Vol. 89 Monday,

No. 222 November 18, 2024

Pages 90547–91246

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 89 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

7 CFR Parts 271 and 273

[FNS–2016–0037]

RIN 0584–AE33

Supplemental Nutrition Assistance Program (SNAP): Employment and Training Program Monitoring, Oversight and Reporting Measures

AGENCY: Food and Nutrition Service (FNS), USDA.

ACTION: Final rule.

SUMMARY: The final rule implements the employment and training (E&T) provisions of the Agricultural Act of 2014. This section provided the Department additional oversight authority of State agencies' administration of the Supplemental Nutrition Assistance Program (SNAP) E&T program; required the Department to develop reporting measures and required State agencies to report outcome data to the Department. It also required the Department to monitor and assess State agencies' effectiveness of E&T programs and provided the Department with the authority to require State agencies to make improvements to their programs as necessary. Finally, State agencies are required to submit reports on the impact of certain E&T components, and in certain States, the E&T services provided to able-bodied adults without dependents (ABAWDs). The final rule will strengthen the E&T program through the collection of information to determine the overall effectiveness of the E&T program in reaching the goal of assisting participants in obtaining the skills necessary to obtain and retain employment.

DATES:

Effective date: This rule will become effective January 17, 2025.

Implementation date: State agencies must implement all provisions of this rule no later than October 1, 2025.

FOR FURTHER INFORMATION CONTACT: Marcie Foster, Food and Nutrition Service, U.S. Department of Agriculture, 1320 Braddock Place, 5th Floor, Alexandria, VA 22314, *Marcie.Foster@usda.gov.* Phone: (703) 305–2930.

Section (when referring to Federal Regulations)	§
Supplemental Nutrition Assistance Program	SNAP
U.S. Department of Agriculture	The Department
U.S. Department of Labor	DOL
Workforce Innovation and Opportunity Act	WIOA

Summary Overview

The final rule implements the E&T provisions of section 4022(a)(2) of the Agricultural Act of 2014 (Pub. L. 113–79). The Department published an interim final rule (IFR) on March 24, 2016 (81 FR 15613), that became effective May 23, 2016, and received 43 comments, 36 of which were substantive.

After the release of the IFR the Department conducted various activities to provide guidance to State agencies on the implementation of the reporting measures. These activities included release of an implementation memo, two-part series of questions and answers and a webinar.[1]

The final rule incorporates changes from the interim final rule that includes specifying the information the Department will use in assessing the effectiveness of State's E&T programs; adding educational reporting measures for attainment of a credential or certificate and measurable skill gains; reporting of employment and earnings measures and educational measures by distinct participant characteristics, such as by race and/or ethnicity; and adding reporting measures for States operating mandatory E&T programs. The final rule also changes the due date of the State agency's submission of the E&T Annual Report from January 1 to April 15.

The final rule establishes information sources that the Food and Nutrition Service (FNS) will use for assessing the effectiveness of E&T programs in preparing E&T participants for employment, including skill attainment and employment retention. The rule specifies the authority of FNS to require a State agency to modify its SNAP E&T State Plan to improve outcomes if determined through an assessment that the E&T outcomes are inadequate.

[1] Interim rule: SNAP Employment and Training Program Monitoring, Oversight and Reporting Measures (*https://www.fns.usda.gov/snap/fr-032416*).

The final rule requires State agencies to identify an outcome reporting measure for every component that is designed to serve at least 100 participants a year in annual E&T State Plan.

The final rule also requires State agencies to submit an E&T Annual Report by April 15 each year that contains the following:

- Employment and earnings reporting measures that consist of four consecutive quarters of data from the two previous Federal Fiscal Years (FFY);
- Educational reporting measures that consist of data from the FFY ending the preceding September 30th;
- Employment and earnings reporting measures and educational reporting measures for each of the seven (7) participant characteristics;
- States that serve mandatory E&T participants will report on the number of SNAP participants required to participate in E&T and referred to E&T and the number and percentage of SNAP participants that were deemed ineligible for SNAP benefits due to failure to comply with E&T requirements;
- Number and percentage of E&T participants for the FFY ending the preceding September 30th by nine (9) participant characteristics;
- Component measures identified in the States' E&T State Plan for components that are designed to serve at least 100 participants a year; and
- States that have committed to offering at-risk ABAWDs, defined as an able-bodied adult without dependents who are at risk of losing SNAP eligibility due to time-limited participation, a slot in a qualifying activity and received an additional allocation of funds will report on:
  - The monthly average number of individuals in the State who meet the conditions of an at-risk ABAWD:
  - The number of individuals the State offers a position in a work program or workfare program;
  - The monthly average number of individuals who participate in such programs; and
  - A description of the types of employment and training programs the State agency offered to at-risk ABAWDs and the availability of those programs throughout the State.

The final rule specifies that State agencies may be required to submit the E&T Annual Report in a standardized format specified by FNS.

The final rule will also reinstate regulatory language in 7 CFR 273.24(a) for the definition of a workfare program for the purposes of meeting the ABAWD work requirement. This definition was inadvertently removed during a prior rulemaking.

The Department would note that this final rule does not address any changes to ABAWD work requirements as a result of the Fiscal Responsibility Act of 2023 (Pub. L. 118–5). Those changes will be addressed through separate rulemaking.

The Department discusses the changes from the interim final rule, as well as a summary of comments and explanation of each of the final regulatory changes in more detail below.

Summary of Changes From Interim Final Rule

- The interim final rule codified the authority of FNS to require a State agency to modify its E&T State Plan to improve outcomes. The final rule includes language that specifies the information sources that FNS will utilize in assessing the effectiveness of a State's E&T program.
- The interim final rule specified a January 1 due date for State agencies' submission of the E&T Annual Report. The final rule changes that due date to April 15.
- The interim final rule established a reporting measure for the completion of an educational, training, work experience or on-the-job training component. The final rule removes and replaces this measure with two educational measures aligned with Workforce Innovation and Opportunity Act (Pub. L. 113–128) (WIOA) programs, for attainment of a credential or certificate, and measurable skill gains.
- The interim final rule required State agencies to disaggregate each of the reporting measures by four (4) key participant characteristics, *e.g.,* of the 100 E&T participants in unsubsidized employment in the second quarter after completion of participation in E&T, 90 had the characteristic of a mandatory E&T participant. The final rule modifies this disaggregation by requiring the reporting of the employment, earnings, and educational measures for each of the key participant characteristics, *e.g.,* of the 90 mandatory E&T participants who completed participation in E&T, 60 mandatory E&T participants are in unsubsidized employment in the second quarter after completion of participation in E&T. The final rule also introduces three (3) additional key participant characteristics, race and/or ethnicity and mandatory E&T participants deemed ineligible due to failure to comply with mandatory E&T.
- The interim final rule required State agencies to report the number and percentage of all E&T participants that participated during the reporting fiscal year by seven (7)participant characteristics, such as gender, age, etc. The final rule is modifying this requirement by adding race and/or ethnicity to the participant characteristics.

Summary of Comments and Explanation of Revisions

FNS received thirty-six (36) relevant and non-duplicative comments. Thirty comments came from advocacy organizations and six comments from State SNAP agencies or State Workforce agencies. Generally, the comments were supportive of the interim final rule and believed that the reporting measures would greatly improve employment and training efforts in States. However, many of the supporters made recommendations for improvement or sought clarification of specific provisions.

General Comments

Many commenters raised general or cross-cutting issues about the overall impact of the interim final rule. We address these issues in this section, followed by comments on each section of the interim final rule.

A. Additional Reporting Requirements

Twenty-seven (27) commenters, while supportive of the interim final rule, believed that additional reporting requirements should be added to adequately evaluate the effectiveness of and need for change to States' E&T programs, specifically for States that serve mandatory E&T participants. Commenters urged that additional reporting measures be added to capture the following:

- The number and percentage of individuals required to participate in E&T;
- The number and percentage who were exempted from participation in E&T;
- The number and percentage who were sanctioned before participating in E&T; and
- The number and percentage of those who were sanctioned after beginning participation in E&T.

Some commenters further suggested that States should be required to report on the sanctioned individuals' employment information and the number and percentage of individuals exempted from participation by exemption reason, noting exemptions as an important outcome in shaping an effective E&T program and remedying ineffective practices. In addition, one commenter proposed that States should report on the employment rates in the

second and fourth quarters after SNAP recipients are mandated to participate and suggested that States should be required to report on the number of mandatory E&T participants who receive a SNAP E&T assessment, as well as the number of those mandated to participate who are later found to be exempt. Three of the commenters urged that the final rule require States to report on the number of individuals who are assigned to SNAP E&T; the activity component to which they are assigned; and the number and percentage of individuals assigned to an activity who are sanctioned by the type of activity.

The Department appreciates the comments and agrees that to assess the effectiveness of a State's E&T program, particularly those that serve mandatory E&T participants, sanction data for those that fail to comply with E&T requirements is an important factor. For this reason, the Department added additional reporting requirements for States that serve mandatory E&T participants in the E&T Program Activity Report (FNS–583) (OMB Control No. 0584–0064; expiration date: 06/30/2027) through the final rule, *Employment and Training Opportunities in the Supplemental Nutrition Assistance Program,* published January 5, 2021 (''2021 final rule'', 86 FR 358). As required in the 2021 final rule, the Department will collect via the FNS–583 report the number of SNAP applicants and participants required to participate in E&T by the State agency and, of those applicants and participants, the number who began participation in an E&T program, the number who began participating in an E&T component, and the number of mandatory E&T participants who were deemed ineligible for failure to comply with E&T requirements. This FNS–583 data is capturing every time an individual is subject to mandatory participation in E&T and the resulting actions. This results in a duplicated count if an individual has multiple certification periods and is subject to mandatory participation in E&T at each of those certification periods in a reporting fiscal year. The FNS–583 report also collects individual participation data and component participation.

To complement and enhance the FNS–583 data, in this final rule, the Department is modifying the regulation at 7 CFR 273.7(c)(17)(iv) by adding to the E&T Annual Report for States that serve mandatory E&T participants the reporting of the unduplicated number of SNAP participants who were required to participate in E&T, the unduplicated number of those individuals who were referred to E&T and the unduplicated number and percentages of SNAP participants who were deemed ineligible for failure to comply with E&T requirements. The Department is adding these reporting elements to analyze the churn [2] of SNAP E&T participants as well as the difference in the number of individuals required to participate and referred to E&T. This change is responsive to the comments received through the IFR. The Department believes the data from the FNS–583 report and the E&T Annual Report, as well as information collected through management evaluations, will provide FNS and State agencies information to assess the effectiveness of a mandatory E&T program.

However, the Department does not believe that the other suggested reporting requirements, such as sanctioned individuals' employment information or the employment rates in the second or fourth quarters after being sanctioned, are necessary due to other changes being included for mandatory E&T programs, *e.g.* employment and earnings measures for participants deemed ineligible due to failure to comply with E&T, and believes that the additional burden these measures would place on State agencies outweighs their benefit in the overall determination of effectiveness of E&T programs. The Department is not addressing these suggested additional reporting requirements in this final rule.

B. Definitions

Eleven commenters stated that the interim final rule failed to define ''completion of participation in E&T'', with nine of the commenters noting that the final rule should clarify that completion of participation in E&T has the same meaning as ''exit'' used in WIOA programs. One commenter asked if, for States that serve mandatory E&T participants, completion of participation in E&T correlates with becoming exempt from work registration for reasons others than employment. One commenter asked if completion of participation in E&T includes a person who (1) participates but leaves an assignment before meeting all obligations of the assignment while remaining a SNAP participant; (2) leaves a component after becoming ineligible for SNAP; or (3) finds unsubsidized employment during component participation.

The Department appreciates the comments and agrees that for clarity and consistency the term ''completion of participation in E&T'' should be defined in the regulations. For the purposes of capturing the reporting measures of employment and earnings, completion of participation in E&T is defined as an E&T participant who has not received any E&T services for at least 90 days with no plans for future services, as discussed in the SNAP E&T Program Monitoring, Oversight and Reporting Measures Questions and Answer, Part II, released May 15, 2017. This timeframe and definition align with the definition of ''exit'' in WIOA programs as provided in Training and Employment Guidance Letter No.10–16, Change 3.[3] The Department clarifies that for States serving mandatory E&T participants, completion of participation in E&T does not in any way relate to participants becoming exempt from work registration for reasons other than employment, unless an E&T participant stops participating in E&T as a direct result of the exemption status. Thus, completion of participation in E&T could include participants who leave an assignment before meeting all the obligations of the assignment while remaining a SNAP recipient, or participants who leave a component when becoming ineligible for SNAP or for participants who find unsubsidized employment during component participation, if those individuals do not receive any E&T services for at least 90 days. Under 7 CFR 271.2 the Department is codifying the definition of ''completion of participation in E&T'' to mean that an E&T participant has not received any E&T services for at least 90 days and no future services are planned.

Twenty-five commenters noted that the Department defines an ''E&T participant,'' for the purposes of reporting, as an individual who is placed in and begins an E&T component. The commenters stated that this definition fails to adequately capture many individuals in SNAP who are required to participate in E&T activities and that the regulation as written would not capture the outcomes of SNAP participants who are required to participate in E&T but are disqualified before they begin an E&T component.

The Department appreciates the comments and agrees that the definition of an ''E&T participant,'' for the

[2] Churn in SNAP is defined as when a household exits SNAP and then re-enters the program within 4 months. (Understanding the Rates, Causes, and Costs in Churning in the SNAP Program, November 2014).

[3] Training and Employment Guidance Letter No.10–16, Change 3 issued September June 11, 2024 (*https://www.dol.gov/sites/dolgov/files/ETA/advisories/TEGL/2023/TEGL%2010-16%20Change%203/TEGL%2010-16%2C%20Change%203.pdf.*

purposes of reporting, discussed in the interim final rule would exclude those individuals who were deemed ineligible for SNAP before they were placed in an E&T component. The interim final rule did not add the definition of an E&T participant. This determination of when an individual could be considered an E&T participant for reporting purposes, as discussed in the interim final rule preamble, was based on an existing definition under 7 CFR 271.2 for ''placed in an employment and training (E&T) program'', which provided that a State agency may count a person as ''placed'' in an E&T program when the individual commences a component. As a result of the changes to the E&T program made through the Agricultural Improvement Act of 2018, the 2021 final rule made several changes to definitions under 7 CFR 271.2. The changes in the 2021 final rule modified definitions of an E&T program and E&T mandatory participant, added definitions for an E&T participant and an E&T voluntary participant, and removed the definition of ''placed in an employment and training (E&T) program.'' An ''E&T program'' is defined as a program operated by each State agency consisting of case management and one or more E&T components. The definition for an ''E&T participant'' is an individual who meets the definition of a mandatory or voluntary E&T participant. Because these definitions do not explicitly establish at what point an individual becomes an E&T participant for reporting on the E&T Program Activity Report (FNS–583) or E&T Annual Report, the Department is modifying the definition of an E&T participant under 7 CFR 271.2 to state that an ''E&T participant'' means an individual who meets the definition of a mandatory or voluntary E&T participant who is referred to E&T and begins at least one part of an E&T program, including orientation, assessment, case management services or a component. Because the purpose of the reporting measures is to measure the impact of the E&T services that an individual receives, the Department is not including mandatory E&T participants who do not appear for E&T services in the definition of an E&T participant. However, the modified definition will include individuals who do begin an E&T program including orientation, assessment, case management services, who were previously not being captured. Therefore, the Department is addressing in this final rule a modification to the definition of an ''E&T participant'' under 7 CFR 271.2.

One commenter suggested that the term ''former E&T participant'' be defined. The Department appreciates the comment and agrees that because the interim final rule under 7 CFR 273.7(c)(17) included the term former participant as one group of participants in the reporting measures that this term should be defined. Former participants are included in these measures to capture those individuals who began participation in an E&T program but who discontinued participation because they are no longer receiving SNAP benefits due to reasons such as failure to recertify. The Department is defining under 7 CFR 271.2 the term ''former E&T participant'' to mean an individual who is no longer participating in E&T services because the individual is no longer receiving SNAP benefits.

One commenter requested definitions for both the numerators and denominators for each of the reporting measures. The Department appreciates the comment and would note that the Department issued guidance [4] through the SNAP E&T Outcome Reporting Interim Final Rule Questions and Answers Part II that was issued May 15, 2017, that provided such definitions and does not believe it necessary to define in regulations. For the measures of unsubsidized employment in the second or fourth after ''completion of participation in E&T'' the denominator includes those E&T participants who have completed participation, defined as not receiving services for 90 days, and the numerator consists of those participants who completed participation in E&T and have earned income in the second or fourth quarters after completion of participation in E&T. As these measures are generally aligned with measures in the WIOA program the Department wishes to retain some level of flexibility to accommodate changes that may be instituted in the WIOA programs. The Department is not including numerator and denominator definitions for these reporting measures in this final rule.

C. Delay Implementation

Two commenters noted that the interim final rule requires States to start collecting complex data elements and that State agencies would need to evaluate the system changes, regulatory changes and new directives they would need to implement to comply with the new reporting requirements. One commenter noted that the State agency would need to seek State statutory changes to access employment and wage outcomes through quarterly wage reporting or the National Directory of New Hires. The commenters recommended that the implementation of the reporting measures be delayed to improve the quality, utility, and clarity of the information to be collected.

The Department recognizes that the introduction of outcome reporting measures might require changes to States' data systems. However, the Department was statutorily required to issue an interim final rule implementing the provisions of section 4022 (c) of the Act within 18 months of enactment. The Department actively worked with State agencies to implement these provisions by conducting readiness assessments during FFY 2016 and FFY 2017 and offering grants for data systems annually beginning with FFY 2017. The Department also conducted a webinar for State agencies that included representatives from the Department of Labor on the use of quarterly wage record data.[5] Because State agencies already collect participant characteristics, such as race and/or ethnicity for the SNAP program and some State agencies report educational measures such as attainment of credential or certificate for educational components in their E&T State Plans, the Department believes that most State agencies will be ready to implement these changes in the final rule. However, the Department is delaying implementation of all the provisions of this final rule until October 1, 2025, in order to allow States sufficient time to make necessary changes to implement the final rule and to ensure that the first Annual Report under the final rule will be comprehensive of all provisions.

D. Annual Report Timeframe

One commenter stated that the preamble for the interim final rule provided each measure under 7 CFR 273.7(c)(17) would be reported using the most recent data available during the reporting period. The commenter stated that the final rule should clarify that different measures will be reported for individuals in different time periods. The Department appreciates the comment and acknowledges that different measures contained within a State's annual report may consist of information from different time periods, due to the lag time for measures such as employment and earnings; therefore, the Department is modifying the regulatory

[4] SNAP E&T Outcome Reporting Interim Final Rule Questions and Answers Part II, issued May 15, 2017 (*https://fns-prod.azureedge.us/sites/default/files/snap/Clarification-SNAP-EandT-Outcome-Reporting-PartII.pdf*).

[5] Webinar: SNAP E&T Outcome Reporting Requirements, August 23, 2017 (*https://www.youtube.com/watch?v=eP-PeKxdEd0*).

text in 7 CFR 273.7(c)(17) to indicate the time period to be reported for each section of the annual report. Due to the lag time in the employment and earnings reporting measures, as well as the lag time in the availability of quarterly wage records, for these measures State agencies will be required to report four (4) consecutive quarters of data from the two previous FFYs. This is consistent with the timeframe reported in annual reports as specified in guidance issued through the SNAP E&T Outcome Reporting Requirements—Questions and Answers (Q&A) Part II. The Department is aware that these lag times create a challenge for State agencies to provide four (4) quarters of data by the required January 1 due date of the annual report. To address this challenge the Department is modifying the due date of the Annual Report to April 15 under 7 CFR 273.7(c)(17). For educational measures added in this final rule for obtainment of a credential or certificate and measurable skill gains, State agencies will report on data from the previous FFY. State agencies will report participant characteristics for those E&T participants served in the E&T program from the previous FFY, consistent with guidance [6] issued under the IFR.

E. County-Administered E&T Programs

Two commenters stated that, for States with county-administered SNAP E&T programs, there should be a requirement that every county track and provide the same data to the State agency. They state that without this requirement the data will lack continuity and comparability between locations and the reports that the State agency provides to the Department will be incomplete. The Department appreciates the comment and would note that section 16(h)(5) of the Food and Nutrition Act of 2008, as amended (''the Act''), places the responsibility with the State agency for establishing component measures that will serve at least 100 individuals a year as well and for submitting the E&T Annual Report. In addition, section 11(a)(2) of the Act states that the responsibility of the agency of State government shall not be affected by whether the program is operated on a State-administered or county-administered basis. It is therefore the responsibility of the State agency to ensure that data is being tracked consistently, whether in a State-administered or county-administered program. The Department is not including additional requirements for county-administered SNAP E&T programs in this final rule.

F. E&T 100 Percent Grants

One commenter noted that language included in the preamble to the interim final rule states that the Department retains the authority to consider outcome data as part of the scope of the impact for a State's E&T program when evaluating requests for additional 100 percent funds. The commenter stated that the April 2016 SNAP E&T State Plan Handbook did not discuss the use of outcome data for these reviews and that the final rule should address whether the Department intends to use outcome data when reviewing additional funds requests and if so, how the Department envisions this working when outcome data will not be available until the out-years.

The Department appreciates the comments and clarifies that the 2021 final rule implemented changes to the Department's process for reallocating unobligated or unexpended Federal E&T 100 percent funds to other State agencies requesting additional E&T funds, codified under 7 CFR 273.7(d)(1)(iii)(E). This change was necessitated by requirements at section 16(h)(1)(C) of the Act, as amended by the Agricultural Improvement Act of 2018, that introduced priorities for the reallocation of funds, including the requirement that the Department determines that the requests funded have the most demonstrable impact on the ability of participants to find and retain employment that leads to increased household income and reduced reliance on public assistance. The Department has provided guidance in the revised 2022 E&T State Plan Handbook [7] and E&T Toolkit [8] regarding the inclusion of information in State agencies' requests for additional funds demonstrating that the planned use of the funds has a demonstrable impact on the ability of participants to find and retain employment that increases the household income. The rule under 7 CFR 273.7(d)(1)(iii) provides that in making reallocations the Department will consider, among other things, whether the employment and training programs and activities for which the State agency is requesting reallocated funds have the ''most demonstrable impact on the ability of participants to find and retain employment that leads to increased household income and reduced reliance on public assistance.'' The Department must also consider the size of the request relative to the State agency's E&T spending in prior years, the specificity of the State's plan for spending the reallocated funds, and the quality of the program and scope of impact for the State's E&T program. The Department considers the information provided by the State agency in their request as well as all performance data, including outcome data such as the reporting measures from prior E&T Annual Reports and E&T Program Activity reports, to fall within the factors already delineated in 7 CFR 273.7(d)(1)(iii). Therefore, it is not necessary to make a change in this final rule.

One commenter noted that State system interfaces currently do not allow for the automated collection of employment and earnings data. The commenter asked if the Department would provide funding to support State system infrastructure costs for ongoing support or system enhancements and if State agencies can direct Department funds for system costs to other agencies responsible for the interfacing system.

The Department notes that State agencies can use the E&T 100 percent Federal grant and 50 percent administrative funds to develop or enhance information management systems used for collecting and reporting E&T data. State agencies choosing to use their E&T funds, whether the 100 percent Federal grant or the 50 percent administrative funds, for system development or modifications should include the anticipated costs of data collection in the estimated operating cost within their annual E&T State Plan. Additionally, the Department periodically makes available additional grant opportunities, such as through E&T Data and Technical Assistance Grants, which are intended to support the development of State SNAP E&T data collection and reporting systems. Since the ability to use those funds for information management systems already exists, it is not necessary to specify available funds in this final rule.

Reporting Measures

Section 4022(a)(2) of the Agricultural Act of 2014 (Pub. L. 113–79) amended section 16(h)(5)(B)(i) and (ii) of the Act to require the Department to develop, in consultation with the Department of Labor (DOL), reporting measures that identify improvements in the skills, training, education, or work experience of members of households participating in SNAP. The measures were to be

[6] SNAP E&T Outcome Reporting Interim Final Rule Questions and Answers Part II, issued May 15, 2017 (*https://fns-prod.azureedge.us/sites/default/files/snap/Clarification-SNAP-EandT-Outcome-Reporting-PartII.pdf*).

[7] E&T State Plan Handbook (*https://www.fns.usda.gov/snap-et/state-plan-handbook*).

[8] SNAP E&T Program Toolkit (*https://www.fns.usda.gov/snap-et/toolkit*).

based on common measures of performance for Federal workforce programs and include additional indicators that reflect the challenges facing the types of members of households participating in SNAP who participate in a specific E&T component. In the interim final rule, the Department, after consultation with DOL, established under 7 CFR 273.7(c)(17)(i)–(iv) that State agencies would report annual outcome data based on measures that were similar to the performance indicators for the core programs in the WIOA, but that reflected the intent of the Act, and the unique characteristics of the SNAP E&T program and its participants. Those reporting measures included:

- The number and percentage of E&T participants and former participants who are in unsubsidized employment during the second quarter after completion of participation in E&T;
- The number and percentage of E&T participants and former participants who are in unsubsidized employment during the fourth quarter after completion of participation in E&T;
- The median quarterly earnings of all the E&T participants and former participants who are in unsubsidized employment during the second quarter after completion of participation in E&T; and
- The total number and percentage of participants that completed a training, educational, work experience or on-the-job training component.

G. Data Sources, Methodology and Method of Collection

Regarding the measures required under 7 CFR 273.7(c)(17)(i) through (iv) one commenter asked if States are required to report on participants who enter E&T during the fiscal year or on individuals under certification in the fiscal year that enter and participate in E&T. The Department is clarifying that for the reporting measures of employment and earnings, due to the nature of these measures, State agencies are reporting on those E&T participants from the previous two FFYs who were referred to E&T, began at least one part of an E&T program including case management services or a component, and had obtained employment six months (second quarter) or one year (fourth quarter) after completion of participation in E&T. Therefore, the Department is modifying the regulatory text at 7 CFR 273.7(c)(17)(i) to indicate that for the reporting measures of employment and earnings State agencies shall report four (4) consecutive quarters of data from the two previous FFYs ending the preceding September 30.

One commenter noted that the E&T State Plan Handbook issued by the Department in April 2016 included options for data sources for reporting measures and State reporting measures not discussed in the interim final rule, including the use of sampling. The commenter stated that the final rule should identify the data sources that States may use to meet the reporting requirements. Another commenter had questions regarding the use of sampling as a data source. They asked if States that choose to use sampling for State- and Federal-reported outcomes will report both outcomes for the same sample of 500 cases, or does the Department expect the sample of 500 cases for State reported outcomes to be different than the sample of 500 cases for the reporting measures. The commenter also asked if States are required to report outcome data in the E&T State Plan or does the E&T plan contain a description of the reporting measures that will be reported for that fiscal year. Another commenter asked if there is a required source of data or methodology for calculating median earnings.

The Department appreciates the comments and notes that FNS issued guidance in the SNAP E&T State Plan Handbook in April 2016 and most recently updated May 2022 which specified that State agencies would determine the data source and the collection methodology it would use to gather the information needed for the annual report. The Department expressed that its preference was for State agencies to use administrative data and provided a list of sources they may consider using. These sources included Quarterly Wage Records (QWR) available through State's Unemployment Insurance (UI) program, the National Directory of New Hires, State's management information systems, manual follow-up or follow-up surveys of E&T participants. This guidance also indicated that State agencies may use sampling as a data collection methodology, rather than tracking all E&T participants. The Department recognized that given the variation in State's E&T programs, including their data collection and tracking procedures, State agencies were in the best position to determine the appropriate data source and collection methodology to employ. However, for the reporting measures of employment and earnings, the Department indicated that the preferred source of data was QWR but understood that State agencies needed lead time to negotiate data agreements, or in some cases require State regulatory or statutory changes granting them access to such data. For that reason, the Department indicated while State agencies moved toward the goal of using QWR for employment and earnings data, they could utilize any of the sources. State agencies indicate in their annual E&T State Plan the data sources they intend to use for reporting measures and component measures. For calculating the median quarterly wages in the second quarter after completion of participation in E&T, the methodology State agencies should employ is to arrange all individual quarterly earnings for participants in numerical order, from smallest to largest, and identify the wage that is in the middle of that list. Regarding the use of sampling, State agencies have discretion as to whether they employ different samples for reporting measures and State component measures, given that the nature and timeframe of the measures may differ. States choosing to use sampling as a collection methodology must also include details regarding the sample design in the E&T State Plan. The regulations under 7 CFR 273.7(c)(6)(xviii) specifies that in the annual E&T State Plan State agencies will provide a component measure for every component that is expected to include 100 or more participants, and those measures will be reported in the annual report specified in paragraph (c)(17). To maintain flexibility to account for variations among States, the Department is not changing in the final rule the data sources or collection methodology States may employ for the annual report.

One commenter noted that UI QWR data does not capture all earnings, such as out of State, Federal or informal employment. The commenter asked if it was feasible for the Department to collect data on employment or to match nationally on behalf of States against the State submission of participants who completed an E&T program. Another commenter noted that the final rule should provide an option for States to request that the Department calculate performance measures related to employment and earnings using the Department's access to national quarterly wage record data or National Directory of New Hires. They indicated that such an option would relieve States of some of the burden imposed on the State to perform such measures and calculations, ensure standardized measurement standards for States participating in such an option, and provide the Department a more robust platform to assess the E&T program. The commenter stressed this as an option

and would not support making this approach mandatory. One commenter stated that the Department should allow the use of automated data exchanges and State wage information to identify the employment status and quarterly wages of former E&T participants. They noted that they have observed that within the first year of reinstating the ABAWD work requirement in their State,[9] E&T vendors reported that the actual employment rate for SNAP participants is significantly higher than the 37% employment rate identified by the State's data. The commenter noted that former E&T participants rarely verify their new employment status after reporting it since there is no incentive for them to do so and they believe that it is essential for States to be able to use wage matches through such sources as Work Number or Equifax to accurate report employment outcomes of E&T participants.

The Department acknowledges that the quarterly wage record data available through State's UI reporting does not capture all earnings, specifically Federal employment or the self-employed. As previously discussed, the Department is not requiring States to use a specific data source for the annual report. However, the Department believes that QWR data is the most reliable and efficient source of information pertaining to employment and earnings of E&T participants and suggest as a best practice the use of QWR data. Further, it would not be feasible for the Department to calculate performance measures related to employment and earnings because quarterly wage record data is not available from a single source at a national level, it resides within each State agency responsible for UI reporting. In addition, this would require the Department to collect individual case records on every E&T participant from each State agency and this would impose additional burden on State agencies. The Department does not collect individual case records in the SNAP program, including the SNAP E&T program. Therefore, the Department is not changing the data sources or method for collection in this final rule.

H. Employment and Earnings Measures

One commenter asked if the fourth quarter employment after completion of E&T was intended to be a proxy for retention. This commenter also asked what if the employer or record from second and fourth quarters are different. The Department understands that the fourth quarter employment measure could be perceived as being a proxy for employment retention. However, the measure is a point in time measure and is only measuring whether an E&T participant is in unsubsidized employment twelve months after completing participation in E&T. Whether the E&T participant was included in the second quarter employment measure bears no relevance to the fourth quarter employment measure; therefore, the Department is not making a change in the final rule.

Three commenters stated that the timeline for reporting employment and earnings measures should consider the six-month lag time in the availability of quarterly wage records (QWR). They noted, for States using QWR information, reporting on fourth quarter employment after completion of E&T by the January 1 due date of the annual report would not be possible for any group completing components in FFY 2017 or thereafter. This lag time in the availability of the QWR gives States little time to perform the matches and analysis before the E&T Annual Report is due on January 1.

One commenter stated that the final rule should provide information addressing how States can request an extension or apply for a waiver of the requirement for States to submit an annual report to the Department on January 1 of each year.

The Department appreciates the comments and acknowledges that the timeframe of the employment and earnings measures as well as the six-month lag time in the availability of quarterly wage records (QWR) impacts State agencies' abilities to submit an E&T Annual Report that consists of four (4) quarters of data from only the preceding FFY on January 1. Therefore, the Department is modifying the regulatory text at 7 CFR 273.7(c)(17) to change the due date of the annual report to April 15. Additionally, the Department is modifying 7 CFR 273.7(c)(17)(i) to reflect that for the employment and earnings measures State agencies shall submit four (4) consecutive quarters of data from the two previous FFYs.

Regarding the quarterly median wage measure, one commenter noted that because the quarterly wage records reflect quarterly earnings and does not include a start date or the number of pay periods, individuals who are hired mid-quarter will appear to have lower wages than their actual hourly rate. The Department appreciates the comment on the limitation of quarterly wage records to reflect the earnings of participants who may obtain employment mid-quarter. However, the Department was required to develop reporting measures, in consultation with the Department of Labor, that were based on common measures of performance for Federal workforce programs and the quarterly median measure is aligned with WIOA programs. The Department believes that, to account for the mid-quarter hires, as well as to ensure consistency, all States would need to modify their collection processes to include capturing the start date of employment for those individuals as well as the wage information. In order to ensure consistency in the State agencies reporting of participant wage information, this would require that all State agencies, as well as E&T providers devote staff time to collect the information necessary from the E&T participants or employers. This would place an undue burden on E&T participants and their employers to provide participant wage information. The Department believes that this burden far outweighs the benefits to account for those mid-quarter hires, therefore, the Department is not modifying the regulations regarding the quarterly median wage measure in this final rule.

One commenter questioned the practical utility of the employment and earnings measures and asked if employment and earnings six or twelve months after E&T participation correlate with the impact of the E&T intervention. Another commenter noted that the employment and earnings measures are reliant on systems outside of State SNAP agency and requires ongoing staffing effort to manually collect and compile the information, calling into question the effort and validity of such measures. The Department appreciates the comments and would note that the provisions of 4022(a) in the Agricultural Act of 2014 charged the Department with the responsibility to assess the effectiveness of SNAP E&T programs in preparing members of households participating in SNAP for employment, including the acquisition of basic skills necessary for employment; and increasing the number of household members who obtain and retain employment subsequent to participation in the SNAP E&T program. This section further required the Department, in consultation with the Department of Labor, to develop reporting measures that would identify improvements in the skills, training, education of SNAP

[9] The American Recovery and Reinvestment Act of 2009 (ARRA) suspended the time limit for individuals subject to the work requirements under section 6(o)(2) of the Food and Nutrition Act, unless the individual did not comply with requirements of a program offered by a State agency. This provision under ARRA expired at the end of FFY 2011.

participants and that were based on common measures of performance for Federal workforce training programs. As noted previously, WIOA established common measures of performance to ensure consistency across all programs under WIOA. These common measures for employment and earnings specified the timeframe of second quarter and fourth quarter after exit from a WIOA program. The Department believes that the adoption of employment and earnings measures aligned with measures for workforce programs under WIOA meets the Department's obligation to assess States for the number of individuals who obtain and retain employment subsequent to participation in E&T programs. The Department is not modifying the provisions for the employment and earnings measures in this final rule.

One commenter stated that while the Department has developed standardized reporting measures as required in the Act, it has not, at least as stated in the guidance provided in the E&T Plan Handbook, standardized the methods states must employ to collect data on those measures. Given that employment outcomes are known to differ based on the modality of data collection, the commenter suggested the final rule should address how the Department plans to adjust for performance differences across States using differing data collection methodologies.

The establishment of reporting measures, as provided in section 16(h)(5)(B) of the Act, was for the purpose of identifying improvements in the skills, training, education or work experience of members of households participating in States' Supplemental Nutrition Assistance Programs. The Act did not require the Secretary to establish reporting measures with performance targets or to compare reporting measures across State agencies. Therefore, the Department is not making changes in the final rule in response to this comment.

I. Completion of Education, Training, Work Experience or OJT Components

One commenter stated that the reporting measures should also include a credential attainment measure consistent with the WIOA primary indicator on credential attainment. This includes measures such as the number and percentage of individuals assigned to E&T who obtain a recognized postsecondary credential, or a secondary school diploma or its recognized equivalent during participation in or within 1 year after exit from SNAP E&T. The commenter noted that measuring credential attainment is an important part of measuring skill-building outcomes. The Department agrees that the reporting measures should include educational measures that are aligned with WIOA.[10] This includes measures such as credential attainment and measurable skill gain that are important factors to consider in assessing and evaluating the effectiveness of a State's E&T program in assisting E&T participants in obtaining skills necessary for employment. Measurable skill gains provide the Department and State agencies with an interim progress of participants who are enrolled in any educational or training program and is triggered by program enrollment rather than on completion of the program. Both measures are in practice by workforce development organizations. An analysis of State's FY 2021 E&T Annual Reports indicates that several State agencies already utilized these as component measures. Because of these factors, the burden on State agencies should be minimal. Therefore, the Department is creating two educational measures for attainment of credential or certificate and measurable skill gains under new 7 CFR 273.7(c)(17)(ii).

State agencies will be required to report the number and percentage of E&T participants enrolled during the preceding FFY in an educational or training program, excluding those in on-the-job training, customized training or transitional jobs, who attain a recognized post-secondary credential, certificate or a secondary school diploma, or its recognized equivalent, during participation in or upon completion of participation in E&T.

State agencies will also be required to report the number and percentage of E&T participants who, during the preceding FFY, were in an education or training program that will lead to a recognized postsecondary credential or employment and who are achieving measurable skill gains, defined as documented academic, technical, occupational, or other forms of progress, towards such a credential or employment. This measure is intended to capture E&T participants who are working towards attainment of a credential or employment but may not have had sufficient time to achieve the intended outcome during the reporting fiscal year. In essence, this measure is reporting E&T participants' progress toward attainment of a credential or employment. Depending on the type of education or training program, documented progress could consist of one of the following:

- Documented achievement of at least one educational functioning level of a participant who is receiving instruction below the postsecondary education level.
- Documented attainment of a secondary school diploma or its recognized equivalent.
- Secondary or postsecondary transcript or report card for a sufficient number of credit hours that shows a participant is meeting the State unit's academic standards.
- Satisfactory or better progress report, towards established milestones, such as completion of one year of an apprenticeship program or similar milestones, from the training provider who is providing training.
- Successful passage of an exam that is required for a particular occupation or progress in attaining technical or occupational skills as evidenced by trade-related benchmarks such as knowledge-based exams.

