect to section 168 property). Further, except as provided in the analysis in paragraph (d)(5)(v)(D) of this section, beginning in 2027, Y will not make any other AFSI adjustments under paragraph (d)(1) of this section with respect to the replacement property because, following the accounting method change, the replacement property is not section 168 property.

(D) *Analysis: Tax capitalization method change AFSI adjustment.* The change in method of accounting implemented by Y for its taxable year ending December 31, 2027, is a tax capitalization method change. Accordingly, Y must compute and take

into account the corresponding tax capitalization method change AFSI adjustment under paragraph (d)(1)(vi) of this section. The tax capitalization method change AFSI adjustment is \$4,620x, and is computed as the difference between the amount determined under paragraph (b)(11)(i) of this section of \$4,620x (the cumulative amount of deductible tax depreciation taken into account under paragraph (d)(1)(ii) of this section with respect to taxable years ending on or after December 31, 2019, and before the tax year of change, of \$7,120x ($\$2,000x + \$3,200x + \$1,920x$), less the cumulative amount of covered book depreciation expense that was disregarded under paragraph (d)(1)(iii) of this section with respect to taxable years ending on or after December 31, 2019, and before the tax year of change, of \$2,500x ($\$500x + \$1,000x + \$1,000x$)), and the amount determined under paragraph (b)(11)(ii) of this section of \$0x (following the tax capitalization method change, the replacement property is not section 168 property and, therefore, no adjustments under paragraph (d)(1) of this section would have been required with respect to taxable years ending on or after December 31, 2019, and before the tax year of change under the new method of accounting). Under paragraphs (d)(1)(vi) and (d)(4) of this section, Y takes the \$4,620x positive tax capitalization method change AFSI adjustment into account as an increase to AFSI ratably over four taxable years beginning in 2027.

(vi) *Example 6: Change in method of accounting to capitalize costs to section 168 property as required under section 263A—(A) Facts: Taxable years 2024 through 2026.* During 2024, Y produces and places in service section 168 property with a cost of \$20,000x. For regular tax purposes, Y depreciates the section 168 property under the general depreciation system by using the 200 percent declining balance method, the half-year convention, and a 5-year recovery period. For regular tax purposes, Y claims \$4,000x ($\$20,000x \text{ cost} \times 20\%$) of deductible tax depreciation in 2024, \$6,400 ($\$20,000x \times 32\%$) of deductible tax depreciation in 2025, and \$3,840 ($\$20,000x \times 19.2\%$) of deductible tax depreciation in 2026. For AFS purposes, Y depreciates the section 168 property over 10 years using the straight-line method and the half-year convention. Y takes into account in its FSI \$1,000x ($\$20,000x \text{ cost} / 10 \text{ years} / 2$) of covered book depreciation expense for 2024 and \$2,000x ($\$20,000x \text{ cost} / 10 \text{ years}$) of covered book depreciation expense for each of 2025 and 2026.

Further, Y deducts \$10,000x of general and administrative costs in computing taxable income for 2024 consistent with its established method of accounting for regular tax purposes with respect to those costs. Y also takes into account the \$10,000x of general and administrative costs as an expense in its FSI for 2024.

(B) *Facts: Taxable year 2027.* During 2027, Y determines that the \$10,000x of general and administrative costs deducted in computing taxable income for 2024 were incurred by reason of the production of the section 168 property Y produced and placed in service in 2024, and therefore Y should have capitalized the \$10,000x of general and administrative costs to the basis of the section 168 property under section 263A and depreciated those costs under sections 167 and 168. Accordingly, Y timely files a Form 3115, *Application for Change in Accounting Method*, under Rev. Proc. 2015–13 for its taxable year ending December 31, 2027, to change its method of accounting to capitalize and depreciate the \$10,000x of general and administrative costs as part of the basis of the corresponding section 168 property. The Commissioner consents to the change. The section 481(a) adjustment required to implement the method change is positive \$2,880x (the difference between the amount of the general and administrative costs Y deducted under its present method of accounting prior to the tax year of change of \$10,000x, and the amount that would have been deducted under Y's proposed method of accounting prior to the tax year of change of \$7,120x (this amount equals the deductible tax depreciation that would have been claimed prior to the tax year of change ($\$2,000x$ for 2024 + $\$3,200x$ for 2025 + $\$1,920x$ for 2026))). Y takes one fourth of the \$2,880x positive section 481(a) adjustment into account in computing taxable income for regular tax purposes for 2027, the tax year of change.

(C) *Analysis: Tax capitalization method change AFSI adjustment.* The change in method of accounting for regular tax purposes implemented by Y for its taxable year ending December 31, 2027, is a tax capitalization method change as defined in paragraph (b)(10) of this section. Accordingly, Y must compute and take into account in AFSI a tax capitalization method change AFSI adjustment pursuant to paragraphs (b)(11) and (d)(1)(vi) of this section. The tax capitalization method change AFSI adjustment equals positive \$2,880x, computed as the difference between the amount determined under paragraph (b)(11)(i) of this section of \$0x (under

Y's prior method of accounting, the \$10,000x of general and administrative costs did not constitute section 168 property as those costs were deducted, and therefore no adjustments under paragraph (d)(1) of this section were made with respect to taxable years ending on or after December 31, 2019, and before the tax year of change) and the amount determined under paragraph (b)(11)(ii) of this section of \$2,880x (the cumulative amount of deductible tax depreciation that would have reduced AFSI under paragraph (d)(1)(ii) of this section with respect to taxable years ending on or after December 31, 2019, and before the tax year of change of \$7,120x (\$2,000x + \$3,200x + \$1,920x), plus the cumulative amount of covered book expense that would have been disregarded under paragraph (d)(1)(iii) of this section with respect to taxable years ending on or after December 31, 2019, and before the tax year of change of \$10,000x). Y takes the \$2,880x positive tax capitalization method change AFSI adjustment into account in computing AFSI ratably over four taxable years beginning in 2027 under paragraph (d)(4) of this section.

(D) *Analysis: Adjustments to AFSI under paragraph (d)(1) of this section for 2027 and subsequent taxable years.* Following the tax capitalization method change, the \$10,000x of general and administrative costs constitute section 168 property as those costs become part of the unadjusted basis of the underlying section 168 property produced and placed in service in 2024, resulting in total unadjusted basis of the section 168 property of \$30,000x. Therefore, in addition to taking into account the tax capitalization method change AFSI adjustment described in paragraph (d)(5)(vi)(C) of this section, Y is required to begin making adjustments to AFSI under paragraph (d)(1) of this section with respect to the general and administrative costs. Accordingly, Y reduces AFSI for 2027 and subsequent taxable years by the deductible tax depreciation it claims for the particular taxable year with respect to the section 168 property (including the \$10,000x of general and administrative costs) under paragraph (d)(1)(ii) of this section (that is, \$3,456x for 2027 (\$30,000x × 11.52%)). Y increases AFSI for 2027 and subsequent taxable years by the covered book depreciation expense with respect to the section 168 property under paragraph (d)(1)(iii) of this section (that is, \$2,000x for 2027). As the covered book expense attributable to the \$10,000x of general and administrative costs was taken into account in Y's FSI for 2024, there is no covered book

expense for Y to disregard under paragraph (d)(1)(iii) of this section when computing AFSI for 2027 and subsequent taxable years with respect to those costs.

(vii) *Example 7: Deductible tax depreciation under section 174—(A) Facts.* Y is engaged in the business of developing chemical products. On January 1, 2024, Y begins a research project in the United States to develop a new product. Y pays or incurs costs for the research project that are considered specified research or experimental expenditures under section 174 of the Code. Y owns a facility that is used exclusively for research. Tax depreciation on the facility is \$200,000x in 2024. Y treats the \$200,000x of 2024 tax depreciation as a specified research or experimental expenditure under section 174. Accordingly, Y capitalizes and amortizes the \$200,000x of 2024 tax depreciation ratably over a 5-year period under section 174(a)(2), beginning at the midpoint of 2024. Thus, \$20,000x of the capitalized amount (\$200,000x depreciation/5 years × 6/12 months) results in a deduction (through section 174 amortization) in computing taxable income in 2024.

(B) *Analysis.* Pursuant to paragraph (d)(1)(ii) of this section, Y reduces AFSI for 2024 by deductible tax depreciation of \$20,000x, which is the portion of the 2024 tax depreciation that reduced Y's taxable income for 2024.

(viii) *Example 8: Section 168 property treated as leased property for AFS purposes—(A) Facts.* On January 1, 2024, Y enters into an agreement to obtain the right to use equipment in its trade or business for seven years. Under the agreement, Y will make seven annual payments of \$10,000x at the end of each year. At the end of the agreement, Y will take ownership of the equipment at no additional cost. For regular tax purposes, Y treats the agreement as a financed purchase of equipment and capitalizes the cost of the equipment of \$57,750x (equal to the present value of the annual payments based on a 5% rate stated in the agreement) and depreciates the equipment under the general depreciation system using the 200 percent declining balance method, the half-year convention, and a 5-year recovery period. For regular tax purposes, Y claims \$11,550x (\$57,750x cost × 20%) of deductible tax depreciation in 2024 and \$18,480x (\$57,750x cost × 32%) of deductible tax depreciation in 2025. For regular tax purposes, Y also incurs interest expense on the remaining liability as of the end of the year equal to \$2,900x for 2024

and \$2,550x for 2025, based on the 5% interest rate stated in the agreement. Y prepares its AFS on the basis of GAAP and accounts for the agreement as a finance lease under ASC 842.

Accordingly, Y capitalizes a right of use asset of \$57,750x (equal to the present value of the annual lease payments) and recognizes right of use asset amortization each year of \$8,250x (\$57,750x right of use asset/7 years). For AFS purposes, Y also recognizes interest expense each year equal to the amounts incurred for regular tax purposes.

(B) *Analysis: Taxable year 2024.* The right of use asset amortization of \$8,250x is a covered book depreciation expense under paragraph (b)(3) of this section. Pursuant to paragraph (d)(1)(iii) of this section, Y makes an adjustment to AFSI to disregard the covered book depreciation expense of \$8,250x for 2024 (equal to the right of use asset amortization of \$8,250x). Pursuant to paragraph (d)(1)(ii) of this section, AFSI is also reduced by the deductible tax depreciation of \$11,550x for 2024. The interest expense of \$2,900x incurred for regular tax and AFS purposes is not a covered book expense as such amount is not reflected in the unadjusted depreciable basis, as defined in § 1.168(b)–1(a)(3), of the equipment for regular tax purposes and, accordingly, does not give rise to an AFSI adjustment under this paragraph (d).

(C) *Analysis: Taxable year 2025.* Pursuant to paragraph (d)(1)(iii) of this section, Y makes an adjustment to AFSI to disregard the covered book depreciation expense of \$8,250x for 2025 (equal to the right of use asset amortization for 2025 of \$8,250x). Pursuant to paragraph (d)(1)(ii) of this section, AFSI is also reduced by the deductible tax depreciation of \$18,480x for 2025. The interest expense of \$2,550x incurred for regular tax and AFS purposes is not a covered book expense as such amount is not reflected in the unadjusted depreciable basis, as defined in § 1.168(b)–1(a)(3), of the equipment for regular tax purposes and, accordingly, does not give rise to an AFSI adjustment under this paragraph (d).

(D) *Analysis: Taxable years 2026 through 2029.* Pursuant to paragraph (d)(1)(iii) of this section, Y continues to make an annual adjustment to AFSI to disregard the covered book depreciation expense of \$8,250x for each year (equal to the right of use asset amortization of \$8,250x). Pursuant to paragraph (d)(1)(ii) of this section, Y continues to reduce AFSI by the deductible tax depreciation for each taxable year. As of the end of 2029, the equipment is fully depreciated for regular tax purposes.

Interest expense incurred for regular tax and AFS purposes for each year is not a covered book expense as such amount is not reflected in the unadjusted depreciable basis, as defined in § 1.168(b)–1(a)(3), of the equipment for regular tax purposes and, accordingly, does not give rise to an AFSI adjustment under this paragraph (d).

(E) *Analysis: Taxable year 2030.*

Although the equipment is fully depreciated for regular tax purposes, the right of use asset amortization of \$8,250x for 2030 continues to be treated as a covered book depreciation expense under paragraph (b)(3) of this section. Pursuant to paragraph (d)(1)(iii) of this section, Y makes an adjustment to AFSI to disregard the covered book depreciation expense of \$8,250x for 2030 (equal to the right of use asset amortization for 2030 of \$8,250x). As the equipment was fully depreciated as of the end of 2029, there is no reduction to AFSI needed under paragraph (d)(1)(ii) of this section, as the deductible tax depreciation for the equipment for 2030 is zero. Interest expense incurred for regular tax and AFS purposes for 2030 is not a covered book expense as such amount is not reflected in the unadjusted depreciable basis, as defined in § 1.168(b)–1(a)(3), of the equipment for regular tax purposes and, accordingly, does not give rise to an AFSI adjustment under this paragraph (d).

(ix) *Example 9: Basis adjustment under section 743(b) to section 168 property—(A) Facts.* PRS1, a partnership for Federal tax and AFS purposes, is owned by X, a C corporation, and A, an individual. PRS1 was formed in 2022, uses the calendar year as its taxable year, and has a calendar-year financial accounting period. For 2024, PRS1 has \$100x of FSI, which includes \$20x of covered book depreciation expense. For regular tax purposes, PRS1's deductible tax depreciation with respect to its section 168 property is \$30x. X has a basis adjustment under section 743(b) with respect to its investment in PRS1 that relates to section 168 property owned by PRS1. As result of the basis adjustment, X is allocated an additional \$5x of tax depreciation that relates to PRS1's section 168 property. X does not have a corresponding equity interest method basis adjustment for AFS purposes.

(B) *Analysis: PRS1's modified FSI adjustment.* In computing its modified FSI for the 2024 taxable year, pursuant to § 1.56A–5(e)(3) and paragraph (d)(2)(i) of this section, PRS1 adjusts the \$100x FSI to disregard the covered book depreciation expense of \$20x, and reduces modified FSI by the deductible

tax depreciation of \$30x, which under paragraph (d)(2)(ii) of this section does not include X's \$5x tax depreciation resulting from the basis adjustment under section 743(b). Accordingly, PRS1's modified FSI is \$90x (\$100x FSI + \$20x covered book depreciation expense – \$30x deductible tax depreciation).

(C) *Analysis: X's adjustments to its share of PRS1's modified FSI.* Pursuant to § 1.56A–5(e)(1)(iv) and (e)(4)(ii)(A) and paragraph (d)(2)(ii) of this section, X adjusts its share of PRS1's modified FSI by deductible tax depreciation resulting from the basis adjustment under section 743(b) attributable to section 168 property under paragraph (d)(2)(ii) of this section. Accordingly, X reduces its share of modified FSI by deductible tax depreciation of \$5x.

(x) *Example 10: Basis adjustment under section 734(b) to section 168 property—(A) Facts.* The facts are the same as in paragraph (d)(5)(ix) of this section (*Example 9*), except that on December 31, 2023, PRS1 distributed property, that is not section 168 property, to A. The distribution of property to A required PRS1 to increase its basis in its remaining partnership property under section 734(b), including its section 168 property. For 2024, as a result of the positive basis adjustment under section 734(b), PRS1 has additional tax depreciation with respect to section 168 property of \$10x, increasing the deductible tax depreciation with respect to section 168 property from \$30x to \$40x. Consistent with paragraph (d)(5)(ix) of this section (*Example 9*), X has a basis adjustment under section 743(b) with respect to its investment in PRS1 that relates to section 168 property owned by PRS1. As result of the basis adjustment, X is allocated an additional \$5x of tax depreciation that relates to PRS1's section 168 property for 2024.

(B) *Analysis: PRS1's modified FSI adjustment.* In computing its modified FSI for the 2024 taxable year, pursuant to § 1.56A–5(e)(3) and paragraph (d)(2)(i) of this section, PRS1 adjusts the \$100x FSI to disregard the covered book depreciation expense of \$20x, and reduces modified FSI by the deductible tax depreciation of \$40x, which under paragraph (d)(2)(iii) of this section includes the deductible tax depreciation resulting from the basis adjustment under section 734(b). Accordingly, PRS1's modified FSI is \$80x (\$100x FSI + \$20x covered book depreciation expense – \$40x deductible tax depreciation).

(C) *Analysis: X's adjustments to its share of PRS1's modified FSI.* Pursuant to § 1.56A–5(e)(1)(iv) and (e)(4)(ii)(A)

and paragraph (d)(2)(ii) of this section, X adjusts its share of PRS1's modified FSI by deductible tax depreciation resulting from the basis adjustment under section 743(b) attributable to section 168 property under paragraph (d)(2)(ii) of this section. Accordingly, X reduces its share of modified FSI by deductible tax depreciation of \$5x.

(e) *AFSI adjustments upon disposition of section 168 property—(1) In general.* Except as otherwise provided in paragraph (e)(7) of this section, if a CAMT entity disposes of section 168 property for regular tax purposes, the CAMT entity adjusts AFSI for the taxable year in which the disposition occurs to redetermine any gain or loss taken into account in the CAMT entity's FSI with respect to the disposition for the taxable year (including a gain or loss of zero) by reference to the CAMT basis (in lieu of the AFS basis) of the section 168 property as of the date of the disposition (disposition date), as determined under paragraph (e)(2)(i) of this section. To the extent the CAMT basis of the section 168 property is negative (for example, because of differences between regular tax basis and AFS basis), this negative amount is required to be recognized as AFSI gain upon disposition of the section 168 property.

(2) *Adjustments to the AFS basis of section 168 property—(i) In general.* For purposes of applying paragraph (e)(1) of this section, and subject to paragraphs (e)(2)(ii) and (e)(3) of this section, the CAMT basis of the section 168 property as of the disposition date is the AFS basis of the section 168 property as of that date—

(A) Decreased by the full amount of tax depreciation with respect to such property as of the disposition date (regardless of whether any amount of tax depreciation was capitalized for regular tax purposes and not yet taken into account as a reduction to AFSI through an adjustment described in paragraph (d)(1)(i) or (ii) of this section as of the disposition date);

(B) Increased by the amount of any covered book expense with respect to such property;

(C) Increased by the amount of any covered book COGS depreciation and covered book depreciation expense that reduced the AFS basis of such property as of the disposition date, including covered book COGS depreciation and covered book depreciation expense with respect to AFS basis increases that are otherwise disregarded for AFSI and CAMT basis purposes (for example, AFS basis increases that are disregarded for AFSI and CAMT basis purposes under §§ 1.56A–18 and 1.56A–19);

(D) Decreased by any reductions to the CAMT basis of such property under § 1.56A–21(c)(4) and (5);

(E) Decreased by any amount allowed as a credit against tax imposed by subtitle A with respect to such property, but only to the extent of the amount that reduces the basis of such property for regular tax purposes; and

(F) Increased or decreased, as appropriate, by the amount of any adjustments to AFS basis that are disregarded for AFSI and CAMT basis purposes under other sections of the section 56A regulations with respect to such property (for example, AFS basis decreases that are disregarded for AFSI and CAMT basis purposes under § 1.56A–8 and AFS basis adjustments that are disregarded for AFSI and CAMT basis purposes under § 1.56A–18 or § 1.56A–19).

(ii) *Special rules regarding adjustments to the AFS basis of section 168 property*—(A) *Property placed in service prior to the effective date of CAMT.* In the case of section 168 property placed in service by a CAMT entity in a taxable year that begins before January 1, 2023, the amounts described in paragraph (e)(2)(i) of this section include amounts attributable to all taxable years beginning before January 1, 2023 (including taxable years beginning on or before December 31, 2019).

(B) *Property acquired in certain transactions to which section 168(i)(7) applies.* In the case of section 168 property that was acquired by a CAMT entity in a transaction that is a covered recognition transaction, as defined in § 1.56A–18(b)(10), with respect to at least one party to the transaction, or in a transaction described in § 1.56A–20, the amounts described in paragraph (e)(2)(i) of this section include only amounts attributable to the period following the transaction, regardless of whether section 168(i)(7) applies to any portion of the transaction for regular tax purposes.

(C) *Coordination with section 56A(c)(5).* The adjustment described in paragraph (e)(2)(i)(E) of this section applies regardless of the treatment of the tax credit for AFS purposes. *See* § 1.56A–8(b) and paragraph (e)(2)(i)(F) of this section.

(D) *Determination of CAMT basis of section 168 property following a change in method of accounting for depreciation or a tax capitalization method change.* In the case of section 168 property for which the CAMT entity made a change in method of accounting for depreciation for regular tax purposes or a tax capitalization method change, the amounts described in paragraph

(e)(2)(i) of this section are determined as though the CAMT entity used the method of accounting to which it changed under the corresponding method change when making the adjustments under paragraph (d)(1) of this section in all taxable years prior to the taxable year in which the disposition of the section 168 property occurs. The immediately preceding sentence applies regardless of whether the full amount of a corresponding tax depreciation section 481(a) adjustment or a tax capitalization method change AFSI adjustment has been taken into account in AFSI under paragraph (d)(1) of this section as of the end of the taxable year in which the disposition of the section 168 property occurs.

(E) *Adjustments to the AFS basis of section 168 property include only the covered book amounts actually disregarded in determining AFSI.* The adjustments described in paragraphs (e)(2)(i)(B) and (C) of this section include only the amounts that were actually disregarded by the CAMT entity under paragraph (d)(1)(iii) of this section in computing its AFSI, modified FSI, or adjusted net income or loss for the relevant taxable years. Accordingly, for a taxable year ending after December 31, 2019, only the amounts disregarded under paragraph (d)(1)(iii) of this section in computing the AFSI, modified FSI, or adjusted net income or loss reported by the CAMT entity as required by the section 56A regulations or other sections of the Code (for example, on its annual return on Form 4626 (or any successor), on its Form 5471, or in accordance with the reporting requirements in § 1.56A–5(h)) for such taxable year with respect to the section 168 property are taken into account in computing the adjustments described in paragraphs (e)(2)(i)(B) and (C) of this section. For a taxable year ending on or before December 31, 2019, or for a taxable year in which the CAMT entity satisfies the simplified method under § 1.59–2(g) (including a taxable year included in the relevant three-taxable-year period), the CAMT entity is deemed to have disregarded the appropriate amounts under paragraph (d)(1)(iii) with respect to the section 168 property for such taxable year.

(3) *Special rules for section 168 property disposed of by a partnership.* If a partnership disposes of section 168 property—

(i) The adjustment under paragraph (e)(1) of this section with respect to the section 168 property is taken into account in determining the partnership's modified FSI under § 1.56A–5(e)(3); and

(ii) For purposes of determining the adjustment under paragraph (e)(1) of this section with respect to the section 168 property, the adjustment to the partnership's AFS basis in the section 168 property under paragraph (e)(2)(i)(A) of this section—

(A) Includes any tax depreciation (including any reduction in tax depreciation) with respect to a section 734(b) basis adjustment;

(B) Excludes any tax depreciation (including any reduction in tax depreciation) with respect to a section 743(b) basis adjustment; and

(C) Excludes any tax depreciation (including any reduction in tax depreciation) with respect to a basis adjustment under § 1.1017–1(g)(2).

(iii) For purposes of determining the adjustment under paragraph (e)(1) of this section with respect to the section 168 property, the adjustment to the partnership's AFS basis in the section 168 property under paragraph (e)(2)(i)(D) of this section excludes any basis adjustment under § 1.1017–1(g)(2), regardless of whether any partner in the partnership is subject to the attribute reduction rules under § 1.56A–21(c)(5) and (6). However, if a partner in the partnership is subject to the attribute reduction rules under § 1.56A–21(c)(5) and (6), the partner increases its distributive share amount (under § 1.56A–5(e)(4)(ii)(B)) for the taxable year of the disposition of the section 168 property by the amount of any basis adjustment under § 1.1017–1(g)(2) with respect to the section 168 property that has not yet been taken into account for regular tax purposes. *See* § 1.1017–1(g)(2)(v).

(iv) If a partner has a basis adjustment under section 743(b) with respect to section 168 property held by a partnership that is disposed of by the partnership for regular tax purposes, the partner—

(A) Increases its distributive share amount (under § 1.56A–5(e)(4)(ii)(B)) for the taxable year of the disposition of the section 168 property by an amount equal to the total amount of any tax depreciation or tax depreciation section 481(a) adjustment(s) with respect to a section 743(b) basis adjustment that decreased the partner's distributive share amount under § 1.56A–5(e)(1)(iv) and (e)(4)(ii)(A) for taxable years prior to the disposition; and

(B) Decreases its distributive share amount (under § 1.56A–5(e)(4)(ii)(B)) for the taxable year of the disposition of the section 168 property by an amount equal to the total amount of any tax depreciation or tax depreciation section 481(a) adjustment(s) with respect to a section 743(b) basis adjustment that

increased the partner's distributive share amount under § 1.56A–5(e)(1)(iv) and (e)(4)(ii)(A) for taxable years prior to the disposition.

(4) *Treatment of amounts recognized in FSI upon the disposition of section 168 property.* Except as provided in other sections of the section 56A regulations, if a CAMT entity disposes of section 168 property for regular tax purposes and recognizes gain or loss from the disposition in its FSI, the gain or loss (as redetermined under paragraph (e)(1) of this section) is recognized for AFSI purposes in the taxable year of the disposition, regardless of whether any gain or loss with respect to the disposition is realized, recognized, deferred, or otherwise taken into account for regular tax purposes.

(5) *Determining the appropriate asset.* For purposes of determining the appropriate asset to ascertain whether section 168 property has been disposed of, the unit of property determination under § 1.263(a)–3(e) does not apply. Instead, section 168 and the regulations under section 168 apply. See § 1.168(i)–8(c)(4).

(6) *Subsequent AFS dispositions.* If section 168 property is disposed of for regular tax purposes before it is treated as disposed of for AFS purposes, any AFS basis recovery with respect to such property that is reflected in FSI following the date such property is disposed of for regular tax purposes is disregarded in determining AFSI.

(7) *Intercompany transactions.* If a member of a tax consolidated group disposes of section 168 property for regular tax purposes in an intercompany transaction, as defined in § 1.1502–13(b)(1)(i), for which the AFS consolidation entries are taken into account under § 1.1502–56A(c)(3)(i) in determining AFSI of the tax consolidated group for the taxable year that includes the intercompany transaction, the tax consolidated group member's AFSI adjustment under paragraph (e)(1) of this section is determined as of the date of the intercompany transaction. However, such AFSI adjustment is deferred, and the tax consolidated group does not adjust AFSI under this paragraph (e), until the taxable year in which the AFS consolidation entries related to the disposition become disregarded under § 1.1502–56A(c)(3)(ii). See § 1.1502–56A(e)(3).

(8) *Examples.* The following examples illustrate the application of the rules in this paragraph (e). For purposes of paragraphs (e)(8)(i) through (ix) of this section (*Examples 1 through 9*), each of X and Y is a corporation that uses the

calendar year as its taxable year and has a calendar-year financial accounting period. Unless otherwise stated, Y has elected out of additional first year depreciation under section 168(k), and the tax depreciation with respect to any section 168 property is not required to be capitalized under any capitalization provision in the Code.

(i) *Example 1: Disposition of section 168 property.*—(A) *Facts.* X is an applicable corporation for the calendar year ending December 31, 2024. On January 1, 2019, X purchased and placed in service Property 1, which is section 168 property, at a cost of \$1,000x. Property 1 qualified for, and X claimed, the 100-percent additional first year depreciation deduction allowable under section 168(k) for its taxable year ending December 31, 2019. For AFS purposes, X depreciates Property 1 over 40 years on a straight-line method and recognizes \$25x (\$1,000x cost/40 years) of covered book depreciation expense in 2019 and each year thereafter until X sells Property 1 (a disposition for regular tax and AFS purposes) on January 1, 2025, for \$900x. For 2025, X takes into account \$50x of net gain from the sale of Property 1 in its FSI (\$900x consideration – \$850x of AFS basis (\$1,000x cost – \$150x accumulated covered book depreciation expense as of January 1, 2025)).

(B) *Analysis: Taxable year 2024.* In determining AFSI for the taxable year ending December 31, 2024, X does not have any tax COGS depreciation or deductible tax depreciation in computing taxable income with respect to Property 1, and thus, the adjustments under paragraphs (d)(1)(i) and (ii) of this section are zero. In addition, X adjusts AFSI under paragraph (d)(1)(iii) of this section to disregard the \$25x of covered book depreciation expense with respect to Property 1.

(C) *Analysis: Taxable year 2025.* To determine the AFSI adjustment for the gain or loss from the sale of Property 1 under paragraph (e)(1) of this section, X determines the CAMT basis of Property 1 by adjusting the AFS basis of Property 1 by the amounts described in paragraph (e)(2)(i) of this section with respect to Property 1, including those amounts attributable to taxable years beginning before January 1, 2023 (as required by paragraph (e)(2)(ii)(A) of this section). Accordingly, the CAMT basis of Property 1 for AFSI purposes is zero (\$850x AFS basis + \$150x accumulated covered book depreciation expense – \$1,000x accumulated tax depreciation). Thus, the redetermined gain on the sale of Property 1 for AFSI purposes is \$900x (\$900x consideration – \$0x CAMT basis), and

X's AFSI adjustment under paragraph (e)(1) of this section required to reflect the redetermined gain is a positive adjustment of \$850x (\$900x redetermined gain – \$50x net gain in FSI).

(ii) *Example 2: Property acquired in a covered nonrecognition transaction.*—(A) *Facts: Property 1.* The facts are the same as in paragraph (e)(8)(i)(A) of this section (*Example 1*), except that X does not sell Property 1.

(B) *Facts: Merger.* On January 1, 2024, X merges with and into Y, a corporation, in a transaction that qualifies as a reorganization under section 368(a)(1)(A) of the Code (Merger). The sole consideration received by X's shareholders in the Merger is Y voting stock. On X's AFS and Y's AFS for the 2024 taxable year, the Merger results in \$165x net gain included in FSI and a corresponding \$165x increase in the AFS basis of the assets exchanged in the transaction. As a result, Y's AFS basis of Property 1 as of January 1, 2024, is \$1,040x (\$1,000x AFS basis on January 1, 2019 – \$125x accumulated covered book depreciation expense + \$165x net gain in FSI from the Merger). For AFS purposes, Y depreciates Property 1 over 40 years on a straight-line method and recognizes \$26x (\$1,040x AFS basis following the Merger/40 years) of covered book depreciation expense in the 2024 taxable year.

(C) *Facts: Disposition of Property 1.* On January 1, 2025, Y sells Property 1 for \$900x. For 2025, Y takes into account \$114x of net loss from the sale of Property 1 in its FSI (\$900x consideration – \$1,014x AFS basis (\$1,040x AFS basis following the Merger – \$26x of covered book depreciation expense for the 2024 taxable year)).

(D) *Analysis: Merger in 2024.* The Merger is a covered nonrecognition transaction, as defined in § 1.56A–18(b)(9). Under § 1.56A–19(c)(1)(i)(A), in computing AFSI resulting from the Merger, X disregards any gain or loss reflected in its FSI resulting from the exchange of X's assets for the Y stock in the Merger. As a result, X's AFSI does not include the \$165x net gain that was taken into account on its AFS as a result of the transfer of its assets to Y in the Merger. Under § 1.56A–19(c)(3)(i)(A), Y disregards any gain or loss reflected in its FSI resulting from the exchange of its stock for X's assets in the Merger. Under § 1.56A–19(c)(3)(ii), Y takes Property 1 (acquired from X in the Merger) with a CAMT basis of \$0x, equal to X's CAMT basis in Property 1 prior to the Merger (\$875x AFS basis + \$125x accumulated covered book depreciation expense – \$1,000x accumulated tax

depreciation). Under § 1.56A–19(c)(4)(i), X's shareholders' AFSI is adjusted to disregard the \$165x net gain in FSI and, thus, includes no gain or loss in AFSI resulting from the exchange of X stock for Y stock in the Merger.

(E) *Analysis: Property 1 in taxable year 2024.* For regular tax purposes, Y is treated as X for purposes of computing tax depreciation with respect to Property 1 under section 168(i)(7). Because Property 1 was already fully depreciated by X prior to the Merger, Y's tax depreciation with respect to Property 1 is zero. As a result, Y does not have any tax COGS depreciation or deductible tax depreciation with respect to Property 1 for 2024, and thus, the adjustments under paragraphs (d)(1)(i) and (ii) of this section are zero. In addition, Y adjusts AFSI under paragraph (d)(1)(iii) of this section to disregard the \$26x of covered book depreciation expense with respect to Property 1.

(F) *Analysis: Taxable year 2025.* To determine the AFSI adjustment for gain or loss resulting from the sale of Property 1 under paragraph (e)(1) of this section, Y determines the CAMT basis of Property 1 by adjusting the AFS basis by the amounts described in paragraph (e)(2)(i) of this section with respect to Property 1, including those amounts attributable to taxable years beginning before January 1, 2024 (as required by paragraph (e)(2)(ii)(A) of this section). Because the Merger in 2024 is a covered nonrecognition transaction, paragraph (e)(2)(ii)(B) of this section does not apply and, thus, depreciation with respect to years prior to the Merger is accounted for in determining the CAMT basis of Property 1. Accordingly, the CAMT basis of Property 1 for AFSI purposes is zero (\$1,014x AFS basis + \$125x accumulated covered book depreciation expense from years prior to the Merger + \$26x accumulated covered book depreciation expense from years after the Merger – \$1,000x of accumulated tax depreciation – \$165x increase in AFS basis from the Merger that is disregarded for CAMT purposes under § 1.56A–19(c)(3)(ii)). Thus, the redetermined gain on the sale of Property 1 for AFSI purposes is \$900x (\$900x consideration – \$0x CAMT basis) and Y's AFSI adjustment under paragraph (e)(1) of this section to reflect the redetermined gain is a positive adjustment of \$1,014x (\$900x redetermined gain – \$114x net loss in FSI).

(iii) *Example 3: Property acquired in a covered recognition transaction—(A) Facts: Property 1 before the transaction.* The facts are the same as in paragraph (e)(8)(i)(A) of this section (*Example 1*),

except that X does not sell Property 1, and Property 1 has a fair market value of \$900x on January 1, 2024.

(B) *Facts: Section 351 transfer with boot.* On January 1, 2024, X transfers Property 1 to Y, an unrelated applicable corporation, in exchange for 100 shares of Y stock with a fair market value of \$700x and \$200x cash in a transaction that qualifies under section 351(b) of the Code (Exchange). The Exchange is made pursuant to an integrated transaction in which unrelated Z transfers non-depreciable Property 2 to Y. Following the Exchange, X and Y are not members of the same controlled group of corporations, as defined in § 1.59–2(e), and do not report their FSI on a consolidated financial statement. On X's AFS for the 2024 taxable year, the Exchange results in \$25x net gain in FSI (\$900x consideration – \$875x AFS basis (\$1,000x cost – \$125x accumulated book depreciation)). On Y's AFS for the 2024 taxable year, Y has a corresponding \$25x increase in the AFS basis of Property 1. As a result, Y's AFS basis of Property 1 is \$900x (\$1,000x AFS basis on January 1, 2019 – \$125x X's accumulated covered book depreciation expense + \$25x net gain in X's FSI from the Exchange). For AFS purposes, Y depreciates Property 1 over 40 years using the straight line method and recognizes \$22.5x (\$900x AFS basis following the Exchange)/40 years) of covered book depreciation expense in the 2024 taxable year.

(C) *Facts: Tax depreciation for Property 1 in taxable year 2024.* Y is treated as acquiring Property 1 on January 1, 2024. For regular tax purposes, under section 168(i)(7), Y is treated as X for purposes of computing depreciation deductions with respect to so much of the basis of Property 1 in the hands of Y as does not exceed the adjusted basis of Property 1 in the hands of X. Because X fully depreciated Property 1 prior to the Exchange, the adjusted basis of Property 1 in the hands of X prior to the Exchange is zero and, thus, the amount of Y's tax depreciation for Property 1 that is determined under section 168(i)(7) is also zero. However, under section 362(a) of the Code, the \$200x cash X received from Y in the Exchange increases Y's adjusted basis of Property 1. Y depreciates the \$200x adjusted basis of Property 1 under the general depreciation system by using the 200 percent declining balance method, 5-year recovery period, and half-year convention. For regular tax purposes, Y recognizes \$40x (\$200x x 20%) of deductible tax depreciation in 2024 with respect to Property 1.

(D) *Facts: Disposition of Property 1.* On January 1, 2025, Y sells Property 1

for \$800x. For 2025, Y takes into account \$77.5x of net loss for the sale of Property 1 in its FSI (\$800x consideration – \$877.5x AFS basis (\$900x AFS basis following the Exchange – \$22.5x of covered book depreciation expense for the 2024 taxable year)).

(E) *Analysis: Exchange in 2024.* Because Y transferred cash to X in addition to Y stock, under § 1.56A–19(g)(4)(i), the Exchange is a covered recognition transaction, as defined in § 1.56A–18(b)(10). Under § 1.56A–19(g)(3)(i), to determine AFSI resulting from the Exchange, X redetermines the gain or loss reflected in FSI by reference to CAMT basis. Thus, X's redetermined gain from the Exchange is \$900x (\$900x consideration – \$0x CAMT basis in Property 1 (\$875x AFS basis + \$125x accumulated covered book depreciation expense – \$1,000x accumulated tax depreciation)) and X's AFSI adjustment to reflect the redetermined gain is a positive adjustment of \$875x (\$900x redetermined gain – \$25x net gain in FSI). Under § 1.56A–19(g)(5)(ii), Y's CAMT basis in Property 1 is equal to its AFS basis of \$900x.

(F) *Analysis: Property 1 in taxable year 2024.* In determining AFSI for the taxable year ending December 31, 2024, Y does not have any tax COGS depreciation in computing taxable income with respect to Property 1, and thus, the adjustment under paragraph (d)(1)(i) of this section is zero. In addition, Y reduces AFSI under paragraph (d)(1)(ii) of this section by deductible tax depreciation of \$40x, and Y adjusts AFSI under paragraph (d)(1)(iii) of this section to disregard the \$22.5x of covered book depreciation expense with respect to Property 1.

(G) *Analysis: Taxable year 2025.* To determine the AFSI adjustment for the gain or loss from the sale of Property 1 under paragraph (e)(1) of this section, Y determines the CAMT basis of Property 1 by adjusting the AFS basis of Property 1 by the amounts described in paragraph (e)(2)(i) of this section, which generally include amounts attributable to taxable years beginning before January 1, 2024 (as required by paragraph (e)(2)(ii)(A) of this section). However, because the Exchange is a covered recognition transaction, under paragraph (e)(2)(ii)(B) of this section, the amounts described in paragraph (e)(2)(i) of this section taken into account to determine Y's CAMT basis of Property 1 include only amounts attributable to the period following the date Property 1 was acquired in the Exchange, or January 1, 2024. Accordingly, the CAMT basis of Property 1 is \$860x (\$877.5x AFS basis (\$900x AFS basis following

the Exchange – \$22.5x of covered book depreciation expense for the 2024 taxable year) + \$22.5x accumulated covered book depreciation expense following the Exchange – \$40x of tax depreciation following the Exchange). Thus, the redetermined loss on the sale of Property 1 for AFSI purposes is \$60x (\$800x consideration – \$860x CAMT basis) and Y's AFSI adjustment under paragraph (e)(1) of this section to reflect the redetermined loss is a positive adjustment of \$17.5x (\$60x redetermined loss – \$77.5x net loss in FSI).

(iv) *Example 4: Property for which a tax credit was claimed—(A) Facts.* X is a domestic corporation that uses the calendar year as its taxable year and has a calendar-year financial accounting period. On January 1, 2018, X purchased and placed in service Property A, which is section 168 property, at a cost of \$1,000x. Property A qualified for, and X claimed, a \$200x investment tax credit for its taxable year ending December 31, 2018. X reduced its regular tax basis in Property A under section 50(c)(1) of the Code and its AFS basis in Property A under the accounting standards used to prepare its AFS to \$800x (\$1,000x cost basis – \$200x basis reduction for the credit received). For regular tax purposes, Property A qualified for, and X claimed, the 100-percent additional first year depreciation deduction allowable under section 168(k) for its taxable year ending December 31, 2018, for the remaining \$800x of regular tax basis. For AFS purposes, X depreciates Property A over 40 years on a straight-line method and recognizes \$20x (\$800x AFS basis/40 years) of depreciation expense in its FSI in 2018 and each year thereafter until it sells Property A (a disposition for regular tax and AFS purposes) on January 1, 2024, for \$900x. For 2024, X recognizes \$220x of net gain for the sale of Property A in its FSI (\$900x consideration – \$680x AFS basis (\$1,000x cost – \$200x investment tax credit – \$120x accumulated depreciation expense as of January 1, 2024)). Under § 1.56A–8(b), X disregards the \$200x investment tax credit claimed with respect to Property A in determining its AFSI. Had X determined its depreciation expense for AFS purposes without regard to the \$200x investment tax credit, X would have instead recognized \$25x (\$1000x AFS basis/40 years) of depreciation expense each year and \$50 of net gain in 2024 from the sale from the sale of Property A (\$900x consideration – \$850 AFS basis (\$1000x cost – \$150x accumulated depreciation expense)).

(B) *Analysis for taxable year 2023.* In determining AFSI for the taxable year

ending December 31, 2023, X does not have any tax COGS depreciation or deductible tax depreciation in computing taxable income with respect to Property A, and thus, the adjustments to AFSI under paragraphs (d)(1)(i) and (ii) of this section are zero. In addition, X is required to adjust AFSI under paragraph (d)(1)(iii) of this section to disregard covered book depreciation expense with respect to Property A. Notwithstanding that the depreciation expense reflected in X's FSI is reduced as a result of the AFS treatment of the investment tax credit, and that the investment tax credit is disregarded under § 1.56A–8(b), covered book depreciation expense for 2023 is \$20x (as opposed to \$25x), which is the amount of depreciation expense that X actually reflects in its FSI for 2023. That is, the adjustment to AFSI under paragraph (d)(1)(iii) of this section encompasses the adjustment required under § 1.56A–8(b).

(C) *Analysis for taxable year 2024.* To determine the AFSI adjustment for the gain or loss from the sale of Property A under paragraph (e)(1) of this section, X determines the CAMT basis of such property by adjusting the AFS basis of such property as of the disposition date by the amounts described in paragraph (e)(2)(i) of this section, including those amounts attributable to taxable years beginning before January 1, 2023 (as required by paragraph (e)(2)(ii)(A) of this section). The AFS basis of Property A as of the disposition date is \$680x. Such amount is decreased by the \$800x of tax depreciation with respect to Property A under paragraph (e)(2)(i)(A) of this section, increased by the \$120x of covered book depreciation expense under paragraph (e)(2)(i)(C) of this section (which is the amount of covered book depreciation expense that reduced the AFS basis of Property A as of the disposition date), decreased by the \$200x investment tax credit under paragraph (e)(2)(i)(E) of this section (which equals the amount by which X reduced its basis in Property A for regular tax purposes), and increased, under paragraph (e)(2)(i)(F) of this section, by the \$200x reduction to AFS basis that is disregarded under § 1.56A–8(b). Accordingly, the CAMT basis of Property A is \$0, and the redetermined gain on the sale of Property A for AFSI purposes is \$900x (\$900x consideration – \$0x CAMT basis). Thus, X's AFSI adjustment under paragraph (e)(1) of this section is an increase to AFSI of \$680x (\$900x redetermined gain – \$220x FSI gain).

(v) *Example 5: Disposition of property that was subject to a tax capitalization method change and is not section 168*

property at time of disposition—(A) General facts. The facts are the same as in paragraph (d)(5)(v) of this section (*Example 5*), except Y transfers the replacement property to a scrap account on January 1, 2030, and sells it on the same day for \$5,000x. Y's AFS basis in the replacement property as of January 1, 2030, is \$4,000x (\$10,000x cost – \$6,000x of cumulative book depreciation expense as of January 1, 2030 (\$500x for 2024, \$1,000x for each year in the period 2025 through 2029, and \$500x for 2030)). Accordingly, Y takes into account \$1,000x of net gain for the sale of the replacement property in its FSI for 2030 (\$5,000x consideration – \$4,000x of AFS basis).

(B) *Analysis: Taxable years 2027 through 2029.* As discussed in the analysis in paragraph (d)(5)(v)(C) of this section, the replacement property is no longer section 168 property beginning in 2027. Therefore, except as provided in the analysis in paragraph (d)(5)(v)(D) of this section (regarding the tax capitalization method change AFSI adjustment), Y does not make any AFSI adjustments under paragraph (d)(1) of this section with respect to the replacement property for taxable years 2027 through 2029. Accordingly, Y's AFSI for taxable years 2027 through 2029 includes the book depreciation expense taken into account in Y's FSI for those years (\$1,000x for each of 2027, 2028, and 2029) and the portion of the tax capitalization method change AFSI adjustment pursuant to paragraph (d)(4) of this section.

(C) *Analysis: Taxable year 2030.* If a CAMT entity disposes of section 168 property, this paragraph (e) requires the CAMT entity to adjust AFSI for the taxable year of the disposition to redetermine any gain or loss taken into account in the CAMT entity's FSI by reference to the CAMT basis of the section 168 property, as determined under paragraph (e)(2)(i) of this section. However, as discussed in the analysis in paragraph (d)(5)(v)(C) of this section, the replacement property is no longer section 168 property under the method of accounting Y changed to under the tax capitalization method change, and therefore the replacement property is not section 168 property at the time of disposition. Accordingly, this paragraph (e) does not apply for purposes of determining the CAMT basis and any corresponding amount of any gain or loss Y takes into account in computing AFSI for 2030 with respect to the disposition of the replacement property. Therefore, the net gain from the sale of the replacement property that Y takes into account in its AFSI for 2030 is the

same as the amount taken into account in Y's FSI for 2030 (\$1,000x).

(vi) *Example 6: Disposition of property that was subject to a tax capitalization method change and is section 168 property at time of disposition*—(A) *General facts.* The facts are the same as in paragraph (d)(5)(vi) of this section (*Example 6*), except Y sells the section 168 property on December 31, 2029, for \$5,000x.

(B) *Facts: Basis of the section 168 property for regular tax and AFS purposes at disposition.* As provided in the analysis in paragraph (d)(5)(vi)(D) of this section, Y's unadjusted basis in the section 168 property is \$30,000x following the tax capitalization method change. Based on Y's depreciation methods of accounting with respect to the section 168 property for regular tax purposes (described in paragraph (d)(5)(vi)(A) of this section), the section 168 property is fully depreciated for regular tax purposes as of December 31, 2029 (that is, cumulative deductible tax depreciation as of December 31, 2029 equals \$30,000x), resulting in adjusted basis for regular tax purposes at disposition of zero. For AFS purposes, Y's cumulative covered book depreciation expense taken into account in Y's FSI as of December 31, 2029 with respect to the section 168 property is \$10,000x (\$1,000x in 2024, \$2,000x in each year for the period 2025 through 2028, and \$1,000x in 2029), resulting in AFS basis at the time of disposition with respect to the section 168 property of \$10,000x (\$20,000x original cost less \$10,000x of cumulative covered book depreciation expense).

(C) *Facts: AFS gain or loss for taxable year 2029.* For its taxable year 2029, Y takes into account a net loss equal to \$5,000x in its FSI with respect to the disposition of the section 168 property (\$5,000x consideration less \$10,000x AFS basis).

(D) *Analysis: AFSI gain or loss for taxable year 2029.* If a CAMT entity disposes of section 168 property, this paragraph (e) requires the CAMT entity to adjust AFSI for the taxable year of the disposition to redetermine any gain or loss taken into account in the CAMT entity's FSI by reference to the CAMT basis of the section 168 property, as determined under paragraph (e)(2)(i) of this section. In addition, pursuant to the special rule in paragraph (e)(2)(ii)(E) of this section, if a CAMT entity made a tax capitalization method change with respect to the section 168 property disposed of, the amounts described in paragraph (e)(2)(i) of this section are determined as though the CAMT entity used the method of accounting it changed to under the corresponding

method change. As provided in the analysis in paragraph (d)(5)(vi)(D) of this section, the \$10,000x of general and administrative costs taken into account in computing taxable income for 2024 constitute section 168 property beginning in 2027. Accordingly, the CAMT basis of the section 168 property for purposes of determining any gain or loss to take into account in AFSI upon the sale of the property on December 31, 2029 is zero (\$10,000x AFS basis + \$10,000x accumulated covered book depreciation expense + \$10,000x of covered book expense (the general and administrative costs taken into account in FSI for 2024) – \$30,000x of accumulated tax depreciation). Pursuant to the special rule in paragraph (e)(2)(ii)(E) of this section, CAMT basis is zero notwithstanding that Y has not yet taken into account in AFSI the full amount of the tax capitalization method change AFSI adjustment that resulted from the tax capitalization method change (as of December 31, 2029, Y has included 75% of the tax capitalization method change AFSI adjustment in AFSI (\$720x for each of 2027, 2028, and 2029)). Thus, the redetermined gain on the sale of the section 168 property for AFSI purposes is \$5,000x (\$5,000x consideration – \$0x CAMT basis), and Y's AFSI adjustment under paragraph (e)(1) of this section required to reflect the redetermined gain is a positive adjustment of \$10,000x (\$5,000x redetermined gain less \$5,000x of net loss in FSI).

(vii) *Example 7: Installment sale under section 453*—(A) *Facts.* X is a CAMT entity that uses the calendar year as its taxable year and has a calendar-year financial accounting period. On January 1, 2018, X purchased for \$550x and placed in service residential rental property (Real Property 1), which is section 168 property. For regular tax purposes, X depreciates Real Property 1 under the general depreciation system by using the straight-line method, a 27.5-year recovery period, and the mid-month convention. X depreciates Real Property 1 for AFS purposes using the same recovery period, depreciation method, and convention that is used for regular tax purposes. X becomes an applicable corporation for the calendar year ending December 31, 2024. On January 1, 2024, X sells Real Property 1 to Y, an unrelated taxpayer, for \$1,000x with the following payment structure: \$100x payable at closing and the remainder payable in equal annual installments over the next 9 years, together with adequate stated interest. As of the date of the installment sale, X's adjusted basis for regular tax

purposes, AFS basis, and CAMT basis for AFSI purposes (as determined under paragraph (e)(1) of this section) for Real Property 1 is \$430x. X does not elect out of the installment method under section 453 of the Code. The gross profit to be realized on the sale is \$570x (\$1,000x selling price – \$430x adjusted regular tax/AFS/CAMT basis). The gross profit percentage is 57% (\$570x gross profit/\$1,000x contract price). No provision in section 56A or the section 56A regulations provides for an adjustment to AFSI to apply the installment method under section 453.

(B) *Analysis.* For taxable year 2024, X realizes \$570x (\$1,000x selling price – \$430x basis) of gain for both regular tax and FSI purposes from the disposition of Real Property 1 in the installment sale. X recognizes \$570x of the gain in FSI, but for regular tax purposes, X recognizes only \$57x (57% of the \$100x payment received in 2024) of the gain, and the remaining \$513x of gain is deferred and recognized as subsequent payments are received under the installment method. Pursuant to paragraph (e)(4) of this section, the installment method in section 453 does not apply for purposes of determining the AFSI gain or loss on the disposition of Real Property 1. Accordingly, X recognizes the entire \$570x FSI gain in AFSI, notwithstanding that \$513x was deferred under section 453 for regular tax purposes.

(viii) *Example 8: Like-kind exchange under section 1031*—(A) *Facts.* The facts are the same as paragraph (e)(8)(vii)(A) of this section (*Example 7*), except that, on January 1, 2024, instead of an installment sale, X transfers Real Property 1 to Y in exchange for Real Property 2 with a fair market value of \$440x and \$20x cash. The exchange qualifies as an exchange of real property held for productive use or investment under section 1031 of the Code. As of the date of the exchange, X's adjusted basis for regular tax purposes, AFS basis, and CAMT basis for AFSI purposes (as determined under paragraph (e)(1) of this section) for Real Property 1 is \$430x. No provision in section 56A or the section 56A regulations provides for an adjustment to AFSI to apply the nonrecognition rules under section 1031.

(B) *Analysis.* For taxable year 2024, X realizes \$30x of gain under section 1001(a) of the Code (\$460x amount realized (\$440x fair market value of replacement Real Property B + \$20x cash) – \$430x adjusted regular tax basis of relinquished property). Of the \$30x realized gain, only \$20x is recognized by X under section 1031(b) for regular tax purposes, as this is the amount of

non-like-kind consideration received in the exchange (\$20x cash). For AFS purposes, X recognizes \$30x of gain in its FSI (\$460x amount realized (\$440x fair market value of Real Property 2 + \$20x cash) – \$430x AFS basis of Real Property 1). Pursuant to paragraph (e)(4) of this section, the nonrecognition rules in section 1031 do not apply for purposes of determining the AFSI gain or loss on the disposition of Real Property 1. Accordingly, for AFSI purposes, X recognizes the entire redetermined gain of \$30x (\$460x amount realized – \$430x of CAMT basis under paragraph (e)(1) of this section) for purposes of computing AFSI, notwithstanding that X recognized only \$20x of the \$30x gain realized for regular tax purposes.

(ix) *Example 9: Replacement property received in a like-kind exchange—(A) Facts.* The facts are the same as in paragraph (e)(8)(viii)(A) of this section (*Example 8*). In addition, for regular tax purposes, X's regular tax basis in the replacement Real Property 2 as of the date of the exchange is \$430x (\$430x adjusted regular tax basis in relinquished Real Property 1 – \$20x cash + \$20x gain recognized). X's AFS basis in Real Property 2 as of the date of the exchange is \$440x, which is the fair market value of Real Property 2 as of the date of the exchange. Under § 1.168(i)–6(c)(3)(ii) and paragraph (c)(4) of this section, X depreciates the \$430x regular tax basis of Real Property 2 over the remaining recovery period of, and using the same depreciation method and convention as that of, Real Property 1. For AFS purposes, X depreciates the \$440x AFS basis of Real Property 2 using the straight-line method and a 27.5-year recovery period and recognizes \$16x (\$440x/27.5 years) of covered book depreciation expense each year. On January 1, 2032, X sells Real Property 2 with a regular tax basis of \$270x (\$430x exchange basis – \$160x accumulated tax depreciation) and a AFS basis of \$312x (\$440x AFS basis – \$128x accumulated book depreciation) to Z for \$500x cash.

(B) *Analysis.* For regular tax purposes, X recognizes a gain on the sale of Real Property 2 of \$230x (\$500x amount realized – \$270x regular tax basis). For AFS purposes, X recognizes a gain of \$188x in its FSI (\$500x amount realized – \$312x AFS basis). Pursuant to paragraph (e)(1) of this section, X adjusts AFSI for taxable year 2032 to redetermine the gain or loss taken to account in FSI with respect to the disposition of Real Property 2 by reference to the CAMT basis of Real Property 2, as determined under paragraph (e)(2)(i) of this section.

Accordingly, the CAMT basis of Real Property 2 for AFSI purposes is \$280x (\$312x AFS basis + \$128x accumulated covered book depreciation expense – \$160x of accumulated tax depreciation). Thus, the redetermined gain on the sale of Real Property 2 for AFSI purposes is \$220x (\$500x consideration – \$280x CAMT basis), and Y's AFSI adjustment under paragraph (e)(1) of this section required to reflect the redetermined gain is a positive adjustment of \$32x (\$220x redetermined gain – \$188x of net gain in FSI).

(x) *Example 10: Section 168 property disposed of by a partnership—(A) Facts.* PRS1, a partnership for Federal tax and AFS purposes, is owned by X, a C corporation, and A, an individual. PRS1 was formed in 2022, uses the calendar year as its taxable year, and has a calendar-year financial accounting period. PRS1 purchased and placed in service section 168 property on January 1, 2023, at a cost of \$210x. For AFS purposes, PRS1 depreciates the section 168 property over 10 years on a straight-line method, recognizing \$21x (\$210x cost basis/10 years) of covered book depreciation expense in 2023 and each year thereafter. For regular tax purposes, the applicable recovery period of the section 168 property is 7 years and PRS1 makes an election under section 168(b)(5) to depreciate the section 168 property on a straight-line basis using the half-year convention. Accordingly, the deductible tax depreciation with respect to the section 168 property is \$15x for 2023 and \$30x for each of 2024 and 2025. In addition, the deductible tax depreciation with respect to the section 168 property is increased in 2024 and subsequent years by \$10x each year as a result of a positive basis adjustment under section 734(b) on December 31, 2023, so that the deductible tax depreciation with respect to the section 168 property is \$40x in each of 2024 and 2025. On January 1, 2026, PRS1 sells the section 168 property for \$100x (a disposition for regular tax and AFS purposes). For 2026, PRS1 takes into account \$47x of net loss from the sale of the section 168 property in its FSI (\$100x consideration – \$147x AFS basis (\$210x cost – \$63x accumulated covered book depreciation expense as of January 1, 2026)).

(B) *Analysis: Taxable years 2023 through 2025.* In determining modified FSI for the 2023, 2024 and 2025 taxable years, PRS1 adjusts its modified FSI under § 1.56A–5(e)(3) and paragraph (d)(2)(i) of this section to disregard the \$21x of covered book depreciation expense each year with respect to the section 168 property and reduces

modified FSI by deductible tax depreciation of \$15x for 2023 and \$40x for each of 2024 and 2025, which under paragraph (d)(2)(iii) of this section includes the deductible tax depreciation with respect to the basis adjustment under section 734(b).

(C) *Analysis: Taxable year 2026.* Under paragraphs (e)(1) and (e)(3)(i) of this section, PRS1 adjusts its modified FSI for 2026 to redetermine any gain or loss taken into account in its FSI with respect to the disposition of the section 168 property by reference to the CAMT basis of the section 168 property, taking into account the adjustments under paragraphs (e)(2)(i) and (e)(3)(ii) of this section. Under paragraphs (e)(2)(i)(A) and (e)(3)(ii)(A) of this section, PRS1 adjusts the AFS basis, decreasing it by the full amount of tax depreciation with respect to the property as of the disposition date. Accordingly, the CAMT basis of the section 168 property is \$115x (\$147x AFS basis + \$63x accumulated covered book depreciation expense – \$95x accumulated tax depreciation). Thus, the redetermined loss on the sale of the section 168 property is \$15x (\$100x consideration – \$115x CAMT basis) and PRS1's adjustment to modified FSI under paragraph (e)(1) of this section to reflect the redetermined loss is a positive adjustment of \$32x (\$15x redetermined loss – \$47x net loss in FSI).

(xi) *Example 11: Section 168 property disposed of by a partnership with a section 743(b) basis adjustment in place—(A) Facts.* The facts are the same as in paragraph (e)(8)(x)(A) of this section (*Example 10*). In addition, on January 1, 2024, X purchased additional interests in PRS1 that resulted in a \$50x basis adjustment under section 743(b) with respect to its investment in PRS1 that relates to section 168 property owned by PRS1. As result of the basis adjustment, X is allocated an additional \$5x of tax depreciation that relates to PRS1's section 168 property for each of 2024 and 2025. X does not have a corresponding equity interest method basis adjustment for AFS purposes.

(B) *Analysis: Taxable years 2024 and 2025.* Pursuant to § 1.56A–5(e)(1)(iv) and (e)(4)(ii)(A) and paragraph (d)(2)(i) of this section, X adjusts its share of PRS1's modified FSI by deductible tax depreciation resulting from the basis adjustment under section 743(b) attributable to section 168 property under paragraph (d)(2)(ii) of this section. Accordingly, X reduces its share of modified FSI by deductible tax depreciation of \$5x for each of 2024 and 2025.

(C) *Analysis: Taxable year 2026.* Pursuant to § 1.56A–5(e)(1)(iv) and (e)(4)(ii)(B) and paragraph (e)(3)(iv) of this section, X increases its distributive share amount for 2026 by an amount equal to the total amount of tax depreciation with respect to its section 743(b) basis adjustment that decreased its distributive share amount under §§ 1.56A–5(e)(1)(iv) and (e)(4)(ii)(A), that is, an increase of \$10x.

(f) *Applicability date.* This section applies to taxable years ending after [DATE OF PUBLICATION OF FINAL RULE IN THE Federal Register].

§ 1.56A–16 AFSI adjustments for qualified wireless spectrum property.

(a) *Overview.* This section provides rules under section 56A(c)(14) of the Code for determining AFSI adjustments with respect to qualified wireless spectrum. Paragraph (b) of this section provides definitions that apply for purposes of this section. Paragraph (c) of this section provides rules for determining the extent to which property is qualified wireless spectrum. Paragraph (d) of this section provides rules for adjusting AFSI for amortization and other amounts with respect to qualified wireless spectrum. Paragraph (e) of this section provides rules for adjusting AFSI upon the disposition of qualified wireless spectrum. Paragraph (f) of this section provides the applicability date of this section.

(b) *Definitions.* For purposes of this section:

(1) *Covered book amortization expense.* The term *covered book amortization expense* means any of the following items that are taken into account in FSI with respect to qualified wireless spectrum—

(i) Amortization expense;

(ii) Other recovery of AFS basis (including from an impairment loss) that occurs prior to the taxable year in which the disposition occurs for regular tax purposes; or

(iii) Impairment loss reversal.

(2) *Covered book wireless spectrum expense.* The term *covered book wireless spectrum expense* means an amount, other than covered book amortization expense, that—

(i) Reduces FSI; and

(ii) Is reflected in the basis for depreciation, as defined in §§ 1.167(g)-1 and 1.197–2(f)(1)(ii) (without regard to any adjustments described in section 1016(a)(2) and (3) of the Code), of qualified wireless spectrum for regular tax purposes.

(3) *Deductible tax amortization.* The term *deductible tax amortization* means tax amortization, as defined in paragraph (b)(5) of this section, that is

allowed as a deduction in computing taxable income.

(4) *Qualified wireless spectrum.* The term *qualified wireless spectrum* means property that meets the requirements of paragraph (c) of this section.

(5) *Tax amortization.* The term *tax amortization* means amortization deductions allowed under section 197 of the Code with respect to qualified wireless spectrum.

(6) *Tax amortization section 481(a) adjustment.* The term *tax amortization section 481(a) adjustment* means the net amount of the adjustments required under section 481(a) of the Code for a change in method of accounting for amortization for any item of qualified wireless spectrum.

(7) *Tax capitalization method change for qualified wireless spectrum.* The term *tax capitalization method change for qualified wireless spectrum* means a change in method of accounting for regular tax purposes involving a change from capitalizing and depreciating costs as qualified wireless spectrum to deducting the costs (or vice versa).

(8) *Tax capitalization method change AFSI adjustment for qualified wireless spectrum.* The term *tax capitalization method change AFSI adjustment for qualified wireless spectrum* means an adjustment to AFSI that is required under paragraph (d)(1) of this section if a CAMT entity makes a tax capitalization method change for qualified wireless spectrum. The tax capitalization method change AFSI adjustment for qualified wireless spectrum is computed separately for each tax capitalization method change for qualified wireless spectrum and equals the difference between the following amounts computed as of the beginning of the tax year of change—

(i) The cumulative amount of adjustments to AFSI under paragraph (d)(1) of this section with respect to the cost(s) subject to the tax capitalization method change for qualified wireless spectrum that were made with respect to taxable years beginning after December 31, 2019, and before the tax year of change; and

(ii) The cumulative amount of adjustments to AFSI under paragraph (d)(1) of this section with respect to the cost(s) subject to the tax capitalization method change for qualified wireless spectrum that would have been made with respect to taxable years beginning after December 31, 2019, and before the tax year of change, if the new method of accounting for the cost(s) had been applied for regular tax purposes in those taxable years.

(c) *Qualified wireless spectrum—(1) In general.* For purposes of section

56A(c)(14) and this section, qualified wireless spectrum is wireless spectrum that is—

(i) Used in the trade or business of a wireless telecommunications carrier;

(ii) An amortizable section 197 intangible under section 197(c)(1) and (d)(1)(D); and

(iii) Acquired after December 31, 2007, and before August 16, 2022.

(2) *Qualified wireless spectrum does not include wireless spectrum that is not depreciable under section 197 for regular tax purposes.* Qualified wireless spectrum does not include wireless spectrum that is not subject to amortization under section 197 for regular tax purposes. For example, if a foreign corporation other than a controlled foreign corporation is not subject to U.S. taxation, then wireless spectrum owned by the foreign corporation is not treated as qualified wireless spectrum.

(d) *AFSI adjustments for amortization and other amounts with respect to qualified wireless spectrum—(1) In general.* The AFSI of a CAMT entity for a taxable year is—

(i) Reduced by deductible tax amortization with respect to qualified wireless spectrum, but only to the extent of the amount allowed as a deduction in computing taxable income for the taxable year;

(ii) Adjusted to disregard covered book amortization expense, covered book wireless spectrum expense, and amounts described in paragraph (e)(5) of this section with respect to qualified wireless spectrum, including qualified wireless spectrum placed in service for regular tax purposes in a taxable year subsequent to the taxable year the wireless spectrum is treated as placed in service for AFS purposes;

(iii) Reduced by any tax amortization section 481(a) adjustment with respect to qualified wireless spectrum that is negative, but only to the extent of the amount of the adjustment that is taken into account in computing taxable income for the taxable year;

(iv) Increased by any tax amortization section 481(a) adjustment with respect to qualified wireless spectrum that is positive, but only to the extent of the amount of the adjustment that is taken into account in computing taxable income for the taxable year;

(v) Increased or decreased, as appropriate, by any tax capitalization method change AFSI adjustment for qualified wireless spectrum in accordance with paragraph (d)(3) of this section; and

(vi) Adjusted for other items as provided in IRB guidance the IRS may publish.

(2) *Special rules for qualified wireless spectrum held by a partnership*—(i) *In general.* If qualified wireless spectrum is held by a partnership, see § 1.56A–5(e) for the manner in which the adjustments provided in paragraph (d)(1) of this section are taken into account by the partnership and its CAMT entity partners under the applicable method described in § 1.56A–5(c).

(ii) *Basis adjustment under section 743(b) of the Code.* If qualified wireless spectrum is held by a partnership, the adjustments provided in paragraphs (d)(1)(i) and (iii) through (vi) of this section do not include any amounts resulting from any basis adjustment under section 743(b) of the Code attributable to the qualified wireless spectrum that are treated as increases or decreases to tax amortization or a tax amortization section 481(a) adjustment for regular tax purposes. See § 1.743–1(j)(4). Instead, such amounts resulting from any basis adjustment under section 743(b) attributable to the qualified wireless spectrum that would have been included in the adjustments provided in paragraphs (d)(1)(i), (ii), and (iv) through (vi) of this section are separately stated to the CAMT entity partners under § 1.56A–5(e)(4)(i) and are taken into account by the CAMT entity partners in the manner provided in § 1.56A–5(e)(4)(ii)(A).

(iii) *Basis adjustment under section 734(b) of the Code.* If qualified wireless spectrum is held by a partnership, the adjustments provided in paragraphs (d)(1)(i) and (iii) through (vi) of this section include amounts resulting from any basis adjustment under section 734(b) of the Code attributable to the qualified wireless spectrum that are treated as increases or decreases to tax amortization or a tax amortization section 481(a) adjustment for regular tax purposes. See § 1.734–1(e).

(iv) *Basis adjustment under § 1.1017–1(g)(2).* If qualified wireless spectrum is held by a partnership, the adjustments provided in paragraphs (d)(1)(i) and (iii) through (vi) of this section do not include any decreases in tax amortization or income amounts for regular tax purposes, as applicable, resulting from any basis adjustment under § 1.1017–1(g)(2) attributable to qualified wireless spectrum (as calculated under § 1.743–1(j)(4)(ii)). Instead, such decreases in tax depreciation or income amounts, as applicable, resulting from any basis adjustment under § 1.1017–1(g)(2) attributable to section 168 property that would have been included in the adjustments provided in paragraphs (d)(1)(i), (ii), and (iv) through (vii) of

this section are separately stated to the CAMT entity partners under § 1.56A–5(e)(4)(i) and are taken into account by the CAMT entity partners in the manner provided in § 1.56A–5(e)(4)(ii)(A).

(3) *Adjustment period for tax capitalization method change AFSI adjustments for qualified wireless spectrum.* A tax capitalization method change AFSI adjustment for qualified wireless spectrum that is negative reduces AFSI under paragraph (d)(1)(v) of this section in the tax year of change by the full amount of the adjustment. A tax capitalization method change AFSI adjustment for qualified wireless spectrum that is positive increases AFSI under paragraph (d)(1)(v) of this section ratably over four taxable years beginning with the tax year of change. For purposes of this paragraph (d)(3), if any taxable year during the four-year spread period for a tax capitalization method change AFSI adjustment for qualified wireless spectrum that is positive is a short taxable year, the CAMT entity takes the adjustment into account as if that short taxable year were a full 12-month taxable year. If, in any taxable year, a CAMT entity ceases to engage in the trade or business to which the tax capitalization method change AFSI adjustment for qualified wireless spectrum relates, the CAMT entity includes in AFSI for such taxable year any portion of the adjustment not included in AFSI for a previous taxable year.

(e) *AFSI adjustments upon disposition of qualified wireless spectrum*—(1) *In general.* Except as otherwise provided in paragraph (e)(7) of this section, if a CAMT entity disposes of qualified wireless spectrum for regular tax purposes, the CAMT entity adjusts AFSI for the taxable year in which the disposition occurs to redetermine any gain or loss taken into account in the CAMT entity's FSI with respect to the disposition for the taxable year (including a gain or loss of zero) by reference to the CAMT basis (in lieu of the AFS basis) of the qualified wireless spectrum as of the date of the disposition (disposition date), as determined under paragraph (e)(2)(i) of this section. To the extent the CAMT basis of the qualified wireless spectrum is negative (for example, because of differences between regular tax basis and AFS basis), this negative amount is required to be recognized as AFSI gain upon disposition of the qualified wireless spectrum.

(2) *Adjustments to the AFS basis of qualified wireless spectrum*—(i) *In general.* For purposes of applying paragraph (e)(1) of this section, and subject to paragraphs (e)(2)(ii) and (e)(3)

of this section, the CAMT basis of the qualified wireless spectrum as of the disposition date is the AFS basis of the qualified wireless spectrum as of that date—

(A) Decreased by the full amount of tax amortization with respect to such property as of the disposition date;

(B) Increased by the amount of any covered book wireless spectrum expense with respect to such property;

(C) Increased by the amount of any covered book amortization expense that reduced the AFS basis of such property as of the disposition date, including covered book amortization expense with respect to AFS basis increases that are otherwise disregarded for AFSI and CAMT basis purposes (for example, AFS basis increases that are disregarded for AFSI and CAMT basis purposes under §§ 1.56A–18 and 1.56A–19);

(D) Decreased by any reductions to the CAMT basis of such property under § 1.56A–21(c)(4) and (5); and

(E) Increased or decreased, as appropriate, by the amount of any adjustments to AFS basis that are disregarded for AFSI and CAMT basis purposes under other sections of the section 56A regulations with respect to such property (for example, AFS basis adjustments that are disregarded for AFSI and CAMT basis purposes under §§ 1.56A–18 and 1.56A–19).

(ii) *Special rules regarding adjustments to the AFS basis of qualified wireless spectrum*—(A) *Qualified wireless spectrum placed in service prior to the effective date of CAMT.* The amounts described in paragraph (e)(2)(i) of this section include amounts attributable to all taxable years beginning before January 1, 2023 (including taxable years beginning on or before December 31, 2019).

(B) *Qualified wireless spectrum acquired in certain transactions to which section 197(f)(2) applies.* In the case of qualified wireless spectrum that was acquired by a CAMT entity in a transaction that is a covered recognition transaction, as defined in § 1.56A–18(b)(10), with respect to at least one party to the transaction, or in a transaction described in § 1.56A–20, the amounts described in paragraph (e)(2)(i) of this section include only amounts attributable to the period following the transaction, regardless of whether section 197(f)(2) applies to any portion of the transaction for regular tax purposes. For rules regarding transactions involving members of a tax consolidated group, see § 1.1502–56A(e).

(C) *Determination of CAMT basis of qualified wireless spectrum following a*

change in method of accounting for amortization or a tax capitalization method change for qualified wireless spectrum. In the case of qualified wireless spectrum for which the CAMT entity made a change in method of accounting for amortization for regular tax purposes or a tax capitalization method change for qualified wireless spectrum, the amounts described in paragraph (e)(2)(i) of this section are determined as though the CAMT entity used the method of accounting to which it changed to under the corresponding method change when making the adjustments under paragraph (d)(1) of this section in all taxable years prior to the taxable year in which the disposition of the qualified wireless spectrum occurs. The immediately preceding sentence applies regardless of whether the full amount of a corresponding tax amortization section 481(a) adjustment or a tax capitalization method change AFSI adjustment for qualified wireless spectrum has been taken into account in AFSI under paragraph (d)(1) of this section as of the end of the taxable year in which the disposition of the qualified wireless spectrum occurs.

(D) *Adjustments to the AFS basis of qualified wireless spectrum include only the covered book amounts actually disregarded in determining AFSI.* The adjustments described in paragraphs (e)(2)(i)(B) and (C) of this section include only amounts that were actually disregarded by the CAMT entity under paragraph (d)(1)(ii) of this section in computing its AFSI, modified FSI, or adjusted net income or loss for the relevant taxable years. Accordingly, for a taxable year ending after December 31, 2019, only the amounts disregarded under paragraph (d)(1)(ii) of this section in computing the AFSI, modified FSI, or adjusted net income or loss reported by the CAMT entity as required by the section 56A regulations or other sections of the Code (for example, on its annual return on Form 4626 (or any successor), on its Form 5471, or in accordance with the reporting requirements in § 1.56A–5(h)) for such taxable year with respect to the qualified wireless spectrum are taken into account in computing the adjustments described in paragraphs (e)(2)(i)(B) and (C) of this section. For a taxable year ending on or before December 31, 2019, or for a taxable year in which the CAMT entity satisfied the simplified method under § 1.59–2(g) (including a taxable year included in the relevant three-taxable-year period), the CAMT entity is deemed to have disregarded the appropriate amounts

under paragraph (d)(1)(ii) of this section with respect to the qualified wireless spectrum for such taxable year.

(3) *Special rule for qualified wireless spectrum disposed of by a partnership.* If a partnership disposes of qualified wireless spectrum—

(i) The adjustment under paragraph (e)(1) of this section with respect to the qualified wireless spectrum is taken into account in determining the partnership's modified FSI under § 1.56A–5(e)(3); and

(ii) For purposes of determining the adjustment under paragraph (e)(1) of this section with respect to the qualified wireless spectrum, the adjustment to the partnership's AFS basis in the qualified wireless spectrum under paragraph (e)(2)(i)(A) of this section—

(A) Includes any curative allocation under § 1.704–3(c) or remedial item under § 1.704–3(d) that is treated as tax amortization, but excludes any other curative allocation or offsetting remedial income item;

(B) Includes any tax amortization (including any reduction in tax amortization) with respect to a section 734(b) adjustment;

(C) Excludes any tax amortization (including any reduction in tax amortization) with respect to a section 743(b) basis adjustment; and

(D) Excludes any tax amortization (including any reduction in tax amortization) with respect to a basis adjustment under § 1.1017–1(g)(2).

(iii) For purposes of determining the adjustment under paragraph (e)(1) of this section with respect to the qualified wireless spectrum, the adjustment to the partnership's AFS basis in the qualified wireless spectrum under paragraph (e)(2)(i)(D) of this section excludes any basis adjustment under § 1.1017–1(g)(2), regardless of whether any partner in the partnership is subject to the attribute reduction rules under § 1.56A–21(c)(5) and (6). However, if a partner in the partnership is subject to the attribute reduction rules under § 1.56A–21(c)(5) and (6), the partner increases its distributive share amount (under § 1.56A–5(e)(4)(ii)(B)) for the taxable year of the disposition of the qualified wireless spectrum by the amount of any basis adjustment under § 1.1017–1(g)(2) with respect to the qualified wireless spectrum that has not yet been taken into account for regular tax purposes. See § 1.1017–1(g)(2)(v).

(iv) If a partner has a basis adjustment under section 743(b) in place with respect to qualified wireless spectrum held by a partnership that is disposed of by the partnership, the partner—

(A) Increases its distributive share amount (under § 1.56A–5(e)(4)(ii)(B)) for

the taxable year of the disposition of the qualified wireless spectrum by an amount equal to the total amount of any tax amortization or tax amortization section 481(a) adjustment(s) with respect to a section 743(b) basis adjustment that decreased the partner's distributive share amount under § 1.56A–5(e)(1)(iv) and (e)(4)(ii)(A) for taxable years prior to the disposition; and

(B) Decreases its distributive share amount (under § 1.56A–5(e)(4)(ii)(B)) for the taxable year of the disposition of the qualified wireless spectrum by an amount equal to the total amount of any tax amortization or tax amortization section 481(a) adjustment(s) with respect to a section 743(b) basis adjustment that increased the partner's distributive share amount under § 1.56A–5(e)(1)(iv) and (e)(4)(ii)(A) for taxable years prior to the disposition.

(4) *Treatment of amounts recognized in FSI upon the disposition of qualified wireless spectrum.* Except as otherwise provided in other sections of the section 56A regulations, if a CAMT entity disposes of qualified wireless spectrum for regular tax purposes and recognizes gain or loss from the disposition in its FSI, the gain or loss (as redetermined under paragraph (e)(1) of this section) is recognized for AFSI purposes in the taxable year of disposition, regardless of whether any gain or loss with respect to the disposition is realized, recognized, deferred, or otherwise taken into account for regular tax purposes.

(5) *Subsequent AFS dispositions.* If qualified wireless spectrum is disposed of for regular tax purposes before it is treated as disposed of for AFS purposes, any AFS basis recovery with respect to such wireless spectrum that is reflected in FSI following the date such wireless spectrum is disposed of for regular tax purposes is disregarded in determining AFSI.

(6) *Intercompany transactions.* If a member of a tax consolidated group disposes of qualified wireless spectrum for regular tax purposes in an intercompany transaction, as defined in § 1.1502–13(b)(1)(i), for which the AFS consolidation entries are taken into account under § 1.1502–56A(c)(3)(i) in determining AFSI of the tax consolidated group for the taxable year that includes the intercompany transaction, the member's AFSI adjustment under paragraph (e)(1) of this section is determined as of the date of the intercompany transaction. However, the AFSI adjustment is deferred, and the tax consolidated group does not adjust AFSI under this paragraph (e), until the taxable year in which the AFS consolidation entries

related to the disposition become disregarded under § 1.1502–56A(c)(3)(ii). *See* § 1.1502–56A(e)(3).

(7) *Example.* The following example illustrates the application of this paragraph (e).

(i) *Facts.* X is an applicable corporation for the calendar year ending December 31, 2024. On January 1, 2019, X acquired Wireless Spectrum 1, which is qualified wireless spectrum, at a cost of \$1,000x. For AFS purposes, X does not amortize Wireless Spectrum 1. For regular tax purposes, X amortizes Wireless Spectrum 1 ratably over 15 years and recognizes \$67x (\$1,000x cost/15 years) of deductible tax amortization in 2019 and each year thereafter until X sells Wireless Spectrum 1 (a disposition for regular tax and AFS purposes) on January 1, 2025, for \$900x. For 2025, X takes into account \$100x of net loss from the sale of Wireless Spectrum 1 in its FSI (\$900x consideration – \$1,000x of AFS basis (\$1,000x cost – \$0x accumulated covered book amortization expense as of January 1, 2025)).

(ii) *Analysis: Taxable year 2024.* In determining AFSI for the taxable year ending December 31, 2024, X does not have any covered book amortization expense or covered book wireless spectrum expense reflected in X's FSI with respect to Wireless Spectrum 1, and thus, the adjustment to disregard the amounts under paragraph (d)(1)(ii) of this section is zero. In addition, X reduces AFSI under paragraph (d)(1)(i) of this section for the \$67x of deductible tax amortization with respect to Wireless Spectrum 1.

(iii) *Analysis: Taxable year 2025.* To determine the AFSI adjustment for the gain or loss from the sale of Wireless Spectrum 1 under paragraph (e)(1) of this section, X determines the CAMT basis of such property by adjusting the AFS basis of such property by the amounts described in paragraph (e)(2)(i) of this section with respect to such property, including those amounts attributable to taxable years beginning before January 1, 2023 (as required by paragraph (e)(2)(ii)(A) of this section). Accordingly, the CAMT basis of Wireless Spectrum 1 for AFSI purposes is \$598x (\$1,000x AFS basis + \$0x accumulated covered book amortization expense – \$402x of accumulated tax amortization). Thus, the redetermined gain on the sale of Wireless Spectrum 1 for AFSI purposes is \$302x (\$900x consideration – \$598x CAMT basis), and X's AFSI adjustment under paragraph (e)(1) of this section to reflect the redetermined gain is a positive adjustment of \$402x (\$302x

redetermined gain – \$100x net loss in FSI).

(f) *Applicability date.* This section applies to taxable years ending after [DATE OF PUBLICATION OF FINAL RULE IN THE **Federal Register**].

§ 1.56A–17 AFSI adjustments to prevent certain duplications or omissions.

(a) *Overview.* This section provides rules under section 56A(c)(15)(A) of the Code regarding AFSI adjustments to prevent the duplication or omission of income, expense, gain, or loss.

Paragraph (b) of this section provides general rules for adjusting AFSI to prevent such duplications or omissions. Paragraph (c) of this section provides rules for adjusting AFSI to prevent duplications or omissions that arise from a change in accounting principle. Paragraph (d) of this section provides rules for adjusting AFSI to prevent duplications or omissions that arise from an AFS restatement. Paragraph (e) of this section provides rules for adjusting AFSI to prevent the omission of amounts disclosed in an auditor's opinion. Paragraph (f) of this section provides rules on timing differences that do not give rise to a duplication or omission. Paragraph (g) of this section provides the applicability date of this section.

(b) *In general.* To prevent duplications or omissions of items of income, expense, gain, or loss, AFSI is adjusted for the items described in paragraphs (c) through (e) of this section and for such other items as required or permitted in other sections of the section 56A regulations (for example, § 1.56A–4(c)(1)). *See* § 1.59–2 for modifications to AFSI to prevent duplications or omissions that apply solely for purposes of section 59(k) of the Code.

(c) *Change in accounting principle—*(1) *In general.* If a CAMT entity implements a change in accounting principle in its AFS, or if the CAMT entity is treated as implementing a change in accounting principle under paragraph (c)(5) of this section, AFSI of the CAMT entity is adjusted to include the accounting principle change amount (as determined under paragraph (c)(2) of this section) for the taxable year(s) provided in paragraphs (c)(3) and (4) of this section.

(2) *Accounting principle change amount—*(i) *In general.* If a CAMT entity implements a change in accounting principle in its AFS for a taxable year, the accounting principle change amount is equal to the amount of the net cumulative adjustment to the CAMT entity's beginning retained earnings for the taxable year that results

from the change in accounting principle, adjusted to—

(A) Disregard any portion of the cumulative retained earnings adjustment attributable to taxable years beginning on or before December 31, 2019; and

(B) Reflect the AFSI adjustments provided in other sections of the section 56A regulations to the extent the cumulative retained earnings adjustment is attributable to FSI items to which those AFSI adjustments apply.

(ii) *Change in AFS under paragraph (c)(5) of this section.* If a CAMT entity is treated as implementing a change in accounting principle under paragraph (c)(5) of this section for a taxable year, the accounting principle change amount is equal to the difference between the CAMT entity's beginning retained earnings reflected in the CAMT entity's current AFS as of the beginning of the taxable year and the CAMT entity's ending retained earnings reflected in the CAMT entity's former AFS as of the end of the immediately preceding taxable year (retained earnings difference), adjusted to—

(A) Disregard any portion of the retained earnings difference attributable to taxable years beginning on or before December 31, 2019; and

(B) Reflect the AFSI adjustments provided in other sections of the section 56A regulations to the extent the retained earnings difference is attributable to FSI items to which those AFSI adjustments apply.

(3) *Adjustment spread period rule—*(i) *Duplications—*(A) *General rule.* Except as provided in paragraph (c)(3)(i)(B) of this section, if an accounting principle change amount prevents a net duplication for AFSI purposes, the amount is included in the CAMT entity's AFSI ratably over four taxable years beginning with the taxable year for which the change in accounting principle is implemented in the CAMT entity's AFS.

(B) *Duplication over different period.* If the CAMT entity is able to demonstrate that the net duplication described in paragraph (c)(3)(i)(A) of this section is reasonably anticipated to occur over a different period (not to exceed fifteen taxable years), then the accounting principle change amount may be included in the CAMT entity's AFSI ratably over such period, beginning with the taxable year for which the change in accounting principle is implemented in the CAMT entity's AFS.

(ii) *Omissions—*(A) *Increase to AFI.* If an accounting principle change amount prevents a net omission for AFSI purposes and results in an increase to

AFSI, the amount is included in the CAMT entity's AFSI ratably over four taxable years beginning with the taxable year for which the change in accounting principle is implemented in the CAMT entity's AFS.

(B) *Decrease to AFSI.* If an accounting principle change amount prevents a net omission for AFSI purposes and results in a decrease to AFSI, the amount is included in the CAMT entity's AFSI in full in the taxable year for which the change in accounting principle is implemented in the CAMT entity's AFS.

(iii) *Short periods.* For purposes of paragraphs (c)(3)(i) and (ii) of this section, if any taxable year during the relevant spread period is a short taxable year, the CAMT entity takes the accounting principle change amount into account as if that short taxable year were a full 12-month taxable year.

(4) *Acceleration of accounting principle change amount.* If, in any taxable year, a CAMT entity ceases to engage in a trade or business to which an accounting principle change amount relates, the CAMT entity includes in AFSI for such taxable year any portion of such amount not included in AFSI for a previous taxable year.

(5) *Use of different priority AFSs in consecutive taxable years.* If the priority of a CAMT entity's AFS (as determined under § 1.56A–2(c)) for the taxable year is different than the priority of the CAMT entity's AFS for the immediately preceding taxable year, the CAMT entity is treated as having implemented a change in accounting principle for the taxable year and adjusts AFSI to the extent required under this paragraph (c).

(6) *Examples.* The following examples illustrate the application of the rules in this paragraph (c). For purposes of these examples, the adjustments to retained earnings due to the change in accounting principle are shown on a pre-tax basis.

(i) *Example 1: Adjustment spread period: duplicated income spread over 2 years—(A) Facts.* X is a CAMT entity that uses the calendar year as its taxable year and has a calendar-year financial accounting period. Under the accounting standards that X uses to prepare its AFS, X reports income from contracts under an acceleration method. The applicable regulatory body that issues the accounting standards that X uses to prepare its AFS changed the accounting standards to require income from contracts accounted for under an acceleration method to be accounted for under an end-of-contract deferral method, effective for financial statements issued for financial accounting periods beginning after December 31, 2023. This change in

accounting standards constitutes a change in accounting principle. On January 1, 2024, X has outstanding contracts that are subject to this change in accounting principle (Affected Contracts), and the term of the longest Affected Contract ends in 2025. In X's 2024 AFS, X makes a \$150x negative cumulative adjustment to its opening retained earnings for 2024 to reverse the income X previously reflected in its FSI after 2019 and prior to 2024 with respect to the Affected Contracts. Pursuant to the new accounting principle, X reflects the duplicated income from the Affected Contracts in FSI for 2024 and 2025.

(B) *Analysis.* Under paragraph (c)(1) of this section, X is required to adjust AFSI by the accounting principle change amount (the \$150x negative cumulative adjustment) for the taxable years provided in paragraph (c)(3) of this section. Because the accounting principle change amount prevents a duplication of income, under paragraph (c)(3)(i)(A) of this section, X takes the negative \$150x accounting principle change amount into account in AFSI ratably over four taxable years beginning with the 2024 taxable year ($\$150x/4$ years = \$37.5x per year). Alternatively, because X is able to demonstrate that the duplicated income is reasonably expected to be included in FSI in 2024 and 2025, under paragraph (c)(3)(i)(B) of this section X may choose to take the negative \$150x accounting principle change amount into account in AFSI ratably over 2024 and 2025 ($\$150x/2$ years = \$75x per year).

(ii) *Example 2: Adjustment spread period: duplicated income spread over 10 years—(A) Facts.* The facts are the same as in paragraph (c)(6)(i)(A) of this section (*Example 1*), except that the term of the longest Affected Contract ends in 2033.

(B) *Analysis.* Under paragraph (c)(3)(i)(A) of this section, X takes the negative \$150x accounting principle change amount into account in AFSI ratably over four taxable years beginning with the 2024 taxable year ($\$150x/4$ years = \$37.5x per year). Alternatively, because X is able to demonstrate that the duplicated income is reasonably expected to be included in FSI over the 10-year period from 2024 through 2033, under paragraph (c)(3)(i)(B) of this section X may choose to take the negative \$150x accounting principle change amount into account in AFSI ratably over the 10-year period from the 2024 taxable year through the 2033 taxable year ($\$150x/10$ years = \$15x per year).

(iii) *Example 3: Adjustment spread period: duplications expected over*

twenty-year period—(A) Facts. The facts are the same as in paragraph (c)(6)(i)(A) of this section (*Example 1*), except that the term of the longest Affected Contract ends in 2043.

(B) *Analysis.* Under paragraph (c)(3)(i)(A) of this section, X takes the negative \$150x accounting principle change amount into account in AFSI ratably over the four-taxable-year period beginning with the 2024 taxable year ($\$150x/4$ years = \$37.5x per year). Alternatively, because X is able to demonstrate that the duplicated income is reasonably expected to be included in FSI over a period in excess of 15 taxable years, under paragraph (c)(3)(i)(B) of this section X may choose to take the negative \$150x accounting principle change amount into account in AFSI ratably over the 15-year period from the 2024 taxable year through the 2038 taxable year ($\$150x/15$ years = \$10x per year).

(d) *Restatement of a prior year's AFS—(1) In general—(i) Adjustments to AFSI.* Except as provided in paragraph (d)(2) of this section, if a CAMT entity issues a restated AFS and, as a result, the CAMT entity's FSI for a taxable year beginning after December 31, 2019, is restated on or after the date the CAMT entity filed its original Federal income tax return for such taxable year (restatement year), the CAMT entity accounts for the restatement by adjusting its AFSI for the taxable year in which the restated AFS is issued (AFSI restatement adjustment). Subject to paragraph (d)(1)(ii) of this section, the AFSI restatement adjustment takes into account the cumulative effect of the restatement on the CAMT entity's FSI for the restatement year, including any restatement of the CAMT entity's beginning retained earnings for the restatement year (but only to the extent the retained earnings restatement is attributable to taxable years beginning after December 31, 2019). See § 1.56A–2(e) for rules relating to the issuance of a restated AFS prior to the date the CAMT entity's return for the taxable year is filed.

(ii) *Further adjustments to AFSI.* The AFSI restatement adjustment described in paragraph (d)(1)(i) of this section is subject to further adjustment if it relates to one or more FSI items to which AFSI adjustments provided in other sections of the section 56A regulations apply. For example, to the extent the AFSI restatement adjustment includes a Federal income tax component, § 1.56A–8 applies to disregard that component.

(2) *Exception for amended return.* If, after issuing a restated AFS for a taxable year, a CAMT entity files an amended

return or an administrative adjustment request under section 6227 of the Code (AAR), as applicable, for the taxable year to adjust taxable income as a result of the restatement, the CAMT entity must use the restated AFS for purposes of determining AFSI on the amended return or AAR, as applicable, rather than make the AFSI restatement adjustment under paragraph (d)(1) of this section.

(3) *Reconciliation of retained earnings in AFS.* A CAMT entity is deemed to have issued a restated AFS for a preceding taxable year described in paragraph (d)(3)(i) of this section, and applies paragraph (d)(1) or (2) of this section, as applicable, if—

(i) The beginning retained earnings reflected in the CAMT entity's AFS for the current taxable year is adjusted to be different than the ending retained earnings reflected in the CAMT entity's AFS for the preceding taxable year (for example, as a result of a prior period adjustment);

(ii) The difference described in paragraph (d)(3)(i) of this section is attributable to items that otherwise would be reflected in the CAMT entity's FSI under the relevant accounting standards used to prepare the CAMT entity's AFS; and

(iii) The CAMT entity is not otherwise subject to paragraph (c) or (d)(1) or (2) of this section.

(4) *Example.* The following example illustrates the application of paragraph (d)(1) of this section.

(i) *Facts.* X is a CAMT entity that uses the calendar year as its taxable year and has a calendar-year financial accounting period. On September 15, 2024, X files its Federal income tax return for taxable year 2023 and reports FSI of \$1,580x, which is the FSI set forth on X's original AFS for 2023, and AFSI of \$2,000x (FSI of \$1,580x adjusted to disregard \$420x of Federal income tax expense under § 1.56A–8). On November 1, 2024, X issues a restated AFS for 2023 that reflects FSI of \$2,370x (which includes a reduction for Federal income tax expense of \$630x). The restated AFS also includes an adjustment to increase the 2023 beginning balance of retained earnings by \$79x (\$100x income – \$21x Federal income tax expense) related to income from a prior period that was underreported. X is not amending its taxable year 2023 Federal income tax return to adjust taxable income for such year. X is not subject to any AFSI adjustments other than the AFSI adjustment under § 1.56A–8.

(ii) *Analysis.* X has restated its FSI for 2023 in a restated AFS issued after X filed its original 2023 Federal income tax return. Pursuant to paragraph (d)(1)

of this section, X accounts for the restatement by adjusting its AFSI for taxable year 2024, the taxable year in which the restated AFS for 2023 is issued. On X's 2024 Federal income tax return, X will increase AFSI by \$1,100x for taxable year 2024, which is the first taxable year for which X has not filed an original return as of the November 1, 2024, restatement date. The \$1,100x adjustment represents the cumulative effect of the restatement on FSI, including any restatement of the beginning balance of retained earnings for the period being restated, or 2023. The \$1,100x consists of \$790x (\$2,370x FSI reported on the restated AFS – \$1,580x FSI reported on the original AFS), plus \$210x (\$630x Federal income tax expense reported on the restated AFS – \$420x Federal income tax expense reported on the original AFS, which is required to be disregarded under section § 1.56A–8 in determining AFSI), plus \$100x (\$79x net adjustment to the 2023 beginning balance of retained earnings reported on the restated AFS for 2023 + \$21x disregarded Federal income tax expense (under § 1.56A–8)).

(e) *Adjustment for amounts disclosed in an auditor's opinion.*—(1) *In general.* AFSI is adjusted to include amounts disclosed in an auditor's opinion described in § 1.56A–2(d)(2) and (3) to the extent such amounts would have increased FSI for the taxable year to which the auditor's opinion relates had the amounts been reflected in the CAMT entity's AFS for such taxable year (auditor increase to FSI). No AFSI adjustment is required to the extent the auditor increases to FSI were included in FSI for a prior taxable year. Moreover, if FSI for a subsequent taxable year includes amounts included in AFSI pursuant to an adjustment under this paragraph (e), AFSI for the subsequent taxable year is adjusted to prevent any duplication of income.

(2) *Further adjustments to AFSI.* The auditor increase to FSI described in paragraph (e)(1) of this section is subject to further adjustment if it relates to one or more FSI items to which AFSI adjustments provided in other sections of the section 56A regulations apply. For example, to the extent the auditor increase to FSI includes a Federal income tax component, § 1.56A–8 applies to disregard that component.

(f) *No adjustment for timing differences.* No adjustment to AFSI is permitted to account for differences between the taxable year in which an item is taken into account in FSI and the taxable year in which that item is taken into account for regular tax purposes, even if the timing difference for that

item originates in a taxable year that begins prior to January 1, 2023, and reverses in a taxable year that begins on or after January 1, 2023.

(g) *Applicability date.* This section applies to taxable years ending after September 13, 2024.

§ 1.56A–18 AFSI, CAMT basis, and CAMT retained earnings resulting from certain corporate transactions.

(a) *Overview.*—(1) *Scope.* Except as provided in paragraph (a)(2) of this section, this section provides rules under section 56A(c)(2)(C) and (c)(15)(B) of the Code for determining the AFSI, CAMT basis, and CAMT earnings consequences resulting from specified transactions between a domestic corporate CAMT entity and an individual or other CAMT entity, including a CAMT entity that is a shareholder of a domestic corporate CAMT entity. Paragraph (a)(3) of this section provides cross-references to other applicable rules. Paragraph (b) of this section provides definitions that apply for purposes of this section and §§ 1.56A–19 and 1.56A–21. Paragraph (c) of this section provides operating rules for this section and §§ 1.56A–19 and 1.56A–21. Paragraph (d) of this section provides rules for determining the CAMT consequences of certain non-liquidating stock and property distributions. Paragraph (e) of this section provides rules for determining the CAMT consequences of certain distributions for which an election under section 336(e) of the Code (section 336(e) election) is made. Paragraph (f) of this section provides rules for determining the CAMT consequences of liquidating distributions. Paragraph (g) of this section provides rules for determining the CAMT consequences of stock sales. Paragraph (h) of this section provides rules for determining the CAMT consequences of asset sales. Paragraph (i) of this section provides the applicability date of this section.

(2) *Exceptions.* This section and § 1.56A–19 do not apply to any transaction—

(i) Between members of the same tax consolidated group during any period that they are shareholders of other members of the same tax consolidated group (see § 1.1502–56A(c)(3) for treatment of members of a tax consolidated group when a party to a transaction or property subject to a transaction described in this section or § 1.56A–19 leaves a tax consolidated group); or

(ii) That is a covered asset transaction (as defined in § 1.56A–4(b)(1)), a section 338(g) transaction (as defined in

§ 1.56A–4(b)(3)), or an acquisition or transfer of stock of a foreign corporation subject to § 1.56A–4(c)(1).

(3) *Cross-references*—(i) *Corporate reorganizations and organizations*. For rules regarding the AFSI, CAMT basis, and CAMT earnings consequences resulting from certain corporate reorganizations and organizations not within a tax consolidated group, *see* § 1.56A–19.

(ii) *Transactions within a tax consolidated group*. For rules regarding the AFSI, CAMT basis, and CAMT earnings consequences resulting from transactions between members of the same tax consolidated group (including rules regarding the timing of those determinations), *see* § 1.1502–56A.

(iii) *Deferral of loss from disposition between certain members of a CAMT-related group*. For rules that require the deferral of any loss resulting from a sale, exchange, or any other disposition of property between two or more CAMT entities that are treated as a single employer under section 52(a) and (b) of the Code, *see* § 1.56A–26(b).

(iv) *Certain arrangements disregarded or recharacterized*. For rules pursuant to which the Commissioner may disregard or recharacterize arrangements entered into by one or more CAMT entities, *see* § 1.56A–26(c).

(v) *Clear reflection of income requirement*. For rules regarding adjustments to AFSI to reflect the principles of section 482 of the Code and the regulations under section 482, *see* § 1.56A–26(d).

(vi) *AFSI and CAMT attribute rules regarding troubled corporations*. For rules to determine the CAMT consequences resulting from an insolvency or bankruptcy of a CAMT entity (including an emergence from bankruptcy of a CAMT entity), *see* § 1.56A–21.

(vii) *Financial statement net operating losses*. For rules regarding the apportionment, transfer, and use of FSNOLs by a CAMT entity, *see* §§ 1.56A–23 and 1.1502–56A.

(viii) *Minimum tax credits*. For rules regarding limitations on the use of minimum tax credits, *see* section 383 of the Code and § 1.383–1.

(ix) *AFSI history*. For rules regarding the determination of AFSI history of a CAMT entity described in this section, *see* § 1.59–2(f).

(x) *Certain stock owned by insurance companies*. For rules regarding the AFSI consequences of an insurance company owning stock that relates to the insurance company's obligations under certain insurance contracts, *see* § 1.56A–22(c).

(b) *Definitions*. For purposes of this section and §§ 1.56A–19 and 1.56A–21:

(1) *Acquiror corporation*—(i) *Covered nonrecognition transaction*. In the case of a covered nonrecognition transaction, the term *acquiror corporation* means a party to the covered nonrecognition transaction that is—

(A) An *acquiring corporation* within the meaning of § 1.368–2 (that is, an acquiring corporation with regard to a series of one or more transactions that qualify as a reorganization under section 368(a)(1)(A) through (C) and (G) of the Code); or

(B) A *transferee corporation* within the meaning of § 1.368–2(l)(1) (that is, a transferee corporation with regard to a series of one or more transactions that qualify as a reorganization under section 368(a)(1)(D)), other than a controlled corporation.

(ii) *Covered recognition transaction*. In the case of a covered recognition transaction, the term *acquiror corporation* means a corporate party to the covered recognition transaction that is treated on the corporate party's AFS as acquiring stock or assets of a target corporation (for example, an acquiror under the Accounting Standards Codification). *See generally* paragraphs (g) and (h) of this section, which provide rules for determining the CAMT consequences of stock and asset sales.

(2) *B reorganization*. The term *B reorganization* means a series of one or more transactions that qualify as a reorganization under section 368(a)(1)(B).

(3) *CAMT current earnings*. The term *CAMT current earnings*, for a taxable year of a corporate CAMT entity, means the AFSI of the corporate CAMT entity for the taxable year, taking into account the adjustments required by this section and § 1.56A–19 (not otherwise reflected in AFSI).

(4) *CAMT earnings*. The term *CAMT earnings* means CAMT current earnings and CAMT retained earnings (as appropriate).

(5) *CAMT retained earnings*—(i) *In general*. The term *CAMT retained earnings*, with regard to a corporate CAMT entity, means the amount obtained by adding—

(A) The amount of earnings and profits (within the meaning of section 312 of the Code) of the CAMT entity as of the beginning of the first taxable year of the CAMT entity beginning after December 31, 2019 (even if negative); and

(B) The cumulative balance of the CAMT current earnings of the corporate CAMT entity, taking into account all taxable years of the corporate CAMT entity beginning after December 31,

2019 (that is, all subsequent taxable years).

(ii) *Timing of determination*. The CAMT retained earnings for a year of a corporate CAMT entity is determined immediately before the beginning of the corporate CAMT entity's current taxable year.

(6) *Component transaction*. The term *component transaction* means, with regard to a party to a transaction specified in this section or § 1.56A–19, an element of the transaction (for example, an actual or a deemed transfer or other disposition of property by the party) the regular tax consequences of which are determined solely with regard to that party. For example, a section 351 transferor and section 351 transferee in the same section 351 exchange each would be a party to separate transfers of property that compose separate component transactions of that exchange, the regular tax consequences of which are determined under separate sections of the Code. For rules regarding component transactions, *see* paragraph (c)(5) of this section.

(7) *Controlled corporation*—(i) *Covered nonrecognition transaction*. In the case of a covered nonrecognition transaction, the term *controlled corporation* means a party to the covered nonrecognition transaction that is a controlled corporation described in section 355(a)(1)(A) of the Code.

(ii) *Covered recognition transaction*. In the case of a covered recognition transaction, the term *controlled corporation* means a party—

(A) To a covered recognition transaction that qualifies as a section 355 transaction; and

(B) That is treated as a corporation the stock of which is distributed by another corporation on the AFS of that other corporation (for example, a *spinnee* under the Accounting Standards Codification).

(8) *Corporate dissolution*. The term *corporate dissolution* means—

(i) The complete dissolution of a corporation pursuant to a plan reported on the original (but not a supplemented or an amended) Form 966, *Corporate Dissolution or Liquidation* (or any successor form); or

(ii) A deemed dissolution (for example, pursuant to an election to be treated as a disregarded entity under § 301.7701–3 of this chapter).

(9) *Covered nonrecognition transaction*. The term *covered nonrecognition transaction* means a component transaction that, with regard to a party—

(i) Qualifies for nonrecognition treatment for regular tax purposes, respectively, under section 305, 311(a),

332, 337, 351, 354, 355, 357, 361, or 1032(a) of the Code, or a combination thereof, solely with regard to that party;

(ii) Is not treated as resulting in the recognition of any amount of gain or loss for regular tax purposes solely with regard to that party; and

(iii) Is not treated as a covered recognition transaction under any provision of this section or § 1.56A-19.

(10) *Covered recognition transaction.* The term *covered recognition transaction* means a component transaction consisting of a transfer, sale, contribution, distribution, or other disposition of property that, with regard to a party, does not qualify as a covered nonrecognition transaction solely with regard to the party (and therefore, for example, could result in the recognition of gain or loss for regular tax purposes to the party).

(11) *Covered transaction.* The term *covered transaction* means a covered recognition transaction or a covered nonrecognition transaction (as appropriate).

(12) *Distributing corporation*—(i) *Covered nonrecognition transaction.* In the case of a covered nonrecognition transaction, the term *distributing corporation* means a party to the covered nonrecognition transaction that—

(A) Distributes stock or stock rights of the corporation under section 311(a); or

(B) With regard to a section 355 transaction, distributes stock or securities of a controlled corporation under section 355(c) or distributes stock or securities, or money or other property, of a controlled corporation under section 361(c).

(ii) *Covered recognition transaction.* In the case of a covered recognition transaction, the term *distributing corporation* means a party to the covered recognition transaction that—

(A) Distributes property in a distribution described in section 311(b);

(B) Distributes stock in a distribution described in section 336(e); or

(C) With regard to a section 355 transaction, is treated on the party's AFS as the corporation that distributes the stock or securities of another corporation (for example, a *spinnor* under the Accounting Standards Codification) or distributes money or other property (in addition to stock or securities) of that other corporation.

(13) *Distributing corporation shareholder or security holder.* The term *distributing corporation shareholder or security holder* means, with regard to a section 355 transaction, a CAMT entity that receives in a distribution with respect to, or in exchange for,

distributing corporation stock or securities (as appropriate)—

(i) Stock or securities of a controlled corporation under section 355; or

(ii) Money or other property (in addition to stock or securities) of the controlled corporation under section 356 of the Code.

(14) *Distribution recipient.* The term *distribution recipient* means, with regard to a covered transaction, a CAMT entity that receives from a distributing corporation—

(i) A distribution of property described in section 301 of the Code;

(ii) A distribution in redemption of stock of the distributing corporation under section 302 of the Code; or

(iii) A distribution of stock or stock rights of the distributing corporation under section 305.

(15) *E reorganization.* The term *E reorganization* means a series of one or more transactions that qualify as a reorganization under section 368(a)(1)(E).

(16) *F reorganization.* The term *F reorganization* means a series of one or more transactions that qualify as a reorganization under section 368(a)(1)(F).

(17) *Liquidating corporation*—(i) *Covered nonrecognition transaction.* In the case of a covered nonrecognition transaction, the term *liquidating corporation* means a party to the covered nonrecognition transaction that distributes, through one or more distributions, its property in a complete liquidation to which section 337(a) of the Code applies.

(ii) *Covered recognition transaction.* In the case of a covered recognition transaction, the term *liquidating corporation* means a party to the transaction that distributes, through one or more distributions, all of its property in—

(A) A complete liquidation to which section 336(a) applies; or

(B) Any other corporate dissolution.

(18) *Liquidation recipient.* The term *liquidation recipient* means, with regard to a covered transaction, a CAMT entity that receives one or more distributions of property from a liquidating corporation as part of—

(i) A complete liquidation under sections 331 and 336 of the Code, or sections 332 and 337, as appropriate; or

(ii) Any other corporate dissolution.

(19) *Party.* The term *party* means, with regard to a covered transaction—

(i) An acquiror corporation;

(ii) An acquiror corporation shareholder;

(iii) A controlled corporation;

(iv) A distributing corporation;

(v) A distributing corporation shareholder or security holder;

(vi) A liquidating corporation;

(vii) A liquidation recipient;

(viii) A recapitalizing corporation;

(ix) A recapitalizing corporation shareholder or security holder;

(x) A resulting corporation;

(xi) A section 351 transferee;

(xii) A section 351 transferor;

(xiii) A target corporation;

(xiv) A target corporation shareholder or security holder;

(xv) A transferor corporation within the meaning of § 1.368-2(l)(1); and

(xvi) A transferor corporation shareholder or security holder.

(20) *Property.* The term *property* means any asset, including stock.

(21) *Qualified property.* The term *qualified property* has the meaning given the term in section 355(c)(2)(B) or 361(c)(2)(B) (as appropriate).

(22) *Recapitalizing corporation*—(i) *Covered nonrecognition transaction.* In the case of a covered nonrecognition transaction, the term *recapitalizing corporation* means a corporate party to the covered nonrecognition transaction that recapitalizes its capital structure in a transaction that qualifies as an E reorganization or an exchange to which section 1036 of the Code applies.

(ii) *Covered recognition transaction.* In the case of a covered recognition transaction, the term *recapitalizing corporation* means a corporate party to the covered recognition transaction through which the party recapitalizes its capital structure.

(23) *Recapitalizing corporation shareholder or security holder.* The term *recapitalizing corporation shareholder or security holder* means, with regard to an E reorganization, a CAMT entity that receives in exchange for recapitalizing corporation stock or securities (as appropriate)—

(i) Stock or securities of a recapitalizing corporation under section 354; or

(ii) Money or other property (in addition to stock or securities) of the recapitalizing corporation under section 301.

(24) *Resulting corporation*—(i) *Covered nonrecognition transaction.* In the case of a covered nonrecognition transaction, the term *resulting corporation* means a resulting corporation within the meaning given the term in § 1.368-2(m)(1) (that is, a resulting corporation with regard to an F reorganization) that is a party to the covered nonrecognition transaction.

(ii) *Covered recognition transaction.* In the case of a covered recognition transaction, the term *resulting corporation* means a corporate party—

(A) To a covered nonrecognition transaction that qualifies as an F reorganization; and

(B) That makes a distribution of property to a transferor corporation shareholder or security holder (see paragraph (d)(1)(ii) of this section for rules addressing non-liquidating corporate distributions).

(25) *Section 351 exchange*. The term *section 351 exchange* means one or more transfers by one or more persons (that is, section 351 transferors) of property to a corporation (that is, a section 351 transferee) in exchange for stock of that corporation, or stock and money or other property, that qualifies as an exchange under section 351.

(26) *Section 351 transferee*—(i) *Covered nonrecognition transaction*. In the case of a covered nonrecognition transaction, the term *section 351 transferee* means a party to the section 351 exchange that transfers solely that party's stock to a section 351 transferor, in exchange for money or other property from the section 351 transferor, in a transaction to which section 1032(a) applies.

(ii) *Covered recognition transaction*. In the case of a covered recognition transaction, the term *section 351 transferee* means a party to the section 351 exchange that transfers money or other property (in addition to that party's stock) to a section 351 transferor, in exchange for money or other property from the section 351 transferor, in a transaction to which section 1032(a) applies.

(27) *Section 351 transferor*—(i) *Covered nonrecognition transaction*. In the case of a covered nonrecognition transaction, the term *section 351 transferor* means a party to the section 351 exchange that transfers property to a section 351 transferee solely in exchange for stock of the section 351 transferee in a transaction that qualifies the party solely for nonrecognition treatment under section 351(a).

(ii) *Covered recognition transaction*. In the case of a covered recognition transaction, the term *section 351 transferor* means a party to the section 351 exchange that—

(A) Transfers property to a section 351 transferee in a transaction to which section 351 applies; and

(B) Receives from the section 351 transferee money or other property (in addition to stock of the section 351 transferee) under section 351(b).

(28) *Section 355 transaction*. The term *section 355 transaction* means—

(i) A series of transactions that qualify as a reorganization under sections 355(a) and 368(a)(1)(D) or (G), including a transfer of property by a distributing corporation to a controlled corporation and one or more distributions of controlled corporation stock or

controlled corporation securities that are in pursuance of the plan of reorganization; or

(ii) A distribution of controlled corporation stock or controlled corporation securities that qualifies under section 355 (or so much of section 356 as relates to section 355) and that is not undertaken pursuant to a plan of reorganization.

(29) *Target corporation*—(i) *Covered nonrecognition transaction*. In the case of a covered nonrecognition transaction, the term *target corporation* means a party to the covered nonrecognition transaction that is—

(A) A target corporation within the meaning of § 1.368–2 (that is, a target corporation with regard to a series of one or more transactions that qualify as a reorganization under section 368(a)(1)(A) through (C) and (G)); or

(B) A transferor corporation within the meaning of § 1.368–2(l)(1).

(ii) *Covered recognition transaction*. In the case of a covered recognition transaction, the term *target corporation* means a corporate party to the covered recognition transaction the property (that is, stock or assets) of which is recorded as acquired on the AFS of the acquiror corporation (for example, an acquiree under the Accounting Standards Codification).

(30) *Target corporation shareholder or security holder*. The term *target corporation shareholder or security holder* means, with regard to a series of one or more transactions that qualify as a reorganization described in paragraph (b)(30)(i) of this section, a CAMT entity that receives in exchange for target corporation stock or securities (as appropriate)—

(i) Stock or securities of an acquiror corporation under section 354; or

(ii) Money or other property of the acquiror corporation under section 356 (in addition to stock or securities of the acquiror corporation).

(31) *Transferor corporation*. In the case of a covered nonrecognition transaction, the term *transferor corporation* means a *transferor corporation* within the meaning given the term in § 1.368–2(m)(1) (that is, a transferor corporation with regard to an F reorganization) that is a party to the covered nonrecognition transaction.

(32) *Transferor corporation shareholder or security holder*. The term *transferor corporation shareholder or security holder* means, with regard to an F reorganization, a CAMT entity that receives in exchange for transferor corporation stock or securities (as appropriate)—

(i) Stock or securities of a resulting corporation under section 354; or

(ii) Money or other property of the resulting corporation under section 301 or 302 (in addition to stock or securities of the acquiror corporation).

(c) *Operating rules for this section and § 1.56A–19*—(1) *Treatment of stock*. If a shareholder that is a CAMT entity owns stock of a corporate CAMT entity (for example, a subsidiary), for purposes of applying this section and § 1.56A–19 with regard to the shareholder and subsidiary, as appropriate—

(i) The stock is treated as a directly held asset of the shareholder; and

(ii) The shareholder is not treated as directly holding the assets of the subsidiary.

(2) *FSI resulting from stock investments*—(i) *In general*. Except as provided in paragraph (c)(2)(ii) of this section, if a CAMT entity holds stock in a domestic corporation that is not a member of a tax consolidated group of which the CAMT entity is a member, the CAMT entity—

(A) Disregards in computing the CAMT entity's AFSI any amount reflected in the CAMT entity's FSI that results from holding stock in the domestic corporation (for example, the FSI of a shareholder CAMT entity that otherwise would result from the application of the equity method or fair value method with regard to the shareholder CAMT entity's investment in stock of the subsidiary domestic corporation);

(B) Disregards any adjustment to AFS basis of the stock of that corporation on the CAMT entity's AFS, and instead adjusts CAMT basis in the stock as provided in this section or § 1.56A–19; and

(C) Disregards any adjustments to AFS retained earnings resulting from the ownership of that stock, and instead adjusts CAMT retained earnings as provided in this section or § 1.56A–19.

(ii) *Exceptions*. Paragraph (c)(2)(i) of this section does not apply with regard to—

(A) Amounts that result from a transaction described in paragraphs (d) through (h) of this section or in § 1.56A–19; or

(B) Gains or losses reflected in the CAMT entity's FSI that result from the remeasurement (to fair value) of its existing or remaining stock in a domestic corporation (that is, a subsidiary) when the CAMT entity acquires or disposes of some (but not all) stock in that subsidiary domestic corporation in a covered recognition transaction.

(iii) *Characterization of FSI resulting from stock investments*—(A) *In general*. Except as otherwise provided in paragraph (c)(2)(iii)(B) of this section,

the shareholder of a distributing corporation or a target corporation determines the character of any distribution resulting from a transaction described in paragraphs (d) through (h) of this section or in § 1.56A–19 using the distributing corporation's or target corporation's regular tax earnings and profits.

(B) *Exception.* If the requirements of each of paragraphs (c)(2)(iii)(B)(1) and (2) of this section are met, the shareholder of a distributing corporation or a target corporation determines the character of any distribution resulting from a transaction described in paragraphs (d) through (h) of this section or in § 1.56A–19 as set forth in paragraphs (d) through (h) of this section or in § 1.56A–19, respectively.

(1) Immediately before the transaction, the shareholder owns at least 25 percent (by vote and value) of the stock or the distributing corporation or the target corporation.

(2) The distributing corporation or the target corporation would not qualify for the simplified method for determining applicable corporation status described in § 1.59–2(g)(2).

(3) *Purchase accounting and push down accounting for stock acquisitions.* If an acquiror corporation acquires stock of a target corporation in a covered transaction for regular tax purposes, purchase accounting and push down accounting adjustments (as applicable) that otherwise would be reflected in an acquiror corporation's AFS basis, balance sheet accounts, or FSI are disregarded for purposes of determining the acquiror corporation's AFSI, CAMT basis, and CAMT earnings (as appropriate).

(4) *Purchase accounting and push down accounting for asset acquisitions.* If an acquiror corporation acquires assets of a target corporation in a covered transaction for regular tax purposes, then for purposes of determining the acquiror corporation's AFSI, CAMT basis, and CAMT earnings (as appropriate)—

(i) If the transaction is a covered recognition transaction, any purchase accounting adjustments reflected in a CAMT entity's AFS basis, balance sheet accounts, or FSI are regarded; and

(ii) If the transaction is a covered nonrecognition transaction, any purchase accounting adjustments reflected in a CAMT entity's AFS basis, balance sheet accounts, or FSI are disregarded.

(5) *Determination of CAMT consequences of component transactions—(i) Generally separate treatment.* Except as provided in paragraph (c)(5)(ii) of this section, each

component transaction of a larger transaction is examined separately for qualification as a covered nonrecognition transaction or a covered recognition transaction with regard to each party to the component transaction. For example, a section 351 transferor and a section 351 transferee of the same section 351 exchange each would be a party to separate property transfers that compose separate component transactions of that exchange, the regular tax consequences of which are determined under separate sections of the Code.

(ii) *Effect of other component transactions.* The treatment of a component transaction as a covered nonrecognition transaction or covered recognition transaction may be affected by the treatment of any other component transaction for regular tax purposes, taking into account all relevant provisions of the Code and general principles of Federal tax law, including the step transaction doctrine.

(6) *CAMT stock basis transition rule.* The CAMT basis of stock in a corporation held by a CAMT entity equals the adjusted basis of the stock for regular tax purposes as of the beginning of the first taxable year of the CAMT entity beginning after December 31, 2019, taking into account all subsequent adjustments required under this section and § 1.56A–19. For rules regarding the CAMT basis of stock in a corporation acquired by a CAMT entity during any taxable year of the CAMT entity beginning after December 31, 2019, see § 1.56A–1(d)(3).

(7) *CAMT retained earnings following certain cross border transactions—(i) Inbound liquidations and reorganizations.* If a foreign corporation transfers property to a domestic corporation in a complete liquidation to which sections 332 and 337 apply or in an asset acquisition described in section 368(a)(1), the domestic corporation's CAMT retained earnings are increased to the extent of any earnings and profits of the foreign corporation that carryover to the domestic corporation under section 381(c)(2) of the Code. See § 1.367(b)–3(f)(1); § 1.56A–4(h)(8) (*Example 8*).

(ii) *Section 355 distributions.* If a foreign corporation transfers stock in a domestic corporation described in section 355(a)(1)(A) of the Code in a transfer to which section 355 of the Code applies, the domestic corporation's CAMT retained earnings are increased to the extent of any earnings and profits allocated to the domestic corporation under § 1.312–10. Furthermore, if a domestic corporation transfers stock in a foreign corporation

described in section 355(a)(1)(A) of the Code in a transfer to which section 355 of the Code applies, the domestic corporation's CAMT retained earnings are decreased to the extent the earnings and profits of the domestic corporation are reduced under § 1.312–10.

(8) *Examples.* The following examples illustrate the application of the rules in this paragraph (c). For purposes of these examples, except as otherwise provided, each entity is a domestic corporation that uses the calendar year as its taxable year and is not a member of a tax consolidated group.

(i) *Example 1: Treatment of stock—*

(A) *Facts.* X owns all the stock of Y, which owns Asset 1 and Asset 2. On X's AFS, X is treated as owning directly Asset 1 and Asset 2.

(B) *Analysis.* For purposes of this section and § 1.56A–19, X treats the Y stock as an asset that X directly owns. See paragraph (c)(1)(i) of this section. Accordingly, X is not treated as directly owning either Asset 1 or Asset 2. See paragraph (c)(1)(ii) of this section.

(ii) *Example 2: FSI resulting from stock investments marked to market—*

(A) *Facts.* On February 1, 2024, X acquires stock in Y, a publicly traded company, for \$100x. On X's AFS, X records the Y stock with an AFS basis of \$100x. X does not acquire more, or dispose of any, Y stock. On March 31, 2024, X increases the AFS basis of the Y stock to its fair value of \$110x and recognizes \$10x of gain on X's AFS. For regular tax purposes, X does not mark X's Y stock to market.

(B) *Analysis.* The CAMT consequences to X are identical to the consequences that result for regular tax purposes. Therefore, in computing X's AFSI, X disregards the \$10x of FSI resulting from the revaluation of X's Y stock to its fair value. See paragraph (c)(2)(i)(A) of this section. Accordingly, X does not adjust X's CAMT basis in the Y stock. See paragraph (c)(2)(i)(B) of this section. See also generally § 1.56A–19 (providing no required adjustments to X's CAMT basis in the Y stock). Likewise, X does not adjust X's CAMT retained earnings. See paragraph (c)(2)(i)(C) of this section. See also generally § 1.56A–19 (providing no required adjustments to X's CAMT retained earnings).

(iii) *Example 3: FSI resulting from stock investments due to equity method annual inclusions—(A) Facts.* X owns 35% of the stock of Y. In 2024, Y reports \$20x of net income on Y's AFS. Under the equity method, X includes on X's AFS \$7x of Y's income ($35\% \times \$20x = \$7x$). Consequently, X increases the AFS basis of X's Y stock on X's AFS by \$7x.

(B) *Analysis.* The CAMT consequences to X are identical to the consequences that result for regular tax purposes. Therefore, to compute X's AFSI, X disregards the \$7x of Y's income reported as FSI on X's AFS. Accordingly, X does not adjust X's CAMT basis in the Y stock. See paragraph (c)(2)(i)(B) of this section. See also generally § 1.56A–19 (providing no required adjustments to X's CAMT basis in the Y stock). Likewise, X does not adjust X's CAMT retained earnings. See paragraph (c)(2)(i)(C) of this section. See also generally § 1.56A–19 (providing no required adjustments to X's CAMT retained earnings).

(iv) *Example 4: Remeasurement gain—(A) Facts.* X owns 5% of the stock of Y. X's AFS basis in the Y stock is \$45x, and X's CAMT basis in the Y stock is \$35x. X acquires an additional 25% of the Y stock for \$250x in a covered recognition transaction. The imputed value of X's 5% interest in Y at the time of the acquisition is \$50x ($((\$250x/0.25) \times 0.05 = \$50x)$). As a result of the acquisition, X reports on X's AFS gain of \$5x ($\$50x - \$45x = \$5x$), and X records X's 30% interest in Y with an AFS basis of \$300x ($\$250x + \$50x = \$300x$).

(B) *Analysis.* The adjustments to AFSI described in paragraph (c)(2)(i) of this section do not apply with respect to X's remeasurement gains resulting from X's acquisition of additional Y stock. See paragraph (c)(2)(ii)(B) of this section. Therefore, X takes into account the \$5x of remeasurement gain reported on X's AFS, adjusts X's CAMT basis in the Y stock from \$35x to \$40x, and takes into account any adjustments to X's AFS retained earnings resulting from the ownership of the Y stock.

(v) *Example 5: Purchase accounting and push down accounting—(A) Facts.* Target is the parent of a tax consolidated group of which X is a subsidiary member. Target owns 100% of the stock of X, the fair market value and CAMT basis of which are \$70x and \$20x, respectively. X's assets have a fair market value and CAMT basis of \$70x and \$50x, respectively. During the taxable year, Acquiror acquires all the stock of Target from Target's shareholders for \$100x, and Acquiror does not make a section 338 election with respect to the acquisition of Target stock. At the time of Target's acquisition by Acquiror, Target's assets (other than Target's stock in X) have a fair market value and CAMT basis of \$30x and \$15x, respectively. On Acquiror's AFS, Acquiror records Target's assets at \$30x and X's assets at \$70x.

(B) *Analysis.* The purchase accounting adjustments and push down accounting

adjustments Acquiror made on Acquiror's AFS are disregarded in computing Acquiror's AFSI, CAMT basis, and CAMT earnings. See paragraph (c)(3) of this section. As a result, the purchase by Acquiror of the stock of Target does not affect Target's CAMT basis in Target's assets (including the X stock), nor does the acquisition affect X's CAMT basis in X's assets. Accordingly, the following results obtain from the purchase by Acquiror of the stock of Target: Target's CAMT basis in Target's stock in X equals \$20x; Target's CAMT basis in Target's assets other than Target's X stock equals \$15x; and X's CAMT basis in X's assets equals \$50x.

(vi) *Example 6: Identification of component transactions—(A) Facts.* X and Y respectively contribute Asset 1 and Asset 2 to Z in exchange solely for stock of newly formed Z (XYZ exchange). The XYZ exchange qualifies for nonrecognition treatment under section 351(a) with regard to each of X and Y, and nonrecognition treatment under section 1032(a) with regard to Z. Immediately before the XYZ exchange, Asset 1 had a fair market value and CAMT basis of \$50x and \$25x, respectively. At that time, Asset 2 had a fair market value and CAMT basis of \$50x and \$15x, respectively.

(B) *Analysis: General application of component transaction rule.* X, Y, and Z each identifies the component transactions of the larger transaction (that is, the XYZ exchange) specific to X, Y, and Z to determine the CAMT consequences of that larger transaction specific to each of those parties. See generally paragraph (c)(5) of this section. Under paragraph (c)(5)(i) of this section, the XYZ exchange consists of a total of four component transactions among all of X, Y, and Z. See paragraphs (c)(8)(vi)(C) through (E) of this section (providing greater detail regarding the identification of each component transaction specific to X, Y, and Z, respectively).

(C) *Analysis: X's component transaction.* X has one component transaction, which is X's transfer of property to Z solely in exchange for stock of Z. This transaction is the sole component transaction relevant to X because it is the sole component transaction of the larger transaction (that is, the XYZ exchange) that is relevant for the determination of the CAMT consequences of the larger transaction with regard to X. See paragraphs (b)(27) and (c)(5)(i) of this section. Based on the treatment of this component transaction for regular tax purposes, the XYZ transaction is a covered nonrecognition transaction with regard to X.

(D) *Analysis: Y's component transaction.* Y has one component transaction, which is Y's transfer of property to Z solely in exchange for stock of Z. This transaction is the sole component transaction relevant to Y because it is the sole component transaction of the larger transaction (that is, the XYZ exchange) that is relevant for the determination of the CAMT consequences of the larger transaction with regard to Y. See paragraphs (b)(27) and (c)(5)(i) of this section. Based on the treatment of this component transaction for regular tax purposes, the XYZ transaction is a covered nonrecognition transaction with regard to Y.

(E) *Analysis: Z's two component transactions.* Z has two component transactions, which are Z's respective transfers of stock to X and Y in exchange for property transferred by those parties to Z. Those two transactions are the sole component transactions relevant to Z because they are the sole component transactions of the larger transaction (that is, the XYZ exchange) that are relevant for the determination of the CAMT consequences of the larger transaction with regard to Z. See paragraphs (b)(26) and (c)(5)(i) of this section. Based on the treatment of these component transactions for regular tax purposes, the XYZ transaction is a covered nonrecognition transaction with regard to Z.

(vii) *Example 7: Effect of component transaction on other component transactions—(A) Facts.* The facts are the same as in paragraph (c)(8)(vi)(A) of this section (*Example 6*), except that, prior to the XYZ exchange, X enters into a binding commitment to sell the Z stock that X receives in the XYZ exchange to W, which is unrelated to X and Y.

(B) *Analysis: General application of component transaction rule.* X's binding commitment to sell the Z stock that it received in X's component transaction with regard to the XYZ exchange (that is, the larger transaction) causes the receipt of that stock to be disregarded for purposes of satisfying the control requirement in section 351(a). As a result, section 351(a) does not apply to either X or Y. Because X received 50 percent of the total shares of Z stock in the XYZ exchange, X's binding commitment to sell to W the Z stock that X received in the XYZ exchange forecloses qualification of that exchange under section 351. See paragraph (c)(5)(ii) of this section.

(C) *Analysis: Effect on X's component transaction.* Because the XYZ exchange fails to qualify under section 351, X's component transaction (that is, X's

transfer of property to Z solely in exchange for stock of Z) is treated as a covered recognition transaction with regard to X.

(D) *Analysis: Effect on Y's component transaction.* Because the XYZ exchange fails to qualify under section 351, Y's component transaction (that is, Y's transfer of property to Z solely in exchange for stock of Z) is treated as a covered recognition transaction with regard to Y.

(E) *Analysis: Effect on Z's two component transactions.* The failure of the XYZ exchange to qualify under section 351 does not affect the CAMT consequences of either of Z's two component transactions (which are Z's respective transfers of stock to X and Y in exchange for property transferred by those parties to Z). This result obtains because Z's qualification for nonrecognition treatment under section 1032(a) is not conditioned on the qualification of the XYZ exchange under section 351 or any other nonrecognition provision of the Code. Accordingly, each of Z's two component transactions of the XYZ exchange (that is, the larger transaction) qualifies as a covered nonrecognition transaction with regard to Z.

(viii) *Example 8: CAMT stock basis transition rule—(A) Facts.* X owns a minority interest in Y. On January 1, 2020, X's AFS basis in X's interest in Y was \$120x, and X's adjusted basis in X's Y stock for regular tax purposes was \$45x.

(B) *Analysis.* Under paragraph (c)(6) of this section, X's CAMT basis in X's Y stock is \$45x, subject to any subsequent adjustments required under this section and § 1.56A-19.

(ix) *Example 9: CAMT retained earnings—(A) Facts.* On January 1, 2020, X has \$340x of accumulated earnings and profits (as determined under section 312). In taxable years 2020, 2021, 2022, and 2023, X has CAMT current earnings of \$0x, \$50x, \$27x, and \$33x, respectively.

(B) *Analysis.* To determine X's CAMT retained earnings for the taxable year beginning January 1, 2024, under paragraph (b)(5)(i) of this section, X adds together X's earnings and profits as of the first day of X's taxable year beginning after December 31, 2019, or \$340x, and the cumulative balance of CAMT current earnings for taxable years beginning after December 31, 2019, or \$110x (\$0x + \$50x + \$27x + \$33x). As a result, X's CAMT retained earnings for the taxable year beginning January 1, 2024, are \$450x.

(d) *CAMT consequences of certain non-liquidating stock and property distributions—(1) Distributing*

corporation in covered nonrecognition transaction. If a distributing corporation distributes solely the distributing corporation's stock (or rights to acquire stock) or other property to a distribution recipient in a transaction that qualifies the distributing corporation for nonrecognition treatment under section 311(a) (that is, a covered nonrecognition transaction, determined using CAMT basis in lieu of AFS basis or regular tax basis), the distributing corporation—

(i) Determines the distributing corporation's AFSI resulting from the distribution by—

(A) Disregarding any resulting gain or loss reflected in the distributing corporation's FSI; and

(B) Applying section 311(a) to the distribution (that is, no AFSI is recognized by the distributing corporation); and

(ii) Adjusts the distributing corporation's CAMT earnings (in lieu of AFS retained earnings) resulting from the distribution by applying section 312 (by, for example, reference to CAMT basis).

(2) *Distributing corporation in covered recognition transaction.* Subject to paragraph (e) of this section, if a distributing corporation distributes property to a distribution recipient in a transaction in which section 311(b) applies to the distributing corporation (that is, a covered recognition transaction, determined using CAMT basis in lieu of AFS basis or regular tax basis), the distributing corporation—

(i) Determines the distributing corporation's AFSI resulting from the distribution by redetermining any gain or loss reflected in the distributing corporation's FSI by reference to the distributing corporation's CAMT basis (in lieu of AFS basis) in the distributed property; and

(ii) Adjusts the distributing corporation's CAMT earnings (in lieu of AFS retained earnings) resulting from the distribution based on the distributing corporation's AFSI.

(3) *Section 355(c) distributions in covered recognition transactions.* If a distributing corporation distributes property under section 355(c)(2) that results in any recognition treatment to the distributing corporation (that is, a covered recognition transaction), the distributing corporation—

(i) Determines the distributing corporation's AFSI resulting from the covered recognition transaction by redetermining any resulting gain or loss reflected in the distributing corporation's FSI by reference to the distributing corporation's CAMT basis in the property (in lieu of AFS basis); and

(ii) Adjusts the distributing corporation's CAMT earnings (in lieu of AFS retained earnings) resulting from the distribution based on the distributing corporation's AFSI.

(4) *Distribution recipient.* A distribution recipient in a covered transaction described in paragraph (d)(1) or (2) of this section—

(i) Determines the distribution recipient's AFSI resulting from that distribution by—

(A) Disregarding any resulting gain or loss reflected in the distribution recipient's FSI;

(B) Applying the relevant sections of the Code (for example, sections 243, 301, 302, 305, 306, and 1059 of the Code); and

(C) Using the amount of the distribution (distribution amount) of property other than the distributing corporation stock reflected on the distribution recipient's AFS, taking into account (for purposes of the relevant section of the Code) the distribution recipient's CAMT basis in its distributing corporation stock;

(ii) Determines the characterization of the distribution amount of property other than the distributing corporation stock (to the extent applicable) by applying the relevant section of the Code based on the CAMT earnings (in lieu of earnings and profits) of the distributing corporation;

(iii) Determines the distribution recipient's CAMT basis in the stock of the distributing corporation resulting from the distribution by applying the relevant sections of the Code, using the distribution recipient's CAMT basis in the stock in lieu of regular tax basis;

(iv) Determines the distribution recipient's CAMT basis in the property received from the distributing corporation by applying the relevant sections of the Code, using CAMT basis in lieu of AFS basis; and

(v) Adjusts (to the extent applicable) the distribution recipient's CAMT current earnings (in lieu of AFS retained earnings) resulting from the distribution by applying section 312 based on the distribution recipient's AFSI, as determined under paragraph (d)(4)(i) of this section.

(5) *Examples.* The following examples illustrate the application of the rules in this paragraph (d). For purposes of these examples, except as otherwise provided, each entity is a domestic corporation that uses the calendar year as its taxable year and is not a member of a tax consolidated group.

(i) *Example 1: Stock distribution—(A) Facts.* X owns 25 shares of the stock of Y. X's stock in Y has a fair market value of \$125x and a CAMT basis of \$60x. X

does not qualify for a dividends received deduction for any distribution from Y. Y distributes solely newly-issued stock to X (that is, a distribution recipient) in a transaction that qualifies X for nonrecognition treatment under section 305(a) and that qualifies Y (that is, the distributing corporation) for nonrecognition treatment under section 311(a). Y has CAMT earnings of \$100x.

(B) *Analysis: Treatment of distributing corporation.* Y's distribution of the additional shares of Y stock is a covered nonrecognition transaction. See paragraph (d)(1) of this section. As a result, in determining the amount of Y's AFSI resulting from the distribution, Y disregards any FSI reflected on Y's AFS resulting from the distribution, and Y applies section 311(a) to the distribution. No FSI is reflected in Y's AFS resulting from the distribution. Accordingly, Y has \$0x of AFSI resulting from the distribution. See paragraph (d)(1)(i) of this section. Y adjusts Y's CAMT earnings under section 312 by the amount of Y's AFSI resulting from the distribution, or \$0x. See paragraph (d)(1)(ii) of this section.

(C) *Analysis: Treatment of distribution recipient.* X's receipt of the additional Y stock is a covered nonrecognition transaction with regard to X. See paragraph (d)(1) of this section. In determining the amount of AFSI resulting from the distribution, X first disregards any FSI reflected in X's AFS, and X then applies section 305(a) to the distribution. See paragraph (d)(4)(i) of this section. Accordingly, X has \$0x of AFSI resulting from the distribution. X determines X's CAMT basis in the additional Y stock by applying section 307(a) and § 1.307-1(a), and therefore allocating CAMT basis in proportion to fair market value. See paragraph (d)(4)(iii) of this section. As a result, X allocates \$10x of X's existing CAMT basis in X's Y stock to the new Y stock ($[(\$25x/(\$125x + \$25x)) \times \$60x = \$10x]$). X adjusts X's CAMT earnings under section 312 by the amount of X's AFSI resulting from the distribution, or \$0x. See paragraph (d)(4)(v) of this section.

(ii) *Example 2: Property distribution—*(A) *Facts.* The facts are the same as in paragraph (d)(5)(i) of this section (*Example 1*), except that, instead of distributing additional shares of Y stock to X, Y distributes Asset 1 to X. Asset 1 has a fair market value of \$25x, a CAMT basis of \$15x, a regular tax basis of \$30x, and an AFS basis on Y's AFS of \$20x. Y's FSI is increased by \$5x ($\$25x - \$20x$) as a result of the distribution.

(B) *Analysis: Treatment of distributing corporation.* The determination of

whether section 311(a) or 311(b) applies to the distribution is determined using CAMT basis. As a result, Y's distribution of Asset 1 is a covered recognition transaction under section 311(b). See paragraph (d)(2) of this section. Thus, in determining the amount of Y's AFSI resulting from the distribution, Y uses Y's CAMT basis in lieu of Y's AFS basis in Asset 1 (in other words, Y redetermines any gain or loss reflected in Y's FSI by reference to Y's CAMT basis, in lieu of AFS basis in the distributed property). See paragraph (d)(2)(i) of this section. Accordingly, Y has \$10x ($\$25x - \$15x$) of AFSI resulting from the distribution. Y adjusts Y's CAMT earnings (in lieu of AFS retained earnings) upward by the amount of AFSI resulting from the distribution, or \$10x, and downward by the fair market value of the property distributed, or \$25x. See section 312(b) and paragraph (d)(2)(ii) of this section.

(C) *Analysis: Treatment of distribution recipient.* X's receipt of Asset 1 is a covered recognition transaction with regard to X. See paragraph (d)(2) of this section. In determining the amount of AFSI resulting from the distribution, X first disregards the \$25x of FSI reflected on X's AFS, and X then applies section 301 to the distribution. See paragraph (d)(4)(i) of this section. Under section 301(b)(1), the amount of the distribution is the fair market value of the property distributed, or \$25x. The characterization of the distribution is determined by reference to Y's CAMT earnings. See paragraph (d)(4)(ii) of this section. Because Y has sufficient CAMT earnings, under section 301(c)(1), the entire amount of the distribution is a dividend to X. Accordingly, X has \$25x of AFSI resulting from the distribution. X determines X's CAMT basis in Asset 1 by applying section 301(d), or \$25x. See paragraph (d)(4)(iv) of this section. X adjusts X's CAMT earnings under section 312 by the amount of X's AFSI resulting from the distribution, or \$25x. See paragraph (d)(4)(v) of this section.

(iii) *Example 3: Redemption—*(A) *Facts.* X owns 70 of the 200 outstanding shares of Y stock with an AFS basis of \$77x on X's AFS and a CAMT basis of \$1x per share, or \$70x. In 2024, Y redeems 50 shares from X for \$60x. After the redemption, X owns 20 ($70 - 50$) of the 150 outstanding shares of Y stock. X's CAMT basis in the redeemed shares is \$50x, and the AFS basis of the redeemed shares on X's AFS is \$55x. Y has CAMT earnings of \$100x. The imputed value of the 20 retained shares at the time of the redemption is \$24x ($[(\$60x/50) \times 20 = \$24x]$). X's CAMT basis in those shares is \$20x, and the

AFS basis of those shares on X's AFS is \$22x. As a result of the redemption, X reports on X's AFS gain of \$5x ($\$60x - \$55x = \$5x$) on the redeemed shares and gain of \$2x ($\$24x - \$22x = \$2x$) on the retained shares, and X records X's retained shares with a AFS basis of \$24x.

(B) *Analysis: Treatment of shareholder.* Under paragraph (d)(4)(i) of this section, in determining the amount of AFSI resulting from the redemption, X disregards any FSI reflected on X's AFS, and X applies section 302 to the redemption. Under paragraph (d)(4)(ii) of this section, X determines that the redemption qualifies under section 302(a). Accordingly, X has \$10x ($\$60x - \$50x$) of AFSI resulting from the redemption. Under paragraph (d)(4)(iii) of this section, the distribution does not affect the CAMT basis of X's retained stock. As a result, X holds X's retained Y stock with a CAMT basis of \$20x. Under paragraph (d)(4)(v) of this section, X adjusts X's CAMT earnings under section 312 by the amount of AFSI resulting from the redemption, or \$10x.

(iv) *Example 4: Dividends received deduction—*(A) *Facts.* The facts are the same as in paragraph (d)(5)(i) of this section (*Example 1*), except that, instead of distributing additional shares of Y stock to X, Y makes a pro rata distribution of cash to Y's shareholders out of Y's retained earnings, of which X receives \$25x. Additionally, X's 25 shares of Y stock constitute 10% of all the stock of Y. X records \$25x of FSI resulting from the distribution on X's AFS.

(B) *Analysis.* Under paragraph (d)(4)(i) of this section, in determining the amount of AFSI resulting from the distribution, X disregards the \$25x of FSI reflected in X's AFS, and X applies section 301 to the distribution. Under paragraph (d)(4)(ii) of this section, the characterization of the distribution is determined under the relevant provisions of the Code by reference to Y's CAMT earnings. Under sections 301(c)(1) and 243(a)(1), the entire amount of the distribution is a dividend to X that is eligible for a 50% dividends received deduction. Accordingly, X has \$12.5x ($\$25x - \$25x \times 50\%$) of AFSI resulting from the distribution. Under paragraph (d)(4)(v) of this section, X adjusts X's CAMT earnings under section 312 by the amount of the cash distribution, or \$25x.

(v) *Example 5: Extraordinary dividend—*(A) *Facts.* The facts are the same as in paragraph (d)(5)(iv)(A) of this section (*Example 4*), except that the distribution is an extraordinary

dividend within the meaning of section 1059(c) of the Code.

(B) *Analysis.* The analysis is the same as in paragraph (d)(5)(iv)(B) of this section (*Example 4*), except that, under paragraph (d)(4)(iii) of this section, the CAMT basis of X's stock in Y is reduced by \$12.5x (*see* section 1059(a)). In addition, X adjusts its CAMT earnings under section 312 by \$12.5x. *See* section 312(f)(2) and paragraph (d)(4)(v) of this section.

(e) *Section 336(e) elections—(1) Distributing corporation with regard to dispositions described in section 355(d)(2) or (e)(2).* If a distributing corporation distributes property under section 355(c) or 361(c) that results in any recognition treatment to the distributing corporation (that is, a covered recognition transaction), and if the distribution is the subject of a section 336(e) election described in § 1.336–2(b)(2), the distributing corporation determines the distributing corporation's AFSI by—

(i) Disregarding any resulting gain or loss reflected in the distributing corporation's FSI;

(ii) Applying section 336(e) to the distribution (that is, no AFSI is recognized by the distributing corporation); and

(iii) If stock of the target corporation (that is, the controlled corporation) is sold, exchanged, or distributed outside of the section 355 transaction but is described in § 1.336–2(b)(2)(iii), applying section 336(e) to the sale, exchange, or distribution (that is, no AFSI is recognized by the distributing corporation).

(2) *Target corporation with regard to dispositions described in section 355(d)(2) or (e)(2).* As the result of a distribution described in paragraph (e)(1) of this section, the target corporation (that is, the controlled corporation)—

(i) Determines the target corporation's AFSI resulting from the deemed sale under section 336(e) by redetermining any resulting gain or loss reflected in the target corporation's FSI as being equal to the gain or loss that would result for regular tax purposes, determined by using the CAMT basis in the target corporation's assets rather than the basis in the target corporation's assets for regular tax purposes; and

(ii) Determines the target corporation's CAMT basis in the property received in the deemed purchase under section 336(e) to be equal to the target corporation's regular tax basis in that property as a result of that deemed purchase.

(3) *Distributing corporation shareholder or security holder with*

regard to dispositions described in section 355(d)(2) or (e)(2). A distributing corporation shareholder or security holder in a covered transaction described in paragraph (e)(1) of this section—

(i) Determines the distributing corporation shareholder's or security holder's AFSI resulting from the distribution by—

(A) Disregarding any resulting gain or loss reflected in the distributing corporation shareholder's or security holder's FSI and applying the relevant sections of the Code; and

(B) Using the distribution amount of the property other than distributing corporation stock reflected on the AFS of the distributing corporation shareholder or security holder, taking into account (for purposes of the relevant section of the Code) the CAMT basis of the distributing corporation shareholder or security holder in its distributing corporation stock;

(ii) Determines the characterization of the distribution of the property other than distributing corporation stock (to the extent applicable) by applying the relevant section of the Code based on the CAMT earnings (in lieu of earnings and profits) of the distributing corporation;

(iii) Determines the distributing corporation shareholder's or security holder's CAMT basis in the stock of the distributing corporation resulting from the distribution by applying the relevant section of the Code, using the CAMT basis of the distributing corporation shareholder or security holder in the stock (in lieu of basis for regular tax purposes);

(iv) Determines the distributing corporation shareholder's or security holder's CAMT basis in the property received from the distributing corporation by applying the relevant section of the Code, using CAMT basis (in lieu of AFS basis); and

(v) Adjusts the distributing corporation shareholder's or security holder's CAMT earnings (in lieu of AFS retained earnings) resulting from the distribution by applying section 312 (taking into account CAMT basis).

(4) *Distributing corporation with regard to distributions not described in section 355(d)(2) or (e)(2) for which a section 336(e) election is made.* If a distributing corporation distributes solely the distributing corporation's stock in a subsidiary corporation to a distribution recipient in a transaction that is the subject of a section 336(e) election described in § 1.336–2(b)(1), the distributing corporation determines the distributing corporation's AFSI resulting from the distribution by—

(i) Disregarding any resulting gain or loss reflected in the distributing corporation's FSI; and

(ii) Applying section 336(e) to the distribution (that is, no AFSI is recognized by the distributing corporation).

(5) *Target corporation with regard to distributions not described in section 355(d)(2) or (e)(2).* As the result of a distribution described in paragraph (e)(4) of this section, the target corporation determines the target corporation's AFSI resulting from the deemed sale under section 336(e) by redetermining any resulting gain or loss reflected in the target corporation's FSI to be equal to the gain or loss that would result for regular tax purposes, determined by using the CAMT basis in the target corporation's assets rather than the basis in the target corporation's assets for regular tax purposes.

(6) *New target corporation with regard to distributions not described in section 355(d)(2) or (e)(2).* As the result of a distribution described in paragraph (e)(4) of this section, the new target corporation (within the meaning of § 1.336–1(b)(3)) determines the new target corporation's CAMT basis in the property received in the deemed purchase under section 336(e) to be equal to the new target corporation's regular tax basis in that property as a result of that deemed purchase.

(7) *Example.* The following example illustrates the application of the rules in this paragraph (e).

(i) *Facts.* Distributing is a distributing corporation, and Controlled is a controlled corporation. Each of Distributing and Controlled is a domestic corporation that uses the calendar year as its taxable year and is not a member of a tax consolidated group. On February 1, 2024, Distributing contributes assets with a fair market value of \$100x, a regular tax basis of \$65x, and a CAMT basis of \$60x to Controlled in exchange for all the stock of Controlled (Contribution), and Distributing distributes all the stock of Controlled to Distributing's shareholders pro rata (Distribution). The Contribution and Distribution qualify as a section 355 transaction, but the Distribution is taxable under section 355(e). Because the Distribution is described in section 355(e), Distributing makes a section 336(e) election described in § 1.336–2(b)(2) with respect to the Distribution.

(ii) *Analysis.* Under paragraph (e)(1) of this section, in determining the amount of AFSI resulting from the Distribution, Distributing disregards any FSI resulting from the Distribution, and X applies section 336(e) to the

Distribution. Accordingly, Distributing has \$0x of AFSI resulting from the Distribution. Under paragraph (e)(2)(i) of this section, the target corporation (that is, Controlled) applies section 336(e) and redetermines Controlled's AFSI to be Controlled's gain or loss for regular tax purposes, determined by using its CAMT basis in its assets rather than its regular tax basis in its assets, or \$40x (\$100x – \$66x). Under paragraph (e)(2)(ii) of this section, Controlled's CAMT basis in Controlled's assets is Controlled's regular tax basis, or \$100x.

(f) *CAMT consequences of certain liquidating distributions*—(1) *Liquidating corporation in covered nonrecognition transaction.* If a liquidating corporation distributes property to a liquidation recipient in a transaction that qualifies the liquidating corporation solely for nonrecognition treatment under section 337(a) (that is, a covered nonrecognition transaction), the liquidating corporation—

(i) Determines the liquidating corporation's AFSI resulting from the liquidation by—

(A) Disregarding any resulting gain or loss reflected in the liquidating corporation's FSI; and

(B) Applying section 337(a) to the one or more liquidating distributions composing the liquidation (that is, no AFSI is recognized by the liquidating corporation); and

(ii) Adjusts the liquidating corporation's CAMT retained earnings (in lieu of AFS retained earnings) resulting from the liquidation by applying section 312 based on the liquidating corporation's AFSI, as determined under paragraph (f)(1)(i) of this section.

(2) *Liquidating corporation in covered recognition transaction.* If a liquidating corporation distributes property to a liquidation recipient in a transaction in which section 336(a) applies to the liquidating corporation, or in a corporate dissolution of the liquidating corporation (each, a covered recognition transaction), the liquidating corporation—

(i) Determines the liquidating corporation's AFSI, if any, resulting from the one or more liquidating distributions composing the liquidation or corporate dissolution by redetermining any resulting gain or loss reflected in the liquidating corporation's FSI by reference to the CAMT basis in the liquidating corporation's liquidated property (in lieu of AFS basis); and

(ii) Adjusts the liquidating corporation's CAMT retained earnings (in lieu of AFS retained earnings) based on the liquidating corporation's AFSI, as

determined under paragraph (f)(2)(i) of this section.

(3) *Component transactions of a liquidation consisting of covered recognition and covered nonrecognition transactions.* If a liquidating corporation distributes property to at least one liquidation recipient in a covered nonrecognition transaction to the liquidating corporation and transfers property to at least one liquidation recipient in a covered recognition transaction to the liquidating corporation, the liquidating corporation determines the liquidating corporation's aggregate resulting AFSI and CAMT retained earnings by treating each of the following component transactions separately—

(i) Each component transaction that is a covered nonrecognition transaction to the liquidating corporation; and

(ii) Each component transaction that is a covered recognition transaction to the liquidating corporation.

(4) *Consequences to liquidation recipient in covered nonrecognition transaction.* A liquidation recipient in a covered nonrecognition transaction described in paragraph (f)(1) of this section—

(i) Determines the liquidation recipient's AFSI resulting from the one or more liquidating distributions received by the liquidation recipient by—

(A) Disregarding any resulting gain or loss reflected in the liquidation recipient's FSI; and

(B) Applying section 332 to the one or more liquidating distributions received by the liquidation recipient (that is, no AFSI is recognized by the liquidation recipient);

(ii) Determines the liquidation recipient's CAMT basis in the property received from the liquidating corporation by applying section 334(b), using the CAMT basis of the property received by the liquidation recipient (in lieu of basis for regular tax purposes);

(iii) Adjusts the liquidation recipient's CAMT retained earnings (in lieu of AFS retained earnings) resulting from the one or more liquidating distributions received by the liquidation recipient by applying sections 381(c)(2) and 312; and

(iv) Applying section 381 to the liquidating corporation's other attributes (that is, the liquidation recipient succeeds to the liquidating corporation's other attributes).

(5) *Consequences to liquidation recipient in covered recognition transaction.* A liquidation recipient in a covered recognition transaction described in paragraph (f)(2) of this section—

(i) Determines the liquidation recipient's AFSI resulting from the one or more liquidating distributions by redetermining any resulting gain or loss reflected in the liquidation recipient's FSI by reference to the liquidation recipient's CAMT basis in the liquidation recipient's stock in the liquidating corporation (in lieu of AFS basis);

(ii) Determines the liquidation recipient's CAMT basis in the property received by the liquidation recipient to be equal to the liquidation recipient's AFS basis in that property; and

(iii) Adjusts the liquidation recipient's CAMT earnings (in lieu of earnings and profits) based on the liquidation recipient's AFSI, as determined under paragraph (f)(5)(i) of this section.

(6) *Examples.* The following examples illustrate the application of the rules in this paragraph (f). For purposes of these examples, except as otherwise provided, each entity is a domestic corporation that uses the calendar year as its taxable year and is not a member of a tax consolidated group.

(i) *Example 1: Nonrecognition subsidiary liquidation*—(A) *Facts.* X owns all of the interests in Y, an LLC treated as a corporation for Federal income tax purposes, with a CAMT basis of \$70x and a fair market value of \$100x. Y has one asset (Asset 1) with a CAMT basis of \$45x and a fair market value of \$100x. Y has a FSNOL of \$200x. Y has CAMT earnings of \$50x, and X has CAMT retained earnings of \$300x. X dissolves Y under State law and reports the dissolution on an original Form 966, *Corporate Dissolution or Liquidation*.

(B) *Analysis: Liquidating corporation.* The dissolution of Y is a covered nonrecognition transaction. Under paragraph (f)(1)(i) of this section, in determining the amount of Y's AFSI resulting from the dissolution, Y disregards any FSI reflected in its AFS resulting from the dissolution, and Y applies section 337(a) to the dissolution. Accordingly, Y has \$0x of AFSI resulting from the dissolution. Under paragraph (f)(1)(ii) of this section, Y adjusts Y's CAMT retained earnings by applying section 312 based on the amount of AFSI, or \$0x.

(C) *Analysis: Liquidation recipient.* Under paragraph (f)(4)(i) of this section, in determining the amount of X's AFSI resulting from the dissolution of Y, X disregards any FSI reflected in X's AFS resulting from the liquidating distribution from Y, and X applies section 332 to the liquidating distribution. Accordingly, X has \$0x of AFSI resulting from the dissolution. Under paragraph (f)(4)(ii) of this section,

X determines X's CAMT basis in Asset 1 by applying section 334(b), using the CAMT basis in the hands of Y, or \$45x. Under paragraph (f)(4)(iii) of this section, X succeeds to Y's CAMT earnings. See sections 381(c)(2) and 312. Under paragraph (f)(4)(iv) of this section, X succeeds to Y's FSNOL.

(ii) *Example 2: Component transactions*—(A) *Facts*. X owns 85% of the stock of Y with a fair market value of \$85x, an AFS basis of \$60x, and a CAMT basis of \$40x. Unrelated Z owns the remaining 15% of the stock of Y with a fair market value of \$15x, an AFS basis of \$20x, and a CAMT basis of \$10x. X and Y do not file a consolidated financial statement. Y's assets include \$10x cash, Asset 1, and Asset 2. Asset 1 has a fair market value of \$13x, an AFS basis of \$19x, and a CAMT basis of \$10x. Asset 2 has a fair market value of \$77x, an AFS basis of \$50x, and a CAMT basis of \$40x. Y's CAMT retained earnings are \$50x. X and Z determine to dissolve Y, and they report the dissolution on an original Form 966, *Corporate Dissolution or Liquidation*. Y distributes Asset 1 and \$2x cash to Z, and Y distributes Asset 2 and \$8x cash to X, in exchange for each shareholder's Y stock.

(B) *Analysis: In general*. The dissolution of Y is a covered nonrecognition transaction to Y with respect to the liquidating distribution to X, and a covered recognition transaction to Y with respect to the liquidating distribution to Z. Under paragraph (f)(3) of this section, Y determines Y's AFSI and CAMT retained earnings by treating the component transactions separately.

(C) *Analysis: Covered nonrecognition transaction*. The liquidating distribution to X is a covered nonrecognition transaction. Under paragraph (f)(1)(i) of this section, in determining the amount of Y's AFSI resulting from the distribution to X, Y disregards any FSI reflected in Y's AFS resulting from the distribution to X, and Y applies section 337(a) to the distribution. Accordingly, Y has \$0x of AFSI resulting from the distribution to X. Under paragraphs (f)(1)(ii) and (f)(3) of this section, Y adjusts Y's CAMT retained earnings by applying section 312 based on the amount of AFSI, or \$0x. Under paragraph (f)(4)(i) of this section, in determining the amount of X's AFSI resulting from the dissolution of Y, X disregards any FSI reflected in X's AFS resulting from the liquidating distribution from Y, and X applies section 332 to the liquidating distribution. Accordingly, X has \$0x of AFSI resulting from the dissolution. Under paragraph (f)(4)(ii) of this section, X determines X's CAMT basis in Asset

2 by applying section 334(b), using the CAMT basis in the hands of Y, or \$40x. Under paragraph (f)(4)(iii) of this section, X succeeds to Y's CAMT earnings. See sections 381(c)(2) and 312.

(D) *Analysis: Covered recognition transaction*. The liquidating distribution to Z is a covered recognition transaction. Under paragraph (f)(2)(i) of this section, in determining the amount of Y's AFSI resulting from the distribution to Z, Y redetermines any resulting gain or loss reflected in Y's FSI using Y's CAMT basis in Asset 1. Accordingly, Y has \$3x of AFSI resulting from the liquidating distribution to Z. Under paragraph (f)(2)(ii) of this section, Y adjusts Y's CAMT earnings based on Y's AFSI resulting from the liquidating distribution to Z, or \$3x and reduces them by the CAMT basis of the property, or \$10x, and \$2x cash distributed to Z. Under paragraph (f)(5)(i) of this section, in determining the amount of Z's AFSI resulting from the dissolution of Y, Z redetermines any resulting gain or loss reflected in Z's FSI using Z's CAMT basis in Z's Y stock, or \$5x (\$13x + \$2x - \$10x). Under paragraph (f)(5)(ii) of this section, Z takes a CAMT basis in Asset 1 equal to Z's AFS basis in Asset 1, or \$13x. Under paragraph (f)(5)(iii) of this section, Z adjusts Z's CAMT retained earnings based on Z's AFSI resulting from the dissolution of Y, or \$5x.

(g) *CAMT consequences of stock sales*—(1) *Target corporation shareholder*—(i) *In general*. Except as provided in paragraph (g)(1)(ii) of this section, if a target corporation shareholder transfers target corporation stock to an acquiror corporation in a transaction that results in recognition of gain or loss to the target corporation shareholder in a transaction described in section 304 or 1001 of the Code (each, a covered recognition transaction), the target corporation shareholder—

(A) Determines the target corporation shareholder's AFSI resulting from the covered recognition transaction by redetermining any resulting gain or loss reflected in the target corporation shareholder's FSI by reference to the target corporation shareholder's CAMT basis (in lieu of AFS basis) of the transferred stock;

(B) Determines the target corporation shareholder's CAMT basis in the property received from the acquiror corporation to be equal to the target corporation shareholder's AFS basis in that property; and

(C) Adjusts (to the extent applicable) the target corporation shareholder's CAMT current earnings (in lieu of AFS retained earnings) based on the target

corporation shareholder's AFSI, as determined under paragraph (g)(1)(i)(A) of this section.

(ii) *Stock sales for which a section 336(e) or 338(h)(10) election is made*. If the transfer of stock described in paragraph (g)(1)(i) of this section is the subject of an election under section 336(e) or 338(h)(10) of the Code—

(A) Paragraph (g)(1)(i) of this section does not apply to the target corporation shareholder, and the transfer of target corporation stock by the target corporation shareholder is disregarded; and

(B) The target corporation shareholder adjusts (to the extent applicable) the target corporation shareholder's CAMT current earnings (in lieu of AFS retained earnings) to take into account the deemed liquidation of the target corporation under section 336(e) or 338(h)(10) (as appropriate).

(2) *Target corporation*—(i) *In general*. Except as provided in paragraph (g)(2)(ii) of this section, no CAMT consequences to the target corporation result from a transfer described in paragraph (g)(1)(i) of this section.

(ii) *Stock sales for which a section 336(e), 338(g), or 338(h)(10) election is made*. If the transfer described in paragraph (g)(1)(i) of this section is the subject of an election under section 336(e), 338(g), or 338(h)(10) (that is, a covered recognition transaction), the target corporation determines the target corporation's AFSI resulting from the deemed sale under that election by redetermining any resulting gain or loss reflected in the target corporation's FSI to be equal to the gain or loss that would result for regular tax purposes, determined by using the CAMT basis in the target corporation's assets rather than the basis in the target corporation's assets for regular tax purposes.

(3) *Acquiror corporation*. If an acquiror corporation transfers property (including stock) to a target corporation shareholder in a transaction described in section 304 or 1001 (each, a covered recognition transaction), the acquiror corporation—

(i) Determines the acquiror corporation's AFSI resulting from the covered recognition transaction by redetermining any resulting gain or loss reflected in the acquiror corporation's FSI by reference to the acquiror corporation's CAMT basis (in lieu of AFS basis) in the acquiror corporation's transferred property;

(ii) Determines the acquiror corporation's CAMT basis in the target corporation stock received from the target corporation shareholder to be equal to the acquiror corporation's AFS basis in that property; and

(iii) Adjusts (to the extent applicable) the acquiror corporation's CAMT current earnings (in lieu of AFS retained earnings) based on the acquiror corporation's AFSI, as determined under paragraph (g)(3)(i) of this section.

(4) *New target corporation.* If the transfer described in paragraph (g)(1)(i) of this section is the subject of an election under section 336(e), 338(g), or 338(h)(10) (that is, a covered recognition transaction), the new target corporation determines the new target corporation's CAMT basis in the property deemed to be received from the target corporation to be equal to the new target corporation's regular tax basis in that property as a result of that election.

(5) *Section 304 transactions.* For purposes of this section, section 304 does not apply to any acquisition of stock of a corporation.

(6) *Examples.* The following examples illustrate the application of the rules in this paragraph (g). For purposes of these examples, each entity is a domestic corporation that uses the calendar year as its taxable year and is not a member of a tax consolidated group.

(i) *Example 1: Acquisition of stock of a target corporation—(A) Facts.*

Acquiror acquires all the stock of Target from X for \$100x cash. At the time of Target's acquisition by Acquiror, Target's assets have a CAMT basis of \$15x and a value of \$30x, and X has \$40x of CAMT basis in X's Target stock.

(B) *Analysis.* Acquiror's acquisition of Target is a covered recognition transaction. Under paragraph (g)(3)(ii) of this section, Acquiror takes a \$100x CAMT basis in the stock of Target. Under paragraph (g)(2)(i) of this section, Target has no CAMT consequences from the transaction, and Target's \$15x of CAMT basis in its assets is unaffected by the transaction. Under paragraph (g)(1)(i)(A) of this section, X disregards any FSI reflected in X's AFS resulting from the transaction and uses X's CAMT basis in the Target stock to determine X's AFSI. As a result, X recognizes \$60x of AFSI on the sale of the Target stock (\$100x – \$40x = \$60x).

(ii) *Example 2: Covered recognition transaction stock sale: section*

338(h)(10) election—(A) Facts. The facts are the same as in paragraph (g)(6)(i)(A) of this section (*Example 1*), except that X is the common parent of a consolidated group of which Target is a member, and Acquiror and X make a section 338(h)(10) election with respect to the purchase of Target.

(B) *Analysis.* Because of the section 338(h)(10) election, old Target is treated as selling all of old Target's assets to an unrelated buyer for \$100x, then liquidating and distributing the \$100x to

X. Then, new Target is treated as purchasing all of old Target's assets from an unrelated seller for \$100x.

Under paragraph (g)(1)(ii)(A) of this section, the transfer of the Target stock to Acquiror is disregarded. Under paragraph (g)(1)(ii)(B) of this section, X adjusts X's CAMT earnings to succeed to old Target's CAMT earnings (including old Target's earnings on the deemed sale of old Target's assets). Under paragraph (g)(2)(ii) of this section, old Target's AFSI on the deemed sale of old Target's assets determined using old Target's CAMT basis in those assets, or \$85x (\$100x – \$15x). Under paragraph (g)(4) of this section, new Target's CAMT basis of new Target's assets is new Target's regular tax basis, or \$100x.

(iii) *Example 3: Covered recognition transaction stock sale: section 336(e) election—(A) Facts.* X owns all the stock of Target. The Target stock has a fair market value of \$100x, a CAMT basis of \$35x, and a regular tax basis of \$40x. Target has assets with a fair market value of \$100x, CAMT basis of \$60x, and regular tax basis of \$65x. Target has outstanding 100 shares of a single class of stock. On February 1, 2024, X sells 35 shares of Target stock to Y. On July 1, 2024, X sells 40 shares of Target stock to Z. On December 31, 2024, X sells the remaining 25 shares of Target stock to W. Y, Z, and W are each CAMT entities unrelated to X and unrelated to each other. X makes a section 336(e) election with respect to the disposition of Target.

(B) *Analysis.* Under paragraph (g)(2)(ii) of this section, old Target determines old Target's AFSI by redetermining any FSI appearing on old Target's AFS to be old Target's gain for regular tax purposes, except computed using old Target's CAMT basis in its assets, or \$40x (\$100x – \$60x). Under paragraph (g)(4) of this section, new Target's CAMT basis in new Target's assets is equal to new Target's regular tax basis in those assets, or \$100x.

(h) *CAMT consequences of asset sales—(1) Target corporation.* If a target corporation transfers property (including stock) to an acquiror corporation in a transaction that results in recognition of gain or loss to the target corporation under section 1001 (that is, a covered recognition transaction), the target corporation—

(i) Determines the target corporation's AFSI resulting from the covered recognition transaction by redetermining any resulting gain or loss reflected in the target corporation's FSI by reference to the target corporation's CAMT basis (in lieu of AFS basis) in the target corporation's transferred property;

(ii) Determines the target corporation's CAMT basis in the property received from the acquiror corporation to be equal to the target corporation's AFS basis in that property; and

(iii) Adjusts (to the extent applicable) the target corporation's CAMT current earnings (in lieu of AFS retained earnings) based on the target corporation's AFSI, as determined under paragraph (h)(1)(i) of this section.

(2) *Acquiror corporation.* If an acquiror corporation transfers property (including stock) to a target corporation in a transaction that results in recognition of gain or loss to the acquiror corporation under section 1001 (that is, a covered recognition transaction), the acquiror corporation—

(i) Determines the acquiror corporation's AFSI resulting from the covered recognition transaction by redetermining any resulting gain or loss reflected in the acquiror corporation's FSI by reference to the acquiror corporation's CAMT basis (in lieu of AFS basis) in the acquiror corporation's transferred property;

(ii) Determines the acquiror corporation's CAMT basis in the property received from the target corporation to be equal to the acquiror corporation's AFS basis in that property; and

(iii) Adjusts (to the extent applicable) the acquiror corporation's CAMT current earnings (in lieu of AFS retained earnings) based on the acquiror corporation's AFSI, as determined under paragraph (h)(2)(i) of this section.

(3) *Example.* The following example illustrates the application of the rules in this paragraph (h).

(i) *Facts.* Each of unrelated X and Y is a domestic corporation that uses the calendar year as its taxable year. X sells Asset 1 to Y in exchange for Asset 2 in a covered recognition transaction under section 1001. Asset 1 has a CAMT basis in X's hands of \$40x and a fair market value of \$100x. Asset 2 has a CAMT basis in Y's hands of \$65x and a fair market value of \$100x. After the transaction, X records Asset 2 on X's AFS at its fair value of \$100x, and Y records Asset 1 on Y's AFS at its fair value of \$100x.

(ii) *Analysis—(A) X.* Under paragraph (h)(1)(i) of this section, in determining the amount of X's AFSI resulting from the sale of Asset 1, X redetermines any resulting gain or loss reflected in X's FSI using its CAMT basis in Asset 1. Accordingly, X has \$60x of AFSI (\$100x – \$40x) resulting from the sale. Under paragraph (h)(1)(ii) of this section, X takes a CAMT basis in Asset 2 equal to X's AFS basis in Asset 2, or

\$100x. Under paragraph (h)(1)(iii) of this section, X adjusts X's CAMT current earnings based on X's AFSI resulting from the exchange, or \$60x.

(B) Y. Under paragraph (h)(2)(i) of this section, in determining the amount of Y's AFSI resulting from the acquisition of Asset 1, Y redetermines any resulting gain or loss reflected in Y's FSI using its CAMT basis in Asset 2. Accordingly, Y has \$35x of AFSI (\$100x – \$65x) resulting from the acquisition. Under paragraph (h)(2)(ii) of this section, Y takes a CAMT basis in Asset 1 equal to Y's AFS basis in Asset 1, or \$100x. Under paragraph (h)(2)(iii) of this section, Y adjusts Y's CAMT current earnings based on Y's AFSI resulting from the exchange, or \$35x.

(i) *Applicability date.* This section applies to taxable years ending after [DATE OF PUBLICATION OF FINAL RULE IN THE Federal Register].

§ 1.56A–19 AFSI, CAMT basis, and CAMT retained earnings resulting from certain corporate reorganizations and organizations.

(a) *Overview.* This section provides rules under section 56A(c)(2)(C) and (c)(15)(B) of the Code for determining the AFSI, CAMT basis, and CAMT earnings consequences of certain corporate reorganizations with respect to which a domestic corporate CAMT entity and an individual or other CAMT entity, including a CAMT entity that is a shareholder of a domestic corporate CAMT entity, is a party, and section 351 exchanges. This section incorporates the definitions in § 1.56A–18. Paragraph (b) of this section provides rules for determining the CAMT consequences of B reorganizations. Paragraph (c) of this section provides rules for determining the CAMT consequences of certain acquisitive reorganizations. Paragraph (d) of this section provides rules for determining the CAMT consequences of section 355 transactions. Paragraph (e) of this section provides rules for determining the CAMT consequences of E reorganizations. Paragraph (f) of this section provides rules for determining the CAMT consequences of F reorganizations. Paragraph (g) of this section provides rules for determining the CAMT consequences of section 351 exchanges. Paragraph (h) of this section provides the applicability date of this section. For rules coordinating the application of this section with § 1.56A–4, see § 1.56A–18(a)(2)(ii).

(b) *CAMT consequences of B reorganizations—*(1) *Target corporation shareholder or security holder in covered nonrecognition transaction.* If a target corporation shareholder or security holder transfers solely stock or

securities to an acquiror corporation in a B reorganization that qualifies the target corporation shareholder or security holder for nonrecognition treatment under section 354 of the Code (that is, a covered nonrecognition transaction), the target corporation shareholder or security holder—

(i) Determines the target corporation shareholder's or security holder's AFSI resulting from the transfer by—

(A) Disregarding any resulting gain or loss reflected in the target corporation shareholder's or security holder's FSI; and

(B) Applying section 354 to the transfer (that is, no AFSI is recognized by the target corporation shareholder or security holder);

(ii) Determines the target corporation shareholder's or security holder's CAMT basis in the stock received from the acquiror corporation by applying section 358 of the Code using the CAMT basis (in lieu of AFS basis) of the stock or securities transferred by the target corporation shareholder or security holder to the acquiror corporation; and

(iii) Adjusts the target corporation shareholder's or security holder's CAMT current earnings (in lieu of AFS retained earnings) resulting from the covered nonrecognition transaction by applying section 312 of the Code.

(2) *Target corporation shareholder or security holder in covered recognition transaction.* If a target corporation shareholder or security holder receives stock or securities and other property (or solely property other than stock or securities) from an acquiror corporation in exchange for target corporation stock or securities (that is, in a transaction that fails to qualify as a B reorganization (a covered recognition transaction)), see, for example, § 1.56A–18(g), which provides rules for determining the CAMT consequences of stock sales, and paragraph (g) of this section, which provides rules for determining the CAMT consequences of section 351(b) transactions.

(3) *Acquiror corporation in covered nonrecognition transaction.* If an acquiror corporation transfers solely stock to a target corporation shareholder as part of a B reorganization that qualifies the acquiror corporation for nonrecognition treatment under section 1032(a) of the Code or section 1032(a) and § 1.1032–2(b) (that is, a covered nonrecognition transaction), the acquiror corporation—

(i) Determines the acquiror corporation's AFSI resulting from the covered nonrecognition transaction by—

(A) Disregarding any resulting gain or loss reflected in the acquiror corporation's FSI; and

(B) Applying section 1032(a), or section 1032(a) and § 1.1032–2(b) to the transfer (that is, no AFSI is recognized by the acquiror corporation);

(ii) Determines the acquiror corporation's CAMT basis in the stock received from a target corporation shareholder by applying section 362 of the Code using the CAMT basis (in lieu of AFS basis) of that stock in the hands of the target corporation shareholder; and

(iii) Adjusts the acquiror corporation's CAMT retained earnings (in lieu of AFS retained earnings) resulting from the covered nonrecognition transaction by applying section 312.

(4) *Acquiror corporation in covered recognition transaction—*(i) *Failure to qualify as B reorganization.* If an acquiror corporation transfers stock and other property (or solely property other than stock) to a target corporation shareholder described in paragraph (b)(1) of this section in exchange for target corporation stock (that is, a covered recognition transaction), paragraphs (b)(1) through (3) of this section do not apply. See § 1.56A–18(g), which provides rules for determining the CAMT consequences of stock sales, and paragraph (g) of this section, which provides rules for determining the CAMT consequences of section 351(b) transactions.

(ii) *Failure to qualify under § 1.1032–2(b).* If an acquiror corporation transfers solely stock of the acquiror corporation parent to a target corporation shareholder as part of a B reorganization that does not satisfy § 1.1032–2(b) with regard to all acquiror corporation parent stock (that is, a covered recognition transaction solely with regard to the acquiror corporation parent stock that does not satisfy § 1.1032–2(b)), then solely with regard to the acquiror corporation parent stock that does not qualify under § 1.1032–2(b), see § 1.56A–18(g), which provides rules for determining the CAMT consequences of stock sales.

(5) *Acquiror corporation parent in covered nonrecognition transaction.* If an acquiror corporation transfers solely stock of the acquiror corporation parent to a target corporation shareholder as part of a B reorganization that qualifies the acquiror corporation for nonrecognition treatment under section 1032(a) and § 1.1032–2(b) (that is, a covered nonrecognition transaction), the acquiror corporation parent adjusts its CAMT basis in its acquiror corporation stock pursuant to § 1.358–6.

(6) *Acquiror corporation parent in covered recognition transaction—*(i) *Use of old and cold parent stock with qualifying B reorganization.* If an

acquiror corporation transfers solely stock of the acquiror corporation parent to a target corporation shareholder as part of a B reorganization that does not satisfy § 1.1032-2(b) with regard to all acquiror corporation parent stock (that is, a covered recognition transaction solely with regard to the acquiror corporation parent stock that does not satisfy § 1.1032-2(b)), the acquiror corporation parent adjusts its CAMT basis in its acquiror corporation stock pursuant to § 1.358-6.

(ii) *Use of parent stock with transaction that does not qualify as a B reorganization.* If an acquiror corporation transfers stock of the acquiror corporation parent and other property to a target corporation shareholder in exchange for target corporation stock (that is, a covered recognition transaction), with regard to all acquiror corporation parent stock transferred by the acquiror corporation, the acquiror corporation parent adjusts its CAMT basis in its acquiror corporation stock pursuant to § 1.1032-3.

(7) *Examples.* The following examples illustrate the application of the rules in this paragraph (b). For purposes of these examples, each entity is a domestic corporation that uses the calendar year as its taxable year and is not a member of a tax consolidated group.

(i) *Example 1: Covered nonrecognition transaction—(A) Facts.* During the taxable year, Acquiror acquires all the stock of Target from X for 100 shares of Acquiror's voting stock in a transaction that qualifies as a B reorganization. At the time of the transaction, X's stock in Target has a CAMT basis of \$35× and a fair market value of \$100× and Target has a CAMT basis of \$30× in its assets.

(B) *Analysis.* Acquiror's acquisition of Target from X is a covered nonrecognition transaction to each of Acquiror and X. Under paragraph (b)(1)(i)(A) of this section, X disregards any FSI reflected in its AFS resulting from the exchange of Target stock for Acquiror stock. Under paragraph (b)(1)(i)(B) of this section, X records \$0× in AFSI on the exchange. Under paragraph (b)(1)(ii) of this section, X takes the Acquiror stock received in the exchange with a CAMT basis of \$35×. Under paragraph (b)(1)(iii) of this section, X adjusts its CAMT retained earnings by the amount of AFSI resulting from the exchange, or \$0×. Under paragraph (b)(3)(i) of this section, Acquiror disregards any FSI reflected in its AFS resulting from the exchange of Acquiror stock for Target stock and under paragraph (b)(3)(i) of this section, Acquiror records \$0× in AFSI on the exchange. Under paragraph (b)(3)(ii) of

this section, Acquiror takes the Target stock with a \$35× CAMT basis. Under paragraph (b)(3)(iii) of this section, Acquiror adjusts its CAMT retained earnings by the amount of AFSI resulting from the exchange, or \$0×. Under § 1.56A-18(g)(2)(i), Target has no CAMT consequences from the transaction, and Target's \$30× of CAMT basis in its assets is unaffected by the transaction.

(ii) *Example 2: Covered recognition transaction.* The facts are the same as in paragraph (b)(7)(i) of this section (*Example 1*), except that Acquiror acquires the Target stock for 90 shares of Acquiror voting stock and 10 shares of Acquiror nonqualified preferred stock (within the meaning of section 351(g)). Under paragraph (b)(2) of this section, Acquiror's acquisition of Target from X is a covered recognition transaction. Under § 1.56A-18(g)(1)(i)(A), X disregards any FSI reflected in its AFS resulting from the transaction and uses its CAMT basis in the Target stock in determining its AFSI. As a result, X recognizes \$65× of AFSI on the sale of the Target stock ($\$100 \times - \$35 \times = \$65 \times$). Under § 1.56A-18(g)(2)(i), Target has no CAMT consequences from the transaction, and Target's \$30× of CAMT basis in its assets is unaffected by the transaction. Under § 1.56A-18(g)(3)(ii), Acquiror takes a \$100× CAMT basis in the stock of Target.