One commenter, commenting on the collection of the total number and percentage of participants that completed an educational, training, work experience of on-the job training measure, stated that the ability to capture completion of components, specifically an education or training component, is dependent upon a manual, individual-level process and would pose an undue burden on States without clear benefit. They asked what the Department hopes to deduce from this information. Another commenter noted that the ability to capture completion of components must be imbedded in the E&T case management system and would require additional system functionality and would further require direct reporting by participants and data entry by a worker. The commenter asked if the Department would require verification of completion and if documentation of completion would be included in management evaluations or other Federal reviews. One commenter sought clarification for the measure of completion of an educational, training, work experience or on-the-job training component. They asked that ''completion'' be defined, and a clarification of who is included in the denominator, if it is all E&T participants or only those participating in one of the components. One commenter stated that for the completion of educational, training, work experience or on-the-job training components a SNAP client has the potential to complete multiple E&T

[10] Training and Employment Guidance Letter No.10–16, Change 3 issued September June 11, 2024 (*https://www.dol.gov/sites/dolgov/files/ETA/advisories/TEGL/2023/TEGL%2010-16%20Change%203/TEGL%2010-16%2C%20Change%203.pdf.*

activities. They stated that the final rule should clarify whether States should count completion in each of the components or just one and if States should only be reporting completion in one component during the fiscal year, clarify, how States should determine the completion to be reported.

The Department acknowledges that capturing completion of components would necessitate some level of case management, whether through a manual process or through an automated system. However, separate and apart from any reporting requirements, recording when participants begin and complete any activity is a cornerstone of an effective employment and training program, ensuring participants are making progress toward individual goals as well as program goals. The Department would note at the time of the interim final rule, the Department established reporting measure for completion of an education, training, work experience or on-the-job training (OJT) component in 7 CFR 273.17(c)(17)(iv) of the interim final rule as a measure that was specific to the SNAP E&T program. This was done, partly because the Departments of Labor and Education were still in the process of finalizing their policies for the educational common measures of credential or certificate attainment and measurable skill gains, for the WIOA programs. The Department is not aware of other Federal agencies incorporating similar completion measures, and after reconsideration the Department does not believe ''completion'' is a meaningful measure. Therefore, considering the comments, the Department is removing the completion of education, training, work experience and on-the-job training reporting measure under 7 CFR 273.7(c)(17)(iv) and replacing with two educational measures for attainment of credential or certificate and measurable skill gains under new 7 CFR 273.7(c)(17)(ii).

J. Alignment of Measures With WIOA

Three commenters recommended that the Department fully align the proposed measures and reporting requirements with those established in WIOA and the final WIOA regulations to improve service integration and support evaluation of outcomes across programs. One of the commenters further stated that the Department should give States that choose to integrate services across the WIOA and SNAP E&T programs the option of using the common periods of participation with common exit used in WIOA programs. The Department appreciates the recommendation to fully align measures with those established in the WIOA programs. The measures in the interim final rule were closely aligned but not identical to those measures in WIOA. Some of the variation was attributable to differences in the frequency of reporting and difference in data needs. At the time of the interim final rule the Department did not include educational measures that aligned with WIOA, partly because the Departments of Labor and Education were still in the process of finalizing their policy. The Department encourages and applauds coordination and collaboration between WIOA and SNAP E&T to serve E&T participants. WIOA guidance states that common exit occurs when a participant, enrolled in multiple DOL-administered partner programs, has not received services from any DOL-administered program in which the participant is enrolled, to which the common exit policy applies, for at least 90 days, and no future services are planned.[11] In SNAP E&T an individual's eligibility for SNAP E&T services is directly tied to their eligibility and receipt of SNAP benefits, this means that an individual's participation in SNAP E&T ends when they are no longer receiving SNAP benefits. The Department believes that it would place an undue burden on State agencies to apply the common exit principle for those individuals who may be co-enrolled in SNAP E&T and WIOA programs. Therefore, the Department is not making this change in this final rule.

One commenter, while supportive of aligning reporting requirements between E&T and WIOA programs, suggested that the interim final rule should provide additional implementation time to allow States to align those standards. The commenter noted that SNAP E&T programs and WIOA programs are administered by different State agencies and have differences in vendors, outcome data tracking systems, eligibility and participant tracking systems. The commenter believed additional time is necessary to link the various systems and to align the reporting requirements. The Department appreciates the comment and acknowledges that State agencies need additional time to implement measures that are aligned with WIOA. Therefore, the Department will delay implementation of the educational reporting measures specified under the new 7 CFR 273.7(c)(17)(ii) until October 1, 2025.

[11] Training and Employment Guidance Letter No.10–16, Change 3 issued September June 11, 2024 ((*https://www.dol.gov/sites/dolgov/files/ETA/advisories/TEGL/2023/TEGL%2010-16%20Change%203/TEGL%2010-16%2C%20Change%203.pdf*).

K. Performance Standards

One commenter asked if the Department intended to apply performance standards for outcome measures of employment, earnings and completion of education, training, work experience or on-the-job training. The Department would like to clarify that the provisions of section 16(h)(5)(A) of the Food and Nutrition Act of 2008, as amended by the Agricultural Act of 2014, required the Department to assess the effectiveness of States' E&T programs in preparing members of households participating in SNAP for employment, including the acquisition of basic skills necessary for employment, and in increasing the number of household members who obtain and retain employment after participation in SNAP E&T and to implement reporting measures to assist in making the determination of effectiveness. It was not the intent of the Department to apply performance standards or targets, or to compare the effectiveness of one State's E&T program to other States due to State flexibility in the design of their E&T program, such as the participants targeted for services, services to be delivered and the areas of the State for services, as well as the differences in labor markets and targeted occupations.

Disaggregated Characteristics of E&T Participants in Reporting Measures

Section 16(h)(5)(B)(ii) of the Act, as amended by the Agricultural Act of 2014, requires that the reporting measures developed by the Department include additional indicators that reflect the challenges facing the types of members of households participating in SNAP who participate in a specific employment and training component. In the interim final rule, the Department identified three participant characteristics that it believed were the most important to understand the challenges to employment faced by SNAP E&T participants and former participants who are included in the reporting measures. Those characteristics included whether the participants were voluntary or mandatory participants; participants who had received a high school degree (or GED) prior to being provided with E&T services; and were able-bodied adults without dependents (ABAWDs). The interim final rule required States to report the number and percentage of E&T participants reported in each of the reporting measures, a disaggregation of the number, and percentage of those participants and former participants by each of the three characteristics.

In the interim final rule, the disaggregated characteristics for the reporting measures, such as employment in the second or fourth quarters after completion of participation in E&T, reflect the composition of the outcome group. For example, the number of individuals in unsubsidized employment in the second or fourth quarter after completion of participation in E&T who are voluntary participants. The denominator is the number of individuals in unsubsidized employment in the second or fourth quarter after completion of participation in E&T and the numerator is the number of individuals who met one of the three characteristics.

Two commenters requested the Department clarify that the disaggregated characteristics in the interim final rule require reporting the outcomes of the disaggregated groups, not simply of the composition of the group that is used to determine these outcomes. The denominator would then be the total amount of individuals who meet the characteristic, and the numerator would be the number of individuals who meet that characteristic who are in unsubsidized employment in the second or fourth quarter after completion of participation in E&T. For example, the number and percentage of all voluntary participants in unsubsidized employment during quarter two after completion of E&T participation. One of the commenters noted that reporting employment, earnings and credential attainment outcomes for subpopulations will provide valuable information on the effectiveness of different SNAP E&T strategies.

The Department agrees that the disaggregated characteristics for the reporting measures, such as employment in the second or fourth quarters after completion of participation in E&T, should reflect the outcome observed for each characteristic, rather than the composition of the outcome group. The Department further agrees that this change would provide valuable information on the effectiveness of SNAP E&T observed by each participant characteristic. As a result, the Department is modifying the regulation for the disaggregated characteristics of the reporting measures to reflect the outcomes observed by each characteristic under renumbered 7 CFR 273.7(c)(17)(iii).

One commenter stated that individuals assigned to but not participating in E&T should be treated as a subpopulation for reporting purposes, just as are voluntary or mandatory participants, and participants achieving or not achieving a high school degree or its equivalent. The Department appreciates the suggestion that individuals assigned to but not participating in E&T should be treated as a subpopulation for reporting purposes. We agree that this is an important factor in evaluating the effectiveness of an E&T program, and the Department has recently modified the E&T Program Activity Report (FNS–583) to capture additional reporting elements for States that serve mandatory E&T participants through the 2021 final rule. The Department believes the role of outcome measures is to measure the impact of interventions received by participants, so covering individuals who never participated in E&T is not helpful for those outcome measures. However, the Department agrees that outcome measures should reflect those individuals who were required to participate in E&T, referred to E&T, began participating in an E&T program but who were subsequently deemed ineligible for SNAP due to failure to comply with E&T requirements. The Department believes that it is appropriate and would add value to add a characteristic for mandatory E&T participants who are deemed ineligible for SNAP due to a failure to comply with E&T requirements and therefore are adding this as a new characteristic under 7 CFR 273.7(c)(17)(iii).

The Department remains committed in our efforts to advance racial equity and support for underserved communities, as demonstrated in Executive Order 13985 and the USDA Equity Plan. The Department is adding race and/or ethnicity of E&T participants as additional participant characteristics to be reported by State agencies. This is outlined in the race/ethnicity data collection requirements in 7 CFR 272.6(g). As the regulations at 7 CFR 272.6(g) and (h) require State agencies to collect race and ethnicity data on participating households and report the data to FNS, the Department does not believe reporting measures by race and/or ethnicity will cause any additional burden on the part of the State agencies. The Department will use the participant characteristic information collected through the E&T Annual Reports, such as the race and ethnicity data, in conjunction with other data of SNAP participants to better understand and help identify potential equity concerns at various stages of the SNAP E&T service delivery process. This information will be used by the Department in assessing State's effectiveness of the E&T program in meeting the needs of all E&T participants.

State Component Measures

Section 4022(a)(2) of the Agricultural Act of 2014 amended section 16(h)(5)(B)(ii) of the Act to require each State agency to identify in its annual E&T State Plan appropriate reporting measures for each proposed component that serves a threshold of at least 100 participants a year. The State agencies are then required to report on those measures in their E&T Annual Reports to the Department. This section of the Act provided several measures that State agencies could consider, such as the percentage and number of program participants who received E&T services and are in unsubsidized employment subsequent to the receipt of those services. Other examples include State agency-developed measures of a participant's interim progress toward achieving goals of a specific component and the number and percentage of program participants who are meeting program requirements in a component of the State agency's E&T program. Section 16(h)(5)(C)(iii) also charged the Department with the oversight responsibility to ensure that reporting measures are appropriate to identify improvements in skills, training, work and experience for participants in an E&T program component. The interim final rule established under 7 CFR 273.7(c)(6)(xviii) the requirement that State agencies include in the E&T State Plan a reporting measure for every component that is expected to include 100 or more participants and include those measures in the E&T Annual Report. The rule included the list of suggested measures specified in the Act that State agencies could consider adopting. The Department chose a threshold of 100 participants a year to be consistent with the minimum specified in the Act. The Department would clarify that the intent of component measures is to measure the effectiveness of the intervention provided through the component so the ideal measure would be closely tied to the time of the intervention. For example, an appropriate measure for supervised job search is to measure E&T participant's attainment of unsubsidized employment upon completion of the component. To fulfill the Department's oversight responsibility, the Department will work with State agencies through the State Plan approval process to ensure that the State identified measures approved in the State Plan are appropriate for each component.

One commenter noted that the interim final rule allows States to establish their

own component reporting measures subject to the Department's review and approval as part of the SNAP E&T State Plan review process. However, the rule is silent on the criteria by which component measures will be approved. The commenter suggests that the final rule provide that the Department will presumptively approve State component measures which are chosen from those measures suggested in the regulations and set forth the criteria under which the Department will deem other proposed measures appropriate. One commenter stated that, given the flexibility in determining state-designed reporting measures for components provided in the Act and interim final rule, it is essential that the Department defer to the States when reviewing and approving reporting measures in E&T State Plans. The commenter noted that with less than 100 days between the effective date of the interim final rule and the date the State's FFY 2017 E&T plans were due, the States are best situated to determine how they can effectively collect and report data with very little time to plan. One commenter stated that the final rule should describe what flexibility will be provided to change or adjust reporting measures for individual components after approval as part of the annual SNAP E&T Plan, and if a change is approved what measures the State will be required to include in the annual report.

The Department agrees that State agencies are best suited to determine an appropriate component measure that they can collect effectively and efficiently. The primary criteria for a component measure are that the measure be an outcome-based measure and not a process measure. The measure should be relevant to the given component and should be closely tied to the time of when the component was utilized for participants. For example, a measure of a measurable skill gains would not be applicable for a supervised job search component. The regulations under 7 CFR 273.7(c)(8) provide that if a State agency modifies or alters the nature or location of its components or the number or characteristics of persons served, a State Plan amendment must be submitted to the appropriate FNS Regional Office for approval at least 30 days prior to the planned implementation. This requirement extends to any proposed change in a component measure. If the proposed change is approved the State agency would be required to include the revised measure in that year's E&T Annual Report.

One commenter stated that the SNAP E&T Handbook published by the Department on April 25, 2016, appears to include requirements for county-level reporting measures for State supervised, county administered States, while the interim rule does not. They stated they do not believe that the statute provides the Department the authority to require measures below the State level because section 4022(a)(2) states that the Secretary will monitor E&T programs ''carried out by State agencies'' and ''shall develop State reporting measures.'' They do not believe that county-administered States should be held to additional reporting requirements that are not required of State-administered programs. The commenter proposed that the final rule specifically preclude county-level measurement. The commenter recommended that in the absence of such a prohibition, the Department should also provide information to address whether county-level reporting measurements were considered when the Department estimated States' administrative burden in complying with the requirements outlined in the interim rule.

The Department would like to clarify that the table of components offered by each county included in the April 2016 E&T State Plan Handbook was provided as an option that county-administered States may use in completing the E&T State Plan. It was not intended to indicate that additional reporting requirements were placed on county-administered programs. Rather, it was intended to assist State agencies in compiling the data collected from their counties. That optional table has since been modified to remove reporting measures by county. Further, the Department notes that section 11(a)(2) of the Food and Nutrition Act of 2008, as amended, specifies that the responsibility of the agency of State government shall not be affected by whether the program is operated on a State-administered or county-administered basis. Thus, the Act specifically places the responsibility with the State agency for establishing component measures in the annual E&T State Plan and reporting of those measures in the annual report.

Twenty (20) commenters recommended that States should be required to report employment in the second and fourth quarters after completion of E&T and the median quarterly earnings in the second quarter for any component that is expected to include 100 or more participants, in addition to any State measures. Three of the commenters further stated that States should be required to report the completion of any component. The commenters stated that such information at the component level will allow States to assess the effectiveness of various approaches and redirect resources toward components with the greatest likelihood of helping SNAP participants improve their employability.

The Department appreciates the comments but notes that section (16)(h)(5)(B)(iii) of the Act provides flexibility in identifying appropriate reporting measures for every component that serves at least 100 participants a year in the annual E&T State Plans, with the Department's approval. The interim final rule under 7 CFR 273.7(c)(6)(xviii) provided several examples of measures that State agencies could choose, such as the number of program participants that obtain unsubsidized employment subsequent to receipt of the component. States also can identify other measures in addition to the examples provided in the regulation. The Department would note that the intent of individual component measures is to measure the impact of a particular component. The Department does not believe that outcome measures of the E&T program, such as the reporting measures for employment and earnings six or twelve months after an individual's participation in an E&T program, which could consist of multiple components would be useful in measuring the effectiveness of a single component. However, the Department encourages State agencies to consider the full range of measures, including those measures that would provide an interim benchmark for participant's progress toward achieving goals of a specific component.

One commenter stated that the final rule should address how the States are to be required to track component completion after a person is no longer a SNAP recipient. The commenter explained that currently there is no requirement in place for individuals to report their employment or training status upon completing a SNAP E&T component and that it would be very costly and difficult to obtain this information. The Department wishes to clarify that SNAP regulations do not require States to track component completion after a person is no longer a SNAP recipient. Under 7 CFR 273.7(c)(6)(xviii) States have the discretion to identify an appropriate component measure.

One commenter noted States would need additional time to develop evaluation plans and establish effective collaboration with E&T vendors and other stakeholders to develop a comprehensive evaluation plan for each

proposed component serving at least 100 participants a year. They indicated that adequate planning and development time would ensure that collected data accurately measure intended outcomes. The commenter recommended delaying the implementation of reporting requirements. The Department appreciates the comment and acknowledges that adequate planning and development time is essential for ensuring accurate data collection procedures. The interim final regulations were published in the **Federal Register** on March 24, 2016, effective May 23, 2016, and States were required to identify component measures for components that served at least 100 participants annually in the FY 2017 E&T State Plan. While the Department realizes this only allowed States approximately six months to establish data collection procedures for component measures, guidance was issued in the Supplemental Nutrition Assistance Program—section 4022 of the Agricultural Act of 2014—Questions and Answer (Part I), issued July 26, 2016, that indicated that the Department would work with individual States as needed to allow additional lead time for the States to finalize reporting measures and data sources.

In conclusion, the Department codifies the regulatory text in 7 CFR 273.7(c)(6)(xviii) as indicated in the interim final rule.

E&T Participant Characteristics

Section 16(h)(5)(C) of the Act, as amended by the Agricultural Act of 2014, charges the Department with the responsibility for conducting oversight of State E&T program activities and lists four specific oversight activities. One of the activities includes ensuring that program activities are appropriate to meet the needs of the individuals referred by the State agency to an E&T program component. Additionally, as stated previously, section 16(h)(5)(B)(ii) of the Act required that reporting measures include additional indicators that reflect the challenges facing the types of members of households participating in SNAP who participate in a specific E&T component. Because the SNAP work registrant population, like the general SNAP population, is very diverse and faces a myriad of challenges to employment, such as measurable educational attainment, the Department believed that to have a better understanding of the effectiveness of SNAP E&T it must have a more complete picture of the population that is being served in E&T. For that reason, in the interim final rule the Department required State agencies to report the number and percentage of all E&T participants on seven characteristics. Those participant characteristics included the participants who:

- Are voluntary vs. mandatory;
- Have achieved a high school degree (or GED) prior to being provided with E&T services;
- Are ABAWDs;
- Speak English as a second language;
- Are male vs. female; and
- Belong in the following age ranges: 16–17, 18–35, 36–49, 50–59, 60 or older.

One commenter stated that it is unlikely that the six participant characteristics information would be useful in understanding the effectiveness of E&T programs, absent an effective way to establish relationship between participant characteristics, assignments, and outcomes. The commenter further stated that the Department did not have specific statutory authority to require reporting of participant characteristics and suggested more useful information on participant characteristics and the availability of appropriate assignments could be more efficiently obtained through specific research studies. Another commenter stated that the collection of reliable educational levels is problematic, and the utility of collecting is unclear. The commenter stated that SNAP eligibility systems do not collect educational attainment or an indicator for ''speaks English as a second language'' and that it's unclear what FNS intends to do with this information. The commenter also stated that the language of ''prior to being provided with E&T services'' is unclear and asked if SNAP E&T funds must be used to pay for the full cost of a service to be considered ''provided'' and how this applies to referrals to E&T.

The Department appreciates the comments but disagrees that participant characteristics are not useful in understanding the effectiveness of E&T programs. Based on widely reported research and data, women, minorities and individuals with lower education levels face additional obstacles to employment and lower earnings. To understand the overall effectiveness of a program it is important to consider the demographics of the population that is receiving the services, as well as the challenges that face participants that have less than a high school diploma or equivalency prior to participation in E&T or participants that speak English as a second language. The Department further disagrees that the Department does not have the statutory authority to require reporting of participant characteristics. Section 16(h)(5)(B)(ii) of the Act provided broad discretion to the Department in creating reporting metrics by requiring the inclusion of additional indicators that reflect the challenges facing the types of members of households participating in SNAP E&T. Additionally, the Act charges the Department with oversight responsibility for ensuring that program activities are appropriate to meet the needs of the individuals referred by the State agency to an E&T program component. The inclusion of reporting participant characteristics was in direct response to this requirement specified in the Act, so the Department is retaining the participant characteristics reporting and as described earlier, adding race and/or ethnicity as a participant characteristic.

The interim final rule at 7 CFR 273.7(c)(17)(v) required States to include in the annual report the number and percentage of E&T participants who met the characteristic of having obtained a high school diploma (or GED) prior to being provided with E&T services. The Department agrees with the comment that the term ''prior to being provided with E&T services'' is unclear. For that reason, to add clarity, the Department is modifying the regulatory language in 7 CFR 273.7(c)(17)(v) for this characteristic to read ''E&T participants who obtained high school diploma and equivalency prior to referral to E&T.''

One commenter asked for the participant characteristic of education attainment prior to participation in E&T, for States not already tracking this information, how are States expected to capture data for anyone that participates in FFY 2017 or after. The Department appreciates the comment and notes that the Department allowed State agencies who were not already collecting participant's educational attainment prior to participation in E&T in their automated systems to report that characteristic as ''unknown,'' until such time as the State agency could modify their collection procedures to capture this characteristic. Given the guidance, it is not necessary to make this change in the final rule.

Two commenters inquired how participants should be reported if the characteristic, such as ABAWD status, changes multiple times during a reporting year. The Department issued guidance in the SNAP E&T Outcome Reporting Interim Final Rule: Questions and Answers Part II [12] on May 15, 2017, that State agencies should capture and report on a participant's characteristic at

[12] SNAP E&T Outcome Reporting Interim Final Rule: Questions and Answers Part II.

the time the individual begins an E&T program within the reported fiscal year. No change is required in this final rule.

One commenter noted that all references to high school degree or GED should be replaced with ''high school diploma or equivalency.'' The commenter stated that GED is a trademarked name and is only one of several types of high school equivalency exams being used. The Department appreciates the suggestion and is therefore providing a change in the regulatory language under the renumbered 7 CFR 273.7(c)(17)(iii)(F) and 7 CFR 273.7(c)(17)(v)(C) to reference high school diploma or equivalency.

Monitoring, Evaluating and Assessing State's E&T Programs

The Agricultural Act of 2014 amended section 16(h)(5)(A) of the Act to require the Department to monitor and assess the effectiveness of E&T programs carried out by State agencies in preparing members of households participating in SNAP for employment, including the acquisition of basic skills necessary for employment, and increasing the number of household members who obtain and retain employment subsequent to participation in E&T. The Act also established in section 16(h)(5)(C)(i)–(iii) of the Act specific Department oversight activities of E&T programs, that included ensuring:

- Compliance with Federal E&T program rules and regulations;
- That program activities are appropriate to meet the needs of the individuals referred by the State agency to an E&T program component;
- That reporting measures are appropriate to identify improvements in skills, training, work, and experience for participants in an E&T program component.

Section 16(h)(5)(C)(iv) of the Act also specified Department oversight responsibilities for evaluating the compliance of States that receive an additional allocation for ensuring the availability of work opportunities for ABAWDs. This section provided the Department the authority to require any information from these States that were determined appropriate for evaluating compliance. This included requiring a report by the States on the number of individuals meeting ABAWD criteria; the number offered a work opportunity; the number who participated in such opportunities; and a description of the types of opportunities available throughout the State.

Section 16(h)(5)(E) of the Act, as amended by the Agricultural Act of 2014, gives the Department the authority to require a State agency to make modifications to the State's E&T State Plan to improve outcomes if the Department determines that the E&T outcomes are inadequate.

The SNAP regulations at 7 CFR 275.3(a) already requires FNS to conduct management evaluations (ME) reviews of targeted areas of SNAP program areas each year, including E&T. FNS identifies target areas each year based upon a number of considerations, including recent policy changes, risk to Federal funds and risk to program access. For example, FNS may identify program access as an area that the regional offices are required to review in every State, and nutrition education as an area to be reviewed on an at-risk basis, as necessary. This affords FNS maximum flexibility to target resources to those current areas of vulnerability or agency priorities.

In previous years, FNS has not required its regional offices to perform an ME of each State's E&T program. FNS has required its regional offices to review E&T programs in States that operate third-party partner programs, or that have combined Federal and non-Federal budgets over a certain threshold. As part of its general monitoring and oversight responsibilities, FNS will meet the requirement of the Act by continuing to perform MEs of States' E&T programs but will also continue to establish in guidance which target areas to focus attention each year.[13]

In addition, under existing authority FNS is required to review and approve State agencies' E&T plans and budgets. Through this process, FNS ensures that individual components are structured to meet the needs of participants and that the reporting measures for individual components with more than 100 projected participants required by this rule are appropriate to measure the impact of the components on participants.

The interim final rule under 7 CFR 273.7(c)(16) established that FNS may require a State agency to make modifications to its SNAP E&T State Plan to improve outcomes if FNS determines that the E&T outcomes are inadequate.

Two commenters provided remarks on the Department's monitoring, evaluating, and assessing of States' E&T programs. One commenter stated that they were concerned the rule discussed consequences for inadequate performance without any indication as to how performance expectations would be set and what would be considered inadequate. Another commenter stated that the final rule should address how the Department would monitor State E&T programs, assess their effectiveness, and determine that the State agencies' E&T outcomes are inadequate. The commenter asked what standards the Department will use to determine differential performances across States.

The Department appreciates the comments. As stated previously, section 16(h)(5)(A) of the Act charges the Department with the responsibility to assess the effectiveness of E&T programs in preparing members of SNAP households for employment, including the acquisition of skills necessary for employment, and increasing the number of household members who obtain and retain employment subsequent to participation in E&T programs. Section 16(h)(5)(C) of the Act also requires the Department to evaluate State agencies' E&T programs on a periodic basis to ensure compliance with Federal E&T program rules and regulations; that program activities are appropriate to meet the needs of individuals referred by the State agency to an E&T program; and that reporting measures are appropriate to identify improvements in skills, training, work experience for participants in an employment and training program component. As mentioned previously, the interim final rule under 7 CFR 273.7(c)(16) established that FNS may require a State agency to make modifications to its SNAP E&T State Plan to improve outcomes if FNS determines that the E&T outcomes were inadequate. When the Department's oversight responsibilities for the assessment of effectiveness of E&T programs is considered, the Department believes that the term 'outcomes' may be mistakenly assumed to refer only to the reporting measures rather than to outcomes of the overall assessment of E&T programs' effectiveness. The reporting measures from the E&T Annual Report are just one tool the Department will utilize to assess the effectiveness of a State agency's E&T program. Other information the Department will also use includes, but is not limited to, E&T State Plans, E&T Program Activity Reports (FNS–583), and ME reviews. Because State agencies have great flexibility in the design of their E&T program, in terms of targeted population, location of services, range of components, as well as differing labor

[13] Fiscal Year 2023 State Management Evaluation Target Areas (*https://www.fns.usda.gov/snap/fiscal-year-2023-state-management-evaluation-target-areas*).

markets, the Department does not intend to set a benchmark or a threshold for inadequate performance but will rather assess and evaluate each State agency, taking into consideration attributes of a State's E&T program. As discussed further in this section the Department is developing a framework for assessing State's E&T programs. The attributes of a State's E&T program, such as targeted populations and differing labor markets is considered within the design of the framework. The Department does not believe it necessary to include these attributes in the regulations. However, to provide transparency and clarity, the Department is modifying the regulatory text at 7 CFR 273.7(c)(16) to include the sources of information the Department will use to determine the effectiveness of a State's E&T program, such as E&T State Plans, ME reviews, E&T Program Activity Reports, E&T Annual Reports and other factors the Department determines appropriate to the assessment. The Department is also amending this section to stipulate FNS' responsibility to assess that program activities are appropriate to meet the needs of individuals referred by the State agency to an E&T program.

One commenter stated they appreciated that the Department would consider unemployment rates together with other important factors when looking at the unique challenges SNAP E&T participants face. The commenter encouraged the Department to consider a broad array of labor market indicators, including the Bureau of Labor Statistics alternative measures of labor market underutilization. They noted that labor market demand, not only a mismatch of skills to available jobs, is a key driver of the unemployment and underemployment problems many SNAP participants face. One commenter stated that it is critical that any attempt to use long-term data to determine the efficacy of an E&T program take into consideration any external influences that may have an impact on the job retention of an E&T participant but is not caused by the overall effectiveness of the training services received from an E&T vendor. This caution will ensure that States, stakeholders, and advocates are focusing on variables that are within the control of the E&T program, and not those that are outside the program's control. The Department appreciates the comments and agrees that when evaluating the effectiveness of State's E&T programs, external factors, such as the alternative measures of labor market underutilization, are important to consider when looking at the challenges SNAP E&T participants face. As previously mentioned, the Department is adding regulatory text to 7 CFR 273.7(c)(16) to clarify the information the Department will use in evaluating the effectiveness of States' E&T programs.

Currently, under 7 CFR 273.7(c)(16), FNS may require a State agency to make modifications to its SNAP E&T State Plan to improve outcomes if FNS determines that the E&T outcomes were inadequate. FNS will evaluate the effectiveness of SNAP E&T programs in several categories, such as intentional program design, integrated eligibility, deliberate program operations, and meaningful outcomes. FNS is amending 7 CFR 273.7(c)(16) to reflect these considerations. FNS will develop a framework with more detail which will be issued in guidance but anticipates each assessment category will contain various factors that may influence how effective programs are administered. For example, under deliberate program operations, factors may include component availability, component utilization, and whether the components offered are appropriate to meets the needs of the State's targeted population. One factor alone will not indicate whether a State's program is effective, but all the factors when viewed in their totality will provide a roadmap for needed areas of improvement. This assessment is not intended to provide a benchmark or performance target. Nor is the assessment intended to compare one State's E&T program against another. Rather, when determining effectiveness, FNS will consider whether the State's E&T program is designed and implemented with the purpose of meeting the needs of SNAP participants and assisting participants in gaining the skills necessary to obtain and retain employment.

If through this effectiveness assessment of a State's E&T program, which includes, but is not limited to information collected through ME reviews and corrective action plans, and program activity reports, the State is found to have inadequate outcomes, such as inappropriate components for the targeted population the State serves in E&T, FNS will provide technical assistance to the State agency and make recommendations for modifications to the State's E&T State Plan. Depending upon the impact of the inadequate outcome on E&T participants, such as a high rate of individuals being deemed ineligible for SNAP benefits due to failure to comply with E&T requirements, FNS may require State agencies to amend their plan within that FFY. For other instances the State agency may be required to make the necessary modifications no later than in the E&T State Plan submitted for the next FFY. E&T State Plans are due at least 45 days before the start of a FFY as provided under 7 CFR 273.7(c)(8). The Department is modifying the regulation under 7 CFR 273.7(c)(16) to clarify that the modifications must be made before FNS will approve State E&T Plans.

As a consequence for a State agency's failure to modify their E&T State Plan according to the recommendations by FNS to improve the effectiveness of the State's E&T program, FNS will employ the current authorities provided in the regulations under 7 CFR 272.2(e) to deny the State agency's E&T plan and under 7 CFR 273.7(d)(1)(ii)(B) that states a State agency's receipt of its 100 percent Federal E&T grant is contingent on FNS' approval of the State agency's E&T plan. This regulation further stipulates that non-receipt of an E&T grant does not release a State agency from its responsibility to design and operate an E&T program. Additionally, FNS will follow the procedure provided under 7 CFR 276.4 regarding suspension and disallowance of administrative funds due to FNS determination of the efficiency and effectiveness of State agencies administration of SNAP. Under this process, FNS will provide advance warning to the State agency that their failure to modify their E&T State Plan can result in FNS rescinding the prior approval of the State agency's E&T State Plan and the State agency may be at risk of having administrative funds, including the 100 percent E&T Federal grant and E&T 50 percent reimbursement funds, suspended or disallowed until the State comes into compliance.

Procedural Matters

Executive Order 12866, 13563, and 14094

Executive Orders 12866, 13563, and 14094 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility.

This final rule has been determined to be significant under Executive Order 12866, as amended by Executive Order

14094, and was reviewed by the Office of Management and Budget (OMB) in conformance with Executive Order 12866.

Summary of Total Cost Impacts

A regulatory impact analysis must be prepared for regulatory actions that are significant as defined by section 3(f)(1) of E.O. 12866, as amended by E.O. 14904. This final rule does not meet the definition of significant under section 3(f)(1) of E.O. 12866, as amended, and therefore the Department has prepared an economic summary of the rule, rather than a regulatory impact analysis.

This final rule makes changes to the interim final rule (IFR) published by the Department on March 24, 2016, and made effective May 23, 2016. The Department expects several of the final rule provisions to impact FNS or State administrative costs. This final rule is not expected to impact SNAP participants' benefit levels and is expected to minimally impact household burden. For this economic analysis, the Department compares the final rule's costs and savings to a pre-IFR baseline of burden costs, in addition to the currently approved information collection request (ICR) which already incorporates activities of the IFR since it was updated in 2022 (OMB #0584–0614, approved from December 29, 2022, through December 31, 2025). As such, comparisons to the current ICR indicate changes in burden caused by the final rule compared to the IFR.

The following provisions are expected to have measurable impacts:

Final rule provisions that are unchanged from the interim final rule (IFR): These provisions represent a change from the pre-IFR baseline, but no change from the burden hours estimated under the IFR's provisions and the currently approved ICR.

- 7 CFR 273.7(c)(6)(xviii) requires State agencies to identify component measures in their E&T Plans.
- 7 CFR 273.7(c)(17)(i)(A)–(C) requires State agencies to report on employment and earnings measures in an E&T Annual Report, renumbered in this final rule.
- 7 CFR 273.7(c)(17)(vi) requires State agencies to report the component measures identified in its E&T Plan, renumbered in this final rule.
- 7 CFR 273.7(c)(17)(vii) requires ABAWD pledge States that have received additional allocation funds to report information regarding the use of those funds, renumbered in this final rule.
- 7 CFR 272.1(f) mandates E&T Annual Report recordkeeping requirements.

Final rule provisions that are revised or newly added: These provisions represent a change from the pre-IFR baseline and from the burden hours estimated under the IFR's provisions in the currently approved ICR.

- 7 CFR 273.7(c)(17)(ii)(A)–(B) requires State agencies to report on educational measures in an E&T Annual Report.
- 7 CFR 273.7(c)(17)(iii) requires State agencies to report on seven participant characteristics, a change from the four characteristics required in the IFR, for the employment and earnings measures and educational measures in 273.7(c)(17)(i) through (ii).
- 7 CFR 273.7(c)(17)(v) modifies the reporting requirements for E&T participant characteristics established by the IFR to include race and/or ethnicity.
- 7 CFR 273.7(c)(17)(iv) removes the IFR requirement for State agencies to report measures on completion of education, training, work experience, and on-the-job training. Additionally, the final rule adds required reporting for State agencies that serve mandatory E&T participants, which was not included in the IFR.

Below, table 1 provides a summary of the total effects of all provisions in the final rule, compared to the pre-IFR baseline. The *Baseline* column shows the annual costs for each final rule provision, prior to implementation of the IFR. The columns with *FY* headers show the effects of the final rule in that specific fiscal year. FY 2026 is the first implementation year and the first year in which the discount rate is applied. As noted previously, there are no anticipated impacts on SNAP benefit payments to households (transfers) and nominal burden-related costs to SNAP households. The cost for State agencies to conduct ongoing E&T program reporting and recordkeeping over five years (FY 2026 through FY 2030) is $4.33 million. The cost for Federal (FNS) staff to review and analyze the E&T outcome data provided by State agencies over five years is about $50,100. The total combined cost to State and Federal governments over five years, compared to pre-IFR policy, is approximately $4.38 million. All costs, except for those in discounted cost impact rows of table 1, are adjusted annually for inflation using the Consumer Price Index for Uban Wage Earners and Clerical Workers (CPI–W) fiscal year-over-fiscal year projections from OMB's Economic Assumptions for the FY 2025 Midsession Update.

TABLE 1—SUMMARY OF TOTAL COST IMPACTS, COMPARED TO PRE-IFR BASELINE *

[Adjusted annually for inflation **]

	Pre-IFR Baseline: ***	FY 2026	FY 2027	FY 2028	FY 2029	FY 2030	5-Year total
Costs Due to State Agency Burden (in 000s):							
Identifying State component measures	$0	$8.8	$9.1	$9.3	$9.5	$9.7	$46.3
Reporting employment and earnings measures	0	265.4	271.5	277.8	284.2	290.7	1,389.5
Reporting State component measures	0	88.5	90.5	92.6	94.7	96.9	463.2
Additional reporting for ABAWD pledge States	0	8.3	8.5	8.7	8.9	9.1	43.7
E&T Annual Report recordkeeping	0	4.4	4.5	4.6	4.7	4.8	23.2
Reporting educational measures	0	353.9	362.0	370.4	378.9	387.6	1,852.7
Reporting 7 participant characteristics for measures	0	44.2	45.3	46.3	47.4	48.4	231.6
Reporting E&T participant characteristics	0	44.2	45.3	46.3	47.4	48.4	231.6
Mandatory E&T program reporting	0	8.3	8.5	8.7	8.9	9.1	43.7
Total	0	826.2	845.2	864.6	884.5	904.8	4,325.5
Discounted Cost Impact (in 000s):							
7 percent	0	768.4	768.4	768.4	768.4	768.4	3,841.9
3 percent	0	801.4	801.4	801.4	801.4	801.4	4,007.1
Costs Due to Federal Burden (in 000s):							
Reviewing and analyzing E&T outcome data	$0	9.6	9.8	10.0	10.2	10.5	50.1
Discounted Cost Impact:							
7 percent	$0	8.9	8.9	8.9	8.9	8.9	44.5
3 percent	0	9.3	9.3	9.3	9.3	9.3	46.4

* Totals may not sum due to rounding.

** Estimates (excluding those in the discounted cost impact rows) were adjusted for inflation using BLS' CPI–W, from the Office of Management and Budget's Economic Assumptions in the FY 2025 Midsession Update.
*** Prior to the IFR taking effect on May 23, 2016.

The final rule's provisions will result in substantial benefits for FNS, State SNAP E&T programs, and SNAP E&T participants. Currently, research on the effects of SNAP E&T is limited and participant outcomes have not been quantified on a large scale. The improved reporting requirements finalized in this rule will allow FNS and State agencies to better measure and monitor the effectiveness of E&T programs and strategically improve those programs. FNS can use these data to assess which practices work well in SNAP E&T and share those best practices across State agencies. The final rule also allows FNS to require State agencies to modify their E&T State Plan if the data show inadequate outcomes in their E&T program. By improving E&T programs, participants will be better prepared for employment by acquiring the necessary skills to obtain and retain employment upon completion of E&T.

FNS expects State agencies will not incur implementation costs in excess of those incurred as a result of the IFR. The implementation costs associated with this final rule include one-time costs for developing new or modifying existing data collection systems for E&T programs. FNS expects State agencies will incur a small increase in recurring burden costs in excess of those incurred as a result of the IFR. We estimate an increase of 740 total hours from the burden hours included in the currently approved ICR due to the addition of reporting on educational measures and State agencies that serve mandatory E&T participants. As a result, annual State E&T reporting and recordkeeping will cost an additional $61,764 per year in FY 2026 dollars,[14] compared to the estimated costs in the current ICR. However, the Department acknowledges that there are uncertainties which could affect State burden (see *Uncertainties* section). Compared to a pre-IFR baseline, ongoing State agency burden as a result of the final rule are estimated to be approximately 186.8 hours per State, or 9,899 total hours annually.

The Department funds SNAP E&T programs through E&T grants and additional grants for State agencies that pledge to serve all individuals who are subject to the SNAP work requirement for able-bodied adults without dependents (ABAWDs) and are at-risk of losing eligibility due to time-limited participation. The Department allocates these funds annually to State agencies based on the percentage of work registrants and time-limited participants in each State. State agencies may use their 100-percent federally funded E&T grants to pay for all costs associated with the implementation of this final rule. As such, the Department estimates the net cost to State agencies for these activities will be $0. However, the Federal government will provide 50-percent reimbursement for administrative costs that exceed the State agencies' E&T grants.[15]

State Agency Implementation Costs

State agencies may find it necessary to implement system modifications to report on new measures that were not required in the IFR, including educational measures and mandatory E&T program measures. However, the Department estimates the new measures will not add to the overall implementation burden costs associated with the IFR included in the currently approved ICR (see table 2, below). This assumes that State agencies would rely on government entities with which they already have data matching or sharing agreements, but may need to renegotiate those agreements, such as with State Unemployment Insurance agencies for the matching of quarterly wage records, as well as other existing sources to obtain administrative data, including SNAP eligibility systems. The Department acknowledges that the actual number of hours to implement this final rule will vary by State agency (see *Uncertainties* section).

According to the Bureau of Labor Statistics data at time of analysis, the fully loaded median hourly rate for functions performed by State agency workers for SNAP is $77.03 in 2023 dollars.[16] Using this hourly rate and CPI–W projections from OMB to adjust for inflation, the one-time implementation costs associated with all provisions in the final rule, in comparison to the pre-IFR baseline, will total an estimated $2.3 million in FY 2026.

TABLE 2—IMPLEMENTATION COSTS

[In FY2026 dollars]

Number of respondents	Hours per response	Total annual burden hours (IFR)	Total annual burden hours (final rule)	Difference (IFR – final rule)	Total start-up costs
53	520	27,560	27,560	0	$2,300,278

State Agency Ongoing Costs and Savings

The Department notes that States will be permitted to cover the burden-related costs associated with this final rule with 100-percent federally funded E&T grants. Therefore, the Department does not expect State agencies to directly incur ongoing costs because of the final rule. All costs in this section are in FY 2026 dollars and are expected to increase annually due to inflation.

Provisions that are unchanged from the interim final rule (IFR) to the final rule: Burden hours identified in this section are included in the currently approved ICR and are unchanged by the final rule. Costs noted in this section are relative to the pre-IFR baseline.

Identifying State component measures in E&T State Plan. State agencies are

[14] Based on a $57.92 median hourly wage for Computer and Information Systems Managers (11–3021) in May 2023 and multiplied by 1.33 for a fully loaded wage of $77.03. Base wage derived from BLS Occupational Employment and Wage Statistics data (found here: *https://www.bls.gov/oes/current/naics4_999200.htm#11-0000*) and inflated using OMB's FY 2025 Mid-Session CPI–W projections in future years.

[15] Due to the uncertainties around States' decisions to use their E&T grants to fully fund implementation of this rule, the Department cannot quantify costs to the Federal government with more specificity.

[16] Based on a $57.92 median hourly wage for Computer and Information Systems Managers (11–3021) in May 2023 and multiplied by 1.33 for a fully loaded wage of $77.03. Base wage derived from BLS Occupational Employment and Wage Statistics data (found here: *https://www.bls.gov/oes/current/naics4_999200.htm#11-0000*).

required to identify in their E&T State Plan an outcome reporting measure for every component that serves at least 100 participants annually. Each State SNAP agency is estimated to spend two hours annually to identify component measures (106 total hours, annually), with a total annual cost of $8,847. There is no change in burden hours from the currently approved ICR.

Reporting employment and earnings measures. State agencies are required to report on employment and earnings measures for E&T participants and former participants in their E&T Annual Report. Fifty-three State agencies are expected to spend 60 hours annually to report these measures (3,180 total hours, annually), with a total annual cost of $265,417. There is no change in burden hours from the currently approved ICR.

Reporting State component measures: State agencies are required to report component measures for E&T components serving at least 100 participants a year. Each State agency is expected to spend 20 hours per year on this requirement (1,060 total burden hours, annually), with a total annual cost of $88,472. There is no change in burden hours from the currently approved ICR.

Additional reporting for ABAWD pledge States. State agencies that have committed to offering at-risk ABAWDs participation in a qualifying activity and have received additional funds are required to report on the use of those funds. Ten State agencies [17] are each expected to spend 10 hours on this requirement (100 total hours, annually), with a total annual cost of $8,346. There is no change in burden hours from the currently approved ICR.

Recordkeeping for E&T Annual Report: State agencies are required to conduct recordkeeping for the E&T Annual Report. Each State agency is expected to spend one hour on this task per year (53 total hours, annually), with a total annual cost of $4,424. There is no change in burden hours from the currently approved ICR.

Provisions that are revised or new in the final rule: Costs and savings identified in this section differ from those caused by the IFR, which are included in the currently approved ICR. Costs and savings in this section are discussed relative to the currently approved ICR and the pre-IFR baseline.

New requirement to report educational measures, replacing requirement to report E&T annual measures in IFR. State agencies will be required to report on new educational measures for attainment of a credential or certificate and measurable skill gains for all E&T participants enrolled in education or training programs. These measures align with Workforce Innovation and Opportunity Act (WIOA) programs and replace the previous reporting measures in the IFR that required State agencies to report on completion of education, training, work experience, and on-the-job training. Each of the 53 State agencies are expected to spend 80 hours annually reporting these measures (4,240 total hours, annually) with a total annual cost of $353,889. Because the reporting requirements that are being replaced represent 3,600 total burden hours in the currently approved ICR, this change in the final rule results in a net increase of 640 annual burden hours and a net annual cost increase of $53,417.

Modified requirement to report participant characteristics for reporting measures. State agencies are required to report on four participant characteristics for each employment, earnings and educational measures under the IFR. The final rule adds three additional participant characteristics for the reporting measures: race and/or ethnicity, and mandatory E&T participants deemed ineligible due to failure to comply with mandatory E&T. Each State agency is expected to spend 10 hours annually on this requirement (530 total burden hours, annually), with a total annual cost of $44,236. The requirement to report on four participant characteristics, which has become seven characteristics in this final rule, was previously included with another requirement in the IFR (See *Modified requirement to report E&T participant characteristics,* in the next paragraph of this section). That requirement was approved for a total of 1,060 burden hours in the currently approved ICR. The 530 total burden hours for this requirement were transferred from those 1,060 burden hours and do not reflect new burden hours.

Modified requirement to report E&T participant characteristics. The final rule is adding race and/or ethnicity to the list of E&T participant characteristics that State agencies are required to report as established in the IFR. Each of the 53 State agencies are expected to spend 10 hours annually on this requirement, with a total cost of $44,236 annually. State agencies were previously expected to spend 20 hours on this requirement under the currently approved ICR because it included the required reporting on four participant characteristics for reporting measures. However, this participant characteristics reporting requirement has been modified to seven participant characteristics and renumbered in the final rule (see *Modified requirement to report seven participant characteristics for reporting measures* in this section). Ten of the allotted 20 burden hours for this provision were transferred to the seven participant characteristics reporting requirement. Therefore, this modified requirement does not result in an overall change in annual burden hours compared to the currently approved ICR.

New requirement for mandatory E&T program reporting. State agencies that serve mandatory E&T participants will be required to report on the number of SNAP participants who were required to participate in E&T and were referred to E&T, and the number and percentages of SNAP participants who were deemed ineligible for failure to comply with E&T requirements. This is a new provision that was not included in the IFR. Each State agency that serves mandatory E&T participants is expected to spend 10 hours implementing this new requirement. On average, 10 State agencies serve mandatory E&T participants (resulting in 100 total burden hours, annually), with a total annual cost of $8,346.

Annual Federal Government Cost

FNS National Office employees must review and analyze the outcome data provided by State agencies as required by this final rule. An FNS National Office analyst at a GS–13 Step 5 level is expected to spend two hours to review each of the 53 State agencies' outcome data once per year for a total annual cost of $9,480, compared to the pre-IFR baseline.[18] It is also estimated that an FNS National Office analyst at the GS–14 Step 1 level will spend one hour reviewing and approving the information, for a total annual cost of $93.25. The combined Federal costs associated with FNS review and analysis of E&T outcome data is $9,573 in FY 2026 dollars. The final rule does not cause a change in Federal burden hours compared to the currently approved ICR.

Annual Household Administrative Burden

The Department estimates that household burden due to the final rule will be minimal. A small number of E&T participants may face additional

[17] The estimation of 10 ABAWD pledge States is based on the average number of participating States prior to the COVID–19 Public Health Emergency.

[18] Based on fully loaded wage (multiplied by 1.33) in FY 2024. Hourly wage rates available here: *https://www.opm.gov/policy-data-oversight/pay-leave/salaries-wages/salary-tables/pdf/2024/DCB_h.pdf.*

reporting burden due to the need to contact these individuals to track outcomes. However, the Department expects State agencies to bear the primary burden of tracking and reporting E&T outcomes. The final rule does not cause a change in annual household administrative burden compared to the currently approved ICR.

Uncertainties

There is considerable variation in the size and scope of States' E&T programs. There is also significant variation in the structure and functionality of SNAP E&T data systems and State SNAP eligibility systems. This variability makes it difficult to anticipate the changes that State agencies might need to make to collect and report the required outcome data. For these estimates, the Department assumed that State agencies use a combination of methods to collect data, including using existing automated systems data, collecting new data, and collecting data for a sample of participants. Although the exact methods State agencies use could affect the cost, the Department expects that the total cost of the final rule will be minimal.

Additionally, there is uncertainty regarding how State agencies will fund costs associated with State agency burden hours in this final rule. State agencies will be able to use their 100-percent federally funded E&T grants to pay for all costs associated with this rule, so the Department anticipates that the net cost to State agencies will be $0. However, State agencies may choose not to use their E&T grant funds or to use only a portion of the funds, in which case they would incur administrative expenses.

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601–612) requires Agencies to analyze the impact of rulemaking on small entities and consider alternatives that would minimize any significant impacts on a substantial number of small entities. Pursuant to that review, it has been certified that this rule would not have a significant impact on a substantial number of small entities. This final rule would not have an impact on small entities because the provisions of this final rule apply to State agencies, which are not small entities as defined by the Regulatory Flexibility Act.

Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this rule as meeting the criteria in 5 U.S.C. 804(2).

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local and Tribal governments and the private sector. Under section 202 of the UMRA, the Department generally must prepare a written statement, including a cost benefit analysis, for proposed and final rules with ''Federal mandates'' that may result in expenditures by State, local or tribal governments, in the aggregate, or the private sector, of $100 million or more in any one year. When such a statement is needed for a rule, section 205 of the UMRA generally requires the Department to identify and consider a reasonable number of regulatory alternatives and adopt the most cost effective or least burdensome alternative that achieves the objectives of the rule.

This final rule does not contain Federal mandates (under the regulatory provisions of Title II of the UMRA) for State, local and tribal governments, or the private sector of $100 million or more in any one year. Thus, the rule is not subject to the requirements of sections 202 and 205 of the UMRA.

Executive Order 12372

This Supplemental Nutrition Assistance Program is listed in the Catalog of Federal Domestic Assistance under Number 10.551 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 2 CFR chapter IV.)

Federalism Summary Impact Statement

Executive Order 13132 requires Federal agencies to consider the impact of their regulatory actions on State and local governments. Where such actions have federalism implications, agencies are directed to provide a statement for inclusion in the preamble to the regulations describing the agency's considerations in terms of the three categories called for under section (6)(b)(2)(B) of Executive Order 13132.

The Department has considered the impact of this rule on State and local governments and has determined that this rule does not have federalism implications. Therefore, under section 6(b) of the Executive Order, a federalism summary is not required.

Executive Order 12988, Civil Justice Reform

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is intended to have preemptive effect with respect to any State or local laws, regulations, or policies which conflict with its provisions, or which would otherwise impede its full and timely implementation. This rule is not intended to have retroactive effect unless so specified in the Effective Dates section of the final rule. Prior to any judicial challenge to the provisions of the final rule, all applicable administrative procedures must be exhausted.

Civil Rights Impact Analysis

FNS has reviewed the final rule, in accordance with the Department Regulation 4300–004, ''Civil Rights Impact Analysis'' to identify and address any major civil rights impacts the final rule might have on minorities, women, and persons with disabilities. FNS specifically prohibits the State and local government agencies that administer the Program from engaging in actions that discriminate based on race, color national origin, sex (including gender identity and sexual orientation), religious creed, age, disability, and political beliefs. SNAP's nondiscrimination regulation can be found at 7 CFR 272.6(a). The final rule does not change these requirements. The final rule will require State agencies to collect and report outcome data on SNAP E&T programs and will not change work requirements or impact the population subject to work requirements. FNS will provide implementation guidance to State agencies through webinars or policy meetings for State agencies requesting technical assistance. FNS will also assist State agencies in improving the collection and analysis of State E&T data systems. FNS will provide information to program stakeholders, including State agencies and the general public, using a variety of communication methods: in-person, written and electronic, including ensuring that program information is generally available in multiple languages, and new materials on FNS' websites are compliant with section 508 of the Rehabilitation Act of 1973.

Executive Order 13175

Executive Order 13175 requires Federal agencies to consult and coordinate with Tribes on a government-to-government basis on policies that have Tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian Tribes, on the relationship

between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes. This rule will not have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes. Thus, Executive Order 13175 does not apply to this action.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. Chap. 35; 5 CFR 1320) requires the Office of Management and Budget (OMB) approve all collections of information by a Federal agency before they can be implemented. Respondents are not required to respond to any collection of information unless it displays a current valid OMB control number.

In accordance with the Paperwork Reduction Act of 1995, this final rule will contain information collections that are subject to review and approval by the Office of Management and Budget; therefore, FNS is submitting for public comment the changes in the information collection burden that would result from adoption of the proposals in this final rule.

Comments on this final rule must be received by January 17, 2025. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Title: SNAP: Employment and Training Program Performance Measurement, Monitoring and Reporting Requirements

OMB Number: 0584–0614.

Form Number: Not Applicable.

Expiration Date: December 31, 2025.

Type of Request: Revision of a currently approved collection.

Abstract: As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)), FNS is submitting this information collection to OMB for its review and approval. The final rule will require State agencies to collect and report annually on: (1) the number and percentage of all E&T participants who are in unsubsidized employment during the second and fourth quarters after completion of participation in E&T; (2) Median quarterly wages of the E&T participants who are in unsubsidized employment during the second quarter after completion of participation in E&T; (3) educational measures for attainment of credential or certificates and measurable skill gains for all E&T participants enrolled in education or training programs; (4) employment, earnings and educational measures for each of seven unique participant characteristics; (5) certain unique characteristics of all E&T participants that participate in E&T during the preceding Federal fiscal year.

The final rule also requires State agencies to identify in the annual E&T State Plan appropriate reporting measures for each proposed component that is projected to serve a threshold of at least 100 participants a year and report on those measures in the E&T Annual Report. Additionally, the final rule requires that State agencies that have committed to offering all ABAWDs at risk of losing eligibility due to time-limited participation a slot in a qualifying activity and have received an additional allocation of funds, to report information regarding the use of those funds.

The information collection for the SNAP E&T Performance Measurement, Monitoring and Reporting Requirements is currently approved under OMB Control No. 0584–0614, expiration date December 31, 2025. The changes made to this information collection because of the final rule is described below. Once OMB approves the information collection request associated with this final rulemaking activity, the agency will publish a separate notice in the **Federal Register** announcing OMB approval.

Change from Interim Final Rule: The interim final rule established a reporting measure for the completion of an educational, training, work experience or on-the-job training component under 7 CFR 273.7(c)(17)(iv). The final rule removes and replaces this measure with two educational measures under the renumbered 7 CFR 273.7(c)(17)(ii).

The interim final rule required State agencies to disaggregate each of the reporting measures by four key participant characteristics under 7 CFR 273.7(c)(17)(vi). The final rule removes this disaggregation requirement and under the renumbered 7 CFR 273.7(c)(17)(iii) requires the State agencies to report the reporting measures of employment, earnings and educational measures for each of the key participant characteristics, including two additional key participant characteristics for race and/or ethnicity and mandatory E&T participants deemed ineligible due to failure to comply with mandatory E&T.

The interim final rule required State agencies to report the number and percentage of all E&T participants that participated during the reporting fiscal year for seven (7) participant characteristics under 7 CFR 273.7(c)(17)(v). The final rule modifies this requirement by adding race and/or ethnicity to the participant characteristics to be reported.

The final rule under 7 CFR 273.7(c)(17)(iv) adds additional reporting requirements for State agencies that serve mandatory E&T participants.

The Department received some comments on the cost and hour burden, as well as comments related to the underlying policy. One commenter noted that the regulations require several data elements that some State agencies currently do not collect that may require system implementation costs, including one-time capital costs, additional reporting costs for collecting and creating the required reporting measures and ongoing costs for operating and maintaining those system. The commenter suggested that the final regulations should explain how the Department determined that the interim rule did not meet the $100 million threshold that would subject the regulation to the Federal Unfunded Mandates Reform Act (UMRA). The commenter also suggested that the final regulations should state the amount of additional funds the Department would make available to States to pay for these implementation costs. The Department appreciates the comment and would note that in determining the cost to implement the Department considered the analysis conducted of FY 2013 State agency E&T State Plans that indicated that thirty-six State agencies tracked the number of E&T participants that enter employment. The Department anticipated that some of the system implementation costs, including the one-time capital costs and the ongoing costs for collecting and reporting, could be paid for using the existing Federal grant funds States receive to operate E&T and that State funds in excess of

those grant funds are reimbursed at a 50 percent rate by the Federal government.

One State agency believed, based on their experience, that the burden estimate for rule implementation was underestimated by the Department. They noted that they had recently completely redesigned their E&T data system that resulted in 14,577 hours of contractor time and 9,400 hours of State agency staff time totaling approximately $1.5 million. The commenter estimated that modifications to implement the new reporting requirements would require at least 4,000 hours of contractor time and 2,600 hours of State staff for an estimated cost of approximately $546,000. The commenter believes that other States would likely need to invest a similar amount of time and money to comply with the new reporting requirements. The Department appreciates the commenter's experience in redesigning their E&T data system, the Department does not believe that this same experience would be borne by other State agencies, due to the different size and complexity of States' E&T programs. In determining the initial reporting and recordkeeping burden estimate, the Department relied on the analysis that indicated thirty-six State agencies had identified reporting measures and collected outcome data and that the remaining States would need to develop systems to collect and report the required data. The Department considered that in the first year that the interim final rule was published, State agencies would need to develop E&T data collection systems, modify existing system, or build interfaces between SNAP eligibility and SNAP E&T data collection systems. Several of the measures, such as employment, earnings, characteristics of E&T participants, State agencies could use a variety of sources to obtain administrative data, such as SNAP eligibility systems. The Department also anticipates that some State agencies would rely on government entities with which they already had agreements and would need to renegotiate those agreements, such as with State's UI agencies for the matching of quarterly wage records.

One State agency stated that they estimated that ongoing reporting and maintenance would total 1,500 hours and that the Department's estimated burden of 231 hours is far below what States would need to spend in ongoing maintenance efforts. This State agency also stated that the burden for reporting participants who complete an educational or training program six months after completing the E&T program was underestimated by the Department. The commenter noted that they do not currently track completion of education or training programs, and this would require a manual process to contact participants six months after completing the E&T program. They estimate that this manual process would result in approximately 2,600 staff hours to collect a single data element and that this is not an efficient use of resources. The State agency acknowledged that the State's quarterly wage records could be used to report participant's employment and earnings after completion. However, they noted that not all individuals have wage information in this data source and that discrepancies in the Federal Employer Identification Number and self-employment contribute to the largest portion of unavailable wage matches for approximately 20 percent of participants. For those cases, the commenter estimates that a manual process to gather quarterly earnings information would result in approximately 750 hours of staff time. Lastly, the State agency noted that they estimate the overall burden to collect and report the required information would be approximately 3,600 hours annually. They do not believe that this is an efficient use of resource for their State E&T program. The Department appreciates the comments and experience of this State agency. The Department again relied on the basis that a vast majority of State agencies already tracked E&T participants for various outcome measures, including obtainment of employment. The Department assumed that State agencies could use a combination of methods to collect the data including existing automated systems data, new data collection, and some contact with SNAP E&T participants. Further, the Department assumed that manual processes, such as contacting E&T participants would be minimal. As stated previously, given the variations of State's E&T programs, the Department does not believe the experience of this one State agency would equate into a similar experience by all State agencies.

Respondents: State, local or Tribal governments.

Estimated Number of Respondents: 53.

Estimated Number of Responses per Respondent: One response per year for each State agency that administers the SNAP E&T program. State agencies will be required to report their outcome data annually.

Estimated Total Annual Responses: 53.

Estimated Time per Respondent: 25.32.

Estimated Total Annual Burden Hours on Respondents: 9,899.

Estimated Hourly Wage Rate (Fully-Loaded): $75.25.

Estimated Total Annual Burden Cost on Respondents: $762,519.97.

According to the Bureau of Labor Statistics as of May 2023, for Occupational Group (11–3021),[19] has an hourly mean wage for functions performed by State agency workers for the SNAP program are estimated at $57.92 median hourly wage per staff. Including 33% for fringe benefits the fully loaded hourly rate per staff is estimated at $77.03 ($57.92 * 33% = $19.11 + $57.92).

Total Recordkeeping Burden	53.00	1.00	53.00	1.00	53.00	77.03	4,082.59
Total Burden for #0584–0614	53.00	7.38	391.00	25.32	9,899.00	77.03	762,519.97

Effect of State Agencies: The Department has estimated that the effect of State agencies will be two-fold. First a one-time capital cost for developing new or modifying existing data collection systems. And second, an annual reporting burden for collecting and reporting data for the required E&T Annual Report. States may also incur annual operating and maintenance costs for their data collection systems.

Prior to Implementation: In the first year that the final rule is published, States may need to modify E&T data systems, or their processes for data collection relating to collecting educational reporting measures.

E-Government Act Compliance

The Department is committed to complying with the E-Government Act, 2002 to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

List of Subjects

7 CFR Part 271

Administrative practice and procedures, Food stamps, Grant programs-social programs.

7 CFR Part 273

Administrative practice and procedures, Food stamps, Grant programs-social programs, Penalties, Reporting and recordkeeping.

Accordingly, 7 CFR parts 271 and 273 are amended to read as follows:

■ 1. The authority citation for parts 271 and 273 continues to read as follows:

Authority: 7 U.S.C. 2011–2036.

PART 271—GENERAL INFORMATION AND DEFINITIONS

■ 2. Amend § 271.2 by:

■ a. Adding in alphabetical order a definition for ''Completion of participation in E&T'';

■ b. Revising the definition of ''Employment and Training (E&T) participant'';

■ c. Adding in alphabetical order a definition for ''Former E&T participant''.

The additions and revisions read as follows:

§ 271.2 Definitions.

* * * * *

Completion of participation in E&T means that an E&T participant has not received any E&T services for at least 90 days and no future services are planned.

* * * * *

Employment and Training (E&T) participant means an individual who meets the definition of a mandatory or voluntary participant who is referred to E&T and begins at least one part of an E&T program, including orientation, assessment, case management services or a component.

* * * * *

Former E&T participant means an individual who is no longer participating in E&T services because the individual is no longer receiving SNAP benefits.

* * * * *

■ 3. Amend § 271.8 by adding an entry in the table for ''273.7(c)(17)'' in numerical order to read as follows:

§ 271.8 Information collection/ recordkeeping—OMB assigned control numbers.

7 CFR section where requirements are described	Current OMB Control No.
* * * * *	
273.7(c)(17)	0584–0614
* * * * *	

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

■ 4. Amend § 273.7 by revising paragraphs (c)(6)(xvii) and (c)(16) and (17) to read as follows:

§ 273.7 Work provisions.

* * * * *

(c) * * *

(6) * * *

(xviii) For each component that is expected to include 100 or more participants, reporting measures that the State will collect and include in the annual report in paragraph (c)(17) of this section. Such measures may include:

(A) The percentage and number of program participants who received E&T services and are in unsubsidized employment subsequent to the receipt of those services;

(B) The percentage and number of participants who obtain a recognized credential, a registered apprenticeship, or a regular secondary school diploma (or its recognized equivalent), while participating in, or within 1 year after receiving E&T services;

(C) The percentage and number of participants who are in an education or training program that is intended to lead to a recognized credential, a registered apprenticeship an on-the-job training program, a regular secondary school diploma (or its recognized equivalent), or unsubsidized employment;

(D) Measures developed to assess the skills acquisition of E&T program participants that reflect the goals of the specific components including the percentage and number of participants who are meeting program requirements or are gaining skills likely to lead to employment; and

(E) Other indicators approved by FNS in the E&T State Plan; and

* * * * *

(16) FNS will assess the effectiveness of E&T programs in preparing E&T participants for employment, including obtaining of necessary skills and increasing the number of E&T participants who obtain and retain employment upon completion of participation in E&T. FNS will also assess that program activities are appropriate to meet the needs of individuals referred by the State agency to an E&T program. FNS may use all available information, including but not limited to, E&T State Plans, E&T Program Activity Reports, Annual Reports, and Management Evaluations. Based on this information, FNS will assess an E&T program's effectiveness across various categories including, but not limited to, intentional program

design, integrated eligibility, deliberate program operations and meaningful outcomes.

(i) FNS may require a State agency to make modifications to its SNAP E&T plan to improve outcomes if FNS determines that the E&T outcomes are inadequate. FNS will consider these modifications in determining whether to approve a State's E&T plan.

(ii) [Reserved]

(17) The State agency shall submit an annual E&T report by April 15 each year that contains the following:

(i) Employment and Earnings Reporting Measures: State agencies shall report four consecutive quarters of data from the two previous Federal fiscal years ending the preceding September 30 for the following measures:

(A) The number and percentage of E&T participants and former participants who are in unsubsidized employment during the second quarter after completion of participation in E&T.

(B) Median quarterly earnings of the E&T participants and former participants who are in unsubsidized employment during the second quarter after completion of participation in E&T.

(C) The number and percentage of E&T participants and former participants who are in unsubsidized employment during the fourth quarter after completion of participation in E&T.

(ii) Educational Reporting Measures: State agencies shall report data for the Federal fiscal year ending the preceding September 30 for the following measures:

(A) *Attainment of a credential or certificate.* The number and percentage of E&T participants enrolled in an education or training program, excluding those in on-the-job training, customized training or transitional jobs, who attain a recognized postsecondary credential, certificate or a secondary school diploma, or its recognized equivalent, during participation in or upon completion of participation in E&T.

(B) *Measurable skill gains.* The number and percentage of E&T participants who, during the preceding Federal fiscal year, are in an education or training program that leads to a recognized postsecondary credential or employment and who are achieving measurable skill gains, defined as documented academic, technical, occupational, or other forms of progress, towards such a credential or employment.

(iii) State agencies shall report the employment and earnings measures specified in paragraphs (c)(17)(i)(A) through (C) and educational measures specified in paragraphs (c)(17)(ii)(A) and (B) for each of following participant characteristics:

(A) By Race and/or Ethnicity;

(B) Voluntary E&T Participants;

(C) Mandatory E&T Participants;

(D) Mandatory E&T Participants deemed ineligible due to failure to comply with mandatory E&T;

(E) E&T Participants who obtained high school diploma or equivalency prior to participation in E&T; and

(F) ABAWDs.

(iv) State agencies that serve mandatory E&T participants shall report for the Federal fiscal year ending the preceding September 30 the following:

(A) the unduplicated number of SNAP participants who were required to participate in E&T;

(B) of those required to participate the unduplicated number and percentage referred to E&T; and

(C) the unduplicated number and percentage of SNAP participants that were determined ineligible for failure to comply with E&T requirements.

(v) The number and percentage of E&T participants for the Federal fiscal year ending the preceding September 30 who:

(A) Are voluntary E&T participants;

(B) Are mandatory E&T participants;

(C) Have received a high school diploma or equivalent prior to being provided with E&T services;

(D) Are ABAWDs;

(E) Are English language learners;

(F) By Gender identity;

(G) Are within each of the following age ranges: 16–17, 18–35, 36–49, 50–59, 60 or older; and

(H) By Race and/or Ethnicity

(vi) Reports for the measures identified in a State's E&T plan related to components that are designed to serve at least 100 participants a year; and

(vii) States that have committed to offering all at-risk ABAWDs participation in a qualifying activity and have received an additional allocation of funds as specified in paragraph (d)(3) of this section shall include:

(A) The monthly average number of individuals in the State who meet the conditions in paragraph (d)(3)(i) of this section;

(B) The monthly average number of individuals to whom the State offers a position in a program described in § 273.24(a)(3) and (4);

(C) The monthly average number of individuals who participate in such programs; and

(D) A description of the types of employment and training programs the State agency offered to at risk ABAWDs and the availability of those programs throughout the State.

(viii) States may be required to submit the annual report in a standardized format based upon guidance issued by FNS.

* * * * *

■ 5. Amend § 273.24 by adding paragraph (a)(4) to read as follows:

§ 273.24 Time limit for able-bodied adults.

(a) * * *

(4) *Workfare program* means:

(i) A program under § 273.7(m); or

(ii) A comparable program established by a State or political subdivision of a State.

* * * * *

Tameka Owens,

Acting Administrator and Assistant Administrator, Food and Nutrition Service.

[FR Doc. 2024–26809 Filed 11–15–24; 8:45 am]

BILLING CODE 3410–30–P

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1220

[Doc. No. AMS–LP–23–0079]

Soybean Promotion and Research: Adjustments to Representation on the United Soybean Board

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule adjusts the number of members on the United Soybean Board (Board) to reflect changes in production levels that have occurred since the Board was last reapportioned in 2021. As required by the Soybean Promotion, Research, and Consumer Information Act (Act), membership on the Board is reviewed every 3-years and adjustments are made accordingly. These adjustments decrease Board membership for the State of North Dakota from four members to three members and increase Board membership for the State of New York from one member to two members, thus the total number of Board members will remain at 77. These changes will be reflected in the Soybean Promotion and Research Order (Order) and become effective with the Secretary of Agriculture's (Secretary) appointments for terms in 2025.

DATES: This final rule is effective as of December 18, 2024.

FOR FURTHER INFORMATION CONTACT: Jason Julian, Research and Promotion Division, at (202) 731–2149; or by email at *jason.julian@usda.gov.*

SUPPLEMENTARY INFORMATION:

Executive Orders 12866, 13563 and 14094

USDA issues this final rule in conformance with Executive Orders (E.O.) 12866, 13563, and 14094. Executive Orders 12866 and 13563, and 14094 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. E.O. 14094 reaffirms, supplements, and updates E.O. 12866 and further directs agencies to ask for and consider input from a wide range of affected and interested parties through a variety of means. This final rule is not a significant regulatory action within the meaning of E.O. 12866. So, this action has not been reviewed by the Office of Management and Budget (OMB).

Executive Order 13175

This action has been reviewed per the requirements of E.O. 13175, Consultation and Coordination with Indian Tribal Governments, which requires agencies to consider whether their rulemaking actions would have Tribal implications. The review revealed that this regulation would not have substantial and direct efforts on Tribal governments or significant Tribal implications.

Executive Order 12988

This final rule was reviewed under E.O. 12988, Civil Justice Reform. This rule is not intended to have retroactive effect.

The Act (7 U.S.C. 6309) provides that nothing in the Act may be construed to preempt or supersede any other program relating to soybean promotion organized and operated under the laws of the U.S. or any State. There are no administrative proceedings that must be exhausted prior to any judicial challenge to the provisions of this rule.

Paperwork Reduction Act

In accordance with OMB regulations (5 CFR part 1320) that implement the Paperwork Reduction Act of 1995 (44 U.S.C. part 35), the information collection and recordkeeping requirements contained in the Order and accompanying Rules and Regulations have previously been approved by OMB and were assigned OMB control number 0581–0093.

Background

The Board was initially appointed on July 11, 1991, per the provisions of the Act (7 U.S.C. 6301–6311), and the Order (7 CFR part 1220) issued thereunder. The Order set up an initial Board with sixty members, composed of soybean producers. For purposes of setting up the Board, the United States was divided into 31 States and geographical units. Representation on the Board from each unit was determined by the level of production in each unit.

Reapportionment

Section 1220.201(c) of the Order provides that at the end of each 3-year period, the Board shall review soybean production levels in the geographic units throughout the United States. Section 1220.130 of the Order defines a unit as each State, or group of States, which is represented on the Board. The Board may recommend to the Secretary that Board membership for each unit be changed to reflect current production levels.

Section 1220.201(d) of the Order provides that at the end of each 3-year period, the Secretary must review the volume of production of each unit and adjust the boundaries of any unit and the number of Board members from each such unit as necessary to conform with the criteria set forth in § 1220.201(e): (1) To the extent practicable, States with annual average soybean production of less than 3 million bushels shall be grouped into geographically contiguous units, each of which has a combined production level equal to or greater than 3 million bushels, and each such group shall be entitled to at least 1 member on the Board; (2) units with at least 3 million bushels, but fewer than 15 million bushels shall be entitled to 1 board member; (3) units with 15 million bushels or more but fewer than 70 million bushels shall be entitled to 2 Board members; (4) units with 70 million bushels or more but fewer than 200 million bushels shall be entitled to 3 Board members; and (5) units with 200 million bushels or more shall be entitled to 4 Board members.

The Board was last reapportioned in 2021. The total Board membership decreased from 78 to 77 members, with Alabama decreasing one member. The final rule was published in the **Federal Register** (86 FR 61668) on November 8, 2021, and became effective with the 2022 appointments.

This final rule keeps total membership of the Board at 77 members. Production data was used for years 2018–2022 (excluding the crops in years in which production was the highest and in which production was the lowest in each State) was reported by USDA's National Agricultural Statistics Service (NASS). This change does not affect the number of geographical units.

This final rule adjusts representation on the Board as follows:

State	Previous representation	Current representation
New York	1	2
North Dakota	4	3

Board adjustments by this final rule will become effective with the 2025 appointment process.

Summary of Comments

A proposed rule was published in the **Federal Register** (89 FR 51277) on June 17, 2024, with a 30-day comment period. USDA received three comments. One comment communicated displeasure for North Dakota's decreased number from four seats to three seats. Upon reviewing the requirements of the Act and Order, USDA determined that leaving the North Dakota seats at four would not be consistent with the Act and Order, which requires that at the end of each 3-year period, the Secretary review the volume of production of each unit and adjust the boundaries of any unit and the number of Board members from each such unit as necessary to conform with the formula to determine the number of directors for each unit set forth in § 1220.201(e) of the Order. This was done by calculating production data for years 2018–2022 (excluding the crops in years in which production was the highest and in which production was the lowest in each State) as reported by USDA's NASS, resulting in a 3-year average for North Dakota that fell below the required number of bushels to retain four seats under § 1220.201(e)(5) of the Order. Accordingly, no change is made in response to this comment.

One comment was in favor of the seat adjustments for North Dakota and New York.

One comment was not germane to the proposed rule.

Regulatory Flexibility Act

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612), the Agricultural Marketing Service (AMS) considered the economic effect of this action on small entities and determined that this final rule would not have a significant economic impact on a substantial number of small entities. The purpose of the RFA is to fit regulatory actions to the

scale of businesses subject to such actions in order that small businesses will not be unduly burdened.

Effective August 19, 2019, the Small Business Administration (SBA) (13 CFR 121.201) published an interim final rule (84 FR 34261) that adjusts the monetary-based size standards for inflation. As a result of this rule, the size classification for soybean producers changed from sales of $750,000 or less to sales of $1,000,000 or less. There are an estimated 413,358 soybean producers and an estimated 10,000 first purchasers who collect the assessment, most who would be considered small businesses under the criteria set up by SBA.

According to USDA's NASS 2022 Census of Agriculture, the number of operations in the United States with soybean production totaled 270,851.[1] The most recent (2022) Census of Agriculture data show that roughly 19 percent of producers with soybean production, or 52,756 operations, have annual receipts of $1,000,000 or more.[2] Therefore, most soybean producers, 81 percent, are considered small businesses with the new SBA guidance. It should be noted that producers are only indirectly affected by this final rule.

This final rule imposes no new burden on the industry, as it only adjusts representation on the Board to reflect changes in soybean production. The adjustments are required by the Order and do not result in a change to Board membership, which will remain at 77 members.

AMS is committed to following e-Government Act of 2002 to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to government information and services, and for other purposes.

USDA has not found any relevant Federal rules that duplicate, overlap, or conflict with this rule.

List of Subjects in 7 CFR Part 1220

Administrative practice and procedure, Advertising, Agricultural research, Marketing agreements, Reporting and recordkeeping requirements, Soybeans.

For the reasons set forth in the preamble, the Agricultural Marketing Service amends 7 CFR part 1220 as follows:

PART 1220—SOYBEAN PROMOTION, RESEARCH, AND CONSUMER INFORMATION

■ 1. The authority citation for 7 CFR part 1220 continues to read as follows:

Authority: 7 U.S.C. 6301–6311 and 7 U.S.C. 7401.

■ 2. Amend § 1220.201 by revising paragraph (a) to read as follows:

§ 1220.201 Membership of Board.