(c) *CAMT consequences of certain acquisitive reorganizations—(1) Target corporation in a covered nonrecognition transaction—(i) Reorganization exchanges.* If a target corporation transfers property to an acquiror corporation in an acquisitive reorganization that qualifies the target corporation solely for nonrecognition treatment under section 361 of the Code (that is, a covered nonrecognition transaction), the target corporation—

(A) Determines the target corporation's AFSI resulting from the transfer by disregarding any resulting gain or loss reflected in the target corporation's FSI and applying section 361(a) and (b) to the transfer (that is, no AFSI is recognized by the target corporation);

(B) Determines the target corporation's CAMT basis in the property received from the acquiror corporation by applying section 358 using the CAMT basis (in lieu of AFS basis) of the property transferred by the target corporation to the acquiror corporation; and

(C) Adjusts the target corporation's CAMT earnings (in lieu of AFS retained earnings) resulting from the covered nonrecognition transaction by applying section 312.

(ii) *Section 361(c) distributions.* As part of an acquisitive reorganization, if a target corporation distributes or transfers qualified property to a target corporation shareholder, or to a target corporation creditor, that qualifies solely for nonrecognition treatment to the target corporation under section 361(c), the target corporation determines its AFSI resulting from the transfer by—

(A) Disregarding any resulting gain or loss reflected in the target corporation's FSI; and

(B) Applying section 361(c) to the distribution (that is, no AFSI is recognized by the target corporation).

(2) *Target corporation in covered recognition transaction.* As part of an acquisitive reorganization, if a target corporation distributes or transfers property to a target corporation shareholder or security holder or target corporation creditor under section 361(c) that results in the recognition of gain to the target corporation (that is, a covered recognition transaction), the target corporation—

(i) Determines the target corporation's AFSI resulting from the distribution or transfer by redetermining any resulting gain or loss reflected in the target corporation's FSI by reference to its CAMT basis in the distributed or transferred property (in lieu of AFS basis); and

(ii) Adjusts the target corporation's CAMT earnings (in lieu of AFS retained earnings) based on the target corporation's AFSI, as determined under paragraph (c)(1)(ii)(A) of this section.

(3) *Acquiror corporation qualification for covered nonrecognition transaction.* If an acquiror corporation transfers solely stock, or stock and money or other property, to a target corporation as part of an acquisitive reorganization that qualifies the acquiror corporation for nonrecognition treatment under section 1032(a) or section 1032(a) and § 1.1032-2(b) (that is, a covered nonrecognition transaction), the acquiror corporation—

(i) Determines the acquiror corporation's AFSI resulting from the covered nonrecognition transaction by—

(A) Disregarding any resulting gain or loss reflected in the acquiror corporation's FSI; and

(B) Applying section 1032(a), or section 1032(a) and § 1.1032-2(b), to the transfer (that is, no AFSI is recognized by the acquiror corporation);

(ii) Determines the acquiror corporation's CAMT basis in the property received from the target corporation by applying section 362 using the CAMT basis (in lieu of AFS basis) of that property;

(iii) Adjusts the acquiror corporation's CAMT retained earnings (in lieu of AFS retained earnings) resulting from the covered nonrecognition transaction by applying sections 381(c)(2) and 312 of the Code; and

(iv) Applies section 381 to the target corporation's other attributes (that is, the acquiror corporation succeeds to the target corporation's other attributes).

(4) *Acquiror corporation in covered recognition transaction*—(i) *Failure to qualify as an asset reorganization*. If an acquiror corporation transfers stock and other property (or solely property other than stock) to a target corporation shareholder described in paragraph (b)(1) of this section in exchange for target corporation stock (that is, a covered recognition transaction), paragraphs (c)(1) through (3) of this section do not apply. See § 1.56A–18(h), which provides rules for determining the CAMT consequences of asset sales.

(ii) *Failure to qualify under § 1.1032–2(b)*. If an acquiror corporation transfers solely stock of the acquiror corporation parent to a target corporation shareholder as part of an acquisitive reorganization that does not satisfy § 1.1032–2(b) with regard to all acquiror corporation parent stock (that is, a covered recognition transaction solely with regard to the acquiror corporation parent stock that does not satisfy § 1.1032–2(b)), then solely with regard to the acquiror corporation parent stock that does not qualify under § 1.1032–2(b), see § 1.56A–18(h), which provides rules for determining the CAMT consequences of asset sales.

(5) *Acquiror corporation parent in covered nonrecognition transaction*. If an acquiror corporation transfers solely stock of the acquiror corporation parent to a target corporation shareholder as part of an acquisitive reorganization that qualifies the acquiror corporation for nonrecognition treatment under section 1032(a) and § 1.1032–2(b) (that is, a covered nonrecognition transaction), the acquiror corporation parent adjusts its CAMT basis in its acquiror corporation stock pursuant to § 1.358–6.

(6) *Acquiror corporation parent in covered recognition transaction*—(i) *Use of old and cold parent stock with qualifying acquisitive reorganization*. If an acquiror corporation transfers solely stock of the acquiror corporation parent to a target corporation shareholder as part of an acquisitive reorganization that does not satisfy § 1.1032–2(b) with regard to all acquiror corporation parent stock (that is, a covered recognition transaction solely with regard to the acquiror corporation parent stock that does not satisfy § 1.1032–2(b)), the acquiror corporation parent adjusts its

CAMT basis in its acquiror corporation stock pursuant to § 1.358–6.

(ii) *Use of parent stock in a transaction that does not qualify as an acquisitive reorganization*. If an acquiror corporation transfers acquiror corporation parent stock and other property to a target corporation shareholder in exchange for target corporation stock (that is, a covered recognition transaction), with regard to all acquiror corporation parent stock transferred by the acquiror corporation, the acquiror corporation parent adjusts its CAMT basis in its acquiror corporation stock pursuant to § 1.1032–3.

(7) *Target corporation shareholder or security holder in covered nonrecognition transaction*. A target corporation shareholder or security holder in a covered nonrecognition transaction described in paragraph (c)(1) of this section—

(i) Determines the target corporation shareholder or security holder's AFSI resulting from the covered nonrecognition transaction by—

(A) Disregarding any resulting gain or loss reflected in its FSI;

(B) Applying the relevant section of the Code (section 354 or 356 of the Code); and

(C) Using the distribution amount reflected on its AFS, taking into account (for purposes of the relevant section of the Code) the CAMT basis in its target corporation stock;

(ii) Determines the characterization of the distribution of property other than the acquiring corporation stock (to the extent applicable) by applying the relevant section of the Code based on the CAMT earnings (in lieu of earnings and profits) of the target corporation;

(iii) Determines its CAMT basis in the stock or securities of the acquiring corporation resulting from the

distribution by applying the relevant section of the Code using the target corporation shareholder's or security holder's CAMT basis in the stock (in lieu of basis for regular tax purposes);

(iv) Determines its CAMT basis in the property received from the target corporation by applying the relevant section of the Code, using CAMT basis in lieu of AFS basis; and

(v) Adjusts (to the extent applicable) the target corporation shareholder's or security holder's CAMT current earnings (in lieu of AFS retained earnings) resulting from the distribution by applying section 312 based on its AFSI, as determined under paragraph (c)(4)(i) of this section.

(8) *Examples*. The following examples illustrate the application of the rules in this paragraph (c). For purposes of these

examples, each entity is a domestic corporation that uses the calendar year as its taxable year and is not a member of a tax consolidated group.

(i) *Example 1: Covered nonrecognition transaction*—(A) *Facts*. During the taxable year, Target, whose stock is wholly owned by X, merges with and into Acquiror in a transaction that qualifies as a reorganization under section 368(a)(1)(A) of the Code. In the merger, X receives solely Acquiror stock with a fair market value of \$100×. At the time of Target's merger into Acquiror, Target's assets have a CAMT basis of \$15× and a value of \$30×, Target has \$10× CAMT retained earnings, and X has \$40× of CAMT basis in its Target stock.

(B) *Analysis*. Acquiror's acquisition of Target's assets is a covered nonrecognition transaction. Under paragraph (c)(1)(i)(A) of this section, in computing AFSI resulting from the transaction, Target disregards any FSI reflected in its AFS resulting from the exchange of its assets for the Acquiror stock. Under paragraph (c)(3)(i)(A) of this section, Acquiror disregards any FSI reflected in its AFS resulting from the exchange of its stock for Target's assets, and instead applies section 1032(a) of the Code under paragraph (c)(3)(i)(B) of this section. Under paragraph (c)(3)(ii) of this section, Acquiror takes the Target assets with a CAMT basis of \$15×. Under paragraph (c)(3)(iii) of this section, Acquiror adjusts its CAMT retained earnings to reflect Target's \$10× CAMT retained earnings. Under paragraph (c)(7)(i) of this section, X disregards any FSI resulting from the exchange of its Target stock for Acquiror stock. Under paragraph (c)(7)(iii) of this section, X takes the Acquiror stock with a \$40× CAMT basis.

(ii) *Example 2: Covered nonrecognition transaction with nonqualifying consideration*—(A) *Facts*. The facts are the same as in paragraph (c)(8)(i) of this section (*Example 1*), except that X receives as consideration in the merger \$10× cash and Acquiror voting stock with a fair market value of \$90×.

(B) *Analysis*. The analysis is the same as in paragraph (c)(8)(i)(B) of this section (*Example 1*), except as follows: Under paragraph (c)(7)(i)(B) of this section, X applies section 356 to the receipt of the \$10× cash and includes \$10× in AFSI. Under paragraph (c)(7)(iii) of this section, X takes the Acquiror stock at a \$50× basis (\$40× exchanged basis of Target stock + \$10× gain recognized). Under paragraph (c)(7)(v) of this section, X adjusts its

CAMT retained earnings to reflect the \$10× AFSI recognized.

(d) *CAMT consequences of section 355 transactions*—(1) *Distributing corporation in covered nonrecognition transactions*—(i) *Controlled contribution*. If a distributing corporation transfers property to a controlled corporation in a transaction that qualifies the distributing corporation solely for nonrecognition treatment under sections 355 and 361 (that is, a covered nonrecognition transaction), the distributing corporation—

(A) Determines the distributing corporation's AFSI resulting from the one or more transfers by disregarding any resulting gain or loss reflected in its FSI and applying sections 355 and 361, respectively (that is, no AFSI is recognized by the distributing corporation);

(B) Determines the distributing corporation's CAMT basis in the property received from the controlled corporation by applying section 358 using the CAMT basis (in lieu of AFS basis) of the property transferred by the distributing corporation to the controlled corporation; and

(C) Adjusts the distributing corporation's CAMT earnings (in lieu of AFS retained earnings) resulting from the covered nonrecognition transaction by applying section 312.

(ii) *Section 361(c) distributions and transfers*. If a distributing corporation distributes or transfers solely qualified property to a distributing corporation shareholder or security holder, or to a creditor of the distributing corporation, that qualifies solely for nonrecognition treatment to the distributing corporation under section 361(c) (that is, a covered nonrecognition transaction), the distributing corporation determines the distributing corporation's AFSI resulting from the covered nonrecognition transaction by disregarding any resulting gain or loss reflected in the distributing corporation's FSI and applying section 361(c) (that is, no AFSI is recognized by the distributing corporation).

(iii) *Section 355(c) distributions*. If a distributing corporation distributes solely qualified property to a distributing corporation shareholder or security holder in a distribution that qualifies solely for nonrecognition treatment to the distributing corporation under section 355(c) (that is, a covered nonrecognition transaction), the distributing corporation—

(A) Determines the distributing corporation's AFSI resulting from the distribution by disregarding any resulting gain or loss reflected in the

distributing corporation's FSI and applying section 355(c) (that is, no AFSI is recognized by the distributing corporation); and

(B) Adjusts the distributing corporation's CAMT earnings (in lieu of AFS retained earnings) resulting from the distribution by applying section 312.

(2) *Distributing corporation in covered recognition transactions*—(i) *Controlled contribution*. If a distributing corporation transfers property to a controlled corporation in a section 355 transaction that results in any recognition treatment to the distributing corporation (that is, a covered recognition transaction), the distributing corporation—

(A) Determines the distributing corporation's AFSI resulting from the one or more transfers by redetermining any resulting gain or loss reflected in its FSI by using CAMT basis in lieu of AFS basis;

(B) Determines the distributing corporation's CAMT basis in the property received from the controlled corporation to be equal to the distributing corporation's AFS basis in that property; and

(C) Adjusts the distributing corporation's CAMT retained earnings (in lieu of AFS retained earnings) based on the distributing corporation's AFSI, as determined under paragraph (d)(2)(i)(A) of this section.

(ii) *Section 361(c) distribution*. If a distribution or transfer of property by a distributing corporation under section 361(c) results in any recognition treatment to the distributing corporation (that is, a covered recognition transaction), the distributing corporation—

(A) Determines the distributing corporation's AFSI resulting from the covered recognition transaction by redetermining any resulting gain or loss reflected in the distributing corporation's FSI by reference to its CAMT basis in the distributed or transferred property (in lieu of AFS basis); and

(B) Adjusts the distributing corporation's CAMT earnings (in lieu of AFS retained earnings) based on the distributing corporation's AFSI, as determined under paragraph (d)(2)(ii)(A) of this section.

(3) *Distributing corporation shareholder or security holder*. A distributing corporation shareholder or security holder in a covered transaction described in paragraph (d)(1) or (2) of this section—

(i) Determines the distributing corporation shareholder's or security holder's AFSI resulting from the distribution by—

(A) Disregarding any resulting gain or loss reflected in the distributing corporation shareholder's or security holder's FSI;

(B) Applying the relevant section of the Code; and

(C) Using the distribution amount of the property other than distributing corporation stock reflected in the AFS of the distributing corporation shareholder or security holder, taking into account (for purposes of the relevant section of the Code) the CAMT basis of the distributing corporation shareholder or security holder in its distributing corporation stock;

(ii) Determines the characterization of the distribution of the property other than distributing corporation stock (to the extent applicable) by applying the relevant section of the Code based on the CAMT earnings (in lieu of earnings and profits) of the distributing corporation;

(iii) Determines the distributing corporation shareholder's or security holder's CAMT basis in the stock of the distributing corporation resulting from the distribution by applying the relevant section of the Code, using the CAMT basis of the distributing corporation shareholder or security holder in the stock (in lieu of basis for regular tax purposes);

(iv) Determines the distributing corporation shareholder's or security holder's CAMT basis in the property received from the distributing corporation by applying the relevant section of the Code, using CAMT basis (in lieu of AFS basis); and

(v) Adjusts the distributing corporation shareholder's or security holder's CAMT earnings (in lieu of AFS retained earnings) resulting from the distribution by applying section 312 based on its AFSI, as determined under paragraph (d)(3)(i) of this section.

(4) *Controlled corporation in covered nonrecognition transaction*. Subject to § 1.56A-18(e), if a controlled corporation transfers solely its own stock to a distributing corporation that qualifies the controlled corporation for nonrecognition treatment under section 1032(a) (that is, a covered nonrecognition transaction), the controlled corporation—

(i) Determines the controlled corporation's AFSI resulting from the transfer by—

(A) Disregarding any resulting gain or loss reflected in the controlled corporation's FSI; and

(B) Applying section 1032(a) to the transfer (that is, no AFSI is recognized by the controlled corporation);

(ii) Determines the controlled corporation's CAMT basis in the

property received by the controlled corporation from the distributing corporation by applying section 362 using the CAMT basis (in lieu of AFS basis) of that property; and

(iii) Adjusts the controlled corporation's CAMT current earnings (in lieu of AFS retained earnings) resulting from the covered nonrecognition transaction by applying section 312.

(5) *Controlled corporation in covered recognition transaction—(i) Qualification—(A) General rule.* Except as provided in paragraph (d)(5)(i)(B) of this section, if a controlled corporation transfers money or other property (in addition to stock) to a distributing corporation as part of a section 355 transaction that qualifies the controlled corporation for nonrecognition treatment under section 1032(a), the transfer is treated as a covered recognition transaction to the controlled corporation.

(B) *Exception for complete boot purges through covered nonrecognition transactions.* A transfer by a controlled corporation described in paragraph (d)(5)(i)(A) of this section is treated as a covered nonrecognition transaction if the distributing corporation distributes or transfers all of the money or other property received by the distributing corporation in that transfer to a distributing corporation shareholder or security holder, or to a distributing corporation creditor, that qualifies solely for nonrecognition treatment to the distributing corporation under section 361(b) (that is, a covered nonrecognition transaction).

(ii) *CAMT consequences.* If a transfer by a controlled corporation described in paragraph (d)(5)(i) of this section is a covered recognition transaction, the controlled corporation—

(A) Determines the controlled corporation's AFSI resulting from the covered recognition transaction by redetermining any resulting gain or loss reflected in the controlled corporation's FSI by reference to the controlled corporation's CAMT basis (in lieu of AFS basis);

(B) Determines the controlled corporation's CAMT basis in the property received from the distributing corporation to be equal to the controlled corporation's AFS basis in that property; and

(C) Adjusts the controlled corporation's CAMT earnings (in lieu of AFS retained earnings) based on the controlled corporation's AFSI, as determined under paragraph (d)(5)(ii)(A) of this section.

(6) *Examples.* The following examples illustrate the application of the rules in

this paragraph (d). For purposes of these examples, each entity is a domestic corporation that uses the calendar year as its taxable year and is not a member of a tax consolidated group.

(i) *Example 1: Covered nonrecognition transaction to distributing corporation and controlled corporation—(A) Facts.* On February 1, Distributing contributes property with a fair market value of \$190x and a CAMT basis of \$20x to Controlled, a newly formed corporation, in exchange for Controlled stock with a fair market value of \$175x and \$15x of Controlled securities (collectively, the Contribution). Pursuant to a plan of reorganization that includes the Contribution, Distributing distributes all of the Controlled stock to Distributing's shareholders in exchange for their Distributing stock (Controlled Split-Off) in a transaction that qualifies for Distributing under sections 368(a)(1)(D), 355, 357, and 361 of the Code, and for Controlled under section 1032(a). Pursuant to the plan of reorganization, Distributing distributes the Controlled securities to creditors of Distributing in transactions that qualify under section 361(c)(3) (Debt-for-Debt Exchange). Immediately before the Contribution, Distributing has \$600x of CAMT retained earnings. As part of the Controlled Split-Off, X, a CAMT entity that holds 10 shares of Distributing stock with a CAMT basis of \$10x and a fair market value of \$26x, exchanges 5 shares of Distributing stock for Controlled stock. As part of the Debt-for-Debt Exchange, Y, a CAMT entity that holds Distributing securities with a CAMT basis of \$3x and a fair market value of \$6x, exchanges its Distributing securities for \$6x of Controlled securities.

(B) *Analysis: Contribution and distribution.* The Contribution and the Controlled Split-Off are covered nonrecognition transactions. Under paragraph (d)(1)(i)(A) of this section, Distributing disregards any FSI reflected in its AFS resulting from the Contribution and instead applies section 361 to determine AFSI; that is, Distributing has \$0x AFSI on the Contribution. Under paragraph (d)(1)(i)(B) of this section, Distributing takes a CAMT basis of \$20x in the Controlled stock and securities received in the Contribution. Under paragraph (d)(1)(i)(C) of this section, Distributing reduces its CAMT earnings by the amount of AFSI resulting from the Contribution, or \$0x. Under paragraph (d)(4)(i) of this section, Controlled disregards any FSI reflected in its AFS resulting from the Contribution and applies section 1032(a) to determine AFSI, or \$0x AFSI resulting from the

Contribution. Under paragraph (d)(4)(ii) of this section, Controlled records a CAMT basis of \$20x for the assets received in the Contribution.

(C) *Analysis: Distributing shareholders.* Under paragraph (d)(3)(i)(A) of this section, X disregards any FSI reflected in its AFS resulting from the exchange of Distributing stock for Controlled stock and instead applies section 355(a) to determine AFSI, or \$0x AFSI. Under paragraph (d)(3)(iii) of this section, X takes a \$5x CAMT basis in the Controlled stock received in the Controlled Split-Off. Under paragraph (d)(3)(v) of this section, X adjusts its CAMT retained earnings by the amount of AFSI resulting from the exchange, or \$0x.

(D) *Analysis: Distributing security holders.* The analysis is similar to paragraph (d)(6)(i)(C) of this section (*Example 1*) for Y with respect to the Controlled securities exchanged for Distributing securities.

(ii) *Example 2: Distributing corporation boot-purge exception—(A) Facts.* The facts are the same as in paragraph (d)(6)(i)(A) of this section (*Example 1*), except that in the Contribution, the property contributed to Controlled has a fair market value of \$200x, Controlled transfers \$10x cash to Distributing, and Distributing distributes the \$10x cash to its shareholders in a distribution that qualifies under section 361(b)(1)(A) (Cash Distribution). In the Cash Distribution, X receives \$1x.

(B) *Analysis.* Because the Cash Distribution qualifies under section 361(b)(1)(A), under paragraph (d)(5)(i)(B) of this section, the receipt of nonqualifying consideration and the distribution of nonqualifying consideration is a covered nonrecognition transaction. As a result, the analysis is the same as paragraph (d)(6)(i)(B) of this section (*Example 1*). Additionally, under paragraph (d)(3)(i)(B) of this section, X includes \$1x in AFSI. Under paragraph (d)(3)(v) of this section, X adjusts its CAMT earnings by the amount of AFSI resulting from the exchange, or \$1x.

(iii) *Example 3: Covered recognition transaction to distributing corporation—(A) Facts.* The facts are the same as in paragraph (d)(6)(ii)(A) of this section (*Example 2*), except that in the Contribution, the fair market value of the property contributed to Controlled is \$210x and Distributing receives Controlled securities worth \$25x and distributes all of the Controlled securities to Distributing creditors in exchange for Distributing securities. Additionally, in the Controlled Split-Off, Distributing distributes only 90% of

the Controlled stock. On September 30th, Distributing distributes the remaining 10% of the Controlled stock pro rata to its shareholders.

(B) *Analysis: Contribution.* Because Distributing distributed Controlled securities with a fair market value of more than the adjusted basis of the property transferred to Controlled, resulting in gain to Distributing under section 361(b)(3), under paragraph (d)(2)(i) of this section, the Contribution is a covered recognition transaction. Under paragraph (d)(2)(i)(A) of this section, Distributing determines its AFSI resulting from the exchange using its CAMT basis, or \$190x (\$210x – \$20x). Under paragraph (d)(2)(i)(B) of this section, Distributing's CAMT basis in the Controlled stock and Controlled securities is its AFS basis, or \$170x and \$25x, respectively. Under paragraph (d)(2)(i)(C) of this section, Distributing adjusts its CAMT retained earnings by the amount of AFSI resulting from the Contribution, or \$190x.

(C) *Analysis: Controlled split-off.* The Controlled Split-Off is a covered nonrecognition transaction. As a result, the analysis of the CAMT consequences to X is similar to paragraph (d)(6)(i)(C) of this section (*Example 1*). Under § 1.56A–18(c)(2)(i), Distributing disregards any FSI reflected in its AFS resulting from the Controlled Split-Off. Additionally, under § 1.56A–18(c)(2)(i), Distributing disregards any FSI reflected in its AFS resulting from any mark-to-market of the fair value of the retained Controlled stock.

(D) *Analysis—Debt-for-debt exchange.* The Debt-for-Debt exchange is a covered nonrecognition transaction. As a result, the analysis with respect to Y is similar to paragraph (d)(6)(i)(D) of this section (*Example 1*).

(e) *CAMT consequences of recapitalizations—(1) Recapitalizing corporation in covered nonrecognition transaction.* If a recapitalizing corporation transfers solely stock to a recapitalizing corporation shareholder or creditor in an E reorganization or a section 1036 exchange that qualifies the recapitalizing corporation solely for nonrecognition treatment (that is, a covered nonrecognition transaction), the recapitalizing corporation—

(i) Determines the recapitalizing corporation's AFSI resulting from the covered nonrecognition transaction by—

(A) Disregarding any resulting gain or loss reflected in the recapitalizing corporation's FSI; and

(B) Applying section 1032(a) or 1036 of the Code, as appropriate (that is, no AFSI is recognized by the recapitalizing corporation); and

(ii) Adjusts the recapitalizing corporation's CAMT earnings (in lieu of AFS retained earnings) resulting from the covered nonrecognition transaction by applying section 312.

(2) *Component transactions consisting of covered nonrecognition transaction and corporate distributions.* If a transaction that qualifies as an E reorganization includes a transfer of money or other property (other than stock in the recapitalizing corporation) to a recapitalizing corporation shareholder or security holder, the recapitalizing corporation determines its aggregate resulting AFSI and CAMT earnings by treating each of the following component transactions separately—

(i) Each component transaction that qualifies as a covered nonrecognition transaction; and

(ii) Each component transaction that is treated as a distribution of property by the recapitalizing corporation to a recapitalizing corporation shareholder or security holder. See paragraph (d)(1)(ii) of this section for rules addressing non-liquidating corporate distributions.

(3) *Recapitalizing corporation shareholder or security holder.* A recapitalizing corporation shareholder or security holder in a covered transaction described in paragraph (e)(1) or (2) of this section—

(i) Determines the recapitalizing corporation shareholder's or security holder's AFSI resulting from the covered transaction by—

(A) Disregarding any resulting gain or loss reflected in its FSI;

(B) Applying the relevant section of the Code; and

(C) Using the distribution amount reflected on its AFS, taking into account (for purposes of the relevant section of the Code) the CAMT basis in its recapitalizing corporation stock;

(ii) Determines the characterization of any distribution (to the extent applicable) by applying the relevant section of the Code based on the CAMT earnings (in lieu of earnings and profits) of the recapitalizing corporation;

(iii) Determines its CAMT basis in the stock of the recapitalizing corporation resulting from the exchange by applying the relevant section of the Code using its CAMT basis in the stock (in lieu of basis for regular tax purposes);

(iv) Determines its CAMT basis in the property received from the recapitalizing corporation by applying the relevant section of the Code, using CAMT basis (in lieu of AFS basis); and

(v) Adjusts (to the extent applicable) its CAMT earnings (in lieu of AFS retained earnings) resulting from the

exchange by applying section 312 based on its AFSI, as determined under paragraph (e)(3)(i) of this section.

(4) *Examples.* The following examples illustrate the application of the rules in this paragraph (e). For purposes of these examples, each entity is a domestic corporation that uses the calendar year as its taxable year and is not a member of a tax consolidated group.

(i) *Example 1: Covered nonrecognition transaction—(A) Facts.* X has two classes of common stock, Class D and Class E. X also has issued \$100x in securities that are held by unrelated parties. On its AFS, X carries the X securities at \$90x. Y owns Class E common stock with a fair market value of \$100x and a CAMT basis of \$50x. Z holds \$20x of X's securities with a CAMT basis of \$10x. As part of an E reorganization, X recapitalizes its Class D and Class E stock into a single class of Class D common stock. X also recapitalizes the \$100x securities into preferred stock with a fair market value of \$100x.

(B) *Analysis.* The transaction is a covered nonrecognition transaction. Under paragraph (e)(1)(i) of this section, X disregards any FSI reflected in its AFS from the exchange of its Class D and Class E common stock for the Class D common stock and instead applies the appropriate Code section to determine its AFSI on the exchange, or \$0x. Under paragraph (e)(1)(ii) of this section, X adjusts its CAMT retained earnings to reflect the AFSI resulting from the exchange, or by \$0x. Under paragraph (e)(3)(i)(A) of this section, Y disregards any FSI reflected in its AFS resulting from the exchange of its Class E common stock for Class D common stock. Under paragraph (e)(3)(i)(B) of this section, Y determines its AFSI resulting from the exchange by applying section 354 of the Code, resulting in \$0x AFSI. Under paragraph (e)(3)(iii) of this section, Y takes a CAMT basis in its Class D stock of \$50x.

(ii) *Example 2: E reorganization and corporate distribution—(A) Facts.* X has two classes of common stock outstanding, held as follows: Y owns 99 shares of Class D common stock with a CAMT basis of \$99x and a fair market value of \$198x, and Z owns one share of Class E common stock with a CAMT basis of \$1x and a fair market value of \$2x. In order to simplify its capital structure and eliminate minority interests, Y engages in a transaction in which the Class D and Class E stock are recapitalized into a single class of common stock. In the exchange, Y exchanges its 99 shares of Class D X stock for 33 shares of X stock, and Z receives \$2x cash in exchange for its one

share in lieu of X issuing a fractional share of stock.

(B) *Analysis.* Y's exchange of Class D common stock for new X common stock is a covered nonrecognition transaction. Z's exchange of its share of Class E common stock for cash is a covered recognition transaction. Under paragraph (e)(2) of this section, X determines its aggregate AFSI and CAMT earnings by treating each component transaction separately. With respect to the covered nonrecognition transaction, the analysis is similar to paragraph (e)(4)(i)(B) of this section (*Example 1*), except that Y's CAMT basis in its 33 shares of X stock is \$99x. See § 1.56A–18(d) for rules relating to the computation of AFSI for Z and X with respect to the complete redemption of Z's interest in X for cash.

(f) *CAMT consequences of F reorganizations—(1) Transferor corporation in covered nonrecognition transaction.* If a transferor corporation transfers property to a resulting corporation in an F reorganization that qualifies the transferor corporation solely for nonrecognition treatment (that is, a covered nonrecognition transaction), the transferor corporation—

(i) Determines the transferor corporation's AFSI resulting from the covered nonrecognition transaction by—

(A) Disregarding any resulting gain or loss reflected in the transferor corporation's FSI; and

(B) Applying section 361 to the transfer (that is, no AFSI is recognized by the transferor corporation);

(ii) Determines the transferor corporation's CAMT basis in any property received from the resulting corporation by applying section 358 using the CAMT basis (in lieu of AFS basis) of the property transferred by the transferor corporation to the resulting corporation; and

(iii) Adjusts the transferor corporation's CAMT earnings (in lieu of AFS retained earnings) resulting from the covered nonrecognition transaction by applying section 312.

(2) *Component transactions consisting of covered nonrecognition transaction and corporate distributions.* If a transaction that qualifies as an F reorganization includes a transfer of money or other property (other than stock in the resulting corporation) to a transferor corporation shareholder or security holder, the transferor corporation determines its aggregate resulting AFSI and CAMT earnings by treating each of the following component transactions separately—

(i) Each component transaction that qualifies as a covered nonrecognition transaction; and

(ii) Each component transaction that is treated as a distribution of property by the transferor corporation to a transferor corporation shareholder or security holder. See § 1.56A–18(d) for rules addressing non-liquidating corporate distributions.

(3) *Resulting corporation.* If a resulting corporation transfers solely stock, or stock and money or other property, to a transferor corporation as part of an F reorganization that qualifies the resulting corporation for nonrecognition treatment under section 1032(a) (that is, a covered nonrecognition transaction), the resulting corporation—

(i) Determines the resulting corporation's AFSI resulting from the covered nonrecognition transaction by—

(A) Disregarding any resulting gain or loss reflected in the resulting corporation's FSI; and

(B) Applying section 1032(a) to the transfer (that is, no AFSI is recognized by the resulting corporation);

(ii) Determines the resulting corporation's CAMT basis in the property received from the transferor corporation by applying section 362 using the CAMT basis (in lieu of AFS basis) of that property; and

(iii) Adjusts the resulting corporation's CAMT retained earnings (in lieu of AFS retained earnings) resulting from the covered nonrecognition transaction by applying sections 381(c)(2) and 312.

(4) *Transferor corporation shareholder or security holder.* A transferor corporation shareholder or security holder described in paragraph (f)(1) or (2) of this section—

(i) Determines the transferor corporation shareholder's or security holder's AFSI resulting from the covered transaction by—

(A) Disregarding any resulting gain or loss reflected in its FSI;

(B) Applying the relevant provision of the Code; and

(C) Using the distribution amount reflected on its AFS, taking into account (for purposes of the relevant section of the Code) the transferor corporation shareholder's or security holder's CAMT basis in its transferor corporation stock;

(ii) Determines the characterization of any distribution (to the extent applicable) by applying the relevant section of the Code based on the CAMT earnings (in lieu of AFS earnings and profits) of the transferor corporation;

(iii) Determines the transferor corporation shareholder's or security holder's CAMT basis in the stock of the

resulting corporation resulting from the exchange by applying the relevant section of the Code using the transferor corporation shareholder's or security holder's CAMT basis in the stock (in lieu of basis for regular tax purposes);

(iv) Determines the transferor corporation shareholder's or security holder's CAMT basis in the property received by applying the relevant section of the Code, using CAMT basis in lieu of AFS basis; and

(v) Adjusts (to the extent applicable) its CAMT earnings (in lieu of AFS retained earnings) resulting from the exchange by applying section 312 based on its AFSI, as determined under paragraph (f)(4)(i) of this section.

(5) *Examples.* The following examples illustrate the application of the rules in this paragraph (f). For purposes of these examples, each entity is a domestic corporation that uses the calendar year as its taxable year and is not a member of a tax consolidated group.

(i) *Example 1: Covered nonrecognition transaction—(A) Facts.* X is organized in State G. X has a single class of stock owned by Y, Z, and W as follows: Y owns 50 shares, with a fair market value of \$100x and a CAMT basis of \$50x; Z owns 45 shares, with a fair market value of \$90 and a CAMT basis of \$45; and W owns 5 shares with a fair market value of \$10 and a CAMT basis of \$5. X's assets have a fair market value of \$200x and a CAMT basis of \$75x. X has \$350x CAMT retained earnings and \$0x CAMT current earnings. In 2024, X organizes U as a State H corporation. Y, Z, and W contribute their X stock to U in exchange for U stock, and U converts X to a limited liability company under State H law.

(B) *Analysis.* The reorganization is a covered nonrecognition transaction. Under paragraph (f)(1)(i) of this section, X determines its AFSI by disregarding any FSI reflected in its AFS resulting from the transfer of its assets to U and instead applies section 361 to the exchange, resulting in \$0x AFSI. Under paragraph (f)(1)(ii) of this section, X takes a \$75x CAMT basis in the U stock it is deemed to receive. Under paragraph (f)(1)(iii) of this section, X adjusts its CAMT retained earnings by the amount of its AFSI, or \$0x. Under paragraph (f)(3)(i) of this section, U disregards any FSI on its AFS resulting from the issuance of its stock in exchange for X's assets, and instead applies section 1032(a), resulting in \$0x AFSI on the exchange. Under paragraph (f)(3)(ii) of this section, U takes the assets received from X at X's CAMT basis, or \$75x. Under paragraph (f)(3)(iii) of this section, U adjusts its CAMT retained earnings by taking into account X's

CAMT retained earnings, or \$350x, plus the AFSI recognized on the exchange, or \$0x. Under paragraph (f)(4)(i) of this section, each of Y, Z, and W, would disregard any FSI reflected in its AFS resulting from the exchange of X stock for U stock, and instead would apply section 354 to the exchange, resulting in \$0x AFSI. Under paragraph (f)(4)(iv) of this section, each of Y, Z, and W would determine its basis in the U stock by applying section 358, resulting in Y taking a CAMT basis in the U stock of \$50x, Z taking a CAMT basis in the U stock of \$45x, and W taking a CAMT basis in the U stock of \$5x. Under paragraph (f)(4)(v) of this section, each of Y, Z, and W would adjust CAMT retained earnings by the amount of AFSI recognized on the exchange, or \$0x.

(ii) *Example 2: Component transactions*—(A) *Facts*. The facts are the same as in paragraph (f)(5)(i)(A) of this section (*Example 1*), except that as part of the transaction, U distributes \$10x cash to W in complete redemption of W's stock.

(B) *Analysis*. The F reorganization involving Y and Z is a covered nonrecognition transaction. The redemption by U of all of W's stock is a covered recognition transaction. Under paragraph (f)(2) of this section, U determines its aggregate AFSI and CAMT earnings by treating each component transaction separately. With respect to the covered nonrecognition transaction, the analysis is similar to paragraph (f)(5)(i)(B) of this section (*Example 1*). With respect to the covered recognition transaction, see § 1.56A–18(d).

(g) *CAMT consequences of section 351 exchanges*—(1) *Component transactions consisting of covered recognition and covered nonrecognition transactions*. If a section 351 exchange has more than one section 351 transferor, and if the section 351 transferee transfers solely stock to at least one section 351 transferor and transfers money or other property in addition to its stock to at least one other section 351 transferor, the section 351 transferee determines its aggregate resulting AFSI, CAMT basis, and CAMT earnings consequences by treating each of the following component transactions separately—

(i) Each component transaction in which the section 351 transferee transfers solely stock (including nonqualified preferred stock described in section 351(g)(2)) to a section 351 transferor (that is, a covered nonrecognition transaction with respect to the section 351 transferee); and

(ii) Each component transaction in which the section 351 transferee transfers money or other property in

addition to its stock to a section 351 transferor (that is, a covered recognition transaction with respect to the section 351 transferee).

(2) *Section 351 transferor in covered nonrecognition transaction*. If a section 351 transferor transfers property to a section 351 transferee in a transaction to which section 351(a) applies to the section 351 transferor (that is, a covered nonrecognition transaction with respect to the section 351 transferor), the section 351 transferor—

(i) Determines the section 351 transferor's AFSI resulting from the transfer by—

(A) Disregarding any resulting gain or loss reflected in the section 351 transferor's FSI; and

(B) Applying section 351 to the transfer (that is, no AFSI is recognized by the section 351 transferor); and

(ii) Determines the section 351 transferor's CAMT basis in the stock received from the section 351 transferee by applying section 358 using the CAMT basis (in lieu of AFS basis) of the property transferred by the section 351 transferor to the section 351 transferee.

(3) *Section 351 transferor in covered recognition transaction*. If a section 351 transferor transfers property to a section 351 transferee in a transaction in which section 351(b) applies (including by reason of section 351(g)) to the section 351 transferor (that is, a covered recognition transaction with respect to the section 351 transferor), the section 351 transferor—

(i) Determines the section 351 transferor's AFSI resulting from the transfer by redetermining any resulting gain or loss, if any, reflected in its FSI by reference to its CAMT basis in the transferred property (in lieu of AFS basis);

(ii) Determines the section 351 transferor's CAMT basis in the property received from the section 351 transferee to be equal to the section 351 transferor's AFS basis in that property; and

(iii) Adjusts the section 351 transferor's CAMT retained earnings (in lieu of AFS retained earnings) based on the section 351 transferor's AFSI, as determined under paragraph (g)(3)(i) of this section.

(4) *Section 351 transferee in covered nonrecognition transaction*. If a section 351 transferee transfers solely stock to a section 351 transferor in a transaction in which section 1032(a) applies to the section 351 transferee (that is, a covered nonrecognition transaction), the section 351 transferee determines its AFSI resulting from the covered nonrecognition transaction and its CAMT basis in the property received

from the section 351 transferor under this paragraph (g)(4).

(i) *Section 351 transferee's AFSI*. The section 351 transferee determines the section 351 transferee's AFSI resulting from the transfer by—

(A) Disregarding any resulting gain or loss reflected in the section 351 transferee's FSI; and

(B) Applying section 1032(a) to the transfer (that is, no AFSI is recognized by the section 351 transferee).

(ii) *Section 351 transferee's CAMT basis in property*. Except as provided in paragraph (g)(3)(iii) of this section, the section 351 transferee determines the section 351 transferee's CAMT basis in the property received by the section 351 transferee from the section 351 transferor by applying section 362 using the CAMT basis (in lieu of AFS basis) of that property and any CAMT gain recognized by the section 351 transferor in the section 351 exchange.

(iii) *Special CAMT basis rule*. The section 351 transferee determines its CAMT basis under paragraph (g)(4)(ii) of this section in the property received from a section 351 transferor by redetermining the amount of any CAMT gain recognized by the section 351 transferor to include only the amount, if any, by which the fair market value of the portion of the property transferred by the section 351 transferor exceeds the section 351 transferor's CAMT basis in that portion of the transferred property if—

(A) The section 351 transferor is not an applicable corporation and its AFSI otherwise is not required to be taken into account under the section 56A regulations by any applicable corporation for the taxable year in which qualification of the component transaction as a covered recognition transaction with respect to the section 351 transferor otherwise would be determined under the section 56A regulations,

(B) The section 351 transferee solely transfers its stock to that section 351 transferor, and

(C) The fair market value of nonqualified preferred stock (as defined in section 351(g)(2)) described in paragraph (g)(4)(iii)(B) of this section is 10 percent or less of the aggregate fair market value of the stock described in paragraph (g)(4)(iii)(B) of this section transferred by the section 351 transferee to the section 351 transferor in the section 351 exchange.

(5) *Section 351 transferee in covered recognition transaction*. If a section 351 transferee transfers money or other property and stock to a section 351 transferor in a transaction to which section 1032(a) applies to the section

351 transferee (that is, a covered recognition transaction), the section 351 transferee determines its AFSI resulting from the transfer and its CAMT basis in the property received from the section 351 transferor, and CAMT retained earnings consequences under this paragraph (g)(5).

(i) *Section 351 transferee's AFSI.* The section 351 transferee determines the section 351 transferee's AFSI resulting from the transfer by redetermining any resulting gain or loss reflected in the section 351 transferee's FSI by reference to CAMT basis (in lieu of AFS basis).

(ii) *Section 351 transferee's CAMT basis in property.* Except as provided in paragraph (g)(5)(iii) of this section, the section 351 transferee determines the section 351 transferee's CAMT basis in the property received by the section 351 transferee to be equal to the section 351 transferee's AFS basis in that property.

(iii) *Special CAMT basis rule.* The section 351 transferee determines its CAMT basis under paragraph (g)(5)(ii) of this section in the property received from a section 351 transferor by redetermining the section 351 transferee's AFS basis in that property to not exceed the sum of the amount of the section 351 transferee's CAMT basis in the transferred property immediately before the section 351 exchange and the amount, if any, by which the fair market value of the portion of the property other than stock of the section 351 transferee transferred to the section 351 transferor exceeds the section 351 transferee's CAMT basis in that portion of the transferred property if—

(A) The section 351 transferor is not an applicable corporation and its AFSI otherwise is not required to be taken into account under the section 56A regulations by any applicable corporation for the taxable year in which qualification of the component transaction as a covered recognition transaction with respect to the section 351 transferee otherwise would be determined under the section 56A regulations,

(B) The section 351 transferee transfers its stock and money or other property to that section 351 transferor, and

(C) The amount of money and fair market value of other property described in paragraph (g)(5)(iii)(B) of this section is 10 percent or less of the sum of the money and the aggregate fair market value of the stock and other property described in paragraph (g)(5)(iii)(B) of this section transferred by the section 351 transferee to the section 351 transferor in the section 351 exchange.

(iv) *Section 351 transferee's CAMT retained earnings.* The section 351 transferee adjusts the section 351 transferee's CAMT retained earnings (in lieu of AFS retained earnings) based on the section 351 transferee's AFSI, as determined under paragraph (g)(5)(i) of this section.

(6) *Examples.* The following examples illustrate the application of the rules in this paragraph (g). For purposes of these examples, each entity is a domestic corporation that uses the calendar year as its taxable year and is not a member of a tax consolidated group.

(i) *Example 1: Covered nonrecognition transaction—(A) Facts.* Acquiror transfers assets with a CAMT basis of \$40x and a fair market value of \$90x to newly formed Target in a section 351 exchange (Exchange). On its AFS, Acquiror recognizes \$50x of FSI on the Exchange (\$90x – \$40x).

(B) *Analysis.* The Exchange is a covered nonrecognition transaction to each of Acquiror and Target. Under paragraph (g)(2)(i) of this section, in computing AFSI, Acquiror disregards the FSI reflected in its AFS resulting from the Exchange. Under paragraph (g)(2)(ii) of this section, Acquiror records the Target stock received in the Exchange at the CAMT basis of the assets transferred to Target, or \$40x. Under paragraph (g)(4)(i) of this section, Target disregards any FSI reflected in its AFS resulting from the Exchange. Under paragraph (g)(4)(ii) of this section, Target takes a \$40x CAMT basis in the assets it receives from Acquiror in the Exchange.

(ii) *Example 2: Covered recognition transaction—(A) Facts.* The facts are the same as in paragraph (g)(6)(i)(A) of this section (*Example 1*), except that Acquiror receives \$10x of cash in addition to \$80x of Target stock in the Exchange.

(B) *Analysis.* The Exchange is a covered recognition transaction to each of Acquiror and Target. Under paragraph (g)(3)(i) of this section, Acquiror disregards any FSI resulting from the Exchange reflected in its AFS and instead redetermines its AFSI by computing any gain or loss using its CAMT basis in the assets transferred to Target, or \$50x (\$90x – \$40x). Under paragraph (g)(3)(ii) of this section, Acquiror's CAMT basis in the Target stock received is its AFS basis, or \$80x. Under paragraph (g)(3)(iii) of this section, Acquiror adjusts its CAMT retained earnings by the amount of AFSI resulting from the Exchange, or \$50x. Under paragraph (g)(5)(i) of this section, Target disregards any FSI resulting from the Exchange and instead determines AFSI using CAMT basis, or \$90x. Under

paragraph (g)(5)(ii) of this section, Target determines its CAMT basis using its AFS basis in the property, or \$90x. Paragraph (g)(5)(iii) of this section does not apply. Under paragraph (g)(5)(iv) of this section, Target adjusts its CAMT retained earnings by the amount of AFSI recognized on the Exchange, or \$90x, reduced by the \$10x cash distributed.

(iii) *Example 3: Component transactions—(A) Facts.* The facts are the same as in paragraph (g)(6)(ii)(A) of this section (*Example 2*), except that, as part of the same transaction, unrelated X transfers assets to Target with a CAMT basis of \$25x and a fair market value of \$120x in exchange for Target stock.

(B) *Analysis.* The transfer of assets by Acquiror to Target is a covered recognition transaction to each of Acquiror and Target. The transfer of assets by X to Target is a covered nonrecognition transaction to each of X and Target. Under paragraph (g)(1) of this section, Target determines its aggregate AFSI, CAMT basis, and CAMT retained earnings by treating each of the component transactions separately. With respect to the transfer of assets by Acquiror to Target, the analysis is similar to paragraph (g)(6)(ii)(B) of this section (*Example 2*). Under paragraph (g)(2)(i) of this section, in computing AFSI, X disregards the FSI reflected in its AFS resulting from the Exchange. Under paragraph (g)(2)(ii) of this section, X's CAMT basis of the Target stock received in the Exchange is the CAMT basis of the assets transferred to Target, or \$25x. Under paragraph (g)(4)(i) of this section, Target disregards any FSI reflected in its AFS resulting from the Exchange. Under paragraph (g)(4)(ii) of this section, Target takes a \$25x CAMT basis in the assets it receives from X in the Exchange.

(iv) *Example 4: Covered recognition transaction—(A) Facts.* The facts are the same as in paragraph (g)(6)(ii)(A) of this section (*Example 2*), except that Acquiror is not an applicable corporation and receives \$5x of cash in addition to \$85x of Target stock in the Exchange.

(B) *Analysis.* The amount of money transferred by Target to Acquiror in the Exchange is less than 10 percent of the amount of money and the fair market value of stock transferred by Target to Acquiror in the Exchange ($\$5x / (\$5x + \$85x) = 5.5\%$). Accordingly, under paragraph (g)(5)(iii) of this section, Target's CAMT basis in the assets received from Acquiror is equal to Acquiror's CAMT basis in the assets immediately before the Exchange (\$40) plus \$0 of CAMT gain recognized by

Target on the transfer of the \$5 of cash in the Exchange.

(h) *Applicability date.* This section applies to taxable years ending after [DATE OF PUBLICATION OF FINAL RULE IN THE FEDERAL REGISTER].

§ 1.56A-20 AFSI adjustments to apply certain subchapter K principles.

(a) *Overview*—(1) *In general.* This section provides rules under sections 56A(c)(15)(B) and (e) of the Code for determining AFSI adjustments for a CAMT entity that is a partner in a partnership, including the CAMT entity's distributive share of AFSI from a partnership investment under section 56A(c)(2)(D) of the Code, to take into account certain principles under subchapter K. Paragraph (b) of this section sets forth the scope of this section and provides a general rule for FSI resulting from transactions between a CAMT entity and a partnership in which the CAMT entity is a partner. Paragraph (c) of this section provides special rules for contributions of property by a CAMT entity to a partnership. Paragraph (d) of this section provides special rules for distributions of property by a partnership if one or more of its partners is a CAMT entity. Paragraph (e) of this section provides rules regarding the treatment of partner and partnership liabilities for purposes of the section 56A regulations. Paragraph (f) of this section provides special rules for partial nonrecognition transactions under sections 721(a) and 731(b) of the Code. Paragraph (g) of this section provides rules regarding the maintenance of books and records and reporting requirements to comply with the rules of this section. Paragraph (h) of this section provides examples illustrating the application of the rules in this section. Paragraph (i) of this section provides the applicability date of this section.

(2) *Scope of rules.* This section applies to contributions to or distributions from a partnership. However, this section does not apply to contributions to or distributions from a partnership of stock of a foreign corporation except with respect to the effect on the CAMT basis of a partnership investment for a distribution of stock of a foreign corporation that is distributed in the same transaction as other property under paragraph (d)(2)(iii) of this section. See § 1.56A-4(b) for rules that apply if stock of a foreign corporation is contributed to or distributed by a partnership.

(b) *General operating rules.* Except as otherwise provided in this section, in

the case of a transaction between a CAMT entity and a partnership, each of the CAMT entity, any other partners in that partnership, and the partnership in which the CAMT entity is a partner includes in its AFSI any income, expense, gain, or loss reflected in its FSI as a result of the transaction.

(c) *Contributions of property*—(1) *In general.* Subject to paragraph (e) of this section and except as provided in paragraph (f) of this section, if property is contributed by a CAMT entity (contributor) to a partnership in a transaction to which section 721(a) applies, any gain or loss reflected in the CAMT entity's FSI from the property transfer is included in the CAMT entity's AFSI in accordance with paragraphs (c)(2)(i) through (iv) of this section. As provided in paragraph (b) of this section, any other FSI amount resulting to the CAMT entity or the partnership from the transaction (for example, FSI gain or loss resulting from a deconsolidation or dilution, a revaluation to the fair market value of partnership assets for FSI purposes, or the application of paragraph (e) of this section) is not disregarded for AFSI purposes.

(2) *Contribution of property with financial accounting built-in gain or loss*—(i) *Deferred sale approach.* Subject to paragraph (e) of this section and except as provided in paragraphs (c)(2)(ii) through (iv) and (f) of this section, a contributor that contributes property to a partnership in a transaction described in paragraph (c)(1) of this section (deferred sale property) includes the amount of deferred sale gain or loss (as determined under paragraph (c)(2)(i)(A) of this section) in its AFSI ratably, on a monthly basis, over the applicable recovery period (as determined under paragraphs (c)(2)(i)(B) through (F) of this section) beginning on the first day of the month the deferred sale property is contributed to the partnership (in the case of deferred sale property described in paragraph (c)(2)(i)(B), (C), (D), or (F) of this section) or the first day of the month described in paragraph (c)(2)(i)(E) of this section (in the case of deferred sale property described in paragraph (c)(2)(i)(E) of this section). For purposes of the preceding sentence—

(A) The amount of *deferred sale gain or loss* is the amount of gain or loss reflected in the contributor's FSI resulting from the contribution of deferred sale property, and if the contribution is treated as a sale or exchange for AFS purposes, such gain or loss is redetermined by reference to the contributor's CAMT basis in the deferred sale property at the time of

contribution rather than the contributor's AFS basis;

(B) The applicable recovery period for deferred sale property that is section 168 property (as defined in § 1.56A-15(b)(6)) or qualified wireless spectrum (as defined in § 1.56A-16(b)(4)) and that is placed in service by the contributor in a taxable year prior to the taxable year in which the property becomes deferred sale property is the full recovery period that was assigned to the property by the contributor in the taxable year such property was placed in service for purposes of depreciating or amortizing the property for regular tax purposes;

(C) The applicable recovery period for deferred sale property that is section 168 property or qualified wireless spectrum and that is either placed in service and contributed to a partnership in the same taxable year or is contributed and placed in service by the partnership in the same taxable year as the contribution, is the recovery period used by the partnership to depreciate or amortize the deferred sale property for regular tax purposes;

(D) The applicable recovery period for deferred sale property subject to depreciation or amortization for AFS purposes that is not section 168 property or qualified wireless spectrum in the hands of the contributor or the partnership is the recovery period used by the partnership to depreciate or amortize the deferred sale property for AFS purposes;

(E) If the deferred sale property that is section 168 property or qualified wireless spectrum has not been placed in service in the same taxable year it is contributed to the partnership, but is placed in service by the partnership in the immediately subsequent taxable year and thus subject to depreciation in that subsequent taxable year, the applicable recovery period is the recovery period for regular tax purposes that is used by the partnership for the deferred sale property in the immediately subsequent taxable year, and the inclusion of the deferred sale gain or loss by the contributor begins on the first day of the first month of that subsequent taxable year; and

(F) The applicable recovery period for deferred sale property that is not described in paragraphs (c)(2)(i)(B) through (E) of this section is 15 years.

(ii) *Inclusion of deferred sale gain upon a decrease in contributor's distributive share percentage*—(A) *In general.* If the contributor's distributive share percentage (as determined under § 1.56A-5(e)(2)) in the partnership decreases by more than one-third following its contribution of deferred

sale property (whether by sale or exchange, liquidation of all or part of the contributor's interest in the partnership, dilution or deconsolidation, or otherwise), then the contributor includes in its AFSI for the taxable year in which the decrease occurs an amount of the deferred sale gain equal to the product of the amount described in paragraph (c)(2)(ii)(B) of this section and the percentage described in paragraph (c)(2)(ii)(C) of this section. Any amount of deferred sale gain remaining after application of this paragraph is included in the contributor's AFSI as provided in paragraph (c)(2)(ii)(D) of this section. Deferred sale loss, if any, is not accelerated under this paragraph (c)(2)(ii) as a result of decrease in in a contributor's distributive share percentage unless the decrease is the result of the contributor disposing of its entire investment in the partnership.

(B) *The amount.* The amount referenced in paragraph (c)(2)(ii)(A) of this section is the amount of deferred sale gain with respect to the deferred sale property that has not yet been included in the contributor's AFSI as of the date immediately before the transaction resulting in the decrease in the contributor's distributive share percentage.

(C) *The percentage.* The percentage referenced in paragraph (c)(2)(ii)(A) of this section is the percentage change in the contributor's distributive share percentage resulting from the transaction.

(D) *Continued ratable inclusion of remaining deferred sale gain or loss.* The amount (if any) of deferred sale gain or loss with respect to deferred sale property remaining after application of paragraph (c)(2)(ii)(A) of this section will continue to be included in the contributor's AFSI ratably on a monthly basis over the remaining applicable recovery period of the deferred sale property.

(iii) *Inclusion of deferred sale gain or loss upon disposition of deferred sale property.* If the partnership sells, distributes, or otherwise disposes of deferred sale property (including by distribution to the contributor or the partnership's contribution of the deferred sale property to another CAMT entity in a recognition or nonrecognition transaction), then the contributor includes in its AFSI in the taxable year of the disposition, the amount of any deferred sale gain or loss with respect to the deferred sale property that has yet to be included in the contributor's AFSI as of the date of the disposition. For rules regarding the effects of property distributions on the AFSI of a

partnership and its CAMT entity partner, *see* paragraphs (d)(1) and (2) of this section.

(iv) *Inclusion of deferred sale gain upon an acceleration event described in § 1.721(c)–4(b).* If section 721(a) applies to a contribution of deferred sale property due to the application of the gain deferral method described in § 1.721(c)–3 and an acceleration event described in § 1.721(c)–4(b) occurs, then the contributor includes in its AFSI for the contributor's taxable year of the event, the amount of any deferred sale gain with respect to the deferred sale property that has yet to be included in the contributor's AFSI as of the date of the acceleration event. If a partial acceleration event described in § 1.721(c)–5(d) occurs, then the contributor includes in its AFSI in the taxable year of the event an amount of deferred sale gain that bears the same ratio to the total amount of any deferred sale gain that has yet to be included in the contributor's AFSI immediately before the event, that the taxable gain required to be recognized under § 1.721(c)–5(d)(2) or (3) bears to the total amount of remaining built-in gain (as defined in § 1.721(c)–1(b)(13)) with respect to section 721(c) property, as computed for regular tax purposes. The amount (if any) of deferred sale gain with respect to deferred sale property remaining after application of this paragraph (c)(2)(iv) will continue to be included in the contributor's AFSI ratably on a monthly basis over the remaining applicable recovery period of the deferred sale property. These acceleration events are in addition to the acceleration events under paragraphs (c)(2)(ii) and (iii) of this section.

(v) *Tiered partnerships.* If the contributor is a partnership, the deferred sale gain or loss included in the contributor partnership's AFSI for a taxable year in accordance with this paragraph (c)(2) is included in the distributive share amounts of the partners of the contributor partnership (whether or not the partners were partners of the contributor at the time of contribution) in proportion to their distributive share percentages for the taxable year, as determined under § 1.56A–5(e)(2). Similar rules apply to any partner in the chain of partnerships that owns an interest directly or indirectly in the contributor.

(3) *Basis rules—(i) Basis of property contributed to partnership.* The partnership's initial CAMT basis in property contributed to a partnership by a CAMT entity at the time of the contribution is the partnership's initial AFS basis in the contributed property at

the time of the contribution, regardless of whether section 721(a) applies, in whole or in part, to the contribution.

(ii) *Basis of partnership investment for contributed property.* The initial CAMT basis of an interest in a partnership investment acquired by a contributor upon a contribution of property to the partnership to which section 721(a) applies is the contributor's AFS basis in the acquired partnership investment, decreased by any deferred sale gain or increased by any deferred sale loss that is required to be included in the contributor's AFSI in accordance with paragraph (c)(2) of this section. *See* § 1.56A–5(j) for rules that apply to adjustments to CAMT basis of a partnership investment for contributions of stock of a foreign corporation. The contributor's initial CAMT basis in the acquired partnership investment is subsequently increased or decreased—

(A) On the last day of each taxable year during the applicable recovery period by an amount equal to the deferred sale gain or loss, respectively, required to be included in AFSI in each taxable year in accordance with paragraph (c)(2)(i) of this section (without duplication of any increases or decreases to CAMT basis under paragraph (c)(3)(ii)(B) of this section); or

(B) Immediately prior to an event causing all or a portion of the deferred sale gain to be accelerated into AFSI in accordance with paragraph (c)(2)(ii) of this section, by an amount equal to the sum of the deferred sale gain or loss that accrued in accordance with paragraph (c)(2)(i) of this section prior to the event and the amount required to be included in AFSI under paragraph (c)(2)(ii) of this section.

(d) *Distributions of property—(1) Gain or loss recognized by partnership—(i) In general.* Except as provided in paragraph (f) of this section, if a partnership distributes property to a partner in a transaction to which section 731(b) applies, any gain or loss reflected in the partnership's FSI with respect to the property transferred is disregarded for purposes of determining the partnership's modified FSI and instead is included in the CAMT entity partners' distributive share amounts (as provided in § 1.56A–5(e)(1)(iv)) in accordance with paragraphs (d)(1)(ii) and (iii) and (d)(2) of this section. As provided in paragraph (b) of this section, any other FSI amount resulting from the transaction (for example, FSI gain or loss to a partner resulting from a deconsolidation or dilution, or a revaluation to fair market value of other partnership assets for FSI purposes) is not disregarded for purposes of

determining the AFSI of the partner or the modified FSI of the partnership.

(ii) *Deferred distribution gain or loss approach.* Subject to paragraph (e) of this section and except as provided in paragraphs (d)(1)(iii), (d)(2)(ii), and (f) of this section, if a partnership distributes property to a partner in a transaction to which section 731(b) applies (deferred distribution property), the amount of deferred distribution gain or loss (as determined under paragraph (d)(1)(ii)(A) of this section) is included in each CAMT entity partner's distributive share amount (in accordance with their allocable shares as provided in paragraph (d)(2) of this section) ratably, on a monthly basis, over the applicable recovery period (as determined under paragraphs (d)(1)(ii)(B) through (F) of this section) beginning on the first day of the month in which the distribution occurs (in the case of deferred distribution property described in paragraph (d)(1)(ii)(B), (C), (D), or (F) of this section), or the first day of the month described in paragraph (d)(1)(ii)(E) of this section (in the case of deferred distribution property described in paragraph (d)(1)(ii)(E) of this section). For purposes of the preceding sentence—

(A) The amount of *deferred distribution gain or loss* is the amount of gain or loss reflected in the partnership's FSI resulting from the distribution of deferred distribution property, and if the distribution is treated as a sale or exchange for AFS purposes, such gain or loss is redetermined by reference to the partnership's CAMT basis in the deferred distribution property at the time of distribution rather than the partnership's AFS basis;

(B) The applicable recovery period for deferred distribution property that is section 168 property (as defined in § 1.56A–15(b)(6)) or qualified wireless spectrum (as defined in § 1.56A–16(b)(4)) and that is placed in service by the partnership in a taxable year prior to the taxable year in which the property becomes deferred distribution property is the full recovery period that was assigned to the property by the partnership in the taxable year such property was placed in service for purposes of depreciating or amortizing the property for regular tax purposes;

(C) The applicable recovery period for deferred distribution property that is section 168 property or qualified wireless spectrum and that is either placed in service by a partnership and distributed by the partnership to a partner in the same taxable year or is distributed by the partnership to a partner and placed in service by the

partner in the same taxable year as the distribution is the recovery period used by the partner to depreciate or amortize the deferred sale property for the taxable year of the distribution for regular tax purposes;

(D) The applicable recovery period for deferred distribution property subject to depreciation or amortization for AFS purposes that is not section 168 property or qualified wireless spectrum is the recovery period that was used by the partnership to depreciate or amortize the deferred sale property for AFS purposes;

(E) If the deferred distribution property that is section 168 property or qualified wireless spectrum has not been placed in service in the same taxable year it is distributed to the partner, but is placed in service by the partner in the immediately subsequent taxable year and thus subject to depreciation in that subsequent taxable year, the applicable recovery period is the recovery period for regular tax purposes that is used by the partner for the deferred distribution property in the immediately subsequent taxable year, and the inclusion of the deferred sale gain or loss by the partnership begins on the first day of the first month of that subsequent taxable year; and

(F) The applicable recovery period for deferred distribution property that is not described in paragraphs (d)(1)(ii)(B) through (E) of this section is 15 years.

(iii) *Acceleration of deferred distribution gain or loss.* If a partnership described in paragraph (d)(1)(ii) of this section engages in an acceleration transaction, then the partners of the partnership that are CAMT entities include in their distributive share amounts, in the manner provided in paragraph (d)(2) of this section, the amount of any deferred distribution gain or loss with respect to the deferred distribution property that has yet to be included in such partners' distributive share amounts as of the date immediately before the acceleration transaction for the partnership's taxable year in which the acceleration transaction occurs. For purposes of this paragraph (d)(1)(iii), the term *acceleration transaction* means, with respect to a partnership described in paragraph (d)(1)(ii) of this section—

(A) A termination of the partnership under section 708(b)(1) of the Code as a result of a dissolution or liquidation;

(B) A sale or exchange of all or substantially all of the partnership's assets; or

(C) A merger or consolidation of the partnership with one or more partnerships in which the partnership is not the resulting partnership for regular

tax purposes (as determined under § 1.708–1(c)).

(2) *Partner inclusions of deferred distribution gain or loss.*—(i) *Partners' allocable shares of deferred distribution gain or loss.* Deferred distribution gain or loss is allocated among the CAMT entity partners in proportion to their distributive share percentages for the taxable year of the distribution, as determined under § 1.56A–5(e)(2).

(ii) *Acceleration of a partner's allocable share of deferred distribution gain or loss.* If a CAMT entity partner disposes of its entire investment in the partnership, including through a liquidating distribution by the partnership, the partner includes in its distributive share amount for the partner's taxable year in which the disposition occurs its allocable share of any deferred distribution gain or loss that has not yet been included in the partner's distributive share amount as of the disposition date.

(iii) *FSI resulting to a partner from a distribution of property or money.* If a distribution of property or money from a partnership to a CAMT entity partner results in any gain, loss, or other amount being reflected in the FSI of the partner, then such gain, loss or other amount is redetermined using the relevant CAMT basis, if applicable, and included in the partner's AFSI in the taxable year in which the property or money is distributed to the partner. For purposes of this paragraph (d)(2)(iii), if the relevant CAMT basis is the partner's CAMT basis in its partnership investment.

(A) Money distributed in the same transaction as property is treated as reducing CAMT basis, if applicable under § 1.56A–5(j)(3)(i), prior to any distribution of property;

(B) Stock in a foreign corporation distributed in the same transaction is treated as reducing CAMT basis under § 1.56A–5(j)(3)(xii) prior to any distribution of property other than stock in a foreign corporation; and

(C) Principles similar to § 1.731–1(a)(1)(ii) apply for purposes of calculating the effect of the distribution on AFSI.

(iv) *Tiered partnerships.* If any partner of the distributing partnership is a partnership for Federal tax purposes, the deferred distribution gain or loss included in the partner's distributive share amount for a taxable year in accordance with paragraph (d)(2)(i) of this section is included in its CAMT entity partners' distributive share amounts (whether or not the partners were partners in the partnership at the time of the distribution) in proportion to their distributive share percentages for

the taxable year, as determined under § 1.56A–5(e)(2). Similar rules apply to any CAMT entity partner in the chain of partnerships that owns an interest, directly or indirectly, in the partnership that is a partner in the distributing partnership.

(3) *Basis rules*—(i) *Basis of distributed property*. A CAMT entity partner's initial CAMT basis in property distributed by a partnership is the partner's initial basis in the property for AFS purposes, determined immediately after the distribution.

(ii) *Basis of partner's investment in partnership*. The CAMT basis of a CAMT entity partner's investment in a partnership following the partnership's distribution of property is increased or decreased—

(A) At the end of each taxable year during the applicable recovery period by the amount required to be included in the partner's distributive share amount in each taxable year in accordance with paragraph (d)(1)(ii) of this section; and

(B) Immediately prior to an acceleration event specified in paragraph (d)(1)(iii) or (d)(2)(ii) of this section by the amount of deferred distribution gain or loss not previously included in the partner's distributive share amount in accordance with paragraph (d)(1)(ii) of this section.

(e) *Liability allocation rules*—(1) *General rule*. The treatment of partner and partnership liabilities for purposes of determining a CAMT entity partner's or partnership's AFSI is based on the applicable liability treatment for AFS purposes and not under section 752 of the Code.

(2) *Application of rules to contributions and distributions*. For purposes of determining whether section 721(a) or 731(b) applies to a transaction, section 752 is inapplicable. As a result, any rules relating to liabilities for regular tax purposes, such as the rules relating to liabilities under §§ 1.707–5 and 1.707–6, do not apply.

(f) *Proportionate deferred sale approach for partial nonrecognition transactions under sections 721(a) and 731(b)*. This paragraph (f) applies if a transfer of property by a partner to a partnership does not constitute a nonrecognition transaction under section 721(a) for regular tax purposes (or would not constitute a nonrecognition transaction under section 721(a) for regular tax purposes considering the application of paragraph (e) of this section), in whole or in part, or if a transfer of property by a partnership to a partner would not constitute a nonrecognition transaction under section 731(b) for regular tax

purposes (or would not constitute a nonrecognition transaction under section 731(b) for regular tax purposes considering the application of paragraph (e) of this section), in whole or in part. If this paragraph (f) applies, then the CAMT entity partner or partnership includes in its AFSI or modified FSI, as applicable, for the taxable year of the transfer an amount (if any) of the FSI reflected on the partner's or the partnership's AFS resulting from the transaction that bears the same ratio to the total amount of gain or loss reflected in the partner's or partnership's FSI resulting from the transaction (with the amount of such gain or loss being redetermined using the CAMT basis of the property) that the taxable gain or loss that would be recognized without application of section 752 and the exceptions relating to liabilities in §§ 1.707–5 and 1.707–6 bears to the taxable gain or loss realized on the transfer as determined for regular tax purposes. Any FSI resulting from the transaction but not included in a CAMT entity partner's or partnership's AFSI or modified FSI, as applicable, because of the rules in paragraph (c) or (d) of this section is deferred and included in the partner's AFSI or the partners' distributive share amounts, as appropriate, in accordance with paragraph (c) or (d) of this section.

(g) *Maintenance of books and records and reporting requirements*—(1) *Information to be included in books and records*. A partnership and each CAMT entity that is a partner in the partnership must include in its respective books and records the information necessary for the partnership and each CAMT entity to comply with the rules of this section and § 1.56A–5. As applicable for a partnership or partner to comply with the rules of this section and § 1.56A–5, the information to be maintained in its respective books and records includes, without limitation—

(i) The recovery periods used to depreciate deferred sale property and deferred distribution property for regular tax purposes;

(ii) The properties contributed to the partnership that had a built-in gain or loss at the time of contribution and the amount of the built-in gain or loss with respect to each property for AFSI purposes;

(iii) The CAMT basis of any property contributed to or distributed from the partnership; and

(iv) The amount of deferred distribution gain or loss to be allocated among, and included in the distributive share amounts of, the partners of the partnership.

(2) *Reporting requirements*—(i) *In general*. Subject to the notice requirement in § 1.56A–5(i)(3)(iii), a partnership must report to a CAMT entity partner the information required for the CAMT entity partner to comply with the rules of this section and § 1.56A–5, including, without limitation—

(A) The recovery periods used to depreciate deferred sale property;

(B) The date on which the partnership sold, distributed, or otherwise disposed of deferred sale property;

(C) The date on which an acceleration event described in § 1.721(c)–4(b) occurred; and

(D) The amount of deferred distribution gain or loss resulting from a distribution of property that is included in the CAMT entity partner's distributive share amount under paragraph (d) of this section.

(ii) *Form of reporting*. A partnership may report information to a CAMT entity partner in any reasonable manner sufficient for a CAMT entity partner to comply with the rules of this section, provided, that if any information relates to the determination of a CAMT entity partner's distributive share amount with respect to its investment in the partnership, the partnership must report the information consistently with the reporting requirements described in § 1.56A–5(h).

(h) *Examples*. The following examples illustrate the application of the rules in this section.

(1) *Example 1: Contribution of property to an existing partnership with no deferred sale gain or loss*—(i) *Facts*. On July 1, 2024, X, a domestic corporation, contributes land with an AFS basis of \$20,000x and a fair market value of \$20,000x to PRS, a partnership, in exchange for a 20% interest in the capital and profits of PRS in a transaction to which section 721(a) applies. No gain or loss is reflected in X's FSI as a result of the property transfer. Following the transfer, X's AFS basis in its investment in PRS is \$20,000x. PRS's initial AFS basis in the land is \$20,000x. At the time of contribution, Y, a domestic corporation, held a 55% interest in the capital and profits of PRS, and various individuals owned the remaining 45%.

(ii) *Analysis*. Although this is a contribution of property to which paragraph (c)(1) of this section would apply, because no gain or loss is reflected in X's FSI as a result of the property transfer, there is no deferred sale gain or loss. Under paragraph (c)(3)(ii) of this section, X's initial CAMT basis in its partnership investment is equal to \$20,000x

(\$20,000x AFS basis of X's partnership investment following the transfer—\$0 deferred sale gain or loss). Under paragraph (c)(3)(i) of this section, PRS has an initial CAMT basis in the land equal to its initial AFS basis of the land, which is also \$20,000x. If X's receipt of the 20% interest in capital and profits of PRS causes PRS to become deconsolidated from Y for AFS purposes, then, under paragraph (b)(2) of this section, any gain or loss included in Y's FSI because of the deconsolidation for AFS purposes would not be excluded from Y's AFSI under this section.

(2) *Example 2: Contribution of property to a new partnership with deferred sale gain*—(i) *Facts*. X and Y, each a domestic corporation that uses the calendar year as its taxable year, form partnership PRS on July 1, 2024. X contributes Asset 1, which is section 168 property, in exchange for a 40% interest in the capital and profits of PRS in a transaction to which section 721(a) applies. Immediately before the contribution, Asset 1 had an AFS basis of \$4,000x, a CAMT basis of \$3,000x, and a fair market value of \$10,000x. The property transfer results in \$6,000x of FSI being reflected in X's AFS for 2024, which is calculated for AFS purposes by subtracting the AFS basis of Asset 1 from the fair market value (\$10,000x—\$4,000x). For regular tax purposes, X uses a 5-year recovery period for Asset 1. Following the transfer, X's initial AFS basis in its investment in PRS is \$10,000x. PRS's initial AFS basis in Asset 1 is \$10,000x.

(ii) *Analysis*. The FSI resulting from the transfer is included in X's AFSI in accordance with paragraph (c)(2) of this section under the deferred sale approach. First, the amount of FSI resulting from the transfer must be redetermined using the CAMT basis of the property instead of the AFS basis of the property, which results in a redetermined FSI amount of \$7,000x (\$10,000x—\$3,000x). This redetermined FSI amount is included in X's AFSI ratably over the applicable recovery period. Because Asset 1 is section 168 property, under paragraph (c)(2)(i)(B) of this section, the recovery period is the recovery period used by X to depreciate the deferred sale property for regular tax purposes, or 5 years. Accordingly, X includes \$700x in AFSI in 2024 $((\$7,000x \text{ deferred sale gain}) / (60 \text{ months (the 5-year recovery period determined on a monthly basis)}) \times 6 \text{ months (the number of months, including partial months, remaining in X's taxable year from the date of the contribution)})$. X will include the remaining \$6,300x of deferred sale gain in AFSI in 2025

through 2029. Under paragraph (c)(3)(i) of this section, PRS's initial CAMT basis in Asset 1 equals its AFS basis of Asset 1 following the transfer, or \$10,000x. Under paragraph (c)(3)(ii) of this section, X's initial CAMT basis in its investment in PRS is \$3,000x (the \$10,000x initial AFS basis of the partnership investment—the \$7,000x of deferred sale gain). X's CAMT basis in its partnership investment is increased by the amount of deferred sale gain included in its AFSI in accordance with paragraph (c)(3)(ii) of this section and § 1.56A–5(j)(3).

(3) *Example 3: Acceleration of deferred sale gain upon disposition of a portion of CAMT entity's partnership investment*—(i) *Facts*. The facts are the same as in paragraph (h)(2)(i) of this section (*Example 2*), except that, effective July 1, 2026, X sold a portion of its investment in PRS and, after the sale, X's distributive share percentage under § 1.56A–5(c)(2) is reduced from 40% to 25%.

(ii) *Analysis*—(A) *Determine the amount of deferred gain accelerated*. Under paragraph (c)(2)(ii) of this section, X includes \$1,575x in AFSI in 2026 because of the sale, determined as follows:

Deferred gain under paragraph (c)(2)(i) of this section	\$7,000x
Less deferred gain previously included in AFSI ...	(\$2,800x)
Remaining deferred gain under paragraph (b)(2)(i) of this section	\$4,200x
Distributive share percentage prior to sale	40%
Distributive share percentage after sale	25%
Percentage change in ownership $((40\% - 25\%) / 40\%)$	37.5%
Amount included in AFSI under paragraph (c)(2)(ii) of this section $(\$4,200x \times 0.375)$	\$1,575x

(B) *Calculation of CAMT basis upon disposition of a portion of a CAMT entity's partnership investment*. In addition to the \$1,575x that X includes in AFSI in 2026 because of the sale, X must also include in AFSI in 2026 the portion of the deferred sale gain that accrued from January 1 through June 30 of 2026, and a portion of the remaining deferred sale gain required to be included at the end of 2026 based on the remaining recovery period of Asset 1. Per the preceding calculation, there is \$2,625x deferred sale gain remaining (\$4,200x less \$1,575x). Accordingly, X includes in AFSI \$1,137.5x (\$700x deferred sale gain that accrued from

January 1 through June 30, 2026, plus \$437.5 $((\$2,625x \text{ deferred sale gain remaining after the sale}) / (36 \text{ months (the 3-year remaining recovery period determined on a monthly basis)}) \times 6 \text{ months (the number of months, including partial months, remaining in X's taxable year from the date of sale)})$. For purposes of determining the amount of gain or loss to be included in X's AFSI as a result of a sale of its partnership investment, X must, under paragraph (c)(3)(ii) of this section, increase its CAMT basis immediately prior to the sale of the partnership investment by the sum of \$2,275x (\$700x deferred sale gain required to be ratably included in AFSI through June 30, 2026 + \$1,575x deferred sale gain required to be included in AFSI in 2026 as a result of the sale).

(4) *Example 4: Partnership disposition of deferred sale property*—(i) *Facts*. The facts are the same as in paragraph (h)(2)(i) of this section (*Example 2*), except that PRS sells Asset 1 to an unrelated third party at the end of 2026.

(ii) *Analysis*. Under paragraph (c)(2)(iii) of this section, X includes in AFSI in 2026 all of the \$3,500x of remaining deferred sale gain with respect to Asset 1 as of the end of 2026. Under paragraph (c)(3)(ii) of this section and § 1.56A–5(k)(3), X's CAMT basis in its partnership investment will increase by the amount of deferred sale gain required to be included in AFSI, or \$3,500x.

(5) *Example 5: Part disguised sale of property to partnership and part deferred sale gain*—(i) *Facts*. The facts are the same as in paragraph (h)(2)(i) of this section (*Example 2*), except that, immediately after the contribution, PRS transfers \$5,000x cash to X, and X's initial AFS basis in its investment in PRS is \$5,000x. Assume that, under section 707(a)(2)(B) of the Code and § 1.707–3, PRS's transfer of cash to X is treated as part of a sale of Asset 1 by X to PRS. X's adjusted tax basis in Asset 1 is \$0x at the time of the transfer.

(ii) *Analysis: Treatment of transaction for regular tax purposes*. Under section 707(a)(2)(B) and § 1.707–3, X is treated as having sold a portion of Asset 1 with a value of \$5,000x to PRS in exchange for \$5,000 of cash. Accordingly, X recognizes \$5,000x of taxable gain for regular tax purposes (\$5,000x amount realized—\$0x adjusted tax basis $(\$0x \times \$5,000x / \$10,000x)$), and X is considered to have contributed to PRS in a transaction to which section 721(a) applies, a portion of Asset 1 with a \$5,000 fair market value and an adjusted tax basis of \$0x.

(iii) *Analysis: Proportionate deferred sale approach*—(A) *Determine X's AFSI*

inclusion amount. Under paragraph (f) of this section, X is required to include in AFSI an amount of gain or loss that bears the same ratio to the total amount of gain or loss reflected in X's FSI (but redetermined using the CAMT basis of the property) that taxable gain or loss recognized on the transfer bears to the taxable gain or loss realized on the transfer, as determined for regular tax purposes. Accordingly, X includes \$3,500x in AFSI in 2024 (\$7,000x of gain resulting from the transfer, redetermined using the CAMT basis of the property $(\$10,000x - \$3,000x) \times (\$5,000x \text{ taxable gain recognized} / \$10,000x \text{ taxable gain realized})$).

(B) *Determine X's deferred sale gain amount.* X is considered to have contributed to PRS in a transaction to which section 721(a) applies, \$5,000x of the fair market value of Asset 1 with an AFS basis of \$2,000x $(\$4,000x \times (\$5,000x / \$10,000x))$ and a CAMT basis of \$1,500x $(\$3,000x \times (\$5,000x / \$10,000x))$. Under paragraph (c)(2) of this section, the CAMT gain resulting from the transfer is included in X's AFSI in accordance with paragraph (c)(2)(i) of this section under the deferred sale approach. To do this, X first determines the amount of deferred sale gain using the CAMT basis of the property considered contributed in a deferred sale $(\$5,000x - \$1,500x)$ and includes this gain, or \$3,500x, in its AFSI ratably over the applicable recovery period. Because Asset 1 is section 168 property, under paragraph (c)(2)(i)(B) of this section, the applicable recovery period is the recovery period used by X to depreciate the deferred sale property for regular tax purposes, or 5 years.

(C) *Determine X's initial CAMT basis in its partnership investment and PRS's initial CAMT basis in Asset 1.* Under paragraph (c)(3)(ii) of this section, X's initial CAMT basis in its partnership investment is \$1,500x $(\$5,000x \text{ AFS basis of the partnership investment to X following the transfer} - \$3,500x \text{ deferred sale gain determined under paragraph (c)(2)(i) of this section})$. Under paragraph (c)(3)(i) of this section, PRS's initial CAMT basis in Asset 1 is equal to the AFS basis of the property, or \$10,000x.

(6) *Example 6: Contribution of encumbered property—(i) Facts.* The facts are the same as in paragraph (h)(2)(i) of this section (Example 2), except that Asset 1 was subject to a \$5,000x nonrecourse liability that would be a qualified liability under § 1.707–5, and that PRS took the property subject to such liability. Other than PRS's taking of Asset 1 subject to the liability, X received no other consideration as part of a transfer and

would not be deemed to have sold any portion of Asset 1 under §§ 1.707–3 and 1.707–5. X's adjusted tax basis in Asset 1 at the time of contribution is \$0x. For AFS purposes, X is required to recognize gain equal to the excess of the nonrecourse liability on Asset 1 upon contribution, and its AFS basis in the property contributed and X's initial AFS basis in its investment in PRS is \$5,000x.

(ii) *Analysis—(A) Proportionate deferred sale approach with application of paragraph (e) of this section.* Even though X is not considered to have sold any portion of Asset 1 to PRS for which taxable gain would be required to be recognized for regular tax purposes under §§ 1.707–3 and 1.707–5 because the nonrecourse liability is a qualified liability, paragraph (e)(2) of this section applies. Paragraph (e)(2) of this section provides that section 752 and the exceptions in § 1.707–5 concerning liabilities assumed or taken subject to property by a partnership do not apply for purposes of determining the portion of Asset 1 deemed contributed or sold under paragraphs (c) and (f) of this section. Accordingly, for purposes of determining the amount of the gain or loss to be included in AFSI in the taxable year of transfer under paragraph (f) of this section and the amount to be deferred under paragraph (c) of this section, X calculates the amount of taxable gain that would be recognized on the transfer under §§ 1.1001–2(a)(1) and 1.707–3, without application of section 752 and § 1.707–5.

(B) *Determine X's proportionate amount of AFSI inclusion and deferred sale gain.* Under § 1.1001–2(a)(1), X would have been treated as receiving consideration of \$5,000x on the transfer of Asset 1 to PRS because of PRS's taking Asset 1 subject to the \$5,000x nonrecourse liability. Applying § 1.707–3 to determine the portion of Asset 1 that is sold to PRS and the portion that is contributed under section 721(a), X would have been treated as having sold a portion of Asset 1 and recognized \$5,000x of gain for regular tax purposes $(\$5,000x \text{ amount realized} - \$0x \text{ adjusted tax basis } (\$0x \times \$5,000x / \$10,000x))$. X also would have been considered to have contributed to PRS under section 721(a) \$5,000x of the fair market value of Asset 1 with an adjusted tax basis of \$0x.

(C) *Remaining analysis.* The remaining analysis is the same as in paragraphs (h)(5)(iii)(A) through (C) of this section (Example 5).

(7) *Example 7: Current distribution of section 168 property to partner—(i) Facts.* Each of X and Y is a corporation and a partner in PRS. Each of X, Y and

PRS uses the calendar year as its taxable year. On July 1, 2024, PRS transfers Asset 1 to X, which is not an asset contributed to PRS by either X or Y. The distribution is not in liquidation of any part of X's financial interest in PRS. At the time of the distribution, Asset 1, which is section 168 property, had a fair market value of \$200,000x, an AFS basis of \$120,000x, and a CAMT basis of \$100,000x, and was being depreciated over a 5-year recovery period under the general depreciation system of section 168. For AFS purposes, PRS recognizes \$80,000x of FSI on the distribution, which is calculated by subtracting the AFS basis of Asset 1 from the fair market value of Asset 1. At the time of the distribution, X had an AFS basis in its partnership investment of \$125,000x, and a distributive share percentage of 40%, as determined under § 1.56A–5(e)(2).

(ii) *Analysis: Treatment of partnership-level gain.* Under paragraph (d)(1)(i) of this section, no part of the \$80,000x of FSI is included in PRS's modified FSI. Rather, under paragraph (d)(1)(ii) of this section, X and Y include their allocable portion (as determined under paragraph (d)(2)(i) of this section) of the deferred distribution gain (but redetermined using the CAMT basis of Asset 1) in their respective distributive share amounts over a period of 5 years (the applicable recovery period used by the partnership to depreciate the property for regular tax purposes), commencing on July 1, 2024. Accordingly, under paragraphs (d)(1)(ii) and (d)(2)(i) of this section, X and Y would include in their distributive share amounts in 2024 the sum of \$4,000x and \$6,000x, respectively (the \$100,000x of deferred distribution gain (as redetermined using the CAMT basis of Property) multiplied by X's or Y's distributive share percentage (40% or 60%, respectively), divided by 60 months (the 5 year recovery period determined on a monthly basis), and further multiplied by 6 (the number of months, including partial months, remaining in PRS's taxable year following the distribution of Asset 1)). In each of 2025 through 2028, X and Y would include in their respective distributive share amounts the sums of \$8,000x and \$12,000x, respectively, and in 2029, the sums of \$4,000x and \$6,000x, respectively.

(iii) *Analysis: Treatment of partner-level gain.* If, as a result of the distribution, X would be required to include \$75,000x of gain in FSI (calculated by the \$200,000x AFS value of Asset 1 over X's \$125,000x AFS basis in its partnership investment), then, under paragraph (d)(2)(iii) of this

section, X must redetermine the FSI amount using the CAMT basis it is partnership investment as of the last day of the taxable year under principles similar to § 1.731–1(a)(1)(ii) and include this amount in its AFSI. Under paragraph (d)(3)(i) of this section, X's initial CAMT basis in Asset 1 would be X's initial basis in the property for AFS purposes, determined immediately after the distribution.

(8) *Example 8: Acceleration of gain due to partnership dissolution—(i)*

Facts. The facts are the same as in paragraph (h)(7)(i) of this section (*Example 7*), except that at the beginning of 2026, Partnership XY dissolves and liquidates.

(ii) *Analysis.* Under paragraph (d)(1)(iii) of this section, PRS includes in X's and Y's distributive share amounts in 2026 the sums of \$28,000x (\$40,000x deferred distribution gain allocated to X – \$12,000x previously included in X's distributive share amount in 2024 and 2025), and \$42,000x (the \$60,000x of the deferred distribution gain allocated to Y – \$18,000x previously included in Y's distributive share amount in 2024 and 2025), respectively. Under paragraph (d)(3)(ii) of this section, X and Y would increase their CAMT bases in their partnership investments by the \$28,000x and \$42,000x, respectively, immediately prior to the dissolution and liquidation.

(9) *Example 9: Acceleration of gain due to liquidation of partner's interest—(i)*

Facts. The facts are the same as in paragraph (h)(7)(i) of this section (*Example 7*), except that at the beginning of 2027, Y sells its partnership investment to Z, an unrelated corporation.

(ii) *Analysis.* Under paragraph (d)(2)(ii) of this section, Y includes in its distributive share amount for 2027 the sum of \$30,000x, the remaining amount of deferred distribution gain allocated to it under paragraph (d)(2)(i) of this section (\$60,000x initial allocation – \$6,000x previously included in its distributive share amount in 2024 – \$12,000x previously included in its distributive share amount in each of 2025 and 2026). Under paragraph (d)(3)(ii) of this section, Y would increase its CAMT basis immediately prior to its sale of its partnership investment to Z by the \$30,000x of remaining deferred distribution gain required to be included in its AFSI under paragraph (d)(2)(ii) of this section. Under paragraph (d)(1)(ii) of this section, X would continue to include in its distributive share amount its proportionate amount of the deferred

distribution gain allocated to it under paragraph (d)(2)(i) of this section. Accordingly, X would include \$8,000x in its distributive share amount in 2027.

(i) *Applicability date.* This section applies to taxable years ending after [DATE OF PUBLICATION OF FINAL RULE IN THE Federal Register].

§ 1.56A–21 AFSI adjustments for troubled companies.

(a) *Overview—(1) Scope.* This section provides rules under section 56A of the Code for determining the CAMT consequences resulting from an insolvency or bankruptcy of a CAMT entity, including rules for determining any resulting AFSI and adjustments to CAMT basis or other CAMT attributes. This section also provides rules under section 56A for determining the CAMT consequences resulting from the receipt of Federal financial assistance. This section incorporates the definitions and rules regarding covered transactions in §§ 1.56A–18 and 1.56A–19. Paragraph (b) of this section provides additional definitions for purposes of this section. Paragraph (c) of this section provides rules regarding discharge of indebtedness income. Paragraph (d) of this section provides rules regarding fresh start accounting for the emergence from bankruptcy. Paragraph (e) of this section provides rules regarding investments in partnerships that realize discharge of indebtedness income. Paragraph (f) of this section provides rules regarding Federal financial assistance. Paragraph (g) of this section provides the applicability date of this section.

(2) *AFSI consequences resulting from disposition of property.* For rules for determining the CAMT consequences resulting from the disposition of any property by a CAMT entity in connection with a title 11 case or an insolvency, see § 1.56A–18(g) and (h), which address covered recognition transactions consisting of a sale of property by a CAMT entity.

(3) *AFS consequences resulting from certain covered nonrecognition transactions.* For rules for determining the CAMT consequences of acquisitive reorganizations and section 355 transactions, see § 1.56A–19(c) and (d), respectively.

(4) *Disregarded entities.* For rules regarding the application of paragraphs (c) and (d) of this section to disregarded entities, see paragraphs (c)(3) and (d)(5) of this section.

(b) *Definitions.* For purposes of this section:

(1) *CAMT attribute.* The term *CAMT attribute* means—

(i) CAMT basis;

(ii) CAMT foreign tax credits;

(iii) CFC adjustment carryovers (as defined in § 1.56A–6(b)(6)); and

(iv) FSNOLs.

(2) *Covered property.* The term *covered property* means section 168 property, qualified wireless spectrum, and ANCSA property (as defined in § 1.56A–11(b)(2)).

(3) *Discharge of indebtedness—(i) In general.* With respect to a CAMT entity, the term *discharge of indebtedness*, and any similar term, means any discharge of indebtedness of the CAMT entity reflected in its AFS.

(ii) *Adjustments to AFS basis.* For purposes of this paragraph (b)(3), the term *discharge of indebtedness*, and any similar term, includes income resulting from adjustments to the AFS basis of the indebtedness during the pendency of a title 11 case.

(iii) *Scope of discharge of indebtedness.* With respect to a CAMT entity, the term *discharge of indebtedness*, and any similar term, does not include the discharge of any indebtedness of the CAMT entity—

(A) To the extent incurring that indebtedness previously has resulted in a reduction in the FSI of the CAMT entity;

(B) That results from the satisfaction of a nonrecourse debt of the CAMT entity with the property that secures that debt; or

(C) That results from the satisfaction of recourse debt of the CAMT entity with property to the extent the aggregate fair market value of the property exceeds the aggregate CAMT basis of that property.

(4) *Federal financial assistance.* The term *Federal financial assistance* (FFA) has the meaning provided in section 597(c) of the Code and § 1.597–1(b).

(5) *Indebtedness.* With respect to a CAMT entity, the term *indebtedness*, and any similar term, means any indebtedness reflected on the AFS of the CAMT entity—

(i) For which the CAMT entity is liable; or

(ii) Subject to which the CAMT entity holds property (see section 108(d)(1) of the Code).

(6) *Insolvent—(i) In general.* The term *insolvent* has the meaning given the term in section 108(d)(3).

(ii) *Timing of determination.* With respect to any discharge of indebtedness of a CAMT entity, whether or not the CAMT entity is insolvent, and the amount by which the CAMT entity is insolvent, is determined on the basis of the CAMT entity's assets and liabilities (for regular tax purposes) immediately before the discharge of indebtedness. See section 108(d)(3).

(7) *Title 11 case.* The term *title 11 case* has the meaning given the term in section 108(d)(2).

(c) *Discharge of indebtedness income*—(1) *AFSI in title 11 cases.* If a CAMT entity that is under the jurisdiction of a court in a title 11 case realizes any discharge of indebtedness income, and if the discharge of indebtedness is granted by the court or is pursuant to a plan approved by the court—

(i) For purposes of determining the AFSI of the CAMT entity, the CAMT entity disregards the total amount of income that is reflected in the FSI of the CAMT entity resulting solely from the discharge of indebtedness of the CAMT entity; and

(ii) The CAMT entity applies the attribute reduction rules described in paragraphs (c)(4) and (5) of this section to the CAMT entity's CAMT attributes.

(2) *AFSI in cases of insolvency.* If a CAMT entity is insolvent and realizes any discharge of indebtedness income, and if paragraph (c)(1) of this section does not apply to the CAMT entity—

(i) For purposes of determining the AFSI of the CAMT entity, the CAMT entity disregards the income reflected in the FSI of the CAMT entity resulting solely from the discharge of indebtedness by an amount equal to the lesser of the amount of the discharge of indebtedness and the amount by which the CAMT entity is insolvent; and

(ii) The CAMT entity applies the attribute reduction rules in paragraph (c)(4) of this section to the CAMT entity's CAMT attributes.

(3) *Disregarded entities*—(i) *In general.* For purposes of applying paragraphs (c)(1) and (2) of this section to discharge of indebtedness of a disregarded entity, the disregarded entity is not considered to be the *taxpayer*, as that term is used in section 108. Instead, for purposes of paragraphs (c)(1) and (2) of this section, the CAMT entity owner of the disregarded entity is the *taxpayer*. See § 1.108–9.

(ii) *Title 11 cases.* If indebtedness of a disregarded entity is discharged in a title 11 case, paragraph (c)(1) of this section applies to that discharged indebtedness only if the CAMT entity owner of the disregarded entity is under the jurisdiction of the court in a title 11 case as the title 11 debtor.

(iii) *Insolvency.* If indebtedness of an insolvent disregarded entity is discharged, paragraph (c)(2) of this section applies to that discharged indebtedness only to the extent the CAMT entity owner of the disregarded entity is insolvent.

(4) *Attribute reduction*—(i) *Overview.* If income reflected in the FSI of a CAMT

entity is disregarded for AFSI purposes under paragraph (c)(1)(i) or (c)(2)(i) of this section (that is, with regard to a discharge of indebtedness resulting from a title 11 case or an insolvency), the CAMT entity reduces the CAMT attributes of the CAMT entity described in, and in the manner required by, this paragraph (c)(4) and paragraph (c)(5) of this section.

(ii) *Required attribute reduction amount*—(A) *In general.* Subject to paragraph (c)(4)(ii)(B) of this section, a CAMT entity described in paragraph (c)(4)(i) of this section reduces its CAMT attributes by an amount that corresponds to the amount of discharge of indebtedness of the CAMT entity excluded from AFSI under paragraph (c)(1) or (2) of this section. For rules that provide the amount of CAMT attributes that is reduced for each dollar of discharge of indebtedness excluded from AFSI, see paragraph (c)(5) of this section.

(B) *Maximum amount of attribute reduction.* The amount of CAMT attributes required to be reduced by a CAMT entity under paragraph (c)(4)(iii) of this section cannot exceed the aggregate amount of the CAMT entity's CAMT attributes, determined as of the time of the reduction under paragraphs (c)(4)(iv) and (v) of this section.

(iii) *Attribute reduction.* A CAMT entity described in paragraph (c)(4)(i) of this section reduces the following CAMT attributes of the CAMT entity in the following order:

(A) CAMT basis of covered property, but only to the extent the basis of the covered property is reduced by the CAMT entity under section 108 for regular tax purposes.

(B) FSNOLs.

(C) CFC adjustment carryovers.

(D) CAMT basis of property (other than covered property) that is depreciated or amortized for AFS purposes.

(E) CAMT basis of property (other than covered property) that is not depreciated or amortized for AFS purposes.

(F) CAMT foreign tax credits.

(G) Any remaining CAMT basis of covered property.

(iv) *Timing and allocation of reductions*—(A) *Reductions generally made after determination of CAMT liability for taxable year.* The reductions described in paragraph (c)(4)(iii) of this section are made after the determination of the tentative minimum tax under section 55(b)(2)(A) of the Code for the taxable year of the discharge of indebtedness of the CAMT entity. For taxable years beginning after December 31, 2019, and before January 1, 2023, the

reductions described in paragraph (c)(4)(iii) of this section are made after the determination of AFSI for the taxable year of the discharge of indebtedness of the CAMT entity. For any discharge of indebtedness of a CAMT entity that occurs in a taxable year beginning on or before December 31, 2019, the reductions described in paragraph (c)(4)(iii) of this section do not apply. See § 1.56A–1(d)(3).

(B) *CAMT basis of property.* The reductions of basis described in paragraphs (c)(4)(iii)(A), (D), (E), and (G) of this section apply solely to property of the CAMT entity that the CAMT entity holds on the first day of the taxable year following the taxable year in which the CAMT entity excludes discharge of indebtedness income from its AFSI. For additional rules that address covered nonrecognition transactions, see paragraph (d)(3)(ii) of this section.

(C) *Allocation of basis reductions.* The CAMT entity must reduce CAMT basis under paragraph (c)(4)(iii)(A) of this section for each individual item of property under section 108 for regular tax purposes. For basis reductions to property described in paragraph (c)(4)(iii)(D), (E), or (G) of this section, the CAMT entity applies § 1.1017–1(a) to determine the allocation of CAMT basis reductions to individual items of property. A CAMT entity that properly makes an election under section 108(b)(5) for regular tax purposes must apply the modifications of § 1.1017–1(c) to determine the allocation of CAMT basis reductions to individual items of property.

(v) *Order of reductions*—(A) *FSNOL carryovers.* The reductions described in paragraph (c)(4)(iii)(B) or (C) of this section, respectively, are made first to any FSNOL or CFC adjustment carryover arising for the taxable year of the discharge of indebtedness of the CAMT entity, and then to the FSNOL carryover or CFC adjustment carryover to that taxable year, in the order of the taxable years from which each FSNOL or CFC adjustment carryover arose, beginning with the earliest such taxable year.

(B) *CAMT foreign tax credits.* The reduction described in paragraph (c)(4)(iii)(F) of this section is made in the order in which the CAMT foreign tax credits are taken into account for the taxable year of the discharge of indebtedness of the CAMT entity.

(5) *Amount of attribute reduction*—(i) *CAMT basis, FSNOLs, and CFC adjustment carryovers.* For each dollar of AFSI that a CAMT entity excludes under paragraphs (c)(1) and (2) of this

section, the CAMT entity reduces, as appropriate—

- (A) A dollar of CAMT basis;
- (B) A dollar of FSNOL; or
- (C) A dollar of CFC adjustment

carryover.

(ii) *CAMT basis reduction limitation.*

Except as otherwise provided in paragraph (c)(5)(iii) of this section, the combined amount of CAMT basis reduced under paragraphs (c)(4)(iii)(D), (E), and (G) of this section cannot exceed the excess of—

(A) The aggregate CAMT basis and money of the CAMT entity immediately after the discharge of indebtedness of the CAMT entity, less the amount of basis reduced under paragraph (c)(4)(iii)(A) of this section; over

(B) The aggregate amount of liabilities reflected on the AFS of the CAMT entity immediately after the discharge of indebtedness of the CAMT entity.

(iii) *Election under section 108(b)(5).* The limitation in paragraph (c)(5)(ii) of this section does not apply if the CAMT entity has made an election under section 108(b)(5).

(iv) *CAMT foreign tax credits.* For each dollar of AFSI that a CAMT entity excludes under this paragraph (c), the CAMT entity reduces each dollar of the CAMT entity's CAMT foreign tax credits by an amount equal to—

(A) One dollar of the CAMT foreign tax credit; multiplied by

(B) The percentage specified in section 55(b)(2)(A)(i).

(6) *Examples.* The following examples illustrate the application of the rules in this paragraph (c). For purposes of these examples, each entity is a domestic corporation that uses the calendar year as its taxable year and is not a member of a tax consolidated group.

(i) *Example 1: Bankruptcy emergence in a covered nonrecognition transaction—*

(A) *Facts.* During its 2024 taxable year, X emerges from bankruptcy in a title 11 case by transferring all of its assets with a CAMT basis of \$60x and a fair value of \$160x to Y in a transaction that qualifies as a reorganization under section 368(a)(1)(G) of the Code (G Reorganization). In connection with the transaction, \$40x of X's \$200x indebtedness is discharged. On its AFS, X reports \$100x of gain from the G Reorganization and \$40x of income from the discharge of indebtedness, and Y reports the AFS basis of the assets it receives as \$160x on its AFS.

(B) *Analysis.* The G Reorganization is a covered nonrecognition transaction. See § 1.56A–18(b)(9). For purposes of determining X's AFSI for the 2024 taxable year, X disregards the \$100x of FSI resulting from the G Reorganization

and the \$40x of income from the discharge of indebtedness. See § 1.56A–19(c)(1)(i)(A). Y disregards any increase in the AFS basis of the assets it receives from X and takes a CAMT basis in those assets equal to X's \$60x CAMT basis. See § 1.56A–19(c)(3)(ii).

(ii) *Example 2: Bankruptcy emergence in a covered recognition transaction—*

(A) *Facts.* The facts are the same as in paragraph (c)(6)(i)(A) of this section (*Example 1*), except that, after the discharge of its indebtedness in a title 11 case, X sells all of its assets to Y for cash in a transaction that does not qualify for nonrecognition treatment under any provision of the Code. X then distributes the cash to its creditors and dissolves. On its AFS, X reports \$40x from the discharge of indebtedness and \$100x of gain from the sale.

(B) *Analysis.* X disregards any FSI that otherwise would result from the discharge of \$40x of X's indebtedness. See paragraph (c)(1)(i) of this section. X's AFSI for the 2024 taxable year includes the \$100x gain from the sale of its assets in a covered recognition transaction. See § 1.56A–18(h)(1). Y has a CAMT basis of \$160x in the assets it receives from X in the covered recognition transaction. See § 1.56A–18(h)(2)(ii).

(iii) *Example 3: Attribute reduction—*

(A) *Facts.* During its 2024 taxable year, X emerges from bankruptcy in a title 11 case. As a result of the bankruptcy reorganization, some of X's indebtedness is discharged. X has \$850x of discharge of indebtedness income for regular tax purposes prior to the application of section 108(b). On X's AFS, X reports \$1,000x from the discharge of indebtedness. At the time of the discharge, X has \$300x of net operating losses (NOLs), \$700x of FSNOLs, and \$800x of basis in its assets for both regular tax and CAMT purposes (including \$400x of basis in covered property). X does not make an election under section 108(b)(5).

(B) *Application of section 108.* For purposes of determining its income for regular tax purposes for the 2024 taxable year, X excludes \$850x of income from the discharge of indebtedness under section 108(a)(1)(A). Under section 108(b), X reduces its NOLs by \$300x and the basis of its assets by \$550x, of which \$275x is basis in covered property.

(C) *AFSI analysis.* For purposes of determining X's AFSI for the 2024 taxable year, X disregards any FSI that otherwise would result from the discharge of X's indebtedness. See paragraph (c)(1)(i) of this section. X's CAMT attributes are reduced by an amount equal to the amount of the

exclusion of FSI from X's AFSI (that is, \$1,000x). See paragraphs (c)(1)(ii) and (c)(4)(ii) of this section. X first reduces its CAMT basis of covered property to the extent its basis is reduced under section 108(b) for regular tax purposes, or \$275x. See paragraphs (c)(4)(iii)(A) and (c)(5)(i)(A) of this section. X then reduces X's FSNOLs by \$700x. Finally, X reduces X's CAMT basis in property other than covered property by \$25x. See paragraphs (c)(4)(iii)(B) and (D), (c)(5)(i)(A) and (B), and (c)(5)(ii) of this section. X does not further reduce its basis in covered property because X already has reduced \$1,000x of attributes for the \$1,000x of income from the discharge of indebtedness it has excluded. See paragraph (c)(4)(ii)(A) of this section.

(iv) *Example 4: Excluded income from the discharge of indebtedness of insolvent taxpayer—*

(A) *Facts.* The facts are the same as in paragraph (c)(6)(iii)(A) of this section (*Example 3*), except that X does not emerge from bankruptcy in a title 11 case; instead, some of X's indebtedness is discharged during the 2024 taxable year. Immediately before the discharge, X is insolvent by \$850x. Under section 108(b), X reduces its NOLs by \$300x and the basis of its assets by \$550x, of which \$275x is basis in covered property.

(B) *AFSI analysis.* For purposes of determining its AFSI for the 2024 taxable year, X disregards \$850x of its \$1,000x of FSI that otherwise would result from the discharge of its indebtedness. See paragraph (c)(2)(i) of this section. X takes the remaining \$150x of FSI from the discharge of its indebtedness into account for purposes of computing its AFSI. See *id.* X's CAMT attributes are reduced by an amount equal to the amount of the exclusion of financial accounting gain from X's AFSI (that is, \$850x). See paragraphs (c)(2)(ii) and (c)(4)(ii) of this section. X first reduces its CAMT basis of covered property to the extent its basis is reduced under section 108(b) for regular tax purposes, or \$275x. See paragraphs (c)(4)(iii)(A) and (c)(5)(i)(A) of this section. X then reduces its FSNOLs by \$575x. See paragraphs (c)(4)(iii)(B) and (c)(5)(i)(B) of this section.

(d) *Fresh start accounting for emergence from bankruptcy—*(1) *Scope.* This paragraph (d) provides rules for determining the CAMT consequences to a CAMT entity resulting from an emergence from bankruptcy of the CAMT entity.

(2) *AFSI consequences resulting from emergence from bankruptcy—*(i) *General rule.* Except to the extent

provided in paragraphs (d)(2)(ii) and (iii) of this section, a CAMT entity determines its CAMT consequences resulting from its emergence from bankruptcy by—

(A) Disregarding any resulting gain or loss that is reflected in the FSI of the CAMT entity;

(B) Determining the CAMT basis of any assets of the CAMT entity by disregarding any adjustment to the AFS basis of those assets resulting from the emergence from bankruptcy; and

(C) Adjusting the CAMT entity's CAMT earnings (in lieu of AFS retained earnings) resulting from the CAMT entity's emergence from bankruptcy by applying section 312 of the Code.

(ii) *Discharge of indebtedness.* A CAMT entity described in paragraph (d)(2)(i) of this section determines the CAMT consequences of any discharge of indebtedness of the CAMT entity resulting from the CAMT entity's emergence from bankruptcy in accordance with paragraph (c) of this section.

(iii) *Covered transactions.* A CAMT entity described in paragraph (d)(2)(i) of this section determines the CAMT consequences of any covered transaction in connection with the CAMT entity's emergence from bankruptcy in accordance with paragraph (d)(3) of this section.

(3) *AFSI consequences of title 11 cases—(i) Covered recognition transactions.* If a CAMT entity disposes of assets in a covered recognition transaction (solely with regard to the CAMT entity) as part of its title 11 case, the CAMT entity determines the CAMT consequences of the covered recognition transaction with regard to the CAMT entity by applying § 1.56A–18(g) and (h).

(ii) *Covered nonrecognition transactions—(A) In general.* If a CAMT entity disposes of assets in a covered nonrecognition transaction (solely with regard to the CAMT entity) as part of its title 11 case, the CAMT entity determines the CAMT consequences of the covered nonrecognition transaction with regard to the CAMT entity by applying § 1.56A–19(c) and (d), which provide rules for determining the CAMT consequences of acquisitive reorganizations and section 355 transactions, respectively.

(B) *CAMT attribute adjustments resulting from covered nonrecognition transactions.* If a CAMT entity described in paragraph (d)(2)(i) of this section is a target corporation in an acquisitive reorganization that qualifies as a covered nonrecognition transaction with regard to the CAMT entity (that is, the target corporation), the CAMT entity is

treated as reducing all CAMT attributes required by paragraphs (c)(5) and (6) of this section before the acquiror corporation would be treated as receiving those CAMT attributes under § 1.56A–19(c).

(4) *Discharge of indebtedness.* A CAMT entity described in paragraph (d)(3)(i) or (d)(3)(ii)(A) of this section determines the CAMT consequences of any discharge of indebtedness of the CAMT entity resulting from the CAMT entity's emergence from bankruptcy in accordance with paragraph (c) of this section.

(5) *Disregarded entities.* For purposes of applying this paragraph (d) to a disregarded entity, the disregarded entity is not considered to be the *taxpayer*, as that term is used in section 108. Instead, for purposes of this paragraph (d), the CAMT entity owner of the disregarded entity is the *taxpayer*. See paragraph (c)(1) of this section and § 1.108–9.

(6) *Example.* The following example illustrates the application of the rules in this paragraph (d).

(i) *Facts.* X is a domestic corporation that uses the calendar year as its taxable year and is not a member of a tax consolidated group. During its 2024 taxable year, X emerges from bankruptcy without being a party to a covered transaction. In connection with the transfer of ownership, X reports \$90× of gain on its AFS when it increases the AFS basis of its assets from \$40× to their fair value of \$130× at the time it emerges from bankruptcy.

(ii) *Analysis.* For purposes of determining its AFSI for the 2024 taxable year, X does not take into account the \$90× of FSI resulting from the increase in the AFS basis of its assets. See paragraph (d)(2)(i)(A) of this section. X does not make any adjustments to the CAMT basis of its assets resulting from X's emergence from bankruptcy. Accordingly, X's CAMT basis in its assets remains at \$40×. See paragraph (d)(2)(i)(B) of this section.

(e) *Application to investments in partnerships—(1) Scope.* This paragraph (e) provides rules for applying this section to a CAMT entity that is a partner in a partnership if the partnership realizes discharge of indebtedness income.

(2) *Discharge of indebtedness income of a partnership—(i) Calculation of partnership's AFSI.* Any discharge of indebtedness income reflected in a partnership's FSI is disregarded for purposes of determining the partnership's AFSI, and is instead taken into account by the CAMT entities that are partners in the partnership in

accordance with paragraphs (e)(2)(ii) and (iii) of this section.

(ii) *Exclusion from AFSI and attribute reduction at the partner level—(A) In general.* Subject to paragraph (e)(3) of this section, the AFSI exclusions provided in paragraphs (c)(1) and (2) of this section, and any resulting CAMT attribute reductions (as provided in paragraphs (c)(4) and (5) of this section), are applied at the partner level in the same manner as the rules in section 108(a) and section 108(b) are applied at the partner level for regular tax purposes. See section 108(d)(6) and § 1.108–9(b).

(B) *Special rules for covered property.* For purposes of applying the CAMT attribute reduction rules under paragraphs (c)(4) and (5) of this section at the partner level, a CAMT entity partner treats its partnership investment as covered property to the extent the basis of covered property held by the partnership is reduced by the partnership for regular tax purposes under § 1.1017–1(g)(2). In addition, if a CAMT entity partner treats its partnership investment as covered property under the immediately preceding sentence, the basis adjustment rules under § 1.1017–1(g)(2) with respect to covered property held by the partnership apply for purposes of determining the CAMT entity's distributive share amount under § 1.56A–5.

(iii) *Discharge of indebtedness income separately stated to partners.* Discharge of indebtedness income reflected in a partnership's FSI is separately stated to the partners in accordance with their distributive share percentages for the taxable year in which the income is reflected in the partnership's FSI. See also § 1.56A–5(e)(4)(iii).

(3) *Inclusion of partnership liabilities for purposes of determining insolvency.* In applying paragraph (e)(2) of this section, a CAMT entity that is a partner in a partnership includes its share of partnership's liabilities under section 752 of the Code in determining whether it is insolvent in the same manner as its share of partnership liabilities would be included for regular tax purposes.

(f) *Federal financial assistance—(1) In general.* AFSI does not include any financial accounting gain attributable to FFA any earlier than when the gain is included in gross income for purposes of section 597 and the regulations under section 597.

(2) *Example.* The following example illustrates the application of the rules in this paragraph (f).

(i) *Facts.* X is an Institution, as defined in § 1.597–1(b), that uses the calendar year as its taxable year. On July

1, 2024, X acquires assets and assumes liabilities of an unrelated Institution under Agency Receivership, as defined in § 1.597–1(b), in a Taxable Transfer, as defined in § 1.597–5(a)(1)(i)(A), in exchange for an up-front payment from an Agency, as defined in § 1.597–1(b). The contractual terms of the acquisition by X involve a transfer of assets to X that gives rise to \$10,000× of FSI that is attributable to FFA. Applicable financial accounting principles require X to include this \$10,000× in FSI in 2024. Pursuant to section 597 and the regulations under section 597, the gain is not recognized in 2024. As a result of subsequent events, X includes \$2,000× of gain attributable to that FFA in gross income for regular tax purposes in 2025.

(ii) *Analysis.* Under paragraph (f)(1) of this section, X does not include the \$10,000× of FSI in AFSI in 2024. Under paragraph (f)(1) of this section, X includes FSI of \$2,000× in AFSI in 2025.

(g) *Applicability date.* This section applies to taxable years ending after [DATE OF PUBLICATION OF FINAL RULE IN THE FEDERAL REGISTER].

§ 1.56A–22 AFSI adjustments for certain insurance companies and other specified industries.

(a) *Overview.* This section provides rules under section 56A of the Code for determining AFSI for certain insurance companies and other specified industries. Paragraph (b) of this section provides additional definitions that apply to this section. Paragraph (c) of this section provides rules for determining AFSI as it relates to certain types of life insurance and annuity contracts. Paragraph (d) of this section provides rules for determining AFSI as it relates to funds withheld reinsurance or modified coinsurance agreements. Paragraph (e) of this section provides rules for determining AFSI as it relates to assets held by any one of several identified entities since the entity became fully subject to Federal income tax by an act of Congress. Paragraph (f) of this section provides the applicability date of this section.

(b) *Definitions.* For purposes of this section:

(1) *Covered insurance company.* The term *covered insurance company* means—

(i) A company subject to tax under subchapter L of the Code; or

(ii) A foreign company that is subject to regulation as an insurance (or reinsurance) company by its home country and is licensed, authorized, or regulated by the applicable insurance regulatory body for its home country to sell insurance, reinsurance, or annuity contracts.

(2) *Covered investment pool.* The term *covered investment pool* means a pool of investment assets that are designated to support one or more covered variable contracts and that are taken into account in determining FSI.

(3) *Covered obligations.* The term *covered obligations* means the AFSI liabilities, including contract reserves and claims or benefits payable, that reflect a covered insurance company's obligations with respect to one or more covered variable contracts and that are taken into account in determining FSI.

(4) *Covered reinsurance agreement.* The term *covered reinsurance agreement* means a funds withheld reinsurance or modified coinsurance agreement and any retrocession of all or part of the risk under either such agreement. Under these agreements, the reinsurance operates like conventional reinsurance, but from a legal title and financial accounting perspective, the ceding company retains the investment assets supporting the obligations to the holders of the underlying contracts (and for modified coinsurance, the ceding company also retains the reserves). The ceding company records a liability to the reinsurer to reflect the assets it has retained.

(5) *Covered variable contract.* The term *covered variable contract* means a contract—

(i) That is issued by a covered insurance company;

(ii) That is regulated as a life insurance or annuity contract in the jurisdiction in which it is issued; and

(iii) For which the amount of the covered insurance company's obligations to the contract holder depends in whole or in part (by law, regulation, or the terms of the contract) on the value of the assets that are designated to support the contract.

(6) *Withheld assets.* The term *withheld assets* means the assets held by a ceding company to support the risk reinsured under a covered reinsurance agreement.

(7) *Withheld assets payable.* The term *withheld assets payable* means a liability on the ceding company's AFS that reflects—

(i) The ceding company's obligation to the reinsurer under a covered reinsurance agreement with respect to the withheld assets; and

(ii) Changes in the value of the withheld assets.

(8) *Withheld assets receivable.* The term *withheld assets receivable* means an asset on the reinsurer's AFS that reflects—

(i) The reinsurer's right against the ceding company under a covered

reinsurance agreement with respect to the withheld assets; and

(ii) Changes in the value of the withheld assets.

(c) *AFSI adjustments for covered variable contracts—*(1) *Non-application of certain provisions—*(i) *In general.* If the requirements in paragraph (c)(1)(ii) of this section are satisfied, the AFSI adjustments (and corresponding adjustments to CAMT basis) provided in §§ 1.56A–4, 1.56A–5, and 1.56A–18 through 1.56A–20 do not apply to determine the AFSI of a covered insurance company with respect to the covered investment pool assets referenced in paragraph (c)(1)(ii)(B) of this section that are otherwise within the scope of such regulations. Thus, amounts reflected in the FSI of the covered insurance company with respect to the covered investment pool assets, including unrealized gains and losses, are included in AFSI without adjustment if the requirements of paragraph (c)(1)(ii) of this section are met.

(ii) *Requirements.* Paragraph (c)(1)(i) of this section applies if—

(A) A covered insurance company issues or reinsures covered variable contracts;

(B) Amounts reflected in the FSI of the covered insurance company with respect to covered investment pool assets result in a change in the amount of the obligations to the holders of the related covered variable contracts by reason of law, regulation, or the terms of one or more such covered variable contracts; and

(C) The change in the amount of the obligations results in a change in the amount of the covered obligations of the covered insurance company.

(2) *Example.* The following example illustrates the application of paragraph (c)(1) of this section.

(i) *Facts.* X is a life insurance company subject to tax under subchapter L of the Code. X uses the calendar year as its taxable year and has a calendar-year financial accounting period. X uses GAAP to prepare its AFS. On January 1, 2024, X issues a life insurance contract that is a variable contract, as described in section 817, to an individual, A. The contract is regulated as a life insurance contract in the jurisdiction in which it is issued. X owns assets that are designated to support X's contractual obligation to A and holds those assets in a separate account that is segregated from the general asset accounts of X. X accounts for these assets and its contractual obligations to A in its FSI. The separate account assets are stock in unrelated domestic corporations. At the end of

2024, no assets that support A's variable contract have been sold, and the fair market value of the assets has increased by \$10x. Under the terms of the variable contract, the increase in the value of the assets supporting A's variable contract caused X's contractual obligation to A to increase by \$10x. On X's AFS, the \$10x increase in the value of the assets supporting the variable contract is included in FSI and offsets the \$10x increase in X's contractual obligation to A (which reduces X's FSI).

(ii) *Analysis.* X is a covered insurance company, and the variable contract that X issued to A is a covered variable contract. The assets in the separate account that X holds to support its contractual obligations to A constitute a covered investment pool, and X's contractual obligations to A are reflected in X's AFS liabilities, which constitute covered obligations. Paragraph (c)(1) of this section provides that § 1.56A-18 does not apply to exclude from a covered insurance company's AFSI or otherwise adjust any gain or loss in a covered investment pool that is reflected in the FSI of the covered insurance company if the requirements in paragraph (c)(1)(ii) of this section are satisfied. In this case, the requirement in paragraph (c)(1)(ii)(A) of this section is satisfied because X is a covered insurance company that issues covered variable contracts. The requirement in paragraph (c)(1)(ii)(B) of this section is satisfied because the \$10x increase in value in the covered investment pool results in a change in X's obligation to A under the terms of the variable contract. The requirement in paragraph (c)(1)(ii)(C) of this section is satisfied because the change in the amount of the obligation results in a change in the amount of X's covered obligations. Accordingly, section § 1.56A-18 does not apply to exclude any of the \$10x unrealized gain from X's AFSI or otherwise adjust the amount. Thus, both the unrealized gain and the offsetting change in the covered obligations are taken into account for purposes of determining X's AFSI, which eliminates what would otherwise be a difference between X's AFSI and A's life insurance company taxable income.

(d) *AFSI adjustments for covered reinsurance agreements*—(1) *In general.* For a covered insurance company that is a party to a covered reinsurance agreement, the changes described in paragraphs (d)(1)(i) and (ii) of this section that are accounted for separately in the covered insurance company's AFS with respect to each agreement are excluded from the covered insurance company's AFSI.

(i) *Ceding company.* For the ceding company holding the withheld assets, changes in FSI of the ceding company as a result of changes in the amount of the withheld assets payable to the extent that—

(A) The changes in the amount of the withheld assets payable correspond to the ceding company's unrealized gains and losses in the withheld assets; and

(B) The unrealized gains and losses in the withheld assets are not included in the ceding company's AFSI (determined without regard to this section but after giving effect to all other sections in the section 56A regulations except for § 1.56A-23).

(ii) *Reinsurer.* For the reinsurer, changes in FSI of the reinsurer as a result of changes in the amount of the withheld assets receivable, provided that the changes in the amount of the withheld assets receivable correspond to the unrealized gains and losses in the withheld assets.

(2) *Effect of retrocession agreement.* The exclusion provided in paragraph (d)(1)(ii) of this section is reduced to the extent that the accounting for a retrocession of the reinsured risk results in the withheld assets receivable being offset on the AFS of the reinsurer by a withheld asset payable with respect to the retrocessionaire in the retrocession.

(3) *Fair value accounting.* The exclusions provided in paragraph (d)(1) of this section will not apply to a covered insurance company with respect to a covered reinsurance agreement if—

(i) The covered insurance company elects for AFS purposes to account for the covered reinsurance agreement at fair value in its FSI; or

(ii) The covered insurance company accounts for both of the following items at fair value in its FSI—

(A) The changes in the withheld assets payable that correspond to the unrealized gains and losses in the withheld assets (for the ceding company) or the withheld assets receivable that correspond to the unrealized gains and losses in the withheld assets (for the reinsurer); and

(B) The covered reinsurance agreement.

(4) *Examples.* The following examples illustrate the application of paragraphs (d)(1) and (3) of this section.

(i) *Example 1: Covered reinsurance transaction*—(A) *Facts.* X and Y are life insurance companies subject to tax under subchapter L of the Code. Each of X and Y uses the calendar year as its taxable year, has a calendar-year financial accounting period, and uses GAAP for purposes of preparing its AFS. On January 1, 2024, X, the ceding

company, enters into a funds withheld reinsurance agreement with Y, the reinsurer. Y does not retrocede any risk covered by the funds withheld reinsurance agreement. Under the terms of the agreement, from a legal title and financial accounting perspective, X retains the assets supporting the obligations to the holders of the reinsured contracts (the withheld assets) as security for the reinsurer's obligations under the reinsurance agreement. X has a liability to Y with respect to the withheld assets (the withheld assets payable). X reflects all unrealized gains and losses on the withheld assets in OCI on its AFS, and X accounts for the corresponding changes in the withheld assets payable in its FSI. Y records an asset that corresponds to X's withheld assets payable (the withheld assets receivable) on its AFS, and Y accounts for changes in the withheld assets receivable in its FSI. At the end of 2024, no withheld assets have been sold, and the fair market value of the withheld assets has increased by \$10x. On its AFS, X includes the \$10x unrealized gain in OCI and records the effect of the \$10x increase in its withheld assets payable in FSI. Y records the effect of a corresponding \$10x increase in its withheld assets receivable in its FSI.

(B) *Analysis.* Each of X and Y is a covered insurance company, and the funds withheld reinsurance agreement is a covered reinsurance agreement. The \$10x of unrealized gain in the withheld assets is included in OCI on X's AFS and thus is excluded from X's AFSI under the definition of FSI in § 1.56A-1(b)(20). Under paragraph (d)(1)(i) of this section, because the \$10x of unrealized gain is not included in X's AFSI, the \$10x increase in the withheld assets payable is also excluded from X's AFSI. The amount included in Y's FSI as a result of the \$10x increase in Y's withheld assets receivable corresponds to the unrealized gain in the withheld assets. Under paragraph (d)(1)(ii) of this section, this \$10x increase is excluded from Y's AFSI.

(ii) *Example 2: Fair value accounting*—(A) *Facts.* The facts are the same as in paragraph (d)(4)(i)(A) of this section (*Example 1*), except that Y had made an election to account for the covered reinsurance agreement at fair value on its AFS. In 2024, the value of Y's liability under the reinsurance agreement on its AFS increased by \$8x (determined in accordance with the relevant accounting valuation rules).

(B) *Analysis.* As a result of Y's election, Y accounts for both the \$10x increase in its withheld assets receivable and the \$8x increase in its reinsurance agreement liability at fair

value in FSI. Under paragraph (d)(3) of this section, the exclusion provided in paragraph (d)(1)(ii) of this section does not apply. Accordingly, Y includes both the \$10x increase in its withheld assets receivable and the \$8x increase in its reinsurance agreement liability in AFSI.

(e) *Use of fresh start basis.* For purposes of determining AFSI, the following rules apply.

(1) *Federal Home Loan Mortgage Corporation.* The adjusted basis rules provided in section 177(d)(2) of the Deficit Reduction Act of 1984, Public Law 98–369, 98 Stat. 494 (1984), apply to determine the CAMT basis of any asset held by the Federal Home Loan Mortgage Corporation (and any successor(s) under section 381) since January 1, 1985.

(2) *Existing Blue Cross or Blue Shield organizations.* The AFSI gain or loss (but not depreciation, amortization, or other amounts) for any asset held by an existing Blue Cross or Blue Shield organization, as defined in section 833(c)(2), as added by section 1012 of the Tax Reform Act of 1986, Public Law 99–514, 100 Stat. 2085 (1986) (and any successor(s) under section 381), since the first day of the entity's first taxable year beginning after December 31, 1986, is determined using the entity's adjusted basis for regular tax purposes for the asset.

(3) *Certain pension business entities.* The AFSI gain or loss (but not depreciation, amortization, or other amounts) for any asset held by Mutual of America or Teachers Insurance Annuity Association-College Retirement Equities Fund, as referenced in sections 1012(c)(4)(A) and (B) of the Tax Reform Act of 1986 (and any successor(s) under section 381) since the first day of the entity's first taxable year beginning after December 31, 1997, is determined using the entity's adjusted basis for regular tax purposes for the asset.

(f) *Applicability date.* This section applies to taxable years ending after [DATE OF PUBLICATION OF FINAL RULE IN THE FEDERAL REGISTER].

§ 1.56A–23 AFSI adjustments for financial statement net operating losses and other attributes.

(a) *Overview.* This section provides rules under section 56A(d) of the Code for determining the AFSI adjustment for FSNOL carryovers, built-in losses, and other attributes. Paragraph (b) of this section defines the term financial statement net operating loss (FSNOL). Paragraph (c) of this section provides general rules regarding the adjustment to AFSI for the utilization of an FSNOL carryover. Paragraph (d) of this section provides rules regarding the amount of

an FSNOL that can be carried forward. Paragraph (e) of this section provides limitations on the utilization of certain FSNOL carryovers. Paragraph (f) of this section provides rules regarding the utilization of built-in losses. Paragraph (g) of this section provides the applicability date of this section.

(b) *Definition of financial statement net operating loss.* The term *financial statement net operating loss* (FSNOL) means, with respect to a corporation for any taxable year ending after December 31, 2019, the amount of the corporation's negative AFSI for the taxable year (determined after application of the section 56A regulations and without regard to this section).

(c) *AFSI adjustments for the utilization of an FSNOL.* Subject to the limitation in paragraph (e) of this section, if a corporation's AFSI for a taxable year is positive (determined after application of the section 56A regulations and without regard to this section), the corporation's AFSI is reduced by an amount equal to the lesser of—

(1) The aggregate amount of FSNOL carryovers to the taxable year (as determined under paragraph (d) of this section); or

(2) 80 percent of the AFSI of the corporation for the taxable year (determined after application of the section 56A regulations and without regard to this section).

(d) *FSNOL carryovers*—(1) *In general.* An FSNOL for any taxable year (including a taxable year in which the corporation is not an applicable corporation) is carried forward to each taxable year following the taxable year of the loss. The amount of an FSNOL carried forward to a taxable year is the amount of the FSNOL remaining (if any) after the application of paragraphs (c), (e), and (f) of this section. FSNOL carryovers used to reduce a corporation's AFSI under paragraph (c) of this section are used in the order of the taxable years in which the FSNOLs arose. For purposes of determining the amount of an FSNOL carried forward to the first taxable year a corporation is an applicable corporation (and any subsequent taxable year), paragraphs (c), (e), and (f) of this section apply to reduce the FSNOL in taxable years beginning after the taxable year of the loss and before the first taxable year in which the corporation is an applicable corporation.

(2) *Example.* The following example illustrates the application of paragraph (d)(1) of this section.

(i) *Facts.* X is a corporation that uses the calendar year as its taxable year. For

2020, X generated an FSNOL of \$3,000x. For 2021, 2022, and 2023, X's AFSI (determined without regard to this section) is \$900x, \$1,100x, and \$1,200x, respectively. X first becomes an applicable corporation for 2024. X's FSNOL is not subject to the limitations in paragraph (e) of this section.

(ii) *Analysis.* X calculates its FSNOL carryover to 2024 by first determining how much of the 2020 FSNOL is absorbed in 2021 through 2023. In 2021, \$720x (80% of \$900x) of the FSNOL carryover is absorbed, resulting in an FSNOL carryover to 2022 of \$2,280x (\$3,000x–\$720x). In 2022, \$880x (80% of \$1,100x) of the FSNOL carryover is absorbed, resulting in an FSNOL carryover to 2023 of \$1,400x (\$2,280x–\$880x). In 2023, \$960x (80% of \$1,200x) of the FSNOL carryover is absorbed, resulting in an FSNOL carryover to 2024 of \$440x (\$1,400x–\$960x).

(e) *Limitation on use of FSNOL carryovers following acquisitions*—(1) *In general.* If a corporation or a tax consolidated group (successor) succeeds to the FSNOL carryovers (acquired FSNOLs) of another corporation (predecessor corporation) in a successor transaction, as defined in paragraph (e)(2) of this section, the use of the acquired FSNOLs by the successor is subject to the limitation described in paragraph (e)(3) of this section.

(i) *Successor after stock acquisitions.* For purposes of this paragraph (e), the acquired corporation in a transaction described in paragraph (e)(2)(ii) of this section is treated as the successor to the acquired corporation after the acquisition.

(ii) *Tax consolidated groups.* If the consolidated group continues under § 1.1502–75(d)(1), this paragraph (e) applies to the tax consolidated group as if it were a single corporation.

(2) *Successor transaction.* For purposes of this paragraph (e), with respect to a particular acquired FSNOL, the term *successor transaction* means—

(i) A transaction described under section 381(a) of the Code; or

(ii) The acquisition of stock of a corporation in a transaction—

(A) That constitutes an ownership change within the meaning of § 1.59–2(f); or

(B) In which the predecessor corporation joins a tax consolidated group.

(3) *Limitation*—(i) *In general.* Acquired FSNOLs generated by an acquired business of a predecessor corporation can be used to reduce the AFSI of a successor under paragraph (c) of this section—

(A) Only if the business that generated the acquired FSNOLs (predecessor

business) is separately tracked in the successor's books and records (separately tracked business); and

(B) Only to the extent of the amount of AFSI generated by the separately tracked business after the successor transaction (separately tracked income), subject to the limitation in section 56A(d) and paragraph (e)(3)(ii)(E) of this section.

(ii) *Separately tracked income.* For purposes of paragraph (e)(3)(i) of this section, the separately tracked income of a business is determined as provided in this paragraph (e)(3)(ii).

(A) *Tracked register.* The aggregate of the acquired FSNOLs of a predecessor corporation that are utilized to reduce a successor's AFSI for all taxable years under this paragraph (e) may not exceed the aggregate AFSI for all separately tracked businesses (tracked register) for all taxable years computed under this paragraph (e)(3).

(B) *Taxable periods.* The tracked register applicable to a taxable year to which an FSNOL is carried includes items taken into account in AFSI solely in taxable periods following the successor transaction, but excludes items taken into account in AFSI in any taxable years ending after the taxable year to which the loss is carried. If the successor transaction does not occur at the close of the predecessor corporation's taxable year, separately tracked income is allocated to the portions of the taxable year before and after the successor transaction as if the predecessor corporation's books were closed on the acquisition date.

(C) *Computation of tracked register generally.* Except as provided in paragraph (e)(3)(ii)(D) of this section, the tracked register is computed by reference to only the items taken into account in AFSI that are generated by the separately tracked business without regard to FSNOLs that reduce that AFSI.

(D) *FSNOL reductions.* The tracked register takes into account the expenses, FSNOLs, and other losses of the separately tracked business actually absorbed by the successor corporation or the successor group in the taxable periods included in the tracked register (whether or not absorbed against income of the separately tracked business).

(E) *80-percent limitation.* The amount of acquired FSNOL that may be used in a taxable year is subject to limitation under paragraph (c)(2) of this section. The tracked register is decreased in a taxable year by the full amount of AFSI required to support the amount of FSNOL absorption in such taxable year.

(F) *Built-in losses.* The treatment under paragraph (f) of this section of a built-in loss as a hypothetical FSNOL in

the taxable year recognized for AFSI purposes applies solely for purposes of determining the limitation under this paragraph (e)(3) with respect to the loss in that taxable year.

(iii) *Separation of predecessor business from related FSNOLs—(A) In general.* If, following a successor transaction, the assets constituting a predecessor business are transferred to a corporation that is not a member of the same tax consolidated group as the transferor in exchange for stock of the transferee corporation, and if the exchange is not described in paragraph (e)(2)(i)(A) of this section, the amount of separately tracked income derived from those assets after the exchange for purposes of paragraph (e)(3)(ii) of this section is limited to the amount of AFSI resulting from the ownership of the stock received in the exchange (for example, dividends received with respect to the stock, or gain on the sale or exchange of the stock).

(B) *Transfer to member of same tax consolidated group.* If, following a successor transaction, the assets constituting a predecessor business are transferred from one member of the successor group to another member, this paragraph (e) applies as if all members of the successor group were a single corporation. See § 1.1502-56A(a)(2).

(iv) *Integration of predecessor and acquiror businesses.* If, following a successor transaction, a predecessor business is integrated with a business that previously had been separately tracked and reported on the successor's books and records, the acquired FSNOLs may be used—

(A) Only to the extent of the AFSI of the predecessor business that would have been separately tracked under paragraph (e)(3)(ii) of this section if the predecessor business had remained a separately tracked business; and

(B) Only if the successor generates and maintains pro forma income statements supporting any use of the acquired FSNOLs under this paragraph (e)(3)(iv).

(v) *Successor transaction involving multiple separately tracked businesses—(A) In general.* If a predecessor has more than one separately tracked business before the successor transaction, the acquired FSNOLs may be used to the extent of the combined AFSI from all separately tracked businesses of the predecessor corporation.

(B) *Subgroup acquisition.* If multiple members of the same tax consolidated group are acquired in a successor transaction and are members of a consolidated group immediately after the acquisition (limitation subgroup),

paragraph (e)(3)(v)(A) of this section applies to the limitation subgroup (during its period of consolidation immediately following the successor transaction) as if the subgroup's members were a single predecessor corporation.

(4) *Examples.* The following examples illustrate the application of the rules in this paragraph (e). Except as otherwise provided: each entity is a domestic corporation that uses the calendar year as its taxable year and is not a member of a tax consolidated group; Target and Acquiror are unrelated before the transaction; and the successor in the transaction has available AFSI in each year in excess of the amount of FSNOL available for use under this section.

(i) *Example 1: Acquisition of Target stock followed by contribution of assets—(A) Facts.* Acquiror purchases all of Target's stock for cash (Acquisition) on December 31, 2023. At the time of the Acquisition, Target operates Business X, and Target has a \$200x FSNOL. Target has no other separately tracked businesses. Following the Acquisition, Acquiror contributes assets to Target to expand Business X (Expansion). Following the Expansion, Business X (including the contributed assets) is separately tracked in Target's books and records. In 2024, Business X has separately tracked income of \$25x.

(B) *Analysis.* The Acquisition is a successor transaction. See paragraph (e)(2)(ii)(A) of this section. Target is treated as the successor after the Acquisition. See paragraph (e)(1)(ii) of this section. Because Business X is a separately tracked business, the tracked register at the end of 2024 is \$25x. See paragraph (e)(3)(i) of this section. Accordingly, \$25x of the \$200x FSNOL can be applied against the \$25x of tracked income for the year, subject to the 80-percent limitation in paragraph (c)(2) of this section. See paragraph (e)(3)(ii) of this section. As a result, Target may deduct \$20x (80% of \$25x) of the acquired FSNOL in 2024, and the tracked register is reduced to \$0x. See paragraph (e)(3)(ii)(E) of this section. The remaining \$180x of acquired FSNOL (\$200x–\$20x) is carried forward to 2025.

(ii) *Example 2: Acquisition of Target assets—(A) Facts.* On January 1, 2024, Target merges with and into Acquiror in a transaction described under section 381(a) (Merger). At the time of the Merger, Target operates Business X, and Target has a \$400x FSNOL. Acquiror also operates Business X. Following the Merger, Acquiror integrates Target's Business X operations with Acquiror's historic Business X operations and

separately tracks the combined Business X operations on Acquiror's books and records. In 2024, Business X generates AFSI of \$40x, with \$15x attributable to the Business X operations acquired from Target in the Merger, and \$25x attributable to Acquiror's historic Business X operations, as reflected in pro forma income statements generated and maintained by Acquiror.

(B) *Analysis: In general.* The Merger is a successor transaction. See paragraph (e)(2)(i) of this section. An acquired FSNOL may be used only to the extent the business that generated that FSNOL is separately tracked, and only to the extent of the separately tracked income of that business (as determined under paragraph (e)(3)(ii) of this section). See paragraph (e)(3)(i) of this section. Although Target's Business X is integrated with Acquiror's Business X after the Merger, the acquired FSNOL may be used to the extent of the income that would have been separately tracked under paragraph (e)(3)(ii) of this section if Target's Business X had remained a separately tracked business, provided that the successor generates and maintains pro forma income statements. See paragraph (e)(3)(iv) of this section.

(C) *Analysis: Computation of limitation.* Because Acquiror generates and maintains pro forma income statements for Target's Business X, the tracked register for 2024 is \$15x. Accordingly, \$15x of the \$400x FSNOL can be applied against the \$15x of tracked income for the year, subject to the 80-percent limitation in paragraph (c)(2) of this section. See paragraph (e)(3)(ii) of this section. As a result, Acquiror may include \$12x (80% of \$15x) of the acquired FSNOL in its aggregate FSNOL deduction for 2024, and the tracked register is reduced to \$0x. See paragraph (e)(3)(ii)(E) of this section. The remaining \$388x of acquired FSNOL (\$400x–\$12x) is carried forward to 2025.

(iii) *Example 3: Acquisition of multiple lines of business—(A) Facts.* Acquiror is the common parent of a tax consolidated group (Acquiror group). Acquiror purchases all the stock of Target for cash (Acquisition) on December 31, 2023. As a result, Target becomes a member of the Acquiror group. At the time of the Acquisition, Target operates two lines of business (Business X and Business Y), and Target has a \$400x FSNOL, all of which is allocable to Business X. Following the Acquisition, each of Business X and Business Y is separately tracked in the Acquiror group's books and records. In 2024, Business X generates AFSI of \$25x, and Business Y generates AFSI of \$20x.

(B) *Analysis.* The Acquisition is a successor transaction. See paragraph (e)(2)(ii)(B) of this section. Target is treated as the successor after the Acquisition. See paragraph (e)(1)(ii) of this section. Because each of Business X and Business Y is a separately tracked business, the tracked register at the end of 2024 is \$45x (\$25x + \$20x). See paragraphs (e)(3)(i) and (v) of this section. Accordingly, \$45x of the \$400x FSNOL can be applied against the \$45x of tracked income for the year, subject to the 80-percent limitation in paragraph (c)(2) of this section. See paragraph (e)(3)(ii) of this section. As a result, the Acquiror group may include \$36x (80% of \$45x) of the acquired FSNOL in its aggregate FSNOL deduction for 2024, and the tracked register is reduced to \$0. See paragraph (e)(3)(ii)(E) of this section. The remaining \$364x of acquired FSNOL (\$400x–\$36x) is carried forward to 2025.

(iv) *Example 4: Negative tracked register.* The facts are the same as in paragraph (e)(4)(iii)(A) of this section (Example 3), except that, in 2024, Business Y generates AFSI of -\$30x. The tracked register at the end of 2024 is -\$5x (\$25x + -\$30x). See paragraphs (e)(3)(i) and (v) of this section. Because the tracked register is not a positive number, the Acquiror group may include none of the \$400x acquired FSNOL in its aggregate FSNOL deduction in 2024. See paragraph (c)(2) of this section. The entire \$400x of acquired FSNOL is carried forward to 2025.

(v) *Example 5: Acquisition of subgroup.* The facts are the same as in paragraph (e)(4)(iii)(A) of this section (Example 3), except that, at the time of the Acquisition, Target is the common parent of a tax consolidated group that includes subsidiary member T1. Target operates Business X, and T1 operates Business Y. The results are the same as in paragraph (e)(4)(iii)(B) of this section. See paragraph (e)(3)(v)(B) of this section.

(vi) *Example 6: Asset transfer to affiliate that is not a member of the transferor's tax consolidated group—(A) Facts.* Acquiror is the common parent of a tax consolidated group (Acquiror group). Acquiror also owns 70 percent of the stock of Affiliate, which is engaged in Business X. Acquiror is not engaged in Business X or Business Y. On January 1, 2024, Target merges with and into Acquiror in a transaction described in section 381(a) (Merger). At the time of the Merger, Target operates Business X and Business Y, and Target has a \$400x FSNOL, all of which is allocable to Business Y. Following the Merger, Acquiror operates and

separately tracks Business Y, which generates AFSI of \$12x in 2024. Acquiror contributes Business X to Affiliate in exchange for an additional five percent of Affiliate stock. Business X generates AFSI of \$45x in 2024. On December 31, 2024, Affiliate pays a dividend to Acquiror, \$8x of which (net of DRD) is attributable to the stock issued to Acquiror in exchange for Target's Business X assets.

(B) *Analysis.* The Merger is a successor transaction. See paragraph (e)(2)(i) of this section. Because Acquiror transferred Target's Business X assets to a corporation that is not a member of Acquiror's tax consolidated group, the tracked register at the end of 2024 with respect to Business X includes only AFSI attributable to stock received in the exchange, or \$8x. See paragraph (e)(3)(iii)(A) of this section. Because Business Y is a separately tracked business, the tracked register at the end of 2024 with respect to Business Y is \$12x. See paragraph (e)(3)(i) of this section. Accordingly, the tracked register at the end of 2024 is \$20x (\$8x + \$12x). As a result, \$20x of the \$400x FSNOL can be applied against the \$20x of tracked income for the year, subject to the 80-percent limitation in paragraph (c)(2) of this section. See paragraph (e)(3)(ii) of this section. The Acquiror group may include \$16x (80% of \$20x) of the acquired FSNOL in its aggregate FSNOL deduction for 2024, and the tracked register is reduced to \$0x. See paragraph (e)(3)(ii)(E) of this section. The remaining \$384x of the acquired FSNOL (\$400x–\$16x) is carried forward to 2025.

(f) *Limitation on use of built-in losses following acquisitions—(1) Scope.* This paragraph (f) applies if a predecessor corporation (as defined in paragraph (e)(1)(i) of this section) has a CAMT net unrealized built-in loss (as defined in paragraph (f)(4) of this section) immediately before a successor transaction (as defined in paragraph (e)(2) of this section). Under this paragraph (f), the limitation in paragraph (e) of this section applies to the use of the built-in losses (as defined in paragraph (f)(3) of this section) recognized for AFSI purposes following the successor transaction.

(2) *Operating rules—(i) General rule.* For purposes of applying the limitation in paragraph (e) of this section, all built-in losses are treated as if they were acquired FSNOLs.

(ii) *Asset acquisition.* For purposes of applying this paragraph (f), assets and liabilities acquired directly from the same transferor (whether corporate or non-corporate, and whether foreign or domestic) pursuant to the same plan are

treated as the assets and liabilities of a corporation that becomes a member of the consolidated group on the date of the acquisition. See paragraph (e)(2)(ii)(B) of this section.

(iii) *Association of built-in loss with separately tracked acquired business.* Every built-in loss is treated as allocable to the separately tracked acquired business with which it was associated immediately before the successor transaction, regardless of whether the built-in loss is associated with that separately tracked acquired business when the built-in loss is recognized for AFSI purposes.

(iv) *Ordering rule.* To the extent that a built-in loss is allowed to reduce AFSI of the successor under paragraph (e) of this section in the taxable year the built-in loss is recognized for AFSI purposes, the built-in loss reduces AFSI for the taxable year before any acquired FSNOLs are allowed to reduce AFSI for the taxable year.

(v) *Carryover of built-in loss not allowed in year of recognition.* To the extent that a built-in loss is not allowed to reduce AFSI under paragraph (e) of this section in the taxable year the built-in loss is recognized for AFSI purposes, the built-in loss is treated for purposes of paragraph (e) of this section as a separate FSNOL carryover arising in a taxable period immediately preceding the successor transaction.

(3) *Built-in losses*—(i) *Definition.* All losses of a separately tracked business that are recognized for AFSI purposes during the five-year period beginning on the date of the successor transaction are built-in losses subject to limitation under this paragraph (f), except to the extent the successor establishes that—

(A) The asset at issue was not held by the predecessor corporation immediately before the successor transaction; or

(B) The loss exceeds the built-in loss in the asset, measured as of the date of the successor transaction, taking into account the CAMT basis of any relevant property.

(ii) *Timing rule.* A loss that is recognized but disallowed or deferred for AFSI purposes (see, for example, § 1.56A–26(b)) is not treated as a built-in loss unless and until the loss would be allowed to be taken into AFSI without regard to the application of this paragraph (f).

(4) *CAMT net unrealized built-in loss*—(i) *Successor transaction results in a section 382 ownership change.* If a successor transaction results in an ownership change, as defined in section 382(g) of the Code or § 1.1502–92, then the predecessor corporation in the successor transaction is treated as

having a CAMT net unrealized built-in loss (CAMT NUBIL) if the predecessor corporation has a net unrealized built-in loss (NUBIL), as defined in section 382(h)(3), based on CAMT basis.

(ii) *Successor transaction does not result in a section 382 ownership change.* This paragraph (f)(4)(ii) applies if a successor transaction does not result in an ownership change. Under this paragraph (f)(4)(ii), a predecessor corporation has a CAMT NUBIL if that predecessor corporation would have a NUBIL under section 382(h)(3) on the day of the successor transaction, taking into account—

(A) The CAMT basis of property; and

(B) Income, expenses, gains, and losses for AFSI purposes that are attributable to periods before the successor transaction.

(iii) *Inapplicability of NUBIL limitation.* For purposes of paragraphs (f)(4)(i) and (ii) of this section, section 382(h)(1)(B)(ii) does not apply to the extent it limits the amount of RBIL that may be treated as a pre-change loss to the amount of the NUBIL.

(iv) *Successor transaction treated as ownership change.* In applying section 382(h) to identify a NUBIL for purposes of paragraph (f)(4)(ii) of this section, every successor transaction is treated as if it were an ownership change under section 382(g).

(v) *No consideration in excess of fair market value.* For purposes of determining CAMT NUBIL under this paragraph (f)(4), no consideration or deemed consideration in excess of fair market value is taken into account.

(5) *Example: Determination of recognized built-in loss.* The following example illustrates the application of the rules in this paragraph (f).

(i) *Facts.* Target and Acquiror are unrelated domestic corporations, each of which uses the calendar year as its taxable year. Target merges with and into Acquiror in a successor transaction described in paragraph (e)(2)(i) of this section (Merger). At the time of the Merger, Target holds two assets that are used in the same business. Asset 1 has an unrealized loss for AFSI purposes of \$55x (CAMT basis \$75x, value \$20x), and Asset 2 has an unrealized gain for AFSI purposes of \$20x (CAMT basis \$30x, value \$50x). Target has no other income or expense items that would be treated as built-in items under section 382(h)(6).

(ii) *Analysis: Computation of NUBIL.* The Merger results in an ownership change under section 382(g). Under section 382(h)(3)(A), computed using CAMT basis, Target has a \$35x NUBIL at the time of the Merger ($-\$55x + \$20x = -\$35x$). Under paragraph (f)(4)(i) of

this section, Target has a CAMT NUBIL. Assume that \$35x exceeds the threshold requirement in section 382(h)(3)(B).

(iii) *Analysis: Imposition of limitation.* Under paragraph (f)(4)(iii) of this section, the restriction under section 382(h)(1)(B)(ii), which limits the amount of recognized built-in loss that is treated as pre-change loss to the amount of the NUBIL, does not apply for purposes of this paragraph (f). As a result, the entire \$55x of unrealized loss (and not just the \$35x net unrealized loss) is treated under paragraphs (f)(2) and (3) of this section as a built-in loss to the extent it is recognized within 5 years of the Merger. Under paragraph (e)(1) of this section, this \$55x built-in loss is subject to limitation under paragraph (e)(3) of this section. The use of the \$55x built-in loss is not limited by section 382.

(g) *Applicability date.* This section applies to taxable years ending after [DATE OF PUBLICATION OF FINAL RULE IN THE FEDERAL REGISTER].

§ 1.56A–24 AFSI adjustments for hedging transactions and hedged items.

(a) *Overview.* This section provides rules under section 56A of the Code for determining AFSI for certain hedging transactions and hedged items.

Paragraph (b) of this section provides definitions that apply for purposes of this section. Paragraph (c) of this section provides general rules that may apply to disregard a fair value measurement adjustment for purposes of determining AFSI of a CAMT entity for a taxable year. Paragraph (d) of this section provides a rule for determining AFSI if a CAMT entity marks to market a net investment hedge for regular tax purposes. Paragraph (e) of this section provides operative rules for the application of paragraphs (c) and (d) of this section. Paragraph (f) of this section provides examples illustrating the application of the rules in this section. Paragraph (g) of this section provides the applicability date of this section.

(b) *Definitions.* For purposes of this section:

(1) *AFSI hedge*—(i) *In general.* Except as provided in paragraph (b)(1)(ii) of this section, the term *AFSI hedge* means an asset or a liability of a CAMT entity for which there are fair value measurement adjustments and that—

(A) Is entered into as a hedging transaction, as defined in § 1.1221–2(b) (whether or not the character of gain or loss from the transaction is determined under § 1.1221–2), a § 1.1275–6 hedge that is part of an integrated transaction subject to § 1.1275–6, a section 1256(e) hedging transaction, a section 988(d) hedging transaction that is part of a

transaction that is integrated under § 1.988–5 or other regulations issued under section 988(d) of the Code (or an advance ruling described in § 1.988–5(e)) that govern the character or timing of gain or loss from the transaction, or a position that is a hedge under section 475(c)(2)(F) of the Code;

(B) Is a hedge that qualifies for, and is properly treated by the CAMT entity as subject to, hedge accounting (for example, under Accounting Standards Codification paragraph 815–20–25–1 or IFRS 9 Chapter 6) and reported on a CAMT entity's AFS; or

(C) Is described in both paragraphs (b)(1)(i)(A) and (B) of this section.

(ii) *Exception for certain insurance hedges.* The term *AFSI hedge* does not include an asset or a liability that is entered into as a hedging transaction, as defined in § 1.1221–2(b) (whether or not the character of gain or loss from the transaction is determined under § 1.1221–2), by a covered insurance company, as defined in § 1.56A–22(b)(1), to manage risk of fluctuations in the value of one or more assets or indices that are taken into account in determining—

(A) The obligations of the covered insurance company to holders of life insurance or annuity contracts; or

(B) The obligations of the covered insurance company to another covered insurance company with respect to obligations to holders of life insurance or annuity contracts.

(2) *AFSI subsequent adjustment date*—(i) *In general.* Except as provided in paragraph (b)(2)(ii) of this section, the term *AFSI subsequent adjustment date* means the earliest day on which any of the following events occur—

(A) An AFSI hedge or a hedged item (as applicable) subject to paragraph (c)(2) of this section matures or is sold, disposed of, or otherwise terminated;

(B) An AFSI hedge or a hedged item (as applicable) that corresponds to the hedged item or the AFSI hedge subject to paragraph (c)(2) of this section matures or is sold, disposed of, or otherwise terminated; or

(C) An asset or liability ceases to constitute an AFSI hedge or hedged item (as applicable) subject to paragraph (c)(2) of this section.

(ii) *Certain corporate and partnership transactions*—(A) *Covered nonrecognition transactions.* The acquisition of an AFSI hedge and the corresponding hedged item subject to paragraph (c)(2) of this section by a CAMT entity in a covered nonrecognition transaction (as defined in § 1.56A–18(b)(9)) is not an AFSI subsequent adjustment date. As a result, this section continues to apply to the

AFSI hedge and hedged item that were acquired by the CAMT entity. The acquisition of an AFSI hedge or hedged item subject to paragraph (c)(2) of this section without the corresponding hedged item or AFSI hedge (as applicable) by a CAMT entity in a covered nonrecognition transaction (as defined in § 1.56A–18(b)(9)) is an AFSI subsequent adjustment date.

(B) *Covered recognition transactions and certain partnership transactions.* The acquisition of an AFSI hedge or hedged item (as applicable) subject to paragraph (c)(2) of this section with or without the corresponding hedged item or AFSI hedge (as applicable) by a CAMT entity in a covered recognition transaction (as defined in § 1.56A–18(b)(10)), a contribution of an AFSI hedge or hedged item (as applicable) subject to paragraph (c)(2) of this section with or without the corresponding hedged item or AFSI hedge (as applicable) to a partnership in a transaction to which section 721(a) applies, or a distribution of an AFSI hedge or hedged item (as applicable) subject to paragraph (c)(2) of this section with or without the corresponding hedged item or AFSI hedge (as applicable) from a partnership to a partner in a transaction to which section 731(b) applies is an AFSI subsequent adjustment date.

(3) *Fair value measurement adjustment.* The term *fair value measurement adjustment* means a change in the value of an asset or a liability due to required periodic determinations at least annually of the increases or decreases in fair value of that asset or liability included in a CAMT entity's FSI, regardless of whether the determinations are required due to the type of asset or liability or due to an election by the CAMT entity. The term *fair value measurement adjustment* does not include an impairment loss or impairment loss reversal.

(4) *Hedged item.* The term *hedged item* means an asset or a liability that is reported on a CAMT entity's AFS and for which there are one or more AFSI hedges managing a risk of interest rate or price changes, a risk of currency fluctuations, or another risk that is eligible to be managed by an AFSI hedge.

(5) *Net investment hedge.* The term *net investment hedge* means an asset or a liability entered into by a CAMT entity to manage the foreign currency exposure of a net investment in a foreign operation (including under Accounting Standards Codification paragraph 815–20–25–66 or IFRS 9 Chapter 6.5.13) for which there are changes in the value of

the asset or liability due to required periodic determinations (at least annually) of the increases or decreases in fair value of that asset or liability that are included in the CAMT entity's equity accounts on the CAMT entity's AFS, such as retained earnings or OCI.

(c) *Fair value measurement adjustments for an AFSI hedge or a hedged item*—(1) *Scope.* For purposes of determining AFSI of a CAMT entity for a taxable year, paragraph (c)(2) of this section applies to a fair value measurement adjustment for an AFSI hedge or a hedged item if the fair value measurement adjustment would otherwise be included in the CAMT entity's AFSI (determined without regard to this section but after giving effect to all other sections in the section 56A regulations except for § 1.56A–23). Paragraph (c)(2) of this section provides the exclusive rules for the treatment of such a fair value measurement adjustment for purposes of determining AFSI.

(2) *Treatment of fair value measurement adjustment for certain AFSI hedges or hedged items.* A fair value measurement adjustment for an AFSI hedge or a hedged item for a taxable year is disregarded by a CAMT entity for purposes of determining the CAMT entity's AFSI if the CAMT entity either—

(i) Has a fair value measurement adjustment described in paragraph (c)(1) of this section with respect to an AFSI hedge but not the hedged item, and marks to market neither the AFSI hedge nor the hedged item for regular tax purposes; or

(ii) Has a fair value measurement adjustment described in paragraph (c)(1) of this section with respect to a hedged item but not the AFSI hedge, and marks to market neither the hedged item nor the AFSI hedge for regular tax purposes.

(3) *Application to prior taxable years.* Adjustments to AFSI under paragraph (c)(2) of this section are required to be made for all taxable years prior to the taxable year in which the AFSI hedge or hedged item matures or is sold, disposed of, or otherwise terminated, including taxable years that end on or before December 31, 2019.

(d) *Net investment hedge adjustments.* To the extent a CAMT entity marks to market a net investment hedge for regular tax purposes for a taxable year, the CAMT entity includes in AFSI for the taxable year the gain or loss resulting from marking to market the net investment hedge for regular tax purposes.

(e) *Operative rules*—(1) *Inclusion of certain taxable amounts in AFSI.* If a fair value measurement adjustment that

is disregarded under paragraph (c)(2) of this section in a taxable year includes amounts corresponding to items of income, gain, deduction, or loss under chapter 1 in that taxable year, the CAMT entity includes such amounts in AFSI in that taxable year. See paragraph (f)(5) of this section (*Example 5*).

(2) *Subsequent adjustments for AFSI hedges and hedged items.* Paragraphs (e)(2)(i) and (ii) of this section apply in the taxable year in which there is an AFSI subsequent adjustment date.

(i) In the taxable year of an AFSI subsequent adjustment date, the CAMT entity includes in AFSI the cumulative fair value measurement adjustments previously disregarded in determining AFSI under paragraph (c)(2) of this section, net of any amounts included in AFSI under paragraph (e)(1) of this section. In the case of multiple AFSI hedges with respect to a single hedged item, the preceding sentence applies only to the AFSI hedge for which there was an AFSI subsequent adjustment date.

(ii) Following an event described in paragraph (b)(2)(i)(B) or (C) of this section, the CAMT entity uses the AFS basis of the AFSI hedge or hedged item that was subject to paragraph (c)(2) of this section immediately following the AFSI subsequent adjustment date as the CAMT basis in order to determine any further recognized gain or loss included in AFSI with respect to the AFSI hedge or hedged item.

(3) *Subsequent adjustments for net investment hedges.* In the taxable year in which the net investment hedge subject to paragraph (d) of this section matures or is sold, disposed of, or otherwise terminated, or in which the asset or liability that was a net investment hedge subject to paragraph (d) of this section ceases to constitute a net investment hedge, the CAMT entity adjusts the amount included in AFSI by the cumulative mark-to-market gain or loss for regular tax purposes included in AFSI under paragraph (d) of this section. If the asset or liability that was a net investment hedge subject to paragraph (d) of this section ceases to constitute a net investment hedge but does not mature or is not sold, disposed of, or otherwise terminated, as of the date it ceases to constitute a net investment hedge, the CAMT entity redetermines the CAMT basis of the net investment hedge that was subject to paragraph (d) of this section in accordance with § 1.56A-1(d)(4). For purposes of the preceding sentence, the CAMT basis of the net investment hedge is the initial AFS basis of the net investment hedge (that is, the AFS basis as of the date the CAMT entity enters

into the net investment hedge), adjusted to take into account the cumulative mark-to-market gain or loss for regular tax purposes included in AFSI under paragraph (d) of this section (and disregarding for this purpose any changes in AFS basis resulting from items with respect to the net investment hedge not included in AFSI).

(f) *Examples.* The following examples illustrate the application of the rules in this section. For purposes of these examples, X is a corporation and, except as otherwise provided, the AFSI hedge and hedged item do not mature and are not sold, disposed of, or otherwise terminated during the taxable years involved, and the gain and loss occur in the same taxable year.

(1) *Example 1: Fair value measurement adjustment for an AFSI hedge—(i) Facts.* X has an outstanding forward contract constituting an AFSI hedge with respect to a commodity delivery obligation constituting a hedged item. X has a fair value measurement adjustment described in paragraph (c)(1) of this section on the AFSI hedge of \$20x of gain. There is no fair value measurement adjustment described in paragraph (c)(1) of this section on the hedged item. X does not mark to market the AFSI hedge or the hedged item for regular tax purposes.

(ii) *Analysis.* For purposes of determining AFSI of X, X will disregard the fair value measurement adjustment of \$20x of gain under paragraph (c)(2)(i) of this section because the forward contract is an AFSI hedge, there is no fair value measurement adjustment described in paragraph (c)(1) of this section on the hedged item, and X does not mark to market the AFSI hedge or the hedged item for regular tax purposes.

(2) *Example 2: AFSI hedge marked to market for regular tax purposes—(i) Facts.* X has an outstanding futures contract constituting an AFSI hedge with respect to a purchased debt instrument constituting a hedged item. X has a fair value measurement adjustment described in paragraph (c)(1) of this section on the AFSI hedge of \$15x of gain. There is no fair value measurement adjustment described in paragraph (c)(1) of this section on the hedged item. For regular tax purposes, the AFSI hedge is marked to market, resulting in X including \$15x of gain on the AFSI hedge in X's taxable income.

(ii) *Analysis.* For purposes of determining AFSI of X, X will not disregard the fair value measurement adjustment on the AFSI hedge of \$15x of gain because the AFSI hedge is marked to market for regular tax

purposes, and therefore paragraph (c)(2)(i) of this section does not apply.

(3) *Example 3: Fair value measurement adjustment for AFSI hedge and hedged item—(i) Facts.* X has an outstanding futures contract constituting an AFSI hedge with respect to a fixed-rate obligation constituting a hedged item. X has a fair value measurement adjustment described in paragraph (c)(1) of this section on the AFSI hedge of \$10x of gain, and a fair value measurement adjustment described in paragraph (c)(1) of this section on the hedged item of \$10x of loss. For regular tax purposes, neither the AFSI hedge nor the hedged item is marked to market.

(ii) *Analysis.* For purposes of determining the AFSI of X, X will not disregard either the fair value measurement adjustment of \$10x of gain or the fair value measurement adjustment of \$10x of loss because there are fair value measurement adjustments described in paragraph (c)(1) of this section for both the AFSI hedge and the hedged item, and therefore paragraphs (c)(2)(i) and (ii) of this section do not apply.

(4) *Example 4: Net investment hedge marked to market—(i) Facts.* X has an outstanding futures contract constituting a net investment hedge. For regular tax purposes, the futures contract is marked to market, resulting in X including \$10x of unrealized loss on the net investment hedge in X's taxable income. X includes \$8x of unrealized loss on the net investment hedge in OCI.

(ii) *Analysis.* Because the futures contract is a net investment hedge, X will include the mark-to-market loss of \$10x for regular tax purposes on the futures contract in AFSI under paragraph (d) of this section, rather than the \$8x of unrealized loss included in OCI.

(5) *Example 5: Inclusion of original issue discount (OID) in AFSI—(i) Facts.* X holds a debt instrument with OID subject to section 1272 of the Code that is a hedged item and that has a fair value measurement adjustment described in paragraph (c)(1) of this section. X also holds an AFSI hedge that does not have a fair value measurement adjustment described in paragraph (c)(1) of this section. The fair value measurement adjustment includes amounts corresponding to the OID on the debt instrument. For regular tax purposes, neither the AFSI hedge nor the hedged item is marked to market. The fair value measurement adjustment is disregarded under paragraph (c)(2)(ii) of this section.

(ii) *Analysis.* Under paragraph (c)(2)(ii) of this section, X disregards the fair value measurement adjustment on the debt instrument in determining AFSI. Instead, X will include the taxable income from the OID on the debt instrument in determining AFSI under paragraph (e)(1) of this section.

(6) *Example 6: Subsequent adjustments for AFSI hedge—(i) Facts.* X has an AFSI hedge with an initial AFS basis of \$100x. There are fair value measurement adjustments described in paragraph (c)(1) of this section for the AFSI hedge of \$10x of gain in 2024 and \$2x of loss in 2025 that were disregarded under paragraph (c)(2) of this section. There is no fair value measurement adjustment for the hedged item, and X does not mark to market the AFSI hedge or the hedged item for regular tax purposes. This gain and loss results in an increase in the AFS basis to \$110x in 2024 and a decrease in the AFS basis to \$108x in 2025. In 2026, the AFSI hedge is sold for \$115x when the AFS basis is still \$108x, giving rise to an FSI gain of \$7x.

(ii) *Analysis.* Under paragraph (e)(2)(i) of this section, X includes in AFSI the cumulative fair value measurement adjustments of \$8x previously disregarded in determining AFSI under paragraph (c)(2) of this section. X also includes in AFSI the FSI gain of \$7x from the taxable year that includes the AFSI subsequent adjustment date to take into account the net difference between the \$115x received in the sale and the AFS basis as of the AFSI subsequent adjustment date of \$108x. As a result, the sale of the AFSI hedge gives rise to \$15x of gain in 2026 for purposes of determining AFSI for that taxable year.

(7) *Example 7: Subsequent adjustments for AFSI hedge with negative carrying value—(i) Facts.* In 2024, X enters into a forward contract constituting an AFSI hedge with respect to a purchase obligation constituting a hedged item. The forward contract has a three-year term and an initial carrying value (AFS basis) of \$0. At the end of 2024, there is a fair value measurement adjustment described in paragraph (c)(1) of this section for the forward contract of \$15x of loss that is included in X's FSI for that year and was disregarded under paragraph (c)(2) of this section. There is no fair value measurement adjustment for the purchase obligation, and X does not mark to market the forward contract or the purchase obligation for regular tax purposes. Applicable financial accounting principles treat the forward contract as a liability with a negative carrying value (AFS basis) at the end of 2024 of \$15x.

In 2025 and at a time when the forward contract still has a negative carrying value (AFS basis) of \$15x, the purchase obligation is sold, which sale gives rise to an AFSI subsequent adjustment date. Because the forward contract has not yet matured or been sold, disposed of, or otherwise terminated, there is no gain or loss included in X's FSI as of the AFSI subsequent adjustment date.

(ii) *Analysis.* Under paragraph (e)(2)(i) of this section, X includes in AFSI in 2025 the \$15x of loss to take into account the fair value measurement adjustment for the forward contract that was previously disregarded under paragraph (c)(2) of this section. Under paragraph (e)(2)(ii) of this section, for purposes of determining any future gain or loss included in the AFS basis (and the CAMT basis) of the forward contract immediately following the AFSI subsequent adjustment date is –\$15x.

(g) *Applicability date.* This section applies to taxable years ending after [DATE OF PUBLICATION OF FINAL RULE IN THE FEDERAL REGISTER].

§ 1.56A–25 AFSI adjustments for mortgage servicing income.

(a) *Overview.* This section provides rules under section 56A(c)(10) of the Code for adjusting AFSI with respect to mortgage servicing income.

(b) *In general.* AFSI is adjusted so as not to include any item of income in connection with a mortgage servicing contract any earlier than the date such income is included in gross income under chapter 1.

(c) *Applicability date.* This section applies to taxable years ending after [DATE OF PUBLICATION OF FINAL RULE IN THE FEDERAL REGISTER].

§ 1.56A–26 AFSI adjustments for certain related party transactions and CAMT avoidance transactions.

(a) *Overview.* This section provides rules under section 56A of the Code for adjusting AFSI for losses that arise in certain related party transactions and for CAMT avoidance transactions.

Paragraph (b) of this section provides rules for adjusting AFSI for losses that arise from the sale or exchange of property between CAMT entities that are related. Paragraph (c) of this section provides an anti-abuse rule to adjust AFSI for transactions undertaken with a principal purpose of avoiding applicable corporation status or reducing or avoiding a CAMT liability under section 55 of the Code. Paragraph (d) of this section provides for the clear reflection of income under the principles of section 482 of the Code. Paragraph (e) of this section provides the applicability date of this section.

(b) *Deferral of loss from disposition between or among certain related entities—(1) CAMT-related group.* For purposes of this paragraph (b), the term *CAMT-related group* means any two or more CAMT entities that are treated as a single employer under section 52(a) and (b) of the Code. See § 1.59–2(e).

(2) *Required deferral.* If the AFSI of a CAMT entity (as determined after the application of all other sections of the section 56A regulations other than § 1.56A–23) reflects a loss resulting from a sale, exchange, or any other disposition of property (including stock) between that CAMT entity and one or more CAMT entities that are part of that CAMT entity's CAMT-related group (including after application of paragraph (d) of this section), that loss is deferred for AFSI purposes until no member of that CAMT entity's CAMT-related group holds that property (in whole or in part).

(c) *General anti-abuse rule.*

Arrangements entered into with a principal purpose of avoiding the application of the corporate alternative minimum tax rules under sections 55 through 59 of the Code, the section 56A regulations, or §§ 1.59–2 through 1.59–4, including avoiding treatment as an applicable corporation or reducing or otherwise avoiding a liability under section 55(a), may be disregarded or recharacterized by the Commissioner to the extent necessary to carry out the purposes of the corporate alternative minimum tax, the section 56A regulations, and §§ 1.59–2 through 1.59–4.

(d) *Clear reflection of income requirement—(1) In general.* For purposes of determining AFSI, if any item of income, expense, gain, or loss reflected in the FSI of the CAMT entity with respect to a controlled transaction or controlled transfer (as defined in § 1.482–1(i)(8)) between two or more CAMT entities does not reflect the principles of section 482 and the regulations under section 482, then the CAMT entity must make appropriate adjustments to CAMT basis to reflect these principles (regardless of whether section 482 is otherwise considered to apply).

(2) *Appropriate adjustments.* For purposes of calculating AFSI following a transaction described in paragraph (d)(1) of this section that does not reflect the principles of section 482 and the regulations under section 482, the CAMT entity must make appropriate adjustments to CAMT basis to reflect the adjustments required by paragraph (d)(1) of this section.

(3) *Example: Transfer accounted for at historical cost for accounting purposes.* The following example

illustrates the application of paragraphs (d)(1) and (2) of this section.

(i) *Facts.* X is a domestic corporation that owns all the stock of FC, a controlled foreign corporation. FC's functional currency is the U.S. dollar. X's and FC's financial results are consolidated in the financial statement included with X's Form 10-K, filed with the SEC and prepared using GAAP, and which serves as both X's and FC's AFS. On July 1, FC sells to X self-created intangible property with a zero AFS basis in the financial accounts of FC, a zero CAMT basis and a zero basis for regular tax purposes on the date of transfer. GAAP measures the transferred intangible property at the carrying value of the intangible property in the accounts of FC on the date of the transfer. No gain is reflected in the AFS for the transfer of the intangible property. Under the arm's length standard in the regulations under section 482, the arm's length sale price of the intangible property at the time of transfer is \$10x.

(ii) *Analysis.* The sale of the self-created intangible property by FC to X is a controlled transaction or controlled transfer under § 1.482-1(i)(8). Under paragraph (d)(1) of this section, X's AFSI with respect to the sale is adjusted to reflect the arm's length price at the time of the sale, or \$10x, rather than the \$0 properly shown for financial accounting purposes. Accordingly, FC recognizes a gain of \$10x, and X's AFSI is increased by its pro rata share, or 100%, of the additional FC income. Going forward, under paragraph (d)(2) of this section, X's CAMT basis in the intangible property is appropriately adjusted to reflect the \$10x that X is treated as paying for the intangible property.

(e) *Applicability date.* This section applies to taxable years ending after September 13, 2024.

§ 1.56A-27 AFSI adjustments for foreign governments.

(a) *Overview.* This section provides rules under section 56A of the Code for adjusting AFSI with respect to income of foreign governments.

(b) *In general.* AFSI of a foreign government is adjusted so as not to take into account any amount of FSI that, if it were properly treated as gross income for regular tax purposes, would be excluded from gross income and exempt from taxation under subtitle A pursuant to section 892 of the Code.

(c) *Applicability date.* This section applies to taxable years ending after September 13, 2024.

■ **Par. 10.** Sections 1.59-2 through 1.59-4 are added to read as follows:

*	*	*	*	*
Sec.				
1.59-2	General rules for determining			
	applicable corporation status.			
1.59-3	Foreign-parented multinational			
	group.			
1.59-4	CAMT foreign tax credit.			
*	*	*	*	*

§ 1.59-2 General rules for determining applicable corporation status.

(a) *Overview.* This section provides rules under section 59(k) of the Code for determining whether a corporation is an applicable corporation for purposes of sections 53 and 55 through 59 of the Code and §§ 1.56A-1 through 1.56A-27, this section, and §§ 1.59-3, 1.59-4, 1.1502-53, and 1.1502-56A. Paragraph (b) of this section provides defined terms, including the definition of an applicable corporation, that apply for purposes of this section. Paragraph (c) of this section provides general rules regarding the average annual AFSI test under section 59(k)(1)(B) and the determination of AFSI for purposes of the test, including rules to implement section 59(k)(1)(D) and (k)(2)(A). Paragraph (d) of this section provides special rules pursuant to section 59(k)(1)(E) that apply for purposes of the average annual AFSI test. Paragraph (e) of this section provides special rules pursuant to section 59(k)(1)(D) for determining whether a person and a corporation are treated as a single employer under section 52(a) or (b) of the Code. Paragraph (f) of this section provides special rules for determining the AFSI history of a corporation that joins or leaves a test group. Paragraph (g) of this section provides a safe harbor for purposes of determining whether a corporation is an applicable corporation. Paragraph (h) of this section provides rules under section 59(k)(1)(C) regarding the termination of applicable corporation status. Paragraph (i) of this section provides a substantiation requirement. Paragraph (j) of this section provides a reporting requirement. Paragraph (k) of this section provides the applicability date of this section.

(b) *Defined terms.* The following definitions apply for purposes of this section. Terms used in this section that are not defined in this section have the meanings provided in the section 56A regulations.

(1) *Applicable corporation.* Except as provided in paragraph (h) of this section, the term *applicable corporation* means, with respect to any taxable year, any corporation (other than an S corporation, a regulated investment

company, or a real estate investment trust) that meets the average annual AFSI test (as described in paragraph (c) of this section) for one or more taxable years that—

- (i) Are prior to such taxable year; and
- (ii) End after December 31, 2021.

(2) *FPMG corporation.* The term *FPMG corporation* means a corporation being tested for applicable corporation status if that corporation is a member of an FPMG (as determined under § 1.59-3) on the first or last day of its taxable year.

(3) *Relevant aggregation entity.* The term *relevant aggregation entity* has the meaning provided in paragraph (c)(2)(ii)(A) of this section.

(4) *Relevant relationship criteria.* The term *relevant relationship criteria* means the relationship criteria set forth in paragraph (c)(1)(ii)(A), (c)(2)(ii)(A), or (c)(2)(iii)(A) of this section, as applicable.

(5) *Section 56A regulations.* The term *section 56A regulations* means §§ 1.56A-1 through 1.56A-27 and 1.1502-56A.

(6) *Test group.* The term *test group* means, with respect to a corporation, the corporation and all persons that are treated as related to such corporation under the relevant relationship criteria.

(7) *Test group parent.* The term *test group parent* means—

(i) In the case of a parent-subsidary controlled group (as defined in paragraph (e)(1)(ii) of this section), the common parent of such group as described in paragraph (e)(1)(ii) of this section;

(ii) In the case of a brother-sister controlled group (as defined in paragraph (e)(1)(iii) of this section), the collective group of persons described in paragraph (e)(1)(iii) of this section that satisfy the ownership requirements under paragraphs (e)(1)(iii)(A) and (B) of this section with respect to each corporation that is a member of the brother-sister controlled group;

(iii) In the case of a combined group, as defined in paragraph (e)(1)(iv) of this section, either the common parent of the relevant parent-subsidary controlled group or the collective group of persons described in paragraph (b)(7)(ii) of this section with respect to the relevant brother-sister controlled group, as applicable;

(iv) In the case of parent-subsidary group under common control, as defined in § 1.52-1(c), the common parent organization of such group as described in § 1.52-1(c);

(v) In the case of a brother-sister group under common control, as defined in § 1.52-1(d), the collective group of persons described in § 1.52-1(d) that

satisfy the ownership requirements under § 1.52–1(d)(1) with respect to each organization, as defined in § 1.52–1(b), that is a member of the brother-sister controlled group;

(vi) In the case of a combined group under common control, as defined in § 1.52–1(e), either the common parent organization of the relevant parent-subsubsidiary group under common control or the collective group of persons described in paragraph (b)(7)(v) of this section with respect to the relevant brother-sister group under common control, as applicable; or

(vii) In the case of an FPMG, the FPMG common parent, as defined in § 1.59–3(b)(9).

(c) *Average annual AFSI test*—(1) *Corporations other than FPMG corporations*—(i) *In general*. A corporation that is not an FPMG corporation meets the average annual AFSI test for a taxable year if the average annual AFSI of the corporation (as determined under paragraph (c)(1)(ii) of this section) for the 3-taxable-year period ending with such taxable year exceeds \$1,000,000,000.

(ii) *Aggregation required to determine AFSI for purposes of the average annual AFSI test*—(A) *In general*. For purposes of applying the average annual AFSI test described in paragraph (c)(1)(i) of this section to a corporation described in paragraph (c)(1)(i) of this section, the AFSI of the corporation and all persons treated as a single employer with the corporation under section 52(a) or (b) is treated as the AFSI of the corporation. For purposes of this paragraph (c)(1)(ii)(A), if a person treated as a single employer with a corporation described in paragraph (c)(1)(i) of this section has a taxable year that differs from the taxable year of the corporation, then the corporation's AFSI includes such person's AFSI for the taxable year of such person that ends with or within the taxable year of the corporation. See paragraph (e) of this section for rules that apply to determine whether persons are treated as a single employer with the corporation under section 52(a) or (b). See paragraph (f) of this section for rules that apply to determine AFSI of the corporation if a person joins or leaves the corporation's test group.

(B) *Certain AFSI adjustments disregarded*. For purposes of applying the average annual AFSI test described in paragraph (c)(1)(i) of this section to a corporation described in paragraph (c)(1)(i) of this section, the AFSI of the corporation and the AFSI of any person treated as a single employer with the corporation under section 52(a) or (b) is determined without regard to the AFSI adjustments provided in §§ 1.56A–5,

1.56A–6(b)(2), 1.56A–8(c), 1.56A–13, 1.56A–20, 1.56A–23, and 1.56A–27. Because the AFSI adjustments provided in §§ 1.56A–5, 1.56A–13, 1.56A–20, and 1.56A–27 disregard, disregard and replace, or otherwise adjust amounts reflected in FSI, determining AFSI without regard to those AFSI adjustments means that such FSI amounts are included in AFSI without adjustment. See § 1.56A–1(c) for rules that apply to determine FSI.

(C) *Adjustments to prevent duplications with respect to partnership investments*. For purposes of the average annual AFSI test described in paragraph (c)(1)(i) of this section to a corporation described in paragraph (c)(1)(i) of this section, and to prevent the duplication of income or loss from a partnership investment, if a partnership is treated as a single employer with the corporation under section 52(a) or (b), the AFSI of any partner in the partnership that is either that corporation, or treated as a single employer with that corporation, is determined without regard to any amount reflected in that partner's FSI that is derived from, and included in, the FSI of the partnership. See § 1.56A–5(d) for a description of FSI amounts that are not treated as derived from, or included in, the FSI of the partnership.

(D) *Adjustments to account for discharge of indebtedness income with respect to partnership investments*. For purposes of the average annual AFSI test described in paragraph (c)(1)(i) of this section to a corporation described in paragraph (c)(1)(i) of this section, if a partnership is treated as a single employer with the corporation under section 52(a) or (b), the exclusions from AFSI for discharge of indebtedness income pursuant to § 1.56A–21(c) apply to the partnership's AFSI, but are based on a determination of whether the relevant partner meets any of the exclusions provided in § 1.56A–21(c)(1) and (2), including the application of any resulting CAMT attribute reductions provided in § 1.56A–21(c)(5) and (6).

(2) *FPMG corporations*—(i) *In general*. An FPMG corporation meets the average annual AFSI test for a taxable year if—
(A) The average annual AFSI of the FPMG corporation (as determined under paragraph (c)(2)(ii) of this section) for the 3-taxable-year period ending with such taxable year exceeds \$1,000,000,000; and

(B) The average annual AFSI of the FPMG corporation (as determined under paragraph (c)(2)(iii) of this section) for the 3-taxable-year period ending with such taxable year is \$100,000,000 or more.

(ii) *Aggregation required to determine AFSI for purposes of the average annual AFSI test in paragraph (c)(2)(i)(A) of this section (\$1,000,000,000 test for FPMG corporations)*—(A) *In general*. For purposes of applying the average annual AFSI test described in paragraph (c)(2)(i)(A) of this section to an FPMG corporation, the AFSI of the FPMG corporation and all other members of its FPMG and persons (other than persons that are members of the FPMG) treated as a single employer with the FPMG corporation under section 52(a) or (b) (each such member or person other than the FPMG corporation, a relevant aggregation entity) is treated as AFSI of the FPMG corporation. For purposes of this paragraph (c)(2)(ii)(A), if a relevant aggregation entity has a taxable year that differs from the taxable year of the FPMG corporation, then the FPMG corporation's AFSI includes the relevant aggregation entity's AFSI for the taxable year of the relevant aggregation entity that ends with or within the taxable year of the FPMG corporation. Additionally, for purposes of this paragraph (c)(2)(ii)(A), if a relevant aggregation entity does not have a taxable year for regular tax purposes, the relevant aggregation entity treats its AFS reporting year as its taxable year. See paragraph (e) of this section for rules that apply to determine whether persons are treated as a single employer with the FPMG corporation under section 52(a) or (b). See § 1.59–3 for rules that apply to determine the members of the FPMG corporation's FPMG. See paragraph (f) of this section for rules that apply to determine AFSI of the FPMG corporation if a person joins or leaves the FPMG corporation's test group.

(B) *Certain AFSI adjustments disregarded*. For purposes of applying the average annual AFSI test described in paragraph (c)(2)(i)(A) of this section to an FPMG corporation, and subject to paragraph (c)(2)(i)(C) of this section, the AFSI of the FPMG corporation and each relevant aggregation entity with respect to the FPMG corporation is determined without regard to the AFSI adjustments provided in §§ 1.56A–5 through 1.56A–7, 1.56A–8(c), 1.56A–13, 1.56A–20, 1.56A–23, and 1.56A–27. Because the AFSI adjustments provided in §§ 1.56A–5, 1.56A–7, 1.56A–13, 1.56A–20, and 1.56A–27 disregard, disregard and replace, or otherwise adjust amounts reflected in FSI, determining AFSI without regard to those AFSI adjustments means that such FSI amounts are included in AFSI without adjustment. See § 1.56A–1(c) for rules that apply to determine FSI.

(C) *Special rule for foreign persons with items that are not taken into*

account for regular tax purposes. For purposes of the average annual AFSI test described in paragraph (c)(2)(i)(A) of this section, an FPMG corporation that is a foreign corporation or any relevant aggregation entity with respect to the FPMG corporation that is not a United States person (as defined in section 7701(a)(30) of the Code) does not make any AFSI adjustment described in the section 56A regulations that is dependent on the treatment of an item for regular tax purposes if the FPMG corporation or relevant aggregation entity, as applicable, does not take that item into account for regular tax purposes. If an AFSI adjustment provides for disregarding an item reflected in FSI and replacing that item with an amount that is taken into account for regular tax purposes, and the FPMG corporation or relevant aggregation entity, as applicable, does not take that item into account for regular tax purposes, then the item reflected in the FPMG corporation's or relevant aggregation entity's FSI is not disregarded or replaced with any other amount. Further, for purposes of this paragraph (c)(2)(ii)(C), any adjustment described in § 1.56A–26 is not an adjustment that is dependent on the treatment of an item for regular tax purposes.

(D) *Adjustments to prevent duplications with respect to partnership investments.* For purposes of the average annual AFSI test described in paragraph (c)(2)(i)(A) of this section to an FPMG corporation and preventing the duplication of income or loss from a partnership investment, if a partnership is a relevant aggregation entity (as described in paragraph (c)(2)(ii)(A) of this section) with respect to the FPMG corporation, then the AFSI of any partner in the partnership that is either the FPMG corporation or a relevant aggregation entity with respect to the FPMG corporation is determined without regard to any amount reflected in the partner's FSI that is derived from, and included in, the FSI of the partnership. See § 1.56A–5(d) for a description of FSI amounts that are not treated as derived from, or included in, the FSI of the partnership.

(E) *Adjustments to account for discharge of indebtedness income with respect to partnership investments.* For purposes of the average annual AFSI test described in paragraph (c)(2)(i)(A) of this section to an FPMG corporation, if a partnership is a relevant aggregation entity with respect to the FPMG corporation, the exclusions from AFSI for discharge of indebtedness income pursuant to § 1.56A–21(c) apply to the partnership's AFSI, but are based on a

determination of whether the relevant partner meets any of the exclusions provided in § 1.56A–21(c)(1) and (2), including the application of any resulting CAMT attribute reductions provided in § 1.56A–21(c)(5) and (6).

(F) *Adjustments to prevent duplications with respect to ownership of certain stock.* For purposes of applying the average annual AFSI test described in paragraph (c)(2)(i)(A) of this section, the AFSI of a shareholder of a foreign corporation that is the FPMG corporation or a relevant aggregation entity with respect to the FPMG corporation (corporate aggregation entity) is determined without regard to any item reflected in the FSI of the shareholder that is attributable to FSI of the FPMG corporation or corporate aggregation entity and that, under paragraph (c)(2)(ii)(C) of this section, is not disregarded, if either—

(1) The shareholder is the FPMG corporation and is a foreign corporation; or

(2) The shareholder is a relevant aggregation entity with respect to the FPMG corporation and is not a United States person (as defined in section 7701(a)(30) of the Code).

(iii) *Aggregation required to determine AFSI for purposes of the average annual AFSI test in paragraph (c)(2)(i)(B) of this section (\$100,000,000 test for FPMG corporations).*—(A) *In general.* For purposes of the average annual AFSI test described in paragraph (c)(2)(i)(B) of this section to an FPMG corporation, the AFSI of the FPMG corporation and all persons treated as a single employer with the FPMG corporation under section 52(a) or (b) is treated as the AFSI of the FPMG corporation. For purposes of this paragraph (c)(2)(iii)(A), if a person treated as a single employer with an FPMG corporation has a taxable year that differs from the taxable year of the corporation, then the FPMG corporation's AFSI includes the person's AFSI for the taxable year of the person that ends with or within the taxable year of the FPMG corporation. See paragraph (e) of this section for rules that apply to determine whether persons are treated as a single employer with the FPMG corporation under section 52(a) or (b). See paragraph (f) of this section for rules that apply to determine AFSI of the FPMG corporation if a person joins or leaves the FPMG corporation's test group.

(B) *Certain AFSI adjustments disregarded.* For purposes of applying the average annual AFSI test described in paragraph (c)(2)(i)(B) of this section to an FPMG corporation, the AFSI of the

FPMG corporation and the AFSI of any person treated as a single employer with the FPMG corporation under section 52(a) or (b) is determined without regard to the AFSI adjustments provided in §§ 1.56A–5, 1.56A–6(b)(2), 1.56A–8(c), 1.56A–13, 1.56A–20, 1.56A–23, and 1.56A–27. Because the AFSI adjustments provided in §§ 1.56A–5, 1.56A–13, 1.56A–20, and 1.56A–27 disregard, disregard and replace, or otherwise adjust amounts reflected in FSI, determining AFSI without regard to those AFSI adjustments means that such FSI amounts are included in AFSI without adjustment. See § 1.56A–1(c) for rules that apply to determine FSI.

(C) *Adjustments to prevent duplications with respect to partnership investments.* For purposes of the average annual AFSI test described in paragraph (c)(2)(i)(B) of this section to an FPMG corporation and preventing the duplication of income or loss from a partnership investment, if a partnership is treated as a single employer with the FPMG corporation under section 52(a) or (b), then the AFSI of any partner in the partnership that is either that FPMG corporation or treated as a single employer with that FPMG corporation is determined without regard to any amount reflected in the partner's FSI that is derived from, and included in, the FSI of the partnership. See § 1.56A–5(d) for a description of FSI amounts that are not treated as derived from, or included in, the FSI of the partnership.

(D) *Adjustments to account for discharge of indebtedness income with respect to partnership investments.* For purposes of the average annual AFSI test described in paragraph (c)(2)(i)(B) of this section to an FPMG corporation, if a partnership is treated as a single employer with the FPMG corporation under section 52(a) or (b), the exclusions from AFSI for discharge of indebtedness income pursuant to § 1.56A–21(c) apply to the partnership's AFSI, but are based on a determination of whether the relevant partner meets any of the exclusions provided in § 1.56A–21(c)(1) and (2), including the application of any resulting CAMT attribute reductions provided in § 1.56A–21(c)(5) and (6).

(d) *Special rules for applying the average annual AFSI test.*—(1) *Corporations in existence for less than three taxable years.* If a corporation has been in existence for less than three taxable years, the average annual AFSI tests described in paragraphs (c)(1)(i) and (c)(2)(i) of this section, as applicable, are applied on the basis of the period during which the corporation was in existence. For purposes of the immediately preceding sentence, the

period during which a corporation has been in existence includes the period during which any predecessor of the corporation has been in existence. See paragraph (d)(3) of this section.

(2) *Short taxable years*—(i) *In general.* For purposes of the average annual AFSI tests described in paragraphs (c)(1)(i) and (c)(2)(i) of this section and determining AFSI under paragraphs (c)(1)(ii) and (c)(2)(ii) and (iii) of this section, as applicable, the AFSI for any taxable year of less than 12 months is annualized by multiplying the AFSI for the short period by 12 and dividing the result by the number of months in the short period.

(ii) *Nonrecurring items in short taxable years.* For purposes of paragraph (d)(2)(i) of this section, AFSI for the short period to be annualized does not include those items described as extraordinary items in § 1.6655–2(f)(3)(ii)(A) to the extent that the items are not otherwise disregarded in determining AFSI, either because of an AFSI adjustment or because the items are not included in FSI. However, the items are included in AFSI for the annualized 12-month period after the AFSI for the short period is annualized under paragraph (d)(2)(i) of this section.

(3) *Treatment of predecessors.* For purposes of this section, any reference to a corporation includes a reference to any predecessor of the corporation.

(e) *Special rules for applying section 52(a) and (b) in determining applicable corporation status under paragraph (c) of this section.* This paragraph (e) provides rules for determining whether a corporation and another person are treated as a single employer under section 52(a) or (b) for purposes of determining the AFSI of the corporation under paragraphs (c)(1)(ii)(A), (c)(2)(ii)(A), and (c)(2)(iii)(A) of this section, as applicable.

(1) *Persons treated as a single employer under section 52(a)*—(i) *In general.* Persons are treated as a single employer under section 52(a) if those persons are members of a controlled group of corporations. The term *controlled group of corporations* has the same meaning as under section 1563(a) of the Code, determined without regard to section 1563(a)(4) and (e)(3)(C), except that *more than 50 percent* is substituted for *at least 80 percent* each place it appears in section 1563(a)(1), and is any group of corporations that is—

(A) A parent-subsidiary controlled group, as defined in paragraph (e)(1)(ii) of this section;

(B) A brother-sister controlled group, as defined in paragraph (e)(1)(iii) of this section; or

(C) A combined group, as defined in paragraph (e)(1)(iv) of this section.

(ii) *Parent-subsidiary controlled group.* The term *parent-subsidiary controlled group* means one or more chains of corporations connected through stock ownership with a common parent if the ownership of each corporation satisfies the following ownership requirements—

(A) Stock possessing more than 50 percent of the total combined voting power of all classes of stock entitled to vote or more than 50 percent of the total value of shares of all classes of stock of each of the corporations, except the parent corporation, is owned (directly and with the application of section 1563(e)(1), (2), and (3), relating to options, partnerships, and estates or trusts, respectively) by one or more of the other corporations; and

(B) The common parent owns (directly and with the application of section 1563(e)(1), (2), and (3)) stock possessing more than 50 percent of the total combined voting power of all classes of stock entitled to vote or more than 50 percent of the total value of shares of all classes of stock of at least one of the other corporations, excluding, in computing the voting power or value, stock owned directly by the other corporations.

(iii) *Brother-sister controlled group.* The term *brother-sister controlled group* means two or more corporations if the ownership of each corporation satisfies the controlling interest requirement of paragraph (e)(1)(iii)(A) of this section and the effective control requirement of paragraph (e)(1)(iii)(B) of this section.

(A) *Controlling interest requirement.* The same five or fewer persons who are individuals, estates, or trusts own (directly and with the application of section 1563(e)) stock possessing at least 80 percent of the total combined voting power of all classes of stock entitled to vote or at least 80 percent of the total value of the shares of all classes of stock in each corporation.

(B) *Effective control requirement.* Taking into account the ownership of each of the same five or fewer persons whose ownership is considered for purposes of paragraph (e)(1)(iii)(A) of this section only to the extent that each person's ownership is identical with respect to each corporation, those persons own stock possessing more than 50 percent of the total combined voting power of all classes of stock entitled to vote or more than 50 percent of the total value of the shares of all classes of stock of each corporation.

(iv) *Combined group.* The term *combined group* means a group of three or more corporations, if—

(A) Each corporation is a member of either a parent-subsidiary controlled group of corporations or brother-sister controlled group of corporations; and

(B) At least one corporation is the common parent of a parent-subsidiary controlled group and also a member of a brother-sister controlled group.

(2) *Persons treated as a single employer under section 52(b)*—(i) *In general.* Similar to the rules that apply under sections 52(a) and 1563(a), persons are treated as a single employer under section 52(b) if those persons are members of a group of trades or businesses that are under common control.

(ii) *Trades or businesses that are under common control.* The term *trades or businesses that are under common control* means any group of trades or businesses that is either—

(A) A parent-subsidiary group under common control, as defined in § 1.52–1(c);

(B) A brother-sister group under common control, as defined in § 1.52–1(d); or

(C) A combined group under common control, as defined in § 1.52–1(e).

(3) *Component members.* In determining whether a corporation is included in a controlled group of corporations under sections 52(a) and 1563(a) and whether a group of trades or businesses are under common control under sections 52(b), 1563(b) and § 1.1563–1(b) (relating to component members of a controlled group of corporations) are not taken into account. For example, a foreign corporation subject to income tax under section 881 of the Code may be a member of a controlled group of corporations or group of trades or businesses that are under common control and treated as a single employer for purposes of paragraphs (c)(1)(ii)(A), (c)(2)(ii)(A), and (c)(2)(iii)(A) of this section, as applicable. See § 1.1563–1(a)(1)(ii).

(4) *Application of section 52 to an S corporation, a regulated investment company, or a real estate investment trust.* Although an S corporation, a regulated investment company, or a real estate investment trust cannot be an applicable corporation, an S corporation, a regulated investment company, or a real estate investment trust can be a member of a controlled group under section 52(a) or (b) and treated as a single employer for purposes of paragraphs (c)(1)(ii)(A), (c)(2)(ii)(A), and (c)(2)(iii)(A) of this section, as applicable.

(5) *Example.* The following example illustrates the application of the rules in this paragraph (e).

(i) *Facts.* X is a corporation that owns 80% of the capital and profits interest in PRS, a partnership. PRS owns 80% of the total combined voting power of all classes of stock entitled to vote of Y, a corporation.

(ii) *Analysis.* In accordance with section 1563(e)(2), X is deemed to own stock owned, directly or indirectly, by or for PRS in proportion to its interest in the capital or profits of PRS. X is deemed to own 64% of the total combined voting power of all classes of stock entitled to vote of Y (80% of PRS x 80% of Y). X is the common parent of a parent-subsidiary controlled group consisting of X and Y. Because PRS is not a corporation, it is not a member of the controlled group under section 52(a). However, under paragraph (e)(2) of this section, if PRS is engaged in a trade or business, it may be a member of a group of trades or businesses under common control under section 52(b) that includes X and Y.

(f) *Special rules for applying the average annual AFSI test if persons join or leave a corporation's test group—(1) In general.* Except as provided in paragraph (f)(2) of this section, under paragraph (c)(1)(ii)(A), (c)(2)(ii)(A), or (c)(2)(iii)(A) of this section, as applicable, a corporation includes in its AFSI for a taxable year of the corporation the AFSI of all persons treated as related to the corporation (determined by applying the relevant relationship criteria) at any point during the taxable year. For purposes of the immediately preceding sentence, if a person is treated as related to the corporation under the relevant relationship criteria for a portion of the corporation's taxable year, the corporation includes in its AFSI for that taxable year the AFSI of the person for the portion of the taxable year in which the relevant relationship criteria are satisfied. For purposes of computing the AFSI of such person for the relevant portion of the taxable year under this paragraph (f)(1), the person performs an interim closing of its books as of the end of the day before a change in status (that is, the relevant relationship criteria are newly satisfied or are no longer satisfied).

(2) *Exceptions for ownership changes—(i) In general.* For purposes of paragraph (f)(1) of this section, if a corporation experiences a change in ownership during a taxable year that results in the corporation and a person no longer being treated as related under the relevant relationship criteria, then following the change in ownership the corporation does not include that person's AFSI in the corporation's AFSI for any period prior to the change in

ownership (notwithstanding that the corporation and the person were treated as related under the relevant relationship criteria during some, or all, of that period) to determine whether the corporation meets the average annual AFSI test (as described in paragraph (c) of this section) for the taxable year in which the change in ownership occurs or for any subsequent taxable year in which the corporation and the person are not treated as related under the relevant relationship criteria. For purposes of the immediately preceding sentence, a corporation experiences a change in ownership during a taxable year of the corporation if—

(A) The corporation is not a test group parent (as defined in paragraph (b)(6) of this section);

(B) The corporation is treated as related to a test group parent under the relevant relationship criteria as of the first day of the taxable year; and

(C) As a result of a transaction (or series of related transactions) the corporation and the test group parent no longer satisfy the relevant relationship criteria as of the last day of the taxable year.

(ii) *Corporation joins a new tax consolidated group.* If a corporation experiences a change in ownership during a taxable year, as described in paragraph (f)(2)(i) of this section, that results in the corporation joining a tax consolidated group, as defined in § 1.56A–1(b)(43), that is an applicable corporation for the taxable year that includes the corporation's first taxable year in which it is a member of the tax consolidated group, then the corporation is treated as an applicable corporation beginning with the first taxable year in which it is a member of the tax consolidated group. For the taxable years in which the corporation is a member of the tax consolidated group, the corporation's AFSI is included in the tax consolidated group's AFSI under § 1.1502–56A.

(iii) *Multiple test group parents.* If a corporation is treated as related to multiple test group parents under the relevant relationship criteria as of the first day of the taxable year, then the determination of whether the corporation has a change in ownership (but not whether the corporation and a person are related under the relevant relationship criteria) during the taxable year is made under this paragraph (f)(2) separately with respect to each test group parent.

(iv) *Treatment of successors.* For purposes of this paragraph (f)(2), any reference to a test group parent includes a reference to any successor of that test group parent.

(3) *Examples.* The following examples illustrate the application of the rules in this paragraph (f). For purposes of these examples, the relevant CAMT entities are X, Y, PRS1, PRS2, PRS3 and PRS4. For regular tax purposes, X and Y are domestic corporations and PRS1, PRS2, PRS3, and PRS4 are partnerships engaged in trades or businesses. X, Y, PRS1, PRS2, PRS3, and PRS4 use a calendar year for both regular tax purposes and financial accounting purposes. X and Y each file stand-alone Federal income tax returns on Form 1120 and PRS1, PRS2, PRS3, and PRS4 each file a Federal income tax return on Form 1065.

(i) *Example 1: No change in ownership—(A) General facts.* X and Y were not applicable corporations for their 2023 taxable years and are determining whether they are applicable corporations for their 2024 taxable years. X and Y are not members of an FPMG (as defined in § 1.59–3(c)) for their 2024 taxable years. At all times during taxable years 2021 and 2022, X and Y were members of a group of trades or business under common control under paragraph (e)(2)(ii)(A) of this section as they were members of a parent-subsidiary group under common control (as defined in § 1.52–1(c)) of which PRS1 was the common parent (PRS1 group). Specifically, at all times during 2021 and 2022, PRS1 directly owned 80% of the total value of the shares of all classes of stock of X, X owned 60% the total value of the shares of all classes of stock of Y, and Y owned 75% of the capital and profits interests of PRS2. X, Y, PRS1, and PRS2 comprise a financial statement group that issues a consolidated AFS, as defined in § 1.56A–1(c)(3) (PRS1 financial statement group).

(B) *Facts: Taxable year 2023.* On April 1, 2023, Y sold its 75% interest in the capital and profits of PRS2 to PRS4, a common parent of a different parent-subsidiary group under common control (PRS4 group) that also comprises a financial statement group that issues a consolidated AFS (PRS4 financial statement group). On July 1, 2023, PRS1 acquired 60% of the capital and profits interests of PRS3 in a taxable transaction. Accordingly, during 2023, PRS2 leaves the PRS1 group and PRS3 joins the PRS1 group. X and Y remain in the PRS1 group at all times during 2023.

(C) *Analysis: Relevant relationship criteria for X and Y's applicable corporation status test.* Because X and Y are not members of a FPMG for 2024, X and Y each apply the average annual AFSI test under paragraph (c)(1) of this section to determine whether they are

applicable corporations for 2024 (using the 2021 through 2023 three-taxable-year period). Accordingly, the relevant relationship criteria for determining whether X and Y are applicable corporations for 2024 are the rules provided under paragraph (c)(1)(ii)(A) of this section and the special rules for determining whether persons are treated as a single employer under paragraph (e) of this section. Therefore, under paragraph (c)(1)(ii)(A) of this section, X includes in its AFSI the AFSI of all persons treated as a single employer with X under section 52(a) or (b) for purposes of its applicable corporation status test, and Y includes in its AFSI the AFSI of all persons treated as a single employer with Y under section 52(a) or (b) for its applicable corporation status test. Specifically, as PRS1 group includes both domestic corporations and partnerships, X and Y each apply the special rules in paragraph (e)(2) of this section for persons treated a single employer under section 52(b) and include in AFSI the persons that are members of a group of trades or businesses that are under common control with X and Y, respectively, for purposes of each of X and Y's applicable corporation status test.

(D) *Analysis: X's test group for taxable years 2021 through 2023.* Because X remained in the PRS1 group at all times during 2023, such that X's test group parent, as defined in paragraph (b)(6) of this section, was the same as the beginning and end 2023, X did not experience a change in ownership under paragraph (f)(2) of this section in 2023 notwithstanding that PRS2 left the PRS1 group and PRS3 joined the PRS1 group during 2023. Therefore, under paragraph (f)(1) of this section, for each taxable year in X's three-taxable-year test period, X's AFSI includes the AFSI of any person related to it under the relevant relationship criteria (the rules under paragraphs (c)(1)(ii)(A) and (e) of this section) at any point during the taxable year. If such person was not related to X for the entire taxable year, X's AFSI includes such person's AFSI for the portion of the taxable year in which X and such person were related. Accordingly, X's AFSI for 2021 and 2022 includes the AFSI of Y, PRS1, and PRS2 for 2021 and 2022, as X, Y, PRS1 and PRS2 were related under paragraph (e)(2)(ii)(A) of this section at all times during this period. For 2023, X was related to Y and PRS1 under paragraph (e)(2)(ii)(A) of this section for the entire taxable year and related to PRS2 and PRS3 under paragraph (e)(2)(ii)(A) of this section for portions of the 2023 taxable year. Accordingly, X's AFSI for

2023 includes the AFSI of Y and PRS1 for 2023, PRS2's AFSI attributable to the period beginning January 1, 2023 and ending March 31, 2023, and PRS3's AFSI attributable to the period beginning July 1, 2023 and ending December 31, 2023.

(E) *Analysis: Y's test group for taxable years 2021 through 2023.* The analysis for determining Y's test group for 2021–2023 is the same as in paragraph (f)(3)(i)(D) of this section. Because Y remained in the PRS1 group at all times during 2023, such that Y's test group parent, as defined in paragraph (b)(6) of this section, was the same at the beginning and end 2023, Y did not experience a change in ownership under paragraph (f)(2) of this section in 2023 notwithstanding that PRS2 left the PRS1 group and PRS3 joined the PRS1 group during 2023. Accordingly, under paragraph (f)(1) of this section, Y's AFSI for 2021 and 2022 includes the AFSI of X, PRS1, and PRS2 for 2021 and 2022, as X, Y, PRS1 and PRS2 were related under paragraph (e)(2)(ii)(A) of this section at all times during this period. For 2023, Y was related to X and PRS 1 under paragraph (e)(2)(ii)(A) of this section for the entire taxable year and related to PRS2 and PRS3 under paragraph (e)(2)(ii)(A) of this section for portions of the taxable year. Accordingly, Y's AFSI for 2023 includes the AFSI of X and PRS1 for 2023, PRS2's AFSI attributable to the period January 1, 2023 through March 31, 2023, and PRS3's AFSI attributable to the period July 1, 2023 through December 31, 2023.

(ii) *Example 2: Change in ownership—(A) Facts.* The facts are the same as in paragraph (f)(3)(i) of this section (*Example 1*), except, on September 1, 2023, 70% of the stock of Y was acquired by PRS4. Accordingly, during its 2023 taxable year, Y leaves the PRS1 group and joins the PRS4 group.

(B) *Analysis: Relevant relationship criteria for X and Y's applicable corporation status test.* The analysis for determining the relevant relationship criteria for purposes of determining X and Y's applicable corporation status for 2024 is the same as in paragraph (f)(3)(i)(D) of this section. Accordingly, the relevant relationship criteria for determining whether X and Y are applicable corporations for 2024 are the rules provided under paragraph (c)(1)(ii)(A) of this section and the special rules for determining whether persons are treated as a single employer under paragraph (e) of this section (specifically the rules in paragraph (e)(2) of this section for persons treated a single employer under section 52(b)).

(C) *Analysis: X's test group for taxable years 2021 through 2023.* The analysis for determining X's test group for 2021–2023 is the same as in paragraph (f)(3)(i)(D) of this section. Because X remained in the PRS1 group at all times during 2023, such that X's test group parent, as defined in paragraph (b)(6) of this section, was the same at the beginning and end of 2023, X did not experience a change in ownership under paragraph (f)(2) of this section in 2023 notwithstanding that Y and PRS2 left the PRS1 group and PRS3 joined the PRS1 group during 2023. Therefore, pursuant to paragraph (f)(1) of this section, X's AFSI for 2021 and 2022 includes the AFSI of Y, PRS1, and PRS2 for 2021 and 2022. For 2023, X was related to PRS1 under paragraph (e)(2)(ii)(A) of this section for the entire taxable year and related to Y, PRS2 and PRS3 under paragraph (e)(2)(ii)(A) of this section for portions of that taxable year. Accordingly, X's AFSI for 2023 includes the AFSI of PRS1 for 2023, Y's AFSI attributable to the period beginning January 1, 2023 and ending August 31, 2023, PRS2's AFSI attributable to the period beginning January 1, 2023 and ending March 31, 2023, and PRS3's AFSI attributable to the period beginning July 1, 2023 and ending December 31, 2023.

(D) *Analysis: Y's change in ownership and test group for taxable years 2021 through 2023.* On September 1, 2023, Y leaves the PRS1 group and joins the PRS4 group. Accordingly, Y experiences a change in ownership under paragraph (f)(2) of this section for 2023 as Y was related to PRS1 (the test group parent of PRS1 group) under paragraph (e)(2)(ii)(A) of this section on January 1, 2023 and Y was no longer related to PRS1 under paragraph (e)(2)(ii)(A) of this section on December 31, 2023 (Y joined the PRS4 group of which PRS4 is the test group parent on September 1, 2023). Therefore, following this change in ownership, Y does not include in its AFSI the AFSI of relevant members of the PRS1 group for any period prior to the change in ownership under paragraph (f)(2) of this section. Accordingly, for purposes of determining its AFSI for the 2021 through 2023 three-taxable-year test period and pursuant to paragraph (f)(2) of this section, Y's AFSI for 2021, 2022, and for the period beginning January 1 and ending August 31, 2023, includes only the AFSI of itself. Y's AFSI for that period does not include the AFSI of X, PRS1, PRS2, or PRS3 (as applicable), even though X, Y, PRS1, PRS2, and PRS3 were related under paragraph (e)(2)(ii)(A) of this section for some or

all of that period. For the period beginning September 1, 2023, and ending December 31, 2023, pursuant to paragraph (f)(1) of this section, Y's AFSI includes the AFSI of the members of the PRS4 group as Y was related to those members of the PRS4 group under paragraph (e)(2)(ii)(A) of this section for that period.

(g) *Simplified method for determining applicable corporation status*—(1) *In general.* A corporation may choose to apply the safe harbor method described in paragraph (g)(2) of this section (simplified method) in lieu of the average annual AFSI test and rules described in paragraphs (c) through (f) of this section for purposes of determining whether it is an applicable corporation under paragraph (b)(1) of this section.

(2) *Simplified method.* Under the simplified method, a corporation determines whether it is an applicable corporation under paragraph (b)(1) of this section by applying the average annual AFSI test and paragraphs (c) through (f) of this section with the following modifications:

(i) The average annual AFSI test in paragraphs (c)(1)(i) and (c)(2)(i)(A) of this section, as applicable, is applied by substituting \$500,000,000 (or such other amount specified in IRB guidance the IRS may publish) for \$1,000,000,000.

(ii) The average annual AFSI test in paragraph (c)(2)(i)(B) of this section, as applicable, is applied by substituting \$50,000,000 (or such other amount specified in IRB guidance the IRS may publish) for \$100,000,000.

(iii) The rules for determining AFSI under paragraphs (c)(1)(ii)(B), (c)(2)(ii)(B), and (c)(2)(iii)(B) of this section are disregarded and AFSI is instead determined by—

(A) Determining FSI by treating those members of the test group whose financial results are reflected on the same AFS as a single CAMT entity for purposes of § 1.56A–1(c)(3) and (4) (that is, AFS consolidation entries between the members of the test group are not disregarded); and

(B) Making no AFSI adjustments other than the AFSI adjustment in § 1.56A–8(b) and, solely for purposes of paragraph (c)(2)(i)(B) of this section, the AFSI adjustment in § 1.56A–7.

(iv) For a corporation that has an AFS that covers a period (AFS year) that differs from its taxable year—

(A) Paragraphs (c)(1)(i) and (c)(2)(i) of this section are applied by substituting 3-AFS-year period ending during such taxable year for 3-taxable-year period ending with such taxable year in each place that phrase appears;

(B) Paragraphs (c)(1)(ii)(B), (c)(2)(ii)(B), (c)(2)(iii)(B), and (d) of this section are applied by substituting AFS year for taxable year in each place that phrase appears.

(3) *Examples.* The following examples illustrate the application of the rules in paragraphs (g)(2)(i) through (iv) of this section.

(i) *Example 1: AFS consolidation entries*—(A) *Facts.* X, Y, and Z are domestic corporations that are members of a financial statement group (XYZ group). X and Y (but not Z) are treated as a single employer under section 52(a). X, Y, and Z choose to apply the simplified method described in paragraph (g)(2) of this section. During the 2024 taxable year, X provides services to Y and Z. For purposes of the 2024 AFS for the XYZ group, AFS consolidation entries are made to eliminate income and expense from the provision of service transactions between X and Y, and between X and Z.

(B) *Analysis.* Under paragraph (g)(2)(iii)(A) of this section and for purposes of the simplified method described in paragraph (g)(2) of this section, the AFSI of X and Y for the 2024 taxable year is determined by treating X and Y as a single CAMT entity for purposes of § 1.56A–1(c)(3), which means the AFS consolidation entries that eliminate the income and expense from the transactions between X and Y are not disregarded. However, the AFS Consolidation Entries that eliminate income and expense from the provision of service transactions between X and Z are disregarded for purposes of determining the FSI and AFSI of X, Y, and Z under the simplified method because X and Z are not treated as a single employer under section 52(a).

(ii) *Example 2: Mismatched tax and AFS year*—(A) *Facts.* W is a corporation that uses the calendar year as its taxable year and has a fiscal AFS year that ends on September 30. W has been in existence since before calendar year 2020 and has never had a short taxable year or short AFS year. W is not an FPMG corporation. W chooses to use the simplified method described in paragraph (g)(2) of this section.

(B) *Analysis.* In determining whether W is an applicable corporation for its taxable year ending December 31, 2024, W applies paragraph (c)(1)(i) of this section (as modified by paragraph (g)(2) of this section) by using the AFSI (as determined under paragraph (g)(2)(iii) of this section) for the 3-AFS-year period ending during its taxable year ending December 31, 2023. That is, W uses AFSI from the AFS years that ended

September 30, 2021, September 30, 2022, and September 30, 2023.

(4) *Effect of not meeting the safe harbor.* If a corporation applies the simplified method described in paragraph (g)(2) of this section, and determines that its AFSI (as determined under paragraph (g)(2) of this section) exceeds the relevant simplified method thresholds in paragraphs (g)(2)(i) and (ii) of this section, for example, because it has AFSI in excess of \$500 million and is not an FPMG corporation, then the corporation is an applicable corporation for such year only if it is determined to be an applicable corporation under paragraphs (b) through (f) of this section (determined without regard to the modifications described in paragraph (g)(2) of this section).

(h) *Termination of status as an applicable corporation*—(1) *In general.* A corporation's status as an applicable corporation terminates as of the first day of the first taxable year following the taxable year in which the corporation—

(i) Experiences a change in ownership, as described in paragraph (f)(2)(i) of this section, provided that if the corporation is described in paragraph (f)(2)(iii) of this section, the corporation experiences a change in ownership with respect to all test group parents it was related to under the relevant relationship criteria as of the first day of the taxable year; or

(ii) Satisfies the termination test described in paragraph (h)(2) of this section.

(2) *Termination test.* A corporation satisfies the termination test for a taxable year if the corporation does not meet the average annual AFSI test (as described in paragraph (c) of this section, and taking into account the application of paragraphs (c) through (f) of this section), for 5 consecutive taxable years ending with the taxable year.

(3) *Later change in status*—(i) *In general.* Except as provided in paragraph (h)(3)(ii) of this section, a corporation whose status as an applicable corporation terminates for the taxable year described in paragraph (h)(1) of this section continues to apply the rules in this section to determine whether the corporation is an applicable corporation under paragraph (b)(1) of this section for the taxable year described in paragraph (h)(1) of this section (that is, the corporation may become an applicable corporation for the same taxable year in which its status terminates under paragraph (h)(1) of this section) and each taxable year thereafter.

(ii) *Joining a tax consolidated group.* If a corporation whose status as an

applicable corporation terminates for the taxable year described in paragraph (h)(1)(i) of this section due to a change in ownership that results in the corporation joining a tax consolidated group that is an applicable corporation for the tax consolidated group's taxable year that includes such taxable year, then the corporation is treated as an applicable corporation beginning with such taxable year and subsequent taxable years, as applicable. See paragraph (f)(2)(ii) of this section.

(i) *Substantiation requirement.* A corporation (other than an S corporation, a regulated investment company, or a real estate investment trust) must maintain books and records sufficient to demonstrate whether it is an applicable corporation for any taxable year, including the identification of all persons treated as a single employer with such corporation under section 52(a) or (b) and whether the corporation is a member of an FPMG under § 1.59–3. See § 1.6001–1(a).

(j) *Reporting requirement.* A corporation (other than an S corporation, a regulated investment company, or a real estate investment trust) that does not satisfy the simplified method under paragraph (g) of this section must provide information to demonstrate whether it is an applicable corporation, in such form and manner as Form 4626, *Alternative Minimum Tax-Corporations* (or any successor form), the Federal income tax return required to be filed by such corporation, or their respective instructions prescribe. See §§ 1.6011–1 and 601.602 of this chapter.

(k) *Applicability date.* This section applies to taxable years of the corporation determining its applicable corporation status ending after September 13, 2024.

§ 1.59–3 Foreign-parented multinational group.

(a) *Overview.* This section provides rules under section 59(k) of the Code for determining a foreign-parented multinational group (FPMG) for purposes of sections 53 and 55 through 59 of the Code and §§ 1.56A–1 through 1.56A–27, 1.59–2, this section, and §§ 1.59–4, 1.1502–53, and 1.1502–56A. Paragraph (b) of this section provides definitions that apply for purposes of this section. Paragraph (c) of this section provides the rules for determining an FPMG. Paragraph (d) of this section describes the treatment of a U.S. trade or business. Paragraph (e) of this section provides for the treatment of certain parent entities as foreign corporations. Paragraph (f) of this section defines the term controlling interest. Paragraph (g)

of this section defines the term applicable financial accounting standard. Paragraph (h) of this section defines the term included in the same applicable financial statement for that taxable year. Paragraph (i) of this section specifies who is a member of an FPMG. Paragraph (j) of this section provides examples illustrating the application of the rules in this section. Paragraph (k) of this section provides the applicability date of this section.

(b) *Definitions.* The following definitions apply for purposes of this section. Terms used in this section that are not defined in this section have the meanings provided in § 1.56A–1(b).

(1) *Applicable financial accounting standard for that taxable year.* The term *applicable financial accounting standard for that taxable year* has the meaning provided in paragraph (g) of this section.

(2) *Controlling interest.* The term *controlling interest* has the meaning provided in paragraph (f) of this section.

(3) *Deemed domestic corporation.* The term *deemed domestic corporation* has the meaning provided in paragraph (d) of this section.

(4) *Deemed foreign corporation.* The term *deemed foreign corporation* means any entity treated as a foreign corporation under paragraph (e) of this section.

(5) *Domestic corporation.* The term *domestic corporation* includes any domestic corporation for regular tax purposes, as well as any deemed domestic corporation, except as otherwise provided in this section.

(6) *Entity.* The term *entity* means any CAMT entity and any deemed domestic corporation. Any disregarded entity or branch that is owned by a CAMT entity (including through ownership of one or more disregarded entities or branches) is treated as part of that CAMT entity, except to the extent the disregarded entity or branch is a deemed domestic corporation.

(7) *Foreign corporation.* The term *foreign corporation* includes any foreign corporation for regular tax purposes, as well as any deemed foreign corporation, except as otherwise provided in this section.

(8) *Foreign-parented multinational group (FPMG).* The term *FPMG* has the meaning provided in paragraph (c) of this section.

(9) *FPMG common parent.* The term *FPMG common parent* means an ultimate parent that is a foreign corporation.

(10) *Included in the same applicable financial statement for that taxable year.* The term *included in the same applicable financial statement for that*

taxable year has the meaning provided in paragraph (h) of this section.

(11) *Section 52 group.* The term *section 52 group* means, with respect to a person, that person and the group of persons whose AFSI is required to be aggregated with the AFSI of that person under § 1.59–2(c)(1)(ii)(A).

(12) *Ultimate parent.* The term *ultimate parent* means an entity that has a controlling interest in at least one other entity and in which no entity has a controlling interest.

(c) *FPMG.* For purposes of this section, the term *FPMG* means, with respect to any taxable year of a corporation, two or more entities, one of which is the corporation, if—

(1) At least one of the entities is a domestic corporation and at least one of the entities is a foreign corporation;

(2) The entities are included in the same applicable financial statement for that taxable year; and

(3) One of the entities is an FPMG common parent.

(d) *Treatment of U.S. trade or business as separate domestic corporation.* For purposes of this section, if a foreign corporation (excluding a deemed foreign corporation) is or is treated as engaged in a trade or business within the United States for purposes of section 882 of the Code (including through one or more disregarded entities or pass-through entities), the trade or business will be treated as a separate domestic corporation (a deemed domestic corporation) that is wholly owned by the foreign corporation.

(e) *Treatment of certain ultimate parents as foreign corporations.* For purposes of this section, an ultimate parent that is not a corporation (determined without regard to this paragraph (e)) is treated as a foreign corporation if—

(1) The ultimate parent directly or indirectly owns (other than through a domestic corporation, excluding a deemed domestic corporation) a foreign trade or business (as defined in § 1.989(a)–1(c)); or

(2) The ultimate parent directly or indirectly owns (other than through a domestic corporation, excluding a deemed domestic corporation) any equity interest in a foreign corporation and the ultimate parent has a controlling interest (including through a domestic corporation) in such foreign corporation.

(f) *Controlling interest*—(1) *In general.* An entity (upper-tier entity) has a controlling interest in another entity (lower-tier entity) if the applicable financial accounting standard requires that a consolidated financial statement

of the upper-tier entity reflects the assets, liabilities, equity, income, and expenses of the lower-tier entity (regardless of whether or not a consolidated financial statement is or is required to be prepared or is prepared correctly).

(2) *Treatment of certain entities.* For purposes of this section, an upper-tier entity has a controlling interest (if it does not otherwise have a controlling interest under the applicable financial accounting standard) in any of the following entities—

(i) A deemed domestic corporation if either—

(A) The upper-tier entity is the foreign corporation; or

(B) The upper-tier entity has a controlling interest in the foreign corporation;

(ii) Any entity if—

(A) The entity and the upper-tier entity are in the same section 52 group;

(B) The upper-tier entity directly or indirectly (through one or more CAMT entities) owns an interest in the entity; and

(C) The upper-tier entity is a member of an FPMG without regard to this paragraph (f)(2)(ii); or

(iii) Any entity in which the upper-tier entity would be treated as having a controlling interest but for the fact that the entity is (or would be) excluded from the upper-tier entity's consolidated financial statement under the applicable financial accounting standard—

(A) Based on size or materiality;

(B) Because the entity is held for sale;

(C) Because the entity or business of the entity is winding down, liquidating, or otherwise ceasing operations or being terminated or disposed of; or

(D) Because the entity is permitted but not required to be excluded under the applicable financial accounting standard from a consolidated financial statement of the upper-tier entity, regardless of whether or not a consolidated financial statement is (or is required to be) prepared.

(3) *Tiered controlling interests.* For purposes of this section, if an upper-tier entity has a controlling interest in a lower-tier entity, the upper-tier entity will also have a controlling interest in any entity in which the lower-tier entity has a controlling interest under paragraph (f)(2)(ii) of this section. This rule applies iteratively, starting at the bottom of the controlling interest chain and ending with the FPMG common parent.

(g) *Applicable financial accounting standard—(1) In general.* For purposes of this section, the term *applicable financial accounting standard* means

GAAP except as provided in paragraph (g)(2) of this section.

(2) *Exceptions—(i) Rules for applying exceptions.* The exceptions in paragraphs (g)(2)(ii) and (iii) of this section apply in descending order of priority. For example, if an applicable financial accounting standard is determined pursuant to paragraph (g)(2)(ii) of this section, then paragraph (g)(2)(iii) of this section does not apply. Similarly, if an applicable financial accounting standard is determined pursuant to paragraph (g)(2)(iii)(A) of this section, then paragraph (g)(2)(iii)(B) of this section does not apply. For purposes of this paragraph (g)(2), all references to an ultimate parent are to the ultimate parent as determined by treating the accounting standard used to prepare the relevant consolidated financial statement as the applicable financial accounting standard. For example, in paragraph (g)(2)(ii) of this section, the ultimate parent of a consolidated financial statement described in § 1.56A–2(c)(2)(i) is determined by treating IFRS as the applicable financial accounting standard and, in paragraph (g)(2)(iii)(B) of this section, each of the ultimate parents would be determined based on the accounting standard used to prepare the applicable consolidated financial statement. If the assets, liabilities, equity, income, and expenses of a corporation are reflected in a consolidated financial statement described in § 1.56A–2(c)(1) (qualifying GAAP financial statement) that is of its ultimate parent, the exceptions in this paragraph (g)(2) do not apply.

(ii) *IFRS.* If the assets, liabilities, equity, income, and expenses of a corporation are reflected in a consolidated financial statement described in § 1.56A–2(c)(2)(i) that is of its ultimate parent, then the applicable financial accounting standard means the accounting standard used to prepare that consolidated financial statement.

(iii) *Other accounting standard—(A) Single accounting standard.* If the assets, liabilities, equity, income, and expenses of a corporation are reflected in a single consolidated financial statement described in § 1.56A–2(c)(3)(i) that is of its ultimate parent, then the applicable financial accounting standard means the accounting standard used to prepare that consolidated financial statement.

(B) *Multiple accounting standards.* If the assets, liabilities, equity, income, and expenses of a corporation are reflected in more than one consolidated financial statements described in § 1.56A–2(c)(3)(i) that are of their ultimate parents and all of those

consolidated financial statements have the same ultimate parent (each, a parented financial statement), then the applicable financial accounting standard means:

(1) If the accounting standard used to prepare one of those parented financial statements was the applicable financial accounting standard in the prior taxable year, that accounting standard; and

(2) If no accounting standard is described in paragraph (g)(2)(iii)(B)(1) of this section, the accounting standard chosen by the corporation from among the accounting standards used to prepare those parented financial statements, provided that the choice of accounting standard is specified on a statement attached to the Form 4626, *Alternative Minimum Tax-Corporations* (or any successor form), of the corporation or as otherwise directed in the instructions to the form for the first applicable taxable year (statement requirement). If the corporation does not choose an accounting standard, chooses one that is not permitted, or fails to satisfy the statement requirement and does not establish to the Commissioner's satisfaction that the corporation has used the chosen applicable financial accounting standard, the Commissioner has discretion either to treat the applicable financial accounting standard as GAAP or to treat the applicable financial accounting standard as one of the accounting standards used to prepare one of those parented financial statements.

(3) *Reflected in a consolidated financial statement.* For purposes of this paragraph (g), the assets, liabilities, equity, income, and expenses of a corporation are treated as reflected in a consolidated financial statement if either they are reflected in the consolidated financial statement, or they would have been reflected in the consolidated financial statement but for the entity being excluded for a reason specified in paragraphs (f)(2)(iii)(A) through (D) of this section.

(4) *Disclosure requirement.* The corporation must specify the applicable financial accounting standard on a statement attached to the Form 4626 (or any successor form) of the corporation or as otherwise directed in the instructions to the form for each taxable year the applicable financial accounting standard is relevant in determining if the corporation is a member of an FPMG.

(h) *Included in the same applicable financial statement for that taxable year.* For purposes of this section, the FPMG common parent and all entities in which the FPMG common parent has

a controlling interest at any time during the taxable year are treated as included in the same applicable financial statement for that taxable year. For purposes of this paragraph (h), it is irrelevant whether a consolidated financial statement of the FPMG common parent is prepared or whether a particular entity is reflected in the consolidated financial statement of the FPMG common parent or would be reflected if a consolidated financial statement of the FPMG common parent were prepared. The entities included in the same applicable financial statement for that taxable year for this purpose may differ from the entities included in the applicable financial statement(s) determined under § 1.56A-2.

(i) *Member of an FPMG.* Each entity included in the same applicable financial statement for that taxable year as the FPMG common parent is a member of that FPMG (including the FPMG common parent).

(j) *Examples.* The following examples illustrate the application of the rules in this section.

(1) *Example 1: Determining if there is an FPMG and its members when there is a single foreign corporation that is engaged in U.S. trade or business—(i) Facts.* FC is a foreign corporation engaged in a trade or business in the United States for purposes of section 882 of the Code. FC does not own an interest in any entity. FC does not have a controlling interest in any entity under its applicable financial accounting standard and does not prepare a consolidated financial statement. No entity has a controlling interest in FC, within the meaning of paragraph (f) of this section, and FC is not a member of any section 52 group. FC is being tested for applicable corporation status.

(ii) *Analysis.* Under paragraph (d) of this section, the U.S. trade or business is treated as a separate domestic corporation that is wholly owned by FC (the deemed domestic corporation, DC). Under paragraph (f)(2) of this section, FC is treated as having a controlling interest in DC because DC and FC are described in paragraph (d) of this section. As a result, FC is an ultimate parent under paragraph (b)(12) of this section because it has a controlling interest in DC and no entity has a controlling interest in it. Because FC is the ultimate parent and a foreign corporation, it is the FPMG common parent under paragraph (b)(9) of this section. Under paragraph (h) of this section, FC and DC are treated as included in the same applicable financial statement for that taxable year because FC, the FPMG common parent, has a controlling interest in DC. As a

result, there is an FPMG comprised of FC and DC under paragraph (c) of this section because the following three requirements are satisfied: there is at least one foreign corporation (FC) and one domestic corporation (DC); the entities (FC and DC) are included in the same applicable financial statement for that taxable year; and one of the entities (FC) is an FPMG common parent.

(2) *Example 2: Partnership treated as a deemed foreign corporation—(i) Facts.* PRS is a partnership that directly owns all the stock of X, a domestic corporation, and 15% of the stock of FC, a foreign corporation. The remaining 85% of the stock of FC is directly owned by X. PRS is the ultimate parent and has a controlling interest in X and FC.

(ii) *Analysis.* PRS is treated as a foreign corporation under paragraph (e) of this section because the following three requirements of paragraph (e)(2) of this section are satisfied: PRS is the ultimate parent; PRS owns an interest in FC that is not owned through a domestic corporation; and PRS has a controlling interest in FC because of its direct interest in FC and its indirect interest in FC through X.

(3) *Example 3: Controlling interest—(i) Facts.* FC is a foreign corporation that is not required (for example, by regulators or creditors) to prepare a consolidated financial statement and therefore does not prepare a consolidated financial statement. FC directly owns 100% of the stock of X, and X directly owns 100% of the stock of Y. X and Y are domestic corporations. Y is held for sale. If FC were to prepare a consolidated financial statement under GAAP, FC would be required to reflect the assets, liabilities, equity, income, and expenses of X but not Y. However, if Y were not held for sale, FC also would be required to reflect the assets, liabilities, equity, income, and expense of Y on its consolidated financial statement under GAAP.

(ii) *Analysis.* Under paragraph (g) of this section, the applicable financial accounting standard is GAAP because FC does not prepare a consolidated financial statement and therefore none of the exceptions in paragraph (g)(2) of this section apply. FC has a controlling interest in X under paragraph (f)(1) of this section because the applicable financial accounting standard (which is GAAP) requires that FC's consolidated financial statement include the assets, liabilities, equity, income, and expenses of X. Neither the fact that no consolidated financial statement is required to be prepared nor the fact that no consolidated financial statement is prepared is relevant to the controlling interest determination under paragraph

(f) of this section. FC also has a controlling interest in Y under paragraph (f)(2)(iii) of this section because Y would have been included on FC's consolidated financial statement under the applicable financial accounting standard (GAAP) but for being excluded because Y was held for sale, and therefore FC would have had a controlling interest under the applicable financial accounting standard (GAAP) but for the exclusion. Therefore, for purposes of this section, FC has a controlling interest in X and Y.

(4) *Example 4: Determining the members of an FPMG—(i) Facts.* FC is a foreign corporation. FC has a controlling interest under paragraph (f)(1) of this section in X and A and under paragraph (f)(2)(iii) of this section in B and C. No entity has a controlling interest in FC, and FC does not have any controlling interests other than those specified. In addition, B is part of a section 52 group that includes B, D, and E, and B owns an interest in each of D and E. X is a domestic corporation.

(ii) *Analysis—(A) FPMG membership determined without regard to paragraph (f)(2)(ii) of this section.* In determining whether an upper-tier entity has a controlling interest in a lower-tier entity, paragraph (f)(2)(ii) of this section applies only if the upper-tier entity is a member of an FPMG without regard to paragraph (f)(2)(ii) of this section. Accordingly, the first step in determining whether an upper-tier entity may have a controlling interest in a lower-tier entity under paragraph (f)(2)(ii) of this section is to determine whether the upper-tier entity is a member of an FPMG without regard to paragraph (f)(2)(ii) of this section. Without regard to paragraph (f)(2)(ii) of this section, FC is the ultimate parent under paragraph (b)(12) of this section because FC has a controlling interest in X, A, B, and C and no entity has a controlling interest in FC. Because FC is the ultimate parent and a foreign corporation, it is the FPMG common parent under paragraph (b)(9) of this section. Under paragraph (h) of this section, FC, X, A, B, and C are included in the same applicable financial statement for that taxable year because FC is the FPMG common parent and has a controlling interest in X, A, B, and C. There is an FPMG because the requirements of paragraph (c) of this section are satisfied: there is at least one domestic corporation (X) and at least one foreign corporation (FC); the entities are included in the same applicable financial statement for that taxable year; and FC is an FPMG common parent. The members of the FPMG under

paragraph (i) of this section are FC, X, A, B, and C.

(B) *FPMG membership determined taking into account paragraph (f)(2)(ii) of this section.* After determining if there is an FPMG and the members of the FPMG without regard to paragraph (f)(2)(ii) of this section, paragraph (f)(2)(ii) of this section needs to be taken into account to determine whether there are any additional members. Under paragraphs (f)(2)(ii) and (f)(3) of this section, if an entity is owned by a member of the FPMG without regard to paragraph (f)(2)(ii) of this section, is part of the same section 52 group, and the FPMG member directly or indirectly owns an interest in the entity, the FPMG common parent will have a controlling interest in the entity. B is a member of the FPMG without regard to paragraph (f)(2)(ii) of this section. B is in the same section 52 group as D and E. B owns an interest in D and E. Consequently, FC has a controlling interest in D and E under paragraphs (f)(2)(ii) and (f)(3) of this section. As a result, because all entities in which the FPMG common parent has a controlling interest are included in the same applicable financial statement for that taxable year under paragraph (h) of this section, D and E are included in the same applicable financial statement for that taxable year as FC, X, A, B, and C. Therefore, the members of the FPMG under paragraph (i) of this section are FC, X, A, B, C, D, and E. This result is not dependent on which entity is being tested for applicable corporation status.

(5) *Example 5: Determining the applicable financial accounting standard*—(i) *Facts.* X, a domestic corporation, is the corporation who is being tested for applicable corporation status. X owns interests in A and B. X is owned by FC, a foreign corporation, and FC owns interests in other entities. Country A is a foreign country. FC is listed on a stock exchange in Country A and required to file a consolidated financial statement of FC under the generally accepted accounting principles of Country A (Country A Accounting Standard) with the agency of Country A that is equivalent to the United States Securities and Exchange Commission (SEC) (Agency A). FC files the required audited consolidated financial statement that is certified (within the meaning of § 1.56A–3(d)) with Agency A. FC is the ultimate parent under Country A Accounting Standard. In addition, an audited consolidated financial statement is prepared in accordance with GAAP that is certified (within the meaning of § 1.56A–3(d)) and includes the assets, liabilities, equity, income, and expenses

of only X, A, and B. Under GAAP, the ultimate parent is FC. Further, an audited consolidated financial statement is prepared in accordance with IFRS that is certified (within the meaning of § 1.56A–3(d)) and includes the assets, liabilities, equity, income, and expenses of X; however, it is not filed with the SEC or an agency of a foreign government that is equivalent to the SEC. The financial statements described in this paragraph (j)(5) are the only consolidated financial statements that are prepared that include the assets, liabilities, equity, income, and expenses of X.

(ii) *Analysis.* Unless an exception applies, the applicable financial accounting standard is GAAP. If there is a GAAP consolidated financial statement that meets the description in the last sentence of paragraph (g)(2)(i) of this section, then none of the exceptions in paragraph (g)(2) of this section can apply and therefore the default rule in paragraph (g)(1) of this section that the applicable financial accounting standard is GAAP applies. As FC is the ultimate parent under GAAP and there is not a GAAP consolidated financial statement that includes the assets, liabilities, equity, income, and expenses of FC, an exception may apply. As provided in paragraph (g)(2)(i) of this section, the exceptions apply in descending order. Therefore, the exception in paragraph (g)(2)(ii) of this section is tested first. In this case, there is not an IFRS consolidated financial statement that is described in § 1.56A–2(c)(2)(i) because the IFRS consolidated financial statement is not filed with the SEC or an agency of a foreign government that is equivalent to the SEC. Because the exception in paragraph (g)(2)(ii) of this section does not apply, the exception in paragraph (g)(2)(iii)(A) of this section is tested next. There is only one consolidated financial statement described in § 1.56A–2(c)(3)(i), and that consolidated financial statement is filed with Agency A and is of FC, the ultimate parent under Country A Accounting Standard. As a result, the exception applies, and the applicable financial accounting standard is Country A Accounting Standard.

(k) *Applicability date.* This section applies to taxable years of the corporation determining its applicable corporation status ending after September 13, 2024.

§ 1.59–4 CAMT foreign tax credit.

(a) *Overview.* This section provides rules under section 59(l) of the Code for computing the CAMT foreign tax credit, as defined in proposed § 1.56A–1(b)(9). Paragraph (b) of this section provides

definitions that apply for purposes of this section. Paragraph (c) of this section describes how to compute the CAMT foreign tax credit. Paragraph (d) of this section provides rules for determining an applicable corporation's pro rata share of taxes of a controlled foreign corporation. Paragraph (e) of this section provides for the carryover of unused CFC taxes. Paragraph (f) of this section provides rules for foreign tax redeterminations. Paragraph (g) of this section describes the treatment of partnership taxes. Paragraph (h) of this section describes the treatment of members of a tax consolidated group for purposes of this section. Paragraph (i) provides examples illustrating the application of the rules in this section. Paragraph (j) of this section provides the applicability dates of this section.

(b) *Definitions.* The following definitions apply for purposes of this section. Terms used in this section that are not defined in this section have the meanings provided in § 1.56A–1(b).

(1) *Eligible tax.* The term *eligible tax* means a foreign income tax, other than a foreign income tax for which a credit is disallowed or suspended for regular tax purposes under section 245A(d), 245A(e)(3), 901(e), 901(f), 901(i), 901(j), 901(k), 901(l), 901(m), 907, 908, 909, 965(g), 999, or 6038(c) of the Code.

(2) *Income group.* The term *income group* has the meaning provided in § 1.960–1(b)(13).

(3) *Pro rata share percentage.* The term *pro rata share percentage* means, with respect to a controlled foreign corporation in which an applicable corporation is a United States shareholder and a taxable year of the controlled foreign corporation, a fraction, the numerator of which is the applicable corporation's pro rata share of the adjusted net income or loss of the controlled foreign corporation, as determined under § 1.56A–6, for its taxable year, and the denominator of which is the adjusted net income or loss of the controlled foreign corporation for its taxable year.

(4) *Residual income group.* The term *residual income group* has the meaning provided in § 1.960–1(b)(22).

(5) *Section 904 category.* The term *section 904 category* has the meaning provided in § 1.960–1(b)(23).

(6) *Subpart F income group.* The term *subpart F income group* has the meaning provided in § 1.960–1(b)(31).

(7) *Tested income group.* The term *tested income group* has the meaning provided in § 1.960–1(b)(34).

(8) *Unused CFC taxes.* The term *unused CFC taxes* means, with respect to any taxable year of an applicable corporation, the excess (if any) of the

amount described in paragraph (c)(1)(i) of this section for the taxable year, over the amount described in paragraph (c)(1)(ii) of this section for the taxable year.

(c) *Computation of CAMT foreign tax credit.* If an applicable corporation chooses to have the benefits of subpart A of part III of subchapter N of chapter 1 for a taxable year, the amount of the CAMT foreign tax credit allowed to the applicable corporation under section 59(l) for the taxable year equals the sum of—

(1) The lesser of—

(i) The aggregate of the applicable corporation's pro rata shares of taxes of controlled foreign corporations, as determined under paragraph (d) of this section; or

(ii) The product of the amount of the adjustment under § 1.56A–6(b)(1) and the percentage specified in section 55(b)(2)(A)(i) of the Code; and

(2) The amount of eligible taxes paid, within the meaning of § 1.901–2(g)(5), by the applicable corporation during the taxable year, to the extent the taxes have been taken into account, within the meaning of § 1.56A–8(d), on the applicable corporation's AFS.

(d) *Applicable corporation's pro rata share of taxes of a controlled foreign corporation—(1) In general.* If an applicable corporation is a United States shareholder of a controlled foreign corporation, the applicable corporation's pro rata share of the taxes of the controlled foreign corporation for a taxable year is equal to the sum of the amounts described in paragraphs (d)(2) and (3) of this section, reduced to reflect the suspensions and disallowances described in paragraph (b)(1) of this section that apply at the level of the United States shareholder.

(2) *Aggregate pro rata share of taxes under section 960(b) of the Code.* The amount described in this paragraph (d)(2) is equal to the sum of the amount of foreign income taxes deemed paid by the applicable corporation under § 1.960–3(b) for the taxable year of the applicable corporation, to the extent the taxes have been taken into account, within the meaning of § 1.56A–8(d), on the AFS of the applicable corporation or any controlled foreign corporation with respect to which the applicable corporation is a United States shareholder.

(3) *Aggregate pro rata share of the eligible current year taxes.* The amount described in this paragraph (d)(3) is equal to the sum of—

(i) The amount of eligible current year taxes, as defined in § 1.960–1(b)(5), deemed paid by the applicable corporation under § 1.960–2(b) for the

taxable year of the applicable corporation, to the extent the taxes have been taken into account, within the meaning of § 1.56A–8(d), on the AFS of the controlled foreign corporation or the applicable corporation;

(ii) The aggregate of the applicable corporation's proportionate share of eligible current year taxes, as defined in § 1.960–1(b)(5), of the controlled foreign corporation for each tested income group within each section 904 category of the controlled foreign corporation, as determined under § 1.960–2(c)(5) for the taxable year of the applicable corporation, to the extent the taxes have been taken into account, within the meaning of § 1.56A–8(d), on the AFS of the controlled foreign corporation or applicable corporation;

(iii) Solely with respect to any subpart F income group and tested income group within a section 904 category of the controlled foreign corporation for which the denominator of the applicable corporation's proportionate share fraction (as described in § 1.960–2(b)(3)(i) and (c)(5), respectively) is zero or less than zero, the aggregate amount of eligible current year taxes of the controlled foreign corporation for each such income group within each section 904 category of the controlled foreign corporation, for the controlled foreign corporation's taxable year that ends with or within the taxable year of the applicable corporation, to the extent the taxes have been taken into account, within the meaning of § 1.56A–8(d), on the AFS of the controlled foreign corporation or applicable corporation, multiplied by the pro rata share percentage, as defined in paragraph (b)(3) of this section, for such taxable year of the controlled foreign corporation; and

(iv) The aggregate amount of eligible current year taxes, as defined in § 1.960–1(b)(5), of the controlled foreign corporation for each residual income group, as defined in § 1.960–1(d)(2)(ii)(D), of the controlled foreign corporation, for the controlled foreign corporation's taxable year that ends with or within the taxable year of the applicable corporation, to the extent the taxes have been taken into account, within the meaning of § 1.56A–8(d), on the AFS of the controlled foreign corporation or applicable corporation, multiplied by the pro rata share percentage, as defined in paragraph (b)(3) of this section, for such taxable year of the controlled foreign corporation.

(e) *Carryover of unused CFC taxes—*

(1) *In general.* If an applicable corporation chooses to have the benefits of subpart A of part III of subchapter N

of chapter 1 for a taxable year, any unused CFC taxes for the taxable year are carried to each of the five succeeding taxable years, in chronological order, to increase the amount described in paragraph (c)(1)(i) of this section, but only to the extent not absorbed as taxes deemed paid under paragraph (e)(2) of this section in a prior taxable year. The amount of taxes deemed paid under paragraph (e)(2) of this section in a carryover taxable year is absorbed regardless of whether the taxpayer chooses to have the benefits of subpart A of part III of subchapter N of chapter 1 for the carryover taxable year.

(2) *Amount of unused CFC taxes deemed paid in a carryover taxable year.* The amount of unused CFC taxes deemed paid in any taxable year is equal to the lesser of—

(i) The amount of unused CFC taxes that are carried to the taxable year under paragraph (e)(1) of this section; or

(ii) The excess (if any) of the amount described in paragraph (c)(1)(ii) of this section for the taxable year over the amount described in paragraph (c)(1)(i) of this section for the taxable year.

(3) *Ordering rule.* If, as a result of the limitation in paragraph (e)(2)(ii) of this section, the amount of unused CFC taxes deemed paid under paragraph (e)(2) of this section is less than the full amount of unused CFC taxes that are carried to the taxable year under paragraph (e)(1) of this section, then the unused CFC taxes that are absorbed as deemed paid under paragraph (e)(2) of this section are first the unused CFC taxes from the fifth preceding taxable year, followed sequentially by the unused CFC taxes from the fourth, third, second, and first preceding taxable year, respectively, up to the amount described in paragraph (e)(2)(ii) of this section.

(f) *Foreign tax redetermination.*

Foreign income taxes paid or accrued as a result of a foreign tax redetermination, as defined in § 1.905–3(a), are eligible to be claimed as a CAMT foreign tax credit only if the domestic corporation is an applicable corporation in the taxable year to which the foreign tax redetermination relates (relation-back year). A CAMT foreign tax credit with respect to such foreign income taxes may be claimed only in the relation-back year, even if the taxes are reflected in a journal entry of an AFS within a taxable year that is later than the relation-back year.

(g) *Treatment of partnership taxes.* For purposes of paragraph (c)(2) of this section, if an applicable corporation is a partner in a partnership (or an indirect partner in the partnership through one or more other partnerships or other

pass-through entities), the amount of eligible taxes paid or accrued by the applicable corporation for the taxable year includes the amount of creditable foreign tax expenditures (within the meaning of § 1.704–1(b)(4)(viii)) allocated to the applicable corporation for regular tax purposes, reduced to reflect the suspensions and disallowances described in paragraph (b)(1) of this section that apply at the level of the partner.

(h) *Tax consolidated groups.* Members of a tax consolidated group are treated as a single entity for purposes of this section. *See also* § 1.1502–56A(a)(2). For rules regarding the use of consolidated unused CFC taxes, *see* § 1.1502–56A(i).

(i) *Examples.* The following examples illustrate the application of the rules in this section. For purposes of these examples, each entity uses the calendar year as its taxable year and for AFS purposes and has a U.S. dollar functional currency.

(1) *Example 1: Eligible tax—(i) Facts.* X is an applicable corporation for its taxable year ending on December 31, 2024. In 2024, X paid \$100x of foreign withholding taxes on dividend payments received on stock in a foreign corporation that X holds for investment purposes. For regular tax purposes, a foreign tax credit is disallowed for the \$100x of foreign withholding taxes because X's holding period in the stock did not meet the minimum holding period required under section 901(k).

(ii) *Analysis.* Under paragraph (b)(1) of this section, X's eligible taxes for CAMT foreign tax credit purposes do not include the \$100x of foreign withholding taxes for which a credit is disallowed for regular tax purposes under section 901(k).

(2) *Example 2: Pro rata share of taxes of a controlled foreign corporation—(i) Facts.* X, a domestic corporation, is an applicable corporation for its taxable year ending on December 31, 2024. X owns 60% of the stock of FC, a controlled foreign corporation. X's pro rata share percentage, as defined in paragraph (b)(3) of this section, with respect to FC is also 60%. FC earns subpart F income, tested income, and residual income. In 2024, X is deemed to pay \$4x of foreign income tax under § 1.960–2(b) with respect to the subpart F income. In 2024, X's proportionate share, as defined in § 1.960–2(c)(5), of eligible current year taxes of FC for the tested income group of FC is \$4x. In 2024, FC has \$2x of eligible current year taxes in the residual income group. All the taxes paid by FC in 2024 are eligible current year taxes, as defined in § 1.960–1(b)(5). All the taxes paid by FC in 2024 are also eligible taxes within the

meaning of paragraph (b)(1) of this section, and no suspensions or disallowances described in paragraph (b)(1) of this section apply at the level of X, the United States shareholder of FC. Finally, all the taxes paid by FC in 2024 are taken into account, within the meaning of § 1.56A–8(d), in the 2024 AFS of FC or X.

(ii) *Analysis.* Under paragraph (d)(3) of this section, X's aggregate pro rata share of FC's eligible current year taxes is \$9.2x. This includes the \$4x of foreign income tax X is deemed to pay under § 1.960–2(b), X's \$4x proportionate share of eligible current year taxes of FC for the tested income group of FC, and X's \$1.2x pro rata share of eligible current year taxes of FC in the residual income group ($60\% \times \$2x$).

(3) *Example 3: Partnership taxes—(i) Facts.* X, a domestic corporation, is an applicable corporation for its taxable year ending on December 31, 2024. In 2024, X is a partner in PRS, a domestic partnership that uses the calendar year as its taxable year. In 2024, PRS paid \$300x of foreign income taxes to Country G, which PRS accounted for as a current tax expense in its AFS. The \$300x of foreign income taxes paid to Country G are creditable foreign tax expenditures (within the meaning of § 1.704–1(b)(4)(viii)) of PRS, \$180x of which are allocated to X for regular tax purposes. None of the suspensions or disallowances described in paragraph (b)(1) of this section apply at the level of X.

(ii) *Analysis.* Under paragraph (g) of this section, the amount of eligible taxes paid by X for purposes of computing the amount of CAMT foreign tax credit under paragraph (c)(2) of this section includes \$180x of creditable foreign tax expenditures of PRS that are allocated to X for regular tax purposes. Under § 1.56A–8(d)(3), the foreign income taxes taken into account in the AFS of PRS are considered taken into account in the AFS of X.

(j) *Applicability date.* This section applies to taxable years of applicable corporations ending after September 13, 2024.

■ **Par. 11.** Add an undesignated center heading to read “Base Erosion and Anti-Abuse Tax” above § 1.59A–0.

■ **Par. 12.** Section 1.1502–2 is amended:

■ a. In paragraph (a)(8), by removing the word “and” at the end of the paragraph;

■ b. In paragraph (a)(9), by removing the period from the end of the paragraph and adding “; and” in its place;

■ c. Adding paragraph (a)(10); and

■ d. Revising paragraph (d).

The addition and revision read as follows:

§ 1.1502–2 Computation of tax liability.

(a) * * *

(10) The alternative minimum tax imposed by section 55(a).

* * * * *

(d) *Applicability date—(1) In general.* Paragraphs (a)(1) through (9), (b), and (c) of this section apply to taxable years for which the original consolidated Federal income tax return is due (without extension) after December 6, 2019.

(2) *Paragraph (a)(10) of this section.* Paragraph (a)(10) of this section applies to taxable years for which the original consolidated Federal income tax return is due (without extension) after [DATE OF PUBLICATION OF FINAL RULE IN THE FEDERAL REGISTER].

§ 1.1502–3 [Amended]

■ **Par. 13.** Section 1.1502–3 is amended by removing and reserving paragraph (d)(4).

■ **Par. 14.** Section 1.1502–53 is added to read as follows:

§ 1.1502–53 Consolidated minimum tax credit.

(a) *Overview.* Subject to section 53 of the Code and paragraph (b) of this section, a group's consolidated minimum tax credit is allowed under this section against the group's consolidated liability for tax with respect to consolidated return years after the group's first consolidated return year beginning after 2022. Paragraph (c) of this section provides rules regarding separate return year minimum tax credits arising in separate return limitation years after the first separate return limitation year beginning after 2022. Paragraph (d) of this section provides rules regarding the allocation of the consolidated MTC to a corporation that ceases to be a member (and thus may be carried to the member's separate return years). Paragraph (e) of this section provides the date of applicability.

(b) *Consolidated MTC—(1)*

Definitions. The definitions in § 1.1502–56A(b) apply for purposes of this section, with the following additions:

(i) *Consolidated MTC.* The term *consolidated MTC* means the MTC that is attributable to a tax consolidated group's CAMT liability under section 55 of the Code.

(ii) *MTC.* The term *MTC* means the minimum tax credit, within the meaning of section 53(b) of the Code (as modified by section 53(e)).

(2) *Consolidated MTC earned in taxable year.* For any consolidated return year beginning after 2022, the consolidated MTC earned in the taxable year is the tax imposed on the tax

consolidated group by section 55(a) for the taxable year.

(3) *MTC allowed for a taxable year.* Subject to the limitations in paragraphs (b)(5) and (c) of this section, the credit allowed to the tax consolidated group for a taxable year equals the sum of the consolidated MTCs of the group and the separate year MTCs of members of the group for earlier taxable years to the extent they have not been absorbed in earlier years. See paragraph (b)(4) of this section.

(4) *Absorption of MTCs.* For purposes of determining the amount, if any, of an unused credit (whether consolidated or separate) that can be allowed in a taxable year (consolidated or separate), the amount of such unused credit that is absorbed in a prior consolidated return year is determined by:

(i) Applying all unused credits that can be carried to such prior year in the order of the taxable years in which such unused credits arose, beginning with the taxable year which ends earliest; and

(ii) Applying all such unused credits that can be carried to such prior year from taxable years ending on the same date on a pro rata basis.

(5) *Limitation.* Under section 53(c), the MTC allowed for any consolidated return year cannot exceed the excess (if any) of—

(i) The group's consolidated regular tax liability for such consolidated return year reduced by the sum of the credits allowable under subparts B, D, E, and F of part IV of subchapter A of chapter 1 of the Code, increased by the amount of tax imposed under section 59A of the Code for the consolidated return year; over

(ii) The group's consolidated tentative minimum tax for the consolidated return year.

(c) *Separate return year MTC—(1) Limitation on portion of separate return year MTC arising in separate return limitation years.* The aggregate of a member's minimum tax credits arising in SRLYs that are included in the consolidated MTCs allowed for all consolidated return years of the group may not exceed—

(i) The aggregate for all consolidated return years of the member's contributions to the consolidated section 53(c) limitation for each consolidated return year (determined under paragraph (c)(2) of this section); reduced by

(ii) The aggregate of consolidated MTCs attributable to the member (determined in the manner provided in § 1.1502–56A(j)) that are absorbed in all consolidated return years (whether or not absorbed by the member).

(2) *Member's contribution to the consolidated section 53(c) limitation—*
(i) *Year in which CAMT is not incurred.* For a year in which consolidated regular tax liability is greater than consolidated tentative minimum tax, a member's contribution to the consolidated section 53(c) limitation for a consolidated return year equals the member's share of the consolidated regular tax liability minus its share of consolidated tentative minimum tax. The group computes the member's share of consolidated regular tax liability by applying to the respective consolidated amounts the principles of section 1552 and the percentage method under § 1.1502–33(d)(3), assuming a 100 percent allocation of any decreased tax liability. The group computes the member's share of consolidated tentative minimum tax by multiplying the consolidated tentative minimum tax by a fraction. The denominator of the fraction is the group's AFSI, and the numerator of the fraction is the member's positive separate AFSI as defined in § 1.1502–56A(j)(2).

(ii) *Year in which CAMT is incurred.* For a consolidated return year for which consolidated tentative minimum tax is greater than consolidated regular tax liability, the group reduces the member's aggregate contribution to the consolidated section 53(c) limitation by the member's share of the consolidated CAMT for the year as determined under § 1.1502–56A(j).

(iii) *Years included in computation.* For purposes of computing the member's contribution under this paragraph (c)(2), the consolidated return years of the group include only those years, including the year to which a credit is carried, that the member has been continuously included in the group's consolidated return, but exclude any years after the year to which the credit is carried.

(iv) *Subgroup principles.* The SRLY subgroup principles under § 1.1502–21(c)(2) apply for purposes of this paragraph (c)(2). The predecessor and successor principles under § 1.1502–21(f) also apply for purposes of this paragraph (c)(2).

(v) *Overlap with section 383.* The principles under § 1.1502–21(g) apply for purposes of this paragraph (c)(2). For example, an overlap of this paragraph (c)(2) and the application of section 383 of the Code with respect to a credit carryover occurs if a corporation becomes a member of a consolidated group (that is, the SRLY event) within six months of the change date of an ownership change giving rise to a section 383 credit limitation with respect to that carryover (that is, the

section 383 event), with the result that the limitation of this paragraph (c)(2) does not apply. See §§ 1.1502–21(g)(2)(ii)(A) and 1.383–1; see also § 1.1502–21(g)(4) (subgroup rules).

(d) *Carryovers of tax consolidated MTC to separate return years—(1) In general.* If any consolidated MTC that is attributable to a member may be carried to a separate return year of the member, the amount attributable to the member is apportioned to the member and carried to the separate return year. If carried over to a separate return year, the apportioned MTC may not be carried over to an equivalent, or later, consolidated return year of the group. The amount attributable to the member is determined in the manner provided in § 1.1502–56A(j) (with regard to allocation of CAMT liability).

(2) *Recomputed percentage.* If, for any reason, a member's portion of a consolidated MTC is absorbed or reduced on a non-pro rata basis, the percentage of the consolidated MTC attributable to each member is recomputed as provided in paragraph (d)(3) of this section. In addition, if a member with a separate MTC ceases to be a member, or if a member that ceases to be a member is allocated and apportioned MTC of the group under this paragraph (d)(2), the percentage of the consolidated MTC attributable to each remaining member is recomputed. For purposes of this paragraph (d)(2), an MTC that is permanently disallowed, eliminated, or reduced under section 108(b) of the Code or § 1.1502–28 is treated as absorbed.

(3) *Recomputation.* The recomputed percentage of the consolidated MTC attributable to each member equals the remaining MTC attributable to the member at the time of the recomputation, divided by the sum of the remaining MTC attributable to all of the remaining members at the time of the recomputation.

(4) *Example.* The following example illustrates the application of the rules in this paragraph (d).

(i) *Facts.* P, S, and T are members of the P tax consolidated group (P Group), which uses the calendar year as its taxable year. P, S, and T report their financial results on a tax consolidated group AFS. For 2024, if AFSI were computed by reference to only each member's items of income, expense, gain, and loss, P would have separate AFSI of \$1,000x, S would have a separate FSNOL of \$100x, and T would have separate AFSI of \$200x. The P Group has no regular tax liability, no liability for tax on base erosion payments under section 59A of the Code, and no CAMT foreign tax credit

for 2024. Thus, the P Group's AFSI for 2024 is \$1,100x, and the P Group's liability for the tentative minimum tax under section 55(b)(2)(A) is \$165x ($\$1,100x \times 15\% = \$165x$). On December 31, 2024, T is acquired by an unrelated party and ceases to be a member of the P Group.

(ii) *Analysis*. Of the P Group's tax consolidated MTC of \$165x, as determined under section 53(b), \$27.5x is apportioned to T ($(\$200x/(\$200x + \$1,000x)) \times \$165x = \$27.5x$), and \$137.5x remains to offset the P Group's regular income tax liability.

(e) *Applicability date*. This section applies to consolidated return years for which the due date of the income tax return (without extensions) is after [DATE OF PUBLICATION OF FINAL RULE IN THE FEDERAL REGISTER].

§ 1.1502–55 [Removed and Reserved]

■ **Par. 15.** Remove and reserve § 1.1502–55.

■ **Par. 16.** Section 1.1502–56A is added to read as follows.

§ 1.1502–56A Corporate alternative minimum tax.

(a) *Overview*—(1) *Scope*. This section provides rules for applying the corporate alternative minimum tax (CAMT) under sections 55, 56A, and 59(k) and (l) of the Internal Revenue Code (Code) to tax consolidated groups. Paragraph (b) of this section provides definitions that apply for purposes of this section. Paragraph (c) of this section provides rules for calculating the FSI of a tax consolidated group. Paragraph (d) of this section provides rules regarding the disposition of stock of a tax consolidated group member by another member. Paragraph (e) of this section provides rules regarding tax items relating to intercompany transactions (as defined in § 1.1502–13(b)(1)(i)). Paragraph (f) of this section provides rules regarding the use of financial statement net operating loss (FSNOL) carryovers. Paragraph (g) of this section provides a cross-reference to § 1.56A–23 for rules regarding the use of attributes from separate return years. Paragraph (h) of this section provides rules regarding the use of CFC adjustment carryovers. Paragraph (i) of this section provides rules regarding the use of consolidated unused CFC taxes. Paragraph (j) of this section provides rules regarding the allocation of the tentative minimum tax under section 55(b)(2)(A). Paragraph (k) of this section provides rules regarding the allocation of adjusted financial statement income (AFSI) when a corporation ceases to be a member of a tax consolidated group.

Paragraph (l) of this section provides the applicability date of this section.

(2) *General rule*. Except as otherwise provided in this section, for purposes of determining the AFSI of the tax consolidated group, the tentative minimum tax under section 55(b)(2)(A), and status as an applicable corporation under section 59(k), members of a tax consolidated group are treated as a single CAMT entity solely during the period in which those members are members of that tax consolidated group.

(b) *Definitions*. The following definitions apply for purposes of this section:

(1) *AFS*. The term *AFS* has the meaning given the term *applicable financial statement* (AFS) in § 1.56A–2(b). For special rules regarding the AFS of a tax consolidated group, *see* §§ 1.56A–1(c)(2)(i) and 1.56A–2(g).

(2) *AFSI*. The term *AFSI* has the meaning given the term *adjusted statement financial income* (AFSI) in § 1.56A–1(b)(1).

(3) *CAMT entity*. The term *CAMT entity* has the meaning given the term in § 1.56A–1(b)(8).

(4) *CFC adjustment carryover*. The term *CFC adjustment carryover* has the meaning given the term in § 1.56A–6(b).

(5) *Chapter 1; Code*—(i) *Chapter 1*. The term *chapter 1* means chapter 1 of subtitle A of the Code.

(ii) *Code*. The term *Code* means the Internal Revenue Code.

(6) *Consolidated FSNOL*. The term *consolidated FSNOL* means the portion of an FSNOL that is attributable to a tax consolidated group, as determined under paragraph (f) of this section.

(7) *FSI*. The term *FSI* has the meaning given the term *financial statement income* (FSI) in § 1.56A–1(b)(20).

(8) *FSNOL*. The term *FSNOL* has the meaning given the term *financial statement net operating loss* (FSNOL) in § 1.56A–23(b).

(9) *Section 56A regulations*. The term *section 56A regulations* means §§ 1.56A–1 through 1.56A–27 and this section.

(10) *Tax consolidated group*. The term *tax consolidated group* has the meaning given the term *consolidated group* in § 1.1502–1(h).

(11) *Tax consolidated group AFS*. The term *tax consolidated group AFS* means the AFS of a tax consolidated group and all its members, as determined under §§ 1.56A–1(c)(2)(i) and 1.56A–2(g). A tax consolidated group AFS may include one or more CAMT entities that are not members of the tax consolidated group.

(c) *Calculation of FSI of a tax consolidated group*. A tax consolidated group determines the group's FSI for a

taxable year based on the tax consolidated group AFS in the following manner:

(1) *AFS comprising solely tax consolidated group members*. If the financial statement group (including tax consolidated group members described in § 1.56A–1(c)(2)(i)) for which the tax consolidated group AFS for a taxable year is prepared includes only members of the tax consolidated group, the FSI of the tax consolidated group for the taxable year equals the consolidated FSI reflected on that AFS. *See* § 1.56A–1(c).

(2) *AFS comprising members and non-members*. If the financial statement group (including tax consolidated group members described in § 1.56A–1(c)(2)(i)) for which the tax consolidated group AFS for a taxable year is prepared includes one or more CAMT entities that are not members of the tax consolidated group, the tax consolidated group's FSI for the taxable year is determined from that AFS under § 1.56A–1(c)(3) by treating all members of the tax consolidated group as a single CAMT entity. Accordingly, for example, the FSI of the tax consolidated group is determined by:

(i) Disregarding each AFS consolidation entry regarding—

(A) A transaction between a member and a non-member;

(B) A member's investment in a non-member; and

(C) A non-member's investment in a member.

(ii) Taking into account each AFS consolidation entry regarding—

(A) A transaction between members; and

(B) A member's investment in another member.

(3) *Operating rules regarding AFS consolidation entries*. For purposes of determining the AFSI of a tax consolidated group for a taxable year:

(i) *Conditions for taking into account AFS consolidation entries*. The tax consolidated group takes into account each AFS consolidation entry that eliminates the effect of a transaction

between or among members of the group, provided that—

(A) Each member that was a party to the transaction, that continued to exist after the transaction, and that had effects from that transaction (or the member's successor in a section 381(a) transaction) continues to be a member of that tax consolidated group at the end of the group's taxable year; and

(B) All property that is the subject of the transaction continues to be held by the tax consolidated group at the end of the group's taxable year.

(ii) *Conditions for disregarding AFS consolidation entries and applying*

section 56A regulations. Except as provided in paragraph (c)(3)(ii)(C) of this section, to the extent that any requirement in paragraph (c)(3)(i) of this section is not satisfied at any time during the taxable year of the tax consolidated group, then on the earliest date on which that requirement is not satisfied certain AFS consolidation entries described in paragraph (c)(2)(i) of this section cease to be taken into account as provided in paragraphs (c)(3)(ii)(A) through (D) of this section, immediately before the earliest date that any requirement of paragraph (c)(3)(i) of this section is not satisfied.

(A) *Property ceases to be held by group.* If one or more pieces of property that were the subject of the transaction cease to be held by the tax consolidated group during the group's taxable year, any AFS consolidation entry described in paragraph (c)(2)(i) of this section that pertains to that property ceases to be taken into account immediately before that earliest date.

(B) *Party to the transaction ceases to be a member of group.* If a party to the transaction (or a successor to that member in a section 381(a) transaction) ceases to be a member of the tax consolidated group during the group's taxable year, then all AFS consolidation entries with regard to that party cease to be taken into account immediately before that earliest date.

(C) *Whole-group exception.* Paragraphs (c)(3)(ii)(A) and (B) of this section do not apply to the extent that § 1.1502–13(j)(5) applies to an acquisition of the tax consolidated group. Therefore, AFS consolidation entries continue to be taken into account.

(D) *Determination of CAMT consequences based on section 56A regulations.* If an AFS consolidation entry of a tax consolidated group ceases to be taken into account under paragraph (c)(3)(ii)(A) through (C) of this section, the CAMT consequences of the transaction(s) to which that AFS consolidation entry pertains are determined by applying the section 56A regulations. *See generally* § 1.56A–1.

(iii) *Example.* The rules of this paragraph (c)(3) are illustrated by the following example.

(A) *Facts.* P is the common parent of a tax consolidated group that uses the calendar year as its taxable year, of which S1, S2, and S3 are members (P group). S2 owns all of the stock of S3. On February 1, 2023, S3 merges into S1 in a transaction that qualifies as a reorganization under section 368(a)(1)(A) of the Code (Merger). In the Merger, S2 receives both S1 voting stock and cash. On December 31, 2024, P sells

S1 to X, a corporation unrelated to P or any member of P's tax consolidated group.

(B) *Analysis.* The Merger is a covered nonrecognition transaction. At the end of the P group's 2023 taxable year, S1 remains a member of the group, and no property transferred in the Merger has left the P group. As a result, under paragraph (c)(3)(i) of this section, any AFS consolidating entries related to the Merger continue to be given effect and the section 56A regulations do not apply to the Merger. At the end of the P group's 2024 taxable year, S1 is no longer a member of the P group. As a result, under paragraph (c)(3)(ii)(B) of this section, all AFS consolidating entries relating to the Merger cease to be taken into account immediately before S1 ceases to be a member of the P group, and, under paragraph (c)(3)(ii)(D) of this section, the CAMT consequences of the Merger are determined under the section 56A regulations. *See generally* § 1.56A–19(c) (providing the CAMT consequences of acquisitive reorganizations).

(4) *Captive partnership.* Treating a tax consolidated group as a single CAMT entity for purposes of this section does not change the Federal tax classification of an entity classified as a partnership owned solely by members of the group.

(5) *Examples.* The following examples illustrate the application of the rules in this paragraph (c). For purposes of these examples: each of P, S, B, and Z is a domestic corporation that uses the calendar year as its taxable year and has only one class of stock outstanding, and S and B are the sole subsidiary members of the P tax consolidated group (P Group).

(i) *Example 1: Tax consolidated group AFS that includes corporations other than tax consolidated group members—*

(A) *Facts.* P owns 60 percent of the stock of Z. The remaining stock of Z is held by unrelated persons. The financial results of corporations P, B, S, and Z are reported on a tax consolidated group AFS (PBSZ Consolidated AFS) for all relevant financial reporting periods. P, B, S, and Z are the only taxpayers whose financial results are reported on the PBSZ Consolidated AFS. Under § 1.56A–2(g), the PBSZ Consolidated AFS is the AFS of P, B, S, and Z. In 2024, B sells Asset N to S for \$10x. Books and records used to prepare the PBSZ Consolidated AFS, including trial balances, show that B has gain of \$2x (\$10x – \$8x) on the sale of Asset N. The \$2x of gain is eliminated from consolidated FSI through AFS consolidation entries made in preparing the PBSZ Consolidated AFS. In 2025, S sells Asset N to Z for \$13x. Books and

records used to prepare the PBSZ Consolidated AFS, including trial balances, show that S has gain of \$3x (\$13x – \$10x) on the sale of Asset N. The gain is eliminated from consolidated FSI through AFS consolidation entries made in preparing the PBSZ Consolidated AFS.

(B) *Analysis: In general.* The PBSZ Consolidated AFS includes items of Z, an entity that is not a member of the P Group. Therefore, the FSI of the P Group is determined under paragraph (c)(2) of this section. Under paragraph (c)(2) of this section, the P Group's FSI is determined from the PBSZ Consolidated AFS by treating the P Group as a single CAMT entity. Accordingly, AFS consolidation entries eliminating transactions between Z and a member of the P Group (that is, P, S, or B) are disregarded in determining the FSI of the P Group, (that is, such consolidation entries are reversed) but AFS consolidation entries eliminating transactions between P, S, and B are taken into account.

(C) *Analysis: 2024.* In 2024, because the AFS consolidation entries eliminate a transaction between S and B (that is, a transaction between members of the P Group), those consolidation entries are taken into account. *See* paragraph (c)(2)(ii)(A) of this section. Therefore, B's \$2x gain on the sale of Asset N to S is not included in the P Group's FSI in 2024.

(D) *Analysis: 2025.* In 2025, because the AFS consolidation entries eliminate a transaction between S (a member of the P Group) and Z (a CAMT entity that is not a member of the P Group), these AFS consolidation entries are disregarded (that is, these consolidation entries are reversed). In addition, because Asset N leaves the P Group in 2025, immediately before the sale of Asset N to Z, the consolidating entries between S and B are disregarded with regard to their transaction with regard to Asset N. *See* paragraph (c)(3) of this section. Therefore, the P Group's FSI in 2025 includes \$5x of gain on the sale of Asset N—\$2x of gain to B, and \$3x of gain to S.

(ii) *Example 2: Tax consolidated group AFS that includes solely tax consolidated group members; buying member leaves the group—*(A) *Facts.* The financial results of the members of the P Group are reported on the tax consolidated group AFS of the P Group (P Group AFS) for all relevant financial reporting periods. P, S, and B are the only entities whose financial results are reported on the P Group AFS. Under § 1.56A–2(g), the P Group AFS is the AFS of P, S, and B. Z is unrelated to the P Group. In 2024, S sells Asset N to B

for \$10x. Books and records used to prepare the P Group AFS, including trial balances, show that S has gain of \$2x on the sale of Asset N. The gain is eliminated from consolidated FSI through AFS consolidation entries made in preparing the P Group AFS. In 2025, P sells all the stock of B to Z, and B joins the Z consolidated AFS. At the time of the sale of its stock, B continues to hold Asset N, which has a value of \$13x.

(B) *Analysis: In general.* The P Group AFS includes items solely of members of the P Group. Therefore, the FSI of the P Group is determined under paragraph (c)(1) of this section to be the FSI reflected on the group's AFS for the taxable year. Under paragraph (a)(2) of this section, P, S, and B are treated as a single CAMT entity for purposes of computing the P Group's AFSI and liability for the tentative minimum tax under section 55(b)(2)(A).

(C) *Analysis: 2024.* In 2024, because the AFS consolidation entries eliminate a transaction between S and B (that is, a transaction between members of the P Group), those consolidation entries are taken into account. Therefore, S's \$2x of gain on the sale of Asset N is not included in the P Group's FSI in 2024.

(D) *Analysis: 2025.* In 2025, upon P's sale of all of the B stock to Z, B ceases to be a member of the P Group, and B's FSI ceases to be reflected in the P Group AFS. Because B ceases to be a member of the P Group, the AFS consolidation entries eliminating the sale of Asset N from S to B are disregarded (that is, these consolidation entries are reversed). See paragraph (c)(3) of this section. As a result, immediately before the sale of the B stock, S takes into account its \$2x of gain on its sale of Asset N to B. B carries Asset N into the Z consolidated AFS with a basis of \$10x, reflecting the reversal of the consolidating entries on the sale of Asset N. Compare § 1.56A-18(c)(3) (disregarding purchase accounting and push down accounting adjustments to AFS basis in assets resulting from stock acquisitions).

(iii) *Example 3: Tax consolidated group AFS that includes solely tax consolidated group members; selling member leaves the group.* The facts are the same as in paragraph (c)(5)(ii)(A) of this section (*Example 2*), except that, in 2025, P sells all the stock of S (rather than B) to Z. Consistent with the results described in paragraph (c)(5)(ii)(D) of this section, immediately before S leaves the P group, the consolidating entries relating to the sale of Asset N from S to B are disregarded (that is, the consolidating entries are reversed). Therefore, S's \$2x of gain is taken into account in determining the FSI of the P

Group for 2025. B's CAMT basis in Asset N equals \$10x.

(d) *Gain or loss on disposition of member stock by another member—(1) In general.* Notwithstanding paragraph (a)(2) of this section, the AFSI of a tax consolidated group for a taxable year includes gain or loss from one member's sale or exchange of stock of another member, as determined under this paragraph (d). For rules regarding the timing of the inclusion of the gain or loss, see paragraph (c) of this section.

(2) *Computation of gain or loss.* A tax consolidated group computes AFSI resulting from the sale or exchange of stock of one member by another member by—

(i) Applying the rules that otherwise apply to the sale or exchange under the section 56A regulations; and

(ii) Using the CAMT basis (as determined under paragraph (d)(3) of this section).

(3) *CAMT basis of member stock—(i) Stock held by group members on the first day of the first taxable year beginning after December 31, 2019.* The CAMT basis in a share of stock of a subsidiary member held by another member of a tax consolidated group (shareholder member) equals the sum of:

(A) The regular tax basis of the subsidiary member stock in the hands of the shareholder member on the first day of the shareholder member's first taxable year beginning after December 31, 2019 (see § 1.56A-18(c)(6));

(B) Any adjustments described in § 1.56A-18(c)(2); and

(C) Any adjustments described in paragraph (d)(3)(iii) of this section.

(ii) *Stock acquired by group members after the first day of the first taxable year beginning after December 31, 2019.* The CAMT basis in a share of stock of a subsidiary member acquired by a shareholder member from a taxpayer that is not a member of the same tax consolidated group equals the sum of:

(A) The CAMT basis of the subsidiary member stock immediately after the acquisition of that stock;

(B) Any adjustments described in § 1.56A-18(c)(2); and

(C) Any adjustments described in paragraph (d)(3)(iii) of this section.

(iii) *Adjustment to basis during consolidation—(A) In general.* CAMT stock basis is adjusted under this paragraph (d)(3)(iii) to take into account adjustments to the AFS basis of the member stock for the period during which the member was a member of a tax consolidated group (including adjustments to reflect all other adjustments to FSI in determining AFSI under the section 56A regulations).

(B) *Negative basis adjustments.* For purposes of this paragraph (d)(3)(iii), the CAMT basis of stock includes negative adjustments for expenses or losses of a member only to the extent that those items are absorbed by a member of the tax consolidated group under the section 56A regulations.

(e) *Tax items relating to intercompany transactions—(1) In general.* Certain AFSI adjustments under the section 56A regulations disregard items reflected in a CAMT entity's FSI and replace those items with items that are taken into account for regular tax purposes (regular tax items) (for example, under §§ 1.56A-15 and 1.56A-16). This paragraph (e) applies if the regular tax item relates to an intercompany transaction, in order to ensure that the regular tax item reflects the treatment of members of a tax consolidated group as divisions of a single corporation (single entity treatment) within the meaning of § 1.1502-13(a)(2). See also paragraph (a)(2) of this section.

(2) *Disregarding impact of intercompany transaction.* Except as provided in paragraph (e)(3) of this section, any increase or decrease in the amount of a regular tax item described in paragraph (e)(1) of this section that results from an intercompany transaction is disregarded for purposes of inclusion of the item in AFSI.

(3) *Acceleration of impact of intercompany transaction.* This paragraph (e)(3) applies if, pursuant to paragraph (c)(3)(ii) of this section, AFS consolidation entries related to an item described in paragraph (e)(1) of this section become disregarded. Under this paragraph (e)(3), immediately before the AFS consolidation entries become disregarded, AFSI of the tax consolidated group is increased or decreased by the regular tax items that previously were disregarded under paragraph (e)(2) of this section.

(4) *Examples.* The following examples illustrate the application of the rules in this paragraph (e). For purposes of these examples, S and B are members of the P consolidated group (P Group), which uses the calendar year as its taxable year.

(i) *Example 1: Intercompany sale—(A) Facts.* On January 1, 2024, S buys section 168 property (as defined in § 1.56A-15(b)(6)) for \$100x (Asset A) and depreciates it using the straight-line method and a 10-year recovery period for regular tax purposes. For AFS purposes, S depreciates Asset A over 20 years using the straight-line method. On January 1, 2026, S sells Asset A to B for \$130x and S recognizes a \$40x net gain for AFS purposes (\$130x consideration—\$90x AFS basis (\$100x cost—\$10x

accumulated book depreciation)). However, the P Group's AFS includes AFS consolidating entries that eliminate the effect of the sale of Asset A to B. For regular tax purposes, under section 168(i)(7) of the Code, B is treated as S to the extent B's \$130x basis does not exceed S's adjusted basis at the time of the sale. Accordingly, B takes a \$80x carryover basis (S's \$100x cost–S's \$20x accumulated tax depreciation) in Asset A and continues to depreciate the \$80x basis using S's depreciation methods. B has additional basis of \$50x in Asset A (\$130x consideration–\$80x section 168(i)(7) basis) which B treats as new 10-year recovery section 168 property and depreciates using the straight-line method. (To simplify the example, the half-year convention is disregarded by both S and B for AFS and regular tax purposes, and any depreciation on Asset A is not subject to capitalization under any other Code provision.)

(B) *Analysis.* Under § 1.56A–15(d)(1)(iii), covered book depreciation expense (as defined in § 1.56A–15(b)(3)) taken into account in FSI by S or B with respect to Asset A is disregarded in computing AFSI and replaced with deductible tax depreciation (as defined in § 1.56A–15(b)(5)). In each of 2024 and 2025, the P Group's AFSI therefore reflects S's \$10x of deductible tax depreciation from Asset A (\$100x cost/10 years). In 2026, for regular tax purposes, B takes into account \$15x of deductible tax depreciation from Asset A (\$10x under section 168(i)(7) + \$5x ((\$130x–\$80x)/10 years) relating to B's additional depreciable basis in Asset A). However, pursuant to paragraph (e)(2) of this section, the P Group's AFSI disregards the \$5x increase resulting from the intercompany transaction between S and B. Thus, the P Group's AFSI in 2026 reflects only \$10x of deductible tax depreciation from Asset A. Pursuant to paragraph (c)(2)(i) of this section, the P Group's AFSI for 2026 takes into account the AFS consolidation entries that eliminate the effect of the sale of Asset A to B and, pursuant to § 1.56A–15(e)(7), the P Group does not adjust AFSI for 2026 for S's AFSI adjustment determined under § 1.56A–15(e)(1) of \$10x (S's redetermined gain or loss from the sale of Asset A on January 1, 2026 of \$50x (\$130x consideration–\$80x CAMT basis (\$90x AFS basis + \$10x covered book depreciation expense–\$20x deductible tax depreciation) minus the \$40x net gain included in S's FSI prior to elimination). Accordingly, the P Group's AFSI in 2026 does not reflect any gain from the intercompany sale.

(ii) *Example 2: Sale of property to a non-member—(A) Facts.* The facts are

the same as in paragraph (e)(4)(i)(A) of this section (*Example 1*), except that, on January 1, 2028, B sells Asset A to non-member X for \$110x. As of January 1, 2028, B's accumulated book depreciation for Asset A is \$13x (computed using a recovery period of 20 years and the straight-line method), and B has an AFS basis in Asset A of \$117x (\$130x consideration–\$13x accumulated book depreciation). B's net loss included in FSI from the sale of Asset A to non-member X is \$7x (\$110x consideration–\$117x AFS basis). For regular tax purposes, as of January 1, 2028, B's accumulated deductible tax depreciation for Asset A is \$30x (\$20x under section 168(i)(7) + \$10x from B's additional depreciable basis in Asset A).

(B) *Analysis.* Under paragraph (c)(3)(ii) of this section, immediately before Asset A leaves the P Group, the AFS consolidating entries relating to the intercompany sale of Asset A on January 1, 2026, become disregarded for purposes of computing the P Group's AFSI for 2028. Therefore, S takes into account its \$40x net gain in FSI for 2028 and B takes into account its increased \$40x of basis in Asset A for AFS purposes from that intercompany sale immediately before Asset A leaves the P Group. Due to the \$40x net gain being included in FSI for 2028, pursuant to § 1.56A–15(e)(7), S redetermines its gain taken into account in FSI for 2028, and the P Group adjusts AFSI for 2028 for the difference between the net gain included in FSI and the redetermined gain or loss (computed as of January 1, 2026) under § 1.56A–15(e). Accordingly, the P Group's AFSI adjustment under § 1.56A–15(e) for 2028 is a positive adjustment of \$10x, which equals S's \$50x redetermined gain (\$130x consideration – \$80x CAMT basis (\$90x AFS basis + \$10x covered book depreciation expense – \$20x deductible tax depreciation)) minus the \$40x net gain in FSI. Additionally, under paragraph (e)(3) of this section, immediately before Asset A leaves the P Group, B takes into account in AFSI for 2028 the \$10x of deductible tax depreciation that was disregarded in 2026 and 2027 under paragraph (e)(2) of this section (\$5x + \$5x).

(iii) *Example 3: Buying member leaves the group—(A) Facts.* The facts are the

same as in paragraph (e)(4)(ii)(A) of this section (*Example 2*), except that, instead of selling Asset A, on January 1, 2028, all the stock of B is sold to non-member X, causing B to leave the P Group.

(B) *Analysis.* Under paragraph (c)(3)(ii) of this section, immediately before B leaves the P Group, the AFS consolidating entries relating to the intercompany sale of Asset A become disregarded for purposes of computing the P Group's AFSI. Therefore, S takes into account its \$40x net gain attributable to the sale of Asset A on January 1, 2026 in FSI for 2028 and B takes into account its increased \$40x of basis in Asset A for AFS purposes from that intercompany sale immediately before B leaves the P Group. Due to the \$40x net gain included in FSI for 2028, pursuant to § 1.56A–15(e)(7), S redetermines its gain taken into account in FSI with respect to Asset A, and the P Group adjusts AFSI for the difference between the net gain in FSI and the redetermined gain or loss (computed as of January 1, 2026) under § 1.56A–15(e). Accordingly, the P Group's AFSI adjustment under § 1.56A–15(e) for 2028 is a positive adjustment of \$10x, which equals S's \$50x redetermined gain (\$130x consideration – \$80x CAMT basis (\$90x AFS basis + \$10x covered book depreciation expense – \$20x deductible tax depreciation)) minus the \$40x net gain in FSI. Additionally, under paragraph (e)(3) of this section, immediately before B leaves the P Group, B takes into account in AFSI for 2028 the \$10x of deductible tax depreciation that was disregarded in 2026 and 2027 under paragraph (e)(2) of this section (\$5x + \$5x).

(f) *Use of FSNOL carryovers—(1) Amount of consolidated AFSI reduced.* Subject to the limitations under § 1.56A–23 and this paragraph (f), the amount of consolidated FSNOL carryovers of a tax consolidated group that can be used to reduce the AFSI of the group for any consolidated return year is the aggregate of the group's consolidated FSNOL carryovers to that year.

(2) *Composition of consolidated FSNOL carryovers.* The consolidated FSNOL carryovers described in paragraph (f)(1) of this section consist of—

(i) Any consolidated FSNOL of the tax consolidated group; and

(ii) Any FSNOLs of the members of the group arising in the respective separate return years (as defined in § 1.1502–1(e)) of those members (to the extent available for use under § 1.56A–23 and this section).

(3) *Application of 80-percent limitation—(i) Group application.* With

regard to a consolidated return year of a tax consolidated group, the 80-percent limitation under section 56A(d)(1) applies to the consolidated AFSI of the group for that year.

(ii) *Group limitation.* The amount of FSNOL that a tax consolidated group can use to reduce the AFSI of the group for a consolidated return year equals the lesser of—

(A) The aggregate amount of FSNOLs carried to that consolidated return year; or

(B) The amount determined by multiplying 80 percent by the consolidated AFSI for the group for that year, computed without regard to the FSNOL deduction allowable under section 56A(d).

(4) *General ordering rules for use of FSNOLs*—(i) *Taxable year in which FSNOL arose.* Except as provided in paragraph (f)(4)(ii) of this section, FSNOLs permitted to be used by a tax consolidated group to reduce the AFSI of the group in its consolidated return year are used to reduce the group's AFSI in the order of the taxable years in which the FSNOLs arose.

(ii) *FSNOLs carried from same taxable year.* Except as otherwise provided in paragraph (f)(5) of this section, FSNOLs carried from taxable years ending on the same date, and that are available to reduce the AFSI of the tax consolidated group for the consolidated return year, are used to reduce the group's AFSI on a pro rata basis.

(iii) *Apportionment of consolidated FSNOL.* Except as otherwise provided in paragraph (f)(5) of this section, the amount of any consolidated FSNOL absorbed by a tax consolidated group in any year is apportioned among members based on the percentage of the FSNOL eligible for carryover that is attributable to each member and is available for absorption. The percentage of the consolidated FSNOL attributable to a member is determined pursuant to paragraph (f)(5)(iv) of this section.

(iv) *Certain adjustments to CAMT basis of member stock.* For rules regarding adjustments to the CAMT basis of member stock resulting from the absorption of loss, see paragraph (d)(3)(ii) of this section.

(5) *Carryovers of FSNOLs to separate return years*—(i) *In general.* If any consolidated FSNOL that is attributable to a member may be carried to a separate return year of the member, the amount of the FSNOL that is attributable to the member is apportioned to the member and carried to the separate return year. If carried over to a separate return year of the member, the apportioned loss may not

be carried over to an equivalent, or later, consolidated return year of the group.

(ii) *Special rules*—(A) *Year of departure from group.* If a corporation ceases to be a member of a group during a consolidated return year of the group, consolidated FSNOL carryovers attributable to the corporation are first carried to the consolidated return year. Only the amount of consolidated FSNOL carryover that is not absorbed by the group in that year may be carried to the corporation's first separate return year.

(B) *Equivalent years.* Taxable years are equivalent if they bear the same numerical relationship to the consolidated return year in which a consolidated FSNOL arises, counting forward or backward from the year in which the FSNOL arose.

(C) *Short years in connection with transactions to which section 381(a) of the Code applies.* If a member distributes or transfers assets to a corporation that is a member immediately after the distribution or transfer in a transaction to which section 381(a) applies, the transaction does not cause the distributor or transferor to have a short year within the consolidated return year of the group in which the transaction occurred that is counted as a separate year for purposes of determining the years to which a consolidated FSNOL may be carried.

(iii) *Amount of FSNOL attributable to a member.* The amount of a consolidated FSNOL of a tax consolidated group that is attributable to a member equals the product obtained by multiplying the consolidated FSNOL and the percentage of the FSNOL attributable to the member.

(iv) *Percentage of FSNOL attributable to a member*—(A) *In general.* Except as provided in paragraph (f)(5)(iv)(C) of this section, the percentage of the consolidated FSNOL for the consolidated return year attributable to a member equals the separate FSNOL of the member for the consolidated return year divided by the sum of the separate FSNOLs for that year of all members having FSNOLs for that year.

(B) *Separate FSNOL.* For purposes of paragraph (f)(5)(iv)(A) of this section, the separate FSNOL of a member is determined by computing the FSNOL by reference to only the member's items of income, expense, gain, and loss, including the member's losses and expenses actually absorbed by the group in the consolidated return year (whether or not absorbed by the member).

(C) *Recomputed percentage.* If, for any reason, a member's portion of a consolidated FSNOL is absorbed or

reduced on a non-pro rata basis, the percentage of the consolidated FSNOL attributable to each member is recomputed as provided in paragraph (f)(5)(iv)(D) of this section. In addition, if a member with a separate FSNOL ceases to be a member, or if a member that ceases to be a member is allocated and apportioned FSNOL of the group under this paragraph (f)(5), the percentage of the consolidated FSNOL attributable to each remaining member is recomputed. For purposes of this paragraph (f)(5)(iv), an FSNOL that is permanently disallowed, eliminated, or reduced under § 1.56A-21(c)(5) and (6) is treated as absorbed.

(D) *Recomputation.* The recomputed percentage of the consolidated FSNOL attributable to each member equals the remaining FSNOL attributable to the member at the time of the recomputation divided by the sum of the remaining FSNOL attributable to all of the remaining members at the time of the recomputation.

(6) *Example.* The following example illustrates the application of the rules in this paragraph (f).

(i) *Facts.* P, M1, M2, and M3 are members of the P tax consolidated group (P Group), which uses the calendar year as its taxable year. P, M1, M2, and M3 report their financial results on a tax consolidated group AFS. In 2026, the P Group generates an FSNOL of \$55x, computed by the P Group as a single CAMT entity. See paragraph (a)(2) of this section. In that year, P has a separate FSNOL of \$40x, M1 has separate AFSI of \$10x, M2 has a separate FSNOL of \$20x, and M3 has a separate FSNOL of \$5x. On December 31, 2026, M2 ceases to be a member of the P group, but M2's FSI continues to be reported on P's consolidated AFS.

(ii) *Analysis: Allocation and apportionment of FSNOL.* Under paragraph (f)(5) of this section, a portion of the P Group's \$55x FSNOL is apportioned to M2 because M2 ceases to be a member of the P Group. Specifically, \$16.9x of FSNOL is apportioned to M2 ($(\$20x/(\$20x + \$40x + \$5x)) \times \$55x = \$16.9x$). See paragraphs (f)(5)(iii) and (f)(5)(iv)(A) and (B) of this section. The remaining \$38.1x of FSNOL remains with the P Group.

(iii) *Analysis: Year of departure from group.* Under paragraph (f)(5)(iv)(C) of this section, the percentages of the remaining FSNOL attributable to P and to M3 are recomputed when M2 ceases to be a member of the P Group. The recomputed percentage attributable to P is 89% ($\$40x/(\$40x + \$5x) = 89\%$), and the recomputed percentage attributable to M3 is 11% ($\$5x/(\$40x + \$5x) = 11\%$).

The result would be the same if M2's FSI had ceased to be reported on P's consolidated AFS in 2027.

(g) *Limitation on the use of attributes from separate return years.* For the use of FSNOLs, built-in losses, and other attributes generated in separate return years, see § 1.56A–23(e) through (g) and paragraphs (h) and (i) of this section.

(h) *Use of CFC adjustment carryovers of a tax consolidated group—(1) Amount of consolidated § 1.56A–6(b)(1) adjustment reduced.* Subject to the limitations under § 1.56A–6 and this paragraph (h), the amount of CFC adjustment carryovers of a tax consolidated group that can be used to reduce the group's adjustment to AFSI under § 1.56A–6(b)(1) is the aggregate of the group's consolidated CFC adjustment carryovers to that year.

(2) *Composition of consolidated CFC adjustment carryovers.* The consolidated CFC adjustment carryovers described in paragraph (h)(1) of this section consist of—

(i) Any consolidated CFC adjustment carryovers of the tax consolidated group; and

(ii) Any CFC adjustment carryovers of the members of the group arising in the respective separate return years (as defined in § 1.1502–1(e)) of those members to the extent available for use under § 1.56A–6 and this section.

(3) *Limitation on use of CFC adjustment carryovers.* In any consolidated return year, the aggregate amount of CFC adjustment carryovers from all separate return years of a member of a tax consolidated group that can be used to reduce the group's adjustment to AFSI under § 1.56A–6(b)(1) cannot exceed the adjustment to AFSI under § 1.56A–6(b)(1) generated by the member.

(4) *General ordering rules for use of CFC adjustment carryovers—(i) Taxable year in which CFC adjustment carryover arose.* Except as provided in paragraph (h)(4)(ii) of this section, CFC adjustment carryovers permitted to be used by a tax consolidated group to reduce the group's adjustment to AFSI under § 1.56A–6(b)(1) in its consolidated return year are used in the order of the taxable years in which the CFC adjustment carryovers arose.

(ii) *CFC adjustment carryovers carried from same taxable year.* Except as otherwise provided in paragraph (h)(5) of this section, CFC adjustment carryovers carried from taxable years ending on the same date, and that are available to reduce the tax consolidated group's adjustment to AFSI under § 1.56A–6(b)(1) for the consolidated return year, are used to reduce the

group's adjustment to AFSI under § 1.56A–6(b)(1) on a pro rata basis.

(iii) *Apportionment of consolidated CFC adjustment carryovers.* Except as otherwise provided in paragraph (h)(5) of this section, the amount of any consolidated CFC adjustment carryover absorbed by a tax consolidated group in any year is apportioned among members based on the percentage of the consolidated CFC adjustment carryover that is attributable to each member as of the beginning of the year. The percentage of the consolidated CFC adjustment carryover attributable to a member is determined applying the principles of paragraph (f)(5)(iv) of this section.

(5) *Carryover of CFC adjustment carryovers to separate return years.* If any consolidated CFC adjustment carryover that is attributable to a member may be carried to a separate return year of the member, the amount of the CFC adjustment carryover that is attributable to the member is apportioned to the member and carried to the separate return year of the member, and the amount of the CFC adjustment carryover attributable to each remaining member is recomputed applying the principles of paragraph (f)(5) of this section.

(6) *Example.* The following example illustrates the application of the rules in this paragraph (h).

(i) *Facts—(A) General.* P, M1, M2 and M3 are members of the P consolidated group (P group), which uses the calendar year as its taxable year. Each of P, M1, M2 and M3 is a United States shareholder of controlled foreign corporations. Prior to 2025, the P group had not generated a CFC adjustment carryover for any taxable year.

(B) *2025 taxable year.* In 2025, the P group generates a CFC adjustment carryover of \$60x, computed by the P group as a single corporation. In that year, P's pro rata share of the adjusted net income or loss of the controlled foreign corporations of which it was a United States shareholder is –\$10x, M1's pro rata share of the adjusted net income or loss of the controlled foreign corporations of which it was a United States shareholder is –\$20x, M2's pro rata share of the adjusted net income or loss of the controlled foreign corporations of which it was a United States shareholder is –\$10x, and M3's pro rata share of the adjusted net income or loss of the controlled foreign corporations of which it was a United States shareholder is –\$20x.

(C) *2026 taxable year.* In 2026, the P group generates a CFC adjustment carryover of \$40x, computed by the P group as a single corporation. In that

year, P's pro rata share of the adjusted net income or loss of the controlled foreign corporations of which it was a United States shareholder is \$10x, M1's pro rata share of the adjusted net income or loss of the controlled foreign corporations of which it was a United States shareholder is –\$10x, M2's pro rata share of the adjusted net income or loss of the controlled foreign corporations of which it was a United States shareholder is –\$20x, and M3's pro rata share of the adjusted net income or loss of the controlled foreign corporations of which it was a United States shareholder is –\$20x. On December 31, 2026, M2 ceases to be a member of the P group.

(ii) *Analysis—(A) Allocation and apportionment of 2025 CFC adjustment carryover.* Under the principles of paragraph (f)(5) of this section, a portion of the P group's CFC adjustment carryover from 2025 (\$60x) is apportioned to M2 because M2 ceases to be a member of the P group. Specifically, \$10x of the CFC adjustment carryover from 2025 is apportioned to M2 ($(\$10x/(\$10x + \$20x + \$10x + \$20x) \times \$60x) = \$10x$). The remaining \$50x of the CFC adjustment carryover from 2025 remains with the P group. The percentages of the remaining CFC adjustment carryover from 2025 attributable to P, M1 and M3 are recomputed when M2 ceases to be a member of the P group. The recomputed percentage attributable to P is 20% ($\$10x/(\$10x + \$20x + \$20x) = 20\%$), the recomputed percentage attributable to M1 is 40% ($\$20x/(\$10x + \$20x + \$20x) = 40\%$), and the recomputed percentage attributable to M3 is 40% ($\$20x/(\$10x + \$20x + \$20x) = 40\%$).

(B) *Allocation and apportionment of 2026 CFC adjustment carryover.* Under the principles of paragraph (f)(5) of this section, a portion of the P group's CFC adjustment carryover from 2026 (\$40x) is apportioned to M2 because M2 ceases to be a member of the P group. Specifically, \$16x of the CFC adjustment carryover from 2026 is apportioned to M2 ($(\$20x/(\$10x + \$20x + \$20x) \times \$40x) = \$16x$). The remaining \$24x of the CFC adjustment carryover from 2026 remains with the P group. The percentages of the remaining CFC adjustment carryover from 2026 attributable to M1 and M3 are recomputed when M2 ceases to be a member of the P group. The recomputed percentage attributable to M1 is 33.3% ($\$10x/(\$10x + \$20x) = 33.3\%$), and the recomputed percentage attributable to M3 is 66.7% ($\$20x/(\$10x + \$20x) = 66.7\%$).

(i) *Use of consolidated unused CFC taxes—(1) Determination of*

consolidated tentative minimum tax. Subject to the limitations under § 1.59–4 and this paragraph (i), the amount of consolidated unused CFC taxes that can be used to determine the consolidated tentative minimum tax under section 55(b)(2)(A) of the group for any consolidated return year is the aggregate of the group's consolidated unused CFC taxes for that year.

(2) *Composition of consolidated unused CFC taxes.* The consolidated unused CFC taxes described in paragraph (i)(1) of this section consist of—

(i) Any unused CFC taxes of the tax consolidated group to the extent available for use under § 1.59–4(e); and

(ii) Any unused CFC taxes of members of the group arising in the respective separate return years (as defined in § 1.1502–1(e)) of those members (or predecessors of those members within the meaning of § 1.1502–1(f)(4)) to the extent available for use under § 1.59–4(e).

(3) *Limitation on use of unused CFC taxes.* In any consolidated return year, the aggregate amount of unused CFC taxes from all separate return years of a member (or predecessor of the member within the meaning of § 1.1502–1(f)(4)) of a tax consolidated group that can be used cannot exceed the excess (if any) of—

(i) The product of the § 1.56A–6(b)(1) adjustment generated by the member and the percentage specified in section 55(b)(2)(A)(i) for the consolidated return year; over

(ii) The aggregate of the member's pro rata shares of taxes of controlled foreign corporations with regard to which it is a United States shareholder, as determined under § 1.59–4(d), for the consolidated return year.

(4) *Amount of unused CFC taxes that can be used in a consolidated return year—(i) In general.* For purposes of § 1.59–4(e), and except as provided in paragraph (i)(4)(ii) of this section, the amount of unused CFC taxes that can be used in any consolidated return year is determined by applying all unused CFC taxes that may be carried to the consolidated return year in the order of the taxable years (whether a consolidated return year or a separate return year) in which those unused CFC taxes arose, beginning with the taxable year that ends earliest.

(ii) *Unused CFC taxes carried from same taxable year.* Except as otherwise provided in paragraph (i)(5) of this section, unused CFC taxes carried from taxable years ending on the same date, and that are available to determine the consolidated tentative minimum tax of the group for the consolidated return

year, are used to determine the group's consolidated tentative minimum tax on a pro rata basis.

(5) *Carryover of consolidated unused CFC taxes to separate return years—(i) Unused CFC taxes attributable to a departing member.* If a corporation ceases to be a member of a tax consolidated group during a consolidated return year, the consolidated unused CFC taxes that are attributable to the departing member consist of—

(A) All unused CFC taxes of the departing member arising in all separate return years of the departing member that have not been absorbed by the tax consolidated group; and

(B) The portion of the consolidated unused CFC taxes for each consolidated return year of which the departing member was a member of the group that have not been absorbed by the group multiplied by a fraction, the numerator of which is the amount of CFC taxes described in § 1.59–4(c)(1)(i) of the member for the year, and the denominator of which is the amount of CFC taxes described in § 1.59–4(c)(1)(i) of the group for the year.

(ii) *Year of departure from group.* If a corporation ceases to be a member of a tax consolidated group during a consolidated return year of the group, consolidated unused CFC taxes attributable to the corporation are first carried to the consolidated return year.

(iii) *Carryover to first separate return year.* The amount of consolidated unused CFC taxes attributable to the corporation that is not absorbed by the group in the year of departure from the group is carried to the corporation's first separate return year and is not carried to any consolidated return year of the group.

(iv) *Short years in connection with transactions to which section 381(a) of the Code applies.* If a member distributes or transfers assets to a corporation that is a member immediately after the distribution or transfer in a transaction to which section 381(a) applies, the transaction does not cause the distributor or transferor to have a short year within the consolidated return year of the group in which the transaction occurred that is counted as a separate year for purposes of determining the years to which a consolidated unused CFC tax may be carried.

(v) *Example.* The following example illustrates the application of the rules in this paragraph (i)(5).

(A) *Facts.* P, S, and T are members of the P tax consolidated group (P Group), which uses the calendar year as its taxable year. P, S, and T report their

financial results on a tax consolidated group AFS. For 2024, the P Group has \$1000x of CFC taxes described in § 1.59–4(c)(1)(i), of which \$200x are attributable to T. After determining its consolidated tentative minimum tax under section 55(b)(2)(A) for 2024, P Group has \$300x of unused CFC taxes for the year. P Group has no unused CFC taxes for any other taxable year. On December 31, 2024, T is acquired by an unrelated party and ceases to be a member of the P Group.

(B) *Analysis.* Under paragraph (i)(5)(i) of this section, \$60x of the P Group's 2024 unused CFC taxes are attributable to T ($\$300x \times (\$200x/\$1000x)$). Under paragraph (i)(5)(iii) of this section, the \$60x of unused CFC taxes attributable to T is carried to T's first separate return year and is not carried to any consolidated return year of the P Group.

(j) *CAMT liability—(1) Allocation.* Liability for the tentative minimum tax under section 55(b)(2)(A) for a consolidated return year is apportioned among members of the tax consolidated group based on the percentage of AFSI that is attributable to each member for the year, as determined under paragraph (j)(2) of this section.

(2) *Percentage of AFSI attributable to a member.* The percentage of AFSI for the consolidated return year attributable to a member equals the separate positive AFSI of the member for the consolidated return year divided by the sum of the AFSI for that year of all members having separate positive AFSI for that year. For this purpose, the separate AFSI of a member is determined by computing AFSI by reference to only the member's items of income, expense, gain, and loss.

(3) *Example.* The following example illustrates the application of the rules in paragraphs (j)(1) and (2) of this section.

(i) *Facts.* P, S, and T are members of the P tax consolidated group (P Group), which uses the calendar year as its taxable year. P, S, and T report their financial results on a tax consolidated group AFS. For 2024, if AFSI were computed by reference to only each member's items of income, expense, gain, and loss, P would have separate AFSI of \$1,000x, S would have a separate FSNOL of \$100x, and T would have separate AFSI of \$200x. The P Group has no regular tax liability, no liability for tax on base erosion payments under section 59A of the Code, and no CAMT foreign tax credit for 2024. Thus, the P Group's AFSI for 2024 is \$1,100x, and the P Group's liability for the tentative minimum tax under section 55(b)(2)(A) is \$165x ($\$1,100x \times 15\% = \$165x$).

(ii) *Analysis.* Under paragraphs (j)(1) and (2) of this section, $\$137.5x$ of the P Group's 2024 liability for the tentative minimum tax under section 55(b)(2)(A) is apportioned to P $((\$1,000x/(\$1,000x + \$200x)) \times \$165x = \$137.5x)$, and $\$27.5x$ is apportioned to T $((\$200x/(\$200x + \$1,000x)) \times \$165x = \$27.5x)$.

(4) *Cross-reference.* See § 1.1502–53 for rules regarding the allocation of any consolidated MTC attributable to a separate return year of a member.

(k) *Allocation of AFSI when members leave the group—(1) Treatment of departing member.* When a member leaves a tax consolidated group (departing member), the group allocates

to the departing member the member's AFSI (for purposes of applying the average annual AFSI test under § 1.59–2(c)) for each taxable year (or portion thereof) in which the departing member was a member of the tax consolidated group (for taxable years relevant under § 1.59–2(c)(1)(i) and (c)(2)(i)). The amount of AFSI allocated to the departing member under this paragraph (k)(1) is determined as if the member had been a separate CAMT entity during the period in which it was a member of the tax consolidated group.

(2) *Treatment of group.* The AFSI allocated to the departing member is not

subtracted from the AFSI of the tax consolidated group of which the departing member ceased to be a member. See § 1.59–2(f).

(l) *Applicability date.* This section applies to consolidated return years for which the due date of the income tax return (without extensions) is after [DATE OF PUBLICATION OF FINAL RULE IN THE **FEDERAL REGISTER**].

Douglas W. O'Donnell,

Deputy Commissioner.

Securities and Exchange Commission

Self-Regulatory Organizations; Cboe C2 Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Establish Fees for Industry Members Related to Certain Historical Costs of the National Market System Plan Governing the Consolidated Audit Trail; Notice

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100937; File No. SR–C2–2024–014]

Self-Regulatory Organizations; Cboe C2 Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Establish Fees for Industry Members Related to Certain Historical Costs of the National Market System Plan Governing the Consolidated Audit Trail

September 5, 2024.

Pursuant to Section 19(b)(1) under the Securities Exchange Act of 1934 (the “Act”)¹ and Rule 19b–4 thereunder,² notice is hereby given that on August 22, 2024, Cboe C2 Exchange, Inc. (the “Exchange” or “C2”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe C2 Exchange, Inc. (the “Exchange” or “C2”) proposes to amend its fee schedule entitled “Consolidated Audit Trail Funding Fees”³ to establish fees for Industry Members⁴ related to certain historical costs of the National Market System Plan Governing the Consolidated Audit Trail (the “CAT NMS Plan” or “Plan”) incurred prior to January 1, 2022. These fees would be payable to Consolidated Audit Trail, LLC (“CAT LLC” or “the Company”)⁵ and referred to as Historical CAT Assessment 1. The fee rate for Historical CAT Assessment 1 will be \$0.000013 per executed equivalent share. CAT Executing Brokers will receive their first monthly invoice for Historical CAT Assessment 1 in November 2024

calculated based on their transactions as CAT Executing Brokers for the Buyer (“CEBB”) and/or CAT Executing Brokers for the Seller (“CEBS”) in October 2024. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange’s website (http://markets.cboe.com/us/options/regulation/rule_filings/ctwo/), at the Exchange’s Office of the Secretary, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On July 11, 2012, the Commission adopted Rule 613 of Regulation NMS, which required the self-regulatory organizations (“SROs”) to submit a national market system (“NMS”) plan to create, implement and maintain a consolidated audit trail that would capture customer and order event information for orders in NMS securities across all markets, from the time of order inception through routing, cancellation, modification or execution.⁶ On November 15, 2016, the Commission approved the CAT NMS Plan.⁷ Under the CAT NMS Plan, the Operating Committee has the discretion to establish funding for CAT LLC to operate the CAT, including establishing fees for Industry Members to be assessed by CAT LLC that would be implemented on behalf of CAT LLC by the Participants.⁸ The Operating Committee adopted a revised funding model to fund the CAT (“CAT Funding Model”). On September 6, 2023, the Commission

approved the CAT Funding Model, after concluding that the model was reasonable and that it satisfied the requirements of Section 11A of the Exchange Act and Rule 608 thereunder.⁹

The CAT Funding Model provides a framework for the recovery of the costs to create, develop and maintain the CAT, including providing a method for allocating costs to fund the CAT among Participants and Industry Members. The CAT Funding Model establishes two categories of fees: (1) CAT fees assessed by CAT LLC and payable by certain Industry Members to recover a portion of historical CAT costs previously paid by the Participants (“Historical CAT Assessment” fees); and (2) CAT fees assessed by CAT LLC and payable by Participants and Industry Members to fund prospective CAT costs (“Prospective CAT Costs” fees).¹⁰

Under the CAT Funding Model, “[t]he Operating Committee will establish one or more fees (each a ‘Historical CAT Assessment’) to be payable by Industry Members with regard to CAT costs previously paid by the Participants (‘Past CAT Costs’).”¹¹ In establishing a Historical CAT Assessment, the Operating Committee will determine a “Historical Recovery Period” and calculate a “Historical Fee Rate” for that Historical Recovery Period. Then, for each month in which a Historical CAT Assessment is in effect, each CEBB and CEBS would be required to pay the fee—the Historical CAT Assessment—for each transaction in Eligible Securities executed by the CEBB or CEBS from the prior month as set forth in CAT Data, where the Historical CAT Assessment for each transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Historical Fee Rate.¹²

⁹ Securities Exchange Act Rel. No. 98290 (Sept. 6, 2023), 88 FR 62628 (Sept. 12, 2023) (“CAT Funding Model Approval Order”).

¹⁰ Under the CAT Funding Model, the Operating Committee may establish one or more Historical CAT Assessments. Section 11.3(b) of the CAT NMS Plan. This filing only establishes Historical CAT Assessment 1 related to certain Historical CAT Costs as described herein; it does not address any other potential Historical CAT Assessment related to other Historical CAT Costs. In addition, under the CAT Funding Model, the Operating Committee also may establish CAT Fees related to CAT costs going forward. Section 11.3(a) of the CAT NMS Plan. This filing does not address any potential CAT Fees related to CAT costs going forward. Any such other fee for any other Historical CAT Assessment or CAT Fee for Prospective CAT Costs will be subject to a separate fee filing.

¹¹ Section 11.3(b) of the CAT NMS Plan.

¹² In approving the CAT Funding Model, the Commission stated that, “[i]n the Commission’s view, the proposed recovery of the Past CAT Costs via the Historical CAT Assessment is reasonable.” CAT Funding Model Approval Order at 62662.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

³ The Exchange and each of its affiliated exchanges (Cboe BYX Exchange, Inc., Cboe BZX Exchange, Inc., Cboe Exchange, Inc., Cboe EDGA Exchange, Inc., and Cboe EDGX Exchange, Inc.) are filing to adopt the same amendment to this fee schedule.

⁴ An “Industry Member” is defined as “a member of a national securities exchange or a member of a national securities association.” See Exchange Rule 7.20(u); see also Section 1.1 of the CAT NMS Plan. Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in the CAT NMS Plan and/or the CAT Compliance Rule. See Chapter 7, Section B of the Exchange’s Rulebook.

⁵ The term “CAT LLC” may be used to refer to Consolidated Audit Trail, LLC or CAT NMS, LLC, depending on the context.

⁶ Securities Exchange Act Rel. No. 67457 (July 18, 2012), 77 FR 45721 (Aug. 1, 2012) (“Rule 613 Adopting Release”).

⁷ Securities Exchange Act Rel. No. 79318 (Nov. 15, 2016), 81 FR 84696 (Nov. 23, 2016) (“CAT NMS Plan Approval Order”).

⁸ Section 11.1(b) of the CAT NMS Plan.

Each Historical CAT Assessment to be paid by CEBBs and CEBs is designed to contribute toward the recovery of two-thirds of the Historical CAT Costs. Because the Participants previously have paid Past CAT Costs via loans to the Company, the Participants would not be required to pay any Historical CAT Assessment. In lieu of a Historical CAT Assessment, the Participants' one-third share of Historical CAT Costs will be paid by the cancellation of loans made by the Participants to the Company on a pro rata basis based on the outstanding loan amounts due under the loans, instead of through the payment of a CAT fee.¹³ In addition, the Participants also will be 100% responsible for certain Excluded Costs (as discussed below).

CAT LLC proposes to charge CEBBs and CEBs (as described in more detail below) Historical CAT Assessment 1 to recover certain historical CAT costs incurred prior to January 1, 2022, in accordance with the CAT Funding Model. To implement this fee on behalf of CAT LLC, the CAT NMS Plan requires the Participants to "file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves, and such fees shall be labeled as 'Consolidated Audit Trail Funding

Fees.'" ¹⁴ The Plan further states that "Participants will be required to file with the SEC pursuant to Section 19(b) of the Exchange Act a filing for each Historical CAT Assessment."¹⁵ Accordingly, the purpose of this filing is to implement a Historical CAT Assessment on behalf of CAT LLC for Industry Members, referred to as Historical CAT Assessment 1, in accordance with the CAT NMS Plan.¹⁶

The Exchange previously filed a fee filing to implement Historical CAT Assessment 1. On January 17, 2024, the SEC published this prior filing for Historical CAT Assessment 1, temporarily suspended the fee filing, and instituted proceedings to determine whether to approve or disapprove the fee filing.¹⁷ The Exchange is withdrawing its original fee filing for Historical CAT Assessment 1. This Historical CAT Assessment 1 replaces the prior Historical CAT Assessment 1 that was previously filed with the Commission.

(1) CAT Executing Brokers

Historical CAT Assessment 1 will be charged to each CEBB and CEBs for each applicable transaction in Eligible Securities.¹⁸ The CAT NMS Plan defines a "CAT Executing Broker" to mean:

(a) with respect to a transaction in an Eligible Security that is executed on an exchange, the Industry Member identified as the Industry Member responsible for the order on the buy-side of the transaction and the Industry Member responsible for the sell-side of the transaction in the equity order trade event and option trade event in the CAT Data submitted to the CAT by the relevant exchange pursuant to the Participant Technical Specifications; and (b) with respect to a transaction in an Eligible Security that is executed otherwise than on an exchange and required to be reported to an equity trade reporting facility of a registered national securities association, the Industry Member identified as the executing broker and the Industry Member identified as the contra-side executing broker in the TRF/ORF/ADF transaction data event in the CAT Data submitted to the CAT by FINRA pursuant to the Participant Technical Specifications; provided, however, in those circumstances where there is a non-Industry Member identified as the contra-side executing broker in the TRF/ORF/ADF transaction data event or no contra-side executing broker is identified in the TRF/ORF/ADF transaction data event, then the Industry Member identified as the executing broker in the TRF/ORF/ADF transaction data event would be treated as CAT Executing Broker for the Buyer and for the Seller.¹⁹

The following fields of the Participant Technical Specifications indicate the CAT Executing Brokers for the transactions executed on an exchange.

EQUITY ORDER TRADE (EOT)²⁰

No.	Field name	Data type	Description	Include key
12.n.8/13.n.8	member	Member Alias	The identifier for the member firm that is responsible for the order on this side of the trade. Not required if there is no order for the side as indicated by the NOBUYID/NOSELLID instruction. This must be provided if orderID is provided.	C

OPTION TRADE (OT)²¹

No.	Field name	Data type	Description	Include key
16.n.13/17.n.13	member	Member Alias	The identifier for the member firm that is responsible for the order ..	R

In addition, the following fields of the Participant Technical Specifications would indicate the CAT Executing

Brokers for the transactions executed otherwise than on an exchange:

¹³ Section 11.3(b)(ii) of the CAT NMS Plan.

¹⁴ Section 11.1(b) of the CAT NMS Plan.

¹⁵ Section 11.3(b)(iii)(B)(I) of the CAT NMS Plan.

¹⁶ Note that there may be one or more Historical CAT Assessments depending on the timing of the completion of the Financial Accountability Milestones, among other things. Section 11.3(b) of the CAT NMS Plan.

¹⁷ Securities Exchange Act Release No. 99370 (January 17, 2024), 89 FR 10430 (February 13, 2024) (SR-C2-2024-002).

¹⁸ In its approval of the CAT Funding Model, the Commission determined that charging CAT fees to CAT Executing Brokers was reasonable. In reaching this conclusion the Commission noted that the use

of CAT Executing Brokers is appropriate because the CAT Funding Model is based upon the calculation of *executed* equivalent shares, and, therefore, charging CAT Executing Brokers would reflect their executing role in each transaction. Furthermore, the Commission noted that, because CAT Executing Brokers are already identified in transaction reports from the exchanges and FINRA's equity trade reporting facilities recorded in CAT Data, charging CAT Executing Brokers could streamline the billing process. CAT Funding Model Approval Order at 62629.

¹⁹ Section 1.1 of the CAT NMS Plan. Note that CEBBs and CEBs may, but are not required to, pass-through their CAT fees to their clients, who may, in turn, pass their fees to their clients until

they are imposed ultimately on the account that executed the transaction. *See* CAT Funding Model Approval Order at 62649.

²⁰ *See* Table 23, Section 4.7 (Order Trade Event) of the CAT Reporting Technical Specifications for Plan Participants, Version 4.1.0-r21 (Apr. 15, 2024), https://www.catnmsplan.com/sites/default/files/2024-04/04.15.2024-CAT_Reporting_Technical_Specifications_for_Participants_4.1.0-r21.pdf ("CAT Reporting Technical Specifications for Plan Participants").

No.	Field name	Data type	Description	Include key
26	reportingExecutingMpid	Member Alias	MPID of the executing party	R
28	contraExecutingMpid	Member Alias	MPID of the contra-side executing party	C

(2) Calculation of Historical Fee Rate 1

The Operating Committee determined the Historical Fee Rate to be used in calculating Historical CAT Assessment 1 (“Historical Fee Rate 1”) by dividing the Historical CAT Costs for Historical CAT Assessment 1 (“Historical CAT Costs 1”) by the projected total executed share volume of all transactions in Eligible Securities for the Historical Recovery Period for Historical CAT Assessment 1 (“Historical Recovery Period 1”), as discussed in detail below. Based on this calculation, the Operating Committee has determined that Historical Fee Rate 1 would be \$0.00003994969693072937 per executed equivalent share. This rate is then divided by three and rounded to determine the fee rate of \$0.000013 per executed equivalent share that will be assessed to CEBBs and CEBs, as also discussed in detail below.

(A) Executed Equivalent Shares for Transactions in Eligible Securities

Under the CAT NMS Plan, for purposes of calculating each Historical CAT Assessment, executed equivalent shares in a transaction in Eligible Securities will be reasonably counted as follows: (1) each executed share for a transaction in NMS Stocks will be counted as one executed equivalent share; (2) each executed contract for a transaction in Listed Options will be counted based on the multiplier applicable to the specific Listed Options (*i.e.*, 100 executed equivalent shares or such other applicable multiplier); and

(3) each executed share for a transaction in OTC Equity Securities shall be counted as 0.01 executed equivalent share.²³

(B) Historical CAT Costs 1

The CAT NMS Plan states that “[t]he Operating Committee will reasonably determine the Historical CAT Costs sought to be recovered by each Historical CAT Assessment, where the Historical CAT Costs will be Past CAT Costs minus Past CAT Costs reasonably excluded from Historical CAT Costs by the Operating Committee. Each Historical CAT Assessment will seek to recover from CAT Executing Brokers two-thirds of Historical CAT Costs incurred during the period covered by the Historical CAT Assessment.”²⁴ As described in detail below, Historical CAT Costs 1 would be \$318,059,819. This figure includes Past CAT Costs of \$401,312,909 minus certain Excluded Costs of \$83,253,090. Participants collectively will remain responsible for one-third of Historical CAT Costs 1 (which is \$106,019,939.67), plus the Excluded Costs of \$83,253,090. CEBBs collectively will be responsible for one-third of Historical CAT Costs 1 (which is \$106,019,939.67), and CEBs collectively will be responsible for one-third of Historical CAT Costs 1 (which is \$106,019,939.67).

The following describes in detail Historical CAT Costs 1 with regard to four separate historical time periods as well as Past CAT Costs excluded from Historical CAT Costs 1 (“Excluded Costs”). The following cost details are

provided in accordance with the requirement in the CAT NMS Plan to provide in the fee filing “a brief description of the amount and type of Historical CAT Costs, including (1) the technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees, and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration and (6) public relations costs.”²⁵ Each of the costs described below are reasonable, appropriate and necessary for the creation, implementation and maintenance of CAT.

(i) Historical CAT Costs Incurred Prior to June 22, 2020 (Pre-FAM Costs)

Historical CAT Costs 1 would include costs incurred by CAT prior to June 22, 2020 (“Pre-FAM Period”) and already funded by the Participants, excluding Excluded Costs (described further below). Historical CAT Costs 1 would include costs for the Pre-FAM Period of \$124,290,730. The Participants would remain responsible for one-third of this cost (which they have previously paid) (\$41,430,243.33), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$41,430,243.33) and CEBs paying one-third (\$41,430,243.33). These costs do not include Excluded Costs, as discussed further below. The following table breaks down Historical CAT Costs 1 for the Pre-FAM Period into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Historical CAT costs 1 for Pre-FAM Period (prior to June 22, 2020)*
Capitalized Developed Technology Costs**	\$51,847,150
Technology Costs	33,568,579
Cloud Hosting Services	10,268,840
Operating Fees	21,085,485
CAIS Operating Fees	2,072,908
Change Request Fees	141,346
Legal	19,674,463
Consulting	17,013,414
Insurance	880,419

²² See Table 61, Section 6.1 (TRF/ORF/ADF Transaction Data Event) of the CAT Reporting Technical Specifications for Plan Participants.

²³ Section 11.3(a)(i)(B) and 11.3(b)(i)(B) of the CAT NMS Plan. In approving the CAT Funding

Model, the Commission concluded that “the use of executed equivalent share volume as the basis of the proposed cost allocation methodology is reasonable and consistent with the approach taken

by the funding principles of the CAT NMS Plan.” CAT Funding Model Approval Order at 62640.

²⁴ Section 11.3(b)(i)(C) of the CAT NMS Plan.

²⁵ Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Historical CAT costs 1 for Pre-FAM Period (prior to June 22, 2020) *
Professional and administration	1,082,036
Public relations	224,669
Total Operating Expenses	124,290,730

* The costs described in this table of costs for the Pre-FAM Period were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website. In addition, in accordance with Section 6.6(a)(i) of the CAT NMS Plan, in 2018 CAT LLC provided the SEC with "an independent audit of fees, costs, and expenses incurred by the Participants on behalf of the Company prior to the Effective Date of the Plan that will be publicly available." The audit is available on the CAT website.

** The non-cash amortization of these capitalized developed technology costs of \$2,115,545 incurred during the period prior to June 22, 2020 have been appropriately excluded from the above table.²⁶

The Pre-FAM Period includes a broad range of CAT-related activity from 2012 through June 22, 2020, including the evaluation of the requirements of SEC Rule 613, the development of the CAT NMS Plan, the evaluation and selection of the initial and successor Plan Processors, the commencement of the creation and implementation of the CAT to comply with Rule 613 and the CAT NMS Plan, including technical specifications for transaction reporting and regulatory access, and related technology and the commencement of reporting to the CAT. The following describes the costs for each of the categories for the Pre-FAM Period.

(a) Technology Costs—Cloud Hosting Services

The \$10,268,840 in technology costs for cloud hosting services represent costs incurred for services provided by the cloud services provider for the CAT, Amazon Web Services, Inc. ("AWS"), during the Pre-FAM Period.

As part of its proposal for acting as the successor Plan Processor for the CAT, FCAT selected AWS as a subcontractor to provide cloud hosting services. In 2019, after reviewing the capabilities of other cloud services providers, FCAT determined that AWS was the only cloud services provider at that time sufficiently mature and capable of providing the full suite of necessary cloud services for the CAT, including, for example, the security, resiliency and complexity necessary for the CAT computing requirements. The use of cloud hosting services is standard for this type of high-volume data activity and reasonable and necessary for implementation of the CAT,

particularly given the substantial data volumes associated with the CAT.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT the fees incurred by the Plan Processor for cloud hosting services provided by AWS as FCAT's subcontractor [sic] on a monthly basis for the cloud hosting services, and FCAT, in turn, pays such fees to AWS. The fees for cloud hosting services were negotiated by FCAT on an arm's length basis with the goals of managing cost and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the expected volume of data, the breadth of services provided and market rates for similar services. The fees for cloud hosting services during the Pre-FAM Period were paid to FCAT by CAT NMS, LLC²⁷ and subsequently Consolidated Audit Trail, LLC (as previously noted, both entities are referred to generally as "CAT LLC"),²⁸ and FCAT, in turn, paid AWS. CAT LLC was funded via loan contributions by the Participants.²⁹

AWS was engaged by FCAT to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. Services provided by

AWS include storage services, databases, compute services and other services (such as networking, management tools and DevOps tools). AWS also was engaged to provide various environments for CAT, such as development, performance testing, test and production environments.

The cost for AWS services for the CAT is a function of the volume of CAT Data. The greater the amount of CAT Data, the greater the cost of AWS services to the CAT. During the Pre-FAM Period from the engagement of AWS in February 2019 through June 2020, AWS provided cloud hosting services for volumes of CAT Data far in excess of the volume predictions set forth in the CAT NMS Plan. The CAT NMS Plan states, when all CAT Reporters are submitting their data to the CAT, it "must be sized to receive[,] process and load more than 58 billion records per day,"³⁰ and that "[i]t is expected that the Central Repository will grow to more than 29 petabytes of raw, uncompressed data."³¹ However, the volume of CAT Data for the Pre-FAM Period was far in excess of these predicted levels. By the end of this period, data submitted to the CAT included options and equities Participant Data,³² Phase 2a and Phase 2b Industry Member Data³³ (including certain linkages), as well as SIP Data,³⁴ reference data and other types of Other Data.³⁵ The following chart provides data regarding the average daily volume, cumulative total events, total compute

²⁷ CAT NMS, LLC was formed by FINRA and the U.S. national securities exchanges to implement the requirements of SEC Rule 613 under the Exchange Act. SEC Rule 613 required the SROs to jointly submit to the SEC the CAT NMS Plan to create, implement and maintain the CAT. The SEC approved the CAT NMS Plan on November 15, 2016. CAT NMS Plan Approval Order.

²⁸ On August 29, 2019, the Participants formed a new Delaware limited liability company named Consolidated Audit Trail, LLC for the purpose of conducting activities related to the CAT from and after the effectiveness of the proposed amendment of the CAT NMS Plan to replace CAT NMS, LLC. See Securities Exchange Act Rel. No. 87149 (Sept. 27, 2019), 84 FR 52905 (Oct. 3, 2019).

²⁹ For each of the costs paid by CAT NMS, LLC and Consolidated Audit Trail, LLC as discussed throughout this filing, CAT NMS, LLC and Consolidated Audit Trail, LLC paid these costs via loan contributions by the Participants to CAT NMS, LLC and Consolidated Audit Trail, LLC, respectively.

³⁰ Appendix D-4 of the CAT NMS Plan at n.262.

³¹ Appendix D-5 of the CAT NMS Plan.

³² See Section 6.3(d) of the CAT NMS Plan.

³³ See Securities Exchange Rel. No. 88702 (Apr. 20, 2020), 85 FR 23075 (Apr. 24, 2020) ("Phased Reporting Exemptive Relief Order") for a description of Phase 2a and Phase 2b Industry Member Data.

³⁴ See Section 6.5(a)(ii) of the CAT NMS Plan.

³⁵ See Appendix C-108 of the CAT NMS Plan.

²⁶ With respect to certain costs that were "appropriately excluded," such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

hours and storage footprint of the CAT during the Pre-FAM Period.³⁶

	Date range: 3/29/19 to 4/12/20 *	Date range: 4/13/20 to 6/21/20 **
Average Daily Volume in Billions:		
Participant—Equities	5	5
Participant—Options	80	981
Industry Member—Equities		3
Industry Member—Options		0.04
SIP—Options & Equities	64	70
Average Total Daily Volume	149	166
Cumulative Total Events for the Period	3,890	4,990
Total Compute Hours for the Period	*** N/A	5,663,247
Storage Footprint at End of Period (Petabytes)	30.57	47.96

* The Participant Equities in RSA format.

** Start of Industry Member reporting on 4/13/2020.

*** Note that, although there were compute hours during this period, data related to such compute hours are no longer available in current data.

(b) Technology Costs—Operating Fees

The \$21,085,485 in technology costs related to operating fees represent costs incurred with regard to activities of FCAT as the Plan Processor. Operating fees are those fees paid by CAT LLC to FCAT as the Plan Processor to operate and maintain the CAT and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (e.g., management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management as required by the CAT NMS Plan.

FCAT was selected to assume the role of the successor Plan Processor. Prior to this selection, the Participants engaged in discussions with two prior Bidders³⁷ for the successor Plan Processor role. The Operating Committee formed a Selection Subcommittee in accordance with Section 4.12 of the CAT NMS Plan to evaluate and review Bids and to make a recommendation to the Operating Committee with respect to the selection of the successor Plan Processor. In an April 9, 2019 letter to the Commission, the Participants described the reasons for its selection of the successor Plan Processor:

The Selection Subcommittee considered factors including, but not limited to, the following, in recommending FINRA to the Operating Committee as the successor Plan Processor:

a. FINRA's specialized technical expertise and capabilities in the area of broker-dealer technology;

b. The need to appoint a successor Plan Processor with specialized expertise to develop, implement, and maintain the CAT

System in accordance with the CAT NMS Plan and SEC Rule 613;

c. FINRA's detailed proposal in response to CATLLC's recent inquiries; and

d. FINRA's data query and analytics systems demonstration to the Participants.

Based on these and other factors, the Selection Subcommittee determined that FINRA was the most appropriate Bidder to become the successor Plan Processor.³⁸

On February 26, 2019, the Operating Committee (with FINRA recusing itself) voted to select FINRA as the successor Plan Processor pursuant to Section 6.1(t) of the CAT NMS Plan.³⁹ On March 29, 2019, CAT LLC and FCAT (a wholly owned subsidiary of FINRA) entered into a Plan Processor Agreement pursuant to which FCAT would perform the functions and duties of the Plan Processor contemplated by the CAT NMS Plan, including the management and operation of the CAT.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT a negotiated monthly fixed price for the operation of the CAT. This fixed price contract was negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity. The operating fees during the Pre-FAM Period were paid to FCAT by CAT LLC.

From March 29, 2019 (the commencement of the Plan Processor Agreement with FCAT) through June 22, 2020 (the end of the Pre-FAM Period), the Plan Processor's activities with

respect to the CAT included the following:

- Commenced user acceptance testing with market data provided by Exegy Incorporated ("Exegy"), a market data provider;⁴⁰

- Published Technical Specifications and related reporting scenarios documents for Phase 2a, 2b and 2c reporting for Industry Members, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;

- Facilitated testing for Phase 2a and 2b reporting for Industry Members;

- Began developing Technical Specifications and related reporting scenarios documents for Phase 2d reporting for Industry Members, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;

- Published Central Repository Access Technical Specifications, and provided regulator access to test data from Industry Members;

- Facilitated Participant exchanges that support options market makers sending Quote Sent Time to the CAT;

- Facilitated the introduction of OPRA and Options NBBO Other Data to CAT;

- Addressed compliance items, including drafting CAT policies and procedures, and addressing requirements under Regulation SCI;

- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;

- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;

³⁶ Note that the volume data described in this table does not include CAIS data.

³⁷ The term "Bidder" is defined in Section 1.1 of the CAT NMS Plan.

³⁸ Letter from Michael J. Simon, Chair, CAT NMS, LLC Operating Committee, to Brent J. Fields, Secretary, SEC (Apr. 9, 2019), <https://www.sec.gov/divisions/marketreg/rule613-info-notice-of-plan-processor-selection-040919.pdf>.

³⁹ *Id.*

⁴⁰ The use of Exegy to provide market data, including the costs and market data provided, is discussed below in Section 3(a)(2)(B)(i)(i).

- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with Participants, the SEC and its staff;
- Operated the FINRA CAT Helpdesk, which is the primary source for answers to questions about CAT, including questions regarding: clock synchronization, firm reporting responsibilities, interpretive questions, technical specifications for reporting to CAT and more;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content;⁴¹ and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(c) Technology Costs—CAIS Operating Fees

The \$2,072,908 in technology costs related to CAIS operating fees represent the fees paid for FCAT's subcontractor charged with the development and operation of CAT's Customer and Account Information System ("CAIS"). The CAT is required under the CAT NMS Plan to capture and store Customer Identifying Information and Customer Account Information in a database separate from the transactional database and to create a CAT-Customer-ID for each Customer.

During the Pre-FAM Period, the CAIS-related services were provided by the Plan Processor through the Plan Processor's subcontractor, Kingland Systems Incorporation ("Kingland"). Kingland had experience operating in the securities regulatory technology space, and as a part of its proposal for acting as the Plan Processor for the CAT, FCAT selected Kingland as a subcontractor to provide certain CAIS-related services.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay to the Plan Processor the fees incurred by FCAT for CAIS-related services provided by FCAT through Kingland on a monthly basis. FCAT negotiated the fees for Kingland's CAIS-related services on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS

Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity. The fees for CAIS-related services during the Pre-FAM Period were paid by CAT LLC to FCAT. FCAT, in turn, paid Kingland.

During the Pre-FAM Period, Kingland began development of the CAIS Technical Specifications and the building of CAIS. In addition, Kingland also worked on the build related to the CCID Alternative, an alternative approach to customer information that was not included in the CAT NMS Plan as originally adopted.⁴² Furthermore, Kingland also worked on the acceleration of the reporting of large trader identifiers ("LTID") earlier than originally contemplated during this period, in accordance with exemptive relief granted by the SEC.⁴³

(d) Technology Costs—Change Request Fees

The technology costs related to change request fees include costs related to certain modifications, upgrades or other changes to the CAT. Change requests are standard practice and necessary to reflect operational changes, including changes related to new market developments, such as new market participants. In general, if CAT LLC determines that a modification, upgrade or other change to the functionality or service is necessary and appropriate, CAT LLC will submit a request for such a change to the Plan Processor. The Plan Processor will then respond to the request with a proposal for implementing the change, including the cost (if any) of such a change. CAT LLC then determines whether to approve the proposed change. The change request costs were paid by CAT LLC to FCAT. During the Pre-FAM Period, CAT LLC incurred costs of \$141,346 related to change requests implemented by FCAT. Such change requests related to a development fee regarding the OPRA and SIP data feeds, and the reprocessing of certain exchange data.⁴⁴

(e) Technology Costs—Capitalized Developed Technology Costs

This category of costs includes capitalizable application development costs incurred in the development of the CAT. The capitalized developed

technology costs for the Pre-FAM Period of \$51,847,150 relate to technology provided by the Initial Plan Processor and the successor Plan Processor.

Initial Plan Processor: Thesys CAT, LLC. The capitalized developed technology costs related to the Initial Plan Processor include costs incurred with regard to testing for Participant reporting, Participant reporting to the CAT, a security assessment of the CAT, and the development of the billing function for the CAT.

On January 17, 2017, the Selection Committee of the CAT NMS Plan selected the Initial Plan Processor, Thesys Technologies, LLC, for the CAT NMS Plan pursuant to Article V of the CAT NMS Plan.⁴⁵ The Participants utilized a request for proposal ("RFP") to seek proposals to build and operate the CAT, receiving a number of proposals in response to the RFP. The Participants carefully reviewed and considered each of the proposals, including holding in-person meetings with each of the Bidders. After several rounds of review, the Participants selected the Initial Plan Processor in accordance with the CAT NMS Plan, taking into consideration that the Initial Plan Processor had experience operating in the securities regulatory technology space, among other considerations. On April 6, 2017, CAT LLC entered into an agreement with Thesys CAT LLC ("Thesys CAT"), a Thesys affiliate, to perform the functions and duties of the Plan Processor contemplated by the CAT NMS Plan, including the management and operation of the CAT. Under the agreement, CAT LLC would pay Thesys CAT a negotiated, fixed price fee for its role as the Initial Plan Processor. Effective January 30, 2019, the Plan Processor Agreement with Thesys CAT was terminated, and FCAT was subsequently selected as the successor Plan Processor.

From January 17, 2017 through January 30, 2019, the time in which the Thesys CAT was engaged for the CAT, but excluding the period from November 15, 2017 through January 30, 2019, the Initial Plan Processor engaged in various activities with respect to the CAT, including preparing iterative drafts of Participant Technical Specifications, Industry Member Technical Specifications and the Central Repository Access Technical Specifications. In addition, Thesys CAT also developed CAT technology, addressed compliance items, including

⁴² For a discussion of the CCID Alternative, see Securities Exchange Act Rel. No. 88393 (Mar. 17, 2020), 85 FR 16152 (Mar. 20, 2020).

⁴³ Phased Reporting Exemptive Relief Order at 23079–80.

⁴⁴ Note that CAT LLC also has incurred costs related to specific Industry Members (e.g., reprocessing costs related to Industry Member reporting errors).

⁴⁵ Letter from the Participants to Brent J. Fields, Secretary, SEC (Jan. 18, 2017), <https://www.sec.gov/divisions/marketreg/rule613-info-notice-of-plan-processor-selection.pdf>.

⁴¹ The CAT website is <https://www.catnmsplan.com>.

drafting CAT policies and procedures, addressing Regulation SCI requirements, establishing a CAT Compliance Officer and a Chief Information Security Officer, addressed security-related matters for the CAT, and worked towards the initiation of Participant reporting per the Participant Technical Specifications.

Successor Plan Processor: FCAT. The capitalized developed technology costs related to FCAT include: (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, including the completion of go-live functionality related to options ingestion and validation, equities regulatory services agreement query tool updates and unlinked options data query, options linkages release, Industry Member Phase 2a file submission and data integrity (including error corrections), and Industry Member testing, including reporting relationships, ATS order type management, basic reporting statistics, SFTP data integrity feedback and error correction; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including a one-time development fee for a secure analytics workspace, a one-time development fee of an Industry Member connectivity solution, and a one-time development fee for the acceleration of multi-factor authentication; (3) CAIS implementation fees; and (4) license fees.

(f) Legal Costs

The legal costs of \$19,674,463 represent the fees paid for legal services provided by two law firms, Wilmer Cutler Pickering Hale and Dorr LLP ("WilmerHale") and Pillsbury Winthrop Shaw Pittman LLP ("Pillsbury"), during the Pre-FAM Period. The legal costs exclude those costs incurred from November 15, 2017 through November 15, 2018.

Law Firm: WilmerHale. Following the adoption of Rule 613, the Participants determined it was necessary to engage external legal counsel to advise the Participants with respect to corporate and regulatory legal matters related to the CAT, including drafting and developing the CAT NMS Plan. The Participants considered a variety of factors in their analysis of prospective law firms, including (1) the firm's qualifications, resources and expertise; (2) the firm's relevant experience and understanding of the regulatory matters raised by the CAT and in advising on

matters of similar scope; (3) the composition of the legal team; and (4) professional fees. Following a series of interviews, the Participants acting as a consortium determined that WilmerHale was well qualified given the balance of these considerations and engaged WilmerHale in February 2013.

WilmerHale's billing rates are negotiated on an annual basis and are determined with reference to the rates charged by other leading law firms for similar work. The Participants assess WilmerHale's performance and review prospective budgets and staffing plans submitted by WilmerHale on an annual basis. WilmerHale's compensation arrangements are reasonable and appropriate, and in line with the rates charged by other leading law firms for similar work.

The legal costs for WilmerHale during the Pre-FAM Period included costs incurred from 2013 until June 22, 2020 to address corporate and regulatory legal matters related to the CAT. The legal fees for this law firm during the period from February 2013 until the formation of the CAT NMS, LLC on November 15, 2016 were paid directly by the exchanges and FINRA to WilmerHale. After the formation of CAT NMS LLC, the legal fees were paid by CAT LLC to WilmerHale.

After WilmerHale was engaged in 2013 through the end of the Pre-FAM Period on June 22, 2020 (excluding the legal costs from November 15, 2017 through November 15, 2018), WilmerHale provided legal assistance to the CAT on a variety of matters, including with regard to the following:

- Analyzed various legal matters associated with the Selection Plan, and drafted an amendment to the Selection Plan;
- Assisted with the RFP and bidding process for the CAT Plan Processor;
- Analyzed legal matters related to the Development Advisory Group ("DAG");
- Drafted the CAT NMS Plan, analyzed various items related to the CAT NMS Plan, and responded to comment letters on CAT NMS Plan;
- Provided legal support for the formation of the legal entity, the governance of the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (e.g., Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding and Other Products) and the DAG, governance support during the transition to the new governance structure under the CAT NMS Plan, and

governance support after the adoption of the CAT NMS Plan, which involved support for the Operating Committee, Advisory Committee, Compliance Subcommittee and CAT working groups;

- Assisted with the development of the CAT funding model and drafted related amendments of the CAT NMS Plan and related filings;
- Negotiated and drafted the plan processor agreements with the Initial Plan Processor and the successor Plan Processor;
- Provided assistance with compliance with Regulation SCI;
- Assisted with clock synchronization study;
- Provided assistance with respect to the establishment of CAT security;
- Drafted exemptive requests from CAT NMS Plan requirements, including with regard to options market maker quotes, Customer IDs, CAT Reporter IDs, linking allocations to executions, CAT reporting timeline, FDIDs, customer and account information, timestamp granularity, small industry members, data facility reporting and linkage, allocation reports, SRO-assigned market participant identifiers and cancelled trade indicators, thereby seeking to implement changes that would be cost effective and benefit Industry Members and Participants;
- Assisted with the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Provided advice regarding CAT policies and procedures;
- Analyzed the SEC's amendment of the CAT NMS Plan regarding financial accountability;
- Provided interpretations of and related to the CAT NMS Plan;
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues; and
- Assisted with third-party vendor agreements.

Law Firm: Pillsbury. The legal costs for CAT during the Pre-FAM Period include costs related to the legal services performed by Pillsbury. The Participants interviewed this law firm as well as other potential law firms to provide legal assistance regarding certain liability matters. After considering a variety of factors in its analysis, including the relevant expertise and fees of the firm, CAT LLC determined to hire Pillsbury in April 2019. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees were paid by CAT LLC to Pillsbury. The legal costs for Pillsbury during the

Pre-FAM Period included costs incurred from April 2019 until June 22, 2020 to address legal matters regarding the agreements between CAT Reporters and CAT LLC concerning certain terms associated with CAT Reporting (the "Reporter Agreement"). During that period, Pillsbury advised CAT LLC regarding applicable legal matters, participated in negotiations between the Participants and Industry Members, participated in meetings with senior SEC staff, the Chairman, and Commissioners, represented CAT LLC and the Participants in an SEC administrative proceeding, and drafted a proposed amendment to the CAT NMS Plan regarding liability matters. Liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants. Moreover, litigation involving CAT LLC is an expense of operating the CAT, and, therefore, is appropriately an obligation of both Participants and Industry Members under the CAT Funding Model.

(g) Consulting Costs

The consulting costs of \$17,013,414 represent the fees paid to the consulting firm Deloitte & Touche LLP ("Deloitte") as project manager during the Pre-FAM Period, from October 2012 until June 22, 2020. These consulting costs include costs for advisory services related to the operation of the CAT, and meeting facilitation and communications coordination, vendor support and financial analyses.

To help facilitate project management given the unprecedented complexity and scope of the CAT project, the Participants determined it was necessary to engage a consulting firm to assist with the CAT project in 2012, following the adoption of Rule 613. A variety of factors were considered in the analysis of prospective consulting firms, including (1) the firm's qualifications, resources, and expertise; (2) the firm's relevant experience and understanding of the regulatory issues raised by the CAT and in coordinating matters of similar scope; (3) the composition of the consulting team; and (4) professional fees. Following a series of interviews, the exchanges and FINRA as a consortium determined that Deloitte was well qualified given the balance of these considerations and engaged Deloitte on October 1, 2012.

Deloitte's fee rates are negotiated on an annual basis and are in line with market rates for this type of specialized consulting work. CAT LLC assesses

Deloitte's performance and reviews prospective budgets and staffing plans submitted by Deloitte on an annual basis. Deloitte's compensation arrangements are reasonable and appropriate, and in line with the rates charged by other leading consulting firms for similar work.

The consulting costs for CAT during the period from 2012 until the formation of the CAT NMS, LLC were paid directly by the Participants to Deloitte. After the formation of CAT NMS, LLC, the consulting fees were paid by CAT LLC to Deloitte. CAT LLC reviewed the consulting fees each month and approved the invoices.

After Deloitte was hired in 2012 through the end of the Pre-FAM Period on June 22, 2020 (excluding the consulting costs from November 15, 2017 through November 15, 2018), Deloitte provided a variety of consulting services, including the following:

- Established and implemented program operations for the CAT project, including the program management [*sic*] office and workstream design;
- Assisted with the Plan Processor selection process, including but not limited to, the development of the RFP and the bidder evaluation process, and facilitation and consolidation of the Participant's independent reviews;
- Assisted with the development and drafting of the CAT NMS Plan, including conducting cost-benefit studies, analyzing OATS and CAT requirements, and drafting appendices to the Plan;
- Assisted with cost and funding-related activities for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided governance support to the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (e.g., Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding and Other Products) and the DAG, governance support during the transition to the new governance structure under the CAT NMS Plan and governance support after the adoption of the CAT NMS Plan, which involved support for the Operating Committee, Advisory Committee, Compliance Subcommittee and CAT working groups;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings

and communications, and interfacing with law firms and the SEC;

- Assisted with industry outreach and communications regarding the CAT, including assistance with industry outreach events, the development of the CAT website, frequently asked questions, and coordinating with the CAT LLC's public relations firm;
- Provided support for updating the SEC on the progress of the development of the CAT;
- Provided active planning and coordination with and support for the Initial Plan Processor with regard to the development of the CAT, and reported to the Participants on the progress;
- Coordinated efforts regarding the selection of the successor Plan Processor;
- Assisted with the transition from the Initial Plan Processor to the successor Plan Processor, including support for the Operating Committee and successor Plan Processor for the new role; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(h) Insurance

The insurance costs of \$880,419 represent the cost incurred for insurance for CAT during the Pre-FAM Period. Commencing in 2020, CAT LLC performed an evaluation of various potential alternatives for CAT insurance policies, which included engaging in discussions with different insurance companies and conducting cost comparisons of various alternative approaches to insurance. Based on an analysis of a variety of factors, including coverage and premiums, CAT LLC determined to purchase cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance from USI Insurance Services LLC ("USI"). Such policies are standard for corporate entities, and cyber security liability insurance is important for the CAT System. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(i) Professional and Administration Costs

In adopting the CAT NMS Plan, the Commission amended the Plan to add a requirement that CAT LLC's financial statements be prepared in compliance with GAAP, audited by an independent public accounting firm, and made

publicly available.⁴⁶ The professional and administration costs include costs related to accounting and accounting advisory services to support the operating and financial functions of CAT, financial statement audit services by an independent accounting firm, preparation of tax returns, and various cash management and treasury functions. In addition, professional and administration costs for the Pre-FAM Period include costs related to the receipt of market data and a security assessment. The costs for these professional and administration services were \$1,082,036 for the Pre-FAM Period.

Financial Advisory Firm: Anchin Accountants & Advisors (“Anchin”). CAT LLC determined to hire a financial advisory firm, Anchin, to assist with financial matters for the CAT in April 2018. CAT LLC interviewed Anchin as well as other potential financial advisory firms to assist with the CAT project, considering a variety of factors in its analysis, including the firm’s relevant expertise and fees. The hourly fee rates for this firm were in line with market rates for these financial advisory services. The fees for these services were paid by CAT LLC to Anchin.

After Anchin was hired in April 2018 through the end of the Pre-FAM Period on June 22, 2020 (excluding the period from April 2018 through November 15, 2018), Anchin provided a variety of services, including the following:

- Developed, updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Addressed accounting and financial reporting matters relating to the transition from CAT NMS, LLC to Consolidated Audit Trail, LLC, including supporting the dissolution of CAT NMS, LLC;
- Supported compliance with the CAT NMS Plan;

- Worked with and provided support to the Operating Committee and various CAT working groups;

- Prepared monthly, quarterly and annual financial statements;

- Supported the annual financial statement audits by an independent auditor;

- Reviewed historical costs from inception; and

- Provided accounting and financial information in support of SEC filings.

Accounting Firm: Grant Thornton LLP (“Grant Thornton”). In February 2020, CAT LLC determined to engage an independent accounting firm, Grant Thornton, to complete the audit of CAT LLC’s financial statements, in accordance with the requirements of the CAT NMS Plan. CAT LLC interviewed this firm as well as another potential accounting firm to audit CAT LLC’s financial statements, considering a variety of factors in its analysis, including the relevant expertise and fees of each of the firms. CAT LLC determined that Grant Thornton was well-qualified for the proposed role given the balance of these considerations. Grant Thornton’s fixed fee rate compensation arrangement was reasonable and appropriate, and in line with the market rates charged for these types of accounting services. The fees for these services were paid by CAT LLC to Grant Thornton.

Market Data Provider: Exegy. The professional and administrative costs for the Pre-FAM Period included costs related to the receipt of certain market data for the CAT pursuant to an agreement with the CAT LLC, and then with FCAT. Exegy provided SIP Data required by the CAT NMS Plan.

After performing an analysis of the available market data vendors to confirm that the data provided met the SIP Data requirements of the CAT NMS Plan and comparing the costs of the vendors providing the required SIP Data, CAT LLC determined to purchase market data from Exegy from July 2018 through March 2019. CAT LLC determined that, unlike certain other vendors, Exegy provided market data that included all data elements required by the CAT NMS Plan.⁴⁷ In addition, the fees were reasonable and in line with market rates for the market data received. Accordingly, the professional and administrative costs for the Pre-FAM Period include the Exegy costs from November 2018 through March 2019. The cost of the market data was reasonable for the market data received.

The fees for the market data were paid directly by CAT LLC to Exegy.

Upon the termination of the contract between CAT LLC and Exegy, FCAT entered into a contract with Exegy to purchase the required market data from Exegy in July 2019. All costs under the contract were treated as a direct pass through cost to CAT LLC. Therefore, the fees for the market data were paid by CAT LLC to FCAT, who, in turn, paid Exegy for the market data.

Security Assessment: RSM US LLP (“RSM”). The operating costs for the Pre-FAM Period include costs related to a third party security assessment of the CAT performed by RSM. The assessment was designed to verify and validate the effective design, implementation, and operation of the controls specified by NIST Special Publication 800–53, Revision 4 and related standards and guidelines. Such a security assessment is in line with industry practice and important given the data included in the CAT. CAT LLC determined to engage RSM to perform the security assessment, after considering a variety of factors in its analysis, including the firm’s relevant expertise and fees. The fees were reasonable and in line with market rates for such an assessment. RSM performed the assessment from October 2018 through December 2018. Accordingly, the costs for the Pre-FAM Period include the costs incurred in November and December 2018. The cost for the security assessment were paid directly to RSM by CAT LLC.

(j) Public Relations Costs

The public relations costs of \$224,669 represent the fees paid to public relations firms during the Pre-FAM Period for professional communications services to CAT, including media relations consulting, strategy and execution. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants. Specifically, the public relations firms provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (e.g., amendments to the CAT NMS Plan). Public relations services were important for various reasons, including monitoring comments made by market

⁴⁶ Section 9.2 of the CAT NMS Plan.

⁴⁷ See Section 6.5(a)(ii) of the CAT NMS Plan.

participants about CAT and understanding issues related to the CAT discussed on the public record.

The services performed by each of the public relations firms were comparable. The fees for such services were reasonable and in line with market rates. Only one public relations firm was engaged at a time; the three firms were engaged sequentially as the primary public relations contact moved among the three firms during this time period.

Public Relations Firm: Peppercomm, Inc. ("Peppercomm"). The national securities exchanges and FINRA, acting as a consortium, determined to hire the public relations firm Peppercomm in October 2014 and continued to engage this firm through September 2017. The exchanges and FINRA made this engagement decision after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fee rates for this public relations firm were negotiated on an arm's length basis and were in line with market rates for these types of services.

The public relations costs during the period from October 2014 until the formation of the CAT NMS, LLC were paid directly by the exchanges and FINRA to the public relations firm. After the formation of CAT NMS, LLC, the consulting fees were paid by CAT LLC.

Public Relations Firm: Sloane & Company ("Sloane"). CAT LLC determined to hire a new public relations firm, Sloane, in March 2018, based on, among other things, their expertise and the primary contact's history with the project. The fee rates for this public relations firm were in line with market rates for these types of services. The fees during the Pre-FAM Period were paid by CAT LLC to Sloane. CAT LLC continued the engagement with Sloane until February 2020.

Public Relations Firm: Peak Strategies. CAT LLC determined to hire a new public relations firm, Peak Strategies, in March 2020, based on, among other things, their expertise and the primary contact's history with the project. The fee rates for this public relations firm were in line with market

rates for these types of services. The fees during the Pre-FAM Period were paid by CAT LLC to Peak Strategies.

(ii) *Historical CAT Costs Incurred in Financial Accountability Milestone Period 1*

Historical CAT Costs 1 would include costs incurred by CAT and already funded by the Participants during Period 1 of the Financial Accountability Milestones ("FAM Period 1"),⁴⁸ which covers the period from June 22, 2020–July 31, 2020. Historical CAT Costs 1 would include costs for FAM Period 1 of \$6,377,343. The Participants would remain responsible for one-third of this cost (which they have previously paid) (\$2,125,781), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$2,125,781) and CEBBs paying one-third (\$2,125,781). The following table breaks down Historical CAT Costs 1 for FAM Period 1 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Historical CAT costs for FAM Period 1 *
Capitalized Developed Technology Costs **	\$1,684,870
Technology Costs	3,996,800
Cloud Hosting Services	2,642,122
Operating Fees	1,099,680
CAIS Operating Fees	254,998
Change Request Fees	
Legal	481,687
Consulting	137,209
Insurance	
Professional and administration	69,077
Public relations	7,700
Total Operating Expenses	6,377,343

* The costs described in this table of costs for FAM Period 1 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

** The non-cash amortization of these capitalized developed technology costs of \$362,121 incurred during FAM Period 1 have been appropriately excluded from the above table.⁴⁹

By the completion of FAM Period 1, CAT LLC was required to implement the reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of equities transaction data and options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information.⁵⁰ CAT LLC completed the requirements of FAM Period 1 by July 31, 2020. The following describes the costs for each of the categories for FAM Period 1.

(a) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 1 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production

environments, during the FAM 1 Period. Accordingly, the \$2,642,122 in technology costs for cloud hosting services represent costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 1. The fee arrangement for AWS described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. Moreover, CAT LLC continued to believe that AWS's maturity in the cloud services space as well as the significant cost and time

⁴⁸ Section 11.6(a)(i)(A) of the CAT NMS Plan.

⁴⁹ As discussed above, with respect to certain costs that were "appropriately excluded," such excluded costs relate to the amortization of capitalized technology costs, which are amortized

over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

⁵⁰ See definition of "Initial Industry Member Core Equity and Options Reporting" in Section 1.1 of the CAT NMS Plan.

necessary to move the CAT to a different cloud services provider supported the continued engagement of AWS.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During the FAM 1 Period, the volume of CAT Data

continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a and Phase 2b Industry Member Data (including certain linkages) as well

as SIP Data, reference data and other types of Other Data. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 1.⁵¹

	Date range: 6/22/20–7/31/20
Average Daily Volume in Billions:	
Participant—Equities	6
Participant—Options	103
Industry Member—Equities	7
Industry Member—Options	0.31
SIP—Options & Equities	74
Average Total Daily Volume	185
Cumulative Total Events for the Period	5,190
Total Compute Hours for the Period	2,612,082
Storage Footprint at End of Period (Petabytes)	57.47

(b) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 1. Accordingly, the \$1,099,680 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 1. The fee arrangement for FCAT described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. During FAM Period 1, FCAT's activities with respect to the CAT included the following:

- Published iterative drafts of draft Technical Specifications for Phase 2d, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Published iterative drafts of CAIS Technical Specifications, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Facilitated Industry Member reporting of Quote Sent Time on Options Market Maker quotes;
- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to

Participant and Industry Member reporting;

- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(c) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 1. Accordingly, the \$254,998 in technology costs for CAIS operating fees represent costs incurred for services provided by Kingland during FAM Period 1. The fee arrangement for Kingland described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. During FAM Period 1, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to CCID Alternative, as well as the acceleration of the reporting of LTIDs.