(a) For the purposes of nominating and appointing producers to the Board, the United States shall be divided into thirty-one geographic units and the number of Board members from each unit, subject to paragraphs (d) and (e) of this section shall be as follows:

TABLE 1 TO PARAGRAPH (a)

State/unit	Number of members
South Dakota	4
Ohio	4
Nebraska	4
Missouri	4
Minnesota	4
Iowa	4
Indiana	4
Illinois	4
North Dakota	3
Wisconsin	3
Tennessee	3
Mississippi	3
Michigan	3
Kentucky	3
Kansas	3
Arkansas	3
Virginia	2
Pennsylvania	2
North Carolina	2
Maryland	2
Louisiana	2
New York	2

[Docket No. FAA–2024–2580; Amdt. Nos. 11–70, 61–158, 68–3, and 91–380]

RIN 2120–AM06

Regulatory Updates to BasicMed

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule implements, without interpretation, the provisions of sections 815 and 828 of the FAA Reauthorization Act of 2024 (''the Act''). To conform the FAA's regulations to the self-enacting provisions in the Act, this final rule amends certain regulations to: align aircraft conditions and limitations with the term ''covered aircraft'' as defined in section 2307(j) of the FAA Extension, Safety, and Security Act of 2016 to increase the number of allowable passengers from 5 to 6, increase the number of occupants from 6 to 7, and increase the maximum takeoff weight from 6,000 pounds to 12,500 pounds, while excluding certain transport category rotorcraft. This final rule facilitates updates to current standards the medical form a State-licensed physician uses in completing a comprehensive medical examination. Further, this final rule amends regulations to incorporate the statutory expansion of BasicMed medical eligibility to examiners conducting practical tests or proficiency checks if they meet the requirements for operating covered aircraft under BasicMed, as provided in the Act.

DATES: This rule is effective on November 18, 2024.

ADDRESSES: For information on where to obtain copies of rulemaking documents and other information related to this final rule, see ''How to Obtain Additional Information'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Bradley C. Zeigler, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–1100; email: *Bradley.C.Zeigler@faa.gov.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

On May 16, 2024, the President signed into law the FAA Reauthorization Act of 2024 (Pub. L. 118–63) (''the Act''), impacting certain requirements for BasicMed in section 815, BasicMed for Examiners Administering Tests or Proficiency Checks, and section 828, Expansion of BasicMed. Specifically, section 815 expanded the privileges of BasicMed to examiners and section 828 amended provisions in section 2307 of the FAA Extension, Safety, and Security Act of 2016 (49 U.S.C. 44703 note) (FESSA) directly applicable to BasicMed. The Act also directed the Administrator of the FAA to implement the amendments made in sections 815 and 828 through rulemaking. Section 828 further provides that the Administrator of the FAA shall update regulations in 14 CFR parts 61 and 68 to implement the amendments made in the Act (*i.e.,* the updated statutory language in FESSA), and within 180 days of the enactment, apply parts 61 and 68 to ensure that an individual may operate as pilot in command of a covered aircraft if the provisions of section 2307 of FESSA are met. The amendments to parts 61 and 68 in this final rule align with the statutory charge set forth by section 828 [1] in the following manner:

- Increase the number of allowable passengers from 5 to 6 and occupants from 6 to 7 for covered aircraft;
- Increase the maximum takeoff weight from 6,000 pounds to 12,500 pounds for covered aircraft;
- Clarify that calendar months will be used in determining the duration of the comprehensive medical examination for those persons acting as the pilot in command or as a required flightcrew member for operations under § 61.113(i);
- Specify that covered aircraft does not include transport category rotorcraft certified to airworthiness standards under part 29; and
- Clarify which versions of FAA Form 8500–8, Application for Airman Medical Certificate, may be used to populate the questions in the BasicMed Comprehensive Medical Examination Checklist.

Section 815, BasicMed For Examiners Administering Tests or Proficiency Checks, provides that an examiner may administer a practical test or proficiency check if such examiner meets the medical eligibility requirements for BasicMed and the flight is conducted in a covered aircraft.[2] While the FAA finds the expansion to be self-enacting, the section provided the FAA with three years to issue a final rule updating the regulations, as well as any related requirements the Administrator finds are in the interest of aviation safety.[3] This final rule will, therefore, update § 61.23 to permit persons performing the duties of an examiner to administer a practical test or proficiency check without holding a medical certificate issued under part 67, provided those persons meet the requirements to operate under the conditions and limitations set forth in § 61.113(i).

Summary of the Costs and Benefits

There are no costs or benefits of this rule relative to the with-statute baseline. This rule conforms FAA regulations to self-implementing legislation in sections 815 and 828 of the FAA Reauthorization Act of 2024. Under the updated Office of Management and Budget (OMB) Circular A–4 guidance,[4] an agency may use a with-statute baseline for estimating costs and benefits for regulations that simply restate statutory requirements in self-implementing legislation. Since the rule does not deviate from the self-implementing statutory provisions, there are no costs or benefits as measured against the with-statute baseline.

II. Authority for This Rulemaking

The FAA's authority to issue rules on aviation safety is found in Title 49 of the United States Code (49 U.S.C.). Subtitle I, section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This final rule is promulgated under the authority described in subtitle VII, part A, subpart iii, section 44701, General Requirements; section 44702, Issuance of Certificates; and section 44703, Airman Certificates. Under these sections, the FAA is charged with prescribing regulations and minimum standards for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. The FAA is also authorized to issue certificates, including airman certificates and medical certificates, to qualified individuals. This final rule is within the scope of that authority.

BasicMed provisions were originally promulgated under section 2307 of

[1] See sec. 828(a).

[2] Sec. 815(a).

[3] Sec. 815(b).

[4] OMB Circular No. A–4 updated November 9, 2023, page 12. Accessed September 30, 2024 at: *https://www.whitehouse.gov/wp-content/uploads/2023/11/CircularA-4.pdf.*

Public Law 114–190, the FAA Extension, Safety and Security Act of 2016. The requirements of this rule continue to be within that authority, as well as under sections 815 and 828 of the FAA Reauthorization Act of 2024.

III. Good Cause for Immediate Adoption

The Administrative Procedure Act (5 U.S.C. 553(b)(B)) requires an agency to conduct notice and comment rulemaking except when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest. Additionally, section 553(d) permits agencies, upon a finding of good cause, to issue rules with an effective date less than 30 days from the date of publication. The FAA finds good cause to forgo notice and opportunity for comment and the 30 days notice requirement to implement the statutory amendments as a final rule.

First, as it pertains to section 815, the FAA finds that notice and the opportunity for comment to be unnecessary because the final rule implements the statutory provisions without interpretation. The declaratory provision of section 815(a) became effective on May 16, 2024, immediately upon passage of the Act. While section 815(b) provided three years to conform the regulations with the self-enacting provision, the FAA has simply adopted the statutory language without interpretation and implements that language directly into the regulations, rendering notice and the opportunity for comment unnecessary.

Second, as it pertains to section 828, by effect of section 828(c), which directs the Administrator to ''apply parts 61 and 68, Code of Federal Regulations, in a manner reflecting the amendments made by this section,'' the FAA must implement the provisions of section 828(a) beginning 180 days after passage of the Act (*i.e.,* November 12, 2024). Notice and the opportunity for comment are unnecessary in this action because the FAA is strictly implementing the amendments made to the statutory provisions in section 2307 of FESSA without interpretation. This rule conforms parts 61, 68, and 91 to the specific amended provisions within the Act. Additionally, because the FAA is simply amending the regulations to the language in section 2307 of FESSA, the updated regulations do not impose any additional substantive restrictions or requirements on the persons affected by these regulations. Further, case law supports the concept that the FAA's compliance to implement a rule by the statutorily prescribed deadline of November 12, 2024, makes compliance with section 553 impracticable and supports a finding of good cause to forgo notice and the opportunity for comment.[5]

For similar reasons, the FAA finds good cause to forgo the 30 days delay of effective date requirement under 5 U.S.C. 553(d) because 30 days delay of effective date is impracticable and unnecessary. The FAA is publishing this rule with an immediate effective date to comply with the statutory deadline imposed in section 828 of the Act, which directed the FAA to apply parts 61 and 68 to reflect the amendments beginning 180 days after the Act's enactment. Additionally, because section 815 has been effective since May 14, 2024, (*i.e.,* self-enacting), 30 days notice is unnecessary. Delaying the effective date of this final rule will not stay these requirements from being legally binding and would only cause inconsistency between the FAA's regulations and the statutory provisions already in effect.[6] Therefore, the FAA finds good cause to forgo the 30 days effective date requirement to comply with the Congressional directive and align with FAA's regulations with the self-enacting statutory provisions.

Finally, this final rule makes one technical amendment to add an OMB control number for an already existing and approved information collection to the FAA's regulatory list of control numbers in part 11. The FAA finds that notice and comment is unnecessary for such technical change.[7]

IV. Background

FESSA was enacted on July 15, 2016. Section 2307(a) of FESSA, Medical Certification of Certain Small Aircraft Pilots, directed the FAA to ''issue or revise regulations to ensure that an individual may operate as pilot in command of a covered aircraft'' without having to undergo the medical certification process under 14 CFR part 67 if the pilot and aircraft meet certain prescribed requirements as outlined in FESSA. The FAA implemented, without interpretation, the provisions of section 2307 of FESSA by publishing the Alternative Pilot Physical Examination and Education Requirements final rule on January 11, 2017,[8] which amended parts 61 and 91 and created part 68.[9] These medical eligibility requirements for pilots are collectively known as BasicMed.

On May 16, 2024, the President signed the FAA Reauthorization Act of 2024 (Pub. L. 118–63) into law. Specific to this rulemaking, the FAA Reauthorization Act of 2024, sections 815 and 828, promulgates certain changes to (1) expand the applicability of BasicMed to pilot examiners, (2) expand the definition of a covered aircraft in FESSA, (3) apply consistent usage of the term ''calendar months,'' and (4) permit the FAA to modify forms related to comprehensive medical examination checklists. As discussed herein, certain changes were self-enacting upon enactment of the Reauthorization, while others are self-enacting 180 days from the enactment of the Reauthorization. This final rule conforms FAA regulations as set forth by the Reauthorization.

V. Section 828 Expansion of BasicMed

Section 828(a) of the Act amended certain requirements set forth in FESSA, section 2307, paragraphs (a)(2), (a)(7), (a)(8)(A), (b)(2)(A)(i), (h), and (j). First, section 828 revises the definition of covered aircraft to increase the number of occupants in a BasicMed covered aircraft from 6 to 7, increases the maximum certificated takeoff weight from 6,000 pounds to 12,500 pounds, and excludes transport category rotorcraft certified to airworthiness standards under part 29. Second, section 828(a) also increases the maximum number of passengers from 5 to 6, modifies the duration of time for a comprehensive medical examination from 48 months to 48 calendar months, and updates which medical application form versions the FAA may use to populate the questions of the

[5] *Philadelphia Citizens in Action* v. *Schweiker,* 669 F. 2d 877, 885–86 (3rd Cir. 1982) (finding the need for compliance with a statutorily prescribed deadline to contribute to a finding of good cause).

[6] See *Clay Broadcasting Corp.* v. *United States,* 464 F.2d 1313, 1320 (5th Cir. 1972), rev'd on other grounds sub nom. *National Cable Television Ass'n, Inc.* v. *United States,* 415 U.S. 336 (1974) (finding an effective date in accordance with a Congressional directive supports good cause to forgo the 30 days notice requirement.).

[7] Technical amendments are ''a routine determination, insignificant in nature and impact, and inconsequential to the industry and to the public.'' *See Mack Trucks, Inc.* v. *EPA, 682 F.3d 87, 94 (D.C. Cir. 2012))(quotation marks and citation omitted); See also United States v. Mullins,* 2012 WL 3777067, at *4 (D. Vt. Aug. 29, 2012) (explaining that public comment is unnecessary if minor or merely technical amendments in which the public is not particularly interested were involved).

[8] 82 FR 3149.

[9] BasicMed was additionally modified on November 22, 2022, by *Medical Certification Standards for Commercial Balloon Operations* final rule (87 FR 71218) to expand BasicMed to required flightcrew members in addition to persons acting as pilot in command in accordance with section 318 of Public Law 115–254 (''Commercial Balloon Pilot Safety Act of 2018'') and in response to NTSB Safety Recommendation A–17–034.

Comprehensive Medical Examination Checklist (BasicMed), FAA Form 8700–2 (CMEC). While section 828(b) directs the FAA to amend regulations in 14 CFR parts 61 and 68 without imposing a deadline to do so,[10] paragraph (c) requires the FAA to apply parts 61 and 68 in a manner reflecting the amendments made by paragraph (a) within 180 days of the enactment of the Act (*i.e.,* November 12, 2024). The amended requirements of section 828 and the FAA's implementation of those requirements are subsequently discussed.

A. Calendar Month (§ 61.23(c)(3)(i)(D))

Prior to this rule, § 61.23(c)(3)(i)(D) required that, to be eligible to operate under BasicMed, an individual must complete their comprehensive medical examination from a State-licensed physician during the 48 months before acting as a pilot in command or serving as a required flightcrew member in operations under § 61.113(i) and in accordance with the relevant requirements in part 68. This requirement was consistent with the directive of section 2307(a)(7) of FESSA at the time of final rule adoption[11] (*i.e.,* before May 16, 2024). With the exception of § 61.23(c)(3)(i)(D), the FAA has generally used the term ''calendar month'' throughout part 61 to refer to periods of time for the purposes of recency. Further, the usage of the term ''month'' was inconsistent within section 2307 of FESSA, which used the term ''month'' to refer to the duration of a comprehensive medical examination, but ''calendar month'' when referring to the duration of recency for the medical education course. This amendment will implement section 828(a)(1)(B) to correct the term and align the language in § 61.23 with part 61 convention and section 2307(a)(7) of FESSA to state ''calendar month.''

B. Covered Aircraft Requirements (§§ 61.113(i)(1) and 91.319(j))

In section 2307(j) of FESSA, as promulgated in 2016, a covered aircraft was defined as an aircraft that (1) is authorized under Federal law to carry not more than 6 occupants; and (2) has a maximum certificated takeoff weight of not more than 6,000 pounds. These requirements were implemented for aircraft authorized under Federal law.[12] Section 828(a)(4) of the FAA Reauthorization Act of 2024 amended section 2307(j) of FESSA to increase the number of occupants an aircraft is authorized to carry under Federal law from 6 to 7 and to increase the maximum certificated takeoff weight from not more than 6,000 pounds to not more than 12,500 pounds. Additionally, section 828(a)(4) added a third provision to section 2307(j) of FESSA to exclude transport category rotorcraft certificated to airworthiness standards under part 29. To note, these amendments were immediately adopted within 49 U.S.C. 44703 note (FESSA).

For aircraft authorized under Federal law, this final rule revises § 61.113(i)(1) to reflect the provisions of section 2307(j), as amended by section 828(a)(4).[13] Additionally, this final rule revises § 91.319(j) to increase the maximum number of occupants that a person may carry in an experimental aircraft operated under § 61.113(i) from 6 to 7.[14]

C. Passengers in Covered Aircraft (§ 61.113(i)(1))

Section 2307(a)(8) of FESSA established limitations for operations under BasicMed. One operating requirement limited an individual operating in the covered aircraft from carrying more than 5 passengers. Section 828 of the Act amended section 2307(a)(8)(A) (*i.e.,* the operating requirement) by increasing the number of passengers from 5 to 6. This final rule will revise § 61.113(i)(1) to reflect this increased passenger limitation. Therefore, a covered aircraft may now be authorized to carry up to 7 occupants (including any required flight crewmembers) and may be operating with up to 6 passengers on board.[15]

D. Comprehensive Medical Examination Checklist (§ 68.7(a)(1))

To comply with the requirements of BasicMed, a pilot must receive a comprehensive medical examination from a State-licensed physician.[16] The State-licensed physician conducts the examination using the CMEC[17] completed by the recipient prior to the examination. Section 2307(b)(2) of FESSA prescribes the content of the CMEC, implemented in § 68.7. Originally, section 2307(b)(2)(A)(i) specified that the checklist must be populated with specific questions from FAA Form 8500–8 (3–99); however, the 3–99 version of FAA Form 8500–8 is now obsolete and no longer an active form.

Now, section 828(a)(2) of the Act amended section 2307(b)(2)(A)(i) of FESSA to specify that the checklist must include certain questions from the 8500–8 (3–99) or any successor form, which include pertinent medical history of the examination recipient. As a result of the amendment, this final rule amends § 68.7(a)(1) by inserting the language ''(or any successor form)'' following ''FAA Form 8500–8 (3–99).'' In practice, this amendment explicitly facilitates future updates to the FAA Form 8700–2 CMEC and incorporates changes made to specific questions in subsequent versions of FAA Form 8500–8.

VI. Expanding BasicMed for Examiners Administering Tests or Proficiency Checks

Prior to FESSA, the medical eligibility requirements for an examiner mirrored the requirements for the applicant taking the examination. The provisions of section 2307 of FESSA, and subsequent modifications to apply BasicMed to required flightcrew members, did not originally apply to examiners because an examiner does not typically act as pilot in command of the aircraft for a practical test and only

[10] While the statute directs the FAA to amend parts 61 and 68, the FAA notes that in order to implement the expansion of BasicMed to experimental aircraft which are not type certificated as the regulations currently reflect, the FAA must amend part 91. Section 91.319 prescribes operating limitations for aircraft having experimental certificates. This aligns with the approach set forth by the Alternative Pilot Physical Examination and Education Requirements final rule (82 FR 3149).

[11] 82 FR 3149 at 3154.

[12] Comprehensive discussion regarding the FAA's analysis and implementation of ''aircraft authorized under Federal Law'' may be found at 82 FR 3149, at 3154.

[13] Section 61.113 refers to the parameters of aircraft; however, the 2017 preamble unintentionally narrowed the aircraft authorized to type certificated aircraft and experimental aircraft, inadvertently omitting aircraft such as light sport aircraft and special flight permits. In practice, the FAA applies § 61.113 to any aircraft meeting the definition of ''covered aircraft'' and will continue to do so.

[14] As previously stated in footnote 8 of this preamble, the statute directs the FAA to amend parts 61 and 68; however, because experimental aircraft are not type certificated but may be operated under BasicMed given the definitions set forth in FESSA, the FAA finds it appropriate to amend part 91 as well. Because experimental aircraft may be operated under BasicMed, the FAA omitted the word ''certificated'' from ''maximum takeoff weight'' in the 2017 final rule regulatory text, which is also reflected in this final rule.

[15] For additional discussion on the relationship between ''occupants'' and ''passengers'' as it pertains to covered aircraft, see 82 FR 3149 at 3154.

[16] 14 CFR 61.23(c)(3)(D).

[17] During this rulemaking, the FAA discovered that the rule establishing BasicMed, Alternative Pilot Physical Examination and Education Requirements, did not add OMB control number 2120–0770 (approving the new information collection for FAA Form 8700–2) to § 11.201. Section 11.201 sets forth an informational list of current OMB control numbers, organized by 14 CFR part or section, identified and described for reference to the FAA's information collection activities. This final rule corrects the error by adding the OMB control number to the table set forth in § 11.201(b).

serves as a required flightcrew member during portions of a practical test.[18]

Section 815(a) of the FAA Reauthorization Act of 2024 permits examiners to administer a practical test or proficiency check so long as the examiner meets the medical eligibility requirements of BasicMed (*i.e.,* the examiner meets the medical qualification requirements under part 68 and the operation is conducted in a covered aircraft as defined in section 2307(j) of FESSA). While the FAA determined that this provision was self-enacting as of May 16, 2024, section 815(b) of the Act directs the FAA to issue a final rule revising part 61 within three years of enactment. Section 815(b) also permits the Administrator to add ''any related requirements the Administrator finds are in the interest of aviation safety'' to the final rule; however, at this time, the FAA does not find any related requirements warranted and will not be adding any additional related requirements to this final rule. To align the regulations with the self-enacting statute, this final rule adds new § 61.23(c)(1)(vii) [19] to explicitly allow examiners to administer practical tests or proficiency checks for airman certificates, ratings, or authorizations, provided the flight is conducted under the conditions and limitations set forth in § 61.113(i).

The amended provisions in § 61.23(a)(3)(iv) to allow examiners to perform their duties under BasicMed use the phrase ''when meeting the requirements to operate under the conditions and limitations set forth in § 61.113(i)'' rather than ''when operating under the conditions and limitations set forth in § 61.113(i)'' because § 61.113(i) applies to persons exercising private pilot privileges as either pilot in command or as a required flightcrew member. The added phrase ''when meeting the requirements'' was included to clarify that even though the examiner may not be performing a pilot duty as an examiner and not serving as either pilot in command or as a required flightcrew member, that person may serve as an examiner without holding a medical certificate provided that person has otherwise met all the requirements to operate as pilot in command or as a required flightcrew member under BasicMed.

[18] E.g., acting as a safety pilot under 14 CFR 91.109(c)(1).

[19] As a result, this final rule revises § 61.23(c)(1)(v) and (vi) to account for list expansion (*i.e.,* simply removing ''or'' from paragraph (c)(1)(v) and adding ''or'' to paragraph (c)(1)(vi)).

VII. Regulatory Notices and Analyses

Federal agencies consider impacts of regulatory actions under a variety of executive orders and other requirements. First, Executive Order 12866, Executive Order 13563, and Executive Order 14094 (''Modernizing Regulatory Review'') direct that each Federal agency shall propose or adopt a regulation only upon a reasoned determination that the benefits of the intended regulation justify the costs. Second, the Regulatory Flexibility Act of 1980 (Pub. L. 96–354) requires agencies to analyze the economic impact of regulatory changes on small entities. Third, the Trade Agreements Act (Pub. L. 96–39) prohibits agencies from setting standards that create unnecessary obstacles to the foreign commerce of the United States. Fourth, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) requires agencies to prepare a written assessment of the costs, benefits, and other effects of proposed or final rules that include a Federal mandate that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation) in any one year. The current threshold after adjustment for inflation is $183 million using the most current (2023) Implicit Price Deflator for the Gross Domestic Product. This portion of the preamble summarizes the FAA's analysis of the economic impacts of this rule.

In conducting these analyses, the FAA has determined that this final rule: (1) has benefits that justify its costs, (2) is not a ''significant regulatory action'' as defined in section 3(f)(1) of Executive Order 12866, (3) will not create unnecessary obstacles to the foreign commerce of the United States; and (4) will not impose an unfunded mandate on State, local, or tribal governments, or on the private sector by exceeding the threshold identified above. As the FAA finds good cause to forgo notice and opportunity for comment under 5 U.S.C. 553(b)(B) for this final rule, 5 U.S.C. 603 and 604 do not require regulatory flexibility analyses regarding impacts on small entities.

A. Regulatory Evaluation

There are no costs or benefits of this rule relative to the with-statute baseline. This rule conforms FAA regulations to self-implementing legislation in sections 815 and 828 of the FAA Reauthorization Act of 2024. Section 815 allows a pilot examiner to perform authorized examiner duties so long as the examiner can otherwise meet the requirements to operate under BasicMed in the aircraft being used for the practical test or proficiency check. Section 828 expands BasicMed by increasing the number of allowable passengers in a covered aircraft to 6 (up from 5); increasing the allowable number of seats in a covered aircraft to 7 (up from 6); and increasing the maximum certificated takeoff weight of a covered aircraft to 12,500 pounds (up from 6,000 pounds). This expansion of Basic Med does not apply to transport category rotorcraft certified to airworthiness standards under part 29.

Under the updated OMB Circular A–4 guidance,[20] an agency may use a with-statute baseline for estimating costs and benefits for regulations that simply restate statutory requirements in self-implementing legislation. Since the rule does not deviate from the self-implementing statutory provisions, there are no costs or benefits as measured against the with-statute baseline.

B. Regulatory Flexibility Determination

The Regulatory Flexibility Act (RFA), in 5 U.S.C. 603, requires an agency to prepare an initial regulatory flexibility analysis describing impacts on small entities whenever 5 U.S.C. 553 or any other law requires an agency to publish a general notice of proposed rulemaking for any proposed rule. Similarly, 5 U.S.C. 604 requires an agency to prepare a final regulatory flexibility analysis when an agency issues a final rule under 5 U.S.C. 553 after that section or any other law requires publication of a general notice of proposed rulemaking. The FAA finds good cause to forgo notice and comment and to not delay the effective date for this rule. As 5 U.S.C. 553(b)(B) permits an agency to forgo notice and the opportunity for comment when good cause exists and the FAA finds good cause exists in this situation, 5 U.S.C. 603 and 604 similarly do not require regulatory flexibility analyses.

C. International Trade Impact Assessment

The Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. Pursuant to these Acts, the establishment of standards is not considered an unnecessary obstacle to the foreign commerce of the United

[20] OMB Circular No. A–4 updated November 9, 2023, page 12. Accessed September 30, 2024, at: *https://www.whitehouse.gov/wp-content/uploads/2023/11/CircularA-4.pdf.*

States, so long as the standard has a legitimate domestic objective, such as the protection of safety and does not operate in a manner that excludes imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

The FAA has assessed the potential effect of this final rule and determined that it will only have a domestic impact and therefore will not create unnecessary obstacles to the foreign commerce of the United States.

D. Unfunded Mandates Assessment

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) governs the issuance of Federal regulations that require unfunded mandates. An unfunded mandate is a regulation that requires a State, local, or tribal government, or the private sector to incur direct costs without the Federal government having first provided the funds to pay those costs. The FAA determined that the final rule will not result in the expenditure of $183 million or more by State, local, or tribal governments, in the aggregate, or the private sector, in any one year.

E. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires that the FAA consider the impact of paperwork and other information collection burdens imposed on the public. According to the 1995 amendments to the Paperwork Reduction Act (5 CFR 1320.8(b)(2)(vi)), an agency may not collect or sponsor the collection of information, nor may it impose an information collection requirement unless it displays a currently valid Office of Management and Budget (OMB) control number.

The FAA has determined that there would be no new information collection associated with the requirement to complete the Comprehensive Medical Examination Checklist associated with this final rule. Approval to collect such information previously was approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) and was assigned OMB Control Number 2120–0770.

The FAA lists OMB control numbers assigned to its information collection activities in 14 CFR 11.201(b). Accordingly, this technical amendment updates 14 CFR 11.201(b) to display OMB control number 2120–0770 associated with the information collection activities in the final rule, Alternative Pilot Physical Examination and Education Requirements.

F. International Compatibility and Cooperation

In keeping with U.S. obligations under the Convention on International Civil Aviation, it is FAA policy to conform to International Civil Aviation Organization (ICAO) Standards and Recommended Practices (SARPs) to the maximum extent practicable. The FAA has reviewed ICAO SARPs applicable to private pilots.

Airmen certificated by the FAA are represented to ICAO as compliant with ICAO standards for private pilots, among other requirements. As FESSA and this final rule describe standards that diverge from ICAO requirements,[21] flights must be geographically limited to operations within the United States, unless authorized by the country in which the flight is conducted.

The FAA will modify certain differences to reflect that certain U.S. private pilots no longer are required to hold a current FAA airman medical certificate. A filing is required for certain ICAO Annex 1 SARPs found in Chapters 1, 2, and 6.

G. Environmental Analysis

FAA Order 1050.1F identifies FAA actions that are categorically excluded from preparation of an environmental assessment or environmental impact statement under the National Environmental Policy Act in the absence of extraordinary circumstances. The FAA has determined this rulemaking action qualifies for the categorical exclusion identified in paragraph 5–6.6f for regulations and involves no extraordinary circumstances.

VIII. Executive Order Determinations

A. Executive Order 13132, Federalism

The FAA has analyzed this final rule under the principles and criteria of Executive Order 13132, Federalism. The FAA has determined that this action will not have a substantial direct effect on the States, or the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of government, and, therefore, will not have federalism implications.

[21] Annex 1 to the Convention on International Civil Aviation, ''Personnel Licensing,'' Chapter 6 ''Medical Provisions for Licensing,'' 11th Edition (July 2011).

B. Executive Order 13175, Consultation and Coordination With Indian Tribal Governments

Consistent with Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, and FAA Order 1210.20, American Indian and Alaska Native Tribal Consultation Policy and Procedures, the FAA ensures that Federally Recognized Tribes (Tribes) are given the opportunity to provide meaningful and timely input regarding proposed Federal actions that have the potential to have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes; or to affect uniquely or significantly their respective Tribes. At this point, the FAA has not identified any unique or significant effects, environmental or otherwise, on Tribes resulting from this final rule.

C. Executive Order 13211, Regulations That Significantly Affect Energy Supply, Distribution, or Use

The FAA analyzed this final rule under Executive Order 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use. The FAA has determined that it is not a ''significant energy action'' under the Executive order and is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

D. Executive Order 13609, Promoting International Regulatory Cooperation

Executive Order 13609, Promoting International Regulatory Cooperation, promotes international regulatory cooperation to meet shared challenges involving health, safety, labor, security, environmental, and other issues and to reduce, eliminate, or prevent unnecessary differences in regulatory requirements. The FAA has analyzed this action under the policies and agency responsibilities of Executive Order 13609 and has determined that this action will have no effect on international regulatory cooperation.

IX. Additional Information

A. Electronic Access and Filing

A copy of this final rule and all background material may be viewed online at *www.regulations.gov* using the docket number listed above. A copy of this final rule will be placed in the docket. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365

days each year. An electronic copy of this document may also be downloaded from the Office of the Federal Register's website at *www.federalregister.gov* and the Government Publishing Office's website at *www.govinfo.gov.* A copy may also be found at the FAA's Regulations and Policies website at *www.faa.gov/regulations_policies.*

Copies may also be obtained by sending a request to the Federal Aviation Administration, Office of Rulemaking, ARM–1, 800 Independence Avenue SW, Washington, DC 20591, or by calling (202) 267–9677. Requestors must identify the docket or amendment number of this rulemaking.

All documents the FAA considered in developing this final rule, including economic analyses and technical reports, may be accessed from the internet through the Federal eRulemaking Portal referenced above.

B. Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA) requires the FAA to comply with small entity requests for information or advice about compliance with statutes and regulations within its jurisdiction. A small entity with questions regarding this document may contact its local FAA official or the person listed under the **FOR FURTHER INFORMATION CONTACT** heading at the beginning of the preamble. To find out more about SBREFA on the internet, visit *http://www.faa.gov/regulations_policies/rulemaking/sbre_act/.*

List of Subjects

14 CFR Part 11

Administrative practice and procedure, Reporting and recordkeeping requirements.

14 CFR Part 61

Aircraft, Airmen, Aviation safety, Reporting and recordkeeping requirements.

14 CFR Part 68

Aircraft, Airmen, Health, Reporting and recordkeeping requirements.

14 CFR Part 91

Aircraft, Airmen, Aviation safety, Reporting and recordkeeping requirements, Transportation.

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends chapter I of title 14, Code of Federal Regulations as follows:

Part 11—GENERAL RULEMAKING PROCEDURES

■ 1. The authority citation for part 11 continues to read as follows:

Authority: 49 U.S.C. 106(f), 40101, 40103, 40105, 40109, 40113, 44110, 44502, 44701–44702, 44711, and 46102.

■ 2. Amend § 11.201 by revising the table in paragraph (b) to read as follows:

§ 11.201 Office of Management and Budget (OMB) control numbers assigned under the Paperwork Reduction Act.

* * * * *

(b) * * *

14 CFR part or section identified and described	Current OMB control No.
* * * * *	
Part 68	2120–0770
* * * * *	

PART 61—CERTIFICATION: PILOTS, FLIGHT INSTRUCTORS, AND GROUND INSTRUCTORS

■ 3. The authority citation for part 61 is revised to read as follows:

Authority: 49 U.S.C. 106(f), 40113, 44701–44703, 44707, 44709–44711, 44729, 44903, 45102–45103, 45301–45302; Sec. 2307 Pub. L. 114–190, 130 Stat. 615 (49 U.S.C. 44703 note); sec. 318, Pub. L. 115–254, 132 Stat. 3186 (49 U.S.C. 44703 note); and secs. 815 and 828, Pub. L. 118–63, 138 Stat. 1330 (49 U.S.C. 44703 note).

■ 4. Amend § 61.23 by revising paragraphs (a)(3)(iv), (c)(1)(v) and (vi), adding paragraph (c)(1)(vii), and revising paragraph (c)(3)(i)(D) to read as follows:

§ 61.23 Medical certificates: Requirement and duration.

(a) * * *

(3) * * *

(iv) When performing the duties as an Examiner in an aircraft when administering a practical test or proficiency check for an airman certificate, rating, or authorization, except when meeting the requirements to operate under the conditions and limitations set forth in § 61.113(i).

* * * * *

(c) * * *

(1) * * *

(v) Exercising the privileges of a student, recreational or private pilot certificate if the flight is conducted under the conditions and limitations set forth in § 61.113(i);

(vi) Exercising the privileges of a flight instructor certificate and acting as the pilot in command or as a required flight crewmember if the flight is conducted under the conditions and limitations set forth in § 61.113(i); or

(vii) Serving as an Examiner and administering a practical test or proficiency check for an airman certificate, rating, or authorization if the flight is conducted under the conditions and limitations set forth in § 61.113(i).

* * * * *

(3) * * *

(i) * * *

(D) Receive a comprehensive medical examination from a State-licensed physician during the 48 calendar months before acting as pilot in command or serving as a required flightcrew member of an operation conducted under § 61.113(i) and that medical examination is conducted in accordance with the requirements in part 68 of this chapter; and

* * * * *

■ 5. Amend § 61.113 by revising paragraph (i)(1) to read as follows:

§ 61.113 Private pilot privileges and limitations: Pilot in command.

* * * * *

(i) * * *

(1) The aircraft is authorized to carry not more than 7 occupants, has a maximum takeoff weight of not more than 12,500 pounds, is operated with no more than 6 passengers on board, and is not a transport category rotorcraft certified to airworthiness standards under part 29 of this chapter; and

* * * * *

PART 68—REQUIREMENTS FOR OPERATING CERTAIN SMALL AIRCRAFT WITHOUT A MEDICAL CERTIFICATE

■ 6. The authority citation for part 68 is revised to read as follows:

Authority: 49 U.S.C. 106(f), 44701–44703, sec. 2307 of Pub. L. 114–190, 130 Stat. 615 (49 U.S.C. 44703 note); sec. 828 of Pub. L. 118–63, 138 Stat. 1330 (49 U.S.C. 44703).

■ 7. Amend § 68.7 by revising paragraph (a)(1) to read as follows:

§ 68.7 Comprehensive Medical Examination Checklist.

* * * * *

(a) * * *

(1) Boxes 3 through 13 and boxes 16 through 19 of the FAA Form 8500–8 (3–99), or any successor form; and

* * * * *

Part 91—GENERAL OPERATING AND FLIGHT RULES

■ 8. The authority citation for part 91 is revised to read as follows:

Authority: 49 U.S.C. 106(f), 40101, 40103, 40105, 40113, 40120, 44101, 44111, 44701,

44704, 44709, 44711, 44712, 44715, 44716, 44717, 44722, 46306, 46315, 46316, 46504, 46506–46507, 47122, 47508, 47528–47531, 47534; Pub. L. 114–190, 130 Stat. 615 (49 U.S.C. 44703 note); Sec. 828 of Pub. L. 118–63, 138 Stat. 1330 (49 U.S.C. 44703 note); articles 12 and 29 of the Convention on International Civil Aviation (61 Stat. 1180), (126 Stat. 11).

■ 9. Amend § 91.319 by revising paragraph (j) to read as follows:

§ 91.319 Aircraft having experimental certificates: Operating limitations.

* * * * *

(j) No person may operate an aircraft that has an experimental certificate under § 61.113(i) of this chapter unless the aircraft is carrying not more than 7 occupants.

Issued in Washington, DC, under the authority of 49 U.S.C. 106(f) and secs. 815 and 828 of Public Law 118–63.

Michael Gordon Whitaker,

Administrator.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2023–1624; Airspace Docket No. 24–ACE–7]

RIN 2120–AA66

Establishment of Class E Airspace; Rose Hill, KS

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes Class E airspace at Rose Hill, KS to support new public instrument procedures.

DATES: Effective date 0901 UTC, December 26, 2024. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

ADDRESSES: A copy of the Notice of Proposed Rulemaking (NPRM), all comments received, this final rule, and all background material may be viewed online at *www.regulations.gov* using the FAA Docket number. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year.

FAA Order JO 7400.11J, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications/*. You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Raul Garza Jr., Federal Aviation Administration, Operations Support Group, Central Service Center, 10101 Hillwood Parkway, Fort Worth, TX 76177; telephone (817) 222–5874.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes Class E airspace extending upward from 700 feet above the surface at Cook Airfield, Rose Hill, KS, to support instrument flight rule operations at this airport.

History

The FAA published an NPRM for Docket No. FAA 2023–1624 in the **Federal Register** (89 FR 66290; August 15, 2024), proposing to establish the Class E airspace at Rose Hill, KS. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Differences From the NPRM

An FAA database review noted that the incorrect coordinates were used in the NPRM. This Final Rule replaces the incorrect coordinates with the correct coordinates: 37°33′55″ N, long 097°10′29″ W. This action does not change the airspace dimensions or operating requirements.

Incorporation by Reference

Class E airspace designations are published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11J, dated July 31, 2024 and effective September 15, 2024. FAA Order JO 7400.11J is publicly available as listed in the **ADDRESSES** section of this document. These amendments will be published in the next update to FAA Order JO 7400.11.

FAA Order JO 7400.11J lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This action amends 14 CFR part 71 by establishing Class E airspace upward from 700 feet above the surface within a 6.6-mile radius of Cook Airfield, Rose Hill, KS.

This action supports new public instrument procedures.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures,'' paragraph 5–6.5.a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p.389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11J, Airspace Designations and Reporting Points, dated July 31, 2024, and effective September 15, 2024, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ACE KS E5 Rose Hill, KS [Establish]

Cook Airfield, KS
(Lat. 37°33′55″ N, long. 097°10′29″ W)

That airspace extending upward from 700 feet above the surface within a 6.6-mile radius of the Cook Airfield.

* * * * *

Issued in Fort Worth, Texas, on November 12, 2024.

Martin A. Skinner,

Acting Manager, Operations Support Group, ATO Central Service Center.

Conforming Amendments to Commission Rules and Forms

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Securities and Exchange Commission (''Commission'') is adopting amendments to correct certain errors in various rules and forms under the Securities Act of 1933, the Securities Exchange Act of 1934, the Investment Company Act of 1940, and the Investment Advisers Act of 1940. The Commission is also amending a rule that displays control numbers assigned to information collection requirements by the Office of Management and Budget pursuant to the Paperwork Reduction Act.

DATES: This rule is effective November 18, 2024.

FOR FURTHER INFORMATION CONTACT: Greg Scopino, Senior Counsel; Blair Burnett, Branch Chief; or Brian McLaughlin Johnson, Assistant Director, Investment Company Regulation Office, at (202) 551–6792, Division of Investment Management, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–8549.

SUPPLEMENTARY INFORMATION: The Commission is amending the following rules and forms:

Commission reference		CFR citation (17 CFR)
Securities Act of 1933 (''Securities Act'') [1]	Rule 482 [2]	§ 230.482.
Securities Act and Investment Company Act of 1940 (''Act'' or ''Investment Company Act'') [3].	Form N–1A [4]	§§ 239.15A and 274.11A.

I. Discussion

The Commission is adopting amendments to correct errors in certain Commission rules and forms. Specifically, the amendments correct errors in the formula for calculating yield data reported on Form N–MFP, which requires money market funds to report portfolio and other information to the Commission each month. The amendments also make conforming changes to the risk disclosure statement in rule 482, which requires certain information to be included in mutual fund advertisements and sales literature. The amendments also conform certain provisions of Form N–1A and Form N–2, forms used by open-end management investment companies (''open-end funds'') and closed-end funds, respectively, to register under the Investment Company Act and to offer their shares under the Securities Act. These amendments reflect recent rule changes requiring open-end funds to transmit more concise annual and semi-annual reports to shareholders. Further, the amendments correct outdated cross-

references and redesignate the numbering of certain paragraphs within Form N–CSR, a reporting form used by funds to file shareholder reports under the Investment Company Act and the Exchange Act. The amendments also correct an erroneous cross-reference in rule 204–2, which prescribes recordkeeping requirements for investment advisers. Finally, the amendments insert inadvertently omitted Office of Management and Budget (''OMB'') control numbers in 17 CFR 200.800, which is a rule that displays control numbers OMB has assigned to existing information collection requirements pursuant to the Paperwork Reduction Act.

Although the amendments are effective immediately, to the extent that registrants need additional time to conform to the amendments, they may take up to 90 days after the effective date to comply.[12] Given the nature of the amendments, a 90-day compliance period gives registrants adequate time to review these amendments and, if necessary, update their practices to reflect the corrections.

A. Form N–MFP

The Commission is adopting amendments to correct errors in Form N–MFP. Money market funds use Form N–MFP to report portfolio and other information to the Commission each month. Among the items required by Form N–MFP is the reporting of a money market fund's 7-day annualized gross and net yields. The form requires money market funds to report 7-day gross yield at the series level and 7-day net yield at the class level.[13] These standardized metrics give investors the ability to view the yield information of a money market fund over a recent time period, allowing investors to make better informed decisions and, in the aggregate, provide the Commission with useful data for identifying and monitoring trends in the money market fund sector.

In 2023, the Commission adopted a rulemaking that changed the frequency at which funds are required to report the 7-day yield information in their monthly reports on Form N–MFP to require 7-day gross and net yield data for each business day of the month (instead of only the 7 days ended on the last day of the month).[14]

In making this frequency-related change, the phrase ''business days'' was erroneously inserted into the yield calculation formula in a way that inadvertently altered the calculation period from 7 calendar days to 7 business days. A 7-business day period is internally inconsistent with the remainder of the yield calculation formula, which uses a scaling factor intended to annualize yields calculated over 7 calendar days. If used with a 7-business day period, it would result in the reporting of inflated annual yields on Form N–MFP.[15] Based on a review of a sample of recent Form N–MFP filings, Commission staff has not observed any evidence of an increase in reported yield figures relative to yields reported in prior periods, suggesting that money market funds' yield calculations do not reflect the error.[16] In addition, in amending Form N–MFP in 2023, the phrase ''immediately preceding'' was inadvertently inserted into the yield calculation formula, such that the reporting day would not be included in the calculation. The amendments correct these errors, ensuring that Form N–MFP continues to reflect the longstanding method money market funds have used to calculate and report yield figures (measured over seven calendar days) to the Commission in Form N–MFP and in other contexts, including prospectuses, advertisements, and sales literature.[17]

B. Rule 482(b)(4)

We are amending rule 482 to correct outdated cross-references and conform the risk statements that money market funds must include in their advertisements and sales literature to the risk statements that money market funds must include in their prospectuses.[18] Rule 482 applies to advertisements or other sales materials with respect to securities of an investment company registered under the Investment Company Act that is selling or proposing to sell its securities pursuant to a registration statement that has been filed under the Investment Company Act.[19] This rule describes the information that is required to be included in an advertisement, including a disclosure statement that must be used on money market fund advertisements.[20]

In the Money Market Fund Reform Adopting Release, the Commission amended the risk statements that money market funds must include in their prospectuses to align with the changes to money market fund regulations adopted in that release (*e.g.,* the removal of provisions allowing temporary suspensions of redemptions and changes to the liquidity fee framework). However, rule 482 was not included in the amendments and the statements that rule 482 currently requires are inconsistent with the recently amended regulatory framework for money market funds.[21] Further, the risk statements that money market funds were required to include in prospectuses and advertisements have otherwise always been identical and the risk statements should not differ based on whether an investor is reviewing a prospectus or an advertisement.[22]

[12] *See also infra* section I.C (stating that funds may include the updates to Item 10(a)(1)(iii) of Form N–1A in their next annual prospectus update following the adoption of the amendments to Form N–1A).

[13] *See* Items A.19 and B.8 of Form N–MFP.

[14] *See* Money Market Fund Reforms; Form PF Reporting Requirements for Large Liquidity Fund Advisers; Technical Amendments to Form N–CSR and Form N–1A, Investment Company Act Release No. 34959 (July 12, 2023) [88 FR 51404 (Aug. 3, 2023)] (''Money Market Fund Reform Adopting Release''), available at *https://www.federalregister.gov/documents/2023/08/03/2023-15124/money-market-fund-reforms-form-pf-reporting-requirements-for-large-liquidity-fund-advisers-technical.*

[15] The yield calculation formula in Items A.19 and B.8 (by reference to Item 26(a)(1) of Form N–1A) includes a scaling factor of 365/7, which operates to annualize yields calculated over a period of 7 calendar days. Due to the inclusion of weekends and holidays, however, 7 business days span a longer calendar period than 7 calendar days. Accordingly, yields calculated over 7 business days but annualized over 7 calendar days would result in inflated annual yields. *See infra* footnote 45.

[16] *See infra* footnote 45 and accompanying text.

[17] *See* Item 26(a) of Form N–1A (requiring money market funds to base yield calculations on the 7 days ended on the date of the most recent balance sheet included in the registration statement); Item 24(a) of Form N–4 (at 17 CFR 239.17b and 274.11c) (requiring a prospectus for an account or sub-account that holds itself out as a money market account or sub-account to be calculated based on the 7 days ended on the date of the most recent balance sheet of the registrant included in the registration statement); paragraph (e)(1) of 17 CFR 230.482 (requiring that any quotation of a money market fund's yield in an advertisement be based on the methods of computation prescribed in Form N–1A or Form N–4); paragraph (b)(1)(ii) of 17 CFR 270.34b–1 (requiring a money market fund's sales literature that includes any quotation of yield or similar quotations purporting to demonstrate the income earned or distributions made by the fund to be accompanied by a quotation of current yield based on the computation method prescribed in Form N–1A or Form N–4).

[18] *See* amended rule 482(b)(4). The regulations at 17 CFR 270.34b–1 (rule 34b–1) cross reference paragraph (b)(4) of rule 482, so the amendments will update the risk statements that money market funds must include in sales literature under rule 34b–1 as well. For purposes of this release, we use the term ''advertisement'' to include both rule 482 advertisements and rule 34b–1 sales literature, unless otherwise specified.

[19] *See* rule 482(a).

[20] *See* rule 482(b).

[21] *See* Item 4(b)(1)(ii) of Form N–1A.

[22] *See* Revisions to Rules Regulating Money Market Funds, Investment Company Act Release No. 18005 (Feb. 20, 1991) [56 FR 8113 (Feb. 27, 1991)], at text accompanying n.88, available at *https://archives.federalregister.gov/issue_slice/1991/2/27/8112-8130.pdf#page=2;* New Disclosure Option for Open-End Management Investment Companies, Investment Company Act Release No. 23065 (Mar. 13, 1998) [63 FR 13968 (Mar. 23, 1998)], at n.72 and accompanying text, available at *https://www.govinfo.gov/content/pkg/FR-1998-03-*

As a result, rule 482 includes outdated references to concepts that have been removed or significantly modified in underlying money market fund regulations (*e.g.,* allowing temporary suspensions of redemptions). The amendments to rule 482 would correct this error, make certain other conforming edits to further align the language of the risk statements with the risk statements that money market funds must include in their prospectuses, and correct inaccurate cross references to money market fund rules.[23]

C. Form N–1A

We are amending a provision of Form N–1A to correct a cross reference, reflecting changes made in the Tailored Shareholder Reports Adopting Release.[24] Specifically, we are amending Item 10(a)(1)(iii) of Form N–1A. This item requires open-end funds to include prospectus disclosure stating that a discussion regarding the basis for the board of directors approving any advisory contract of the fund is available in the fund's annual or semi-annual report to shareholders, as applicable.[25] In the Tailored Shareholder Reports Adopting Release, however, the Commission adopted amendments requiring discussion regarding the basis for the board's approval of the advisory contract to be included on Form N–CSR rather than in the annual or semi-annual report.[26] We are accordingly amending Item 10(a)(1)(iii) to reference that this disclosure now appears in the fund's reports on Form N–CSR.[27] Because this change simply updates a cross reference, funds may include the updated language in their next annual prospectus update following the adoption of the amendments to Form N–1A and we anticipate funds would update this disclosure at that time. In the interim period before funds make this update, an investor who wants to review the discussion regarding the basis for the board's approval of the advisory contract would look in the fund's shareholder report (which is referenced in the current prospectus disclosure requirement).[28] While this discussion will no longer appear in the fund's shareholder report, the report will include a link to additional information about the fund, which includes the discussion regarding the basis for the board's approval of the advisory contract.

D. Form N–2

We are amending Instruction 8.a to Item 24 of Form N–2 to correct a cross-reference to a provision of Form N–CSR that became outdated when the Commission adopted amendments to Form N–CSR in the Tailored Shareholder Reports Adopting Release. Instruction 8.a refers to Item 7 of Form N–CSR (''Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies''), which was redesignated as Item 12 (but not otherwise changed) in the Tailored Shareholder Reports Adopting Release.[29] We are therefore amending the reference in Item 7 in Instruction 8.a to refer instead to Item 12.

E. Form N–CSR

We are amending Items 2, 16, and 19 of Form N–CSR to correct outdated cross-references, remove unnecessary instructions, and redesignate the numbering of certain paragraphs. In the Recovery of Erroneously Awarded Compensation Adopting Release, the Commission added a new Item 18 (''Recovery of Erroneously Awarded Compensation'') to Form N–CSR and redesignated then-current Item 18 (''Exhibits'') as Item 19.[30] References in Item 2 of Form N–CSR, however, erroneously still refer to Item 18.[31] We are therefore amending Item 2 to refer to Item 19 instead of Item 18.

In the Recovery of Erroneously Awarded Compensation Adopting Release, the Commission also added new paragraph (a)(2) to newly designated Item 19 (''Exhibits'') and redesignated paragraph (a)(2) of newly redesignated Item 19 as paragraph (a)(3). Subsequent paragraphs were not renumbered, however, resulting in two paragraphs designated (a)(3). The amendments would correct this error by redesignating existing paragraphs (a)(3) and (a)(4) of newly redesignated Item 19 as paragraphs (a)(4) and (a)(5). We are also correcting the title for the instructions to Item 19, which currently erroneously references Item 13. In addition, we are removing the instruction to paragraph (b) of Item 16 and the instruction to paragraph (a)(3) of Item 19 on Form N–CSR.[32] These instructions were included in Form N–CSR pursuant to the 2016 investment company reporting modernization

23/pdf/98-7071.pdf; Registration Form Used by Open-End Management Investment Companies, Investment Company Act Release No. 23064 (Mar. 13, 1998) [63 FR 13916 (Mar. 23, 1998)], at paragraph accompanying n.41, available at *https://www.govinfo.gov/content/pkg/FR-1998-03-23/pdf/98-7070.pdf;* Money Market Fund Reform; Amendments to Form PF, Investment Company Act Release No. 31166 (July 23, 2014) [79 FR 47736 (Aug. 14, 2024)], at section III.E.1.a., available at *https://www.federalregister.gov/documents/2014/08/14/2014-17747/money-market-fund-reform-amendments-to-form-pf.*

[23] For example, the amendments correct errors in cross references to the definitions of government money market fund and retail money market fund located in 17 CFR 270.2a–7 (rule 2a–7), as well as cross references to the location of liquidity fee provisions in that rule.

[24] *See* Tailored Shareholder Reports for Mutual Funds and Exchange-Traded Funds; Fee Information in Investment Company Advertisements, Investment Company Act Release No. 34731 (Oct. 26, 2022) [87 FR 72758 (Nov. 25, 2022)] (''Tailored Shareholder Reports Adopting Release''), available at *https://www.federalregister.gov/documents/2022/11/25/2022-23756/tailored-shareholder-reports-for-mutual-funds-and-exchange-traded-funds-fee-information-in.*

[30] Listing Standards for Recovery of Erroneously Awarded Compensation, Investment Company Act Release No. 34732 (Oct. 26, 2022) [87 FR 73076 (Nov. 28, 2022)] (''Recovery of Erroneously Awarded Compensation Adopting Release''), available at *https://www.federalregister.gov/documents/2022/11/28/2022-23757/listing-standards-for-recovery-of-erroneously-awarded-compensation.*

[31] These references appear in paragraphs (c) and (f) of Item 2.

[32] *See* instruction to paragraph (b) of Item 16 of Form N–CSR (''Until the date that the registrant has filed its first report on Form N–PORT (17 CFR 270.150), the registrant's disclosures required by this Item are limited to any change in the registrant's internal control over financial reporting that occurred during the registrant's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.''); *see also* instruction to paragraph (a)(3) of Item 19 on Form N–CSR (''Until the date that the registrant has filed its first report on Form N–PORT (17 CFR 270.150), in the certification required by Item 18(a)(3), the registrant's certifying officers must certify that they have disclosed in the report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.'').

rulemaking to address how registrants should handle certain disclosures during the transition period before all registered management investment companies were required to file Form N–PORT.[33] These instructions are unnecessary as all registered management investment companies are currently required to file Form N–PORT (*i.e.,* the transition period for reporting on Form N–PORT has concluded).

F. Rule 204–2(j)(4)

We are amending rule 204–2 under the Investment Advisers Act to correct an erroneous cross reference. The corrected cross reference in rule 204–2(j)(4) will refer to 17 CFR 270.0–2(b)(2) (rule 0–2(b)(2)) for the definition of non-resident investment adviser (and not rule 0–2(d)(3) under the Investment Advisers Act, which does not exist).

G. OMB Control Numbers

Finally, we are amending 17 CFR 200.800 to display control numbers OMB has assigned to certain existing information collection requirements pursuant to the Paperwork Reduction Act that mistakenly were not previously listed in that rule.

II. Procedural and Other Matters

The Administrative Procedure Act (''APA'') generally requires an agency to publish notice of a rulemaking in the **Federal Register** and provide an opportunity for public comment.[34] This requirement does not apply, however, if the agency ''for good cause, finds . . . that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.'' [35] Given the nature of the amendments and the associated minimal exercise of discretion, the Commission finds that notice and public comment are unnecessary and that there is good cause to implement these amendments in a final rule.

The amendments to Form N–MFP correct inadvertent errors that created an inconsistency in the yield calculation formula and represented a departure from the longstanding method money market funds have used to calculate and report yield figures to the Commission. The amendments to rule 482 conform the required risk disclosure to the recently amended regulatory framework for money market funds. The amendments to Form N–1A, Form N–2, Form N–CSR, and rule 204–2 are ministerial in nature. They update incorrect or outdated cross references, redesignate the numbering of certain paragraphs, or remove outdated information. Accordingly, we find good cause that publishing the amendments to Form N–MFP, rule 482, Form N–1A, Form N–2, Form N–CSR, and rule 204–2 for comment is unnecessary. The APA also provides that notice of proposed rulemaking is not required for ''rules of agency organization, procedure, or practice.'' [36] The amendments to 17 CFR 200.800 pertain to agency organization, procedure, or practice, and therefore are not subject to the APA's requirement for advance notice and opportunity for public comment prior to publication.

The APA generally requires publication of a rule at least 30 days before its effective date. This requirement does not apply, however, if the agency finds good cause for making the rule effective sooner.[37] For the same reasons we are forgoing notice and comment, we find good cause to make the amendments effective upon publication in the **Federal Register**. This finding that notice and public comment are unnecessary also satisfies the requirements of the Congressional Review Act, allowing the amendments to become effective at such time that the Commission determines.[38] Pursuant to the Congressional Review Act, the Office of Information and Regulatory Affairs has designated these amendments not a ''major rule,'' as defined by 5 U.S.C. 804(2). The amendments also do not require analysis under the Regulatory Flexibility Act.[39]

III. Economic Analysis

As discussed above, these amendments correct errors in certain Commission rules and forms. The Commission is mindful of the economic effects, including the benefits and costs, of the adopted amendments. The analysis below addresses the likely economic effects of the amendments, including the anticipated and estimated benefits and costs of the amendments and their likely effects on efficiency, competition, and capital formation.[40] We analyze these effects against a baseline that consists of the current regulatory framework and current market practices.

The amendments we are adopting are limited in nature.[41] Therefore, many of the economic effects will be minimal or null. Where we are unable to quantify those economic effects that may exist, we explain why they are impracticable to quantify and we discuss them in qualitative terms. Given the nature of the benefits and the minimal costs expected to result from these amendments, we do not anticipate any changes to efficiency, competition, or capital formation will result from these amendments.

A. Form N–MFP

Baseline. Money market funds report their gross and net yields using public Form N–MFP filings.[42] The instructions accompanying these yields' calculations were inadvertently changed in a 2023 rulemaking.[43] The amendments to Form N–MFP correct this error.[44]

We estimate that this amendment to Form N–MFP will apply to 291 money market funds registered with the Commission as of December 31, 2023. Commission staff have not observed evidence of reported yield changes that would be expected if money market funds had fully implemented the erroneous instructions in their calculations of 7-day annualized gross and net yields.[45]

[33] *See* Investment Company Reporting Modernization, Investment Company Act Release No. 32314 (Oct. 13, 2016) [81 FR 81870 (Nov. 18, 2016)], available at *https://www.federalregister.gov/documents/2016/11/18/2016-25349/investment-company-reporting-modernization.*

[34] 5 U.S.C. 553(b)–(c).

[35] 5 U.S.C. 553(b)(3)(B).

[36] *See* 5 U.S.C. 553(b).

[37] *See* 5 U.S.C. 553(d).

[38] *See* 5 U.S.C. 808(2), allowing the rule amendments to become effective notwithstanding the requirement of 5 U.S.C. 801 (if a Federal agency finds that notice and public comment are impractical, unnecessary, or contrary to the public interest, a rule shall take effect at such time as the Federal agency promulgating the rule determines).

[39] *See* 5 U.S.C. 604(a) (requiring a final regulatory flexibility analysis only for rules required by the APA or other law to undergo notice and comment).

[40] Section 2(a) of the Securities Act, section 3(f) of the Exchange Act, section 2(c) of the Investment Company Act, and section 202(c) of the Investment Advisers Act require us, when engaging in rulemaking that requires us to consider or determine whether an action is necessary or appropriate in or consistent with the public interest, to consider, in addition to the protection of investors, whether the action will promote efficiency, competition, and capital formation. Section 23(a)(2) of the Exchange Act also requires us to consider the effect that the rules will have on competition and prohibits us from adopting any rule that would impose a burden on competition not necessary or appropriate in furtherance of the Exchange Act.

[41] *See supra* section II.

[42] *See* Form N–MFP Item A.19 for instructions on the calculation of 7-day gross yields at the series level, and Item B.8 for instructions on the calculation of 7-day net yields at the class level.

[43] The change directed the yield calculations to be based on the 7 business days preceding the date for which the yield is reported, instead of the 7 calendar days ended on (and including) that date. *See supra* section I.A.

[44] *See supra* section I.

[45] The scaling factor of 365/7 provided in the instructions to Item A.19 and B.8 (by reference to Item 26(a)(1) of Form N–1A) appropriately annualizes yields calculated over a period of 7 calendar days, but is inconsistent with the longer period of 7 business days as erroneously amended. Specifically, because 7 business days encompasses a longer period than 7 calendar days, a fund that

Economic Effects. The amendments to Form N–MFP will correct errors and ensure that Form N–MFP continues to reflect the longstanding calculation method for money market fund yields, including consistency in calculation methods across Form N–MFP, prospectuses, advertisements, and sales literature.[46] Investors will benefit to the extent that they would have been confused as to the performance of any money market funds that incorporate the errors into their yield calculations.[47] The change may also provide a small benefit to money market funds to the extent that the erroneous instructions and departure from longstanding methods would otherwise complicate their completion of the form.

We expect that money market funds will not incur significant costs associated with these amendments. As mentioned above, a review of a sample of Form N–MFP filings suggests that filers' recent yield calculations do not reflect the error.[48] If there are any money market funds that have implemented the erroneous instructions, those funds will have to make corrections to their internal processes following these amendments. However, we anticipate the one-time costs to do so will be minimal as funds are familiar with the correct method from Form N–MFP prior to the erroneous amendments going into effect, as well as from preparing their prospectuses, advertisements, and sales literature.

B. Rule 482(b)(4)

Baseline. Advertisements and other sales material for securities of a registered investment company that holds itself out to be a money market fund must include certain risk disclosures specified in paragraph (b)(4) of rule 482, as applicable to the fund.[49] Currently, the disclosures required by rule 482(b)(4) do not reflect recent changes to 17 CFR 270.2a–7 (rule 2a–7).[50] In addition, the required wording in these disclosures deviates from the corresponding statements that Form N–1A directs money market funds to include in their prospectuses, which historically had been aligned.[51] The amendment to rule 482 corrects these errors by aligning the risk disclosure language in paragraph (b)(4) to exactly match the corresponding language in Form N–1A.[52]

We estimate that the amendment to rule 482 will apply to 291 money market funds registered with the Commission as of December 2023. Money market funds will have to update their processes for preparing advertisements to incorporate the amended language in rule 482(b)(4), to the extent these processes have not already been updated. Intermediaries that prepare money market fund advertisements are also subject to rule 482(b)(4) and will also have to update their processes, if they have not already done so.

Economic Effects. The amendment will restore the consistency of the aforementioned risk disclosures presented by money market funds across various channels. This change will principally benefit certain prospective investors that may use a fund's advertisement to inform their investment decisions. Specifically, these investors will be presented with information that accurately describes certain requirements of amended rule 2a–7 applicable to the fund, thereby eliminating any confusion stemming from potential inconsistencies in risk disclosures across these channels.

Funds and intermediaries will incur a minimal cost associated with updating their processes for preparing money market fund advertisements as a result of this amendment because the wording changes are not extensive, and they may take up to 90 days to make the changes. In addition, we anticipate that funds or intermediaries generally will update any previously prepared advertisements that are actively in use, but that have not been updated to account for amended rule 2a–7.[53] This cost will scale with the number of these money market fund advertisements maintained by a fund or intermediary, but we expect the costs to funds and intermediaries will be minimal because the wording changes are minor and precisely prescribed, and funds and intermediaries may take up to 90 days to make the changes.

C. Other Amendments

The amendments make several ministerial changes to correct missing or erroneous paragraph numbers, cross-references, and similar administrative text. These changes affect Form N–1A, Form N–CSR, Form N–2, rule 204–2(j)(4), and the OMB control numbers listed in 17 CFR 200.800.

Form N–1A contains inaccurate language, in Item 10(a)(1)(iii), about the location of a discussion regarding the basis for the fund board's approval of the fund's advisory contract: it states the basis will be in the fund's annual or semi-annual report to fund shareholders, but funds are required to include this basis in Form N–CSR filings rather than in reports.[54] Open-end funds use Form N–1A to register with the Commission and to offer their shares; as of December 2023, there are 12,153 open-end funds registered with the Commission.

Correcting the erroneous statement in Form N–1A may benefit certain prospective investors that are inclined to review a fund board's basis for approving the fund's advisory contract. We are unaware of any data that would allow us to estimate the number of prospective investors that are inclined to seek out this information or the number of these prospective investors that would face difficulty obtaining this information in the absence of the technical amendment. However, any benefit will be small because investors can find this information despite the error.[55] Similarly, the costs that funds will undertake to update the wording on Form N–1A to reference Form N–CSR rather than their annual or semi-annual report will be minimal because the wording changes are not extensive and because funds will not need to include the updated language until their next annual prospectus update following the adoption of the amendments to Form N–1A.[56]

annualizes its yields using a scaling factor of 365/7 would overstate its annual yields relative to those yields reported prior to the June 11, 2024, compliance date. Commission staff reviewed Form N–MFP filings from 29 money market funds that filed Form N–MFP in May 2024 (representing 10% of money market funds and $620 billion (9.5%) of money market fund net assets) and did not observe any evidence of any such changes in yield reporting following this compliance date.

[46] *See supra* footnote 17.

[47] *See supra* footnote 45 (explaining why applying the incorrect formula could create misleading yield results).

[48] *See supra* section I.A. *See also supra* footnote 45.

[49] The amendment will update risk statement language that also applies to sales literature under rule 34b–1. *See supra* footnote 18.

[50] Specifically, Rule 482(b)(4) refers to a fund's suspension of redemptions or assessment of fees contingent upon the fund's available liquidity and regulatory minimums. These references are no longer applicable following the Money Market Fund Reform Adopting Release. The rule also includes outdated cross references to rule 2a–7. *See supra* footnote 23.

[51] *See supra* footnote 22 (describing corresponding statements).

[52] *See supra* section I.B.

[53] Pursuant to the Paperwork Reduction Act analysis, we anticipate a one-time internal time burden of half an hour per fund, at a cost of $21,243 across 291 money market funds. *See infra* section IV.

[54] *See supra* section I.C.

[55] *See supra* footnote 28 and accompanying text.

[56] *See id.* and accompanying text.

Form N–CSR contains incorrect cross-references, paragraph numbering, and section headings.[57] As of December 2023, there are 12,851 registered management investment companies that are registered with the Commission and required to file Form N–CSR. Correcting Form N–CSR will benefit users to the extent they may have been confused by the errors. Registered management investment companies will not incur any costs as a result of the corrections, which impose no new obligations.

Form N–2 contains an incorrect cross-reference.[58] Closed-end funds use Form N–2 to register with the Commission and to offer their shares; as of December 2023 there are 683 closed-end funds registered with the Commission. There may be a minimal benefit to closed-end funds resulting from this change if fewer compliance resources are required to correctly complete the form. There will be no cost to closed-end funds or other registrants, as the change does not require any action.

Rule 204–2(j)(4) contains an incorrect cross-reference. Rule 204–2(j)(4) sets books and records requirements for non-resident advisers; as of December 2023, there are 15,478 advisers registered with the Commission. There may be minimal benefit to advisers from this amendment to the extent that the erroneous cross reference caused confusion to some registrants or other individuals.[59] There will be no costs to advisers or other registrants resulting from this change, as no new actions will be required of them.

The table in 17 CFR 200.800 displays current OMB control numbers for information collection requirements codified in title 17 of the CFR, but OMB control numbers for several rules are absent from this display.[60] This amendment may benefit the public to the extent the corrected table improves ease of reference. We expect any benefit to be small. The amendment has no costs to registrants or other market participants.

IV. Paperwork Reduction Act

Certain provisions of the rules and form amendments contain ''collection of information'' requirements within the meaning of the Paperwork Reduction Act of 1995 (''PRA'').[61] Specifically, the amendments to rule 482(b)(4) of the Securities Act to revise the particular wording of the risk statements that money market funds must include in their advertisements modify an existing ''collection of information.'' The title for the existing collection of information is ''Rule 482 under the Securities Act of 1933, Advertising by an Investment Company as Satisfying Requirements of section 10'' (OMB Control No. 3235–0565). This collection of information will be mandatory for money market funds and the information will not be kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. We are submitting the proposed collections of information to the Office of Management and Budget for review in accordance with the PRA.

In our most recent PRA submission for rule 482, we estimated the annual aggregate burden to comply with the collection of information requirement of rule 482 is 577,847 burden hours with an internal cost burden of $213,133,255.[62] Given that the amendments are one-time updates to the wording of the risk statements already required under current rule 482(b)(4), we believe that, once affected funds have made these one-time changes, the amendments to rule 482(b)(4) will only require money market funds to incur the same costs and hour burdens, per fund, on an ongoing basis as under current rule 482(b)(4).

The table below summarizes our PRA initial and ongoing annual burden estimates associated with the amendments to rule 482. Some money market funds may have already updated the risk statements in their advertisements to conform with the required risk statements in their prospectus. Accordingly, the PRA estimates likely overestimate the costs associated with the final amendments for those funds whose risk statements in their advertisements are currently in line with the risk statements that the amendments would require.

ESTIMATES

	Internal initial burden hours	Internal annual burden hours [1]	Wage rate [2]	Internal time costs [1]
Amended risk statement in advertisement	0.5	[3] 0.17	[4] $429	$73
Number of funds		[5] × 291		[5] × 291
Total estimated burden		49		21,243
Current Burden Estimates		577,847		213,133,255
Revised Burden Estimates		577,896		213,154,498

[1] This estimate includes the initial burden and internal time costs estimates amortized over a three-year period.

[2] The estimated wage figures are based on published rates for the professionals described in this chart, modified to account for an 1800-hour work-year and inflation. The estimated figures for the proposed burdens were multiplied by 5.35 to account for bonuses, firm size, employee benefits, and overhead. See Securities Industry and Financial Markets Association's Report on Management & Professional Earnings in the Securities Industry 2013.

[3] This estimate assumes that, after the initial 0.5 hours to amend the fund's risk statement, funds would not have an ongoing burden associated with the amendment.

[4] This represents a blended rate for a compliance attorney ($449) and a senior programmer ($408).

[5] The number of funds estimate is based on the number of money market funds reporting to the Commission on Form N–MFP as of Dec. 2023.

The amendments to Form N–MFP, Form N–1A, Form N–2, Form N–CSR, and rule 204–2 do not make any substantive modifications to any existing collection of information requirements or impose any new

[57] Item 2 and Item 19 of Form N–CSR contain incorrect cross-references. In addition, certain paragraphs in Item 19 are incorrectly numbered and one of the headings incorrectly refers to Item 13 instead of Item 19. Also, instructions to Item 16(b) and Item(a)(3) are irrelevant, as they refer to a 2016 rulemaking's pre-compliance transitionary period that is now concluded. *See supra* section I.E.

[58] Instruction 8.a to Item 24 of Form N–2 refers to Item 7 of Form N–CSR; it should instead refer to Item 12. *See supra* section I.D.

[59] Rule 204–2(j)(4) incorrectly cross-references the location of the definition of ''non-resident advisers.'' The erroneous reference does not exist, and the definition appears in the same section as the erroneous reference, so any confusion is likely small. *See supra* section I.F.

[60] *See supra* section I.G.

[61] 44 U.S.C. 3501 *et seq.*

[62] The most recent rule 482 PRA submission was approved in 2022 (OMB Control No. 3235–0565).

substantive recordkeeping or information collection requirements within the meaning of the PRA.[63] Accordingly, we are not revising any burden and cost estimates in connection with these amendments.

Statutory Authority

The Commission is adopting these amendments under the authority set forth in the Securities Act, particularly sections 5, 6, 7, 10, 19, and 28 thereof [15 U.S.C. 77a *et seq.*]; the Exchange Act, particularly section 23 thereof [15 U.S.C. 78a *et seq.*]; the Investment Company Act, particularly sections 8, 24, 30, and 38 thereof [15 U.S.C. 80a *et seq.*]; the Investment Advisers Act, particularly sections 204 and 211 thereof [15 U.S.C. 80b–1 *et seq*]; and 44 U.S.C. 3506, 3507.

Text of Rule and Form Amendments

For reasons set forth in the preamble, the Commission is amending title 17, chapter II of the Code of Federal Regulations as follows:

PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

■ 1. The authority citation for part 200 continues to read as follows:

Authority: 5 U.S.C. 552, 552a, 552b, and 557; 11 U.S.C. 901 and 1109(a); 15 U.S.C. 77c, 77e, 77f, 77g, 77h, 77j, 77o, 77q, 77s, 77u, 77z–3, 77ggg(a), 77hhh, 77sss, 77uuu, 78b, 78c(b), 78d, 78d–1, 78d–2, 78e, 78f, 78g, 78h, 78i, 78k, 78k–1, 78*l*, 78m, 78n, 78*o*, 78*o*–4, 78q, 78q–1, 78w, 78t–1, 78u, 78w, 78*ll*(d), 78mm, 78eee, 80a–8, 80a–20, 80a–24, 80a–29, 80a–37, 80a–41, 80a–44(a), 80a–44(b), 80b–3, 80b–4, 80b–5, 80b–9, 80b–10(a), 80b–11, 7202, and 7211 *et seq.;* 29 U.S.C. 794; 44 U.S.C. 3506 and 3507; Reorganization Plan No. 10 of 1950 (15 U.S.C. 78d nt); sec. 8G, Pub. L. 95–452, 92 Stat. 1101 (5 U.S.C. App.); sec. 913, Pub. L. 111–203, 124 Stat. 1376, 1827; sec. 3(a), Pub. L. 114–185, 130 Stat. 538; E.O. 11222, 30 FR 6469, 3 CFR, 1964–1965 Comp., p. 36; E.O. 12356, 47 FR 14874, 3 CFR, 1982 Comp., p. 166; E.O. 12600, 52 FR 23781, 3 CFR, 1987 Comp., p. 235; Information Security Oversight Office Directive No. 1, 47 FR 27836; and 5 CFR 735.104 and 5 CFR parts 2634 and 2635, unless otherwise noted.

■ 2. Revise and republish § 200.800 to read as follows:

§ 200.800 OMB control numbers assigned pursuant to the Paperwork Reduction Act.

(a) *Purpose.* This subpart collects and displays the control numbers assigned to information collection requirements of the Commission by the Office of Management and Budget pursuant to the Paperwork Reduction Act of 1980, 44 U.S.C. 3500 *et seq.* This subpart displays current OMB control numbers for those information collection requirements of the Commission that are rules and regulations and codified in this title either in full text or incorporated by reference with the approval of the Director of the Office of the Federal Register.

(b) *Display.*

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

■ 3. The authority citation for part 230 continues to read, in part, as follows:

Authority: 15 U.S.C. 77b, 77b note, 77c, 77d, 77f, 77g, 77h, 77j, 77r, 77s, 77z–3, 77sss, 78c, 78d, 78j, 78*l,* 78m, 78n, 78o, 78o–7 note, 78t, 78w, 78*ll*(d), 78mm, 80a–8, 80a–24, 80a–28, 80a–29, 80a–30, and 80a–37, and Pub. L. 112–106, sec. 201(a), sec. 401, 126 Stat. 313 (2012), unless otherwise noted.

* * * * *

Sections 230.400 to 230.499 issued under secs. 6, 8, 10, 19, 48 Stat. 78, 79, 81, and 85, as amended (15 U.S.C. 77f, 77h, 77j, 77s).

* * * * *

■ 4. Amend § 230.482 by revising paragraph (b)(4) to read as follows:

§ 230.482 Advertising by an investment company as satisfying requirements of section 10.

* * * * *

(b) * * *

(4) *Money market funds.* (i) An advertisement for an investment company that holds itself out to be a money market fund, that is not a government money market fund, as defined in § 270.2a–7(a)(14) of this chapter, or a retail money market fund, as defined in § 270.2a–7(a)(21) of this chapter, must include the following statement:

You could lose money by investing in the Fund. Because the share price of the Fund will fluctuate, when you sell your shares they may be worth more or less than what you originally paid for them. The Fund may impose a fee upon sale of your shares. The Fund generally must impose a fee when net sales of Fund shares exceed certain levels. An investment in the Fund is not a bank account and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor is not required to reimburse the Fund for losses, and you should not expect that the sponsor will provide financial support to the Fund at any time, including during periods of market stress.

(ii) An advertisement for an investment company that holds itself out to be a money market fund, that is a government money market fund, as defined in § 270.2a–7(a)(14) of this chapter, or a retail money market fund, as defined in § 270.2a–7(a)(21) of this chapter, and that is subject to the requirements of § 270.2a–7(c)(2)(i) of this chapter (or is not subject to the requirements of § 270.2a–7(c)(2)(i) of this chapter pursuant to § 270.2a–7(c)(2)(i)(B) of this chapter, but has chosen to rely on the ability to impose liquidity fees consistent with the requirements of § 270.2a–7(c)(2)(i)), must include the following statement:

You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at $1.00 per share, it cannot guarantee it will do so. The Fund may impose a fee upon sale of your shares. An investment in the Fund is not a bank account and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor is not required to reimburse the Fund for losses, and you should not expect that the sponsor will provide financial support to the Fund at any time, including during periods of market stress.

(iii) An advertisement for an investment company that holds itself

out to be a money market fund, that is a government money market fund, as defined in § 270.2a–7(a)(14) of this chapter, that is not subject to the requirements of § 270.2a–7(c)(2)(i) of this chapter pursuant to § 270.2a–7(c)(2)(i)(B) of this chapter, and that has not chosen to rely on the ability to impose liquidity fees consistent with the requirements of § 270.2a–7(c)(2)(i), must include the following statement:

You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at $1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not a bank account and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor is not required to reimburse the Fund for losses, and you should not expect that the sponsor will provide financial support to the Fund at any time, including during periods of market stress.

Note 3 to paragraph (b)(4). If an affiliated person, promoter, or principal underwriter of the Fund, or an affiliated person of such a person, has contractually committed to provide financial support to the Fund, the statement may omit the last sentence (''The Fund's sponsor is not required to reimburse the Fund for losses, and you should not expect that the sponsor will provide financial support to the Fund at any time, including during periods of market stress.'') for the term of the agreement. For purposes of this note, the term ''financial support'' includes any capital contribution, purchase of a security from the Fund in reliance on § 270.17a–9 of this chapter, purchase of any defaulted or devalued security at par, execution of letter of credit or letter of indemnity, capital support agreement (whether or not the Fund ultimately received support), performance guarantee, or any other similar action reasonably intended to increase or stabilize the value or liquidity of the fund's portfolio; however, the term ''financial support'' excludes any routine waiver of fees or reimbursement of fund expenses, routine inter-fund lending, routine inter-fund purchases of fund shares, or any action that would qualify as financial support as defined in this note, that the board of directors has otherwise determined not to be reasonably intended to increase or stabilize the value or liquidity of the fund's portfolio.

PART 274—FORMS PRESCRIBED UNDER THE INVESTMENT COMPANY ACT OF 1940

■ 5. The authority citation for part 274 continues to read as follows:

Authority: 15 U.S.C. 77f, 77g, 77h, 77j, 77s, 78c(b), 78*l,* 78m, 78n, 78n–1, 78*o*(d), 80a–8, 80a–24, 80a–26, 80a–29, and sec. 939A, Pub. L. 111–203, 124 Stat. 1376, unless otherwise noted.