(d) Technology Costs—Change Request Fees

CAT LLC did not incur costs related to change requests during FAM Period 1.

(e) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 1 of \$1,684,870 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include: (1) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including separate production and industry test entitlements, and reprocessing of exchange event timestamps; (2) implementation fees; and (3) license fees.

(f) Legal Costs

The legal costs of \$481,687 represent the fees paid for legal services provided by two law firms, WilmerHale and Pillsbury during FAM Period 1.

Law Firm: WilmerHale. CAT LLC continued to employ WilmerHale during FAM Period 1 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 1 were paid by CAT LLC to WilmerHale. During FAM Period 1, WilmerHale provided legal assistance to the CAT including with regard to the following:

⁵¹ Note that the volume data described in this table does not include CAIS data.

- Assisted with the development of the CAT funding model and drafted related amendments and fee filings;
- Drafted exemptive requests from CAT NMS Plan requirements regarding, for example, verbal activity, options market maker quote sent time, TRF linkages, and allocations;
- Provided interpretations related to CAT NMS Plan requirements, including the Financial Accountability Milestone amendment;
- Assisted with compliance with Regulation SCI;
- Provided support for the Operating Committee, Compliance Subcommittee, working groups and Leadership Team, including with regard to meetings with the SEC staff;
- Assisted with the drafting of the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Assisted with communications and presentations for the industry regarding CAIS;
- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for Compliance Subcommittee, including with regard to response to OCIE examinations and the annual assessment;
- Provided guidance regarding CAT technical specifications;
- Assisted with third-party vendor agreements; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

Law Firm: Pillsbury. CAT LLC continued to employ Pillsbury during FAM Period 1 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 1 were paid by CAT LLC to Pillsbury. During FAM Period 1, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During that period, Pillsbury advised CAT LLC regarding applicable legal matters and drafted a proposed amendment to the CAT NMS Plan regarding liability matters. Liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants.

(g) Consulting Costs

The consulting costs of \$137,209 represent the fees paid to Deloitte as project manager during FAM Period 1. CAT LLC continued to employ Deloitte during FAM Period 1 based on, among

other things, their expertise and cumulative experience with the CAT. The fee rates for Deloitte during FAM Period 1 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 1 were paid by CAT LLC to the consulting firm. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 1, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT;
- Assisted with the transition from the Initial Plan Processor to the successor Plan Processor; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(h) Insurance

Although insurance was in effect during FAM Period 1, CAT LLC did not incur costs related to insurance during FAM Period 1.

(i) Professional and Administration Costs

Financial Advisory Firm: Anchin. The professional and administration costs of \$69,077 represent the fees paid to Anchin during FAM Period 1. CAT LLC continued to employ Anchin during FAM Period 1 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these type of financial advisory services. The fees for these services during FAM Period 1 were paid by CAT LLC to Anchin. During FAM Period 1, Anchin provided a variety of services, including the following:

- Maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;

- Provided accounting research and consultations on various accounting, financial reporting and tax matters;

- Addressed various accounting, financial reporting and operating inquiries from Participants;

- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;

- Supported compliance with the CAT NMS Plan;

- Worked with and provided support to the Operating Committee and various CAT working groups; and

- Prepared monthly and quarterly financial statements.

(j) Public Relations Costs

The public relations costs of \$7,700 represent the fees paid to Peak Strategies during FAM Period 1. CAT LLC continued to employ Peak Strategies during FAM Period 1 based on, among other things, their expertise and history with the project. The fee rates for this firm were reasonable and in line with market rates for these types of services. The fees for these services during FAM Period 1 were paid by CAT LLC to Peak Strategies. During FAM Period 1, Peak Strategies continued to provide professional communications services to CAT LLC, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (e.g., amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(iii) Historical CAT Costs Incurred in Financial Accountability Milestone Period 2

Historical CAT Costs 1 would include costs incurred by CAT LLC and already funded by Participants during Period 2 of the Financial Accountability

Milestones (“FAM Period 2”),⁵² which covers the period from August 1, 2020–December 31, 2020. Historical CAT Costs 1 would include costs for FAM Period 2 of \$42,976,478. The Participants would remain responsible

for one-third of this cost (which they have previously paid) (\$14,325,493), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$14,325,493) and CEBs paying one-

third (\$14,325,493). The following table breaks down Historical CAT Costs 1 for FAM Period 2 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Historical CAT costs for FAM Period 2 *
Capitalized Developed Technology Costs **	\$6,761,094
Technology Costs	31,460,033
Cloud Hosting Services	20,709,212
Operating Fees	9,108,700
CAIS Operating Fees	1,590,298
Change Request Fees	51,823
Legal	2,766,644
Consulting	532,146
Insurance	976,098
Professional and administration	438,523
Public relations	41,940
Total Operating Expenses	42,976,478

* The costs described in this table of costs for FAM Period 2 were calculated based upon CAT LLC’s review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

** The non-cash amortization of these capitalized developed technology costs of \$1,892,505 incurred during FAM Period 2 have been appropriately excluded from the above table.⁵³

By the completion of FAM Period 2, CAT LLC was required to implement the following with regard to the CAT:

(a) Industry Member reporting (excluding reporting by Small Industry Members that are not OATS reporters) for equities transactions, excluding Customer Account Information, CustomerID, and Customer Identifying Information, is developed, tested, and implemented at a 5% Error Rate or less and with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, and trade reporting facilities linkage to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, excluding linkage of representative orders, from order origination through order execution or order cancellation; and (b) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3 and Section 8.2.1 incorporates the Industry Member equities transaction data described in condition (a) and is available to the Participants and to the Commission.⁵⁴

CAT LLC completed the requirements of FAM Period 2 by December 31, 2020.

The following describes the costs for each of the categories for FAM Period 2.

(a) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 2 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production environments, during the FAM 2 Period. Accordingly, the \$20,709,212 in technology costs for cloud hosting services represent costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 2. The fee arrangement for AWS described above with regard to the Pre-FAM

Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During the FAM 2 Period, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a and Phase 2b Industry Member Data (including certain linkages) as well as SIP Data, and Other Data, including reference data. In addition, Industry Members began reporting LTID account information. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 2.⁵⁵

	Date range: 8/1/20–12/31/20
Average Daily Volume in Billions:	
Participant—Equities	6
Participant—Options	116
Industry Member—Equities	11
Industry Member—Options	0.98
SIP—Options & Equities	80
Average Total Daily Volume	282
Cumulative Total Events for the Period	2,170

⁵² Section 11.6(a)(i)(B) of the CAT NMS Plan.

⁵³ As discussed above, with respect to certain costs that were “appropriately excluded,” such excluded costs relate to the amortization of capitalized technology costs, which are amortized

over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

⁵⁴ See definition of “Full Implementation of Core Equity Reporting Requirements” in Section 1.1 of the CAT NMS Plan.

⁵⁵ Note that the volume data described in this table does not include CAIS data.

	Date range: 8/1/20–12/31/20
Total Compute Hours for the Period	15,660,392
Storage Footprint at End of Period (Petabytes)	114.59

(b) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 2. Accordingly, the \$9,108,700 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 2. The fee arrangement for FCAT described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement. During FAM Period 2, FCAT's activities with respect to the CAT included publishing the Technical Specifications for Phase 2d and overseeing the reporting of firm to firm and intrafirm linkages by Industry Members. In addition, FCAT also continued to engage in the following activities during FAM Period 2:

- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the development and implementation of the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with the Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(c) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 2. Accordingly, the \$1,590,298 in technology costs for CAIS operating fees represent costs incurred for services provided by Kingland during FAM Period 2. The fee arrangement for Kingland described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement. During FAM Period 2, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to the CCID Alternative, as well as the acceleration of the reporting of LTIDs.

(d) Technology Costs—Change Request Fees

During FAM Period 2, CAT LLC engaged FCAT to pursue certain change requests in accordance with the Plan Processor Agreement. The change request costs were paid by CAT LLC to FCAT. Specifically, during FAM Period 2, CAT incurred costs of \$51,823 related to a change request regarding the addition of functionality for exchange Participants to report rejected messages to the CAT.

(e) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 2 of \$6,761,094 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Plan Processor; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including costs related to separate production and industry test entitlements, market maker reference

data, and back-processing of exchange exception logic; (3) implementation fees; and (4) license fees.

(f) Legal Costs

The legal costs of \$2,766,644 represent the fees paid for legal services provided by two law firms, WilmerHale and Pillsbury during FAM Period 2.

Law Firm: WilmerHale. CAT LLC continued to employ WilmerHale during FAM Period 2 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 2 were paid by CAT LLC to WilmerHale. During FAM Period 2, the legal assistance provided by WilmerHale included providing legal advice regarding the following:

- Assisted with the development of the CAT funding model and drafting related amendments and rule filings;
- Drafted exemptive requests from CAT NMS Plan requirements regarding, for example, allocations, exchange activity, OTQT, initial data validation, error corrections and recordkeeping;
- Provided interpretations related to CAT NMS Plan requirements, including with regard to the Financial Accountability Milestone amendment, FAQs and technical specifications;
- Provided support for the Operating Committee, Compliance Subcommittees, working groups and Leadership Team, including with regard to meetings with the SEC staff;
- Assisted with the Implementation Plan and Quarterly Progress Reports required pursuant to Section 6.6 of the CAT NMS Plan;
- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for the Compliance Subcommittee, including with regard to responses to OCIE examinations and the annual assessment;
- Provided guidance regarding the SEC's proposed security amendments to the CAT NMS Plan;
- Provided guidance regarding SRO rule filings for the retirement of systems;
- Provided legal support for Operating Committee meetings, including drafting resolutions and other materials and voting advice;

- Assisted with third-party vendor agreements (e.g., with regard to Anchin, Grant Thornton and insurance policies);
- Assisted with change requests; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

Law Firm: Pillsbury. CAT LLC continued to employ Pillsbury during FAM Period 2 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 2 were paid by CAT LLC to Pillsbury. During FAM Period 2, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During that period, Pillsbury advised CAT LLC regarding applicable legal matters and drafted and filed a proposed amendment to the CAT NMS Plan regarding liability matters. As discussed above, liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants.

(g) Consulting Costs

The consulting costs of \$532,146 represent the fees paid to Deloitte as project manager during FAM Period 2. CAT LLC continued to employ Deloitte during FAM Period 2 based on, among other things, their expertise and long history with the project. The fee rates for Deloitte during FAM Period 2 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 2 were paid to Deloitte by CAT LLC. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 2, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided support for third-party vendors for the CAT, including FCAT,

Anchin and the law firms engaged by CAT LLC.

(h) Insurance

The insurance costs of \$976,098 represent the fees paid for insurance during FAM Period 2. CAT LLC continued to maintain cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance offered by USI. After engaging in a process for renewing the coverage, CAT LLC determined to purchase these insurance policies from USI. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(i) Professional and Administration Costs

The professional and administration costs of \$438,523 represent the fees paid to Anchin and Grant Thornton for financial services provided during FAM Period 2.

Financial Advisory Firm: Anchin. CAT LLC continued to engage Anchin during FAM Period 2 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these types of financial advisory services. The fees for these services during FAM Period 2 were paid by CAT LLC to Anchin. During FAM Period 2, Anchin provided a variety of services, including the following:

- Updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated [sic] bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from the Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;

- Supported the annual financial statement audit by an independent auditor; and

- Reviewed historical costs from inception.

Accounting Firm: Grant Thornton. CAT LLC continued to employ the accounting firm Grant Thornton during FAM Period 2 based on, among other things, its expertise and cumulative knowledge of CAT LLC. CAT LLC continued to believe that Grant Thornton was well qualified for its role and its fee rates were in line with market rates for these accounting services. The fees for these services during FAM Period 2 were paid by CAT LLC to Grant Thornton. During FAM Period 2, Grant Thornton performed a financial statement audit for CAT LLC as an independent accounting firm.

(j) Public Relations Costs

The public relations costs of \$41,940 represent the fees paid to Peak Strategies during FAM Period 2. CAT LLC continued to employ Peak Strategies during FAM Period 2 based on, among other things, their expertise and history with the project. The fee rates for this firm were in line with market rates for these types of services. The fees for these services during FAM Period 2 were paid by CAT LLC to Peak Strategies. During FAM Period 2, Peak Strategies continued to provide professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (e.g., amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(iv) Historical CAT Costs Incurred in Financial Accountability Milestone Period 3

Historical CAT Costs 1 would include costs incurred by CAT and already funded by the Participants during Period 3 of the Financial Accountability Milestones (“FAM Period 3”),⁵⁶ which

covers the period from January 1, 2021–December 31, 2021. Historical CAT Costs 1 would include costs for FAM Period 3 of \$144,415,268. The Participants would remain responsible for one-third of this cost (which they have previously paid) (\$48,138,423), and Industry Members would be

responsible for the remaining two-thirds, with CEBBs paying one-third (\$48,138,423) and CEBBs paying one-third (\$48,138,423). The following table breaks down Historical CAT Costs 1 for FAM Period 3 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Historical CAT costs for FAM Period 3 *
Capitalized Developed Technology Costs **	\$10,763,372
<i>Technology Costs</i>	123,639,402
Cloud Hosting Services	94,574,759
Operating Fees	23,106,091
CAIS Operating Fees	5,562,383
Change Request Fees	396,169
Legal	6,333,248
Consulting	1,408,209
Insurance	1,582,714
Professional and administration	595,923
Public relations	92,400
Total Operating Expenses	144,415,268

* The costs described in this table of costs for FAM Period 3 were calculated based upon CAT LLC’s review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

** The non-cash amortization of these capitalized developed technology costs of \$5,108,044 incurred during FAM Period 3 have been appropriately excluded from the above table.⁵⁷

By the completion of FAM Period 3, CAT LLC was required to implement the following requirements with regard the CAT:

(a) reporting to the Order Audit Trail System (“OATS”) is no longer required for new orders; (b) Industry Member reporting for equities transactions and simple electronic options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, trade reporting facilities linkage, and representative order linkages (including any equities allocation information provided in an Allocation Report) to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, is developed, tested, and implemented at a 5% Error Rate or less; (c) Industry Member reporting for manual options transactions and complex options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with all required linkages to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or

order cancellation, including any options allocation information provided in an Allocation Report, is developed, tested, and fully implemented; (d) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3, Section 8.2.1, and Section 8.5 incorporates the data described in conditions (b)–(c) and is available to the Participants and to the Commission; and (e) the requirements of Section 6.10(a) are met.⁵⁸

CAT LLC completed the requirements of FAM Period 3 by December 31, 2021. The following describes the costs for each of the categories for FAM Period 3.

(a) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 3 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production

environments, during the FAM 3 Period. Accordingly, the \$94,574,759 in technology costs for cloud hosting services represents costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 3. The fee arrangement for AWS described above for the earlier periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During FAM Period 3, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a, Phase 2b, Phase 2c and Phase 2d Industry Member Data (including certain linkages), SIP Data, Other Data, including reference data, and LTID account information. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 3.⁵⁹

	Date range: 1/1/21 to 4/25/21	Date range: 4/26/21 to 12/31/21 *
Average Daily Volume in Billions:		

⁵⁶ Section 11.6(a)(i)(C) of the CAT NMS Plan.

⁵⁷ As discussed above, with respect to certain costs that were “appropriately excluded,” such excluded costs relate to the amortization of capitalized technology costs, which are amortized

over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

⁵⁸ See definition of “Full Availability and Regulatory Utilization of Transactional Database Functionality” in Section 1.1 of the CAT NMS Plan.

⁵⁹ Note that the volume data described in this table does not include CAIS data.

	Date range: 1/1/21 to 4/25/21	Date range: 4/26/21 to 12/31/21 *
Participant—Equities	9	9
Participant—Options	135	136
Industry Member—Equities	20	19
Industry Member—Options	2	2
SIP—Options & Equities	129	137
Average Total Daily Volume	297	304
Cumulative Total Events for the Period	7,480	5,310
Total Compute Hours for the Period	15,860,304	33,487,318
Storage Footprint at End of Period (Petabytes)	180.22	284.62

* Start of Participant Equities in CAT format and SIP Equities on 4/26/21.

(b) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 3. Accordingly, the \$23,106,091 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 3. The fee arrangement for FCAT described above with regard to the prior Periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement. During FAM Period 3, FCAT's activities with respect to the CAT included the following:

- Facilitated Phase 2c and Phase 2d testing for Industry Members;
- Oversaw creation of linkages of the lifecycle of order events based on the received data through Phase 2d;
- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with the Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(c) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement with FCAT discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 3. Accordingly, the \$5,562,383 in technology costs for CAIS operating fees represents costs incurred for services provided by Kingland during FAM Period 3. The fee arrangement for Kingland described above with regard to the prior Periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement. During FAM Period 3, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to the CCID Alternative, as well as the acceleration of the reporting of LTIDs. The full CAIS Technical Specifications were published during FAM Period 3.

(d) Technology Costs—Change Request Fees

During FAM Period 3, CAT LLC engaged FCAT to pursue certain change requests in accordance with the Plan Processor Agreement. The change request costs were paid by CAT LLC to FCAT. Specifically, during FAM Period 3, CAT incurred costs of \$396,169 related to change requests, including the following: (1) the addition of functionality for exchange Participants to report rejected messages to the CAT; (2) the migration of MIRS query engine to AWS to reduce operational costs and increase resiliency; and (3) updating the Participant Technical Specifications to allow for two-sided Participant option quote reporting.

(e) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 3 of \$10,763,372 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such

costs include (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Plan Processor, including the transition from equity data received by FINRA pursuant to various regulatory services agreements between FINRA and Participant exchanges to the equity CAT Data, and the completion of the Industry Member Phase 2d options manual and complex orders go-live requirements; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including costs related to off-exchange volume concentration, Participant 24-hour trading and an external metastore; (3) implementation fees; and (4) license fees.

(f) Legal Costs

The legal costs of \$6,333,248 represent the fees paid for legal services provided by three law firms, WilmerHale, Pillsbury and Covington & Burling LLP ("Covington") during FAM Period 3.

Law Firm: WilmerHale. CAT LLC continued to employ WilmerHale during FAM Period 3 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 3 were paid by CAT LLC to WilmerHale. During FAM Period 3, the legal assistance provided by WilmerHale included providing legal advice regarding the following:

- Assisted with the development of the CAT funding model and drafting related amendments and rule filings;
- Drafted exemptive requests from CAT NMS Plan requirements, including, for example, verbal activity regarding Phase 2c cutover, error reports, error corrections, Phase 2d Reporting, unique Order-ID on internal route events,

reporting addresses, recordkeeping, and unique CCID for foreign customers;

- Provided interpretations related to CAT NMS Plan requirements, including with regard to the Financial Accountability Milestone amendment, FAQs, CAIS requirements, ADF, and technical specifications;

- Provided support for the Operating Committee, Compliance Subcommittee, working groups and Leadership Team, including with regard to meetings with the SEC staff;

- Assisted with the Implementation Plan and Quarterly Progress Reports required pursuant to Section 6.6(c) of the CAT NMS Plan;

- Drafted SRO rule filings related to the CAT Compliance Rule;

- Provided support for Compliance Subcommittee, including with regard to responses to OCIE examinations and the annual assessment;

- Provided guidance regarding the SEC's proposed security amendments to the CAT NMS Plan;

- Provided guidance regarding SRO rule filings for the retirement of systems;

- Provided legal support for Operating Committee meetings, including drafting resolutions and other materials and voting advice;

- Provided assistance with change requests;

- Provided guidance and regulatory support for litigation regarding the response to the SEC's exemptive orders;

- Assisted with communications with the industry, including CAT Alerts and presentations;

- Provided guidance regarding the confidentiality of CAT Data, including third-party information requests;

- Assisted with cost management analysis and proposals; and

- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

Law Firm: Pillsbury. CAT LLC continued to employ Pillsbury during FAM Period 3 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 3 were paid by CAT LLC to Pillsbury. During FAM Period 3, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During this period, Pillsbury advised CAT LLC regarding applicable legal matters, reviewed and responded to comment letters regarding the proposed Plan amendment, participated in meetings with senior SEC staff, responded to comments submitted following the SEC's April 6,

2021 order instituting proceedings,⁶⁰ and assessed legal matters regarding the SEC's October 29, 2021 order denying the proposed Plan amendment.⁶¹

Law Firm: Covington. CAT LLC hired Covington for litigation with the SEC regarding certain exemptive orders related to the CAT, including orders issued in December 2020.⁶² CAT LLC interviewed this law firm as well as other potential law firms, considering a variety of factors in its analysis for choosing legal assistance, including the relevant expertise and fees of the potential lawyers. CAT LLC approved the engagement of Covington in January 2021. The fee rates for this law firm, which were calculated based on hourly rates, were in line with market rates for specialized services. The legal fees for FAM Period 3 for this firm were paid by CAT LLC to Covington.

After Covington was hired in 2021 through the end of 2021, the firm provided legal assistance regarding the litigation with the SEC regarding the 2020 Orders. These services included researching, drafting, and filing motions to stay the 2020 orders and related materials in proceedings before the SEC, as well as researching, drafting, and filing petitions for judicial review of the 2020 Orders in proceedings before the U.S. Court of Appeals for the D.C. Circuit. Covington oversaw ongoing litigation proceedings on these matters, and also supported WilmerHale with respect to settlement negotiations with the SEC staff regarding the 2020 Orders.

In addition to these services, CAT LLC engaged Covington in November 2021 to provide assistance with respect to the SEC's disapproval of CAT NMS Plan amendments concerning a proposed limitation on liability in the event of a data breach or similar event. Covington provided advice concerning CAT's response to the SEC's disapproval order. This work accounted for a minority of Covington's fees in 2021.⁶³

(g) Consulting Costs

The consulting costs of \$1,408,209 represent the fees paid to Deloitte as

⁶⁰ Securities Exchange Act Rel. No. 91487 (Apr. 6, 2021), 86 FR 19054 (Apr. 12, 2021).

⁶¹ Securities Exchange Act Rel. No. 93484 (Oct. 29, 2021), 86 FR 60933 (Nov. 4, 2021).

⁶² See Securities Exchange Act Rel. No. 90688 (Dec. 16, 2020), 85 FR 83634 (Dec. 22, 2020); and Securities Exchange Act Rel. No. 90689 (Dec. 16, 2020), 85 FR 83667 (Dec. 22, 2020) (collectively, the "2020 Orders").

⁶³ As discussed above with regard to Pillsbury's work on liability matters, liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants. Moreover, such activity is a necessary part of the operation of the CAT.

project manager during FAM Period 3. CAT LLC continued to employ Deloitte during FAM Period 3 based on, among other things, their expertise and long history with the project. The fee rates for Deloitte during FAM Period 3 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 3 were paid to Deloitte by CAT LLC. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 3, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;

- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;

- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;

- Provided support for updating the SEC on the progress of the development of the CAT; and

- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(h) Insurance

The insurance costs of \$1,582,714 represent the fees paid for insurance during FAM Period 3. CAT LLC continued to maintain cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance offered by USI. After engaging in a process for renewing the coverage, CAT LLC determined to purchase these insurance policies from USI. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(i) Professional and Administration Costs

The professional and administration costs of \$595,923 represent the fees paid to Anchin and Grant Thornton for financial services during FAM Period 3.

Financial Advisory Firm: Anchin. CAT LLC continued to employ Anchin during FAM Period 3 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these financial advisory services. The fees for these services during FAM Period 3 were paid by CAT LLC to

Anchin. During FAM Period 3, Anchin provided a variety of services, including the following:

- Updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated [*sic*] bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

Accounting Firm: Grant Thornton. CAT LLC continued to employ the accounting firm Grant Thornton during FAM Period 3 based on, among other things, their expertise and cumulative knowledge of CAT LLC. CAT LLC determined that Grant Thornton was well qualified for its role and that its fixed fee rates were in line with market rates for these accountant services. The fees for these services during FAM Period 3 were paid by CAT LLC to Grant Thornton. During FAM Period 3, Grant

Thornton provided audited financial statements for CAT LLC.

(j) Public Relations Costs

The public relations costs of \$92,400 represent the fees paid to Peak Strategies during FAM Period 3. CAT LLC continued to employ Peak Strategies during FAM Period 3 based on, among other things, their expertise and history with the project. The fee rates for this firm were in line with market rates for these types of services. The fees for these services during FAM Period 3 were paid by CAT LLC to Peak Strategies. During FAM Period 3, Peak Strategies continued to provide professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.*, congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.*, amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(v) Excluded Costs

Historical CAT Costs 1 would not include three categories of CAT costs ("Excluded Costs"): (1) \$14,749,362 of costs related to the termination of the relationship with the Initial Plan

Processor; (2) \$48,874,937, which are all CAT costs incurred from November 15, 2017 through November 15, 2018; and (3) \$19,628,791, which are costs paid to the the Initial Plan Processor from November 16, 2018 through February 2019 when the relationship with the Initial Plan Processor was concluded. The Participants would remain responsible for 100% of these costs, which total \$83,253,090. CAT LLC determined to exclude these Excluded Costs from Historical CAT Costs 1 because these costs relate to the delay in the start of reporting to the CAT and the conclusion of the relationship with the Initial Plan Processor.⁶⁴

(a) Costs Related To Conclusion of Relationship With Initial Plan Processor

First, Historical CAT Costs 1 would not include \$14,749,362 of costs related to the conclusion of the relationship with the Initial Plan Processor. Such costs include costs related to the American Arbitration Association, the legal assistance of Pillsbury with regard to the arbitration with the Initial Plan Processor, and the settlement costs related to the arbitration with the Initial Plan Processor. The Participants would remain responsible for 100% of these \$14,749,362 in costs.

(b) Costs Incurred From November 15, 2017 Through November 15, 2018

Second, Historical CAT Costs 1 would not include all CAT costs incurred from November 15, 2017 through November 15, 2018. CAT LLC determined to exclude all costs during this one-year period of \$48,874,937 from fees charged to Industry Members due to the delay in the start of reporting to the CAT. The Participants would remain responsible for 100% of these \$48,874,937 in costs. The following table breaks down these costs into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Excluded costs for November 15, 2017–November 15, 2018*
Capitalized Developed Technology Costs	\$37,852,083
Technology Costs	
Cloud Hosting Services	
Operating Fees	
CAIS Operating Fees	
Change Request Fees	
Legal	6,143,278

⁶⁴ In approving the CAT Funding Model, the Commission states that the proposed exclusion of the first two categories of Excluded Costs "is reasonable in the Commission's view because it would not require all costs incurred by the Participants to be recovered from Industry Members

through the Historical CAT Assessment, specifically excluding those costs related to the delay in the start of reporting to the CAT and costs related to the conclusion of the relationship with the Initial Plan Processor." CAT Funding Model Approval Order at 62663. In addition to the first two

categories of Excluded Costs, CAT LLC is now proposing a third category of Excluded Costs that would exclude all costs paid to the Initial Plan Processor after November 15, 2018.

Operating expense	Excluded costs for November 15, 2017– November 15, 2018 *
Consulting	4,452,106
Insurance	
Professional and administration	340,145
Public relations	87,325
Total Operating Expenses	48,874,937

* The costs described in this table of Excluded Costs were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

The following provides additional detail regarding the Excluded Costs.

(I) Technology Costs—Cloud Hosting Services, Operating Fees, CAIS Operating Fees and Change Request Fees

CAT LLC did not incur technology costs related to the categories of cloud hosting services, operating fees, CAIS operating fees or change requests during the period from November 15, 2017 through November 15, 2018.

(II) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for the period from November 15, 2017 through November 15, 2018 include capitalizable application development costs of \$37,852,083 incurred in the development of the CAT by the Initial Plan Processor. Such costs include development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Initial Plan Processor. Such costs include costs related to Industry Member technical specifications for orders and transactions, the system security plan, testing and production for Participant CAT reporting, third-party security assessment and response, query portal, onboarding of the Chief Information Security Officer, and ingestion of FINRA TRF data and FINRA data related to halts and corporate actions.

(III) Legal Costs

The legal costs of \$6,143,278 represent the fees paid to WilmerHale for legal services from November 15, 2017 through November 15, 2018. During this period, WilmerHale provided legal assistance to the CAT including with regard to the following:

- Provided legal support for the governance of the CAT, including governance support for the Operating Committee, Advisory Committee, Compliance Subcommittee, and CAT working groups;

- Assisted with the development of the CAT funding model and drafted related amendments of the CAT NMS Plan;
- Provided assistance related to CAT security;
- Drafted exemptive requests, including requests related to PII;
- Assisted with the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Provided interpretations of and related to the CAT NMS Plan;
- Provided advice with regard to regulator access to the CAT;
- Assisted with the Plan Processor transition;
- Provided assistance regarding communications with the industry regarding the CAT;
- Provided advice regarding Customer Account Information and PII;
- Provided support for litigation related to SEC exemptive orders; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretative and implementation issues.

(IV) Consulting Costs

The consulting costs of \$4,452,106 represent the fees paid to Deloitte for their role as project manager for the CAT from November 15, 2017 through November 15, 2018. During this period, Deloitte engaged in the following activities with respect to the CAT:

- Implemented program operations for the CAT project;
- Provided governance support to the Operating Committee, including support for Subcommittees and working groups of the Operating Committee (e.g., Compliance Subcommittee, Cost and Funding Working Group, Technical Working Group, Industry Outreach Working Group, Security Working Group and Steering Committee);
- Assisted with cost and funding issues for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;

- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided active planning and coordination with and support for the Initial Plan Processor with regard to the development of the CAT, and reported to the Participants on the progress.

(V) Insurance

CAT LLC did not incur costs related to insurance during the period from November 15, 2017 through November 15, 2018.

(VI) Professional and Administration Costs

The professional and administration costs of \$340,145 represent the fees paid to Anchin, Exegy and RSM from November 15, 2017 through November 15, 2018.

Financial Advisory Firm: Anchin. From the commencement of its engagement [sic] in April 2018 through November 15, 2018, Anchin engaged in the following activities with respect to the CAT:

- Developed, updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Addressed accounting and financial matters relating to the transition from CAT NMS, LLC to Consolidated Audit Trail, LLC, including supporting the dissolution of CAT NMS, LLC;
- Supported compliance with the CAT NMS Plan;

- Worked with and provided support to the Operating Committee and various CAT working groups;

- Prepared monthly, quarterly and annual financial statements;

- Supported the annual financial statement audits by an independent auditor;

- Reviewed historical costs from inception; and

- Provided accounting and financial information in support of SEC filings.

Market Data Provider: Exegy. From July 2018 through November 15, 2018, CAT LLC purchased market data from Exegy (as described in more detail above).

Security Assessment: RSM. From October 2018 through November 15, 2018, CAT LLC incurred costs for RSM's performance of a security assessment (as described in more detail above).

(VII) Public Relations Costs

The public relations costs of \$87,325 represent the fees paid to Sloane from November 15, 2017 through November 15, 2018. From the commencement of its engagement [*sic*] in March 2018 through November 15, 2018, Sloane provided professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, Sloane provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.*, congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.*, amendments to the CAT NMS Plan).

(c) Costs Paid to Initial Plan Processor From November 16, 2018 Through February 2019

Third, Historical CAT Costs 1 would not include the \$19,628,791 in costs paid to the Initial Plan Processor from November 16, 2018 through February 2019 when CAT LLC's relationship with the Initial Plan Processor concluded. CAT LLC determined that Historical CAT Costs 1 would not include any fees paid to the Initial Plan Processor after November 15, 2017,⁶⁵ which was the date by which Participants were required to begin reporting to the

CAT.⁶⁶ As discussed above, the Participants determined that Historical CAT Costs 1 would not include all CAT costs incurred from November 15, 2017 through November 15, 2018, which includes \$37,852,083 in Initial Plan Processor costs incurred from November 15, 2017 through November 15, 2018 (as well as other CAT costs during this period). The remaining Initial Plan Processor costs incurred after November 15, 2018 are the \$19,628,791 in costs for the period from November 16, 2018 through February 2019 incurred in the development of the CAT by the Initial Plan Processor, as well as a transition fee for the transition from the Initial Plan Processor to the successor Plan Processor. The Participants would remain responsible for 100% of these \$19,628,791 in costs.

(C) Historical Recovery Period 1

Under the CAT NMS Plan, the Operating Committee is required to reasonably establish the length of the Historical Recovery Period used in calculating each Historical Fee Rate based upon the amount of the Historical CAT Costs to be recovered by the Historical CAT Assessment, and to describe the reasons for its length.⁶⁷ The Historical Recovery Period used in calculating the Historical Fee Rate may not be less than 24 months or more than five years.⁶⁸ The Operating Committee has determined to establish a Historical Recovery Period 1 of 24 months for Historical CAT Assessment 1.

The Operating Committee determined that the length of Historical Recovery Period 1 appropriately weighs the need for a reasonable Historical Fee Rate 1 that spreads the Historical CAT Costs over an appropriate amount of time and the need to repay the loans to the Participants in a timely fashion. The Operating Committee determined that 24 months for Historical Recovery Period 1 would establish a fee rate that is lower than other transaction-based fees, including fees assessed pursuant to Section 31.⁶⁹ In addition, in establishing

a Historical Recovery Period of 24 months, the Operating Committee recognized that the total costs for Historical CAT Assessment 1 were less than the total costs for 2022 and 2023,⁷⁰ and therefore it would be reasonable and appropriate to recover costs subject to this filing over an approximate two-year period.

The length of the Historical Recovery Period 1 and the reasons for its length are provided in this filing in accordance with the requirement in the CAT NMS Plan to provide such information in a fee filing for a Historical CAT Assessment.⁷¹

(D) Projected Total Executed Equivalent Share Volume

The calculation of Historical Fee Rate 1 also requires the determination of the projected total executed equivalent share volume of transactions in Eligible Securities for Historical Recovery Period 1. Under the CAT NMS Plan, the Operating Committee is required to "reasonably determine the projected total executed equivalent share volume of all transactions in Eligible Securities for each Historical Recovery Period based on the executed equivalent share volume of all transactions in Eligible Securities for the prior twelve months."⁷² The Operating Committee is required to base its projection on the prior twelve months, but it may use its discretion to analyze the likely volume for the upcoming year. Such discretion would allow the Operating Committee to use its judgment when estimating projected total executed equivalent share volume if the volume over the prior twelve months was unusual or otherwise unfit to serve as the basis of a future volume estimate.⁷³

The total executed equivalent share volume of transactions in Eligible Securities for the 12-month period from June 2023 through May 2024 was 3,980,753,840,905.21 executed equivalent shares. The Operating Committee has determined to calculate the projected total executed equivalent share volume for the 24 months of Historical Recovery Period 1 by doubling the executed equivalent share volume for the prior 12 months. The Operating Committee determined that such an approach was reasonable as the CAT's annual executed equivalent share

\$0.00009 per share to \$0.0004 per share. CAT Funding Model at 62682.

⁷⁰ The total CAT costs for 2022 were approximately \$186 million and the total CAT costs for 2023 were approximately \$233 million.

⁷¹ Section 11.3(b)(iii)(B)(II)(C) of the CAT NMS Plan.

⁷² Section 11.3(b)(i)(E) of the CAT NMS Plan.

⁷³ CAT Funding Model Approval Order at 62664.

⁶⁵ As discussed below, CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017. See Section 3(a)(10)(E) below.

⁶⁶ The SEC approved the CAT NMS Plan on November 15, 2016, and Participant reporting was required to begin on the first anniversary of this date, November 15, 2017. See Section 6.3 of the CAT NMS Plan and CAT NMS Plan Approval Order.

⁶⁷ Section 11.3(b)(i)(D)(I) and Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

⁶⁸ Section 11.3(b)(i)(D)(I) of the CAT NMS Plan. In the CAT Funding Model Approval Order, the SEC stated that "[i]n the Commission's view, it is reasonable for the Operating Committee to establish the length of the Historical Recovery Period to be no less than 24 months and no more than five years." CAT Funding Model Approval Order at 62664.

⁶⁹ As the SEC noted in the CAT Funding Model Approval Order, recent Section 31 fees ranged from

volume has remained relatively constant. For example, the executed equivalent share volume for 2021 was 3,963,697,612.395, the executed equivalent share volume for 2022 was 4,039,821,841,560.31, and the executed equivalent share volume for 2023 was 3,868,940,345,680.6. Accordingly, the projected total executed equivalent share volume for Historical Recovery Period 1 is projected to be 7,961,507,681,810.42 executed equivalent shares.⁷⁴

The projected total executed equivalent share volume of all transactions in Eligible Securities for Historical Recovery Period 1 and a description of the calculation of the projection is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide such information in a fee filing for a Historical CAT Assessment.⁷⁵

(E) Historical Fee Rate 1

Historical Fee Rate 1 would be calculated by dividing Historical CAT Costs 1 by the reasonably projected total executed equivalent share volume of all transactions in Eligible Securities for Historical Recovery Period 1, as described in detail above.⁷⁶ Specifically, Historical Fee Rate 1 would be calculated by dividing \$318,059,819 by 7,961,507,681,810.42. As a result, the Historical Fee Rate 1 would be \$0.00003994969693072937 per executed equivalent share. Historical Fee Rate 1 is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide the Historical Fee Rate in a fee filing for a Historical CAT Assessment.⁷⁷

(3) Past CAT Costs and Participants

Participants would not be required to pay any fees associated with Historical CAT Assessment 1 as the Participants previously have paid all Past CAT Costs. The CAT NMS Plan explains that:

Because Participants previously have paid Past CAT Costs via loans to the Company, Participants would not be required to pay any Historical CAT Assessment. In lieu of a Historical CAT Assessment, the Participants' one-third share of Historical CAT Costs and

such other additional Past CAT Costs as reasonably determined by the Operating Committee will be paid by the cancellation of loans made to the Company on a pro rata basis based on the outstanding loan amounts due under the loans.⁷⁸

The CAT NMS Plan further states that "Historical CAT Assessments are designed to recover two-thirds of the Historical CAT Costs."⁷⁹

(4) Monthly Fees

CEBBs and CEBSs would be required to pay fees for Historical CAT Assessment 1 on a monthly basis for the period in which Historical CAT Assessment 1 is in effect.⁸⁰ A CEBB or CEBS's fee for each month would be calculated based on the transactions in Eligible Securities executed by the CEBB or CEBS from the prior month.⁸¹ Proposed paragraph (a)(1)(A) of the fee schedule would state that each CAT Executing Broker would receive its first invoice in November 2024, and "would receive an invoice each month thereafter in which Historical CAT Assessment 1 is in effect." Proposed paragraph (a)(1)(B) of the fee schedule would state that "Consolidated Audited Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1 on a monthly basis." In addition, proposed paragraph (b)(1) of the fee schedule states that each CEBB and CEBS is required to pay its CAT fees "each month."

(5) Actual Recovery Period for Historical CAT Assessment 1

The CAT NMS Plan states that, "[n]otwithstanding the length of the Historical Recovery Period used in calculating the Historical Fee Rate, each Historical CAT Assessment calculated using the Historical Fee Rate will remain in effect until all Historical CAT Costs for the Historical CAT Assessment are collected."⁸² Accordingly, Historical CAT Assessment 1 will remain in effect until all Historical CAT Costs 1 have been collected. The actual recovery period for Historical CAT Assessment 1 may be shorter or longer than Historical Recovery Period 1 depending on the actual executed

equivalent share volumes during the time that Historical CAT Assessment 1 is in effect.⁸³

(6) Consolidated Audit Trail Funding Fees

To implement Historical CAT Assessment 1, a new section would be added to the Exchange's fee schedule for "Consolidated Audit Trail Funding Fees", and it would include the proposed paragraphs described below.

(A) Fee Schedule for Historical CAT Assessment 1

The CAT NMS Plan states that:

Each month in which a Historical CAT Assessment is in effect, each CEBB and each CEBS shall pay a fee for each transaction in Eligible Securities executed by the CEBB or CEBS from the prior month as set forth in CAT Data, where the Historical CAT Assessment for each transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Historical Fee Rate reasonably determined pursuant to paragraph (b)(i) of this Section 11.3.⁸⁴

Accordingly, based on the factors discussed above, the Exchange proposes to add paragraph (a)(1) to the Consolidated Audit Trail Funding Fees section of its fee schedule. Proposed paragraph (a)(1) would state the following:

(A) Each CAT Executing Broker shall receive its first invoice for Historical CAT Assessment 1 in November 2024, which shall set forth the Historical CAT Assessment 1 fees calculated based on transactions in October 2024, and shall receive an invoice for Historical CAT Assessment 1 for each month thereafter in which Historical CAT Assessment 1 is in effect.

(B) Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1 on a monthly basis. Each month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer ("CEBB") and/or the CAT Executing Broker for the Seller ("CEBS") (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of \$0.000013 per executed equivalent share.

(C) Historical CAT Assessment 1 will remain in effect until \$212,039,879.34 (two-thirds of Historical CAT Costs 1) are collected from CAT Executing Brokers

⁷⁴ This projection was calculated by multiplying 3,980,753,840,905.21 executed equivalent shares by two.

⁷⁵ Section 11.3(b)(iii)(B)(II)(D) of the CAT NMS Plan.

⁷⁶ In approving the CAT Funding Model, the Commission stated that "[t]he calculation of the Historical Fee Rate by dividing the Historical CAT Costs by the projected total executed equivalent share volume of all transactions in Eligible Securities for the Historical Recovery Period is reasonable." CAT Funding Model Approval Order at 62664.

⁷⁷ Section 11.3(b)(iii)(B)(II)(A) of the CAT NMS Plan.

⁷⁸ Section 11.3(b)(ii) of the CAT NMS Plan.

⁷⁹ *Id.* In approving the CAT Funding Model, the Commission stated that "[t]he proposed allocation of the Historical CAT Assessment solely to CEBSs and CEBBs, and ultimately Industry Members, is reasonable. The Historical CAT Assessment will still be divided into thirds," as the Participants' one-third share of Historical CAT Costs will be paid by the cancellation of loans made to the Company. CAT Funding Model Approval Order at 62666.

⁸⁰ See Section 11.3(b)(iii)(A) of the CAT NMS Plan.

⁸¹ See proposed paragraph (a)(1)(B) of the fee schedule.

⁸² Section 11.3(b)(i)(D)(II) of the CAT NMS Plan.

⁸³ In approving the CAT Funding Model, the Commission stated that, "[i]n the Commission's view, it is reasonable for Industry Members to be charged a Historical CAT Assessment until all Historical CAT Costs for the Historical CAT Assessment are collected." CAT Funding Model Approval Order at 62665.

⁸⁴ Section 11.3(b)(iii)(A) of the CAT NMS Plan.

collectively, which is estimated to be approximately two years, but could be for a longer or shorter period of time. Consolidated Audit Trail, LLC will provide notice when Historical CAT Assessment 1 will no longer be in effect.

(D) Each CAT Executing Broker shall be required to pay each invoice for Historical CAT Assessment 1 in accordance with paragraph (b).

As noted in the Plan amendment for the CAT Funding Model, “as a practical matter, the fee filing for a Historical CAT Assessment would provide the exact fee per executed equivalent share to be paid for each Historical CAT Assessment, by multiplying the Historical Fee Rate by one-third and describing the relevant number of decimal places for the fee rate.”⁸⁵ Accordingly, proposed paragraph (a)(1)(B) of the fee schedule would set forth a fee rate of \$0.000013 per executed equivalent share. This fee rate is calculated by multiplying Historical Fee Rate 1 of \$0.00003994969693072937 by one-third, and rounding the result to 6 decimal places.⁸⁶ The Operating Committee determined to use six decimal places to balance the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.

The proposed language in paragraph (a)(1)(A) of the fee schedule would describe when CAT Executing Brokers would receive their first monthly invoice for Historical CAT Assessment 1. Specifically, CAT Executing Brokers would receive their first monthly invoice for Historical CAT Assessment 1 in November 2024 and the fees set forth in that invoice would be calculated based on transactions executed in the prior month, that is, transactions executed in October 2024. The payment for the first invoice would be required within 30 days after the receipt of the first invoice (unless a longer period is indicated), as described in paragraph (b)(2) of the fee schedule.

Proposed paragraph (a)(1)(A) of the fee schedule also would describe the monthly cadence of the invoices for Historical CAT Assessment 1. Specifically, after the first invoices are provided to CAT Executing Brokers in November 2024, invoices will be sent to CAT Executing Brokers each month thereafter while Historical CAT Assessment 1 is in effect.

⁸⁵ CAT Funding Model Approval Order at 62658, n.658.

⁸⁶ Dividing \$0.00003994969693072937 by three equals \$0.00001331656564357646. Rounding \$0.00001331656564357646 to six decimal places equals \$0.000013.

Proposed paragraph (a)(1)(B) of the fee schedule would describe the invoices for Historical CAT Assessment 1.

Proposed paragraph (a)(1)(B) of the fee schedule would state that “Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1 on a monthly basis.” Proposed paragraph (a)(1)(B) of the fee schedule also would describe the fees to be set forth in the invoices for Historical CAT Assessment 1. Specifically, it would state that “[e]ach month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer (“CEBB”) and/or the CAT Executing Broker for the Seller (“CEBS”) (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of \$0.000013 per executed equivalent share.”

Furthermore, proposed paragraph (a)(1)(C) of the fee schedule would describe how long Historical CAT Assessment 1 would remain in effect. It would state that “Historical CAT Assessment 1 will remain in effect until \$212,039,879.34 (two-thirds of Historical CAT Costs 1) are collected from CAT Executing Brokers collectively, which is estimated to be approximately two years, but could be for a longer or shorter period of time.” This proposed paragraph would further state that “Consolidated Audit Trail, LLC will provide notice when Historical CAT Assessment 1 will no longer be in effect.”

Historical CAT Assessment 1 will be assessed for all transactions executed in each month through the end of the month in which two-thirds of Historical CAT Costs 1 are assessed, and then CAT LLC will provide notice that Historical CAT Assessment 1 is no longer in effect. Since Historical CAT Assessment 1 is a monthly fee based on transaction volume from the prior month, Historical CAT Assessment 1 may collect more than two-thirds of Historical CAT Costs 1. To the extent that occurs, any excess money collected during the final month in which Historical CAT Assessment 1 is in effect will be used to offset future fees and/or to fund the reserve for the CAT.

Finally, proposed paragraph (a)(1)(D) of the fee schedule sets forth the requirement for the CAT Executing Brokers to pay the invoices for Historical CAT Assessment 1. It would state that “[e]ach CAT Executing Broker shall be required to pay each invoice for

Historical CAT Assessment 1 in accordance with paragraph (b).”

(B) Manner of Payment

Paragraph (b)(1) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule describes the manner of payment of Industry Member CAT fees. Paragraph (b)(1) states that “[e]ach CAT Executing Broker shall pay its CAT fees as required pursuant to paragraph (a) each month to the Consolidated Audit Trail, LLC in the manner prescribed by the Consolidated Audit Trail, LLC.” The CAT NMS Plan requires the Operating Committee to establish a system for the collection of CAT fees.⁸⁷ The Plan Processor has established a billing system for CAT fees.⁸⁸ Therefore, the Exchange proposes to require CAT Executing Brokers to pay Historical CAT Assessment 1 in accordance with such system.

(C) Failure To Pay CAT Fees

The CAT NMS Plan further states that:

Participants shall require each Industry Member to pay all applicable fees authorized under this Article XI within thirty (30) days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If an Industry Member fails to pay any such fee when due (as determined in accordance with the preceding sentence), such Industry Member shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of: (a) the Prime Rate plus 300 basis points; or (b) the maximum rate permitted by applicable law.⁸⁹

Accordingly, the Exchange previously has added this requirement to the Exchange’s fee schedule. Specifically, paragraph (b)(2) of the fee schedule states:

Each CAT Executing Broker shall pay the CAT fees required pursuant to paragraph (a) within thirty days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If a CAT Executing Broker fails to pay any such CAT fee when due, such CAT Executing Broker shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of (i) the Prime Rate plus 300 basis points, or (ii) the maximum rate permitted by applicable law.

⁸⁷ Section 11.4 of the CAT NMS Plan.

⁸⁸ The billing process and system are described in CAT Alert 2023-02 as well as the CAT FAQs related to the billing of CAT fees, the Industry Member CAT Reporter Portal User Guide, the FCAT Industry Member Onboarding Guide, the FCAT Connectivity Supplement for Industry Members and the CAT Billing Webinars (dated Sept. 28, 2023, and Nov. 7, 2023), each available on the CAT website.

⁸⁹ Section 11.4 of the CAT NMS Plan.

The requirements of paragraph (b)(2) would apply to Historical CAT Assessment 1.

(7) Historical CAT Assessment Details

The CAT NMS Plan states that:

Details regarding the calculation of a CAT Executing Broker's Historical CAT Assessment will be provided upon request to such CAT Executing Broker. At a minimum, such details would include each CAT Executing Broker's executed equivalent share volume and corresponding fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise than on an exchange, and (3) by buy-side transactions and sell-side transactions.⁹⁰

Such information would provide CEBBs and CEBBs with the ability to understand the details regarding the calculation of their Historical CAT Assessment.⁹¹ CAT LLC will provide CAT Executing Brokers with these details regarding the calculation of their Historical CAT Assessments on their monthly invoice for the Historical CAT Assessment.

In addition, CAT LLC will make certain aggregate statistics regarding Historical CAT Assessments publicly available. Specifically, the CAT NMS Plan states that, “[f]or each Historical CAT Assessment, at a minimum, CAT LLC will make publicly available the aggregate executed equivalent share volume and corresponding aggregate fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise on an exchange, and (3) by buy-side transactions and sell-side transactions.”⁹² Such aggregate statistics will be available on the CAT website.

Furthermore, CAT LLC will make publicly available on the CAT website the total amount invoiced each month that Historical CAT Assessment 1 is in effect as well as the total amount invoiced for Historical CAT Assessment 1 for all months since its

commencement. CAT LLC also will make publicly available on the CAT website the total costs to be collected from Industry Members for Historical CAT Assessment 1. By reviewing statistics regarding how much has been invoiced and how much remains to be invoiced for Historical CAT Assessment 1, Industry Members would have sufficient information to reasonably track how much longer Historical CAT Assessment 1 is likely to be in place.

(8) Implementation Assistance

To assist Industry Members with compliance with the commencement of Historical CAT Assessment 1, CAT LLC has been making available to CAT Executing Brokers mock invoices prior to the commencement of Historical CAT Assessment 1. Specifically, CAT Executing Brokers have received mock invoices based on transaction data each month since November 2023. The mock invoices are in the same form as the actual, payable invoices, including both the relevant transaction data and the corresponding fee. However, no payments have been required in response to such mock invoices; they have been used solely to assist CAT Executing Brokers with the development of their processes for paying the CAT fees. Such data has provided CAT Executing Brokers with a preview of the transaction data used in creating the invoices for Historical CAT Assessment 1 fees, as the data will be the same as data provided in actual invoices. Such data preview is intended to facilitate the payment of Historical CAT Assessment 1.

(9) Financial Accountability Milestones

The CAT NMS Plan states that “[n]o Participant will make a filing with the SEC pursuant to Section 19(b) of the Exchange Act regarding any Historical CAT Assessment until any applicable Financial Accountability Milestone described in Section 11.6 has been satisfied.”⁹³ The CAT NMS Plan further states that “in all filings submitted by the Participants to the Commission under Section 19(b) of the Exchange Act, to establish or implement Post-Amendment Industry Member Fees pursuant to this Article, . . . the Participants shall clearly indicate whether such fees are related to Post-Amendment Expenses incurred during Period 1, Period 2, Period 3, or Period 4.”⁹⁴ As discussed in detail below, all applicable Financial Accountability Milestones for Historical CAT

Assessment 1—that is, Period 1, Period 2 and Period 3 of the Financial Accountability Milestones—have been satisfied. Furthermore, as discussed below, this filing clearly indicates that Historical CAT Assessment 1 relates to Post-Amendment Expenses incurred during Periods 1, 2 and 3 of the Financial Accountability Milestones.

(A) Period 1 of the Financial Accountability Milestones

In accordance with Section 11.6(b) of the CAT NMS Plan, Historical CAT Assessment 1 seeks to recover costs that are related to “all fees, costs, and expenses (including legal and consulting fees, costs, and expenses) incurred by or for the Company in connection with the development, implementation and operation of the CAT from the effective date of [Section 11.6 of the CAT NMS Plan] until such time as Full Implementation of CAT NMS Plan Requirements has been achieved”⁹⁵ (“Post-Amendment Expenses”) incurred during FAM Period 1. FAM Period 1 began on June 22, 2020, the effective date of Section 11.6 of the CAT NMS Plan, and concluded on July 31, 2020, the date of Initial Industry Member Core Equity and Options Reporting. Section 1.1 of the CAT NMS Plan defines “Initial Industry Member Core Equity and Options Reporting” as:

The reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of both: (a) equities transaction data, excluding Customer Account Information, Customer-ID, and Customer Identifying Information; and (b) options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information.

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports.⁹⁶ As indicated by the Participants' Quarterly Progress Report for the third quarter of 2020,⁹⁷ Initial Industry Member Core Equity and Option Reporting was completed on schedule on July 22, 2020, which is prior to the July 31, 2020 deadline.

Under the FAM Period 1 requirement of Initial Industry Member Core Equity and Options Reporting, Industry Members—excluding Small Industry Members that are not OATS reporters—

⁹⁰ Section 11.3(a)(iv)(A) of the CAT NMS Plan.

⁹¹ In approving the CAT Funding Model, the Commission stated that, “[i]n the Commission's view, providing CAT Execut[ing] Brokers information regarding the calculation of their CAT Fees will aid in transparency and permit CAT Execut[ing] Brokers to confirm the accuracy of their invoices for CAT Fees.” CAT Funding Model Approval Order at 62667.

⁹² Section 11.3(a)(iv)(B) of the CAT NMS Plan. In approving the CAT Funding Model, the Commission stated that “[t]he publication of the aggregate executed equivalent share volume and aggregate fee is appropriate because it would allow Participants and CAT Executing Brokers a high-level validation of executed volume and fees.” CAT Funding Model Approval Order at 62667.

⁹³ Section 11.3(b)(iii)(B)(III) of the CAT NMS Plan.

⁹⁴ Section 11.6(b) of the CAT NMS Plan.

⁹⁵ Section 11.6 of the CAT NMS Plan.

⁹⁶ The Quarterly Progress Reports are available at <https://www.catnmsplan.com/implementation-plan>.

⁹⁷ See Q3 2020 Quarterly Progress Report (Oct. 30, 2020) and Updated Q3 2020 Quarterly Progress Report (Jan. 29, 2021).

were required to report two categories of data to the CAT: equities transaction data and options transaction data (both excluding Customer Account Information, Customer-ID, and Customer Identifying Information) by July 31, 2020. Pursuant to exemptive relief provided by the Commission, the Commission authorized the Participants' Compliance Rules to allow core equity reporting for Industry Members (Phase 2a) to begin on June 22, 2020 and core options reporting for Industry Members (Phase 2b) to begin on July 20, 2020.⁹⁸

In adopting the FAMs, the Commission stated that the equities transaction reporting required for FAM Period 1 "is consistent with the functionality that the Participants describe on the CAT NMS Plan website as 'Production Go-Live for Equities 2a file submission and data integrity validations.'" ⁹⁹ The Phase 2a Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order, and includes the following data related to Eligible Securities that are equities:

- All events and scenarios covered by OATS, which includes information related to the receipt or origination of orders, order transmittal, and order modifications, cancellations and executions;
- Reportable Events for: (1) proprietary orders, including market maker orders, for Eligible Securities that are equities; (2) electronic quotes in listed equity Eligible Securities (*i.e.*, NMS stocks) sent to a national securities exchange or FINRA's Alternative Display Facility ("ADF"); (3) electronic quotes in unlisted Eligible Securities (*i.e.*, OTC Equity Securities) received by an Industry Member operating an interdealer quotation system ("IDQS"); and (4) electronic quotes in unlisted Eligible Securities sent to an IDQS or other quotation system not operated by a Participant or Industry Member;

⁹⁸ See Phased Reporting Exemptive Relief Order. Under the CAT NMS Plan as adopted, the Participants were required, through their Compliance Rules, to require their Large Industry Members to commence reporting Industry Member Data to the Central Repository by November 15, 2018, and to require their Small Industry Members to commence reporting Industry Member Data to the Central Repository by November 15, 2019. Sections 6.7(a)(v) and (vi) of the CAT NMS Plan. The SEC granted exemptive relief from these provisions of the CAT NMS Plan to allow for the phased implementation of Industry Member reporting via five phases addressing the reporting requirements for Phase 2a Industry Member Data, Phase 2b Industry Member Data, Phase 2c Industry Member Data, Phase 2d Industry Member Data and Phase 2e Industry Member Data.

⁹⁹ Securities Exchange Act Rel. No. 88890 (May 15, 2020), 85 FR 31322, 31330 n.97 (May 22, 2020) ("FAM Adopting Release").

- Firm Designated IDs ("FDIDs"), which Industry Members must report to the CAT as required by Sections 6.3(d)(i)(A) and 6.4(d)(ii)(C) of the CAT NMS Plan;

- Industry Members would be required to report all street side representative orders, including both agency and proprietary orders and mark such orders as representative orders, except in certain limited exceptions as described in the Industry Member Technical Specifications;

- The link between the street side representative order and the order being represented when: (1) the representative order was originated specifically to represent a single order received either from a customer or another broker-dealer; and (2) there is (a) an existing direct electronic link in the Industry Member's system between the order being represented and the representative order and (b) any resulting executions are immediately and automatically applied to the represented order in the Industry Member's system;

- Manual and Electronic Capture Time for Manual Order Events;

- Special handling instructions for the original receipt or origination of an order during Phase 2a; and

- When routing an order, whether the order was routed as an intermarket sweep order ("ISO").

In Phase 2a, Industry Members were not required to report modifications of a previously routed order in certain limited instances, nor were they required to report a cancellation of an order received from a Customer after the order has been executed.¹⁰⁰

The Quarterly Progress Report for the third quarter of 2020 states that "Interim Step: Production Go-Live for Equities 2a file submission and data integrity validation (Large Industry Members and Small OATS Reporters)" was completed on June 22, 2020. Accordingly, the FAM Period 1 requirement of reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of "equities transaction data, excluding Customer Account Information, Customer-ID, and Customer Identifying Information" was completed on June 22, 2020.

In adopting the FAMs, the Commission stated that the options transaction reporting required for FAM Period 1 is "consistent with the functionality that the Participants describe on the CAT NMS Plan website as 'Production Go-Live for Options 2b file submission and data integrity

validations.'" ¹⁰¹ The Phase 2b Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order, and includes the Industry Member Data related to Eligible Securities that are options and related to simple electronic option orders, excluding electronic paired option orders. A simple electronic option order is an order to buy or sell a single option that is not related to or dependent on any other transaction for pricing and timing of execution that is either received or routed electronically by an Industry Member. Electronic receipt of an order is defined as the initial receipt of an order by an Industry Member in electronic form in standard format directly into an order handling or execution system. Electronic routing of an order is the routing of an order via electronic medium in standard format from one Industry Member's order handling or execution system to an exchange or another Industry Member. An electronic paired option order is an electronic option order that contains both the buy and sell side that is routed to another Industry Member or exchange for crossing and/or price improvement as a single transaction on an exchange. Responses to auctions of simple orders and paired simple orders would be reportable in Phase 2b. Furthermore, combined orders in options would be treated in Phase 2b in the same way as equity representative orders are treated in Phase 2a. A combined order would mean, as permitted by SRO rules, a single, simple order in Listed Options created by combining individual, simple orders in Listed Options from a customer with the same exchange origin code before routing to an exchange. During Phase 2b, the single combined order sent to an exchange must be reported and marked as a combined order, but the linkage to the underlying orders is not required to be reported until Phase 2d.¹⁰²

The Quarterly Progress Report for the third quarter of 2020 states that "Interim Step: Production Go-Live for Options 2b file submission and data integrity validations" was completed on July 20, 2020. Accordingly, the FAM Period 1 requirement of reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of "options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information" was completed on July 20, 2020.

¹⁰¹ FAM Adopting Release at 31330, n.98.

¹⁰² Phased Reporting Exemptive Relief Order at 23078.

¹⁰⁰ Phased Reporting Exemptive Relief Order at 23076–78.

As discussed above, the Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1 would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from June 22, 2020 through July 31, 2020. The total costs for this period, as discussed above, are \$6,377,343. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$2,125,781) and CEBBs paying one-third (\$2,125,781).

(B) Period 2 of the Financial Accountability Milestones

Historical CAT Assessment 1 seeks to recover costs that are related to Post-Amendment Expenses incurred during FAM Period 2. FAM Period 2 began on August 1, 2020, and concluded on December 31, 2020, the date of the Full Implementation of Core Equity Reporting. Section 1.1 of the CAT NMS Plan defines “Full Implementation of Core Equity Reporting” as:

the point at which: (a) Industry Member reporting (excluding reporting by Small Industry Members that are not OATS reporters) for equities transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, is developed, tested, and implemented at a 5% Error Rate or less and with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, and trade reporting facilities linkage to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, excluding linkage of representative orders, from order origination through order execution or order cancellation; and (b) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3 and Section 8.2.1 incorporates the Industry Member equities transaction data described in condition (a) and is available to the Participants and to the Commission. This Financial Accountability Milestone shall be considered complete as of the date identified in a Quarterly Progress Report meeting the requirements of Section 6.6(c).

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants’ Quarterly Progress Reports. As indicated by the Participants’ Quarterly Progress Report for the fourth quarter of 2020,¹⁰³ Full Implementation of Core Equity

Reporting was completed on schedule by December 31, 2020.

Specifically, the Full Implementation of Core Equity Reporting requires the satisfaction of two prongs. The first prong requires Participants to have fully implemented the first phase of equities transaction reporting for Industry Members (excluding Small Industry Members that are not OATS reporters) at an Error Rate of less than 5%. In addition, equities transaction data produced by the CAT at this stage must also be sufficiently interlinked so as to permit full analysis of an order’s lifecycle across the national market, excluding full linkage of representative orders. As CAT LLC reported on its Quarterly Progress Reports, Phase 2a was fully implemented as of October 26, 2020, including intra-firm, inter-firm, national securities exchange, and trade reporting facilities linkages.¹⁰⁴ In addition to the reporting of Phase 2a Industry Member Data as described above with regard to FAM Period 1, the following linkage data was added to the CAT as described in the Quarterly Progress Reports for the third and fourth quarter of 2020:

- “Production Go-Live for Equities 2a Intrafirm Linkage validations” was completed on 7/27/2020;¹⁰⁵
- “Production Go-Live for Firm to Firm Linkage validations for Equities 2a (Large Industry Members and Small OATS Reporters)” was completed on October 26, 2020; and
- “Production Go-Live for Equities 2a Exchange and TRF Linkage validations (Large Industry Members and Small OATS Reporters)” was completed on October 26, 2020.

Furthermore, as CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2020, the average overall error rate for Phase 2a Industry Member Data was less than 5% as of December 31, 2020. The average overall error rate was calculated by dividing the compliance errors by processed records.

The second prong of this FAM requires that the equities transaction data collected by the CAT at this stage be made available to regulators through two basic query tools required by the CAT NMS Plan—a targeted query tool that will enable regulators to retrieve data via an online query screen with a variety of predefined selection criteria, and a user-defined direct query tool that will provide regulators with the ability to query data using all available

attributes and data sources.¹⁰⁶ As CAT LLC reported on its Quarterly Progress Reports, the query tool functionality incorporating the data from Phase 2a was available to the Participants and the Commission as of December 31, 2020.¹⁰⁷

The Commission has determined that the Participants have sufficiently complied with the conditions set forth in the 2020 Orders and with the technical requirements for Quarterly Progress Reports set forth in Section 6.6(c) of the CAT NMS Plan for purposes of determining compliance with this FAM.¹⁰⁸

As discussed above, Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1 would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from August 1, 2020 through December 31, 2020. The total costs for this period, as discussed above, are \$42,976,478. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remain [*sic*] two-thirds, with CEBBs paying one-third (\$14,325,492.70) and CEBBs paying one-third (\$14,325,492.70).

(C) Period 3 of the Financial Accountability Milestones

Historical CAT Assessment 1 seeks to recover costs that are related to Post-Amendment Expenses incurred during FAM Period 3. FAM Period 3 began on January 1, 2021, and concluded on December 31, 2021, the date of the Full Availability and Regulatory Utilization of Transactional Database Functionality. Section 1.1 of the CAT NMS Plan defines “Full Availability and Regulatory Utilization of Transactional Database Functionality” as:

the point at which: (a) reporting to the Order Audit Trail System (“OATS”) is no longer required for new orders; (b) Industry Member reporting for equities transactions and simple

¹⁰⁶ Section 6.10(c)(i)(A) of the CAT NMS Plan requires the Plan Processor to “provide Participants and the SEC with access to all CAT Data stored in the Central Repository” via an “online targeted query tool.” Appendix D, Sections 8.1.1–8.1.3 of the CAT NMS Plan describes the required functionality associated with this regulatory tool. Appendix D, Section 8.2.1 describes the required functionality associated with a user-defined direct query tool that will “deliver large sets of data that can then be used in internal surveillance or market analysis applications.”

¹⁰⁷ See Q3 2020 Quarterly Progress Report (Oct. 30, 2020); Updated Q3 2020 Quarterly Progress Report (Jan. 29, 2021); and Q4 2020 Quarterly Progress Report (Jan. 29, 2021).

¹⁰⁸ Securities Exchange Act Rel. No. 98848 (Nov. 2, 2023), 88 FR 77128, 77129 n.13 (Nov. 8, 2023) (“Settlement Exemptive Order”).

¹⁰³ Q4 2020 Quarterly Progress Report (Jan. 29, 2021).

¹⁰⁴ For a description of the requirements of Phases 2a, see Phased Reporting Exemptive Relief Order.

¹⁰⁵ Q3 2020 Quarterly Progress Report (Oct. 20, 2021).

electronic options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, trade reporting facilities linkage, and representative order linkages (including any equities allocation information provided in an Allocation Report) to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, is developed, tested, and implemented at a 5% Error Rate or less; (c) Industry Member reporting for manual options transactions and complex options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with all required linkages to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, including any options allocation information provided in an Allocation Report, is developed, tested, and fully implemented; (d) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3, Section 8.2.1, and Section 8.5 incorporates the data described in conditions (b)–(c) and is available to the Participants and to the Commission; and (e) the requirements of Section 6.10(a) are met. This Financial Accountability Milestone shall be considered complete as of the date identified in a Quarterly Progress Report meeting the requirements of Section 6.6(c).

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports. As indicated by the Participants' Quarterly Progress Report for the fourth quarter of 2021,¹⁰⁹ Full Availability and Regulatory Utilization of Transactional Database Functionality was completed on schedule by December 31, 2021.

Specifically, the "Full Availability and Regulatory Utilization of Transactional Database Functionality" requires the satisfaction of five prongs. The first prong requires that reporting to the Order Audit Trail System ("OATS") is no longer required for new orders. As CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2021,¹¹⁰ FINRA retired OATS effective September 1, 2021.¹¹¹ Accordingly, after the retirement of OATS, reporting to OATS was no longer required.

In addition to Phase 2a and Phase 2b Industry Member Data, the second and third prongs of "Full Availability and Regulatory Utilization of Transactional

Database Functionality" require Industry Member reporting of Phase 2c Industry Member Data and Phase 2d Industry Member Data. The Phase 2c Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order. That Order states that "Phase 2c Industry Member Data" is Industry Member Data related to Eligible Securities that are equities other than Phase 2a Industry Member Data, Phase 2d Industry Member Data, or Phase 2e Industry Member Data. Specifically, the Phase 2c Industry Member Data includes Industry Member Data that is related to Eligible Securities that are equities and that is related to: (1) Allocation Reports as required to be recorded and reported to the Central Repository pursuant to Section 6.4(d)(ii)(A)(1) of the CAT NMS Plan; (2) quotes in unlisted Eligible Securities sent to an IDQS operated by a CAT Reporter (reportable by the Industry Member sending the quotes) (except for quotes reportable in Phase 2d, as discussed below); (3) electronic quotes in listed equity Eligible Securities (*i.e.*, NMS stocks) that are not sent to a national securities exchange or FINRA's Alternative Display Facility; (4) reporting changes to client instructions regarding modifications to algorithms; (5) marking as a representative order any order originated to work a customer order in price guarantee scenarios, such as a guaranteed VWAP; (6) flagging rejected external routes to indicate a route was not accepted by the receiving destination; (7) linkage of duplicate electronic messages related to a Manual Order Event between the electronic event and the original manual route; (8) special handling instructions on order route reports (other than the ISO, which is required to be reported in Phase 2a); (9) quote identifier on trade events; (10) reporting of LTIDs (if applicable) for accounts with Reportable Events that are reportable to CAT as of and including Phase 2c; (11) reporting of date account opened or Account Effective Date (as applicable) for accounts and reporting of a flag indicating the Firm Designated ID type as account or relationship; (12) order effective time for orders that are received by an Industry Member and do not become effective until a later time; (13) the modification or cancellation of an internal route of an order; and (14) linkages to the customer orders(s) being represented for representative order scenarios, including agency average price trades, net trades, aggregated orders, and disconnected Order Management System ("OMS")—Execution Management System ("EMS")

scenarios, as required in the Industry Member Technical Specifications.¹¹²

Phase 2c Industry Member Data also includes electronic quotes that are provided by or received in a CAT Reporter's order/quote handling or execution systems in Eligible Securities that are equities and are provided by an Industry Member to other market participants off a national securities exchange under the following conditions: (1) an equity bid or offer is displayed publicly or has been communicated (a) for listed securities to the ADF operated by FINRA; or (b) for unlisted equity securities to an "interdealer quotation system," as defined in FINRA Rule 6420(c); or (2) an equity bid or offer which is accessible electronically by customers or other market participants and is immediately actionable for execution or routing; *i.e.*, no further manual or electronic action is required by the responder providing the quote in order to execute or cause a trade to be executed). With respect to OTC Equity Securities, OTC Equity Securities quotes sent by an Industry Member to an IDQS operated by an Industry Member CAT Reporter (other than such an IDQS that does not match and execute orders) are reportable by the Industry Member sending them in Phase 2c. Accordingly, any response to a request for quote or other form of solicitation response provided in a standard electronic format (*e.g.*, FIX) that meets this quote definition (*i.e.*, an equity bid or offer which is accessible electronically by customers or other market participants and is immediately actionable for execution or routing) would be reportable in Phase 2c.¹¹³

The Phase 2d Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order. "Phase 2d Industry Member Data" is Industry Member Data that is related to Eligible Securities that are options other than Phase 2b Industry Member Data, Industry Member Data that is related to Eligible Securities that are equities other than Phase 2a Industry Member Data or Phase 2c Industry Member Data, and Industry Member Data other than Phase 2e Industry Member Data. Phase 2d Industry Member Data includes with respect to the Eligible Securities that are options: (1) simple manual orders; (2) electronic and manual paired orders; (3) all complex orders with linkages to all CAT-reportable legs; (4) LTIDs (if applicable) for accounts with Reportable Events for Phase 2d; (5) date account

opened or Account Effective Date (as applicable) for accounts with an LTID and flag indicating the Firm Designated ID type as account or relationship for such accounts; (6) Allocation Reports as required to be recorded and reported to the Central Repository pursuant to Section 6.4(d)(ii)(A)(1) of the CAT NMS Plan; (7) the modification or cancellation of an internal route of an order; and (8) linkage between a combined order and the original customer orders. Phase 2d Industry Member Data also would include electronic quotes that are provided by or received in a CAT Reporter's order/quote handling or execution systems in Eligible Securities that are options and are provided by an Industry Member to other market participants off a national securities exchange under the following conditions: a listed option bid or offer which is accessible electronically by customers or other market participants and is immediately actionable (*i.e.*, no further action is required by the responder providing the quote in order to execute or cause a trade to be executed). Accordingly, any response to a request for quote or other form of solicitation response provided in standard electronic format (*e.g.*, FIX) that meets this definition is reportable in Phase 2d for options.¹¹⁴

Phase 2d Industry Member Data also includes with respect to Eligible Securities that are options or equities (1) receipt time of cancellation and modification instructions through Order Cancel Request and Order Modification Request events; (2) modifications of previously routed orders in certain instances; and (3) OTC Equity Securities quotes sent by an Industry Member to an IDQS operated by an Industry Member CAT Reporter that does not match and execute orders. In addition, subject to any exemptive or other relief, Phase 2d Industry Member Data will include verbal or manual quotes on an exchange floor or in the over-the-counter market, where verbal quotes and manual quotes are defined as bids or offers in Eligible Securities provided verbally or that are provided or received other than via a CAT Reporter's order handling and execution system (*e.g.*, quotations provided via email or instant messaging).¹¹⁵

The Quarterly Progress Report for the fourth quarter of 2021 states that "Phase 2a was fully implemented as of October 26, 2020;" "Phase 2b was fully implemented as of January 4, 2021;" "Phase 2c was implemented as of April 26, 2021;" and "Phase 2d was fully

implemented as of December 13, 2021."¹¹⁶ The Quarterly Progress Reports for 2021 provide additional detail regarding the implementation of these steps including the following:

- "Production Go-Live for Equities 2c reporting requirements (Large Industry Members)" was completed on April 26, 2021;
- "LTID Account Information Reporting Go-Live for Phases 2a, 2b and 2c (Large Industry Members)" was completed on April 26, 2021;
- "FCAT Plan Processor creates linkages of the lifecycle of order events based on the received data through Phase 2d Production Go-Live for Options 2d reporting requirements (Large Industry Members)" was completed on December 13, 2021;
- "Production Go-Live for Options 2d reporting requirements (Large Industry Members)" was completed on December 13, 2021;
- "Production Go-Live for Options 2b reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)" was completed on December 13, 2021;
- "Production Go-Live for Equities 2c reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)" was completed on December 13, 2021;
- "Production Go-Live for Options 2d reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)" was completed on December 13, 2021;
- "LTID Account Information Reporting Go-Live for Phases 2d (Large Industry Members)" was completed on December 13, 2021; and
- "LTID Account Information Reporting Go-Live for Phases 2a, 2b, 2c and 2d (Small Industry Members)" was completed on December 13, 2021.¹¹⁷

The third prong of "Full Availability and Regulatory Utilization of Transactional Database Functionality" also imposes an Error Rate requirement of 5% or less. The Quarterly Progress Report for the fourth quarter of 2021 states the average overall error rate was less than 5% as of December 31, 2021. The average overall error rate was calculated by dividing the compliance errors by processed records.

The fourth prong of "Full Availability and Regulatory Utilization of Transactional Database Functionality" requires that the data collected by the CAT at this stage be made available to

regulators through an online targeted query tool and a user-defined direct query tool. As CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2021, the query tool functionality incorporating the data from Phases 2a, 2b, 2c and 2d was available to the Participants and to the Commission as of December 31, 2021.¹¹⁸

The fifth prong requires the requirements of Section 6.10(a) of the CAT NMS Plan to have been met. Section 6.10(a) of the CAT NMS Plan requires the Participants to use the tools described in Appendix D to "develop and implement a surveillance system, or enhance existing surveillance systems, reasonably designed to make use of the consolidated information contained in the Central Repository." The Exchange implemented a surveillance system, or enhanced existing surveillance systems, reasonably designed to make use of the consolidated information contained in the Central Repository as of December 31, 2021 in accordance with Section 6.10(a) of the CAT NMS Plan.¹¹⁹

The Commission has determined that the Participants have sufficiently complied with the conditions set forth in the 2020 Orders and with the technical requirements for Quarterly Progress Reports set forth in Section 6.6(c) of the CAT NMS Plan for purposes of determining compliance with this FAM.¹²⁰

As discussed above, Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1 would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2021 through December 31, 2021. The total costs for this period, as discussed above, are \$144,415,268. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remain [*sic*] two-thirds, with CEBBs paying one-third (\$48,138,422.70) and CEBBs paying one-third (\$48,138,422.70).

(D) Additional Considerations Related to the Financial Accountability Milestones

As discussed above, CAT LLC has satisfied the Financial Accountability Milestones ("FAMs") for Periods 1

¹¹⁸ See Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

¹¹⁹ See Q1 2021 Quarterly Progress Report (Apr. 30, 2021); Q2 2021 Quarterly Progress Report (July 27, 2021); Q3 2021 Quarterly Progress Report (Nov. 1, 2021); Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

through 3.¹²¹ As discussed below, none of the circumstances related to NIA Electronic RFQ Responses, the 2023 Verbal Quotes Exemption, the November 2023 Order, or Executing Broker reporting, affect the conclusion that the FAMs for Periods 1 through 3 were satisfied in a timely fashion.

(i) NIA Electronic RFQ Responses

CAT LLC does not believe that the exemptive relief relating to the reporting of electronic responses for quotes (“RFQs”) that are not immediately actionable (“NIA Electronic RFQ Responses”) affect the conclusion that FAMs 1 through 3 have been satisfied. The only reason CAT LLC pursued this relief is because certain Industry Members introduced concerns that NIA Electronic RFQ Responses could be considered “orders” reportable pursuant to Rule 613(j)(8) and some Industry Members were not prepared to report such orders to CAT. Thus, the relief was requested on behalf of Industry Members. CAT LLC itself has not taken any position on whether NIA Electronic RFQ Responses are “orders,” as the definition of “order” is an SEC rule and the trading processes for NIA Electronic RFQ Responses are the Industry Members’, not those of the Participants or CAT LLC. Accordingly, CAT LLC stated in its letter that “Industry Members must determine whether trading interest falls within the definition of an ‘order’ for CAT purposes. To the extent an NIA Electronic RFQ Response is not considered an ‘order’ as defined in Rule 613(j)(8) and the CAT NMS Plan, it would not be reportable to CAT.”¹²²

Only “orders” as defined in SEC Rule 613(j)(8) are reportable to CAT. There is no agreement across the industry or among regulators as to whether NIA Electronic RFQ Responses are “orders” reportable to CAT. Certain Industry Members have raised the question as to whether NIA Electronic RFQ Responses are orders, but others have argued that they are not orders under Rule 613(j)(8).¹²³ Indeed, members of the

Advisory Committee, which CAT LLC relies upon for guidance with regard to Industry Member issues, have not had a definitive view on whether NIA Electronic RFQ Responses are orders. As Rule 613(j)(8) is an SEC rule, CAT LLC believes that only the SEC can provide a definitive determination as to if, and under what circumstances, an NIA Electronic RFQ Response is considered an “order” reportable to CAT. The issue has persisted for some time. As a result, CAT LLC filed an exemptive request regarding NIA Electronic RFQ Responses for clarity on the interpretive issue. As recently as April 2024, Industry Members have re-raised this issue stating that the SEC agrees that it must provide additional guidance on this interpretive issue to resolve the CAT reporting issue for NIA Electronic RFQ Responses:

As further discussed in the prior FIF letters, even if the Commission had the legal authority to require the reporting of NIA RFQ responses to CAT without an amendment to Rule 613, the Commission has not provided guidance to industry members as to the conditions under which NIA RFQ responses would be reportable to CAT. In subsequent discussions with industry members, Commission representatives have agreed that, prior to NIA RFQ responses being reportable to CAT, it would be necessary for the Commission to provide further guidance to industry members as to the conditions under which NIA RFQ responses would be reportable to CAT.¹²⁴

On May 20, 2024, the Commission granted CAT LLC’s request for exemptive relief from certain CAT reporting requirements pertaining to NIA Electronic RFQ Responses to the extent such responses are considered “orders” reportable pursuant to Rule 613(j)(8).¹²⁵ The Commission, however, did not provide additional guidance regarding the conditions under which NIA Electronic RFQ Responses would be reportable to CAT. The Commission stated in its exemptive order that “[t]o the extent that the Participants are availing themselves of exemptive relief from a CAT NMS Plan requirement, such requirement shall not be included in the requirements for the Financial Accountability Milestones, provided that any conditions of the exemption are satisfied.”¹²⁶

When the Commission proposed the FAMs, the Participants expressed concern that, “by conditioning the ability of CAT LLC and the Participants to collect Post-Amendment Industry Member Fees on factors dependent on

the efforts of Industry Members, the Commission’s proposals inadvertently establish a perverse incentive for Industry Members to devote less than maximum efforts to comply with their obligations related to the CAT as they will pay less fees in such instances.”¹²⁷ The Participants further warned that “Industry Members may request or require unanticipated reporting delays to address Industry Member implementation issues or concerns,” but that, “[f]aced with financial penalties for missed deadlines, the Participants may not be able to fully address legitimate industry concerns or accommodate requests for delays with respect to future deadlines.”¹²⁸ CAT LLC has engaged in good faith to help address NIA Electronic RFQ Responses and other concerns relevant to the ability of Industry Members to meet their CAT reporting obligations. CAT LLC should not be penalized financially for seeking in good faith to resolve a difficult interpretive issue for the benefit of Industry Members.

(ii) 2023 Verbal Quotes Exemption

CAT LLC does not believe that the Commission’s May 19, 2023 order granting temporary exemptive relief relating to certain verbal floor activity and unstructured verbal and electronic upstairs activity (the “2023 Verbal Quotes Exemption”) affects the conclusion that FAMs 1 through 3 have been satisfied. The 2023 Verbal Quotes Exemption, which was issued on May 19, 2023, is not relevant for purposes of FAM Periods 1 through 3, which only cover the period through December 31, 2021. The relevant exemption for this time period is the Commission’s November 12, 2020 order, which granted relief for the same activity through July 31, 2023 (the “2020 Verbal Quotes Order”).¹²⁹ The Commission has stated that, “to the extent that the Participants are availing themselves of exemptive relief from a CAT NMS Plan requirement, such requirement shall not be included in the requirements for a Financial Accountability Milestone, provided that the conditions of the exemption are satisfied.”¹³⁰ Here, the

¹²¹ In May 2020, the Commission adopted amendments to the CAT NMS Plan that establish four Financial Accountability Milestones and set target deadlines by which these milestones must be achieved. These amendments also reduce the amount of any fees, costs, and expenses that may be recovered from Industry Members if the Participants fail to meet the target deadlines. FAM Adopting Release.

¹²² See Letter from Brandon Becker, Chair, CAT NMS Plan Operating Committee to Vanessa Countryman, Secretary, Commission (Feb. 13, 2024) at 2.

¹²³ See, e.g., Letter from Howard Meyerson, Managing Director, FIF, to Sai Rao, Counsel for Trading and Markets, Office of the Chair (Apr. 25, 2024).

¹²⁴ *Id.*

¹²⁵ Securities Exchange Act Rel. No. 100181 (May 20, 2024), 89 FR 45715 (May 23, 2024).

¹²⁶ *Id.* at n.11.

¹²⁷ See Letter from Michael Simon, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission at 9 (Oct. 28, 2019).

¹²⁸ *Id.* at 10.

¹²⁹ Securities Exchange Act Rel. No. 90405, 85 FR 73544 (Nov. 18, 2020) (the “2020 Verbal Quotes Exemption”).

¹³⁰ See, e.g., Securities Exchange Act Rel. No. 89051 (June 11, 2020), 85 FR 36631, 36633 (June 17, 2020). The straightforward reading of the Commission’s statement is that compliance with the conditions of an exemption will be measured as of the deadline for a particular FAM Period.

2020 Verbal Quotes Order was in effect and the conditions of the exemption were satisfied as of December 31, 2021, and therefore may be relied upon for purposes of determining compliance with FAM Periods 1 through 3.¹³¹

(iii) November 2023 Order

CAT LLC does not believe that the Commission's November 2, 2023 order granting relief from certain CAT NMS Plan requirements (the "November 2023 Order") affects the conclusion that FAMs 1 through 3 have been satisfied. The November 2023 Order is not relevant for purposes of FAM Periods 1 through 3, which only cover the period through December 31, 2021. As described in the November 2023 Order, the relevant exemptive orders for this time period were issued on December 16, 2020, which also states that "the Commission has determined that the Participants have sufficiently complied with the conditions set forth in the prior Orders and with the technical requirements for Quarterly Progress Reports set forth in section 6.6(c) of the CAT NMS Plan, including for purposes of determining compliance with any applicable Financial Accountability Milestones."¹³² The November 2023 Exemption Order is consistent with the Commission's repeated statements in the FAM adopting release that it would have "authority to grant exemptive relief from any requirement associated with a particular Financial Accountability Milestone," citing Section 36 of the Exchange Act and Rule 608.¹³³ Similarly, the CAT NMS Plan

expressly contemplates the Commission's ability to grant exemptive relief from any CAT NMS Plan requirement.¹³⁴

(iv) Executing Broker Reporting

CAT LLC also completed the requirements of FAM Period 2, including the required linkages, by December 31, 2020. Although Participant exchanges may report the Executing Broker to CAT differently in certain situations, these reporting differences are irrelevant for linkage purposes as the fields used for CAT Executing Broker are not used for linkage.

(10) Additional Support for Reasonableness of Historical CAT Costs

The CAT Funding Model approved by the Commission permits the recovery of reasonable costs in each of the categories of CAT costs sought to be recovered via Historical CAT Assessment 1.¹³⁵ As described in detail above and in further detail below, the CAT costs to be recovered for each category are reasonable. The following discusses in further details how each of the following costs are reasonable: (1) costs incurred prior to the effective date of the CAT NMS Plan; (2) cloud hosting services costs; (3) costs related to funding model filings; (4) costs related to litigation with the SEC regarding the CAT NMS Plan; (5) costs related to the Initial Plan Processor; (6) CAIS implementation costs; (7) public relations costs; (8) legal costs related to the limitation of liability provision in the CAT Reporter agreements; and (9) costs for the Chair of CAT Operating Committee. As discussed in detail below, each of these costs is reasonable and should be recoverable in accordance with the CAT Funding Model.

(A) Costs Incurred Prior to the Effective Date of CAT NMS Plan

CAT LLC believes that it is reasonable to seek recovery of costs incurred prior to when the CAT NMS Plan became effective in November 2016, such as legal and consulting fees incurred to

create the CAT NMS Plan. Rule 613 specifically mandates that the CAT be created, implemented and maintained, and further provides that the CAT NMS Plan include a proposed allocation of estimated costs to fund the creation, implementation and maintenance of the CAT among the Participants (referred to as "plan sponsors"), and between the Participants and Industry Members (referred to as "members of the plan sponsors").¹³⁶ Consistent with Rule 613, the CAT NMS Plan, as approved by the Commission, specifically authorizes charging Industry Members fees for costs reasonably incurred prior to the date of the approval of the CAT NMS Plan by the Commission in November 2016, including legal and consulting costs. Section 11.1(c) of the CAT NMS Plan states that:

[i]n determining fees on Participants and Industry Members the Operating Committee shall take into account fees, costs and expenses (including legal and consulting fees and expenses) reasonably incurred by Participants on behalf of the Company prior to the Effective Date in connection with the creation and implementation of the CAT.

Accordingly, the CAT NMS Plan specifically permits the recovery of costs, including legal and consulting costs, reasonably incurred prior to November 2016 in connection with the creation and implementation of the CAT.

Furthermore, the costs incurred to create and implement the CAT prior to the effective date of the CAT NMS Plan ("Pre-Formation Costs") were reasonable both in scope and amount, in accordance with the requirements of Section 11.1(c) of the CAT NMS Plan. During the four-year period from 2012 to 2016, a total of \$13,842,881 in Pre-Formation Costs were incurred. This is an average of approximately \$3.5 million per year over this period. The Pre-Formation Costs fell into three categories: legal costs, consulting costs and public relations costs. This includes legal costs of \$3,196,434; consulting costs of \$10,589,273; and public relations costs of \$57,174. The legal, consulting and public relations services were performed by WilmerHale, Deloitte and Peppercomm, respectively. The selection considerations and fees for these three firms are described in detail above and are described further below. The Pre-Formation Costs are direct costs of CAT, which have been funded entirely by the Participants through non-interest-bearing notes. The Pre-Formation Costs do not include the significant costs incurred by each of the

¹³¹ As a condition to the 2020 Verbal Quotes Exemption, the Commission required that the Participants provide a written status update on the reporting of these quotes and orders by July 31, 2022, including the estimated costs of reporting these quotes and orders and an implementation plan for the reporting of these quotes and orders. As noted, the 2020 Verbal Quotes Order was in effect and the conditions of the exemption were satisfied as of December 31, 2021, and therefore may be relied upon for purposes of determining compliance with FAM Periods 1 through 3. In any event, on June 3, 2022, the Participants provided the required written status update. See Letter from Michael Simon, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission (June 3, 2022).

¹³² *Id.* at 77129 n.12.

¹³³ FAM Adopting Release at 31335 (May 22, 2020). Section 36 of the Exchange Act grants the Commission the authority to "conditionally or unconditionally exempt any person, security, or transaction . . . from any provision or provisions of [the Exchange Act] or of any rule or regulation thereunder, to the extent that such exemption is necessary or appropriate in the public interest, and is consistent with the protection of investors." 15 U.S.C. 78mm(a)(1). Under Rule 608(e) of Regulation NMS, the Commission may "exempt from [Rule 608], either unconditionally or on specified terms and conditions, any self-regulatory organization, member thereof, or specified security, if the Commission determines that such exemption is

consistent with the public interest, the protection of investors, the maintenance of fair and orderly markets and the removal of impediments to, and perfection of the mechanism of, a national market system." 17 CFR 242.608(e).

¹³⁴ Section 12.3 of the CAT NMS Plan ("[T]o the extent the SEC grants exemptive relief applicable to any provision of this Agreement, Participants and Industry Members shall be entitled to comply with such provision pursuant to the terms of the exemptive relief so granted at the time such relief is granted irrespective of whether this Agreement has been amended.")

¹³⁵ See Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹³⁶ See, e.g., Rule 613(a)(1)(vii)(D) of the CAT NMS Plan.

individual Participants in responding to the adoption of Rule 613.

The Pre-Formation Costs are reasonable and appropriate as they reflect the extensive efforts that were necessary to create the CAT NMS Plan as mandated after the SEC's adoption of Rule 613. As described in more detail below, these efforts included, among other things, developing a plan for selecting the Plan Processor, soliciting and evaluating bids, engaging a diverse set of market participants and the SEC in the development of the Plan, interacting with the SEC in their oversight of the development of the Plan, and seeking appropriate exemptive relief to address areas of concern in Rule 613.¹³⁷

(i) Request for Proposal ("RFP")

The Participants determined to utilize an RFP to ensure that potential alternative solutions for creating the Plan could be presented and considered, and that a detailed and meaningful cost-benefit analysis could be performed. The SEC supported the use of an RFP, and approved its use as it is described in extensive detail in the CAT NMS Plan.¹³⁸

In the context of the SEC's adoption of Rule 613, commenters urged the Commission to utilize an RFP process to assist in the planning and design of the NMS plan.¹³⁹ Specifically, the Commission explained:

In this regard, several commenters suggested that the Commission undergo a RFP or request for information ("RFI") process to create and implement a consolidated audit trail. Specifically, FIF urged the Commission to perform a RFP process "to determine the best technical solution for developing a consolidated audit trail." FIF suggested that the Commission "should outline a set of goals and guiding principles they are striving to achieve as part of the adopted CAT filing and leave the determination of data elements and other technical requirements to [an] industry working group." Similarly, Direct Edge suggested that Commission staff should form and engage in a working group to develop an

RFP for publication by the Commission. DirectEdge explained that an RFP process would facilitate the identification of the costs and benefits of the audit trail, as well as the consideration of a wider range of technological solutions. Further, commenters, including Broadridge Financial Solutions, Inc., a technology provider, also requested more specific information about the audit trail system to better assess the Commission's initial cost estimates and to determine the best approach to the consolidated audit trail.¹⁴⁰

In response to these comments, the Commission modified Rule 613 to require the Participants to address certain important considerations regarding the features and details of the NMS plan and to extend the timeframe for submission of the CAT NMS Plan by the Participants from the 90 days as originally proposed to 270 days, in part, to accommodate a process that would address these considerations.¹⁴¹ As the SEC noted, "[i]n light of the numerous specific requirements of Rule 613, the Participants concluded that publication of a request for proposal ('RFP') was necessary to ensure that potential alternative solutions to creating the consolidated audit trail can be presented and considered by the Participants and that a detailed and meaningful cost/benefit analysis can be performed, both of which are required considerations to be addressed in the CAT NMS Plan."¹⁴²

The SEC specifically recognized that the Participants planned to use an RFP when it approved the Selection Plan, and stated that the RFP was a reasonable approach.¹⁴³ As the SEC described in its approval order for the Selection Plan, "[t]he Participants filed the [Selection] Plan to govern how the SROs will proceed with formulating and submitting the CAT NMS Plan—and, as part of that process, how to review, evaluate, and narrow down the bids submitted in response to the RFP ('Bids')—and ultimately choosing the plan processor that will build, operate, and maintain the consolidated audit trail ('Plan Processor')."¹⁴⁴ After evaluating the Selection Plan, including the use of an RFP process, the Commission stated that it "believes the [Selection] Plan is reasonably designed to govern the process by which the SROs will formulate and submit the CAT NMS Plan, including the review, evaluation, and narrowing down of Bids

in response to the RFP, and ultimately choosing the Plan Processor that will build, operate, and maintain the consolidated audit trail."¹⁴⁵

On February 26, 2013, the Participants published an RFP soliciting bids from parties interested in serving as the plan processor for the CAT. Initially, 31 firms submitted intentions to bid. In the following months, the Participants engaged with potential bidders with respect to, among other things, the selection process, selection criteria, and potential bidders' questions and concerns. On March 21, 2014, the Participants received ten bids in response to the RFP.

(ii) Selection Plan

On September 4, 2013, the Participants filed with the Commission a national market system plan to govern the process for Participant review of the bids submitted in response to the RFP, the procedures for evaluating the bids, and, ultimately, selection of the plan processor (the "Selection Plan").¹⁴⁶ The Commission approved the Selection Plan as filed on February 21, 2014.¹⁴⁷ In approving the Selection Plan, the Commission concluded that "it is reasonably designed to achieve its objective of facilitating the development of the CAT NMS Plan and the selection of the Plan Processor."¹⁴⁸

The Selection Plan divided the review and evaluation of bids, and the selection of the plan processor, into various stages. Specifically, pursuant to the Selection Plan, a selection committee reviewed all bids and determined which bids contained sufficient information to allow the Participants to meaningfully assess and evaluate the bids. The ten submitted bids were deemed "Qualified Bids," and so passed to the next stage, in which each bidder presented its bids to the Participants on a confidential basis. On July 1, 2014, after conducting careful analysis and comparison of the bids, the Selection Committee voted and selected a shortlist of six eligible bidders. The Selection Committee determined which shortlisted bidders would be provided the opportunity to revise their bids. After the Selection Committee assessed and evaluated the revised bids, the Selection Committee selected the plan processor via two rounds of voting by the Participants, as described in the Selection Plan.

The Selection Plan established an Operating Committee responsible for

¹³⁷ The Participants described in detail the process for drafting the CAT NMS Plan in its original filing of the CAT NMS Plan. See Letter from Mike Simon, on behalf of the Participants of the CAT NMS Plan, to Brent J. Fields, Secretary, Commission (Sept. 30, 2014). A non-exclusive list of filings and activities associated with CAT, including certain pre-2016 filings, are available on the SEC's website: <https://www.sec.gov/divisions/marketreg/rule613-info>.

¹³⁸ See detailed discussion of RFP questions in Appendix C of the CAT NMS Plan, and incorporation of RFP requirements in Appendix D at D-2.

¹³⁹ For example, in its comments on proposed Rule 613, FIF suggested "that the SROs should select the processor through a 'request for proposal.'" Rule 613 Adopting Release at 45785.

¹⁴⁸ Selection Plan Approval Order at 11160.

formulating, drafting, and filing with the Commission the CAT NMS Plan and for ensuring that the Participants' joint obligations under Rule 613 were met in a timely and efficient manner. In formulating the CAT NMS Plan, the Participants also engaged multiple persons across a wide range of roles and expertise, engaged the consulting firm Deloitte as project manager, and engaged the law firm WilmerHale to serve as legal counsel in drafting the Plan. Within this structure, the Participants focused on, among other things, comparative analyses of the proposed technologies and operating models, development of funding models to support the building and operation of the CAT, and detailed review of governance considerations. Given the complexity and scope of developing the CAT NMS Plan, these efforts were extensive.

When it approved the CAT NMS Plan in 2016, the Commission reiterated its belief that the Selection Plan remains a "reasonable approach," that "the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor," and that "the process set forth in the Selection Plan should be permitted to continue":

In approving the Selection Plan, the Commission stated that the Selection Plan is reasonably designed to achieve its objective of facilitating the development of the CAT NMS Plan and the selection of the Plan Processor. The Commission also found that the Selection Plan is reasonably designed to govern the process by which the SROs will formulate and submit the CAT NMS Plan, including the review, evaluation, and narrowing down of Bids in response to the RFP, and ultimately choosing the Plan Processor that will build, operate, and maintain the consolidated audit trail. The Commission believes that the process set out in the Selection Plan for selecting a Plan Processor remains a reasonable approach, which will facilitate the selection of Plan Processor through a fair, transparent and competitive process and that no modifications to the Selection Plan are required to meet the approval standard. . . . In response to the comment that offered support for a specific Bidder, the Commission agrees with the Participants that the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor and thus believes that the process set forth in the Selection Plan should be permitted to continue.¹⁴⁹

(iii) Engagement With Market Participants and SEC

During the process of developing the CAT NMS Plan, the Participants engaged in extensive and meaningful

dialogue with market participants and the SEC. To this end, the Participants created a website to update the public on the progress of the CAT NMS Plan, published a request for comment on multiple issues related to the Plan, held multiple public events to inform the industry of the progress of the CAT and to address inquiries, and formed, and later expanded, a DAG to solicit more input from a representative industry group.¹⁵⁰

The DAG included representatives of Participants and Industry Members and conducted meetings to discuss, among other things, technical and operational aspects the Participants were considering for the Plan. The Participants issued press releases soliciting participants for the DAG, and a wide spectrum of firms was deliberately chosen to provide insight from various industry segments affected by CAT. The DAG meetings included discussions of topics such as option market maker quote reporting, requirements for capturing Customer IDs, timestamps and clock synchronization, reporting requirements for order handling scenarios, costs and funding, error handling and corrections, and potential elimination of systems made redundant by the CAT. From the inception of the DAG through September 2014, the DAG participated in 36 meetings, as well as a variety of DAG subcommittee meetings.

(iv) Request for Exemption From Certain Requirements Under Rule 613

Following multiple discussions between the Participants and both the DAG and the bidders, as well as among the Participants themselves, the Participants recognized that some provisions of Rule 613 would not permit certain solutions to be included in the Plan that the Participants, in coordination with the DAG, determined advisable to effectuate the most efficient and cost-effective CAT. Specifically, "the SROs reached the conclusion that additional flexibility in certain of the minimum requirements specified in Rule 613 would allow them to propose a more efficient and cost-effective approach without adversely affecting the reliability or accuracy of CAT Data, or its security and confidentiality."¹⁵¹ Consequently, the Participants submitted a request for exemptive relief from certain provisions of Rule 613 regarding: (1) options market maker quotes; (2) Customer-IDs; (3) CAT-

Reporter-IDs; (4) CAT-Order-IDs on allocation reports; and (5) timestamp granularity.¹⁵² The Participants filed two supplements to the request for exemptive relief.¹⁵³

After reviewing the exemptive request, the Commission determined that it was appropriate in the public interest and consistent with the protection of investors to grant the requested exemptive relief.¹⁵⁴ In granting the exemptive relief, the Commission stated:

[T]he Commission is persuaded to provide flexibility in the discrete areas discussed in the Exemption Request so that the alternative approaches can be included in the CAT NMS Plan and subject to notice and comment. Doing so could allow for more efficient and cost-effective approaches than otherwise would be permitted. The Commission at this stage is not deciding whether the proposed approaches detailed below are more efficient or effective than those in Rule 613. However, the Commission believes the proposed approaches should be within the permissible range of alternatives available to the SROs.¹⁵⁵

The Commission further stated that the requested exemptive relief is consistent with the protection of investors. The Commission noted that:

Doing so will provide the public an opportunity to consider and comment on whether these proposed alternative approaches would indeed be more efficient and cost-effective than those otherwise required by Rule 613, and whether such approaches would adversely affect the reliability or accuracy of CAT Data or otherwise undermine the goals of Rule 613. Moreover, if—as the SROs represent—efficiency gains and cost savings would result from including the proposed approaches in the CAT NMS Plan without adverse effects, then the resultant benefits could potentially flow to investors (e.g., lower broker-dealer reporting costs resulting in fewer costs passed on to Customers).¹⁵⁶

The Participants incorporated the exemptive relief into the proposed CAT NMS Plan, which was noticed for comment, and the Commission ultimately approved the CAT NMS Plan with the more efficient and cost-effective alternative approaches described in the exemptive relief. Accordingly, the Participants believe that the costs incurred in developing the exemptive request were critical to the creation of a better CAT than was

¹⁴⁹ See CAT NMS Plan Approval Order at 84737.

originally contemplated by Rule 613, and therefore should be recoverable as part of Historical CAT Assessment 1.

(v) Request for Extensions for Filing the CAT NMS Plan

Rule 613(a)(1) under Regulation NMS required the Participants to jointly file the CAT NMS Plan on or before April 28, 2013, less than a year after the adoption of Rule 613. In recognition of the complexity of the project to create the CAT NMS Plan as well as industry interest in limiting or eliminating certain requirements of Rule 613 (*e.g.*, addressing the reporting of options market maker quotes), the Participants requested two extensions of the deadline to file the CAT NMS Plan. The Participants described the need for additional time as follows:

The SROs stated in their Request Letter that they do not believe that the 270-day time period provided for in Rule 613(a)(1) provides sufficient time for the development of the RFP, formulation and submission of bids, and review and evaluation of such bids. The SROs also stated that they believe additional time beyond the 270 days provided for in Rule 613(a)(1) is necessary in order to provide sufficient time for effective consultation with and input from the industry and the public on the proposed solution chosen by the SROs for the creation of the consolidated audit trail at the conclusion of the RFP process and the NMS plan itself.¹⁵⁷

In recognition of the need for additional time to refine the technical description of and requirements for the CAT and to allow for additional evaluation of the proposed cost and funding considerations, the SEC granted two extensions of this deadline.¹⁵⁸ The SEC determined that both extensions were appropriate, in the public interest, and consistent with the protection of investors.¹⁵⁹ In reaching this conclusion, the Commission stated that “it understands that the creation of a consolidated audit trail is a significant undertaking and that a proposed NMS plan must include detailed information and discussion about many things.”¹⁶⁰ The SEC also noted the following:

This additional time to complete the RFP process should allow the SROs to engage in a more thoughtful and comprehensive process for the development of an NMS plan. In this regard, the Commission notes that the

additional time to solicit comment from the industry and the public at certain key points in the development of the NMS plan could identify issues that can be resolved earlier in the development of the consolidated audit trail and prior to filing the NMS plan with the Commission.¹⁶¹

Given the Commission’s recognition of the reasonableness and value of the extension of the deadline to file the CAT NMS Plan, the Participants believe that the costs incurred in developing the extension request were important to the process of developing the CAT NMS Plan, and therefore should be recoverable as part of Historical CAT Assessment 1.

(vi) Submission and Approval of the CAT NMS Plan

After extensive analyses and discussions with the DAG, bidders, market participants and the SEC staff, the Participants finalized the draft of the CAT NMS Plan and filed the CAT NMS Plan with the SEC on September 30, 2014. Following additional discussions, the Participants filed several amendments to the CAT NMS Plan during 2015 and 2016. With these additional changes, the SEC published the CAT NMS Plan for notice and comment in May 2016.¹⁶² Following the comment period, the SEC approved the Plan in November 2016.¹⁶³

(vii) Legal Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include legal costs of \$3,196,434. The legal services were performed by WilmerHale. The selection considerations and fees for WilmerHale were described in detail above. Prior to the creation of CAT LLC, WilmerHale was engaged to represent the consortium of SROs, not the individual Participants. For administrative purposes, FINRA agreed to receive such legal bills, although such costs were shared among the Participants. Therefore, the legal costs incurred with respect to WilmerHale do not include legal costs incurred by the individual Participants. These pre-formation legal costs are described in detail above and are further described below:

- Analyzed various legal matters associated with the Selection Plan and drafted an amendment to Selection Plan;
- Assisted with the RFP and bidding process for the CAT Plan Processor;
- Analyzed legal matters related to the DAG;

- Drafted the CAT NMS Plan, analyzed various items related to the CAT NMS Plan, and responded to comment letters on the CAT NMS Plan;

- Provided legal support for the formation of the legal entity, the governance of the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.*, Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding, and Other Products) and the DAG, and governance support during the transition to the new governance structure under the CAT NMS Plan;

- Drafted exemptive requests;
- Provided interpretations related to the CAT NMS Plan;

- Provided support with regard to discussions among the exchanges, FINRA and other third parties, such as Deloitte;

- Provided tax advice with regard to CAT’s status as a tax-exempt organization; and

- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

(viii) Consulting Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include consulting costs of \$10,589,273. The consulting services were performed by Deloitte. The selection considerations and fees for Deloitte were described in detail above. Prior to the creation of CAT LLC, for administrative purposes, Deloitte was engaged by FINRA to provide consulting services related to CAT, but the costs were shared by the consortium of SROs per agreement. Therefore, the consulting costs incurred with respect to Deloitte do not include consulting costs incurred by the individual Participants. The pre-formation consulting costs include the following:

- Established and implemented program operations for the CAT project, including the program management office and workstream design;
- Assisted with the Plan Processor selection process, including but not limited to, the development of the RFP and the bidder evaluation process, and facilitation and consolidation of the Participants’ independent reviews;
- Assisted with the development and drafting of the CAT NMS Plan, including conducting cost-benefit studies, reviewing technical requirements of other NMS plans, analyzing OATS and CAT requirements, and drafting appendices to the Plan;

¹⁵⁷ Securities Exchange Act Rel. No. 69060 (Mar. 7, 2013), 78 FR 15771, 15772 (Mar. 12, 2013) (“March 2013 Exemptive Order”).

¹⁵⁸ See March 2013 Exemptive Order; Securities Exchange Act Rel. No. 71018 (Dec. 6, 2013), 78 FR 75669 (Dec. 12, 2013) (“December 2013 Exemptive Order”).

¹⁵⁹ March 2013 Exemptive Order at 15772; December 2013 Exemptive Order at 75670.

¹⁶⁰ March 2013 Exemptive Order at 15772.

¹⁶¹ *Id.* at 15773.

¹⁶² See Securities Exchange Act Rel. No. 77724 (Apr. 27, 2016), 81 FR 30614 (May 17, 2016).

¹⁶³ See CAT NMS Plan Approval Order.

- Provided governance support to the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (e.g., Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding, and Other Products) and the DAG;

- Provided support for updating the SEC on the progress of the development of the CAT;

- Provided support for industry outreach sessions, including with regard to program design and agenda development, program support and logistics and coordination; and
- Provided support in fact finding, drafting content and meeting coordination for WilmerHale with regard to the CAT and the development of the CAT NMS Plan.

Such Pre-Formation Costs did not include costs related to the Chair of the CAT NMS Plan Operating Committee, as the CAT NMS Plan had not yet been adopted.

(ix) Public Relations Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include public relations costs of \$57,174. The public relations services were performed by Peppercomm. The selection considerations and fees for Peppercomm are described in detail above. The costs related to Peppercomm were shared among the SROs. Therefore, the public relations costs do not include public relations costs incurred by the individual Participants. The pre-formation public relations costs include services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT.

(B) Cloud Hosting Services

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs related to cloud hosting services as a part of Historical CAT Assessments. CAT LLC believes that the costs related to cloud hosting services described in detail above are reasonable and appropriate given the strict data processing timelines and storage requirements imposed by the Commission-approved CAT NMS Plan

and should be recoverable as a part of Historical CAT Assessment 1.

(i) Reasonableness of AWS Costs Given the Requirements of the CAT NMS Plan

CAT LLC believes that the costs for the cloud hosting services are reasonable, both in terms of the level of the fees paid by CAT LLC for cloud hosting services provided by AWS and the scope of the services performed by AWS for CAT LLC. CAT LLC believes that both the scope and amount of the costs for cloud hosting services are reasonable given the current requirements of the CAT NMS Plan adopted pursuant to Rule 613, including the strict data processing timeline, storage and other technical requirements under the Commission-approved CAT NMS Plan.

CAT LLC believes that the level of fees for the cloud hosting services is reasonable, taking into consideration a variety of factors, including the expected volume of data and the breadth of services provided and market rates for similar services.

CAT LLC also believes that the scope of services provided by AWS for the CAT are appropriate given the current requirements of the Commission-approved CAT NMS Plan. As described above, the cloud hosting services costs reflect a variety of factors including, among other things:

- *Breadth of Cloud Activities.* AWS was engaged by FCAT, the Plan Processor, to provide a broad range of services to the CAT, including data ingestion, data management, and analytic tools. Services provided by AWS necessary to the CAT include storage services, databases, compute services, and other services (such as networking, management tools and development operations (“DevOps”) tools). AWS also was engaged to provide the various environments for CAT, such as the development, performance testing, test and production environments, which are required by the CAT NMS Plan.

- *High Data Volume.* The cost for AWS services for the CAT is a function of the volume of CAT Data. While it is not linear, the greater the amount of CAT Data, the greater the cost of AWS services to the CAT. The data volume handled by AWS now far exceeds the original volume estimates for the CAT.

- *Plan Requirements.* The cost for AWS services also reflects the technical requirements necessary to meet the stringent performance and other requirements for processing CAT Data. These Plan-dictated processing timelines, storage, testing, security and

other technical requirements are significant drivers of AWS costs.

- *Cost Avoidance Efforts.* CAT LLC and FCAT have engaged in ongoing efforts to seek to avoid and minimize AWS costs where permissible under the Plan. Accordingly, these cost avoidance efforts have limited the extent of AWS costs.

In addition, various requirements of the CAT NMS Plan adopted pursuant to Rule 613 contribute to the significant cloud hosting services costs, and that various Plan requirements could be amended or removed without affecting the regulatory purpose of the CAT. Indeed, CAT LLC has repeatedly sought exemptive relief and filed amendments to the CAT NMS Plan, and has even filed suit against the Commission, to seek to revise or eliminate certain costly requirements related to the CAT. However, despite these efforts, absent the Commission granting exemptive relief or approving cost savings amendments to the CAT NMS Plan, CAT LLC, the Participants and Industry Members are all required to comply with such requirements.

(ii) Effect of CAT Design on CAT Costs

(a) Efficient CAT Design

CAT is reasonably designed to efficiently and effectively utilize cloud computing and storage services, given the requirements of the Commission-approved CAT NMS Plan, including requirements related to security, operational reliance and quality assurance, and maintainability.

The Plan Processor uses state-of-the-art software that meets the strict security standards of the CAT NMS Plan. CAT utilizes a big data processing framework that is extensively used by large data processing companies, such as Apple, Meta, Netflix, IBM and Google. As such, it has substantial commercial support and support in the open-source community. It is also well suited for use with regard to iterative types of algorithms and query functions and analytics that the CAT requires, and it provides the heightened security necessary for the CAT.

The development and implementation of the design of CAT is not and has not been static. CAT LLC and the Plan Processor are always evaluating new innovations and service offerings from AWS and other providers to seek to maximize efficiency and cost avoidance while still satisfying the requirements of the CAT NMS Plan. These efforts have led to substantial savings to date. The cloud hosting costs for 2023 were less than the cloud hosting costs for 2022 by \$8 million despite processing seven

trillion more events in 2023 due to the efficiency and cost avoidance efforts for cloud hosting services. For example, when AWS introduced new storage options, FCAT adopted the cost-efficient new storage option after establishing that the new offering would satisfy the security and other standards of the CAT NMS Plan. This change led to millions of dollars of savings in storage costs. Similarly, when AWS introduced a new compute processor, FCAT adopted this new compute processor, which led to millions of dollars in savings in compute costs. However, in other cases, new cloud technology developments could not be implemented in CAT because they would not satisfy the security or other requirements of the CAT NMS Plan.

When evaluating the design of the CAT, it must be kept in mind that the CAT is not a typical commercial technology project. The ability to make use of technology approaches that may lead to cost avoidance is also subject to the restrictive requirements of the CAT NMS Plan, such as processing timeframes, requirements for retention of data versions, query requirements, and security standards. Because such requirements are set forth in the CAT NMS Plan, any modification of such requirements are subject to the time-consuming process of amending the CAT NMS Plan or seeking an exemption from the relevant requirement. For example, CAT LLC recently has filed an amendment to address several of these expensive Plan requirements.¹⁶⁴

(b) CAT Was Designed To Minimize Industry Member Effort

The CAT System also was designed to minimize the extent to which Industry Members would need to alter their systems to report to CAT. During the design process, Industry Member groups argued that it would make more sense financially for the CAT to accommodate differences in industry systems, than for all Industry Members to change their systems. Moreover, such design choices would facilitate consistency, uniformity and accuracy in reporting. Requiring the CAT to make such accommodations may increase CAT costs while accommodating CAT Reporters.

Based on the requirements in the CAT NMS Plan and/or in response to industry requests for functionality to be embedded with the Plan Processor to

streamline or limit Industry Member system changes, the CAT has been designed to limit the effect on Industry Members. The following provides examples of such accommodations:

- *Industry Member Reporting.* In light of the complexity of Industry Member market activity, the CAT's order reporting and linkage scenarios document for Industry Members is over 800 pages in length, addressing nearly 200 scenarios.¹⁶⁵ The Industry Member Technical Specifications allow for dozens of specific event types, which drive complexity for the Plan Processor, but streamline reporting for Industry Members. Furthermore, the Plan Processor greatly expanded Industry Member linkage requirements to support, among other things, child events and supplemental events, allowing for "stateless as-you-go" and "batch end-of-day" reporting when all data is available. Accordingly, CAT takes on the significant cost and effort of providing the required linkages between CAT events; correspondingly, Industry Members are not required to perform this costly task.

- *File Submission Process.* The CAT was designed to accommodate the varying needs of CAT Reporters with regard to the file submission process. For example, in a 2018 letter, FIF stated that "[t]he SFTP-based submission process is cumbersome, exposes industry members to unnecessary complexity, and puts the burden of support on the CAT Reporter rather than imbedding more functionality into the Plan Processor."¹⁶⁶ Currently, FCAT provides two mechanisms for submitting files: SFTP via a private network, and the Web via Reporter Web Portal.

- *Error Corrections.* The industry also emphasized the need for the CAT to provide error correction tools and functionalities to identify, rectify and re-submit corrections within the required timeframe. For example, FIF stated in a 2018 letter the following:

To be clear, if OATS-like error correction tools are not made available on Day 1, hundreds of firms will be required to create and test their own tools or obtain vendor alternatives prior to the CAT Go-Live Date. Proprietary tools will require additional system builds, access to and ingestion of CAT data to perform system validation, and testing which will further stress the limited number of subject matter experts ("SMEs") dedicated to the

implementation of CAT reporting. Should this occur, inevitably firms (especially small firms who lack the necessary IT staff to write code and develop proprietary systems), may be put in the position of passing onto investors the cost required to build hundreds of redundant systems.¹⁶⁷

CAT provides various tools to help Industry Members identify and rectify errors.

- *Data Ingestion Format.* The industry also recommended that CAT adopt a flexible input format that provides an option for Industry Members to submit data in formats that are already in use to reduce costs and potential reporting errors. For example, FIF argued the following:

FIF CAT WG is not proposing a specific format; rather, we are proposing flexibility of input formats which includes support of existing formats (e.g., OATS, FIX) as well as a baseline specification where all fields are defined, and normalized. The input formats must be clearly and thoroughly defined in Technical Specifications, including FAQs.

Mandating a uniform format for reporting data to the CAT simplifies the task for the Central Repository of consolidating/storing data, but it puts the burden on each CAT Reporter to accurately translate their current (e.g., OATS) reporting information into a uniform CAT interface. However, that is likely to yield more errors because it is very dependent on accurate, complete and timely information (Technical Specifications, FAQs, meta-data, competent CAT help desk) available to CAT Reporters, availability of sophisticated CAT test tools to validate interface protocols, and the skill levels of the estimated 300+ unique CAT Reporters/Submitters during Phase 1 of CAT. Concentrating the responsibility of data conversions with the Central Repository is a reasonable trade-off that should yield fewer errors, and greater accuracy.¹⁶⁸

CAT provides such a flexible input format.

(c) Effect of Initial Plan Processor Design

The costs for cloud hosting services are appropriate and have not been adversely affected by the original design and approaches of the Initial Plan Processor. FCAT's design costs are the result of the requirements of the Commission-approved CAT NMS Plan.

¹⁶⁴ See, e.g., Securities Exchange Act Rel. No. 99938 (Apr. 10, 2024), 89 FR 26983 (Apr. 16, 2024); Letter from Brandon Becker, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission (Mar. 27, 2024) (proposing amendments to the CAT NMS Plan for \$23 million in annual savings).

¹⁶⁵ See CAT Industry Member Reporting Scenarios v.4.10 (Oct. 21, 2022).

¹⁶⁶ Letter from Janet Early, FIF, to Thesys CAT (Mar. 29, 2018).

¹⁶⁷ Letter from Christopher Bok, FIF, to Jay Clayton, Chair, Commission, at 4 (Dec. 11, 2018).

¹⁶⁸ Letter from Mary Lou Von Kaenel, Managing Director, FIF, to Brent Fields, Secretary, Commission at 92 (July 18, 2016), <https://www.sec.gov/comments/4-698/4698-13.pdf>.

When FCAT took over as the Plan Processor from Thesys, it utilized certain aspects of the technical specifications created by Thesys in its design. However, FCAT has not maintained aspects of the original design that would not be appropriate for the CAT. FCAT revised and enhanced the original technical specifications of the CAT System to increase its efficiency and efficacy, and to ensure its compliance with the CAT NMS Plan. For example, the Initial Plan Processor's approach utilized many more fields than FCAT's approach, which relies on additional linkages. With the additional linkages, the CAT System takes on more of the CAT-related burdens than the Industry Members. Such an approach serves to facilitate consistency, uniformity and accuracy in reporting.

Moreover, FCAT did not utilize the system built by the Initial Plan Processor; it rebuilt the CAT System based on revised technical specifications. For example, the Initial Plan Processor used an on-premises processing approach which was not geared toward the huge amounts of data stored in the CAT, while FCAT adopted a cloud-based solution in response to such data demands.

Furthermore, given the very short timeframe to develop the CAT System and the prior optimization of certain query tools (e.g., Diver) for regulatory use with significant amounts of data, FCAT determined to rely upon certain existing FINRA tools and adapt them for use with the CAT.

(iii) Consideration of AWS Alternatives

CAT LLC continues to support the selection of AWS as the cloud hosting services provider for CAT given the compliance, operational, and security requirements of the CAT. Independent analyses confirm these conclusions, noting that "AWS is an excellent choice for either strategic or tactical use and recommends considering AWS for almost all cloud IaaS or IaaS+PaaS scenarios."¹⁶⁹ AWS provides the following benefits to CAT, among others:

- *Broad Suitability.* AWS has a long track record of successfully serving cloud customers with mission-critical projects.
- *Proven Scalability.* AWS has demonstrated that it is capable of building and delivering services on a large scale.
- *Track Record of Innovation.* AWS continues to rapidly innovate, both in

terms of new domains of capability and at a fundamental level, thereby facilitating innovation for its customers.

- *Resiliency/Dependability.* Another benefit of AWS is its resiliency; it has a strong track record of stable services. As noted in a review of cloud service providers, "[c]ustomers like to have a broad set of options for resilience and for their cloud providers to have a strong track record of stable services (continuously available, without operational quirks). Only AWS fulfills both desires."¹⁷⁰

- *Technical and Customer Support.* AWS consistently provides high-quality technical and customer support and engagement. Given the size, scope and regulatory importance of CAT, customer support and engagement that CAT has with the highest levels of AWS are very important to the success of the CAT.

- *Scale.* AWS is capable of supporting large-scale solutions, which is critical given the size and magnitude of the CAT.

- *Security.* AWS provides the security features necessary for the CAT.

In addition, the nature of the CAT, including the amount of data it must process and the size of its data footprint, does not allow for a multi-cloud solution as this would be cost prohibitive and greatly increase the security boundary and associated risk profile of the CAT. For example, a multi-cloud hosting option would increase costs, complexity, and risk for operations with regard to, for example, DevOps, production support, and networking. Similarly, with regard to security, a multi-cloud solution would increase risk, including with regard to the need for data transfers between cloud providers and the expansion of the security boundary. With regard to labor, a multi-cloud solution would lose economies of scale due to the need to support unique cloud requirements. Accordingly, the use of single-cloud solution continues to provide advantages with regard to cost, complexity, and risk. Indeed, "[t]he best practice is to focus on a single primary strategic provider."¹⁷¹

Furthermore, if another cloud service provider were determined to be a better match for the CAT at some future date, switching cloud service providers would be a very significant, expensive and time-consuming effort. Such an effort would likely be a 10-to-15-year commitment at a substantial expense. Such a move would require the replication or redesign of the underlying cloud environments (e.g., organizational

setup, identify management, accounts, environments, DevOps tooling likes release management/config management/network management), as the new provider likely would not have the same infrastructure and software. Once that process has been completed, an exabyte of CAT data would need to be securely migrated to the new platform.

(C) Funding Model Filings

CAT LLC believes that the recovery of costs related to the development of the funding model is appropriate, and that the amount and scope of such costs, as described above, are reasonable.

Funding the CAT is a critical aspect of Rule 613 and the CAT NMS Plan. Article XI of the CAT NMS Plan describes in detail the requirements for funding the CAT, and the Participants are required to comply with and enforce compliance with the funding requirements of the CAT NMS Plan, just as with other aspects of the Plan. Accordingly, the development and implementation of a funding model for the CAT is as much a part of the requirements of the CAT NMS Plan as the development and operation of the CAT System. CAT LLC sees no reason to distinguish the efforts to develop a funding model from, for example, efforts to develop the CAT System, in seeking to recover reasonable CAT costs.

Moreover, in approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that "the reasonably budgeted CAT costs shall include . . . legal costs."¹⁷² In addition, the CAT NMS Plan also requires Participants to include in their fee filings "a brief description of the amount and type of the Historical CAT Costs, including . . . legal . . . costs."¹⁷³ In keeping with these provisions, this filing provides a brief description of reasonably budgeted legal costs above. These legal costs include costs related to the development of the CAT Funding Model.

In addition, the legal costs incurred for the assistance in developing the CAT Funding Model are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1. As described above, the specialized services were performed by experienced counsel at negotiated rates for such services that reflect both the

¹⁶⁹ See, e.g., Lydia Leong and Adrian Wong, Solution Comparison for Strategic Cloud Integrated IaaS and PaaS Providers (July 28, 2023) ("Strategic Cloud Assessment Article").

¹⁷⁰ Strategic Cloud Assessment Article.

¹⁷¹ *Id.*

¹⁷² Section 11.1(a)(i) of the CAT NMS Plan.

¹⁷³ Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

extent of the services and market rates. Moreover, the scope of the legal costs associated with the development of the funding model reflect the complexity of the task in satisfying the detailed requirements of the CAT NMS Plan, the standards of the Exchange Act, and the many perspectives of the different market constituents potentially affected by or interested in the funding model, including Industry Members, Participants and investors. The many and varied comments by market participants on CAT funding over the years demonstrate the complexity of the task.

(D) Costs Related to Litigation With the SEC

CAT LLC believes that the recovery of legal costs related to the litigation with the SEC regarding the CAT NMS Plan is appropriate, and that the amount and scope of such costs, as described above, are reasonable.

As a preliminary matter, as discussed above, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments.¹⁷⁴ Moreover, CAT LLC initiated such litigation, and incurred the related legal costs, because it was critical to address the Commission's interpretations of the CAT NMS Plan. Among other things, such interpretations threatened to impose unnecessary costs on the CAT, which would be borne by the Participants and Industry Members. Indeed, in response to the litigation, the Commission provided exemptive relief that allowed alternative, more cost-effective approaches to the implementation of the CAT. Specifically, in the 2023 exemptive order, the Commission stated:

The conditional exemptive relief in this Order allows for the implementation of alternative regulatory solutions that continue to advance the regulatory goals that Rule 613 and the CAT NMS Plan were intended to promote, while reducing the implementation and operational costs, burdens, and/or difficulties that would otherwise be incurred by the Participants and Industry Members that must fund the CAT.¹⁷⁵

CAT LLC believes it is reasonable and appropriate to incur costs to limit the need to incur even greater costs due to certain interpretations of the Plan.

In addition, the legal costs incurred during the litigation are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1. As described above, the

specialized services were performed by experienced counsel at market rates for such services. As such, the legal costs related to this litigation incurred during the period covered by Historical CAT Assessment 1 were reasonable.

Finally, Industry Members will directly benefit from the result of the litigation because it has addressed CAT NMS Plan requirements that would have imposed significantly greater costs on the CAT. Accordingly, it is reasonable and appropriate that the costs of such litigation be included in the Historical CAT Costs 1.

(E) Costs Related to the Initial Plan Processor

CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017, which was the date by which Participants were required to begin reporting to the CAT, due to the delay in the commencement of reporting to the CAT. As discussed above, the Participants determined to exclude all CAT costs incurred from November 15, 2017 through November 15, 2018, which includes \$37,852,083 in Thesys costs incurred from November 15, 2017 through November 15, 2018 (as well as other CAT costs during this period). The remaining Thesys costs incurred after November 15, 2018 are the \$19,628,791 in capitalized developed technology costs for the period from November 16, 2018 through February 2019 incurred in the development of the CAT by the Initial Plan Processor, as well as a transition fee for the transition from the Initial Plan Processor to the successor Plan Processor. The Participants would remain responsible for 100% of these \$19,628,791 in costs.

CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017. CAT LLC notes that the development and implementation of the CAT System, while unprecedented in scope and design, is like any other large and innovative technology project in that, inevitably, there were adjustments and refinements in the technical approach as the project developed, even with substantial planning efforts and oversight prior to the build. This is even more likely when the project faces a very tight implementation schedule, such as the one imposed by the Commission in Rule 613 and the CAT NMS Plan. However, an adjusted approach does not mean that the funds were not valid expenditures and should not be recovered.

The reasonableness of Thesys costs should be evaluated by the Commission as of the time they were incurred, not in hindsight. As detailed above, the Commission concluded in 2016 that "the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor," and that "the process set forth in the Selection Plan should be permitted to continue."¹⁷⁶ Following this process, the Participants notified the Commission of the selection of Thesys as the Initial Plan Processor on January 17, 2017.¹⁷⁷ At the time, neither the Commission nor the industry argued that the selection of the Initial Plan Processor was unreasonable or otherwise inconsistent with the CAT NMS Plan, nor did they predict the selection would result in unanticipated delays in the implementation of the CAT System. On the contrary, on April 4, 2017, the President of SIFMA wrote that "SIFMA looks forward to commencing work with the SROs and Thesys."¹⁷⁸

As noted in the CAT Funding Model Approval Order, "[i]n Rule 613, the Commission made the determination that the costs of the CAT should be shared by the Participants and Industry Members."¹⁷⁹ If the CAT Funding Model had existed on Day 1, the risk of any unanticipated costs or challenges associated with the Initial Plan Processor would have been fairly and reasonably shared among the Participants and Industry Members on an ongoing basis. Given that the Commission concluded in 2012 that the costs of the CAT would be shared by the Participants and Industry Members, it is not fair or reasonable to determine in hindsight that all of the risk involved in developing the CAT should be allocated entirely to the Participants.

(F) CAIS Implementation Costs

CAT LLC believes that the recovery of CAIS-related costs is appropriate, and that the amount and scope of such costs, as described above, are reasonable, and that the reasonableness of historical costs should be evaluated by the Commission as of the time they were incurred, not in hindsight.

¹⁷⁶ CAT NMS Plan Approval Order at 84737.

¹⁷⁷ Letter from the Participants to Brent J. Fields, Secretary, SEC (Jan. 18, 2017), <https://www.sec.gov/divisions/marketreg/rule613-info-notice-of-plan-processor-selection.pdf>.

¹⁷⁸ Letter from Kenneth E. Bentsen, Jr., SIFMA, to Participants re: Selection of Thesys as CAT Processor (Apr. 4, 2017), <https://www.sifma.org/wp-content/uploads/2017/05/SIFMA-Submits-Comment-Letter-to-SRO-on-the-selection-of-Thesys-as-the-CAT-Processor.pdf>.

¹⁷⁹ CAT Funding Model Approval Order at 62650.

¹⁷⁴ See Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁷⁵ Settlement Exemptive Order at 77129–30.

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable CAIS operating costs as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that “the reasonably budgeted CAT costs shall include . . . CAIS operating fees.”¹⁸⁰ In addition, the CAT NMS Plan also requires Participants to include in their fee filings “a brief description of the amount and type of the Historical CAT Costs, including . . . CAIS operating fees.”¹⁸¹ In keeping with these provisions, this filing provides a brief description of reasonably budgeted CAIS operating fees.

In addition, CAT LLC determined that the CAIS operating fees described above are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1. The “CAIS Operating Costs” for Historical CAT Assessment 1 total \$9,480,587, with Pre-FAM costs of \$2,072,908, FAM 1 costs of \$254,998, FAM 2 costs of \$1,590,298, and FAM 3 costs of \$5,562,383. As described above, the CAIS operating fees were incurred with regard to two categories of CAIS-related efforts: (1) the acceleration of the reporting of LTIDs; and (2) the development of the CAIS Technical Specifications and the building of CAIS. These two categories of costs are discussed in more detail below.

(i) LTID Reporting

During the period covered by Historical CAT Assessment 1, the CAIS operating costs included costs related to the acceleration of the reporting of LTIDs earlier than originally contemplated during this period at the request of the SEC and in accordance with exemptive relief granted by the SEC.¹⁸² As the SEC approved in this exemptive relief, the Participants proposed “to require the reporting of LTIDs to the CAT in Phases 2c and 2d, instead of with the rest of Customer Account Information in Phase 2e, which potentially could result in an earlier elimination of broker-dealer recordkeeping, reporting and monitoring requirements of the Large Trader Rule.”¹⁸³ To implement the reporting of LTIDs to the CAT, the following steps were taken during the period covered by Historical CAT Assessment 1:

- After FCAT developed the LTID Technical Specifications, the LTID

Technical Specifications were published on January 31, 2020, with additional updates provided to the LTID Technical Specifications through April 2021.¹⁸⁴

- The LTID account information testing environment opened on August 24, 2020.
- The LTID account information reporting production environment opened on December 14, 2020.
- CAT Reporters were required to request their production readiness certification for account information related to LTIDs by the deadline of April 9, 2021.
- The LTID account information reporting for Phases 2a, 2b and 2c for Large Industry Members went live on April 26, 2021.
- The LTID account information reporting for Phases 2d for Large Industry Members went live on December 13, 2021.
- The LTID account information reporting for Phases 2a, 2b, 2c and 2d for Small Industry Members went live on April 26, 2021.

Throughout this project, FCAT and CAT LLC worked closely with the industry on LTID and CAIS reporting. Between December 2019 and December 2021, at least 57 checkpoint calls, webinars, and technical working group meetings with industry representatives were hosted to address issues and to educate CAT Reporters regarding LTID and CAIS reporting.¹⁸⁵

The LTID reporting project was successfully completed in a timely fashion, and the fees related to the project were reasonable. Accordingly, CAT LLC appropriately seeks to recover such costs via Historical CAT Assessment 1.

(ii) CAIS Reporting

During the period covered by Historical CAT Assessment 1, FCAT began the development of the full CAIS Technical Specifications and the building of CAIS. The CAIS Technical Specifications were developed during this period as follows:

- Iterative drafts of the CAIS Technical Specifications were published on June 30, 2020, December 1, 2020, and January 1, 2021.¹⁸⁶

¹⁸⁴ The LTID Technical Specifications, including original drafts and updated versions, are available on the Industry Member Specifications page of the CAT website (<https://www.catnmsplan.com/specifications/im>).

¹⁸⁵ Such contact points with the industry are described in detail on the Events web page of the CAT website (<https://www.catnmsplan.com/events>).

¹⁸⁶ The CAIS Technical Specifications, including original drafts and updated versions, are available on the Industry Member Specifications page of the CAT website (<https://www.catnmsplan.com/specifications/im>).

- The full, final CAIS Technical Specifications were published on January 29, 2021.

- Updated versions of the CAIS Technical Specifications were published throughout 2021.¹⁸⁷

As discussed above, FCAT and CAT LLC frequently engaged with the industry regarding the development of CAIS, hosting regular checkpoint calls, webinars, and technical working group meetings with industry representatives to address any issues, including addressing the interplay between Industry Members’ existing customer systems and CAIS, and to educate CAT Reporters regarding LTID and CAIS reporting. Such engagement was critical to the CAIS development process as the CAIS project was unprecedented in terms of its content, scope and complexity.

During this period, FCAT also commenced the building of the CAIS system in accordance with the CAIS Technical Specifications during the period covered by Historical CAT Assessment 1. The CAIS system was ready for industry testing shortly after the end of this period in January 2022.

The CAIS Technical Specifications and the CAIS system, as developed during this period, continue to be in use today. Industry Members have been required to report, and have continuously reported, required data to CAIS on a daily basis since November 7, 2022, consistent with interim reporting obligations. The CAIS system accepts and validates the CAIS data submitted by Industry Members and provides Industry Members with initial feedback on data errors. In light of the unprecedented nature of the CAIS system, certain changes to the system, such as changes related to error corrections and the CAIS regulatory portal, were necessary to finalize CAIS reporting. FCAT worked to address these remaining issues,¹⁸⁸ and, as of May 31, 2024, FCAT indicated that it had achieved the final CAIS reporting milestone. Accordingly, CAT LLC appropriately seeks to recover CAIS operating costs via Historical CAT Assessment 1.

(G) Public Relations Costs

CAT LLC believes that the recovery of public relations costs is appropriate and that the amount and scope of such costs, as described above, are reasonable.

¹⁸⁷ Six updated versions of the CAIS Technical Specifications were published during 2021, in March, May, June, August, October and December.

¹⁸⁸ See, e.g., CAT Q4 2023 Quarterly Progress Report (Jan. 30, 2024) (<https://www.catnmsplan.com/sites/default/files/2024-01/CAT-Q4-2023-QPR.pdf>).

¹⁸⁰ Section 11.1(a)(i) of the CAT NMS Plan.

¹⁸¹ Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁸² See Phased Reporting Exemptive Relief Order at 23079–80.

¹⁸³ *Id.* at 23078–79, n.70.

The Commission has long recognized that external public relations costs are reasonably associated with creating, implementing and maintaining the CAT. In the CAT NMS Plan Approval Order, the Commission estimated that the Participants had collectively spent approximately \$2,400,000 in preparation of the CAT NMS Plan on external public relations, legal, and consulting costs, and estimated that the Participants would continue to incur external public relations costs associated with maintaining the CAT upon approval of the CAT NMS Plan.¹⁸⁹

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for public relations services as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that “the reasonably budgeted CAT costs shall include . . . public relations costs.”¹⁹⁰ In addition, the CAT NMS Plan also requires Participants to include in their fee filings “a brief description of the amount and type of the Historical CAT Costs, including . . . public relations costs.”¹⁹¹ In keeping with these provisions, a brief description of reasonable public relations costs are described above.

In addition, CAT LLC determined that the public relations costs described above are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1. The services performed by the public relations firms through 2021 were limited in scope to assist CAT LLC, which has no employees of its own, to be better positioned to understand and address CAT matters to the benefit of all market participants and to communicate on important CAT topics with the public. In addition, the costs for these services were appropriately limited. During the 10-year period covered by Historical CAT Assessment 1, the average cost per year for these services was approximately \$36,000.

(H) Legal Costs Related to the Limitation of Liability Provision in CAT Reporter Agreements

CAT LLC believes that the recovery of legal costs related to the limitation of liability provision, including costs related to the proceedings before the SEC and costs related to the proposed amendment to the Consolidated Audit Trail Reporter Agreement and the Consolidated Audit Trail Reporting

Agent Agreement (the “Reporting Agreements”) is appropriate and that the amount and scope of such costs as described above are reasonable.

As a preliminary matter, as discussed above, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments.¹⁹² In addition, CAT LLC determined that the legal costs incurred for the assistance with regard to the limitation of liability provisions are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1.

Moreover, it is critical that CAT LLC, which has no employees of its own, have the ability to fund a legal defense in litigation and other legal proceedings against it. In response to CAT LLC requiring Industry Members to agree to the limitation of liability provision to submit data to the CAT, SIFMA filed an application for review of actions taken by CAT LLC and the Participants pursuant to Sections 19(d) and 19(f) of the Exchange Act. Contemporaneously with the filing of this proceeding, SIFMA moved for a stay of the requirement that Industry Members sign a Reporter Agreement, or in the alternative, asked the Commission to further delay the launch of CAT reporting on June 22, 2020. CAT LLC must have the resources to defend itself from litigious actions by others, like these.

Although a limitation of liability provision ultimately was not adopted as proposed, it was a reasonable provision to propose for the CAT Reporter Agreements, given that such provisions are in accordance with industry norms. Limitations of liability are ubiquitous within the securities industry and have long governed the economic relationships between self-regulatory organizations and the entities that they regulate. For example, U.S. securities exchanges have adopted rules to limit their liability for losses that Industry Members incur through their use of exchange facilities.¹⁹³ Similarly, FINRA’s former order audit trail, OATS, which has functioned as an integrated audit trail of order, quote, and trade data for equity securities, required FINRA members to acknowledge an agreement that includes a limitation of liability provision.¹⁹⁴ In addition, such a

provision was intended to ensure the financial stability of the CAT. Accordingly, it was reasonable for CAT LLC to propose the use of such a provision.¹⁹⁵

Furthermore, as described above, the specialized services were performed by experienced counsel at market rates for such services. Accordingly, the legal costs for the efforts related to the limitation of liability provision were reasonable.

(I) Costs for the Chair of CAT Operating Committee

CAT LLC believes that the recovery of consulting costs related to the Chair of the CAT Operating Committee is appropriate and that the amount and scope of such costs are reasonable.

As a preliminary matter, the selection of the Chair of the Operating Committee complies with the requirements of Section 4.2 of the CAT NMS Plan. The initial Chair that served during the period covered by Historical CAT Assessment was designated by a Participant as the Participant’s alternate voting member. Accordingly, the Chair is a representative of the Participants, as required by the CAT NMS Plan.

In addition, in approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for consulting as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that “the reasonably budgeted CAT costs shall include . . . consulting . . .” costs.¹⁹⁶ In addition, the CAT NMS Plan also requires Participants to include in their fee filings “a brief description of the amount and type of the Historical CAT Costs, including . . . consulting”¹⁹⁷ costs. In keeping with these provisions, a brief description of reasonable consulting costs is included in this filing, and such reasonable consulting costs include the costs related to the Chair position.

The Participants determined that the position of the Chair was a critical role for the implementation of the CAT, and an independent Chair would appropriately consider and address the views of each of the Participants. The Participants also determined that it was important to have a Chair with a strong

terms—including its limitation of liability provision—every time they access FINRA’s OATS system to report trade information (*i.e.*, repeatedly over the course of a trading day for many Industry Members).

¹⁹⁵ See Letter from Michael Simon, Chair, CAT Operating Committee, to Vanessa Countryman, Secretary, Commission (Dec. 18, 2020).

¹⁹⁶ Section 11.1(a)(i) of the CAT NMS Plan.

¹⁹⁷ Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁸⁹ CAT NMS Plan Approval Order at 84917–18.

¹⁹⁰ Section 11.1(a)(i) of the CAT NMS Plan.

¹⁹¹ Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁹² See Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁹³ See, e.g., NASDAQ Equities Rule 4626.

¹⁹⁴ FINRA Rule 1013(a)(1)(R) requires all applicants for FINRA Membership to acknowledge the FINRA Entitlement Program Agreement and Terms of Use, which applies to OATS. Industry Members click to indicate that they agree to its

background regarding issues related to the regulatory obligations of self-regulatory organizations, including their obligations under national market system plans. The compensation paid to the Chair is appropriate for a person with such background and skills. The average annual amount paid to the Chair from 2017 through the end of FAM 3 was \$292,733.30. Separate from the Chair, CAT LLC relies upon a Leadership Team of representatives of the SROs to oversee the day-to-day implementation of the CAT NMS Plan. CAT LLC does not compensate any member of the Leadership Team.

(11) Fee Implementation Assistance for Industry Members

(A) Reconciliation of CAT Invoices

(i) Reconciliation of CAT Invoices to Underlying Trades Provided by CAT

CAT LLC understands that there are three types of reconciliation processes related to the invoices:

- *Reconciliation of CAT Invoices to Underlying Trades:* Reconciling the CAT invoice amount to the underlying trades provided by CAT;
- *Matching Trades to Books and Records:* Providing the means to match the underlying trades provided by CAT with CAT invoices to other books and records independently maintained by individual CAT Reporters (e.g., exchange trade journals/acknowledgements) and data sources of self-regulatory organizations independent of CAT; and
- *Order Originator Identification:* Providing the ability to identify the order originator for the underlying trades provided by CAT with CAT invoices, which would facilitate firms' ability to pass through CAT Fees to their customers.

As discussed further below, CAT LLC only considers the first type of process to be a "reconciliation" and the only type of process that is required under the CAT NMS Plan. CAT LLC provides the means to reconcile the CAT invoice amount to the underlying trades provided by CAT.

The CAT NMS Plan does not require CAT LLC to facilitate the second type of process: matching underlying trades for a CAT invoice with a firm's internal books and records. CAT LLC has access only to the underlying trades provided by CAT; it does not have access to a firm's internal books and records. Although beyond the requirements of the CAT NMS Plan and involving firm specific considerations, CAT LLC voluntarily has provided guidance and processes to assist CAT Reporters in their efforts to match the underlying

trades with their own books and records.

The CAT NMS Plan also does not require CAT LLC to provide the ability to identify the order originator for the underlying trades for the CAT invoices. Accordingly, the billing guidance and processes do not provide CAT Reporters with the ability to identify the order originator for the underlying trades provided by CAT with CAT invoices. CAT LLC has been working closely with CAT Reporters to explain its billing approach and to address any outstanding billing questions. But, it should not be lost that CAT LLC provides information sufficient to allow CAT Reporters to reconcile CAT invoice amounts with the underlying trades provided by CAT LLC.

(ii) Match the Underlying Trades Provided by CAT With CAT Invoices to Firms' Internal Books and Records Independent of CAT

The CAT NMS Plan does not require CAT LLC to facilitate the matching of underlying trades for a CAT invoice with a firm's internal books and records, which may consist of trading data from various sources external to CAT. Although beyond the requirements of the CAT NMS Plan and involving firm specific considerations, CAT LLC voluntarily has provided guidance and processes to assist CAT Reporters in their efforts to match the underlying trades with their own books and records.

In this regard, it is important to recognize that CAT LLC has developed a billing approach that greatly improves upon existing billing practices for similar regulatory fees (e.g., fees related to Section 31). Accordingly, with the additional information voluntarily provided by CAT LLC, CAT Reporters generally will have sufficient information to match their underlying trades provided by CAT with their own internal books and records that are independent of CAT or to SRO data that is independent of CAT data. However, CAT LLC emphasizes that providing such additional information is not required by the CAT NMS Plan.

To facilitate the introduction of CAT fees, CAT LLC has worked with FCAT to develop an approach to CAT billing that is consistent with existing billing constructs used with regard to Section 31-related sales values fees, subject to certain enhancements. Under this billing approach, FCAT is providing additional linkage elements, not necessarily provided in the Section 31-sales value fee context, to facilitate CAT Reporters' ability to match the underlying trades provided by CAT

with their internal books and records and to reduce the complexity of that process. Specifically, FCAT is providing various key elements of the trade itself, such as the tradeID and branch sequence,¹⁹⁸ to CAT Reporters in the trade billing details provided with their CAT invoices ("Additional Trade Details"). As a result, CAT Reporters now have numerous alternative methods for matching a trade with their internal books and records where they previously did not have such matching methods in other fee contexts.

With the Additional Trade Details, CAT LLC and FCAT believe that the overwhelming majority of underlying trades provided by CAT bills can be matched with a CAT Reporter's internal books and records. CAT LLC recognizes that there may be certain cases in which such matching is more difficult given various firm-specific considerations, but believes that such instances are significantly more limited than with regard to the SRO fees charged in relation to Section 31.¹⁹⁹ By providing Additional Trade Details that are not available in other fee contexts, FCAT enhances the Industry Members' ability to match the underlying trades provided with CAT invoices with books and records and SRO data, both of which are independent of CAT data.

(iii) CAT LLC Is Not Required To Facilitate CAT Reporters' Ability To Pass Through Fees to Their Customers

Similar to other regulatory fees, the CAT NMS Plan does not address the manner or extent to which CAT Executing Brokers may seek to pass any CAT fees on to their customers, nor does it impose any obligation on CAT LLC or the Plan Processor to facilitate firms' ability to do so. Accordingly, Historical CAT Assessment 1 does not address the process by which any CAT Reporters may pass through the fee to their

¹⁹⁸ See CAT Technical Specifications for Billing Trade Details; Trade Details Schema (<https://catnmsplan.com/sites/default/files/2024-02/02.05.24-Billing-Trade-Details-Schema.json>); CAT Billing Scenarios, Version 1.0 (Nov. 30, 2023) (<https://www.catnmsplan.com/sites/default/files/2024-01/01.12.2024-CAT-Billing-Scenarios-v1.0.pdf>).

¹⁹⁹ For years, broker-dealers have faced similar reconciliation issues with regard to SRO fees related to Section 31. Broker-dealers have responded to this issue in the Section 31 context by exercising their discretion as to whether and the manner and extent to which they pass on those fees (e.g., by rounding up its fees to the nearest cent, or decide to charge for, or not charge for, certain transactions, or assess a specific fee or incorporate the costs into other fee programs). See, e.g., Securities Exchange Act Rel. No. 49928 (June 28, 2004), 69 FR 41060, 41072 (July 7, 2004) (noting that broker-dealers may "over-collect" Section 31-related fees charged to their clients due to rounding practices, and double-counting with regard to certain transactions).

customers. Likewise, the CAT billing approach provided by the Plan Processor is designed to address the needs of CAT Reporters with regard to the reconciliation of CAT invoices with the underlying trades provided by CAT LLC with the invoices; they are not designed to address issues related to any pass-through fees. Accordingly, facilitating CAT Reporters' ability to pass through fees to their clients is outside the scope of this fee filing. Nevertheless, as described below, CAT LLC and the Plan Processor have expended significant efforts to provide technical assistance to Industry Members regarding the implementation of Historical CAT Assessment 1, including providing Additional Trade Details that provide significant details about each underlying trade.

(a) Originating Brokers Versus Executing Brokers

In its approval of the CAT Funding Model, the Commission approved charging CAT fees to the CAT Executing Broker, rather than the originating broker. This fee filing must comply with the requirements of the CAT Funding Model, and, therefore, charges the Historical CAT Assessment 1 to CAT Executing Brokers.

Moreover, charging originating brokers would introduce significant complexity to the billing process from the CAT's perspective, and would increase the costs of implementing CAT fees. Charging the CAT Executing Broker is simple and straightforward, and leverages a one-to-one relationship between billable events (trades) and billable parties, similar to other transaction-based fees. In contrast, for a single trade event, there may be many originating brokers, and each trade must be broken down on a pro-rata basis, to account for one or more layers of aggregation, disaggregation, and representation of the underlying orders. While CAT is indeed designed to capture and unwind complex aggregation scenarios, the data and linkages are structured to facilitate regulatory use, and not a billing mechanism that assesses fees on a distinct set of executed trades; it is not simply a matter of using existing CAT linkages. Furthermore, charging originating brokers would implicate issues related to lifecycle linkage rates, and issues related to corrections, cancellations and allocations, while charging CAT Executing Brokers would avoid such issues.

(b) Identification of Order Originator for Underlying Trades

As noted, the CAT NMS Plan does not address the manner or extent to which CAT Executing Brokers may seek to pass any CAT Fees on to their customers, nor does it impose any obligation on CAT LLC or the Plan Processor to facilitate firms' ability to do so. Nevertheless, the Additional Trade Details provided with regard to the underlying trades on CAT invoices may assist with this process. Like with Section 31-related sales value fees, however, it is not always possible to trace every fee on a transaction back to the originating party. Industry Members have faced these issues under Section 31-related sales value fees for many years.²⁰⁰ However, with the Additional Trade Details provided under the CAT billing approach, in many cases, CAT Reporters will be able to identify the order originator for the underlying trades provided by CAT with CAT invoices. In some cases, CAT LLC believes that certain issues related to certain types of market activity may implicate CAT Reporters' ability to identify the order originator for a limited set of underlying trades for the CAT invoices. Although CAT LLC does not believe that it is required to address these issues, CAT LLC and FCAT have been carefully researching and analyzing these types of issues as they are identified, and have been working voluntarily to assist CAT Reporters with these issues as necessary and when possible. In addition, CAT LLC intends to continue to provide CAT Reporters with billing guidance through FAQs, CAT Alerts and Helpdesk responses to address outstanding billing questions.

(B) Significant Technical Assistance

CAT LLC has worked with FCAT to provide significant technical assistance to Industry Members to allow the Industry Members to understand how Historical CAT Assessment 1 will be implemented and billed, including webinars, CAT alerts, mock invoices, and responses to questions posed to the FCAT Help Desk.

• *Technical Specifications and Scenarios.* CAT LLC has provided

detailed technical documentation for CAT billing, including (1) technical specifications, which describe the CAT Billing Trade Details Files associated with monthly CAT invoices, including detailed information about data elements and file formats as well as access instructions, network and transport options;²⁰¹ (2) trade details schemas;²⁰² and (3) CAT billing scenarios.²⁰³

• *Industry Webinars.* CAT LLC has hosted two industry webinars specifically dedicated to CAT billing. The first webinar, hosted on September 28, 2023, discussed the operational implementation of the CAT Reporter billing process.²⁰⁴ The second webinar, hosted on November 7, 2023, provided (1) a demonstration of the CAT Reporter Portal and how to access CAT billing documents, including CAT invoices; and (2) additional information on underlying trade details in relation to the CAT Reporter billing process and an overview of the CAT Contact Management System.²⁰⁵ 485 participants and 394 participants attended the two webinars, respectively.

• *CAT Alert.* CAT LLC has published a detailed CAT Alert that describes how FCAT, as the Plan Processor acting on behalf of CAT LLC, will calculate applicable fees, issue invoices to and collect payment from CAT Executing Brokers.²⁰⁶

• *Frequently Asked Questions (FAQs).* CAT LLC also has continued to engage with the industry on billing issues by making responses to billing FAQs available on the CAT website. The FAQs address a broad range of frequently asked questions, including, for example, which Industry Members will receive invoices, how fees are calculated, when and how fees are required to be paid, how to access invoices, and how to update the billing contact. To date, responses to 27 FAQs are available on the CAT website, and

²⁰¹ CAT Technical Specifications for Billing Trade Details, Version 1.0 r1 (Dec. 8, 2023) (https://catnmsplan.com/sites/default/files/2023-12/12.07.2023-CAT-Technical-Specifications-for-Billing-Trade-Details-v1.0r1_CLEAN.pdf).

²⁰⁶ See CAT Alert 2023-02 (Oct. 12, 2023) (<https://www.catnmsplan.com/sites/default/files/2023-10/10.12.23-CAT-Alert-2023-02.pdf>).

²⁰⁰ "FINRA charges a Regulatory Transaction Fee ("RTF") to industry members to reimburse FINRA for the Section 31 fees that FINRA pays to the Commission. FINRA does not currently provide industry members with the data that industry members require for proper reconciliation of RTF fees. This has been a major problem for the industry for many years." Letter from Howard Meyerson, Managing Director, FIF, to Robert Cook, Chief Executive Officer, FINRA at 2 (Dec. 15, 2023) (<https://fif.com/index.php/working-groups/category/271-comment-letters?download=2820:fif-letter-to-finra-on-pass-through-of-finra-cat-fees&view=category>).

CAT LLC will provide additional responses to FAQs as warranted.²⁰⁷

- **Mock Invoices.** To assist Industry Members with compliance with the commencement of Historical CAT Assessment 1, CAT LLC has been making available to CAT Executing Brokers mock invoices for Historical CAT Assessment 1 since December 2023 for billable activity occurring in November 2023. The mock invoices are in the same form as the actual, payable invoices, including both the relevant transaction data and the corresponding fee (as originally contemplated). However, no payments are required in response to such mock invoices; they are to be used solely to assist CAT Executing Brokers with the development of their processes for paying the CAT fees. Such data provides CAT Executing Brokers with a preview of the transaction data used in creating the invoices for Historical CAT Assessment 1 fees, as the data will be the same as data provided in actual invoices. Such data preview is intended to facilitate the payment of Historical CAT Assessment 1. For the November, December, and January billing periods, FCAT has generated trade detail files for 569 distinct firms that are CAT Executing Brokers. As such, CAT Reporters have actively engaged in the billing process via the mock invoices.

- **Help Desk Assistance.** CAT LLC also provides detailed, individualized assistance to Industry Members regarding CAT fees and the billing process through the FCAT Help Desk.²⁰⁸ For example, the Help Desk has assisted with 406 cases related to the billing of CAT fees from July 2023 through March 2024.

By providing such detailed and sustained assistance to Industry Members regarding CAT fees and billing, CAT LLC has successfully addressed questions raised by Industry Members regarding the CAT fees and billing processes.

(C) Ample Preparation Time

CAT LLC has provided Industry Members with ample time to comply with the implementation of Historical CAT Assessment 1. CAT LLC originally proposed issuing the first invoices for Historical CAT Assessment 1 in

December 2023 based on transactions in Eligible Securities in November 2023. In consideration of the feedback about the need for additional time to implement the new fee, CAT LLC pushed back this timeline by four months, proposing to issue the first Historical CAT Assessment 1 in April 2024 based on transactions in March 2024.²⁰⁹ This filing pushes this timeline back even further for implementing Historical CAT Assessment 1, proposing to issue the first invoices for Historical CAT Assessment 1 in November 2024 based on transactions in Eligible Securities in October 2024. Moreover, as discussed above, during these additional months, FCAT has been working closely with Industry Members to provide guidance regarding their mock bills and reconciliation efforts related thereto.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of the Exchange Act. The Exchange believes that the proposed rule change is consistent with Section 6(b)(5) of the Act,²¹⁰ which requires, among other things, that the Exchange's rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and not designed to permit unfair discrimination between customers, issuers, brokers and dealers. The Exchange also believes that the proposed rule change is consistent with the provisions of Section 6(b)(4) of the Act,²¹¹ because it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(8) of the Act,²¹² which requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. These provisions also require that the Exchange be "so organized and [have] the capacity to be able to carry out the purposes" of the Act and "to comply, and . . . to enforce compliance by its members and persons associated with its members," with the

provisions of the Exchange Act.²¹³ Accordingly, a reasonable reading of the Act indicates that it intended that regulatory funding be sufficient to permit an exchange to fulfill its statutory responsibility under the Act, and contemplated that such funding would be achieved through equitable assessments on the members, issuers, and other users of an exchange's facilities.

The Exchange believes that this proposal is consistent with the Act because it implements provisions of the Plan and is designed to assist the Exchange in meeting regulatory obligations pursuant to the Plan. In approving the Plan, the SEC noted that the Plan "is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act."²¹⁴ To the extent that this proposal implements the Plan and applies specific requirements to Industry Members, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Act.

The Exchange believes that the proposed fees paid by the CEBBs and CEBs are reasonable, equitably allocated and not unfairly discriminatory. First, the Historical CAT Assessment 1 fees to be collected are directly associated with the costs of establishing and maintaining the CAT, where such costs include Plan Processor costs and costs related to technology, legal, consulting, insurance, professional and administration, and public relations costs. The Exchange has already incurred such development and implementation costs and the proposed Historical CAT Assessment 1 fees, therefore, would allow the Exchange to collect certain of such costs in a fair and reasonable manner from Industry Members, as contemplated by the CAT NMS Plan.

The proposed Historical CAT Assessment 1 fees would be charged to Industry Members in support of the maintenance of a consolidated audit trail for regulatory purposes. The proposed fees, therefore, are consistent with the Commission's view that regulatory fees be used for regulatory purposes and not to support the Exchange's business operations. The proposed fees would not cover Exchange services unrelated to the CAT.

²⁰⁷ See CAT Billing FAQs, Section V of CAT FAQs (https://www.catnmsplan.com/faq?search_api_fulltext=&field_topics=271&sort_by=field_faq_number).

²⁰⁸ The CAT NMS Plan requires that the Plan Processor "staff a CAT help desk, as described in Appendix D, CAT Help Desk, to provide technical expertise." Section 6.10(c)(vi) of the CAT NMS Plan. See also Section 10.3 of Appendix D of the CAT NMS Plan for a description of the Plan requirements for the CAT Help Desk.

²⁰⁹ Securities Exchange Act Release No. 99370 (January 17, 2024), 89 FR 10430 (February 13, 2024) (SR-C2-2024-002).

²¹⁰ 15 U.S.C. 78f(b)(6).

²¹¹ 15 U.S.C. 78f(b)(4).

²¹² 15 U.S.C. 78f(b)(8).

²¹³ See Section 6(b)(1) of the Exchange Act.

²¹⁴ CAT NMS Plan Approval Order at 84697.

In addition, any surplus would be used as a reserve to offset future fees. Given the direct relationship between CAT fees and CAT costs, the Exchange believes that the proposed fees are reasonable, equitable and not unfairly discriminatory.

As further discussed below, the SEC approved the CAT Funding Model, finding it was reasonable and that it equitably allocates fees among Participants and Industry Members. The Exchange believes that the proposed fees adopted pursuant to the CAT Funding Model approved by the SEC are reasonable, equitably allocated and not unfairly discriminatory.

(1) Implementation of CAT Funding Model in CAT NMS Plan

Section 11.1(b) of the CAT NMS Plan states that “[t]he Participants shall file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves.” Per Section 11.1(b) of the CAT NMS Plan, the Exchange has filed this fee filing to implement the Industry Member CAT fees included in the CAT Funding Model. The Exchange believes that this proposal is consistent with the Exchange Act because it is consistent with, and implements, the CAT Funding Model in the CAT NMS Plan, and is designed to assist the Exchange and its Industry Members in meeting regulatory obligations pursuant to the CAT NMS Plan. In approving the CAT NMS Plan, the SEC noted that the Plan “is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.”²¹⁵ Similarly, in approving the CAT Funding Model, the SEC concluded that the CAT Funding Model met this standard.²¹⁶ As this proposal implements the Plan and the CAT Funding Model described therein, and applies specific requirements to Industry Members in compliance with the Plan, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Exchange Act.

(2) Calculation of Fee Rate for Historical CAT Assessment 1 Is Reasonable

The SEC has determined that the CAT Funding Model is reasonable and satisfies the requirements of the Exchange Act. Specifically, the SEC has

concluded that the method for determining Historical CAT Assessments as set forth in Section 11.3 of the CAT NMS Plan, including the formula for calculating the Historical Fee Rate, the identification of the parties responsible for payment and the transactions subject to the fee rate for the Historical CAT Assessment, is reasonable and satisfies the Exchange Act.²¹⁷ In each respect, as discussed above, Historical CAT Assessment 1 is calculated, and would be applied, in accordance with the requirements applicable to Historical CAT Assessments as set forth in the CAT NMS Plan. Furthermore, as discussed below, the Exchange believes that each of the figures for the variables in the SEC-approved formula for calculating the fee rate for Historical CAT Assessment 1 is reasonable and consistent with the Exchange Act. Calculation of the Historical Fee Rate for Historical CAT Assessment 1 requires the figures for the Historical CAT Costs 1, the executed equivalent share volume for the prior twelve months, the determination of Historical Recovery Period 1, and the projection of the executed equivalent share volume for Historical Recovery Period 1. Each of these variables is reasonable and satisfies the Exchange Act, as discussed throughout this filing.

(A) Historical CAT Costs 1

The formula for calculating a Historical Fee Rate requires the amount of Historical CAT Costs to be recovered. Specifically, Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan requires a fee filing to provide:

a brief description of the amount and type of the Historical CAT Costs, including (1) the technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees, and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration and (6) public relations costs.

In accordance with this requirement, the Exchange has set forth the amount and type of Historical CAT Costs 1 for each of these categories of costs above.

Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan also requires that the fee filing provide “sufficient detail to demonstrate that the Historical CAT Costs are reasonable and appropriate.” As discussed below, the Exchange believes that the amounts set forth in this filing for each of these cost categories is “reasonable and appropriate.” Each of the costs included in Historical CAT Costs 1 are reasonable

and appropriate because the costs are consistent with standard industry practice, based on the need to comply with the requirements of the CAT NMS Plan, incurred subject to negotiations performed on an arm’s length basis, and/or are consistent with the needs of any legal entity, particularly one with no employees.

(i) Technology: Cloud Hosting Services

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover costs related to cloud hosting services as a part of Historical CAT Assessments.²¹⁸ CAT LLC determined that the costs related to cloud hosting services described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. As described above, the cloud hosting services costs reflect, among other things, the breadth of the CAT cloud activities, data volume far in excess of the original volume estimates, the need for specialized cloud services given the volume and unique nature of the CAT, the processing time requirements of the Plan, and regular efforts to seek to minimize costs where permissible under the Plan. CAT LLC determined that use of cloud hosting services is necessary for implementation of the CAT, particularly given the substantial data volumes associated with the CAT, and that the fees for cloud hosting services negotiated by FCAT were reasonable, taking into consideration a variety of factors, including the expected volume of data and the breadth of services provided and market rates for similar services.²¹⁹ Indeed, the actual costs of the CAT are far in excess of the original estimated costs of the CAT due to various factors, including the higher volumes and greater complexity of the CAT than anticipated when Rule 613 was originally adopted.

To comply with the requirements of the Plan, the breadth of the cloud activities related to the CAT is substantial. The cloud services not only include the production environment for the CAT, but they also include two industry testing environments, support environments for quality assurance and stress testing and disaster recovery capabilities. Moreover, the cloud storage costs are driven by the requirements of the Plan, which requires the storage of multiple versions of the data, from the original submitted version of the data

²¹⁸ Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

²¹⁹ For a discussion of the amount and type of cloud hosting services fees, see Sections 3(a)(2)(B)(i)(a), 3(a)(2)(B)(ii)(a), 3(a)(2)(B)(iii)(a) and 3(a)(2)(B)(iv)(A) above.

²¹⁵ CAT NMS Plan Approval Order at 84696.

²¹⁶ CAT Funding Model Approval Order at 62686.

²¹⁷ *Id.* at 62662–63.

through various processing steps, to the final version of the data.

Data volume is a significant driver of costs for cloud hosting services. When the Commission adopted the CAT NMS Plan in 2016, it estimated that the CAT would need to receive 58 billion records per day²²⁰ and that annual operating costs for the CAT would range from \$36.5 million to \$55 million.²²¹ Through 2021, the actual data volumes have been five times that original estimate. The data volumes for each period are set forth in detail above.²²²

In addition to the effect of the data volume on the cloud hosting costs, the processing timelines set forth in the Plan contribute to the cloud hosting costs. Although CAT LLC has proactively sought to manage cloud hosting costs while complying with the Plan, including through requests to the Commission for exemptive relief and an amendment to the CAT NMS Plan, stringent CAT NMS Plan requirements do not allow for any material flexibility in cloud architecture design choices, processing timelines (*e.g.*, the use of non-peak processing windows), or lower-cost storage tiers. As a result, the required CAT processing timelines contribute to the cloud hosting costs of the CAT.

The costs for cloud hosting services also reflect the need for specialized cloud hosting services given the data volume and unique processing needs of the CAT. The data volume as well as the data processing needs of the CAT necessitate the use of cloud hosting services. The equipment, power and services required for an on-premises data model, the alternative to cloud hosting services, would be cost prohibitive. Moreover, as CAT was being developed, there were limited cloud hosting providers that could satisfy all the necessary CAT requirements, including the operational and security criteria. Over time more providers offering cloud hosting services that would satisfy these criteria have entered the market. CAT LLC will continue to evaluate alternative cloud hosting services, recognizing that the time and cost to move to an alternative cloud provider would be substantial.

The reasonableness of the cloud hosting services costs is further supported by key cost discipline mechanisms for the CAT—a cost-based funding structure, cost transparency, cost management efforts (including regular efforts to lower compute and

storage costs where permitted by the Plan) and oversight. Together, these mechanisms help ensure the ongoing reasonableness of the CAT's costs and the level of fees assessed to support those costs.²²³

(ii) Technology: Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to operating fees as a part of Historical CAT Assessments.²²⁴ CAT LLC determined that the costs related to operating fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. The operating fees include the negotiated fees paid by CAT LLC to the Plan Processor to operate and maintain the system for order-related information and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.*, management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the selection of FCAT as the Plan Processor was reasonable and appropriate given its expertise with securities regulatory reporting, after a process of considering other potential candidates.²²⁵ CAT LLC also determined that the fixed price contract, negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, was reasonable and appropriate, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity.²²⁶ The services performed by FCAT for each period and the costs related to such services are described above.²²⁷

(iii) Technology: CAIS Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to CAIS operating fees as a part of Historical CAT Assessments.²²⁸ CAT LLC determined that the costs related to CAIS operating fees described in this filing are reasonable and should be included as a part of Historical CAT

Costs 1. The CAIS operating fees include the fees paid to the Plan Processor to operate and maintain CAIS and to perform the business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.*, management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the FCAT-negotiated fees for Kingland's CAIS-related services, negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity, were reasonable and appropriate.²²⁹ The services performed by Kingland for each period and the costs for each period are described above.²³⁰

(iv) Technology: Change Request Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to change request fees as a part of Historical CAT Assessments.²³¹ CAT LLC determined that the costs related to change request fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. It is common practice to utilize a change request process to address evolving needs in technology projects. This is particularly true for a project like CAT that is the first of its kind, both in substance and in scale. The substance and costs of each of the change requests are evaluated by the Operating Committee, and approved in accordance with the requirements for Operating Committee meetings. In each case, CAT LLC determined that the change requests were necessary to implement the CAT. As described above, the change requests cover various technology changes, including, for example, changes related to CAT reporting, data feeds and exchange functionality. CAT LLC also determined that the costs for each change request were appropriate for the relevant technology change. A description of the change requests for each FAM Period and their total costs are set described above.²³² As noted above, the total costs for change requests through FAM Period 3 represent a small percentage of

²²³ See Securities Exchange Act Rel. No. 97151 (Mar. 15, 2023), 88 FR 17086, 17117 (Mar. 21, 2023) (describing key cost discipline mechanisms for the CAT).

²²⁴ Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

²²⁵ See Section 3(a)(2)(B)(i)(b) above.

²²⁶ See Sections 3(a)(2)(B)(i)(b), 3(a)(2)(B)(ii)(b), 3(a)(2)(B)(iii)(b) and 3(a)(2)(B)(iv)(b) above.

Historical CAT Costs 1—that is, 0.25% of Historical CAT Costs 1.

(v) Capitalized Developed Technology Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to capitalized developed technology costs as a part of Historical CAT Assessments.²³³ Capitalized developed technology costs include costs related to certain development costs, costs related to certain modifications, upgrades and other changes to the CAT, CAIS implementation fees and license fees. The amount and type of costs for each period are described in more detail above.²³⁴ CAT LLC determined that these costs are reasonable and should be included as a part of Historical CAT Costs 1.

These costs involve the activity of both the Initial Plan Processor and FCAT, as the successor Plan Processor.²³⁵ With regard to the Initial Plan Processor, the Participants utilized an RFP to seek proposals to build and operate the CAT, receiving a number of proposals in response to the RFP. The Participants carefully reviewed and considered each of the proposals, including holding in-person meetings with each of the Bidders. After several rounds of review, the Participants selected the Initial Plan Processor in accordance with the CAT NMS Plan. CAT LLC entered into an agreement with the Initial Plan Processor in which CAT LLC would pay the Initial Plan Processor a negotiated, fixed price fee.²³⁶ In addition, as described above, CAT LLC determined that it is appropriate to enter into an agreement with FCAT as the successor Plan Processor.²³⁷

(vi) Legal

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to legal fees as a part of Historical CAT Assessments.²³⁸ CAT LLC determined that the legal costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Given the unique nature of the CAT, the number of parties involved with the CAT (including, for example, the SEC, Participants, Industry Members, and

vendors) and the many regulatory issues associated with the CAT, the scope of the necessary legal services are substantial. CAT LLC determined that the scope of the legal services is necessary to implement and maintain the CAT and that the legal rates reflect the specialized services necessary for such a project. When hiring each law firm for a CAT project, CAT LLC interviewed multiple firms, and determined to hire each firm based on a variety of factors, including the relevant expertise and fees. In each case, CAT LLC determined that the hourly fee rates were in line with market rates for the specialized legal expertise. In addition, CAT LLC determined that the total costs incurred for each CAT project were appropriate given the breadth of services provided. The services performed by each law firm for each period and the costs related to such services are described above.²³⁹

(vii) Consulting

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover consulting costs as a part of Historical CAT Assessments.²⁴⁰ CAT LLC determined that the consulting costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Because there are no CAT employees²⁴¹ and because of the significant number of issues associated with the CAT, the consultants provided assistance in the management of various CAT matters and the processes related to such matters.²⁴² CAT LLC considered a variety of factors in choosing a consulting firm and determined to select Deloitte after an interview process.²⁴³ CAT LLC also determined that the consulting services were provided at reasonable market rates, as the fees were negotiated annually and comparable to the rates charged by other consulting firms for similar work.²⁴⁴ Moreover, the total costs for such consulting services were appropriate in light of the breadth of services provided by Deloitte and the services performed by Deloitte and the

costs related to such services are described above.²⁴⁵

(viii) Insurance

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover insurance costs as a part of Historical CAT Assessments.²⁴⁶ CAT LLC determined that the insurance costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. CAT LLC determined that it is common practice to have directors' and officers' liability insurance, and errors and omissions liability insurance. CAT LLC further determined that it was important to have cyber security insurance given the nature of the CAT, and such a decision is consistent with the CAT NMS Plan, which states that the cyber incident response plan may include "[i]nsurance against security breaches."²⁴⁷ In selecting the insurance providers for these policies, CAT LLC engaged in an evaluation of alternative insurers, including a comparison of the pricing offered by the alternative insurers.²⁴⁸ Based on this analysis, CAT LLC determined that the selected insurance policies provided appropriate coverage at reasonable market rates.²⁴⁹

(ix) Professional and Administration

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover professional and administration costs as a part of Historical CAT Assessments.²⁵⁰ CAT LLC determined that the professional and administration costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Because there are no CAT employees, all required accounting, financial, tax, cash management and treasury functions for CAT LLC have been outsourced at market rates. In addition, the required annual financial statement audit of CAT LLC is included in professional and administration costs, which costs are also at market rates.

CAT LLC determined to hire a financial advisory firm, Anchin, to assist with financial matters for the CAT. CAT LLC interviewed Anchin as well as other potential financial advisory firms to assist with the CAT

²⁴⁹ *Id.*

²⁵⁰ Section 11.3(b)(iii)(B)(II)(B)(5) of the CAT NMS Plan.

project, considering a variety of factors in its analysis, including the firm's relevant expertise and fees.²⁵¹ The hourly fee rates for this firm were in line with market rates for the financial advisory services provided.²⁵² Moreover, the total costs for such financial advisory services was appropriate in light of the breadth of services provided by Anchin. The services performed by Anchin and the costs related to such services are described above.²⁵³

CAT LLC also determined to engage an independent accounting firm, Grant Thornton, to complete the audit of CAT LLC's financial statements, in accordance with the requirements of the CAT NMS Plan. CAT LLC interviewed this firm as well as another potential accounting firm to audit CAT LLC's financial statements, considering a variety of factors in its analysis, including the relevant expertise and fees of each of the firms. CAT LLC determined that Grant Thornton was well-qualified for the role given the balance of these considerations.²⁵⁴ Grant Thornton's fixed fee rate compensation arrangement was reasonable and appropriate, and in line with the market rates charged for these types of accounting services.²⁵⁵ Moreover, the total costs for such financial advisory services was appropriate in light of the breadth of services provided by Grant Thornton. The services performed by Grant Thornton and the costs related to such services are described above.²⁵⁶

The professional and administrative costs also include costs related to the receipt of certain market data from Exegy. After performing an analysis of the available market data vendors to confirm that the data provided met the SIP Data requirements of the CAT NMS Plan and comparing the costs of the vendors providing the required SIP Data, CAT LLC determined to purchase market data from Exegy. Exegy provided the data elements required by the CAT NMS Plan, and the fees were reasonable and in line with market rates for the market data received.²⁵⁷

The professional and administrative costs also include costs related to a third party security assessment of the CAT performed by RSM. The assessment was designed to verify and validate the

effective design, implementation and operation of the controls specified by NIST Special Publication 800–53, Revision 4 and related standards and guidelines. Such a security assessment is in line with industry practice and important given the data included in the CAT. CAT LLC determined to engage RSM to perform the security assessment, after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fees were reasonable and in line with market rates for such an assessment.²⁵⁸

(x) Public Relations Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover public relations costs as a part of Historical CAT Assessments.²⁵⁹ CAT LLC determined that the public relations costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. CAT LLC determined that the types of public relations services utilized were beneficial to the CAT and market participants more generally. Public relations services were important for various reasons, including monitoring comments made by market participants about CAT and understanding issues related to the CAT discussed on the public record.²⁶⁰ By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT issues to the benefit of all market participants.²⁶¹ Moreover, CAT LLC determined that the rates charged for such services were in line with market rates.²⁶² As noted above, the total public relations costs through FAM Period 3 represent a small percentage of Historical CAT Costs 1—that is, 0.1% of Historical CAT Costs 1.

(B) Total Executed Equivalent Share Volume for the Prior 12 Months

The total executed equivalent share volume of transactions in Eligible Securities for the 12-month period from June 2023 through May 2024 was 3,980,753,840,905.21 executed equivalent shares. CAT LLC determined the total executed equivalent share volume for the prior twelve months by counting executed equivalent shares in the same manner as it will count executed equivalent shares for CAT billing purposes.

(C) Historical Recovery Period 1

CAT LLC has determined to establish a Historical Recovery Period of 24 months for Historical CAT Assessment 1 and that such length is reasonable. CAT LLC determined that the length of Historical Recovery Period 1 appropriately weighs the need for a reasonable Historical Fee Rate 1 that spreads the Historical CAT Costs over an appropriate amount of time and the need to repay the loans notes to the Participants in a timely fashion. CAT LLC determined that 24 months for Historical Recovery Period 1 would establish a fee rate that is lower than other transaction-based fees, including fees assessed pursuant to Section 31.²⁶³ In addition, in establishing a Historical Recovery Period of 24 months, CAT LLC recognized that the total costs for Historical CAT Assessment 1 was less than the total costs for 2022 and 2023, and therefore it would be appropriate to recover those costs in two years.

(D) Projected Executed Equivalent Share Volume for Historical Recovery Period 1

CAT LLC has determined to calculate the projected total executed equivalent share volume for the 24 months of Historical Recovery Period 1 by doubling the executed equivalent share volume for the prior 12 months. CAT LLC determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has remained relatively constant in recent years. For example, the executed equivalent share volume for 2021 was 3,963,697,612,395, the executed equivalent share volume for 2022 was 4,039,821,841,560.31, and the executed equivalent share volume for 2023 was 3,868,940,345,680.6. Accordingly, the projected total executed equivalent share volume for Historical Recovery Period 1 is projected to be 7,961,507,681,810.42 executed equivalent shares.²⁶⁴

(E) Actual Fee Rate for Historical CAT Assessment 1

(i) Decimal Places

As noted in the Plan amendment for the CAT Funding Model, as a practical matter, the fee filing for a Historical CAT Assessment would provide the exact fee per executed equivalent share to be paid for each Historical CAT Assessment, by multiplying the

²⁵¹ See Section 3(a)(2)(B)(i)(i) above.

²⁵² See Sections 3(a)(2)(B)(i)(i), 3(a)(2)(B)(ii)(i), 3(a)(2)(B)(iii)(i) and 3(a)(2)(B)(iv)(i) above.

²⁵³ *Id.*

²⁵⁴ See Section 3(a)(2)(B)(i)(i) above.

²⁵⁹ Section 11.3(b)(iii)(B)(III)(B)(6) of the CAT NMS Plan.

²⁶⁰ See Section 3(a)(2)(B)(i)(j) above.

²⁶¹ See Sections 3(a)(2)(B)(i)(j), 3(a)(2)(B)(ii)(j), 3(a)(2)(B)(iii)(j) and 3(a)(2)(B)(iv)(j) above.

²⁶² *Id.*

²⁶³ As the SEC noted in the CAT Funding Model Approval Order, recent Section 31 fees ranged from \$0.00009 per share to \$0.0004 per share. CAT Funding Model Approval Order at 62682.

²⁶⁴ This projection was calculated by multiplying 3,980,753,840,905.21 executed equivalent shares by two.

Historical Fee Rate by one-third and describing the relevant number of decimal places for the fee rate.²⁶⁵ Accordingly, proposed paragraph (a)(1)(B) of the fee schedule would set forth a fee rate of \$0.000013 per executed equivalent share. This fee rate is calculated by multiplying Historical Fee Rate 1 by one-third, and rounding the result to 6 decimal places. CAT LLC determined that the use of six decimal places is reasonable as it balances the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.