■ 6. Amend Form N–1A (referenced in §§ 239.15A and 274.11A) by revising Item 10.

Note: Form N–1A is attached as Appendix A to this document. Form N–1A will not appear in the Code of Federal Regulations.

■ 7. Amend Form N–2 (referenced in §§ 239.14 and 274.11a–1) by revising Instruction 8.a to Item 24.

Note: Form N–2 is attached as Appendix B to this document. Form N–2 will not appear in the Code of Federal Regulations.

■ 8. Revise Form N–CSR (referenced in §§ 249.331 and 274.128) by:

■ a. In Items 2(c) and (f), removing the text ''Item 18(a)(1)'' and adding, in its place, the text ''Item 19(a)(1)'';

■ b. In Item 16, removing the instruction to paragraph (b); and

■ c. In Item 19:

■ i. Removing the instruction to paragraph (a)(3);

■ ii. Redesignating the instructions to Item 13 as instructions to Item 19; and

■ iii. Redesignating Items 19(a)(3) and (4) as Items 19(a)(4) and (5), respectively.

■ 9. Amend Form N–MFP (referenced in § 274.201) by revising Items A.19 and B.8.

Note: Form N–MFP is attached as Appendix C to this document. Form N–MFP will not appear in the Code of Federal Regulations.

PART 275—RULES AND REGULATIONS, INVESTMENT ADVISERS ACT OF 1940

■ 10. The authority citation for part 275 continues to read, in part, as follows:

Authority: 15 U.S.C. 80b–2(a)(11)(G), 80b–2(a)(11)(H), 80b–2(a)(17), 80b–3, 80b–4, 80b–4a, 80b–6(4), 80b–6a, 80b–11, 1681w(a)(1), 6801–6809, and 6825, unless otherwise noted.

* * * * *

Section 275.204–2 is also issued under 15 U.S.C. 80b–6.

* * * * *

■ 11. Amend § 275.204–2 by revising paragraph (j)(4) to read as follows:

§ 275.204–2 Books and records to be maintained by investment advisers.

* * * * *

(j) * * *

(4) For purposes of this paragraph (j) the term *non-resident investment adviser* shall have the same meaning set out in § 275.0–2(b)(2).

* * * * *

By the Commission.

Dated: November 7, 2024.

Vanessa A. Countryman,

Secretary.

Note: The following appendices will not appear in the Code of Federal Regulations.

* * * * *

Instructions

* * * * *

8. a. When a Registrant (or financial intermediary through which shares of the Registrant may be purchased or sold) receives a request for a description of the policies and procedures that the Registrant uses to determine how to vote proxies, the Registrant (or financial intermediary) must send the information most recently disclosed in response to Item 18.16 of this Form or Item 12 of Form N–CSR within 3 business days of receipt of the request, by first-class mail or other means designed to ensure equally prompt delivery.

* * * * *

Appendix C—Form N–MFP

Form N–MFP

* * * * *

Item A.19. 7-day gross yield. For each business day, based on the 7 days ended on that business day, calculate the fund's yield by determining the net change, exclusive of capital changes and income other than investment income, in the value of a hypothetical pre-existing account having a balance of one share at the beginning of the period and dividing the difference by the value of the account at the beginning of the base period to obtain the base period return, and then multiplying the base period return by (365/7) with the resulting yield figure carried to at least the nearest hundredth of one percent. The 7-day gross yield should not reflect a deduction of shareholder fees and fund operating expenses. For master funds and feeder funds, report the 7-day gross yield at the master-fund level.

a. 7-day gross yield _____

b. Date _____

* * * * *

Item B.8. 7-day net yield for each business day of the month reported, as calculated under Item 26(a)(1) of Form N–1A (§ 274.11A of this chapter) except based on the 7 days ended on that business day.

a. 7-day net yield _____

b. Date _____

BILLING CODE 0099–10–D

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket No. USCG–2024–0878]

Special Local Regulations; San Diego Parade of Lights, San Diego, CA

AGENCY: Coast Guard, DHS.

ACTION: Notification of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the San Diego Parade of Lights special local regulations on the waters of San Diego Bay, California on December 8, 2024, and December 15, 2024. These special local regulations are necessary to provide for the safety of the participants, crew, spectators, sponsor vessels, and general users of the waterway. During the enforcement period, persons and vessels are prohibited from anchoring, blocking, loitering, or impeding within this regulated area unless authorized by the Captain of the Port Sector San Diego or a designated representative.

DATES: The regulations in 33 CFR 100.1101 will be enforced from 5 p.m. through 8 p.m. on December 8, 2024, and from 5 p.m. through 8 p.m. on December 15, 2024, for Item 5 in Table 1 of Section 100.1101.

FOR FURTHER INFORMATION CONTACT: If you have questions about this publication of enforcement, call or email Lieutenant Shelley Turner, Waterways Management, U.S. Coast Guard Sector San Diego, CA; telephone (619) 278–7656, email *MarineEventsSD@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the special local regulations in 33 CFR 100.1101 for the San Diego Parade of Lights in San Diego Bay, CA in 33 CFR 100.1101, Table 1, Item 5 of that section from 5 p.m. until 8 p.m. on December 8, 2024, and on December 15, 2024. This enforcement action is being taken to provide for the safety of life on navigable waterways during the event. The Coast Guard's regulation for recurring marine events in the San Diego Captain of the Port Zone identifies the regulated entities and area for this event. During the enforcement periods and under the provisions of 33 CFR 100.1101, persons and vessels are prohibited from anchoring, blocking, loitering, or impeding within this regulated area, unless authorized by the Captain of the Port, or his designated representative. The Coast Guard may be assisted by other Federal, State, or local law enforcement agencies in enforcing this regulation.

In addition to this notification of enforcement in the **Federal Register**, the Coast Guard will provide the maritime community with advance notification of this enforcement period via the Local Notice to Mariners, marine information broadcasts, and local advertising by the event sponsor.

P.C. Dill,

Captain, U.S. Coast Guard, Captain of the Port Sector San Diego.

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R10–OAR–2024–0449; FRL–12269–01–R10]

Air Plan Approval; ID; Update to Materials Incorporated by Reference

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; administrative change.

SUMMARY: The Environmental Protection Agency (EPA) is updating the materials that are incorporated by reference (IBR) into the Idaho State Implementation Plan (SIP). The regulations affected by this update have been previously submitted by Idaho and approved by the EPA. In this final rule, the EPA is also notifying the public of corrections and clarifying changes in the Code of Federal Regulations (CFR) tables that identify the materials incorporated by reference into the Idaho SIP. This update affects the materials that are available for public inspection at the National Archives and Records Administration (NARA) and the EPA Regional Office.

DATES: This action is effective November 18, 2024.

ADDRESSES: The SIP materials for which incorporation by reference into 40 CFR part 52 is finalized through this action are available for inspection at the following locations: Environmental Protection Agency, Region 10, 1200 Sixth Avenue, Suite 155, Seattle, WA 98101; and *www.regulations.gov.* To view the materials at the Region 10 Office, the EPA requests that you email the contact listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Kristin Hall, EPA Region 10, 1200 Sixth Avenue—Suite 155, Seattle, WA 98101, at (206) 553–6357, or *hall.kristin@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Each state has a SIP containing the control measures and strategies used to attain and maintain the national ambient air quality standards (NAAQS). The SIP is extensive, containing such elements as air pollution control regulations, emission inventories, monitoring networks, attainment

demonstrations, and enforcement mechanisms.

Each state must formally adopt the control measures and strategies in the SIP after the public has had an opportunity to comment on them and then submit the proposed SIP revisions to the EPA. Once these control measures and strategies are approved by the EPA, and after notice and comment, they are incorporated into the federally approved SIP and are identified in title 40 of part 52, ''Approval and Promulgation of Implementation Plans,'' of the Code of Federal Regulations (40 CFR part 52). The full text of the state regulation approved by the EPA is not reproduced in its entirety in 40 CFR part 52 but is ''incorporated by reference.'' This means that the EPA has approved a given state regulation or specified changes to the given regulation with a specific effective date. The public is referred to the location of the full text version should they want to know which measures are contained in a given SIP. The information provided allows the EPA and the public to monitor the extent to which a state implements a SIP to attain and maintain the NAAQS and to take enforcement action for violations of the SIP.

The SIP is a living document which the state can revise as necessary to address the unique air pollution problems in the state. Therefore, the EPA from time to time must take action on proposed revisions containing new or revised state regulations. A submission from a state can revise one or more rules in their entirety, or portions of rules. The state indicates the changes in the submission (such as by using redline/strikethrough text) and the EPA then takes action on the requested changes. The EPA establishes a docket for its actions using a unique Docket Identification Number, which is listed in each action. These dockets and the complete submission are available for viewing on *www.regulations.gov.*

On May 22, 1997 (62 FR 27968), the EPA revised the procedures for incorporating by reference, into the Code of Federal Regulations, materials approved by the EPA into each SIP. These changes revised the format for the identification of the SIP in 40 CFR part 52, streamlined the mechanisms for announcing the EPA approval of revisions to a SIP, and streamlined the mechanisms for the EPA's updating of the IBR information contained for each SIP in 40 CFR part 52. The revised procedures also called for the EPA to maintain ''SIP Compilations'' that contain the federally approved regulations and source-specific permits submitted by each state agency.

The EPA generally updates these SIP Compilations every few years. Under the revised procedures, the EPA must periodically publish an informational document in the rules section of the **Federal Register** notifying the public that updates have been made to a SIP Compilation for a particular state. The EPA began applying the 1997 revised procedures to the Idaho SIP on January 25, 2005 (70 FR 3479). The EPA subsequently published updates to the IBR materials for Idaho on December 28, 2012 (77 FR 76417), April 1, 2015 (80 FR 17333), and July 24, 2020 (85 FR 44741).

A. Approved and Incorporated by Reference Regulatory Materials

Since the last IBR update, the EPA approved and incorporated by reference regulatory materials into the Idaho SIP at 40 CFR 52.670(c) as described in the following paragraphs of this preamble.

1. Action on November 19, 2020 (85 FR 73632):

- IDAPA 58.01.01.006 (general air quality definitions), except section 006.49, 006.50, 006.51, 006.66, 006.67, 006.68.b, 006.116, and 006.118 (State effective 4/11/2019);
- IDAPA 58.01.01.107 (incorporation by reference of Federal standards), except section 107.03.f through 107.03.p (State effective 3/30/2020);
- IDAPA 58.01.01.221 (exemptions from permit to construct requirements for certain pollutants) (State effective 4/11/2019);
- IDAPA 58.01.01.222 (exemptions from permit to construct for certain sources) (State effective 4/11/2019); and
- IDAPA 58.01.01.404 (procedure for issuing permits) (State effective 4/11/2019).

2. Action on May 24, 2022 (87 FR 31429):

- IDAPA 58.01.01.107 (incorporation by reference of Federal standards), except section 107.03.f through 107.03.p (State effective 6/17/2021).

3. Action on March 29, 2023 (88 FR 18426):

- IDAPA 58.01.01.107 (incorporation by reference of Federal standards), except section 107.03.f through 107.03.p (State effective 3/24/2022).

4. Action on May 26, 2023 (88 FR 34091):

- Idaho Code section 39–107(1)(a) (board composition rules) (State effective 7/1/2022).

B. Regulatory Materials Removed From Incorporation by Reference

Since the last IBR update, the EPA also removed the following regulatory materials from the Idaho SIP at 40 CFR 52.670(c).

1. Action on November 19, 2020 (85 FR 73632):

- IDAPA 58.01.01.845 (rules for control of sulfur oxide emissions from sulfuric acid plants) (State effective 5/1/1994);
- IDAPA 58.01.01.846 (emission limits) (State effective 4/5/2000);
- IDAPA 58.01.01.847 (monitoring and testing requirements) (State effective 5/1/1994); and
- IDAPA 58.01.01.848 (compliance schedules) (State effective 4/5/2000).

2. Action on June 15, 2023 (88 FR 39177):

- Ada County Ordinance (motor vehicle emissions control ordinance) (county approval date 6/15/1999);
- City of Boise Ordinance (motor vehicle emissions control ordinance) (city approval date 7/20/1999);
- City of Eagle Ordinance (motor vehicle emissions control ordinance) (city approval date 4/27/1999);
- City of Garden City Ordinance (motor vehicle emission control ordinance) (most recently amended 8/13/1996); and
- City of Meridian Ordinance (motor vehicle emissions control ordinance) (city approval date 6/1/1999).

II. EPA Action

In this action, the EPA is providing notification of an update to the materials incorporated by reference into the Idaho SIP as of September 1, 2024, and identified in 40 CFR 52.670(c) and (d). This update includes SIP materials submitted by Idaho and approved by the EPA since the last IBR update. *See* 85 FR 44741 (July 24, 2020). In addition, The EPA is providing notification of the following corrections and clarifying changes to 40 CFR 52.670(c), (d), and (e):

A. Changes Applicable to Paragraph (c)

1. Revising the introductory text of paragraph (c), ''EPA approved regulations,'' to read ''EPA approved laws and regulations'';

2. Replacing the original table entitled ''EPA Approved Idaho Regulations and Statutes'' with three new tables entitled ''Table 1 to Paragraph (c)—State Regulations'', ''Table 2 to Paragraph (c)—State Statutes'', and ''Table 3 to Paragraph (c)—City and County Codes and Ordinances'';

3. Sorting the entries from the original table into the three new tables;

4. Revising the undesignated heading ''Idaho Administrative Procedures Act (IDAPA) 58.01.01—Rules for the Control of Air Pollution in Idaho'' to read ''Rules for the Control of Air Pollution in Idaho (IDAPA 58.01.01)'';

5. Adding back entries 121 and 122 that were removed in error in the action

on November 19, 2020 (85 FR 73632); and

6. Correcting entries 221 and 222 that should have been revised in the action on November 19, 2020 (85 FR 73632).

B. Changes Applicable to Paragraph (d)

1. Revising the introductory text of paragraph (d), ''EPA approved State Source-specific requirements,'' to read ''EPA approved source-specific requirements''; and

2. Renaming the original table entitled ''EPA Approved Idaho Source-Specific Requirements'' to read ''Table 4 to Paragraph (d)—State Source-Specific Requirements''.

C. Changes Applicable to Paragraph (e)

1. Replacing the original table entitled ''EPA-Approved Idaho Nonregulatory Provisions and Quasi-Regulatory Measures'' with two new tables entitled ''Table 5 to Paragraph (e)—State Provisions Approved but not Incorporated by Reference'', ''Table 6 to Paragraph (e)—State Attainment, Maintenance and Other Plans'';

2. Sorting and grouping the entries from the original table into the two new tables;

3. Correcting the entry for ''Northern Ada County Air Quality Maintenance Area Second 10-year Carbon Monoxide Limited Maintenance Plan'' to list the appropriate geographic area, ''Northern Ada County'', instead of ''state-wide''; and

4. Correcting the entry for ''Regional Haze SIP Revision'' to revise text in the explanations column that was included in error.

III. Good Cause Exemption

The EPA has determined that this action falls under the ''good cause'' exemption in section 553(b)(3)(B) of the Administrative Procedure Act (APA) which, upon finding ''good cause,'' authorizes agencies to dispense with public participation and section 553(d)(3) which allows an agency to make an action effective immediately (thereby avoiding the 30-day delayed effective date otherwise provided for in the APA). This administrative action simply codifies provisions which are already in effect as a matter of law in Federal and approved state programs, makes corrections and clarifying changes to the tables in the CFR, and makes ministerial changes to the prefatory heading to the tables in the CFR. Under section 553 of the APA, an agency may find good cause where procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Public comment for this administrative action is ''unnecessary'' and ''contrary to the public interest'' since the codification (and corrections) only reflect existing law. Immediate notice of this action in the **Federal Register** benefits the public by providing the public notification of the updated Idaho SIP Compilation and notification of corrections to the Idaho ''Identification of Plan'' portion of the CFR. Further, pursuant to section 553(d)(3), making this action immediately effective benefits the public by immediately updating both the SIP Compilation and the CFR ''Identification of plan'' section (which includes table entry corrections).

IV. Incorporation by Reference

In this document, The EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, The EPA is finalizing the incorporation by reference of regulations promulgated by Idaho, previously approved by the EPA and federally effective before September 1, 2024, contained in 40 CFR 52.670(c), *EPA approved laws and regulations,* and 40 CFR 52.670(d), *EPA approved source-specific requirements,* described in section II. of this preamble. The EPA has made, and will continue to make, these materials generally available through *www.regulations.gov* and at the EPA Region 10 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the Clean Air Act (CAA), the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, The EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 14094 (88 FR 21879, April 11, 2023);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a state program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications and it will not impose substantial direct costs on Tribal governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, February 16, 1994) directs Federal agencies to identify and address ''disproportionately high and adverse human health or environmental effects'' of their actions on communities with environmental justice (EJ) concerns to the greatest extent practicable and permitted by law. Executive Order 14096 (Revitalizing Our Nation's Commitment to Environmental Justice for All, 88 FR 25251, April 26, 2023) builds on and supplements Executive Order 12898 and defines EJ as, among other things, the just treatment and meaningful involvement of all people, regardless of income, race, color, national origin, or Tribal affiliation, or disability in agency decision-making and other Federal activities that affect human health and the environment.

The EPA did not perform an EJ analysis and did not consider EJ in this action. Consideration of EJ is not required as part of this action, and there is no information in the record inconsistent with the stated goal of Executive Order 12898/14096 of achieving EJ for communities with EJ concerns.

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

The EPA also believes that the provisions of section 307(b)(1) of the CAA pertaining to petitions for judicial review are not applicable to this action. This is because prior EPA rulemaking actions for each individual component of the Idaho SIP Compilation previously afforded interested parties the opportunity to file a petition for judicial review in the United States Court of Appeals for the appropriate circuit within 60 days of such rulemaking action. Thus, the EPA believes judicial review of this action under section 307(b)(1) is not available.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: November 7, 2024.

Casey Sixkiller,

Regional Administrator, Region 10.

For the reasons set forth in the preamble, the EPA is amending 40 CFR part 52 as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart N—Idaho

■ 2. In § 52.670, paragraphs (b) through (e) are revised to read as follows:

§ 52.670 Identification of plan.

* * * * *

(b) *Incorporation by reference.* (1) Material listed in paragraphs (c) and (d) of this section with an EPA approval date prior to September 1, 2024, was approved for incorporation by reference by the Director of the **Federal Register** in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Material is incorporated as it exists on the date of the approval and notification of any change in the material will be published in the **Federal Register**. Entries in paragraphs (c) and (d) with EPA approval dates after September 1, 2024, will be incorporated by reference in the next update to the SIP compilation.

(2) EPA Region 10 certifies that the rules/regulations provided by the EPA in the SIP compilation at the addresses in paragraph (b)(3) of this section are an exact duplicate of the officially promulgated State rules/regulations which have been approved as part of the State Implementation Plan as of the dates referenced in paragraph (b)(1) of this section.

(3) Copies of the materials incorporated by reference may be inspected at the Region 10 EPA Office at 1200 Sixth Avenue, Suite 155, Seattle, WA 98101. To obtain the material, please call (206) 553–6357. You may inspect the material with an EPA approval date prior to September 1, 2024, for Idaho at the National Archives and Records Administration (NARA). TABLE 1 TO PARAGRAPH (c)—STATE REGULATIONS

State citation	Title/subject	State effective date	EPA approval date	Explanations
Rules for the Control of Air Pollution in Idaho (IDAPA 58.01.01)				
001	Title and Scope	5/1/1994	1/16/2003, 68 FR 2217.	
004	Catchlines	5/1/1994	1/16/2003, 68 FR 2217.	
005	Definitions	5/1/1994	1/16/2003, 68 FR 2217.	
006	General Definitions	4/11/2019; 4/11/2015, 4/4/2013, 3/30/2007, 4/11/2006, 7/1/2002, 4/5/2000, 3/20/1997, 5/1/1994.	11/19/2020, 85 FR 73632	Except sections 006.49, 006.50, 006.51, 006.66, 006.67, 006.68.b, 006.116, and 006.118.
007	Definitions for the Purposes of Sections 200 through 225 and 400 through 461.	3/30/2007, 4/11/2006, 4/5/2000, 6/30/1995, 5/1/1995, 5/1/1994.	6/9/2011, 76 FR 33647.	
011	Definitions for the Purposes of Sections 790 through 799.	3/15/2002	8/12/2016, 81 FR 53290.	
106	Abbreviations	5/1/1994	1/16/2003, 68 FR 2217.	
107	Incorporations by Reference	3/28/2018, 3/25/2016, 3/20/2014, 3/30/2007, 7/1/1997, 5/1/1994.	8/20/2018, 83 FR 42033	Except sections 107.03.f through 107.03.p.
121	Compliance Requirements by Department.	5/1/1994	1/16/2003, 68 FR 2217.	
122	Information Orders by the Department.	4/5/2000, 5/1/1994	1/16/2003, 68 FR 2217.	
123	Certification of Documents	5/1/1994	1/16/2003, 68 FR 2217.	
124	Truth, Accuracy and Completeness of Documents.	5/1/1994	1/16/2003, 68 FR 2217.	
125	False Statements	3/23/1998	1/16/2003, 68 FR 2217.	
126	Tampering	3/23/1998	1/16/2003, 68 FR 2217.	
127	Format of Responses	5/1/1994	1/16/2003, 68 FR 2217.	
130	Startup, Shutdown, Scheduled Maintenance, Safety Measures, Upset and Breakdown.	4/5/2000	1/16/2003, 68 FR 2217.	
131	Excess Emissions	4/5/2000	1/16/2003, 68 FR 2217.	
132	Correction of Condition	4/5/2000	1/16/2003, 68 FR 2217.	

TABLE 1 TO PARAGRAPH (c)—STATE REGULATIONS—Continued

State citation	Title/subject	State effective date	EPA approval date	Explanations
133	Start-up, Shutdown and Scheduled Maintenance Requirements.	4/11/2006, 4/5/2000, 3/20/1997	11/26/2010, 75 FR 72719.	
134	Upset, Breakdown and Safety Requirements.	4/11/2006, 4/5/2000, 3/20/1997	11/26/2010, 75 FR 72719.	
135	Excess Emission Reports	4/11/2006, 4/5/2000, 3/20/1997	11/26/2010, 75 FR 72719.	
136	Excess Emission Records	4/5/2000, 3/23/1998, 3/20/1997	1/16/2003, 68 FR 2217.	
155	Circumvention	4/11/2006	11/26/2010, 75 FR 72719.	
156	Total Compliance	5/1/1994	1/16/2003, 68 FR 2217.	
157	Test Methods and Procedures	4/11/2015	8/12/2016, 81 FR 53290.	
160	Provisions Governing Specific Activities and Conditions.	4/5/2000	1/16/2003, 68 FR 2217.	
162	Modifying Physical Conditions	5/1/1994	1/16/2003, 68 FR 2217.	
163	Source Density	5/1/1994	1/16/2003, 68 FR 2217.	
164	Polychlorinated Biphenyls (PCBs)	5/1/1994	1/16/2003, 68 FR 2217.	
175	Procedures and Requirements for Permits Establishing a Facility Emissions Cap.	4/11/2015	8/12/2016, 81 FR 53290.	
176	Facility Emissions Cap	4/11/2015	8/12/2016, 81 FR 53290	Except for provisions relating to hazardous air pollutants.
177	Application Procedures	4/11/2015	8/12/2016, 81 FR 53290.	
178	Standard Contents of Permits Establishing a Facility Emissions Cap.	4/11/2015	8/12/2016, 81 FR 53290.	
179	Procedures for Issuing Permits Establishing a Facility Emissions Cap.	4/11/2015	8/12/2016, 81 FR 53290.	
180	Revisions to Permits Establishing a Facility Emissions Cap.	4/11/2015	8/12/2016, 81 FR 53290.	
181	Notice and Recordkeeping of Estimates of Ambient Concentrations.	4/11/2015	8/12/2016, 81 FR 53290.	
200	Procedures and Requirements for Permits to Construct.	3/25/2016	5/12/2017, 82 FR 22083.	
201	Permit to Construct Required	4/11/2006	8/12/2016, 81 FR 53290.	
202	Application Procedures	4/11/2015	8/12/2016, 81 FR 53290.	
203	Permit Requirements for New and Modified Stationary Sources.	5/1/1994	1/16/2003, 68 FR 2217	Except subsection 203.03.
204	Permit Requirements for New Major Facilities or Major Modifications in Nonattainment Areas.	4/2/2008, 3/30/2007, 4/6/2005, 4/5/2000, 5/1/1994.	11/26/2010, 75 FR 72719.	
205	Permit Requirements for New Major Facilities or Major Modifications in Attainment or Unclassifiable Areas.	4/2/2008, 3/30/2007, 4/6/2005	11/26/2010, 75 FR 72719.	
206	Optional Offsets for Permits to Construct.	4/6/2005	11/26/2010, 75 FR 72719.	
207	Requirements for Emission Reduction Credit.	5/1/1994	1/16/2003, 68 FR 2217.	
208	Demonstration of Net Air Quality Benefit.	4/5/2000, 5/1/1994	1/16/2003, 68 FR 2217.	
209	Procedures for Issuing Permits	4/11/2006, 4/6/2005, 5/3/2003, 7/1/2002, 4/5/2000, 3/19/1999, 3/23/1998, 5/1/1994.	11/26/2010, 75 FR 72719.	
211	Conditions for Permits to Construct.	5/1/1994	1/16/2003, 68 FR 2217.	
212	Obligation to Comply	5/1/1994	1/16/2003, 68 FR 2217.	
213	Pre-Permit Construction	4/11/2006, 5/3/2003, 4/5/2000, 3/23/1998.	11/26/2010, 75 FR 72719.	
220	General Exemption Criteria for Permit to Construct Exemptions.	4/4/2013, 4/5/2000	3/3/2014, 79 FR 11711.	
221	Category I Exemption	4/11/2019	11/19/2020, 85 FR 73632.	
222	Category II Exemption	4/11/2019	11/19/2020, 85 FR 73632.	
400	Procedures and Requirements for Tier II Operating Permits.	7/1/2002	11/26/2010, 75 FR 72719.	
401	Tier II Operating Permit	4/11/2015	8/12/2016, 81 FR 53290	Except sections 401.01.a and 401.04.
402	Application Procedures	7/1/2002, 5/1/1994, 4/5/2000, 7/1/2002.	11/26/2010, 75 FR 72719.	
403	Permit Requirements for Tier II Sources.	5/1/1994	1/16/2003, 68 FR 2217.	
404	Procedure for Issuing Permits	4/11/2019	11/19/2020, 85 FR 73632.	
405	Conditions for Tier II Operating Permits.	5/1/1994	1/16/2003, 68 FR 2217.	
406	Obligation to Comply	5/1/1994	1/16/2003, 68 FR 2217.	
460	Requirements for Emission Reduction Credits.	4/11/2006, 4/5/2000, 5/1/1994	11/26/2010, 75 FR 72719.	
461	Requirements for Banking Emission Reduction Credits (ERC's).	4/5/2000, 5/1/1994	1/16/2003, 68 FR 2217.	

TABLE 1 TO PARAGRAPH (c)—STATE REGULATIONS—Continued

State citation	Title/subject	State effective date	EPA approval date	Explanations
500	Registration Procedures and Requirements for Portable Equipment.	5/1/1994	1/16/2003, 68 FR 2217.	
510	Stack Heights and Dispersion Techniques.	5/1/1994	1/16/2003, 68 FR 2217.	
511	Applicability	4/11/2006	11/26/2010, 75 FR 72719.	
512	Definitions	4/11/2006, 5/1/1994, 4/5/2000	11/26/2010, 75 FR 72719.	
513	Requirements	4/11/2006	11/26/2010, 75 FR 72719.	
514	Opportunity for Public Hearing	5/1/1994	1/16/2003, 68 FR 2217.	
515	Approval of Field Studies and Fluid Models.	5/1/1994	1/16/2003, 68 FR 2217.	
516	No Restriction on Actual Stack Height.	5/1/1994	1/16/2003, 68 FR 2217.	
550	Air Pollution Emergency Rule	5/1/1994	1/16/2003, 68 FR 2217.	
551	Episode Criteria	5/1/1994	1/16/2003, 68 FR 2217.	
552	Stages	3/15/2002, 5/1/1994	1/16/2003, 68 FR 2217.	
553	Effect of Stages	3/15/2002	1/16/2003, 68 FR 2217.	
556	Criteria for Defining Levels Within Stages.	3/15/2002, 4/5/2000	1/16/2003, 68 FR 2217.	
557	Public Notification	5/1/1994	1/16/2003, 68 FR 2217.	
558	Information To Be Given	3/15/2002, 5/1/1994	1/16/2003, 68 FR 2217.	
559	Manner and Frequency of Notification.	5/1/1994	1/16/2003, 68 FR 2217.	
560	Notification to Sources	4/11/2006	11/26/2010, 75 FR 72719.	
561	General Rules	4/11/2006, 5/1/1994, 3/15/2002	11/26/2010, 75 FR 72719.	
562	Specific Emergency Episode Abatement Plans for Point Sources.	5/1/1994	1/16/2003, 68 FR 2217.	
563	Transportation Conformity	3/30/2001	4/12/2001, 66 FR 18873.	
564	Incorporation by Reference	3/30/2001	4/12/2001, 66 FR 18873.	
565	Abbreviations	3/30/2001	4/12/2001, 66 FR 18873.	
566	Definitions for the Purpose of Sections 563 Through 574 and 582.	3/30/2001	4/12/2001, 66 FR 18873.	
567	Agencies Affected by Consultation.	3/30/2001	4/12/2001, 66 FR 18873.	
568	ICC Member Roles in Consultation.	3/30/2001	4/12/2001, 66 FR 18873.	
569	ICC Member Responsibilities in Consultation.	3/30/2001	4/12/2001, 66 FR 18873.	
570	General Consultation Process	3/30/2001	4/12/2001, 66 FR 18873.	
571	Consultation Procedures	3/30/2001	4/12/2001, 66 FR 18873.	
572	Final Conformity Determinations by USDOT.	3/30/2001	4/12/2001, 66 FR 18873.	
573	Resolving Conflicts	3/30/2001	4/12/2001, 66 FR 18873.	
574	Public Consultation Procedures	3/30/2001	4/12/2001, 66 FR 18873.	
575	Air Quality Standards and Area Classification.	4/11/2006	11/26/2010, 75 FR 72719.	
576	General Provisions for Ambient Air Quality Standards.	5/1/1994	1/16/2003, 68 FR 2217.	
578	Designation of Attainment, Unclassifiable, and Nonattainment Areas.	5/1/1994	1/16/2003, 68 FR 2217.	
579	Baselines for Prevention of Significant Deterioration.	4/11/2015	8/12/2016, 81 FR 53290.	
580	Classification of Prevention of Significant Deterioration Areas.	4/5/2000, 5/1/1994	1/16/2003, 68 FR 2217.	
581	Prevention of Significant Deterioration (PSD) Increments.	10/6/2010, 4/11/2006, 7/1/1997, 5/1/1994.	7/17/2012, 77 FR 41916.	
600	Rules for Control of Open Burning	4/2/2008	8/1/2008, 73 FR 44915	Previous EPA approval date of 7/11/2005 removed in response to 9th Circuit remand.
601	Fire Permits, Hazardous Materials and Liability.	4/2/2008	8/1/2008, 73 FR 44915	Previous EPA approval date of 7/11/2005 removed in response to 9th Circuit remand.
602	Nonpreemption of Other Jurisdictions.	4/2/2008	8/1/2008, 73 FR 44915	Previous EPA approval date of 7/11/2005 removed in response to 9th Circuit remand.
603	General Restrictions	4/2/2008, 3/21/2003, 5/1/1994	8/1/2008, 73 FR 44915	Previous EPA approval date of 7/11/2005 removed in response to 9th Circuit remand.
606	Categories of Allowable Burning	4/2/2008	8/1/2008, 73 FR 44915	Previous EPA approval date of 7/11/2005 removed in response to 9th Circuit remand.
607	Recreational and Warming Fires	3/21/2003	8/1/2008, 73 FR 44915	Previous EPA approval date of 7/11/2005 removed in response to 9th Circuit remand.
608	Weed Control Fires	5/1/1994	8/1/2008, 73 FR 44915	Previous EPA approval date of 7/11/2005 removed in response to 9th Circuit remand.

TABLE 1 TO PARAGRAPH (c)—STATE REGULATIONS—Continued

State citation	Title/subject	State effective date	EPA approval date	Explanations
609	Training Fires	3/21/2003	8/1/2008, 73 FR 44915	Previous EPA approval date of 7/11/2005 removed in response to 9th Circuit remand.
610	Industrial Flares	3/21/2003	8/1/2008, 73 FR 44915	Previous EPA approval date of 7/11/2005 removed in response to 9th Circuit remand.
611	Residential Solid Waste Disposal Fires.	5/1/1994	1/16/2003, 68 FR 2217.	
612	Landfill Disposal Site Fires	3/21/2003	8/1/2008, 73 FR 44915	Previous EPA approval date of 7/11/2005 removed in response to 9th Circuit remand.
613	Orchard Fires	3/21/2003, 5/1/1994	8/1/2008, 73 FR 44915	Previous EPA approval date of 7/11/2005 removed in response to 9th Circuit remand.
614	Prescribed Burning	5/1/1994	1/16/2003, 68 FR 2217.	
615	Dangerous Material Fires	3/21/2003	8/1/2008, 73 FR 44915	Previous EPA approval date of 7/11/2005 removed in response to 9th Circuit remand.
616	Infectious Waste Burning	3/21/2003	8/1/2008, 73 FR 44915	Previous EPA approval date of 7/11/2005 removed in response to 9th Circuit remand.
617	Crop Residue	7/1/2011, 4/2/2008	3/19/2013,78 FR 16790.	
618	Permit By Rule	7/1/2011, 4/2/2008	3/19/2013, 78 FR 16790.	
619	Registration for Permit By Rule	4/2/2008	8/1/2008, 73 FR 44915.	
620	Burn Fee	4/11/2019	12/9/2019, 84 FR 67189.	
621	Burn Determination	2/28/2018, 4/2/2008	6/19/2018, 83 FR 28382; 8/1/2008, 73 FR 44915.	
622	General Provisions	7/1/2011, 4/2/2008	3/19/2013, 78 FR 16790.	
623	Public Notification	7/1/2011, 4/2/2008	3/19/2013, 78 FR 16790.	
624	Spot Burn, Baled Agricultural Residue Burn, and Propane Flaming Permits.	7/1/2011	3/19/2013, 78 FR 16790.	
625	Visible Emissions	4/2/2008	8/1/2008, 73 FR 44915.	
626	General Restrictions on Visible Emissions from Wigwam Burners.	4/5/2000	1/16/2003, 68 FR 2217.	
650	Rules for Control of Fugitive Dust	5/1/1994	1/16/2003, 68 FR 2217.	
651	General Rules	3/30/2007, 5/1/1994	6/9/2011, 76 FR 33647.	
665	Regional Haze Rules	3/30/2007	6/9/2011, 76 FR 33647.	
666	Reasonable Progress Goals	3/30/2007	6/9/2011, 76 FR 33647.	
667	Long-Term Strategy for Regional Haze.	3/30/2007	6/9/2011, 76 FR 33647.	
668	BART Requirement for Regional Haze.	3/30/2007	6/9/2011, 76 FR 33647.	
675	Fuel Burning Equipment—Particulate Matter.	4/5/2000	1/16/2003, 68 FR 2217.	
676	Standards for New Sources	5/1/1994	1/16/2003, 68 FR 2217.	
677	Standards for Minor and Existing Sources.	5/1/1994	1/16/2003, 68 FR 2217.	
678	Combinations of Fuels	5/1/1994	1/16/2003, 68 FR 2217.	
679	Averaging Period	4/11/2006, 5/1/1994	11/26/2010, 75 FR 72719.	
680	Altitude Correction	5/1/1994	1/16/2003, 68 FR 2217.	
681	Test Methods and Procedures	4/5/2000	1/16/2003, 68 FR 2217.	
700	Particulate Matter Process Weight Limitations.	5/3/2003, 4/5/2000	11/26/2010, 75 FR 72719.	
701	Particulate Matter—New Equipment Process Weight Limitations.	4/5/2000	1/16/2003, 68 FR 2217.	
702	Particulate Matter—Existing Equipment Process Weight Limitations.	4/5/2000, 5/1/1994	1/16/2003, 68 FR 2217.	
703	Particulate Matter—Other Processes.	4/5/2000	1/16/2003, 68 FR 2217.	
725	Rules for Sulfur Content of Fuels	4/11/2015	8/12/2016, 81 FR 53290.	
785	Rules for Control of Incinerators	5/1/1994	1/16/2003, 68 FR 2217.	
786	Emission Limits	4/5/2000	1/16/2003, 68 FR 2217.	
787	Exceptions	3/23/1998	1/16/2003, 68 FR 2217.	
790	Rules for the Control of Nonmetallic Mineral Processing Plants.	3/15/2002	8/12/2016, 81 FR 53290.	
791	General Control Requirements	3/15/2002	8/12/2016, 81 FR 53290.	
793	Emissions Standards for Nonmetallic Mineral Processing Plants not Subject to 40 CFR 60, Subpart OOO.	3/15/2002	8/12/2016, 81 FR 53290.	
794	Permit Requirements	4/11/2015	8/12/2016, 81 FR 53290	Except section 794.04.

Kerr McGee, Soda Springs, ID.	13–0420–0002–00	7/18/1979 (date issued)	7/28/1982, 47 FR 32530	Soda Springs TSP Nonattainment Area Plan.
J.R. Simplot, Pocatello, Idaho.	Air Pollution Operating Permit No. T1–9507–114–1; Facility Number No. 077–00006.	4/5/2004	7/13/2006, 71 FR 39574	The following conditions: Cover page, facility identification information only, #300 Sulfuric Acid Plant, Permit Conditions 16.1, 16.10, 16.11, #400 Sulfuric Acid Plant, Permit Condition 17.1, 17.7, 17.10, 17.11, Phosphoric acid plant, Permit Condition 12.3, 12.13, Granulation No. 3 Process, Permit Condition 9.2.1, Granulation No. 3 stack, 9.17 (except 9.17.1 through 9.17.6), Reclaim Cooling Towers, Permit Condition 14.2, 14.6.1, Babcock & Wilcox Boiler, Permit Condition 6.4, 6.12, HPB&W Boiler, Permit Condition 5.3, 5.13 through 5.18, 5.21.