(ii) Reasonable Fee Level

The Exchange believes that imposing Historical CAT Assessment 1 with a fee rate of \$0.000013 per executed equivalent share is reasonable because it provides for a revenue stream for the Company that is aligned with Historical CAT Costs 1 and such costs would be spread out over an appropriate recovery period, as discussed above. Moreover, the Exchange believes that the level of the fee rate is reasonable, as it is comparable to other transaction-based fees. Indeed, Historical CAT Assessment 1 is significantly lower than fees assessed pursuant to Section 31 (e.g., \$0.0009 per share to 0.0004 per share),²⁶⁶ and, as a result, the magnitude of Historical CAT Assessment 1 is small, and therefore will mitigate any potential adverse economic effects or inefficiencies.²⁶⁷ Furthermore, the reasonable fee rate for Historical CAT Assessment 1 further supports CAT LLC's decision to seek to recover all Historical CAT Costs prior to 2022, rather than establishing separate Historical CAT Assessments for pre-FAM, FAM 1, FAM 2 and FAM 3 costs.

(3) Historical CAT Assessment 1 Provides for an Equitable Allocation of Fees

Historical CAT Assessment 1 provides for an equitable allocation of fees, as it equitably allocates CAT costs between and among the Participants and Industry Members. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfied the requirements of the Exchange Act, including the formula for calculating Historical CAT Assessments as well as the Industry Members to be charged the Historical CAT Assessments.²⁶⁸ In approving the CAT

Funding Model, the SEC stated that “[t]he Participants have sufficiently demonstrated that the proposed allocation of fees is reasonable.”²⁶⁹ Accordingly, the CAT Funding Model sets forth the requirements for allocating fees related to Historical CAT Costs among Participants and Industry Members, and the fee filings for Historical CAT Assessments must comply with those requirements.

Historical CAT Assessment 1 provides for an equitable allocation of fees as it complies with the requirements regarding the calculation of Historical CAT Assessments as set forth in the CAT NMS Plan. For example, as described above, the calculation of Historical CAT Assessment 1 complies with the formula set forth in Section 11.3(b) of the CAT NMS Plan. In addition, Historical CAT Assessment 1 would be charged to CEBBs and CEBs in accordance with Section 11.3(b) of the CAT NMS Plan. Furthermore, the Participants would continue to remain responsible for their designated share of Past CAT Costs through the cancellation of loans made by the Participants to CAT LLC.

In addition, as discussed above, each of the inputs into the calculation of Historical CAT Assessment 1—Historical CAT Costs 1 (including Excluded Costs), the count for the executed equivalent share volume for the prior 12 months, the length of the Historical Recovery Period, and the projected executed equivalent share volume for the Historical Recovery Period—are reasonable. Moreover, these inputs lead to a reasonable fee rate for Historical CAT Assessment 1 that is lower than other fee rates for transaction-based fees. A reasonable fee rate allocated in accordance with the requirements of the CAT Funding Model provides for an equitable allocation of fees.

(4) Historical CAT Assessment 1 Is Not Unfairly Discriminatory

Historical CAT Assessment 1 is not an unfairly discriminatory fee. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfied the requirements of the Exchange Act. In reaching this conclusion, the SEC analyzed the potential effect of Historical CAT Assessments calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members,

such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. Historical CAT Assessment 1 complies with the requirements regarding the calculation of Historical CAT Assessments as set forth in the CAT NMS Plan. In addition, as discussed above, each of the inputs into the calculation of Historical CAT Assessment 1 and the resulting fee rate for Historical CAT Assessment 1 is reasonable. Therefore, Historical CAT Assessment 1 does not impose an unfairly discriminatory fee on Industry Members.

Finally, the Exchange believes the proposed fees established pursuant to the CAT Funding Model promote just and equitable principles of trade, and, in general, protect investors and the public interest, and are provided in a transparent manner and specificity in the fee schedule. The Exchange also believes that the proposed fees are reasonable because they would provide ease of calculation, ease of billing and other administrative functions, and predictability of a fee based on fixed rate per executed equivalent share. Such factors are crucial to estimating a reliable revenue stream for CAT LLC and for permitting Exchange members to reasonably predict their payment obligations for budgeting purposes.

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 6(b)(8) of the Act²⁷⁰ requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that Historical CAT Assessment 1 implements provisions of the CAT NMS Plan that were approved by the Commission and is designed to assist the Exchange in meeting its regulatory obligations pursuant to the Plan.

In addition, all Participants (including exchanges and FINRA) are proposing to introduce Historical CAT Assessment 1 on behalf of CAT LLC to implement the requirements of the CAT NMS Plan. Therefore, this is not a competitive fee filing, and, therefore, it does not raise competition issues between and among the Participants.

Furthermore, in approving the CAT Funding Model, the SEC analyzed the

²⁶⁵ CAT Funding Model Approval Order at 62658, n.658.

²⁶⁶ CAT Funding Model Approval Order at 62663, 62682.

²⁶⁷ *Id.*

²⁶⁸ See Section 11.3(b) of the CAT NMS Plan.

²⁶⁹ CAT Funding Model Approval Order at 62629.

²⁷⁰ 15 U.S.C. 78f(b)(8).

potential competitive impact of the CAT Funding Model, including competitive issues related to market services, trading services and regulatory services, efficiency concerns, and capital formation.²⁷¹ The SEC also analyzed the potential effect of CAT fees calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members, such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. Based on this analysis, the SEC approved the CAT Funding Model as compliant with the Exchange Act. Historical CAT Assessment 1 is calculated and implemented in accordance with the CAT Funding Model as approved by the SEC.

As discussed above, each of the inputs into the calculation of Historical CAT Assessment 1 is reasonable and the resulting fee rate for Historical CAT Assessment 1 calculated in accordance with the CAT Funding Model is reasonable. Therefore, Historical CAT Assessment 1 would not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Exchange Act²⁷² and Rule 19b-4(f)(2) thereunder,²⁷³ because it establishes or changes a due, or fee.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend the rule change if it appears to the Commission that the action is necessary or appropriate in the public interest, for the protection of investors, or would otherwise further the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-C2-2024-014 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-C2-2024-014. This file

number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-C2-2024-014 and should be submitted on or before October 4, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁷⁴

Sherry R. Haywood,

Assistant Secretary.

Securities and Exchange Commission

Self-Regulatory Organizations; Cboe EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Establish Fees for Industry Members Related to Certain Historical Costs of the National Market System Plan Governing the Consolidated Audit Trail; Notice

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100942; File No. SR–CboeEDGA–2024–035]

Self-Regulatory Organizations; Cboe EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Establish Fees for Industry Members Related to Certain Historical Costs of the National Market System Plan Governing the Consolidated Audit Trail

September 5, 2024.

Pursuant to Section 19(b)(1) under the Securities Exchange Act of 1934 (the “Act”)¹ and Rule 19b–4 thereunder,² notice is hereby given that on August 22, 2024, Cboe EDGA Exchange, Inc. (the “Exchange” or “Cboe EDGA”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGA Exchange, Inc. (the “Exchange” or “Cboe EDGA”) proposes to amend its fee schedule entitled “Consolidated Audit Trail Funding Fees”³ to establish fees for Industry Members⁴ related to certain historical costs of the National Market System Plan Governing the Consolidated Audit Trail (the “CAT NMS Plan” or “Plan”) incurred prior to January 1, 2022. These fees would be payable to Consolidated Audit Trail, LLC (“CAT LLC” or “the Company”)⁵ and referred to as Historical CAT Assessment 1. The fee rate for Historical CAT Assessment 1 will be \$0.000013 per executed equivalent share. CAT Executing Brokers will receive their first monthly

invoice for Historical CAT Assessment 1 in November 2024 calculated based on their transactions as CAT Executing Brokers for the Buyer (“CEBB”) and/or CAT Executing Brokers for the Seller (“CEBS”) in October 2024. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange’s website (http://markets.cboe.com/us/equities/regulation/rule_filings/edga/), at the Exchange’s Office of the Secretary, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On July 11, 2012, the Commission adopted Rule 613 of Regulation NMS, which required the self-regulatory organizations (“SROs”) to submit a national market system (“NMS”) plan to create, implement and maintain a consolidated audit trail that would capture customer and order event information for orders in NMS securities across all markets, from the time of order inception through routing, cancellation, modification or execution.⁶ On November 15, 2016, the Commission approved the CAT NMS Plan.⁷ Under the CAT NMS Plan, the Operating Committee has the discretion to establish funding for CAT LLC to operate the CAT, including establishing fees for Industry Members to be assessed by CAT LLC that would be implemented on behalf of CAT LLC by the Participants.⁸ The Operating Committee adopted a revised funding model to

fund the CAT (“CAT Funding Model”). On September 6, 2023, the Commission approved the CAT Funding Model, after concluding that the model was reasonable and that it satisfied the requirements of Section 11A of the Exchange Act and Rule 608 thereunder.⁹

The CAT Funding Model provides a framework for the recovery of the costs to create, develop and maintain the CAT, including providing a method for allocating costs to fund the CAT among Participants and Industry Members. The CAT Funding Model establishes two categories of fees: (1) CAT fees assessed by CAT LLC and payable by certain Industry Members to recover a portion of historical CAT costs previously paid by the Participants (“Historical CAT Assessment” fees); and (2) CAT fees assessed by CAT LLC and payable by Participants and Industry Members to fund prospective CAT costs (“Prospective CAT Costs” fees).¹⁰

Under the CAT Funding Model, “[t]he Operating Committee will establish one or more fees (each a ‘Historical CAT Assessment’) to be payable by Industry Members with regard to CAT costs previously paid by the Participants (‘Past CAT Costs’).”¹¹ In establishing a Historical CAT Assessment, the Operating Committee will determine a “Historical Recovery Period” and calculate a “Historical Fee Rate” for that Historical Recovery Period. Then, for each month in which a Historical CAT Assessment is in effect, each CEBB and CEBS would be required to pay the fee—the Historical CAT Assessment—for each transaction in Eligible Securities executed by the CEBB or CEBS from the prior month as set forth in CAT Data, where the Historical CAT Assessment for each transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Historical Fee Rate.¹²

⁹ Securities Exchange Act Rel. No. 98290 (Sept. 6, 2023), 88 FR 62628 (Sept. 12, 2023) (“CAT Funding Model Approval Order”).

¹⁰ Under the CAT Funding Model, the Operating Committee may establish one or more Historical CAT Assessments. Section 11.3(b) of the CAT NMS Plan. This filing only establishes Historical CAT Assessment 1 related to certain Historical CAT Costs as described herein; it does not address any other potential Historical CAT Assessment related to other Historical CAT Costs. In addition, under the CAT Funding Model, the Operating Committee also may establish CAT Fees related to CAT costs going forward. Section 11.3(a) of the CAT NMS Plan. This filing does not address any potential CAT Fees related to CAT costs going forward. Any such other fee for any other Historical CAT Assessment or CAT Fee for Prospective CAT Costs will be subject to a separate fee filing.

¹¹ Section 11.3(b) of the CAT NMS Plan.

¹² In approving the CAT Funding Model, the Commission stated that, “[i]n the Commission’s view, the proposed recovery of the Past CAT Costs

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

³ The Exchange and each of its affiliated exchanges (Cboe BYX Exchange, Inc., Cboe BZX Exchange, Inc., Cboe C2 Exchange, Inc., Cboe Exchange, Inc., and Cboe EDGX Exchange, Inc.) are filing to adopt the same amendment to this fee schedule.

⁴ An “Industry Member” is defined as “a member of a national securities exchange or a member of a national securities association.” See Exchange Rule 7.20(u); see also Section 1.1 of the CAT NMS Plan. Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in the CAT NMS Plan and/or the CAT Compliance Rule. See Chapter 7, Section B of the Exchange’s Rulebook.

⁵ The term “CAT LLC” may be used to refer to Consolidated Audit Trail, LLC or CAT NMS, LLC, depending on the context.

⁶ Securities Exchange Act Rel. No. 67457 (July 18, 2012), 77 FR 45721 (Aug. 1, 2012) (“Rule 613 Adopting Release”).

⁷ Securities Exchange Act Rel. No. 79318 (Nov. 15, 2016), 81 FR 84696 (Nov. 23, 2016) (“CAT NMS Plan Approval Order”).

⁸ Section 11.1(b) of the CAT NMS Plan.

Each Historical CAT Assessment to be paid by CEBBs and CEBs is designed to contribute toward the recovery of two-thirds of the Historical CAT Costs. Because the Participants previously have paid Past CAT Costs via loans to the Company, the Participants would not be required to pay any Historical CAT Assessment. In lieu of a Historical CAT Assessment, the Participants' one-third share of Historical CAT Costs will be paid by the cancellation of loans made by the Participants to the Company on a pro rata basis based on the outstanding loan amounts due under the loans, instead of through the payment of a CAT fee.¹³ In addition, the Participants also will be 100% responsible for certain Excluded Costs (as discussed below).

CAT LLC proposes to charge CEBBs and CEBs (as described in more detail below) Historical CAT Assessment 1 to recover certain historical CAT costs incurred prior to January 1, 2022, in accordance with the CAT Funding Model. To implement this fee on behalf of CAT LLC, the CAT NMS Plan requires the Participants to "file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves, and such fees shall be labeled as 'Consolidated Audit Trail Funding

Fees.'" ¹⁴ The Plan further states that "Participants will be required to file with the SEC pursuant to Section 19(b) of the Exchange Act a filing for each Historical CAT Assessment."¹⁵ Accordingly, the purpose of this filing is to implement a Historical CAT Assessment on behalf of CAT LLC for Industry Members, referred to as Historical CAT Assessment 1, in accordance with the CAT NMS Plan.¹⁶

The Exchange previously filed a fee filing to implement Historical CAT Assessment 1. On January 17, 2024, the SEC published this prior filing for Historical CAT Assessment 1, temporarily suspended the fee filing, and instituted proceedings to determine whether to approve or disapprove the fee filing.¹⁷ The Exchange is withdrawing its original fee filing for Historical CAT Assessment 1. This Historical CAT Assessment 1 replaces the prior Historical CAT Assessment 1 that was previously filed with the Commission.

(1) CAT Executing Brokers

Historical CAT Assessment 1 will be charged to each CEBB and CEBs for each applicable transaction in Eligible Securities.¹⁸ The CAT NMS Plan defines a "CAT Executing Broker" to mean:

(a) with respect to a transaction in an Eligible Security that is executed on an exchange, the Industry Member identified as the Industry Member responsible for the order on the buy-side of the transaction and the Industry Member responsible for the sell-side of the transaction in the equity order trade event and option trade event in the CAT Data submitted to the CAT by the relevant exchange pursuant to the Participant Technical Specifications; and (b) with respect to a transaction in an Eligible Security that is executed otherwise than on an exchange and required to be reported to an equity trade reporting facility of a registered national securities association, the Industry Member identified as the executing broker and the Industry Member identified as the contra-side executing broker in the TRF/ORF/ADF transaction data event in the CAT Data submitted to the CAT by FINRA pursuant to the Participant Technical Specifications; provided, however, in those circumstances where there is a non-Industry Member identified as the contra-side executing broker in the TRF/ORF/ADF transaction data event or no contra-side executing broker is identified in the TRF/ORF/ADF transaction data event, then the Industry Member identified as the executing broker in the TRF/ORF/ADF transaction data event would be treated as CAT Executing Broker for the Buyer and for the Seller.¹⁹

The following fields of the Participant Technical Specifications indicate the CAT Executing Brokers for the transactions executed on an exchange.

EQUITY ORDER TRADE (EOT)²⁰

No.	Field name	Data type	Description	Include key
12.n.8/13.n.8	member	Member Alias	The identifier for the member firm that is responsible for the order on this side of the trade. Not required if there is no order for the side as indicated by the NOBUYID/NOSELLID instruction. This must be provided if orderID is provided.	C

via the Historical CAT Assessment is reasonable." CAT Funding Model Approval Order at 62662.

¹³ Section 11.3(b)(ii) of the CAT NMS Plan.

¹⁴ Section 11.1(b) of the CAT NMS Plan.

¹⁵ Section 11.3(b)(iii)(B)(I) of the CAT NMS Plan.

¹⁶ Note that there may be one or more Historical CAT Assessments depending on the timing of the completion of the Financial Accountability Milestones, among other things. Section 11.3(b) of the CAT NMS Plan.

¹⁷ Securities Exchange Act Release No. 99374 (January 17, 2024), 89 FR 10468 (February 13, 2024) (SR-CboeEDGA-2024-002).

¹⁸ In its approval of the CAT Funding Model, the Commission determined that charging CAT fees to

CAT Executing Brokers was reasonable. In reaching this conclusion the Commission noted that the use of CAT Executing Brokers is appropriate because the CAT Funding Model is based upon the calculation of *executed* equivalent shares, and, therefore, charging CAT Executing Brokers would reflect their executing role in each transaction. Furthermore, the Commission noted that, because CAT Executing Brokers are already identified in transaction reports from the exchanges and FINRA's equity trade reporting facilities recorded in CAT Data, charging CAT Executing Brokers could streamline the billing process. CAT Funding Model Approval Order at 62629.

¹⁹ Section 1.1 of the CAT NMS Plan. Note that CEBBs and CEBs may, but are not required to,

pass-through their CAT fees to their clients, who may, in turn, pass their fees to their clients until they are imposed ultimately on the account that executed the transaction. See CAT Funding Model Approval Order at 62649.

²⁰ See Table 23, Section 4.7 (Order Trade Event) of the CAT Reporting Technical Specifications for Plan Participants, Version 4.1.0-r21 (Apr. 15, 2024), https://www.catnmsplan.com/sites/default/files/2024-04/04.15.2024-CAT_Reporting_Technical_Specifications_for_Participants_4.1.0-r21.pdf ("CAT Reporting Technical Specifications for Plan Participants").

26	reportingExecutingMpid	Member Alias	MPID of the executing party	R
28	contraExecutingMpid	Member Alias	MPID of the contra-side executing party	C

(2) Calculation of Historical Fee Rate 1

The Operating Committee determined the Historical Fee Rate to be used in calculating Historical CAT Assessment 1 (“Historical Fee Rate 1”) by dividing the Historical CAT Costs for Historical CAT Assessment 1 (“Historical CAT Costs 1”) by the projected total executed share volume of all transactions in Eligible Securities for the Historical Recovery Period for Historical CAT Assessment 1 (“Historical Recovery Period 1”), as discussed in detail below. Based on this calculation, the Operating Committee has determined that Historical Fee Rate 1 would be \$0.00003994969693072937 per executed equivalent share. This rate is then divided by three and rounded to determine the fee rate of \$0.000013 per executed equivalent share that will be assessed to CEBBs and CEBBs, as also discussed in detail below.

(A) Executed Equivalent Shares for Transactions in Eligible Securities

Under the CAT NMS Plan, for purposes of calculating each Historical CAT Assessment, executed equivalent shares in a transaction in Eligible Securities will be reasonably counted as follows: (1) each executed share for a transaction in NMS Stocks will be counted as one executed equivalent share; (2) each executed contract for a transaction in Listed Options will be counted based on the multiplier applicable to the specific Listed Options (i.e., 100 executed equivalent shares or such other applicable multiplier); and

(3) each executed share for a transaction in OTC Equity Securities shall be counted as 0.01 executed equivalent share.²³

(B) Historical CAT Costs 1

The CAT NMS Plan states that “[t]he Operating Committee will reasonably determine the Historical CAT Costs sought to be recovered by each Historical CAT Assessment, where the Historical CAT Costs will be Past CAT Costs minus Past CAT Costs reasonably excluded from Historical CAT Costs by the Operating Committee. Each Historical CAT Assessment will seek to recover from CAT Executing Brokers two-thirds of Historical CAT Costs incurred during the period covered by the Historical CAT Assessment.”²⁴ As described in detail below, Historical CAT Costs 1 would be \$318,059,819. This figure includes Past CAT Costs of \$401,312,909 minus certain Excluded Costs of \$83,253,090. Participants collectively will remain responsible for one-third of Historical CAT Costs 1 (which is \$106,019,939.67), plus the Excluded Costs of \$83,253,090. CEBBs collectively will be responsible for one-third of Historical CAT Costs 1 (which is \$106,019,939.67), and CEBBs collectively will be responsible for one-third of Historical CAT Costs 1 (which is \$106,019,939.67).

The following describes in detail Historical CAT Costs 1 with regard to four separate historical time periods as well as Past CAT Costs excluded from Historical CAT Costs 1 (“Excluded Costs”). The following cost details are

provided in accordance with the requirement in the CAT NMS Plan to provide in the fee filing “a brief description of the amount and type of Historical CAT Costs, including (1) the technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees, and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration and (6) public relations costs.”²⁵ Each of the costs described below are reasonable, appropriate and necessary for the creation, implementation and maintenance of CAT.

(i) Historical CAT Costs Incurred Prior to June 22, 2020 (Pre-FAM Costs)

Historical CAT Costs 1 would include costs incurred by CAT prior to June 22, 2020 (“Pre-FAM Period”) and already funded by the Participants, excluding Excluded Costs (described further below). Historical CAT Costs 1 would include costs for the Pre-FAM Period of \$124,290,730. The Participants would remain responsible for one-third of this cost (which they have previously paid) (\$41,430,243.33), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$41,430,243.33) and CEBBs paying one-third (\$41,430,243.33). These costs do not include Excluded Costs, as discussed further below. The following table breaks down Historical CAT Costs 1 for the Pre-FAM Period into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

²¹ See Table 51, Section 5.2.5.1 (Simple Option Trade Event) of the CAT Reporting Technical Specifications for Plan Participants.

²² See Table 61, Section 6.1 (TRF/ORF/ADF Transaction Data Event) of the CAT Reporting Technical Specifications for Plan Participants.

²³ Section 11.3(a)(i)(B) and 11.3(b)(i)(B) of the CAT NMS Plan. In approving the CAT Funding Model, the Commission concluded that “the use of executed equivalent share volume as the basis of the proposed cost allocation methodology is reasonable and consistent with the approach taken

by the funding principles of the CAT NMS Plan.” CAT Funding Model Approval Order at 62640.

²⁴ Section 11.3(b)(i)(C) of the CAT NMS Plan.

²⁵ Section 11.3(b)(iii)(B)(II)(B) of the CAT NMS Plan.

Operating expense	Historical CAT costs 1 for Pre-FAM Period (prior to June 22, 2020) *
Capitalized Developed Technology Costs **	\$51,847,150
Technology Costs	33,568,579
Cloud Hosting Services	10,268,840
Operating Fees	21,085,485
CAIS Operating Fees	2,072,908
Change Request Fees	141,346
Legal	19,674,463
Consulting	17,013,414
Insurance	880,419
Professional and administration	1,082,036
Public relations	224,669
Total Operating Expenses	124,290,730

* The costs described in this table of costs for the Pre-FAM Period were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website. In addition, in accordance with Section 6.6(a)(i) of the CAT NMS Plan, in 2018 CAT LLC provided the SEC with "an independent audit of fees, costs, and expenses incurred by the Participants on behalf of the Company prior to the Effective Date of the Plan that will be publicly available." The audit is available on the CAT website.

** The non-cash amortization of these capitalized developed technology costs of \$2,115,545 incurred during the period prior to June 22, 2020 have been appropriately excluded from the above table.²⁶

The Pre-FAM Period includes a broad range of CAT-related activity from 2012 through June 22, 2020, including the evaluation of the requirements of SEC Rule 613, the development of the CAT NMS Plan, the evaluation and selection of the initial and successor Plan Processors, the commencement of the creation and implementation of the CAT to comply with Rule 613 and the CAT NMS Plan, including technical specifications for transaction reporting and regulatory access, and related technology and the commencement of reporting to the CAT. The following describes the costs for each of the categories for the Pre-FAM Period.

(a) Technology Costs—Cloud Hosting Services

The \$10,268,840 in technology costs for cloud hosting services represent costs incurred for services provided by the cloud services provider for the CAT, Amazon Web Services, Inc. ("AWS"), during the Pre-FAM Period.

As part of its proposal for acting as the successor Plan Processor for the CAT, FCAT selected AWS as a subcontractor to provide cloud hosting services. In 2019, after reviewing the capabilities of other cloud services providers, FCAT determined that AWS was the only cloud services provider at that time sufficiently mature and capable of providing the full suite of necessary cloud services for the CAT,

including, for example, the security, resiliency and complexity necessary for the CAT computing requirements. The use of cloud hosting services is standard for this type of high-volume data activity and reasonable and necessary for implementation of the CAT, particularly given the substantial data volumes associated with the CAT.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT the fees incurred by the Plan Processor for cloud hosting services provided by AWS as FCAT's subcontractor [sic] on a monthly basis for the cloud hosting services, and FCAT, in turn, pays such fees to AWS. The fees for cloud hosting services were negotiated by FCAT on an arm's length basis with the goals of managing cost and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the expected volume of data, the breadth of services provided and market rates for similar services. The fees for cloud hosting services during the Pre-FAM Period were paid to FCAT by CAT NMS, LLC²⁷ and subsequently Consolidated Audit Trail, LLC (as previously noted, both entities are referred to generally as "CAT LLC"),²⁸ and FCAT, in turn, paid

²⁷ CAT NMS, LLC was formed by FINRA and the U.S. national securities exchanges to implement the requirements of SEC Rule 613 under the Exchange Act. SEC Rule 613 required the SROs to jointly submit to the SEC the CAT NMS Plan to create, implement and maintain the CAT. The SEC approved the CAT NMS Plan on November 15, 2016. CAT NMS Plan Approval Order.

²⁸ On August 29, 2019, the Participants formed a new Delaware limited liability company named Consolidated Audit Trail, LLC for the purpose of conducting activities related to the CAT from and after the effectiveness of the proposed amendment of the CAT NMS Plan to replace CAT NMS, LLC.

AWS. CAT LLC was funded via loan contributions by the Participants.²⁹

AWS was engaged by FCAT to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. Services provided by AWS include storage services, databases, compute services and other services (such as networking, management tools and DevOps tools). AWS also was engaged to provide various environments for CAT, such as development, performance testing, test and production environments.

The cost for AWS services for the CAT is a function of the volume of CAT Data. The greater the amount of CAT Data, the greater the cost of AWS services to the CAT. During the Pre-FAM Period from the engagement of AWS in February 2019 through June 2020, AWS provided cloud hosting services for volumes of CAT Data far in excess of the volume predictions set forth in the CAT NMS Plan. The CAT NMS Plan states, when all CAT Reporters are submitting their data to the CAT, it "must be sized to receive[,] process and load more than 58 billion records per day,"³⁰ and that "[i]t is expected that the Central Repository will grow to more than 29 petabytes of raw, uncompressed data."³¹ However,

See Securities Exchange Act Rel. No. 87149 (Sept. 27, 2019), 84 FR 52905 (Oct. 3, 2019).

²⁹ For each of the costs paid by CAT NMS, LLC and Consolidated Audit Trail, LLC as discussed throughout this filing, CAT NMS, LLC and Consolidated Audit Trail, LLC paid these costs via loan contributions by the Participants to CAT NMS, LLC and Consolidated Audit Trail, LLC, respectively.

³⁰ Appendix D-4 of the CAT NMS Plan at n.262.

³¹ Appendix D-5 of the CAT NMS Plan.

²⁶ With respect to certain costs that were "appropriately excluded," such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

the volume of CAT Data for the Pre-FAM Period was far in excess of these predicted levels. By the end of this period, data submitted to the CAT included options and equities

Participant Data,³² Phase 2a and Phase 2b Industry Member Data³³ (including certain linkages), as well as SIP Data,³⁴ reference data and other types of Other Data.³⁵ The following chart provides

data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during the Pre-FAM Period.³⁶

	Date range: 3/29/19 to 4/12/20 *	Date range: 4/13/20 to 6/21/20 **
Average Daily Volume in Billions:		
Participant—Equities	5	5
Participant—Options	80	981
Industry Member—Equities		3
Industry Member—Options		0.04
SIP—Options & Equities	64	70
Average Total Daily Volume	149	166
Cumulative Total Events for the Period	3,890	4,990
Total Compute Hours for the Period	*** N/A	5,663,247
Storage Footprint at End of Period (Petabytes)	30.57	47.96

* The Participant Equities in RSA format.

** Start of Industry Member reporting on 4/13/2020

*** Note that, although there were compute hours during this period, data related to such compute hours are no longer available in current data.

(b) Technology Costs—Operating Fees

The \$21,085,485 in technology costs related to operating fees represent costs incurred with regard to activities of FCAT as the Plan Processor. Operating fees are those fees paid by CAT LLC to FCAT as the Plan Processor to operate and maintain the CAT and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (e.g., management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management as required by the CAT NMS Plan.

FCAT was selected to assume the role of the successor Plan Processor. Prior to this selection, the Participants engaged in discussions with two prior Bidders³⁷ for the successor Plan Processor role. The Operating Committee formed a Selection Subcommittee in accordance with Section 4.12 of the CAT NMS Plan to evaluate and review Bids and to make a recommendation to the Operating Committee with respect to the selection of the successor Plan Processor. In an April 9, 2019 letter to the Commission, the Participants described the reasons for its selection of the successor Plan Processor:

The Selection Subcommittee considered factors including, but not limited to, the following, in recommending FINRA to the Operating Committee as the successor Plan Processor:

a. FINRA's specialized technical expertise and capabilities in the area of broker-dealer technology;

b. The need to appoint a successor Plan Processor with specialized expertise to develop, implement, and maintain the CAT System in accordance with the CAT NMS Plan and SEC Rule 613;

c. FINRA's detailed proposal in response to CATLLC's recent inquiries; and

d. FINRA's data query and analytics systems demonstration to the Participants.

Based on these and other factors, the Selection Subcommittee determined that FINRA was the most appropriate Bidder to become the successor Plan Processor.³⁸

On February 26, 2019, the Operating Committee (with FINRA recusing itself) voted to select FINRA as the successor Plan Processor pursuant to Section 6.1(t) of the CAT NMS Plan.³⁹ On March 29, 2019, CAT LLC and FCAT (a wholly owned subsidiary of FINRA) entered into a Plan Processor Agreement pursuant to which FCAT would perform the functions and duties of the Plan Processor contemplated by the CAT NMS Plan, including the management and operation of the CAT.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT a negotiated monthly fixed price for the operation of the CAT. This fixed price contract was negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into

consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity. The operating fees during the Pre-FAM Period were paid to FCAT by CAT LLC.

From March 29, 2019 (the commencement of the Plan Processor Agreement with FCAT) through June 22, 2020 (the end of the Pre-FAM Period), the Plan Processor's activities with respect to the CAT included the following:

- Commenced user acceptance testing with market data provided by Exegy Incorporated ("Exegy"), a market data provider;⁴⁰

- Published Technical Specifications and related reporting scenarios documents for Phase 2a, 2b and 2c reporting for Industry Members, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;

- Facilitated testing for Phase 2a and 2b reporting for Industry Members;

- Began developing Technical Specifications and related reporting scenarios documents for Phase 2d reporting for Industry Members, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;

- Published Central Repository Access Technical Specifications, and provided regulator access to test data from Industry Members;

³² See Section 6.3(d) of the CAT NMS Plan.

³³ See Securities Exchange Rel. No. 88702 (Apr. 20, 2020), 85 FR 23075 (Apr. 24, 2020) ("Phased Reporting Exemptive Relief Order") for a description of Phase 2a and Phase 2b Industry Member Data.

³⁴ See Section 6.5(a)(ii) of the CAT NMS Plan.

³⁵ See Appendix C–108 of the CAT NMS Plan.

³⁶ Note that the volume data described in this table does not include CAIS data.

³⁷ The term "Bidder" is defined in Section 1.1 of the CAT NMS Plan.

³⁸ Letter from Michael J. Simon, Chair, CAT NMS, LLC Operating Committee, to Brent J. Fields,

Secretary, SEC (Apr. 9, 2019), <https://www.sec.gov/divisions/marketreg/rule613-info-notice-of-plan-processor-selection-040919.pdf>.

³⁹ *Id.*

⁴⁰ The use of Exegy to provide market data, including the costs and market data provided, is discussed below in Section 3(a)(2)(B)(i)(i).

- Facilitated Participant exchanges that support options market makers sending Quote Sent Time to the CAT;
- Facilitated the introduction of OPRA and Options NBBO Other Data to CAT;

- Addressed compliance items, including drafting CAT policies and procedures, and addressing requirements under Regulation SCI;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;

- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;

- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;

- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with Participants, the SEC and its staff;
- Operated the FINRA CAT Helpdesk, which is the primary source for answers to questions about CAT, including questions regarding: clock synchronization, firm reporting responsibilities, interpretive questions, technical specifications for reporting to CAT and more;

- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content;⁴¹ and

- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(c) Technology Costs—CAIS Operating Fees

The \$2,072,908 in technology costs related to CAIS operating fees represent the fees paid for FCAT's subcontractor charged with the development and operation of CAT's Customer and Account Information System ("CAIS"). The CAT is required under the CAT NMS Plan to capture and store Customer Identifying Information and Customer Account Information in a database separate from the transactional database and to create a CAT-Customer-ID for each Customer.

During the Pre-FAM Period, the CAIS-related services were provided by the Plan Processor through the Plan Processor's subcontractor, Kingland Systems Incorporation ("Kingland").

Kingland had experience operating in the securities regulatory technology space, and as a part of its proposal for acting as the Plan Processor for the CAT, FCAT selected Kingland as a subcontractor to provide certain CAIS-related services.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay to the Plan Processor the fees incurred by FCAT for CAIS-related services provided by FCAT through Kingland on a monthly basis. FCAT negotiated the fees for Kingland's CAIS-related services on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity. The fees for CAIS-related services during the Pre-FAM Period were paid by CAT LLC to FCAT. FCAT, in turn, paid Kingland.

During the Pre-FAM Period, Kingland began development of the CAIS Technical Specifications and the building of CAIS. In addition, Kingland also worked on the build related to the CCID Alternative, an alternative approach to customer information that was not included in the CAT NMS Plan as originally adopted.⁴² Furthermore, Kingland also worked on the acceleration of the reporting of large trader identifiers ("LTID") earlier than originally contemplated during this period, in accordance with exemptive relief granted by the SEC.⁴³

(d) Technology Costs—Change Request Fees

The technology costs related to change request fees include costs related to certain modifications, upgrades or other changes to the CAT. Change requests are standard practice and necessary to reflect operational changes, including changes related to new market developments, such as new market participants. In general, if CAT LLC determines that a modification, upgrade or other change to the functionality or service is necessary and appropriate, CAT LLC will submit a request for such a change to the Plan Processor. The Plan Processor will then respond to the request with a proposal for implementing the change, including the cost (if any) of such a change. CAT LLC then determines whether to approve the proposed change. The change request costs were paid by CAT LLC to FCAT. During the Pre-FAM Period, CAT LLC

incurred costs of \$141,346 related to change requests implemented by FCAT. Such change requests related to a development fee regarding the OPRA and SIP data feeds, and the reprocessing of certain exchange data.⁴⁴

(e) Technology Costs—Capitalized Developed Technology Costs

This category of costs includes capitalizable application development costs incurred in the development of the CAT. The capitalized developed technology costs for the Pre-FAM Period of \$51,847,150 relate to technology provided by the Initial Plan Processor and the successor Plan Processor.

Initial Plan Processor: Thesys CAT, LLC. The capitalized developed technology costs related to the Initial Plan Processor include costs incurred with regard to testing for Participant reporting, Participant reporting to the CAT, a security assessment of the CAT, and the development of the billing function for the CAT.

On January 17, 2017, the Selection Committee of the CAT NMS Plan selected the Initial Plan Processor, Thesys Technologies, LLC, for the CAT NMS Plan pursuant to Article V of the CAT NMS Plan.⁴⁵ The Participants utilized a request for proposal ("RFP") to seek proposals to build and operate the CAT, receiving a number of proposals in response to the RFP. The Participants carefully reviewed and considered each of the proposals, including holding in-person meetings with each of the Bidders. After several rounds of review, the Participants selected the Initial Plan Processor in accordance with the CAT NMS Plan, taking into consideration that the Initial Plan Processor had experience operating in the securities regulatory technology space, among other considerations. On April 6, 2017, CAT LLC entered into an agreement with Thesys CAT LLC ("Thesys CAT"), a Thesys affiliate, to perform the functions and duties of the Plan Processor contemplated by the CAT NMS Plan, including the management and operation of the CAT. Under the agreement, CAT LLC would pay Thesys CAT a negotiated, fixed price fee for its role as the Initial Plan Processor. Effective January 30, 2019, the Plan Processor Agreement with Thesys CAT was terminated, and FCAT

⁴⁴ Note that CAT LLC also has incurred costs related to specific Industry Members (e.g., reprocessing costs related to Industry Member reporting errors).

⁴⁵ Letter from the Participants to Brent J. Fields, Secretary, SEC (Jan. 18, 2017), <https://www.sec.gov/divisions/marketreg/rule613-info-notice-of-plan-processor-selection.pdf>.

⁴¹ The CAT website is <https://www.catnmsplan.com>.

⁴² For a discussion of the CCID Alternative, see Securities Exchange Act Rel. No. 88393 (Mar. 17, 2020), 85 FR 16152 (Mar. 20, 2020).

⁴³ Phased Reporting Exemptive Relief Order at 23079–80.

was subsequently selected as the successor Plan Processor.

From January 17, 2017 through January 30, 2019, the time in which the Thesys CAT was engaged for the CAT, but excluding the period from November 15, 2017 through January 30, 2019, the Initial Plan Processor engaged in various activities with respect to the CAT, including preparing iterative drafts of Participant Technical Specifications, Industry Member Technical Specifications and the Central Repository Access Technical Specifications. In addition, Thesys CAT also developed CAT technology, addressed compliance items, including drafting CAT policies and procedures, addressing Regulation SCI requirements, establishing a CAT Compliance Officer and a Chief Information Security Officer, addressed security-related matters for the CAT, and worked towards the initiation of Participant reporting per the Participant Technical Specifications.

Successor Plan Processor: FCAT. The capitalized developed technology costs related to FCAT include: (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, including the completion of go-live functionality related to options ingestion and validation, equities regulatory services agreement query tool updates and unlinked options data query, options linkages release, Industry Member Phase 2a file submission and data integrity (including error corrections), and Industry Member testing, including reporting relationships, ATS order type management, basic reporting statistics, SFTP data integrity feedback and error correction; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including a one-time development fee for a secure analytics workspace, a one-time development fee of an Industry Member connectivity solution, and a one-time development fee for the acceleration of multi-factor authentication; (3) CAIS implementation fees; and (4) license fees.

(f) Legal Costs

The legal costs of \$19,674,463 represent the fees paid for legal services provided by two law firms, Wilmer Cutler Pickering Hale and Dorr LLP ("WilmerHale") and Pillsbury Winthrop Shaw Pittman LLP ("Pillsbury"), during the Pre-FAM Period. The legal costs exclude those costs incurred from

November 15, 2017 through November 15, 2018.

Law Firm: WilmerHale. Following the adoption of Rule 613, the Participants determined it was necessary to engage external legal counsel to advise the Participants with respect to corporate and regulatory legal matters related to the CAT, including drafting and developing the CAT NMS Plan. The Participants considered a variety of factors in their analysis of prospective law firms, including (1) the firm's qualifications, resources and expertise; (2) the firm's relevant experience and understanding of the regulatory matters raised by the CAT and in advising on matters of similar scope; (3) the composition of the legal team; and (4) professional fees. Following a series of interviews, the Participants acting as a consortium determined that WilmerHale was well qualified given the balance of these considerations and engaged WilmerHale in February 2013.

WilmerHale's billing rates are negotiated on an annual basis and are determined with reference to the rates charged by other leading law firms for similar work. The Participants assess WilmerHale's performance and review prospective budgets and staffing plans submitted by WilmerHale on an annual basis. WilmerHale's compensation arrangements are reasonable and appropriate, and in line with the rates charged by other leading law firms for similar work.

The legal costs for WilmerHale during the Pre-FAM Period included costs incurred from 2013 until June 22, 2020 to address corporate and regulatory legal matters related to the CAT. The legal fees for this law firm during the period from February 2013 until the formation of the CAT NMS, LLC on November 15, 2016 were paid directly by the exchanges and FINRA to WilmerHale. After the formation of CAT NMS LLC, the legal fees were paid by CAT LLC to WilmerHale.

After WilmerHale was engaged in 2013 through the end of the Pre-FAM Period on June 22, 2020 (excluding the legal costs from November 15, 2017 through November 15, 2018), WilmerHale provided legal assistance to the CAT on a variety of matters, including with regard to the following:

- Analyzed various legal matters associated with the Selection Plan, and drafted an amendment to the Selection Plan;
- Assisted with the RFP and bidding process for the CAT Plan Processor;
- Analyzed legal matters related to the Development Advisory Group ("DAG");

- Drafted the CAT NMS Plan, analyzed various items related to the CAT NMS Plan, and responded to comment letters on CAT NMS Plan;

- Provided legal support for the formation of the legal entity, the governance of the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (e.g., Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding and Other Products) and the DAG, governance support during the transition to the new governance structure under the CAT NMS Plan, and governance support after the adoption of the CAT NMS Plan, which involved support for the Operating Committee, Advisory Committee, Compliance Subcommittee and CAT working groups;

- Assisted with the development of the CAT funding model and drafted related amendments of the CAT NMS Plan and related filings;

- Negotiated and drafted the plan processor agreements with the Initial Plan Processor and the successor Plan Processor;

- Provided assistance with compliance with Regulation SCI;

- Assisted with clock synchronization study;

- Provided assistance with respect to the establishment of CAT security;

- Drafted exemptive requests from CAT NMS Plan requirements, including with regard to options market maker quotes, Customer IDs, CAT Reporter IDs, linking allocations to executions, CAT reporting timeline, FIDs, customer and account information, timestamp granularity, small industry members, data facility reporting and linkage, allocation reports, SRO-assigned market participant identifiers and cancelled trade indicators, thereby seeking to implement changes that would be cost effective and benefit Industry Members and Participants;

- Assisted with the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;

- Provided advice regarding CAT policies and procedures;

- Analyzed the SEC's amendment of the CAT NMS Plan regarding financial accountability;

- Provided interpretations of and related to the CAT NMS Plan;

- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues; and

- Assisted with third-party vendor agreements.

Law Firm: Pillsbury. The legal costs for CAT during the Pre-FAM Period include costs related to the legal services performed by Pillsbury. The Participants interviewed this law firm as well as other potential law firms to provide legal assistance regarding certain liability matters. After considering a variety of factors in its analysis, including the relevant expertise and fees of the firm, CAT LLC determined to hire Pillsbury in April 2019. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees were paid by CAT LLC to Pillsbury. The legal costs for Pillsbury during the Pre-FAM Period included costs incurred from April 2019 until June 22, 2020 to address legal matters regarding the agreements between CAT Reporters and CAT LLC concerning certain terms associated with CAT Reporting (the "Reporter Agreement"). During that period, Pillsbury advised CAT LLC regarding applicable legal matters, participated in negotiations between the Participants and Industry Members, participated in meetings with senior SEC staff, the Chairman, and Commissioners, represented CAT LLC and the Participants in an SEC administrative proceeding, and drafted a proposed amendment to the CAT NMS Plan regarding liability matters. Liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants. Moreover, litigation involving CAT LLC is an expense of operating the CAT, and, therefore, is appropriately an obligation of both Participants and Industry Members under the CAT Funding Model.

(g) Consulting Costs

The consulting costs of \$17,013,414 represent the fees paid to the consulting firm Deloitte & Touche LLP ("Deloitte") as project manager during the Pre-FAM Period, from October 2012 until June 22, 2020. These consulting costs include costs for advisory services related to the operation of the CAT, and meeting facilitation and communications coordination, vendor support and financial analyses.

To help facilitate project management given the unprecedented complexity and scope of the CAT project, the Participants determined it was necessary to engage a consulting firm to assist with the CAT project in 2012, following the adoption of Rule 613. A

variety of factors were considered in the analysis of prospective consulting firms, including (1) the firm's qualifications, resources, and expertise; (2) the firm's relevant experience and understanding of the regulatory issues raised by the CAT and in coordinating matters of similar scope; (3) the composition of the consulting team; and (4) professional fees. Following a series of interviews, the exchanges and FINRA as a consortium determined that Deloitte was well qualified given the balance of these considerations and engaged Deloitte on October 1, 2012.

Deloitte's fee rates are negotiated on an annual basis and are in line with market rates for this type of specialized consulting work. CAT LLC assesses Deloitte's performance and reviews prospective budgets and staffing plans submitted by Deloitte on an annual basis. Deloitte's compensation arrangements are reasonable and appropriate, and in line with the rates charged by other leading consulting firms for similar work.

The consulting costs for CAT during the period from 2012 until the formation of the CAT NMS, LLC were paid directly by the Participants to Deloitte. After the formation of CAT NMS, LLC, the consulting fees were paid by CAT LLC to Deloitte. CAT LLC reviewed the consulting fees each month and approved the invoices.

After Deloitte was hired in 2012 through the end of the Pre-FAM Period on June 22, 2020 (excluding the consulting costs from November 15, 2017 through November 15, 2018), Deloitte provided a variety of consulting services, including the following:

- Established and implemented program operations for the CAT project, including the program management [sic] office and workstream design;
- Assisted with the Plan Processor selection process, including but not limited to, the development of the RFP and the bidder evaluation process, and facilitation and consolidation of the Participant's independent reviews;
- Assisted with the development and drafting of the CAT NMS Plan, including conducting cost-benefit studies, analyzing OATS and CAT requirements, and drafting appendices to the Plan;
- Assisted with cost and funding-related activities for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided governance support to the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA

as well as subcommittees of this group (e.g., Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding and Other Products) and the DAG, governance support during the transition to the new governance structure under the CAT NMS Plan and governance support after the adoption of the CAT NMS Plan, which involved support for the Operating Committee, Advisory Committee, Compliance Subcommittee and CAT working groups;

- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with industry outreach and communications regarding the CAT, including assistance with industry outreach events, the development of the CAT website, frequently asked questions, and coordinating with the CAT LLC's public relations firm;
- Provided support for updating the SEC on the progress of the development of the CAT;
- Provided active planning and coordination with and support for the Initial Plan Processor with regard to the development of the CAT, and reported to the Participants on the progress;
- Coordinated efforts regarding the selection of the successor Plan Processor;
- Assisted with the transition from the Initial Plan Processor to the successor Plan Processor, including support for the Operating Committee and successor Plan Processor for the new role; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(h) Insurance

The insurance costs of \$880,419 represent the cost incurred for insurance for CAT during the Pre-FAM Period. Commencing in 2020, CAT LLC performed an evaluation of various potential alternatives for CAT insurance policies, which included engaging in discussions with different insurance companies and conducting cost comparisons of various alternative approaches to insurance. Based on an analysis of a variety of factors, including coverage and premiums, CAT LLC determined to purchase cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance from USI Insurance Services LLC ("USI"). Such policies are standard for corporate

entities, and cyber security liability insurance is important for the CAT System. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(i) Professional and Administration Costs

In adopting the CAT NMS Plan, the Commission amended the Plan to add a requirement that CAT LLC's financial statements be prepared in compliance with GAAP, audited by an independent public accounting firm, and made publicly available.⁴⁶ The professional and administration costs include costs related to accounting and accounting advisory services to support the operating and financial functions of CAT, financial statement audit services by an independent accounting firm, preparation of tax returns, and various cash management and treasury functions. In addition, professional and administration costs for the Pre-FAM Period include costs related to the receipt of market data and a security assessment. The costs for these professional and administration services were \$1,082,036 for the Pre-FAM Period.

Financial Advisory Firm: Anchin Accountants & Advisors ("Anchin"). CAT LLC determined to hire a financial advisory firm, Anchin, to assist with financial matters for the CAT in April 2018. CAT LLC interviewed Anchin as well as other potential financial advisory firms to assist with the CAT project, considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The hourly fee rates for this firm were in line with market rates for these financial advisory services. The fees for these services were paid by CAT LLC to Anchin.

After Anchin was hired in April 2018 through the end of the Pre-FAM Period on June 22, 2020 (excluding the period from April 2018 through November 15, 2018), Anchin provided a variety of services, including the following:

- Developed, updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;

- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Addressed accounting and financial reporting matters relating to the transition from CAT NMS, LLC to Consolidated Audit Trail, LLC, including supporting the dissolution of CAT NMS, LLC;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

Accounting Firm: Grant Thornton LLP ("Grant Thornton"). In February 2020, CAT LLC determined to engage an independent accounting firm, Grant Thornton, to complete the audit of CAT LLC's financial statements, in accordance with the requirements of the CAT NMS Plan. CAT LLC interviewed this firm as well as another potential accounting firm to audit CAT LLC's financial statements, considering a variety of factors in its analysis, including the relevant expertise and fees of each of the firms. CAT LLC determined that Grant Thornton was well-qualified for the proposed role given the balance of these considerations. Grant Thornton's fixed fee rate compensation arrangement was reasonable and appropriate, and in line with the market rates charged for these types of accounting services. The fees for these services were paid by CAT LLC to Grant Thornton.

Market Data Provider: Exegy. The professional and administrative costs for the Pre-FAM Period included costs related to the receipt of certain market data for the CAT pursuant to an agreement with the CAT LLC, and then with FCAT. Exegy provided SIP Data required by the CAT NMS Plan.

After performing an analysis of the available market data vendors to confirm that the data provided met the SIP Data requirements of the CAT NMS Plan and comparing the costs of the vendors providing the required SIP Data, CAT LLC determined to purchase

market data from Exegy from July 2018 through March 2019. CAT LLC determined that, unlike certain other vendors, Exegy provided market data that included all data elements required by the CAT NMS Plan.⁴⁷ In addition, the fees were reasonable and in line with market rates for the market data received. Accordingly, the professional and administrative costs for the Pre-FAM Period include the Exegy costs from November 2018 through March 2019. The cost of the market data was reasonable for the market data received. The fees for the market data were paid directly by CAT LLC to Exegy.

Upon the termination of the contract between CAT LLC and Exegy, FCAT entered into a contract with Exegy to purchase the required market data from Exegy in July 2019. All costs under the contract were treated as a direct pass through cost to CAT LLC. Therefore, the fees for the market data were paid by CAT LLC to FCAT, who, in turn, paid Exegy for the market data.

Security Assessment: RSM US LLP ("RSM"). The operating costs for the Pre-FAM Period include costs related to a third party security assessment of the CAT performed by RSM. The assessment was designed to verify and validate the effective design, implementation, and operation of the controls specified by NIST Special Publication 800-53, Revision 4 and related standards and guidelines. Such a security assessment is in line with industry practice and important given the data included in the CAT. CAT LLC determined to engage RSM to perform the security assessment, after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fees were reasonable and in line with market rates for such an assessment. RSM performed the assessment from October 2018 through December 2018. Accordingly, the costs for the Pre-FAM Period include the costs incurred in November and December 2018. The cost for the security assessment were paid directly to RSM by CAT LLC.

(j) Public Relations Costs

The public relations costs of \$224,669 represent the fees paid to public relations firms during the Pre-FAM Period for professional communications services to CAT, including media relations consulting, strategy and execution. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants. Specifically, the public

⁴⁶ Section 9.2 of the CAT NMS Plan.

⁴⁷ See Section 6.5(a)(ii) of the CAT NMS Plan.

relations firms provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (e.g., amendments to the CAT NMS Plan). Public relations services were important for various reasons, including monitoring comments made by market participants about CAT and understanding issues related to the CAT discussed on the public record.

The services performed by each of the public relations firms were comparable. The fees for such services were reasonable and in line with market rates. Only one public relations firm was engaged at a time; the three firms were engaged sequentially as the primary public relations contact moved among the three firms during this time period.

Public Relations Firm: Peppercomm, Inc. ("Peppercomm"). The national securities exchanges and FINRA, acting as a consortium, determined to hire the

public relations firm Peppercomm in October 2014 and continued to engage this firm through September 2017. The exchanges and FINRA made this engagement decision after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fee rates for this public relations firm were negotiated on an arm's length basis and were in line with market rates for these types of services. The public relations costs during the period from October 2014 until the formation of the CAT NMS, LLC were paid directly by the exchanges and FINRA to the public relations firm. After the formation of CAT NMS, LLC, the consulting fees were paid by CAT LLC.

Public Relations Firm: Sloane & Company ("Sloane"). CAT LLC determined to hire a new public relations firm, Sloane, in March 2018, based on, among other things, their expertise and the primary contact's history with the project. The fee rates for this public relations firm were in line with market rates for these types of services. The fees during the Pre-FAM Period were paid by CAT LLC to Sloane. CAT LLC continued the engagement with Sloane until February 2020.

Public Relations Firm: Peak Strategies. CAT LLC determined to hire

a new public relations firm, Peak Strategies, in March 2020, based on, among other things, their expertise and the primary contact's history with the project. The fee rates for this public relations firm were in line with market rates for these types of services. The fees during the Pre-FAM Period were paid by CAT LLC to Peak Strategies.

(ii) Historical CAT Costs Incurred in Financial Accountability Milestone Period 1

Historical CAT Costs 1 would include costs incurred by CAT and already funded by the Participants during Period 1 of the Financial Accountability Milestones ("FAM Period 1"),⁴⁸ which covers the period from June 22, 2020–July 31, 2020. Historical CAT Costs 1 would include costs for FAM Period 1 of \$6,377,343. The Participants would remain responsible for one-third of this cost (which they have previously paid) (\$2,125,781), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$2,125,781) and CEBs paying one-third (\$2,125,781). The following table breaks down Historical CAT Costs 1 for FAM Period 1 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Historical CAT costs for FAM Period 1 *
Capitalized Developed Technology Costs **	\$1,684,870
Technology Costs	3,996,800
Cloud Hosting Services	2,642,122
Operating Fees	1,099,680
CAIS Operating Fees	254,998
Change Request Fees	
Legal	481,687
Consulting	137,209
Insurance	
Professional and administration	69,077
Public relations	7,700
Total Operating Expenses	6,377,343

* The costs described in this table of costs for FAM Period 1 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

** The non-cash amortization of these capitalized developed technology costs of \$362,121 incurred during FAM Period 1 have been appropriately excluded from the above table.⁴⁹

By the completion of FAM Period 1, CAT LLC was required to implement the reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of equities transaction data and options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information.⁵⁰ CAT LLC

completed the requirements of FAM Period 1 by July 31, 2020. The following describes the costs for each of the categories for FAM Period 1.

(a) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 1 to provide a broad array

of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance

⁴⁸ Section 11.6(a)(i)(A) of the CAT NMS Plan.

⁴⁹ As discussed above, with respect to certain costs that were "appropriately excluded," such excluded costs relate to the amortization of capitalized technology costs, which are amortized

over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

⁵⁰ See definition of "Initial Industry Member Core Equity and Options Reporting" in Section 1.1 of the CAT NMS Plan.

testing, test, and production environments, during the FAM 1 Period. Accordingly, the \$2,642,122 in technology costs for cloud hosting services represent costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 1. The fee arrangement for AWS described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. Moreover, CAT LLC

continued to believe that AWS's maturity in the cloud services space as well as the significant cost and time necessary to move the CAT to a different cloud services provider supported the continued engagement of AWS.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During the FAM 1 Period, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in

the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a and Phase 2b Industry Member Data (including certain linkages) as well as SIP Data, reference data and other types of Other Data. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 1.⁵¹

	Date range: 6/22/20–7/31/20
Average Daily Volume in Billions:	
Participant—Equities	6
Participant—Options	103
Industry Member—Equities	7
Industry Member—Options	0.31
SIP—Options & Equities	74
Average Total Daily Volume	185
Cumulative Total Events for the Period	5,190
Total Compute Hours for the Period	2,612,082
Storage Footprint at End of Period (Petabytes)	57.47

(b) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 1. Accordingly, the \$1,099,680 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 1. The fee arrangement for FCAT described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. During FAM Period 1, FCAT's activities with respect to the CAT included the following:

- Published iterative drafts of draft Technical Specifications for Phase 2d, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Published iterative drafts of CAIS Technical Specifications, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Facilitated Industry Member reporting of Quote Sent Time on Options Market Maker quotes;
- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;

- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(c) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 1. Accordingly, the \$254,998 in technology costs for CAIS operating fees represent costs incurred for services provided by Kingland during FAM Period 1. The fee arrangement for Kingland described above with regard to

the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. During FAM Period 1, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to CCID Alternative, as well as the acceleration of the reporting of LTIDs.

(d) Technology Costs—Change Request Fees

CAT LLC did not incur costs related to change requests during FAM Period 1.

(e) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 1 of \$1,684,870 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include: (1) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including separate production and industry test entitlements, and reprocessing of exchange event timestamps; (2) implementation fees; and (3) license fees.

(f) Legal Costs

The legal costs of \$481,687 represent the fees paid for legal services provided

⁵¹ Note that the volume data described in this table does not include CAIS data.

by two law firms, WilmerHale and Pillsbury during FAM Period 1.

Law Firm: WilmerHale. CAT LLC continued to employ WilmerHale during FAM Period 1 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 1 were paid by CAT LLC to WilmerHale. During FAM Period 1, WilmerHale provided legal assistance to the CAT including with regard to the following:

- Assisted with the development of the CAT funding model and drafted related amendments and fee filings;
- Drafted exemptive requests from CAT NMS Plan requirements regarding, for example, verbal activity, options market maker quote sent time, TRF linkages, and allocations;
- Provided interpretations related to CAT NMS Plan requirements, including the Financial Accountability Milestone amendment;
- Assisted with compliance with Regulation SCI;
- Provided support for the Operating Committee, Compliance Subcommittee, working groups and Leadership Team, including with regard to meetings with the SEC staff;
- Assisted with the drafting of the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Assisted with communications and presentations for the industry regarding CAIS;
- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for Compliance Subcommittee, including with regard to response to OCIE examinations and the annual assessment;
- Provided guidance regarding CAT technical specifications;
- Assisted with third-party vendor agreements; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

Law Firm: Pillsbury. CAT LLC continued to employ Pillsbury during FAM Period 1 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 1 were paid by CAT LLC to Pillsbury. During FAM Period 1, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During that period, Pillsbury advised CAT LLC regarding applicable legal matters and drafted a

proposed amendment to the CAT NMS Plan regarding liability matters. Liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants.

(g) Consulting Costs

The consulting costs of \$137,209 represent the fees paid to Deloitte as project manager during FAM Period 1. CAT LLC continued to employ Deloitte during FAM Period 1 based on, among other things, their expertise and cumulative experience with the CAT. The fee rates for Deloitte during FAM Period 1 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 1 were paid by CAT LLC to the consulting firm. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 1, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT;
- Assisted with the transition from the Initial Plan Processor to the successor Plan Processor; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(h) Insurance

Although insurance was in effect during FAM Period 1, CAT LLC did not incur costs related to insurance during FAM Period 1.

(i) Professional and Administration Costs

Financial Advisory Firm: Anchin. The professional and administration costs of \$69,077 represent the fees paid to Anchin during FAM Period 1. CAT LLC continued to employ Anchin during FAM Period 1 based on, among other things, their expertise and history with the project. The hourly fee rates for this

firm were in line with market rates for these type of financial advisory services. The fees for these services during FAM Period 1 were paid by CAT LLC to Anchin. During FAM Period 1, Anchin provided a variety of services, including the following:

- Maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups; and
- Prepared monthly and quarterly financial statements.

(j) Public Relations Costs

The public relations costs of \$7,700 represent the fees paid to Peak Strategies during FAM Period 1. CAT LLC continued to employ Peak Strategies during FAM Period 1 based on, among other things, their expertise and history with the project. The fee rates for this firm were reasonable and in line with market rates for these types of services. The fees for these services during FAM Period 1 were paid by CAT LLC to Peak Strategies. During FAM Period 1, Peak Strategies continued to provide professional communications services to CAT LLC, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (e.g., amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues

related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(iii) Historical CAT Costs Incurred in Financial Accountability Milestone Period 2

Historical CAT Costs 1 would include costs incurred by CAT LLC and already

funded by Participants during Period 2 of the Financial Accountability Milestones ("FAM Period 2"),⁵² which covers the period from August 1, 2020–December 31, 2020. Historical CAT Costs 1 would include costs for FAM Period 2 of \$42,976,478. The Participants would remain responsible for one-third of this cost (which they have previously paid) (\$14,325,493), and Industry Members would be

responsible for the remaining two-thirds, with CEBBs paying one-third (\$14,325,493) and CEBBs paying one-third (\$14,325,493). The following table breaks down Historical CAT Costs 1 for FAM Period 2 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Historical CAT costs for FAM period 2 *
Capitalized Developed Technology Costs **	\$6,761,094
Technology Costs	31,460,033
Cloud Hosting Services	20,709,212
Operating Fees	9,108,700
CAIS Operating Fees	1,590,298
Change Request Fees	51,823
Legal	2,766,644
Consulting	532,146
Insurance	976,098
Professional and administration	438,523
Public relations	41,940
Total Operating Expenses	42,976,478

* The costs described in this table of costs for FAM Period 2 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

** The non-cash amortization of these capitalized developed technology costs of \$1,892,505 incurred during FAM Period 2 have been appropriately excluded from the above table.⁵³

By the completion of FAM Period 2, CAT LLC was required to implement the following with regard to the CAT:

(a) Industry Member reporting (excluding reporting by Small Industry Members that are not OATS reporters) for equities transactions, excluding Customer Account Information, CustomerID, and Customer Identifying Information, is developed, tested, and implemented at a 5% Error Rate or less and with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, and trade reporting facilities linkage to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, excluding linkage of representative orders, from order origination through order execution or order cancellation; and (b) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3 and Section 8.2.1 incorporates the Industry Member equities transaction data described in condition (a) and is available to the Participants and to the Commission.⁵⁴

CAT LLC completed the requirements of FAM Period 2 by December 31, 2020.

The following describes the costs for each of the categories for FAM Period 2.

(a) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 2 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production environments, during the FAM 2 Period. Accordingly, the \$20,709,212 in technology costs for cloud hosting services represent costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 2. The fee arrangement for AWS described above with regard to the Pre-FAM

Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During the FAM 2 Period, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a and Phase 2b Industry Member Data (including certain linkages) as well as SIP Data, and Other Data, including reference data. In addition, Industry Members began reporting LTID account information. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 2.⁵⁵

⁵² Section 11.6(a)(i)(B) of the CAT NMS Plan.

⁵³ As discussed above, with respect to certain costs that were "appropriately excluded," such excluded costs relate to the amortization of capitalized technology costs, which are amortized

over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

⁵⁴ See definition of "Full Implementation of Core Equity Reporting Requirements" in Section 1.1 of the CAT NMS Plan.

⁵⁵ Note that the volume data described in this table does not include CAIS data.

	Date range: 8/1/20–12/31/20
Average Daily Volume in Billions:	
Participant—Equities	6
Participant—Options	116
Industry Member—Equities	11
Industry Member—Options	0.98
SIP—Options & Equities	80
Average Total Daily Volume	282
Cumulative Total Events for the Period	2,170
Total Compute Hours for the Period	15,660,392
Storage Footprint at End of Period (Petabytes)	114.59

(b) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 2. Accordingly, the \$9,108,700 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 2. The fee arrangement for FCAT described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement. During FAM Period 2, FCAT's activities with respect to the CAT included publishing the Technical Specifications for Phase 2d and overseeing the reporting of firm to firm and intrafirm linkages by Industry Members. In addition, FCAT also continued to engage in the following activities during FAM Period 2:

- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the development and implementation of the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with the Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data

access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(c) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 2. Accordingly, the \$1,590,298 in technology costs for CAIS operating fees represent costs incurred for services provided by Kingland during FAM Period 2. The fee arrangement for Kingland described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement. During FAM Period 2, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to the CCID Alternative, as well as the acceleration of the reporting of LTIDs.

(d) Technology Costs—Change Request Fees

During FAM Period 2, CAT LLC engaged FCAT to pursue certain change requests in accordance with the Plan Processor Agreement. The change request costs were paid by CAT LLC to FCAT. Specifically, during FAM Period 2, CAT incurred costs of \$51,823 related to a change request regarding the addition of functionality for exchange Participants to report rejected messages to the CAT.

(e) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 2 of \$6,761,094 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the

CAT, as defined in the agreement between CAT LLC and the Plan Processor; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including costs related to separate production and industry test entitlements, market maker reference data, and back-processing of exchange exception logic; (3) implementation fees; and (4) license fees.

(f) Legal Costs

The legal costs of \$2,766,644 represent the fees paid for legal services provided by two law firms, WilmerHale and Pillsbury during FAM Period 2.

Law Firm: WilmerHale. CAT LLC continued to employ WilmerHale during FAM Period 2 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 2 were paid by CAT LLC to WilmerHale. During FAM Period 2, the legal assistance provided by WilmerHale included providing legal advice regarding the following:

- Assisted with the development of the CAT funding model and drafting related amendments and rule filings;
- Drafted exemptive requests from CAT NMS Plan requirements regarding, for example, allocations, exchange activity, OTQT, initial data validation, error corrections and recordkeeping;
- Provided interpretations related to CAT NMS Plan requirements, including with regard to the Financial Accountability Milestone amendment, FAQs and technical specifications;
- Provided support for the Operating Committee, Compliance Subcommittees, working groups and Leadership Team, including with regard to meetings with the SEC staff;
- Assisted with the Implementation Plan and Quarterly Progress Reports required pursuant to Section 6.6 of the CAT NMS Plan;

- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for the Compliance Subcommittee, including with regard to responses to OCIE examinations and the annual assessment;
- Provided guidance regarding the SEC's proposed security amendments to the CAT NMS Plan;
- Provided guidance regarding SRO rule filings for the retirement of systems;
- Provided legal support for Operating Committee meetings, including drafting resolutions and other materials and voting advice;
- Assisted with third-party vendor agreements (e.g., with regard to Anchin, Grant Thornton and insurance policies);
- Assisted with change requests; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

Law Firm: Pillsbury. CAT LLC continued to employ Pillsbury during FAM Period 2 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 2 were paid by CAT LLC to Pillsbury. During FAM Period 2, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During that period, Pillsbury advised CAT LLC regarding applicable legal matters and drafted and filed a proposed amendment to the CAT NMS Plan regarding liability matters. As discussed above, liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants.

(g) Consulting Costs

The consulting costs of \$532,146 represent the fees paid to Deloitte as project manager during FAM Period 2. CAT LLC continued to employ Deloitte during FAM Period 2 based on, among other things, their expertise and long history with the project. The fee rates for Deloitte during FAM Period 2 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 2 were paid to Deloitte by CAT LLC. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 2, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;

- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(h) Insurance

The insurance costs of \$976,098 represent the fees paid for insurance during FAM Period 2. CAT LLC continued to maintain cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance offered by USI. After engaging in a process for renewing the coverage, CAT LLC determined to purchase these insurance policies from USI. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(i) Professional and Administration Costs

The professional and administration costs of \$438,523 represent the fees paid to Anchin and Grant Thornton for financial services provided during FAM Period 2.

Financial Advisory Firm: Anchin. CAT LLC continued to engage Anchin during FAM Period 2 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these types of financial advisory services. The fees for these services during FAM Period 2 were paid by CAT LLC to Anchin. During FAM Period 2, Anchin provided a variety of services, including the following:

- Updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated [sic] bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;

- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from the Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audit by an independent auditor; and
- Reviewed historical costs from inception.

Accounting Firm: Grant Thornton. CAT LLC continued to employ the accounting firm Grant Thornton during FAM Period 2 based on, among other things, its expertise and cumulative knowledge of CAT LLC. CAT LLC continued to believe that Grant Thornton was well qualified for its role and its fee rates were in line with market rates for these accounting services. The fees for these services during FAM Period 2 were paid by CAT LLC to Grant Thornton. During FAM Period 2, Grant Thornton performed a financial statement audit for CAT LLC as an independent accounting firm.

(j) Public Relations Costs

The public relations costs of \$41,940 represent the fees paid to Peak Strategies during FAM Period 2. CAT LLC continued to employ Peak Strategies during FAM Period 2 based on, among other things, their expertise and history with the project. The fee rates for this firm were in line with market rates for these types of services. The fees for these services during FAM Period 2 were paid by CAT LLC to Peak Strategies. During FAM Period 2, Peak Strategies continued to provide professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (e.g., amendments to the CAT NMS Plan). As discussed above, such public

relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(iv) Historical CAT Costs Incurred in Financial Accountability Milestone Period 3

Historical CAT Costs 1 would include costs incurred by CAT and already funded by the Participants during Period 3 of the Financial Accountability Milestones ("FAM Period 3"),⁵⁶ which covers the period from January 1, 2021–December 31, 2021. Historical CAT Costs 1 would include costs for FAM Period 3 of \$144,415,268. The

Participants would remain responsible for one-third of this cost (which they have previously paid) (\$48,138,423), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$48,138,423) and CEBBs paying one-third (\$48,138,423). The following table breaks down Historical CAT Costs 1 for FAM Period 3 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Historical CAT costs for FAM Period 3*
Capitalized Developed Technology Costs**	\$10,763,372
Technology Costs	123,639,402
Cloud Hosting Services	94,574,759
Operating Fees	23,106,091
CAIS Operating Fees	5,562,383
Change Request Fees	396,169
Legal	6,333,248
Consulting	1,408,209
Insurance	1,582,714
Professional and administration	595,923
Public relations	92,400
Total Operating Expenses	144,415,268

* The costs described in this table of costs for FAM Period 3 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

** The non-cash amortization of these capitalized developed technology costs of \$5,108,044 incurred during FAM Period 3 have been appropriately excluded from the above table.⁵⁷

By the completion of FAM Period 3, CAT LLC was required to implement the following requirements with regard the CAT:

(a) reporting to the Order Audit Trail System ("OATS") is no longer required for new orders; (b) Industry Member reporting for equities transactions and simple electronic options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, trade reporting facilities linkage, and representative order linkages (including any equities allocation information provided in an Allocation Report) to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, is developed, tested, and implemented at a 5% Error Rate or less; (c) Industry Member reporting for manual options transactions and complex options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with all required linkages to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or

order cancellation, including any options allocation information provided in an Allocation Report, is developed, tested, and fully implemented; (d) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3, Section 8.2.1, and Section 8.5 incorporates the data described in conditions (b)–(c) and is available to the Participants and to the Commission; and (e) the requirements of Section 6.10(a) are met.⁵⁸

CAT LLC completed the requirements of FAM Period 3 by December 31, 2021. The following describes the costs for each of the categories for FAM Period 3.

(a) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 3 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production

environments, during the FAM 3 Period. Accordingly, the \$94,574,759 in technology costs for cloud hosting services represents costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 3. The fee arrangement for AWS described above for the earlier periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During FAM Period 3, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a, Phase 2b, Phase 2c and Phase 2d Industry Member Data (including certain linkages), SIP Data, Other Data, including reference data, and LTID account information. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 3.⁵⁹

⁵⁶ Section 11.6(a)(i)(C) of the CAT NMS Plan.

⁵⁷ As discussed above, with respect to certain costs that were "appropriately excluded," such excluded costs relate to the amortization of capitalized technology costs, which are amortized

over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

⁵⁸ See definition of "Full Availability and Regulatory Utilization of Transactional Database Functionality" in Section 1.1 of the CAT NMS Plan.

⁵⁹ Note that the volume data described in this table does not include CAIS data.

	Date range: 1/1/21 to 4/25/21	Date range: 4/26/21 to 12/31/21 *
Average Daily Volume in Billions:		
Participant—Equities	9	9
Participant—Options	135	136
Industry Member—Equities	20	19
Industry Member—Options	2	2
SIP—Options & Equities	129	137
Average Total Daily Volume	297	304
Cumulative Total Events for the Period	7,480	5,310
Total Compute Hours for the Period	15,860,304	33,487,318
Storage Footprint at End of Period (Petabytes)	180.22	284.62

* Start of Participant Equities in CAT format and SIP Equities on 4/26/21.

(b) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 3. Accordingly, the \$23,106,091 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 3. The fee arrangement for FCAT described above with regard to the prior Periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement. During FAM Period 3, FCAT's activities with respect to the CAT included the following:

- Facilitated Phase 2c and Phase 2d testing for Industry Members;
- Oversaw creation of linkages of the lifecycle of order events based on the received data through Phase 2d;
- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with the Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the

use of CAT Data and query tools, for Participants and the SEC staff.

(c) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement with FCAT discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 3. Accordingly, the \$5,562,383 in technology costs for CAIS operating fees represents costs incurred for services provided by Kingland during FAM Period 3. The fee arrangement for Kingland described above with regard to the prior Periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement. During FAM Period 3, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to the CCID Alternative, as well as the acceleration of the reporting of LTIDs. The full CAIS Technical Specifications were published during FAM Period 3.

(d) Technology Costs—Change Request Fees

During FAM Period 3, CAT LLC engaged FCAT to pursue certain change requests in accordance with the Plan Processor Agreement. The change request costs were paid by CAT LLC to FCAT. Specifically, during FAM Period 3, CAT incurred costs of \$396,169 related to change requests, including the following: (1) the addition of functionality for exchange Participants to report rejected messages to the CAT; (2) the migration of MIRS query engine to AWS to reduce operational costs and increase resiliency; and (3) updating the Participant Technical Specifications to allow for two-sided Participant option quote reporting.

(e) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 3 of \$10,763,372

include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Plan Processor, including the transition from equity data received by FINRA pursuant to various regulatory services agreements between FINRA and Participant exchanges to the equity CAT Data, and the completion of the Industry Member Phase 2d options manual and complex orders go-live requirements; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including costs related to off-exchange volume concentration, Participant 24-hour trading and an external metastore; (3) implementation fees; and (4) license fees.

(f) Legal Costs

The legal costs of \$6,333,248 represent the fees paid for legal services provided by three law firms, WilmerHale, Pillsbury & Covington & Burling LLP ("Covington") during FAM Period 3.

Law Firm: WilmerHale. CAT LLC continued to employ WilmerHale during FAM Period 3 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 3 were paid by CAT LLC to WilmerHale. During FAM Period 3, the legal assistance provided by WilmerHale included providing legal advice regarding the following:

- Assisted with the development of the CAT funding model and drafting related amendments and rule filings;
- Drafted exemptive requests from CAT NMS Plan requirements, including, for example, verbal activity regarding Phase 2c cutover, error reports, error

corrections, Phase 2d Reporting, unique Order-ID on internal route events, reporting addresses, recordkeeping, and unique CCID for foreign customers;

- Provided interpretations related to CAT NMS Plan requirements, including with regard to the Financial Accountability Milestone amendment, FAQs, CAIS requirements, ADF, and technical specifications;
 - Provided support for the Operating Committee, Compliance Subcommittee, working groups and Leadership Team, including with regard to meetings with the SEC staff;
 - Assisted with the Implementation Plan and Quarterly Progress Reports required pursuant to Section 6.6(c) of the CAT NMS Plan;
 - Drafted SRO rule filings related to the CAT Compliance Rule;
 - Provided support for Compliance Subcommittee, including with regard to responses to OCIE examinations and the annual assessment;
 - Provided guidance regarding the SEC's proposed security amendments to the CAT NMS Plan;
 - Provided guidance regarding SRO rule filings for the retirement of systems;
 - Provided legal support for Operating Committee meetings, including drafting resolutions and other materials and voting advice;
 - Provided assistance with change requests;
 - Provided guidance and regulatory support for litigation regarding the response to the SEC's exemptive orders;
 - Assisted with communications with the industry, including CAT Alerts and presentations;
 - Provided guidance regarding the confidentiality of CAT Data, including third-party information requests;
 - Assisted with cost management analysis and proposals; and
 - Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.
- Law Firm: Pillsbury.* CAT LLC continued to employ Pillsbury during FAM Period 3 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 3 were paid by CAT LLC to Pillsbury. During FAM Period 3, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During this period, Pillsbury advised CAT LLC regarding applicable legal matters, reviewed and responded to comment letters regarding the proposed Plan amendment, participated in meetings with senior SEC staff, responded to comments

submitted following the SEC's April 6, 2021 order instituting proceedings,⁶⁰ and assessed legal matters regarding the SEC's October 29, 2021 order denying the proposed Plan amendment.⁶¹

Law Firm: Covington. CAT LLC hired Covington for litigation with the SEC regarding certain exemptive orders related to the CAT, including orders issued in December 2020.⁶² CAT LLC interviewed this law firm as well as other potential law firms, considering a variety of factors in its analysis for choosing legal assistance, including the relevant expertise and fees of the potential lawyers. CAT LLC approved the engagement of Covington in January 2021. The fee rates for this law firm, which were calculated based on hourly rates, were in line with market rates for specialized services. The legal fees for FAM Period 3 for this firm were paid by CAT LLC to Covington.

After Covington was hired in 2021 through the end of 2021, the firm provided legal assistance regarding the litigation with the SEC regarding the 2020 Orders. These services included researching, drafting, and filing motions to stay the 2020 orders and related materials in proceedings before the SEC, as well as researching, drafting, and filing petitions for judicial review of the 2020 Orders in proceedings before the U.S. Court of Appeals for the D.C. Circuit. Covington oversaw ongoing litigation proceedings on these matters, and also supported WilmerHale with respect to settlement negotiations with the SEC staff regarding the 2020 Orders.

In addition to these services, CAT LLC engaged Covington in November 2021 to provide assistance with respect to the SEC's disapproval of CAT NMS Plan amendments concerning a proposed limitation on liability in the event of a data breach or similar event. Covington provided advice concerning CAT's response to the SEC's disapproval order. This work accounted for a minority of Covington's fees in 2021.⁶³

⁶⁰ Securities Exchange Act Rel. No. 91487 (Apr. 6, 2021), 86 FR 19054 (Apr. 12, 2021).

⁶¹ Securities Exchange Act Rel. No. 93484 (Oct. 29, 2021), 86 FR 60933 (Nov. 4, 2021).

⁶² See Securities Exchange Act Rel. No. 90688 (Dec. 16, 2020), 85 FR 83634 (Dec. 22, 2020); and Securities Exchange Act Rel. No. 90689 (Dec. 16, 2020), 85 FR 83667 (Dec. 22, 2020) (collectively, the "2020 Orders").

⁶³ As discussed above with regard to Pillsbury's work on liability matters, liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants. Moreover, such activity is a necessary part of the operation of the CAT.

(g) Consulting Costs

The consulting costs of \$1,408,209 represent the fees paid to Deloitte as project manager during FAM Period 3. CAT LLC continued to employ Deloitte during FAM Period 3 based on, among other things, their expertise and long history with the project. The fee rates for Deloitte during FAM Period 3 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 3 were paid to Deloitte by CAT LLC. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 3, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(h) Insurance

The insurance costs of \$1,582,714 represent the fees paid for insurance during FAM Period 3. CAT LLC continued to maintain cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance offered by USI. After engaging in a process for renewing the coverage, CAT LLC determined to purchase these insurance policies from USI. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(i) Professional and Administration Costs

The professional and administration costs of \$595,923 represent the fees paid to Anchin and Grant Thornton for financial services during FAM Period 3.

Financial Advisory Firm: Anchin. CAT LLC continued to employ Anchin during FAM Period 3 based on, among other things, their expertise and history with the project. The hourly fee rates for

this firm were in line with market rates for these financial advisory services. The fees for these services during FAM Period 3 were paid by CAT LLC to Anchin. During FAM Period 3, Anchin provided a variety of services, including the following:

- Updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated *[sic]* bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

Accounting Firm: Grant Thornton. CAT LLC continued to employ the accounting firm Grant Thornton during FAM Period 3 based on, among other things, their expertise and cumulative knowledge of CAT LLC. CAT LLC determined that Grant Thornton was well qualified for its role and that its fixed fee rates were in line with market rates for these accountant services. The

fees for these services during FAM Period 3 were paid by CAT LLC to Grant Thornton. During FAM Period 3, Grant Thornton provided audited financial statements for CAT LLC.

(j) Public Relations Costs

The public relations costs of \$92,400 represent the fees paid to Peak Strategies during FAM Period 3. CAT LLC continued to employ Peak Strategies during FAM Period 3 based on, among other things, their expertise and history with the project. The fee rates for this firm were in line with market rates for these types of services. The fees for these services during FAM Period 3 were paid by CAT LLC to Peak Strategies. During FAM Period 3, Peak Strategies continued to provide professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.*, congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.*, amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(v) Excluded Costs

Historical CAT Costs 1 would not include three categories of CAT costs (“Excluded Costs”): (1) \$14,749,362 of

costs related to the termination of the relationship with the Initial Plan Processor; (2) \$48,874,937, which are all CAT costs incurred from November 15, 2017 through November 15, 2018; and (3) \$19,628,791, which are costs paid to the the Initial Plan Processor from November 16, 2018 through February 2019 when the relationship with the Initial Plan Processor was concluded. The Participants would remain responsible for 100% of these costs, which total \$83,253,090. CAT LLC determined to exclude these Excluded Costs from Historical CAT Costs 1 because these costs relate to the delay in the start of reporting to the CAT and the conclusion of the relationship with the Initial Plan Processor.⁶⁴

(a) Costs Related to Conclusion of Relationship With Initial Plan Processor

First, Historical CAT Costs 1 would not include \$14,749,362 of costs related to the conclusion of the relationship with the Initial Plan Processor. Such costs include costs related to the American Arbitration Association, the legal assistance of Pillsbury with regard to the arbitration with the Initial Plan Processor, and the settlement costs related to the arbitration with the Initial Plan Processor. The Participants would remain responsible for 100% of these \$14,749,362 in costs.

(b) Costs Incurred From November 15, 2017 Through November 15, 2018

Second, Historical CAT Costs 1 would not include all CAT costs incurred from November 15, 2017 through November 15, 2018. CAT LLC determined to exclude all costs during this one-year period of \$48,874,937 from fees charged to Industry Members due to the delay in the start of reporting to the CAT. The Participants would remain responsible for 100% of these \$48,874,937 in costs. The following table breaks down these costs into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Excluded costs for November 15, 2017–November 15, 2018*
Capitalized Developed Technology Costs	\$37,852,083
Technology Costs	
Cloud Hosting Services	
Operating Fees	
CAIS Operating Fees	
Change Request Fees	

⁶⁴ In approving the CAT Funding Model, the Commission states that the proposed exclusion of the first two categories of Excluded Costs “is reasonable in the Commission’s view because it would not require all costs incurred by the Participants to be recovered from Industry Members

through the Historical CAT Assessment, specifically excluding those costs related to the delay in the start of reporting to the CAT and costs related to the conclusion of the relationship with the Initial Plan Processor.” CAT Funding Model Approval Order at 62663. In addition to the first two

categories of Excluded Costs, CAT LLC is now proposing a third category of Excluded Costs that would exclude all costs paid to the Initial Plan Processor after November 15, 2018.

Operating expense	Excluded costs for November 15, 2017– November 15, 2018 *
Legal	\$6,143,278
Consulting	\$4,452,106
Insurance	
Professional and administration	\$340,145
Public relations	\$87,325
Total Operating Expenses	\$48,874,937

* The costs described in this table of Excluded Costs were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

The following provides additional detail regarding the Excluded Costs.

(I) Technology Costs—Cloud Hosting Services, Operating Fees, CAIS Operating Fees and Change Request Fees

CAT LLC did not incur technology costs related to the categories of cloud hosting services, operating fees, CAIS operating fees or change requests during the period from November 15, 2017 through November 15, 2018.

(II) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for the period from November 15, 2017 through November 15, 2018 include capitalizable application development costs of \$37,852,083 incurred in the development of the CAT by the Initial Plan Processor. Such costs include development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Initial Plan Processor. Such costs include costs related to Industry Member technical specifications for orders and transactions, the system security plan, testing and production for Participant CAT reporting, third-party security assessment and response, query portal, onboarding of the Chief Information Security Officer, and ingestion of FINRA TRF data and FINRA data related to halts and corporate actions.

(III) Legal Costs

The legal costs of \$6,143,278 represent the fees paid to WilmerHale for legal services from November 15, 2017 through November 15, 2018. During this period, WilmerHale provided legal assistance to the CAT including with regard to the following:

- Provided legal support for the governance of the CAT, including governance support for the Operating Committee, Advisory Committee, Compliance Subcommittee, and CAT working groups;

- Assisted with the development of the CAT funding model and drafted related amendments of the CAT NMS Plan;
- Provided assistance related to CAT security;
- Drafted exemptive requests, including requests related to PII;
- Assisted with the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Provided interpretations of and related to the CAT NMS Plan;
- Provided advice with regard to regulator access to the CAT;
- Assisted with the Plan Processor transition;
- Provided assistance regarding communications with the industry regarding the CAT;
- Provided advice regarding Customer Account Information and PII;
- Provided support for litigation related to SEC exemptive orders; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretative and implementation issues.

(IV) Consulting Costs

The consulting costs of \$4,452,106 represent the fees paid to Deloitte for their role as project manager for the CAT from November 15, 2017 through November 15, 2018. During this period, Deloitte engaged in the following activities with respect to the CAT:

- Implemented program operations for the CAT project;
- Provided governance support to the Operating Committee, including support for Subcommittees and working groups of the Operating Committee (e.g., Compliance Subcommittee, Cost and Funding Working Group, Technical Working Group, Industry Outreach Working Group, Security Working Group and Steering Committee);
- Assisted with cost and funding issues for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;

- Provided support for updating the SEC on the progress of the development of the CAT; and

- Provided active planning and coordination with and support for the Initial Plan Processor with regard to the development of the CAT, and reported to the Participants on the progress.

(V) Insurance

CAT LLC did not incur costs related to insurance during the period from November 15, 2017 through November 15, 2018.

(VI) Professional and Administration Costs

The professional and administration costs of \$340,145 represent the fees paid to Anchin, Exegy and RSM from November 15, 2017 through November 15, 2018.

Financial Advisory Firm: Anchin. From the commencement of its engagement [sic] in April 2018 through November 15, 2018, Anchin engaged in the following activities with respect to the CAT:

- Developed, updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Addressed accounting and financial matters relating to the transition from CAT NMS, LLC to Consolidated Audit Trail, LLC, including supporting the dissolution of CAT NMS, LLC;

- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

Market Data Provider: Exegy. From July 2018 through November 15, 2018, CAT LLC purchased market data from Exegy (as described in more detail above).

Security Assessment: RSM. From October 2018 through November 15, 2018, CAT LLC incurred costs for RSM's performance of a security assessment (as described in more detail above).

(VII) Public Relations Costs

The public relations costs of \$87,325 represent the fees paid to Sloane from November 15, 2017 through November 15, 2018. From the commencement of its engagement [*sic*] in March 2018 through November 15, 2018, Sloane provided professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, Sloane provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.*, congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.*, amendments to the CAT NMS Plan).

(c) Costs Paid to Initial Plan Processor From November 16, 2018 Through February 2019

Third, Historical CAT Costs 1 would not include the \$19,628,791 in costs paid to the Initial Plan Processor from November 16, 2018 through February 2019 when CAT LLC's relationship with the Initial Plan Processor concluded. CAT LLC determined that Historical CAT Costs 1 would not include any fees paid to the Initial Plan Processor after November 15, 2017,⁶⁵ which was the date by which Participants were

required to begin reporting to the CAT.⁶⁶ As discussed above, the Participants determined that Historical CAT Costs 1 would not include all CAT costs incurred from November 15, 2017 through November 15, 2018, which includes \$37,852,083 in Initial Plan Processor costs incurred from November 15, 2017 through November 15, 2018 (as well as other CAT costs during this period). The remaining Initial Plan Processor costs incurred after November 15, 2018 are the \$19,628,791 in costs for the period from November 16, 2018 through February 2019 incurred in the development of the CAT by the Initial Plan Processor, as well as a transition fee for the transition from the Initial Plan Processor to the successor Plan Processor. The Participants would remain responsible for 100% of these \$19,628,791 in costs.

(C) Historical Recovery Period 1

Under the CAT NMS Plan, the Operating Committee is required to reasonably establish the length of the Historical Recovery Period used in calculating each Historical Fee Rate based upon the amount of the Historical CAT Costs to be recovered by the Historical CAT Assessment, and to describe the reasons for its length.⁶⁷ The Historical Recovery Period used in calculating the Historical Fee Rate may not be less than 24 months or more than five years.⁶⁸ The Operating Committee has determined to establish a Historical Recovery Period 1 of 24 months for Historical CAT Assessment 1.

The Operating Committee determined that the length of Historical Recovery Period 1 appropriately weighs the need for a reasonable Historical Fee Rate 1 that spreads the Historical CAT Costs over an appropriate amount of time and the need to repay the loans to the Participants in a timely fashion. The Operating Committee determined that 24 months for Historical Recovery Period 1 would establish a fee rate that is lower than other transaction-based fees, including fees assessed pursuant to

Section 31.⁶⁹ In addition, in establishing a Historical Recovery Period of 24 months, the Operating Committee recognized that the total costs for Historical CAT Assessment 1 were less than the total costs for 2022 and 2023,⁷⁰ and therefore it would be reasonable and appropriate to recover costs subject to this filing over an approximate two-year period.

The length of the Historical Recovery Period 1 and the reasons for its length are provided in this filing in accordance with the requirement in the CAT NMS Plan to provide such information in a fee filing for a Historical CAT Assessment.⁷¹

(D) Projected Total Executed Equivalent Share Volume

The calculation of Historical Fee Rate 1 also requires the determination of the projected total executed equivalent share volume of transactions in Eligible Securities for Historical Recovery Period 1. Under the CAT NMS Plan, the Operating Committee is required to "reasonably determine the projected total executed equivalent share volume of all transactions in Eligible Securities for each Historical Recovery Period based on the executed equivalent share volume of all transactions in Eligible Securities for the prior twelve months."⁷² The Operating Committee is required to base its projection on the prior twelve months, but it may use its discretion to analyze the likely volume for the upcoming year. Such discretion would allow the Operating Committee to use its judgment when estimating projected total executed equivalent share volume if the volume over the prior twelve months was unusual or otherwise unfit to serve as the basis of a future volume estimate.⁷³

The total executed equivalent share volume of transactions in Eligible Securities for the 12-month period from June 2023 through May 2024 was 3,980,753,840,905.21 executed equivalent shares. The Operating Committee has determined to calculate the projected total executed equivalent share volume for the 24 months of Historical Recovery Period 1 by doubling the executed equivalent share volume for the prior 12 months. The

⁶⁵ The SEC approved the CAT NMS Plan on November 15, 2016, and Participant reporting was required to begin on the first anniversary of this date, November 15, 2017. See Section 6.3 of the CAT NMS Plan and CAT NMS Plan Approval Order.

⁶⁷ Section 11.3(b)(i)(D)(I) and Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

⁶⁸ Section 11.3(b)(i)(D)(I) of the CAT NMS Plan. In the CAT Funding Model Approval Order, the SEC stated that "[i]n the Commission's view, it is reasonable for the Operating Committee to establish the length of the Historical Recovery Period to be no less than 24 months and no more than five years." CAT Funding Model Approval Order at 62664.

⁶⁹ As the SEC noted in the CAT Funding Model Approval Order, recent Section 31 fees ranged from \$0.00009 per share to \$0.0004 per share. CAT Funding Model at 62682.

⁷⁰ The total CAT costs for 2022 were approximately \$186 million and the total CAT costs for 2023 were approximately \$233 million.

⁷¹ Section 11.3(b)(iii)(B)(II)(C) of the CAT NMS Plan.

⁷² Section 11.3(b)(i)(E) of the CAT NMS Plan.

⁷³ CAT Funding Model Approval Order at 62664.

⁶⁵ As discussed below, CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017. See Section 3(a)(10)(E) below.

Operating Committee determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has remained relatively constant. For example, the executed equivalent share volume for 2021 was 3,963,697,612,395, the executed equivalent share volume for 2022 was 4,039,821,841,560.31, and the executed equivalent share volume for 2023 was 3,868,940,345,680.6. Accordingly, the projected total executed equivalent share volume for Historical Recovery Period 1 is projected to be 7,961,507,681,810.42 executed equivalent shares.⁷⁴

The projected total executed equivalent share volume of all transactions in Eligible Securities for Historical Recovery Period 1 and a description of the calculation of the projection is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide such information in a fee filing for a Historical CAT Assessment.⁷⁵

(E) Historical Fee Rate 1

Historical Fee Rate 1 would be calculated by dividing Historical CAT Costs 1 by the reasonably projected total executed equivalent share volume of all transactions in Eligible Securities for Historical Recovery Period 1, as described in detail above.⁷⁶ Specifically, Historical Fee Rate 1 would be calculated by dividing \$318,059,819 by 7,961,507,681,810.42. As a result, the Historical Fee Rate 1 would be \$0.00003994969693072937 per executed equivalent share. Historical Fee Rate 1 is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide the Historical Fee Rate in a fee filing for a Historical CAT Assessment.⁷⁷

(3) Past CAT Costs and Participants

Participants would not be required to pay any fees associated with Historical CAT Assessment 1 as the Participants previously have paid all Past CAT Costs. The CAT NMS Plan explains that:

Because Participants previously have paid Past CAT Costs via loans to the Company,

Participants would not be required to pay any Historical CAT Assessment. In lieu of a Historical CAT Assessment, the Participants' one-third share of Historical CAT Costs and such other additional Past CAT Costs as reasonably determined by the Operating Committee will be paid by the cancellation of loans made to the Company on a pro rata basis based on the outstanding loan amounts due under the loans.⁷⁸

The CAT NMS Plan further states that "Historical CAT Assessments are designed to recover two-thirds of the Historical CAT Costs."⁷⁹

(4) Monthly Fees

CEBBs and CEBs would be required to pay fees for Historical CAT Assessment 1 on a monthly basis for the period in which Historical CAT Assessment 1 is in effect.⁸⁰ A CEBB or CEBs's fee for each month would be calculated based on the transactions in Eligible Securities executed by the CEBB or CEBs from the prior month.⁸¹ Proposed paragraph (a)(1)(A) of the fee schedule would state that each CAT Executing Broker would receive its first invoice in November 2024, and "would receive an invoice each month thereafter in which Historical CAT Assessment 1 is in effect." Proposed paragraph (a)(1)(B) of the fee schedule would state that "Consolidated Audited Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1 on a monthly basis." In addition, proposed paragraph (b)(1) of the fee schedule states that each CEBB and CEBs is required to pay its CAT fees "each month."

(5) Actual Recovery Period for Historical CAT Assessment 1

The CAT NMS Plan states that, "[n]otwithstanding the length of the Historical Recovery Period used in calculating the Historical Fee Rate, each Historical CAT Assessment calculated using the Historical Fee Rate will remain in effect until all Historical CAT Costs for the Historical CAT Assessment are collected."⁸² Accordingly, Historical CAT Assessment 1 will remain in effect until all Historical CAT Costs 1 have been collected. The actual

recovery period for Historical CAT Assessment 1 may be shorter or longer than Historical Recovery Period 1 depending on the actual executed equivalent share volumes during the time that Historical CAT Assessment 1 is in effect.⁸³

(6) Consolidated Audit Trail Funding Fees

To implement Historical CAT Assessment 1, a new section would be added to the Exchange's fee schedule for "Consolidated Audit Trail Funding Fees", and it would include the proposed paragraphs described below.

(A) Fee Schedule for Historical CAT Assessment 1

The CAT NMS Plan states that:

Each month in which a Historical CAT Assessment is in effect, each CEBB and each CEBs shall pay a fee for each transaction in Eligible Securities executed by the CEBB or CEBs from the prior month as set forth in CAT Data, where the Historical CAT Assessment for each transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Historical Fee Rate reasonably determined pursuant to paragraph (b)(i) of this Section 11.3.⁸⁴

Accordingly, based on the factors discussed above, the Exchange proposes to add paragraph (a)(1) to the Consolidated Audit Trail Funding Fees section of its fee schedule. Proposed paragraph (a)(1) would state the following:

(A) Each CAT Executing Broker shall receive its first invoice for Historical CAT Assessment 1 in November 2024, which shall set forth the Historical CAT Assessment 1 fees calculated based on transactions in October 2024, and shall receive an invoice for Historical CAT Assessment 1 for each month thereafter in which Historical CAT Assessment 1 is in effect.

(B) Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1 on a monthly basis. Each month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer ("CEBB") and/or the CAT Executing Broker for the Seller ("CEBs") (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of \$0.000013 per executed equivalent share.

⁸³ In approving the CAT Funding Model, the Commission stated that, "[i]n the Commission's view, it is reasonable for Industry Members to be charged a Historical CAT Assessment until all Historical CAT Costs for the Historical CAT Assessment are collected." CAT Funding Model Approval Order at 62665.

⁸⁴ Section 11.3(b)(iii)(A) of the CAT NMS Plan.

⁷⁴ This projection was calculated by multiplying 3,980,753,840,905.21 executed equivalent shares by two.

⁷⁵ Section 11.3(b)(iii)(B)(II)(D) of the CAT NMS Plan.

⁷⁶ In approving the CAT Funding Model, the Commission stated that "[t]he calculation of the Historical Fee Rate by dividing the Historical CAT Costs by the projected total executed equivalent share volume of all transactions in Eligible Securities for the Historical Recovery Period is reasonable." CAT Funding Model Approval Order at 62664.

⁷⁷ Section 11.3(b)(iii)(B)(II)(A) of the CAT NMS Plan.

⁷⁸ Section 11.3(b)(ii) of the CAT NMS Plan.

⁷⁹ *Id.* In approving the CAT Funding Model, the Commission stated that "[t]he proposed allocation of the Historical CAT Assessment solely to CEBs and CEBBs, and ultimately Industry Members, is reasonable. The Historical CAT Assessment will still be divided into thirds," as the Participants' one-third share of Historical CAT Costs will be paid by the cancellation of loans made to the Company. CAT Funding Model Approval Order at 62666.

⁸⁰ See Section 11.3(b)(iii)(A) of the CAT NMS Plan.

⁸¹ See proposed paragraph (a)(1)(B) of the fee schedule.

⁸² Section 11.3(b)(i)(D)(II) of the CAT NMS Plan.

(C) Historical CAT Assessment 1 will remain in effect until \$212,039,879.34 (two-thirds of Historical CAT Costs 1) are collected from CAT Executing Brokers collectively, which is estimated to be approximately two years, but could be for a longer or shorter period of time. Consolidated Audit Trail, LLC will provide notice when Historical CAT Assessment 1 will no longer be in effect.

(D) Each CAT Executing Broker shall be required to pay each invoice for Historical CAT Assessment 1 in accordance with paragraph (b).

As noted in the Plan amendment for the CAT Funding Model, “as a practical matter, the fee filing for a Historical CAT Assessment would provide the exact fee per executed equivalent share to be paid for each Historical CAT Assessment, by multiplying the Historical Fee Rate by one-third and describing the relevant number of decimal places for the fee rate.”⁸⁵ Accordingly, proposed paragraph (a)(1)(B) of the fee schedule would set forth a fee rate of \$0.000013 per executed equivalent share. This fee rate is calculated by multiplying Historical Fee Rate 1 of \$0.00003994969693072937 by one-third, and rounding the result to 6 decimal places.⁸⁶ The Operating Committee determined to use six decimal places to balance the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.

The proposed language in paragraph (a)(1)(A) of the fee schedule would describe when CAT Executing Brokers would receive their first monthly invoice for Historical CAT Assessment 1. Specifically, CAT Executing Brokers would receive their first monthly invoice for Historical CAT Assessment 1 in November 2024 and the fees set forth in that invoice would be calculated based on transactions executed in the prior month, that is, transactions executed in October 2024. The payment for the first invoice would be required within 30 days after the receipt of the first invoice (unless a longer period is indicated), as described in paragraph (b)(2) of the fee schedule.

Proposed paragraph (a)(1)(A) of the fee schedule also would describe the monthly cadence of the invoices for Historical CAT Assessment 1. Specifically, after the first invoices are provided to CAT Executing Brokers in November 2024, invoices will be sent to CAT Executing Brokers each month

thereafter while Historical CAT Assessment 1 is in effect.

Proposed paragraph (a)(1)(B) of the fee schedule would describe the invoices for Historical CAT Assessment 1.

Proposed paragraph (a)(1)(B) of the fee schedule would state that “Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1 on a monthly basis.” Proposed paragraph (a)(1)(B) of the fee schedule also would describe the fees to be set forth in the invoices for Historical CAT Assessment 1. Specifically, it would state that “[e]ach month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer (“CEBB”) and/or the CAT Executing Broker for the Seller (“CEBS”) (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of \$0.000013 per executed equivalent share.”

Furthermore, proposed paragraph (a)(1)(C) of the fee schedule would describe how long Historical CAT Assessment 1 would remain in effect. It would state that “Historical CAT Assessment 1 will remain in effect until \$212,039,879.34 (two-thirds of Historical CAT Costs 1) are collected from CAT Executing Brokers collectively, which is estimated to be approximately two years, but could be for a longer or shorter period of time.” This proposed paragraph would further state that “Consolidated Audit Trail, LLC will provide notice when Historical CAT Assessment 1 will no longer be in effect.”

Historical CAT Assessment 1 will be assessed for all transactions executed in each month through the end of the month in which two-thirds of Historical CAT Costs 1 are assessed, and then CAT LLC will provide notice that Historical CAT Assessment 1 is no longer in effect. Since Historical CAT Assessment 1 is a monthly fee based on transaction volume from the prior month, Historical CAT Assessment 1 may collect more than two-thirds of Historical CAT Costs 1. To the extent that occurs, any excess money collected during the final month in which Historical CAT Assessment 1 is in effect will be used to offset future fees and/or to fund the reserve for the CAT.

Finally, proposed paragraph (a)(1)(D) of the fee schedule sets forth the requirement for the CAT Executing Brokers to pay the invoices for Historical CAT Assessment 1. It would

state that “[e]ach CAT Executing Broker shall be required to pay each invoice for Historical CAT Assessment 1 in accordance with paragraph (b).”

(B) Manner of Payment

Paragraph (b)(1) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule describes the manner of payment of Industry Member CAT fees. Paragraph (b)(1) states that “[e]ach CAT Executing Broker shall pay its CAT fees as required pursuant to paragraph (a) each month to the Consolidated Audit Trail, LLC in the manner prescribed by the Consolidated Audit Trail, LLC.” The CAT NMS Plan requires the Operating Committee to establish a system for the collection of CAT fees.⁸⁷ The Plan Processor has established a billing system for CAT fees.⁸⁸ Therefore, the Exchange proposes to require CAT Executing Brokers to pay Historical CAT Assessment 1 in accordance with such system.

(C) Failure to Pay CAT Fees

The CAT NMS Plan further states that:

Participants shall require each Industry Member to pay all applicable fees authorized under this Article XI within thirty (30) days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If an Industry Member fails to pay any such fee when due (as determined in accordance with the preceding sentence), such Industry Member shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of: (a) the Prime Rate plus 300 basis points; or (b) the maximum rate permitted by applicable law.⁸⁹

Accordingly, the Exchange previously has added this requirement to the Exchange’s fee schedule. Specifically, paragraph (b)(2) of the fee schedule states:

Each CAT Executing Broker shall pay the CAT fees required pursuant to paragraph (a) within thirty days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If a CAT Executing Broker fails to pay any such CAT fee when due, such CAT Executing Broker shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of (i) the Prime Rate plus 300

⁸⁷ Section 11.4 of the CAT NMS Plan.

⁸⁸ The billing process and system are described in CAT Alert 2023-02 as well as the CAT FAQs related to the billing of CAT fees, the Industry Member CAT Reporter Portal User Guide, the FCAT Industry Member Onboarding Guide, the FCAT Connectivity Supplement for Industry Members and the CAT Billing Webinars (dated Sept. 28, 2023, and Nov. 7, 2023), each available on the CAT website.

⁸⁹ Section 11.4 of the CAT NMS Plan.

⁸⁵ CAT Funding Model Approval Order at 62658, n.658.

⁸⁶ Dividing \$0.00003994969693072937 by three equals \$0.00001331656564357646. Rounding \$0.00001331656564357646 to six decimal places equals \$0.000013.

basis points, or (ii) the maximum rate permitted by applicable law.

The requirements of paragraph (b)(2) would apply to Historical CAT Assessment 1.

(7) Historical CAT Assessment Details

The CAT NMS Plan states that:

Details regarding the calculation of a CAT Executing Broker's Historical CAT Assessment will be provided upon request to such CAT Executing Broker. At a minimum, such details would include each CAT Executing Broker's executed equivalent share volume and corresponding fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise than on an exchange, and (3) by buy-side transactions and sell-side transactions.⁹⁰

Such information would provide CEBBs and CEBBs with the ability to understand the details regarding the calculation of their Historical CAT Assessment.⁹¹ CAT LLC will provide CAT Executing Brokers with these details regarding the calculation of their Historical CAT Assessments on their monthly invoice for the Historical CAT Assessment.

In addition, CAT LLC will make certain aggregate statistics regarding Historical CAT Assessments publicly available. Specifically, the CAT NMS Plan states that, “[f]or each Historical CAT Assessment, at a minimum, CAT LLC will make publicly available the aggregate executed equivalent share volume and corresponding aggregate fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise on an exchange, and (3) by buy-side transactions and sell-side transactions.”⁹² Such aggregate statistics will be available on the CAT website.

Furthermore, CAT LLC will make publicly available on the CAT website the total amount invoiced each month that Historical CAT Assessment 1 is in effect as well as the total amount

invoiced for Historical CAT Assessment 1 for all months since its commencement. CAT LLC also will make publicly available on the CAT website the total costs to be collected from Industry Members for Historical CAT Assessment 1. By reviewing statistics regarding how much has been invoiced and how much remains to be invoiced for Historical CAT Assessment 1, Industry Members would have sufficient information to reasonably track how much longer Historical CAT Assessment 1 is likely to be in place.

(8) Implementation Assistance

To assist Industry Members with compliance with the commencement of Historical CAT Assessment 1, CAT LLC has been making available to CAT Executing Brokers mock invoices prior to the commencement of Historical CAT Assessment 1. Specifically, CAT Executing Brokers have received mock invoices based on transaction data each month since November 2023. The mock invoices are in the same form as the actual, payable invoices, including both the relevant transaction data and the corresponding fee. However, no payments have been required in response to such mock invoices; they have been used solely to assist CAT Executing Brokers with the development of their processes for paying the CAT fees. Such data has provided CAT Executing Brokers with a preview of the transaction data used in creating the invoices for Historical CAT Assessment 1 fees, as the data will be the same as data provided in actual invoices. Such data preview is intended to facilitate the payment of Historical CAT Assessment 1.

(9) Financial Accountability Milestones

The CAT NMS Plan states that “[n]o Participant will make a filing with the SEC pursuant to Section 19(b) of the Exchange Act regarding any Historical CAT Assessment until any applicable Financial Accountability Milestone described in Section 11.6 has been satisfied.”⁹³ The CAT NMS Plan further states that “in all filings submitted by the Participants to the Commission under Section 19(b) of the Exchange Act, to establish or implement Post-Amendment Industry Member Fees pursuant to this Article, . . . the Participants shall clearly indicate whether such fees are related to Post-Amendment Expenses incurred during Period 1, Period 2, Period 3, or Period 4.”⁹⁴ As discussed in detail below, all

applicable Financial Accountability Milestones for Historical CAT Assessment 1—that is, Period 1, Period 2 and Period 3 of the Financial Accountability Milestones—have been satisfied. Furthermore, as discussed below, this filing clearly indicates that Historical CAT Assessment 1 relates to Post-Amendment Expenses incurred during Periods 1, 2 and 3 of the Financial Accountability Milestones.

(A) Period 1 of the Financial Accountability Milestones

In accordance with Section 11.6(b) of the CAT NMS Plan, Historical CAT Assessment 1 seeks to recover costs that are related to “all fees, costs, and expenses (including legal and consulting fees, costs, and expenses) incurred by or for the Company in connection with the development, implementation and operation of the CAT from the effective date of [Section 11.6 of the CAT NMS Plan] until such time as Full Implementation of CAT NMS Plan Requirements has been achieved”⁹⁵ (“Post-Amendment Expenses”) incurred during FAM Period 1. FAM Period 1 began on June 22, 2020, the effective date of Section 11.6 of the CAT NMS Plan, and concluded on July 31, 2020, the date of Initial Industry Member Core Equity and Options Reporting. Section 1.1 of the CAT NMS Plan defines “Initial Industry Member Core Equity and Options Reporting” as:

The reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of both: (a) equities transaction data, excluding Customer Account Information, Customer-ID, and Customer Identifying Information; and (b) options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information.

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports.⁹⁶ As indicated by the Participants' Quarterly Progress Report for the third quarter of 2020,⁹⁷ Initial Industry Member Core Equity and Option Reporting was completed on schedule on July 22, 2020, which is prior to the July 31, 2020 deadline.

Under the FAM Period 1 requirement of Initial Industry Member Core Equity and Options Reporting, Industry

⁹⁰ Section 11.3(a)(iv)(A) of the CAT NMS Plan.

⁹¹ In approving the CAT Funding Model, the Commission stated that, “[i]n the Commission's view, providing CAT Execut[ing] Brokers information regarding the calculation of their CAT Fees will aid in transparency and permit CAT Execut[ing] Brokers to confirm the accuracy of their invoices for CAT Fees.” CAT Funding Model Approval Order at 62667.

⁹² Section 11.3(a)(iv)(B) of the CAT NMS Plan. In approving the CAT Funding Model, the Commission stated that “[t]he publication of the aggregate executed equivalent share volume and aggregate fee is appropriate because it would allow Participants and CAT Executing Brokers a high-level validation of executed volume and fees.” CAT Funding Model Approval Order at 62667.

⁹³ Section 11.3(b)(iii)(B)(III) of the CAT NMS Plan.

⁹⁴ Section 11.6(b) of the CAT NMS Plan.

⁹⁵ Section 11.6 of the CAT NMS Plan.

⁹⁶ The Quarterly Progress Reports are available at <https://www.catnmsplan.com/implementation-plan>.

⁹⁷ See Q3 2020 Quarterly Progress Report (Oct. 30, 2020) and Updated Q3 2020 Quarterly Progress Report (Jan. 29, 2021).

Members—excluding Small Industry Members that are not OATS reporters—were required to report two categories of data to the CAT: equities transaction data and options transaction data (both excluding Customer Account Information, Customer-ID, and Customer Identifying Information) by July 31, 2020. Pursuant to exemptive relief provided by the Commission, the Commission authorized the Participants' Compliance Rules to allow core equity reporting for Industry Members (Phase 2a) to begin on June 22, 2020 and core options reporting for Industry Members (Phase 2b) to begin on July 20, 2020.⁹⁸

In adopting the FAMs, the Commission stated that the equities transaction reporting required for FAM Period 1 “is consistent with the functionality that the Participants describe on the CAT NMS Plan website as ‘Production Go-Live for Equities 2a file submission and data integrity validations.’”⁹⁹ The Phase 2a Industry Member Data is described in detail in the SEC’s Phased Reporting Exemptive Relief Order, and includes the following data related to Eligible Securities that are equities:

- All events and scenarios covered by OATS, which includes information related to the receipt or origination of orders, order transmittal, and order modifications, cancellations and executions;
- Reportable Events for: (1) proprietary orders, including market maker orders, for Eligible Securities that are equities; (2) electronic quotes in listed equity Eligible Securities (*i.e.*, NMS stocks) sent to a national securities exchange or FINRA’s Alternative Display Facility (“ADF”); (3) electronic quotes in unlisted Eligible Securities (*i.e.*, OTC Equity Securities) received by an Industry Member operating an interdealer quotation system (“IDQS”); and (4) electronic quotes in unlisted Eligible Securities sent to an IDQS or

other quotation system not operated by a Participant or Industry Member;

- Firm Designated IDs (“FDIDs”), which Industry Members must report to the CAT as required by Sections 6.3(d)(i)(A) and 6.4(d)(ii)(C) of the CAT NMS Plan;

- Industry Members would be required to report all street side representative orders, including both agency and proprietary orders and mark such orders as representative orders, except in certain limited exceptions as described in the Industry Member Technical Specifications;

- The link between the street side representative order and the order being represented when: (1) the representative order was originated specifically to represent a single order received either from a customer or another broker-dealer; and (2) there is (a) an existing direct electronic link in the Industry Member’s system between the order being represented and the representative order and (b) any resulting executions are immediately and automatically applied to the represented order in the Industry Member’s system;

- Manual and Electronic Capture Time for Manual Order Events;

- Special handling instructions for the original receipt or origination of an order during Phase 2a; and

- When routing an order, whether the order was routed as an intermarket sweep order (“ISO”).

In Phase 2a, Industry Members were not required to report modifications of a previously routed order in certain limited instances, nor were they required to report a cancellation of an order received from a Customer after the order has been executed.¹⁰⁰

The Quarterly Progress Report for the third quarter of 2020 states that “Interim Step: Production Go-Live for Equities 2a file submission and data integrity validation (Large Industry Members and Small OATS Reporters)” was completed on June 22, 2020. Accordingly, the FAM Period 1 requirement of reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of “equities transaction data, excluding Customer Account Information, Customer-ID, and Customer Identifying Information” was completed on June 22, 2020.

In adopting the FAMs, the Commission stated that the options transaction reporting required for FAM Period 1 is “consistent with the functionality that the Participants describe on the CAT NMS Plan website as ‘Production Go-Live for Options 2b

file submission and data integrity validations.’”¹⁰¹ The Phase 2b Industry Member Data is described in detail in the SEC’s Phased Reporting Exemptive Relief Order, and includes the Industry Member Data related to Eligible Securities that are options and related to simple electronic option orders, excluding electronic paired option orders. A simple electronic option order is an order to buy or sell a single option that is not related to or dependent on any other transaction for pricing and timing of execution that is either received or routed electronically by an Industry Member. Electronic receipt of an order is defined as the initial receipt of an order by an Industry Member in electronic form in standard format directly into an order handling or execution system. Electronic routing of an order is the routing of an order via electronic medium in standard format from one Industry Member’s order handling or execution system to an exchange or another Industry Member. An electronic paired option order is an electronic option order that contains both the buy and sell side that is routed to another Industry Member or exchange for crossing and/or price improvement as a single transaction on an exchange. Responses to auctions of simple orders and paired simple orders would be reportable in Phase 2b. Furthermore, combined orders in options would be treated in Phase 2b in the same way as equity representative orders are treated in Phase 2a. A combined order would mean, as permitted by SRO rules, a single, simple order in Listed Options created by combining individual, simple orders in Listed Options from a customer with the same exchange origin code before routing to an exchange. During Phase 2b, the single combined order sent to an exchange must be reported and marked as a combined order, but the linkage to the underlying orders is not required to be reported until Phase 2d.¹⁰²

The Quarterly Progress Report for the third quarter of 2020 states that “Interim Step: Production Go-Live for Options 2b file submission and data integrity validations” was completed on July 20, 2020. Accordingly, the FAM Period 1 requirement of reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of “options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information” was completed on July 20, 2020.

¹⁰¹ FAM Adopting Release at 31330, n.98.

¹⁰² Phased Reporting Exemptive Relief Order at 23078.

⁹⁸ See Phased Reporting Exemptive Relief Order. Under the CAT NMS Plan as adopted, the Participants were required, through their Compliance Rules, to require their Large Industry Members to commence reporting Industry Member Data to the Central Repository by November 15, 2018, and to require their Small Industry Members to commence reporting Industry Member Data to the Central Repository by November 15, 2019. Sections 6.7(a)(v) and (vi) of the CAT NMS Plan. The SEC granted exemptive relief from these provisions of the CAT NMS Plan to allow for the phased implementation of Industry Member reporting via five phases addressing the reporting requirements for Phase 2a Industry Member Data, Phase 2b Industry Member Data, Phase 2c Industry Member Data, Phase 2d Industry Member Data and Phase 2e Industry Member Data.

⁹⁹ Securities Exchange Act Rel. No. 88890 (May 15, 2020), 85 FR 31322, 31330 n.97 (May 22, 2020) (“FAM Adopting Release”).

¹⁰⁰ Phased Reporting Exemptive Relief Order at 23076–78.

As discussed above, the Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1 would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from June 22, 2020 through July 31, 2020. The total costs for this period, as discussed above, are \$6,377,343. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$2,125,781) and CEBBs paying one-third (\$2,125,781).

(B) Period 2 of the Financial Accountability Milestones

Historical CAT Assessment 1 seeks to recover costs that are related to Post-Amendment Expenses incurred during FAM Period 2. FAM Period 2 began on August 1, 2020, and concluded on December 31, 2020, the date of the Full Implementation of Core Equity Reporting. Section 1.1 of the CAT NMS Plan defines “Full Implementation of Core Equity Reporting” as:

the point at which: (a) Industry Member reporting (excluding reporting by Small Industry Members that are not OATS reporters) for equities transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, is developed, tested, and implemented at a 5% Error Rate or less and with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, and trade reporting facilities linkage to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, excluding linkage of representative orders, from order origination through order execution or order cancellation; and (b) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3 and Section 8.2.1 incorporates the Industry Member equities transaction data described in condition (a) and is available to the Participants and to the Commission. This Financial Accountability Milestone shall be considered complete as of the date identified in a Quarterly Progress Report meeting the requirements of Section 6.6(c).

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants’ Quarterly Progress Reports. As indicated by the Participants’ Quarterly Progress Report for the fourth quarter of 2020,¹⁰³ Full Implementation of Core Equity

Reporting was completed on schedule by December 31, 2020.

Specifically, the Full Implementation of Core Equity Reporting requires the satisfaction of two prongs. The first prong requires Participants to have fully implemented the first phase of equities transaction reporting for Industry Members (excluding Small Industry Members that are not OATS reporters) at an Error Rate of less than 5%. In addition, equities transaction data produced by the CAT at this stage must also be sufficiently interlinked so as to permit full analysis of an order’s lifecycle across the national market, excluding full linkage of representative orders. As CAT LLC reported on its Quarterly Progress Reports, Phase 2a was fully implemented as of October 26, 2020, including intra-firm, inter-firm, national securities exchange, and trade reporting facilities linkages.¹⁰⁴ In addition to the reporting of Phase 2a Industry Member Data as described above with regard to FAM Period 1, the following linkage data was added to the CAT as described in the Quarterly Progress Reports for the third and fourth quarter of 2020:

- “Production Go-Live for Equities 2a Intrafirm Linkage validations” was completed on 7/27/2020;¹⁰⁵
- “Production Go-Live for Firm to Firm Linkage validations for Equities 2a (Large Industry Members and Small OATS Reporters)” was completed on October 26, 2020; and
- “Production Go-Live for Equities 2a Exchange and TRF Linkage validations (Large Industry Members and Small OATS Reporters)” was completed on October 26, 2020.

Furthermore, as CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2020, the average overall error rate for Phase 2a Industry Member Data was less than 5% as of December 31, 2020. The average overall error rate was calculated by dividing the compliance errors by processed records.

The second prong of this FAM requires that the equities transaction data collected by the CAT at this stage be made available to regulators through two basic query tools required by the CAT NMS Plan—a targeted query tool that will enable regulators to retrieve data via an online query screen with a variety of predefined selection criteria, and a user-defined direct query tool that will provide regulators with the ability to query data using all available

attributes and data sources.¹⁰⁶ As CAT LLC reported on its Quarterly Progress Reports, the query tool functionality incorporating the data from Phase 2a was available to the Participants and the Commission as of December 31, 2020.¹⁰⁷

The Commission has determined that the Participants have sufficiently complied with the conditions set forth in the 2020 Orders and with the technical requirements for Quarterly Progress Reports set forth in Section 6.6(c) of the CAT NMS Plan for purposes of determining compliance with this FAM.¹⁰⁸

As discussed above, Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1 would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from August 1, 2020 through December 31, 2020. The total costs for this period, as discussed above, are \$42,976,478. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remain [*sic*] two-thirds, with CEBBs paying one-third (\$14,325,492.70) and CEBBs paying one-third (\$14,325,492.70).

(C) Period 3 of the Financial Accountability Milestones

Historical CAT Assessment 1 seeks to recover costs that are related to Post-Amendment Expenses incurred during FAM Period 3. FAM Period 3 began on January 1, 2021, and concluded on December 31, 2021, the date of the Full Availability and Regulatory Utilization of Transactional Database Functionality. Section 1.1 of the CAT NMS Plan defines “Full Availability and Regulatory Utilization of Transactional Database Functionality” as:

the point at which: (a) reporting to the Order Audit Trail System (“OATS”) is no longer required for new orders; (b) Industry Member reporting for equities transactions and simple

¹⁰⁶ Section 6.10(c)(i)(A) of the CAT NMS Plan requires the Plan Processor to “provide Participants and the SEC with access to all CAT Data stored in the Central Repository” via an “online targeted query tool.” Appendix D, Sections 8.1.1–8.1.3 of the CAT NMS Plan describes the required functionality associated with this regulatory tool. Appendix D, Section 8.2.1 describes the required functionality associated with a user-defined direct query tool that will “deliver large sets of data that can then be used in internal surveillance or market analysis applications.”

¹⁰⁷ See Q3 2020 Quarterly Progress Report (Oct. 30, 2020); Updated Q3 2020 Quarterly Progress Report (Jan. 29, 2021); and Q4 2020 Quarterly Progress Report (Jan. 29, 2021).

¹⁰⁸ Securities Exchange Act Rel. No. 98848 (Nov. 2, 2023), 88 FR 77128, 77129 n.13 (Nov. 8, 2023) (“Settlement Exemptive Order”).

¹⁰³ Q4 2020 Quarterly Progress Report (Jan. 29, 2021).

¹⁰⁴ For a description of the requirements of Phases 2a, see Phased Reporting Exemptive Relief Order.

¹⁰⁵ Q3 2020 Quarterly Progress Report (Oct. 20, 2021).

electronic options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, trade reporting facilities linkage, and representative order linkages (including any equities allocation information provided in an Allocation Report) to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, is developed, tested, and implemented at a 5% Error Rate or less; (c) Industry Member reporting for manual options transactions and complex options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with all required linkages to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, including any options allocation information provided in an Allocation Report, is developed, tested, and fully implemented; (d) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3, Section 8.2.1, and Section 8.5 incorporates the data described in conditions (b)–(c) and is available to the Participants and to the Commission; and (e) the requirements of Section 6.10(a) are met. This Financial Accountability Milestone shall be considered complete as of the date identified in a Quarterly Progress Report meeting the requirements of Section 6.6(c).

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports. As indicated by the Participants' Quarterly Progress Report for the fourth quarter of 2021,¹⁰⁹ Full Availability and Regulatory Utilization of Transactional Database Functionality was completed on schedule by December 31, 2021.

Specifically, the "Full Availability and Regulatory Utilization of Transactional Database Functionality" requires the satisfaction of five prongs. The first prong requires that reporting to the Order Audit Trail System ("OATS") is no longer required for new orders. As CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2021,¹¹⁰ FINRA retired OATS effective September 1, 2021.¹¹¹ Accordingly, after the retirement of OATS, reporting to OATS was no longer required.

In addition to Phase 2a and Phase 2b Industry Member Data, the second and third prongs of "Full Availability and Regulatory Utilization of Transactional

Database Functionality" require Industry Member reporting of Phase 2c Industry Member Data and Phase 2d Industry Member Data. The Phase 2c Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order. That Order states that "Phase 2c Industry Member Data" is Industry Member Data related to Eligible Securities that are equities other than Phase 2a Industry Member Data, Phase 2d Industry Member Data, or Phase 2e Industry Member Data. Specifically, the Phase 2c Industry Member Data includes Industry Member Data that is related to Eligible Securities that are equities and that is related to: (1) Allocation Reports as required to be recorded and reported to the Central Repository pursuant to Section 6.4(d)(ii)(A)(1) of the CAT NMS Plan; (2) quotes in unlisted Eligible Securities sent to an IDQS operated by a CAT Reporter (reportable by the Industry Member sending the quotes) (except for quotes reportable in Phase 2d, as discussed below); (3) electronic quotes in listed equity Eligible Securities (*i.e.*, NMS stocks) that are not sent to a national securities exchange or FINRA's Alternative Display Facility; (4) reporting changes to client instructions regarding modifications to algorithms; (5) marking as a representative order any order originated to work a customer order in price guarantee scenarios, such as a guaranteed VWAP; (6) flagging rejected external routes to indicate a route was not accepted by the receiving destination; (7) linkage of duplicate electronic messages related to a Manual Order Event between the electronic event and the original manual route; (8) special handling instructions on order route reports (other than the ISO, which is required to be reported in Phase 2a); (9) quote identifier on trade events; (10) reporting of LTIDs (if applicable) for accounts with Reportable Events that are reportable to CAT as of and including Phase 2c; (11) reporting of date account opened or Account Effective Date (as applicable) for accounts and reporting of a flag indicating the Firm Designated ID type as account or relationship; (12) order effective time for orders that are received by an Industry Member and do not become effective until a later time; (13) the modification or cancellation of an internal route of an order; and (14) linkages to the customer orders(s) being represented for representative order scenarios, including agency average price trades, net trades, aggregated orders, and disconnected Order Management System ("OMS")—Execution Management System ("EMS")

scenarios, as required in the Industry Member Technical Specifications.¹¹²

Phase 2c Industry Member Data also includes electronic quotes that are provided by or received in a CAT Reporter's order/quote handling or execution systems in Eligible Securities that are equities and are provided by an Industry Member to other market participants off a national securities exchange under the following conditions: (1) an equity bid or offer is displayed publicly or has been communicated (a) for listed securities to the ADF operated by FINRA; or (b) for unlisted equity securities to an "interdealer quotation system," as defined in FINRA Rule 6420(c); or (2) an equity bid or offer which is accessible electronically by customers or other market participants and is immediately actionable for execution or routing; *i.e.*, no further manual or electronic action is required by the responder providing the quote in order to execute or cause a trade to be executed). With respect to OTC Equity Securities, OTC Equity Securities quotes sent by an Industry Member to an IDQS operated by an Industry Member CAT Reporter (other than such an IDQS that does not match and execute orders) are reportable by the Industry Member sending them in Phase 2c. Accordingly, any response to a request for quote or other form of solicitation response provided in a standard electronic format (*e.g.*, FIX) that meets this quote definition (*i.e.*, an equity bid or offer which is accessible electronically by customers or other market participants and is immediately actionable for execution or routing) would be reportable in Phase 2c.¹¹³

The Phase 2d Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order. "Phase 2d Industry Member Data" is Industry Member Data that is related to Eligible Securities that are options other than Phase 2b Industry Member Data, Industry Member Data that is related to Eligible Securities that are equities other than Phase 2a Industry Member Data or Phase 2c Industry Member Data, and Industry Member Data other than Phase 2e Industry Member Data. Phase 2d Industry Member Data includes with respect to the Eligible Securities that are options: (1) simple manual orders; (2) electronic and manual paired orders; (3) all complex orders with linkages to all CAT-reportable legs; (4) LTIDs (if applicable) for accounts with Reportable Events for Phase 2d; (5) date account

¹⁰⁹ Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

opened or Account Effective Date (as applicable) for accounts with an LTID and flag indicating the Firm Designated ID type as account or relationship for such accounts; (6) Allocation Reports as required to be recorded and reported to the Central Repository pursuant to Section 6.4(d)(ii)(A)(1) of the CAT NMS Plan; (7) the modification or cancellation of an internal route of an order; and (8) linkage between a combined order and the original customer orders. Phase 2d Industry Member Data also would include electronic quotes that are provided by or received in a CAT Reporter's order/quote handling or execution systems in Eligible Securities that are options and are provided by an Industry Member to other market participants off a national securities exchange under the following conditions: a listed option bid or offer which is accessible electronically by customers or other market participants and is immediately actionable (*i.e.*, no further action is required by the responder providing the quote in order to execute or cause a trade to be executed). Accordingly, any response to a request for quote or other form of solicitation response provided in standard electronic format (*e.g.*, FIX) that meets this definition is reportable in Phase 2d for options.¹¹⁴

Phase 2d Industry Member Data also includes with respect to Eligible Securities that are options or equities (1) receipt time of cancellation and modification instructions through Order Cancel Request and Order Modification Request events; (2) modifications of previously routed orders in certain instances; and (3) OTC Equity Securities quotes sent by an Industry Member to an IDQS operated by an Industry Member CAT Reporter that does not match and execute orders. In addition, subject to any exemptive or other relief, Phase 2d Industry Member Data will include verbal or manual quotes on an exchange floor or in the over-the-counter market, where verbal quotes and manual quotes are defined as bids or offers in Eligible Securities provided verbally or that are provided or received other than via a CAT Reporter's order handling and execution system (*e.g.*, quotations provided via email or instant messaging).¹¹⁵

The Quarterly Progress Report for the fourth quarter of 2021 states that "Phase 2a was fully implemented as of October 26, 2020;" "Phase 2b was fully implemented as of January 4, 2021;" "Phase 2c was implemented as of April 26, 2021;" and "Phase 2d was fully

implemented as of December 13, 2021."¹¹⁶ The Quarterly Progress Reports for 2021 provide additional detail regarding the implementation of these steps including the following:

- "Production Go-Live for Equities 2c reporting requirements (Large Industry Members)" was completed on April 26, 2021;
- "LTID Account Information Reporting Go-Live for Phases 2a, 2b and 2c (Large Industry Members)" was completed on April 26, 2021;
- "FCAT Plan Processor creates linkages of the lifecycle of order events based on the received data through Phase 2d Production Go-Live for Options 2d reporting requirements (Large Industry Members)" was completed on December 13, 2021;
- "Production Go-Live for Options 2d reporting requirements (Large Industry Members)" was completed on December 13, 2021;
- "Production Go-Live for Options 2b reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)" was completed on December 13, 2021;
- "Production Go-Live for Equities 2c reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)" was completed on December 13, 2021;
- "Production Go-Live for Options 2d reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)" was completed on December 13, 2021;
- "LTID Account Information Reporting Go-Live for Phases 2d (Large Industry Members)" was completed on December 13, 2021; and
- "LTID Account Information Reporting Go-Live for Phases 2a, 2b, 2c and 2d (Small Industry Members)" was completed on December 13, 2021.¹¹⁷

The third prong of "Full Availability and Regulatory Utilization of Transactional Database Functionality" also imposes an Error Rate requirement of 5% or less. The Quarterly Progress Report for the fourth quarter of 2021 states the average overall error rate was less than 5% as of December 31, 2021. The average overall error rate was calculated by dividing the compliance errors by processed records.

The fourth prong of "Full Availability and Regulatory Utilization of Transactional Database Functionality" requires that the data collected by the CAT at this stage be made available to

regulators through an online targeted query tool and a user-defined direct query tool. As CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2021, the query tool functionality incorporating the data from Phases 2a, 2b, 2c and 2d was available to the Participants and to the Commission as of December 31, 2021.¹¹⁸

The fifth prong requires the requirements of Section 6.10(a) of the CAT NMS Plan to have been met. Section 6.10(a) of the CAT NMS Plan requires the Participants to use the tools described in Appendix D to "develop and implement a surveillance system, or enhance existing surveillance systems, reasonably designed to make use of the consolidated information contained in the Central Repository." The Exchange implemented a surveillance system, or enhanced existing surveillance systems, reasonably designed to make use of the consolidated information contained in the Central Repository as of December 31, 2021 in accordance with Section 6.10(a) of the CAT NMS Plan.¹¹⁹

The Commission has determined that the Participants have sufficiently complied with the conditions set forth in the 2020 Orders and with the technical requirements for Quarterly Progress Reports set forth in Section 6.6(c) of the CAT NMS Plan for purposes of determining compliance with this FAM.¹²⁰

As discussed above, Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1 would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2021 through December 31, 2021. The total costs for this period, as discussed above, are \$144,415,268. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remain [*sic*] two-thirds, with CEBBs paying one-third (\$48,138,422.70) and CEBBs paying one-third (\$48,138,422.70).

(D) Additional Considerations Related to the Financial Accountability Milestones

As discussed above, CAT LLC has satisfied the Financial Accountability Milestones ("FAMs") for Periods 1

¹¹⁸ See Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

through 3.¹²¹ As discussed below, none of the circumstances related to NIA Electronic RFQ Responses, the 2023 Verbal Quotes Exemption, the November 2023 Order, or Executing Broker reporting, affect the conclusion that the FAMs for Periods 1 through 3 were satisfied in a timely fashion.

(i) NIA Electronic RFQ Responses

CAT LLC does not believe that the exemptive relief relating to the reporting of electronic responses for quotes (“RFQs”) that are not immediately actionable (“NIA Electronic RFQ Responses”) affect the conclusion that FAMs 1 through 3 have been satisfied. The only reason CAT LLC pursued this relief is because certain Industry Members introduced concerns that NIA Electronic RFQ Responses could be considered “orders” reportable pursuant to Rule 613(j)(8) and some Industry Members were not prepared to report such orders to CAT. Thus, the relief was requested on behalf of Industry Members. CAT LLC itself has not taken any position on whether NIA Electronic RFQ Responses are “orders,” as the definition of “order” is an SEC rule and the trading processes for NIA Electronic RFQ Responses are the Industry Members’, not those of the Participants or CAT LLC. Accordingly, CAT LLC stated in its letter that “Industry Members must determine whether trading interest falls within the definition of an ‘order’ for CAT purposes. To the extent an NIA Electronic RFQ Response is not considered an ‘order’ as defined in Rule 613(j)(8) and the CAT NMS Plan, it would not be reportable to CAT.”¹²²

Only “orders” as defined in SEC Rule 613(j)(8) are reportable to CAT. There is no agreement across the industry or among regulators as to whether NIA Electronic RFQ Responses are “orders” reportable to CAT. Certain Industry Members have raised the question as to whether NIA Electronic RFQ Responses are orders, but others have argued that they are not orders under Rule 613(j)(8).¹²³ Indeed, members of the

Advisory Committee, which CAT LLC relies upon for guidance with regard to Industry Member issues, have not had a definitive view on whether NIA Electronic RFQ Responses are orders. As Rule 613(j)(8) is an SEC rule, CAT LLC believes that only the SEC can provide a definitive determination as to if, and under what circumstances, an NIA Electronic RFQ Response is considered an “order” reportable to CAT. The issue has persisted for some time. As a result, CAT LLC filed an exemptive request regarding NIA Electronic RFQ Responses for clarity on the interpretive issue. As recently as April 2024, Industry Members have re-raised this issue stating that the SEC agrees that it must provide additional guidance on this interpretive issue to resolve the CAT reporting issue for NIA Electronic RFQ Responses:

As further discussed in the prior FIF letters, even if the Commission had the legal authority to require the reporting of NIA RFQ responses to CAT without an amendment to Rule 613, the Commission has not provided guidance to industry members as to the conditions under which NIA RFQ responses would be reportable to CAT. In subsequent discussions with industry members, Commission representatives have agreed that, prior to NIA RFQ responses being reportable to CAT, it would be necessary for the Commission to provide further guidance to industry members as to the conditions under which NIA RFQ responses would be reportable to CAT.¹²⁴

On May 20, 2024, the Commission granted CAT LLC’s request for exemptive relief from certain CAT reporting requirements pertaining to NIA Electronic RFQ Responses to the extent such responses are considered “orders” reportable pursuant to Rule 613(j)(8).¹²⁵ The Commission, however, did not provide additional guidance regarding the conditions under which NIA Electronic RFQ Responses would be reportable to CAT. The Commission stated in its exemptive order that “[t]o the extent that the Participants are availing themselves of exemptive relief from a CAT NMS Plan requirement, such requirement shall not be included in the requirements for the Financial Accountability Milestones, provided that any conditions of the exemption are satisfied.”¹²⁶

When the Commission proposed the FAMs, the Participants expressed concern that, “by conditioning the ability of CAT LLC and the Participants to collect Post-Amendment Industry Member Fees on factors dependent on

the efforts of Industry Members, the Commission’s proposals inadvertently establish a perverse incentive for Industry Members to devote less than maximum efforts to comply with their obligations related to the CAT as they will pay less fees in such instances.”¹²⁷ The Participants further warned that “Industry Members may request or require unanticipated reporting delays to address Industry Member implementation issues or concerns,” but that, “[f]aced with financial penalties for missed deadlines, the Participants may not be able to fully address legitimate industry concerns or accommodate requests for delays with respect to future deadlines.”¹²⁸ CAT LLC has engaged in good faith to help address NIA Electronic RFQ Responses and other concerns relevant to the ability of Industry Members to meet their CAT reporting obligations. CAT LLC should not be penalized financially for seeking in good faith to resolve a difficult interpretive issue for the benefit of Industry Members.

(ii) 2023 Verbal Quotes Exemption

CAT LLC does not believe that the Commission’s May 19, 2023 order granting temporary exemptive relief relating to certain verbal floor activity and unstructured verbal and electronic upstairs activity (the “2023 Verbal Quotes Exemption”) affects the conclusion that FAMs 1 through 3 have been satisfied. The 2023 Verbal Quotes Exemption, which was issued on May 19, 2023, is not relevant for purposes of FAM Periods 1 through 3, which only cover the period through December 31, 2021. The relevant exemption for this time period is the Commission’s November 12, 2020 order, which granted relief for the same activity through July 31, 2023 (the “2020 Verbal Quotes Order”).¹²⁹ The Commission has stated that, “to the extent that the Participants are availing themselves of exemptive relief from a CAT NMS Plan requirement, such requirement shall not be included in the requirements for a Financial Accountability Milestone, provided that the conditions of the exemption are satisfied.”¹³⁰ Here, the

¹²¹ In May 2020, the Commission adopted amendments to the CAT NMS Plan that establish four Financial Accountability Milestones and set target deadlines by which these milestones must be achieved. These amendments also reduce the amount of any fees, costs, and expenses that may be recovered from Industry Members if the Participants fail to meet the target deadlines. FAM Adopting Release.

¹²² See Letter from Brandon Becker, Chair, CAT NMS Plan Operating Committee to Vanessa Countryman, Secretary, Commission (Feb. 13, 2024) at 2.

¹²³ See, e.g., Letter from Howard Meyerson, Managing Director, FIF, to Sai Rao, Counsel for Trading and Markets, Office of the Chair (Apr. 25, 2024).

¹²⁴ *Id.*

¹²⁵ Securities Exchange Act Rel. No. 100181 (May 20, 2024), 89 FR 45715 (May 23, 2024).

¹²⁶ *Id.* at n.11.

¹²⁷ See Letter from Michael Simon, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission at 9 (Oct. 28, 2019).

¹²⁸ *Id.* at 10.

¹²⁹ Securities Exchange Act Rel. No. 90405, 85 FR 73544 (Nov. 18, 2020) (the “2020 Verbal Quotes Exemption”).

¹³⁰ See, e.g., Securities Exchange Act Rel. No. 89051 (June 11, 2020), 85 FR 36631, 36633 (June 17, 2020). The straightforward reading of the Commission’s statement is that compliance with the conditions of an exemption will be measured as of the deadline for a particular FAM Period.

2020 Verbal Quotes Order was in effect and the conditions of the exemption were satisfied as of December 31, 2021, and therefore may be relied upon for purposes of determining compliance with FAM Periods 1 through 3.¹³¹

(iii) November 2023 Order

CAT LLC does not believe that the Commission's November 2, 2023 order granting relief from certain CAT NMS Plan requirements (the "November 2023 Order") affects the conclusion that FAMs 1 through 3 have been satisfied. The November 2023 Order is not relevant for purposes of FAM Periods 1 through 3, which only cover the period through December 31, 2021. As described in the November 2023 Order, the relevant exemptive orders for this time period were issued on December 16, 2020, which also states that "the Commission has determined that the Participants have sufficiently complied with the conditions set forth in the prior Orders and with the technical requirements for Quarterly Progress Reports set forth in section 6.6(c) of the CAT NMS Plan, including for purposes of determining compliance with any applicable Financial Accountability Milestones."¹³² The November 2023 Exemption Order is consistent with the Commission's repeated statements in the FAM adopting release that it would have "authority to grant exemptive relief from any requirement associated with a particular Financial Accountability Milestone," citing Section 36 of the Exchange Act and Rule 608.¹³³ Similarly, the CAT NMS Plan

expressly contemplates the Commission's ability to grant exemptive relief from any CAT NMS Plan requirement.¹³⁴

(iv) Executing Broker Reporting

CAT LLC also completed the requirements of FAM Period 2, including the required linkages, by December 31, 2020. Although Participant exchanges may report the Executing Broker to CAT differently in certain situations, these reporting differences are irrelevant for linkage purposes as the fields used for CAT Executing Broker are not used for linkage.

(10) Additional Support for Reasonableness of Historical CAT Costs

The CAT Funding Model approved by the Commission permits the recovery of reasonable costs in each of the categories of CAT costs sought to be recovered via Historical CAT Assessment 1.¹³⁵ As described in detail above and in further detail below, the CAT costs to be recovered for each category are reasonable. The following discusses in further details how each of the following costs are reasonable: (1) costs incurred prior to the effective date of the CAT NMS Plan; (2) cloud hosting services costs; (3) costs related to funding model filings; (4) costs related to litigation with the SEC regarding the CAT NMS Plan; (5) costs related to the Initial Plan Processor; (6) CAIS implementation costs; (7) public relations costs; (8) legal costs related to the limitation of liability provision in the CAT Reporter agreements; and (9) costs for the Chair of CAT Operating Committee. As discussed in detail below, each of these costs is reasonable and should be recoverable in accordance with the CAT Funding Model.

(A) Costs Incurred Prior to the Effective Date of CAT NMS Plan

CAT LLC believes that it is reasonable to seek recovery of costs incurred prior to when the CAT NMS Plan became effective in November 2016, such as legal and consulting fees incurred to

create the CAT NMS Plan. Rule 613 specifically mandates that the CAT be created, implemented and maintained, and further provides that the CAT NMS Plan include a proposed allocation of estimated costs to fund the creation, implementation and maintenance of the CAT among the Participants (referred to as "plan sponsors"), and between the Participants and Industry Members (referred to as "members of the plan sponsors").¹³⁶ Consistent with Rule 613, the CAT NMS Plan, as approved by the Commission, specifically authorizes charging Industry Members fees for costs reasonably incurred prior to the date of the approval of the CAT NMS Plan by the Commission in November 2016, including legal and consulting costs. Section 11.1(c) of the CAT NMS Plan states that:

[i]n determining fees on Participants and Industry Members the Operating Committee shall take into account fees, costs and expenses (including legal and consulting fees and expenses) reasonably incurred by Participants on behalf of the Company prior to the Effective Date in connection with the creation and implementation of the CAT.

Accordingly, the CAT NMS Plan specifically permits the recovery of costs, including legal and consulting costs, reasonably incurred prior to November 2016 in connection with the creation and implementation of the CAT.

Furthermore, the costs incurred to create and implement the CAT prior to the effective date of the CAT NMS Plan ("Pre-Formation Costs") were reasonable both in scope and amount, in accordance with the requirements of Section 11.1(c) of the CAT NMS Plan. During the four-year period from 2012 to 2016, a total of \$13,842,881 in Pre-Formation Costs were incurred. This is an average of approximately \$3.5 million per year over this period. The Pre-Formation Costs fell into three categories: legal costs, consulting costs and public relations costs. This includes legal costs of \$3,196,434; consulting costs of \$10,589,273; and public relations costs of \$57,174. The legal, consulting and public relations services were performed by WilmerHale, Deloitte and Peppercomm, respectively. The selection considerations and fees for these three firms are described in detail above and are described further below. The Pre-Formation Costs are direct costs of CAT, which have been funded entirely by the Participants through non-interest-bearing notes. The Pre-Formation Costs do not include the significant costs incurred by each of the

¹³¹ As a condition to the 2020 Verbal Quotes Exemption, the Commission required that the Participants provide a written status update on the reporting of these quotes and orders by July 31, 2022, including the estimated costs of reporting these quotes and orders and an implementation plan for the reporting of these quotes and orders. As noted, the 2020 Verbal Quotes Order was in effect and the conditions of the exemption were satisfied as of December 31, 2021, and therefore may be relied upon for purposes of determining compliance with FAM Periods 1 through 3. In any event, on June 3, 2022, the Participants provided the required written status update. See Letter from Michael Simon, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission (June 3, 2022).

¹³² *Id.* at 77129 n.12.

¹³³ FAM Adopting Release at 31335 (May 22, 2020). Section 36 of the Exchange Act grants the Commission the authority to "conditionally or unconditionally exempt any person, security, or transaction . . . from any provision or provisions of [the Exchange Act] or of any rule or regulation thereunder, to the extent that such exemption is necessary or appropriate in the public interest, and is consistent with the protection of investors." 15 U.S.C. 78mm(a)(1). Under Rule 608(e) of Regulation NMS, the Commission may "exempt from [Rule 608], either unconditionally or on specified terms and conditions, any self-regulatory organization, member thereof, or specified security, if the Commission determines that such exemption is

consistent with the public interest, the protection of investors, the maintenance of fair and orderly markets and the removal of impediments to, and perfection of the mechanism of, a national market system." 17 CFR 242.608(e).

¹³⁴ Section 12.3 of the CAT NMS Plan ("[T]o the extent the SEC grants exemptive relief applicable to any provision of this Agreement, Participants and Industry Members shall be entitled to comply with such provision pursuant to the terms of the exemptive relief so granted at the time such relief is granted irrespective of whether this Agreement has been amended.")

¹³⁵ See Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹³⁶ See, e.g., Rule 613(a)(1)(vii)(D) of the CAT NMS Plan.

individual Participants in responding to the adoption of Rule 613.

The Pre-Formation Costs are reasonable and appropriate as they reflect the extensive efforts that were necessary to create the CAT NMS Plan as mandated after the SEC's adoption of Rule 613. As described in more detail below, these efforts included, among other things, developing a plan for selecting the Plan Processor, soliciting and evaluating bids, engaging a diverse set of market participants and the SEC in the development of the Plan, interacting with the SEC in their oversight of the development of the Plan, and seeking appropriate exemptive relief to address areas of concern in Rule 613.¹³⁷

(i) Request for Proposal ("RFP")

The Participants determined to utilize an RFP to ensure that potential alternative solutions for creating the Plan could be presented and considered, and that a detailed and meaningful cost-benefit analysis could be performed. The SEC supported the use of an RFP, and approved its use as it is described in extensive detail in the CAT NMS Plan.¹³⁸

In the context of the SEC's adoption of Rule 613, commenters urged the Commission to utilize an RFP process to assist in the planning and design of the NMS plan.¹³⁹ Specifically, the Commission explained:

In this regard, several commenters suggested that the Commission undergo a RFP or request for information ("RFI") process to create and implement a consolidated audit trail. Specifically, FIF urged the Commission to perform a RFP process "to determine the best technical solution for developing a consolidated audit trail." FIF suggested that the Commission "should outline a set of goals and guiding principles they are striving to achieve as part of the adopted CAT filing and leave the determination of data elements and other technical requirements to [an] industry working group." Similarly, Direct Edge suggested that Commission staff should form and engage in a working group to develop an

RFP for publication by the Commission. DirectEdge explained that an RFP process would facilitate the identification of the costs and benefits of the audit trail, as well as the consideration of a wider range of technological solutions. Further, commenters, including Broadridge Financial Solutions, Inc., a technology provider, also requested more specific information about the audit trail system to better assess the Commission's initial cost estimates and to determine the best approach to the consolidated audit trail.¹⁴⁰

In response to these comments, the Commission modified Rule 613 to require the Participants to address certain important considerations regarding the features and details of the NMS plan and to extend the timeframe for submission of the CAT NMS Plan by the Participants from the 90 days as originally proposed to 270 days, in part, to accommodate a process that would address these considerations.¹⁴¹ As the SEC noted, "[i]n light of the numerous specific requirements of Rule 613, the Participants concluded that publication of a request for proposal ('RFP') was necessary to ensure that potential alternative solutions to creating the consolidated audit trail can be presented and considered by the Participants and that a detailed and meaningful cost/benefit analysis can be performed, both of which are required considerations to be addressed in the CAT NMS Plan."¹⁴²

The SEC specifically recognized that the Participants planned to use an RFP when it approved the Selection Plan, and stated that the RFP was a reasonable approach.¹⁴³ As the SEC described in its approval order for the Selection Plan, "[t]he Participants filed the [Selection] Plan to govern how the SROs will proceed with formulating and submitting the CAT NMS Plan—and, as part of that process, how to review, evaluate, and narrow down the bids submitted in response to the RFP ('Bids')—and ultimately choosing the plan processor that will build, operate, and maintain the consolidated audit trail ('Plan Processor')."¹⁴⁴ After evaluating the Selection Plan, including the use of an RFP process, the Commission stated that it "believes the [Selection] Plan is reasonably designed to govern the process by which the SROs will formulate and submit the CAT NMS Plan, including the review, evaluation, and narrowing down of Bids

in response to the RFP, and ultimately choosing the Plan Processor that will build, operate, and maintain the consolidated audit trail."¹⁴⁵

On February 26, 2013, the Participants published an RFP soliciting bids from parties interested in serving as the plan processor for the CAT. Initially, 31 firms submitted intentions to bid. In the following months, the Participants engaged with potential bidders with respect to, among other things, the selection process, selection criteria, and potential bidders' questions and concerns. On March 21, 2014, the Participants received ten bids in response to the RFP.

(ii) Selection Plan

On September 4, 2013, the Participants filed with the Commission a national market system plan to govern the process for Participant review of the bids submitted in response to the RFP, the procedures for evaluating the bids, and, ultimately, selection of the plan processor (the "Selection Plan").¹⁴⁶ The Commission approved the Selection Plan as filed on February 21, 2014.¹⁴⁷ In approving the Selection Plan, the Commission concluded that "it is reasonably designed to achieve its objective of facilitating the development of the CAT NMS Plan and the selection of the Plan Processor."¹⁴⁸

The Selection Plan divided the review and evaluation of bids, and the selection of the plan processor, into various stages. Specifically, pursuant to the Selection Plan, a selection committee reviewed all bids and determined which bids contained sufficient information to allow the Participants to meaningfully assess and evaluate the bids. The ten submitted bids were deemed "Qualified Bids," and so passed to the next stage, in which each bidder presented its bids to the Participants on a confidential basis. On July 1, 2014, after conducting careful analysis and comparison of the bids, the Selection Committee voted and selected a shortlist of six eligible bidders. The Selection Committee determined which shortlisted bidders would be provided the opportunity to revise their bids. After the Selection Committee assessed and evaluated the revised bids, the Selection Committee selected the plan processor via two rounds of voting by the Participants, as described in the Selection Plan.

The Selection Plan established an Operating Committee responsible for

¹³⁷ The Participants described in detail the process for drafting the CAT NMS Plan in its original filing of the CAT NMS Plan. See Letter from Mike Simon, on behalf of the Participants of the CAT NMS Plan, to Brent J. Fields, Secretary, Commission (Sept. 30, 2014). A non-exclusive list of filings and activities associated with CAT, including certain pre-2016 filings, are available on the SEC's website: <https://www.sec.gov/divisions/marketreg/rule613-info>.

¹³⁸ See detailed discussion of RFP questions in Appendix C of the CAT NMS Plan, and incorporation of RFP requirements in Appendix D at D-2.

¹³⁹ For example, in its comments on proposed Rule 613, FIF suggested "that the SROs should select the processor through a 'request for proposal.'" Rule 613 Adopting Release at 45785.

¹⁴⁷ See Selection Plan Approval Order.

¹⁴⁸ Selection Plan Approval Order at 11160.

formulating, drafting, and filing with the Commission the CAT NMS Plan and for ensuring that the Participants' joint obligations under Rule 613 were met in a timely and efficient manner. In formulating the CAT NMS Plan, the Participants also engaged multiple persons across a wide range of roles and expertise, engaged the consulting firm Deloitte as project manager, and engaged the law firm WilmerHale to serve as legal counsel in drafting the Plan. Within this structure, the Participants focused on, among other things, comparative analyses of the proposed technologies and operating models, development of funding models to support the building and operation of the CAT, and detailed review of governance considerations. Given the complexity and scope of developing the CAT NMS Plan, these efforts were extensive.

When it approved the CAT NMS Plan in 2016, the Commission reiterated its belief that the Selection Plan remains a "reasonable approach," that "the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor," and that "the process set forth in the Selection Plan should be permitted to continue":

In approving the Selection Plan, the Commission stated that the Selection Plan is reasonably designed to achieve its objective of facilitating the development of the CAT NMS Plan and the selection of the Plan Processor. The Commission also found that the Selection Plan is reasonably designed to govern the process by which the SROs will formulate and submit the CAT NMS Plan, including the review, evaluation, and narrowing down of Bids in response to the RFP, and ultimately choosing the Plan Processor that will build, operate, and maintain the consolidated audit trail. The Commission believes that the process set out in the Selection Plan for selecting a Plan Processor remains a reasonable approach, which will facilitate the selection of Plan Processor through a fair, transparent and competitive process and that no modifications to the Selection Plan are required to meet the approval standard. . . . In response to the comment that offered support for a specific Bidder, the Commission agrees with the Participants that the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor and thus believes that the process set forth in the Selection Plan should be permitted to continue.¹⁴⁹

(iii) Engagement With Market Participants and SEC

During the process of developing the CAT NMS Plan, the Participants engaged in extensive and meaningful

dialogue with market participants and the SEC. To this end, the Participants created a website to update the public on the progress of the CAT NMS Plan, published a request for comment on multiple issues related to the Plan, held multiple public events to inform the industry of the progress of the CAT and to address inquiries, and formed, and later expanded, a DAG to solicit more input from a representative industry group.¹⁵⁰

The DAG included representatives of Participants and Industry Members and conducted meetings to discuss, among other things, technical and operational aspects the Participants were considering for the Plan. The Participants issued press releases soliciting participants for the DAG, and a wide spectrum of firms was deliberately chosen to provide insight from various industry segments affected by CAT. The DAG meetings included discussions of topics such as option market maker quote reporting, requirements for capturing Customer IDs, timestamps and clock synchronization, reporting requirements for order handling scenarios, costs and funding, error handling and corrections, and potential elimination of systems made redundant by the CAT. From the inception of the DAG through September 2014, the DAG participated in 36 meetings, as well as a variety of DAG subcommittee meetings.

(iv) Request for Exemption From Certain Requirements Under Rule 613

Following multiple discussions between the Participants and both the DAG and the bidders, as well as among the Participants themselves, the Participants recognized that some provisions of Rule 613 would not permit certain solutions to be included in the Plan that the Participants, in coordination with the DAG, determined advisable to effectuate the most efficient and cost-effective CAT. Specifically, "the SROs reached the conclusion that additional flexibility in certain of the minimum requirements specified in Rule 613 would allow them to propose a more efficient and cost-effective approach without adversely affecting the reliability or accuracy of CAT Data, or its security and confidentiality."¹⁵¹ Consequently, the Participants submitted a request for exemptive relief from certain provisions of Rule 613 regarding: (1) options market maker quotes; (2) Customer-IDs; (3) CAT-

Reporter-IDs; (4) CAT-Order-IDs on allocation reports; and (5) timestamp granularity.¹⁵² The Participants filed two supplements to the request for exemptive relief.¹⁵³

After reviewing the exemptive request, the Commission determined that it was appropriate in the public interest and consistent with the protection of investors to grant the requested exemptive relief.¹⁵⁴ In granting the exemptive relief, the Commission stated:

[T]he Commission is persuaded to provide flexibility in the discrete areas discussed in the Exemption Request so that the alternative approaches can be included in the CAT NMS Plan and subject to notice and comment. Doing so could allow for more efficient and cost-effective approaches than otherwise would be permitted. The Commission at this stage is not deciding whether the proposed approaches detailed below are more efficient or effective than those in Rule 613. However, the Commission believes the proposed approaches should be within the permissible range of alternatives available to the SROs.¹⁵⁵

The Commission further stated that the requested exemptive relief is consistent with the protection of investors. The Commission noted that:

Doing so will provide the public an opportunity to consider and comment on whether these proposed alternative approaches would indeed be more efficient and cost-effective than those otherwise required by Rule 613, and whether such approaches would adversely affect the reliability or accuracy of CAT Data or otherwise undermine the goals of Rule 613. Moreover, if—as the SROs represent—efficiency gains and cost savings would result from including the proposed approaches in the CAT NMS Plan without adverse effects, then the resultant benefits could potentially flow to investors (e.g., lower broker-dealer reporting costs resulting in fewer costs passed on to Customers).¹⁵⁶

The Participants incorporated the exemptive relief into the proposed CAT NMS Plan, which was noticed for comment, and the Commission ultimately approved the CAT NMS Plan with the more efficient and cost-effective alternative approaches described in the exemptive relief. Accordingly, the Participants believe that the costs incurred in developing the exemptive request were critical to the creation of a better CAT than was

¹⁵⁰ See Section D(11) of Appendix C of the CAT NMS Plan.

¹⁵¹ Securities Exchange Rel. No. 77265 (Mar. 1, 2016), 81 FR 11856 (Mar. 7, 2016) ("2016 Exemptive Order").

¹⁴⁹ See CAT NMS Plan Approval Order at 84737.

originally contemplated by Rule 613, and therefore should be recoverable as part of Historical CAT Assessment 1.

(v) Request for Extensions for Filing the CAT NMS Plan

Rule 613(a)(1) under Regulation NMS required the Participants to jointly file the CAT NMS Plan on or before April 28, 2013, less than a year after the adoption of Rule 613. In recognition of the complexity of the project to create the CAT NMS Plan as well as industry interest in limiting or eliminating certain requirements of Rule 613 (*e.g.*, addressing the reporting of options market maker quotes), the Participants requested two extensions of the deadline to file the CAT NMS Plan. The Participants described the need for additional time as follows:

The SROs stated in their Request Letter that they do not believe that the 270-day time period provided for in Rule 613(a)(1) provides sufficient time for the development of the RFP, formulation and submission of bids, and review and evaluation of such bids. The SROs also stated that they believe additional time beyond the 270 days provided for in Rule 613(a)(1) is necessary in order to provide sufficient time for effective consultation with and input from the industry and the public on the proposed solution chosen by the SROs for the creation of the consolidated audit trail at the conclusion of the RFP process and the NMS plan itself.¹⁵⁷

In recognition of the need for additional time to refine the technical description of and requirements for the CAT and to allow for additional evaluation of the proposed cost and funding considerations, the SEC granted two extensions of this deadline.¹⁵⁸ The SEC determined that both extensions were appropriate, in the public interest, and consistent with the protection of investors.¹⁵⁹ In reaching this conclusion, the Commission stated that “it understands that the creation of a consolidated audit trail is a significant undertaking and that a proposed NMS plan must include detailed information and discussion about many things.”¹⁶⁰ The SEC also noted the following:

This additional time to complete the RFP process should allow the SROs to engage in a more thoughtful and comprehensive process for the development of an NMS plan. In this regard, the Commission notes that the

additional time to solicit comment from the industry and the public at certain key points in the development of the NMS plan could identify issues that can be resolved earlier in the development of the consolidated audit trail and prior to filing the NMS plan with the Commission.¹⁶¹

Given the Commission’s recognition of the reasonableness and value of the extension of the deadline to file the CAT NMS Plan, the Participants believe that the costs incurred in developing the extension request were important to the process of developing the CAT NMS Plan, and therefore should be recoverable as part of Historical CAT Assessment 1.

(vi) Submission and Approval of the CAT NMS Plan

After extensive analyses and discussions with the DAG, bidders, market participants and the SEC staff, the Participants finalized the draft of the CAT NMS Plan and filed the CAT NMS Plan with the SEC on September 30, 2014. Following additional discussions, the Participants filed several amendments to the CAT NMS Plan during 2015 and 2016. With these additional changes, the SEC published the CAT NMS Plan for notice and comment in May 2016.¹⁶² Following the comment period, the SEC approved the Plan in November 2016.¹⁶³

(vii) Legal Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include legal costs of \$3,196,434. The legal services were performed by WilmerHale. The selection considerations and fees for WilmerHale were described in detail above. Prior to the creation of CAT LLC, WilmerHale was engaged to represent the consortium of SROs, not the individual Participants. For administrative purposes, FINRA agreed to receive such legal bills, although such costs were shared among the Participants. Therefore, the legal costs incurred with respect to WilmerHale do not include legal costs incurred by the individual Participants. These pre-formation legal costs are described in detail above and are further described below:

- Analyzed various legal matters associated with the Selection Plan and drafted an amendment to Selection Plan;
- Assisted with the RFP and bidding process for the CAT Plan Processor;
- Analyzed legal matters related to the DAG;

- Drafted the CAT NMS Plan, analyzed various items related to the CAT NMS Plan, and responded to comment letters on the CAT NMS Plan;

- Provided legal support for the formation of the legal entity, the governance of the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.*, Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding, and Other Products) and the DAG, and governance support during the transition to the new governance structure under the CAT NMS Plan;

- Drafted exemptive requests;
- Provided interpretations related to the CAT NMS Plan;

- Provided support with regard to discussions among the exchanges, FINRA and other third parties, such as Deloitte;

- Provided tax advice with regard to CAT’s status as a tax-exempt organization; and

- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

(viii) Consulting Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include consulting costs of \$10,589,273. The consulting services were performed by Deloitte. The selection considerations and fees for Deloitte were described in detail above. Prior to the creation of CAT LLC, for administrative purposes, Deloitte was engaged by FINRA to provide consulting services related to CAT, but the costs were shared by the consortium of SROs per agreement. Therefore, the consulting costs incurred with respect to Deloitte do not include consulting costs incurred by the individual Participants. The pre-formation consulting costs include the following:

- Established and implemented program operations for the CAT project, including the program management office and workstream design;
- Assisted with the Plan Processor selection process, including but not limited to, the development of the RFP and the bidder evaluation process, and facilitation and consolidation of the Participants’ independent reviews;
- Assisted with the development and drafting of the CAT NMS Plan, including conducting cost-benefit studies, reviewing technical requirements of other NMS plans, analyzing OATS and CAT requirements, and drafting appendices to the Plan;

¹⁵⁷ Securities Exchange Act Rel. No. 69060 (Mar. 7, 2013), 78 FR 15771, 15772 (Mar. 12, 2013) (“March 2013 Exemptive Order”).

¹⁵⁸ See March 2013 Exemptive Order; Securities Exchange Act Rel. No. 71018 (Dec. 6, 2013), 78 FR 75669 (Dec. 12, 2013) (“December 2013 Exemptive Order”).

¹⁵⁹ March 2013 Exemptive Order at 15772; December 2013 Exemptive Order at 75670.

¹⁶⁰ March 2013 Exemptive Order at 15772.

¹⁶¹ *Id.* at 15773.

¹⁶² See Securities Exchange Act Rel. No. 77724 (Apr. 27, 2016), 81 FR 30614 (May 17, 2016).

¹⁶³ See CAT NMS Plan Approval Order.

- Provided governance support to the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (e.g., Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding, and Other Products) and the DAG;

- Provided support for updating the SEC on the progress of the development of the CAT;

- Provided support for industry outreach sessions, including with regard to program design and agenda development, program support and logistics and coordination; and
- Provided support in fact finding, drafting content and meeting coordination for WilmerHale with regard to the CAT and the development of the CAT NMS Plan.

Such Pre-Formation Costs did not include costs related to the Chair of the CAT NMS Plan Operating Committee, as the CAT NMS Plan had not yet been adopted.

(ix) Public Relations Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include public relations costs of \$57,174. The public relations services were performed by Peppercomm. The selection considerations and fees for Peppercomm are described in detail above. The costs related to Peppercomm were shared among the SROs. Therefore, the public relations costs do not include public relations costs incurred by the individual Participants. The pre-formation public relations costs include services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT.

(B) Cloud Hosting Services

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs related to cloud hosting services as a part of Historical CAT Assessments. CAT LLC believes that the costs related to cloud hosting services described in detail above are reasonable and appropriate given the strict data processing timelines and storage requirements imposed by the Commission-approved CAT NMS Plan

and should be recoverable as a part of Historical CAT Assessment 1.

(i) Reasonableness of AWS Costs Given the Requirements of the CAT NMS Plan

CAT LLC believes that the costs for the cloud hosting services are reasonable, both in terms of the level of the fees paid by CAT LLC for cloud hosting services provided by AWS and the scope of the services performed by AWS for CAT LLC. CAT LLC believes that both the scope and amount of the costs for cloud hosting services are reasonable given the current requirements of the CAT NMS Plan adopted pursuant to Rule 613, including the strict data processing timeline, storage and other technical requirements under the Commission-approved CAT NMS Plan.

CAT LLC believes that the level of fees for the cloud hosting services is reasonable, taking into consideration a variety of factors, including the expected volume of data and the breadth of services provided and market rates for similar services.

CAT LLC also believes that the scope of services provided by AWS for the CAT are appropriate given the current requirements of the Commission-approved CAT NMS Plan. As described above, the cloud hosting services costs reflect a variety of factors including, among other things:

- *Breadth of Cloud Activities.* AWS was engaged by FCAT, the Plan Processor, to provide a broad range of services to the CAT, including data ingestion, data management, and analytic tools. Services provided by AWS necessary to the CAT include storage services, databases, compute services, and other services (such as networking, management tools and development operations (“DevOps”) tools). AWS also was engaged to provide the various environments for CAT, such as the development, performance testing, test and production environments, which are required by the CAT NMS Plan.

- *High Data Volume.* The cost for AWS services for the CAT is a function of the volume of CAT Data. While it is not linear, the greater the amount of CAT Data, the greater the cost of AWS services to the CAT. The data volume handled by AWS now far exceeds the original volume estimates for the CAT.

- *Plan Requirements.* The cost for AWS services also reflects the technical requirements necessary to meet the stringent performance and other requirements for processing CAT Data. These Plan-dictated processing timelines, storage, testing, security and

other technical requirements are significant drivers of AWS costs.

- *Cost Avoidance Efforts.* CAT LLC and FCAT have engaged in ongoing efforts to seek to avoid and minimize AWS costs where permissible under the Plan. Accordingly, these cost avoidance efforts have limited the extent of AWS costs.

In addition, various requirements of the CAT NMS Plan adopted pursuant to Rule 613 contribute to the significant cloud hosting services costs, and that various Plan requirements could be amended or removed without affecting the regulatory purpose of the CAT. Indeed, CAT LLC has repeatedly sought exemptive relief and filed amendments to the CAT NMS Plan, and has even filed suit against the Commission, to seek to revise or eliminate certain costly requirements related to the CAT. However, despite these efforts, absent the Commission granting exemptive relief or approving cost savings amendments to the CAT NMS Plan, CAT LLC, the Participants and Industry Members are all required to comply with such requirements.

(ii) Effect of CAT Design on CAT Costs

(a) Efficient CAT Design

CAT is reasonably designed to efficiently and effectively utilize cloud computing and storage services, given the requirements of the Commission-approved CAT NMS Plan, including requirements related to security, operational reliance and quality assurance, and maintainability.

The Plan Processor uses state-of-the-art software that meets the strict security standards of the CAT NMS Plan. CAT utilizes a big data processing framework that is extensively used by large data processing companies, such as Apple, Meta, Netflix, IBM and Google. As such, it has substantial commercial support and support in the open-source community. It is also well suited for use with regard to iterative types of algorithms and query functions and analytics that the CAT requires, and it provides the heightened security necessary for the CAT.

The development and implementation of the design of CAT is not and has not been static. CAT LLC and the Plan Processor are always evaluating new innovations and service offerings from AWS and other providers to seek to maximize efficiency and cost avoidance while still satisfying the requirements of the CAT NMS Plan. These efforts have led to substantial savings to date. The cloud hosting costs for 2023 were less than the cloud hosting costs for 2022 by \$8 million despite processing seven

trillion more events in 2023 due to the efficiency and cost avoidance efforts for cloud hosting services. For example, when AWS introduced new storage options, FCAT adopted the cost-efficient new storage option after establishing that the new offering would satisfy the security and other standards of the CAT NMS Plan. This change led to millions of dollars of savings in storage costs. Similarly, when AWS introduced a new compute processor, FCAT adopted this new compute processor, which led to millions of dollars in savings in compute costs. However, in other cases, new cloud technology developments could not be implemented in CAT because they would not satisfy the security or other requirements of the CAT NMS Plan.

When evaluating the design of the CAT, it must be kept in mind that the CAT is not a typical commercial technology project. The ability to make use of technology approaches that may lead to cost avoidance is also subject to the restrictive requirements of the CAT NMS Plan, such as processing timeframes, requirements for retention of data versions, query requirements, and security standards. Because such requirements are set forth in the CAT NMS Plan, any modification of such requirements are subject to the time-consuming process of amending the CAT NMS Plan or seeking an exemption from the relevant requirement. For example, CAT LLC recently has filed an amendment to address several of these expensive Plan requirements.¹⁶⁴

(b) CAT Was Designed To Minimize Industry Member Effort

The CAT System also was designed to minimize the extent to which Industry Members would need to alter their systems to report to CAT. During the design process, Industry Member groups argued that it would make more sense financially for the CAT to accommodate differences in industry systems, than for all Industry Members to change their systems. Moreover, such design choices would facilitate consistency, uniformity and accuracy in reporting. Requiring the CAT to make such accommodations may increase CAT costs while accommodating CAT Reporters.

Based on the requirements in the CAT NMS Plan and/or in response to industry requests for functionality to be embedded with the Plan Processor to

streamline or limit Industry Member system changes, the CAT has been designed to limit the effect on Industry Members. The following provides examples of such accommodations:

- *Industry Member Reporting.* In light of the complexity of Industry Member market activity, the CAT's order reporting and linkage scenarios document for Industry Members is over 800 pages in length, addressing nearly 200 scenarios.¹⁶⁵ The Industry Member Technical Specifications allow for dozens of specific event types, which drive complexity for the Plan Processor, but streamline reporting for Industry Members. Furthermore, the Plan Processor greatly expanded Industry Member linkage requirements to support, among other things, child events and supplemental events, allowing for "stateless as-you-go" and "batch end-of-day" reporting when all data is available. Accordingly, CAT takes on the significant cost and effort of providing the required linkages between CAT events; correspondingly, Industry Members are not required to perform this costly task.

- *File Submission Process.* The CAT was designed to accommodate the varying needs of CAT Reporters with regard to the file submission process. For example, in a 2018 letter, FIF stated that "[t]he SFTP-based submission process is cumbersome, exposes industry members to unnecessary complexity, and puts the burden of support on the CAT Reporter rather than imbedding more functionality into the Plan Processor."¹⁶⁶ Currently, FCAT provides two mechanisms for submitting files: SFTP via a private network, and the Web via Reporter Web Portal.

- *Error Corrections.* The industry also emphasized the need for the CAT to provide error correction tools and functionalities to identify, rectify and re-submit corrections within the required timeframe. For example, FIF stated in a 2018 letter the following:

To be clear, if OATS-like error correction tools are not made available on Day 1, hundreds of firms will be required to create and test their own tools or obtain vendor alternatives prior to the CAT Go-Live Date. Proprietary tools will require additional system builds, access to and ingestion of CAT data to perform system validation, and testing which will further stress the limited number of subject matter experts ("SMEs") dedicated to the

implementation of CAT reporting. Should this occur, inevitably firms (especially small firms who lack the necessary IT staff to write code and develop proprietary systems), may be put in the position of passing onto investors the cost required to build hundreds of redundant systems.¹⁶⁷

CAT provides various tools to help Industry Members identify and rectify errors.

- *Data Ingestion Format.* The industry also recommended that CAT adopt a flexible input format that provides an option for Industry Members to submit data in formats that are already in use to reduce costs and potential reporting errors. For example, FIF argued the following:

FIF CAT WG is not proposing a specific format; rather, we are proposing flexibility of input formats which includes support of existing formats (e.g., OATS, FIX) as well as a baseline specification where all fields are defined, and normalized. The input formats must be clearly and thoroughly defined in Technical Specifications, including FAQs.

Mandating a uniform format for reporting data to the CAT simplifies the task for the Central Repository of consolidating/storing data, but it puts the burden on each CAT Reporter to accurately translate their current (e.g., OATS) reporting information into a uniform CAT interface. However, that is likely to yield more errors because it is very dependent on accurate, complete and timely information (Technical Specifications, FAQs, meta-data, competent CAT help desk) available to CAT Reporters, availability of sophisticated CAT test tools to validate interface protocols, and the skill levels of the estimated 300+ unique CAT Reporters/Submitters during Phase 1 of CAT. Concentrating the responsibility of data conversions with the Central Repository is a reasonable trade-off that should yield fewer errors, and greater accuracy.¹⁶⁸

CAT provides such a flexible input format.

(c) Effect of Initial Plan Processor Design

The costs for cloud hosting services are appropriate and have not been adversely affected by the original design and approaches of the Initial Plan Processor. FCAT's design costs are the result of the requirements of the Commission-approved CAT NMS Plan.

¹⁶⁴ See, e.g., Securities Exchange Act Rel. No. 99938 (Apr. 10, 2024), 89 FR 26983 (Apr. 16, 2024); Letter from Brandon Becker, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission (Mar. 27, 2024) (proposing amendments to the CAT NMS Plan for \$23 million in annual savings).

¹⁶⁵ See CAT Industry Member Reporting Scenarios v.4.10 (Oct. 21, 2022).

¹⁶⁶ Letter from Janet Early, FIF, to Thesys CAT (Mar. 29, 2018).

¹⁶⁷ Letter from Christopher Bok, FIF, to Jay Clayton, Chair, Commission, at 4 (Dec. 11, 2018).

¹⁶⁸ Letter from Mary Lou Von Kaenel, Managing Director, FIF, to Brent Fields, Secretary, Commission at 92 (July 18, 2016), <https://www.sec.gov/comments/4-698/4698-13.pdf>.

When FCAT took over as the Plan Processor from Thesys, it utilized certain aspects of the technical specifications created by Thesys in its design. However, FCAT has not maintained aspects of the original design that would not be appropriate for the CAT. FCAT revised and enhanced the original technical specifications of the CAT System to increase its efficiency and efficacy, and to ensure its compliance with the CAT NMS Plan. For example, the Initial Plan Processor's approach utilized many more fields than FCAT's approach, which relies on additional linkages. With the additional linkages, the CAT System takes on more of the CAT-related burdens than the Industry Members. Such an approach serves to facilitate consistency, uniformity and accuracy in reporting.

Moreover, FCAT did not utilize the system built by the Initial Plan Processor; it rebuilt the CAT System based on revised technical specifications. For example, the Initial Plan Processor used an on-premises processing approach which was not geared toward the huge amounts of data stored in the CAT, while FCAT adopted a cloud-based solution in response to such data demands.

Furthermore, given the very short timeframe to develop the CAT System and the prior optimization of certain query tools (e.g., Diver) for regulatory use with significant amounts of data, FCAT determined to rely upon certain existing FINRA tools and adapt them for use with the CAT.

(iii) Consideration of AWS Alternatives

CAT LLC continues to support the selection of AWS as the cloud hosting services provider for CAT given the compliance, operational, and security requirements of the CAT. Independent analyses confirm these conclusions, noting that "AWS is an excellent choice for either strategic or tactical use and recommends considering AWS for almost all cloud IaaS or IaaS+PaaS scenarios."¹⁶⁹ AWS provides the following benefits to CAT, among others:

- *Broad Suitability.* AWS has a long track record of successfully serving cloud customers with mission-critical projects.
- *Proven Scalability.* AWS has demonstrated that it is capable of building and delivering services on a large scale.
- *Track Record of Innovation.* AWS continues to rapidly innovate, both in

terms of new domains of capability and at a fundamental level, thereby facilitating innovation for its customers.

- *Resiliency/Dependability.* Another benefit of AWS is its resiliency; it has a strong track record of stable services. As noted in a review of cloud service providers, "[c]ustomers like to have a broad set of options for resilience and for their cloud providers to have a strong track record of stable services (continuously available, without operational quirks). Only AWS fulfills both desires."¹⁷⁰

- *Technical and Customer Support.* AWS consistently provides high-quality technical and customer support and engagement. Given the size, scope and regulatory importance of CAT, customer support and engagement that CAT has with the highest levels of AWS are very important to the success of the CAT.

- *Scale.* AWS is capable of supporting large-scale solutions, which is critical given the size and magnitude of the CAT.

- *Security.* AWS provides the security features necessary for the CAT.

In addition, the nature of the CAT, including the amount of data it must process and the size of its data footprint, does not allow for a multi-cloud solution as this would be cost prohibitive and greatly increase the security boundary and associated risk profile of the CAT. For example, a multi-cloud hosting option would increase costs, complexity, and risk for operations with regard to, for example, DevOps, production support, and networking. Similarly, with regard to security, a multi-cloud solution would increase risk, including with regard to the need for data transfers between cloud providers and the expansion of the security boundary. With regard to labor, a multi-cloud solution would lose economies of scale due to the need to support unique cloud requirements. Accordingly, the use of single-cloud solution continues to provide advantages with regard to cost, complexity, and risk. Indeed, "[t]he best practice is to focus on a single primary strategic provider."¹⁷¹

Furthermore, if another cloud service provider were determined to be a better match for the CAT at some future date, switching cloud service providers would be a very significant, expensive and time-consuming effort. Such an effort would likely be a 10-to-15-year commitment at a substantial expense. Such a move would require the replication or redesign of the underlying cloud environments (e.g., organizational

setup, identify management, accounts, environments, DevOps tooling likes release management/config management/network management), as the new provider likely would not have the same infrastructure and software. Once that process has been completed, an exabyte of CAT data would need to be securely migrated to the new platform.

(C) Funding Model Filings

CAT LLC believes that the recovery of costs related to the development of the funding model is appropriate, and that the amount and scope of such costs, as described above, are reasonable.

Funding the CAT is a critical aspect of Rule 613 and the CAT NMS Plan. Article XI of the CAT NMS Plan describes in detail the requirements for funding the CAT, and the Participants are required to comply with and enforce compliance with the funding requirements of the CAT NMS Plan, just as with other aspects of the Plan. Accordingly, the development and implementation of a funding model for the CAT is as much a part of the requirements of the CAT NMS Plan as the development and operation of the CAT System. CAT LLC sees no reason to distinguish the efforts to develop a funding model from, for example, efforts to develop the CAT System, in seeking to recover reasonable CAT costs.