TABLE 4 TO PARAGRAPH (d)—STATE SOURCE-SPECIFIC REQUIREMENTS [1]—Continued

Name of source	Permit No.	State effective date	EPA approval date	Explanation
J.R. Simplot, Pocatello, Idaho.	Compliance Agreement & Voluntary Order Idaho Code 39–116A.	4/16/2004	7/13/2006, 71 FR 39574	The following conditions: No. 300 Sulfuric Acid Plant; Condition 8 and 9. No. 400 Sulfuric Acid Plant; Condition 10, 11, and 12. Granulation No.1 Plant; Condition 14. Granulation No.2 Plant; Condition 15. Compliance and Performance Testing; Condition 16.
The Amalgamated Sugar Company LLC—Nampa Factory, Nampa, Idaho.	T2–2009.0105	12/23/2011 (date issued)	4/28/2014, 79 FR 23273	The following conditions: 1.2, including the table of Regulated Emission Point Sources Table, 3.2, 3.3 (first paragraph only), 3.4, 3.5, 3.6, 3.7, 3.8, 3.9, 3.11, 3.13, 3.14, 3.15, 3.16, and 4.1.
P4 Production, L.L.C., Soda Springs, Idaho.	T2–2009.0109	11/17/2009 (date issued)	6/22/2011, 76 FR 36329	The following conditions: 1.2 (including Table 1.1), 2.3, 2.4, 2.5, 2.6, 2.7, and 2.8. (Regional Haze SIP Revision).

[1] EPA does not have the authority to remove these source-specific requirements in the absence of a demonstration that their removal would not interfere with attainment or maintenance of the NAAQS, violate any prevention of significant deterioration increment or result in visibility impairment. Idaho Department of Environmental Quality may request removal by submitting such a demonstration to EPA as a SIP revision.

[2] Only a small portion of this facility is located on State lands. The vast majority of the facility is located in Indian Country. It is EPA's position that unless EPA has explicitly approved a program as applying in Indian country, State or local regulations or permits are not effective within the boundaries of that Indian country land for purposes of complying with the CAA. See 68 FR 2217, 2220 (January 16, 2003).

(e) *EPA approved nonregulatory provisions and quasi-regulatory measures.*

TABLE 5 TO PARAGRAPH (e)—STATE PROVISIONS APPROVED BUT NOT INCORPORATED BY REFERENCE

Name of SIP provision	Applicable geographic or non-attainment area	State submittal date	EPA approval date	Explanations
Appendix A.2—Idaho Environmental Protection and Health Act, Idaho Code Section 39–101 et seq.	State-wide	3/15/2001	1/16/2003, 68 FR 2217.	
Four sections of Appendix A.3—Rules and Regulations for Control of Air Pollution in Idaho—that were approved but not incorporated by reference in section (c).	State-wide	5/17/1994	1/16/2003, 68 FR 2217.	IDAPA 58.01.01.000 (legal authority), 58.01.01.002 (written interpretations), 58.01.01.003 (administrative appeals), and 58.01.01.128 (confidential business information).
Idaho State Board SIP Revision; Idaho Code §§ 59–701 through 705; Ethics in Government Act.	Statewide	9/16/2013	10/24/2013, 78 FR 63394.	To satisfy the requirements of CAA section 128(a)(2) and CAA section 110(a)(2)(E)(ii) for all criteria pollutants.
Idaho Department of Environmental Quality letter dated October 18, 2013 supplementing the May 9, 2013 SIP Submittal.	State-wide	10/24/2013	3/3/2014, 79 FR 11711.	
Road Sanding Agreement, Idaho Transportation Department to Idaho Department of Environmental Quality (Voluntary Measure).	Franklin County, Logan UT–ID $PM_{2.5}$ Nonattainment Area.	12/19/2012	3/25/2014, 79 FR 16201.	Fine Particulate Matter Control Measures; Franklin County.
Letter of Intent $PM_{2.5}$ Reduction, Franklin County Road Department to Department of Environmental Quality (Voluntary Measure).	Franklin County, Logan UT–ID $PM_{2.5}$ Nonattainment Area.	12/19/2012	3/25/2014, 79 FR 16201.	Fine Particulate Matter Control Measures; Franklin County.

RIN 0970–AD11

Increase Flexibility for Tribes in Child Care and Development Fund (CCDF) Eligibility

AGENCY: Office of Child Care (OCC), Administration for Children and Families (ACF), Department of Health and Human Services (HHS).

ACTION: Final rule.

SUMMARY: This final rule amends the Child Care and Development Fund (CCDF) regulations to provide all Indian Tribes and Tribal Organizations operating CCDF programs the flexibility, at their discretion, to establish and use eligibility criteria regardless of family income or assets.

DATES: *Effective:* November 18, 2024.

I. Statutory Authority

This final rule is being issued under the authority granted to the Secretary of Health and Human Services by the Child Care and Development Block Grant (CCDBG) Act of 1990, as amended (42 U.S.C. 9857 *et seq.*), and section 418 of the Social Security Act (42 U.S.C. 618).

II. Background

In response to requests from Tribal Leaders and Tribal Child Care and Development Fund (CCDF) Lead Agencies for more flexibility on family income eligibility to better meet community needs and to recent statutory changes to eligibility in the Tribal Head Start program, this final rule amends the CCDF regulations to provide all Tribal CCDF Lead Agencies the flexibility to serve Indian children (as defined by the Tribal Lead Agency) in their defined service area regardless of family income or assets. This final rule is also responsive to Executive Order 14112, *Reforming Federal Funding and Support for Tribal Nations To Better Embrace Our Trust Responsibilities and Promote the Next Era of Tribal Self-Determination,* which directs agencies to ''increase the accessibility, equity, flexibility, and utility of Federal funding.'' This final rule provides Tribal Nations with more flexibility to better meet community needs, responds to calls for greater Tribal sovereignty and self-determination, and facilitates better alignment between Tribal CCDF and American Indian and Alaska Native (AIAN) Head Start programs.

The CCDBG Act (42 U.S.C. 9857 *et seq.*), hereafter referred to as the ''Act,'' together with section 418 of the Social Security Act (42 U.S.C. 618), authorize the CCDF program, which is the primary federal funding source to Tribes, States, and Territories devoted to supporting families access to child care and to increasing the quality of child care for all children. CCDF plays a vital role in supporting child development and family well-being; facilitating parent employment, training, and education; and improving the economic well-being of participating families. In fiscal year (FY) 2024, 264 Tribal Lead Agencies representing 546 federally recognized Tribal Nations received CCDF grants totaling nearly $600 million.[1] Annual Tribal CCDF awards range from $70,000 to $88 million per year.

The Act does not explicitly apply most of its provisions to the Tribal CCDF program, so with some exceptions and within certain parameters, the Secretary of Health and Human Services has the authority to determine many of the CCDF requirements for Tribal Lead Agencies, including the family income and assets eligibility requirements for children to receive services from Tribal CCDF programs. Previous Tribal CCDF regulations included different family income and assets eligibility requirements and flexibilities based on a Tribal Lead Agency's award allocation size in FY 2016. Tribal Lead Agencies who had allocations under $250,000 in 2016 (155 Tribal Lead Agencies) could serve any Indian child (as defined by the Tribal Lead Agency) in their defined service area, regardless of family income or assets. However, Tribal Lead Agencies with allocations above $250,000 in 2016 were subject to the same CCDF income and assets eligibility standard as States, set forth at § 98.20(a)(2), which meant that family income could not be more than 85 percent of Grantee Median Income (GMI) and family assets could not exceed $1 million.

This final rule extends the existing flexibility for Tribal Lead Agencies with small allocations to disregard family income and assets in determining family eligibility for CCDF to all Tribal Lead Agencies. All Tribal CCDF Lead Agencies may continue to use family income and/or assets criteria for eligibility at their option, but it will no longer be a requirement. Tribal Lead Agencies choosing to use family income or assets criteria for eligibility would have the flexibility to determine the appropriate threshold for their Nation. This final rule does not alter existing flexibilities that permit Tribal Lead Agencies with medium and large allocations to apply categorical eligibility criteria for families under certain conditions.

This final rule will benefit Tribal Nations by better aligning family income eligibility rules in the Tribal CCDF with Head Start programs and providing necessary flexibility to determine how early childhood program

[1] *https://www.acf.hhs.gov/occ/data/gy-2024-ccdf-tribal-allocations-based-appropriations.*

family income or assets determinations can best support their communities. This alignment is particularly salient because many American Indian and Alaskan Native (AIAN) Head Start grant recipients administer a Tribal CCDF program. At the request of Tribal Nations and the Biden-Harris Administration, the Further Consolidated Appropriations Act, 2024 (Public Law (Pub. L.) 118–47, Div. D, Tit. II, Sec. 238) included changes to AIAN Head Start eligibility criteria, to make eligible for Head Start services all age-eligible children in an AIAN program's service area regardless of income. The Head Start Act, unlike the CCDBG Act, required legislative action to make this change.

Effective Dates

This final rule will become effective on the date of publication to expedite Tribal Lead Agencies' ability to implement the flexibilities included in this final rule.

Severability

The provisions of this final rule are intended to be severable, such that, in the event a court were to invalidate any particular provision or deem it to be unenforceable, the remaining provisions would continue to be valid.

III. Development of Regulation

ACF published a notice of proposed rulemaking (NPRM) in the **Federal Register** on July 16, 2024, (89 FR 57835) proposing revisions to CCDF regulations. We provided a 60-day comment period during which interested parties could submit comments in writing electronically.

ACF received 18 comments on the proposed rule (public comments on the proposed rule are available for review on *www.regulations.gov*), including Tribal Nations and Tribal organizations, a state CCDF Lead Agency, non-profit and research organizations, parents, and individual members of the public. Public comments informed the development of content for this final rule.

Tribal consultation and comments. ACF is committed to consulting with Tribal Nations prior to promulgating any regulation that has Tribal implications. ACF held a formal consultation session virtually in August 2024 with Tribal leaders and authorized representatives to discuss the impact of the proposed regulations on Tribes. Tribes and Tribal organizations were informed of these events through formal letters to Tribal leaders and announcements to Tribal CCDF administrators. ACF also distributed materials specifically addressing the impact of the proposed rule on Tribes. ACF will publish a consultation report, which will be posted as a supplemental document in the **Federal Register** and will include information on consultation attendees as well as their specific comments. During consultation, ACF received testimony from one authorized representative who expressed strong support for the proposed change. This final rule was informed by this testimony.

In addition, prior to the development of the NPRM, OCC sought feedback from Tribal Nations and other interested parties on areas where more flexibility and/or different program rules would better serve children, families, and Tribal Nations through a formal Request for Information (RFI), published in the **Federal Register** at 88 FR 48409 (July 27, 2023). Through the RFI process, many Tribal Lead Agencies expressed support for changing eligibility requirements so they can serve Indian children (as defined by the Tribal Lead Agency), regardless of family income. OCC also received feedback on the need for flexibility in eligibility determination at the ACF Tribal Early Childhood Consultation held in July 2024. This final rule was informed by this feedback.

This final rule maintains the structure and organization of the current CCDF regulations. Where language of previous regulations remains unchanged, the preamble explanation and interpretation of that language published with all prior final rules also is retained, unless specifically modified in the preamble to this rule. (See 57 FR 34352, Aug. 4, 1992; 63 FR 39936, Jul. 24, 1998; 72 FR 27972, May 18, 2007; 72 FR 50889, Sep. 5, 2007; 81 FR 67438, Sept. 30, 2016; 89 FR 15366, Mar. 1, 2024).

IV. Discussion of Comments and Regulatory Provisions

This final rule amends § 98.81(b)(1) to provide all CCDF Tribal Lead Agencies the flexibility to determine family eligibility for CCDF without regard to family income and assets. Specifically, the rule revises § 98.81(b)(1)(ii) so that all Tribal Lead Agencies may disregard family income and assets requirements described in § 98.20(a)(2), while retaining the ability for Tribal Lead Agencies with a Tribal median income below a level determined by the Secretary to deem any child in their service area categorically eligible, regardless of work, or training status. Previously, the 40 percent of Tribal Lead Agencies with medium and large allocations were subject to the requirements at § 98.20(a)(2) that children must be in families with incomes below 85 percent Grantee Median Income (GMI) and with assets under $1 million to be eligible for CCDF. Tribes with small allocations were already exempt from the requirements at § 98.20(a)(2). Extending the flexibility to serve any Indian child in the service area regardless of family income or assets to all Tribal Lead Agencies gives the Lead Agencies the authority to better meet the needs of Tribal Nations and their communities and supports Tribal sovereignty and self-determination. It also creates better opportunities for Tribes to align CCDF programs with other Tribal early childhood programs, including Tribal home visiting, Early Head Start, Head Start preschool, and tribally or state funded preschool.

The new flexibility included in this final rule is at the option of the Tribal Lead Agency. Therefore, Tribal Lead Agencies with medium and large allocations may choose to continue using income and/or assets when determining if a child is eligible for CCDF. Tribal Lead Agencies who choose to keep income and/or assets as eligibility criteria are not limited to setting the income threshold at or below 85 percent GMI, or an asset limit at $1 million and may set these thresholds higher.

This final rule does not make any other changes to Tribal CCDF regulations. No other changes were made to family eligibility rules, including existing Tribal categorical eligibility flexibilities, which remain unchanged.

Comment: Commenters unanimously expressed support for the proposed change to provide all Tribal Lead Agencies the flexibility to serve all Indian children (as defined by the Lead Agency) in their service area regardless of family income or assets. Commenters noted that the change is a step toward promoting Tribal sovereignty and enabling Tribal Nations to implement the CCDF program in a way that meets the unique needs of each community. They also noted that the change better aligns with eligibility rules of other early childhood programs, including Head Start, which may lead to more inclusive and equitable services for Native families.

Response: We acknowledge that commenters supported the proposed change and agree that this change supports Tribal sovereignty and have retained the provision as proposed with one minor addition to clarify that Tribal Lead Agencies may disregard eligibility requirements for assets, in addition to

those required for income, which has always been the intent of the rule.

Comment: While all commenters supported the change, some noted that all Tribal Lead Agencies may not have the funding to serve all Indian children in their service areas.

Response: This regulatory change provides a new flexibility for all Tribal Lead Agencies. The rule does not impact Congressionally appropriated funds or Tribal CCDF allocations. Disregarding income and assets as eligibility criteria is an option for Tribal Lead Agencies, not a requirement. Tribal Lead Agencies have flexibility to establish income and asset requirements that balance the needs of the community and resources available.

V. Regulatory Process Matters

Paperwork Reduction Act

Under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.,* as amended), all Departments are required to submit to the Office of Management and Budget (OMB) for review and approval any reporting or recordkeeping requirements inherent in a proposed or final rule. As required by this Act, we will submit all revised data collection requirements to OMB for review and approval.

The final rule modifies the previously approved ACF–118–A CCDF Tribal Plan information collection (OMB #0970–0198). ACF initiated the process to receive OMB approval to revise and extend approval of the ACF–118–A CCDF Tribal Plan. This began with the initial 60-day comment period, which started on July 2, 2024, (89 FR 54827) and the first comment period ended on September 3, 2024. ACF will include the changes that result from this final rule in the revision request that is submitted to OMB for review and approval. This includes updates to the information collection and the associated burden estimates. This process will include publication of a second **Federal Register** notice soliciting public comments over a 30-day period on the revisions to the ACF–118–A CCDF Tribal Plan.

CCDF title/code	Relevant section in the proposed rule	OMB control No.	Expiration date	Description
ACF–118–A (CCDF Tribal Plan) Part I and Part II.	§ 98.81	0970–0198	4/30/2025	This final rule provides new flexibilities which Tribal lead agencies with medium and large allocations will be required to report on in the CCDF plans.

The table below provides current approved annual burden hours and estimated annual burden hours for these existing information collections that are modified by this final rule.

ANNUAL BURDEN ESTIMATES

Instrument	Total number of respondents	Total number of responses per respondent	Current approved average burden hours per response	Current annual burden hours	Estimated average burden hours per response based on final rule	Estimated annual burden hours based on final rule
ACF–118A Part I (for all tribes)	265	1	120	10,600	120	10,600
ACF–118–A Part II (for medium and large Tribes only)	106	1	24	848	24	848

We did not receive any public comments on these burden estimates, which were included in the NPRM.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) (see 5 U.S.C. 605(b), as amended by the Small Business Regulatory Enforcement Fairness Act) requires federal agencies to determine, to the extent feasible, a rule's impact on small entities, explore regulatory options for reducing any significant impact on a substantial number of such entities, and explain their regulatory approach. The term ''small entities,'' as defined in the RFA, comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. HHS considers a rule to have a significant impact on a substantial number of small entities if it has at least a 3 percent impact on revenue on at least 5 percent of small entities. The Secretary certifies, under 5 U.S.C. 605(b), as enacted by the RFA (Pub. L. 96–354), that this rulemaking will not result in a significant impact on a substantial number of small entities, as this rulemaking primarily impacts tribes receiving federal CCDF grants. Therefore, a regulatory flexibility analysis is not required for this document.

Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for federal agencies to assess the effects of regulatory actions on state, local, and tribal governments, and the private sector. Under section 202 of the UMRA, the Department generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with ''federal mandates'' that may result in expenditures by State, local or Tribal governments, in the aggregate, or the private sector, of $100 million in 1995 dollars, updated annually for inflation. In 2024 the threshold is approximately $183 million. This final rule does not impose an unfunded mandate on State, local, or Tribal governments or the private sector of more than $183 million per year. Therefore, ACF is not required to provide a statement, including a cost-benefit analysis, of the impacts of the changes.

Executive Order 13132

Executive Order 13132 requires federal agencies to consult with State and local government officials if they develop regulatory policies with federalism implications. Federalism is rooted in the belief that issues that are

not national in scope or significance are most appropriately addressed by the level of government close to the people. This rulemaking does not have substantial direct impact on the States, on the relationship between the federal government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with section 6 of Executive Order 13132, this action does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

Assessment of Federal Regulations and Policies on Families

Assessment of Federal Regulations and Policies on Families section 654 of the Treasury and General Government Appropriations Act of 2000 requires federal agencies to determine whether a policy or regulation may negatively affect family well-being. If the agency determines a policy or regulation negatively affects family well-being, then the agency must prepare an impact assessment addressing seven criteria specified in the law. HHS believes it is not necessary to prepare a family policymaking assessment (see Pub. L. 105–277) because the action it takes in this final rule will not have any impact on the autonomy or integrity of the family as an institution.

Regulatory Review

We have examined the impacts of the rule under Executive Order 12866, Executive Order 13563, the RFA (5 U.S.C. 601–612), and the UMRA of 1995 (Pub. L. 104–4). Executive Orders 12866 and 13563 direct us to assess all benefits, costs, and transfers of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity).

The Office of Information and Regulatory Affairs has determined that this final rule is not a significant regulatory action under section 3(f)(1) of Executive Order 12866, as amended by Executive Order 14094. This final rule has, however, been designated ''a significant regulatory action'' under section 3(f) of Executive Order 12866, as amended by Executive Order 14094. Of the nearly $600 million appropriated for 264 Tribal Lead Agencies in FY 2024, approximately $422 million was allocated to grantees that already have discretion to take-up the flexibilities included in this rule. The remaining $173 million is allocated to Tribal Lead Agencies that could be impacted by the change included in this rule. Further, these Tribal Lead Agencies have discretion on whether to adopt this flexibility based on their unique needs. This final rule does not stipulate any new requirements.

VI. Tribal Consultation Statement

Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, requires agencies to consult with Indian tribes when regulations have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. The discussion in sections III and IV of the preamble serves as the Tribal impact statement and contains a detailed description of the consultation and outreach in this final rule.

(Catalog of Federal Domestic Assistance Program Number 93.575, Child Care and Development Block Grant; 93.596, Child Care Mandatory and Matching Funds)

Dated: November 14, 2024.

Xavier Becerra,

Secretary, Department of Health and Human Services.

List of Subjects in 45 CFR Part 98

Child care, Grant programs-social programs.

For the reasons set forth in the preamble, we amend 45 CFR part 98 as follows:

PART 98—CHILD CARE AND DEVELOPMENT FUND

■ 1. The authority citation for part 98 continues to read as follows:

Authority: 42 U.S.C. 618, 9858,

■ 2. Amend § 98.81 by revising paragraph (b)(1)(ii) to read as follows.

§ 98.81 Application and Plan procedures.

* * * * *

(b) * * *

(1) * * *

(ii) The basis for determining family eligibility may be determined by the Tribe notwithstanding family income or assets as described in § 98.20(a)(2).

BILLING CODE 4184–87–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

49 CFR Chapter III

[Docket No. FMCSA–2024–0201]

RIN 2126–AC66

Federal Motor Carrier Safety Regulations

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Final rule; general technical, organizational, conforming, and correcting amendments.

SUMMARY: FMCSA amends its regulations by making technical corrections throughout the Federal Motor Carrier Safety Regulations (FMCSRs). The Agency makes minor changes to correct inadvertent errors and omissions, remove or update obsolete references, and improve the clarity and consistency of certain regulatory provisions. The Agency also makes a change to its rules of organization, procedures, and practice. Because the rule does not impose any new material requirements or increase compliance obligations, it is issued without prior notice and opportunity for comment, pursuant to the good cause exception in the Administrative Procedure Act (APA).

DATES: Effective November 18, 2024.

Petitions for Reconsideration of this final rule must be submitted to the FMCSA Administrator no later than December 18, 2024.

FOR FURTHER INFORMATION CONTACT: Mr. Nicholas Lockhart, Regulatory Development Division, Office of Policy, FMCSA, 1200 New Jersey Avenue SE, Washington, DC 20590–0001; (202) 366–2219; *nicholas.lockhart@dot.gov.*

SUPPLEMENTARY INFORMATION:

I. Legal Basis for the Rulemaking

Congress delegated certain powers to regulate interstate commerce to DOT in numerous pieces of legislation, most notably in section 6 of the Department of Transportation Act (DOT Act) (Pub. L. 89–670, 80 Stat. 931, 937, Oct. 15, 1966). Section 6 of the DOT Act transferred to DOT the authority of the former Interstate Commerce Commission (ICC) to regulate the qualifications and maximum hours of service of employees, the safety of operations, and the equipment, of motor carriers in interstate commerce (80 Stat. 939). This authority, first granted to the ICC in the Motor Carrier Act of 1935

(Pub. L. 74–255, 49 Stat. 543, Aug. 9, 1935), now appears in 49 U.S.C. chapter 315. The regulations issued under this authority, as well as subsequently enacted laws, became known as the FMCSRs, codified at 49 Code of Federal Regulations (CFR) parts 350–399. The administrative powers to enforce chapter 315 (codified in 49 U.S.C. chapter 5) were also transferred from the ICC to DOT in 1966, assigned first to the Federal Highway Administration (FHWA), and then to FMCSA. The FMCSA Administrator, whose powers and duties are set forth in 49 U.S.C. 113, has been delegated authority by the Secretary of Transportation (the Secretary) under 49 CFR 1.81 to prescribe regulations and to exercise authority over and with respect to any personnel within the organization, and under 49 CFR 1.87 to carry out the motor carrier functions vested in the Secretary.

Between 1984 and 1999, enforcement of the FMCSRs, the Hazardous Materials Regulations, and the Commercial Regulations was added to FHWA's authority. The statutes granting these authorities include the Motor Carrier Safety Act of 1984 (Pub. L. 98–554, Title II, 98 Stat. 2832, Oct. 30, 1984), codified at 49 U.S.C. chapter 311, subchapter III; the Commercial Motor Vehicle Safety Act of 1986 (Pub. L. 99–570, Title XII, 100 Stat. 3207–170, Oct. 27, 1986), codified at 49 U.S.C. chapter 313; the Hazardous Materials Transportation Uniform Safety Act of 1990, as amended (Pub. L. 101–615, 104 Stat. 3244, Nov. 16, 1990), codified at 49 U.S.C. chapter 51; the Omnibus Transportation Employee Testing Act of 1991 (Pub. L. 102–143, Title V, 105 Stat. 917, 952, Oct. 28, 1991), codified at 49 U.S.C. 31306; the ICC Termination Act of 1995 (Pub. L. 104–88, 109 Stat. 803, Dec. 29, 1995), codified at 49 U.S.C. chapters 131–149; and the Transportation Equity Act for the 21st Century (Pub. L. 105–178, 112 Stat. 107, June 9, 1998).

The Motor Carrier Safety Improvement Act of 1999 (Pub. L. 106–159, 113 Stat. 1748, Dec. 9, 1999) established FMCSA as a new operating administration within DOT, effective January 1, 2000, and transferred authorities specifically related to commercial motor vehicle safety to FMCSA. Accordingly, since that time the motor carrier safety, and certain commercial, responsibilities previously assigned to both the ICC and FHWA have been the jurisdiction of FMCSA. These responsibilities also include regulations relating to section 18 of the Noise Control Act of 1972, codified at 42 U.S.C. 4917, which were originally assigned to the Secretary of Transportation (Pub. L. 92–574, 86 Stat. 1249, Oct. 27, 1972) and delegated to FHWA (39 FR 7791, Feb. 28, 1974), and are now the jurisdiction of FMCSA, as codified at 49 U.S.C. 113(f)(1).[1]

Congress subsequently expanded, modified, and amended FMCSA's authority in the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (Pub. L. 107–56, 115 Stat. 272, Oct. 26, 2001); the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA–LU) (Pub. L. 109–59, 119 Stat. 1144, Aug. 10, 2005); the SAFETEA–LU Technical Corrections Act of 2008 (Pub. L. 110–244, 122 Stat. 1572, June 6, 2008); the Moving Ahead for Progress in the 21st Century Act (MAP–21) (Pub. L. 112–141, 126 Stat. 405, July 6, 2012); Fixing America's Surface Transportation Act (Pub. L. 114–94, 129 Stat. 1312, Dec. 4, 2015); and the Infrastructure Investment and Jobs Act (Pub. L. 117–58, 135 Stat. 429, Nov. 15, 2021).

The specific regulations amended by this rule are based on the statutes detailed above. Generally, the legal authority for each of those provisions was explained when the requirement was originally adopted and is noted at the beginning of each part in Title 49 of the CFR.

The APA specifically provides exceptions to its notice and comment rulemaking procedures when an agency finds there is good cause to dispense with them, and incorporates the finding, and a brief statement of reasons therefore, in the rules issued (5 U.S.C. 553(b)(B)). Good cause exists when an agency determines that notice and public comment procedures are impractical, unnecessary, or contrary to the public interest. The amendments made in this final rule primarily correct inadvertent errors and omissions, remove or update obsolete references, and make minor language changes to improve clarity and consistency. The technical amendments do not impose any new material requirements or increase compliance obligations. For these reasons, FMCSA finds good cause that notice and public comment on this final rule are unnecessary.

In addition to amendments that fall within the APA good cause exception, this rule also contains amendments that fall within the APA exception for rules of agency organization, procedure, or practice. Specifically, the Agency amends 49 CFR 387.307(e) to align with the service rules in part 386 and to specify the same procedures for Agency review of documents filed by brokers notified of a pending suspension of operating authority due to insufficient financial responsibility as are followed by the Agency when such brokers file documents in support of a reinstatement from suspension. These amendments fall within the exception to the APA's notice and comment rulemaking procedures for ''rules of agency organization, procedure, or practice,'' (5 U.S.C. 553(b)(A)) because the procedures for filing such documents are already specified in § 387.307(e) and so are made clearer with this amendment. Similarly, an amendment to part 389 also concerns matters of Agency policy. These changes are therefore excepted from the notice and public comment requirements.

The APA also allows agencies to make rules effective immediately with good cause (5 U.S.C. 553(d)(3)), instead of requiring publication 30 days prior to the effective date. For the reasons already stated, FMCSA finds there is good cause for this rule to be effective immediately.

This rule contains numerous, unrelated provisions that focus on unique aspects of FMCSA's regulations. Therefore, FMCSA finds that the various provisions of this final rule are severable and able to operate functionally if severed from each other. In the event a court were to invalidate one or more of this final rule's unique provisions, the remaining provisions should stand.

II. Section-by-Section Analysis

A. Part 350—Motor Carrier Safety Assistance Program (MCSAP) and High Priority Program

FMCSA amends part 350 to eliminate the current question-and-answer format in favor of standard styling. Thus, all section headings that are phrased as questions will be rephrased as brief descriptive phrases pertaining to the section's content. However, unless specifically described below, this change does not affect the body text of the regulations in this part. FMCSA makes this change because it has determined that the question-and-answer format is cumbersome, difficult to read, and may cause confusion. Moreover, in several instances the title of a section is styled as a question, but the regulatory text does not provide a concise answer to the question asked, somewhat defeating the purpose of the question-and-answer style.

[1] Responsibility for the regulations related to section 18 of the Noise Control Act was given to FMCSA by Congress in section 101 of the Motor Carrier Safety Improvement Act (Pub. L. 106–159, 113 Stat. 1748, 1750, Dec. 9, 1999).

Part 350 previously had section headings styled as brief descriptive phrases, rather than questions, until 2000. That year, FMCSA issued a final rule that comprehensively revised part 350 (65 FR 15092 (March 21, 2000)). The revisions included a series of stylistic changes described in the NPRM: question and answer format, the active voice, and ''Plain English'' (64 FR 11414, 11416 (March 9, 1999)). The Agency intended for the stylistic changes to logically organize the regulations, clearly format the regulations, and make the regulations easily understood. The Agency continues to pursue these goals when drafting regulations and adopts active voice and ''Plain English'' where practical, in new and revised regulations, to achieve these goals. However, the Agency no longer uses a question-and-answer format in new and revised regulations. Most of the FMCSRs, and most federal regulations generally, use a short descriptive phrase for section headings instead of a question-and-answer format. Therefore, the Agency amends each section heading in part 350 to use a short descriptive phrase. FMCSA is also making other amendments to part 350, which are described below.

Section 350.305 What specific variances from the FMCSRs are allowed for State laws and regulations applicable to intrastate commerce and are not subject to Federal jurisdiction?

In addition to revising the title of § 350.305 to use a short descriptive phrase, FMCSA amends the section by adding an introductory sentence specifying that these variances are for State laws and regulations applicable to intrastate commerce and not subject to Federal jurisdiction.

FMCSA also revises § 350.305(d)(3) to eliminate the reference to a 100-air mile radius under § 395.1(e)(1)(i) because it is no longer correct. The regulations in part 350 relate to MCSAP funding, and § 350.305 describes allowable variances in state laws and regulations for States receiving MCSAP funding. Each State that receives MSCAP funds must adopt and enforce laws, regulations, standards, and orders on CMV safety for intrastate commerce that are compatible with the FMCSRs. However, since the early days of MCSAP, some variances for intrastate operations have been allowed. On September 8, 1992, FHWA published what previously had been informal intrastate variances as appendix C to part 350. Section 3(e) provided that exemptions based on the distance traveled from the home terminal were not compatible. However, the prohibition did not apply to exemptions already in the FMCSRs or to the extension of the short-haul mileage exemption for driver hours of service from 100 to 150 miles (57 FR 40946, 40962; Sept. 8, 1992). The short-haul mileage exemption has been placed in several different sections of the CFR over time; it was located in § 350.341(d) prior to moving to its current location in § 350.305(d)(3) when part 350 was rewritten in 2020 (85 FR 37785, 37804; June 24, 2020). The current short-haul mileage exemption references the short-haul mile radius in the hours-of-service regulations, § 395.1(e)(1)(i). On June 1, 2020, FMCSA revised regulations relating to driver hours of service and extended the short-haul exemption in § 395.1(e)(1)(i) to 150 air-miles, effective September 29, 2020 (85 FR 33396, 33451).

Although the allowed air-mile radius is currently the same in §§ 350.305(d)(3) and 395.1(e)(1)(i), it is nevertheless possible that the radius specified in § 395.1(e)(1)(i) could be either expanded or contracted at some time in the future. To correct the discrepancy that currently exists in the regulation while avoiding unintentional effects on the intrastate variance, FMCSA revises § 350.305(d)(3) to read as follows: ''A 150-air mile radius or the air mile radius under § 395.1(e)(1)(i) of this subchapter, whichever is greater.'' The revision affords States the benefit of any future expansion of the air-mile radius in § 395.1(e)(1)(i) and also protects against a decrease of the long-standing 150-mile intrastate variance without full consideration of the impact of any change on intrastate commerce through notice and comment rulemaking. Therefore, there is no substantive impact from this revision.

B. Part 369 Reports of Motor Carriers

Section 369.1 Annual Reports of For-Hire, Non-Exempt Motor Carriers of Property, Motor Carriers of Household Goods, and Dual Property Carriers

Section 369.1 requires certain motor carriers to file the Motor Carrier Annual Report Form M (Form M) with the Agency. The website address provided in § 369.1(b), where the Agency has made Form M available, is no longer valid. FMCSA amends § 369.1(b) to provide a correct website address for Form M and to update the phrasing of the regulation to avoid using the word ''you.''

Section 369.4 Annual Reports of Class I Carriers of Passengers

Section 369.4 requires certain motor carriers of passengers to file the Motor Carrier Annual Report Form MP–1 for Motor Carriers of Passengers (Form MP–1). However, this section does not provide a website address where the form is available. FMCSA amends § 369.4(c) to provide a website address where the form is available for the convenience of motor carriers of passengers.

C. Part 371—Brokers of Property

Section 371.2 Definitions

Section 371.2 provides definitions that apply to FMCSA's property broker regulations in Part 371. FMCSA amends § 371.2 to format the definitions as a list of terms without paragraphs rather than providing the definition for each term in a separate paragraph. The definitions are unchanged by this amendment. This format conforms to the format of other definition sections in Chapter III, Subchapter B, such as § 390.5T, and guidance from the Office of the Federal Register's Document Drafting Handbook (3–33).

D. Part 380—Special Training Requirements

Section 380.301 General Requirements

Section 380.301 contains general requirements for longer combination vehicle driver-instructors. FMCSA amends the introductory text of § 380.301 to avoid using the word ''you,'' and thereby clarify to whom the regulation applies.

Section 380.723 Removal From Training Provider Registry: Procedure

Section 380.723 describes the procedures for removing a training provider from FMCSA's Training Provider Registry, including processes FMCSA follows when it removes a training provider from the registry. In § 380.723, paragraph (b) explains that FMCSA begins the involuntary removal process by issuing a written notice to the provider, and paragraph (c) explains that if the provider wishes to remain on the registry, they must submit a written response to FMCSA within 30 days. Paragraph (c) also explains that the provider can either oppose the notice of proposed removal or take corrective action within 60 days. FMCSA amends paragraph (c) to provide clarification on the timelines for provider responses, as the current regulation may be confusing for providers who choose to take corrective action in response to a notification of proposed removal. Providers that intend to take corrective action must still submit the initial written response described in paragraph (c) within 30 days of the notification. Further, these providers are still

required to submit evidence of corrective action in accordance with (c)(2)(i).

FMCSA also amends section § 380.723 to replace the word ''notice'' with the word ''notification'' wherever it refers to a communication from FMCSA to a training provider, as this section also uses the word ''notice'' to refer to **Federal Register** notices. This change will improve the clarity and readability of the section.

Lastly, FMCSA amends § 380.723(c)(2)(i) to correct an error from a previous amendment. When paragraph (c)(2)(i) was established, it described a 60-day time period that began either on the date the notice of proposed removal was issued or on the date when FMCSA's Director of the Office of Carrier, Driver, and Vehicle Safety Standards subsequently affirmed or modified the notice of proposed removal (81 FR 88732, 88793, Dec. 8, 2016). FMCSA later amended the section, with the intention to remove the reference to that particular director and replace it with a reference to FMCSA (86 FR 57060, 57062, Oct. 14, 2021). Although the word ''Director'' was removed, it was not replaced with ''FMCSA,'' and FMCSA now corrects that inadvertent error by adding the word ''FMCSA'' in the appropriate place.

E. Part 381—Waivers, Exemptions, and Pilot Programs

Section 381.210 How do I request a waiver?

Part 381 covers waiver and exemptions from the FMCSRs, and § 381.210 sets out the process for requesting a waiver and the required contents of the request. The regulations in § 381.210 are authorized by 49 U.S.C. 31315, which is titled ''Waivers, exemptions, and pilot programs.'' The authorizing statute requires certain contents in a waiver request, and while the regulation also requires these contents so that it aligns with the statute, the requirements are phrased differently. The statute requires that a person requesting a waiver explain how, if granted a waiver, they would likely achieve an equivalent or greater level of safety as compared to the level of safety they would achieve absent the waiver. Section 381.210 describes this as a requirement that the person requesting a waiver explain how they would achieve a level of safety that is equivalent to, or greater than, the level of safety that would be obtained by complying with the regulation. Though this framing of the requirement has the same effect, FMCSA revises § 381.210 to use the phrasing from the authorizing statute, to avoid any confusion.

Section 381.310 How do I apply for an exemption?

Section 381.310 sets out the process for requesting an exemption, and FMCSA amends it to better align with the authorizing statute, as with § 381.210. The authorizing statute, 49 U.S.C. 31315, requires that a person requesting an exemption explain how they would likely achieve an equivalent or greater level of safety as compared to the level of safety they would achieve absent the exemption. Section 381.210 describes this as a requirement that the person requesting an exemption explain how they would achieve a level of safety that is equivalent to, or greater than, the level of safety that would be obtained by complying with the regulation. Though this framing of the requirement has the same effect, FMCSA revises § 381.310 to use the phrasing from the authorizing statute, to avoid any confusion.

Section 381.505 What are the minimum elements required for a pilot program?

Section 381.505 sets out the requirement for a pilot program, and FMCSA amends it to better align with the authorizing statute, as with §§ 381.210 and 381.310. The authorizing statute, 49 U.S.C. 31315, requires that FMCSA ensure that the pilot program is designed to achieve a level of safety that is equivalent to, or greater than, the level of safety that would otherwise be achieved through compliance with the applicable regulations. Section 381.210 describes this as a requirement to ensure that the program is designed to achieve a level of safety that is equivalent to, or greater than, the level of safety that would be achieved by complying with the regulations. Again, though this framing of the requirement has the same effect, FMCSA revises § 381.505 to use the phrasing from the authorizing statute, to avoid any confusion.

F. Part 382—Controlled Substances and Alcohol Use and Testing

Section 382.101 Purpose

Section 382.101 sets out the purpose of part 382 and in doing so, uses the term ''commercial motor vehicles.'' In later sections of part 382, the term is abbreviated as ''CMV,'' and so FMCSA revises § 382.101 to provide the abbreviation for ''commercial motor vehicle(s)'' where it is first used in the part.