Moreover, in approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that "the reasonably budgeted CAT costs shall include . . . legal costs."¹⁷² In addition, the CAT NMS Plan also requires Participants to include in their fee filings "a brief description of the amount and type of the Historical CAT Costs, including . . . legal . . . costs."¹⁷³ In keeping with these provisions, this filing provides a brief description of reasonably budgeted legal costs above. These legal costs include costs related to the development of the CAT Funding Model.

In addition, the legal costs incurred for the assistance in developing the CAT Funding Model are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1. As described above, the specialized services were performed by experienced counsel at negotiated rates for such services that reflect both the

¹⁶⁹ See, e.g., Lydia Leong and Adrian Wong, Solution Comparison for Strategic Cloud Integrated IaaS and PaaS Providers (July 28, 2023) ("Strategic Cloud Assessment Article").

¹⁷⁰ Strategic Cloud Assessment Article.

¹⁷¹ *Id.*

¹⁷² Section 11.1(a)(i) of the CAT NMS Plan.

¹⁷³ Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

extent of the services and market rates. Moreover, the scope of the legal costs associated with the development of the funding model reflect the complexity of the task in satisfying the detailed requirements of the CAT NMS Plan, the standards of the Exchange Act, and the many perspectives of the different market constituents potentially affected by or interested in the funding model, including Industry Members, Participants and investors. The many and varied comments by market participants on CAT funding over the years demonstrate the complexity of the task.

(D) Costs Related to Litigation With the SEC

CAT LLC believes that the recovery of legal costs related to the litigation with the SEC regarding the CAT NMS Plan is appropriate, and that the amount and scope of such costs, as described above, are reasonable.

As a preliminary matter, as discussed above, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments.¹⁷⁴ Moreover, CAT LLC initiated such litigation, and incurred the related legal costs, because it was critical to address the Commission's interpretations of the CAT NMS Plan. Among other things, such interpretations threatened to impose unnecessary costs on the CAT, which would be borne by the Participants and Industry Members. Indeed, in response to the litigation, the Commission provided exemptive relief that allowed alternative, more cost-effective approaches to the implementation of the CAT. Specifically, in the 2023 exemptive order, the Commission stated:

The conditional exemptive relief in this Order allows for the implementation of alternative regulatory solutions that continue to advance the regulatory goals that Rule 613 and the CAT NMS Plan were intended to promote, while reducing the implementation and operational costs, burdens, and/or difficulties that would otherwise be incurred by the Participants and Industry Members that must fund the CAT.¹⁷⁵

CAT LLC believes it is reasonable and appropriate to incur costs to limit the need to incur even greater costs due to certain interpretations of the Plan.

In addition, the legal costs incurred during the litigation are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1. As described above, the

specialized services were performed by experienced counsel at market rates for such services. As such, the legal costs related to this litigation incurred during the period covered by Historical CAT Assessment 1 were reasonable.

Finally, Industry Members will directly benefit from the result of the litigation because it has addressed CAT NMS Plan requirements that would have imposed significantly greater costs on the CAT. Accordingly, it is reasonable and appropriate that the costs of such litigation be included in the Historical CAT Costs 1.

(E) Costs Related to the Initial Plan Processor

CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017, which was the date by which Participants were required to begin reporting to the CAT, due to the delay in the commencement of reporting to the CAT. As discussed above, the Participants determined to exclude all CAT costs incurred from November 15, 2017 through November 15, 2018, which includes \$37,852,083 in Thesys costs incurred from November 15, 2017 through November 15, 2018 (as well as other CAT costs during this period). The remaining Thesys costs incurred after November 15, 2018 are the \$19,628,791 in capitalized developed technology costs for the period from November 16, 2018 through February 2019 incurred in the development of the CAT by the Initial Plan Processor, as well as a transition fee for the transition from the Initial Plan Processor to the successor Plan Processor. The Participants would remain responsible for 100% of these \$19,628,791 in costs.

CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017. CAT LLC notes that the development and implementation of the CAT System, while unprecedented in scope and design, is like any other large and innovative technology project in that, inevitably, there were adjustments and refinements in the technical approach as the project developed, even with substantial planning efforts and oversight prior to the build. This is even more likely when the project faces a very tight implementation schedule, such as the one imposed by the Commission in Rule 613 and the CAT NMS Plan. However, an adjusted approach does not mean that the funds were not valid expenditures and should not be recovered.

The reasonableness of Thesys costs should be evaluated by the Commission as of the time they were incurred, not in hindsight. As detailed above, the Commission concluded in 2016 that "the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor," and that "the process set forth in the Selection Plan should be permitted to continue."¹⁷⁶ Following this process, the Participants notified the Commission of the selection of Thesys as the Initial Plan Processor on January 17, 2017.¹⁷⁷ At the time, neither the Commission nor the industry argued that the selection of the Initial Plan Processor was unreasonable or otherwise inconsistent with the CAT NMS Plan, nor did they predict the selection would result in unanticipated delays in the implementation of the CAT System. On the contrary, on April 4, 2017, the President of SIFMA wrote that "SIFMA looks forward to commencing work with the SROs and Thesys."¹⁷⁸

As noted in the CAT Funding Model Approval Order, "[i]n Rule 613, the Commission made the determination that the costs of the CAT should be shared by the Participants and Industry Members."¹⁷⁹ If the CAT Funding Model had existed on Day 1, the risk of any unanticipated costs or challenges associated with the Initial Plan Processor would have been fairly and reasonably shared among the Participants and Industry Members on an ongoing basis. Given that the Commission concluded in 2012 that the costs of the CAT would be shared by the Participants and Industry Members, it is not fair or reasonable to determine in hindsight that all of the risk involved in developing the CAT should be allocated entirely to the Participants.

(F) CAIS Implementation Costs

CAT LLC believes that the recovery of CAIS-related costs is appropriate, and that the amount and scope of such costs, as described above, are reasonable, and that the reasonableness of historical costs should be evaluated by the Commission as of the time they were incurred, not in hindsight.

¹⁷⁶ CAT NMS Plan Approval Order at 84737.

¹⁷⁷ Letter from the Participants to Brent J. Fields, Secretary, SEC (Jan. 18, 2017), <https://www.sec.gov/divisions/markreg/rule613-info-notice-of-plan-processor-selection.pdf>.

¹⁷⁸ Letter from Kenneth E. Bentsen, Jr., SIFMA, to Participants re: Selection of Thesys as CAT Processor (Apr. 4, 2017), <https://www.sifma.org/wp-content/uploads/2017/05/SIFMA-Submits-Comment-Letter-to-SRO-on-the-selection-of-Thesys-as-the-CAT-Processor.pdf>.

¹⁷⁹ CAT Funding Model Approval Order at 62650.

¹⁷⁴ See Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁷⁵ Settlement Exemptive Order at 77129–30.

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable CAIS operating costs as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that “the reasonably budgeted CAT costs shall include . . . CAIS operating fees.”¹⁸⁰ In addition, the CAT NMS Plan also requires Participants to include in their fee filings “a brief description of the amount and type of the Historical CAT Costs, including . . . CAIS operating fees.”¹⁸¹ In keeping with these provisions, this filing provides a brief description of reasonably budgeted CAIS operating fees.

In addition, CAT LLC determined that the CAIS operating fees described above are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1. The “CAIS Operating Costs” for Historical CAT Assessment 1 total \$9,480,587, with Pre-FAM costs of \$2,072,908, FAM 1 costs of \$254,998, FAM 2 costs of \$1,590,298, and FAM 3 costs of \$5,562,383. As described above, the CAIS operating fees were incurred with regard to two categories of CAIS-related efforts: (1) the acceleration of the reporting of LTIDs; and (2) the development of the CAIS Technical Specifications and the building of CAIS. These two categories of costs are discussed in more detail below.

(i) LTID Reporting

During the period covered by Historical CAT Assessment 1, the CAIS operating costs included costs related to the acceleration of the reporting of LTIDs earlier than originally contemplated during this period at the request of the SEC and in accordance with exemptive relief granted by the SEC.¹⁸² As the SEC approved in this exemptive relief, the Participants proposed “to require the reporting of LTIDs to the CAT in Phases 2c and 2d, instead of with the rest of Customer Account Information in Phase 2e, which potentially could result in an earlier elimination of broker-dealer recordkeeping, reporting and monitoring requirements of the Large Trader Rule.”¹⁸³ To implement the reporting of LTIDs to the CAT, the following steps were taken during the period covered by Historical CAT Assessment 1:

- After FCAT developed the LTID Technical Specifications, the LTID

Technical Specifications were published on January 31, 2020, with additional updates provided to the LTID Technical Specifications through April 2021.¹⁸⁴

- The LTID account information testing environment opened on August 24, 2020.
- The LTID account information reporting production environment opened on December 14, 2020.
- CAT Reporters were required to request their production readiness certification for account information related to LTIDs by the deadline of April 9, 2021.
- The LTID account information reporting for Phases 2a, 2b and 2c for Large Industry Members went live on April 26, 2021.
- The LTID account information reporting for Phases 2d for Large Industry Members went live on December 13, 2021.
- The LTID account information reporting for Phases 2a, 2b, 2c and 2d for Small Industry Members went live on April 26, 2021.

Throughout this project, FCAT and CAT LLC worked closely with the industry on LTID and CAIS reporting. Between December 2019 and December 2021, at least 57 checkpoint calls, webinars, and technical working group meetings with industry representatives were hosted to address issues and to educate CAT Reporters regarding LTID and CAIS reporting.¹⁸⁵

The LTID reporting project was successfully completed in a timely fashion, and the fees related to the project were reasonable. Accordingly, CAT LLC appropriately seeks to recover such costs via Historical CAT Assessment 1.

(ii) CAIS Reporting

During the period covered by Historical CAT Assessment 1, FCAT began the development of the full CAIS Technical Specifications and the building of CAIS. The CAIS Technical Specifications were developed during this period as follows:

- Iterative drafts of the CAIS Technical Specifications were published on June 30, 2020, December 1, 2020, and January 1, 2021.¹⁸⁶

¹⁸⁴ The LTID Technical Specifications, including original drafts and updated versions, are available on the Industry Member Specifications page of the CAT website (<https://www.catnmsplan.com/specifications/im>).

¹⁸⁵ Such contact points with the industry are described in detail on the Events web page of the CAT website (<https://www.catnmsplan.com/events>).

¹⁸⁶ The CAIS Technical Specifications, including original drafts and updated versions, are available on the Industry Member Specifications page of the CAT website (<https://www.catnmsplan.com/specifications/im>).

- The full, final CAIS Technical Specifications were published on January 29, 2021.

- Updated versions of the CAIS Technical Specifications were published throughout 2021.¹⁸⁷

As discussed above, FCAT and CAT LLC frequently engaged with the industry regarding the development of CAIS, hosting regular checkpoint calls, webinars, and technical working group meetings with industry representatives to address any issues, including addressing the interplay between Industry Members’ existing customer systems and CAIS, and to educate CAT Reporters regarding LTID and CAIS reporting. Such engagement was critical to the CAIS development process as the CAIS project was unprecedented in terms of its content, scope and complexity.

During this period, FCAT also commenced the building of the CAIS system in accordance with the CAIS Technical Specifications during the period covered by Historical CAT Assessment 1. The CAIS system was ready for industry testing shortly after the end of this period in January 2022.

The CAIS Technical Specifications and the CAIS system, as developed during this period, continue to be in use today. Industry Members have been required to report, and have continuously reported, required data to CAIS on a daily basis since November 7, 2022, consistent with interim reporting obligations. The CAIS system accepts and validates the CAIS data submitted by Industry Members and provides Industry Members with initial feedback on data errors. In light of the unprecedented nature of the CAIS system, certain changes to the system, such as changes related to error corrections and the CAIS regulatory portal, were necessary to finalize CAIS reporting. FCAT worked to address these remaining issues,¹⁸⁸ and, as of May 31, 2024, FCAT indicated that it had achieved the final CAIS reporting milestone. Accordingly, CAT LLC appropriately seeks to recover CAIS operating costs via Historical CAT Assessment 1.

(G) Public Relations Costs

CAT LLC believes that the recovery of public relations costs is appropriate and that the amount and scope of such costs, as described above, are reasonable.

¹⁸⁷ Six updated versions of the CAIS Technical Specifications were published during 2021, in March, May, June, August, October and December.

¹⁸⁸ See, e.g., CAT Q4 2023 Quarterly Progress Report (Jan. 30, 2024) (<https://www.catnmsplan.com/sites/default/files/2024-01/CAT-Q4-2023-QPR.pdf>).

¹⁸⁰ Section 11.1(a)(i) of the CAT NMS Plan.

¹⁸¹ Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁸² See Phased Reporting Exemptive Relief Order at 23079–80.

¹⁸³ *Id.* at 23078–79, n.70.

The Commission has long recognized that external public relations costs are reasonably associated with creating, implementing and maintaining the CAT. In the CAT NMS Plan Approval Order, the Commission estimated that the Participants had collectively spent approximately \$2,400,000 in preparation of the CAT NMS Plan on external public relations, legal, and consulting costs, and estimated that the Participants would continue to incur external public relations costs associated with maintaining the CAT upon approval of the CAT NMS Plan.¹⁸⁹

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for public relations services as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that “the reasonably budgeted CAT costs shall include . . . public relations costs.”¹⁹⁰ In addition, the CAT NMS Plan also requires Participants to include in their fee filings “a brief description of the amount and type of the Historical CAT Costs, including . . . public relations costs.”¹⁹¹ In keeping with these provisions, a brief description of reasonable public relations costs are described above.

In addition, CAT LLC determined that the public relations costs described above are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1. The services performed by the public relations firms through 2021 were limited in scope to assist CAT LLC, which has no employees of its own, to be better positioned to understand and address CAT matters to the benefit of all market participants and to communicate on important CAT topics with the public. In addition, the costs for these services were appropriately limited. During the 10-year period covered by Historical CAT Assessment 1, the average cost per year for these services was approximately \$36,000.

(H) Legal Costs Related to the Limitation of Liability Provision in CAT Reporter Agreements

CAT LLC believes that the recovery of legal costs related to the limitation of liability provision, including costs related to the proceedings before the SEC and costs related to the proposed amendment to the Consolidated Audit Trail Reporter Agreement and the Consolidated Audit Trail Reporting

Agent Agreement (the “Reporting Agreements”) is appropriate and that the amount and scope of such costs as described above are reasonable.

As a preliminary matter, as discussed above, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments.¹⁹² In addition, CAT LLC determined that the legal costs incurred for the assistance with regard to the limitation of liability provisions are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1.

Moreover, it is critical that CAT LLC, which has no employees of its own, have the ability to fund a legal defense in litigation and other legal proceedings against it. In response to CAT LLC requiring Industry Members to agree to the limitation of liability provision to submit data to the CAT, SIFMA filed an application for review of actions taken by CAT LLC and the Participants pursuant to Sections 19(d) and 19(f) of the Exchange Act. Contemporaneously with the filing of this proceeding, SIFMA moved for a stay of the requirement that Industry Members sign a Reporter Agreement, or in the alternative, asked the Commission to further delay the launch of CAT reporting on June 22, 2020. CAT LLC must have the resources to defend itself from litigious actions by others, like these.

Although a limitation of liability provision ultimately was not adopted as proposed, it was a reasonable provision to propose for the CAT Reporter Agreements, given that such provisions are in accordance with industry norms. Limitations of liability are ubiquitous within the securities industry and have long governed the economic relationships between self-regulatory organizations and the entities that they regulate. For example, U.S. securities exchanges have adopted rules to limit their liability for losses that Industry Members incur through their use of exchange facilities.¹⁹³ Similarly, FINRA’s former order audit trail, OATS, which has functioned as an integrated audit trail of order, quote, and trade data for equity securities, required FINRA members to acknowledge an agreement that includes a limitation of liability provision.¹⁹⁴ In addition, such a

provision was intended to ensure the financial stability of the CAT. Accordingly, it was reasonable for CAT LLC to propose the use of such a provision.¹⁹⁵

Furthermore, as described above, the specialized services were performed by experienced counsel at market rates for such services. Accordingly, the legal costs for the efforts related to the limitation of liability provision were reasonable.

(I) Costs for the Chair of CAT Operating Committee

CAT LLC believes that the recovery of consulting costs related to the Chair of the CAT Operating Committee is appropriate and that the amount and scope of such costs are reasonable.

As a preliminary matter, the selection of the Chair of the Operating Committee complies with the requirements of Section 4.2 of the CAT NMS Plan. The initial Chair that served during the period covered by Historical CAT Assessment was designated by a Participant as the Participant’s alternate voting member. Accordingly, the Chair is a representative of the Participants, as required by the CAT NMS Plan.

In addition, in approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for consulting as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that “the reasonably budgeted CAT costs shall include . . . consulting . . .” costs.¹⁹⁶ In addition, the CAT NMS Plan also requires Participants to include in their fee filings “a brief description of the amount and type of the Historical CAT Costs, including . . . consulting”¹⁹⁷ costs. In keeping with these provisions, a brief description of reasonable consulting costs is included in this filing, and such reasonable consulting costs include the costs related to the Chair position.

The Participants determined that the position of the Chair was a critical role for the implementation of the CAT, and an independent Chair would appropriately consider and address the views of each of the Participants. The Participants also determined that it was important to have a Chair with a strong

terms—including its limitation of liability provision—every time they access FINRA’s OATS system to report trade information (*i.e.*, repeatedly over the course of a trading day for many Industry Members).

¹⁹⁵ See Letter from Michael Simon, Chair, CAT Operating Committee, to Vanessa Countryman, Secretary, Commission (Dec. 18, 2020).

¹⁹⁶ Section 11.1(a)(i) of the CAT NMS Plan.

¹⁹⁷ Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁸⁹ CAT NMS Plan Approval Order at 84917–18.

¹⁹⁰ Section 11.1(a)(i) of the CAT NMS Plan.

¹⁹¹ Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁹² See Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁹³ See, e.g., NASDAQ Equities Rule 4626.

¹⁹⁴ FINRA Rule 1013(a)(1)(R) requires all applicants for FINRA Membership to acknowledge the FINRA Entitlement Program Agreement and Terms of Use, which applies to OATS. Industry Members click to indicate that they agree to its

background regarding issues related to the regulatory obligations of self-regulatory organizations, including their obligations under national market system plans. The compensation paid to the Chair is appropriate for a person with such background and skills. The average annual amount paid to the Chair from 2017 through the end of FAM 3 was \$292,733.30. Separate from the Chair, CAT LLC relies upon a Leadership Team of representatives of the SROs to oversee the day-to-day implementation of the CAT NMS Plan. CAT LLC does not compensate any member of the Leadership Team.

(11) Fee Implementation Assistance for Industry Members

(A) Reconciliation of CAT Invoices

(i) Reconciliation of CAT Invoices to Underlying Trades Provided by CAT

CAT LLC understands that there are three types of reconciliation processes related to the invoices:

- *Reconciliation of CAT Invoices to Underlying Trades:* Reconciling the CAT invoice amount to the underlying trades provided by CAT;
- *Matching Trades to Books and Records:* Providing the means to match the underlying trades provided by CAT with CAT invoices to other books and records independently maintained by individual CAT Reporters (e.g., exchange trade journals/acknowledgements) and data sources of self-regulatory organizations independent of CAT; and
- *Order Originator Identification:* Providing the ability to identify the order originator for the underlying trades provided by CAT with CAT invoices, which would facilitate firms' ability to pass through CAT Fees to their customers.

As discussed further below, CAT LLC only considers the first type of process to be a "reconciliation" and the only type of process that is required under the CAT NMS Plan. CAT LLC provides the means to reconcile the CAT invoice amount to the underlying trades provided by CAT.

The CAT NMS Plan does not require CAT LLC to facilitate the second type of process: matching underlying trades for a CAT invoice with a firm's internal books and records. CAT LLC has access only to the underlying trades provided by CAT; it does not have access to a firm's internal books and records. Although beyond the requirements of the CAT NMS Plan and involving firm specific considerations, CAT LLC voluntarily has provided guidance and processes to assist CAT Reporters in their efforts to match the underlying

trades with their own books and records.

The CAT NMS Plan also does not require CAT LLC to provide the ability to identify the order originator for the underlying trades for the CAT invoices. Accordingly, the billing guidance and processes do not provide CAT Reporters with the ability to identify the order originator for the underlying trades provided by CAT with CAT invoices. CAT LLC has been working closely with CAT Reporters to explain its billing approach and to address any outstanding billing questions. But, it should not be lost that CAT LLC provides information sufficient to allow CAT Reporters to reconcile CAT invoice amounts with the underlying trades provided by CAT LLC.

(ii) Match the Underlying Trades Provided by CAT With CAT Invoices to Firms' Internal Books and Records Independent of CAT

The CAT NMS Plan does not require CAT LLC to facilitate the matching of underlying trades for a CAT invoice with a firm's internal books and records, which may consist of trading data from various sources external to CAT. Although beyond the requirements of the CAT NMS Plan and involving firm specific considerations, CAT LLC voluntarily has provided guidance and processes to assist CAT Reporters in their efforts to match the underlying trades with their own books and records.

In this regard, it is important to recognize that CAT LLC has developed a billing approach that greatly improves upon existing billing practices for similar regulatory fees (e.g., fees related to Section 31). Accordingly, with the additional information voluntarily provided by CAT LLC, CAT Reporters generally will have sufficient information to match their underlying trades provided by CAT with their own internal books and records that are independent of CAT or to SRO data that is independent of CAT data. However, CAT LLC emphasizes that providing such additional information is not required by the CAT NMS Plan.

To facilitate the introduction of CAT fees, CAT LLC has worked with FCAT to develop an approach to CAT billing that is consistent with existing billing constructs used with regard to Section 31-related sales values fees, subject to certain enhancements. Under this billing approach, FCAT is providing additional linkage elements, not necessarily provided in the Section 31-sales value fee context, to facilitate CAT Reporters' ability to match the underlying trades provided by CAT

with their internal books and records and to reduce the complexity of that process. Specifically, FCAT is providing various key elements of the trade itself, such as the tradeID and branch sequence,¹⁹⁸ to CAT Reporters in the trade billing details provided with their CAT invoices ("Additional Trade Details"). As a result, CAT Reporters now have numerous alternative methods for matching a trade with their internal books and records where they previously did not have such matching methods in other fee contexts.

With the Additional Trade Details, CAT LLC and FCAT believe that the overwhelming majority of underlying trades provided by CAT bills can be matched with a CAT Reporter's internal books and records. CAT LLC recognizes that there may be certain cases in which such matching is more difficult given various firm-specific considerations, but believes that such instances are significantly more limited than with regard to the SRO fees charged in relation to Section 31.¹⁹⁹ By providing Additional Trade Details that are not available in other fee contexts, FCAT enhances the Industry Members' ability to match the underlying trades provided with CAT invoices with books and records and SRO data, both of which are independent of CAT data.

(iii) CAT LLC Is Not Required To Facilitate CAT Reporters' Ability To Pass Through Fees to Their Customers

Similar to other regulatory fees, the CAT NMS Plan does not address the manner or extent to which CAT Executing Brokers may seek to pass any CAT fees on to their customers, nor does it impose any obligation on CAT LLC or the Plan Processor to facilitate firms' ability to do so. Accordingly, Historical CAT Assessment 1 does not address the process by which any CAT Reporters may pass through the fee to their

¹⁹⁸ See CAT Technical Specifications for Billing Trade Details; Trade Details Schema (<https://catnmsplan.com/sites/default/files/2024-02/02.05.24-Billing-Trade-Details-Schema.json>); CAT Billing Scenarios, Version 1.0 (Nov. 30, 2023) (<https://www.catnmsplan.com/sites/default/files/2024-01/01.12.2024-CAT-Billing-Scenarios-v1.0.pdf>).

¹⁹⁹ For years, broker-dealers have faced similar reconciliation issues with regard to SRO fees related to Section 31. Broker-dealers have responded to this issue in the Section 31 context by exercising their discretion as to whether and the manner and extent to which they pass on those fees (e.g., by rounding up its fees to the nearest cent, or decide to charge for, or not charge for, certain transactions, or assess a specific fee or incorporate the costs into other fee programs). See, e.g., Securities Exchange Act Rel. No. 49928 (June 28, 2004), 69 FR 41060, 41072 (July 7, 2004) (noting that broker-dealers may "over-collect" Section 31-related fees charged to their clients due to rounding practices, and double-counting with regard to certain transactions).

customers. Likewise, the CAT billing approach provided by the Plan Processor is designed to address the needs of CAT Reporters with regard to the reconciliation of CAT invoices with the underlying trades provided by CAT LLC with the invoices; they are not designed to address issues related to any pass-through fees. Accordingly, facilitating CAT Reporters' ability to pass through fees to their clients is outside the scope of this fee filing. Nevertheless, as described below, CAT LLC and the Plan Processor have expended significant efforts to provide technical assistance to Industry Members regarding the implementation of Historical CAT Assessment 1, including providing Additional Trade Details that provide significant details about each underlying trade.

(a) Originating Brokers Versus Executing Brokers

In its approval of the CAT Funding Model, the Commission approved charging CAT fees to the CAT Executing Broker, rather than the originating broker. This fee filing must comply with the requirements of the CAT Funding Model, and, therefore, charges the Historical CAT Assessment 1 to CAT Executing Brokers.

Moreover, charging originating brokers would introduce significant complexity to the billing process from the CAT's perspective, and would increase the costs of implementing CAT fees. Charging the CAT Executing Broker is simple and straightforward, and leverages a one-to-one relationship between billable events (trades) and billable parties, similar to other transaction-based fees. In contrast, for a single trade event, there may be many originating brokers, and each trade must be broken down on a pro-rata basis, to account for one or more layers of aggregation, disaggregation, and representation of the underlying orders. While CAT is indeed designed to capture and unwind complex aggregation scenarios, the data and linkages are structured to facilitate regulatory use, and not a billing mechanism that assesses fees on a distinct set of executed trades; it is not simply a matter of using existing CAT linkages. Furthermore, charging originating brokers would implicate issues related to lifecycle linkage rates, and issues related to corrections, cancellations and allocations, while charging CAT Executing Brokers would avoid such issues.

(b) Identification of Order Originator for Underlying Trades

As noted, the CAT NMS Plan does not address the manner or extent to which CAT Executing Brokers may seek to pass any CAT Fees on to their customers, nor does it impose any obligation on CAT LLC or the Plan Processor to facilitate firms' ability to do so. Nevertheless, the Additional Trade Details provided with regard to the underlying trades on CAT invoices may assist with this process. Like with Section 31-related sales value fees, however, it is not always possible to trace every fee on a transaction back to the originating party. Industry Members have faced these issues under Section 31-related sales value fees for many years.²⁰⁰ However, with the Additional Trade Details provided under the CAT billing approach, in many cases, CAT Reporters will be able to identify the order originator for the underlying trades provided by CAT with CAT invoices. In some cases, CAT LLC believes that certain issues related to certain types of market activity may implicate CAT Reporters' ability to identify the order originator for a limited set of underlying trades for the CAT invoices. Although CAT LLC does not believe that it is required to address these issues, CAT LLC and FCAT have been carefully researching and analyzing these types of issues as they are identified, and have been working voluntarily to assist CAT Reporters with these issues as necessary and when possible. In addition, CAT LLC intends to continue to provide CAT Reporters with billing guidance through FAQs, CAT Alerts and Helpdesk responses to address outstanding billing questions.

(B) Significant Technical Assistance

CAT LLC has worked with FCAT to provide significant technical assistance to Industry Members to allow the Industry Members to understand how Historical CAT Assessment 1 will be implemented and billed, including webinars, CAT alerts, mock invoices, and responses to questions posed to the FCAT Help Desk.

• *Technical Specifications and Scenarios.* CAT LLC has provided

detailed technical documentation for CAT billing, including (1) technical specifications, which describe the CAT Billing Trade Details Files associated with monthly CAT invoices, including detailed information about data elements and file formats as well as access instructions, network and transport options;²⁰¹ (2) trade details schemas;²⁰² and (3) CAT billing scenarios.²⁰³

• *Industry Webinars.* CAT LLC has hosted two industry webinars specifically dedicated to CAT billing. The first webinar, hosted on September 28, 2023, discussed the operational implementation of the CAT Reporter billing process.²⁰⁴ The second webinar, hosted on November 7, 2023, provided (1) a demonstration of the CAT Reporter Portal and how to access CAT billing documents, including CAT invoices; and (2) additional information on underlying trade details in relation to the CAT Reporter billing process and an overview of the CAT Contact Management System.²⁰⁵ 485 participants and 394 participants attended the two webinars, respectively.

• *CAT Alert.* CAT LLC has published a detailed CAT Alert that describes how FCAT, as the Plan Processor acting on behalf of CAT LLC, will calculate applicable fees, issue invoices to and collect payment from CAT Executing Brokers.²⁰⁶

• *Frequently Asked Questions (FAQs).* CAT LLC also has continued to engage with the industry on billing issues by making responses to billing FAQs available on the CAT website. The FAQs address a broad range of frequently asked questions, including, for example, which Industry Members will receive invoices, how fees are calculated, when and how fees are required to be paid, how to access invoices, and how to update the billing contact. To date, responses to 27 FAQs are available on the CAT website, and

²⁰¹ CAT Technical Specifications for Billing Trade Details, Version 1.0 r1 (Dec. 8, 2023) (https://catnmsplan.com/sites/default/files/2023-12/12.07.2023-CAT-Technical-Specifications-for-Billing-Trade-Details-v1.0r1_CLEAN.pdf).

²⁰⁶ See CAT Alert 2023-02 (Oct. 12, 2023) (<https://www.catnmsplan.com/sites/default/files/2023-10/10.12.23-CAT-Alert-2023-02.pdf>).

²⁰⁰ "FINRA charges a Regulatory Transaction Fee ("RTF") to industry members to reimburse FINRA for the Section 31 fees that FINRA pays to the Commission. FINRA does not currently provide industry members with the data that industry members require for proper reconciliation of RTF fees. This has been a major problem for the industry for many years." Letter from Howard Meyerson, Managing Director, FIF, to Robert Cook, Chief Executive Officer, FINRA at 2 (Dec. 15, 2023) (<https://fif.com/index.php/working-groups/category/271-comment-letters?download=2820:fif-letter-to-finra-on-pass-through-of-finra-cat-fees&view=category>).

CAT LLC will provide additional responses to FAQs as warranted.²⁰⁷

- **Mock Invoices.** To assist Industry Members with compliance with the commencement of Historical CAT Assessment 1, CAT LLC has been making available to CAT Executing Brokers mock invoices for Historical CAT Assessment 1 since December 2023 for billable activity occurring in November 2023. The mock invoices are in the same form as the actual, payable invoices, including both the relevant transaction data and the corresponding fee (as originally contemplated). However, no payments are required in response to such mock invoices; they are to be used solely to assist CAT Executing Brokers with the development of their processes for paying the CAT fees. Such data provides CAT Executing Brokers with a preview of the transaction data used in creating the invoices for Historical CAT Assessment 1 fees, as the data will be the same as data provided in actual invoices. Such data preview is intended to facilitate the payment of Historical CAT Assessment 1. For the November, December, and January billing periods, FCAT has generated trade detail files for 569 distinct firms that are CAT Executing Brokers. As such, CAT Reporters have actively engaged in the billing process via the mock invoices.

- **Help Desk Assistance.** CAT LLC also provides detailed, individualized assistance to Industry Members regarding CAT fees and the billing process through the FCAT Help Desk.²⁰⁸ For example, the Help Desk has assisted with 406 cases related to the billing of CAT fees from July 2023 through March 2024.

By providing such detailed and sustained assistance to Industry Members regarding CAT fees and billing, CAT LLC has successfully addressed questions raised by Industry Members regarding the CAT fees and billing processes.

(C) Ample Preparation Time

CAT LLC has provided Industry Members with ample time to comply with the implementation of Historical CAT Assessment 1. CAT LLC originally proposed issuing the first invoices for Historical CAT Assessment 1 in

December 2023 based on transactions in Eligible Securities in November 2023. In consideration of the feedback about the need for additional time to implement the new fee, CAT LLC pushed back this timeline by four months, proposing to issue the first Historical CAT Assessment 1 in April 2024 based on transactions in March 2024.²⁰⁹ This filing pushes this timeline back even further for implementing Historical CAT Assessment 1, proposing to issue the first invoices for Historical CAT Assessment 1 in November 2024 based on transactions in Eligible Securities in October 2024. Moreover, as discussed above, during these additional months, FCAT has been working closely with Industry Members to provide guidance regarding their mock bills and reconciliation efforts related thereto.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of the Exchange Act. The Exchange believes that the proposed rule change is consistent with Section 6(b)(5) of the Act,²¹⁰ which requires, among other things, that the Exchange's rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and not designed to permit unfair discrimination between customers, issuers, brokers and dealers. The Exchange also believes that the proposed rule change is consistent with the provisions of Section 6(b)(4) of the Act,²¹¹ because it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(8) of the Act,²¹² which requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. These provisions also require that the Exchange be "so organized and [have] the capacity to be able to carry out the purposes" of the Act and "to comply, and . . . to enforce compliance by its members and persons associated with its members," with the

provisions of the Exchange Act.²¹³ Accordingly, a reasonable reading of the Act indicates that it intended that regulatory funding be sufficient to permit an exchange to fulfill its statutory responsibility under the Act, and contemplated that such funding would be achieved through equitable assessments on the members, issuers, and other users of an exchange's facilities.

The Exchange believes that this proposal is consistent with the Act because it implements provisions of the Plan and is designed to assist the Exchange in meeting regulatory obligations pursuant to the Plan. In approving the Plan, the SEC noted that the Plan "is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act."²¹⁴ To the extent that this proposal implements the Plan and applies specific requirements to Industry Members, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Act.

The Exchange believes that the proposed fees paid by the CEBBs and CEBs are reasonable, equitably allocated and not unfairly discriminatory. First, the Historical CAT Assessment 1 fees to be collected are directly associated with the costs of establishing and maintaining the CAT, where such costs include Plan Processor costs and costs related to technology, legal, consulting, insurance, professional and administration, and public relations costs. The Exchange has already incurred such development and implementation costs and the proposed Historical CAT Assessment 1 fees, therefore, would allow the Exchange to collect certain of such costs in a fair and reasonable manner from Industry Members, as contemplated by the CAT NMS Plan.

The proposed Historical CAT Assessment 1 fees would be charged to Industry Members in support of the maintenance of a consolidated audit trail for regulatory purposes. The proposed fees, therefore, are consistent with the Commission's view that regulatory fees be used for regulatory purposes and not to support the Exchange's business operations. The proposed fees would not cover Exchange services unrelated to the CAT.

²⁰⁷ See CAT Billing FAQs, Section V of CAT FAQs (https://www.catnmsplan.com/faq?search_api_fulltext=&field_topics=271&sort_by=field_faq_number).

²⁰⁸ The CAT NMS Plan requires that the Plan Processor "staff a CAT help desk, as described in Appendix D, CAT Help Desk, to provide technical expertise." Section 6.10(c)(vi) of the CAT NMS Plan. See also Section 10.3 of Appendix D of the CAT NMS Plan for a description of the Plan requirements for the CAT Help Desk.

²¹² 15 U.S.C. 78f(b)(8).

²¹³ See Section 6(b)(1) of the Exchange Act.

²¹⁴ CAT NMS Plan Approval Order at 84697.

In addition, any surplus would be used as a reserve to offset future fees. Given the direct relationship between CAT fees and CAT costs, the Exchange believes that the proposed fees are reasonable, equitable and not unfairly discriminatory.

As further discussed below, the SEC approved the CAT Funding Model, finding it was reasonable and that it equitably allocates fees among Participants and Industry Members. The Exchange believes that the proposed fees adopted pursuant to the CAT Funding Model approved by the SEC are reasonable, equitably allocated and not unfairly discriminatory.

(1) Implementation of CAT Funding Model in CAT NMS Plan

Section 11.1(b) of the CAT NMS Plan states that “[t]he Participants shall file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves.” Per Section 11.1(b) of the CAT NMS Plan, the Exchange has filed this fee filing to implement the Industry Member CAT fees included in the CAT Funding Model. The Exchange believes that this proposal is consistent with the Exchange Act because it is consistent with, and implements, the CAT Funding Model in the CAT NMS Plan, and is designed to assist the Exchange and its Industry Members in meeting regulatory obligations pursuant to the CAT NMS Plan. In approving the CAT NMS Plan, the SEC noted that the Plan “is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.”²¹⁵ Similarly, in approving the CAT Funding Model, the SEC concluded that the CAT Funding Model met this standard.²¹⁶ As this proposal implements the Plan and the CAT Funding Model described therein, and applies specific requirements to Industry Members in compliance with the Plan, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Exchange Act.

(2) Calculation of Fee Rate for Historical CAT Assessment 1 Is Reasonable

The SEC has determined that the CAT Funding Model is reasonable and satisfies the requirements of the Exchange Act. Specifically, the SEC has

concluded that the method for determining Historical CAT Assessments as set forth in Section 11.3 of the CAT NMS Plan, including the formula for calculating the Historical Fee Rate, the identification of the parties responsible for payment and the transactions subject to the fee rate for the Historical CAT Assessment, is reasonable and satisfies the Exchange Act.²¹⁷ In each respect, as discussed above, Historical CAT Assessment 1 is calculated, and would be applied, in accordance with the requirements applicable to Historical CAT Assessments as set forth in the CAT NMS Plan. Furthermore, as discussed below, the Exchange believes that each of the figures for the variables in the SEC-approved formula for calculating the fee rate for Historical CAT Assessment 1 is reasonable and consistent with the Exchange Act. Calculation of the Historical Fee Rate for Historical CAT Assessment 1 requires the figures for the Historical CAT Costs 1, the executed equivalent share volume for the prior twelve months, the determination of Historical Recovery Period 1, and the projection of the executed equivalent share volume for Historical Recovery Period 1. Each of these variables is reasonable and satisfies the Exchange Act, as discussed throughout this filing.

(A) Historical CAT Costs 1

The formula for calculating a Historical Fee Rate requires the amount of Historical CAT Costs to be recovered. Specifically, Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan requires a fee filing to provide:

a brief description of the amount and type of the Historical CAT Costs, including (1) the technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees, and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration and (6) public relations costs.

In accordance with this requirement, the Exchange has set forth the amount and type of Historical CAT Costs 1 for each of these categories of costs above.

Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan also requires that the fee filing provide “sufficient detail to demonstrate that the Historical CAT Costs are reasonable and appropriate.” As discussed below, the Exchange believes that the amounts set forth in this filing for each of these cost categories is “reasonable and appropriate.” Each of the costs included in Historical CAT Costs 1 are reasonable

and appropriate because the costs are consistent with standard industry practice, based on the need to comply with the requirements of the CAT NMS Plan, incurred subject to negotiations performed on an arm’s length basis, and/or are consistent with the needs of any legal entity, particularly one with no employees.

(i) Technology: Cloud Hosting Services

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover costs related to cloud hosting services as a part of Historical CAT Assessments.²¹⁸ CAT LLC determined that the costs related to cloud hosting services described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. As described above, the cloud hosting services costs reflect, among other things, the breadth of the CAT cloud activities, data volume far in excess of the original volume estimates, the need for specialized cloud services given the volume and unique nature of the CAT, the processing time requirements of the Plan, and regular efforts to seek to minimize costs where permissible under the Plan. CAT LLC determined that use of cloud hosting services is necessary for implementation of the CAT, particularly given the substantial data volumes associated with the CAT, and that the fees for cloud hosting services negotiated by FCAT were reasonable, taking into consideration a variety of factors, including the expected volume of data and the breadth of services provided and market rates for similar services.²¹⁹ Indeed, the actual costs of the CAT are far in excess of the original estimated costs of the CAT due to various factors, including the higher volumes and greater complexity of the CAT than anticipated when Rule 613 was originally adopted.

To comply with the requirements of the Plan, the breadth of the cloud activities related to the CAT is substantial. The cloud services not only include the production environment for the CAT, but they also include two industry testing environments, support environments for quality assurance and stress testing and disaster recovery capabilities. Moreover, the cloud storage costs are driven by the requirements of the Plan, which requires the storage of multiple versions of the data, from the original submitted version of the data

²¹⁸ Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

²¹⁹ For a discussion of the amount and type of cloud hosting services fees, see Sections 3(a)(2)(B)(i)(a), 3(a)(2)(B)(ii)(a), 3(a)(2)(B)(iii)(a) and 3(a)(2)(B)(iv)(A) above.

²¹⁵ CAT NMS Plan Approval Order at 84696.

²¹⁶ CAT Funding Model Approval Order at 62686.

²¹⁷ *Id.* at 62662–63.

through various processing steps, to the final version of the data.

Data volume is a significant driver of costs for cloud hosting services. When the Commission adopted the CAT NMS Plan in 2016, it estimated that the CAT would need to receive 58 billion records per day²²⁰ and that annual operating costs for the CAT would range from \$36.5 million to \$55 million.²²¹ Through 2021, the actual data volumes have been five times that original estimate. The data volumes for each period are set forth in detail above.²²²

In addition to the effect of the data volume on the cloud hosting costs, the processing timelines set forth in the Plan contribute to the cloud hosting costs. Although CAT LLC has proactively sought to manage cloud hosting costs while complying with the Plan, including through requests to the Commission for exemptive relief and an amendment to the CAT NMS Plan, stringent CAT NMS Plan requirements do not allow for any material flexibility in cloud architecture design choices, processing timelines (*e.g.*, the use of non-peak processing windows), or lower-cost storage tiers. As a result, the required CAT processing timelines contribute to the cloud hosting costs of the CAT.

The costs for cloud hosting services also reflect the need for specialized cloud hosting services given the data volume and unique processing needs of the CAT. The data volume as well as the data processing needs of the CAT necessitate the use of cloud hosting services. The equipment, power and services required for an on-premises data model, the alternative to cloud hosting services, would be cost prohibitive. Moreover, as CAT was being developed, there were limited cloud hosting providers that could satisfy all the necessary CAT requirements, including the operational and security criteria. Over time more providers offering cloud hosting services that would satisfy these criteria have entered the market. CAT LLC will continue to evaluate alternative cloud hosting services, recognizing that the time and cost to move to an alternative cloud provider would be substantial.

The reasonableness of the cloud hosting services costs is further supported by key cost discipline mechanisms for the CAT—a cost-based funding structure, cost transparency, cost management efforts (including regular efforts to lower compute and

storage costs where permitted by the Plan) and oversight. Together, these mechanisms help ensure the ongoing reasonableness of the CAT's costs and the level of fees assessed to support those costs.²²³

(ii) Technology: Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to operating fees as a part of Historical CAT Assessments.²²⁴ CAT LLC determined that the costs related to operating fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. The operating fees include the negotiated fees paid by CAT LLC to the Plan Processor to operate and maintain the system for order-related information and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.*, management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the selection of FCAT as the Plan Processor was reasonable and appropriate given its expertise with securities regulatory reporting, after a process of considering other potential candidates.²²⁵ CAT LLC also determined that the fixed price contract, negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, was reasonable and appropriate, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity.²²⁶ The services performed by FCAT for each period and the costs related to such services are described above.²²⁷

(iii) Technology: CAIS Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to CAIS operating fees as a part of Historical CAT Assessments.²²⁸ CAT LLC determined that the costs related to CAIS operating fees described in this filing are reasonable and should be included as a part of Historical CAT

Costs 1. The CAIS operating fees include the fees paid to the Plan Processor to operate and maintain CAIS and to perform the business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.*, management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the FCAT-negotiated fees for Kingland's CAIS-related services, negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity, were reasonable and appropriate.²²⁹ The services performed by Kingland for each period and the costs for each period are described above.²³⁰

(iv) Technology: Change Request Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to change request fees as a part of Historical CAT Assessments.²³¹ CAT LLC determined that the costs related to change request fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. It is common practice to utilize a change request process to address evolving needs in technology projects. This is particularly true for a project like CAT that is the first of its kind, both in substance and in scale. The substance and costs of each of the change requests are evaluated by the Operating Committee, and approved in accordance with the requirements for Operating Committee meetings. In each case, CAT LLC determined that the change requests were necessary to implement the CAT. As described above, the change requests cover various technology changes, including, for example, changes related to CAT reporting, data feeds and exchange functionality. CAT LLC also determined that the costs for each change request were appropriate for the relevant technology change. A description of the change requests for each FAM Period and their total costs are set described above.²³² As noted above, the total costs for change requests through FAM Period 3 represent a small percentage of

²²³ See Securities Exchange Act Rel. No. 97151 (Mar. 15, 2023), 88 FR 17086, 17117 (Mar. 21, 2023) (describing key cost discipline mechanisms for the CAT).

Historical CAT Costs 1—that is, 0.25% of Historical CAT Costs 1.

(v) Capitalized Developed Technology Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to capitalized developed technology costs as a part of Historical CAT Assessments.²³³ Capitalized developed technology costs include costs related to certain development costs, costs related to certain modifications, upgrades and other changes to the CAT, CAIS implementation fees and license fees. The amount and type of costs for each period are described in more detail above.²³⁴ CAT LLC determined that these costs are reasonable and should be included as a part of Historical CAT Costs 1.

These costs involve the activity of both the Initial Plan Processor and FCAT, as the successor Plan Processor.²³⁵ With regard to the Initial Plan Processor, the Participants utilized an RFP to seek proposals to build and operate the CAT, receiving a number of proposals in response to the RFP. The Participants carefully reviewed and considered each of the proposals, including holding in-person meetings with each of the Bidders. After several rounds of review, the Participants selected the Initial Plan Processor in accordance with the CAT NMS Plan. CAT LLC entered into an agreement with the Initial Plan Processor in which CAT LLC would pay the Initial Plan Processor a negotiated, fixed price fee.²³⁶ In addition, as described above, CAT LLC determined that it is appropriate to enter into an agreement with FCAT as the successor Plan Processor.²³⁷

(vi) Legal

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to legal fees as a part of Historical CAT Assessments.²³⁸ CAT LLC determined that the legal costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Given the unique nature of the CAT, the number of parties involved with the CAT (including, for example, the SEC, Participants, Industry Members, and

vendors) and the many regulatory issues associated with the CAT, the scope of the necessary legal services are substantial. CAT LLC determined that the scope of the legal services is necessary to implement and maintain the CAT and that the legal rates reflect the specialized services necessary for such a project. When hiring each law firm for a CAT project, CAT LLC interviewed multiple firms, and determined to hire each firm based on a variety of factors, including the relevant expertise and fees. In each case, CAT LLC determined that the hourly fee rates were in line with market rates for the specialized legal expertise. In addition, CAT LLC determined that the total costs incurred for each CAT project were appropriate given the breadth of services provided. The services performed by each law firm for each period and the costs related to such services are described above.²³⁹

(vii) Consulting

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover consulting costs as a part of Historical CAT Assessments.²⁴⁰ CAT LLC determined that the consulting costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Because there are no CAT employees²⁴¹ and because of the significant number of issues associated with the CAT, the consultants provided assistance in the management of various CAT matters and the processes related to such matters.²⁴² CAT LLC considered a variety of factors in choosing a consulting firm and determined to select Deloitte after an interview process.²⁴³ CAT LLC also determined that the consulting services were provided at reasonable market rates, as the fees were negotiated annually and comparable to the rates charged by other consulting firms for similar work.²⁴⁴ Moreover, the total costs for such consulting services were appropriate in light of the breadth of services provided by Deloitte and the services performed by Deloitte and the

costs related to such services are described above.²⁴⁵

(viii) Insurance

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover insurance costs as a part of Historical CAT Assessments.²⁴⁶ CAT LLC determined that the insurance costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. CAT LLC determined that it is common practice to have directors' and officers' liability insurance, and errors and omissions liability insurance. CAT LLC further determined that it was important to have cyber security insurance given the nature of the CAT, and such a decision is consistent with the CAT NMS Plan, which states that the cyber incident response plan may include "[i]nsurance against security breaches."²⁴⁷ In selecting the insurance providers for these policies, CAT LLC engaged in an evaluation of alternative insurers, including a comparison of the pricing offered by the alternative insurers.²⁴⁸ Based on this analysis, CAT LLC determined that the selected insurance policies provided appropriate coverage at reasonable market rates.²⁴⁹

(ix) Professional and Administration

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover professional and administration costs as a part of Historical CAT Assessments.²⁵⁰ CAT LLC determined that the professional and administration costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Because there are no CAT employees, all required accounting, financial, tax, cash management and treasury functions for CAT LLC have been outsourced at market rates. In addition, the required annual financial statement audit of CAT LLC is included in professional and administration costs, which costs are also at market rates.

CAT LLC determined to hire a financial advisory firm, Anchin, to assist with financial matters for the CAT. CAT LLC interviewed Anchin as well as other potential financial advisory firms to assist with the CAT

²³³ Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

²⁴⁰ Section 11.3(b)(iii)(B)(II)(B)(3) of the CAT NMS Plan.

²⁴¹ As stated in the filing of the proposed CAT NMS Plan, "[i]t is the intent of the Participants that the Company have no employees." Securities Exchange Act Rel. No. 77724 (Apr. 27, 2016), 81 FR 30614, 30621 (May 17, 2016).

²⁴² CAT LLC uses certain third parties to perform tasks that may be performed by administrators for other NMS Plans. See, e.g., CTA Plan and CQ Plan.

²⁴³ See Section 3(a)(2)(B)(i)(g) above.

²⁴⁴ See Sections 3(a)(2)(B)(i)(g), 3(a)(2)(B)(ii)(g), 3(a)(2)(B)(iii)(g) and 3(a)(2)(B)(iv)(g) above.

²⁴⁵ *Id.*

²⁴⁶ Section 11.3(b)(iii)(B)(II)(B)(4) of the CAT NMS Plan.

²⁴⁷ Section 4.1.5 of Appendix D of the CAT NMS Plan.

²⁴⁸ See Sections 3(a)(2)(B)(i)(h), 3(a)(2)(B)(ii)(h), 3(a)(2)(B)(iii)(h) and 3(a)(2)(B)(iv)(h) above.

²⁴⁹ *Id.*

²⁵⁰ Section 11.3(b)(iii)(B)(II)(B)(5) of the CAT NMS Plan.

project, considering a variety of factors in its analysis, including the firm's relevant expertise and fees.²⁵¹ The hourly fee rates for this firm were in line with market rates for the financial advisory services provided.²⁵² Moreover, the total costs for such financial advisory services was appropriate in light of the breadth of services provided by Anchin. The services performed by Anchin and the costs related to such services are described above.²⁵³

CAT LLC also determined to engage an independent accounting firm, Grant Thornton, to complete the audit of CAT LLC's financial statements, in accordance with the requirements of the CAT NMS Plan. CAT LLC interviewed this firm as well as another potential accounting firm to audit CAT LLC's financial statements, considering a variety of factors in its analysis, including the relevant expertise and fees of each of the firms. CAT LLC determined that Grant Thornton was well-qualified for the role given the balance of these considerations.²⁵⁴ Grant Thornton's fixed fee rate compensation arrangement was reasonable and appropriate, and in line with the market rates charged for these types of accounting services.²⁵⁵ Moreover, the total costs for such financial advisory services was appropriate in light of the breadth of services provided by Grant Thornton. The services performed by Grant Thornton and the costs related to such services are described above.²⁵⁶

The professional and administrative costs also include costs related to the receipt of certain market data from Exegy. After performing an analysis of the available market data vendors to confirm that the data provided met the SIP Data requirements of the CAT NMS Plan and comparing the costs of the vendors providing the required SIP Data, CAT LLC determined to purchase market data from Exegy. Exegy provided the data elements required by the CAT NMS Plan, and the fees were reasonable and in line with market rates for the market data received.²⁵⁷

The professional and administrative costs also include costs related to a third party security assessment of the CAT performed by RSM. The assessment was designed to verify and validate the

effective design, implementation and operation of the controls specified by NIST Special Publication 800–53, Revision 4 and related standards and guidelines. Such a security assessment is in line with industry practice and important given the data included in the CAT. CAT LLC determined to engage RSM to perform the security assessment, after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fees were reasonable and in line with market rates for such an assessment.²⁵⁸

(x) Public Relations Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover public relations costs as a part of Historical CAT Assessments.²⁵⁹ CAT LLC determined that the public relations costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. CAT LLC determined that the types of public relations services utilized were beneficial to the CAT and market participants more generally. Public relations services were important for various reasons, including monitoring comments made by market participants about CAT and understanding issues related to the CAT discussed on the public record.²⁶⁰ By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT issues to the benefit of all market participants.²⁶¹ Moreover, CAT LLC determined that the rates charged for such services were in line with market rates.²⁶² As noted above, the total public relations costs through FAM Period 3 represent a small percentage of Historical CAT Costs 1—that is, 0.1% of Historical CAT Costs 1.

(B) Total Executed Equivalent Share Volume for the Prior 12 Months

The total executed equivalent share volume of transactions in Eligible Securities for the 12-month period from June 2023 through May 2024 was 3,980,753,840,905.21 executed equivalent shares. CAT LLC determined the total executed equivalent share volume for the prior twelve months by counting executed equivalent shares in the same manner as it will count executed equivalent shares for CAT billing purposes.

(C) Historical Recovery Period 1

CAT LLC has determined to establish a Historical Recovery Period of 24 months for Historical CAT Assessment 1 and that such length is reasonable. CAT LLC determined that the length of Historical Recovery Period 1 appropriately weighs the need for a reasonable Historical Fee Rate 1 that spreads the Historical CAT Costs over an appropriate amount of time and the need to repay the loans notes to the Participants in a timely fashion. CAT LLC determined that 24 months for Historical Recovery Period 1 would establish a fee rate that is lower than other transaction-based fees, including fees assessed pursuant to Section 31.²⁶³ In addition, in establishing a Historical Recovery Period of 24 months, CAT LLC recognized that the total costs for Historical CAT Assessment 1 was less than the total costs for 2022 and 2023, and therefore it would be appropriate to recover those costs in two years.

(D) Projected Executed Equivalent Share Volume for Historical Recovery Period 1

CAT LLC has determined to calculate the projected total executed equivalent share volume for the 24 months of Historical Recovery Period 1 by doubling the executed equivalent share volume for the prior 12 months. CAT LLC determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has remained relatively constant in recent years. For example, the executed equivalent share volume for 2021 was 3,963,697,612,395, the executed equivalent share volume for 2022 was 4,039,821,841,560.31, and the executed equivalent share volume for 2023 was 3,868,940,345,680.6. Accordingly, the projected total executed equivalent share volume for Historical Recovery Period 1 is projected to be 7,961,507,681,810.42 executed equivalent shares.²⁶⁴

(E) Actual Fee Rate for Historical CAT Assessment 1

(i) Decimal Places

As noted in the Plan amendment for the CAT Funding Model, as a practical matter, the fee filing for a Historical CAT Assessment would provide the exact fee per executed equivalent share to be paid for each Historical CAT Assessment, by multiplying the

²⁵¹ See Section 3(a)(2)(B)(i)(i) above.

²⁵² See Sections 3(a)(2)(B)(i)(i), 3(a)(2)(B)(ii)(i), 3(a)(2)(B)(iii)(i) and 3(a)(2)(B)(iv)(i) above.

²⁵³ *Id.*

²⁵⁴ See Section 3(a)(2)(B)(i)(i) above.

²⁵⁵ See Sections 3(a)(2)(B)(i)(i), 3(a)(2)(B)(ii)(i), 3(a)(2)(B)(iii)(i) and 3(a)(2)(B)(iv)(i) above.

²⁵⁶ *Id.*

²⁵⁷ See Section 3(a)(2)(B)(i)(i) above.

²⁵⁸ *Id.*

²⁵⁹ Section 11.3(b)(iii)(B)(III)(B)(6) of the CAT NMS Plan.

²⁶⁰ See Section 3(a)(2)(B)(i)(j) above.

²⁶¹ See Sections 3(a)(2)(B)(i)(j), 3(a)(2)(B)(ii)(j), 3(a)(2)(B)(iii)(j) and 3(a)(2)(B)(iv)(j) above.

²⁶² *Id.*

²⁶³ As the SEC noted in the CAT Funding Model Approval Order, recent Section 31 fees ranged from \$0.00009 per share to \$0.0004 per share. CAT Funding Model Approval Order at 62682.

²⁶⁴ This projection was calculated by multiplying 3,980,753,840,905.21 executed equivalent shares by two.

Historical Fee Rate by one-third and describing the relevant number of decimal places for the fee rate.²⁶⁵ Accordingly, proposed paragraph (a)(1)(B) of the fee schedule would set forth a fee rate of \$0.000013 per executed equivalent share. This fee rate is calculated by multiplying Historical Fee Rate 1 by one-third, and rounding the result to 6 decimal places. CAT LLC determined that the use of six decimal places is reasonable as it balances the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.

(ii) Reasonable Fee Level

The Exchange believes that imposing Historical CAT Assessment 1 with a fee rate of \$0.000013 per executed equivalent share is reasonable because it provides for a revenue stream for the Company that is aligned with Historical CAT Costs 1 and such costs would be spread out over an appropriate recovery period, as discussed above. Moreover, the Exchange believes that the level of the fee rate is reasonable, as it is comparable to other transaction-based fees. Indeed, Historical CAT Assessment 1 is significantly lower than fees assessed pursuant to Section 31 (e.g., \$0.0009 per share to 0.0004 per share),²⁶⁶ and, as a result, the magnitude of Historical CAT Assessment 1 is small, and therefore will mitigate any potential adverse economic effects or inefficiencies.²⁶⁷ Furthermore, the reasonable fee rate for Historical CAT Assessment 1 further supports CAT LLC's decision to seek to recover all Historical CAT Costs prior to 2022, rather than establishing separate Historical CAT Assessments for pre-FAM, FAM 1, FAM 2 and FAM 3 costs.

(3) Historical CAT Assessment 1 Provides for an Equitable Allocation of Fees

Historical CAT Assessment 1 provides for an equitable allocation of fees, as it equitably allocates CAT costs between and among the Participants and Industry Members. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfied the requirements of the Exchange Act, including the formula for calculating Historical CAT Assessments as well as the Industry Members to be charged the Historical CAT Assessments.²⁶⁸ In approving the CAT

Funding Model, the SEC stated that “[t]he Participants have sufficiently demonstrated that the proposed allocation of fees is reasonable.”²⁶⁹ Accordingly, the CAT Funding Model sets forth the requirements for allocating fees related to Historical CAT Costs among Participants and Industry Members, and the fee filings for Historical CAT Assessments must comply with those requirements.

Historical CAT Assessment 1 provides for an equitable allocation of fees as it complies with the requirements regarding the calculation of Historical CAT Assessments as set forth in the CAT NMS Plan. For example, as described above, the calculation of Historical CAT Assessment 1 complies with the formula set forth in Section 11.3(b) of the CAT NMS Plan. In addition, Historical CAT Assessment 1 would be charged to CEBBs and CEBs in accordance with Section 11.3(b) of the CAT NMS Plan. Furthermore, the Participants would continue to remain responsible for their designated share of Past CAT Costs through the cancellation of loans made by the Participants to CAT LLC.

In addition, as discussed above, each of the inputs into the calculation of Historical CAT Assessment 1—Historical CAT Costs 1 (including Excluded Costs), the count for the executed equivalent share volume for the prior 12 months, the length of the Historical Recovery Period, and the projected executed equivalent share volume for the Historical Recovery Period—are reasonable. Moreover, these inputs lead to a reasonable fee rate for Historical CAT Assessment 1 that is lower than other fee rates for transaction-based fees. A reasonable fee rate allocated in accordance with the requirements of the CAT Funding Model provides for an equitable allocation of fees.

(4) Historical CAT Assessment 1 Is Not Unfairly Discriminatory

Historical CAT Assessment 1 is not an unfairly discriminatory fee. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfied the requirements of the Exchange Act. In reaching this conclusion, the SEC analyzed the potential effect of Historical CAT Assessments calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members,

such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. Historical CAT Assessment 1 complies with the requirements regarding the calculation of Historical CAT Assessments as set forth in the CAT NMS Plan. In addition, as discussed above, each of the inputs into the calculation of Historical CAT Assessment 1 and the resulting fee rate for Historical CAT Assessment 1 is reasonable. Therefore, Historical CAT Assessment 1 does not impose an unfairly discriminatory fee on Industry Members.

Finally, the Exchange believes the proposed fees established pursuant to the CAT Funding Model promote just and equitable principles of trade, and, in general, protect investors and the public interest, and are provided in a transparent manner and specificity in the fee schedule. The Exchange also believes that the proposed fees are reasonable because they would provide ease of calculation, ease of billing and other administrative functions, and predictability of a fee based on fixed rate per executed equivalent share. Such factors are crucial to estimating a reliable revenue stream for CAT LLC and for permitting Exchange members to reasonably predict their payment obligations for budgeting purposes.

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 6(b)(8) of the Act²⁷⁰ requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that Historical CAT Assessment 1 implements provisions of the CAT NMS Plan that were approved by the Commission and is designed to assist the Exchange in meeting its regulatory obligations pursuant to the Plan.

In addition, all Participants (including exchanges and FINRA) are proposing to introduce Historical CAT Assessment 1 on behalf of CAT LLC to implement the requirements of the CAT NMS Plan. Therefore, this is not a competitive fee filing, and, therefore, it does not raise competition issues between and among the Participants.

Furthermore, in approving the CAT Funding Model, the SEC analyzed the

²⁶⁵ CAT Funding Model Approval Order at 62658, n.658.

²⁶⁶ CAT Funding Model Approval Order at 62663, 62682.

²⁶⁷ *Id.*

²⁶⁸ See Section 11.3(b) of the CAT NMS Plan.

²⁶⁹ CAT Funding Model Approval Order at 62629.

²⁷⁰ 15 U.S.C. 78f(b)(8).

potential competitive impact of the CAT Funding Model, including competitive issues related to market services, trading services and regulatory services, efficiency concerns, and capital formation.²⁷¹ The SEC also analyzed the potential effect of CAT fees calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members, such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. Based on this analysis, the SEC approved the CAT Funding Model as compliant with the Exchange Act. Historical CAT Assessment 1 is calculated and implemented in accordance with the CAT Funding Model as approved by the SEC.

As discussed above, each of the inputs into the calculation of Historical CAT Assessment 1 is reasonable and the resulting fee rate for Historical CAT Assessment 1 calculated in accordance with the CAT Funding Model is reasonable. Therefore, Historical CAT Assessment 1 would not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Exchange Act²⁷² and Rule 19b-4(f)(2) thereunder,²⁷³ because it establishes or changes a due, or fee.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend the rule change if it appears to the Commission that the action is necessary or appropriate in the public interest, for the protection of investors, or would otherwise further the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CBOEEDGA-2024-035 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to file number SR-CBOEEDGA-2024-035.

This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CBOEEDGA-2024-035 and should be submitted on or before October 4, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁷⁴

Sherry R. Haywood,
Assistant Secretary.

Securities and Exchange Commission

Self-Regulatory Organizations; Nasdaq GEMX, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Establish Fees for Industry Members Related to Certain Historical Costs of the National Market System Plan Governing the Consolidated Audit Trail; Notice

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100944; File No. SR–GEMX–2024–30]

Self-Regulatory Organizations; Nasdaq GEMX, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Establish Fees for Industry Members Related to Certain Historical Costs of the National Market System Plan Governing the Consolidated Audit Trail

September 5, 2024.

Pursuant to Section 19(b)(1) under the Securities Exchange Act of 1934 (the “Act”)¹ and Rule 19b–4 thereunder,² notice is hereby given that on August 23, 2024, Nasdaq GEMX, LLC (“GEMX” or the “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to establish fees for Industry Members³ related to certain historical costs of the National Market System Plan Governing the Consolidated Audit Trail (the “CAT NMS Plan” or “Plan”) incurred prior to January 1, 2022.

The text of the proposed rule change is available on the Exchange’s website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the

proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On July 11, 2012, the Commission adopted Rule 613 of Regulation NMS, which required the self-regulatory organizations (“SROs”) to submit a national market system (“NMS”) plan to create, implement and maintain a consolidated audit trail that would capture customer and order event information for orders in NMS securities across all markets, from the time of order inception through routing, cancellation, modification or execution.⁴ On November 15, 2016, the Commission approved the CAT NMS Plan.⁵ Under the CAT NMS Plan, the Operating Committee has the discretion to establish funding for CAT LLC to operate the CAT, including establishing fees for Industry Members to be assessed by CAT LLC that would be implemented on behalf of CAT LLC by the Participants.⁶ The Operating Committee adopted a revised funding model to fund the CAT (“CAT Funding Model”). On September 6, 2023, the Commission approved the CAT Funding Model, after concluding that the model was reasonable and that it satisfied the requirements of Section 11A of the Exchange Act and Rule 608 thereunder.⁷

The CAT Funding Model provides a framework for the recovery of the costs to create, develop and maintain the CAT, including providing a method for allocating costs to fund the CAT among Participants and Industry Members. The CAT Funding Model establishes two categories of fees: (1) CAT fees assessed by CAT LLC and payable by certain Industry Members to recover a portion of historical CAT costs previously paid by the Participants (“Historical CAT Assessment” fees); and (2) CAT fees assessed by CAT LLC and payable by Participants and Industry Members to

fund prospective CAT costs (“Prospective CAT Costs” fees).⁸

Under the CAT Funding Model, “[t]he Operating Committee will establish one or more fees (each a ‘Historical CAT Assessment’) to be payable by Industry Members with regard to CAT costs previously paid by the Participants (‘Past CAT Costs’).”⁹ In establishing a Historical CAT Assessment, the Operating Committee will determine a “Historical Recovery Period” and calculate a “Historical Fee Rate” for that Historical Recovery Period. Then, for each month in which a Historical CAT Assessment is in effect, each CEBB and CEBS would be required to pay the fee—the Historical CAT Assessment—for each transaction in Eligible Securities executed by the CEBB or CEBS from the prior month as set forth in CAT Data, where the Historical CAT Assessment for each transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Historical Fee Rate.¹⁰

Each Historical CAT Assessment to be paid by CEBBs and CEBSs is designed to contribute toward the recovery of two-thirds of the Historical CAT Costs. Because the Participants previously have paid Past CAT Costs via loans to the Company, the Participants would not be required to pay any Historical CAT Assessment. In lieu of a Historical CAT Assessment, the Participants’ one-third share of Historical CAT Costs will be paid by the cancellation of loans made by the Participants to the Company on a pro rata basis based on the outstanding loan amounts due under the loans, instead of through the payment of a CAT fee.¹¹ In addition, the Participants also will be 100% responsible for certain Excluded Costs (as discussed below).

CAT LLC proposes to charge CEBBs and CEBSs (as described in more detail

⁸ Under the CAT Funding Model, the Operating Committee may establish one or more Historical CAT Assessments. Section 11.3(b) of the CAT NMS Plan. This filing only establishes Historical CAT Assessment 1 related to certain Historical CAT Costs as described herein; it does not address any other potential Historical CAT Assessment related to other Historical CAT Costs. In addition, under the CAT Funding Model, the Operating Committee also may establish CAT Fees related to CAT costs going forward. Section 11.3(a) of the CAT NMS Plan. This filing does not address any potential CAT Fees related to CAT costs going forward. Any such other fee for any other Historical CAT Assessment or CAT Fee for Prospective CAT Costs will be subject to a separate fee filing.

⁹ Section 11.3(b) of the CAT NMS Plan.

¹⁰ In approving the CAT Funding Model, the Commission stated that, “[i]n the Commission’s view, the proposed recovery of the Past CAT Costs via the Historical CAT Assessment is reasonable.” CAT Funding Model Approval Order at 62662.

¹¹ Section 11.3(b)(ii) of the CAT NMS Plan.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

³ An “Industry Member” is defined as “a member of a national securities exchange or a member of a national securities association.” See Nasdaq Rule General 7(u) (GEMX General 7 incorporates The Nasdaq Stock Market LLC Rule General 7 by reference); See also Section 1.1 of the CAT NMS Plan. Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in the CAT NMS Plan and/or the CAT Compliance Rule. Nasdaq Rule General 7 (Consolidated Audit Trail Compliance).

⁴ Securities Exchange Act Rel. No. 67457 (July 18, 2012), 77 FR 45721 (Aug. 1, 2012) (“Rule 613 Adopting Release”).

⁵ Securities Exchange Act Rel. No. 79318 (Nov. 15, 2016), 81 FR 84696 (Nov. 23, 2016) (“CAT NMS Plan Approval Order”).

⁶ Section 11.1(b) of the CAT NMS Plan.

⁷ Securities Exchange Act Rel. No. 98290 (Sept. 6, 2023), 88 FR 62628 (Sept. 12, 2023) (“CAT Funding Model Approval Order”).

below) Historical CAT Assessment 1 to recover certain historical CAT costs incurred prior to January 1, 2022, in accordance with the CAT Funding Model. To implement this fee on behalf of CAT LLC, the CAT NMS Plan requires the Participants to “file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves, and such fees shall be labeled as ‘Consolidated Audit Trail Funding Fees.’”¹² The Plan further states that “Participants will be required to file with the SEC pursuant to Section 19(b) of the Exchange Act a filing for each Historical CAT Assessment.”¹³ Accordingly, the purpose of this filing is to implement a Historical CAT Assessment on behalf of CAT LLC for Industry Members, referred to as Historical CAT Assessment 1, in accordance with the CAT NMS Plan.¹⁴

The Exchange previously filed a fee filing to implement Historical CAT Assessment 1. On January 17, 2024, the SEC published this prior filing for

Historical CAT Assessment 1, temporarily suspended the fee filing, and instituted proceedings to determine whether to approve or disapprove the fee filing.¹⁵ The Exchange is withdrawing its original fee filing for Historical CAT Assessment 1. This Historical CAT Assessment 1 replaces the prior Historical CAT Assessment 1 that was previously filed with the Commission.

(1) CAT Executing Brokers

Historical CAT Assessment 1 will be charged to each CEBB and CEBS for each applicable transaction in Eligible Securities.¹⁶ The CAT NMS Plan defines a “CAT Executing Broker” to mean:

(a) with respect to a transaction in an Eligible Security that is executed on an exchange, the Industry Member identified as the Industry Member responsible for the order on the buy-side of the transaction and the Industry Member responsible for the sell-side of the transaction in the equity order trade event and option trade event in the CAT Data submitted to the CAT by the

relevant exchange pursuant to the Participant Technical Specifications; and (b) with respect to a transaction in an Eligible Security that is executed otherwise than on an exchange and required to be reported to an equity trade reporting facility of a registered national securities association, the Industry Member identified as the executing broker and the Industry Member identified as the contra-side executing broker in the TRF/ORF/ADF transaction data event in the CAT Data submitted to the CAT by FINRA pursuant to the Participant Technical Specifications; provided, however, in those circumstances where there is a non-Industry Member identified as the contra-side executing broker in the TRF/ORF/ADF transaction data event or no contra-side executing broker is identified in the TRF/ORF/ADF transaction data event, then the Industry Member identified as the executing broker in the TRF/ORF/ADF transaction data event would be treated as CAT Executing Broker for the Buyer and for the Seller.¹⁷

The following fields of the Participant Technical Specifications indicate the CAT Executing Brokers for the transactions executed on an exchange.

EQUITY ORDER TRADE (EOT)¹⁸

¹² Section 11.1(b) of the CAT NMS Plan.

¹³ Section 11.3(b)(iii)(B)(I) of the CAT NMS Plan.

¹⁴ Note that there may be one or more Historical CAT Assessments depending on the timing of the completion of the Financial Accountability Milestones, among other things. Section 11.3(b) of the CAT NMS Plan.

¹⁵ Securities Exchange Act Rel. No. 34–99365 (January 17, 2024), 89 FR 10278 (February 13, 2024) (“SR–GEMX–2024–02”).

¹⁶ In its approval of the CAT Funding Model, the Commission determined that charging CAT fees to CAT Executing Brokers was reasonable. In reaching this conclusion the Commission noted that the use of CAT Executing Brokers is appropriate because

the CAT Funding Model is based upon the calculation of *executed* equivalent shares, and, therefore, charging CAT Executing Brokers would reflect their executing role in each transaction. Furthermore, the Commission noted that, because CAT Executing Brokers are already identified in transaction reports from the exchanges and FINRA’s equity trade reporting facilities recorded in CAT Data, charging CAT Executing Brokers could streamline the billing process. CAT Funding Model Approval Order at 62629.

¹⁷ Section 1.1 of the CAT NMS Plan. Note that CEBBs and CEBSs may, but are not required to, pass-through their CAT fees to their clients, who may, in turn, pass their fees to their clients until

they are imposed ultimately on the account that executed the transaction. See CAT Funding Model Approval Order at 62649.

¹⁸ See Table 23, Section 4.7 (Order Trade Event) of the CAT Reporting Technical Specifications for Plan Participants, Version 4.1.0–r21 (Apr. 15, 2024), https://www.catnmsplan.com/sites/default/files/2024-04/04.15.2024-CAT_Reporting_Technical_Specifications_for_Participants_4.1.0-r21.pdf (“CAT Reporting Technical Specifications for Plan Participants”).

¹⁹ See Table 51, Section 5.2.5.1 (Simple Option Trade Event) of the CAT Reporting Technical Specifications for Plan Participants.

In addition, the following fields of the Participant Technical Specifications would indicate the CAT Executing Brokers for the transactions executed otherwise than on an exchange.

TRF/ORF/ADF TRANSACTION DATA EVENT (TRF)²⁰

No.	Field name	Data type	Description	Include key
26	reportingExecutingMpid	Member Alias	MPID of the executing party	R
28	contraExecutingMpid	Member Alias	MPID of the contra-side executing party	C

(2) Calculation of Historical Fee Rate 1

The Operating Committee determined the Historical Fee Rate to be used in calculating Historical CAT Assessment 1 (“Historical Fee Rate 1”) by dividing the Historical CAT Costs for Historical CAT Assessment 1 (“Historical CAT Costs 1”) by the projected total executed share volume of all transactions in Eligible Securities for the Historical Recovery Period for Historical CAT Assessment 1 (“Historical Recovery Period 1”), as discussed in detail below. Based on this calculation, the Operating Committee has determined that Historical Fee Rate 1 would be \$0.00003994969693072937 per executed equivalent share. This rate is then divided by three and rounded to determine the fee rate of \$0.000013 per executed equivalent share that will be assessed to CEBBs and CEBBs, as also discussed in detail below.

(A) Executed Equivalent Shares for Transactions in Eligible Securities

Under the CAT NMS Plan, for purposes of calculating each Historical CAT Assessment, executed equivalent shares in a transaction in Eligible Securities will be reasonably counted as follows: (1) each executed share for a transaction in NMS Stocks will be counted as one executed equivalent share; (2) each executed contract for a transaction in Listed Options will be counted based on the multiplier applicable to the specific Listed Options (*i.e.*, 100 executed equivalent shares or such other applicable multiplier); and

(3) each executed share for a transaction in OTC Equity Securities shall be counted as 0.01 executed equivalent share.²¹

(B) Historical CAT Costs 1

The CAT NMS Plan states that “[t]he Operating Committee will reasonably determine the Historical CAT Costs sought to be recovered by each Historical CAT Assessment, where the Historical CAT Costs will be Past CAT Costs minus Past CAT Costs reasonably excluded from Historical CAT Costs by the Operating Committee. Each Historical CAT Assessment will seek to recover from CAT Executing Brokers two-thirds of Historical CAT Costs incurred during the period covered by the Historical CAT Assessment.”²² As described in detail below, Historical CAT Costs 1 would be \$318,059,819. This figure includes Past CAT Costs of \$401,312,909 minus certain Excluded Costs of \$83,253,090. Participants collectively will remain responsible for one-third of Historical CAT Costs 1 (which is \$106,019,939.67), plus the Excluded Costs of \$83,253,090. CEBBs collectively will be responsible for one-third of Historical CAT Costs 1 (which is \$106,019,939.67), and CEBBs collectively will be responsible for one-third of Historical CAT Costs 1 (which is \$106,019,939.67).

The following describes in detail Historical CAT Costs 1 with regard to four separate historical time periods as well as Past CAT Costs excluded from Historical CAT Costs 1 (“Excluded Costs”). The following cost details are

provided in accordance with the requirement in the CAT NMS Plan to provide in the fee filing “a brief description of the amount and type of Historical CAT Costs, including (1) the technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees, and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration and (6) public relations costs.”²³ Each of the costs described below are reasonable, appropriate and necessary for the creation, implementation and maintenance of CAT.

(i) Historical CAT Costs Incurred Prior to June 22, 2020 (Pre-FAM Costs)

Historical CAT Costs 1 would include costs incurred by CAT prior to June 22, 2020 (“Pre-FAM Period”) and already funded by the Participants, excluding Excluded Costs (described further below). Historical CAT Costs 1 would include costs for the Pre-FAM Period of \$124,290,730. The Participants would remain responsible for one-third of this cost (which they have previously paid) (\$41,430,243.33), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$41,430,243.33) and CEBBs paying one-third (\$41,430,243.33). These costs do not include Excluded Costs, as discussed further below. The following table breaks down Historical CAT Costs 1 for the Pre-FAM Period into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Historical CAT costs 1 for Pre-FAM Period (Prior to June 22, 2020) *
Capitalized Developed Technology Costs **	\$51,847,150
Technology Costs	33,568,579
Cloud Hosting Services	10,268,840
Operating Fees	21,085,485
CAIS Operating Fees	2,072,908

²⁰ See Table 61, Section 6.1 (TRF/ORF/ADF Transaction Data Event) of the CAT Reporting Technical Specifications for Plan Participants.

²¹ Section 11.3(a)(i)(B) and 11.3(b)(i)(B) of the CAT NMS Plan. In approving the CAT Funding

Model, the Commission concluded that “the use of executed equivalent share volume as the basis of the proposed cost allocation methodology is reasonable and consistent with the approach taken

by the funding principles of the CAT NMS Plan.” CAT Funding Model Approval Order at 62640.

²² Section 11.3(b)(i)(C) of the CAT NMS Plan.

²³ Section 11.3(b)(iii)(B)(II)(B) of the CAT NMS Plan.

Operating expense	Historical CAT costs 1 for Pre-FAM Period (Prior to June 22, 2020) *
Change Request Fees	141,346
Legal	19,674,463
Consulting	17,013,414
Insurance	880,419
Professional and administration	1,082,036
Public relations	224,669
Total Operating Expenses	124,290,730

* The costs described in this table of costs for the Pre-FAM Period were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website. In addition, in accordance with Section 6.6(a)(i) of the CAT NMS Plan, in 2018 CAT LLC provided the SEC with "an independent audit of fees, costs, and expenses incurred by the Participants on behalf of the Company prior to the Effective Date of the Plan that will be publicly available." The audit is available on the CAT website.

** The non-cash amortization of these capitalized developed technology costs of \$2,115,545 incurred during the period prior to June 22, 2020 have been appropriately excluded from the above table.²⁴

The Pre-FAM Period includes a broad range of CAT-related activity from 2012 through June 22, 2020, including the evaluation of the requirements of SEC Rule 613, the development of the CAT NMS Plan, the evaluation and selection of the initial and successor Plan Processors, the commencement of the creation and implementation of the CAT to comply with Rule 613 and the CAT NMS Plan, including technical specifications for transaction reporting and regulatory access, and related technology and the commencement of reporting to the CAT. The following describes the costs for each of the categories for the Pre-FAM Period.

(a) Technology Costs—Cloud Hosting Services

The \$10,268,840 in technology costs for cloud hosting services represent costs incurred for services provided by the cloud services provider for the CAT, Amazon Web Services, Inc. ("AWS"), during the Pre-FAM Period.

As part of its proposal for acting as the successor Plan Processor for the CAT, FCAT selected AWS as a subcontractor to provide cloud hosting services. In 2019, after reviewing the capabilities of other cloud services providers, FCAT determined that AWS was the only cloud services provider at that time sufficiently mature and capable of providing the full suite of necessary cloud services for the CAT, including, for example, the security, resiliency and complexity necessary for the CAT computing requirements. The use of cloud hosting services is standard

for this type of high-volume data activity and reasonable and necessary for implementation of the CAT, particularly given the substantial data volumes associated with the CAT.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT the fees incurred by the Plan Processor for cloud hosting services provided by AWS as FCAT's subcontractor [*sic*] on a monthly basis for the cloud hosting services, and FCAT, in turn, pays such fees to AWS. The fees for cloud hosting services were negotiated by FCAT on an arm's length basis with the goals of managing cost and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the expected volume of data, the breadth of services provided and market rates for similar services. The fees for cloud hosting services during the Pre-FAM Period were paid to FCAT by CAT NMS, LLC²⁵ and subsequently Consolidated Audit Trail, LLC (as previously noted, both entities are referred to generally as "CAT LLC"),²⁶ and FCAT, in turn, paid AWS. CAT LLC was funded via loan contributions by the Participants.²⁷

²⁵ CAT NMS, LLC was formed by FINRA and the U.S. national securities exchanges to implement the requirements of SEC Rule 613 under the Exchange Act. SEC Rule 613 required the SROs to jointly submit to the SEC the CAT NMS Plan to create, implement and maintain the CAT. The SEC approved the CAT NMS Plan on November 15, 2016. CAT NMS Plan Approval Order.

²⁶ On August 29, 2019, the Participants formed a new Delaware limited liability company named Consolidated Audit Trail, LLC for the purpose of conducting activities related to the CAT from and after the effectiveness of the proposed amendment of the CAT NMS Plan to replace CAT NMS, LLC. See Securities Exchange Act Rel. No. 87149 (Sept. 27, 2019), 84 FR 52905 (Oct. 3, 2019).

²⁷ For each of the costs paid by CAT NMS, LLC and Consolidated Audit Trail, LLC as discussed throughout this filing, CAT NMS, LLC and Consolidated Audit Trail, LLC paid these costs via loan contributions by the Participants to CAT NMS,

AWS was engaged by FCAT to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. Services provided by AWS include storage services, databases, compute services and other services (such as networking, management tools and DevOps tools). AWS also was engaged to provide various environments for CAT, such as development, performance testing, test and production environments.

The cost for AWS services for the CAT is a function of the volume of CAT Data. The greater the amount of CAT Data, the greater the cost of AWS services to the CAT. During the Pre-FAM Period from the engagement of AWS in February 2019 through June 2020, AWS provided cloud hosting services for volumes of CAT Data far in excess of the volume predictions set forth in the CAT NMS Plan. The CAT NMS Plan states, when all CAT Reporters are submitting their data to the CAT, it "must be sized to receive[,] process and load more than 58 billion records per day,"²⁸ and that "[i]t is expected that the Central Repository will grow to more than 29 petabytes of raw, uncompressed data."²⁹ However, the volume of CAT Data for the Pre-FAM Period was far in excess of these predicted levels. By the end of this period, data submitted to the CAT included options and equities Participant Data,³⁰ Phase 2a and Phase 2b Industry Member Data³¹ (including

LLC and Consolidated Audit Trail, LLC, respectively.

²⁸ Appendix D-4 of the CAT NMS Plan at n.262.

²⁹ Appendix D-5 of the CAT NMS Plan.

³⁰ See Section 6.3(d) of the CAT NMS Plan.

³¹ See Securities Exchange Rel. No. 88702 (Apr. 20, 2020), 85 FR 23075 (Apr. 24, 2020) ("Phased Reporting Exemptive Relief Order") for a description of Phase 2a and Phase 2b Industry Member Data.

²⁴ With respect to certain costs that were "appropriately excluded," such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

certain linkages), as well as SIP Data,³² reference data and other types of Other Data.³³ The following chart provides

data regarding the average daily volume, cumulative total events, total compute

hours and storage footprint of the CAT during the Pre-FAM Period.³⁴

	Date range: 3/29/19 to 4/12/20 *	Date range: 4/13/20 to 6/21/20 **
Average Daily Volume in Billions:		
Participant—Equities	5	5
Participant—Options	80	981
Industry Member—Equities		3
Industry Member—Options		0.04
SIP—Options & Equities	64	70
Average Total Daily Volume	149	166
Cumulative Total Events for the Period	3,890	4,990
Total Compute Hours for the Period	*** N/A	5,663,247
Storage Footprint at End of Period (Petabytes)	30.57	47.96

* The Participant Equities in RSA format.

** Start of Industry Member reporting on 4/13/2020.

*** Note that, although there were compute hours during this period, data related to such compute hours are no longer available in current data.

(b) Technology Costs—Operating Fees

The \$21,085,485 in technology costs related to operating fees represent costs incurred with regard to activities of FCAT as the Plan Processor. Operating fees are those fees paid by CAT LLC to FCAT as the Plan Processor to operate and maintain the CAT and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (e.g., management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management as required by the CAT NMS Plan.

FCAT was selected to assume the role of the successor Plan Processor. Prior to this selection, the Participants engaged in discussions with two prior Bidders³⁵ for the successor Plan Processor role. The Operating Committee formed a Selection Subcommittee in accordance with Section 4.12 of the CAT NMS Plan to evaluate and review Bids and to make a recommendation to the Operating Committee with respect to the selection of the successor Plan Processor. In an April 9, 2019 letter to the Commission, the Participants described the reasons for its selection of the successor Plan Processor:

The Selection Subcommittee considered factors including, but not limited to, the following, in recommending FINRA to the Operating Committee as the successor Plan Processor:

a. FINRA's specialized technical expertise and capabilities in the area of broker-dealer technology;

b. The need to appoint a successor Plan Processor with specialized expertise to develop, implement, and maintain the CAT System in accordance with the CAT NMS Plan and SEC Rule 613;

c. FINRA's detailed proposal in response to CAT LLC's recent inquiries; and

d. FINRA's data query and analytics systems demonstration to the Participants.

Based on these and other factors, the Selection Subcommittee determined that FINRA was the most appropriate Bidder to become the successor Plan Processor.³⁶

On February 26, 2019, the Operating Committee (with FINRA recusing itself) voted to select FINRA as the successor Plan Processor pursuant to Section 6.1(t) of the CAT NMS Plan.³⁷ On March 29, 2019, CAT LLC and FCAT (a wholly owned subsidiary of FINRA) entered into a Plan Processor Agreement pursuant to which FCAT would perform the functions and duties of the Plan Processor contemplated by the CAT NMS Plan, including the management and operation of the CAT.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT a negotiated monthly fixed price for the operation of the CAT. This fixed price contract was negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity. The operating fees during the Pre-FAM Period were paid to FCAT by CAT LLC.

From March 29, 2019 (the commencement of the Plan Processor Agreement with FCAT) through June 22, 2020 (the end of the Pre-FAM Period), the Plan Processor's activities with respect to the CAT included the following:

- Commenced user acceptance testing with market data provided by Exegy Incorporated ("Exegy"), a market data provider;³⁸

- Published Technical Specifications and related reporting scenarios documents for Phase 2a, 2b and 2c reporting for Industry Members, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;

- Facilitated testing for Phase 2a and 2b reporting for Industry Members;

- Began developing Technical Specifications and related reporting scenarios documents for Phase 2d reporting for Industry Members, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;

- Published Central Repository Access Technical Specifications, and provided regulator access to test data from Industry Members;

- Facilitated Participant exchanges that support options market makers sending Quote Sent Time to the CAT;

- Facilitated the introduction of OPRA and Options NBBO Other Data to CAT;

- Addressed compliance items, including drafting CAT policies and procedures, and addressing requirements under Regulation SCI;

³² See Section 6.5(a)(ii) of the CAT NMS Plan.

³³ See Appendix C–108 of the CAT NMS Plan.

³⁴ Note that the volume data described in this table does not include CAIS data.

³⁵ The term "Bidder" is defined in Section 1.1 of the CAT NMS Plan.

³⁶ Letter from Michael J. Simon, Chair, CAT NMS, LLC Operating Committee, to Brent J. Fields, Secretary, SEC (Apr. 9, 2019), <https://www.sec.gov/divisions/marketreg/rule613-info-notice-of-plan-processor-selection-040919.pdf>.

³⁷ *Id.*

³⁸ The use of Exegy to provide market data, including the costs and market data provided, is discussed below in Section 3(a)(2)(B)(i)(i).

- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
 - Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
 - Oversaw the security of the CAT;
 - Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
 - Provided support to subcontractors under the Plan Processor Agreement;
 - Provided support in discussions with Participants, the SEC and its staff;
 - Operated the FINRA CAT Helpdesk, which is the primary source for answers to questions about CAT, including questions regarding: clock synchronization, firm reporting responsibilities, interpretive questions, technical specifications for reporting to CAT and more;
 - Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
 - Administered the CAT website and all of its content;³⁹ and
 - Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(c) Technology Costs—CAIS Operating Fees

The \$2,072,908 in technology costs related to CAIS operating fees represent the fees paid for FCAT's subcontractor charged with the development and operation of CAT's Customer and Account Information System ("CAIS"). The CAT is required under the CAT NMS Plan to capture and store Customer Identifying Information and Customer Account Information in a database separate from the transactional database and to create a CAT-Customer-ID for each Customer.

During the Pre-FAM Period, the CAIS-related services were provided by the Plan Processor through the Plan Processor's subcontractor, Kingland Systems Incorporation ("Kingland"). Kingland had experience operating in the securities regulatory technology space, and as a part of its proposal for acting as the Plan Processor for the CAT, FCAT selected Kingland as a subcontractor to provide certain CAIS-related services.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay to the Plan Processor the fees incurred

by FCAT for CAIS-related services provided by FCAT through Kingland on a monthly basis. FCAT negotiated the fees for Kingland's CAIS-related services on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity. The fees for CAIS-related services during the Pre-FAM Period were paid by CAT LLC to FCAT. FCAT, in turn, paid Kingland.

During the Pre-FAM Period, Kingland began development of the CAIS Technical Specifications and the building of CAIS. In addition, Kingland also worked on the build related to the CCID Alternative, an alternative approach to customer information that was not included in the CAT NMS Plan as originally adopted.⁴⁰ Furthermore, Kingland also worked on the acceleration of the reporting of large trader identifiers ("LTID") earlier than originally contemplated during this period, in accordance with exemptive relief granted by the SEC.⁴¹

(d) Technology Costs—Change Request Fees

The technology costs related to change request fees include costs related to certain modifications, upgrades or other changes to the CAT. Change requests are standard practice and necessary to reflect operational changes, including changes related to new market developments, such as new market participants. In general, if CAT LLC determines that a modification, upgrade or other change to the functionality or service is necessary and appropriate, CAT LLC will submit a request for such a change to the Plan Processor. The Plan Processor will then respond to the request with a proposal for implementing the change, including the cost (if any) of such a change. CAT LLC then determines whether to approve the proposed change. The change request costs were paid by CAT LLC to FCAT. During the Pre-FAM Period, CAT LLC incurred costs of \$141,346 related to change requests implemented by FCAT. Such change requests related to a development fee regarding the OPRA and SIP data feeds, and the reprocessing of certain exchange data.⁴²

⁴⁰ For a discussion of the CCID Alternative, see Securities Exchange Act Rel. No. 88393 (Mar. 17, 2020), 85 FR 16152 (Mar. 20, 2020).

⁴¹ Phased Reporting Exemptive Relief Order at 23079–80.

⁴² Note that CAT LLC also has incurred costs related to specific Industry Members (e.g., reprocessing costs related to Industry Member reporting errors).

(e) Technology Costs—Capitalized Developed Technology Costs

This category of costs includes capitalizable application development costs incurred in the development of the CAT. The capitalized developed technology costs for the Pre-FAM Period of \$51,847,150 relate to technology provided by the Initial Plan Processor and the successor Plan Processor.

Initial Plan Processor: Thesys CAT, LLC. The capitalized developed technology costs related to the Initial Plan Processor include costs incurred with regard to testing for Participant reporting, Participant reporting to the CAT, a security assessment of the CAT, and the development of the billing function for the CAT.

On January 17, 2017, the Selection Committee of the CAT NMS Plan selected the Initial Plan Processor, Thesys Technologies, LLC, for the CAT NMS Plan pursuant to Article V of the CAT NMS Plan.⁴³ The Participants utilized a request for proposal ("RFP") to seek proposals to build and operate the CAT, receiving a number of proposals in response to the RFP. The Participants carefully reviewed and considered each of the proposals, including holding in-person meetings with each of the Bidders. After several rounds of review, the Participants selected the Initial Plan Processor in accordance with the CAT NMS Plan, taking into consideration that the Initial Plan Processor had experience operating in the securities regulatory technology space, among other considerations. On April 6, 2017, CAT LLC entered into an agreement with Thesys CAT LLC ("Thesys CAT"), a Thesys affiliate, to perform the functions and duties of the Plan Processor contemplated by the CAT NMS Plan, including the management and operation of the CAT. Under the agreement, CAT LLC would pay Thesys CAT a negotiated, fixed price fee for its role as the Initial Plan Processor. Effective January 30, 2019, the Plan Processor Agreement with Thesys CAT was terminated, and FCAT was subsequently selected as the successor Plan Processor.

From January 17, 2017 through January 30, 2019, the time in which the Thesys CAT was engaged for the CAT, but excluding the period from November 15, 2017 through January 30, 2019, the Initial Plan Processor engaged in various activities with respect to the CAT, including preparing iterative drafts of Participant Technical

⁴³ Letter from the Participants to Brent J. Fields, Secretary, SEC (Jan. 18, 2017), <https://www.sec.gov/divisions/marketreg/rule613-info-notice-of-plan-processor-selection.pdf>.

³⁹ The CAT website is <https://www.catnmsplan.com>.

Specifications, Industry Member Technical Specifications and the Central Repository Access Technical Specifications. In addition, Thesys CAT also developed CAT technology, addressed compliance items, including drafting CAT policies and procedures, addressing Regulation SCI requirements, establishing a CAT Compliance Officer and a Chief Information Security Officer, addressed security-related matters for the CAT, and worked towards the initiation of Participant reporting per the Participant Technical Specifications.

Successor Plan Processor: FCAT. The capitalized developed technology costs related to FCAT include: (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, including the completion of go-live functionality related to options ingestion and validation, equities regulatory services agreement query tool updates and unlinked options data query, options linkages release, Industry Member Phase 2a file submission and data integrity (including error corrections), and Industry Member testing, including reporting relationships, ATS order type management, basic reporting statistics, SFTP data integrity feedback and error correction; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including a one-time development fee for a secure analytics workspace, a one-time development fee of an Industry Member connectivity solution, and a one-time development fee for the acceleration of multi-factor authentication; (3) CAIS implementation fees; and (4) license fees.

(f) Legal Costs

The legal costs of \$19,674,463 represent the fees paid for legal services provided by two law firms, Wilmer Cutler Pickering Hale and Dorr LLP ("WilmerHale") and Pillsbury Winthrop Shaw Pittman LLP ("Pillsbury"), during the Pre-FAM Period. The legal costs exclude those costs incurred from November 15, 2017 through November 15, 2018.

Law Firm: WilmerHale. Following the adoption of Rule 613, the Participants determined it was necessary to engage external legal counsel to advise the Participants with respect to corporate and regulatory legal matters related to the CAT, including drafting and developing the CAT NMS Plan. The Participants considered a variety of

factors in their analysis of prospective law firms, including (1) the firm's qualifications, resources and expertise; (2) the firm's relevant experience and understanding of the regulatory matters raised by the CAT and in advising on matters of similar scope; (3) the composition of the legal team; and (4) professional fees. Following a series of interviews, the Participants acting as a consortium determined that WilmerHale was well qualified given the balance of these considerations and engaged WilmerHale in February 2013.

WilmerHale's billing rates are negotiated on an annual basis and are determined with reference to the rates charged by other leading law firms for similar work. The Participants assess WilmerHale's performance and review prospective budgets and staffing plans submitted by WilmerHale on an annual basis. WilmerHale's compensation arrangements are reasonable and appropriate, and in line with the rates charged by other leading law firms for similar work.

The legal costs for WilmerHale during the Pre-FAM Period included costs incurred from 2013 until June 22, 2020 to address corporate and regulatory legal matters related to the CAT. The legal fees for this law firm during the period from February 2013 until the formation of the CAT NMS, LLC on November 15, 2016 were paid directly by the exchanges and FINRA to WilmerHale. After the formation of CAT NMS LLC, the legal fees were paid by CAT LLC to WilmerHale.

After WilmerHale was engaged in 2013 through the end of the Pre-FAM Period on June 22, 2020 (excluding the legal costs from November 15, 2017 through November 15, 2018), WilmerHale provided legal assistance to the CAT on a variety of matters, including with regard to the following:

- Analyzed various legal matters associated with the Selection Plan, and drafted an amendment to the Selection Plan;
- Assisted with the RFP and bidding process for the CAT Plan Processor;
- Analyzed legal matters related to the Development Advisory Group ("DAG");
- Drafted the CAT NMS Plan, analyzed various items related to the CAT NMS Plan, and responded to comment letters on CAT NMS Plan;
- Provided legal support for the formation of the legal entity, the governance of the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (e.g., Joint

Subcommittee Group, Technical, Industry Outreach, Cost and Funding and Other Products) and the DAG, governance support during the transition to the new governance structure under the CAT NMS Plan, and governance support after the adoption of the CAT NMS Plan, which involved support for the Operating Committee, Advisory Committee, Compliance Subcommittee and CAT working groups;

- Assisted with the development of the CAT funding model and drafted related amendments of the CAT NMS Plan and related filings;
- Negotiated and drafted the plan processor agreements with the Initial Plan Processor and the successor Plan Processor;
- Provided assistance with compliance with Regulation SCI;
- Assisted with clock synchronization study;
- Provided assistance with respect to the establishment of CAT security;
- Drafted exemptive requests from CAT NMS Plan requirements, including with regard to options market maker quotes, Customer IDs, CAT Reporter IDs, linking allocations to executions, CAT reporting timeline, FDIDs, customer and account information, timestamp granularity, small industry members, data facility reporting and linkage, allocation reports, SRO-assigned market participant identifiers and cancelled trade indicators, thereby seeking to implement changes that would be cost effective and benefit Industry Members and Participants;
- Assisted with the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Provided advice regarding CAT policies and procedures;
- Analyzed the SEC's amendment of the CAT NMS Plan regarding financial accountability;
- Provided interpretations of and related to the CAT NMS Plan;
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues; and
- Assisted with third-party vendor agreements.

Law Firm: Pillsbury. The legal costs for CAT during the Pre-FAM Period include costs related to the legal services performed by Pillsbury. The Participants interviewed this law firm as well as other potential law firms to provide legal assistance regarding certain liability matters. After considering a variety of factors in its analysis, including the relevant expertise and fees of the firm, CAT LLC

determined to hire Pillsbury in April 2019. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees were paid by CAT LLC to Pillsbury. The legal costs for Pillsbury during the Pre-FAM Period included costs incurred from April 2019 until June 22, 2020 to address legal matters regarding the agreements between CAT Reporters and CAT LLC concerning certain terms associated with CAT Reporting (the "Reporter Agreement"). During that period, Pillsbury advised CAT LLC regarding applicable legal matters, participated in negotiations between the Participants and Industry Members, participated in meetings with senior SEC staff, the Chairman, and Commissioners, represented CAT LLC and the Participants in an SEC administrative proceeding, and drafted a proposed amendment to the CAT NMS Plan regarding liability matters. Liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants. Moreover, litigation involving CAT LLC is an expense of operating the CAT, and, therefore, is appropriately an obligation of both Participants and Industry Members under the CAT Funding Model.

(g) Consulting Costs

The consulting costs of \$17,013,414 represent the fees paid to the consulting firm Deloitte & Touche LLP ("Deloitte") as project manager during the Pre-FAM Period, from October 2012 until June 22, 2020. These consulting costs include costs for advisory services related to the operation of the CAT, and meeting facilitation and communications coordination, vendor support and financial analyses.

To help facilitate project management given the unprecedented complexity and scope of the CAT project, the Participants determined it was necessary to engage a consulting firm to assist with the CAT project in 2012, following the adoption of Rule 613. A variety of factors were considered in the analysis of prospective consulting firms, including (1) the firm's qualifications, resources, and expertise; (2) the firm's relevant experience and understanding of the regulatory issues raised by the CAT and in coordinating matters of similar scope; (3) the composition of the consulting team; and (4) professional fees. Following a series of interviews, the exchanges and FINRA as a consortium determined that Deloitte was well qualified given the balance of

these considerations and engaged Deloitte on October 1, 2012.

Deloitte's fee rates are negotiated on an annual basis and are in line with market rates for this type of specialized consulting work. CAT LLC assesses Deloitte's performance and reviews prospective budgets and staffing plans submitted by Deloitte on an annual basis. Deloitte's compensation arrangements are reasonable and appropriate, and in line with the rates charged by other leading consulting firms for similar work.

The consulting costs for CAT during the period from 2012 until the formation of the CAT NMS, LLC were paid directly by the Participants to Deloitte. After the formation of CAT NMS, LLC, the consulting fees were paid by CAT LLC to Deloitte. CAT LLC reviewed the consulting fees each month and approved the invoices.

After Deloitte was hired in 2012 through the end of the Pre-FAM Period on June 22, 2020 (excluding the consulting costs from November 15, 2017 through November 15, 2018), Deloitte provided a variety of consulting services, including the following:

- Established and implemented program operations for the CAT project, including the program management [*sic*] office and workstream design;
- Assisted with the Plan Processor selection process, including but not limited to, the development of the RFP and the bidder evaluation process, and facilitation and consolidation of the Participant's independent reviews;
- Assisted with the development and drafting of the CAT NMS Plan, including conducting cost-benefit studies, analyzing OATS and CAT requirements, and drafting appendices to the Plan;
- Assisted with cost and funding-related activities for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided governance support to the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.*, Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding and Other Products) and the DAG, governance support during the transition to the new governance structure under the CAT NMS Plan and governance support after the adoption of the CAT NMS Plan, which involved support for the Operating Committee, Advisory Committee, Compliance Subcommittee and CAT working groups;

- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;

- Assisted with industry outreach and communications regarding the CAT, including assistance with industry outreach events, the development of the CAT website, frequently asked questions, and coordinating with the CAT LLC's public relations firm;

- Provided support for updating the SEC on the progress of the development of the CAT;

- Provided active planning and coordination with and support for the Initial Plan Processor with regard to the development of the CAT, and reported to the Participants on the progress;

- Coordinated efforts regarding the selection of the successor Plan Processor;

- Assisted with the transition from the Initial Plan Processor to the successor Plan Processor, including support for the Operating Committee and successor Plan Processor for the new role; and

- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(h) Insurance

The insurance costs of \$880,419 represent the cost incurred for insurance for CAT during the Pre-FAM Period. Commencing in 2020, CAT LLC performed an evaluation of various potential alternatives for CAT insurance policies, which included engaging in discussions with different insurance companies and conducting cost comparisons of various alternative approaches to insurance. Based on an analysis of a variety of factors, including coverage and premiums, CAT LLC determined to purchase cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance from USI Insurance Services LLC ("USI"). Such policies are standard for corporate entities, and cyber security liability insurance is important for the CAT System. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(i) Professional and Administration Costs

In adopting the CAT NMS Plan, the Commission amended the Plan to add a requirement that CAT LLC's financial

statements be prepared in compliance with GAAP, audited by an independent public accounting firm, and made publicly available.⁴⁴ The professional and administration costs include costs related to accounting and accounting advisory services to support the operating and financial functions of CAT, financial statement audit services by an independent accounting firm, preparation of tax returns, and various cash management and treasury functions. In addition, professional and administration costs for the Pre-FAM Period include costs related to the receipt of market data and a security assessment. The costs for these professional and administration services were \$1,082,036 for the Pre-FAM Period.

Financial Advisory Firm: Anchin Accountants & Advisors ("Anchin"). CAT LLC determined to hire a financial advisory firm, Anchin, to assist with financial matters for the CAT in April 2018. CAT LLC interviewed Anchin as well as other potential financial advisory firms to assist with the CAT project, considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The hourly fee rates for this firm were in line with market rates for these financial advisory services. The fees for these services were paid by CAT LLC to Anchin.

After Anchin was hired in April 2018 through the end of the Pre-FAM Period on June 22, 2020 (excluding the period from April 2018 through November 15, 2018), Anchin provided a variety of services, including the following:

- Developed, updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Addressed accounting and financial reporting matters relating to the transition from CAT NMS, LLC to Consolidated Audit Trail, LLC,

including supporting the dissolution of CAT NMS, LLC;

- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

Accounting Firm: Grant Thornton LLP ("Grant Thornton"). In February 2020, CAT LLC determined to engage an independent accounting firm, Grant Thornton, to complete the audit of CAT LLC's financial statements, in accordance with the requirements of the CAT NMS Plan. CAT LLC interviewed this firm as well as another potential accounting firm to audit CAT LLC's financial statements, considering a variety of factors in its analysis, including the relevant expertise and fees of each of the firms. CAT LLC determined that Grant Thornton was well-qualified for the proposed role given the balance of these considerations. Grant Thornton's fixed fee rate compensation arrangement was reasonable and appropriate, and in line with the market rates charged for these types of accounting services. The fees for these services were paid by CAT LLC to Grant Thornton.

Market Data Provider: Exegy. The professional and administrative costs for the Pre-FAM Period included costs related to the receipt of certain market data for the CAT pursuant to an agreement with the CAT LLC, and then with FCAT. Exegy provided SIP Data required by the CAT NMS Plan.

After performing an analysis of the available market data vendors to confirm that the data provided met the SIP Data requirements of the CAT NMS Plan and comparing the costs of the vendors providing the required SIP Data, CAT LLC determined to purchase market data from Exegy from July 2018 through March 2019. CAT LLC determined that, unlike certain other vendors, Exegy provided market data that included all data elements required by the CAT NMS Plan.⁴⁵ In addition, the fees were reasonable and in line with market rates for the market data received. Accordingly, the professional and administrative costs for the Pre-FAM Period include the Exegy costs from November 2018 through March

2019. The cost of the market data was reasonable for the market data received. The fees for the market data were paid directly by CAT LLC to Exegy.

Upon the termination of the contract between CAT LLC and Exegy, FCAT entered into a contract with Exegy to purchase the required market data from Exegy in July 2019. All costs under the contract were treated as a direct pass through cost to CAT LLC. Therefore, the fees for the market data were paid by CAT LLC to FCAT, who, in turn, paid Exegy for the market data.

Security Assessment: RSM US LLP ("RSM"). The operating costs for the Pre-FAM Period include costs related to a third party security assessment of the CAT performed by RSM. The assessment was designed to verify and validate the effective design, implementation, and operation of the controls specified by NIST Special Publication 800–53, Revision 4 and related standards and guidelines. Such a security assessment is in line with industry practice and important given the data included in the CAT. CAT LLC determined to engage RSM to perform the security assessment, after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fees were reasonable and in line with market rates for such an assessment. RSM performed the assessment from October 2018 through December 2018. Accordingly, the costs for the Pre-FAM Period include the costs incurred in November and December 2018. The cost for the security assessment were paid directly to RSM by CAT LLC.

(j) Public Relations Costs

The public relations costs of \$224,669 represent the fees paid to public relations firms during the Pre-FAM Period for professional communications services to CAT, including media relations consulting, strategy and execution. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants. Specifically, the public relations firms provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (e.g., amendments to the CAT NMS Plan). Public relations services were

⁴⁴ Section 9.2 of the CAT NMS Plan.

⁴⁵ See Section 6.5(a)(ii) of the CAT NMS Plan.

important for various reasons, including monitoring comments made by market participants about CAT and understanding issues related to the CAT discussed on the public record.

The services performed by each of the public relations firms were comparable. The fees for such services were reasonable and in line with market rates. Only one public relations firm was engaged at a time; the three firms were engaged sequentially as the primary public relations contact moved among the three firms during this time period.

Public Relations Firm: Peppercomm, Inc. ("Peppercomm"). The national securities exchanges and FINRA, acting as a consortium, determined to hire the public relations firm Peppercomm in October 2014 and continued to engage this firm through September 2017. The exchanges and FINRA made this engagement decision after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fee rates for this public relations firm were negotiated on an arm's length basis and were in line with

market rates for these types of services. The public relations costs during the period from October 2014 until the formation of the CAT NMS, LLC were paid directly by the exchanges and FINRA to the public relations firm. After the formation of CAT NMS, LLC, the consulting fees were paid by CAT LLC.

Public Relations Firm: Sloane & Company ("Sloane"). CAT LLC determined to hire a new public relations firm, Sloane, in March 2018, based on, among other things, their expertise and the primary contact's history with the project. The fee rates for this public relations firm were in line with market rates for these types of services. The fees during the Pre-FAM Period were paid by CAT LLC to Sloane. CAT LLC continued the engagement with Sloane until February 2020.

Public Relations Firm: Peak Strategies. CAT LLC determined to hire a new public relations firm, Peak Strategies, in March 2020, based on, among other things, their expertise and the primary contact's history with the project. The fee rates for this public relations firm were in line with market

rates for these types of services. The fees during the Pre-FAM Period were paid by CAT LLC to Peak Strategies.

(ii) Historical CAT Costs Incurred in Financial Accountability Milestone Period 1

Historical CAT Costs 1 would include costs incurred by CAT and already funded by the Participants during Period 1 of the Financial Accountability Milestones ("FAM Period 1"),⁴⁶ which covers the period from June 22, 2020–July 31, 2020. Historical CAT Costs 1 would include costs for FAM Period 1 of \$6,377,343. The Participants would remain responsible for one-third of this cost (which they have previously paid) (\$2,125,781), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$2,125,781) and CEBBs paying one-third (\$2,125,781). The following table breaks down Historical CAT Costs 1 for FAM Period 1 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Historical CAT costs for FAM Period 1 *
Capitalized Developed Technology Costs **	\$1,684,870
Technology Costs	3,996,800
Cloud Hosting Services	2,642,122
Operating Fees	1,099,680
CAIS Operating Fees	254,998
Change Request Fees	
Legal	481,687
Consulting	137,209
Insurance	
Professional and administration	69,077
Public relations	7,700
Total Operating Expenses	6,377,343

* The costs described in this table of costs for FAM Period 1 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

** The non-cash amortization of these capitalized developed technology costs of \$362,121 incurred during FAM Period 1 have been appropriately excluded from the above table.⁴⁷

By the completion of FAM Period 1, CAT LLC was required to implement the reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of equities transaction data and options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information.⁴⁸ CAT LLC completed the requirements of FAM Period 1 by July 31, 2020. The following describes the costs for each of the categories for FAM Period 1.

(a) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 1 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance

testing, test, and production environments, during the FAM 1 Period. Accordingly, the \$2,642,122 in technology costs for cloud hosting services represent costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 1. The fee arrangement for AWS described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. Moreover, CAT LLC continued to believe that AWS's

⁴⁶ Section 11.6(a)(i)(A) of the CAT NMS Plan.

⁴⁷ As discussed above, with respect to certain costs that were "appropriately excluded," such excluded costs relate to the amortization of capitalized technology costs, which are amortized

over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

⁴⁸ See definition of "Initial Industry Member Core Equity and Options Reporting" in Section 1.1 of the CAT NMS Plan.

maturity in the cloud services space as well as the significant cost and time necessary to move the CAT to a different cloud services provider supported the continued engagement of AWS.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During the FAM 1 Period, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a and Phase 2b Industry Member Data (including certain linkages) as well as SIP Data, reference data and other types of Other Data. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 1.⁴⁹

	Date range: 6/22/20–7/31/20
Average Daily Volume in Billions:	
Participant—Equities	6
Participant—Options	103
Industry Member—Equities	7
Industry Member—Options	0.31
SIP—Options & Equities	74
Average Total Daily Volume	185
Cumulative Total Events for the Period	5,190
Total Compute Hours for the Period	2,612,082
Storage Footprint at End of Period (Petabytes) ..	57.47

(b) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 1. Accordingly, the \$1,099,680 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 1. The fee arrangement for FCAT described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. During FAM Period 1, FCAT's activities with respect to the CAT included the following:

- Published iterative drafts of draft Technical Specifications for Phase 2d, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;

- Published iterative drafts of CAIS Technical Specifications, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;

- Facilitated Industry Member reporting of Quote Sent Time on Options Market Maker quotes;

- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;

- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;

- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;

- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;

- Provided support to subcontractors under the Plan Processor Agreement;

- Provided support in discussions with Participants and the SEC and its staff;

- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;

- Administered the CAT website and all of its content; and

- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(c) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 1. Accordingly, the \$254,998 in technology costs for CAIS operating fees represent costs incurred for services provided by Kingland during FAM Period 1. The fee arrangement for Kingland described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. During FAM Period 1, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to CCID Alternative, as well as the acceleration of the reporting of LTIDs.

(d) Technology Costs—Change Request Fees

CAT LLC did not incur costs related to change requests during FAM Period 1.

(e) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 1 of \$1,684,870 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include: (1) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including separate production and industry test entitlements, and reprocessing of exchange event timestamps; (2) implementation fees; and (3) license fees.

(f) Legal Costs

The legal costs of \$481,687 represent the fees paid for legal services provided by two law firms, WilmerHale and Pillsbury during FAM Period 1.

Law Firm: WilmerHale. CAT LLC continued to employ WilmerHale during FAM Period 1 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 1 were paid by CAT LLC to WilmerHale. During FAM Period 1, WilmerHale provided legal assistance to the CAT including with regard to the following:

- Assisted with the development of the CAT funding model and drafted related amendments and fee filings;

- Drafted exemptive requests from CAT NMS Plan requirements regarding, for example, verbal activity, options market maker quote sent time, TRF linkages, and allocations;

- Provided interpretations related to CAT NMS Plan requirements, including the Financial Accountability Milestone amendment;

- Assisted with compliance with Regulation SCI;

- Provided support for the Operating Committee, Compliance Subcommittee, working groups and Leadership Team, including with regard to meetings with the SEC staff;

- Assisted with the drafting of the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;

- Assisted with communications and presentations for the industry regarding CAIS;

⁴⁹ Note that the volume data described in this table does not include CAIS data.

- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for Compliance Subcommittee, including with regard to response to OCIE examinations and the annual assessment;
- Provided guidance regarding CAT technical specifications;
- Assisted with third-party vendor agreements; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

Law Firm: Pillsbury. CAT LLC continued to employ Pillsbury during FAM Period 1 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 1 were paid by CAT LLC to Pillsbury. During FAM Period 1, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During that period, Pillsbury advised CAT LLC regarding applicable legal matters and drafted a proposed amendment to the CAT NMS Plan regarding liability matters. Liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants.

(g) Consulting Costs

The consulting costs of \$137,209 represent the fees paid to Deloitte as project manager during FAM Period 1. CAT LLC continued to employ Deloitte during FAM Period 1 based on, among other things, their expertise and cumulative experience with the CAT. The fee rates for Deloitte during FAM Period 1 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 1 were paid by CAT LLC to the consulting firm. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 1, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the

development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;

- Provided support for updating the SEC on the progress of the development of the CAT;
- Assisted with the transition from the Initial Plan Processor to the successor Plan Processor; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(h) Insurance

Although insurance was in effect during FAM Period 1, CAT LLC did not incur costs related to insurance during FAM Period 1.

(i) Professional and Administration Costs

Financial Advisory Firm: Anchin. The professional and administration costs of \$69,077 represent the fees paid to Anchin during FAM Period 1. CAT LLC continued to employ Anchin during FAM Period 1 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these type of financial advisory services. The fees for these services during FAM Period 1 were paid by CAT LLC to Anchin. During FAM Period 1, Anchin provided a variety of services, including the following:

- Maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups; and
- Prepared monthly and quarterly financial statements.

(j) Public Relations Costs

The public relations costs of \$7,700 represent the fees paid to Peak

Strategies during FAM Period 1. CAT LLC continued to employ Peak Strategies during FAM Period 1 based on, among other things, their expertise and history with the project. The fee rates for this firm were reasonable and in line with market rates for these types of services. The fees for these services during FAM Period 1 were paid by CAT LLC to Peak Strategies. During FAM Period 1, Peak Strategies continued to provide professional communications services to CAT LLC, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (e.g., amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(iii) Historical CAT Costs Incurred in Financial Accountability Milestone Period 2

Historical CAT Costs 1 would include costs incurred by CAT LLC and already funded by Participants during Period 2 of the Financial Accountability Milestones ("FAM Period 2"),⁵⁰ which covers the period from August 1, 2020–December 31, 2020. Historical CAT Costs 1 would include costs for FAM Period 2 of \$42,976,478. The Participants would remain responsible for one-third of this cost (which they have previously paid) (\$14,325,493), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$14,325,493) and CEBSSs paying one-third (\$14,325,493). The following table breaks down Historical CAT Costs 1 for FAM Period 2 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

⁵⁰ Section 11.6(a)(i)(B) of the CAT NMS Plan.

Operating expense	Historical CAT costs for FAM Period 2 *
Capitalized Developed Technology Costs **	\$6,761,094
Technology Costs	31,460,033
Cloud Hosting Services	20,709,212
Operating Fees	9,108,700
CAIS Operating Fees	1,590,298
Change Request Fees	51,823
Legal	2,766,644
Consulting	532,146
Insurance	976,098
Professional and administration	438,523
Public relations	41,940
Total Operating Expenses	42,976,478

* The costs described in this table of costs for FAM Period 2 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

** The non-cash amortization of these capitalized developed technology costs of \$1,892,505 incurred during FAM Period 2 have been appropriately excluded from the above table.⁵¹

By the completion of FAM Period 2, CAT LLC was required to implement the following with regard to the CAT:

(a) Industry Member reporting (excluding reporting by Small Industry Members that are not OATS reporters) for equities transactions, excluding Customer Account Information, CustomerID, and Customer Identifying Information, is developed, tested, and implemented at a 5% Error Rate or less and with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, and trade reporting facilities linkage to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, excluding linkage of representative orders, from order origination through order execution or order cancellation; and (b) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3 and Section 8.2.1 incorporates the Industry Member equities transaction data described in condition (a) and is available to the Participants and to the Commission.⁵²

CAT LLC completed the requirements of FAM Period 2 by December 31, 2020. The following describes the costs for each of the categories for FAM Period 2.

(a) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 2 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production environments, during the FAM 2 Period. Accordingly, the \$20,709,212 in technology costs for cloud hosting services represent costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 2.

The fee arrangement for AWS described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During the FAM 2 Period, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a and Phase 2b Industry Member Data (including certain linkages) as well as SIP Data, and Other Data, including reference data. In addition, Industry Members began reporting LTID account information. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 2.⁵³

	Date range: 8/1/20–12/31/20
Average Daily Volume in Billions:	
Participant—Equities	6
Participant—Options	116
Industry Member—Equities	11
Industry Member—Options	0.98
SIP—Options & Equities	80
Average Total Daily Volume	282
Cumulative Total Events for the Period	2,170
Total Compute Hours for the Period	15,660,392
Storage Footprint at End of Period (Petabytes)	114.59

⁵¹ As discussed above, with respect to certain costs that were “appropriately excluded,” such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As

such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

⁵² See definition of “Full Implementation of Core Equity Reporting Requirements” in Section 1.1 of the CAT NMS Plan.

⁵³ Note that the volume data described in this table does not include CAIS data.

(b) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 2. Accordingly, the \$9,108,700 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 2. The fee arrangement for FCAT described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement. During FAM Period 2, FCAT's activities with respect to the CAT included publishing the Technical Specifications for Phase 2d and overseeing the reporting of firm to firm and intrafirm linkages by Industry Members. In addition, FCAT also continued to engage in the following activities during FAM Period 2:

- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the development and implementation of the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with the Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(c) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 2. Accordingly, the \$1,590,298 in technology costs for CAIS operating fees

represent costs incurred for services provided by Kingland during FAM Period 2. The fee arrangement for Kingland described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement. During FAM Period 2, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to the CCID Alternative, as well as the acceleration of the reporting of LTIDs.

(d) Technology Costs—Change Request Fees

During FAM Period 2, CAT LLC engaged FCAT to pursue certain change requests in accordance with the Plan Processor Agreement. The change request costs were paid by CAT LLC to FCAT. Specifically, during FAM Period 2, CAT incurred costs of \$51,823 related to a change request regarding the addition of functionality for exchange Participants to report rejected messages to the CAT.

(e) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 2 of \$6,761,094 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Plan Processor; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including costs related to separate production and industry test entitlements, market maker reference data, and back-processing of exchange exception logic; (3) implementation fees; and (4) license fees.

(f) Legal Costs

The legal costs of \$2,766,644 represent the fees paid for legal services provided by two law firms, WilmerHale and Pillsbury during FAM Period 2.

Law Firm: WilmerHale. CAT LLC continued to employ WilmerHale during FAM Period 2 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM

Period 2 were paid by CAT LLC to WilmerHale. During FAM Period 2, the legal assistance provided by WilmerHale included providing legal advice regarding the following:

- Assisted with the development of the CAT funding model and drafting related amendments and rule filings;
- Drafted exemptive requests from CAT NMS Plan requirements regarding, for example, allocations, exchange activity, OTQT, initial data validation, error corrections and recordkeeping;
- Provided interpretations related to CAT NMS Plan requirements, including with regard to the Financial Accountability Milestone amendment, FAQs and technical specifications;
- Provided support for the Operating Committee, Compliance Subcommittees, working groups and Leadership Team, including with regard to meetings with the SEC staff;
- Assisted with the Implementation Plan and Quarterly Progress Reports required pursuant to Section 6.6 of the CAT NMS Plan;
- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for the Compliance Subcommittee, including with regard to responses to OCIE examinations and the annual assessment;
- Provided guidance regarding the SEC's proposed security amendments to the CAT NMS Plan;
- Provided guidance regarding SRO rule filings for the retirement of systems;
- Provided legal support for Operating Committee meetings, including drafting resolutions and other materials and voting advice;
- Assisted with third-party vendor agreements (e.g., with regard to Anchin, Grant Thornton and insurance policies);
- Assisted with change requests; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

Law Firm: Pillsbury. CAT LLC continued to employ Pillsbury during FAM Period 2 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 2 were paid by CAT LLC to Pillsbury. During FAM Period 2, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During that period, Pillsbury advised CAT LLC regarding applicable legal matters and drafted and filed a proposed amendment to the CAT NMS Plan regarding liability matters. As discussed above, liability issues related to the CAT are important matters that

needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants.

(g) Consulting Costs

The consulting costs of \$532,146 represent the fees paid to Deloitte as project manager during FAM Period 2. CAT LLC continued to employ Deloitte during FAM Period 2 based on, among other things, their expertise and long history with the project. The fee rates for Deloitte during FAM Period 2 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 2 were paid to Deloitte by CAT LLC. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 2, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(h) Insurance

The insurance costs of \$976,098 represent the fees paid for insurance during FAM Period 2. CAT LLC continued to maintain cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance offered by USI. After engaging in a process for renewing the coverage, CAT LLC determined to purchase these insurance policies from USI. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(i) Professional and Administration Costs

The professional and administration costs of \$438,523 represent the fees paid to Anchin and Grant Thornton for

financial services provided during FAM Period 2.

Financial Advisory Firm: Anchin. CAT LLC continued to engage Anchin during FAM Period 2 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these types of financial advisory services. The fees for these services during FAM Period 2 were paid by CAT LLC to Anchin. During FAM Period 2, Anchin provided a variety of services, including the following:

- Updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated [sic] bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from the Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audit by an independent auditor; and
- Reviewed historical costs from inception.

Accounting Firm: Grant Thornton. CAT LLC continued to employ the accounting firm Grant Thornton during FAM Period 2 based on, among other things, its expertise and cumulative knowledge of CAT LLC. CAT LLC continued to believe that Grant Thornton was well qualified for its role and its fee rates were in line with market rates for these accounting services. The fees for these services during FAM Period 2 were paid by CAT LLC to Grant Thornton. During FAM Period 2, Grant Thornton performed a financial statement audit for CAT LLC as an independent accounting firm.

(j) Public Relations Costs

The public relations costs of \$41,940 represent the fees paid to Peak

Strategies during FAM Period 2. CAT LLC continued to employ Peak Strategies during FAM Period 2 based on, among other things, their expertise and history with the project. The fee rates for this firm were in line with market rates for these types of services. The fees for these services during FAM Period 2 were paid by CAT LLC to Peak Strategies. During FAM Period 2, Peak Strategies continued to provide professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (e.g., amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(iv) Historical CAT Costs Incurred in Financial Accountability Milestone Period 3

Historical CAT Costs 1 would include costs incurred by CAT and already funded by the Participants during Period 3 of the Financial Accountability Milestones ("FAM Period 3"),⁵⁴ which covers the period from January 1, 2021–December 31, 2021. Historical CAT Costs 1 would include costs for FAM Period 3 of \$144,415,268. The Participants would remain responsible for one-third of this cost (which they have previously paid) (\$48,138,423), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$48,138,423) and CEBBs paying one-third (\$48,138,423). The following table breaks down Historical CAT Costs 1 for FAM Period 3 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

⁵⁴ Section 11.6(a)(i)(C) of the CAT NMS Plan.

Operating expense	Historical CAT costs 1 for FAM Period 3 *
Capitalized Developed Technology Costs **	\$10,763,372
Technology Costs	123,639,402
Cloud Hosting Services	94,574,759
Operating Fees	23,106,091
CAIS Operating Fees	5,562,383
Change Request Fees	396,169
Legal	6,333,248
Consulting	1,408,209
Insurance	1,582,714
Professional and administration	595,923
Public relations	92,400
Total Operating Expenses	144,415,268

* The costs described in this table of costs for FAM Period 3 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

** The non-cash amortization of these capitalized developed technology costs of \$5,108,044 incurred during FAM Period 3 have been appropriately excluded from the above table.⁵⁵

By the completion of FAM Period 3, CAT LLC was required to implement the following requirements with regard the CAT:

(a) reporting to the Order Audit Trail System ("OATS") is no longer required for new orders; (b) Industry Member reporting for equities transactions and simple electronic options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, trade reporting facilities linkage, and representative order linkages (including any equities allocation information provided in an Allocation Report) to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, is developed, tested, and implemented at a 5% Error Rate or less; (c) Industry Member reporting for manual options transactions and complex options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with all required linkages to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or

order cancellation, including any options allocation information provided in an Allocation Report, is developed, tested, and fully implemented; (d) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3, Section 8.2.1, and Section 8.5 incorporates the data described in conditions (b)–(c) and is available to the Participants and to the Commission; and (e) the requirements of Section 6.10(a) are met.⁵⁶

CAT LLC completed the requirements of FAM Period 3 by December 31, 2021. The following describes the costs for each of the categories for FAM Period 3.

(a) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 3 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production

environments, during the FAM 3 Period. Accordingly, the \$94,574,759 in technology costs for cloud hosting services represents costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 3. The fee arrangement for AWS described above for the earlier periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During FAM Period 3, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a, Phase 2b, Phase 2c and Phase 2d Industry Member Data (including certain linkages), SIP Data, Other Data, including reference data, and LTID account information. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 3.⁵⁷

	Date range: 1/1/21 to 4/25/21	Date range: 4/26/21 to 12/31/21 *
Average Daily Volume in Billions:		
Participant—Equities	9	9
Participant—Options	135	136
Industry Member—Equities	20	19
Industry Member—Options	2	2
SIP—Options & Equities	129	137
Average Total Daily Volume	297	304
Cumulative Total Events for the Period	7,480	5,310
Total Compute Hours for the Period	15,860,304	33,487,318

⁵⁵ As discussed above, with respect to certain costs that were "appropriately excluded," such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As

such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

⁵⁶ See definition of "Full Availability and Regulatory Utilization of Transactional Database Functionality" in Section 1.1 of the CAT NMS Plan.

⁵⁷ Note that the volume data described in this table does not include CAIS data.

	Date range: 1/1/21 to 4/25/21	Date range: 4/26/21/to 12/31/21 *
Storage Footprint at End of Period (Petabytes)	180.22	284.62

* Start of Participant Equities in CAT format and SIP Equities on 4/26/21.

(b) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 3. Accordingly, the \$23,106,091 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 3. The fee arrangement for FCAT described above with regard to the prior Periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement. During FAM Period 3, FCAT's activities with respect to the CAT included the following:

- Facilitated Phase 2c and Phase 2d testing for Industry Members;
- Oversaw creation of linkages of the lifecycle of order events based on the received data through Phase 2d;
- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with the Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(c) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement with FCAT discussed above, Kingland continued in its role as a

subcontractor for the development and implementation of CAIS during FAM Period 3. Accordingly, the \$5,562,383 in technology costs for CAIS operating fees represents costs incurred for services provided by Kingland during FAM Period 3. The fee arrangement for Kingland described above with regard to the prior Periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement. During FAM Period 3, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to the CCID Alternative, as well as the acceleration of the reporting of LTIDs. The full CAIS Technical Specifications were published during FAM Period 3.

(d) Technology Costs—Change Request Fees

During FAM Period 3, CAT LLC engaged FCAT to pursue certain change requests in accordance with the Plan Processor Agreement. The change request costs were paid by CAT LLC to FCAT. Specifically, during FAM Period 3, CAT incurred costs of \$396,169 related to change requests, including the following: (1) the addition of functionality for exchange Participants to report rejected messages to the CAT; (2) the migration of MIRS query engine to AWS to reduce operational costs and increase resiliency; and (3) updating the Participant Technical Specifications to allow for two-sided Participant option quote reporting.

(e) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 3 of \$10,763,372 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Plan Processor, including the transition from equity data received by FINRA pursuant to various regulatory services agreements between FINRA and Participant exchanges to the equity CAT Data, and the completion of the Industry Member Phase 2d options manual and

complex orders go-live requirements; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including costs related to off-exchange volume concentration, Participant 24-hour trading and an external metastore; (3) implementation fees; and (4) license fees.

(f) Legal Costs

The legal costs of \$6,333,248 represent the fees paid for legal services provided by three law firms, WilmerHale, Pillsbury and Covington & Burling LLP ("Covington") during FAM Period 3.

Law Firm: WilmerHale. CAT LLC continued to employ WilmerHale during FAM Period 3 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 3 were paid by CAT LLC to WilmerHale. During FAM Period 3, the legal assistance provided by WilmerHale included providing legal advice regarding the following:

- Assisted with the development of the CAT funding model and drafting related amendments and rule filings;
- Drafted exemptive requests from CAT NMS Plan requirements, including, for example, verbal activity regarding Phase 2c cutover, error reports, error corrections, Phase 2d Reporting, unique Order-ID on internal route events, reporting addresses, recordkeeping, and unique CCID for foreign customers;
- Provided interpretations related to CAT NMS Plan requirements, including with regard to the Financial Accountability Milestone amendment, FAQs, CAIS requirements, ADF, and technical specifications;
- Provided support for the Operating Committee, Compliance Subcommittee, working groups and Leadership Team, including with regard to meetings with the SEC staff;
- Assisted with the Implementation Plan and Quarterly Progress Reports required pursuant to Section 6.6(c) of the CAT NMS Plan;
- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for Compliance Subcommittee, including with regard to

responses to OCIE examinations and the annual assessment;

- Provided guidance regarding the SEC's proposed security amendments to the CAT NMS Plan;
- Provided guidance regarding SRO rule filings for the retirement of systems;
- Provided legal support for Operating Committee meetings, including drafting resolutions and other materials and voting advice;
- Provided assistance with change requests;
- Provided guidance and regulatory support for litigation regarding the response to the SEC's exemptive orders;
- Assisted with communications with the industry, including CAT Alerts and presentations;
- Provided guidance regarding the confidentiality of CAT Data, including third-party information requests;
- Assisted with cost management analysis and proposals; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

Law Firm: Pillsbury. CAT LLC continued to employ Pillsbury during FAM Period 3 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 3 were paid by CAT LLC to Pillsbury. During FAM Period 3, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During this period, Pillsbury advised CAT LLC regarding applicable legal matters, reviewed and responded to comment letters regarding the proposed Plan amendment, participated in meetings with senior SEC staff, responded to comments submitted following the SEC's April 6, 2021 order instituting proceedings,⁵⁸ and assessed legal matters regarding the SEC's October 29, 2021 order denying the proposed Plan amendment.⁵⁹

Law Firm: Covington. CAT LLC hired Covington for litigation with the SEC regarding certain exemptive orders related to the CAT, including orders issued in December 2020.⁶⁰ CAT LLC interviewed this law firm as well as other potential law firms, considering a variety of factors in its analysis for choosing legal assistance, including the

relevant expertise and fees of the potential lawyers. CAT LLC approved the engagement of Covington in January 2021. The fee rates for this law firm, which were calculated based on hourly rates, were in line with market rates for specialized services. The legal fees for FAM Period 3 for this firm were paid by CAT LLC to Covington.

After Covington was hired in 2021 through the end of 2021, the firm provided legal assistance regarding the litigation with the SEC regarding the 2020 Orders. These services included researching, drafting, and filing motions to stay the 2020 orders and related materials in proceedings before the SEC, as well as researching, drafting, and filing petitions for judicial review of the 2020 Orders in proceedings before the U.S. Court of Appeals for the D.C. Circuit. Covington oversaw ongoing litigation proceedings on these matters, and also supported WilmerHale with respect to settlement negotiations with the SEC staff regarding the 2020 Orders.

In addition to these services, CAT LLC engaged Covington in November 2021 to provide assistance with respect to the SEC's disapproval of CAT NMS Plan amendments concerning a proposed limitation on liability in the event of a data breach or similar event. Covington provided advice concerning CAT's response to the SEC's disapproval order. This work accounted for a minority of Covington's fees in 2021.⁶¹

(g) Consulting Costs

The consulting costs of \$1,408,209 represent the fees paid to Deloitte as project manager during FAM Period 3. CAT LLC continued to employ Deloitte during FAM Period 3 based on, among other things, their expertise and long history with the project. The fee rates for Deloitte during FAM Period 3 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 3 were paid to Deloitte by CAT LLC. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 3, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team,

including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;

- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(h) Insurance

The insurance costs of \$1,582,714 represent the fees paid for insurance during FAM Period 3. CAT LLC continued to maintain cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance offered by USI. After engaging in a process for renewing the coverage, CAT LLC determined to purchase these insurance policies from USI. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(i) Professional and Administration Costs

The professional and administration costs of \$595,923 represent the fees paid to Anchin and Grant Thornton for financial services during FAM Period 3.

Financial Advisory Firm: Anchin. CAT LLC continued to employ Anchin during FAM Period 3 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these financial advisory services. The fees for these services during FAM Period 3 were paid by CAT LLC to Anchin. During FAM Period 3, Anchin provided a variety of services, including the following:

- Updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated *[sic]* bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from Participants;

⁵⁸ Securities Exchange Act Rel. No. 91487 (Apr. 6, 2021), 86 FR 19054 (Apr. 12, 2021).

⁵⁹ Securities Exchange Act Rel. No. 93484 (Oct. 29, 2021), 86 FR 60933 (Nov. 4, 2021).

⁶⁰ See Securities Exchange Act Rel. No. 90688 (Dec. 16, 2020), 85 FR 83634 (Dec. 22, 2020); and Securities Exchange Act Rel. No. 90689 (Dec. 16, 2020), 85 FR 83667 (Dec. 22, 2020) (collectively, the "2020 Orders").

⁶¹ As discussed above with regard to Pillsbury's work on liability matters, liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants. Moreover, such activity is a necessary part of the operation of the CAT.

- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

Accounting Firm: Grant Thornton. CAT LLC continued to employ the accounting firm Grant Thornton during FAM Period 3 based on, among other things, their expertise and cumulative knowledge of CAT LLC. CAT LLC determined that Grant Thornton was well qualified for its role and that its fixed fee rates were in line with market rates for these accountant services. The fees for these services during FAM Period 3 were paid by CAT LLC to Grant Thornton. During FAM Period 3, Grant Thornton provided audited financial statements for CAT LLC.

(j) Public Relations Costs

The public relations costs of \$92,400 represent the fees paid to Peak Strategies during FAM Period 3. CAT LLC continued to employ Peak Strategies during FAM Period 3 based on, among other things, their expertise and history with the project. The fee rates for this firm were in line with market rates for these types of services. The fees for these services during FAM

Period 3 were paid by CAT LLC to Peak Strategies. During FAM Period 3, Peak Strategies continued to provide professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.*, congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.*, amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(v) Excluded Costs

Historical CAT Costs 1 would not include three categories of CAT costs ("Excluded Costs"): (1) \$14,749,362 of costs related to the termination of the relationship with the Initial Plan Processor; (2) \$48,874,937, which are all CAT costs incurred from November 15, 2017 through November 15, 2018; and (3) \$19,628,791, which are costs paid to the Initial Plan Processor from November 16, 2018 through February

2019 when the relationship with the Initial Plan Processor was concluded. The Participants would remain responsible for 100% of these costs, which total \$83,253,090. CAT LLC determined to exclude these Excluded Costs from Historical CAT Costs 1 because these costs relate to the delay in the start of reporting to the CAT and the conclusion of the relationship with the Initial Plan Processor.⁶²

(a) Costs Related to Conclusion of Relationship With Initial Plan Processor

First, Historical CAT Costs 1 would not include \$14,749,362 of costs related to the conclusion of the relationship with the Initial Plan Processor. Such costs include costs related to the American Arbitration Association, the legal assistance of Pillsbury with regard to the arbitration with the Initial Plan Processor, and the settlement costs related to the arbitration with the Initial Plan Processor. The Participants would remain responsible for 100% of these \$14,749,362 in costs.

(b) Costs Incurred From November 15, 2017 Through November 15, 2018

Second, Historical CAT Costs 1 would not include all CAT costs incurred from November 15, 2017 through November 15, 2018. CAT LLC determined to exclude all costs during this one-year period of \$48,874,937 from fees charged to Industry Members due to the delay in the start of reporting to the CAT. The Participants would remain responsible for 100% of these \$48,874,937 in costs. The following table breaks down these costs into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Excluded costs for November 15, 2017–November 15, 2018 *
Capitalized Developed Technology Costs	\$37,852,083
<i>Technology Costs:</i>	
Cloud Hosting Services	
Operating Fees	
CAIS Operating Fees	
Change Request Fees	
Legal	6,143,278
Consulting	4,452,106
Insurance	
Professional and administration	340,145
Public relations	87,325
Total Operating Expenses	48,874,937

* The costs described in this table of Excluded Costs were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

⁶² In approving the CAT Funding Model, the Commission states that the proposed exclusion of the first two categories of Excluded Costs "is reasonable in the Commission's view because it would not require all costs incurred by the Participants to be recovered from Industry Members

through the Historical CAT Assessment, specifically excluding those costs related to the delay in the start of reporting to the CAT and costs related to the conclusion of the relationship with the Initial Plan Processor." CAT Funding Model Approval Order at 62663. In addition to the first two

categories of Excluded Costs, CAT LLC is now proposing a third category of Excluded Costs that would exclude all costs paid to the Initial Plan Processor after November 15, 2018.

The following provides additional detail regarding the Excluded Costs.

(I) Technology Costs—Cloud Hosting Services, Operating Fees, CAIS Operating Fees and Change Request Fees

CAT LLC did not incur technology costs related to the categories of cloud hosting services, operating fees, CAIS operating fees or change requests during the period from November 15, 2017 through November 15, 2018.

(II) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for the period from November 15, 2017 through November 15, 2018 include capitalizable application development costs of \$37,852,083 incurred in the development of the CAT by the Initial Plan Processor. Such costs include development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Initial Plan Processor. Such costs include costs related to Industry Member technical specifications for orders and transactions, the system security plan, testing and production for Participant CAT reporting, third-party security assessment and response, query portal, onboarding of the Chief Information Security Officer, and ingestion of FINRA TRF data and FINRA data related to halts and corporate actions.

(III) Legal Costs

The legal costs of \$6,143,278 represent the fees paid to WilmerHale for legal services from November 15, 2017 through November 15, 2018. During this period, WilmerHale provided legal assistance to the CAT including with regard to the following:

- Provided legal support for the governance of the CAT, including governance support for the Operating Committee, Advisory Committee, Compliance Subcommittee, and CAT working groups;
- Assisted with the development of the CAT funding model and drafted related amendments of the CAT NMS Plan;
- Provided assistance related to CAT security;
- Drafted exemptive requests, including requests related to PII;
- Assisted with the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Provided interpretations of and related to the CAT NMS Plan;

- Provided advice with regard to regulator access to the CAT;
- Assisted with the Plan Processor transition;
- Provided assistance regarding communications with the industry regarding the CAT;
- Provided advice regarding Customer Account Information and PII;
- Provided support for litigation related to SEC exemptive orders; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretative and implementation issues.

(IV) Consulting Costs

The consulting costs of \$4,452,106 represent the fees paid to Deloitte for their role as project manager for the CAT from November 15, 2017 through November 15, 2018. During this period, Deloitte engaged in the following activities with respect to the CAT:

- Implemented program operations for the CAT project;
- Provided governance support to the Operating Committee, including support for Subcommittees and working groups of the Operating Committee (e.g., Compliance Subcommittee, Cost and Funding Working Group, Technical Working Group, Industry Outreach Working Group, Security Working Group and Steering Committee);
- Assisted with cost and funding issues for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided active planning and coordination with and support for the Initial Plan Processor with regard to the development of the CAT, and reported to the Participants on the progress.

(V) Insurance

CAT LLC did not incur costs related to insurance during the period from November 15, 2017 through November 15, 2018.

(VI) Professional and Administration Costs

The professional and administration costs of \$340,145 represent the fees paid to Anchin, Exegy and RSM from November 15, 2017 through November 15, 2018.

Financial Advisory Firm: Anchin. From the commencement of its engagement [sic] in April 2018 through November 15, 2018, Anchin engaged in the following activities with respect to the CAT:

- Developed, updated and maintained internal controls;
 - Provided cash management and treasury functions;
 - Facilitated bill payments;
 - Provided monthly bookkeeping;
 - Reviewed vendor invoices and documentation in support of cash disbursements;
 - Provided accounting research and consultations on various accounting, financial reporting and tax matters;
 - Addressed not-for-profit tax and accounting considerations;
 - Prepared tax returns;
 - Addressed various accounting, financial reporting and operating inquiries from Participants;
 - Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
 - Addressed accounting and financial matters relating to the transition from CAT NMS, LLC to Consolidated Audit Trail, LLC, including supporting the dissolution of CAT NMS, LLC;
 - Supported compliance with the CAT NMS Plan;
 - Worked with and provided support to the Operating Committee and various CAT working groups;
 - Prepared monthly, quarterly and annual financial statements;
 - Supported the annual financial statement audits by an independent auditor;
 - Reviewed historical costs from inception; and
 - Provided accounting and financial information in support of SEC filings.
- Market Data Provider: Exegy.* From July 2018 through November 15, 2018, CAT LLC purchased market data from Exegy (as described in more detail above).

Security Assessment: RSM. From October 2018 through November 15, 2018, CAT LLC incurred costs for RSM's performance of a security assessment (as described in more detail above).

(VII) Public Relations Costs

The public relations costs of \$87,325 represent the fees paid to Sloane from November 15, 2017 through November 15, 2018. From the commencement of its engagement [sic] in March 2018 through November 15, 2018, Sloane provided professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, Sloane provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting

such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (e.g., amendments to the CAT NMS Plan).

(c) Costs Paid to Initial Plan Processor From November 16, 2018 Through February 2019

Third, Historical CAT Costs 1 would not include the \$19,628,791 in costs paid to the Initial Plan Processor from November 16, 2018 through February 2019 when CAT LLC's relationship with the Initial Plan Processor concluded. CAT LLC determined that Historical CAT Costs 1 would not include any fees paid to the Initial Plan Processor after November 15, 2017,⁶³ which was the date by which Participants were required to begin reporting to the CAT.⁶⁴ As discussed above, the Participants determined that Historical CAT Costs 1 would not include all CAT costs incurred from November 15, 2017 through November 15, 2018, which includes \$37,852,083 in Initial Plan Processor costs incurred from November 15, 2017 through November 15, 2018 (as well as other CAT costs during this period). The remaining Initial Plan Processor costs incurred after November 15, 2018 are the \$19,628,791 in costs for the period from November 16, 2018 through February 2019 incurred in the development of the CAT by the Initial Plan Processor, as well as a transition fee for the transition from the Initial Plan Processor to the successor Plan Processor. The Participants would remain responsible for 100% of these \$19,628,791 in costs.

(C) Historical Recovery Period 1

Under the CAT NMS Plan, the Operating Committee is required to reasonably establish the length of the Historical Recovery Period used in calculating each Historical Fee Rate based upon the amount of the Historical CAT Costs to be recovered by the Historical CAT Assessment, and to describe the reasons for its length.⁶⁵ The Historical Recovery Period used in calculating the Historical Fee Rate may

not be less than 24 months or more than five years.⁶⁶ The Operating Committee has determined to establish a Historical Recovery Period 1 of 24 months for Historical CAT Assessment 1.

The Operating Committee determined that the length of Historical Recovery Period 1 appropriately weighs the need for a reasonable Historical Fee Rate 1 that spreads the Historical CAT Costs over an appropriate amount of time and the need to repay the loans to the Participants in a timely fashion. The Operating Committee determined that 24 months for Historical Recovery Period 1 would establish a fee rate that is lower than other transaction-based fees, including fees assessed pursuant to Section 31.⁶⁷ In addition, in establishing a Historical Recovery Period of 24 months, the Operating Committee recognized that the total costs for Historical CAT Assessment 1 were less than the total costs for 2022 and 2023,⁶⁸ and therefore it would be reasonable and appropriate to recover costs subject to this filing over an approximate two-year period.

The length of the Historical Recovery Period 1 and the reasons for its length are provided in this filing in accordance with the requirement in the CAT NMS Plan to provide such information in a fee filing for a Historical CAT Assessment.⁶⁹

(D) Projected Total Executed Equivalent Share Volume

The calculation of Historical Fee Rate 1 also requires the determination of the projected total executed equivalent share volume of transactions in Eligible Securities for Historical Recovery Period 1. Under the CAT NMS Plan, the Operating Committee is required to "reasonably determine the projected total executed equivalent share volume of all transactions in Eligible Securities for each Historical Recovery Period based on the executed equivalent share volume of all transactions in Eligible Securities for the prior twelve months."⁷⁰ The Operating Committee is

required to base its projection on the prior twelve months, but it may use its discretion to analyze the likely volume for the upcoming year. Such discretion would allow the Operating Committee to use its judgment when estimating projected total executed equivalent share volume if the volume over the prior twelve months was unusual or otherwise unfit to serve as the basis of a future volume estimate.⁷¹

The total executed equivalent share volume of transactions in Eligible Securities for the 12-month period from June 2023 through May 2024 was 3,980,753,840,905.21 executed equivalent shares. The Operating Committee has determined to calculate the projected total executed equivalent share volume for the 24 months of Historical Recovery Period 1 by doubling the executed equivalent share volume for the prior 12 months. The Operating Committee determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has remained relatively constant. For example, the executed equivalent share volume for 2021 was 3,963,697,612,395, the executed equivalent share volume for 2022 was 4,039,821,841,560.31, and the executed equivalent share volume for 2023 was 3,868,940,345,680.6. Accordingly, the projected total executed equivalent share volume for Historical Recovery Period 1 is projected to be 7,961,507,681,810.42 executed equivalent shares.⁷²

The projected total executed equivalent share volume of all transactions in Eligible Securities for Historical Recovery Period 1 and a description of the calculation of the projection is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide such information in a fee filing for a Historical CAT Assessment.⁷³

(E) Historical Fee Rate 1

Historical Fee Rate 1 would be calculated by dividing Historical CAT Costs 1 by the reasonably projected total executed equivalent share volume of all transactions in Eligible Securities for Historical Recovery Period 1, as described in detail above.⁷⁴ Specifically,

⁶³ As discussed below, CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017. See Section 3(a)(10)(E) below.

⁶⁴ The SEC approved the CAT NMS Plan on November 15, 2016, and Participant reporting was required to begin on the first anniversary of this date, November 15, 2017. See Section 6.3 of the CAT NMS Plan and CAT NMS Plan Approval Order.

⁶⁵ Section 11.3(b)(i)(D)(I) and Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

⁶⁶ Section 11.3(b)(i)(D)(I) of the CAT NMS Plan. In the CAT Funding Model Approval Order, the SEC stated that "[i]n the Commission's view, it is reasonable for the Operating Committee to establish the length of the Historical Recovery Period to be no less than 24 months and no more than five years." CAT Funding Model Approval Order at 62664.

⁶⁷ As the SEC noted in the CAT Funding Model Approval Order, recent Section 31 fees ranged from \$0.00009 per share to \$0.0004 per share. CAT Funding Model at 62682.

⁶⁸ The total CAT costs for 2022 were approximately \$186 million and the total CAT costs for 2023 were approximately \$233 million.

⁶⁹ Section 11.3(b)(iii)(B)(II)(C) of the CAT NMS Plan.

⁷⁰ Section 11.3(b)(i)(E) of the CAT NMS Plan.

⁷¹ CAT Funding Model Approval Order at 62664.

⁷² This projection was calculated by multiplying 3,980,753,840,905.21 executed equivalent shares by two.

⁷³ Section 11.3(b)(iii)(B)(II)(D) of the CAT NMS Plan.

⁷⁴ In approving the CAT Funding Model, the Commission stated that "[t]he calculation of the Historical Fee Rate by dividing the Historical CAT Costs by the projected total executed equivalent share volume of all transactions in Eligible Securities for the Historical Recovery Period is

Historical Fee Rate 1 would be calculated by dividing \$318,059,819 by 7,961,507,681,810.42. As a result, the Historical Fee Rate 1 would be \$0.00003994969693072937 per executed equivalent share. Historical Fee Rate 1 is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide the Historical Fee Rate in a fee filing for a Historical CAT Assessment.⁷⁵

(3) Past CAT Costs and Participants

Participants would not be required to pay any fees associated with Historical CAT Assessment 1 as the Participants previously have paid all Past CAT Costs. The CAT NMS Plan explains that:

Because Participants previously have paid Past CAT Costs via loans to the Company, Participants would not be required to pay any Historical CAT Assessment. In lieu of a Historical CAT Assessment, the Participants' one-third share of Historical CAT Costs and such other additional Past CAT Costs as reasonably determined by the Operating Committee will be paid by the cancellation of loans made to the Company on a pro rata basis based on the outstanding loan amounts due under the loans.⁷⁶

The CAT NMS Plan further states that "Historical CAT Assessments are designed to recover two-thirds of the Historical CAT Costs."⁷⁷

(4) Monthly Fees

CEBBs and CEBSs would be required to pay fees for Historical CAT Assessment 1 on a monthly basis for the period in which Historical CAT Assessment 1 is in effect.⁷⁸ A CEBB or CEBS's fee for each month would be calculated based on the transactions in Eligible Securities executed by the CEBB or CEBS from the prior month.⁷⁹ Proposed paragraph (a)(1)(A) of the fee schedule would state that each CAT Executing Broker would receive its first invoice in November 2024, and "would receive an invoice each month thereafter in which Historical CAT Assessment 1 is in effect." Proposed paragraph (a)(1)(B) of the fee schedule would state

reasonable." CAT Funding Model Approval Order at 62664.

⁷⁵ Section 11.3(b)(iii)(B)(II)(A) of the CAT NMS Plan.

⁷⁶ Section 11.3(b)(ii) of the CAT NMS Plan.

⁷⁷ *Id.* In approving the CAT Funding Model, the Commission stated that "[t]he proposed allocation of the Historical CAT Assessment solely to CEBSs and CEBBs, and ultimately Industry Members, is reasonable. The Historical CAT Assessment will still be divided into thirds," as the Participants' one-third share of Historical CAT Costs will be paid by the cancellation of loans made to the Company. CAT Funding Model Approval Order at 62666.

⁷⁸ See Section 11.3(b)(iii)(A) of the CAT NMS Plan.

⁷⁹ See proposed paragraph (a)(1)(B) of the fee schedule.

that "Consolidated Audited Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1 on a monthly basis." In addition, proposed paragraph (b)(1) of the fee schedule states that each CEBB and CEBS is required to pay its CAT fees "each month."

(5) Actual Recovery Period for Historical CAT Assessment 1

The CAT NMS Plan states that, "[n]otwithstanding the length of the Historical Recovery Period used in calculating the Historical Fee Rate, each Historical CAT Assessment calculated using the Historical Fee Rate will remain in effect until all Historical CAT Costs for the Historical CAT Assessment are collected."⁸⁰ Accordingly, Historical CAT Assessment 1 will remain in effect until all Historical CAT Costs 1 have been collected. The actual recovery period for Historical CAT Assessment 1 may be shorter or longer than Historical Recovery Period 1 depending on the actual executed equivalent share volumes during the time that Historical CAT Assessment 1 is in effect.⁸¹

(6) Consolidated Audit Trail Funding Fees

To implement Historical CAT Assessment 1, a new section would be added to the Exchange's fee schedule for "Consolidated Audit Trail Funding Fees", and it would include the proposed paragraphs described below.

(A) Fee Schedule for Historical CAT Assessment 1

The CAT NMS Plan states that:

Each month in which a Historical CAT Assessment is in effect, each CEBB and each CEBS shall pay a fee for each transaction in Eligible Securities executed by the CEBB or CEBS from the prior month as set forth in CAT Data, where the Historical CAT Assessment for each transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Historical Fee Rate reasonably determined pursuant to paragraph (b)(i) of this Section 11.3.⁸²

Accordingly, based on the factors discussed above, the Exchange proposes to add paragraph (a)(1) to the Consolidated Audit Trail Funding Fees section of its fee schedule. Proposed

⁸⁰ Section 11.3(b)(i)(D)(II) of the CAT NMS Plan.

⁸¹ In approving the CAT Funding Model, the Commission stated that, "[i]n the Commission's view, it is reasonable for Industry Members to be charged a Historical CAT Assessment until all Historical CAT Costs for the Historical CAT Assessment are collected." CAT Funding Model Approval Order at 62665.

⁸² Section 11.3(b)(iii)(A) of the CAT NMS Plan.

paragraph (a)(1) would state the following:

(A) Each CAT Executing Broker shall receive its first invoice for Historical CAT Assessment 1 in November 2024, which shall set forth the Historical CAT Assessment 1 fees calculated based on transactions in October 2024, and shall receive an invoice for Historical CAT Assessment 1 for each month thereafter in which Historical CAT Assessment 1 is in effect.

(B) Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1 on a monthly basis. Each month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer ("CEBB") and/or the CAT Executing Broker for the Seller ("CEBS") (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of \$0.000013 per executed equivalent share.

(C) Historical CAT Assessment 1 will remain in effect until \$212,039,879.34 (two-thirds of Historical CAT Costs 1) are collected from CAT Executing Brokers collectively, which is estimated to be approximately two years, but could be for a longer or shorter period of time. Consolidated Audit Trail, LLC will provide notice when Historical CAT Assessment 1 will no longer be in effect.

(D) Each CAT Executing Broker shall be required to pay each invoice for Historical CAT Assessment 1 in accordance with paragraph (b).

As noted in the Plan amendment for the CAT Funding Model, "as a practical matter, the fee filing for a Historical CAT Assessment would provide the exact fee per executed equivalent share to be paid for each Historical CAT Assessment, by multiplying the Historical Fee Rate by one-third and describing the relevant number of decimal places for the fee rate.⁸³ Accordingly, proposed paragraph (a)(1)(B) of the fee schedule would set forth a fee rate of \$0.000013 per executed equivalent share. This fee rate is calculated by multiplying Historical Fee Rate 1 of \$0.00003994969693072937 by one-third, and rounding the result to 6 decimal places.⁸⁴ The Operating Committee determined to use six decimal places to balance the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.

⁸³ CAT Funding Model Approval Order at 62658, n.658.

⁸⁴ Dividing \$0.00003994969693072937 by three equals \$0.00001331656564357646. Rounding \$0.00001331656564357646 to six decimal places equals \$0.000013.

The proposed language in paragraph (a)(1)(A) of the fee schedule would describe when CAT Executing Brokers would receive their first monthly invoice for Historical CAT Assessment 1. Specifically, CAT Executing Brokers would receive their first monthly invoice for Historical CAT Assessment 1 in November 2024 and the fees set forth in that invoice would be calculated based on transactions executed in the prior month, that is, transactions executed in October 2024. The payment for the first invoice would be required within 30 days after the receipt of the first invoice (unless a longer period is indicated), as described in paragraph (b)(2) of the fee schedule.

Proposed paragraph (a)(1)(A) of the fee schedule also would describe the monthly cadence of the invoices for Historical CAT Assessment 1. Specifically, after the first invoices are provided to CAT Executing Brokers in November 2024, invoices will be sent to CAT Executing Brokers each month thereafter while Historical CAT Assessment 1 is in effect.

Proposed paragraph (a)(1)(B) of the fee schedule would describe the invoices for Historical CAT Assessment 1. Proposed paragraph (a)(1)(B) of the fee schedule would state that “Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1 on a monthly basis.” Proposed paragraph (a)(1)(B) of the fee schedule also would describe the fees to be set forth in the invoices for Historical CAT Assessment 1. Specifically, it would state that “[e]ach month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer (“CEBB”) and/or the CAT Executing Broker for the Seller (“CEBS”) (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of \$0.000013 per executed equivalent share.”

Furthermore, proposed paragraph (a)(1)(C) of the fee schedule would describe how long Historical CAT Assessment 1 would remain in effect. It would state that “Historical CAT Assessment 1 will remain in effect until \$212,039,879.34 (two-thirds of Historical CAT Costs 1) are collected from CAT Executing Brokers collectively, which is estimated to be approximately two years, but could be for a longer or shorter period of time.” This proposed paragraph would further state that “Consolidated Audit Trail,

LLC will provide notice when Historical CAT Assessment 1 will no longer be in effect.”

Historical CAT Assessment 1 will be assessed for all transactions executed in each month through the end of the month in which two-thirds of Historical CAT Costs 1 are assessed, and then CAT LLC will provide notice that Historical CAT Assessment 1 is no longer in effect. Since Historical CAT Assessment 1 is a monthly fee based on transaction volume from the prior month, Historical CAT Assessment 1 may collect more than two-thirds of Historical CAT Costs 1. To the extent that occurs, any excess money collected during the final month in which Historical CAT Assessment 1 is in effect will be used to offset future fees and/or to fund the reserve for the CAT.

Finally, proposed paragraph (a)(1)(D) of the fee schedule sets forth the requirement for the CAT Executing Brokers to pay the invoices for Historical CAT Assessment 1. It would state that “[e]ach CAT Executing Broker shall be required to pay each invoice for Historical CAT Assessment 1 in accordance with paragraph (b).”

(B) Manner of Payment

Paragraph (b)(1) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule describes the manner of payment of Industry Member CAT fees. Paragraph (b)(1) states that “[e]ach CAT Executing Broker shall pay its CAT fees as required pursuant to paragraph (a) each month to the Consolidated Audit Trail, LLC in the manner prescribed by the Consolidated Audit Trail, LLC.” The CAT NMS Plan requires the Operating Committee to establish a system for the collection of CAT fees.⁸⁵ The Plan Processor has established a billing system for CAT fees.⁸⁶ Therefore, the Exchange proposes to require CAT Executing Brokers to pay Historical CAT Assessment 1 in accordance with such system.

(C) Failure To Pay CAT Fees

The CAT NMS Plan further states that:

Participants shall require each Industry Member to pay all applicable fees authorized under this Article XI within thirty (30) days after receipt of an invoice or other notice indicating payment is due (unless a longer

payment period is otherwise indicated). If an Industry Member fails to pay any such fee when due (as determined in accordance with the preceding sentence), such Industry Member shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of: (a) the Prime Rate plus 300 basis points; or (b) the maximum rate permitted by applicable law.⁸⁷

Accordingly, the Exchange previously has added this requirement to the Exchange’s fee schedule. Specifically, paragraph (b)(2) of the fee schedule states:

Each CAT Executing Broker shall pay the CAT fees required pursuant to paragraph (a) within thirty days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If a CAT Executing Broker fails to pay any such CAT fee when due, such CAT Executing Broker shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of (i) the Prime Rate plus 300 basis points, or (ii) the maximum rate permitted by applicable law.

The requirements of paragraph (b)(2) would apply to Historical CAT Assessment 1.

(7) Historical CAT Assessment Details

The CAT NMS Plan states that:

Details regarding the calculation of a CAT Executing Broker’s Historical CAT Assessment will be provided upon request to such CAT Executing Broker. At a minimum, such details would include each CAT Executing Broker’s executed equivalent share volume and corresponding fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise than on an exchange, and (3) by buy-side transactions and sell-side transactions.⁸⁸

Such information would provide CEBBs and CEBSS with the ability to understand the details regarding the calculation of their Historical CAT Assessment.⁸⁹ CAT LLC will provide CAT Executing Brokers with these details regarding the calculation of their Historical CAT Assessments on their monthly invoice for the Historical CAT Assessment.

In addition, CAT LLC will make certain aggregate statistics regarding Historical CAT Assessments publicly available. Specifically, the CAT NMS

⁸⁵ Section 11.4 of the CAT NMS Plan.

⁸⁶ The billing process and system are described in CAT Alert 2023–02 as well as the CAT FAQs related to the billing of CAT fees, the Industry Member CAT Reporter Portal User Guide, the FCAT Industry Member Onboarding Guide, the FCAT Connectivity Supplement for Industry Members and the CAT Billing Webinars (dated Sept. 28, 2023, and Nov. 7, 2023), each available on the CAT website.

⁸⁷ Section 11.4 of the CAT NMS Plan.

⁸⁸ Section 11.3(a)(iv)(A) of the CAT NMS Plan.

⁸⁹ In approving the CAT Funding Model, the Commission stated that, “[i]n the Commission’s view, providing CAT Execut[ing] Brokers information regarding the calculation of their CAT Fees will aid in transparency and permit CAT Execut[ing] Brokers to confirm the accuracy of their invoices for CAT Fees.” CAT Funding Model Approval Order at 62667.

Plan states that, “[f]or each Historical CAT Assessment, at a minimum, CAT LLC will make publicly available the aggregate executed equivalent share volume and corresponding aggregate fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise on an exchange, and (3) by buy-side transactions and sell-side transactions.”⁹⁰ Such aggregate statistics will be available on the CAT website.

Furthermore, CAT LLC will make publicly available on the CAT website the total amount invoiced each month that Historical CAT Assessment 1 is in effect as well as the total amount invoiced for Historical CAT Assessment 1 for all months since its commencement. CAT LLC also will make publicly available on the CAT website the total costs to be collected from Industry Members for Historical CAT Assessment 1. By reviewing statistics regarding how much has been invoiced and how much remains to be invoiced for Historical CAT Assessment 1, Industry Members would have sufficient information to reasonably track how much longer Historical CAT Assessment 1 is likely to be in place.

(8) Implementation Assistance

To assist Industry Members with compliance with the commencement of Historical CAT Assessment 1, CAT LLC has been making available to CAT Executing Brokers mock invoices prior to the commencement of Historical CAT Assessment 1. Specifically, CAT Executing Brokers have received mock invoices based on transaction data each month since November 2023. The mock invoices are in the same form as the actual, payable invoices, including both the relevant transaction data and the corresponding fee. However, no payments have been required in response to such mock invoices; they have been used solely to assist CAT Executing Brokers with the development of their processes for paying the CAT fees. Such data has provided CAT Executing Brokers with a preview of the transaction data used in creating the invoices for Historical CAT Assessment 1 fees, as the data will be the same as data provided in actual invoices. Such data preview is intended

to facilitate the payment of Historical CAT Assessment 1.

(9) Financial Accountability Milestones

The CAT NMS Plan states that “[n]o Participant will make a filing with the SEC pursuant to Section 19(b) of the Exchange Act regarding any Historical CAT Assessment until any applicable Financial Accountability Milestone described in Section 11.6 has been satisfied.”⁹¹ The CAT NMS Plan further states that “in all filings submitted by the Participants to the Commission under Section 19(b) of the Exchange Act, to establish or implement Post-Amendment Industry Member Fees pursuant to this Article, . . . the Participants shall clearly indicate whether such fees are related to Post-Amendment Expenses incurred during Period 1, Period 2, Period 3, or Period 4.”⁹² As discussed in detail below, all applicable Financial Accountability Milestones for Historical CAT Assessment 1—that is, Period 1, Period 2 and Period 3 of the Financial Accountability Milestones—have been satisfied. Furthermore, as discussed below, this filing clearly indicates that Historical CAT Assessment 1 relates to Post-Amendment Expenses incurred during Periods 1, 2 and 3 of the Financial Accountability Milestones.

(A) Period 1 of the Financial Accountability Milestones

In accordance with Section 11.6(b) of the CAT NMS Plan, Historical CAT Assessment 1 seeks to recover costs that are related to “all fees, costs, and expenses (including legal and consulting fees, costs, and expenses) incurred by or for the Company in connection with the development, implementation and operation of the CAT from the effective date of [Section 11.6 of the CAT NMS Plan] until such time as Full Implementation of CAT NMS Plan Requirements has been achieved”⁹³ (“Post-Amendment Expenses”) incurred during FAM Period 1. FAM Period 1 began on June 22, 2020, the effective date of Section 11.6 of the CAT NMS Plan, and concluded on July 31, 2020, the date of Initial Industry Member Core Equity and Options Reporting. Section 1.1 of the CAT NMS Plan defines “Initial Industry Member Core Equity and Options Reporting” as:

The reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of both: (a) equities

transaction data, excluding Customer Account Information, Customer-ID, and Customer Identifying Information; and (b) options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information.

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants’ Quarterly Progress Reports.⁹⁴ As indicated by the Participants’ Quarterly Progress Report for the third quarter of 2020,⁹⁵ Initial Industry Member Core Equity and Option Reporting was completed on schedule on July 22, 2020, which is prior to the July 31, 2020 deadline.

Under the FAM Period 1 requirement of Initial Industry Member Core Equity and Options Reporting, Industry Members—excluding Small Industry Members that are not OATS reporters—were required to report two categories of data to the CAT: equities transaction data and options transaction data (both excluding Customer Account Information, Customer-ID, and Customer Identifying Information) by July 31, 2020. Pursuant to exemptive relief provided by the Commission, the Commission authorized the Participants’ Compliance Rules to allow core equity reporting for Industry Members (Phase 2a) to begin on June 22, 2020 and core options reporting for Industry Members (Phase 2b) to begin on July 20, 2020.⁹⁶

In adopting the FAMs, the Commission stated that the equities transaction reporting required for FAM Period 1 “is consistent with the functionality that the Participants describe on the CAT NMS Plan website as ‘Production Go-Live for Equities 2a file submission and data integrity

⁹⁴ The Quarterly Progress Reports are available at <https://www.catnmsplan.com/implementation-plan>.

⁹⁵ See Q3 2020 Quarterly Progress Report (Oct. 30, 2020) and Updated Q3 2020 Quarterly Progress Report (Jan. 29, 2021).

⁹⁶ See Phased Reporting Exemptive Relief Order. Under the CAT NMS Plan as adopted, the Participants were required, through their Compliance Rules, to require their Large Industry Members to commence reporting Industry Member Data to the Central Repository by November 15, 2018, and to require their Small Industry Members to commence reporting Industry Member Data to the Central Repository by November 15, 2019. Sections 6.7(a)(v) and (vi) of the CAT NMS Plan. The SEC granted exemptive relief from these provisions of the CAT NMS Plan to allow for the phased implementation of Industry Member reporting via five phases addressing the reporting requirements for Phase 2a Industry Member Data, Phase 2b Industry Member Data, Phase 2c Industry Member Data, Phase 2d Industry Member Data and Phase 2e Industry Member Data.

⁹⁰ Section 11.3(a)(iv)(B) of the CAT NMS Plan. In approving the CAT Funding Model, the Commission stated that “[t]he publication of the aggregate executed equivalent share volume and aggregate fee is appropriate because it would allow Participants and CAT Executing Brokers a high-level validation of executed volume and fees.” CAT Funding Model Approval Order at 62667.

⁹¹ Section 11.3(b)(iii)(B)(III) of the CAT NMS Plan.

⁹² Section 11.6(b) of the CAT NMS Plan.

⁹³ Section 11.6 of the CAT NMS Plan.

validations.’’⁹⁷ The Phase 2a Industry Member Data is described in detail in the SEC’s Phased Reporting Exemptive Relief Order, and includes the following data related to Eligible Securities that are equities:

- All events and scenarios covered by OATS, which includes information related to the receipt or origination of orders, order transmittal, and order modifications, cancellations and executions;

- Reportable Events for: (1) proprietary orders, including market maker orders, for Eligible Securities that are equities; (2) electronic quotes in listed equity Eligible Securities (*i.e.*, NMS stocks) sent to a national securities exchange or FINRA’s Alternative Display Facility (“ADF”); (3) electronic quotes in unlisted Eligible Securities (*i.e.*, OTC Equity Securities) received by an Industry Member operating an interdealer quotation system (“IDQS”); and (4) electronic quotes in unlisted Eligible Securities sent to an IDQS or other quotation system not operated by a Participant or Industry Member;

- Firm Designated IDs (“FDIDs”), which Industry Members must report to the CAT as required by Sections 6.3(d)(i)(A) and 6.4(d)(ii)(C) of the CAT NMS Plan;

- Industry Members would be required to report all street side representative orders, including both agency and proprietary orders and mark such orders as representative orders, except in certain limited exceptions as described in the Industry Member Technical Specifications;

- The link between the street side representative order and the order being represented when: (1) the representative order was originated specifically to represent a single order received either from a customer or another broker-dealer; and (2) there is (a) an existing direct electronic link in the Industry Member’s system between the order being represented and the representative order and (b) any resulting executions are immediately and automatically applied to the represented order in the Industry Member’s system;

- Manual and Electronic Capture Time for Manual Order Events;

- Special handling instructions for the original receipt or origination of an order during Phase 2a; and

- When routing an order, whether the order was routed as an intermarket sweep order (“ISO”).

In Phase 2a, Industry Members were not required to report modifications of

a previously routed order in certain limited instances, nor were they required to report a cancellation of an order received from a Customer after the order has been executed.⁹⁸

The Quarterly Progress Report for the third quarter of 2020 states that “Interim Step: Production Go-Live for Equities 2a file submission and data integrity validation (Large Industry Members and Small OATS Reporters)” was completed on June 22, 2020. Accordingly, the FAM Period 1 requirement of reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of “equities transaction data, excluding Customer Account Information, Customer-ID, and Customer Identifying Information” was completed on June 22, 2020.

In adopting the FAMS, the Commission stated that the options transaction reporting required for FAM Period 1 is “consistent with the functionality that the Participants describe on the CAT NMS Plan website as ‘Production Go-Live for Options 2b file submission and data integrity validations.’”⁹⁹ The Phase 2b Industry Member Data is described in detail in the SEC’s Phased Reporting Exemptive Relief Order, and includes the Industry Member Data related to Eligible Securities that are options and related to simple electronic option orders, excluding electronic paired option orders. A simple electronic option order is an order to buy or sell a single option that is not related to or dependent on any other transaction for pricing and timing of execution that is either received or routed electronically by an Industry Member. Electronic receipt of an order is defined as the initial receipt of an order by an Industry Member in electronic form in standard format directly into an order handling or execution system. Electronic routing of an order is the routing of an order via electronic medium in standard format from one Industry Member’s order handling or execution system to an exchange or another Industry Member. An electronic paired option order is an electronic option order that contains both the buy and sell side that is routed to another Industry Member or exchange for crossing and/or price improvement as a single transaction on an exchange. Responses to auctions of simple orders and paired simple orders would be reportable in Phase 2b. Furthermore, combined orders in options would be treated in Phase 2b in the same way as equity representative orders are treated

in Phase 2a. A combined order would mean, as permitted by SRO rules, a single, simple order in Listed Options created by combining individual, simple orders in Listed Options from a customer with the same exchange origin code before routing to an exchange. During Phase 2b, the single combined order sent to an exchange must be reported and marked as a combined order, but the linkage to the underlying orders is not required to be reported until Phase 2d.¹⁰⁰

The Quarterly Progress Report for the third quarter of 2020 states that “Interim Step: Production Go-Live for Options 2b file submission and data integrity validations” was completed on July 20, 2020. Accordingly, the FAM Period 1 requirement of reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of “options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information” was completed on July 20, 2020.

As discussed above, the Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1 would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from June 22, 2020 through July 31, 2020. The total costs for this period, as discussed above, are \$6,377,343. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$2,125,781) and CEBBs paying one-third (\$2,125,781).

(B) Period 2 of the Financial Accountability Milestones

Historical CAT Assessment 1 seeks to recover costs that are related to Post-Amendment Expenses incurred during FAM Period 2. FAM Period 2 began on August 1, 2020, and concluded on December 31, 2020, the date of the Full Implementation of Core Equity Reporting. Section 1.1 of the CAT NMS Plan defines “Full Implementation of Core Equity Reporting” as:

the point at which: (a) Industry Member reporting (excluding reporting by Small Industry Members that are not OATS reporters) for equities transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, is developed, tested, and implemented at a 5% Error Rate or less and with sufficient intra-

⁹⁷ Securities Exchange Act Rel. No. 88890 (May 15, 2020), 85 FR 31322, 31330 n.97 (May 22, 2020) (“FAM Adopting Release”).

⁹⁸ Phased Reporting Exemptive Relief Order at 23076–78.

⁹⁹ FAM Adopting Release at 31330, n.98.

¹⁰⁰ Phased Reporting Exemptive Relief Order at 23078.

firm linkage, inter-firm linkage, national securities exchange linkage, and trade reporting facilities linkage to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, excluding linkage of representative orders, from order origination through order execution or order cancellation; and (b) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3 and Section 8.2.1 incorporates the Industry Member equities transaction data described in condition (a) and is available to the Participants and to the Commission. This Financial Accountability Milestone shall be considered complete as of the date identified in a Quarterly Progress Report meeting the requirements of Section 6.6(c).

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports. As indicated by the Participants' Quarterly Progress Report for the fourth quarter of 2020,¹⁰¹ Full Implementation of Core Equity Reporting was completed on schedule by December 31, 2020.

Specifically, the Full Implementation of Core Equity Reporting requires the satisfaction of two prongs. The first prong requires Participants to have fully implemented the first phase of equities transaction reporting for Industry Members (excluding Small Industry Members that are not OATS reporters) at an Error Rate of less than 5%. In addition, equities transaction data produced by the CAT at this stage must also be sufficiently interlinked so as to permit full analysis of an order's lifecycle across the national market, excluding full linkage of representative orders. As CAT LLC reported on its Quarterly Progress Reports, Phase 2a was fully implemented as of October 26, 2020, including intra-firm, inter-firm, national securities exchange, and trade reporting facilities linkages.¹⁰² In addition to the reporting of Phase 2a Industry Member Data as described above with regard to FAM Period 1, the following linkage data was added to the CAT as described in the Quarterly Progress Reports for the third and fourth quarter of 2020:

- “Production Go-Live for Equities 2a Intrafirm Linkage validations” was completed on 7/27/2020;¹⁰³
- “Production Go-Live for Firm to Firm Linkage validations for Equities 2a (Large Industry Members and Small

OATS Reporters)” was completed on October 26, 2020; and

- “Production Go-Live for Equities 2a Exchange and TRF Linkage validations (Large Industry Members and Small OATS Reporters)” was completed on October 26, 2020.

Furthermore, as CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2020, the average overall error rate for Phase 2a Industry Member Data was less than 5% as of December 31, 2020. The average overall error rate was calculated by dividing the compliance errors by processed records.

The second prong of this FAM requires that the equities transaction data collected by the CAT at this stage be made available to regulators through two basic query tools required by the CAT NMS Plan—a targeted query tool that will enable regulators to retrieve data via an online query screen with a variety of predefined selection criteria, and a user-defined direct query tool that will provide regulators with the ability to query data using all available attributes and data sources.¹⁰⁴ As CAT LLC reported on its Quarterly Progress Reports, the query tool functionality incorporating the data from Phase 2a was available to the Participants and the Commission as of December 31, 2020.¹⁰⁵

The Commission has determined that the Participants have sufficiently complied with the conditions set forth in the 2020 Orders and with the technical requirements for Quarterly Progress Reports set forth in Section 6.6(c) of the CAT NMS Plan for purposes of determining compliance with this FAM.¹⁰⁶

As discussed above, Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1 would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from August 1, 2020 through December 31, 2020. The total costs for this period, as discussed above, are \$42,976,478.

¹⁰⁴ Section 6.10(c)(i)(A) of the CAT NMS Plan requires the Plan Processor to “provide Participants and the SEC with access to all CAT Data stored in the Central Repository” via an “online targeted query tool.” Appendix D, Sections 8.1.1–8.1.3 of the CAT NMS Plan describes the required functionality associated with this regulatory tool. Appendix D, Section 8.2.1 describes the required functionality associated with a user-defined direct query tool that will “deliver large sets of data that can then be used in internal surveillance or market analysis applications.”

¹⁰⁵ See Q3 2020 Quarterly Progress Report (Oct. 30, 2020); Updated Q3 2020 Quarterly Progress Report (Jan. 29, 2021); and Q4 2020 Quarterly Progress Report (Jan. 29, 2021).

¹⁰⁶ Securities Exchange Act Rel. No. 98848 (Nov. 2, 2023), 88 FR 77128, 77129 n.13 (Nov. 8, 2023) (“Settlement Exemptive Order”).

Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remain [*sic*] two-thirds, with CEBBs paying one-third (\$14,325,492.70) and CEBBs paying one-third (\$14,325,492.70).

(C) Period 3 of the Financial Accountability Milestones

Historical CAT Assessment 1 seeks to recover costs that are related to Post-Amendment Expenses incurred during FAM Period 3. FAM Period 3 began on January 1, 2021, and concluded on December 31, 2021, the date of the Full Availability and Regulatory Utilization of Transactional Database Functionality. Section 1.1 of the CAT NMS Plan defines “Full Availability and Regulatory Utilization of Transactional Database Functionality” as:

the point at which: (a) reporting to the Order Audit Trail System (“OATS”) is no longer required for new orders; (b) Industry Member reporting for equities transactions and simple electronic options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, trade reporting facilities linkage, and representative order linkages (including any equities allocation information provided in an Allocation Report) to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, is developed, tested, and implemented at a 5% Error Rate or less; (c) Industry Member reporting for manual options transactions and complex options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with all required linkages to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, including any options allocation information provided in an Allocation Report, is developed, tested, and fully implemented; (d) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3, Section 8.2.1, and Section 8.5 incorporates the data described in conditions (b)–(c) and is available to the Participants and to the Commission; and (e) the requirements of Section 6.10(a) are met. This Financial Accountability Milestone shall be considered complete as of the date identified in a Quarterly Progress Report meeting the requirements of Section 6.6(c).

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports. As indicated by the Participants' Quarterly Progress

¹⁰¹ Q4 2020 Quarterly Progress Report (Jan. 29, 2021).

¹⁰² For a description of the requirements of Phases 2a, see Phased Reporting Exemptive Relief Order.

¹⁰³ Q3 2020 Quarterly Progress Report (Oct. 20, 2021).

Report for the fourth quarter of 2021,¹⁰⁷ Full Availability and Regulatory Utilization of Transactional Database Functionality was completed on schedule by December 31, 2021.

Specifically, the “Full Availability and Regulatory Utilization of Transactional Database Functionality” requires the satisfaction of five prongs. The first prong requires that reporting to the Order Audit Trail System (“OATS”) is no longer required for new orders. As CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2021,¹⁰⁸ FINRA retired OATS effective September 1, 2021.¹⁰⁹ Accordingly, after the retirement of OATS, reporting to OATS was no longer required.

In addition to Phase 2a and Phase 2b Industry Member Data, the second and third prongs of “Full Availability and Regulatory Utilization of Transactional Database Functionality” require Industry Member reporting of Phase 2c Industry Member Data and Phase 2d Industry Member Data. The Phase 2c Industry Member Data is described in detail in the SEC’s Phased Reporting Exemptive Relief Order. That Order states that “Phase 2c Industry Member Data” is Industry Member Data related to Eligible Securities that are equities other than Phase 2a Industry Member Data, Phase 2d Industry Member Data, or Phase 2e Industry Member Data. Specifically, the Phase 2c Industry Member Data includes Industry Member Data that is related to Eligible Securities that are equities and that is related to: (1) Allocation Reports as required to be recorded and reported to the Central Repository pursuant to Section 6.4(d)(ii)(A)(1) of the CAT NMS Plan; (2) quotes in unlisted Eligible Securities sent to an IDQS operated by a CAT Reporter (reportable by the Industry Member sending the quotes) (except for quotes reportable in Phase 2d, as discussed below); (3) electronic quotes in listed equity Eligible Securities (*i.e.*, NMS stocks) that are not sent to a national securities exchange or FINRA’s Alternative Display Facility; (4) reporting changes to client instructions regarding modifications to algorithms; (5) marking as a representative order any order originated to work a customer order in price guarantee scenarios, such as a guaranteed VWAP; (6) flagging rejected external routes to indicate a route was not accepted by the receiving destination; (7) linkage of duplicate electronic messages related to a Manual

Order Event between the electronic event and the original manual route; (8) special handling instructions on order route reports (other than the ISO, which is required to be reported in Phase 2a); (9) quote identifier on trade events; (10) reporting of LTIDs (if applicable) for accounts with Reportable Events that are reportable to CAT as of and including Phase 2c; (11) reporting of date account opened or Account Effective Date (as applicable) for accounts and reporting of a flag indicating the Firm Designated ID type as account or relationship; (12) order effective time for orders that are received by an Industry Member and do not become effective until a later time; (13) the modification or cancellation of an internal route of an order; and (14) linkages to the customer orders(s) being represented for representative order scenarios, including agency average price trades, net trades, aggregated orders, and disconnected Order Management System (“OMS”)—Execution Management System (“EMS”) scenarios, as required in the Industry Member Technical Specifications.¹¹⁰

Phase 2c Industry Member Data also includes electronic quotes that are provided by or received in a CAT Reporter’s order/quote handling or execution systems in Eligible Securities that are equities and are provided by an Industry Member to other market participants off a national securities exchange under the following conditions: (1) an equity bid or offer is displayed publicly or has been communicated (a) for listed securities to the ADF operated by FINRA; or (b) for unlisted equity securities to an “interdealer quotation system,” as defined in FINRA Rule 6420(c); or (2) an equity bid or offer which is accessible electronically by customers or other market participants and is immediately actionable for execution or routing; *i.e.*, no further manual or electronic action is required by the responder providing the quote in order to execute or cause a trade to be executed). With respect to OTC Equity Securities, OTC Equity Securities quotes sent by an Industry Member to an IDQS operated by an Industry Member CAT Reporter (other than such an IDQS that does not match and execute orders) are reportable by the Industry Member sending them in Phase 2c. Accordingly, any response to a request for quote or other form of solicitation response provided in a standard electronic format (*e.g.*, FIX) that meets this quote definition (*i.e.*, an equity bid or offer which is accessible

electronically by customers or other market participants and is immediately actionable for execution or routing) would be reportable in Phase 2c.¹¹¹

The Phase 2d Industry Member Data is described in detail in the SEC’s Phased Reporting Exemptive Relief Order. “Phase 2d Industry Member Data” is Industry Member Data that is related to Eligible Securities that are options other than Phase 2b Industry Member Data, Industry Member Data that is related to Eligible Securities that are equities other than Phase 2a Industry Member Data or Phase 2c Industry Member Data, and Industry Member Data other than Phase 2e Industry Member Data. Phase 2d Industry Member Data includes with respect to the Eligible Securities that are options: (1) simple manual orders; (2) electronic and manual paired orders; (3) all complex orders with linkages to all CAT-reportable legs; (4) LTIDs (if applicable) for accounts with Reportable Events for Phase 2d; (5) date account opened or Account Effective Date (as applicable) for accounts with an LTID and flag indicating the Firm Designated ID type as account or relationship for such accounts; (6) Allocation Reports as required to be recorded and reported to the Central Repository pursuant to Section 6.4(d)(ii)(A)(1) of the CAT NMS Plan; (7) the modification or cancellation of an internal route of an order; and (8) linkage between a combined order and the original customer orders. Phase 2d Industry Member Data also would include electronic quotes that are provided by or received in a CAT Reporter’s order/quote handling or execution systems in Eligible Securities that are options and are provided by an Industry Member to other market participants off a national securities exchange under the following conditions: a listed option bid or offer which is accessible electronically by customers or other market participants and is immediately actionable (*i.e.*, no further action is required by the responder providing the quote in order to execute or cause a trade to be executed). Accordingly, any response to a request for quote or other form of solicitation response provided in standard electronic format (*e.g.*, FIX) that meets this definition is reportable in Phase 2d for options.¹¹²

Phase 2d Industry Member Data also includes with respect to Eligible Securities that are options or equities (1) receipt time of cancellation and modification instructions through Order Cancel Request and Order Modification

¹⁰⁷ Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

¹¹² *Id.*

Request events; (2) modifications of previously routed orders in certain instances; and (3) OTC Equity Securities quotes sent by an Industry Member to an IDQS operated by an Industry Member CAT Reporter that does not match and execute orders. In addition, subject to any exemptive or other relief, Phase 2d Industry Member Data will include verbal or manual quotes on an exchange floor or in the over-the-counter market, where verbal quotes and manual quotes are defined as bids or offers in Eligible Securities provided verbally or that are provided or received other than via a CAT Reporter's order handling and execution system (e.g., quotations provided via email or instant messaging).¹¹³

The Quarterly Progress Report for the fourth quarter of 2021 states that "Phase 2a was fully implemented as of October 26, 2020;" "Phase 2b was fully implemented as of January 4, 2021;" "Phase 2c was implemented as of April 26, 2021;" and "Phase 2d was fully implemented as of December 13, 2021."¹¹⁴ The Quarterly Progress Reports for 2021 provide additional detail regarding the implementation of these steps including the following:

- "Production Go-Live for Equities 2c reporting requirements (Large Industry Members)" was completed on April 26, 2021;
- "LTID Account Information Reporting Go-Live for Phases 2a, 2b and 2c (Large Industry Members)" was completed on April 26, 2021;
- "FCAT Plan Processor creates linkages of the lifecycle of order events based on the received data through Phase 2d Production Go-Live for Options 2d reporting requirements (Large Industry Members)" was completed on December 13, 2021;
- "Production Go-Live for Options 2d reporting requirements (Large Industry Members)" was completed on December 13, 2021;
- "Production Go-Live for Options 2b reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)" was completed on December 13, 2021;
- "Production Go-Live for Equities 2c reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)" was completed on December 13, 2021;
- "Production Go-Live for Options 2d reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)" was completed on December 13, 2021;

- "LTID Account Information Reporting Go-Live for Phases 2d (Large Industry Members)" was completed on December 13, 2021; and

- "LTID Account Information Reporting Go-Live for Phases 2a, 2b, 2c and 2d (Small Industry Members)" was completed on December 13, 2021.¹¹⁵

The third prong of "Full Availability and Regulatory Utilization of Transactional Database Functionality" also imposes an Error Rate requirement of 5% or less. The Quarterly Progress Report for the fourth quarter of 2021 states the average overall error rate was less than 5% as of December 31, 2021. The average overall error rate was calculated by dividing the compliance errors by processed records.

The fourth prong of "Full Availability and Regulatory Utilization of Transactional Database Functionality" requires that the data collected by the CAT at this stage be made available to regulators through an online targeted query tool and a user-defined direct query tool. As CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2021, the query tool functionality incorporating the data from Phases 2a, 2b, 2c and 2d was available to the Participants and to the Commission as of December 31, 2021.¹¹⁶

The fifth prong requires the requirements of Section 6.10(a) of the CAT NMS Plan to have been met. Section 6.10(a) of the CAT NMS Plan requires the Participants to use the tools described in Appendix D to "develop and implement a surveillance system, or enhance existing surveillance systems, reasonably designed to make use of the consolidated information contained in the Central Repository." The Exchange implemented a surveillance system, or enhanced existing surveillance systems, reasonably designed to make use of the consolidated information contained in the Central Repository as of December 31, 2021 in accordance with Section 6.10(a) of the CAT NMS Plan.¹¹⁷

The Commission has determined that the Participants have sufficiently complied with the conditions set forth in the 2020 Orders and with the technical requirements for Quarterly Progress Reports set forth in Section 6.6(c) of the CAT NMS Plan for

purposes of determining compliance with this FAM.¹¹⁸

As discussed above, Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1 would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2021 through December 31, 2021. The total costs for this period, as discussed above, are \$144,415,268. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remain [*sic*] two-thirds, with CEBBs paying one-third (\$48,138,422.70) and CEBBs paying one-third (\$48,138,422.70).

(D) Additional Considerations Related to the Financial Accountability Milestones

As discussed above, CAT LLC has satisfied the Financial Accountability Milestones ("FAMs") for Periods 1 through 3.¹¹⁹ As discussed below, none of the circumstances related to NIA Electronic RFQ Responses, the 2023 Verbal Quotes Exemption, the November 2023 Order, or Executing Broker reporting, affect the conclusion that the FAMs for Periods 1 through 3 were satisfied in a timely fashion.

(i) NIA Electronic RFQ Responses

CAT LLC does not believe that the exemptive relief relating to the reporting of electronic responses for quotes ("RFQs") that are not immediately actionable ("NIA Electronic RFQ Responses") affect the conclusion that FAMs 1 through 3 have been satisfied. The only reason CAT LLC pursued this relief is because certain Industry Members introduced concerns that NIA Electronic RFQ Responses could be considered "orders" reportable pursuant to Rule 613(j)(8) and some Industry Members were not prepared to report such orders to CAT. Thus, the relief was requested on behalf of Industry Members. CAT LLC itself has not taken any position on whether NIA Electronic RFQ Responses are "orders," as the definition of "order" is an SEC rule and the trading processes for NIA Electronic RFQ Responses are the Industry Members', not those of the Participants

¹¹⁵ See Q2 2021 Quarterly Progress Report (July 27, 2021); and Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

¹¹⁶ See, Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

¹¹⁷ See Q1 2021 Quarterly Progress Report (Apr. 30, 2021); Q2 2021 Quarterly Progress Report (July 27, 2021); Q3 2021 Quarterly Progress Report (Nov. 1, 2021); Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

¹¹⁸ Settlement Exemptive Order at 77129 n.13.

¹¹⁹ In May 2020, the Commission adopted amendments to the CAT NMS Plan that establish four Financial Accountability Milestones and set target deadlines by which these milestones must be achieved. These amendments also reduce the amount of any fees, costs, and expenses that may be recovered from Industry Members if the Participants fail to meet the target deadlines. FAM Adopting Release.

¹¹³ *Id.* at 23079–80.

¹¹⁴ See Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

or CAT LLC. Accordingly, CAT LLC stated in its letter that “Industry Members must determine whether trading interest falls within the definition of an ‘order’ for CAT purposes. To the extent an NIA Electronic RFQ Response is not considered an ‘order’ as defined in Rule 613(j)(8) and the CAT NMS Plan, it would not be reportable to CAT.”¹²⁰

Only “orders” as defined in SEC Rule 613(j)(8) are reportable to CAT. There is no agreement across the industry or among regulators as to whether NIA Electronic RFQ Responses are “orders” reportable to CAT. Certain Industry Members have raised the question as to whether NIA Electronic RFQ Responses are orders, but others have argued that they are not orders under Rule 613(j)(8).¹²¹ Indeed, members of the Advisory Committee, which CAT LLC relies upon for guidance with regard to Industry Member issues, have not had a definitive view on whether NIA Electronic RFQ Responses are orders. As Rule 613(j)(8) is an SEC rule, CAT LLC believes that only the SEC can provide a definitive determination as to if, and under what circumstances, an NIA Electronic RFQ Response is considered an “order” reportable to CAT. The issue has persisted for some time. As a result, CAT LLC filed an exemptive request regarding NIA Electronic RFQ Responses for clarity on the interpretive issue. As recently as April 2024, Industry Members have re-raised this issue stating that the SEC agrees that it must provide additional guidance on this interpretive issue to resolve the CAT reporting issue for NIA Electronic RFQ Responses:

As further discussed in the prior FIF letters, even if the Commission had the legal authority to require the reporting of NIA RFQ responses to CAT without an amendment to Rule 613, the Commission has not provided guidance to industry members as to the conditions under which NIA RFQ responses would be reportable to CAT. In subsequent discussions with industry members, Commission representatives have agreed that, prior to NIA RFQ responses being reportable to CAT, it would be necessary for the Commission to provide further guidance to industry members as to the conditions under which NIA RFQ responses would be reportable to CAT.¹²²

On May 20, 2024, the Commission granted CAT LLC’s request for

exemptive relief from certain CAT reporting requirements pertaining to NIA Electronic RFQ Responses to the extent such responses are considered “orders” reportable pursuant to Rule 613(j)(8).¹²³ The Commission, however, did not provide additional guidance regarding the conditions under which NIA Electronic RFQ Responses would be reportable to CAT. The Commission stated in its exemptive order that “[t]o the extent that the Participants are availing themselves of exemptive relief from a CAT NMS Plan requirement, such requirement shall not be included in the requirements for the Financial Accountability Milestones, provided that any conditions of the exemption are satisfied.”¹²⁴

When the Commission proposed the FAMS, the Participants expressed concern that, “by conditioning the ability of CAT LLC and the Participants to collect Post-Amendment Industry Member Fees on factors dependent on the efforts of Industry Members, the Commission’s proposals inadvertently establish a perverse incentive for Industry Members to devote less than maximum efforts to comply with their obligations related to the CAT as they will pay less fees in such instances.”¹²⁵ The Participants further warned that “Industry Members may request or require unanticipated reporting delays to address Industry Member implementation issues or concerns,” but that, “[f]aced with financial penalties for missed deadlines, the Participants may not be able to fully address legitimate industry concerns or accommodate requests for delays with respect to future deadlines.”¹²⁶ CAT LLC has engaged in good faith to help address NIA Electronic RFQ Responses and other concerns relevant to the ability of Industry Members to meet their CAT reporting obligations. CAT LLC should not be penalized financially for seeking in good faith to resolve a difficult interpretive issue for the benefit of Industry Members.

(ii) 2023 Verbal Quotes Exemption

CAT LLC does not believe that the Commission’s May 19, 2023 order granting temporary exemptive relief relating to certain verbal floor activity and unstructured verbal and electronic upstairs activity (the “2023 Verbal Quotes Exemption”) affects the

conclusion that FAMS 1 through 3 have been satisfied. The 2023 Verbal Quotes Exemption, which was issued on May 19, 2023, is not relevant for purposes of FAM Periods 1 through 3, which only cover the period through December 31, 2021. The relevant exemption for this time period is the Commission’s November 12, 2020 order, which granted relief for the same activity through July 31, 2023 (the “2020 Verbal Quotes Order”).¹²⁷ The Commission has stated that, “to the extent that the Participants are availing themselves of exemptive relief from a CAT NMS Plan requirement, such requirement shall not be included in the requirements for a Financial Accountability Milestone, provided that the conditions of the exemption are satisfied.”¹²⁸ Here, the 2020 Verbal Quotes Order was in effect and the conditions of the exemption were satisfied as of December 31, 2021, and therefore may be relied upon for purposes of determining compliance with FAM Periods 1 through 3.¹²⁹

(iii) November 2023 Order

CAT LLC does not believe that the Commission’s November 2, 2023 order granting relief from certain CAT NMS Plan requirements (the “November 2023 Order”) affects the conclusion that FAMS 1 through 3 have been satisfied. The November 2023 Order is not relevant for purposes of FAM Periods 1 through 3, which only cover the period through December 31, 2021. As described in the November 2023 Order, the relevant exemptive orders for this time period were issued on December 16, 2020, which also states that “the Commission has determined that the Participants have sufficiently complied with the conditions set forth in the prior Orders and with the technical requirements for Quarterly Progress

¹²⁷ Securities Exchange Act Rel. No. 90405, 85 FR 73544 (Nov. 18, 2020) (the “2020 Verbal Quotes Exemption”).

¹²⁸ See, e.g., Securities Exchange Act Rel. No. 89051 (June 11, 2020), 85 FR 36631, 36633 (June 17, 2020). The straightforward reading of the Commission’s statement is that compliance with the conditions of an exemption will be measured as of the deadline for a particular FAM Period.

¹²⁹ As a condition to the 2020 Verbal Quotes Exemption, the Commission required that the Participants provide a written status update on the reporting of these quotes and orders by July 31, 2022, including the estimated costs of reporting these quotes and orders and an implementation plan for the reporting of these quotes and orders. As noted, the 2020 Verbal Quotes Order was in effect and the conditions of the exemption were satisfied as of December 31, 2021, and therefore may be relied upon for purposes of determining compliance with FAM Periods 1 through 3. In any event, on June 3, 2022, the Participants provided the required written status update. See Letter from Michael Simon, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission (June 3, 2022).

¹²⁰ See Letter from Brandon Becker, Chair, CAT NMS Plan Operating Committee to Vanessa Countryman, Secretary, Commission (Feb. 13, 2024) at 2.

¹²¹ See, e.g., Letter from Howard Meyerson, Managing Director, FIF, to Sai Rao, Counsel for Trading and Markets, Office of the Chair (Apr. 25, 2024).

¹²² *Id.*

¹²³ Securities Exchange Act Rel. No. 100181 (May 20, 2024), 89 FR 45715 (May 23, 2024).

¹²⁴ *Id.* at n.11.

¹²⁵ See Letter from Michael Simon, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission at 9 (Oct. 28, 2019).

¹²⁶ *Id.* at 10.

Reports set forth in section 6.6(c) of the CAT NMS Plan, including for purposes of determining compliance with any applicable Financial Accountability Milestones.”¹³⁰ The November 2023 Exemption Order is consistent with the Commission’s repeated statements in the FAM adopting release that it would have “authority to grant exemptive relief from any requirement associated with a particular Financial Accountability Milestone,” citing Section 36 of the Exchange Act and Rule 608.¹³¹ Similarly, the CAT NMS Plan expressly contemplates the Commission’s ability to grant exemptive relief from any CAT NMS Plan requirement.¹³²

(iv) Executing Broker Reporting

CAT LLC also completed the requirements of FAM Period 2, including the required linkages, by December 31, 2020. Although Participant exchanges may report the Executing Broker to CAT differently in certain situations, these reporting differences are irrelevant for linkage purposes as the fields used for CAT Executing Broker are not used for linkage.

(10) Additional Support for Reasonableness of Historical CAT Costs

The CAT Funding Model approved by the Commission permits the recovery of reasonable costs in each of the categories of CAT costs sought to be recovered via Historical CAT Assessment 1.¹³³ As described in detail above and in further detail below, the CAT costs to be recovered for each category are reasonable. The following

discusses in further details how each of the following costs are reasonable: (1) costs incurred prior to the effective date of the CAT NMS Plan; (2) cloud hosting services costs; (3) costs related to funding model filings; (4) costs related to litigation with the SEC regarding the CAT NMS Plan; (5) costs related to the Initial Plan Processor; (6) CAIS implementation costs; (7) public relations costs; (8) legal costs related to the limitation of liability provision in the CAT Reporter agreements; and (9) costs for the Chair of CAT Operating Committee. As discussed in detail below, each of these costs is reasonable and should be recoverable in accordance with the CAT Funding Model.

(A) Costs Incurred Prior to the Effective Date of CAT NMS Plan

CAT LLC believes that it is reasonable to seek recovery of costs incurred prior to when the CAT NMS Plan became effective in November 2016, such as legal and consulting fees incurred to create the CAT NMS Plan. Rule 613 specifically mandates that the CAT be created, implemented and maintained, and further provides that the CAT NMS Plan include a proposed allocation of estimated costs to fund the creation, implementation and maintenance of the CAT among the Participants (referred to as “plan sponsors”), and between the Participants and Industry Members (referred to as “members of the plan sponsors”).¹³⁴ Consistent with Rule 613, the CAT NMS Plan, as approved by the Commission, specifically authorizes charging Industry Members fees for costs reasonably incurred prior to the date of the approval of the CAT NMS Plan by the Commission in November 2016, including legal and consulting costs. Section 11.1(c) of the CAT NMS Plan states that:

[i]n determining fees on Participants and Industry Members the Operating Committee shall take into account fees, costs and expenses (including legal and consulting fees and expenses) reasonably incurred by Participants on behalf of the Company prior to the Effective Date in connection with the creation and implementation of the CAT.

Accordingly, the CAT NMS Plan specifically permits the recovery of costs, including legal and consulting costs, reasonably incurred prior to November 2016 in connection with the creation and implementation of the CAT.

Furthermore, the costs incurred to create and implement the CAT prior to the effective date of the CAT NMS Plan

(“Pre-Formation Costs”) were reasonable both in scope and amount, in accordance with the requirements of Section 11.1(c) of the CAT NMS Plan. During the four-year period from 2012 to 2016, a total of \$13,842,881 in Pre-Formation Costs were incurred. This is an average of approximately \$3.5 million per year over this period. The Pre-Formation Costs fell into three categories: legal costs, consulting costs and public relations costs. This includes legal costs of \$3,196,434; consulting costs of \$10,589,273; and public relations costs of \$57,174. The legal, consulting and public relations services were performed by WilmerHale, Deloitte and Peppercomm, respectively. The selection considerations and fees for these three firms are described in detail above and are described further below. The Pre-Formation Costs are direct costs of CAT, which have been funded entirely by the Participants through non-interest-bearing notes. The Pre-Formation Costs do not include the significant costs incurred by each of the individual Participants in responding to the adoption of Rule 613.

The Pre-Formation Costs are reasonable and appropriate as they reflect the extensive efforts that were necessary to create the CAT NMS Plan as mandated after the SEC’s adoption of Rule 613. As described in more detail below, these efforts included, among other things, developing a plan for selecting the Plan Processor, soliciting and evaluating bids, engaging a diverse set of market participants and the SEC in the development of the Plan, interacting with the SEC in their oversight of the development of the Plan, and seeking appropriate exemptive relief to address areas of concern in Rule 613.¹³⁵

(i) Request for Proposal (“RFP”)

The Participants determined to utilize an RFP to ensure that potential alternative solutions for creating the Plan could be presented and considered, and that a detailed and meaningful cost-benefit analysis could be performed. The SEC supported the use of an RFP, and approved its use as it is described

¹³⁰ *Id.* at 77129 n.12.

¹³¹ FAM Adopting Release at 31335 (May 22, 2020). Section 36 of the Exchange Act grants the Commission the authority to “conditionally or unconditionally exempt any person, security, or transaction . . . from any provision or provisions of [the Exchange Act] or of any rule or regulation thereunder, to the extent that such exemption is necessary or appropriate in the public interest, and is consistent with the protection of investors.” 15 U.S.C. 78mm(a)(1). Under Rule 608(e) of Regulation NMS, the Commission may “exempt from [Rule 608], either unconditionally or on specified terms and conditions, any self-regulatory organization, member thereof, or specified security, if the Commission determines that such exemption is consistent with the public interest, the protection of investors, the maintenance of fair and orderly markets and the removal of impediments to, and perfection of the mechanism of, a national market system.” 17 CFR 242.608(e).

¹³² Section 12.3 of the CAT NMS Plan (“[T]o the extent the SEC grants exemptive relief applicable to any provision of this Agreement, Participants and Industry Members shall be entitled to comply with such provision pursuant to the terms of the exemptive relief so granted at the time such relief is granted irrespective of whether this Agreement has been amended.”)

¹³³ See Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹³⁴ See, e.g., Rule 613(a)(1)(vii)(D) of the CAT NMS Plan.

¹³⁵ The Participants described in detail the process for drafting the CAT NMS Plan in its original filing of the CAT NMS Plan. See Letter from Mike Simon, on behalf of the Participants of the CAT NMS Plan, to Brent J. Fields, Secretary, Commission (Sept. 30, 2014). A non-exclusive list of filings and activities associated with CAT, including certain pre-2016 filings, are available on the SEC’s website: <https://www.sec.gov/divisions/marketreg/rule613-info>.

in extensive detail in the CAT NMS Plan.¹³⁶

In the context of the SEC's adoption of Rule 613, commenters urged the Commission to utilize an RFP process to assist in the planning and design of the NMS plan.¹³⁷ Specifically, the Commission explained:

In this regard, several commenters suggested that the Commission undergo a RFP or request for information ("RFI") process to create and implement a consolidated audit trail. Specifically, FIF urged the Commission to perform a RFP process "to determine the best technical solution for developing a consolidated audit trail." FIF suggested that the Commission "should outline a set of goals and guiding principles they are striving to achieve as part of the adopted CAT filing and leave the determination of data elements and other technical requirements to [an] industry working group." Similarly, Direct Edge suggested that Commission staff should form and engage in a working group to develop an RFP for publication by the Commission. DirectEdge explained that an RFP process would facilitate the identification of the costs and benefits of the audit trail, as well as the consideration of a wider range of technological solutions. Further, commenters, including Broadridge Financial Solutions, Inc., a technology provider, also requested more specific information about the audit trail system to better assess the Commission's initial cost estimates and to determine the best approach to the consolidated audit trail.¹³⁸

In response to these comments, the Commission modified Rule 613 to require the Participants to address certain important considerations regarding the features and details of the NMS plan and to extend the timeframe for submission of the CAT NMS Plan by the Participants from the 90 days as originally proposed to 270 days, in part, to accommodate a process that would address these considerations.¹³⁹ As the SEC noted, "[i]n light of the numerous specific requirements of Rule 613, the Participants concluded that publication of a request for proposal ('RFP') was necessary to ensure that potential alternative solutions to creating the consolidated audit trail can be presented and considered by the Participants and that a detailed and meaningful cost/benefit analysis can be performed, both of which are required

considerations to be addressed in the CAT NMS Plan."¹⁴⁰

The SEC specifically recognized that the Participants planned to use an RFP when it approved the Selection Plan, and stated that the RFP was a reasonable approach.¹⁴¹ As the SEC described in its approval order for the Selection Plan, "[t]he Participants filed the [Selection] Plan to govern how the SROs will proceed with formulating and submitting the CAT NMS Plan—and, as part of that process, how to review, evaluate, and narrow down the bids submitted in response to the RFP ('Bids')—and ultimately choosing the plan processor that will build, operate, and maintain the consolidated audit trail ('Plan Processor')."¹⁴² After evaluating the Selection Plan, including the use of an RFP process, the Commission stated that it "believes the [Selection] Plan is reasonably designed to govern the process by which the SROs will formulate and submit the CAT NMS Plan, including the review, evaluation, and narrowing down of Bids in response to the RFP, and ultimately choosing the Plan Processor that will build, operate, and maintain the consolidated audit trail."¹⁴³

On February 26, 2013, the Participants published an RFP soliciting bids from parties interested in serving as the plan processor for the CAT. Initially, 31 firms submitted intentions to bid. In the following months, the Participants engaged with potential bidders with respect to, among other things, the selection process, selection criteria, and potential bidders' questions and concerns. On March 21, 2014, the Participants received ten bids in response to the RFP.

(ii) Selection Plan

On September 4, 2013, the Participants filed with the Commission a national market system plan to govern the process for Participant review of the bids submitted in response to the RFP, the procedures for evaluating the bids, and, ultimately, selection of the plan processor (the "Selection Plan").¹⁴⁴ The Commission approved the Selection Plan as filed on February 21, 2014.¹⁴⁵ In approving the Selection Plan, the Commission concluded that "it is reasonably designed to achieve its objective of facilitating the development

of the CAT NMS Plan and the selection of the Plan Processor."¹⁴⁶

The Selection Plan divided the review and evaluation of bids, and the selection of the plan processor, into various stages. Specifically, pursuant to the Selection Plan, a selection committee reviewed all bids and determined which bids contained sufficient information to allow the Participants to meaningfully assess and evaluate the bids. The ten submitted bids were deemed "Qualified Bids," and so passed to the next stage, in which each bidder presented its bids to the Participants on a confidential basis. On July 1, 2014, after conducting careful analysis and comparison of the bids, the Selection Committee voted and selected a shortlist of six eligible bidders. The Selection Committee determined which shortlisted bidders would be provided the opportunity to revise their bids. After the Selection Committee assessed and evaluated the revised bids, the Selection Committee selected the plan processor via two rounds of voting by the Participants, as described in the Selection Plan.

The Selection Plan established an Operating Committee responsible for formulating, drafting, and filing with the Commission the CAT NMS Plan and for ensuring that the Participants' joint obligations under Rule 613 were met in a timely and efficient manner. In formulating the CAT NMS Plan, the Participants also engaged multiple persons across a wide range of roles and expertise, engaged the consulting firm Deloitte as project manager, and engaged the law firm WilmerHale to serve as legal counsel in drafting the Plan. Within this structure, the Participants focused on, among other things, comparative analyses of the proposed technologies and operating models, development of funding models to support the building and operation of the CAT, and detailed review of governance considerations. Given the complexity and scope of developing the CAT NMS Plan, these efforts were extensive.

When it approved the CAT NMS Plan in 2016, the Commission reiterated its belief that the Selection Plan remains a "reasonable approach," that "the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor," and that "the process set forth in the Selection Plan should be permitted to continue":

In approving the Selection Plan, the Commission stated that the Selection Plan is reasonably designed to achieve its objective of facilitating the development of the CAT

¹³⁶ See detailed discussion of RFP questions in Appendix C of the CAT NMS Plan, and incorporation of RFP requirements in Appendix D at D–2.

¹³⁷ For example, in its comments on proposed Rule 613, FIF suggested "that the SROs should select the processor through a 'request for proposal.'" Rule 613 Adopting Release at 45785.

¹⁴⁶ Selection Plan Approval Order at 11160.

NMS Plan and the selection of the Plan Processor. The Commission also found that the Selection Plan is reasonably designed to govern the process by which the SROs will formulate and submit the CAT NMS Plan, including the review, evaluation, and narrowing down of Bids in response to the RFP, and ultimately choosing the Plan Processor that will build, operate, and maintain the consolidated audit trail. The Commission believes that the process set out in the Selection Plan for selecting a Plan Processor remains a reasonable approach, which will facilitate the selection of Plan Processor through a fair, transparent and competitive process and that no modifications to the Selection Plan are required to meet the approval standard. . . . In response to the comment that offered support for a specific Bidder, the Commission agrees with the Participants that the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor and thus believes that the process set forth in the Selection Plan should be permitted to continue.¹⁴⁷

(iii) Engagement With Market Participants and SEC

During the process of developing the CAT NMS Plan, the Participants engaged in extensive and meaningful dialogue with market participants and the SEC. To this end, the Participants created a website to update the public on the progress of the CAT NMS Plan, published a request for comment on multiple issues related to the Plan, held multiple public events to inform the industry of the progress of the CAT and to address inquiries, and formed, and later expanded, a DAG to solicit more input from a representative industry group.¹⁴⁸

The DAG included representatives of Participants and Industry Members and conducted meetings to discuss, among other things, technical and operational aspects the Participants were considering for the Plan. The Participants issued press releases soliciting participants for the DAG, and a wide spectrum of firms was deliberately chosen to provide insight from various industry segments affected by CAT. The DAG meetings included discussions of topics such as option market maker quote reporting, requirements for capturing Customer IDs, timestamps and clock synchronization, reporting requirements for order handling scenarios, costs and funding, error handling and corrections, and potential elimination of systems made redundant by the CAT. From the inception of the DAG through

September 2014, the DAG participated in 36 meetings, as well as a variety of DAG subcommittee meetings.

(iv) Request for Exemption From Certain Requirements Under Rule 613

Following multiple discussions between the Participants and both the DAG and the bidders, as well as among the Participants themselves, the Participants recognized that some provisions of Rule 613 would not permit certain solutions to be included in the Plan that the Participants, in coordination with the DAG, determined advisable to effectuate the most efficient and cost-effective CAT. Specifically, “the SROs reached the conclusion that additional flexibility in certain of the minimum requirements specified in Rule 613 would allow them to propose a more efficient and cost-effective approach without adversely affecting the reliability or accuracy of CAT Data, or its security and confidentiality.”¹⁴⁹ Consequently, the Participants submitted a request for exemptive relief from certain provisions of Rule 613 regarding: (1) options market maker quotes; (2) Customer-IDs; (3) CAT-Reporter-IDs; (4) CAT-Order-IDs on allocation reports; and (5) timestamp granularity.¹⁵⁰ The Participants filed two supplements to the request for exemptive relief.¹⁵¹

After reviewing the exemptive request, the Commission determined that it was appropriate in the public interest and consistent with the protection of investors to grant the requested exemptive relief.¹⁵² In granting the exemptive relief, the Commission stated:

[T]he Commission is persuaded to provide flexibility in the discrete areas discussed in the Exemption Request so that the alternative approaches can be included in the CAT NMS Plan and subject to notice and comment. Doing so could allow for more efficient and cost-effective approaches than otherwise would be permitted. The Commission at this stage is not deciding whether the proposed approaches detailed below are more efficient or effective than those in Rule 613. However, the Commission believes the proposed approaches should be within the permissible range of alternatives available to the SROs.¹⁵³

¹⁴⁹ Securities Exchange Rel. No. 77265 (Mar. 1, 2016), 81 FR 11856 (Mar. 7, 2016) (“2016 Exemptive Order”).

¹⁵⁰ Letter from Robert Colby, FINRA, on behalf of the SROs, to Brent J. Fields, Secretary, Commission (Jan. 30, 2015).

¹⁵¹ See Letter from Robert Colby, FINRA, on behalf of the SROs, to Brent J. Fields, Secretary, Commission (Apr. 3, 2015); Letter from the SROs to Brent J. Fields, Secretary, Commission (Sept. 2, 2015).

¹⁵² See 2016 Exemptive Order.

¹⁵³ *Id.* at 11857.

The Commission further stated that the requested exemptive relief is consistent with the protection of investors. The Commission noted that:

Doing so will provide the public an opportunity to consider and comment on whether these proposed alternative approaches would indeed be more efficient and cost-effective than those otherwise required by Rule 613, and whether such approaches would adversely affect the reliability or accuracy of CAT Data or otherwise undermine the goals of Rule 613. Moreover, if—as the SROs represent—efficiency gains and cost savings would result from including the proposed approaches in the CAT NMS Plan without adverse effects, then the resultant benefits could potentially flow to investors (e.g., lower broker-dealer reporting costs resulting in fewer costs passed on to Customers).¹⁵⁴

The Participants incorporated the exemptive relief into the proposed CAT NMS Plan, which was noticed for comment, and the Commission ultimately approved the CAT NMS Plan with the more efficient and cost-effective alternative approaches described in the exemptive relief. Accordingly, the Participants believe that the costs incurred in developing the exemptive request were critical to the creation of a better CAT than was originally contemplated by Rule 613, and therefore should be recoverable as part of Historical CAT Assessment 1.

(v) Request for Extensions for Filing the CAT NMS Plan

Rule 613(a)(1) under Regulation NMS required the Participants to jointly file the CAT NMS Plan on or before April 28, 2013, less than a year after the adoption of Rule 613. In recognition of the complexity of the project to create the CAT NMS Plan as well as industry interest in limiting or eliminating certain requirements of Rule 613 (e.g., addressing the reporting of options market maker quotes), the Participants requested two extensions of the deadline to file the CAT NMS Plan. The Participants described the need for additional time as follows:

The SROs stated in their Request Letter that they do not believe that the 270-day time period provided for in Rule 613(a)(1) provides sufficient time for the development of the RFP, formulation and submission of bids, and review and evaluation of such bids. The SROs also stated that they believe additional time beyond the 270 days provided for in Rule 613(a)(1) is necessary in order to provide sufficient time for effective consultation with and input from the industry and the public on the proposed solution chosen by the SROs for the creation of the consolidated audit trail at the

¹⁵⁴ *Id.*

¹⁴⁷ See CAT NMS Plan Approval Order at 84737.

¹⁴⁸ See Section D(11) of Appendix C of the CAT NMS Plan.

conclusion of the RFP process and the NMS plan itself.¹⁵⁵

In recognition of the need for additional time to refine the technical description of and requirements for the CAT and to allow for additional evaluation of the proposed cost and funding considerations, the SEC granted two extensions of this deadline.¹⁵⁶ The SEC determined that both extensions were appropriate, in the public interest, and consistent with the protection of investors.¹⁵⁷ In reaching this conclusion, the Commission stated that “it understands that the creation of a consolidated audit trail is a significant undertaking and that a proposed NMS plan must include detailed information and discussion about many things.”¹⁵⁸ The SEC also noted the following:

This additional time to complete the RFP process should allow the SROs to engage in a more thoughtful and comprehensive process for the development of an NMS plan. In this regard, the Commission notes that the additional time to solicit comment from the industry and the public at certain key points in the development of the NMS plan could identify issues that can be resolved earlier in the development of the consolidated audit trail and prior to filing the NMS plan with the Commission.¹⁵⁹

Given the Commission’s recognition of the reasonableness and value of the extension of the deadline to file the CAT NMS Plan, the Participants believe that the costs incurred in developing the extension request were important to the process of developing the CAT NMS Plan, and therefore should be recoverable as part of Historical CAT Assessment 1.

(vi) Submission and Approval of the CAT NMS Plan

After extensive analyses and discussions with the DAG, bidders, market participants and the SEC staff, the Participants finalized the draft of the CAT NMS Plan and filed the CAT NMS Plan with the SEC on September 30, 2014. Following additional discussions, the Participants filed several amendments to the CAT NMS Plan during 2015 and 2016. With these additional changes, the SEC published the CAT NMS Plan for notice and

comment in May 2016.¹⁶⁰ Following the comment period, the SEC approved the Plan in November 2016.¹⁶¹

(vii) Legal Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include legal costs of \$3,196,434. The legal services were performed by WilmerHale. The selection considerations and fees for WilmerHale were described in detail above. Prior to the creation of CAT LLC, WilmerHale was engaged to represent the consortium of SROs, not the individual Participants. For administrative purposes, FINRA agreed to receive such legal bills, although such costs were shared among the Participants. Therefore, the legal costs incurred with respect to WilmerHale do not include legal costs incurred by the individual Participants. These pre-formation legal costs are described in detail above and are further described below:

- Analyzed various legal matters associated with the Selection Plan and drafted an amendment to Selection Plan;
- Assisted with the RFP and bidding process for the CAT Plan Processor;
- Analyzed legal matters related to the DAG;
- Drafted the CAT NMS Plan, analyzed various items related to the CAT NMS Plan, and responded to comment letters on the CAT NMS Plan;
- Provided legal support for the formation of the legal entity, the governance of the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (e.g., Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding, and Other Products) and the DAG, and governance support during the transition to the new governance structure under the CAT NMS Plan;
- Drafted exemptive requests;
- Provided interpretations related to the CAT NMS Plan;
- Provided support with regard to discussions among the exchanges, FINRA and other third parties, such as Deloitte;
- Provided tax advice with regard to CAT’s status as a tax-exempt organization; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

(viii) Consulting Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include consulting costs of \$10,589,273. The consulting services were performed by Deloitte. The selection considerations and fees for Deloitte were described in detail above. Prior to the creation of CAT LLC, for administrative purposes, Deloitte was engaged by FINRA to provide consulting services related to CAT, but the costs were shared by the consortium of SROs per agreement. Therefore, the consulting costs incurred with respect to Deloitte do not include consulting costs incurred by the individual Participants. The pre-formation consulting costs include the following:

- Established and implemented program operations for the CAT project, including the program management office and workstream design;
- Assisted with the Plan Processor selection process, including but not limited to, the development of the RFP and the bidder evaluation process, and facilitation and consolidation of the Participants’ independent reviews;
- Assisted with the development and drafting of the CAT NMS Plan, including conducting cost-benefit studies, reviewing technical requirements of other NMS plans, analyzing OATS and CAT requirements, and drafting appendices to the Plan;
- Provided governance support to the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (e.g., Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding, and Other Products) and the DAG;
- Provided support for updating the SEC on the progress of the development of the CAT;
- Provided support for industry outreach sessions, including with regard to program design and agenda development, program support and logistics and coordination; and
- Provided support in fact finding, drafting content and meeting coordination for WilmerHale with regard to the CAT and the development of the CAT NMS Plan.

Such Pre-Formation Costs did not include costs related to the Chair of the CAT NMS Plan Operating Committee, as the CAT NMS Plan had not yet been adopted.

¹⁵⁵ Securities Exchange Act Rel. No. 69060 (Mar. 7, 2013), 78 FR 15771, 15772 (Mar. 12, 2013) (“March 2013 Exemptive Order”).

¹⁵⁶ See March 2013 Exemptive Order; Securities Exchange Act Rel. No. 71018 (Dec. 6, 2013), 78 FR 75669 (Dec. 12, 2013) (“December 2013 Exemptive Order”).

¹⁵⁷ March 2013 Exemptive Order at 15772; December 2013 Exemptive Order at 75670.

¹⁵⁸ March 2013 Exemptive Order at 15772.

¹⁵⁹ *Id.* at 15773.

¹⁶⁰ See Securities Exchange Act Rel. No. 77724 (Apr. 27, 2016), 81 FR 30614 (May 17, 2016).

¹⁶¹ See CAT NMS Plan Approval Order.

(ix) Public Relations Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include public relations costs of \$57,174. The public relations services were performed by Peppercomm. The selection considerations and fees for Peppercomm are described in detail above. The costs related to Peppercomm were shared among the SROs. Therefore, the public relations costs do not include public relations costs incurred by the individual Participants. The pre-formation public relations costs include services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT.

(B) Cloud Hosting Services

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs related to cloud hosting services as a part of Historical CAT Assessments. CAT LLC believes that the costs related to cloud hosting services described in detail above are reasonable and appropriate given the strict data processing timelines and storage requirements imposed by the Commission-approved CAT NMS Plan and should be recoverable as a part of Historical CAT Assessment 1.

(i) Reasonableness of AWS Costs Given the Requirements of the CAT NMS Plan

CAT LLC believes that the costs for the cloud hosting services are reasonable, both in terms of the level of the fees paid by CAT LLC for cloud hosting services provided by AWS and the scope of the services performed by AWS for CAT LLC. CAT LLC believes that both the scope and amount of the costs for cloud hosting services are reasonable given the current requirements of the CAT NMS Plan adopted pursuant to Rule 613, including the strict data processing timeline, storage and other technical requirements under the Commission-approved CAT NMS Plan.

CAT LLC believes that the level of fees for the cloud hosting services is reasonable, taking into consideration a variety of factors, including the expected volume of data and the breadth of services provided and market rates for similar services.

CAT LLC also believes that the scope of services provided by AWS for the CAT are appropriate given the current requirements of the Commission-approved CAT NMS Plan. As described above, the cloud hosting services costs reflect a variety of factors including, among other things:

- *Breadth of Cloud Activities.* AWS was engaged by FCAT, the Plan Processor, to provide a broad range of services to the CAT, including data ingestion, data management, and analytic tools. Services provided by AWS necessary to the CAT include storage services, databases, compute services, and other services (such as networking, management tools and development operations (“DevOps”) tools). AWS also was engaged to provide the various environments for CAT, such as the development, performance testing, test and production environments, which are required by the CAT NMS Plan.

- *High Data Volume.* The cost for AWS services for the CAT is a function of the volume of CAT Data. While it is not linear, the greater the amount of CAT Data, the greater the cost of AWS services to the CAT. The data volume handled by AWS now far exceeds the original volume estimates for the CAT.

- *Plan Requirements.* The cost for AWS services also reflects the technical requirements necessary to meet the stringent performance and other requirements for processing CAT Data. These Plan-dictated processing timelines, storage, testing, security and other technical requirements are significant drivers of AWS costs.

- *Cost Avoidance Efforts.* CAT LLC and FCAT have engaged in ongoing efforts to seek to avoid and minimize AWS costs where permissible under the Plan. Accordingly, these cost avoidance efforts have limited the extent of AWS costs.

In addition, various requirements of the CAT NMS Plan adopted pursuant to Rule 613 contribute to the significant cloud hosting services costs, and that various Plan requirements could be amended or removed without affecting the regulatory purpose of the CAT. Indeed, CAT LLC has repeatedly sought exemptive relief and filed amendments to the CAT NMS Plan, and has even filed suit against the Commission, to seek to revise or eliminate certain costly requirements related to the CAT. However, despite these efforts, absent the Commission granting exemptive relief or approving cost savings amendments to the CAT NMS Plan, CAT LLC, the Participants and Industry Members are all required to comply with such requirements.

(ii) Effect of CAT Design on CAT Costs

(a) Efficient CAT Design

CAT is reasonably designed to efficiently and effectively utilize cloud computing and storage services, given the requirements of the Commission-approved CAT NMS Plan, including requirements related to security, operational reliance and quality assurance, and maintainability.

The Plan Processor uses state-of-the-art software that meets the strict security standards of the CAT NMS Plan. CAT utilizes a big data processing framework that is extensively used by large data processing companies, such as Apple, Meta, Netflix, IBM and Google. As such, it has substantial commercial support and support in the open-source community. It is also well suited for use with regard to iterative types of algorithms and query functions and analytics that the CAT requires, and it provides the heightened security necessary for the CAT.

The development and implementation of the design of CAT is not and has not been static. CAT LLC and the Plan Processor are always evaluating new innovations and service offerings from AWS and other providers to seek to maximize efficiency and cost avoidance while still satisfying the requirements of the CAT NMS Plan. These efforts have led to substantial savings to date. The cloud hosting costs for 2023 were less than the cloud hosting costs for 2022 by \$8 million despite processing seven trillion more events in 2023 due to the efficiency and cost avoidance efforts for cloud hosting services. For example, when AWS introduced new storage options, FCAT adopted the cost-efficient new storage option after establishing that the new offering would satisfy the security and other standards of the CAT NMS Plan. This change led to millions of dollars of savings in storage costs. Similarly, when AWS introduced a new compute processor, FCAT adopted this new compute processor, which led to millions of dollars in savings in compute costs. However, in other cases, new cloud technology developments could not be implemented in CAT because they would not satisfy the security or other requirements of the CAT NMS Plan.

When evaluating the design of the CAT, it must be kept in mind that the CAT is not a typical commercial technology project. The ability to make use of technology approaches that may lead to cost avoidance is also subject to the restrictive requirements of the CAT NMS Plan, such as processing timeframes, requirements for retention of data versions, query requirements,

and security standards. Because such requirements are set forth in the CAT NMS Plan, any modification of such requirements are subject to the time-consuming process of amending the CAT NMS Plan or seeking an exemption from the relevant requirement. For example, CAT LLC recently has filed an amendment to address several of these expensive Plan requirements.¹⁶²

(b) CAT Was Designed To Minimize Industry Member Effort

The CAT System also was designed to minimize the extent to which Industry Members would need to alter their systems to report to CAT. During the design process, Industry Member groups argued that it would make more sense financially for the CAT to accommodate differences in industry systems, than for all Industry Members to change their systems. Moreover, such design choices would facilitate consistency, uniformity and accuracy in reporting. Requiring the CAT to make such accommodations may increase CAT costs while accommodating CAT Reporters.

Based on the requirements in the CAT NMS Plan and/or in response to industry requests for functionality to be embedded with the Plan Processor to streamline or limit Industry Member system changes, the CAT has been designed to limit the effect on Industry Members. The following provides examples of such accommodations:

- *Industry Member Reporting.* In light of the complexity of Industry Member market activity, the CAT's order reporting and linkage scenarios document for Industry Members is over 800 pages in length, addressing nearly 200 scenarios.¹⁶³ The Industry Member Technical Specifications allow for dozens of specific event types, which drive complexity for the Plan Processor, but streamline reporting for Industry Members. Furthermore, the Plan Processor greatly expanded Industry Member linkage requirements to support, among other things, child events and supplemental events, allowing for "stateless as-you-go" and "batch end-of-day" reporting when all data is available. Accordingly, CAT takes on the significant cost and effort of providing the required linkages between CAT events; correspondingly,

Industry Members are not required to perform this costly task.

- *File Submission Process.* The CAT was designed to accommodate the varying needs of CAT Reporters with regard to the file submission process. For example, in a 2018 letter, FIF stated that "[t]he SFTP-based submission process is cumbersome, exposes industry members to unnecessary complexity, and puts the burden of support on the CAT Reporter rather than imbedding more functionality into the Plan Processor."¹⁶⁴ Currently, FCAT provides two mechanisms for submitting files: SFTP via a private network, and the Web via Reporter Web Portal.

- *Error Corrections.* The industry also emphasized the need for the CAT to provide error correction tools and functionalities to identify, rectify and re-submit corrections within the required timeframe. For example, FIF stated in a 2018 letter the following:

To be clear, if OATS-like error correction tools are not made available on Day 1, hundreds of firms will be required to create and test their own tools or obtain vendor alternatives prior to the CAT Go-Live Date. Proprietary tools will require additional system builds, access to and ingestion of CAT data to perform system validation, and testing which will further stress the limited number of subject matter experts ("SMEs") dedicated to the implementation of CAT reporting. Should this occur, inevitably firms (especially small firms who lack the necessary IT staff to write code and develop proprietary systems), may be put in the position of passing onto investors the cost required to build hundreds of redundant systems.¹⁶⁵

CAT provides various tools to help Industry Members identify and rectify errors.

- *Data Ingestion Format.* The industry also recommended that CAT adopt a flexible input format that provides an option for Industry Members to submit data in formats that are already in use to reduce costs and potential reporting errors. For example, FIF argued the following:

FIF CAT WG is not proposing a specific format; rather, we are proposing flexibility of input formats which includes support of existing formats (e.g., OATS, FIX) as well as a baseline specification where all fields are defined, and normalized. The input formats must be clearly and thoroughly

defined in Technical Specifications, including FAQs.

Mandating a uniform format for reporting data to the CAT simplifies the task for the Central Repository of consolidating/storing data, but it puts the burden on each CAT Reporter to accurately translate their current (e.g., OATS) reporting information into a uniform CAT interface. However, that is likely to yield more errors because it is very dependent on accurate, complete and timely information (Technical Specifications, FAQs, meta-data, competent CAT help desk) available to CAT Reporters, availability of sophisticated CAT test tools to validate interface protocols, and the skill levels of the estimated 300+ unique CAT Reporters/Submitters during Phase 1 of CAT. Concentrating the responsibility of data conversions with the Central Repository is a reasonable trade-off that should yield fewer errors, and greater accuracy.¹⁶⁶

CAT provides such a flexible input format.

(c) Effect of Initial Plan Processor Design

The costs for cloud hosting services are appropriate and have not been adversely affected by the original design and approaches of the Initial Plan Processor. FCAT's design costs are the result of the requirements of the Commission-approved CAT NMS Plan.

When FCAT took over as the Plan Processor from Thesys, it utilized certain aspects of the technical specifications created by Thesys in its design. However, FCAT has not maintained aspects of the original design that would not be appropriate for the CAT. FCAT revised and enhanced the original technical specifications of the CAT System to increase its efficiency and efficacy, and to ensure its compliance with the CAT NMS Plan. For example, the Initial Plan Processor's approach utilized many more fields than FCAT's approach, which relies on additional linkages. With the additional linkages, the CAT System takes on more of the CAT-related burdens than the Industry Members. Such an approach serves to facilitate consistency, uniformity and accuracy in reporting.

Moreover, FCAT did not utilize the system built by the Initial Plan Processor; it rebuilt the CAT System based on revised technical specifications. For example, the Initial Plan Processor used an on-premises processing approach which was not

¹⁶² See, e.g., Securities Exchange Act Rel. No. 99938 (Apr. 10, 2024), 89 FR 26983 (Apr. 16, 2024); Letter from Brandon Becker, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission (Mar. 27, 2024) (proposing amendments to the CAT NMS Plan for \$23 million in annual savings).

¹⁶³ See CAT Industry Member Reporting Scenarios v.4.10 (Oct. 21, 2022).

¹⁶⁴ Letter from Janet Early, FIF, to Thesys CAT (Mar. 29, 2018).

¹⁶⁵ Letter from Christopher Bok, FIF, to Jay Clayton, Chair, Commission, at 4 (Dec. 11, 2018).

¹⁶⁶ Letter from Mary Lou Von Kaenel, Managing Director, FIF, to Brent Fields, Secretary, Commission at 92 (July 18, 2016), <https://www.sec.gov/comments/4-698/4698-13.pdf>.

geared toward the huge amounts of data stored in the CAT, while FCAT adopted a cloud-based solution in response to such data demands.

Furthermore, given the very short timeframe to develop the CAT System and the prior optimization of certain query tools (e.g., Diver) for regulatory use with significant amounts of data, FCAT determined to rely upon certain existing FINRA tools and adapt them for use with the CAT.

(iii) Consideration of AWS Alternatives

CAT LLC continues to support the selection of AWS as the cloud hosting services provider for CAT given the compliance, operational, and security requirements of the CAT. Independent analyses confirm these conclusions, noting that “AWS is an excellent choice for either strategic or tactical use and recommends considering AWS for almost all cloud IaaS or IaaS+PaaS scenarios.”¹⁶⁷ AWS provides the following benefits to CAT, among others:

- **Broad Suitability.** AWS has a long track record of successfully serving cloud customers with mission-critical projects.
- **Proven Scalability.** AWS has demonstrated that it is capable of building and delivering services on a large scale.
- **Track Record of Innovation.** AWS continues to rapidly innovate, both in terms of new domains of capability and at a fundamental level, thereby facilitating innovation for its customers.
- **Resiliency/Dependability.** Another benefit of AWS is its resiliency; it has a strong track record of stable services. As noted in a review of cloud service providers, “[c]ustomers like to have a broad set of options for resilience and for their cloud providers to have a strong track record of stable services (continuously available, without operational quirks). Only AWS fulfills both desires.”¹⁶⁸
- **Technical and Customer Support.** AWS consistently provides high-quality technical and customer support and engagement. Given the size, scope and regulatory importance of CAT, customer support and engagement that CAT has with the highest levels of AWS are very important to the success of the CAT.
- **Scale.** AWS is capable of supporting large-scale solutions, which is critical given the size and magnitude of the CAT.

- **Security.** AWS provides the security features necessary for the CAT.

In addition, the nature of the CAT, including the amount of data it must process and the size of its data footprint, does not allow for a multi-cloud solution as this would be cost prohibitive and greatly increase the security boundary and associated risk profile of the CAT. For example, a multi-cloud hosting option would increase costs, complexity, and risk for operations with regard to, for example, DevOps, production support, and networking. Similarly, with regard to security, a multi-cloud solution would increase risk, including with regard to the need for data transfers between cloud providers and the expansion of the security boundary. With regard to labor, a multi-cloud solution would lose economies of scale due to the need to support unique cloud requirements. Accordingly, the use of single-cloud solution continues to provide advantages with regard to cost, complexity, and risk. Indeed, “[t]he best practice is to focus on a single primary strategic provider.”¹⁶⁹

Furthermore, if another cloud service provider were determined to be a better match for the CAT at some future date, switching cloud service providers would be a very significant, expensive and time-consuming effort. Such an effort would likely be a 10-to-15-year commitment at a substantial expense. Such a move would require the replication or redesign of the underlying cloud environments (e.g., organizational setup, identify management, accounts, environments, DevOps tooling like release management/config management/network management), as the new provider likely would not have the same infrastructure and software. Once that process has been completed, an exabyte of CAT data would need to be securely migrated to the new platform.

(C) Funding Model Filings

CAT LLC believes that the recovery of costs related to the development of the funding model is appropriate, and that the amount and scope of such costs, as described above, are reasonable.

Funding the CAT is a critical aspect of Rule 613 and the CAT NMS Plan. Article XI of the CAT NMS Plan describes in detail the requirements for funding the CAT, and the Participants are required to comply with and enforce compliance with the funding requirements of the CAT NMS Plan, just as with other aspects of the Plan. Accordingly, the development and

implementation of a funding model for the CAT is as much a part of the requirements of the CAT NMS Plan as the development and operation of the CAT System. CAT LLC sees no reason to distinguish the efforts to develop a funding model from, for example, efforts to develop the CAT System, in seeking to recover reasonable CAT costs.

Moreover, in approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that “the reasonably budgeted CAT costs shall include . . . legal costs.”¹⁷⁰ In addition, the CAT NMS Plan also requires Participants to include in their fee filings “a brief description of the amount and type of the Historical CAT Costs, including . . . legal . . . costs.”¹⁷¹ In keeping with these provisions, this filing provides a brief description of reasonably budgeted legal costs above. These legal costs include costs related to the development of the CAT Funding Model.

In addition, the legal costs incurred for the assistance in developing the CAT Funding Model are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1. As described above, the specialized services were performed by experienced counsel at negotiated rates for such services that reflect both the extent of the services and market rates. Moreover, the scope of the legal costs associated with the development of the funding model reflect the complexity of the task in satisfying the detailed requirements of the CAT NMS Plan, the standards of the Exchange Act, and the many perspectives of the different market constituents potentially affected by or interested in the funding model, including Industry Members, Participants and investors. The many and varied comments by market participants on CAT funding over the years demonstrate the complexity of the task.

(D) Costs Related to Litigation With the SEC

CAT LLC believes that the recovery of legal costs related to the litigation with the SEC regarding the CAT NMS Plan is appropriate, and that the amount and scope of such costs, as described above, are reasonable.

As a preliminary matter, as discussed above, the Commission recognized that

¹⁶⁷ See, e.g., Lydia Leong and Adrian Wong, Solution Comparison for Strategic Cloud Integrated IaaS and PaaS Providers (July 28, 2023) (“Strategic Cloud Assessment Article”).

¹⁶⁸ Strategic Cloud Assessment Article.

¹⁶⁹ *Id.*

¹⁷⁰ Section 11.1(a)(i) of the CAT NMS Plan.

¹⁷¹ Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments.¹⁷² Moreover, CAT LLC initiated such litigation, and incurred the related legal costs, because it was critical to address the Commission's interpretations of the CAT NMS Plan. Among other things, such interpretations threatened to impose unnecessary costs on the CAT, which would be borne by the Participants and Industry Members. Indeed, in response to the litigation, the Commission provided exemptive relief that allowed alternative, more cost-effective approaches to the implementation of the CAT. Specifically, in the 2023 exemptive order, the Commission stated:

The conditional exemptive relief in this Order allows for the implementation of alternative regulatory solutions that continue to advance the regulatory goals that Rule 613 and the CAT NMS Plan were intended to promote, while reducing the implementation and operational costs, burdens, and/or difficulties that would otherwise be incurred by the Participants and Industry Members that must fund the CAT.¹⁷³

CAT LLC believes it is reasonable and appropriate to incur costs to limit the need to incur even greater costs due to certain interpretations of the Plan.

In addition, the legal costs incurred during the litigation are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1. As described above, the specialized services were performed by experienced counsel at market rates for such services. As such, the legal costs related to this litigation incurred during the period covered by Historical CAT Assessment 1 were reasonable.

Finally, Industry Members will directly benefit from the result of the litigation because it has addressed CAT NMS Plan requirements that would have imposed significantly greater costs on the CAT. Accordingly, it is reasonable and appropriate that the costs of such litigation be included in the Historical CAT Costs 1.

(E) Costs Related to the Initial Plan Processor

CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017, which was the date by which Participants were required to begin reporting to the CAT, due to the delay in the commencement of reporting to the CAT. As discussed above, the

Participants determined to exclude all CAT costs incurred from November 15, 2017 through November 15, 2018, which includes \$37,852,083 in Thesys costs incurred from November 15, 2017 through November 15, 2018 (as well as other CAT costs during this period). The remaining Thesys costs incurred after November 15, 2018 are the \$19,628,791 in capitalized developed technology costs for the period from November 16, 2018 through February 2019 incurred in the development of the CAT by the Initial Plan Processor, as well as a transition fee for the transition from the Initial Plan Processor to the successor Plan Processor. The Participants would remain responsible for 100% of these \$19,628,791 in costs.

CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017. CAT LLC notes that the development and implementation of the CAT System, while unprecedented in scope and design, is like any other large and innovative technology project in that, inevitably, there were adjustments and refinements in the technical approach as the project developed, even with substantial planning efforts and oversight prior to the build. This is even more likely when the project faces a very tight implementation schedule, such as the one imposed by the Commission in Rule 613 and the CAT NMS Plan. However, an adjusted approach does not mean that the funds were not valid expenditures and should not be recovered.

The reasonableness of Thesys costs should be evaluated by the Commission as of the time they were incurred, not in hindsight. As detailed above, the Commission concluded in 2016 that "the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor," and that "the process set forth in the Selection Plan should be permitted to continue."¹⁷⁴ Following this process, the Participants notified the Commission of the selection of Thesys as the Initial Plan Processor on January 17, 2017.¹⁷⁵ At the time, neither the Commission nor the industry argued that the selection of the Initial Plan Processor was unreasonable or otherwise inconsistent with the CAT NMS Plan, nor did they predict the selection would result in unanticipated delays in the implementation of the

CAT System. On the contrary, on April 4, 2017, the President of SIFMA wrote that "SIFMA looks forward to commencing work with the SROs and Thesys."¹⁷⁶

As noted in the CAT Funding Model Approval Order, "[i]n Rule 613, the Commission made the determination that the costs of the CAT should be shared by the Participants and Industry Members."¹⁷⁷ If the CAT Funding Model had existed on Day 1, the risk of any unanticipated costs or challenges associated with the Initial Plan Processor would have been fairly and reasonably shared among the Participants and Industry Members on an ongoing basis. Given that the Commission concluded in 2012 that the costs of the CAT would be shared by the Participants and Industry Members, it is not fair or reasonable to determine in hindsight that all of the risk involved in developing the CAT should be allocated entirely to the Participants.

(F) CAIS Implementation Costs

CAT LLC believes that the recovery of CAIS-related costs is appropriate, and that the amount and scope of such costs, as described above, are reasonable, and that the reasonableness of historical costs should be evaluated by the Commission as of the time they were incurred, not in hindsight.

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable CAIS operating costs as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that "the reasonably budgeted CAT costs shall include . . . CAIS operating fees."¹⁷⁸ In addition, the CAT NMS Plan also requires Participants to include in their fee filings "a brief description of the amount and type of the Historical CAT Costs, including . . . CAIS operating fees."¹⁷⁹ In keeping with these provisions, this filing provides a brief description of reasonably budgeted CAIS operating fees.

In addition, CAT LLC determined that the CAIS operating fees described above are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1. The "CAIS Operating Costs" for Historical CAT Assessment 1 total

¹⁷⁶ Letter from Kenneth E. Bentsen, Jr., SIFMA, to Participants re: Selection of Thesys as CAT Processor (Apr. 4, 2017), <https://www.sifma.org/wp-content/uploads/2017/05/SIFMA-Submits-Comment-Letter-to-SRO-on-the-selection-of-Thesys-as-the-CAT-Processor.pdf>.

¹⁷³ Settlement Exemptive Order at 77129–30.

¹⁷⁴ CAT NMS Plan Approval Order at 84737.

¹⁷⁵ Letter from the Participants to Brent J. Fields, Secretary, SEC (Jan. 18, 2017), <https://www.sec.gov/divisions/markreg/rule613-info-notice-of-plan-processor-selection.pdf>.

\$9,480,587, with Pre-FAM costs of \$2,072,908, FAM 1 costs of \$254,998, FAM 2 costs of \$1,590,298, and FAM 3 costs of \$5,562,383. As described above, the CAIS operating fees were incurred with regard to two categories of CAIS-related efforts: (1) the acceleration of the reporting of LTIDs; and (2) the development of the CAIS Technical Specifications and the building of CAIS. These two categories of costs are discussed in more detail below.

(i) LTID Reporting

During the period covered by Historical CAT Assessment 1, the CAIS operating costs included costs related to the acceleration of the reporting of LTIDs earlier than originally contemplated during this period at the request of the SEC and in accordance with exemptive relief granted by the SEC.¹⁸⁰ As the SEC approved in this exemptive relief, the Participants proposed “to require the reporting of LTIDs to the CAT in Phases 2c and 2d, instead of with the rest of Customer Account Information in Phase 2e, which potentially could result in an earlier elimination of broker-dealer recordkeeping, reporting and monitoring requirements of the Large Trader Rule.”¹⁸¹ To implement the reporting of LTIDs to the CAT, the following steps were taken during the period covered by Historical CAT Assessment 1:

- After FCAT developed the LTID Technical Specifications, the LTID Technical Specifications were published on January 31, 2020, with additional updates provided to the LTID Technical Specifications through April 2021.¹⁸²
- The LTID account information testing environment opened on August 24, 2020.
- The LTID account information reporting production environment opened on December 14, 2020.
- CAT Reporters were required to request their production readiness certification for account information related to LTIDs by the deadline of April 9, 2021.
- The LTID account information reporting for Phases 2a, 2b and 2c for Large Industry Members went live on April 26, 2021.
- The LTID account information reporting for Phases 2d for Large

Industry Members went live on December 13, 2021.

- The LTID account information reporting for Phases 2a, 2b, 2c and 2d for Small Industry Members went live on April 26, 2021.

Throughout this project, FCAT and CAT LLC worked closely with the industry on LTID and CAIS reporting. Between December 2019 and December 2021, at least 57 checkpoint calls, webinars, and technical working group meetings with industry representatives were hosted to address issues and to educate CAT Reporters regarding LTID and CAIS reporting.¹⁸³

The LTID reporting project was successfully completed in a timely fashion, and the fees related to the project were reasonable. Accordingly, CAT LLC appropriately seeks to recover such costs via Historical CAT Assessment 1.

(ii) CAIS Reporting

During the period covered by Historical CAT Assessment 1, FCAT began the development of the full CAIS Technical Specifications and the building of CAIS. The CAIS Technical Specifications were developed during this period as follows:

- Iterative drafts of the CAIS Technical Specifications were published on June 30, 2020, December 1, 2020, and January 1, 2021.¹⁸⁴
- The full, final CAIS Technical Specifications were published on January 29, 2021.
- Updated versions of the CAIS Technical Specifications were published throughout 2021.¹⁸⁵

As discussed above, FCAT and CAT LLC frequently engaged with the industry regarding the development of CAIS, hosting regular checkpoint calls, webinars, and technical working group meetings with industry representatives to address any issues, including addressing the interplay between Industry Members’ existing customer systems and CAIS, and to educate CAT Reporters regarding LTID and CAIS reporting. Such engagement was critical to the CAIS development process as the CAIS project was unprecedented in terms of its content, scope and complexity.

During this period, FCAT also commenced the building of the CAIS system in accordance with the CAIS Technical Specifications during the period covered by Historical CAT Assessment 1. The CAIS system was ready for industry testing shortly after the end of this period in January 2022.

The CAIS Technical Specifications and the CAIS system, as developed during this period, continue to be in use today. Industry Members have been required to report, and have continuously reported, required data to CAIS on a daily basis since November 7, 2022, consistent with interim reporting obligations. The CAIS system accepts and validates the CAIS data submitted by Industry Members and provides Industry Members with initial feedback on data errors. In light of the unprecedented nature of the CAIS system, certain changes to the system, such as changes related to error corrections and the CAIS regulatory portal, were necessary to finalize CAIS reporting. FCAT worked to address these remaining issues,¹⁸⁶ and, as of May 31, 2024, FCAT indicated that it had achieved the final CAIS reporting milestone. Accordingly, CAT LLC appropriately seeks to recover CAIS operating costs via Historical CAT Assessment 1.

(G) Public Relations Costs

CAT LLC believes that the recovery of public relations costs is appropriate and that the amount and scope of such costs, as described above, are reasonable.

The Commission has long recognized that external public relations costs are reasonably associated with creating, implementing and maintaining the CAT. In the CAT NMS Plan Approval Order, the Commission estimated that the Participants had collectively spent approximately \$2,400,000 in preparation of the CAT NMS Plan on external public relations, legal, and consulting costs, and estimated that the Participants would continue to incur external public relations costs associated with maintaining the CAT upon approval of the CAT NMS Plan.¹⁸⁷

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for public relations services as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that “the reasonably budgeted CAT costs shall include . . .

¹⁸⁰ See Phased Reporting Exemptive Relief Order at 23079–80.

¹⁸¹ *Id.* at 23078–79, n.70.

¹⁸² The LTID Technical Specifications, including original drafts and updated versions, are available on the Industry Member Specifications page of the CAT website (<https://www.catnmsplan.com/specifications/im>).

¹⁸³ Such contact points with the industry are described in detail on the Events web page of the CAT website (<https://www.catnmsplan.com/events>).

¹⁸⁴ The CAIS Technical Specifications, including original drafts and updated versions, are available on the Industry Member Specifications page of the CAT website (<https://www.catnmsplan.com/specifications/im>).

¹⁸⁵ Six updated versions of the CAIS Technical Specifications were published during 2021, in March, May, June, August, October and December.

¹⁸⁶ See, e.g., CAT Q4 2023 Quarterly Progress Report (Jan. 30, 2024) (<https://www.catnmsplan.com/sites/default/files/2024-01/CAT-Q4-2023-QPR.pdf>).

¹⁸⁷ CAT NMS Plan Approval Order at 84917–18.

public relations costs.”¹⁸⁸ In addition, the CAT NMS Plan also requires Participants to include in their fee filings “a brief description of the amount and type of the Historical CAT Costs, including . . . public relations costs.”¹⁸⁹ In keeping with these provisions, a brief description of reasonable public relations costs are described above.

In addition, CAT LLC determined that the public relations costs described above are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1. The services performed by the public relations firms through 2021 were limited in scope to assist CAT LLC, which has no employees of its own, to be better positioned to understand and address CAT matters to the benefit of all market participants and to communicate on important CAT topics with the public. In addition, the costs for these services were appropriately limited. During the 10-year period covered by Historical CAT Assessment 1, the average cost per year for these services was approximately \$36,000.

(H) Legal Costs Related to the Limitation of Liability Provision in CAT Reporter Agreements

CAT LLC believes that the recovery of legal costs related to the limitation of liability provision, including costs related to the proceedings before the SEC and costs related to the proposed amendment to the Consolidated Audit Trail Reporter Agreement and the Consolidated Audit Trail Reporting Agent Agreement (the “Reporting Agreements”) is appropriate and that the amount and scope of such costs as described above are reasonable.

As a preliminary matter, as discussed above, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments.¹⁹⁰ In addition, CAT LLC determined that the legal costs incurred for the assistance with regard to the limitation of liability provisions are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1.

Moreover, it is critical that CAT LLC, which has no employees of its own, have the ability to fund a legal defense in litigation and other legal proceedings against it. In response to CAT LLC requiring Industry Members to agree to

the limitation of liability provision to submit data to the CAT, SIFMA filed an application for review of actions taken by CAT LLC and the Participants pursuant to Sections 19(d) and 19(f) of the Exchange Act. Contemporaneously with the filing of this proceeding, SIFMA moved for a stay of the requirement that Industry Members sign a Reporter Agreement, or in the alternative, asked the Commission to further delay the launch of CAT reporting on June 22, 2020. CAT LLC must have the resources to defend itself from litigious actions by others, like these.

Although a limitation of liability provision ultimately was not adopted as proposed, it was a reasonable provision to propose for the CAT Reporter Agreements, given that such provisions are in accordance with industry norms. Limitations of liability are ubiquitous within the securities industry and have long governed the economic relationships between self-regulatory organizations and the entities that they regulate. For example, U.S. securities exchanges have adopted rules to limit their liability for losses that Industry Members incur through their use of exchange facilities.¹⁹¹ Similarly, FINRA’s former order audit trail, OATS, which has functioned as an integrated audit trail of order, quote, and trade data for equity securities, required FINRA members to acknowledge an agreement that includes a limitation of liability provision.¹⁹² In addition, such a provision was intended to ensure the financial stability of the CAT. Accordingly, it was reasonable for CAT LLC to propose the use of such a provision.¹⁹³

Furthermore, as described above, the specialized services were performed by experienced counsel at market rates for such services. Accordingly, the legal costs for the efforts related to the limitation of liability provision were reasonable.

(I) Costs for the Chair of CAT Operating Committee

CAT LLC believes that the recovery of consulting costs related to the Chair of

the CAT Operating Committee is appropriate and that the amount and scope of such costs are reasonable.

As a preliminary matter, the selection of the Chair of the Operating Committee complies with the requirements of Section 4.2 of the CAT NMS Plan. The initial Chair that served during the period covered by Historical CAT Assessment was designated by a Participant as the Participant’s alternate voting member. Accordingly, the Chair is a representative of the Participants, as required by the CAT NMS Plan.

In addition, in approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for consulting as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that “the reasonably budgeted CAT costs shall include . . . consulting . . .” costs.¹⁹⁴ In addition, the CAT NMS Plan also requires Participants to include in their fee filings “a brief description of the amount and type of the Historical CAT Costs, including . . . consulting”¹⁹⁵ costs. In keeping with these provisions, a brief description of reasonable consulting costs is included in this filing, and such reasonable consulting costs include the costs related to the Chair position.

The Participants determined that the position of the Chair was a critical role for the implementation of the CAT, and an independent Chair would appropriately consider and address the views of each of the Participants. The Participants also determined that it was important to have a Chair with a strong background regarding issues related to the regulatory obligations of self-regulatory organizations, including their obligations under national market system plans. The compensation paid to the Chair is appropriate for a person with such background and skills. The average annual amount paid to the Chair from 2017 through the end of FAM 3 was \$292,733.30. Separate from the Chair, CAT LLC relies upon a Leadership Team of representatives of the SROs to oversee the day-to-day implementation of the CAT NMS Plan. CAT LLC does not compensate any member of the Leadership Team.

¹⁸⁸ Section 11.1(a)(i) of the CAT NMS Plan.

¹⁸⁹ Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁹⁰ See Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁹¹ See, e.g., NASDAQ Equities Rule 4626.

¹⁹² FINRA Rule 1013(a)(1)(R) requires all applicants for FINRA Membership to acknowledge the FINRA Entitlement Program Agreement and Terms of Use, which applies to OATS. Industry Members click to indicate that they agree to its terms—including its limitation of liability provision—every time they access FINRA’s OATS system to report trade information (*i.e.*, repeatedly over the course of a trading day for many Industry Members).

¹⁹³ See Letter from Michael Simon, Chair, CAT Operating Committee, to Vanessa Countryman, Secretary, Commission (Dec. 18, 2020).

¹⁹⁴ Section 11.1(a)(i) of the CAT NMS Plan.

¹⁹⁵ Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

(11) Fee Implementation Assistance for Industry Members

(A) Reconciliation of CAT Invoices

(i) Reconciliation of CAT Invoices to Underlying Trades Provided by CAT

CAT LLC understands that there are three types of reconciliation processes related to the invoices:

- *Reconciliation of CAT Invoices to Underlying Trades*: Reconciling the CAT invoice amount to the underlying trades provided by CAT;
- *Matching Trades to Books and Records*: Providing the means to match the underlying trades provided by CAT with CAT invoices to other books and records independently maintained by individual CAT Reporters (e.g., exchange trade journals/ acknowledgements) and data sources of self-regulatory organizations independent of CAT; and
- *Order Originator Identification*: Providing the ability to identify the order originator for the underlying trades provided by CAT with CAT invoices, which would facilitate firms' ability to pass through CAT Fees to their customers.

As discussed further below, CAT LLC only considers the first type of process to be a "reconciliation" and the only type of process that is required under the CAT NMS Plan. CAT LLC provides the means to reconcile the CAT invoice amount to the underlying trades provided by CAT.

The CAT NMS Plan does not require CAT LLC to facilitate the second type of process: matching underlying trades for a CAT invoice with a firm's internal books and records. CAT LLC has access only to the underlying trades provided by CAT; it does not have access to a firm's internal books and records. Although beyond the requirements of the CAT NMS Plan and involving firm specific considerations, CAT LLC voluntarily has provided guidance and processes to assist CAT Reporters in their efforts to match the underlying trades with their own books and records.

The CAT NMS Plan also does not require CAT LLC to provide the ability to identify the order originator for the underlying trades for the CAT invoices. Accordingly, the billing guidance and processes do not provide CAT Reporters with the ability to identify the order originator for the underlying trades provided by CAT with CAT invoices. CAT LLC has been working closely with CAT Reporters to explain its billing approach and to address any outstanding billing questions. But, it should not be lost that CAT LLC

provides information sufficient to allow CAT Reporters to reconcile CAT invoice amounts with the underlying trades provided by CAT LLC.

(ii) Match the Underlying Trades Provided by CAT With CAT Invoices to Firms' Internal Books and Records Independent of CAT

The CAT NMS Plan does not require CAT LLC to facilitate the matching of underlying trades for a CAT invoice with a firm's internal books and records, which may consist of trading data from various sources external to CAT. Although beyond the requirements of the CAT NMS Plan and involving firm specific considerations, CAT LLC voluntarily has provided guidance and processes to assist CAT Reporters in their efforts to match the underlying trades with their own books and records.

In this regard, it is important to recognize that CAT LLC has developed a billing approach that greatly improves upon existing billing practices for similar regulatory fees (e.g., fees related to Section 31). Accordingly, with the additional information voluntarily provided by CAT LLC, CAT Reporters generally will have sufficient information to match their underlying trades provided by CAT with their own internal books and records that are independent of CAT or to SRO data that is independent of CAT data. However, CAT LLC emphasizes that providing such additional information is not required by the CAT NMS Plan.

To facilitate the introduction of CAT fees, CAT LLC has worked with FCAT to develop an approach to CAT billing that is consistent with existing billing constructs used with regard to Section 31-related sales values fees, subject to certain enhancements. Under this billing approach, FCAT is providing additional linkage elements, not necessarily provided in the Section 31-sales value fee context, to facilitate CAT Reporters' ability to match the underlying trades provided by CAT with their internal books and records and to reduce the complexity of that process. Specifically, FCAT is providing various key elements of the trade itself, such as the tradeID and branch sequence,¹⁹⁶ to CAT Reporters in the trade billing details provided with their CAT invoices ("Additional Trade

Details"). As a result, CAT Reporters now have numerous alternative methods for matching a trade with their internal books and records where they previously did not have such matching methods in other fee contexts.

With the Additional Trade Details, CAT LLC and FCAT believe that the overwhelming majority of underlying trades provided by CAT bills can be matched with a CAT Reporter's internal books and records. CAT LLC recognizes that there may be certain cases in which such matching is more difficult given various firm-specific considerations, but believes that such instances are significantly more limited than with regard to the SRO fees charged in relation to Section 31.¹⁹⁷ By providing Additional Trade Details that are not available in other fee contexts, FCAT enhances the Industry Members' ability to match the underlying trades provided with CAT invoices with books and records and SRO data, both of which are independent of CAT data.

(iii) CAT LLC Is Not Required To Facilitate CAT Reporters' Ability To Pass Through Fees to Their Customers

Similar to other regulatory fees, the CAT NMS Plan does not address the manner or extent to which CAT Executing Brokers may seek to pass any CAT fees on to their customers, nor does it impose any obligation on CAT LLC or the Plan Processor to facilitate firms' ability to do so. Accordingly, Historical CAT Assessment 1 does not address the process by which any CAT Reporters may pass through the fee to their customers. Likewise, the CAT billing approach provided by the Plan Processor is designed to address the needs of CAT Reporters with regard to the reconciliation of CAT invoices with the underlying trades provided by CAT LLC with the invoices; they are not designed to address issues related to any pass-through fees. Accordingly, facilitating CAT Reporters' ability to pass through fees to their clients is outside the scope of this fee filing. Nevertheless, as described below, CAT LLC and the Plan Processor have expended significant efforts to provide

¹⁹⁶ See CAT Technical Specifications for Billing Trade Details; Trade Details Schema (<https://catnmsplan.com/sites/default/files/2024-02/02.05.24-Billing-Trade-Details-Schema.json>); CAT Billing Scenarios, Version 1.0 (Nov. 30, 2023) (<https://www.catnmsplan.com/sites/default/files/2024-01/01.12.2024-CAT-Billing-Scenarios-v1.0.pdf>).

¹⁹⁷ For years, broker-dealers have faced similar reconciliation issues with regard to SRO fees related to Section 31. Broker-dealers have responded to this issue in the Section 31 context by exercising their discretion as to whether and the manner and extent to which they pass on those fees (e.g., by rounding up its fees to the nearest cent, or decide to charge for, or not charge for, certain transactions, or assess a specific fee or incorporate the costs into other fee programs). See, e.g., Securities Exchange Act Rel. No. 49928 (June 28, 2004), 69 FR 41060, 41072 (July 7, 2004) (noting that broker-dealers may "over-collect" Section 31-related fees charged to their clients due to rounding practices, and double-counting with regard to certain transactions).

technical assistance to Industry Members regarding the implementation of Historical CAT Assessment 1, including providing Additional Trade Details that provide significant details about each underlying trade.

(a) Originating Brokers Versus Executing Brokers

In its approval of the CAT Funding Model, the Commission approved charging CAT fees to the CAT Executing Broker, rather than the originating broker. This fee filing must comply with the requirements of the CAT Funding Model, and, therefore, charges the Historical CAT Assessment 1 to CAT Executing Brokers.

Moreover, charging originating brokers would introduce significant complexity to the billing process from the CAT's perspective, and would increase the costs of implementing CAT fees. Charging the CAT Executing Broker is simple and straightforward, and leverages a one-to-one relationship between billable events (trades) and billable parties, similar to other transaction-based fees. In contrast, for a single trade event, there may be many originating brokers, and each trade must be broken down on a pro-rata basis, to account for one or more layers of aggregation, disaggregation, and representation of the underlying orders. While CAT is indeed designed to capture and unwind complex aggregation scenarios, the data and linkages are structured to facilitate regulatory use, and not a billing mechanism that assesses fees on a distinct set of executed trades; it is not simply a matter of using existing CAT linkages. Furthermore, charging originating brokers would implicate issues related to lifecycle linkage rates, and issues related to corrections, cancellations and allocations, while charging CAT Executing Brokers would avoid such issues.

(b) Identification of Order Originator for Underlying Trades

As noted, the CAT NMS Plan does not address the manner or extent to which CAT Executing Brokers may seek to pass any CAT Fees on to their customers, nor does it impose any obligation on CAT LLC or the Plan Processor to facilitate firms' ability to do so. Nevertheless, the Additional Trade Details provided with regard to the underlying trades on CAT invoices may assist with this process. Like with Section 31-related sales value fees, however, it is not always possible to trace every fee on a transaction back to the originating party. Industry Members have faced these issues under Section 31-related sales values fees for

many years.¹⁹⁸ However, with the Additional Trade Details provided under the CAT billing approach, in many cases, CAT Reporters will be able to identify the order originator for the underlying trades provided by CAT with CAT invoices. In some cases, CAT LLC believes that certain issues related to certain types of market activity may implicate CAT Reporters' ability to identify the order originator for a limited set of underlying trades for the CAT invoices. Although CAT LLC does not believe that it is required to address these issues, CAT LLC and FCAT have been carefully researching and analyzing these types of issues as they are identified, and have been working voluntarily to assist CAT Reporters with these issues as necessary and when possible. In addition, CAT LLC intends to continue to provide CAT Reporters with billing guidance through FAQs, CAT Alerts and Helpdesk responses to address outstanding billing questions.

(B) Significant Technical Assistance

CAT LLC has worked with FCAT to provide significant technical assistance to Industry Members to allow the Industry Members to understand how Historical CAT Assessment 1 will be implemented and billed, including webinars, CAT alerts, mock invoices, and responses to questions posed to the FCAT Help Desk.

- *Technical Specifications and Scenarios.* CAT LLC has provided detailed technical documentation for CAT billing, including (1) technical specifications, which describe the CAT Billing Trade Details Files associated with monthly CAT invoices, including detailed information about data elements and file formats as well as access instructions, network and transport options;¹⁹⁹ (2) trade details

schemas;²⁰⁰ and (3) CAT billing scenarios.²⁰¹

- *Industry Webinars.* CAT LLC has hosted two industry webinars specifically dedicated to CAT billing. The first webinar, hosted on September 28, 2023, discussed the operational implementation of the CAT Reporter billing process.²⁰² The second webinar, hosted on November 7, 2023, provided (1) a demonstration of the CAT Reporter Portal and how to access CAT billing documents, including CAT invoices; and (2) additional information on underlying trade details in relation to the CAT Reporter billing process and an overview of the CAT Contact Management System.²⁰³ 485 participants and 394 participants attended the two webinars, respectively.

- *CAT Alert.* CAT LLC has published a detailed CAT Alert that describes how FCAT, as the Plan Processor acting on behalf of CAT LLC, will calculate applicable fees, issue invoices to and collect payment from CAT Executing Brokers.²⁰⁴

- *Frequently Asked Questions (FAQs).* CAT LLC also has continued to engage with the industry on billing issues by making responses to billing FAQs available on the CAT website. The FAQs address a broad range of frequently asked questions, including, for example, which Industry Members will receive invoices, how fees are calculated, when and how fees are required to be paid, how to access invoices, and how to update the billing contact. To date, responses to 27 FAQs are available on the CAT website, and CAT LLC will provide additional responses to FAQs as warranted.²⁰⁵

- *Mock Invoices.* To assist Industry Members with compliance with the commencement of Historical CAT Assessment 1, CAT LLC has been making available to CAT Executing Brokers mock invoices for Historical CAT Assessment 1 since December 2023 for billable activity occurring in

¹⁹⁸ "FINRA charges a Regulatory Transaction Fee ("RTF") to industry members to reimburse FINRA for the Section 31 fees that FINRA pays to the Commission. FINRA does not currently provide industry members with the data that industry members require for proper reconciliation of RTF fees. This has been a major problem for the industry for many years." Letter from Howard Meyerson, Managing Director, FIF, to Robert Cook, Chief Executive Officer, FINRA at 2 (Dec. 15, 2023) (<https://fif.com/index.php/working-groups/category/271-comment-letters?download=2820:fif-letter-to-finra-on-pass-through-of-finra-cat-fees&view=category>).

²⁰⁴ See CAT Alert 2023-02 (Oct. 12, 2023) (<https://www.catnmsplan.com/sites/default/files/2023-10/10.12.23-CAT-Alert-2023-02.pdf>).

²⁰⁵ See CAT Billing FAQs, Section V of CAT FAQs (https://www.catnmsplan.com/faq?search_api_fulltext=&field_topics=271&sort_by=field_faq_number).

November 2023. The mock invoices are in the same form as the actual, payable invoices, including both the relevant transaction data and the corresponding fee (as originally contemplated). However, no payments are required in response to such mock invoices; they are to be used solely to assist CAT Executing Brokers with the development of their processes for paying the CAT fees. Such data provides CAT Executing Brokers with a preview of the transaction data used in creating the invoices for Historical CAT Assessment 1 fees, as the data will be the same as data provided in actual invoices. Such data preview is intended to facilitate the payment of Historical CAT Assessment 1. For the November, December, and January billing periods, FCAT has generated trade detail files for 569 distinct firms that are CAT Executing Brokers. As such, CAT Reporters have actively engaged in the billing process via the mock invoices.

- *Help Desk Assistance.* CAT LLC also provides detailed, individualized assistance to Industry Members regarding CAT fees and the billing process through the FCAT Help Desk.²⁰⁶ For example, the Help Desk has assisted with 406 cases related to the billing of CAT fees from July 2023 through March 2024.

By providing such detailed and sustained assistance to Industry Members regarding CAT fees and billing, CAT LLC has successfully addressed questions raised by Industry Members regarding the CAT fees and billing processes.

(C) Ample Preparation Time

CAT LLC has provided Industry Members with ample time to comply with the implementation of Historical CAT Assessment 1. CAT LLC originally proposed issuing the first invoices for Historical CAT Assessment 1 in December 2023 based on transactions in Eligible Securities in November 2023. In consideration of the feedback about the need for additional time to implement the new fee, CAT LLC pushed back this timeline by four months, proposing to issue the first Historical CAT Assessment 1 in April 2024 based on transactions in March 2024.²⁰⁷ This filing pushes this timeline back even further for implementing Historical CAT

Assessment 1, proposing to issue the first invoices for Historical CAT Assessment 1 in November 2024 based on transactions in Eligible Securities in October 2024. Moreover, as discussed above, during these additional months, FCAT has been working closely with Industry Members to provide guidance regarding their mock bills and reconciliation efforts related thereto.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of the Exchange Act. The Exchange believes that the proposed rule change is consistent with Section 6(b)(5) of the Act,²⁰⁸ which requires, among other things, that the Exchange's rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and not designed to permit unfair discrimination between customers, issuers, brokers and dealers. The Exchange also believes that the proposed rule change is consistent with the provisions of Section 6(b)(4) of the Act,²⁰⁹ because it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers. The Exchange further believes that the proposed rule change is consistent with Section 15A(b)(9) of the Act,²¹⁰ which requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. These provisions also require that the Exchange be "so organized and [have] the capacity to be able to carry out the purposes" of the Act and "to comply, and . . . to enforce compliance by its members and persons associated with its members," with the provisions of the Exchange Act.²¹¹ Accordingly, a reasonable reading of the Act indicates that it intended that regulatory funding be sufficient to permit an exchange to fulfill its statutory responsibility under the Act, and contemplated that such funding would be achieved through equitable assessments on the members, issuers, and other users of an exchange's facilities.

The Exchange believes that this proposal is consistent with the Act

because it implements provisions of the Plan and is designed to assist the Exchange in meeting regulatory obligations pursuant to the Plan. In approving the Plan, the SEC noted that the Plan "is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act."²¹² To the extent that this proposal implements the Plan and applies specific requirements to Industry Members, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Act.

The Exchange believes that the proposed fees paid by the CEBBs and CEBs are reasonable, equitably allocated and not unfairly discriminatory. First, the Historical CAT Assessment 1 fees to be collected are directly associated with the costs of establishing and maintaining the CAT, where such costs include Plan Processor costs and costs related to technology, legal, consulting, insurance, professional and administration, and public relations costs. The Exchange has already incurred such development and implementation costs and the proposed Historical CAT Assessment 1 fees, therefore, would allow the Exchange to collect certain of such costs in a fair and reasonable manner from Industry Members, as contemplated by the CAT NMS Plan.

The proposed Historical CAT Assessment 1 fees would be charged to Industry Members in support of the maintenance of a consolidated audit trail for regulatory purposes. The proposed fees, therefore, are consistent with the Commission's view that regulatory fees be used for regulatory purposes and not to support the Exchange's business operations. The proposed fees would not cover Exchange services unrelated to the CAT. In addition, any surplus would be used as a reserve to offset future fees. Given the direct relationship between CAT fees and CAT costs, the Exchange believes that the proposed fees are reasonable, equitable and not unfairly discriminatory.

As further discussed below, the SEC approved the CAT Funding Model, finding it was reasonable and that it equitably allocates fees among Participants and Industry Members. The Exchange believes that the proposed fees adopted pursuant to the CAT

²⁰⁶ The CAT NMS Plan requires that the Plan Processor "staff a CAT help desk, as described in Appendix D, CAT Help Desk, to provide technical expertise." Section 6.10(c)(vi) of the CAT NMS Plan. See also Section 10.3 of Appendix D of the CAT NMS Plan for a description of the Plan requirements for the CAT Help Desk.

²⁰⁷ Securities Exchange Act Rel. No. 34-99365 (January 17, 2024), 89 FR 10278 (February 13, 2024) ("SR-GEMX-2024-02").

²⁰⁸ 15 U.S.C. 78f(b)(6).

²⁰⁹ 15 U.S.C. 78f(b)(4).

²¹⁰ 15 U.S.C. 78o-3(b)(9).

²¹¹ See Section 6(b)(1) of the Exchange Act.

²¹² CAT NMS Plan Approval Order at 84697.

Funding Model approved by the SEC are reasonable, equitably allocated and not unfairly discriminatory.

(1) Implementation of CAT Funding Model in CAT NMS Plan

Section 11.1(b) of the CAT NMS Plan states that “[t]he Participants shall file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves.” Per Section 11.1(b) of the CAT NMS Plan, the Exchange has filed this fee filing to implement the Industry Member CAT fees included in the CAT Funding Model. The Exchange believes that this proposal is consistent with the Exchange Act because it is consistent with, and implements, the CAT Funding Model in the CAT NMS Plan, and is designed to assist the Exchange and its Industry Members in meeting regulatory obligations pursuant to the CAT NMS Plan. In approving the CAT NMS Plan, the SEC noted that the Plan “is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.”²¹³ Similarly, in approving the CAT Funding Model, the SEC concluded that the CAT Funding Model met this standard.²¹⁴ As this proposal implements the Plan and the CAT Funding Model described therein, and applies specific requirements to Industry Members in compliance with the Plan, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Exchange Act.

(2) Calculation of Fee Rate for Historical CAT Assessment 1 is Reasonable

The SEC has determined that the CAT Funding Model is reasonable and satisfies the requirements of the Exchange Act. Specifically, the SEC has concluded that the method for determining Historical CAT Assessments as set forth in Section 11.3 of the CAT NMS Plan, including the formula for calculating the Historical Fee Rate, the identification of the parties responsible for payment and the transactions subject to the fee rate for the Historical CAT Assessment, is reasonable and satisfies the Exchange Act.²¹⁵ In each respect, as discussed above, Historical CAT Assessment 1 is calculated, and would be applied, in

accordance with the requirements applicable to Historical CAT Assessments as set forth in the CAT NMS Plan. Furthermore, as discussed below, the Exchange believes that each of the figures for the variables in the SEC-approved formula for calculating the fee rate for Historical CAT Assessment 1 is reasonable and consistent with the Exchange Act. Calculation of the Historical Fee Rate for Historical CAT Assessment 1 requires the figures for the Historical CAT Costs 1, the executed equivalent share volume for the prior twelve months, the determination of Historical Recovery Period 1, and the projection of the executed equivalent share volume for Historical Recovery Period 1. Each of these variables is reasonable and satisfies the Exchange Act, as discussed throughout this filing.

(A) Historical CAT Costs 1

The formula for calculating a Historical Fee Rate requires the amount of Historical CAT Costs to be recovered. Specifically, Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan requires a fee filing to provide:

a brief description of the amount and type of the Historical CAT Costs, including (1) the technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees, and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration and (6) public relations costs.

In accordance with this requirement, the Exchange has set forth the amount and type of Historical CAT Costs 1 for each of these categories of costs above.

Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan also requires that the fee filing provide “sufficient detail to demonstrate that the Historical CAT Costs are reasonable and appropriate.” As discussed below, the Exchange believes that the amounts set forth in this filing for each of these cost categories is “reasonable and appropriate.” Each of the costs included in Historical CAT Costs 1 are reasonable and appropriate because the costs are consistent with standard industry practice, based on the need to comply with the requirements of the CAT NMS Plan, incurred subject to negotiations performed on an arm’s length basis, and/or are consistent with the needs of any legal entity, particularly one with no employees.

(i) Technology: Cloud Hosting Services

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover costs related to cloud hosting services as a part of

Historical CAT Assessments.²¹⁶ CAT LLC determined that the costs related to cloud hosting services described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. As described above, the cloud hosting services costs reflect, among other things, the breadth of the CAT cloud activities, data volume far in excess of the original volume estimates, the need for specialized cloud services given the volume and unique nature of the CAT, the processing time requirements of the Plan, and regular efforts to seek to minimize costs where permissible under the Plan. CAT LLC determined that use of cloud hosting services is necessary for implementation of the CAT, particularly given the substantial data volumes associated with the CAT, and that the fees for cloud hosting services negotiated by FCAT were reasonable, taking into consideration a variety of factors, including the expected volume of data and the breadth of services provided and market rates for similar services.²¹⁷ Indeed, the actual costs of the CAT are far in excess of the original estimated costs of the CAT due to various factors, including the higher volumes and greater complexity of the CAT than anticipated when Rule 613 was originally adopted.

To comply with the requirements of the Plan, the breadth of the cloud activities related to the CAT is substantial. The cloud services not only include the production environment for the CAT, but they also include two industry testing environments, support environments for quality assurance and stress testing and disaster recovery capabilities. Moreover, the cloud storage costs are driven by the requirements of the Plan, which requires the storage of multiple versions of the data, from the original submitted version of the data through various processing steps, to the final version of the data.

Data volume is a significant driver of costs for cloud hosting services. When the Commission adopted the CAT NMS Plan in 2016, it estimated that the CAT would need to receive 58 billion records per day²¹⁸ and that annual operating costs for the CAT would range from \$36.5 million to \$55 million.²¹⁹ Through 2021, the actual data volumes have been five times that original

²¹⁶ Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

²¹⁷ For a discussion of the amount and type of cloud hosting services fees, see Sections 3(a)(2)(B)(i)(a), 3(a)(2)(B)(ii)(a), 3(a)(2)(B)(iii)(a) and 3(a)(2)(B)(iv)(A) above.

²¹⁸ Appendix D–4 of the CAT NMS Plan at n.262.

²¹⁹ CAT NMS Plan Approval Order at 84801.

²¹³ CAT NMS Plan Approval Order at 84696.

²¹⁴ CAT Funding Model Approval Order at 62686.

²¹⁵ *Id.* at 62662–63.

estimate. The data volumes for each period are set forth in detail above.²²⁰

In addition to the effect of the data volume on the cloud hosting costs, the processing timelines set forth in the Plan contribute to the cloud hosting costs. Although CAT LLC has proactively sought to manage cloud hosting costs while complying with the Plan, including through requests to the Commission for exemptive relief and an amendment to the CAT NMS Plan, stringent CAT NMS Plan requirements do not allow for any material flexibility in cloud architecture design choices, processing timelines (e.g., the use of non-peak processing windows), or lower-cost storage tiers. As a result, the required CAT processing timelines contribute to the cloud hosting costs of the CAT.

The costs for cloud hosting services also reflect the need for specialized cloud hosting services given the data volume and unique processing needs of the CAT. The data volume as well as the data processing needs of the CAT necessitate the use of cloud hosting services. The equipment, power and services required for an on-premises data model, the alternative to cloud hosting services, would be cost prohibitive. Moreover, as CAT was being developed, there were limited cloud hosting providers that could satisfy all the necessary CAT requirements, including the operational and security criteria. Over time more providers offering cloud hosting services that would satisfy these criteria have entered the market. CAT LLC will continue to evaluate alternative cloud hosting services, recognizing that the time and cost to move to an alternative cloud provider would be substantial.

The reasonableness of the cloud hosting services costs is further supported by key cost discipline mechanisms for the CAT—a cost-based funding structure, cost transparency, cost management efforts (including regular efforts to lower compute and storage costs where permitted by the Plan) and oversight. Together, these mechanisms help ensure the ongoing reasonableness of the CAT's costs and the level of fees assessed to support those costs.²²¹

(ii) Technology: Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to operating fees

as a part of Historical CAT Assessments.²²² CAT LLC determined that the costs related to operating fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. The operating fees include the negotiated fees paid by CAT LLC to the Plan Processor to operate and maintain the system for order-related information and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (e.g., management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the selection of FCAT as the Plan Processor was reasonable and appropriate given its expertise with securities regulatory reporting, after a process of considering other potential candidates.²²³ CAT LLC also determined that the fixed price contract, negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, was reasonable and appropriate, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity.²²⁴ The services performed by FCAT for each period and the costs related to such services are described above.²²⁵

(iii) Technology: CAIS Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to CAIS operating fees as a part of Historical CAT Assessments.²²⁶ CAT LLC determined that the costs related to CAIS operating fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. The CAIS operating fees include the fees paid to the Plan Processor to operate and maintain CAIS and to perform the business operations related to the system, including compliance, security, testing, training, communications with the industry (e.g., management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the FCAT-negotiated fees for Kingland's CAIS-related services, negotiated on an arm's length basis with the goals of managing costs

and receiving services required to comply with the CAT NMS Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity, were reasonable and appropriate.²²⁷ The services performed by Kingland for each period and the costs for each period are described above.²²⁸

(iv) Technology: Change Request Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to change request fees as a part of Historical CAT Assessments.²²⁹ CAT LLC determined that the costs related to change request fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. It is common practice to utilize a change request process to address evolving needs in technology projects. This is particularly true for a project like CAT that is the first of its kind, both in substance and in scale. The substance and costs of each of the change requests are evaluated by the Operating Committee, and approved in accordance with the requirements for Operating Committee meetings. In each case, CAT LLC determined that the change requests were necessary to implement the CAT. As described above, the change requests cover various technology changes, including, for example, changes related to CAT reporting, data feeds and exchange functionality. CAT LLC also determined that the costs for each change request were appropriate for the relevant technology change. A description of the change requests for each FAM Period and their total costs are set described above.²³⁰ As noted above, the total costs for change requests through FAM Period 3 represent a small percentage of Historical CAT Costs 1—that is, 0.25% of Historical CAT Costs 1.

(v) Capitalized Developed Technology Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to capitalized developed technology costs as a part of Historical CAT Assessments.²³¹ Capitalized developed technology costs include costs related to certain

²²⁷ See Sections 3(a)(2)(B)(i)(c), 3(a)(2)(B)(ii)(c), 3(a)(2)(B)(iii)(c) and 3(a)(2)(B)(iv)(c) above.

²²⁸ *Id.*

²²⁹ Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

²²⁰ See Sections 3(a)(2)(B)(i)(a), 3(a)(2)(B)(ii)(a), 3(a)(2)(B)(iii)(a) and 3(a)(2)(B)(iv)(A) above.

²²¹ See Securities Exchange Act Rel. No. 97151 (Mar. 15, 2023), 88 FR 17086, 17117 (Mar. 21, 2023) (describing key cost discipline mechanisms for the CAT).

development costs, costs related to certain modifications, upgrades and other changes to the CAT, CAIS implementation fees and license fees. The amount and type of costs for each period are described in more detail above.²³² CAT LLC determined that these costs are reasonable and should be included as a part of Historical CAT Costs 1.

These costs involve the activity of both the Initial Plan Processor and FCAT, as the successor Plan Processor.²³³ With regard to the Initial Plan Processor, the Participants utilized an RFP to seek proposals to build and operate the CAT, receiving a number of proposals in response to the RFP. The Participants carefully reviewed and considered each of the proposals, including holding in-person meetings with each of the Bidders. After several rounds of review, the Participants selected the Initial Plan Processor in accordance with the CAT NMS Plan. CAT LLC entered into an agreement with the Initial Plan Processor in which CAT LLC would pay the Initial Plan Processor a negotiated, fixed price fee.²³⁴ In addition, as described above, CAT LLC determined that it is appropriate to enter into an agreement with FCAT as the successor Plan Processor.²³⁵

(vi) Legal

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to legal fees as a part of Historical CAT Assessments.²³⁶ CAT LLC determined that the legal costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Given the unique nature of the CAT, the number of parties involved with the CAT (including, for example, the SEC, Participants, Industry Members, and vendors) and the many regulatory issues associated with the CAT, the scope of the necessary legal services are substantial. CAT LLC determined that the scope of the legal services is necessary to implement and maintain the CAT and that the legal rates reflect the specialized services necessary for such a project. When hiring each law firm for a CAT project, CAT LLC interviewed multiple firms, and determined to hire each firm based on a variety of factors, including the relevant expertise and fees. In each case,

²³² See Sections 3(a)(2)(B)(i)(e), 3(a)(2)(B)(ii)(e), 3(a)(2)(B)(iii)(e) and 3(a)(2)(B)(iv)(e) above.

²³³ *Id.*

²³⁴ See Section 3(a)(2)(B)(i)(e) above.

²³⁵ See Section 3(a)(2)(B)(i)(b) above.

²³⁶ Section 11.3(b)(iii)(B)(II)(B)(2) of the CAT NMS Plan.

CAT LLC determined that the hourly fee rates were in line with market rates for the specialized legal expertise. In addition, CAT LLC determined that the total costs incurred for each CAT project were appropriate given the breadth of services provided. The services performed by each law firm for each period and the costs related to such services are described above.²³⁷

(vii) Consulting

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover consulting costs as a part of Historical CAT Assessments.²³⁸ CAT LLC determined that the consulting costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Because there are no CAT employees²³⁹ and because of the significant number of issues associated with the CAT, the consultants provided assistance in the management of various CAT matters and the processes related to such matters.²⁴⁰ CAT LLC considered a variety of factors in choosing a consulting firm and determined to select Deloitte after an interview process.²⁴¹ CAT LLC also determined that the consulting services were provided at reasonable market rates, as the fees were negotiated annually and comparable to the rates charged by other consulting firms for similar work.²⁴² Moreover, the total costs for such consulting services were appropriate in light of the breadth of services provided by Deloitte. The services performed by Deloitte and the costs related to such services are described above.²⁴³

(viii) Insurance

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover insurance costs as a part of Historical CAT Assessments.²⁴⁴ CAT LLC determined that the insurance costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. CAT LLC determined that it is common practice

²³⁷ See Sections 3(a)(2)(B)(i)(f), 3(a)(2)(B)(ii)(f), 3(a)(2)(B)(iii)(f) and 3(a)(2)(B)(iv)(f) above.

²³⁸ Section 11.3(b)(iii)(B)(II)(B)(3) of the CAT NMS Plan.

²³⁹ As stated in the filing of the proposed CAT NMS Plan, “[i]t is the intent of the Participants that the Company have no employees.” Securities Exchange Act Rel. No. 77724 (Apr. 27, 2016), 81 FR 30614, 30621 (May 17, 2016).

²⁴⁰ CAT LLC uses certain third parties to perform tasks that may be performed by administrators for other NMS Plans. See, e.g., CTA Plan and CQ Plan.

²⁴¹ See Section 3(a)(2)(B)(i)(g) above.

²⁴² See Sections 3(a)(2)(B)(i)(g), 3(a)(2)(B)(ii)(g), 3(a)(2)(B)(iii)(g) and 3(a)(2)(B)(iv)(g) above.

²⁴³ *Id.*

²⁴⁴ Section 11.3(b)(iii)(B)(II)(B)(4) of the CAT NMS Plan.

to have directors’ and officers’ liability insurance, and errors and omissions liability insurance. CAT LLC further determined that it was important to have cyber security insurance given the nature of the CAT, and such a decision is consistent with the CAT NMS Plan, which states that the cyber incident response plan may include “[i]nsurance against security breaches.”²⁴⁵ In selecting the insurance providers for these policies, CAT LLC engaged in an evaluation of alternative insurers, including a comparison of the pricing offered by the alternative insurers.²⁴⁶ Based on this analysis, CAT LLC determined that the selected insurance policies provided appropriate coverage at reasonable market rates.²⁴⁷

(ix) Professional and Administration

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover professional and administration costs as a part of Historical CAT Assessments.²⁴⁸ CAT LLC determined that the professional and administration costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Because there are no CAT employees, all required accounting, financial, tax, cash management and treasury functions for CAT LLC have been outsourced at market rates. In addition, the required annual financial statement audit of CAT LLC is included in professional and administration costs, which costs are also at market rates.

CAT LLC determined to hire a financial advisory firm, Anchin, to assist with financial matters for the CAT. CAT LLC interviewed Anchin as well as other potential financial advisory firms to assist with the CAT project, considering a variety of factors in its analysis, including the firm’s relevant expertise and fees.²⁴⁹ The hourly fee rates for this firm were in line with market rates for the financial advisory services provided.²⁵⁰ Moreover, the total costs for such financial advisory services was appropriate in light of the breadth of services provided by Anchin. The services performed by Anchin and the

²⁴⁵ Section 4.1.5 of Appendix D of the CAT NMS Plan.

²⁴⁶ See Sections 3(a)(2)(B)(i)(h), 3(a)(2)(B)(ii)(h), 3(a)(2)(B)(iii)(h) and 3(a)(2)(B)(iv)(h) above.

²⁴⁷ *Id.*

²⁴⁸ Section 11.3(b)(iii)(B)(II)(B)(5) of the CAT NMS Plan.

²⁴⁹ See Section 3(a)(2)(B)(i)(i) above.

²⁵⁰ See Sections 3(a)(2)(B)(i)(i), 3(a)(2)(B)(ii)(i), 3(a)(2)(B)(iii)(i) and 3(a)(2)(B)(iv)(i) above.

costs related to such services are described above.²⁵¹

CAT LLC also determined to engage an independent accounting firm, Grant Thornton, to complete the audit of CAT LLC's financial statements, in accordance with the requirements of the CAT NMS Plan. CAT LLC interviewed this firm as well as another potential accounting firm to audit CAT LLC's financial statements, considering a variety of factors in its analysis, including the relevant expertise and fees of each of the firms. CAT LLC determined that Grant Thornton was well-qualified for the role given the balance of these considerations.²⁵² Grant Thornton's fixed fee rate compensation arrangement was reasonable and appropriate, and in line with the market rates charged for these types of accounting services.²⁵³ Moreover, the total costs for such financial advisory services was appropriate in light of the breadth of services provided by Grant Thornton. The services performed by Grant Thornton and the costs related to such services are described above.²⁵⁴

The professional and administrative costs also include costs related to the receipt of certain market data from Exegy. After performing an analysis of the available market data vendors to confirm that the data provided met the SIP Data requirements of the CAT NMS Plan and comparing the costs of the vendors providing the required SIP Data, CAT LLC determined to purchase market data from Exegy. Exegy provided the data elements required by the CAT NMS Plan, and the fees were reasonable and in line with market rates for the market data received.²⁵⁵

The professional and administrative costs also include costs related to a third party security assessment of the CAT performed by RSM. The assessment was designed to verify and validate the effective design, implementation and operation of the controls specified by NIST Special Publication 800-53, Revision 4 and related standards and guidelines. Such a security assessment is in line with industry practice and important given the data included in the CAT. CAT LLC determined to engage RSM to perform the security assessment, after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fees

were reasonable and in line with market rates for such an assessment.²⁵⁶

(x) Public Relations Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover public relations costs as a part of Historical CAT Assessments.²⁵⁷ CAT LLC determined that the public relations costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. CAT LLC determined that the types of public relations services utilized were beneficial to the CAT and market participants more generally. Public relations services were important for various reasons, including monitoring comments made by market participants about CAT and understanding issues related to the CAT discussed on the public record.²⁵⁸ By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT issues to the benefit of all market participants.²⁵⁹ Moreover, CAT LLC determined that the rates charged for such services were in line with market rates.²⁶⁰ As noted above, the total public relations costs through FAM Period 3 represent a small percentage of Historical CAT Costs 1—that is, 0.1% of Historical CAT Costs 1.

(B) Total Executed Equivalent Share Volume for the Prior 12 Months

The total executed equivalent share volume of transactions in Eligible Securities for the 12-month period from June 2023 through May 2024 was 3,980,753,840,905.21 executed equivalent shares. CAT LLC determined the total executed equivalent share volume for the prior twelve months by counting executed equivalent shares in the same manner as it will count executed equivalent shares for CAT billing purposes.

(C) Historical Recovery Period 1

CAT LLC has determined to establish a Historical Recovery Period of 24 months for Historical CAT Assessment 1 and that such length is reasonable. CAT LLC determined that the length of Historical Recovery Period 1 appropriately weighs the need for a reasonable Historical Fee Rate 1 that spreads the Historical CAT Costs over an appropriate amount of time and the need to repay the loans notes to the Participants in a timely fashion. CAT

LLC determined that 24 months for Historical Recovery Period 1 would establish a fee rate that is lower than other transaction-based fees, including fees assessed pursuant to Section 31.²⁶¹ In addition, in establishing a Historical Recovery Period of 24 months, CAT LLC recognized that the total costs for Historical CAT Assessment 1 was less than the total costs for 2022 and 2023, and therefore it would be appropriate to recover those costs in two years.

(D) Projected Executed Equivalent Share Volume for Historical Recovery Period 1

CAT LLC has determined to calculate the projected total executed equivalent share volume for the 24 months of Historical Recovery Period 1 by doubling the executed equivalent share volume for the prior 12 months. CAT LLC determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has remained relatively constant in recent years. For example, the executed equivalent share volume for 2021 was 3,963,697,612,395, the executed equivalent share volume for 2022 was 4,039,821,841,560.31, and the executed equivalent share volume for 2023 was 3,868,940,345,680.6. Accordingly, the projected total executed equivalent share volume for Historical Recovery Period 1 is projected to be 7,961,507,681,810.42 executed equivalent shares.²⁶²

(E) Actual Fee Rate for Historical CAT Assessment 1

(i) Decimal Places

As noted in the Plan amendment for the CAT Funding Model, as a practical matter, the fee filing for a Historical CAT Assessment would provide the exact fee per executed equivalent share to be paid for each Historical CAT Assessment, by multiplying the Historical Fee Rate by one-third and describing the relevant number of decimal places for the fee rate.²⁶³ Accordingly, proposed paragraph (a)(1)(B) of the fee schedule would set forth a fee rate of \$0.000013 per executed equivalent share. This fee rate is calculated by multiplying Historical Fee Rate 1 by one-third, and rounding the result to 6 decimal places. CAT LLC determined that the use of six decimal places is reasonable as it balances the

²⁶³ CAT Funding Model Approval Order at 62658, n.658.

accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.

(ii) Reasonable Fee Level

The Exchange believes that imposing Historical CAT Assessment 1 with a fee rate of \$0.000013 per executed equivalent share is reasonable because it provides for a revenue stream for the Company that is aligned with Historical CAT Costs 1 and such costs would be spread out over an appropriate recovery period, as discussed above. Moreover, the Exchange believes that the level of the fee rate is reasonable, as it is comparable to other transaction-based fees. Indeed, Historical CAT Assessment 1 is significantly lower than fees assessed pursuant to Section 31 (*e.g.*, \$0.0009 per share to 0.0004 per share),²⁶⁴ and, as a result, the magnitude of Historical CAT Assessment 1 is small, and therefore will mitigate any potential adverse economic effects or inefficiencies.²⁶⁵ Furthermore, the reasonable fee rate for Historical CAT Assessment 1 further supports CAT LLC's decision to seek to recover all Historical CAT Costs prior to 2022, rather than establishing separate Historical CAT Assessments for pre-FAM, FAM 1, FAM 2 and FAM 3 costs.

(3) Historical CAT Assessment 1 Provides for an Equitable Allocation of Fees

Historical CAT Assessment 1 provides for an equitable allocation of fees, as it equitably allocates CAT costs between and among the Participants and Industry Members. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfied the requirements of the Exchange Act, including the formula for calculating Historical CAT Assessments as well as the Industry Members to be charged the Historical CAT Assessments.²⁶⁶ In approving the CAT Funding Model, the SEC stated that "[t]he Participants have sufficiently demonstrated that the proposed allocation of fees is reasonable."²⁶⁷ Accordingly, the CAT Funding Model sets forth the requirements for allocating fees related to Historical CAT Costs among Participants and Industry Members, and the fee filings for Historical CAT Assessments must comply with those requirements.

Historical CAT Assessment 1 provides for an equitable allocation of fees as it complies with the requirements regarding the calculation of Historical CAT Assessments as set forth in the CAT NMS Plan. For example, as described above, the calculation of Historical CAT Assessment 1 complies with the formula set forth in Section 11.3(b) of the CAT NMS Plan. In addition, Historical CAT Assessment 1 would be charged to CEBBs and CEBSSs in accordance with Section 11.3(b) of the CAT NMS Plan. Furthermore, the Participants would continue to remain responsible for their designated share of Past CAT Costs through the cancellation of loans made by the Participants to CAT LLC.

In addition, as discussed above, each of the inputs into the calculation of Historical CAT Assessment 1—Historical CAT Costs 1 (including Excluded Costs), the count for the executed equivalent share volume for the prior 12 months, the length of the Historical Recovery Period, and the projected executed equivalent share volume for the Historical Recovery Period—are reasonable. Moreover, these inputs lead to a reasonable fee rate for Historical CAT Assessment 1 that is lower than other fee rates for transaction-based fees. A reasonable fee rate allocated in accordance with the requirements of the CAT Funding Model provides for an equitable allocation of fees.

(4) Historical CAT Assessment 1 Is Not Unfairly Discriminatory

Historical CAT Assessment 1 is not an unfairly discriminatory fee. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfied the requirements of the Exchange Act. In reaching this conclusion, the SEC analyzed the potential effect of Historical CAT Assessments calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members, such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. Historical CAT Assessment 1 complies with the requirements regarding the calculation of Historical CAT Assessments as set forth in the CAT NMS Plan. In addition, as discussed above, each of the inputs into the calculation of Historical CAT Assessment 1 and the resulting fee rate for Historical CAT Assessment 1 is

reasonable. Therefore, Historical CAT Assessment 1 does not impose an unfairly discriminatory fee on Industry Members.

Finally, the Exchange believes the proposed fees established pursuant to the CAT Funding Model promote just and equitable principles of trade, and, in general, protect investors and the public interest, and are provided in a transparent manner and specificity in the fee schedule. The Exchange also believes that the proposed fees are reasonable because they would provide ease of calculation, ease of billing and other administrative functions, and predictability of a fee based on fixed rate per executed equivalent share. Such factors are crucial to estimating a reliable revenue stream for CAT LLC and for permitting Exchange members to reasonably predict their payment obligations for budgeting purposes.

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 6(b)(8) of the Act²⁶⁸ requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that Historical CAT Assessment 1 implements provisions of the CAT NMS Plan that were approved by the Commission and is designed to assist the Exchange in meeting its regulatory obligations pursuant to the Plan.

In addition, all Participants (including exchanges and FINRA) are proposing to introduce Historical CAT Assessment 1 on behalf of CAT LLC to implement the requirements of the CAT NMS Plan. Therefore, this is not a competitive fee filing, and, therefore, it does not raise competition issues between and among the Participants.

Furthermore, in approving the CAT Funding Model, the SEC analyzed the potential competitive impact of the CAT Funding Model, including competitive issues related to market services, trading services and regulatory services, efficiency concerns, and capital formation.²⁶⁹ The SEC also analyzed the potential effect of CAT fees calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA),

²⁶⁴ CAT Funding Model Approval Order at 62663, 62682.

²⁶⁵ *Id.*

²⁶⁶ See Section 11.3(b) of the CAT NMS Plan.

²⁶⁷ CAT Funding Model Approval Order at 62629.

²⁶⁹ CAT Funding Model Approval Order at 62676–86.

Industry Members (including subcategories of Industry Members, such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. Based on this analysis, the SEC approved the CAT Funding Model as compliant with the Exchange Act. Historical CAT Assessment 1 is calculated and implemented in accordance with the CAT Funding Model as approved by the SEC.

As discussed above, each of the inputs into the calculation of Historical CAT Assessment 1 is reasonable and the resulting fee rate for Historical CAT Assessment 1 calculated in accordance with the CAT Funding Model is reasonable. Therefore, Historical CAT Assessment 1 would not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Exchange Act²⁷⁰ and Rule 119b-4(f)(2) thereunder.²⁷¹

²⁷⁰ 15 U.S.C. 78s(b)(3)(A)(ii).

²⁷¹ 17 CFR 240.119b-4(f)(2).

because it establishes or changes a due, or fee.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend the rule change if it appears to the Commission that the action is necessary or appropriate in the public interest, for the protection of investors, or would otherwise further the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-GEMX-2024-30 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-GEMX-2024-30. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use

only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-GEMX-2024-30 and should be submitted on or before October 4, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁷²

Part VI

Securities and Exchange Commission

Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Establish Fees for Industry Members Related to Certain Historical Costs of the National Market System Plan Governing the Consolidated Audit Trail; Notice

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100954; File No. SR–PHLX–2024–43]

Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Establish Fees for Industry Members Related to Certain Historical Costs of the National Market System Plan Governing the Consolidated Audit Trail

September 5, 2024.

Pursuant to Section 19(b)(1) under the Securities Exchange Act of 1934 (the “Act”)¹ and Rule 19b–4 thereunder,² notice is hereby given that on August 23, 2024, Nasdaq PHLX LLC (“PHLX” or the “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to establish fees for Industry Members³ related to certain historical costs of the National Market System Plan Governing the Consolidated Audit Trail (the “CAT NMS Plan” or “Plan”) incurred prior to January 1, 2022.

The text of the proposed rule change is available on the Exchange’s website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the

proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On July 11, 2012, the Commission adopted Rule 613 of Regulation NMS, which required the self-regulatory organizations (“SROs”) to submit a national market system (“NMS”) plan to create, implement and maintain a consolidated audit trail that would capture customer and order event information for orders in NMS securities across all markets, from the time of order inception through routing, cancellation, modification or execution.⁴ On November 15, 2016, the Commission approved the CAT NMS Plan.⁵ Under the CAT NMS Plan, the Operating Committee has the discretion to establish funding for CAT LLC to operate the CAT, including establishing fees for Industry Members to be assessed by CAT LLC that would be implemented on behalf of CAT LLC by the Participants.⁶ The Operating Committee adopted a revised funding model to fund the CAT (“CAT Funding Model”). On September 6, 2023, the Commission approved the CAT Funding Model, after concluding that the model was reasonable and that it satisfied the requirements of Section 11A of the Exchange Act and Rule 608 thereunder.⁷

The CAT Funding Model provides a framework for the recovery of the costs to create, develop and maintain the CAT, including providing a method for allocating costs to fund the CAT among Participants and Industry Members. The CAT Funding Model establishes two categories of fees: (1) CAT fees assessed by CAT LLC and payable by certain Industry Members to recover a portion of historical CAT costs previously paid by the Participants (“Historical CAT Assessment” fees); and (2) CAT fees assessed by CAT LLC and payable by Participants and Industry Members to

fund prospective CAT costs (“Prospective CAT Costs” fees).⁸

Under the CAT Funding Model, “[t]he Operating Committee will establish one or more fees (each a ‘Historical CAT Assessment’) to be payable by Industry Members with regard to CAT costs previously paid by the Participants (‘Past CAT Costs’).”⁹ In establishing a Historical CAT Assessment, the Operating Committee will determine a “Historical Recovery Period” and calculate a “Historical Fee Rate” for that Historical Recovery Period. Then, for each month in which a Historical CAT Assessment is in effect, each CEBB and CEBS would be required to pay the fee—the Historical CAT Assessment—for each transaction in Eligible Securities executed by the CEBB or CEBS from the prior month as set forth in CAT Data, where the Historical CAT Assessment for each transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Historical Fee Rate.¹⁰

Each Historical CAT Assessment to be paid by CEBBs and CEBSs is designed to contribute toward the recovery of two-thirds of the Historical CAT Costs. Because the Participants previously have paid Past CAT Costs via loans to the Company, the Participants would not be required to pay any Historical CAT Assessment. In lieu of a Historical CAT Assessment, the Participants’ one-third share of Historical CAT Costs will be paid by the cancellation of loans made by the Participants to the Company on a pro rata basis based on the outstanding loan amounts due under the loans, instead of through the payment of a CAT fee.¹¹ In addition, the Participants also will be 100% responsible for certain Excluded Costs (as discussed below).

CAT LLC proposes to charge CEBBs and CEBSs (as described in more detail

⁸ Under the CAT Funding Model, the Operating Committee may establish one or more Historical CAT Assessments. Section 11.3(b) of the CAT NMS Plan. This filing only establishes Historical CAT Assessment 1 related to certain Historical CAT Costs as described herein; it does not address any other potential Historical CAT Assessment related to other Historical CAT Costs. In addition, under the CAT Funding Model, the Operating Committee also may establish CAT Fees related to CAT costs going forward. Section 11.3(a) of the CAT NMS Plan. This filing does not address any potential CAT Fees related to CAT costs going forward. Any such other fee for any other Historical CAT Assessment or CAT Fee for Prospective CAT Costs will be subject to a separate fee filing.

⁹ Section 11.3(b) of the CAT NMS Plan.

¹⁰ In approving the CAT Funding Model, the Commission stated that, “[i]n the Commission’s view, the proposed recovery of the Past CAT Costs via the Historical CAT Assessment is reasonable.” CAT Funding Model Approval Order at 62662.

¹¹ Section 11.3(b)(ii) of the CAT NMS Plan.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

³ An “Industry Member” is defined as “a member of a national securities exchange or a member of a national securities association.” See Nasdaq Rule General 7(u) (PHLX General 7 incorporates The Nasdaq Stock Market LLC Rule General 7 by reference); See also Section 1.1 of the CAT NMS Plan. Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in the CAT NMS Plan and/or the CAT Compliance Rule. Nasdaq Rule General 7 (Consolidated Audit Trail Compliance).

⁵ Securities Exchange Act Rel. No. 79318 (Nov. 15, 2016), 81 FR 84696 (Nov. 23, 2016) (“CAT NMS Plan Approval Order”).

⁶ Section 11.1(b) of the CAT NMS Plan.

⁷ Securities Exchange Act Rel. No. 98290 (Sept. 6, 2023), 88 FR 62628 (Sept. 12, 2023) (“CAT Funding Model Approval Order”).

below) Historical CAT Assessment 1 to recover certain historical CAT costs incurred prior to January 1, 2022, in accordance with the CAT Funding Model. To implement this fee on behalf of CAT LLC, the CAT NMS Plan requires the Participants to “file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves, and such fees shall be labeled as ‘Consolidated Audit Trail Funding Fees.’”¹² The Plan further states that “Participants will be required to file with the SEC pursuant to Section 19(b) of the Exchange Act a filing for each Historical CAT Assessment.”¹³ Accordingly, the purpose of this filing is to implement a Historical CAT Assessment on behalf of CAT LLC for Industry Members, referred to as Historical CAT Assessment 1, in accordance with the CAT NMS Plan.¹⁴

The Exchange previously filed a fee filing to implement Historical CAT Assessment 1. On January 17, 2024, the SEC published this prior filing for

Historical CAT Assessment 1, temporarily suspended the fee filing, and instituted proceedings to determine whether to approve or disapprove the fee filing.¹⁵ The Exchange is withdrawing its original fee filing for Historical CAT Assessment 1. This Historical CAT Assessment 1 replaces the prior Historical CAT Assessment 1 that was previously filed with the Commission.

(1) CAT Executing Brokers

Historical CAT Assessment 1 will be charged to each CEBB and CEBS for each applicable transaction in Eligible Securities.¹⁶ The CAT NMS Plan defines a “CAT Executing Broker” to mean:

(a) with respect to a transaction in an Eligible Security that is executed on an exchange, the Industry Member identified as the Industry Member responsible for the order on the buy-side of the transaction and the Industry Member responsible for the sell-side of the transaction in the equity order trade event and option trade event in the CAT Data submitted to the CAT by the

relevant exchange pursuant to the Participant Technical Specifications; and (b) with respect to a transaction in an Eligible Security that is executed otherwise than on an exchange and required to be reported to an equity trade reporting facility of a registered national securities association, the Industry Member identified as the executing broker and the Industry Member identified as the contra-side executing broker in the TRF/ORF/ADF transaction data event in the CAT Data submitted to the CAT by FINRA pursuant to the Participant Technical Specifications; provided, however, in those circumstances where there is a non-Industry Member identified as the contra-side executing broker in the TRF/ORF/ADF transaction data event or no contra-side executing broker is identified in the TRF/ORF/ADF transaction data event, then the Industry Member identified as the executing broker in the TRF/ORF/ADF transaction data event would be treated as CAT Executing Broker for the Buyer and for the Seller.¹⁷

The following fields of the Participant Technical Specifications indicate the CAT Executing Brokers for the transactions executed on an exchange.

EQUITY ORDER TRADE (EOT)¹⁸

No.	Field name	Data type	Description	Include key
12.n.8/13.n.8	member	Member Alias	The identifier for the member firm that is responsible for the order on this side of the trade. Not required if there is no order for the side as indicated by the NOBUYID/NOSELLID instruction. This must be provided if orderID is provided.	C

OPTION TRADE (OT)¹⁹

No.	Field name	Data type	Description	Include key
16.n.13/17.n.13	member	Member Alias	The identifier for the member firm that is responsible for the order ..	R

¹² Section 11.1(b) of the CAT NMS Plan.

¹³ Section 11.3(b)(iii)(B)(I) of the CAT NMS Plan.

¹⁴ Note that there may be one or more Historical CAT Assessments depending on the timing of the completion of the Financial Accountability Milestones, among other things. Section 11.3(b) of the CAT NMS Plan.

¹⁵ Securities Exchange Act Rel. No. 34–99359 (January 17, 2024), 89 FR 10164 (February 13, 2024) (“SR-PHLX–2024–01”).

¹⁶ In its approval of the CAT Funding Model, the Commission determined that charging CAT fees to CAT Executing Brokers was reasonable. In reaching this conclusion the Commission noted that the use of CAT Executing Brokers is appropriate because

the CAT Funding Model is based upon the calculation of *executed* equivalent shares, and, therefore, charging CAT Executing Brokers would reflect their executing role in each transaction. Furthermore, the Commission noted that, because CAT Executing Brokers are already identified in transaction reports from the exchanges and FINRA’s equity trade reporting facilities recorded in CAT Data, charging CAT Executing Brokers could streamline the billing process. CAT Funding Model Approval Order at 62629.

¹⁷ Section 1.1 of the CAT NMS Plan. Note that CEBBs and CEBSs may, but are not required to, pass-through their CAT fees to their clients, who may, in turn, pass their fees to their clients until

they are imposed ultimately on the account that executed the transaction. See CAT Funding Model Approval Order at 62649.

¹⁸ See Table 23, Section 4.7 (Order Trade Event) of the CAT Reporting Technical Specifications for Plan Participants, Version 4.1.0–r21 (Apr. 15, 2024), https://www.catnmsplan.com/sites/default/files/2024-04/04.15.2024-CAT_Reporting_Technical_Specifications_for_Participants_4.1.0-r21.pdf (“CAT Reporting Technical Specifications for Plan Participants”).

¹⁹ See Table 51, Section 5.2.5.1 (Simple Option Trade Event) of the CAT Reporting Technical Specifications for Plan Participants.

In addition, the following fields of the Participant Technical Specifications would indicate the CAT Executing Brokers for the transactions executed otherwise than on an exchange.

26	reportingExecutingMpid	Member Alias	MPID of the executing party	R
28	contraExecutingMpid	Member Alias	MPID of the contra-side executing party.	C

(2) Calculation of Historical Fee Rate 1

The Operating Committee determined the Historical Fee Rate to be used in calculating Historical CAT Assessment 1 (“Historical Fee Rate 1”) by dividing the Historical CAT Costs for Historical CAT Assessment 1 (“Historical CAT Costs 1”) by the projected total executed share volume of all transactions in Eligible Securities for the Historical Recovery Period for Historical CAT Assessment 1 (“Historical Recovery Period 1”), as discussed in detail below. Based on this calculation, the Operating Committee has determined that Historical Fee Rate 1 would be \$0.00003994969693072937 per executed equivalent share. This rate is then divided by three and rounded to determine the fee rate of \$0.000013 per executed equivalent share that will be assessed to CEBBs and CEBBs, as also discussed in detail below.

(A) Executed Equivalent Shares for Transactions in Eligible Securities

Under the CAT NMS Plan, for purposes of calculating each Historical CAT Assessment, executed equivalent shares in a transaction in Eligible Securities will be reasonably counted as follows: (1) each executed share for a transaction in NMS Stocks will be counted as one executed equivalent share; (2) each executed contract for a transaction in Listed Options will be counted based on the multiplier applicable to the specific Listed Options (i.e., 100 executed equivalent shares or such other applicable multiplier); and

(3) each executed share for a transaction in OTC Equity Securities shall be counted as 0.01 executed equivalent share.²¹

(B) Historical CAT Costs 1

The CAT NMS Plan states that “[t]he Operating Committee will reasonably determine the Historical CAT Costs sought to be recovered by each Historical CAT Assessment, where the Historical CAT Costs will be Past CAT Costs minus Past CAT Costs reasonably excluded from Historical CAT Costs by the Operating Committee. Each Historical CAT Assessment will seek to recover from CAT Executing Brokers two-thirds of Historical CAT Costs incurred during the period covered by the Historical CAT Assessment.”²² As described in detail below, Historical CAT Costs 1 would be \$318,059,819. This figure includes Past CAT Costs of \$401,312,909 minus certain Excluded Costs of \$83,253,090. Participants collectively will remain responsible for one-third of Historical CAT Costs 1 (which is \$106,019,939.67), plus the Excluded Costs of \$83,253,090. CEBBs collectively will be responsible for one-third of Historical CAT Costs 1 (which is \$106,019,939.67), and CEBBs collectively will be responsible for one-third of Historical CAT Costs 1 (which is \$106,019,939.67).

The following describes in detail Historical CAT Costs 1 with regard to four separate historical time periods as well as Past CAT Costs excluded from Historical CAT Costs 1 (“Excluded Costs”). The following cost details are

provided in accordance with the requirement in the CAT NMS Plan to provide in the fee filing “a brief description of the amount and type of Historical CAT Costs, including (1) the technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees, and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration and (6) public relations costs.”²³ Each of the costs described below are reasonable, appropriate and necessary for the creation, implementation and maintenance of CAT.

(i) Historical CAT Costs Incurred Prior to June 22, 2020 (Pre-FAM Costs)

Historical CAT Costs 1 would include costs incurred by CAT prior to June 22, 2020 (“Pre-FAM Period”) and already funded by the Participants, excluding Excluded Costs (described further below). Historical CAT Costs 1 would include costs for the Pre-FAM Period of \$124,290,730. The Participants would remain responsible for one-third of this cost (which they have previously paid) (\$41,430,243.33), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$41,430,243.33) and CEBBs paying one-third (\$41,430,243.33). These costs do not include Excluded Costs, as discussed further below. The following table breaks down Historical CAT Costs 1 for the Pre-FAM Period into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Historical CAT costs 1 for Pre-FAM period (prior to June 22, 2020) *
Capitalized Developed Technology Costs **	\$51,847,150
Technology Costs:	33,568,579
Cloud Hosting Services	10,268,840
Operating Fees	21,085,485
CAIS Operating Fees	2,072,908
Change Request Fees	141,346

²⁰ See Table 61, Section 6.1 (TRF/ORF/ADF Transaction Data Event) of the CAT Reporting Technical Specifications for Plan Participants.

²¹ Section 11.3(a)(i)(B) and 11.3(b)(i)(B) of the CAT NMS Plan. In approving the CAT Funding

Model, the Commission concluded that “the use of executed equivalent share volume as the basis of the proposed cost allocation methodology is reasonable and consistent with the approach taken

by the funding principles of the CAT NMS Plan.” CAT Funding Model Approval Order at 62640.

²² Section 11.3(b)(i)(C) of the CAT NMS Plan.

²³ Section 11.3(b)(iii)(B)(II)(B) of the CAT NMS Plan.

Operating expense	Historical CAT costs 1 for Pre-FAM period (prior to June 22, 2020) *
Legal	19,674,463
Consulting	17,013,414
Insurance	880,419
Professional and administration	1,082,036
Public relations	224,669
Total Operating Expenses	124,290,730

* The costs described in this table of costs for the Pre-FAM Period were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website. In addition, in accordance with Section 6.6(a)(i) of the CAT NMS Plan, in 2018 CAT LLC provided the SEC with "an independent audit of fees, costs, and expenses incurred by the Participants on behalf of the Company prior to the Effective Date of the Plan that will be publicly available." The audit is available on the CAT website.

** The non-cash amortization of these capitalized developed technology costs of \$2,115,545 incurred during the period prior to June 22, 2020 have been appropriately excluded from the above table.²⁴

The Pre-FAM Period includes a broad range of CAT-related activity from 2012 through June 22, 2020, including the evaluation of the requirements of SEC Rule 613, the development of the CAT NMS Plan, the evaluation and selection of the initial and successor Plan Processors, the commencement of the creation and implementation of the CAT to comply with Rule 613 and the CAT NMS Plan, including technical specifications for transaction reporting and regulatory access, and related technology and the commencement of reporting to the CAT. The following describes the costs for each of the categories for the Pre-FAM Period.

(a) Technology Costs—Cloud Hosting Services

The \$10,268,840 in technology costs for cloud hosting services represent costs incurred for services provided by the cloud services provider for the CAT, Amazon Web Services, Inc. ("AWS"), during the Pre-FAM Period.

As part of its proposal for acting as the successor Plan Processor for the CAT, FCAT selected AWS as a subcontractor to provide cloud hosting services. In 2019, after reviewing the capabilities of other cloud services providers, FCAT determined that AWS was the only cloud services provider at that time sufficiently mature and capable of providing the full suite of necessary cloud services for the CAT, including, for example, the security, resiliency and complexity necessary for the CAT computing requirements. The use of cloud hosting services is standard for this type of high-volume data

activity and reasonable and necessary for implementation of the CAT, particularly given the substantial data volumes associated with the CAT.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT the fees incurred by the Plan Processor for cloud hosting services provided by AWS as FCAT's subcontractor [*sic*] on a monthly basis for the cloud hosting services, and FCAT, in turn, pays such fees to AWS. The fees for cloud hosting services were negotiated by FCAT on an arm's length basis with the goals of managing cost and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the expected volume of data, the breadth of services provided and market rates for similar services. The fees for cloud hosting services during the Pre-FAM Period were paid to FCAT by CAT NMS, LLC²⁵ and subsequently Consolidated Audit Trail, LLC (as previously noted, both entities are referred to generally as "CAT LLC"),²⁶ and FCAT, in turn, paid AWS. CAT LLC was funded via loan contributions by the Participants.²⁷

²⁵ CAT NMS, LLC was formed by FINRA and the U.S. national securities exchanges to implement the requirements of SEC Rule 613 under the Exchange Act. SEC Rule 613 required the SROs to jointly submit to the SEC the CAT NMS Plan to create, implement and maintain the CAT. The SEC approved the CAT NMS Plan on November 15, 2016. CAT NMS Plan Approval Order.

²⁶ On August 29, 2019, the Participants formed a new Delaware limited liability company named Consolidated Audit Trail, LLC for the purpose of conducting activities related to the CAT from and after the effectiveness of the proposed amendment of the CAT NMS Plan to replace CAT NMS, LLC. See Securities Exchange Act Rel. No. 87149 (Sept. 27, 2019), 84 FR 52905 (Oct. 3, 2019).

²⁷ For each of the costs paid by CAT NMS, LLC and Consolidated Audit Trail, LLC as discussed throughout this filing, CAT NMS, LLC and Consolidated Audit Trail, LLC paid these costs via loan contributions by the Participants to CAT NMS, LLC and Consolidated Audit Trail, LLC, respectively.

AWS was engaged by FCAT to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. Services provided by AWS include storage services, databases, compute services and other services (such as networking, management tools and DevOps tools). AWS also was engaged to provide various environments for CAT, such as development, performance testing, test and production environments.

The cost for AWS services for the CAT is a function of the volume of CAT Data. The greater the amount of CAT Data, the greater the cost of AWS services to the CAT. During the Pre-FAM Period from the engagement of AWS in February 2019 through June 2020, AWS provided cloud hosting services for volumes of CAT Data far in excess of the volume predictions set forth in the CAT NMS Plan. The CAT NMS Plan states, when all CAT Reporters are submitting their data to the CAT, it "must be sized to receive[,] process and load more than 58 billion records per day,"²⁸ and that "[i]t is expected that the Central Repository will grow to more than 29 petabytes of raw, uncompressed data."²⁹ However, the volume of CAT Data for the Pre-FAM Period was far in excess of these predicted levels. By the end of this period, data submitted to the CAT included options and equities Participant Data,³⁰ Phase 2a and Phase 2b Industry Member Data³¹ (including certain linkages), as well as SIP Data,³² reference data and other types of Other

²⁸ Appendix D-4 of the CAT NMS Plan at n.262.

²⁹ Appendix D-5 of the CAT NMS Plan.

³⁰ See Section 6.3(d) of the CAT NMS Plan.

³¹ See Securities Exchange Rel. No. 88702 (Apr. 20, 2020), 85 FR 23075 (Apr. 24, 2020) ("Phased Reporting Exemptive Relief Order") for a description of Phase 2a and Phase 2b Industry Member Data.

³² See Section 6.5(a)(ii) of the CAT NMS Plan.

²⁴ With respect to certain costs that were "appropriately excluded," such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

Data.³³ The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during the Pre-FAM Period.³⁴

	Date range: 3/29/19 to 4/12/20 *	Date range: 4/13/20 to 6/21/20 **
Average Daily Volume in Billions:		
Participant—Equities	5	5
Participant—Options	80	981
Industry Member—Equities		3
Industry Member—Options		0.04
SIP—Options & Equities	64	70
Average Total Daily Volume	149	166
Cumulative Total Events for the Period	3,890	4,990
Total Compute Hours for the Period	*** N/A	5,663,247
Storage Footprint at End of Period (Petabytes)	30.57	47.96

* The Participant Equities in RSA format.

** Start of Industry Member reporting on 4/13/2020.

*** Note that, although there were compute hours during this period, data related to such compute hours are no longer available in current data.

(b) Technology Costs—Operating Fees

The \$21,085,485 in technology costs related to operating fees represent costs incurred with regard to activities of FCAT as the Plan Processor. Operating fees are those fees paid by CAT LLC to FCAT as the Plan Processor to operate and maintain the CAT and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (e.g., management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management as required by the CAT NMS Plan.

FCAT was selected to assume the role of the successor Plan Processor. Prior to this selection, the Participants engaged in discussions with two prior Bidders³⁵ for the successor Plan Processor role. The Operating Committee formed a Selection Subcommittee in accordance with Section 4.12 of the CAT NMS Plan to evaluate and review Bids and to make a recommendation to the Operating Committee with respect to the selection of the successor Plan Processor. In an April 9, 2019 letter to the Commission, the Participants described the reasons for its selection of the successor Plan Processor:

The Selection Subcommittee considered factors including, but not limited to, the following, in recommending FINRA to the Operating Committee as the successor Plan Processor:

a. FINRA's specialized technical expertise and capabilities in the area of broker-dealer technology;

b. The need to appoint a successor Plan Processor with specialized expertise to

develop, implement, and maintain the CAT System in accordance with the CAT NMS Plan and SEC Rule 613;

c. FINRA's detailed proposal in response to CATLLC's recent inquiries; and

d. FINRA's data query and analytics systems demonstration to the Participants.

Based on these and other factors, the Selection Subcommittee determined that FINRA was the most appropriate Bidder to become the successor Plan Processor.³⁶

On February 26, 2019, the Operating Committee (with FINRA recusing itself) voted to select FINRA as the successor Plan Processor pursuant to Section 6.1(t) of the CAT NMS Plan.³⁷ On March 29, 2019, CAT LLC and FCAT (a wholly owned subsidiary of FINRA) entered into a Plan Processor Agreement pursuant to which FCAT would perform the functions and duties of the Plan Processor contemplated by the CAT NMS Plan, including the management and operation of the CAT.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT a negotiated monthly fixed price for the operation of the CAT. This fixed price contract was negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity. The operating fees during the Pre-FAM Period were paid to FCAT by CAT LLC.

From March 29, 2019 (the commencement of the Plan Processor Agreement with FCAT) through June 22, 2020 (the end of the Pre-FAM Period),

the Plan Processor's activities with respect to the CAT included the following:

- Commenced user acceptance testing with market data provided by Exegy Incorporated ("Exegy"), a market data provider;³⁸

- Published Technical Specifications and related reporting scenarios documents for Phase 2a, 2b and 2c reporting for Industry Members, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;

- Facilitated testing for Phase 2a and 2b reporting for Industry Members;

- Began developing Technical Specifications and related reporting scenarios documents for Phase 2d reporting for Industry Members, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;

- Published Central Repository Access Technical Specifications, and provided regulator access to test data from Industry Members;

- Facilitated Participant exchanges that support options market makers sending Quote Sent Time to the CAT;

- Facilitated the introduction of OPRA and Options NBBO Other Data to CAT;

- Addressed compliance items, including drafting CAT policies and procedures, and addressing requirements under Regulation SCI;

- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;

³³ See Appendix C–108 of the CAT NMS Plan.

³⁴ Note that the volume data described in this table does not include CAIS data.

³⁵ The term "Bidder" is defined in Section 1.1 of the CAT NMS Plan.

³⁶ Letter from Michael J. Simon, Chair, CAT NMS, LLC Operating Committee, to Brent J. Fields, Secretary, SEC (Apr. 9, 2019), <https://www.sec.gov/divisions/marketreg/rule613-info-notice-of-plan-processor-selection-040919.pdf>.

³⁷ *Id.*

³⁸ The use of Exegy to provide market data, including the costs and market data provided, is discussed below in Section 3(a)(2)(B)(i)(i).

- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with Participants, the SEC and its staff;
- Operated the FINRA CAT Helpdesk, which is the primary source for answers to questions about CAT, including questions regarding: clock synchronization, firm reporting responsibilities, interpretive questions, technical specifications for reporting to CAT and more;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content;³⁹ and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(c) Technology Costs—CAIS Operating Fees

The \$2,072,908 in technology costs related to CAIS operating fees represent the fees paid for FCAT's subcontractor charged with the development and operation of CAT's Customer and Account Information System ("CAIS"). The CAT is required under the CAT NMS Plan to capture and store Customer Identifying Information and Customer Account Information in a database separate from the transactional database and to create a CAT-Customer-ID for each Customer.

During the Pre-FAM Period, the CAIS-related services were provided by the Plan Processor through the Plan Processor's subcontractor, Kingland Systems Incorporation ("Kingland"). Kingland had experience operating in the securities regulatory technology space, and as a part of its proposal for acting as the Plan Processor for the CAT, FCAT selected Kingland as a subcontractor to provide certain CAIS-related services.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay to the Plan Processor the fees incurred by FCAT for CAIS-related services provided by FCAT through Kingland on a monthly basis. FCAT negotiated the fees for Kingland's CAIS-related services

on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity. The fees for CAIS-related services during the Pre-FAM Period were paid by CAT LLC to FCAT. FCAT, in turn, paid Kingland.

During the Pre-FAM Period, Kingland began development of the CAIS Technical Specifications and the building of CAIS. In addition, Kingland also worked on the build related to the CCID Alternative, an alternative approach to customer information that was not included in the CAT NMS Plan as originally adopted.⁴⁰ Furthermore, Kingland also worked on the acceleration of the reporting of large trader identifiers ("LTID") earlier than originally contemplated during this period, in accordance with exemptive relief granted by the SEC.⁴¹

(d) Technology Costs—Change Request Fees

The technology costs related to change request fees include costs related to certain modifications, upgrades or other changes to the CAT. Change requests are standard practice and necessary to reflect operational changes, including changes related to new market developments, such as new market participants. In general, if CAT LLC determines that a modification, upgrade or other change to the functionality or service is necessary and appropriate, CAT LLC will submit a request for such a change to the Plan Processor. The Plan Processor will then respond to the request with a proposal for implementing the change, including the cost (if any) of such a change. CAT LLC then determines whether to approve the proposed change. The change request costs were paid by CAT LLC to FCAT. During the Pre-FAM Period, CAT LLC incurred costs of \$141,346 related to change requests implemented by FCAT. Such change requests related to a development fee regarding the OPRA and SIP data feeds, and the reprocessing of certain exchange data.⁴²

⁴⁰ For a discussion of the CCID Alternative, see Securities Exchange Act Rel. No. 88393 (Mar. 17, 2020), 85 FR 16152 (Mar. 20, 2020).

⁴¹ Phased Reporting Exemptive Relief Order at 23079–80.

⁴² Note that CAT LLC also has incurred costs related to specific Industry Members (e.g., reprocessing costs related to Industry Member reporting errors).

(e) Technology Costs—Capitalized Developed Technology Costs

This category of costs includes capitalizable application development costs incurred in the development of the CAT. The capitalized developed technology costs for the Pre-FAM Period of \$51,847,150 relate to technology provided by the Initial Plan Processor and the successor Plan Processor.

Initial Plan Processor: Thesys CAT, LLC. The capitalized developed technology costs related to the Initial Plan Processor include costs incurred with regard to testing for Participant reporting, Participant reporting to the CAT, a security assessment of the CAT, and the development of the billing function for the CAT.

On January 17, 2017, the Selection Committee of the CAT NMS Plan selected the Initial Plan Processor, Thesys Technologies, LLC, for the CAT NMS Plan pursuant to Article V of the CAT NMS Plan.⁴³ The Participants utilized a request for proposal ("RFP") to seek proposals to build and operate the CAT, receiving a number of proposals in response to the RFP. The Participants carefully reviewed and considered each of the proposals, including holding in-person meetings with each of the Bidders. After several rounds of review, the Participants selected the Initial Plan Processor in accordance with the CAT NMS Plan, taking into consideration that the Initial Plan Processor had experience operating in the securities regulatory technology space, among other considerations. On April 6, 2017, CAT LLC entered into an agreement with Thesys CAT LLC ("Thesys CAT"), a Thesys affiliate, to perform the functions and duties of the Plan Processor contemplated by the CAT NMS Plan, including the management and operation of the CAT. Under the agreement, CAT LLC would pay Thesys CAT a negotiated, fixed price fee for its role as the Initial Plan Processor. Effective January 30, 2019, the Plan Processor Agreement with Thesys CAT was terminated, and FCAT was subsequently selected as the successor Plan Processor.

From January 17, 2017 through January 30, 2019, the time in which the Thesys CAT was engaged for the CAT, but excluding the period from November 15, 2017 through January 30, 2019, the Initial Plan Processor engaged in various activities with respect to the CAT, including preparing iterative drafts of Participant Technical

⁴³ Letter from the Participants to Brent J. Fields, Secretary, SEC (Jan. 18, 2017), <https://www.sec.gov/divisions/marketreg/rule613-info-notice-of-plan-processor-selection.pdf>.

³⁹ The CAT website is <https://www.catnmsplan.com>.

Specifications, Industry Member Technical Specifications and the Central Repository Access Technical Specifications. In addition, Thesys CAT also developed CAT technology, addressed compliance items, including drafting CAT policies and procedures, addressing Regulation SCI requirements, establishing a CAT Compliance Officer and a Chief Information Security Officer, addressed security-related matters for the CAT, and worked towards the initiation of Participant reporting per the Participant Technical Specifications.

Successor Plan Processor: FCAT. The capitalized developed technology costs related to FCAT include: (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, including the completion of go-live functionality related to options ingestion and validation, equities regulatory services agreement query tool updates and unlinked options data query, options linkages release, Industry Member Phase 2a file submission and data integrity (including error corrections), and Industry Member testing, including reporting relationships, ATS order type management, basic reporting statistics, SFTP data integrity feedback and error correction; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including a one-time development fee for a secure analytics workspace, a one-time development fee of an Industry Member connectivity solution, and a one-time development fee for the acceleration of multi-factor authentication; (3) CAIS implementation fees; and (4) license fees.

(f) Legal Costs

The legal costs of \$19,674,463 represent the fees paid for legal services provided by two law firms, Wilmer Cutler Pickering Hale and Dorr LLP ("WilmerHale") and Pillsbury Winthrop Shaw Pittman LLP ("Pillsbury"), during the Pre-FAM Period. The legal costs exclude those costs incurred from November 15, 2017 through November 15, 2018.

Law Firm: WilmerHale. Following the adoption of Rule 613, the Participants determined it was necessary to engage external legal counsel to advise the Participants with respect to corporate and regulatory legal matters related to the CAT, including drafting and developing the CAT NMS Plan. The Participants considered a variety of

factors in their analysis of prospective law firms, including (1) the firm's qualifications, resources and expertise; (2) the firm's relevant experience and understanding of the regulatory matters raised by the CAT and in advising on matters of similar scope; (3) the composition of the legal team; and (4) professional fees. Following a series of interviews, the Participants acting as a consortium determined that WilmerHale was well qualified given the balance of these considerations and engaged WilmerHale in February 2013.

WilmerHale's billing rates are negotiated on an annual basis and are determined with reference to the rates charged by other leading law firms for similar work. The Participants assess WilmerHale's performance and review prospective budgets and staffing plans submitted by WilmerHale on an annual basis. WilmerHale's compensation arrangements are reasonable and appropriate, and in line with the rates charged by other leading law firms for similar work.

The legal costs for WilmerHale during the Pre-FAM Period included costs incurred from 2013 until June 22, 2020 to address corporate and regulatory legal matters related to the CAT. The legal fees for this law firm during the period from February 2013 until the formation of the CAT NMS, LLC on November 15, 2016 were paid directly by the exchanges and FINRA to WilmerHale. After the formation of CAT NMS LLC, the legal fees were paid by CAT LLC to WilmerHale.

After WilmerHale was engaged in 2013 through the end of the Pre-FAM Period on June 22, 2020 (excluding the legal costs from November 15, 2017 through November 15, 2018), WilmerHale provided legal assistance to the CAT on a variety of matters, including with regard to the following:

- Analyzed various legal matters associated with the Selection Plan, and drafted an amendment to the Selection Plan;
- Assisted with the RFP and bidding process for the CAT Plan Processor;
- Analyzed legal matters related to the Development Advisory Group ("DAG");
- Drafted the CAT NMS Plan, analyzed various items related to the CAT NMS Plan, and responded to comment letters on CAT NMS Plan;
- Provided legal support for the formation of the legal entity, the governance of the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (e.g., Joint

Subcommittee Group, Technical, Industry Outreach, Cost and Funding and Other Products) and the DAG, governance support during the transition to the new governance structure under the CAT NMS Plan, and governance support after the adoption of the CAT NMS Plan, which involved support for the Operating Committee, Advisory Committee, Compliance Subcommittee and CAT working groups;

- Assisted with the development of the CAT funding model and drafted related amendments of the CAT NMS Plan and related filings;
- Negotiated and drafted the plan processor agreements with the Initial Plan Processor and the successor Plan Processor;
- Provided assistance with compliance with Regulation SCI;
- Assisted with clock synchronization study;
- Provided assistance with respect to the establishment of CAT security;
- Drafted exemptive requests from CAT NMS Plan requirements, including with regard to options market maker quotes, Customer IDs, CAT Reporter IDs, linking allocations to executions, CAT reporting timeline, FDIDs, customer and account information, timestamp granularity, small industry members, data facility reporting and linkage, allocation reports, SRO-assigned market participant identifiers and cancelled trade indicators, thereby seeking to implement changes that would be cost effective and benefit Industry Members and Participants;
- Assisted with the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Provided advice regarding CAT policies and procedures;
- Analyzed the SEC's amendment of the CAT NMS Plan regarding financial accountability;
- Provided interpretations of and related to the CAT NMS Plan;
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues; and
- Assisted with third-party vendor agreements.

Law Firm: Pillsbury. The legal costs for CAT during the Pre-FAM Period include costs related to the legal services performed by Pillsbury. The Participants interviewed this law firm as well as other potential law firms to provide legal assistance regarding certain liability matters. After considering a variety of factors in its analysis, including the relevant expertise and fees of the firm, CAT LLC

determined to hire Pillsbury in April 2019. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees were paid by CAT LLC to Pillsbury. The legal costs for Pillsbury during the Pre-FAM Period included costs incurred from April 2019 until June 22, 2020 to address legal matters regarding the agreements between CAT Reporters and CAT LLC concerning certain terms associated with CAT Reporting (the "Reporter Agreement"). During that period, Pillsbury advised CAT LLC regarding applicable legal matters, participated in negotiations between the Participants and Industry Members, participated in meetings with senior SEC staff, the Chairman, and Commissioners, represented CAT LLC and the Participants in an SEC administrative proceeding, and drafted a proposed amendment to the CAT NMS Plan regarding liability matters. Liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants. Moreover, litigation involving CAT LLC is an expense of operating the CAT, and, therefore, is appropriately an obligation of both Participants and Industry Members under the CAT Funding Model.

(g) Consulting Costs

The consulting costs of \$17,013,414 represent the fees paid to the consulting firm Deloitte & Touche LLP ("Deloitte") as project manager during the Pre-FAM Period, from October 2012 until June 22, 2020. These consulting costs include costs for advisory services related to the operation of the CAT, and meeting facilitation and communications coordination, vendor support and financial analyses.

To help facilitate project management given the unprecedented complexity and scope of the CAT project, the Participants determined it was necessary to engage a consulting firm to assist with the CAT project in 2012, following the adoption of Rule 613. A variety of factors were considered in the analysis of prospective consulting firms, including (1) the firm's qualifications, resources, and expertise; (2) the firm's relevant experience and understanding of the regulatory issues raised by the CAT and in coordinating matters of similar scope; (3) the composition of the consulting team; and (4) professional fees. Following a series of interviews, the exchanges and FINRA as a consortium determined that Deloitte was well qualified given the balance of

these considerations and engaged Deloitte on October 1, 2012.

Deloitte's fee rates are negotiated on an annual basis and are in line with market rates for this type of specialized consulting work. CAT LLC assesses Deloitte's performance and reviews prospective budgets and staffing plans submitted by Deloitte on an annual basis. Deloitte's compensation arrangements are reasonable and appropriate, and in line with the rates charged by other leading consulting firms for similar work.

The consulting costs for CAT during the period from 2012 until the formation of the CAT NMS, LLC were paid directly by the Participants to Deloitte. After the formation of CAT NMS, LLC, the consulting fees were paid by CAT LLC to Deloitte. CAT LLC reviewed the consulting fees each month and approved the invoices.

After Deloitte was hired in 2012 through the end of the Pre-FAM Period on June 22, 2020 (excluding the consulting costs from November 15, 2017 through November 15, 2018), Deloitte provided a variety of consulting services, including the following:

- Established and implemented program operations for the CAT project, including the program management [*sic*] office and workstream design;
- Assisted with the Plan Processor selection process, including but not limited to, the development of the RFP and the bidder evaluation process, and facilitation and consolidation of the Participant's independent reviews;
- Assisted with the development and drafting of the CAT NMS Plan, including conducting cost-benefit studies, analyzing OATS and CAT requirements, and drafting appendices to the Plan;
- Assisted with cost and funding-related activities for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided governance support to the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.*, Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding and Other Products) and the DAG, governance support during the transition to the new governance structure under the CAT NMS Plan and governance support after the adoption of the CAT NMS Plan, which involved support for the Operating Committee, Advisory Committee, Compliance Subcommittee and CAT working groups;

- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;

- Assisted with industry outreach and communications regarding the CAT, including assistance with industry outreach events, the development of the CAT website, frequently asked questions, and coordinating with the CAT LLC's public relations firm;

- Provided support for updating the SEC on the progress of the development of the CAT;

- Provided active planning and coordination with and support for the Initial Plan Processor with regard to the development of the CAT, and reported to the Participants on the progress;

- Coordinated efforts regarding the selection of the successor Plan Processor;

- Assisted with the transition from the Initial Plan Processor to the successor Plan Processor, including support for the Operating Committee and successor Plan Processor for the new role; and

- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(h) Insurance

The insurance costs of \$880,419 represent the cost incurred for insurance for CAT during the Pre-FAM Period. Commencing in 2020, CAT LLC performed an evaluation of various potential alternatives for CAT insurance policies, which included engaging in discussions with different insurance companies and conducting cost comparisons of various alternative approaches to insurance. Based on an analysis of a variety of factors, including coverage and premiums, CAT LLC determined to purchase cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance from USI Insurance Services LLC ("USI"). Such policies are standard for corporate entities, and cyber security liability insurance is important for the CAT System. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(i) Professional and Administration Costs

In adopting the CAT NMS Plan, the Commission amended the Plan to add a requirement that CAT LLC's financial

statements be prepared in compliance with GAAP, audited by an independent public accounting firm, and made publicly available.⁴⁴ The professional and administration costs include costs related to accounting and accounting advisory services to support the operating and financial functions of CAT, financial statement audit services by an independent accounting firm, preparation of tax returns, and various cash management and treasury functions. In addition, professional and administration costs for the Pre-FAM Period include costs related to the receipt of market data and a security assessment. The costs for these professional and administration services were \$1,082,036 for the Pre-FAM Period.

Financial Advisory Firm: Anchin Accountants & Advisors ("Anchin"). CAT LLC determined to hire a financial advisory firm, Anchin, to assist with financial matters for the CAT in April 2018. CAT LLC interviewed Anchin as well as other potential financial advisory firms to assist with the CAT project, considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The hourly fee rates for this firm were in line with market rates for these financial advisory services. The fees for these services were paid by CAT LLC to Anchin.

After Anchin was hired in April 2018 through the end of the Pre-FAM Period on June 22, 2020 (excluding the period from April 2018 through November 15, 2018), Anchin provided a variety of services, including the following:

- Developed, updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Addressed accounting and financial reporting matters relating to the transition from CAT NMS, LLC to Consolidated Audit Trail, LLC,

including supporting the dissolution of CAT NMS, LLC;

- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

Accounting Firm: Grant Thornton LLP ("Grant Thornton"). In February 2020, CAT LLC determined to engage an independent accounting firm, Grant Thornton, to complete the audit of CAT LLC's financial statements, in accordance with the requirements of the CAT NMS Plan. CAT LLC interviewed this firm as well as another potential accounting firm to audit CAT LLC's financial statements, considering a variety of factors in its analysis, including the relevant expertise and fees of each of the firms. CAT LLC determined that Grant Thornton was well-qualified for the proposed role given the balance of these considerations. Grant Thornton's fixed fee rate compensation arrangement was reasonable and appropriate, and in line with the market rates charged for these types of accounting services. The fees for these services were paid by CAT LLC to Grant Thornton.

Market Data Provider: Exegy. The professional and administrative costs for the Pre-FAM Period included costs related to the receipt of certain market data for the CAT pursuant to an agreement with the CAT LLC, and then with FCAT. Exegy provided SIP Data required by the CAT NMS Plan.

After performing an analysis of the available market data vendors to confirm that the data provided met the SIP Data requirements of the CAT NMS Plan and comparing the costs of the vendors providing the required SIP Data, CAT LLC determined to purchase market data from Exegy from July 2018 through March 2019. CAT LLC determined that, unlike certain other vendors, Exegy provided market data that included all data elements required by the CAT NMS Plan.⁴⁵ In addition, the fees were reasonable and in line with market rates for the market data received. Accordingly, the professional and administrative costs for the Pre-FAM Period include the Exegy costs from November 2018 through March

2019. The cost of the market data was reasonable for the market data received. The fees for the market data were paid directly by CAT LLC to Exegy.

Upon the termination of the contract between CAT LLC and Exegy, FCAT entered into a contract with Exegy to purchase the required market data from Exegy in July 2019. All costs under the contract were treated as a direct pass through cost to CAT LLC. Therefore, the fees for the market data were paid by CAT LLC to FCAT, who, in turn, paid Exegy for the market data.

Security Assessment: RSM US LLP ("RSM"). The operating costs for the Pre-FAM Period include costs related to a third party security assessment of the CAT performed by RSM. The assessment was designed to verify and validate the effective design, implementation, and operation of the controls specified by NIST Special Publication 800–53, Revision 4 and related standards and guidelines. Such a security assessment is in line with industry practice and important given the data included in the CAT. CAT LLC determined to engage RSM to perform the security assessment, after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fees were reasonable and in line with market rates for such an assessment. RSM performed the assessment from October 2018 through December 2018. Accordingly, the costs for the Pre-FAM Period include the costs incurred in November and December 2018. The cost for the security assessment were paid directly to RSM by CAT LLC.

(j) Public Relations Costs

The public relations costs of \$224,669 represent the fees paid to public relations firms during the Pre-FAM Period for professional communications services to CAT, including media relations consulting, strategy and execution. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants. Specifically, the public relations firms provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (e.g., amendments to the CAT NMS Plan). Public relations services were

⁴⁴ Section 9.2 of the CAT NMS Plan.

⁴⁵ See Section 6.5(a)(ii) of the CAT NMS Plan.

important for various reasons, including monitoring comments made by market participants about CAT and understanding issues related to the CAT discussed on the public record.

The services performed by each of the public relations firms were comparable. The fees for such services were reasonable and in line with market rates. Only one public relations firm was engaged at a time; the three firms were engaged sequentially as the primary public relations contact moved among the three firms during this time period.

Public Relations Firm: Peppercomm, Inc. ("Peppercomm"). The national securities exchanges and FINRA, acting as a consortium, determined to hire the public relations firm Peppercomm in October 2014 and continued to engage this firm through September 2017. The exchanges and FINRA made this engagement decision after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fee rates for this public relations firm were negotiated on an arm's length basis and were in line with

market rates for these types of services. The public relations costs during the period from October 2014 until the formation of the CAT NMS, LLC were paid directly by the exchanges and FINRA to the public relations firm. After the formation of CAT NMS, LLC, the consulting fees were paid by CAT LLC.

Public Relations Firm: Sloane & Company ("Sloane"). CAT LLC determined to hire a new public relations firm, Sloane, in March 2018, based on, among other things, their expertise and the primary contact's history with the project. The fee rates for this public relations firm were in line with market rates for these types of services. The fees during the Pre-FAM Period were paid by CAT LLC to Sloane. CAT LLC continued the engagement with Sloane until February 2020.

Public Relations Firm: Peak Strategies. CAT LLC determined to hire a new public relations firm, Peak Strategies, in March 2020, based on, among other things, their expertise and the primary contact's history with the project. The fee rates for this public relations firm were in line with market

rates for these types of services. The fees during the Pre-FAM Period were paid by CAT LLC to Peak Strategies.

(ii) Historical CAT Costs Incurred in Financial Accountability Milestone Period 1

Historical CAT Costs 1 would include costs incurred by CAT and already funded by the Participants during Period 1 of the Financial Accountability Milestones ("FAM Period 1"),⁴⁶ which covers the period from June 22, 2020–July 31, 2020. Historical CAT Costs 1 would include costs for FAM Period 1 of \$6,377,343. The Participants would remain responsible for one-third of this cost (which they have previously paid) (\$2,125,781), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$2,125,781) and CEBBs paying one-third (\$2,125,781). The following table breaks down Historical CAT Costs 1 for FAM Period 1 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Historical CAT costs for FAM Period 1 *
Capitalized Developed Technology Costs **	\$1,684,870
Technology Costs	3,996,800
Cloud Hosting Services	2,642,122
Operating Fees	1,099,680
CAIS Operating Fees	254,998
Change Request Fees	
Legal	481,687
Consulting	137,209
Insurance	
Professional and administration	69,077
Public relations	7,700
Total Operating Expenses	6,377,343

* The costs described in this table of costs for FAM Period 1 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

** The non-cash amortization of these capitalized developed technology costs of \$362,121 incurred during FAM Period 1 have been appropriately excluded from the above table.⁴⁷

By the completion of FAM Period 1, CAT LLC was required to implement the reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of equities transaction data and options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information.⁴⁸ CAT LLC completed the requirements of FAM Period 1 by July 31, 2020. The following describes the costs for each of the categories for FAM Period 1.

(a) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 1 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance

testing, test, and production environments, during the FAM 1 Period. Accordingly, the \$2,642,122 in technology costs for cloud hosting services represent costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 1. The fee arrangement for AWS described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. Moreover, CAT LLC continued to believe that AWS's

⁴⁶ Section 11.6(a)(i)(A) of the CAT NMS Plan.

⁴⁷ As discussed above, with respect to certain costs that were "appropriately excluded," such excluded costs relate to the amortization of capitalized technology costs, which are amortized

over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

⁴⁸ See definition of "Initial Industry Member Core Equity and Options Reporting" in Section 1.1 of the CAT NMS Plan.

maturity in the cloud services space as well as the significant cost and time necessary to move the CAT to a different cloud services provider supported the continued engagement of AWS.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During the

FAM 1 Period, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a and Phase 2b Industry Member Data (including certain linkages) as well

as SIP Data, reference data and other types of Other Data. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 1.⁴⁹

	Date range: 6/22/20–7/31/20
Average Daily Volume in Billions:	
Participant—Equities	6
Participant—Options	103
Industry Member—Equities	7
Industry Member—Options	0.31
SIP—Options & Equities	74
Average Total Daily Volume	185
Cumulative Total Events for the Period	5,190
Total Compute Hours for the Period	2,612,082
Storage Footprint at End of Period (Petabytes)	57.47

(b) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 1. Accordingly, the \$1,099,680 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 1. The fee arrangement for FCAT described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. During FAM Period 1, FCAT's activities with respect to the CAT included the following:

- Published iterative drafts of draft Technical Specifications for Phase 2d, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Published iterative drafts of CAIS Technical Specifications, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Facilitated Industry Member reporting of Quote Sent Time on Options Market Maker quotes;
- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;

• Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;

- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(c) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 1. Accordingly, the \$254,998 in technology costs for CAIS operating fees represent costs incurred for services provided by Kingland during FAM Period 1. The fee arrangement for Kingland described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. During FAM Period 1, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications

and build related to CCID Alternative, as well as the acceleration of the reporting of LTIDs.

(d) Technology Costs—Change Request Fees

CAT LLC did not incur costs related to change requests during FAM Period 1.

(e) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 1 of \$1,684,870 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include: (1) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including separate production and industry test entitlements, and reprocessing of exchange event timestamps; (2) implementation fees; and (3) license fees.

(f) Legal Costs

The legal costs of \$481,687 represent the fees paid for legal services provided by two law firms, WilmerHale and Pillsbury during FAM Period 1.

Law Firm: WilmerHale. CAT LLC continued to employ WilmerHale during FAM Period 1 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 1 were paid by CAT LLC to WilmerHale. During FAM Period 1,

⁴⁹ Note that the volume data described in this table does not include CAIS data.

WilmerHale provided legal assistance to the CAT including with regard to the following:

- Assisted with the development of the CAT funding model and drafted related amendments and fee filings;
- Drafted exemptive requests from CAT NMS Plan requirements regarding, for example, verbal activity, options market maker quote sent time, TRF linkages, and allocations;
- Provided interpretations related to CAT NMS Plan requirements, including the Financial Accountability Milestone amendment;
- Assisted with compliance with Regulation SCI;
- Provided support for the Operating Committee, Compliance Subcommittee, working groups and Leadership Team, including with regard to meetings with the SEC staff;
- Assisted with the drafting of the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Assisted with communications and presentations for the industry regarding CAIS;
- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for Compliance Subcommittee, including with regard to response to OCIE examinations and the annual assessment;
- Provided guidance regarding CAT technical specifications;
- Assisted with third-party vendor agreements; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

Law Firm: Pillsbury. CAT LLC continued to employ Pillsbury during FAM Period 1 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 1 were paid by CAT LLC to Pillsbury. During FAM Period 1, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During that period, Pillsbury advised CAT LLC regarding applicable legal matters and drafted a proposed amendment to the CAT NMS Plan regarding liability matters. Liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants.

(g) Consulting Costs

The consulting costs of \$137,209 represent the fees paid to Deloitte as

project manager during FAM Period 1. CAT LLC continued to employ Deloitte during FAM Period 1 based on, among other things, their expertise and cumulative experience with the CAT. The fee rates for Deloitte during FAM Period 1 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 1 were paid by CAT LLC to the consulting firm. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 1, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT;
- Assisted with the transition from the Initial Plan Processor to the successor Plan Processor; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(h) Insurance

Although insurance was in effect during FAM Period 1, CAT LLC did not incur costs related to insurance during FAM Period 1.

(i) Professional and Administration Costs

Financial Advisory Firm: Anchin. The professional and administration costs of \$69,077 represent the fees paid to Anchin during FAM Period 1. CAT LLC continued to employ Anchin during FAM Period 1 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these type of financial advisory services. The fees for these services during FAM Period 1 were paid by CAT LLC to Anchin. During FAM Period 1, Anchin provided a variety of services, including the following:

- Maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;

• Reviewed vendor invoices and documentation in support of cash disbursements;

- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups; and
- Prepared monthly and quarterly financial statements.

(j) Public Relations Costs

The public relations costs of \$7,700 represent the fees paid to Peak Strategies during FAM Period 1. CAT LLC continued to employ Peak Strategies during FAM Period 1 based on, among other things, their expertise and history with the project. The fee rates for this firm were reasonable and in line with market rates for these types of services. The fees for these services during FAM Period 1 were paid by CAT LLC to Peak Strategies. During FAM Period 1, Peak Strategies continued to provide professional communications services to CAT LLC, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (e.g., amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(iii) Historical CAT Costs Incurred in Financial Accountability Milestone Period 2

Historical CAT Costs 1 would include costs incurred by CAT LLC and already

funded by Participants during Period 2 of the Financial Accountability Milestones (“FAM Period 2”),⁵⁰ which covers the period from August 1, 2020–December 31, 2020. Historical CAT Costs 1 would include costs for FAM Period 2 of \$42,976,478. The

Participants would remain responsible for one-third of this cost (which they have previously paid) (\$14,325,493), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$14,325,493) and CEBBs paying one-

third (\$14,325,493). The following table breaks down Historical CAT Costs 1 for FAM Period 2 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Historical CAT costs for FAM Period 2*
Capitalized Developed Technology Costs**	\$6,761,094
<i>Technology Costs</i>	31,460,033
Cloud Hosting Services	20,709,212
Operating Fees	9,108,700
CAIS Operating Fees	1,590,298
Change Request Fees	51,823
Legal	2,766,644
Consulting	532,146
Insurance	976,098
Professional and administration	438,523
Public relations	41,940
Total Operating Expenses	42,976,478

* The costs described in this table of costs for FAM Period 2 were calculated based upon CAT LLC’s review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

** The non-cash amortization of these capitalized developed technology costs of \$1,892,505 incurred during FAM Period 2 have been appropriately excluded from the above table.⁵¹

By the completion of FAM Period 2, CAT LLC was required to implement the following with regard to the CAT:

(a) Industry Member reporting (excluding reporting by Small Industry Members that are not OATS reporters) for equities transactions, excluding Customer Account Information, CustomerID, and Customer Identifying Information, is developed, tested, and implemented at a 5% Error Rate or less and with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, and trade reporting facilities linkage to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, excluding linkage of representative orders, from order origination through order execution or order cancellation; and (b) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3 and Section 8.2.1 incorporates the Industry Member equities transaction data described in condition (a) and is available to the Participants and to the Commission.⁵²

CAT LLC completed the requirements of FAM Period 2 by December 31, 2020.

The following describes the costs for each of the categories for FAM Period 2.

(a) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 2 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production environments, during the FAM 2 Period. Accordingly, the \$20,709,212 in technology costs for cloud hosting services represent costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 2. The fee arrangement for AWS described above with regard to the Pre-FAM

Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During the FAM 2 Period, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a and Phase 2b Industry Member Data (including certain linkages) as well as SIP Data, and Other Data, including reference data. In addition, Industry Members began reporting LTID account information. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 2.⁵³

	Date range: 8/1/20–12/31/20
Average Daily Volume in Billions:	
Participant—Equities	6
Participant—Options	116
Industry Member—Equities	11
Industry Member—Options	0.98
SIP—Options & Equities	80
Average Total Daily Volume	282

⁵⁰ Section 11.6(a)(i)(B) of the CAT NMS Plan.

⁵¹ As discussed above, with respect to certain costs that were “appropriately excluded,” such excluded costs relate to the amortization of capitalized technology costs, which are amortized

over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

⁵² See definition of “Full Implementation of Core Equity Reporting Requirements” in Section 1.1 of the CAT NMS Plan.

⁵³ Note that the volume data described in this table does not include CAIS data.

	Date range: 8/1/20–12/31/20
Cumulative Total Events for the Period	2,170
Total Compute Hours for the Period	15,660,392
Storage Footprint at End of Period (Petabytes)	114.59

(b) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 2. Accordingly, the \$9,108,700 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 2. The fee arrangement for FCAT described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement. During FAM Period 2, FCAT's activities with respect to the CAT included publishing the Technical Specifications for Phase 2d and overseeing the reporting of firm to firm and intrafirm linkages by Industry Members. In addition, FCAT also continued to engage in the following activities during FAM Period 2:

- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the development and implementation of the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with the Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(c) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 2. Accordingly, the \$1,590,298 in technology costs for CAIS operating fees represent costs incurred for services provided by Kingland during FAM Period 2. The fee arrangement for Kingland described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement. During FAM Period 2, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to the CCID Alternative, as well as the acceleration of the reporting of LTIDs.

(d) Technology Costs—Change Request Fees

During FAM Period 2, CAT LLC engaged FCAT to pursue certain change requests in accordance with the Plan Processor Agreement. The change request costs were paid by CAT LLC to FCAT. Specifically, during FAM Period 2, CAT incurred costs of \$51,823 related to a change request regarding the addition of functionality for exchange Participants to report rejected messages to the CAT.

(e) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 2 of \$6,761,094 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Plan Processor; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including costs related to separate production and industry test

entitlements, market maker reference data, and back-processing of exchange exception logic; (3) implementation fees; and (4) license fees.

(f) Legal Costs

The legal costs of \$2,766,644 represent the fees paid for legal services provided by two law firms, WilmerHale and Pillsbury during FAM Period 2.

Law Firm: WilmerHale. CAT LLC continued to employ WilmerHale during FAM Period 2 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 2 were paid by CAT LLC to WilmerHale. During FAM Period 2, the legal assistance provided by WilmerHale included providing legal advice regarding the following:

- Assisted with the development of the CAT funding model and drafting related amendments and rule filings;
- Drafted exemptive requests from CAT NMS Plan requirements regarding, for example, allocations, exchange activity, OTQT, initial data validation, error corrections and recordkeeping;
- Provided interpretations related to CAT NMS Plan requirements, including with regard to the Financial Accountability Milestone amendment, FAQs and technical specifications;
- Provided support for the Operating Committee, Compliance Subcommittees, working groups and Leadership Team, including with regard to meetings with the SEC staff;
- Assisted with the Implementation Plan and Quarterly Progress Reports required pursuant to Section 6.6 of the CAT NMS Plan;
- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for the Compliance Subcommittee, including with regard to responses to OCIE examinations and the annual assessment;
- Provided guidance regarding the SEC's proposed security amendments to the CAT NMS Plan;
- Provided guidance regarding SRO rule filings for the retirement of systems;
- Provided legal support for Operating Committee meetings, including drafting resolutions and other materials and voting advice;

- Assisted with third-party vendor agreements (e.g., with regard to Anchin, Grant Thornton and insurance policies);
- Assisted with change requests; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

Law Firm: Pillsbury. CAT LLC continued to employ Pillsbury during FAM Period 2 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 2 were paid by CAT LLC to Pillsbury. During FAM Period 2, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During that period, Pillsbury advised CAT LLC regarding applicable legal matters and drafted and filed a proposed amendment to the CAT NMS Plan regarding liability matters. As discussed above, liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants.

(g) Consulting Costs

The consulting costs of \$532,146 represent the fees paid to Deloitte as project manager during FAM Period 2. CAT LLC continued to employ Deloitte during FAM Period 2 based on, among other things, their expertise and long history with the project. The fee rates for Deloitte during FAM Period 2 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 2 were paid to Deloitte by CAT LLC. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 2, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided support for third-party vendors for the CAT, including FCAT,

Anchin and the law firms engaged by CAT LLC.

(h) Insurance

The insurance costs of \$976,098 represent the fees paid for insurance during FAM Period 2. CAT LLC continued to maintain cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance offered by USI. After engaging in a process for renewing the coverage, CAT LLC determined to purchase these insurance policies from USI. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(i) Professional and Administration Costs

The professional and administration costs of \$438,523 represent the fees paid to Anchin and Grant Thornton for financial services provided during FAM Period 2.

Financial Advisory Firm: Anchin. CAT LLC continued to engage Anchin during FAM Period 2 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these types of financial advisory services. The fees for these services during FAM Period 2 were paid by CAT LLC to Anchin. During FAM Period 2, Anchin provided a variety of services, including the following:

- Updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated [sic] bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from the Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;

- Supported the annual financial statement audit by an independent auditor; and

- Reviewed historical costs from inception.

Accounting Firm: Grant Thornton. CAT LLC continued to employ the accounting firm Grant Thornton during FAM Period 2 based on, among other things, its expertise and cumulative knowledge of CAT LLC. CAT LLC continued to believe that Grant Thornton was well qualified for its role and its fee rates were in line with market rates for these accounting services. The fees for these services during FAM Period 2 were paid by CAT LLC to Grant Thornton. During FAM Period 2, Grant Thornton performed a financial statement audit for CAT LLC as an independent accounting firm.

(j) Public Relations Costs

The public relations costs of \$41,940 represent the fees paid to Peak Strategies during FAM Period 2. CAT LLC continued to employ Peak Strategies during FAM Period 2 based on, among other things, their expertise and history with the project. The fee rates for this firm were in line with market rates for these types of services. The fees for these services during FAM Period 2 were paid by CAT LLC to Peak Strategies. During FAM Period 2, Peak Strategies continued to provide professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (e.g., amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(iv) Historical CAT Costs Incurred in Financial Accountability Milestone Period 3

Historical CAT Costs 1 would include costs incurred by CAT and already funded by the Participants during Period 3 of the Financial Accountability Milestones ("FAM Period 3"),⁵⁴ which

covers the period from January 1, 2021–December 31, 2021. Historical CAT Costs 1 would include costs for FAM Period 3 of \$144,415,268. The Participants would remain responsible for one-third of this cost (which they have previously paid) (\$48,138,423), and Industry Members would be

responsible for the remaining two-thirds, with CEBBs paying one-third (\$48,138,423) and CEBs paying one-third (\$48,138,423). The following table breaks down Historical CAT Costs 1 for FAM Period 3 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Historical CAT costs for FAM Period 3 *
Capitalized Developed Technology Costs **	\$10,763,372
Technology Costs	123,639,402
Cloud Hosting Services	94,574,759
Operating Fees	23,106,091
CAIS Operating Fees	5,562,383
Change Request Fees	396,169
Legal	6,333,248
Consulting	1,408,209
Insurance	1,582,714
Professional and administration	595,923
Public relations	92,400
Total Operating Expenses	144,415,268

* The costs described in this table of costs for FAM Period 3 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

** The non-cash amortization of these capitalized developed technology costs of \$5,108,044 incurred during FAM Period 3 have been appropriately excluded from the above table.⁵⁵

By the completion of FAM Period 3, CAT LLC was required to implement the following requirements with regard the CAT:

(a) reporting to the Order Audit Trail System ("OATS") is no longer required for new orders; (b) Industry Member reporting for equities transactions and simple electronic options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, trade reporting facilities linkage, and representative order linkages (including any equities allocation information provided in an Allocation Report) to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, is developed, tested, and implemented at a 5% Error Rate or less; (c) Industry Member reporting for manual options transactions and complex options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with all required linkages to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or

order cancellation, including any options allocation information provided in an Allocation Report, is developed, tested, and fully implemented; (d) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3, Section 8.2.1, and Section 8.5 incorporates the data described in conditions (b)–(c) and is available to the Participants and to the Commission; and (e) the requirements of Section 6.10(a) are met.⁵⁶

CAT LLC completed the requirements of FAM Period 3 by December 31, 2021. The following describes the costs for each of the categories for FAM Period 3.

(a) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 3 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production

environments, during the FAM 3 Period. Accordingly, the \$94,574,759 in technology costs for cloud hosting services represents costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 3. The fee arrangement for AWS described above for the earlier periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During FAM Period 3, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a, Phase 2b, Phase 2c and Phase 2d Industry Member Data (including certain linkages), SIP Data, Other Data, including reference data, and LTID account information. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 3.⁵⁷

⁵⁴ Section 11.6(a)(i)(C) of the CAT NMS Plan.

⁵⁵ As discussed above, with respect to certain costs that were "appropriately excluded," such excluded costs relate to the amortization of capitalized technology costs, which are amortized

over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

⁵⁶ See definition of "Full Availability and Regulatory Utilization of Transactional Database Functionality" in Section 1.1 of the CAT NMS Plan.

⁵⁷ Note that the volume data described in this table does not include CAIS data.

	Date range: 1/1/21 to 4/25/21	Date range: 4/26/21 to 12/31/21 *
Average Daily Volume in Billions:		
Participant—Equities	9	9
Participant—Options	135	136
Industry Member—Equities	20	19
Industry Member—Options	2	2
SIP—Options & Equities	129	137
Average Total Daily Volume	297	304
Cumulative Total Events for the Period	7,480	5,310
Total Compute Hours for the Period	15,860,304	33,487,318
Storage Footprint at End of Period (Petabytes)	180.22	284.62

* Start of Participant Equities in CAT format and SIP Equities on 4/26/21.

(b) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 3. Accordingly, the \$23,106,091 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 3. The fee arrangement for FCAT described above with regard to the prior Periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement. During FAM Period 3, FCAT's activities with respect to the CAT included the following:

- Facilitated Phase 2c and Phase 2d testing for Industry Members;
- Oversaw creation of linkages of the lifecycle of order events based on the received data through Phase 2d;
- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with the Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the

use of CAT Data and query tools, for Participants and the SEC staff.

(c) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement with FCAT discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 3. Accordingly, the \$5,562,383 in technology costs for CAIS operating fees represents costs incurred for services provided by Kingland during FAM Period 3. The fee arrangement for Kingland described above with regard to the prior Periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement. During FAM Period 3, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to the CCID Alternative, as well as the acceleration of the reporting of LTIDs. The full CAIS Technical Specifications were published during FAM Period 3.

(d) Technology Costs—Change Request Fees

During FAM Period 3, CAT LLC engaged FCAT to pursue certain change requests in accordance with the Plan Processor Agreement. The change request costs were paid by CAT LLC to FCAT. Specifically, during FAM Period 3, CAT incurred costs of \$396,169 related to change requests, including the following: (1) the addition of functionality for exchange Participants to report rejected messages to the CAT; (2) the migration of MIRS query engine to AWS to reduce operational costs and increase resiliency; and (3) updating the Participant Technical Specifications to allow for two-sided Participant option quote reporting.

(e) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 3 of \$10,763,372

include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Plan Processor, including the transition from equity data received by FINRA pursuant to various regulatory services agreements between FINRA and Participant exchanges to the equity CAT Data, and the completion of the Industry Member Phase 2d options manual and complex orders go-live requirements; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including costs related to off-exchange volume concentration, Participant 24-hour trading and an external metastore; (3) implementation fees; and (4) license fees.

(f) Legal Costs

The legal costs of \$6,333,248 represent the fees paid for legal services provided by three law firms, WilmerHale, Pillsbury & Covington & Burling LLP ("Covington") during FAM Period 3.

Law Firm: WilmerHale. CAT LLC continued to employ WilmerHale during FAM Period 3 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 3 were paid by CAT LLC to WilmerHale. During FAM Period 3, the legal assistance provided by WilmerHale included providing legal advice regarding the following:

- Assisted with the development of the CAT funding model and drafting related amendments and rule filings;
- Drafted exemptive requests from CAT NMS Plan requirements, including, for example, verbal activity regarding Phase 2c cutover, error reports, error

corrections, Phase 2d Reporting, unique Order-ID on internal route events, reporting addresses, recordkeeping, and unique CCID for foreign customers;

- Provided interpretations related to CAT NMS Plan requirements, including with regard to the Financial Accountability Milestone amendment, FAQs, CAIS requirements, ADF, and technical specifications;
 - Provided support for the Operating Committee, Compliance Subcommittee, working groups and Leadership Team, including with regard to meetings with the SEC staff;
 - Assisted with the Implementation Plan and Quarterly Progress Reports required pursuant to Section 6.6(c) of the CAT NMS Plan;
 - Drafted SRO rule filings related to the CAT Compliance Rule;
 - Provided support for Compliance Subcommittee, including with regard to responses to OCIE examinations and the annual assessment;
 - Provided guidance regarding the SEC's proposed security amendments to the CAT NMS Plan;
 - Provided guidance regarding SRO rule filings for the retirement of systems;
 - Provided legal support for Operating Committee meetings, including drafting resolutions and other materials and voting advice;
 - Provided assistance with change requests;
 - Provided guidance and regulatory support for litigation regarding the response to the SEC's exemptive orders;
 - Assisted with communications with the industry, including CAT Alerts and presentations;
 - Provided guidance regarding the confidentiality of CAT Data, including third-party information requests;
 - Assisted with cost management analysis and proposals; and
 - Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.
- Law Firm: Pillsbury.* CAT LLC continued to employ Pillsbury during FAM Period 3 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 3 were paid by CAT LLC to Pillsbury. During FAM Period 3, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During this period, Pillsbury advised CAT LLC regarding applicable legal matters, reviewed and responded to comment letters regarding the proposed Plan amendment, participated in meetings with senior SEC staff, responded to comments

submitted following the SEC's April 6, 2021 order instituting proceedings,⁵⁸ and assessed legal matters regarding the SEC's October 29, 2021 order denying the proposed Plan amendment.⁵⁹

Law Firm: Covington. CAT LLC hired Covington for litigation with the SEC regarding certain exemptive orders related to the CAT, including orders issued in December 2020.⁶⁰ CAT LLC interviewed this law firm as well as other potential law firms, considering a variety of factors in its analysis for choosing legal assistance, including the relevant expertise and fees of the potential lawyers. CAT LLC approved the engagement of Covington in January 2021. The fee rates for this law firm, which were calculated based on hourly rates, were in line with market rates for specialized services. The legal fees for FAM Period 3 for this firm were paid by CAT LLC to Covington.

After Covington was hired in 2021 through the end of 2021, the firm provided legal assistance regarding the litigation with the SEC regarding the 2020 Orders. These services included researching, drafting, and filing motions to stay the 2020 orders and related materials in proceedings before the SEC, as well as researching, drafting, and filing petitions for judicial review of the 2020 Orders in proceedings before the U.S. Court of Appeals for the D.C. Circuit. Covington oversaw ongoing litigation proceedings on these matters, and also supported WilmerHale with respect to settlement negotiations with the SEC staff regarding the 2020 Orders.

In addition to these services, CAT LLC engaged Covington in November 2021 to provide assistance with respect to the SEC's disapproval of CAT NMS Plan amendments concerning a proposed limitation on liability in the event of a data breach or similar event. Covington provided advice concerning CAT's response to the SEC's disapproval order. This work accounted for a minority of Covington's fees in 2021.⁶¹

⁵⁸ Securities Exchange Act Rel. No. 91487 (Apr. 6, 2021), 86 FR 19054 (Apr. 12, 2021).

⁵⁹ Securities Exchange Act Rel. No. 93484 (Oct. 29, 2021), 86 FR 60933 (Nov. 4, 2021).

⁶⁰ See Securities Exchange Act Rel. No. 90688 (Dec. 16, 2020), 85 FR 83634 (Dec. 22, 2020); and Securities Exchange Act Rel. No. 90689 (Dec. 16, 2020), 85 FR 83667 (Dec. 22, 2020) (collectively, the "2020 Orders").

⁶¹ As discussed above with regard to Pillsbury's work on liability matters, liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants. Moreover, such activity is a necessary part of the operation of the CAT.

(g) Consulting Costs

The consulting costs of \$1,408,209 represent the fees paid to Deloitte as project manager during FAM Period 3. CAT LLC continued to employ Deloitte during FAM Period 3 based on, among other things, their expertise and long history with the project. The fee rates for Deloitte during FAM Period 3 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 3 were paid to Deloitte by CAT LLC. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 3, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(h) Insurance

The insurance costs of \$1,582,714 represent the fees paid for insurance during FAM Period 3. CAT LLC continued to maintain cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance offered by USI. After engaging in a process for renewing the coverage, CAT LLC determined to purchase these insurance policies from USI. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(i) Professional and Administration Costs

The professional and administration costs of \$595,923 represent the fees paid to Anchin and Grant Thornton for financial services during FAM Period 3.

Financial Advisory Firm: Anchin. CAT LLC continued to employ Anchin during FAM Period 3 based on, among other things, their expertise and history with the project. The hourly fee rates for

this firm were in line with market rates for these financial advisory services. The fees for these services during FAM Period 3 were paid by CAT LLC to Anchin. During FAM Period 3, Anchin provided a variety of services, including the following:

- Updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated [sic] bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

Accounting Firm: Grant Thornton. CAT LLC continued to employ the accounting firm Grant Thornton during FAM Period 3 based on, among other things, their expertise and cumulative knowledge of CAT LLC. CAT LLC determined that Grant Thornton was well qualified for its role and that its fixed fee rates were in line with market rates for these accountant services. The

fees for these services during FAM Period 3 were paid by CAT LLC to Grant Thornton. During FAM Period 3, Grant Thornton provided audited financial statements for CAT LLC.

(j) Public Relations Costs

The public relations costs of \$92,400 represent the fees paid to Peak Strategies during FAM Period 3. CAT LLC continued to employ Peak Strategies during FAM Period 3 based on, among other things, their expertise and history with the project. The fee rates for this firm were in line with market rates for these types of services. The fees for these services during FAM Period 3 were paid by CAT LLC to Peak Strategies. During FAM Period 3, Peak Strategies continued to provide professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (e.g., amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(v) Excluded Costs

Historical CAT Costs 1 would not include three categories of CAT costs ("Excluded Costs"): (1) \$14,749,362 of

costs related to the termination of the relationship with the Initial Plan Processor; (2) \$48,874,937, which are all CAT costs incurred from November 15, 2017 through November 15, 2018; and (3) \$19,628,791, which are costs paid to the the Initial Plan Processor from November 16, 2018 through February 2019 when the relationship with the Initial Plan Processor was concluded. The Participants would remain responsible for 100% of these costs, which total \$83,253,090. CAT LLC determined to exclude these Excluded Costs from Historical CAT Costs 1 because these costs relate to the delay in the start of reporting to the CAT and the conclusion of the relationship with the Initial Plan Processor.⁶²

(a) Costs Related to Conclusion of Relationship With Initial Plan Processor

First, Historical CAT Costs 1 would not include \$14,749,362 of costs related to the conclusion of the relationship with the Initial Plan Processor. Such costs include costs related to the American Arbitration Association, the legal assistance of Pillsbury with regard to the arbitration with the Initial Plan Processor, and the settlement costs related to the arbitration with the Initial Plan Processor. The Participants would remain responsible for 100% of these \$14,749,362 in costs.

(b) Costs Incurred From November 15, 2017 Through November 15, 2018

Second, Historical CAT Costs 1 would not include all CAT costs incurred from November 15, 2017 through November 15, 2018. CAT LLC determined to exclude all costs during this one-year period of \$48,874,937 from fees charged to Industry Members due to the delay in the start of reporting to the CAT. The Participants would remain responsible for 100% of these \$48,874,937 in costs. The following table breaks down these costs into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

Operating expense	Excluded costs for November 15, 2017–November 15, 2018 *
Capitalized Developed Technology Costs	\$37,852,083
<i>Technology Costs</i>	
Cloud Hosting Services	
Operating Fees	
CAIS Operating Fees	
Change Request Fees	

⁶² In approving the CAT Funding Model, the Commission states that the proposed exclusion of the first two categories of Excluded Costs "is reasonable in the Commission's view because it would not require all costs incurred by the Participants to be recovered from Industry Members

through the Historical CAT Assessment, specifically excluding those costs related to the delay in the start of reporting to the CAT and costs related to the conclusion of the relationship with the Initial Plan Processor." CAT Funding Model Approval Order at 62663. In addition to the first two

categories of Excluded Costs, CAT LLC is now proposing a third category of Excluded Costs that would exclude all costs paid to the Initial Plan Processor after November 15, 2018.

Operating expense	Excluded costs for November 15, 2017– November 15, 2018 *
Legal	6,143,278
Consulting	4,452,106
Insurance	
Professional and administration	340,145
Public relations	87,325
Total Operating Expenses	48,874,937

* The costs described in this table of Excluded Costs were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

The following provides additional detail regarding the Excluded Costs.

(I) Technology Costs—Cloud Hosting Services, Operating Fees, CAIS Operating Fees and Change Request Fees

CAT LLC did not incur technology costs related to the categories of cloud hosting services, operating fees, CAIS operating fees or change requests during the period from November 15, 2017 through November 15, 2018.

(II) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for the period from November 15, 2017 through November 15, 2018 include capitalizable application development costs of \$37,852,083 incurred in the development of the CAT by the Initial Plan Processor. Such costs include development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Initial Plan Processor. Such costs include costs related to Industry Member technical specifications for orders and transactions, the system security plan, testing and production for Participant CAT reporting, third-party security assessment and response, query portal, onboarding of the Chief Information Security Officer, and ingestion of FINRA TRF data and FINRA data related to halts and corporate actions.

(III) Legal Costs

The legal costs of \$6,143,278 represent the fees paid to WilmerHale for legal services from November 15, 2017 through November 15, 2018. During this period, WilmerHale provided legal assistance to the CAT including with regard to the following:

- Provided legal support for the governance of the CAT, including governance support for the Operating Committee, Advisory Committee, Compliance Subcommittee, and CAT working groups;

- Assisted with the development of the CAT funding model and drafted related amendments of the CAT NMS Plan;
- Provided assistance related to CAT security;
- Drafted exemptive requests, including requests related to PII;
- Assisted with the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Provided interpretations of and related to the CAT NMS Plan;
- Provided advice with regard to regulator access to the CAT;
- Assisted with the Plan Processor transition;
- Provided assistance regarding communications with the industry regarding the CAT;
- Provided advice regarding Customer Account Information and PII;
- Provided support for litigation related to SEC exemptive orders; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretative and implementation issues.

(IV) Consulting Costs

The consulting costs of \$4,452,106 represent the fees paid to Deloitte for their role as project manager for the CAT from November 15, 2017 through November 15, 2018. During this period, Deloitte engaged in the following activities with respect to the CAT:

- Implemented program operations for the CAT project;
- Provided governance support to the Operating Committee, including support for Subcommittees and working groups of the Operating Committee (e.g., Compliance Subcommittee, Cost and Funding Working Group, Technical Working Group, Industry Outreach Working Group, Security Working Group and Steering Committee);
- Assisted with cost and funding issues for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;

- Provided support for updating the SEC on the progress of the development of the CAT; and

- Provided active planning and coordination with and support for the Initial Plan Processor with regard to the development of the CAT, and reported to the Participants on the progress.

(V) Insurance

CAT LLC did not incur costs related to insurance during the period from November 15, 2017 through November 15, 2018.

(VI) Professional and Administration Costs

The professional and administration costs of \$340,145 represent the fees paid to Anchin, Exegy and RSM from November 15, 2017 through November 15, 2018.

Financial Advisory Firm: Anchin. From the commencement of its engagement [sic] in April 2018 through November 15, 2018, Anchin engaged in the following activities with respect to the CAT:

- Developed, updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Addressed accounting and financial matters relating to the transition from CAT NMS, LLC to Consolidated Audit Trail, LLC, including supporting the dissolution of CAT NMS, LLC;

- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

Market Data Provider: Exegy. From July 2018 through November 15, 2018, CAT LLC purchased market data from Exegy (as described in more detail above).

Security Assessment: RSM. From October 2018 through November 15, 2018, CAT LLC incurred costs for RSM's performance of a security assessment (as described in more detail above).

(VII) Public Relations Costs

The public relations costs of \$87,325 represent the fees paid to Sloane from November 15, 2017 through November 15, 2018. From the commencement of its engagement [*sic*] in March 2018 through November 15, 2018, Sloane provided professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, Sloane provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.*, congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.*, amendments to the CAT NMS Plan).

(c) Costs Paid to Initial Plan Processor From November 16, 2018 Through February 2019

Third, Historical CAT Costs 1 would not include the \$19,628,791 in costs paid to the Initial Plan Processor from November 16, 2018 through February 2019 when CAT LLC's relationship with the Initial Plan Processor concluded. CAT LLC determined that Historical CAT Costs 1 would not include any fees paid to the Initial Plan Processor after November 15, 2017,⁶³ which was the date by which Participants were

required to begin reporting to the CAT.⁶⁴ As discussed above, the Participants determined that Historical CAT Costs 1 would not include all CAT costs incurred from November 15, 2017 through November 15, 2018, which includes \$37,852,083 in Initial Plan Processor costs incurred from November 15, 2017 through November 15, 2018 (as well as other CAT costs during this period). The remaining Initial Plan Processor costs incurred after November 15, 2018 are the \$19,628,791 in costs for the period from November 16, 2018 through February 2019 incurred in the development of the CAT by the Initial Plan Processor, as well as a transition fee for the transition from the Initial Plan Processor to the successor Plan Processor. The Participants would remain responsible for 100% of these \$19,628,791 in costs.

(C) Historical Recovery Period 1

Under the CAT NMS Plan, the Operating Committee is required to reasonably establish the length of the Historical Recovery Period used in calculating each Historical Fee Rate based upon the amount of the Historical CAT Costs to be recovered by the Historical CAT Assessment, and to describe the reasons for its length.⁶⁵ The Historical Recovery Period used in calculating the Historical Fee Rate may not be less than 24 months or more than five years.⁶⁶ The Operating Committee has determined to establish a Historical Recovery Period 1 of 24 months for Historical CAT Assessment 1.

The Operating Committee determined that the length of Historical Recovery Period 1 appropriately weighs the need for a reasonable Historical Fee Rate 1 that spreads the Historical CAT Costs over an appropriate amount of time and the need to repay the loans to the Participants in a timely fashion. The Operating Committee determined that 24 months for Historical Recovery Period 1 would establish a fee rate that is lower than other transaction-based fees, including fees assessed pursuant to

Section 31.⁶⁷ In addition, in establishing a Historical Recovery Period of 24 months, the Operating Committee recognized that the total costs for Historical CAT Assessment 1 were less than the total costs for 2022 and 2023,⁶⁸ and therefore it would be reasonable and appropriate to recover costs subject to this filing over an approximate two-year period.

The length of the Historical Recovery Period 1 and the reasons for its length are provided in this filing in accordance with the requirement in the CAT NMS Plan to provide such information in a fee filing for a Historical CAT Assessment.⁶⁹

(D) Projected Total Executed Equivalent Share Volume

The calculation of Historical Fee Rate 1 also requires the determination of the projected total executed equivalent share volume of transactions in Eligible Securities for Historical Recovery Period 1. Under the CAT NMS Plan, the Operating Committee is required to "reasonably determine the projected total executed equivalent share volume of all transactions in Eligible Securities for each Historical Recovery Period based on the executed equivalent share volume of all transactions in Eligible Securities for the prior twelve months."⁷⁰ The Operating Committee is required to base its projection on the prior twelve months, but it may use its discretion to analyze the likely volume for the upcoming year. Such discretion would allow the Operating Committee to use its judgment when estimating projected total executed equivalent share volume if the volume over the prior twelve months was unusual or otherwise unfit to serve as the basis of a future volume estimate.⁷¹

The total executed equivalent share volume of transactions in Eligible Securities for the 12-month period from June 2023 through May 2024 was 3,980,753,840,905.21 executed equivalent shares. The Operating Committee has determined to calculate the projected total executed equivalent share volume for the 24 months of Historical Recovery Period 1 by doubling the executed equivalent share volume for the prior 12 months. The

⁶⁴ The SEC approved the CAT NMS Plan on November 15, 2016, and Participant reporting was required to begin on the first anniversary of this date, November 15, 2017. See Section 6.3 of the CAT NMS Plan and CAT NMS Plan Approval Order.

⁶⁵ Section 11.3(b)(i)(D)(I) and Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

⁶⁶ Section 11.3(b)(i)(D)(I) of the CAT NMS Plan. In the CAT Funding Model Approval Order, the SEC stated that "[i]n the Commission's view, it is reasonable for the Operating Committee to establish the length of the Historical Recovery Period to be no less than 24 months and no more than five years." CAT Funding Model Approval Order at 62664.

⁶⁷ As the SEC noted in the CAT Funding Model Approval Order, recent Section 31 fees ranged from \$0.00009 per share to \$0.0004 per share. CAT Funding Model at 62682.

⁶⁸ The total CAT costs for 2022 were approximately \$186 million and the total CAT costs for 2023 were approximately \$233 million.

⁶⁹ Section 11.3(b)(iii)(B)(II)(C) of the CAT NMS Plan.

⁷⁰ Section 11.3(b)(i)(E) of the CAT NMS Plan.

⁷¹ CAT Funding Model Approval Order at 62664.

⁶³ As discussed below, CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017. See Section 3(a)(10)(E) below.

Operating Committee determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has remained relatively constant. For example, the executed equivalent share volume for 2021 was 3,963,697,612,395, the executed equivalent share volume for 2022 was 4,039,821,841,560.31, and the executed equivalent share volume for 2023 was 3,868,940,345,680.6. Accordingly, the projected total executed equivalent share volume for Historical Recovery Period 1 is projected to be 7,961,507,681,810.42 executed equivalent shares.⁷²

The projected total executed equivalent share volume of all transactions in Eligible Securities for Historical Recovery Period 1 and a description of the calculation of the projection is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide such information in a fee filing for a Historical CAT Assessment.⁷³

(E) Historical Fee Rate 1

Historical Fee Rate 1 would be calculated by dividing Historical CAT Costs 1 by the reasonably projected total executed equivalent share volume of all transactions in Eligible Securities for Historical Recovery Period 1, as described in detail above.⁷⁴ Specifically, Historical Fee Rate 1 would be calculated by dividing \$318,059,819 by 7,961,507,681,810.42. As a result, the Historical Fee Rate 1 would be \$0.00003994969693072937 per executed equivalent share. Historical Fee Rate 1 is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide the Historical Fee Rate in a fee filing for a Historical CAT Assessment.⁷⁵

(3) Past CAT Costs and Participants

Participants would not be required to pay any fees associated with Historical CAT Assessment 1 as the Participants previously have paid all Past CAT Costs. The CAT NMS Plan explains that:

Because Participants previously have paid Past CAT Costs via loans to the Company,

Participants would not be required to pay any Historical CAT Assessment. In lieu of a Historical CAT Assessment, the Participants' one-third share of Historical CAT Costs and such other additional Past CAT Costs as reasonably determined by the Operating Committee will be paid by the cancellation of loans made to the Company on a pro rata basis based on the outstanding loan amounts due under the loans.⁷⁶

The CAT NMS Plan further states that "Historical CAT Assessments are designed to recover two-thirds of the Historical CAT Costs."⁷⁷

(4) Monthly Fees

CEBBs and CEBs would be required to pay fees for Historical CAT Assessment 1 on a monthly basis for the period in which Historical CAT Assessment 1 is in effect.⁷⁸ A CEBB or CEBs's fee for each month would be calculated based on the transactions in Eligible Securities executed by the CEBB or CEBs from the prior month.⁷⁹ Proposed paragraph (a)(1)(A) of the fee schedule would state that each CAT Executing Broker would receive its first invoice in November 2024, and "would receive an invoice each month thereafter in which Historical CAT Assessment 1 is in effect." Proposed paragraph (a)(1)(B) of the fee schedule would state that "Consolidated Audited Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1 on a monthly basis." In addition, proposed paragraph (b)(1) of the fee schedule states that each CEBB and CEBs is required to pay its CAT fees "each month."

(5) Actual Recovery Period for Historical CAT Assessment 1

The CAT NMS Plan states that, "[n]otwithstanding the length of the Historical Recovery Period used in calculating the Historical Fee Rate, each Historical CAT Assessment calculated using the Historical Fee Rate will remain in effect until all Historical CAT Costs for the Historical CAT Assessment are collected."⁸⁰ Accordingly, Historical CAT Assessment 1 will remain in effect until all Historical CAT Costs 1 have been collected. The actual

recovery period for Historical CAT Assessment 1 may be shorter or longer than Historical Recovery Period 1 depending on the actual executed equivalent share volumes during the time that Historical CAT Assessment 1 is in effect.⁸¹

(6) Consolidated Audit Trail Funding Fees

To implement Historical CAT Assessment 1, a new section would be added to the Exchange's fee schedule for "Consolidated Audit Trail Funding Fees", and it would include the proposed paragraphs described below.

(A) Fee Schedule for Historical CAT Assessment 1

The CAT NMS Plan states that:

Each month in which a Historical CAT Assessment is in effect, each CEBB and each CEBs shall pay a fee for each transaction in Eligible Securities executed by the CEBB or CEBs from the prior month as set forth in CAT Data, where the Historical CAT Assessment for each transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Historical Fee Rate reasonably determined pursuant to paragraph (b)(i) of this Section 11.3.⁸²

Accordingly, based on the factors discussed above, the Exchange proposes to add paragraph (a)(1) to the Consolidated Audit Trail Funding Fees section of its fee schedule. Proposed paragraph (a)(1) would state the following:

(A) Each CAT Executing Broker shall receive its first invoice for Historical CAT Assessment 1 in November 2024, which shall set forth the Historical CAT Assessment 1 fees calculated based on transactions in October 2024, and shall receive an invoice for Historical CAT Assessment 1 for each month thereafter in which Historical CAT Assessment 1 is in effect.

(B) Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1 on a monthly basis. Each month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer ("CEBB") and/or the CAT Executing Broker for the Seller ("CEBs") (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of \$0.000013 per executed equivalent share.

⁸¹ In approving the CAT Funding Model, the Commission stated that, "[i]n the Commission's view, it is reasonable for Industry Members to be charged a Historical CAT Assessment until all Historical CAT Costs for the Historical CAT Assessment are collected." CAT Funding Model Approval Order at 62665.

⁸² Section 11.3(b)(iii)(A) of the CAT NMS Plan.

⁷² This projection was calculated by multiplying 3,980,753,840,905.21 executed equivalent shares by two.

⁷³ Section 11.3(b)(iii)(B)(II)(D) of the CAT NMS Plan.

⁷⁴ In approving the CAT Funding Model, the Commission stated that "[t]he calculation of the Historical Fee Rate by dividing the Historical CAT Costs by the projected total executed equivalent share volume of all transactions in Eligible Securities for the Historical Recovery Period is reasonable." CAT Funding Model Approval Order at 62664.

⁷⁵ Section 11.3(b)(iii)(B)(II)(A) of the CAT NMS Plan.

⁷⁶ Section 11.3(b)(ii) of the CAT NMS Plan.

⁷⁷ *Id.* In approving the CAT Funding Model, the Commission stated that "[t]he proposed allocation of the Historical CAT Assessment solely to CEBs and CEBBs, and ultimately Industry Members, is reasonable. The Historical CAT Assessment will still be divided into thirds," as the Participants' one-third share of Historical CAT Costs will be paid by the cancellation of loans made to the Company. CAT Funding Model Approval Order at 62666.

⁷⁸ See Section 11.3(b)(iii)(A) of the CAT NMS Plan.

⁷⁹ See proposed paragraph (a)(1)(B) of the fee schedule.

⁸⁰ Section 11.3(b)(i)(D)(II) of the CAT NMS Plan.

(C) Historical CAT Assessment 1 will remain in effect until \$212,039,879.34 (two-thirds of Historical CAT Costs 1) are collected from CAT Executing Brokers collectively, which is estimated to be approximately two years, but could be for a longer or shorter period of time. Consolidated Audit Trail, LLC will provide notice when Historical CAT Assessment 1 will no longer be in effect.

(D) Each CAT Executing Broker shall be required to pay each invoice for Historical CAT Assessment 1 in accordance with paragraph (b).

As noted in the Plan amendment for the CAT Funding Model, “as a practical matter, the fee filing for a Historical CAT Assessment would provide the exact fee per executed equivalent share to be paid for each Historical CAT Assessment, by multiplying the Historical Fee Rate by one-third and describing the relevant number of decimal places for the fee rate.”⁸³ Accordingly, proposed paragraph (a)(1)(B) of the fee schedule would set forth a fee rate of \$0.000013 per executed equivalent share. This fee rate is calculated by multiplying Historical Fee Rate 1 of \$0.00003994969693072937 by one-third, and rounding the result to 6 decimal places.⁸⁴ The Operating Committee determined to use six decimal places to balance the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.

The proposed language in paragraph (a)(1)(A) of the fee schedule would describe when CAT Executing Brokers would receive their first monthly invoice for Historical CAT Assessment 1. Specifically, CAT Executing Brokers would receive their first monthly invoice for Historical CAT Assessment 1 in November 2024 and the fees set forth in that invoice would be calculated based on transactions executed in the prior month, that is, transactions executed in October 2024. The payment for the first invoice would be required within 30 days after the receipt of the first invoice (unless a longer period is indicated), as described in paragraph (b)(2) of the fee schedule.

Proposed paragraph (a)(1)(A) of the fee schedule also would describe the monthly cadence of the invoices for Historical CAT Assessment 1. Specifically, after the first invoices are provided to CAT Executing Brokers in November 2024, invoices will be sent to CAT Executing Brokers each month

thereafter while Historical CAT Assessment 1 is in effect.

Proposed paragraph (a)(1)(B) of the fee schedule would describe the invoices for Historical CAT Assessment 1. Proposed paragraph (a)(1)(B) of the fee schedule would state that “Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1 on a monthly basis.” Proposed paragraph (a)(1)(B) of the fee schedule also would describe the fees to be set forth in the invoices for Historical CAT Assessment 1. Specifically, it would state that “[e]ach month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer (“CEBB”) and/or the CAT Executing Broker for the Seller (“CEBS”) (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of \$0.000013 per executed equivalent share.”

Furthermore, proposed paragraph (a)(1)(C) of the fee schedule would describe how long Historical CAT Assessment 1 would remain in effect. It would state that “Historical CAT Assessment 1 will remain in effect until \$212,039,879.34 (two-thirds of Historical CAT Costs 1) are collected from CAT Executing Brokers collectively, which is estimated to be approximately two years, but could be for a longer or shorter period of time.” This proposed paragraph would further state that “Consolidated Audit Trail, LLC will provide notice when Historical CAT Assessment 1 will no longer be in effect.”

Historical CAT Assessment 1 will be assessed for all transactions executed in each month through the end of the month in which two-thirds of Historical CAT Costs 1 are assessed, and then CAT LLC will provide notice that Historical CAT Assessment 1 is no longer in effect. Since Historical CAT Assessment 1 is a monthly fee based on transaction volume from the prior month, Historical CAT Assessment 1 may collect more than two-thirds of Historical CAT Costs 1. To the extent that occurs, any excess money collected during the final month in which Historical CAT Assessment 1 is in effect will be used to offset future fees and/or to fund the reserve for the CAT.

Finally, proposed paragraph (a)(1)(D) of the fee schedule sets forth the requirement for the CAT Executing Brokers to pay the invoices for Historical CAT Assessment 1. It would

state that “[e]ach CAT Executing Broker shall be required to pay each invoice for Historical CAT Assessment 1 in accordance with paragraph (b).”

(B) Manner of Payment

Paragraph (b)(1) to the “Consolidated Audit Trail Funding Fees” section of its fee schedule describes the manner of payment of Industry Member CAT fees. Paragraph (b)(1) states that “[e]ach CAT Executing Broker shall pay its CAT fees as required pursuant to paragraph (a) each month to the Consolidated Audit Trail, LLC in the manner prescribed by the Consolidated Audit Trail, LLC.” The CAT NMS Plan requires the Operating Committee to establish a system for the collection of CAT fees.⁸⁵ The Plan Processor has established a billing system for CAT fees.⁸⁶ Therefore, the Exchange proposes to require CAT Executing Brokers to pay Historical CAT Assessment 1 in accordance with such system.

(C) Failure to Pay CAT Fees

The CAT NMS Plan further states that:

Participants shall require each Industry Member to pay all applicable fees authorized under this Article XI within thirty (30) days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If an Industry Member fails to pay any such fee when due (as determined in accordance with the preceding sentence), such Industry Member shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of: (a) the Prime Rate plus 300 basis points; or (b) the maximum rate permitted by applicable law.⁸⁷

Accordingly, the Exchange previously has added this requirement to the Exchange’s fee schedule. Specifically, paragraph (b)(2) of the fee schedule states:

Each CAT Executing Broker shall pay the CAT fees required pursuant to paragraph (a) within thirty days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If a CAT Executing Broker fails to pay any such CAT fee when due, such CAT Executing Broker shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of (i) the Prime Rate plus 300

⁸⁵ Section 11.4 of the CAT NMS Plan.

⁸⁶ The billing process and system are described in CAT Alert 2023-02 as well as the CAT FAQs related to the billing of CAT fees, the Industry Member CAT Reporter Portal User Guide, the FCAT Industry Member Onboarding Guide, the FCAT Connectivity Supplement for Industry Members and the CAT Billing Webinars (dated Sept. 28, 2023, and Nov. 7, 2023), each available on the CAT website.

⁸⁷ Section 11.4 of the CAT NMS Plan.

⁸³ CAT Funding Model Approval Order at 62658, n.658.

⁸⁴ Dividing \$0.00003994969693072937 by three equals \$0.00001331656564357646. Rounding \$0.00001331656564357646 to six decimal places equals \$0.000013.

basis points, or (ii) the maximum rate permitted by applicable law.

The requirements of paragraph (b)(2) would apply to Historical CAT Assessment 1.

(7) Historical CAT Assessment Details

The CAT NMS Plan states that:

Details regarding the calculation of a CAT Executing Broker's Historical CAT Assessment will be provided upon request to such CAT Executing Broker. At a minimum, such details would include each CAT Executing Broker's executed equivalent share volume and corresponding fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise than on an exchange, and (3) by buy-side transactions and sell-side transactions.⁸⁸

Such information would provide CEBBs and CEBBs with the ability to understand the details regarding the calculation of their Historical CAT Assessment.⁸⁹ CAT LLC will provide CAT Executing Brokers with these details regarding the calculation of their Historical CAT Assessments on their monthly invoice for the Historical CAT Assessment.

In addition, CAT LLC will make certain aggregate statistics regarding Historical CAT Assessments publicly available. Specifically, the CAT NMS Plan states that, “[f]or each Historical CAT Assessment, at a minimum, CAT LLC will make publicly available the aggregate executed equivalent share volume and corresponding aggregate fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise on an exchange, and (3) by buy-side transactions and sell-side transactions.”⁹⁰ Such aggregate statistics will be available on the CAT website.

Furthermore, CAT LLC will make publicly available on the CAT website the total amount invoiced each month that Historical CAT Assessment 1 is in effect as well as the total amount

invoiced for Historical CAT Assessment 1 for all months since its commencement. CAT LLC also will make publicly available on the CAT website the total costs to be collected from Industry Members for Historical CAT Assessment 1. By reviewing statistics regarding how much has been invoiced and how much remains to be invoiced for Historical CAT Assessment 1, Industry Members would have sufficient information to reasonably track how much longer Historical CAT Assessment 1 is likely to be in place.

(8) Implementation Assistance

To assist Industry Members with compliance with the commencement of Historical CAT Assessment 1, CAT LLC has been making available to CAT Executing Brokers mock invoices prior to the commencement of Historical CAT Assessment 1. Specifically, CAT Executing Brokers have received mock invoices based on transaction data each month since November 2023. The mock invoices are in the same form as the actual, payable invoices, including both the relevant transaction data and the corresponding fee. However, no payments have been required in response to such mock invoices; they have been used solely to assist CAT Executing Brokers with the development of their processes for paying the CAT fees. Such data has provided CAT Executing Brokers with a preview of the transaction data used in creating the invoices for Historical CAT Assessment 1 fees, as the data will be the same as data provided in actual invoices. Such data preview is intended to facilitate the payment of Historical CAT Assessment 1.

(9) Financial Accountability Milestones

The CAT NMS Plan states that “[n]o Participant will make a filing with the SEC pursuant to Section 19(b) of the Exchange Act regarding any Historical CAT Assessment until any applicable Financial Accountability Milestone described in Section 11.6 has been satisfied.”⁹¹ The CAT NMS Plan further states that “in all filings submitted by the Participants to the Commission under Section 19(b) of the Exchange Act, to establish or implement Post-Amendment Industry Member Fees pursuant to this Article, . . . the Participants shall clearly indicate whether such fees are related to Post-Amendment Expenses incurred during Period 1, Period 2, Period 3, or Period 4.”⁹² As discussed in detail below, all

applicable Financial Accountability Milestones for Historical CAT Assessment 1—that is, Period 1, Period 2 and Period 3 of the Financial Accountability Milestones—have been satisfied. Furthermore, as discussed below, this filing clearly indicates that Historical CAT Assessment 1 relates to Post-Amendment Expenses incurred during Periods 1, 2 and 3 of the Financial Accountability Milestones.

(A) Period 1 of the Financial Accountability Milestones

In accordance with Section 11.6(b) of the CAT NMS Plan, Historical CAT Assessment 1 seeks to recover costs that are related to “all fees, costs, and expenses (including legal and consulting fees, costs, and expenses) incurred by or for the Company in connection with the development, implementation and operation of the CAT from the effective date of [Section 11.6 of the CAT NMS Plan] until such time as Full Implementation of CAT NMS Plan Requirements has been achieved”⁹³ (“Post-Amendment Expenses”) incurred during FAM Period 1. FAM Period 1 began on June 22, 2020, the effective date of Section 11.6 of the CAT NMS Plan, and concluded on July 31, 2020, the date of Initial Industry Member Core Equity and Options Reporting. Section 1.1 of the CAT NMS Plan defines “Initial Industry Member Core Equity and Options Reporting” as:

The reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of both: (a) equities transaction data, excluding Customer Account Information, Customer-ID, and Customer Identifying Information; and (b) options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information.

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports.⁹⁴ As indicated by the Participants' Quarterly Progress Report for the third quarter of 2020,⁹⁵ Initial Industry Member Core Equity and Option Reporting was completed on schedule on July 22, 2020, which is prior to the July 31, 2020 deadline.

Under the FAM Period 1 requirement of Initial Industry Member Core Equity and Options Reporting, Industry

⁸⁸ Section 11.3(a)(iv)(A) of the CAT NMS Plan.

⁸⁹ In approving the CAT Funding Model, the Commission stated that, “[i]n the Commission's view, providing CAT Execut[ing] Brokers information regarding the calculation of their CAT Fees will aid in transparency and permit CAT Execut[ing] Brokers to confirm the accuracy of their invoices for CAT Fees.” CAT Funding Model Approval Order at 62667.

⁹⁰ Section 11.3(a)(iv)(B) of the CAT NMS Plan. In approving the CAT Funding Model, the Commission stated that “[t]he publication of the aggregate executed equivalent share volume and aggregate fee is appropriate because it would allow Participants and CAT Executing Brokers a high-level validation of executed volume and fees.” CAT Funding Model Approval Order at 62667.

⁹¹ Section 11.3(b)(iii)(B)(III) of the CAT NMS Plan.

⁹² Section 11.6(b) of the CAT NMS Plan.

⁹³ Section 11.6 of the CAT NMS Plan.

⁹⁴ The Quarterly Progress Reports are available at <https://www.catnmsplan.com/implementation-plan>.

⁹⁵ See Q3 2020 Quarterly Progress Report (Oct. 30, 2020) and Updated Q3 2020 Quarterly Progress Report (Jan. 29, 2021).

Members—excluding Small Industry Members that are not OATS reporters—were required to report two categories of data to the CAT: equities transaction data and options transaction data (both excluding Customer Account Information, Customer-ID, and Customer Identifying Information) by July 31, 2020. Pursuant to exemptive relief provided by the Commission, the Commission authorized the Participants' Compliance Rules to allow core equity reporting for Industry Members (Phase 2a) to begin on June 22, 2020 and core options reporting for Industry Members (Phase 2b) to begin on July 20, 2020.⁹⁶

In adopting the FAMs, the Commission stated that the equities transaction reporting required for FAM Period 1 “is consistent with the functionality that the Participants describe on the CAT NMS Plan website as ‘Production Go-Live for Equities 2a file submission and data integrity validations.’”⁹⁷ The Phase 2a Industry Member Data is described in detail in the SEC’s Phased Reporting Exemptive Relief Order, and includes the following data related to Eligible Securities that are equities:

- All events and scenarios covered by OATS, which includes information related to the receipt or origination of orders, order transmittal, and order modifications, cancellations and executions;
- Reportable Events for: (1) proprietary orders, including market maker orders, for Eligible Securities that are equities; (2) electronic quotes in listed equity Eligible Securities (*i.e.*, NMS stocks) sent to a national securities exchange or FINRA’s Alternative Display Facility (“ADF”); (3) electronic quotes in unlisted Eligible Securities (*i.e.*, OTC Equity Securities) received by an Industry Member operating an interdealer quotation system (“IDQS”); and (4) electronic quotes in unlisted Eligible Securities sent to an IDQS or

other quotation system not operated by a Participant or Industry Member;

- Firm Designated IDs (“FDIDs”), which Industry Members must report to the CAT as required by Sections 6.3(d)(i)(A) and 6.4(d)(ii)(C) of the CAT NMS Plan;

- Industry Members would be required to report all street side representative orders, including both agency and proprietary orders and mark such orders as representative orders, except in certain limited exceptions as described in the Industry Member Technical Specifications;

- The link between the street side representative order and the order being represented when: (1) the representative order was originated specifically to represent a single order received either from a customer or another broker-dealer; and (2) there is (a) an existing direct electronic link in the Industry Member’s system between the order being represented and the representative order and (b) any resulting executions are immediately and automatically applied to the represented order in the Industry Member’s system;

- Manual and Electronic Capture Time for Manual Order Events;

- Special handling instructions for the original receipt or origination of an order during Phase 2a; and

- When routing an order, whether the order was routed as an intermarket sweep order (“ISO”).

In Phase 2a, Industry Members were not required to report modifications of a previously routed order in certain limited instances, nor were they required to report a cancellation of an order received from a Customer after the order has been executed.⁹⁸

The Quarterly Progress Report for the third quarter of 2020 states that “Interim Step: Production Go-Live for Equities 2a file submission and data integrity validation (Large Industry Members and Small OATS Reporters)” was completed on June 22, 2020. Accordingly, the FAM Period 1 requirement of reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of “equities transaction data, excluding Customer Account Information, Customer-ID, and Customer Identifying Information” was completed on June 22, 2020.

In adopting the FAMs, the Commission stated that the options transaction reporting required for FAM Period 1 is “consistent with the functionality that the Participants describe on the CAT NMS Plan website as ‘Production Go-Live for Options 2b

file submission and data integrity validations.’”⁹⁹ The Phase 2b Industry Member Data is described in detail in the SEC’s Phased Reporting Exemptive Relief Order, and includes the Industry Member Data related to Eligible Securities that are options and related to simple electronic option orders, excluding electronic paired option orders. A simple electronic option order is an order to buy or sell a single option that is not related to or dependent on any other transaction for pricing and timing of execution that is either received or routed electronically by an Industry Member. Electronic receipt of an order is defined as the initial receipt of an order by an Industry Member in electronic form in standard format directly into an order handling or execution system. Electronic routing of an order is the routing of an order via electronic medium in standard format from one Industry Member’s order handling or execution system to an exchange or another Industry Member. An electronic paired option order is an electronic option order that contains both the buy and sell side that is routed to another Industry Member or exchange for crossing and/or price improvement as a single transaction on an exchange. Responses to auctions of simple orders and paired simple orders would be reportable in Phase 2b. Furthermore, combined orders in options would be treated in Phase 2b in the same way as equity representative orders are treated in Phase 2a. A combined order would mean, as permitted by SRO rules, a single, simple order in Listed Options created by combining individual, simple orders in Listed Options from a customer with the same exchange origin code before routing to an exchange. During Phase 2b, the single combined order sent to an exchange must be reported and marked as a combined order, but the linkage to the underlying orders is not required to be reported until Phase 2d.¹⁰⁰

The Quarterly Progress Report for the third quarter of 2020 states that “Interim Step: Production Go-Live for Options 2b file submission and data integrity validations” was completed on July 20, 2020. Accordingly, the FAM Period 1 requirement of reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of “options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information” was completed on July 20, 2020.

⁹⁹ FAM Adopting Release at 31330, n.98.

¹⁰⁰ Phased Reporting Exemptive Relief Order at 23078.

⁹⁶ See Phased Reporting Exemptive Relief Order. Under the CAT NMS Plan as adopted, the Participants were required, through their Compliance Rules, to require their Large Industry Members to commence reporting Industry Member Data to the Central Repository by November 15, 2018, and to require their Small Industry Members to commence reporting Industry Member Data to the Central Repository by November 15, 2019. Sections 6.7(a)(v) and (vi) of the CAT NMS Plan. The SEC granted exemptive relief from these provisions of the CAT NMS Plan to allow for the phased implementation of Industry Member reporting via five phases addressing the reporting requirements for Phase 2a Industry Member Data, Phase 2b Industry Member Data, Phase 2c Industry Member Data, Phase 2d Industry Member Data and Phase 2e Industry Member Data.

⁹⁷ Securities Exchange Act Rel. No. 88890 (May 15, 2020), 85 FR 31322, 31330 n.97 (May 22, 2020) (“FAM Adopting Release”).

⁹⁸ Phased Reporting Exemptive Relief Order at 23076–78.

As discussed above, the Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1 would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from June 22, 2020 through July 31, 2020. The total costs for this period, as discussed above, are \$6,377,343. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third (\$2,125,781) and CEBBs paying one-third (\$2,125,781).

(B) Period 2 of the Financial Accountability Milestones

Historical CAT Assessment 1 seeks to recover costs that are related to Post-Amendment Expenses incurred during FAM Period 2. FAM Period 2 began on August 1, 2020, and concluded on December 31, 2020, the date of the Full Implementation of Core Equity Reporting. Section 1.1 of the CAT NMS Plan defines “Full Implementation of Core Equity Reporting” as:

the point at which: (a) Industry Member reporting (excluding reporting by Small Industry Members that are not OATS reporters) for equities transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, is developed, tested, and implemented at a 5% Error Rate or less and with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, and trade reporting facilities linkage to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, excluding linkage of representative orders, from order origination through order execution or order cancellation; and (b) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3 and Section 8.2.1 incorporates the Industry Member equities transaction data described in condition (a) and is available to the Participants and to the Commission. This Financial Accountability Milestone shall be considered complete as of the date identified in a Quarterly Progress Report meeting the requirements of Section 6.6(c).

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants’ Quarterly Progress Reports. As indicated by the Participants’ Quarterly Progress Report for the fourth quarter of 2020,¹⁰¹ Full Implementation of Core Equity

Reporting was completed on schedule by December 31, 2020.

Specifically, the Full Implementation of Core Equity Reporting requires the satisfaction of two prongs. The first prong requires Participants to have fully implemented the first phase of equities transaction reporting for Industry Members (excluding Small Industry Members that are not OATS reporters) at an Error Rate of less than 5%. In addition, equities transaction data produced by the CAT at this stage must also be sufficiently interlinked so as to permit full analysis of an order’s lifecycle across the national market, excluding full linkage of representative orders. As CAT LLC reported on its Quarterly Progress Reports, Phase 2a was fully implemented as of October 26, 2020, including intra-firm, inter-firm, national securities exchange, and trade reporting facilities linkages.¹⁰² In addition to the reporting of Phase 2a Industry Member Data as described above with regard to FAM Period 1, the following linkage data was added to the CAT as described in the Quarterly Progress Reports for the third and fourth quarter of 2020:

- “Production Go-Live for Equities 2a Intrafirm Linkage validations” was completed on 7/27/2020;¹⁰³
- “Production Go-Live for Firm to Firm Linkage validations for Equities 2a (Large Industry Members and Small OATS Reporters)” was completed on October 26, 2020; and
- “Production Go-Live for Equities 2a Exchange and TRF Linkage validations (Large Industry Members and Small OATS Reporters)” was completed on October 26, 2020.

Furthermore, as CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2020, the average overall error rate for Phase 2a Industry Member Data was less than 5% as of December 31, 2020. The average overall error rate was calculated by dividing the compliance errors by processed records.

The second prong of this FAM requires that the equities transaction data collected by the CAT at this stage be made available to regulators through two basic query tools required by the CAT NMS Plan—a targeted query tool that will enable regulators to retrieve data via an online query screen with a variety of predefined selection criteria, and a user-defined direct query tool that will provide regulators with the ability to query data using all available

attributes and data sources.¹⁰⁴ As CAT LLC reported on its Quarterly Progress Reports, the query tool functionality incorporating the data from Phase 2a was available to the Participants and the Commission as of December 31, 2020.¹⁰⁵

The Commission has determined that the Participants have sufficiently complied with the conditions set forth in the 2020 Orders and with the technical requirements for Quarterly Progress Reports set forth in Section 6.6(c) of the CAT NMS Plan for purposes of determining compliance with this FAM.¹⁰⁶

As discussed above, Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1 would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from August 1, 2020 through December 31, 2020. The total costs for this period, as discussed above, are \$42,976,478. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remain [*sic*] two-thirds, with CEBBs paying one-third (\$14,325,492.70) and CEBBs paying one-third (\$14,325,492.70).

(C) Period 3 of the Financial Accountability Milestones

Historical CAT Assessment 1 seeks to recover costs that are related to Post-Amendment Expenses incurred during FAM Period 3. FAM Period 3 began on January 1, 2021, and concluded on December 31, 2021, the date of the Full Availability and Regulatory Utilization of Transactional Database Functionality. Section 1.1 of the CAT NMS Plan defines “Full Availability and Regulatory Utilization of Transactional Database Functionality” as:

the point at which: (a) reporting to the Order Audit Trail System (“OATS”) is no longer required for new orders; (b) Industry Member reporting for equities transactions and simple

¹⁰⁴ Section 6.10(c)(i)(A) of the CAT NMS Plan requires the Plan Processor to “provide Participants and the SEC with access to all CAT Data stored in the Central Repository” via an “online targeted query tool.” Appendix D, Sections 8.1.1–8.1.3 of the CAT NMS Plan describes the required functionality associated with this regulatory tool. Appendix D, Section 8.2.1 describes the required functionality associated with a user-defined direct query tool that will “deliver large sets of data that can then be used in internal surveillance or market analysis applications.”

¹⁰⁵ See Q3 2020 Quarterly Progress Report (Oct. 30, 2020); Updated Q3 2020 Quarterly Progress Report (Jan. 29, 2021); and Q4 2020 Quarterly Progress Report (Jan. 29, 2021).

¹⁰⁶ Securities Exchange Act Rel. No. 98848 (Nov. 2, 2023), 88 FR 77128, 77129 n.13 (Nov. 8, 2023) (“Settlement Exemptive Order”).

¹⁰¹ Q4 2020 Quarterly Progress Report (Jan. 29, 2021).

¹⁰² For a description of the requirements of Phases 2a, see Phased Reporting Exemptive Relief Order.

¹⁰³ Q3 2020 Quarterly Progress Report (Oct. 20, 2021).

electronic options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, trade reporting facilities linkage, and representative order linkages (including any equities allocation information provided in an Allocation Report) to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, is developed, tested, and implemented at a 5% Error Rate or less; (c) Industry Member reporting for manual options transactions and complex options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with all required linkages to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, including any options allocation information provided in an Allocation Report, is developed, tested, and fully implemented; (d) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3, Section 8.2.1, and Section 8.5 incorporates the data described in conditions (b)–(c) and is available to the Participants and to the Commission; and (e) the requirements of Section 6.10(a) are met. This Financial Accountability Milestone shall be considered complete as of the date identified in a Quarterly Progress Report meeting the requirements of Section 6.6(c).

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports. As indicated by the Participants' Quarterly Progress Report for the fourth quarter of 2021,¹⁰⁷ Full Availability and Regulatory Utilization of Transactional Database Functionality was completed on schedule by December 31, 2021.

Specifically, the "Full Availability and Regulatory Utilization of Transactional Database Functionality" requires the satisfaction of five prongs. The first prong requires that reporting to the Order Audit Trail System ("OATS") is no longer required for new orders. As CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2021,¹⁰⁸ FINRA retired OATS effective September 1, 2021.¹⁰⁹ Accordingly, after the retirement of OATS, reporting to OATS was no longer required.

In addition to Phase 2a and Phase 2b Industry Member Data, the second and third prongs of "Full Availability and Regulatory Utilization of Transactional

Database Functionality" require Industry Member reporting of Phase 2c Industry Member Data and Phase 2d Industry Member Data. The Phase 2c Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order. That Order states that "Phase 2c Industry Member Data" is Industry Member Data related to Eligible Securities that are equities other than Phase 2a Industry Member Data, Phase 2d Industry Member Data, or Phase 2e Industry Member Data. Specifically, the Phase 2c Industry Member Data includes Industry Member Data that is related to Eligible Securities that are equities and that is related to: (1) Allocation Reports as required to be recorded and reported to the Central Repository pursuant to Section 6.4(d)(ii)(A)(1) of the CAT NMS Plan; (2) quotes in unlisted Eligible Securities sent to an IDQS operated by a CAT Reporter (reportable by the Industry Member sending the quotes) (except for quotes reportable in Phase 2d, as discussed below); (3) electronic quotes in listed equity Eligible Securities (*i.e.*, NMS stocks) that are not sent to a national securities exchange or FINRA's Alternative Display Facility; (4) reporting changes to client instructions regarding modifications to algorithms; (5) marking as a representative order any order originated to work a customer order in price guarantee scenarios, such as a guaranteed VWAP; (6) flagging rejected external routes to indicate a route was not accepted by the receiving destination; (7) linkage of duplicate electronic messages related to a Manual Order Event between the electronic event and the original manual route; (8) special handling instructions on order route reports (other than the ISO, which is required to be reported in Phase 2a); (9) quote identifier on trade events; (10) reporting of LTIDs (if applicable) for accounts with Reportable Events that are reportable to CAT as of and including Phase 2c; (11) reporting of date account opened or Account Effective Date (as applicable) for accounts and reporting of a flag indicating the Firm Designated ID type as account or relationship; (12) order effective time for orders that are received by an Industry Member and do not become effective until a later time; (13) the modification or cancellation of an internal route of an order; and (14) linkages to the customer orders(s) being represented for representative order scenarios, including agency average price trades, net trades, aggregated orders, and disconnected Order Management System ("OMS")—Execution Management System ("EMS")

scenarios, as required in the Industry Member Technical Specifications.¹¹⁰

Phase 2c Industry Member Data also includes electronic quotes that are provided by or received in a CAT Reporter's order/quote handling or execution systems in Eligible Securities that are equities and are provided by an Industry Member to other market participants off a national securities exchange under the following conditions: (1) an equity bid or offer is displayed publicly or has been communicated (a) for listed securities to the ADF operated by FINRA; or (b) for unlisted equity securities to an "interdealer quotation system," as defined in FINRA Rule 6420(c); or (2) an equity bid or offer which is accessible electronically by customers or other market participants and is immediately actionable for execution or routing; *i.e.*, no further manual or electronic action is required by the responder providing the quote in order to execute or cause a trade to be executed). With respect to OTC Equity Securities, OTC Equity Securities quotes sent by an Industry Member to an IDQS operated by an Industry Member CAT Reporter (other than such an IDQS that does not match and execute orders) are reportable by the Industry Member sending them in Phase 2c. Accordingly, any response to a request for quote or other form of solicitation response provided in a standard electronic format (*e.g.*, FIX) that meets this quote definition (*i.e.*, an equity bid or offer which is accessible electronically by customers or other market participants and is immediately actionable for execution or routing) would be reportable in Phase 2c.¹¹¹

The Phase 2d Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order. "Phase 2d Industry Member Data" is Industry Member Data that is related to Eligible Securities that are options other than Phase 2b Industry Member Data, Industry Member Data that is related to Eligible Securities that are equities other than Phase 2a Industry Member Data or Phase 2c Industry Member Data, and Industry Member Data other than Phase 2e Industry Member Data. Phase 2d Industry Member Data includes with respect to the Eligible Securities that are options: (1) simple manual orders; (2) electronic and manual paired orders; (3) all complex orders with linkages to all CAT-reportable legs; (4) LTIDs (if applicable) for accounts with Reportable Events for Phase 2d; (5) date account

¹⁰⁷ Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

¹⁰⁸ *Id.*

opened or Account Effective Date (as applicable) for accounts with an LTID and flag indicating the Firm Designated ID type as account or relationship for such accounts; (6) Allocation Reports as required to be recorded and reported to the Central Repository pursuant to Section 6.4(d)(ii)(A)(1) of the CAT NMS Plan; (7) the modification or cancellation of an internal route of an order; and (8) linkage between a combined order and the original customer orders. Phase 2d Industry Member Data also would include electronic quotes that are provided by or received in a CAT Reporter's order/quote handling or execution systems in Eligible Securities that are options and are provided by an Industry Member to other market participants off a national securities exchange under the following conditions: a listed option bid or offer which is accessible electronically by customers or other market participants and is immediately actionable (*i.e.*, no further action is required by the responder providing the quote in order to execute or cause a trade to be executed). Accordingly, any response to a request for quote or other form of solicitation response provided in standard electronic format (*e.g.*, FIX) that meets this definition is reportable in Phase 2d for options.¹¹²

Phase 2d Industry Member Data also includes with respect to Eligible Securities that are options or equities (1) receipt time of cancellation and modification instructions through Order Cancel Request and Order Modification Request events; (2) modifications of previously routed orders in certain instances; and (3) OTC Equity Securities quotes sent by an Industry Member to an IDQS operated by an Industry Member CAT Reporter that does not match and execute orders. In addition, subject to any exemptive or other relief, Phase 2d Industry Member Data will include verbal or manual quotes on an exchange floor or in the over-the-counter market, where verbal quotes and manual quotes are defined as bids or offers in Eligible Securities provided verbally or that are provided or received other than via a CAT Reporter's order handling and execution system (*e.g.*, quotations provided via email or instant messaging).¹¹³

The Quarterly Progress Report for the fourth quarter of 2021 states that "Phase 2a was fully implemented as of October 26, 2020;" "Phase 2b was fully implemented as of January 4, 2021;" "Phase 2c was implemented as of April 26, 2021;" and "Phase 2d was fully

implemented as of December 13, 2021."¹¹⁴ The Quarterly Progress Reports for 2021 provide additional detail regarding the implementation of these steps including the following:

- "Production Go-Live for Equities 2c reporting requirements (Large Industry Members)" was completed on April 26, 2021;
- "LTID Account Information Reporting Go-Live for Phases 2a, 2b and 2c (Large Industry Members)" was completed on April 26, 2021;
- "FCAT Plan Processor creates linkages of the lifecycle of order events based on the received data through Phase 2d Production Go-Live for Options 2d reporting requirements (Large Industry Members)" was completed on December 13, 2021;
- "Production Go-Live for Options 2d reporting requirements (Large Industry Members)" was completed on December 13, 2021;
- "Production Go-Live for Options 2b reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)" was completed on December 13, 2021;
- "Production Go-Live for Equities 2c reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)" was completed on December 13, 2021;
- "Production Go-Live for Options 2d reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)" was completed on December 13, 2021;
- "LTID Account Information Reporting Go-Live for Phases 2d (Large Industry Members)" was completed on December 13, 2021; and
- "LTID Account Information Reporting Go-Live for Phases 2a, 2b, 2c and 2d (Small Industry Members)" was completed on December 13, 2021.¹¹⁵

The third prong of "Full Availability and Regulatory Utilization of Transactional Database Functionality" also imposes an Error Rate requirement of 5% or less. The Quarterly Progress Report for the fourth quarter of 2021 states the average overall error rate was less than 5% as of December 31, 2021. The average overall error rate was calculated by dividing the compliance errors by processed records.

The fourth prong of "Full Availability and Regulatory Utilization of Transactional Database Functionality" requires that the data collected by the CAT at this stage be made available to

regulators through an online targeted query tool and a user-defined direct query tool. As CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2021, the query tool functionality incorporating the data from Phases 2a, 2b, 2c and 2d was available to the Participants and to the Commission as of December 31, 2021.¹¹⁶

The fifth prong requires the requirements of Section 6.10(a) of the CAT NMS Plan to have been met. Section 6.10(a) of the CAT NMS Plan requires the Participants to use the tools described in Appendix D to "develop and implement a surveillance system, or enhance existing surveillance systems, reasonably designed to make use of the consolidated information contained in the Central Repository." The Exchange implemented a surveillance system, or enhanced existing surveillance systems, reasonably designed to make use of the consolidated information contained in the Central Repository as of December 31, 2021 in accordance with Section 6.10(a) of the CAT NMS Plan.¹¹⁷

The Commission has determined that the Participants have sufficiently complied with the conditions set forth in the 2020 Orders and with the technical requirements for Quarterly Progress Reports set forth in Section 6.6(c) of the CAT NMS Plan for purposes of determining compliance with this FAM.¹¹⁸

As discussed above, Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1 would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2021 through December 31, 2021. The total costs for this period, as discussed above, are \$144,415,268. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remain [*sic*] two-thirds, with CEBBs paying one-third (\$48,138,422.70) and CEBBs paying one-third (\$48,138,422.70).

(D) Additional Considerations Related to the Financial Accountability Milestones

As discussed above, CAT LLC has satisfied the Financial Accountability Milestones ("FAMs") for Periods 1

¹¹⁶ See Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

¹¹⁷ See Q1 2021 Quarterly Progress Report (Apr. 30, 2021); Q2 2021 Quarterly Progress Report (July 27, 2021); Q3 2021 Quarterly Progress Report (Nov. 1, 2021); Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

through 3.¹¹⁹ As discussed below, none of the circumstances related to NIA Electronic RFQ Responses, the 2023 Verbal Quotes Exemption, the November 2023 Order, or Executing Broker reporting, affect the conclusion that the FAMs for Periods 1 through 3 were satisfied in a timely fashion.

(i) NIA Electronic RFQ Responses

CAT LLC does not believe that the exemptive relief relating to the reporting of electronic responses for quotes (“RFQs”) that are not immediately actionable (“NIA Electronic RFQ Responses”) affect the conclusion that FAMs 1 through 3 have been satisfied. The only reason CAT LLC pursued this relief is because certain Industry Members introduced concerns that NIA Electronic RFQ Responses could be considered “orders” reportable pursuant to Rule 613(j)(8) and some Industry Members were not prepared to report such orders to CAT. Thus, the relief was requested on behalf of Industry Members. CAT LLC itself has not taken any position on whether NIA Electronic RFQ Responses are “orders,” as the definition of “order” is an SEC rule and the trading processes for NIA Electronic RFQ Responses are the Industry Members’, not those of the Participants or CAT LLC. Accordingly, CAT LLC stated in its letter that “Industry Members must determine whether trading interest falls within the definition of an ‘order’ for CAT purposes. To the extent an NIA Electronic RFQ Response is not considered an ‘order’ as defined in Rule 613(j)(8) and the CAT NMS Plan, it would not be reportable to CAT.”¹²⁰

Only “orders” as defined in SEC Rule 613(j)(8) are reportable to CAT. There is no agreement across the industry or among regulators as to whether NIA Electronic RFQ Responses are “orders” reportable to CAT. Certain Industry Members have raised the question as to whether NIA Electronic RFQ Responses are orders, but others have argued that they are not orders under Rule 613(j)(8).¹²¹ Indeed, members of the

Advisory Committee, which CAT LLC relies upon for guidance with regard to Industry Member issues, have not had a definitive view on whether NIA Electronic RFQ Responses are orders. As Rule 613(j)(8) is an SEC rule, CAT LLC believes that only the SEC can provide a definitive determination as to if, and under what circumstances, an NIA Electronic RFQ Response is considered an “order” reportable to CAT. The issue has persisted for some time. As a result, CAT LLC filed an exemptive request regarding NIA Electronic RFQ Responses for clarity on the interpretive issue. As recently as April 2024, Industry Members have re-raised this issue stating that the SEC agrees that it must provide additional guidance on this interpretive issue to resolve the CAT reporting issue for NIA Electronic RFQ Responses:

As further discussed in the prior FIF letters, even if the Commission had the legal authority to require the reporting of NIA RFQ responses to CAT without an amendment to Rule 613, the Commission has not provided guidance to industry members as to the conditions under which NIA RFQ responses would be reportable to CAT. In subsequent discussions with industry members, Commission representatives have agreed that, prior to NIA RFQ responses being reportable to CAT, it would be necessary for the Commission to provide further guidance to industry members as to the conditions under which NIA RFQ responses would be reportable to CAT.¹²²

On May 20, 2024, the Commission granted CAT LLC’s request for exemptive relief from certain CAT reporting requirements pertaining to NIA Electronic RFQ Responses to the extent such responses are considered “orders” reportable pursuant to Rule 613(j)(8).¹²³ The Commission, however, did not provide additional guidance regarding the conditions under which NIA Electronic RFQ Responses would be reportable to CAT. The Commission stated in its exemptive order that “[t]o the extent that the Participants are availing themselves of exemptive relief from a CAT NMS Plan requirement, such requirement shall not be included in the requirements for the Financial Accountability Milestones, provided that any conditions of the exemption are satisfied.”¹²⁴

When the Commission proposed the FAMs, the Participants expressed concern that, “by conditioning the ability of CAT LLC and the Participants to collect Post-Amendment Industry Member Fees on factors dependent on

the efforts of Industry Members, the Commission’s proposals inadvertently establish a perverse incentive for Industry Members to devote less than maximum efforts to comply with their obligations related to the CAT as they will pay less fees in such instances.”¹²⁵ The Participants further warned that “Industry Members may request or require unanticipated reporting delays to address Industry Member implementation issues or concerns,” but that, “[f]aced with financial penalties for missed deadlines, the Participants may not be able to fully address legitimate industry concerns or accommodate requests for delays with respect to future deadlines.”¹²⁶ CAT LLC has engaged in good faith to help address NIA Electronic RFQ Responses and other concerns relevant to the ability of Industry Members to meet their CAT reporting obligations. CAT LLC should not be penalized financially for seeking in good faith to resolve a difficult interpretive issue for the benefit of Industry Members.

(ii) 2023 Verbal Quotes Exemption

CAT LLC does not believe that the Commission’s May 19, 2023 order granting temporary exemptive relief relating to certain verbal floor activity and unstructured verbal and electronic upstairs activity (the “2023 Verbal Quotes Exemption”) affects the conclusion that FAMs 1 through 3 have been satisfied. The 2023 Verbal Quotes Exemption, which was issued on May 19, 2023, is not relevant for purposes of FAM Periods 1 through 3, which only cover the period through December 31, 2021. The relevant exemption for this time period is the Commission’s November 12, 2020 order, which granted relief for the same activity through July 31, 2023 (the “2020 Verbal Quotes Order”).¹²⁷ The Commission has stated that, “to the extent that the Participants are availing themselves of exemptive relief from a CAT NMS Plan requirement, such requirement shall not be included in the requirements for a Financial Accountability Milestone, provided that the conditions of the exemption are satisfied.”¹²⁸ Here, the

¹¹⁹ In May 2020, the Commission adopted amendments to the CAT NMS Plan that establish four Financial Accountability Milestones and set target deadlines by which these milestones must be achieved. These amendments also reduce the amount of any fees, costs, and expenses that may be recovered from Industry Members if the Participants fail to meet the target deadlines. FAM Adopting Release.

¹²⁰ See Letter from Brandon Becker, Chair, CAT NMS Plan Operating Committee to Vanessa Countryman, Secretary, Commission (Feb. 13, 2024) at 2.

¹²¹ See, e.g., Letter from Howard Meyerson, Managing Director, FIF, to Sai Rao, Counsel for Trading and Markets, Office of the Chair (Apr. 25, 2024).

¹²² *Id.*

¹²³ Securities Exchange Act Rel. No. 100181 (May 20, 2024), 89 FR 45715 (May 23, 2024).

¹²⁴ *Id.* at n.11.

¹²⁵ See Letter from Michael Simon, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission at 9 (Oct. 28, 2019).

¹²⁶ *Id.* at 10.

¹²⁷ Securities Exchange Act Rel. No. 90405, 85 FR 73544 (Nov. 18, 2020) (the “2020 Verbal Quotes Exemption”).

¹²⁸ See, e.g., Securities Exchange Act Rel. No. 89051 (June 11, 2020), 85 FR 36631, 36633 (June 17, 2020). The straightforward reading of the Commission’s statement is that compliance with the conditions of an exemption will be measured as of the deadline for a particular FAM Period.

2020 Verbal Quotes Order was in effect and the conditions of the exemption were satisfied as of December 31, 2021, and therefore may be relied upon for purposes of determining compliance with FAM Periods 1 through 3.¹²⁹

(iii) November 2023 Order

CAT LLC does not believe that the Commission's November 2, 2023 order granting relief from certain CAT NMS Plan requirements (the "November 2023 Order") affects the conclusion that FAMs 1 through 3 have been satisfied. The November 2023 Order is not relevant for purposes of FAM Periods 1 through 3, which only cover the period through December 31, 2021. As described in the November 2023 Order, the relevant exemptive orders for this time period were issued on December 16, 2020, which also states that "the Commission has determined that the Participants have sufficiently complied with the conditions set forth in the prior Orders and with the technical requirements for Quarterly Progress Reports set forth in section 6.6(c) of the CAT NMS Plan, including for purposes of determining compliance with any applicable Financial Accountability Milestones."¹³⁰ The November 2023 Exemption Order is consistent with the Commission's repeated statements in the FAM adopting release that it would have "authority to grant exemptive relief from any requirement associated with a particular Financial Accountability Milestone," citing Section 36 of the Exchange Act and Rule 608.¹³¹ Similarly, the CAT NMS Plan

expressly contemplates the Commission's ability to grant exemptive relief from any CAT NMS Plan requirement.¹³²

(iv) Executing Broker Reporting

CAT LLC also completed the requirements of FAM Period 2, including the required linkages, by December 31, 2020. Although Participant exchanges may report the Executing Broker to CAT differently in certain situations, these reporting differences are irrelevant for linkage purposes as the fields used for CAT Executing Broker are not used for linkage.

(10) Additional Support for Reasonableness of Historical CAT Costs

The CAT Funding Model approved by the Commission permits the recovery of reasonable costs in each of the categories of CAT costs sought to be recovered via Historical CAT Assessment 1.¹³³ As described in detail above and in further detail below, the CAT costs to be recovered for each category are reasonable. The following discusses in further details how each of the following costs are reasonable: (1) costs incurred prior to the effective date of the CAT NMS Plan; (2) cloud hosting services costs; (3) costs related to funding model filings; (4) costs related to litigation with the SEC regarding the CAT NMS Plan; (5) costs related to the Initial Plan Processor; (6) CAIS implementation costs; (7) public relations costs; (8) legal costs related to the limitation of liability provision in the CAT Reporter agreements; and (9) costs for the Chair of CAT Operating Committee. As discussed in detail below, each of these costs is reasonable and should be recoverable in accordance with the CAT Funding Model.

(A) Costs Incurred Prior to the Effective Date of CAT NMS Plan

CAT LLC believes that it is reasonable to seek recovery of costs incurred prior to when the CAT NMS Plan became effective in November 2016, such as legal and consulting fees incurred to

create the CAT NMS Plan. Rule 613 specifically mandates that the CAT be created, implemented and maintained, and further provides that the CAT NMS Plan include a proposed allocation of estimated costs to fund the creation, implementation and maintenance of the CAT among the Participants (referred to as "plan sponsors"), and between the Participants and Industry Members (referred to as "members of the plan sponsors").¹³⁴ Consistent with Rule 613, the CAT NMS Plan, as approved by the Commission, specifically authorizes charging Industry Members fees for costs reasonably incurred prior to the date of the approval of the CAT NMS Plan by the Commission in November 2016, including legal and consulting costs. Section 11.1(c) of the CAT NMS Plan states that:

[i]n determining fees on Participants and Industry Members the Operating Committee shall take into account fees, costs and expenses (including legal and consulting fees and expenses) reasonably incurred by Participants on behalf of the Company prior to the Effective Date in connection with the creation and implementation of the CAT.

Accordingly, the CAT NMS Plan specifically permits the recovery of costs, including legal and consulting costs, reasonably incurred prior to November 2016 in connection with the creation and implementation of the CAT.

Furthermore, the costs incurred to create and implement the CAT prior to the effective date of the CAT NMS Plan ("Pre-Formation Costs") were reasonable both in scope and amount, in accordance with the requirements of Section 11.1(c) of the CAT NMS Plan. During the four-year period from 2012 to 2016, a total of \$13,842,881 in Pre-Formation Costs were incurred. This is an average of approximately \$3.5 million per year over this period. The Pre-Formation Costs fell into three categories: legal costs, consulting costs and public relations costs. This includes legal costs of \$3,196,434; consulting costs of \$10,589,273; and public relations costs of \$57,174. The legal, consulting and public relations services were performed by WilmerHale, Deloitte and Peppercomm, respectively. The selection considerations and fees for these three firms are described in detail above and are described further below. The Pre-Formation Costs are direct costs of CAT, which have been funded entirely by the Participants through non-interest-bearing notes. The Pre-Formation Costs do not include the significant costs incurred by each of the

¹²⁹ As a condition to the 2020 Verbal Quotes Exemption, the Commission required that the Participants provide a written status update on the reporting of these quotes and orders by July 31, 2022, including the estimated costs of reporting these quotes and orders and an implementation plan for the reporting of these quotes and orders. As noted, the 2020 Verbal Quotes Order was in effect and the conditions of the exemption were satisfied as of December 31, 2021, and therefore may be relied upon for purposes of determining compliance with FAM Periods 1 through 3. In any event, on June 3, 2022, the Participants provided the required written status update. See Letter from Michael Simon, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission (June 3, 2022).

¹³⁰ *Id.* at 77129 n.12.

¹³¹ FAM Adopting Release at 31335 (May 22, 2020). Section 36 of the Exchange Act grants the Commission the authority to "conditionally or unconditionally exempt any person, security, or transaction . . . from any provision or provisions of [the Exchange Act] or of any rule or regulation thereunder, to the extent that such exemption is necessary or appropriate in the public interest, and is consistent with the protection of investors." 15 U.S.C. 78mm(a)(1). Under Rule 608(e) of Regulation NMS, the Commission may "exempt from [Rule 608], either unconditionally or on specified terms and conditions, any self-regulatory organization, member thereof, or specified security, if the Commission determines that such exemption is

consistent with the public interest, the protection of investors, the maintenance of fair and orderly markets and the removal of impediments to, and perfection of the mechanism of, a national market system." 17 CFR 242.608(e).

¹³² Section 12.3 of the CAT NMS Plan ("[T]o the extent the SEC grants exemptive relief applicable to any provision of this Agreement, Participants and Industry Members shall be entitled to comply with such provision pursuant to the terms of the exemptive relief so granted at the time such relief is granted irrespective of whether this Agreement has been amended.")

¹³³ See Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹³⁴ See, e.g., Rule 613(a)(1)(vii)(D) of the CAT NMS Plan.

individual Participants in responding to the adoption of Rule 613.

The Pre-Formation Costs are reasonable and appropriate as they reflect the extensive efforts that were necessary to create the CAT NMS Plan as mandated after the SEC's adoption of Rule 613. As described in more detail below, these efforts included, among other things, developing a plan for selecting the Plan Processor, soliciting and evaluating bids, engaging a diverse set of market participants and the SEC in the development of the Plan, interacting with the SEC in their oversight of the development of the Plan, and seeking appropriate exemptive relief to address areas of concern in Rule 613.¹³⁵

(i) Request for Proposal ("RFP")

The Participants determined to utilize an RFP to ensure that potential alternative solutions for creating the Plan could be presented and considered, and that a detailed and meaningful cost-benefit analysis could be performed. The SEC supported the use of an RFP, and approved its use as it is described in extensive detail in the CAT NMS Plan.¹³⁶

In the context of the SEC's adoption of Rule 613, commenters urged the Commission to utilize an RFP process to assist in the planning and design of the NMS plan.¹³⁷ Specifically, the Commission explained:

In this regard, several commenters suggested that the Commission undergo a RFP or request for information ("RFI") process to create and implement a consolidated audit trail. Specifically, FIF urged the Commission to perform a RFP process "to determine the best technical solution for developing a consolidated audit trail." FIF suggested that the Commission "should outline a set of goals and guiding principles they are striving to achieve as part of the adopted CAT filing and leave the determination of data elements and other technical requirements to [an] industry working group." Similarly, Direct Edge suggested that Commission staff should form and engage in a working group to develop an

RFP for publication by the Commission. DirectEdge explained that an RFP process would facilitate the identification of the costs and benefits of the audit trail, as well as the consideration of a wider range of technological solutions. Further, commenters, including Broadridge Financial Solutions, Inc., a technology provider, also requested more specific information about the audit trail system to better assess the Commission's initial cost estimates and to determine the best approach to the consolidated audit trail.¹³⁸

In response to these comments, the Commission modified Rule 613 to require the Participants to address certain important considerations regarding the features and details of the NMS plan and to extend the timeframe for submission of the CAT NMS Plan by the Participants from the 90 days as originally proposed to 270 days, in part, to accommodate a process that would address these considerations.¹³⁹ As the SEC noted, "[i]n light of the numerous specific requirements of Rule 613, the Participants concluded that publication of a request for proposal ('RFP') was necessary to ensure that potential alternative solutions to creating the consolidated audit trail can be presented and considered by the Participants and that a detailed and meaningful cost/benefit analysis can be performed, both of which are required considerations to be addressed in the CAT NMS Plan."¹⁴⁰

The SEC specifically recognized that the Participants planned to use an RFP when it approved the Selection Plan, and stated that the RFP was a reasonable approach.¹⁴¹ As the SEC described in its approval order for the Selection Plan, "[t]he Participants filed the [Selection] Plan to govern how the SROs will proceed with formulating and submitting the CAT NMS Plan—and, as part of that process, how to review, evaluate, and narrow down the bids submitted in response to the RFP ('Bids')—and ultimately choosing the plan processor that will build, operate, and maintain the consolidated audit trail ('Plan Processor')."¹⁴² After evaluating the Selection Plan, including the use of an RFP process, the Commission stated that it "believes the [Selection] Plan is reasonably designed to govern the process by which the SROs will formulate and submit the CAT NMS Plan, including the review, evaluation, and narrowing down of Bids

in response to the RFP, and ultimately choosing the Plan Processor that will build, operate, and maintain the consolidated audit trail."¹⁴³

On February 26, 2013, the Participants published an RFP soliciting bids from parties interested in serving as the plan processor for the CAT. Initially, 31 firms submitted intentions to bid. In the following months, the Participants engaged with potential bidders with respect to, among other things, the selection process, selection criteria, and potential bidders' questions and concerns. On March 21, 2014, the Participants received ten bids in response to the RFP.

(ii) Selection Plan

On September 4, 2013, the Participants filed with the Commission a national market system plan to govern the process for Participant review of the bids submitted in response to the RFP, the procedures for evaluating the bids, and, ultimately, selection of the plan processor (the "Selection Plan").¹⁴⁴ The Commission approved the Selection Plan as filed on February 21, 2014.¹⁴⁵ In approving the Selection Plan, the Commission concluded that "it is reasonably designed to achieve its objective of facilitating the development of the CAT NMS Plan and the selection of the Plan Processor."¹⁴⁶

The Selection Plan divided the review and evaluation of bids, and the selection of the plan processor, into various stages. Specifically, pursuant to the Selection Plan, a selection committee reviewed all bids and determined which bids contained sufficient information to allow the Participants to meaningfully assess and evaluate the bids. The ten submitted bids were deemed "Qualified Bids," and so passed to the next stage, in which each bidder presented its bids to the Participants on a confidential basis. On July 1, 2014, after conducting careful analysis and comparison of the bids, the Selection Committee voted and selected a shortlist of six eligible bidders. The Selection Committee determined which shortlisted bidders would be provided the opportunity to revise their bids. After the Selection Committee assessed and evaluated the revised bids, the Selection Committee selected the plan processor via two rounds of voting by the Participants, as described in the Selection Plan.

The Selection Plan established an Operating Committee responsible for

¹³⁵ The Participants described in detail the process for drafting the CAT NMS Plan in its original filing of the CAT NMS Plan. See Letter from Mike Simon, on behalf of the Participants of the CAT NMS Plan, to Brent J. Fields, Secretary, Commission (Sept. 30, 2014). A non-exclusive list of filings and activities associated with CAT, including certain pre-2016 filings, are available on the SEC's website: <https://www.sec.gov/divisions/marketreg/rule613-info>.

¹³⁶ See detailed discussion of RFP questions in Appendix C of the CAT NMS Plan, and incorporation of RFP requirements in Appendix D at D-2.

¹³⁷ For example, in its comments on proposed Rule 613, FIF suggested "that the SROs should select the processor through a 'request for proposal.'" Rule 613 Adopting Release at 45785.

¹⁴⁵ See Selection Plan Approval Order.

¹⁴⁶ Selection Plan Approval Order at 11160.

formulating, drafting, and filing with the Commission the CAT NMS Plan and for ensuring that the Participants' joint obligations under Rule 613 were met in a timely and efficient manner. In formulating the CAT NMS Plan, the Participants also engaged multiple persons across a wide range of roles and expertise, engaged the consulting firm Deloitte as project manager, and engaged the law firm WilmerHale to serve as legal counsel in drafting the Plan. Within this structure, the Participants focused on, among other things, comparative analyses of the proposed technologies and operating models, development of funding models to support the building and operation of the CAT, and detailed review of governance considerations. Given the complexity and scope of developing the CAT NMS Plan, these efforts were extensive.

When it approved the CAT NMS Plan in 2016, the Commission reiterated its belief that the Selection Plan remains a "reasonable approach," that "the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor," and that "the process set forth in the Selection Plan should be permitted to continue":

In approving the Selection Plan, the Commission stated that the Selection Plan is reasonably designed to achieve its objective of facilitating the development of the CAT NMS Plan and the selection of the Plan Processor. The Commission also found that the Selection Plan is reasonably designed to govern the process by which the SROs will formulate and submit the CAT NMS Plan, including the review, evaluation, and narrowing down of Bids in response to the RFP, and ultimately choosing the Plan Processor that will build, operate, and maintain the consolidated audit trail. The Commission believes that the process set out in the Selection Plan for selecting a Plan Processor remains a reasonable approach, which will facilitate the selection of Plan Processor through a fair, transparent and competitive process and that no modifications to the Selection Plan are required to meet the approval standard. . . . In response to the comment that offered support for a specific Bidder, the Commission agrees with the Participants that the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor and thus believes that the process set forth in the Selection Plan should be permitted to continue.¹⁴⁷

(iii) Engagement With Market Participants and SEC

During the process of developing the CAT NMS Plan, the Participants engaged in extensive and meaningful

dialogue with market participants and the SEC. To this end, the Participants created a website to update the public on the progress of the CAT NMS Plan, published a request for comment on multiple issues related to the Plan, held multiple public events to inform the industry of the progress of the CAT and to address inquiries, and formed, and later expanded, a DAG to solicit more input from a representative industry group.¹⁴⁸

The DAG included representatives of Participants and Industry Members and conducted meetings to discuss, among other things, technical and operational aspects the Participants were considering for the Plan. The Participants issued press releases soliciting participants for the DAG, and a wide spectrum of firms was deliberately chosen to provide insight from various industry segments affected by CAT. The DAG meetings included discussions of topics such as option market maker quote reporting, requirements for capturing Customer IDs, timestamps and clock synchronization, reporting requirements for order handling scenarios, costs and funding, error handling and corrections, and potential elimination of systems made redundant by the CAT. From the inception of the DAG through September 2014, the DAG participated in 36 meetings, as well as a variety of DAG subcommittee meetings.

(iv) Request for Exemption From Certain Requirements Under Rule 613

Following multiple discussions between the Participants and both the DAG and the bidders, as well as among the Participants themselves, the Participants recognized that some provisions of Rule 613 would not permit certain solutions to be included in the Plan that the Participants, in coordination with the DAG, determined advisable to effectuate the most efficient and cost-effective CAT. Specifically, "the SROs reached the conclusion that additional flexibility in certain of the minimum requirements specified in Rule 613 would allow them to propose a more efficient and cost-effective approach without adversely affecting the reliability or accuracy of CAT Data, or its security and confidentiality."¹⁴⁹ Consequently, the Participants submitted a request for exemptive relief from certain provisions of Rule 613 regarding: (1) options market maker quotes; (2) Customer-IDs; (3) CAT-

Reporter-IDs; (4) CAT-Order-IDs on allocation reports; and (5) timestamp granularity.¹⁵⁰ The Participants filed two supplements to the request for exemptive relief.¹⁵¹

After reviewing the exemptive request, the Commission determined that it was appropriate in the public interest and consistent with the protection of investors to grant the requested exemptive relief.¹⁵² In granting the exemptive relief, the Commission stated:

[T]he Commission is persuaded to provide flexibility in the discrete areas discussed in the Exemption Request so that the alternative approaches can be included in the CAT NMS Plan and subject to notice and comment. Doing so could allow for more efficient and cost-effective approaches than otherwise would be permitted. The Commission at this stage is not deciding whether the proposed approaches detailed below are more efficient or effective than those in Rule 613. However, the Commission believes the proposed approaches should be within the permissible range of alternatives available to the SROs.¹⁵³

The Commission further stated that the requested exemptive relief is consistent with the protection of investors. The Commission noted that:

Doing so will provide the public an opportunity to consider and comment on whether these proposed alternative approaches would indeed be more efficient and cost-effective than those otherwise required by Rule 613, and whether such approaches would adversely affect the reliability or accuracy of CAT Data or otherwise undermine the goals of Rule 613. Moreover, if—as the SROs represent—efficiency gains and cost savings would result from including the proposed approaches in the CAT NMS Plan without adverse effects, then the resultant benefits could potentially flow to investors (e.g., lower broker-dealer reporting costs resulting in fewer costs passed on to Customers).¹⁵⁴

The Participants incorporated the exemptive relief into the proposed CAT NMS Plan, which was noticed for comment, and the Commission ultimately approved the CAT NMS Plan with the more efficient and cost-effective alternative approaches described in the exemptive relief. Accordingly, the Participants believe that the costs incurred in developing the exemptive request were critical to the creation of a better CAT than was

¹⁵⁰ Letter from Robert Colby, FINRA, on behalf of the SROs, to Brent J. Fields, Secretary, Commission (Jan. 30, 2015).

originally contemplated by Rule 613, and therefore should be recoverable as part of Historical CAT Assessment 1.

(v) Request for Extensions for Filing the CAT NMS Plan

Rule 613(a)(1) under Regulation NMS required the Participants to jointly file the CAT NMS Plan on or before April 28, 2013, less than a year after the adoption of Rule 613. In recognition of the complexity of the project to create the CAT NMS Plan as well as industry interest in limiting or eliminating certain requirements of Rule 613 (*e.g.*, addressing the reporting of options market maker quotes), the Participants requested two extensions of the deadline to file the CAT NMS Plan. The Participants described the need for additional time as follows:

The SROs stated in their Request Letter that they do not believe that the 270-day time period provided for in Rule 613(a)(1) provides sufficient time for the development of the RFP, formulation and submission of bids, and review and evaluation of such bids. The SROs also stated that they believe additional time beyond the 270 days provided for in Rule 613(a)(1) is necessary in order to provide sufficient time for effective consultation with and input from the industry and the public on the proposed solution chosen by the SROs for the creation of the consolidated audit trail at the conclusion of the RFP process and the NMS plan itself.¹⁵⁵

In recognition of the need for additional time to refine the technical description of and requirements for the CAT and to allow for additional evaluation of the proposed cost and funding considerations, the SEC granted two extensions of this deadline.¹⁵⁶ The SEC determined that both extensions were appropriate, in the public interest, and consistent with the protection of investors.¹⁵⁷ In reaching this conclusion, the Commission stated that “it understands that the creation of a consolidated audit trail is a significant undertaking and that a proposed NMS plan must include detailed information and discussion about many things.”¹⁵⁸ The SEC also noted the following:

This additional time to complete the RFP process should allow the SROs to engage in a more thoughtful and comprehensive process for the development of an NMS plan. In this regard, the Commission notes that the

additional time to solicit comment from the industry and the public at certain key points in the development of the NMS plan could identify issues that can be resolved earlier in the development of the consolidated audit trail and prior to filing the NMS plan with the Commission.¹⁵⁹

Given the Commission’s recognition of the reasonableness and value of the extension of the deadline to file the CAT NMS Plan, the Participants believe that the costs incurred in developing the extension request were important to the process of developing the CAT NMS Plan, and therefore should be recoverable as part of Historical CAT Assessment 1.

(vi) Submission and Approval of the CAT NMS Plan

After extensive analyses and discussions with the DAG, bidders, market participants and the SEC staff, the Participants finalized the draft of the CAT NMS Plan and filed the CAT NMS Plan with the SEC on September 30, 2014. Following additional discussions, the Participants filed several amendments to the CAT NMS Plan during 2015 and 2016. With these additional changes, the SEC published the CAT NMS Plan for notice and comment in May 2016.¹⁶⁰ Following the comment period, the SEC approved the Plan in November 2016.¹⁶¹

(vii) Legal Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include legal costs of \$3,196,434. The legal services were performed by WilmerHale. The selection considerations and fees for WilmerHale were described in detail above. Prior to the creation of CAT LLC, WilmerHale was engaged to represent the consortium of SROs, not the individual Participants. For administrative purposes, FINRA agreed to receive such legal bills, although such costs were shared among the Participants. Therefore, the legal costs incurred with respect to WilmerHale do not include legal costs incurred by the individual Participants. These pre-formation legal costs are described in detail above and are further described below:

- Analyzed various legal matters associated with the Selection Plan and drafted an amendment to Selection Plan;
- Assisted with the RFP and bidding process for the CAT Plan Processor;
- Analyzed legal matters related to the DAG;

- Drafted the CAT NMS Plan, analyzed various items related to the CAT NMS Plan, and responded to comment letters on the CAT NMS Plan;

- Provided legal support for the formation of the legal entity, the governance of the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.*, Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding, and Other Products) and the DAG, and governance support during the transition to the new governance structure under the CAT NMS Plan;

- Drafted exemptive requests;
- Provided interpretations related to the CAT NMS Plan;

- Provided support with regard to discussions among the exchanges, FINRA and other third parties, such as Deloitte;

- Provided tax advice with regard to CAT’s status as a tax-exempt organization; and

- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

(viii) Consulting Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include consulting costs of \$10,589,273. The consulting services were performed by Deloitte. The selection considerations and fees for Deloitte were described in detail above. Prior to the creation of CAT LLC, for administrative purposes, Deloitte was engaged by FINRA to provide consulting services related to CAT, but the costs were shared by the consortium of SROs per agreement. Therefore, the consulting costs incurred with respect to Deloitte do not include consulting costs incurred by the individual Participants. The pre-formation consulting costs include the following:

- Established and implemented program operations for the CAT project, including the program management office and workstream design;
- Assisted with the Plan Processor selection process, including but not limited to, the development of the RFP and the bidder evaluation process, and facilitation and consolidation of the Participants’ independent reviews;
- Assisted with the development and drafting of the CAT NMS Plan, including conducting cost-benefit studies, reviewing technical requirements of other NMS plans, analyzing OATS and CAT requirements, and drafting appendices to the Plan;

¹⁵⁵ Securities Exchange Act Rel. No. 69060 (Mar. 7, 2013), 78 FR 15771, 15772 (Mar. 12, 2013) (“March 2013 Exemptive Order”).

¹⁵⁶ See March 2013 Exemptive Order; Securities Exchange Act Rel. No. 71018 (Dec. 6, 2013), 78 FR 75669 (Dec. 12, 2013) (“December 2013 Exemptive Order”).

¹⁵⁷ March 2013 Exemptive Order at 15772; December 2013 Exemptive Order at 75670.

¹⁵⁸ March 2013 Exemptive Order at 15772.

¹⁵⁹ *Id.* at 15773.

¹⁶⁰ See Securities Exchange Act Rel. No. 77724 (Apr. 27, 2016), 81 FR 30614 (May 17, 2016).

¹⁶¹ See CAT NMS Plan Approval Order.

- Provided governance support to the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (e.g., Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding, and Other Products) and the DAG;

- Provided support for updating the SEC on the progress of the development of the CAT;

- Provided support for industry outreach sessions, including with regard to program design and agenda development, program support and logistics and coordination; and
- Provided support in fact finding, drafting content and meeting coordination for WilmerHale with regard to the CAT and the development of the CAT NMS Plan.

Such Pre-Formation Costs did not include costs related to the Chair of the CAT NMS Plan Operating Committee, as the CAT NMS Plan had not yet been adopted.

(ix) Public Relations Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include public relations costs of \$57,174. The public relations services were performed by Peppercomm. The selection considerations and fees for Peppercomm are described in detail above. The costs related to Peppercomm were shared among the SROs. Therefore, the public relations costs do not include public relations costs incurred by the individual Participants. The pre-formation public relations costs include services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (e.g., congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT.

(B) Cloud Hosting Services

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs related to cloud hosting services as a part of Historical CAT Assessments. CAT LLC believes that the costs related to cloud hosting services described in detail above are reasonable and appropriate given the strict data processing timelines and storage requirements imposed by the Commission-approved CAT NMS Plan

and should be recoverable as a part of Historical CAT Assessment 1.

(i) Reasonableness of AWS Costs Given the Requirements of the CAT NMS Plan

CAT LLC believes that the costs for the cloud hosting services are reasonable, both in terms of the level of the fees paid by CAT LLC for cloud hosting services provided by AWS and the scope of the services performed by AWS for CAT LLC. CAT LLC believes that both the scope and amount of the costs for cloud hosting services are reasonable given the current requirements of the CAT NMS Plan adopted pursuant to Rule 613, including the strict data processing timeline, storage and other technical requirements under the Commission-approved CAT NMS Plan.

CAT LLC believes that the level of fees for the cloud hosting services is reasonable, taking into consideration a variety of factors, including the expected volume of data and the breadth of services provided and market rates for similar services.

CAT LLC also believes that the scope of services provided by AWS for the CAT are appropriate given the current requirements of the Commission-approved CAT NMS Plan. As described above, the cloud hosting services costs reflect a variety of factors including, among other things:

- *Breadth of Cloud Activities.* AWS was engaged by FCAT, the Plan Processor, to provide a broad range of services to the CAT, including data ingestion, data management, and analytic tools. Services provided by AWS necessary to the CAT include storage services, databases, compute services, and other services (such as networking, management tools and development operations (“DevOps”) tools). AWS also was engaged to provide the various environments for CAT, such as the development, performance testing, test and production environments, which are required by the CAT NMS Plan.

- *High Data Volume.* The cost for AWS services for the CAT is a function of the volume of CAT Data. While it is not linear, the greater the amount of CAT Data, the greater the cost of AWS services to the CAT. The data volume handled by AWS now far exceeds the original volume estimates for the CAT.

- *Plan Requirements.* The cost for AWS services also reflects the technical requirements necessary to meet the stringent performance and other requirements for processing CAT Data. These Plan-dictated processing timelines, storage, testing, security and

other technical requirements are significant drivers of AWS costs.

- *Cost Avoidance Efforts.* CAT LLC and FCAT have engaged in ongoing efforts to seek to avoid and minimize AWS costs where permissible under the Plan. Accordingly, these cost avoidance efforts have limited the extent of AWS costs.

In addition, various requirements of the CAT NMS Plan adopted pursuant to Rule 613 contribute to the significant cloud hosting services costs, and that various Plan requirements could be amended or removed without affecting the regulatory purpose of the CAT. Indeed, CAT LLC has repeatedly sought exemptive relief and filed amendments to the CAT NMS Plan, and has even filed suit against the Commission, to seek to revise or eliminate certain costly requirements related to the CAT. However, despite these efforts, absent the Commission granting exemptive relief or approving cost savings amendments to the CAT NMS Plan, CAT LLC, the Participants and Industry Members are all required to comply with such requirements.

(ii) Effect of CAT Design on CAT Costs

(a) Efficient CAT Design

CAT is reasonably designed to efficiently and effectively utilize cloud computing and storage services, given the requirements of the Commission-approved CAT NMS Plan, including requirements related to security, operational reliance and quality assurance, and maintainability.

The Plan Processor uses state-of-the-art software that meets the strict security standards of the CAT NMS Plan. CAT utilizes a big data processing framework that is extensively used by large data processing companies, such as Apple, Meta, Netflix, IBM and Google. As such, it has substantial commercial support and support in the open-source community. It is also well suited for use with regard to iterative types of algorithms and query functions and analytics that the CAT requires, and it provides the heightened security necessary for the CAT.

The development and implementation of the design of CAT is not and has not been static. CAT LLC and the Plan Processor are always evaluating new innovations and service offerings from AWS and other providers to seek to maximize efficiency and cost avoidance while still satisfying the requirements of the CAT NMS Plan. These efforts have led to substantial savings to date. The cloud hosting costs for 2023 were less than the cloud hosting costs for 2022 by \$8 million despite processing seven

trillion more events in 2023 due to the efficiency and cost avoidance efforts for cloud hosting services. For example, when AWS introduced new storage options, FCAT adopted the cost-efficient new storage option after establishing that the new offering would satisfy the security and other standards of the CAT NMS Plan. This change led to millions of dollars of savings in storage costs. Similarly, when AWS introduced a new compute processor, FCAT adopted this new compute processor, which led to millions of dollars in savings in compute costs. However, in other cases, new cloud technology developments could not be implemented in CAT because they would not satisfy the security or other requirements of the CAT NMS Plan.

When evaluating the design of the CAT, it must be kept in mind that the CAT is not a typical commercial technology project. The ability to make use of technology approaches that may lead to cost avoidance is also subject to the restrictive requirements of the CAT NMS Plan, such as processing timeframes, requirements for retention of data versions, query requirements, and security standards. Because such requirements are set forth in the CAT NMS Plan, any modification of such requirements are subject to the time-consuming process of amending the CAT NMS Plan or seeking an exemption from the relevant requirement. For example, CAT LLC recently has filed an amendment to address several of these expensive Plan requirements.¹⁶²

(b) CAT Was Designed To Minimize Industry Member Effort

The CAT System also was designed to minimize the extent to which Industry Members would need to alter their systems to report to CAT. During the design process, Industry Member groups argued that it would make more sense financially for the CAT to accommodate differences in industry systems, than for all Industry Members to change their systems. Moreover, such design choices would facilitate consistency, uniformity and accuracy in reporting. Requiring the CAT to make such accommodations may increase CAT costs while accommodating CAT Reporters.

Based on the requirements in the CAT NMS Plan and/or in response to industry requests for functionality to be embedded with the Plan Processor to

streamline or limit Industry Member system changes, the CAT has been designed to limit the effect on Industry Members. The following provides examples of such accommodations:

- *Industry Member Reporting.* In light of the complexity of Industry Member market activity, the CAT's order reporting and linkage scenarios document for Industry Members is over 800 pages in length, addressing nearly 200 scenarios.¹⁶³ The Industry Member Technical Specifications allow for dozens of specific event types, which drive complexity for the Plan Processor, but streamline reporting for Industry Members. Furthermore, the Plan Processor greatly expanded Industry Member linkage requirements to support, among other things, child events and supplemental events, allowing for "stateless as-you-go" and "batch end-of-day" reporting when all data is available. Accordingly, CAT takes on the significant cost and effort of providing the required linkages between CAT events; correspondingly, Industry Members are not required to perform this costly task.

- *File Submission Process.* The CAT was designed to accommodate the varying needs of CAT Reporters with regard to the file submission process. For example, in a 2018 letter, FIF stated that "[t]he SFTP-based submission process is cumbersome, exposes industry members to unnecessary complexity, and puts the burden of support on the CAT Reporter rather than imbedding more functionality into the Plan Processor."¹⁶⁴ Currently, FCAT provides two mechanisms for submitting files: SFTP via a private network, and the Web via Reporter Web Portal.

- *Error Corrections.* The industry also emphasized the need for the CAT to provide error correction tools and functionalities to identify, rectify and re-submit corrections within the required timeframe. For example, FIF stated in a 2018 letter the following:

To be clear, if OATS-like error correction tools are not made available on Day 1, hundreds of firms will be required to create and test their own tools or obtain vendor alternatives prior to the CAT Go-Live Date. Proprietary tools will require additional system builds, access to and ingestion of CAT data to perform system validation, and testing which will further stress the limited number of subject matter experts ("SMEs") dedicated to the

implementation of CAT reporting. Should this occur, inevitably firms (especially small firms who lack the necessary IT staff to write code and develop proprietary systems), may be put in the position of passing onto investors the cost required to build hundreds of redundant systems.¹⁶⁵

CAT provides various tools to help Industry Members identify and rectify errors.

- *Data Ingestion Format.* The industry also recommended that CAT adopt a flexible input format that provides an option for Industry Members to submit data in formats that are already in use to reduce costs and potential reporting errors. For example, FIF argued the following:

FIF CAT WG is not proposing a specific format; rather, we are proposing flexibility of input formats which includes support of existing formats (e.g., OATS, FIX) as well as a baseline specification where all fields are defined, and normalized. The input formats must be clearly and thoroughly defined in Technical Specifications, including FAQs.

Mandating a uniform format for reporting data to the CAT simplifies the task for the Central Repository of consolidating/storing data, but it puts the burden on each CAT Reporter to accurately translate their current (e.g., OATS) reporting information into a uniform CAT interface. However, that is likely to yield more errors because it is very dependent on accurate, complete and timely information (Technical Specifications, FAQs, meta-data, competent CAT help desk) available to CAT Reporters, availability of sophisticated CAT test tools to validate interface protocols, and the skill levels of the estimated 300+ unique CAT Reporters/Submitters during Phase 1 of CAT. Concentrating the responsibility of data conversions with the Central Repository is a reasonable trade-off that should yield fewer errors, and greater accuracy.¹⁶⁶

CAT provides such a flexible input format.

(c) Effect of Initial Plan Processor Design

The costs for cloud hosting services are appropriate and have not been adversely affected by the original design and approaches of the Initial Plan Processor. FCAT's design costs are the result of the requirements of the Commission-approved CAT NMS Plan.

¹⁶² See, e.g., Securities Exchange Act Rel. No. 99938 (Apr. 10, 2024), 89 FR 26983 (Apr. 16, 2024); Letter from Brandon Becker, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission (Mar. 27, 2024) (proposing amendments to the CAT NMS Plan for \$23 million in annual savings).

¹⁶³ See CAT Industry Member Reporting Scenarios v.4.10 (Oct. 21, 2022).

¹⁶⁴ Letter from Janet Early, FIF, to Thesys CAT (Mar. 29, 2018).

¹⁶⁵ Letter from Christopher Bok, FIF, to Jay Clayton, Chair, Commission, at 4 (Dec. 11, 2018).

¹⁶⁶ Letter from Mary Lou Von Kaenel, Managing Director, FIF, to Brent Fields, Secretary, Commission at 92 (July 18, 2016), <https://www.sec.gov/comments/4-698/4698-13.pdf>.

When FCAT took over as the Plan Processor from Thesys, it utilized certain aspects of the technical specifications created by Thesys in its design. However, FCAT has not maintained aspects of the original design that would not be appropriate for the CAT. FCAT revised and enhanced the original technical specifications of the CAT System to increase its efficiency and efficacy, and to ensure its compliance with the CAT NMS Plan. For example, the Initial Plan Processor's approach utilized many more fields than FCAT's approach, which relies on additional linkages. With the additional linkages, the CAT System takes on more of the CAT-related burdens than the Industry Members. Such an approach serves to facilitate consistency, uniformity and accuracy in reporting.

Moreover, FCAT did not utilize the system built by the Initial Plan Processor; it rebuilt the CAT System based on revised technical specifications. For example, the Initial Plan Processor used an on-premises processing approach which was not geared toward the huge amounts of data stored in the CAT, while FCAT adopted a cloud-based solution in response to such data demands.

Furthermore, given the very short timeframe to develop the CAT System and the prior optimization of certain query tools (e.g., Diver) for regulatory use with significant amounts of data, FCAT determined to rely upon certain existing FINRA tools and adapt them for use with the CAT.

(iii) Consideration of AWS Alternatives

CAT LLC continues to support the selection of AWS as the cloud hosting services provider for CAT given the compliance, operational, and security requirements of the CAT. Independent analyses confirm these conclusions, noting that "AWS is an excellent choice for either strategic or tactical use and recommends considering AWS for almost all cloud IaaS or IaaS+PaaS scenarios."¹⁶⁷ AWS provides the following benefits to CAT, among others:

- *Broad Suitability.* AWS has a long track record of successfully serving cloud customers with mission-critical projects.
- *Proven Scalability.* AWS has demonstrated that it is capable of building and delivering services on a large scale.
- *Track Record of Innovation.* AWS continues to rapidly innovate, both in

terms of new domains of capability and at a fundamental level, thereby facilitating innovation for its customers.

- *Resiliency/Dependability.* Another benefit of AWS is its resiliency; it has a strong track record of stable services. As noted in a review of cloud service providers, "[c]ustomers like to have a broad set of options for resilience and for their cloud providers to have a strong track record of stable services (continuously available, without operational quirks). Only AWS fulfills both desires."¹⁶⁸

- *Technical and Customer Support.* AWS consistently provides high-quality technical and customer support and engagement. Given the size, scope and regulatory importance of CAT, customer support and engagement that CAT has with the highest levels of AWS are very important to the success of the CAT.

- *Scale.* AWS is capable of supporting large-scale solutions, which is critical given the size and magnitude of the CAT.

- *Security.* AWS provides the security features necessary for the CAT.

In addition, the nature of the CAT, including the amount of data it must process and the size of its data footprint, does not allow for a multi-cloud solution as this would be cost prohibitive and greatly increase the security boundary and associated risk profile of the CAT. For example, a multi-cloud hosting option would increase costs, complexity, and risk for operations with regard to, for example, DevOps, production support, and networking. Similarly, with regard to security, a multi-cloud solution would increase risk, including with regard to the need for data transfers between cloud providers and the expansion of the security boundary. With regard to labor, a multi-cloud solution would lose economies of scale due to the need to support unique cloud requirements. Accordingly, the use of single-cloud solution continues to provide advantages with regard to cost, complexity, and risk. Indeed, "[t]he best practice is to focus on a single primary strategic provider."¹⁶⁹

Furthermore, if another cloud service provider were determined to be a better match for the CAT at some future date, switching cloud service providers would be a very significant, expensive and time-consuming effort. Such an effort would likely be a 10-to-15-year commitment at a substantial expense. Such a move would require the replication or redesign of the underlying cloud environments (e.g., organizational

setup, identify management, accounts, environments, DevOps tooling likes release management/config management/network management), as the new provider likely would not have the same infrastructure and software. Once that process has been completed, an exabyte of CAT data would need to be securely migrated to the new platform.

(C) Funding Model Filings

CAT LLC believes that the recovery of costs related to the development of the funding model is appropriate, and that the amount and scope of such costs, as described above, are reasonable.

Funding the CAT is a critical aspect of Rule 613 and the CAT NMS Plan. Article XI of the CAT NMS Plan describes in detail the requirements for funding the CAT, and the Participants are required to comply with and enforce compliance with the funding requirements of the CAT NMS Plan, just as with other aspects of the Plan. Accordingly, the development and implementation of a funding model for the CAT is as much a part of the requirements of the CAT NMS Plan as the development and operation of the CAT System. CAT LLC sees no reason to distinguish the efforts to develop a funding model from, for example, efforts to develop the CAT System, in seeking to recover reasonable CAT costs.

Moreover, in approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that "the reasonably budgeted CAT costs shall include . . . legal costs."¹⁷⁰ In addition, the CAT NMS Plan also requires Participants to include in their fee filings "a brief description of the amount and type of the Historical CAT Costs, including . . . legal . . . costs."¹⁷¹ In keeping with these provisions, this filing provides a brief description of reasonably budgeted legal costs above. These legal costs include costs related to the development of the CAT Funding Model.

In addition, the legal costs incurred for the assistance in developing the CAT Funding Model are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1. As described above, the specialized services were performed by experienced counsel at negotiated rates for such services that reflect both the

¹⁶⁷ See, e.g., Lydia Leong and Adrian Wong, Solution Comparison for Strategic Cloud Integrated IaaS and PaaS Providers (July 28, 2023) ("Strategic Cloud Assessment Article").

¹⁶⁸ Strategic Cloud Assessment Article.

¹⁶⁹ *Id.*

¹⁷⁰ Section 11.1(a)(i) of the CAT NMS Plan.

¹⁷¹ Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

extent of the services and market rates. Moreover, the scope of the legal costs associated with the development of the funding model reflect the complexity of the task in satisfying the detailed requirements of the CAT NMS Plan, the standards of the Exchange Act, and the many perspectives of the different market constituents potentially affected by or interested in the funding model, including Industry Members, Participants and investors. The many and varied comments by market participants on CAT funding over the years demonstrate the complexity of the task.

(D) Costs Related to Litigation With the SEC

CAT LLC believes that the recovery of legal costs related to the litigation with the SEC regarding the CAT NMS Plan is appropriate, and that the amount and scope of such costs, as described above, are reasonable.

As a preliminary matter, as discussed above, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments.¹⁷² Moreover, CAT LLC initiated such litigation, and incurred the related legal costs, because it was critical to address the Commission's interpretations of the CAT NMS Plan. Among other things, such interpretations threatened to impose unnecessary costs on the CAT, which would be borne by the Participants and Industry Members. Indeed, in response to the litigation, the Commission provided exemptive relief that allowed alternative, more cost-effective approaches to the implementation of the CAT. Specifically, in the 2023 exemptive order, the Commission stated:

The conditional exemptive relief in this Order allows for the implementation of alternative regulatory solutions that continue to advance the regulatory goals that Rule 613 and the CAT NMS Plan were intended to promote, while reducing the implementation and operational costs, burdens, and/or difficulties that would otherwise be incurred by the Participants and Industry Members that must fund the CAT.¹⁷³

CAT LLC believes it is reasonable and appropriate to incur costs to limit the need to incur even greater costs due to certain interpretations of the Plan.

In addition, the legal costs incurred during the litigation are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1. As described above, the

specialized services were performed by experienced counsel at market rates for such services. As such, the legal costs related to this litigation incurred during the period covered by Historical CAT Assessment 1 were reasonable.

Finally, Industry Members will directly benefit from the result of the litigation because it has addressed CAT NMS Plan requirements that would have imposed significantly greater costs on the CAT. Accordingly, it is reasonable and appropriate that the costs of such litigation be included in the Historical CAT Costs 1.

(E) Costs Related to the Initial Plan Processor

CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017, which was the date by which Participants were required to begin reporting to the CAT, due to the delay in the commencement of reporting to the CAT. As discussed above, the Participants determined to exclude all CAT costs incurred from November 15, 2017 through November 15, 2018, which includes \$37,852,083 in Thesys costs incurred from November 15, 2017 through November 15, 2018 (as well as other CAT costs during this period). The remaining Thesys costs incurred after November 15, 2018 are the \$19,628,791 in capitalized developed technology costs for the period from November 16, 2018 through February 2019 incurred in the development of the CAT by the Initial Plan Processor, as well as a transition fee for the transition from the Initial Plan Processor to the successor Plan Processor. The Participants would remain responsible for 100% of these \$19,628,791 in costs.

CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017. CAT LLC notes that the development and implementation of the CAT System, while unprecedented in scope and design, is like any other large and innovative technology project in that, inevitably, there were adjustments and refinements in the technical approach as the project developed, even with substantial planning efforts and oversight prior to the build. This is even more likely when the project faces a very tight implementation schedule, such as the one imposed by the Commission in Rule 613 and the CAT NMS Plan. However, an adjusted approach does not mean that the funds were not valid expenditures and should not be recovered.

The reasonableness of Thesys costs should be evaluated by the Commission as of the time they were incurred, not in hindsight. As detailed above, the Commission concluded in 2016 that "the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor," and that "the process set forth in the Selection Plan should be permitted to continue."¹⁷⁴ Following this process, the Participants notified the Commission of the selection of Thesys as the Initial Plan Processor on January 17, 2017.¹⁷⁵ At the time, neither the Commission nor the industry argued that the selection of the Initial Plan Processor was unreasonable or otherwise inconsistent with the CAT NMS Plan, nor did they predict the selection would result in unanticipated delays in the implementation of the CAT System. On the contrary, on April 4, 2017, the President of SIFMA wrote that "SIFMA looks forward to commencing work with the SROs and Thesys."¹⁷⁶

As noted in the CAT Funding Model Approval Order, "[i]n Rule 613, the Commission made the determination that the costs of the CAT should be shared by the Participants and Industry Members."¹⁷⁷ If the CAT Funding Model had existed on Day 1, the risk of any unanticipated costs or challenges associated with the Initial Plan Processor would have been fairly and reasonably shared among the Participants and Industry Members on an ongoing basis. Given that the Commission concluded in 2012 that the costs of the CAT would be shared by the Participants and Industry Members, it is not fair or reasonable to determine in hindsight that all of the risk involved in developing the CAT should be allocated entirely to the Participants.

(F) CAIS Implementation Costs

CAT LLC believes that the recovery of CAIS-related costs is appropriate, and that the amount and scope of such costs, as described above, are reasonable, and that the reasonableness of historical costs should be evaluated by the Commission as of the time they were incurred, not in hindsight.

¹⁷⁴ CAT NMS Plan Approval Order at 84737.

¹⁷⁵ Letter from the Participants to Brent J. Fields, Secretary, SEC (Jan. 18, 2017), <https://www.sec.gov/divisions/markreg/rule613-info-notice-of-plan-processor-selection.pdf>.

¹⁷⁶ Letter from Kenneth E. Bentsen, Jr., SIFMA, to Participants re: Selection of Thesys as CAT Processor (Apr. 4, 2017), <https://www.sifma.org/wp-content/uploads/2017/05/SIFMA-Submits-Comment-Letter-to-SRO-on-the-selection-of-Thesys-as-the-CAT-Processor.pdf>.

¹⁷⁷ CAT Funding Model Approval Order at 62650.

¹⁷² See Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁷³ Settlement Exemptive Order at 77129–30.

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable CAIS operating costs as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that “the reasonably budgeted CAT costs shall include . . . CAIS operating fees.”¹⁷⁸ In addition, the CAT NMS Plan also requires Participants to include in their fee filings “a brief description of the amount and type of the Historical CAT Costs, including . . . CAIS operating fees.”¹⁷⁹ In keeping with these provisions, this filing provides a brief description of reasonably budgeted CAIS operating fees.

In addition, CAT LLC determined that the CAIS operating fees described above are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1. The “CAIS Operating Costs” for Historical CAT Assessment 1 total \$9,480,587, with Pre-FAM costs of \$2,072,908, FAM 1 costs of \$254,998, FAM 2 costs of \$1,590,298, and FAM 3 costs of \$5,562,383. As described above, the CAIS operating fees were incurred with regard to two categories of CAIS-related efforts: (1) the acceleration of the reporting of LTIDs; and (2) the development of the CAIS Technical Specifications and the building of CAIS. These two categories of costs are discussed in more detail below.

(i) LTID Reporting

During the period covered by Historical CAT Assessment 1, the CAIS operating costs included costs related to the acceleration of the reporting of LTIDs earlier than originally contemplated during this period at the request of the SEC and in accordance with exemptive relief granted by the SEC.¹⁸⁰ As the SEC approved in this exemptive relief, the Participants proposed “to require the reporting of LTIDs to the CAT in Phases 2c and 2d, instead of with the rest of Customer Account Information in Phase 2e, which potentially could result in an earlier elimination of broker-dealer recordkeeping, reporting and monitoring requirements of the Large Trader Rule.”¹⁸¹ To implement the reporting of LTIDs to the CAT, the following steps were taken during the period covered by Historical CAT Assessment 1:

- After FCAT developed the LTID Technical Specifications, the LTID

Technical Specifications were published on January 31, 2020, with additional updates provided to the LTID Technical Specifications through April 2021.¹⁸²

- The LTID account information testing environment opened on August 24, 2020.
- The LTID account information reporting production environment opened on December 14, 2020.
- CAT Reporters were required to request their production readiness certification for account information related to LTIDs by the deadline of April 9, 2021.
- The LTID account information reporting for Phases 2a, 2b and 2c for Large Industry Members went live on April 26, 2021.
- The LTID account information reporting for Phases 2d for Large Industry Members went live on December 13, 2021.
- The LTID account information reporting for Phases 2a, 2b, 2c and 2d for Small Industry Members went live on April 26, 2021.

Throughout this project, FCAT and CAT LLC worked closely with the industry on LTID and CAIS reporting. Between December 2019 and December 2021, at least 57 checkpoint calls, webinars, and technical working group meetings with industry representatives were hosted to address issues and to educate CAT Reporters regarding LTID and CAIS reporting.¹⁸³

The LTID reporting project was successfully completed in a timely fashion, and the fees related to the project were reasonable. Accordingly, CAT LLC appropriately seeks to recover such costs via Historical CAT Assessment 1.

(ii) CAIS Reporting

During the period covered by Historical CAT Assessment 1, FCAT began the development of the full CAIS Technical Specifications and the building of CAIS. The CAIS Technical Specifications were developed during this period as follows:

- Iterative drafts of the CAIS Technical Specifications were published on June 30, 2020, December 1, 2020, and January 1, 2021.¹⁸⁴

¹⁸² The LTID Technical Specifications, including original drafts and updated versions, are available on the Industry Member Specifications page of the CAT website (<https://www.catnmsplan.com/specifications/im>).

¹⁸³ Such contact points with the industry are described in detail on the Events web page of the CAT website (<https://www.catnmsplan.com/events>).

¹⁸⁴ The CAIS Technical Specifications, including original drafts and updated versions, are available on the Industry Member Specifications page of the CAT website (<https://www.catnmsplan.com/specifications/im>).

- The full, final CAIS Technical Specifications were published on January 29, 2021.

- Updated versions of the CAIS Technical Specifications were published throughout 2021.¹⁸⁵

As discussed above, FCAT and CAT LLC frequently engaged with the industry regarding the development of CAIS, hosting regular checkpoint calls, webinars, and technical working group meetings with industry representatives to address any issues, including addressing the interplay between Industry Members’ existing customer systems and CAIS, and to educate CAT Reporters regarding LTID and CAIS reporting. Such engagement was critical to the CAIS development process as the CAIS project was unprecedented in terms of its content, scope and complexity.

During this period, FCAT also commenced the building of the CAIS system in accordance with the CAIS Technical Specifications during the period covered by Historical CAT Assessment 1. The CAIS system was ready for industry testing shortly after the end of this period in January 2022.

The CAIS Technical Specifications and the CAIS system, as developed during this period, continue to be in use today. Industry Members have been required to report, and have continuously reported, required data to CAIS on a daily basis since November 7, 2022, consistent with interim reporting obligations. The CAIS system accepts and validates the CAIS data submitted by Industry Members and provides Industry Members with initial feedback on data errors. In light of the unprecedented nature of the CAIS system, certain changes to the system, such as changes related to error corrections and the CAIS regulatory portal, were necessary to finalize CAIS reporting. FCAT worked to address these remaining issues,¹⁸⁶ and, as of May 31, 2024, FCAT indicated that it had achieved the final CAIS reporting milestone. Accordingly, CAT LLC appropriately seeks to recover CAIS operating costs via Historical CAT Assessment 1.

(G) Public Relations Costs

CAT LLC believes that the recovery of public relations costs is appropriate and that the amount and scope of such costs, as described above, are reasonable.

¹⁸⁵ Six updated versions of the CAIS Technical Specifications were published during 2021, in March, May, June, August, October and December.

¹⁸⁶ See, e.g., CAT Q4 2023 Quarterly Progress Report (Jan. 30, 2024) (<https://www.catnmsplan.com/sites/default/files/2024-01/CAT-Q4-2023-QPR.pdf>).

¹⁷⁸ Section 11.1(a)(i) of the CAT NMS Plan.

¹⁷⁹ Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁸⁰ See Phased Reporting Exemptive Relief Order at 23079–80.

¹⁸¹ *Id.* at 23078–79, n.70.

The Commission has long recognized that external public relations costs are reasonably associated with creating, implementing and maintaining the CAT. In the CAT NMS Plan Approval Order, the Commission estimated that the Participants had collectively spent approximately \$2,400,000 in preparation of the CAT NMS Plan on external public relations, legal, and consulting costs, and estimated that the Participants would continue to incur external public relations costs associated with maintaining the CAT upon approval of the CAT NMS Plan.¹⁸⁷

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for public relations services as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that “the reasonably budgeted CAT costs shall include . . . public relations costs.”¹⁸⁸ In addition, the CAT NMS Plan also requires Participants to include in their fee filings “a brief description of the amount and type of the Historical CAT Costs, including . . . public relations costs.”¹⁸⁹ In keeping with these provisions, a brief description of reasonable public relations costs are described above.

In addition, CAT LLC determined that the public relations costs described above are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1. The services performed by the public relations firms through 2021 were limited in scope to assist CAT LLC, which has no employees of its own, to be better positioned to understand and address CAT matters to the benefit of all market participants and to communicate on important CAT topics with the public. In addition, the costs for these services were appropriately limited. During the 10-year period covered by Historical CAT Assessment 1, the average cost per year for these services was approximately \$36,000.

(H) Legal Costs Related to the Limitation of Liability Provision in CAT Reporter Agreements

CAT LLC believes that the recovery of legal costs related to the limitation of liability provision, including costs related to the proceedings before the SEC and costs related to the proposed amendment to the Consolidated Audit Trail Reporter Agreement and the Consolidated Audit Trail Reporting

Agent Agreement (the “Reporting Agreements”) is appropriate and that the amount and scope of such costs as described above are reasonable.

As a preliminary matter, as discussed above, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments.¹⁹⁰ In addition, CAT LLC determined that the legal costs incurred for the assistance with regard to the limitation of liability provisions are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1.

Moreover, it is critical that CAT LLC, which has no employees of its own, have the ability to fund a legal defense in litigation and other legal proceedings against it. In response to CAT LLC requiring Industry Members to agree to the limitation of liability provision to submit data to the CAT, SIFMA filed an application for review of actions taken by CAT LLC and the Participants pursuant to Sections 19(d) and 19(f) of the Exchange Act. Contemporaneously with the filing of this proceeding, SIFMA moved for a stay of the requirement that Industry Members sign a Reporter Agreement, or in the alternative, asked the Commission to further delay the launch of CAT reporting on June 22, 2020. CAT LLC must have the resources to defend itself from litigious actions by others, like these.

Although a limitation of liability provision ultimately was not adopted as proposed, it was a reasonable provision to propose for the CAT Reporter Agreements, given that such provisions are in accordance with industry norms. Limitations of liability are ubiquitous within the securities industry and have long governed the economic relationships between self-regulatory organizations and the entities that they regulate. For example, U.S. securities exchanges have adopted rules to limit their liability for losses that Industry Members incur through their use of exchange facilities.¹⁹¹ Similarly, FINRA’s former order audit trail, OATS, which has functioned as an integrated audit trail of order, quote, and trade data for equity securities, required FINRA members to acknowledge an agreement that includes a limitation of liability provision.¹⁹² In addition, such a

provision was intended to ensure the financial stability of the CAT. Accordingly, it was reasonable for CAT LLC to propose the use of such a provision.¹⁹³

Furthermore, as described above, the specialized services were performed by experienced counsel at market rates for such services. Accordingly, the legal costs for the efforts related to the limitation of liability provision were reasonable.

(I) Costs for the Chair of CAT Operating Committee

CAT LLC believes that the recovery of consulting costs related to the Chair of the CAT Operating Committee is appropriate and that the amount and scope of such costs are reasonable.

As a preliminary matter, the selection of the Chair of the Operating Committee complies with the requirements of Section 4.2 of the CAT NMS Plan. The initial Chair that served during the period covered by Historical CAT Assessment was designated by a Participant as the Participant’s alternate voting member. Accordingly, the Chair is a representative of the Participants, as required by the CAT NMS Plan.

In addition, in approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for consulting as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that “the reasonably budgeted CAT costs shall include . . . consulting . . .” costs.¹⁹⁴ In addition, the CAT NMS Plan also requires Participants to include in their fee filings “a brief description of the amount and type of the Historical CAT Costs, including . . . consulting”¹⁹⁵ costs. In keeping with these provisions, a brief description of reasonable consulting costs is included in this filing, and such reasonable consulting costs include the costs related to the Chair position.

The Participants determined that the position of the Chair was a critical role for the implementation of the CAT, and an independent Chair would appropriately consider and address the views of each of the Participants. The Participants also determined that it was important to have a Chair with a strong

terms—including its limitation of liability provision—every time they access FINRA’s OATS system to report trade information (*i.e.*, repeatedly over the course of a trading day for many Industry Members).

¹⁹³ See Letter from Michael Simon, Chair, CAT Operating Committee, to Vanessa Countryman, Secretary, Commission (Dec. 18, 2020).

¹⁹⁴ Section 11.1(a)(i) of the CAT NMS Plan.

¹⁹⁵ Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁸⁷ CAT NMS Plan Approval Order at 84917–18.

¹⁸⁸ Section 11.1(a)(i) of the CAT NMS Plan.

¹⁸⁹ Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁹⁰ See Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

¹⁹¹ See, e.g., NASDAQ Equities Rule 4626.

¹⁹² FINRA Rule 1013(a)(1)(R) requires all applicants for FINRA Membership to acknowledge the FINRA Entitlement Program Agreement and Terms of Use, which applies to OATS. Industry Members click to indicate that they agree to its

background regarding issues related to the regulatory obligations of self-regulatory organizations, including their obligations under national market system plans. The compensation paid to the Chair is appropriate for a person with such background and skills. The average annual amount paid to the Chair from 2017 through the end of FAM 3 was \$292,733.30. Separate from the Chair, CAT LLC relies upon a Leadership Team of representatives of the SROs to oversee the day-to-day implementation of the CAT NMS Plan. CAT LLC does not compensate any member of the Leadership Team.

(11) Fee Implementation Assistance for Industry Members

(A) Reconciliation of CAT Invoices

(i) Reconciliation of CAT Invoices to Underlying Trades Provided by CAT

CAT LLC understands that there are three types of reconciliation processes related to the invoices:

- *Reconciliation of CAT Invoices to Underlying Trades:* Reconciling the CAT invoice amount to the underlying trades provided by CAT;
- *Matching Trades to Books and Records:* Providing the means to match the underlying trades provided by CAT with CAT invoices to other books and records independently maintained by individual CAT Reporters (e.g., exchange trade journals/acknowledgements) and data sources of self-regulatory organizations independent of CAT; and
- *Order Originator Identification:* Providing the ability to identify the order originator for the underlying trades provided by CAT with CAT invoices, which would facilitate firms' ability to pass through CAT Fees to their customers.

As discussed further below, CAT LLC only considers the first type of process to be a "reconciliation" and the only type of process that is required under the CAT NMS Plan. CAT LLC provides the means to reconcile the CAT invoice amount to the underlying trades provided by CAT.

The CAT NMS Plan does not require CAT LLC to facilitate the second type of process: matching underlying trades for a CAT invoice with a firm's internal books and records. CAT LLC has access only to the underlying trades provided by CAT; it does not have access to a firm's internal books and records. Although beyond the requirements of the CAT NMS Plan and involving firm specific considerations, CAT LLC voluntarily has provided guidance and processes to assist CAT Reporters in their efforts to match the underlying

trades with their own books and records.

The CAT NMS Plan also does not require CAT LLC to provide the ability to identify the order originator for the underlying trades for the CAT invoices. Accordingly, the billing guidance and processes do not provide CAT Reporters with the ability to identify the order originator for the underlying trades provided by CAT with CAT invoices. CAT LLC has been working closely with CAT Reporters to explain its billing approach and to address any outstanding billing questions. But, it should not be lost that CAT LLC provides information sufficient to allow CAT Reporters to reconcile CAT invoice amounts with the underlying trades provided by CAT LLC.

(ii) Match the Underlying Trades Provided by CAT With CAT Invoices to Firms' Internal Books and Records Independent of CAT

The CAT NMS Plan does not require CAT LLC to facilitate the matching of underlying trades for a CAT invoice with a firm's internal books and records, which may consist of trading data from various sources external to CAT. Although beyond the requirements of the CAT NMS Plan and involving firm specific considerations, CAT LLC voluntarily has provided guidance and processes to assist CAT Reporters in their efforts to match the underlying trades with their own books and records.

In this regard, it is important to recognize that CAT LLC has developed a billing approach that greatly improves upon existing billing practices for similar regulatory fees (e.g., fees related to Section 31). Accordingly, with the additional information voluntarily provided by CAT LLC, CAT Reporters generally will have sufficient information to match their underlying trades provided by CAT with their own internal books and records that are independent of CAT or to SRO data that is independent of CAT data. However, CAT LLC emphasizes that providing such additional information is not required by the CAT NMS Plan.

To facilitate the introduction of CAT fees, CAT LLC has worked with FCAT to develop an approach to CAT billing that is consistent with existing billing constructs used with regard to Section 31-related sales values fees, subject to certain enhancements. Under this billing approach, FCAT is providing additional linkage elements, not necessarily provided in the Section 31-sales value fee context, to facilitate CAT Reporters' ability to match the underlying trades provided by CAT

with their internal books and records and to reduce the complexity of that process. Specifically, FCAT is providing various key elements of the trade itself, such as the tradeID and branch sequence,¹⁹⁶ to CAT Reporters in the trade billing details provided with their CAT invoices ("Additional Trade Details"). As a result, CAT Reporters now have numerous alternative methods for matching a trade with their internal books and records where they previously did not have such matching methods in other fee contexts.

With the Additional Trade Details, CAT LLC and FCAT believe that the overwhelming majority of underlying trades provided by CAT bills can be matched with a CAT Reporter's internal books and records. CAT LLC recognizes that there may be certain cases in which such matching is more difficult given various firm-specific considerations, but believes that such instances are significantly more limited than with regard to the SRO fees charged in relation to Section 31.¹⁹⁷ By providing Additional Trade Details that are not available in other fee contexts, FCAT enhances the Industry Members' ability to match the underlying trades provided with CAT invoices with books and records and SRO data, both of which are independent of CAT data.

(iii) CAT LLC Is Not Required To Facilitate CAT Reporters' Ability To Pass Through Fees to Their Customers

Similar to other regulatory fees, the CAT NMS Plan does not address the manner or extent to which CAT Executing Brokers may seek to pass any CAT fees on to their customers, nor does it impose any obligation on CAT LLC or the Plan Processor to facilitate firms' ability to do so. Accordingly, Historical CAT Assessment 1 does not address the process by which any CAT Reporters may pass through the fee to their

¹⁹⁶ See CAT Technical Specifications for Billing Trade Details; Trade Details Schema (<https://catnmsplan.com/sites/default/files/2024-02/02.05.24-Billing-Trade-Details-Schema.json>); CAT Billing Scenarios, Version 1.0 (Nov. 30, 2023) (<https://www.catnmsplan.com/sites/default/files/2024-01/01.12.2024-CAT-Billing-Scenarios-v1.0.pdf>).

¹⁹⁷ For years, broker-dealers have faced similar reconciliation issues with regard to SRO fees related to Section 31. Broker-dealers have responded to this issue in the Section 31 context by exercising their discretion as to whether and the manner and extent to which they pass on those fees (e.g., by rounding up its fees to the nearest cent, or decide to charge for, or not charge for, certain transactions, or assess a specific fee or incorporate the costs into other fee programs). See, e.g., Securities Exchange Act Rel. No. 49928 (June 28, 2004), 69 FR 41060, 41072 (July 7, 2004) (noting that broker-dealers may "over-collect" Section 31-related fees charged to their clients due to rounding practices, and double-counting with regard to certain transactions).

customers. Likewise, the CAT billing approach provided by the Plan Processor is designed to address the needs of CAT Reporters with regard to the reconciliation of CAT invoices with the underlying trades provided by CAT LLC with the invoices; they are not designed to address issues related to any pass-through fees. Accordingly, facilitating CAT Reporters' ability to pass through fees to their clients is outside the scope of this fee filing. Nevertheless, as described below, CAT LLC and the Plan Processor have expended significant efforts to provide technical assistance to Industry Members regarding the implementation of Historical CAT Assessment 1, including providing Additional Trade Details that provide significant details about each underlying trade.

(a) Originating Brokers Versus Executing Brokers

In its approval of the CAT Funding Model, the Commission approved charging CAT fees to the CAT Executing Broker, rather than the originating broker. This fee filing must comply with the requirements of the CAT Funding Model, and, therefore, charges the Historical CAT Assessment 1 to CAT Executing Brokers.

Moreover, charging originating brokers would introduce significant complexity to the billing process from the CAT's perspective, and would increase the costs of implementing CAT fees. Charging the CAT Executing Broker is simple and straightforward, and leverages a one-to-one relationship between billable events (trades) and billable parties, similar to other transaction-based fees. In contrast, for a single trade event, there may be many originating brokers, and each trade must be broken down on a pro-rata basis, to account for one or more layers of aggregation, disaggregation, and representation of the underlying orders. While CAT is indeed designed to capture and unwind complex aggregation scenarios, the data and linkages are structured to facilitate regulatory use, and not a billing mechanism that assesses fees on a distinct set of executed trades; it is not simply a matter of using existing CAT linkages. Furthermore, charging originating brokers would implicate issues related to lifecycle linkage rates, and issues related to corrections, cancellations and allocations, while charging CAT Executing Brokers would avoid such issues.

(b) Identification of Order Originator for Underlying Trades

As noted, the CAT NMS Plan does not address the manner or extent to which CAT Executing Brokers may seek to pass any CAT Fees on to their customers, nor does it impose any obligation on CAT LLC or the Plan Processor to facilitate firms' ability to do so. Nevertheless, the Additional Trade Details provided with regard to the underlying trades on CAT invoices may assist with this process. Like with Section 31-related sales value fees, however, it is not always possible to trace every fee on a transaction back to the originating party. Industry Members have faced these issues under Section 31-related sales value fees for many years.¹⁹⁸ However, with the Additional Trade Details provided under the CAT billing approach, in many cases, CAT Reporters will be able to identify the order originator for the underlying trades provided by CAT with CAT invoices. In some cases, CAT LLC believes that certain issues related to certain types of market activity may implicate CAT Reporters' ability to identify the order originator for a limited set of underlying trades for the CAT invoices. Although CAT LLC does not believe that it is required to address these issues, CAT LLC and FCAT have been carefully researching and analyzing these types of issues as they are identified, and have been working voluntarily to assist CAT Reporters with these issues as necessary and when possible. In addition, CAT LLC intends to continue to provide CAT Reporters with billing guidance through FAQs, CAT Alerts and Helpdesk responses to address outstanding billing questions.

(B) Significant Technical Assistance

CAT LLC has worked with FCAT to provide significant technical assistance to Industry Members to allow the Industry Members to understand how Historical CAT Assessment 1 will be implemented and billed, including webinars, CAT alerts, mock invoices, and responses to questions posed to the FCAT Help Desk.

• *Technical Specifications and Scenarios.* CAT LLC has provided

¹⁹⁸ "FINRA charges a Regulatory Transaction Fee ("RTF") to industry members to reimburse FINRA for the Section 31 fees that FINRA pays to the Commission. FINRA does not currently provide industry members with the data that industry members require for proper reconciliation of RTF fees. This has been a major problem for the industry for many years." Letter from Howard Meyerson, Managing Director, FIF, to Robert Cook, Chief Executive Officer, FINRA at 2 (Dec. 15, 2023) (<https://fif.com/index.php/working-groups/category/271-comment-letters?download=2820:fif-letter-to-finra-on-pass-through-of-finra-cat-fees&view=category>).

detailed technical documentation for CAT billing, including (1) technical specifications, which describe the CAT Billing Trade Details Files associated with monthly CAT invoices, including detailed information about data elements and file formats as well as access instructions, network and transport options;¹⁹⁹ (2) trade details schemas;²⁰⁰ and (3) CAT billing scenarios.²⁰¹

• *Industry Webinars.* CAT LLC has hosted two industry webinars specifically dedicated to CAT billing. The first webinar, hosted on September 28, 2023, discussed the operational implementation of the CAT Reporter billing process.²⁰² The second webinar, hosted on November 7, 2023, provided (1) a demonstration of the CAT Reporter Portal and how to access CAT billing documents, including CAT invoices; and (2) additional information on underlying trade details in relation to the CAT Reporter billing process and an overview of the CAT Contact Management System.²⁰³ 485 participants and 394 participants attended the two webinars, respectively.

• *CAT Alert.* CAT LLC has published a detailed CAT Alert that describes how FCAT, as the Plan Processor acting on behalf of CAT LLC, will calculate applicable fees, issue invoices to and collect payment from CAT Executing Brokers.²⁰⁴

• *Frequently Asked Questions (FAQs).* CAT LLC also has continued to engage with the industry on billing issues by making responses to billing FAQs available on the CAT website. The FAQs address a broad range of frequently asked questions, including, for example, which Industry Members will receive invoices, how fees are calculated, when and how fees are required to be paid, how to access invoices, and how to update the billing contact. To date, responses to 27 FAQs are available on the CAT website, and

¹⁹⁹ CAT Technical Specifications for Billing Trade Details, Version 1.0 r1 (Dec. 8, 2023) (https://catnmsplan.com/sites/default/files/2023-12/12.07.2023-CAT-Technical-Specifications-for-Billing-Trade-Details-v1.0r1_CLEAN.pdf).

²⁰⁴ See CAT Alert 2023-02 (Oct. 12, 2023) (<https://www.catnmsplan.com/sites/default/files/2023-10/10.12.23-CAT-Alert-2023-02.pdf>).

CAT LLC will provide additional responses to FAQs as warranted.²⁰⁵

- *Mock Invoices.* To assist Industry Members with compliance with the commencement of Historical CAT Assessment 1, CAT LLC has been making available to CAT Executing Brokers mock invoices for Historical CAT Assessment 1 since December 2023 for billable activity occurring in November 2023. The mock invoices are in the same form as the actual, payable invoices, including both the relevant transaction data and the corresponding fee (as originally contemplated). However, no payments are required in response to such mock invoices; they are to be used solely to assist CAT Executing Brokers with the development of their processes for paying the CAT fees. Such data provides CAT Executing Brokers with a preview of the transaction data used in creating the invoices for Historical CAT Assessment 1 fees, as the data will be the same as data provided in actual invoices. Such data preview is intended to facilitate the payment of Historical CAT Assessment 1. For the November, December, and January billing periods, FCAT has generated trade detail files for 569 distinct firms that are CAT Executing Brokers. As such, CAT Reporters have actively engaged in the billing process via the mock invoices.

- *Help Desk Assistance.* CAT LLC also provides detailed, individualized assistance to Industry Members regarding CAT fees and the billing process through the FCAT Help Desk.²⁰⁶ For example, the Help Desk has assisted with 406 cases related to the billing of CAT fees from July 2023 through March 2024.

By providing such detailed and sustained assistance to Industry Members regarding CAT fees and billing, CAT LLC has successfully addressed questions raised by Industry Members regarding the CAT fees and billing processes.

(C) Ample Preparation Time

CAT LLC has provided Industry Members with ample time to comply with the implementation of Historical CAT Assessment 1. CAT LLC originally proposed issuing the first invoices for Historical CAT Assessment 1 in

December 2023 based on transactions in Eligible Securities in November 2023. In consideration of the feedback about the need for additional time to implement the new fee, CAT LLC pushed back this timeline by four months, proposing to issue the first Historical CAT Assessment 1 in April 2024 based on transactions in March 2024.²⁰⁷ This filing pushes this timeline back even further for implementing Historical CAT Assessment 1, proposing to issue the first invoices for Historical CAT Assessment 1 in November 2024 based on transactions in Eligible Securities in October 2024. Moreover, as discussed above, during these additional months, FCAT has been working closely with Industry Members to provide guidance regarding their mock bills and reconciliation efforts related thereto.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of the Exchange Act. The Exchange believes that the proposed rule change is consistent with Section 6(b)(5) of the Act,²⁰⁸ which requires, among other things, that the Exchange's rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and not designed to permit unfair discrimination between customers, issuers, brokers and dealers. The Exchange also believes that the proposed rule change is consistent with the provisions of Section 6(b)(4) of the Act,²⁰⁹ because it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers. The Exchange further believes that the proposed rule change is consistent with Section 15A(b)(9) of the Act,²¹⁰ which requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. These provisions also require that the Exchange be "so organized and [have] the capacity to be able to carry out the purposes" of the Act and "to comply, and . . . to enforce compliance by its members and persons associated with its members," with the

provisions of the Exchange Act.²¹¹ Accordingly, a reasonable reading of the Act indicates that it intended that regulatory funding be sufficient to permit an exchange to fulfill its statutory responsibility under the Act, and contemplated that such funding would be achieved through equitable assessments on the members, issuers, and other users of an exchange's facilities.

The Exchange believes that this proposal is consistent with the Act because it implements provisions of the Plan and is designed to assist the Exchange in meeting regulatory obligations pursuant to the Plan. In approving the Plan, the SEC noted that the Plan "is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act."²¹² To the extent that this proposal implements the Plan and applies specific requirements to Industry Members, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Act.

The Exchange believes that the proposed fees paid by the CEBBs and CEBs are reasonable, equitably allocated and not unfairly discriminatory. First, the Historical CAT Assessment 1 fees to be collected are directly associated with the costs of establishing and maintaining the CAT, where such costs include Plan Processor costs and costs related to technology, legal, consulting, insurance, professional and administration, and public relations costs. The Exchange has already incurred such development and implementation costs and the proposed Historical CAT Assessment 1 fees, therefore, would allow the Exchange to collect certain of such costs in a fair and reasonable manner from Industry Members, as contemplated by the CAT NMS Plan.

The proposed Historical CAT Assessment 1 fees would be charged to Industry Members in support of the maintenance of a consolidated audit trail for regulatory purposes. The proposed fees, therefore, are consistent with the Commission's view that regulatory fees be used for regulatory purposes and not to support the Exchange's business operations. The proposed fees would not cover Exchange services unrelated to the CAT.

²⁰⁵ See CAT Billing FAQs, Section V of CAT FAQs (https://www.catnmsplan.com/faq?search_api_fulltext=&field_topics=271&sort_by=field_faq_number).

²⁰⁶ The CAT NMS Plan requires that the Plan Processor "staff a CAT help desk, as described in Appendix D. CAT Help Desk, to provide technical expertise." Section 6.10(c)(vi) of the CAT NMS Plan. See also Section 10.3 of Appendix D of the CAT NMS Plan for a description of the Plan requirements for the CAT Help Desk.

²⁰⁷ Securities Exchange Act Rel. No. 34–99359 (January 17, 2024), 89 FR 10164 (February 13, 2024) ("SR-PHLX–2024–01").

²⁰⁸ 15 U.S.C. 78f(b)(6).

²⁰⁹ 15 U.S.C. 78f(b)(4).

²¹⁰ 15 U.S.C. 78o–3(b)(9).

²¹¹ See Section 6(b)(1) of the Exchange Act.

²¹² CAT NMS Plan Approval Order at 84697.

In addition, any surplus would be used as a reserve to offset future fees. Given the direct relationship between CAT fees and CAT costs, the Exchange believes that the proposed fees are reasonable, equitable and not unfairly discriminatory.

As further discussed below, the SEC approved the CAT Funding Model, finding it was reasonable and that it equitably allocates fees among Participants and Industry Members. The Exchange believes that the proposed fees adopted pursuant to the CAT Funding Model approved by the SEC are reasonable, equitably allocated and not unfairly discriminatory.

(1) Implementation of CAT Funding Model in CAT NMS Plan

Section 11.1(b) of the CAT NMS Plan states that “[t]he Participants shall file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves.” Per Section 11.1(b) of the CAT NMS Plan, the Exchange has filed this fee filing to implement the Industry Member CAT fees included in the CAT Funding Model. The Exchange believes that this proposal is consistent with the Exchange Act because it is consistent with, and implements, the CAT Funding Model in the CAT NMS Plan, and is designed to assist the Exchange and its Industry Members in meeting regulatory obligations pursuant to the CAT NMS Plan. In approving the CAT NMS Plan, the SEC noted that the Plan “is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.”²¹³ Similarly, in approving the CAT Funding Model, the SEC concluded that the CAT Funding Model met this standard.²¹⁴ As this proposal implements the Plan and the CAT Funding Model described therein, and applies specific requirements to Industry Members in compliance with the Plan, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Exchange Act.

(2) Calculation of Fee Rate for Historical CAT Assessment 1 Is Reasonable

The SEC has determined that the CAT Funding Model is reasonable and satisfies the requirements of the Exchange Act. Specifically, the SEC has

concluded that the method for determining Historical CAT Assessments as set forth in Section 11.3 of the CAT NMS Plan, including the formula for calculating the Historical Fee Rate, the identification of the parties responsible for payment and the transactions subject to the fee rate for the Historical CAT Assessment, is reasonable and satisfies the Exchange Act.²¹⁵ In each respect, as discussed above, Historical CAT Assessment 1 is calculated, and would be applied, in accordance with the requirements applicable to Historical CAT Assessments as set forth in the CAT NMS Plan. Furthermore, as discussed below, the Exchange believes that each of the figures for the variables in the SEC-approved formula for calculating the fee rate for Historical CAT Assessment 1 is reasonable and consistent with the Exchange Act. Calculation of the Historical Fee Rate for Historical CAT Assessment 1 requires the figures for the Historical CAT Costs 1, the executed equivalent share volume for the prior twelve months, the determination of Historical Recovery Period 1, and the projection of the executed equivalent share volume for Historical Recovery Period 1. Each of these variables is reasonable and satisfies the Exchange Act, as discussed throughout this filing.

(A) Historical CAT Costs 1

The formula for calculating a Historical Fee Rate requires the amount of Historical CAT Costs to be recovered. Specifically, Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan requires a fee filing to provide:

a brief description of the amount and type of the Historical CAT Costs, including (1) the technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees, and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration and (6) public relations costs.

In accordance with this requirement, the Exchange has set forth the amount and type of Historical CAT Costs 1 for each of these categories of costs above.

Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan also requires that the fee filing provide “sufficient detail to demonstrate that the Historical CAT Costs are reasonable and appropriate.” As discussed below, the Exchange believes that the amounts set forth in this filing for each of these cost categories is “reasonable and appropriate.” Each of the costs included in Historical CAT Costs 1 are reasonable

and appropriate because the costs are consistent with standard industry practice, based on the need to comply with the requirements of the CAT NMS Plan, incurred subject to negotiations performed on an arm’s length basis, and/or are consistent with the needs of any legal entity, particularly one with no employees.

(i) Technology: Cloud Hosting Services

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover costs related to cloud hosting services as a part of Historical CAT Assessments.²¹⁶ CAT LLC determined that the costs related to cloud hosting services described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. As described above, the cloud hosting services costs reflect, among other things, the breadth of the CAT cloud activities, data volume far in excess of the original volume estimates, the need for specialized cloud services given the volume and unique nature of the CAT, the processing time requirements of the Plan, and regular efforts to seek to minimize costs where permissible under the Plan. CAT LLC determined that use of cloud hosting services is necessary for implementation of the CAT, particularly given the substantial data volumes associated with the CAT, and that the fees for cloud hosting services negotiated by FCAT were reasonable, taking into consideration a variety of factors, including the expected volume of data and the breadth of services provided and market rates for similar services.²¹⁷ Indeed, the actual costs of the CAT are far in excess of the original estimated costs of the CAT due to various factors, including the higher volumes and greater complexity of the CAT than anticipated when Rule 613 was originally adopted.

To comply with the requirements of the Plan, the breadth of the cloud activities related to the CAT is substantial. The cloud services not only include the production environment for the CAT, but they also include two industry testing environments, support environments for quality assurance and stress testing and disaster recovery capabilities. Moreover, the cloud storage costs are driven by the requirements of the Plan, which requires the storage of multiple versions of the data, from the original submitted version of the data

²¹⁶ Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

²¹⁷ For a discussion of the amount and type of cloud hosting services fees, see Sections 3(a)(2)(B)(i)(a), 3(a)(2)(B)(ii)(a), 3(a)(2)(B)(iii)(a) and 3(a)(2)(B)(iv)(A) above.

²¹³ CAT NMS Plan Approval Order at 84696.

²¹⁴ CAT Funding Model Approval Order at 62686.

²¹⁵ *Id.* at 62662–63.

through various processing steps, to the final version of the data.

Data volume is a significant driver of costs for cloud hosting services. When the Commission adopted the CAT NMS Plan in 2016, it estimated that the CAT would need to receive 58 billion records per day²¹⁸ and that annual operating costs for the CAT would range from \$36.5 million to \$55 million.²¹⁹ Through 2021, the actual data volumes have been five times that original estimate. The data volumes for each period are set forth in detail above.²²⁰

In addition to the effect of the data volume on the cloud hosting costs, the processing timelines set forth in the Plan contribute to the cloud hosting costs. Although CAT LLC has proactively sought to manage cloud hosting costs while complying with the Plan, including through requests to the Commission for exemptive relief and an amendment to the CAT NMS Plan, stringent CAT NMS Plan requirements do not allow for any material flexibility in cloud architecture design choices, processing timelines (*e.g.*, the use of non-peak processing windows), or lower-cost storage tiers. As a result, the required CAT processing timelines contribute to the cloud hosting costs of the CAT.

The costs for cloud hosting services also reflect the need for specialized cloud hosting services given the data volume and unique processing needs of the CAT. The data volume as well as the data processing needs of the CAT necessitate the use of cloud hosting services. The equipment, power and services required for an on-premises data model, the alternative to cloud hosting services, would be cost prohibitive. Moreover, as CAT was being developed, there were limited cloud hosting providers that could satisfy all the necessary CAT requirements, including the operational and security criteria. Over time more providers offering cloud hosting services that would satisfy these criteria have entered the market. CAT LLC will continue to evaluate alternative cloud hosting services, recognizing that the time and cost to move to an alternative cloud provider would be substantial.

The reasonableness of the cloud hosting services costs is further supported by key cost discipline mechanisms for the CAT—a cost-based funding structure, cost transparency, cost management efforts (including regular efforts to lower compute and

storage costs where permitted by the Plan) and oversight. Together, these mechanisms help ensure the ongoing reasonableness of the CAT's costs and the level of fees assessed to support those costs.²²¹

(ii) Technology: Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to operating fees as a part of Historical CAT Assessments.²²² CAT LLC determined that the costs related to operating fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. The operating fees include the negotiated fees paid by CAT LLC to the Plan Processor to operate and maintain the system for order-related information and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.*, management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the selection of FCAT as the Plan Processor was reasonable and appropriate given its expertise with securities regulatory reporting, after a process of considering other potential candidates.²²³ CAT LLC also determined that the fixed price contract, negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, was reasonable and appropriate, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity.²²⁴ The services performed by FCAT for each period and the costs related to such services are described above.²²⁵

(iii) Technology: CAIS Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to CAIS operating fees as a part of Historical CAT Assessments.²²⁶ CAT LLC determined that the costs related to CAIS operating fees described in this filing are reasonable and should be included as a part of Historical CAT

Costs 1. The CAIS operating fees include the fees paid to the Plan Processor to operate and maintain CAIS and to perform the business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.*, management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the FCAT-negotiated fees for Kingland's CAIS-related services, negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity, were reasonable and appropriate.²²⁷ The services performed by Kingland for each period and the costs for each period are described above.²²⁸

(iv) Technology: Change Request Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to change request fees as a part of Historical CAT Assessments.²²⁹ CAT LLC determined that the costs related to change request fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. It is common practice to utilize a change request process to address evolving needs in technology projects. This is particularly true for a project like CAT that is the first of its kind, both in substance and in scale. The substance and costs of each of the change requests are evaluated by the Operating Committee, and approved in accordance with the requirements for Operating Committee meetings. In each case, CAT LLC determined that the change requests were necessary to implement the CAT. As described above, the change requests cover various technology changes, including, for example, changes related to CAT reporting, data feeds and exchange functionality. CAT LLC also determined that the costs for each change request were appropriate for the relevant technology change. A description of the change requests for each FAM Period and their total costs are set described above.²³⁰ As noted above, the total costs for change requests through FAM Period 3 represent a small percentage of

²²¹ See Securities Exchange Act Rel. No. 97151 (Mar. 15, 2023), 88 FR 17086, 17117 (Mar. 21, 2023) (describing key cost discipline mechanisms for the CAT).

Historical CAT Costs 1—that is, 0.25% of Historical CAT Costs 1.

(v) Capitalized Developed Technology Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to capitalized developed technology costs as a part of Historical CAT Assessments.²³¹ Capitalized developed technology costs include costs related to certain development costs, costs related to certain modifications, upgrades and other changes to the CAT, CAIS implementation fees and license fees. The amount and type of costs for each period are described in more detail above.²³² CAT LLC determined that these costs are reasonable and should be included as a part of Historical CAT Costs 1.

These costs involve the activity of both the Initial Plan Processor and FCAT, as the successor Plan Processor.²³³ With regard to the Initial Plan Processor, the Participants utilized an RFP to seek proposals to build and operate the CAT, receiving a number of proposals in response to the RFP. The Participants carefully reviewed and considered each of the proposals, including holding in-person meetings with each of the Bidders. After several rounds of review, the Participants selected the Initial Plan Processor in accordance with the CAT NMS Plan. CAT LLC entered into an agreement with the Initial Plan Processor in which CAT LLC would pay the Initial Plan Processor a negotiated, fixed price fee.²³⁴ In addition, as described above, CAT LLC determined that it is appropriate to enter into an agreement with FCAT as the successor Plan Processor.²³⁵

(vi) Legal

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to legal fees as a part of Historical CAT Assessments.²³⁶ CAT LLC determined that the legal costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Given the unique nature of the CAT, the number of parties involved with the CAT (including, for example, the SEC, Participants, Industry Members, and

vendors) and the many regulatory issues associated with the CAT, the scope of the necessary legal services are substantial. CAT LLC determined that the scope of the legal services is necessary to implement and maintain the CAT and that the legal rates reflect the specialized services necessary for such a project. When hiring each law firm for a CAT project, CAT LLC interviewed multiple firms, and determined to hire each firm based on a variety of factors, including the relevant expertise and fees. In each case, CAT LLC determined that the hourly fee rates were in line with market rates for the specialized legal expertise. In addition, CAT LLC determined that the total costs incurred for each CAT project were appropriate given the breadth of services provided. The services performed by each law firm for each period and the costs related to such services are described above.²³⁷

(vii) Consulting

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover consulting costs as a part of Historical CAT Assessments.²³⁸ CAT LLC determined that the consulting costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Because there are no CAT employees²³⁹ and because of the significant number of issues associated with the CAT, the consultants provided assistance in the management of various CAT matters and the processes related to such matters.²⁴⁰ CAT LLC considered a variety of factors in choosing a consulting firm and determined to select Deloitte after an interview process.²⁴¹ CAT LLC also determined that the consulting services were provided at reasonable market rates, as the fees were negotiated annually and comparable to the rates charged by other consulting firms for similar work.²⁴² Moreover, the total costs for such consulting services were appropriate in light of the breadth of services provided by Deloitte and the services performed by Deloitte and the

costs related to such services are described above.²⁴³

(viii) Insurance

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover insurance costs as a part of Historical CAT Assessments.²⁴⁴ CAT LLC determined that the insurance costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. CAT LLC determined that it is common practice to have directors' and officers' liability insurance, and errors and omissions liability insurance. CAT LLC further determined that it was important to have cyber security insurance given the nature of the CAT, and such a decision is consistent with the CAT NMS Plan, which states that the cyber incident response plan may include "[i]nsurance against security breaches."²⁴⁵ In selecting the insurance providers for these policies, CAT LLC engaged in an evaluation of alternative insurers, including a comparison of the pricing offered by the alternative insurers.²⁴⁶ Based on this analysis, CAT LLC determined that the selected insurance policies provided appropriate coverage at reasonable market rates.²⁴⁷

(ix) Professional and Administration

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover professional and administration costs as a part of Historical CAT Assessments.²⁴⁸ CAT LLC determined that the professional and administration costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Because there are no CAT employees, all required accounting, financial, tax, cash management and treasury functions for CAT LLC have been outsourced at market rates. In addition, the required annual financial statement audit of CAT LLC is included in professional and administration costs, which costs are also at market rates.

CAT LLC determined to hire a financial advisory firm, Anchin, to assist with financial matters for the CAT. CAT LLC interviewed Anchin as well as other potential financial advisory firms to assist with the CAT

²³¹ Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

²³⁷ See Sections 3(a)(2)(B)(i)(f), 3(a)(2)(B)(ii)(f), 3(a)(2)(B)(iii)(f) and 3(a)(2)(B)(iv)(f) above.

²³⁸ Section 11.3(b)(iii)(B)(II)(B)(3) of the CAT NMS Plan.

²³⁹ As stated in the filing of the proposed CAT NMS Plan, "[i]t is the intent of the Participants that the Company have no employees." Securities Exchange Act Rel. No. 77724 (Apr. 27, 2016), 81 FR 30614, 30621 (May 17, 2016).

²⁴⁰ CAT LLC uses certain third parties to perform tasks that may be performed by administrators for other NMS Plans. See, e.g., CTA Plan and CQ Plan.

²⁴¹ See Section 3(a)(2)(B)(i)(g) above.

²⁴² See Sections 3(a)(2)(B)(i)(g), 3(a)(2)(B)(ii)(g), 3(a)(2)(B)(iii)(g) and 3(a)(2)(B)(iv)(g) above.

²⁴³ *Id.*

²⁴⁴ Section 11.3(b)(iii)(B)(II)(B)(4) of the CAT NMS Plan.

²⁴⁵ Section 4.1.5 of Appendix D of the CAT NMS Plan.

²⁴⁶ See Sections 3(a)(2)(B)(i)(h), 3(a)(2)(B)(ii)(h), 3(a)(2)(B)(iii)(h) and 3(a)(2)(B)(iv)(h) above.

²⁴⁷ *Id.*

²⁴⁸ Section 11.3(b)(iii)(B)(II)(B)(5) of the CAT NMS Plan.

project, considering a variety of factors in its analysis, including the firm's relevant expertise and fees.²⁴⁹ The hourly fee rates for this firm were in line with market rates for the financial advisory services provided.²⁵⁰ Moreover, the total costs for such financial advisory services was appropriate in light of the breadth of services provided by Anchin. The services performed by Anchin and the costs related to such services are described above.²⁵¹

CAT LLC also determined to engage an independent accounting firm, Grant Thornton, to complete the audit of CAT LLC's financial statements, in accordance with the requirements of the CAT NMS Plan. CAT LLC interviewed this firm as well as another potential accounting firm to audit CAT LLC's financial statements, considering a variety of factors in its analysis, including the relevant expertise and fees of each of the firms. CAT LLC determined that Grant Thornton was well-qualified for the role given the balance of these considerations.²⁵² Grant Thornton's fixed fee rate compensation arrangement was reasonable and appropriate, and in line with the market rates charged for these types of accounting services.²⁵³ Moreover, the total costs for such financial advisory services was appropriate in light of the breadth of services provided by Grant Thornton. The services performed by Grant Thornton and the costs related to such services are described above.²⁵⁴

The professional and administrative costs also include costs related to the receipt of certain market data from Exegy. After performing an analysis of the available market data vendors to confirm that the data provided met the SIP Data requirements of the CAT NMS Plan and comparing the costs of the vendors providing the required SIP Data, CAT LLC determined to purchase market data from Exegy. Exegy provided the data elements required by the CAT NMS Plan, and the fees were reasonable and in line with market rates for the market data received.²⁵⁵

The professional and administrative costs also include costs related to a third party security assessment of the CAT performed by RSM. The assessment was designed to verify and validate the

effective design, implementation and operation of the controls specified by NIST Special Publication 800–53, Revision 4 and related standards and guidelines. Such a security assessment is in line with industry practice and important given the data included in the CAT. CAT LLC determined to engage RSM to perform the security assessment, after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fees were reasonable and in line with market rates for such an assessment.²⁵⁶

(x) Public Relations Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover public relations costs as a part of Historical CAT Assessments.²⁵⁷ CAT LLC determined that the public relations costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. CAT LLC determined that the types of public relations services utilized were beneficial to the CAT and market participants more generally. Public relations services were important for various reasons, including monitoring comments made by market participants about CAT and understanding issues related to the CAT discussed on the public record.²⁵⁸ By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT issues to the benefit of all market participants.²⁵⁹ Moreover, CAT LLC determined that the rates charged for such services were in line with market rates.²⁶⁰ As noted above, the total public relations costs through FAM Period 3 represent a small percentage of Historical CAT Costs 1—that is, 0.1% of Historical CAT Costs 1.

(B) Total Executed Equivalent Share Volume for the Prior 12 Months

The total executed equivalent share volume of transactions in Eligible Securities for the 12-month period from June 2023 through May 2024 was 3,980,753,840,905.21 executed equivalent shares. CAT LLC determined the total executed equivalent share volume for the prior twelve months by counting executed equivalent shares in the same manner as it will count executed equivalent shares for CAT billing purposes.

(C) Historical Recovery Period 1

CAT LLC has determined to establish a Historical Recovery Period of 24 months for Historical CAT Assessment 1 and that such length is reasonable. CAT LLC determined that the length of Historical Recovery Period 1 appropriately weighs the need for a reasonable Historical Fee Rate 1 that spreads the Historical CAT Costs over an appropriate amount of time and the need to repay the loans notes to the Participants in a timely fashion. CAT LLC determined that 24 months for Historical Recovery Period 1 would establish a fee rate that is lower than other transaction-based fees, including fees assessed pursuant to Section 31.²⁶¹ In addition, in establishing a Historical Recovery Period of 24 months, CAT LLC recognized that the total costs for Historical CAT Assessment 1 was less than the total costs for 2022 and 2023, and therefore it would be appropriate to recover those costs in two years.

(D) Projected Executed Equivalent Share Volume for Historical Recovery Period 1

CAT LLC has determined to calculate the projected total executed equivalent share volume for the 24 months of Historical Recovery Period 1 by doubling the executed equivalent share volume for the prior 12 months. CAT LLC determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has remained relatively constant in recent years. For example, the executed equivalent share volume for 2021 was 3,963,697,612,395, the executed equivalent share volume for 2022 was 4,039,821,841,560.31, and the executed equivalent share volume for 2023 was 3,868,940,345,680.6. Accordingly, the projected total executed equivalent share volume for Historical Recovery Period 1 is projected to be 7,961,507,681,810.42 executed equivalent shares.²⁶²

(E) Actual Fee Rate for Historical CAT Assessment 1

(i) Decimal Places

As noted in the Plan amendment for the CAT Funding Model, as a practical matter, the fee filing for a Historical CAT Assessment would provide the exact fee per executed equivalent share to be paid for each Historical CAT Assessment, by multiplying the

²⁴⁹ See Section 3(a)(2)(B)(i)(i) above.

²⁵⁰ See Sections 3(a)(2)(B)(i)(i), 3(a)(2)(B)(ii)(i), 3(a)(2)(B)(iii)(i) and 3(a)(2)(B)(iv)(i) above.

²⁵¹ *Id.*

²⁵² See Section 3(a)(2)(B)(i)(i) above.

²⁵³ See Sections 3(a)(2)(B)(i)(i), 3(a)(2)(B)(ii)(i), 3(a)(2)(B)(iii)(i) and 3(a)(2)(B)(iv)(i) above.

²⁵⁴ *Id.*

²⁵⁵ See Section 3(a)(2)(B)(i)(i) above.

²⁵⁶ *Id.*

²⁵⁷ Section 11.3(b)(iii)(B)(III)(B)(6) of the CAT NMS Plan.

²⁵⁸ See Section 3(a)(2)(B)(i)(j) above.

²⁵⁹ See Sections 3(a)(2)(B)(i)(j), 3(a)(2)(B)(ii)(j), 3(a)(2)(B)(iii)(j) and 3(a)(2)(B)(iv)(j) above.

²⁶⁰ *Id.*

²⁶¹ As the SEC noted in the CAT Funding Model Approval Order, recent Section 31 fees ranged from \$0.00009 per share to \$0.0004 per share. CAT Funding Model Approval Order at 62682.

²⁶² This projection was calculated by multiplying 3,980,753,840,905.21 executed equivalent shares by two.

Historical Fee Rate by one-third and describing the relevant number of decimal places for the fee rate.²⁶³ Accordingly, proposed paragraph (a)(1)(B) of the fee schedule would set forth a fee rate of \$0.000013 per executed equivalent share. This fee rate is calculated by multiplying Historical Fee Rate 1 by one-third, and rounding the result to 6 decimal places. CAT LLC determined that the use of six decimal places is reasonable as it balances the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.

(ii) Reasonable Fee Level

The Exchange believes that imposing Historical CAT Assessment 1 with a fee rate of \$0.000013 per executed equivalent share is reasonable because it provides for a revenue stream for the Company that is aligned with Historical CAT Costs 1 and such costs would be spread out over an appropriate recovery period, as discussed above. Moreover, the Exchange believes that the level of the fee rate is reasonable, as it is comparable to other transaction-based fees. Indeed, Historical CAT Assessment 1 is significantly lower than fees assessed pursuant to Section 31 (e.g., \$0.0009 per share to 0.0004 per share),²⁶⁴ and, as a result, the magnitude of Historical CAT Assessment 1 is small, and therefore will mitigate any potential adverse economic effects or inefficiencies.²⁶⁵ Furthermore, the reasonable fee rate for Historical CAT Assessment 1 further supports CAT LLC's decision to seek to recover all Historical CAT Costs prior to 2022, rather than establishing separate Historical CAT Assessments for pre-FAM, FAM 1, FAM 2 and FAM 3 costs.

(3) Historical CAT Assessment 1 Provides for an Equitable Allocation of Fees

Historical CAT Assessment 1 provides for an equitable allocation of fees, as it equitably allocates CAT costs between and among the Participants and Industry Members. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfied the requirements of the Exchange Act, including the formula for calculating Historical CAT Assessments as well as the Industry Members to be charged the Historical CAT Assessments.²⁶⁶ In approving the CAT

Funding Model, the SEC stated that “[t]he Participants have sufficiently demonstrated that the proposed allocation of fees is reasonable.”²⁶⁷ Accordingly, the CAT Funding Model sets forth the requirements for allocating fees related to Historical CAT Costs among Participants and Industry Members, and the fee filings for Historical CAT Assessments must comply with those requirements.

Historical CAT Assessment 1 provides for an equitable allocation of fees as it complies with the requirements regarding the calculation of Historical CAT Assessments as set forth in the CAT NMS Plan. For example, as described above, the calculation of Historical CAT Assessment 1 complies with the formula set forth in Section 11.3(b) of the CAT NMS Plan. In addition, Historical CAT Assessment 1 would be charged to CEBBs and CEBs in accordance with Section 11.3(b) of the CAT NMS Plan. Furthermore, the Participants would continue to remain responsible for their designated share of Past CAT Costs through the cancellation of loans made by the Participants to CAT LLC.

In addition, as discussed above, each of the inputs into the calculation of Historical CAT Assessment 1—Historical CAT Costs 1 (including Excluded Costs), the count for the executed equivalent share volume for the prior 12 months, the length of the Historical Recovery Period, and the projected executed equivalent share volume for the Historical Recovery Period—are reasonable. Moreover, these inputs lead to a reasonable fee rate for Historical CAT Assessment 1 that is lower than other fee rates for transaction-based fees. A reasonable fee rate allocated in accordance with the requirements of the CAT Funding Model provides for an equitable allocation of fees.

(4) Historical CAT Assessment 1 Is Not Unfairly Discriminatory

Historical CAT Assessment 1 is not an unfairly discriminatory fee. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfied the requirements of the Exchange Act. In reaching this conclusion, the SEC analyzed the potential effect of Historical CAT Assessments calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members,

such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. Historical CAT Assessment 1 complies with the requirements regarding the calculation of Historical CAT Assessments as set forth in the CAT NMS Plan. In addition, as discussed above, each of the inputs into the calculation of Historical CAT Assessment 1 and the resulting fee rate for Historical CAT Assessment 1 is reasonable. Therefore, Historical CAT Assessment 1 does not impose an unfairly discriminatory fee on Industry Members.

Finally, the Exchange believes the proposed fees established pursuant to the CAT Funding Model promote just and equitable principles of trade, and, in general, protect investors and the public interest, and are provided in a transparent manner and specificity in the fee schedule. The Exchange also believes that the proposed fees are reasonable because they would provide ease of calculation, ease of billing and other administrative functions, and predictability of a fee based on fixed rate per executed equivalent share. Such factors are crucial to estimating a reliable revenue stream for CAT LLC and for permitting Exchange members to reasonably predict their payment obligations for budgeting purposes.

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 6(b)(8) of the Act²⁶⁸ requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that Historical CAT Assessment 1 implements provisions of the CAT NMS Plan that were approved by the Commission and is designed to assist the Exchange in meeting its regulatory obligations pursuant to the Plan.

In addition, all Participants (including exchanges and FINRA) are proposing to introduce Historical CAT Assessment 1 on behalf of CAT LLC to implement the requirements of the CAT NMS Plan. Therefore, this is not a competitive fee filing, and, therefore, it does not raise competition issues between and among the Participants.

Furthermore, in approving the CAT Funding Model, the SEC analyzed the

²⁶³ CAT Funding Model Approval Order at 62658, n.658.

²⁶⁴ CAT Funding Model Approval Order at 62663, 62682.

²⁶⁵ *Id.*

²⁶⁶ See Section 11.3(b) of the CAT NMS Plan.

²⁶⁷ CAT Funding Model Approval Order at 62629.

²⁶⁸ 15 U.S.C. 78f(b)(8).

potential competitive impact of the CAT Funding Model, including competitive issues related to market services, trading services and regulatory services, efficiency concerns, and capital formation.²⁶⁹ The SEC also analyzed the potential effect of CAT fees calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members, such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. Based on this analysis, the SEC approved the CAT Funding Model as compliant with the Exchange Act. Historical CAT Assessment 1 is calculated and implemented in accordance with the CAT Funding Model as approved by the SEC.

As discussed above, each of the inputs into the calculation of Historical CAT Assessment 1 is reasonable and the resulting fee rate for Historical CAT Assessment 1 calculated in accordance with the CAT Funding Model is reasonable. Therefore, Historical CAT Assessment 1 would not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Exchange Act²⁷⁰ and Rule 19b-4(f)(2) thereunder,²⁷¹ because it establishes or changes a due, or fee.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend the rule change if it appears to the Commission that the action is necessary or appropriate in the public interest, for the protection of investors, or would otherwise further the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-PHLX-2024-43 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-PHLX-2024-43. This file

number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-PHLX-2024-43 and should be submitted on or before October 4, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁷²

Sherry R. Haywood,

Assistant Secretary.