Section 382.103 Applicability

Section 382.103 provides the applicability of the controlled substances and alcohol use and testing regulations in part 382. The section cross-references §§ 390.3(f) and 390.5, which are currently suspended. FMCSA revises § 382.103 to cross-reference the equivalent temporary sections §§ 390.3T(f) and 390.5T.

Section 382.107 Definitions

Section 382.107 defines terms that are used in the controlled substances and alcohol use and testing regulations in part 382. The introductory text of § 382.107 cross-references § 390.5, which is currently suspended. FMCSA revises § 382.107 to cross-reference the equivalent temporary section § 390.5T.

One of the terms defined in § 382.107 is ''commercial motor vehicle,'' which is abbreviated to ''CMV'' in the definition of ''actual knowledge'' in the same section and in the table for § 382.303(a) and (b). FMCSA amends the definition of ''commercial motor vehicle'' in § 382.107 to add the definition, for clarity.

Section 382.413 Inquiries for Alcohol and Controlled Substances Information From Previous Employers

Section 382.413 requires employers to request alcohol and controlled substances information from the previous employers of their employees. The section references 49 CFR 40.25, titled ''Must an employer check on the drug and alcohol testing record of employees it is intending to use to perform safety-sensitive duties?'' for specific requirements of the inquiry process. The same requirements are covered within the FMCSRs in § 391.23(e), and so FMCSA amends § 382.413 to reference § 391.23(e) rather than § 40.25, for ease of reference. The amendment also enables paragraph (a) to be simplified. Although paragraph (a) references § 40.25 for the inquiry requirements, it adds that the required time frame for the inquiry of previous employers is 3 years, rather than the 2 years specified in § 40.25. Section 391.23(e) requires a 3-year time frame, and by referencing that section rather than § 40.25, paragraph (a) no longer needs to specify a different time frame.

Section 382.501 Removal From Safety-Sensitive Function

FMCSA revises § 382.501(b) to replace the semicolon after ''functions'' with a comma. This is a punctuation correction.

Section 382.601 Employer Obligation To Promulgate a Policy on the Misuse of Alcohol and Use of Controlled Substances

Section 382.601 requires employers provide educational materials explaining the alcohol and controlled substances regulations in part 382. The materials are required to cover the post-accident testing requirements, and in stating this requirement, § 382.601 references § 382.303(d). FMCSA amends § 382.601 to change these cross-references to instead reference § 382.303 as a whole because there are post-accident testing requirements in other paragraphs of § 382.303 as well.

G. Part 383—Commercial Driver's License Standards; Requirements and Penalties

Section 383.141 General

FMCSA revises § 383.141(b) to change ''state'' to ''State'', to conform with the capitalization used throughout the rest of part 383.

H. Part 384—State Compliance With Commercial Driver's License Program

Section 384.405 Decertification of State CDL Program

FMCSA amends section 384.405 to align the regulatory requirements with the statutory requirements. Specifically, paragraph (a) of the regulation uses permissive language, stating that the Administrator may prohibit a State found to be in substantial noncompliance from performing certain CLP or CDL transactions, and sets out the conditions the Administrator should consider when making a decertification determination. However, 49 U.S.C. 31312 uses mandatory language, stating, ''the Secretary shall issue an order'' to prohibit States from carrying out licensing procedures and issuing CDLs if there is a determination of substantial noncompliance.

The regulatory history does not clearly indicate why there is a discrepancy between the statutory text and the regulatory text. It is clear from the statute that the Administrator is required to prohibit noncompliant states from engaging in the enumerated CLP and CDL transactions. FMCSA therefore replaces the word ''may'' in paragraph (a) with the word ''shall,'' to harmonize the regulation with the statutory text.

I. Part 385—Safety Fitness Procedures

As with part 350, FMCSA also revises part 385, subparts C, D, and E, to eliminate the current question-and-answer format in favor of standard styling. This set of revisions includes revisions to the currently suspended §§ 385.301, 385.303, 385.305, 385.329, 385.405, 385.409, 385.419, and 385.421 to mirror the amendments made to the corresponding temporary sections. All section headings that are phrased as questions will be rephrased as brief descriptive phrases pertaining to the section's content, but the body text of the regulations is unchanged unless otherwise stated below. FMCSA's reasoning for making this change in part 385 is the same as for part 350. As used in these regulations, the question-and-answer format is cumbersome, difficult to read, and may cause confusion, and the Agency finds the regulations are clearer and more useful when standard styling is used. FMCSA also makes other amendments to part 385, which are described below.

Section 385.205 How can an individual who has lost certification to perform a safety audit or investigation, including review, be re-certified?

In addition to revising the heading of § 385.205 to be a short descriptive phrase, FMCSA also amends the section by moving the context for the regulation's requirements from the heading to the body of the regulation, in order to clarify the regulation.

Section 385.407 What conditions must a motor carrier satisfy for FMCSA to issue a safety permit?

In addition to revising the heading of § 385.407 to be a short descriptive phrase, FMCSA also makes a clarifying revision to the section by adding paragraph (a)(2)(iv) regarding the requirement for carriers to maintain the minimum financial responsibility required by § 387.9 in order to receive a safety permit. This addition does not impose new burdens on carriers because 49 CFR part 387 already imposes financial responsibility requirements on motor carriers, including hazardous materials carriers, and these requirements are referenced in the safety fitness standard described in § 385.5. Safety permits and financial responsibility are already linked by § 385.407(a), which requires achieving a ''satisfactory'' safety rating as a prerequisite for issuance of a safety permit, and § 385.421T(a)(8), which specifies that failure to maintain the minimum required financial responsibility is grounds for suspending or revoking a safety permit. This revision will eliminate confusion and ensure consistency between these regulations.

Section 385.409 When may a temporary safety permit be issued to a motor carrier?

In addition to revising the heading of § 385.409 to be a short descriptive phrase, FMCSA also amends the section by removing the paragraph heading of § 385.409(a), which is unnecessary given the revised section heading. Although this section is currently suspended, FMCSA is amending it to mirror the amendments to temporary regulation § 385.409T.

Section 385.409T When may a temporary safety permit be issued to a motor carrier?

In addition to revising the heading of § 385.409T to be a short descriptive phrase, FMCSA also amends the section by removing the paragraph heading of § 385.409T(a), which is unnecessary given the revised section heading.

Section 385.411 Must a motor carrier obtain a safety permit if it has a State permit?

In addition to revising the heading of § 385.411 to be a short descriptive phrase, FMCSA also amends the section by moving the context for the regulation's requirements from the heading to the body of the regulation, in order to clarify the regulation. Finally, § 385.411 contains a cross-reference to § 385.405, which is currently suspended, and FMCSA amends the section to reference § 385.405T instead.

Section 385.413 What happens if a motor carrier receives a proposed safety rating that is less than satisfactory?

In addition to revising the heading of § 385.413 to be a short descriptive phrase, FMCSA also amends the section by moving the context for the regulation's requirements from the heading to the body of the regulation, in order to clarify the regulation.

Appendix B to Part 385—Explanation of Safety Rating Process

Part 385 covers FMCSA's safety fitness procedures, and appendix B to part 385 provides an explanation of the safety rating process. Within appendix B, section III.B. explains that proposed safety ratings of ''conditional'' and ''unsatisfactory'' will become final 45 days after they are received, and the explanation uses the word ''you.'' The use of the word ''you'' is unnecessary and may cause confusion, therefore FMCSA amends the appendix to avoid using it in this instance.

J. Part 387—Minimum Levels of Financial Responsibility for Motor Carriers

Section 387.307 Property Broker Surety Bond or Trust Fund

FMCSA revises § 387.307(e)(5) and (6) to clarify that a broker's or freight forwarder's operating authority registration will be suspended 7 business days after the date a notice of pending suspension is served, not 7 business days after the date printed on the notice. This aligns with the Agency's service rules in part 386 and ensures that, when service is accomplished by mail, brokers and freight forwarders will receive the additional 5 days prescribed in § 386.8(c) to file a response before the suspension takes effect.

FMCSA also revises § 387.307(e)(5) to clarify the Agency's review process when a broker submits information in response to notification from the Agency that the broker's operating authority is pending suspension for failure to maintain adequate financial security. When this rule was issued on November 16, 2023 (88 FR 78656), the procedures specified in § 387.307(e)(6), which apply when a broker seeks reinstatement of its operating authority after being suspended, were also intended to apply to § 387.307(e)(5). However, due to a drafting error, the sentence ''FMCSA will consider such evidence and provide written notice to the broker of its determination'' was omitted from § 387.307(e)(5). FMCSA is therefore adding this sentence to § 387.307(e)(5), to reflect that the Agency's obligation to review evidence a broker submits and provide a response is consistent, regardless of whether the Agency receives information prior to a suspension or after a suspension has occurred.

K. Part 389—Rulemaking Procedures—Federal Motor Carrier Safety Regulations

Section 389.13 Initiation of Rulemaking

Section 389.13(a) describes how the Administrator may initiate a rulemaking, paragraph (b) describes certain steps the Administrator must take when promulgating a major rule, and paragraph (c) describes exceptions to the requirements of paragraph (b). The last sentence of paragraph (c) explains when a proposed rule should be evaluated to determine whether 49 CFR 5.17 applies. Section 5.17 was a former regulation in the CFR titled ''Special procedures for economically significant and high-impact rulemakings'' and was removed in the final rule ''Administrative Rulemaking, Guidance, and Enforcement Procedures'' published on April 2, 2021 (86 FR 17292). When § 5.17 was removed, § 389.13 should have been amended to remove the last sentence of paragraph (c). FMCSA corrects this oversight by amending § 389.13 to remove the reference to § 5.17.

Section 389.41 Severability

FMCSA adds a new section that sets forth the Agency's policy on the severability of regulatory provisions in its final rules. Rules often address numerous provisions that are not inextricably intertwined. Therefore, FMCSA generally considers such provisions to be severable, meaning that if any provision in a rule is later held to be invalid, the remainder of the rule is not affected. If provisions of a rule are so inextricably intertwined that the invalidation of one provision would affect another, FMCSA generally explains the relationship between those provisions in the rule's preamble. Adding this section will improve rulemaking efficiency by allowing FMCSA to cite to the regulation in future rulemakings. Because this new section relates to Agency policy and practice, notice and comment is not required in order for the Agency to codify these practices in a new section of the regulations.

L. Part 390—Federal Motor Carrier Safety Regulations; General

As with part 350, FMCSA also revises part 390, subpart C, to eliminate the current question-and-answer format in favor of standard styling. This set of revisions includes a revision to the currently suspended § 390.40 to mirror the amendment made to the corresponding temporary section. All section headings that are phrased as questions will be rephrased as brief descriptive phrases pertaining to the section's content, but the body text of the regulations is unchanged unless otherwise stated below. FMCSA's reasoning for making this change in part 390 is the same as for part 350. As used in these regulations, the question-and-answer format is cumbersome, difficult to read, and may cause confusion, and the Agency finds the regulations are clearer and more useful when standard styling is used. FMCSA also makes other amendments to part 390, which are described below.

Section 390.27 Locations of Motor Carrier Safety Service Centers

Section 390.27 provides the addresses of the motor carrier safety service centers. FMCSA revises § 390.27 to change the address of the Midwestern Service Center from 4749 Lincoln Mall Drive, Suite 300A, Matteson, Illinois 60443 to 600 Holiday Plaza Drive, Suite 240, Matteson, Illinois 60443. The Midwestern Service Center moved in May 2024, requiring this update to the address.

Section 390.44 What are the procedures to correct the safety record of a motor carrier or an intermodal equipment provider?

In addition to revising the heading of § 390.44 to be a short descriptive phrase, FMCSA also amends the section to relocate the context for the regulation's requirements from the heading to the body.

Section 390.125 Qualified VA Examiner Certification Training

Subpart D of part 390 covers the medical examiner certification requirements for qualified Department of Veterans Affairs (VA) examiners, and § 390.125 requires that they complete certain training as part of the certification process. In June 2018, FMCSA adopted a rule that created an alternative process for certain VA healthcare professionals to be listed on the National Registry of Certified Medical Examiners (National Registry) (83 FR 26846, June 11, 2018). At the time, VA and FMCSA had planned to deliver the training through a web-based system operated by VA. Since that time, the technological capabilities of the National Registry system have been enhanced. Accordingly, VA and FMCSA now plan to deliver the training via the National Registry system, which will be more convenient for the qualified VA examiners. FMCSA revises § 390.125 to reflect this change in training delivery.

Section 390.127 Qualified VA Examiner Certification Testing

Section 390.127 requires that qualified VA examiners pass the medical examiner certification test as part of the certification process. Similar to the training required by § 390.125, the test was previously planned to be administered through a web-based system operated by VA. Because of the enhanced National Registry system capabilities, VA and FMCSA now plan to deliver the testing via the National Registry system, which will be more convenient for the qualified VA examiners. FMCSA revises § 390.127 to reflect this change in test administration.

M. Part 391—Qualifications of Drivers and Longer Combination Vehicle (LCV) Driver Instructors

Section 391.45 Persons Who Must Be Medically Examined and Certified

FMCSA revises § 391.45(c) to change ''intra-city'' to ''intracity,'' to conform the styling of the term with its use in other FMCSRs, including § 390.5T, ''Definitions.''

Section 391.49 Alternative Physical Qualification Standards for the Loss or Impairment of Limbs

FMCSA amends § 391.49(d)(3)(i)(B) and (d)(3)(ii)(C) to clarify the meaning, effect, and effective date of the current requirement that individuals must be capable of demonstrating precision prehension and power grasp prehension with each upper limb separately to be eligible for a skill performance evaluation (SPE) certificate issued by FMCSA. An SPE certificate allows individuals who do not meet FMCSA's physical qualification standards in § 391.41(b)(1) for limb loss or (b)(2) for limb impairment to operate a CMV in interstate commerce subject to the terms, conditions, and limitations provided on the certificate.

On December 5, 1985, FHWA published a final rule amending § 391.49 to incorporate its policy that required an individual with upper limb loss or impairment ''to be capable of demonstrating precision prehension . . . and power grasp prehension . . . in each upper limb separately'' (50 FR 49849). FHWA indicated that the requirement was based on the technical expertise and rehabilitation experiences of the personnel of the Krusen Center for Research and Engineering, which developed a report in 1977 for FHWA titled ''Limb Prosthetics for the Bureau of Motor Carrier Safety'' [2] (Krusen Study) (50 FR at 49850–51).

The term *prehension* is commonly defined to mean the act of taking hold, seizing, or grasping.[3] The more specific medical terms *precision prehension* and *power grasp prehension* were used in the regulation to communicate clearly and effectively with the medical professionals who state whether an individual is capable of demonstrating precision prehension and power grasp prehension; however, these medical terms often are not understood by individuals applying for SPE certificates.

The Krusen Study explains the terms in the context of a hand on page II–2 as follows:

> Grasp, or prehension, activities are of two types: power grip and precision grip. The power grip is especially important in the driver's ability to grasp the steering wheel. In the power grip, a clamping force is produced by wrapping the fingers around the wheel against the counterpressure offered by the palm and thumb. In a precision grip, an object like a pencil is held just between the tips of the fingers and the opposing thumb.

Accordingly, demonstrating power grasp prehension requires use of the palm and fingers/thumb of a hand, while demonstrating precision prehension requires use of the fingers/thumb of a hand.

FHWA stated that the effect of the requirement that an individual must be capable of demonstrating precision prehension and power grasp prehension in each upper limb separately was that individuals with loss of a hand or arm will be required to be properly fitted with a functional prosthesis and be proficient in its use prior to applying for a waiver [4] (50 FR at 49849 and 49851). Individuals with upper limb impairment will be required to be fitted with a functional orthotic device and be proficient in its use prior to applying to a waiver, if the individual is not capable of demonstrating precision prehension and power grasp prehension in each upper limb separately without a device (50 FR at 49849 and 49851). Although FHWA included in the regulation that the requirement that an individual must be capable of demonstrating precision prehension and power grasp prehension in each upper limb separately does not apply to an individual who was granted a waiver absent a prosthetic or orthotic device prior to the 1985 amendment, FMCSA has determined that individuals applying for an SPE certificate would benefit from a clearer statement of the effect of the requirement.

For the reasons provided above, FMCSA clarifies § 391.49(d)(3)(i)(B) by changing the explanation of precision prehension from ''(*e.g.,* manipulating knobs and switches)'' to ''(*e.g.,* grasping and manipulating knobs and switches using the fingers/thumb)'' and by changing the explanation of power grasp prehension from ''(*e.g.,* holding and maneuvering the steering wheel)'' to ''(*e.g.,* grasping, holding, and maneuvering the steering wheel using a hand).'' Because precision prehension and power grasp prehension are demonstrated by a hand, FMCSA changes ''with each upper limb separately'' to ''with each hand separately'' for clarity. To clarify the effect of the current requirement, FMCSA adds the following as a new second sentence: ''Prior to applying for an SPE certificate, an applicant with loss of a hand or arm must be fitted and proficient with a proper prosthesis that enables the applicant to demonstrate precision prehension and power grasp prehension with each hand separately.'' In the last sentence, FMCSA adds a date for the requirement by changing ''prior to the publication of this amendment'' to ''prior to January 6, 1986, the effective date of the requirement'' for clarity and the convenience of the reader.

Similarly, FMCSA clarifies § 391.49(d)(3)(ii)(C) by changing the explanation of precision prehension from ''(*e.g.,* manipulating knobs and switches)'' to ''(*e.g.,* grasping and manipulating knobs and switches using the fingers/thumb)'' and by changing the explanation of power grasp prehension from ''(*e.g.,* holding and maneuvering the steering wheel)'' to ''(*e.g.,* grasping, holding, and maneuvering the steering wheel using a hand).'' Because precision prehension and power grasp prehension are demonstrated by a hand, FMCSA changes ''with each upper limb separately'' to ''with each hand separately'' for clarity. To clarify the effect of the current requirement and FMCSA's practice of allowing use of either a prosthesis or orthotic device as appropriate when upper limb impairment is present, FMCSA adds the following as a new second sentence: ''Prior to applying for an SPE certificate, an applicant with upper limb impairment must be fitted and proficient with a proper prosthesis or orthotic device, if the applicant is not capable of demonstrating precision prehension and power grasp prehension with each hand separately without a prosthesis or orthotic device.'' In the last sentence, FMCSA adds a date for the requirement by changing ''prior to the publication of this amendment'' to ''prior to January 6, 1986, the effective date of the requirement'' for clarity and the convenience of the reader. FMCSA also changes ''an SPE certificate'' in the last sentence to ''a waiver'' to make the

Washington: Department of Transportation, Federal Highway Administration, Bureau of Motor Carrier Safety, 1977. Available at *https://www.fmcsa.dot.gov/regulations/medical/krusen-study-limb-prosthetics* (last accessed May 28, 2024).

[3] Merriam-Webster Dictionary. Available at *https://www.merriam-webster.com/dictionary/prehension* (last accessed May 28, 2024).

[4] Beginning in 1964, individuals who did not satisfy the physical qualification requirements for limb loss or impairment were allowed to become medically certified through a waiver process (29 FR 14495, Oct. 22, 1964). After a change to FHWA's waiver authority and the creation of FMCSA in 2000, § 391.49 was amended to reframe the waiver process as an alternative physical qualification standard with SPE certificates instead of waivers (65 FR 25285, May 1, 2000).

sentence factually correct. SPE certificates were not available prior to January 6, 1986. This error occurred in 2000 when a universal change was made to replace ''waiver'' with ''SPE certificate,'' or its equivalent, throughout § 391.49 (65 FR 25285, 25286, May 1, 2000).

Section 391.62 Limited Exemptions for Intra-City Zone Drivers

FMCSA revises the title of § 391.62 to change ''intra-city'' to ''intracity,'' to conform the styling of the term with its use in the body of the section and other FMCSRs, including § 390.5T, ''Definitions.''

N. Part 393—Parts and Accessories Necessary for Safe Operation

As with part 350, FMCSA is also revising part 393, subpart I, to eliminate the current question-and-answer format in favor of standard styling. All section headings that are phrased as questions will be rephrased as brief descriptive phrases pertaining to the section's content, but the body text of the regulations is unchanged unless otherwise stated below. FMCSA's reasoning for making this change in part 393 is the same as for part 350. As used in these regulations, the question-and-answer format is cumbersome, difficult to read, and may cause confusion, and the Agency finds the regulations are clearer and more useful when standard styling is used. FMCSA is also making other amendments to part 393, which are described below.

Section 393.5 Definitions

FMCSA amends the § 393.5 definition of ''longwood'' to expressly include utility poles. This amendment was previously included in a final rule that published June 22, 2006 (71 FR 35819), however, the amendment was not codified in the regulations and utility poles were not expressly included in the definition of ''longwood'' FMCSA amends § 393.5 to correct this oversight.

O. Part 395—Hours of Service of Drivers

Automatic on-board recording devices (AOBRDs) are electric, electronic, electromechanical, or mechanical device used to record information pertinent to a driver's duty status information, for the purpose of tracking the driver's hours of service. As part of the AOBRD final rule, issued on September 30, 1988, § 395.15 codified in the regulations and prescribed the specific requirements for using such devices (53 FR 38670). Subsequently, Congress mandated the use of a different type of device, known as an electronic logging device (ELD), in Section 32301(b) of the Commercial Motor Vehicle Safety Enhancement Act, enacted as part of MAP–21 (Pub. L. 112–141, 126 Stat. 405, 786–788, July 6, 2012). FMCSA implemented this requirement on December 16, 2015, but allowed drivers and motor carriers to continue using certain AOBRDs until December 16, 2019 (80 FR 78292). As this date has passed and all drivers and carriers are now required to use ELDs, FMCSA is now making updates to part 395 to remove the requirements for AOBRDs in § 395.15, as well as multiple references to AOBRDs in other sections.

Section 395.1 Scope of Rules in This Part

Section § 395.1 contains the hours-of-service exceptions for part 395, and paragraph (d) explains the exceptions for oilfield operations. In describing how waiting time should be recorded, paragraph (d) references both §§ 395.8 and 395.15. Since drivers are no longer permitted to use AOBRDs to track hours of service, FMCSA removes the reference to § 395.15 in § 395.1(d).

Section 395.2 Definitions

FMCSA amends § 395.2 by removing the definition for ''automatic on board recording device,'' for the reasons stated above.

Section 395.8 Driver's Record of Duty Status

FMCSA amends § 395.8 to remove cross references to AOBRDs and part § 395.15 for the reasons stated above. Specifically, FMCSA removes § 395.8(a)(1)(ii), renumbers the remaining paragraphs, and updates the cross-references to those paragraphs accordingly. Additionally, FMCSA removes current paragraph (a)(1)(iv)(B) and renumbers the remaining paragraphs accordingly.

FMCSA revises § 395.8(e)(2) and (3) by removing the references to AOBRDs.

Section 395.13 Drivers Ordered Out of Service

FMCSA revises § 395.13 to remove the cross-reference to § 395.15, for the reasons stated above.

Section 395.15 Automatic On-Board Recording Devices [Reserved]

FMCSA removes and reserves § 395.15, for the reasons stated above.

P. Part 397—Transportation of Hazardous Materials; Driving and Parking Rules

Section 397.65 Definitions

Section 397.65 provides definitions that apply to part 397, subpart C—Routing of Non-Radioactive Hazardous Materials, including a definition for the term ''commerce.'' When that definition was adopted, it contained an error, referring to its paragraph (1) as subparagraph (a) (59 FR 51824, 51830 (Oct. 12, 1994)). FMCSA amends this section to correct the error.

III. Regulatory Analyses

A. Executive Order (E.O.) 12866 (Regulatory Planning and Review), E.O. 13563 (Improving Regulation and Regulatory Review), E.O. 14094 (Modernizing Regulatory Review), and DOT Regulatory Policies and Procedures

FMCSA has considered the impact of this final rule under E.O. 12866 (58 FR 51735, Oct. 4, 1993), Regulatory Planning and Review, E.O. 13563 (76 FR 3821, Jan. 21, 2011), Improving Regulation and Regulatory Review, and by E.O. 14094 (88 FR 21879, Apr. 11, 2023), Modernizing Regulatory Review. The Office of Information and Regulatory Affairs within the Office of Management and Budget (OMB) determined that this final rulemaking is not a significant regulatory action under section 3(f) of E.O. 12866, as supplemented by E.O. 13563 and E.O. 14094, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. Accordingly, OMB has not reviewed it under that E.O. In addition, this rule is not significant within the meaning of DOT regulations (49 CFR 5.13(a)). The amendments made in this final rule primarily correct inadvertent errors and omissions, remove or update obsolete references, and make minor language changes to improve clarity and consistency. In accommodating those changes, the Agency is performing nondiscretionary, ministerial acts. Other changes merely align regulatory requirements with the underlying statutory authority. None of the changes in this final rule impose new material requirements or increase compliance obligations; therefore, this final rule imposes no new costs and a full regulatory evaluation is unnecessary.

Changes to §§ 390.125 and 390.127 are expected to result in cost savings. Originally, the Department of Veterans Affairs' (VA) medical examiner training and certification testing were to be delivered through a web-based platform operated by VA. To facilitate this initiative, FMCSA estimated the cost to develop an information technology (IT) connection between the National Registry and the VA platform to be $258,000 with the costs split evenly between FMCSA and VA, *i.e.,* $129,000 each. Because the National Registry has been unavailable, the alternative process

to get VA healthcare providers on the National Registry has not yet been implemented. Under the new approach in which the training and testing are to be delivered via the National Registry, it is no longer necessary to develop the IT connection originally included in the costs of the rule. Therefore, there will be cost savings for VA of at least $129,000 under the new approach.

As part of the National Registry rebuild, FMCSA is scheduled to build mechanisms to deliver training for medical examiners for two other areas within the National Registry system. Once these two mechanisms are built, there will be a platform in existence to deliver training to medical examiners, and only minor modifications will be necessary to add another training area and an area for testing for the qualified VA examiners. Thus, the costs to FMCSA are expected to be minimal and significantly lower than the $129,000 allocated to FMCSA for the IT connection that is no longer needed. Therefore, there will be cost savings for FMCSA of up to $129,000.

B. Congressional Review Act

This rule is not a major rule as defined under the Congressional Review Act (5 U.S.C. 801–808).[5]

C. Regulatory Flexibility Act (Small Entities)

Pursuant to the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FMCSA is not required to prepare a regulatory flexibility analysis under 5 U.S.C. 604(a) for this final rule because FMCSA has not issued a notice of proposed rulemaking prior to this action.

D. Assistance for Small Entities

In accordance with section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121, 110 Stat. 857), FMCSA wants to assist small entities in understanding this final rule so they can better evaluate its effects on themselves and participate in the rulemaking initiative. If the final rule will affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

Small businesses may send comments on the actions of Federal employees who enforce or otherwise determine compliance with Federal regulations to the Small Business Administration's Small Business and Agriculture Regulatory Enforcement Ombudsman (Office of the National Ombudsman, see *https://www.sba.gov/about-sba/oversight-advocacy/office-national-ombudsman*) and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of FMCSA, call 1–888–REG–FAIR (1–888–734–3247). DOT has a policy regarding the rights of small entities to regulatory enforcement fairness and an explicit policy against retaliation for exercising these rights.

E. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) (UMRA) requires Federal agencies to assess the effects of their discretionary regulatory actions. The Act addresses actions that may result in the expenditure by a State, local, or Tribal government, in the aggregate, or by the private sector of $200 million (which is the value equivalent of $100 million in 1995, adjusted for inflation to 2023 levels) or more in any 1 year. Though this final rule would not result in such an expenditure, and the analytical requirements of UMRA do not apply as a result, the Agency discusses the effects of this rule elsewhere in this preamble.

F. Paperwork Reduction Act

This proposed rule contains no new information collection requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

G. E.O. 13132 (Federalism)

A rule has implications for federalism under section 1(a) of E.O. 13132 if it has ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.'' FMCSA has determined that this rule will not have substantial direct costs on or for States, nor will it limit the policymaking discretion of States. Nothing in this document preempts any State law or regulation. Therefore, this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Impact Statement.

H. Privacy

The Consolidated Appropriations Act, 2005,[6] requires the Agency to assess the privacy impact of a regulation that will affect the privacy of individuals. Because this rule does not require the collection of personally identifiable information, the Agency is not required to conduct a privacy impact assessment.

The Privacy Act (5 U.S.C. 552a) applies only to Federal agencies and any non-Federal agency that receives records contained in a system of records from a Federal agency for use in a matching program.

The E-Government Act of 2002,[7] requires Federal agencies to conduct a Privacy Impact Analysis (PIA) for new or substantially changed technology that collects, maintains, or disseminates information in an identifiable form. No new or substantially changed technology will collect, maintain, or disseminate information as a result of this rule. Accordingly, FMCSA has not conducted a PIA.

I. E.O. 13175 (Indian Tribal Governments)

This rule does not have Tribal implications under E.O. 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

J. National Environmental Policy Act of 1969

FMCSA analyzed this rule pursuant to the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*) and determined this action is categorically excluded from further analysis and documentation in an environmental assessment or environmental impact statement under FMCSA Order 5610.1 (69 FR 9680), appendix 2, paragraph 6.b and c. These Categorical Exclusions address technical amendments and other minor amendments such as those found in this rulemaking, as well as regulations concerning internal agency functions, organization, or personnel administration. Therefore, preparation

[5] A *major rule* means any rule that the Office of Management and Budget finds has resulted in or is likely to result in (a) an annual effect on the economy of $100 million or more; (b) a major increase in costs or prices for consumers, individual industries, geographic regions, Federal, State, or local government agencies; or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets (5 U.S.C. 802(4)).

[6] Public Law 108–447, 118 Stat. 2809, 3268, note following 5 U.S.C. 552a (Dec. 4, 2014).

[7] Public Law 107–347, sec. 208, 116 Stat. 2899, 2921 (Dec. 17, 2002).

of an environmental assessment or environmental impact statement is not necessary.

List of Subjects

49 CFR Part 350

Grant programs-transportation, Highway safety, Motor carriers, Motor vehicle safety, Reporting and recordkeeping requirements, State and local governments.

49 CFR Part 369

Motor carriers, Reporting and recordkeeping requirements.

49 CFR Part 371

Brokers, Motor carriers, Reporting and recordkeeping requirements.

49 CFR Part 380

Administrative practice and procedure, Highway safety, Motor carriers, Reporting and recordkeeping requirements.

49 CFR Part 381

Motor carriers.

49 CFR Parts 382 and 383

Administrative practice and procedure, Alcohol abuse, Drug abuse, Drug testing, Highway safety, Motor carriers, Penalties, Safety, Transportation.

49 CFR Part 384

Administrative practice and procedure, Alcohol abuse, Drug abuse, Highway safety, Motor carriers.

49 CFR Part 385

Administrative practice and procedure, Highway safety, Mexico, Motor carriers, Motor vehicle safety, Reporting and recordkeeping requirements.

49 CFR Part 387

Buses, Freight, Freight forwarders, Hazardous materials transportation, Highway safety, Insurance, Intergovernmental relations, Motor carriers, Motor vehicle safety, Moving of household goods, Penalties, Reporting and recordkeeping requirements, Surety bonds.

49 CFR Part 389

Administrative practice and procedure, Highway safety, Motor carriers, Motor vehicle safety.

49 CFR Part 390

Highway safety, Intermodal transportation, Motor carriers, Motor vehicle safety, Reporting and recordkeeping requirements.

49 CFR Part 391

Alcohol abuse, Drug abuse, Drug testing, Highway safety, Motor carriers, Reporting and recordkeeping requirements, Safety, Transportation.

49 CFR Part 393

Highway safety, Motor carriers, Motor vehicle safety.

49 CFR Part 395

Highway safety, Motor carriers, Reporting and recordkeeping requirements.

49 CFR Part 397

Highway safety, Motor carriers, Motor vehicle safety, Reporting and recordkeeping requirements.

In consideration of the foregoing, FMCSA amends 49 CFR chapter III as set forth below:

PART 350—MOTOR CARRIER SAFETY ASSISTANCE PROGRAM (MCSAP) AND HIGH PRIORITY PROGRAM

■ 1. The authority citation for part 350 continues to read as follows:

Authority: 49 U.S.C. 504, 13902, 31101, 31102, 31104, 31106, 31108, 31136, 31141, 31161, 31310, 31311, 31502; secs. 5106 and 5107, Pub. L. 114–94, 129 Stat. 1312, 1530; and 49 CFR 1.87.

■ 2. Amend § 350.101 by revising the section heading to read as follows:

§ 350.101 Purpose.

* * * * *

■ 3. Amend § 350.103 by revising the section heading to read as follows:

§ 350.103 Effective date of changes to financial assistance programs.

* * * * *

■ 4. Amend § 350.105 by revising the section heading to read as follows:

§ 350.105 Definitions.

* * * * *

■ 5. Amend § 350.201 by revising the section heading to read as follows:

§ 350.201 MCSAP administration: Goal and purpose.

* * * * *

■ 6. Amend § 350.203 by revising the section heading to read as follows:

§ 350.203 MCSAP administration: National MCSAP elements.

* * * * *

■ 7. Amend § 350.205 by revising the section heading to read as follows:

§ 350.205 MCSAP administration: Funding eligibility.

* * * * *

■ 8. Amend § 350.207 by revising the section heading to read as follows:

§ 350.207 MCSAP administration: Conditions to qualify for funds.

* * * * *

■ 9. Amend § 350.209 by revising the section heading to read as follows:

§ 350.209 MCSAP administration: Application for funds using a CVSP.

* * * * *

■ 10. Amend § 350.211 by revising the heading to read as follows:

§ 350.211 MCSAP administration: Requirements for the first year of the CVSP.

* * * * *

■ 11. Amend § 350.213 by revising the section heading to read as follows:

§ 350.213 MCSAP administration: Requirements for the second and third years of the CVSP.

* * * * *

■ 12. Amend § 350.215 by revising the section heading to read as follows:

§ 350.215 MCSAP administration: Response to CVSP.

* * * * *

■ 13. Amend § 350.217 by revising the section heading to read as follows:

§ 350.217 MCSAP administration: Allocation of funds.

* * * * *

■ 14. Amend § 350.219 by revising the section heading to read as follows:

§ 350.219 MCSAP administration: Award of funds under a continuing resolution or an extension of FMCSA's authorization.

* * * * *

■ 15. Amend § 350.221 by revising the section heading to read as follows:

§ 350.221 MCSAP administration: Availability of funds.

* * * * *

■ 16. Amend § 350.223 by revising the section heading to read as follows:

§ 350.223 MCSAP administration: Federal and State shares of costs incurred.

* * * * *

■ 17. Amend § 350.225 by revising the section heading to read as follows:

§ 350.225 MCSAP administration: Maintenance of effort to qualify for funds.

* * * * *

■ 18. Amend § 350.227 by revising the section heading to read as follows:

§ 350.227 MCSAP administration: Activities eligible for reimbursement.

* * * * *

■ 19. Amend § 350.229 by revising the section heading to read as follows:

§ 350.229 MCSAP administration: Specific costs eligible for reimbursement.

* * * * *

■ 20. Amend § 350.231 by revising the section heading to read as follows:

§ 350.231 MCSAP administration: Consequences for failure to meet conditions.

* * * * *

■ 21. Amend § 350.301 by revising the section heading to read as follows:

§ 350.301 Compatibility review: Purpose.

* * * * *

■ 22. Amend § 350.303 by revising the section heading to read as follows:

§ 350.303 Compatibility review: State responsibilities.

* * * * *

■ 23. Amend § 350.305 by revising the section heading, adding introductory text, and revising paragraph (d)(3) to read as follows:

§ 350.305 Compatibility review: Allowable variances from the FMCSRs

The following variances are allowed for State laws and regulations applicable to intrastate commerce and are not subject to Federal jurisdiction.

* * * * *

(d) * * *

(3) A 150-air mile radius or the air mile radius under § 395.1(e)(1)(i) of this subchapter, whichever is greater.

* * * * *

■ 24. Amend § 350.307 by revising the section heading to read as follows:

§ 350.307 Compatibility review: Procedures for obtaining a new exemption.

* * * * *

■ 25. Amend § 350.309 by revising the section heading to read as follows:

§ 350.309 Compatibility review: Consequences of incompatible provisions.

* * * * *

■ 26. Amend § 350.401 by revising the section heading to read as follows:

§ 350.401 High Priority Program: Purpose.

* * * * *

■ 27. Amend § 350.403 by revising the section heading to read as follows:

§ 350.403 High Priority Program: Objectives.

* * * * *

■ 28. Amend § 350.405 by revising the section heading to read as follows:

§ 350.405 High Priority Program: Funding conditions and qualifications.

* * * * *

■ 29. Amend § 350.407 by revising the section heading to read as follows:

§ 350.407 High Priority Program: Application procedures.

* * * * *

■ 30. Amend § 350.409 by revising the section heading to read as follows:

§ 350.409 High Priority Program: Responses to applications.

* * * * *

■ 31. Amend § 350.411 by revising the section heading to read as follows:

§ 350.411 High Priority Program: Availability of funds.

* * * * *

■ 32. Amend § 350.413 by revising the section heading to read as follows:

§ 350.413 High Priority Program: Federal and recipient shares of costs.

* * * * *

■ 33. Amend § 350.415 by revising the section heading to read as follows:

§ 350.415 High Priority Program: Activities and projects eligible for reimbursement.

* * * * *

■ 34. Amend § 350.417 by revising the section heading to read as follows:

§ 350.417 High Priority Program: Costs eligible for reimbursement.

* * * * *

PART 369—REPORTS OF MOTOR CARRIERS

■ 35. The authority citation for part 369 continues to read as follows:

Authority: 49 U.S.C. 14123; 49 CFR 1.87.

■ 36. Amend § 369.1 by revising paragraph (b) to read as follows:

§ 369.1 Annual reports of for-hire, non-exempt motor carriers of property, motor carriers of household goods, and dual property carriers.

* * * * *

(b) *Where to file report.* Carriers must file the annual report with the Federal Motor Carrier Safety Administration at the address in § 369.6. Blank copies of the report form are available at the Federal Motor Carrier Safety Administration website *https://www.fmcsa.dot.gov/mission/form-m.*

■ 37. Amend § 369.4 by revising paragraph (c) to read as follows:

§ 369.4 Annual reports of Class I carriers of passengers.

* * * * *

(c) *Where to file report.* The annual report shall be filed on or before March 31 of the year following the year to which it relates. The annual report shall be filed with the Federal Motor Carrier Safety Administration at the address in § 369.6. Blank copies of the report form are available at the Federal Motor Carrier Safety Administration website *https://www.fmcsa.dot.gov/registration/form-mp-1-annual-report-form-and-worksheet-class-i-motor-carriers-passengers.*

PART 371—BROKERS OF PROPERTY

■ 38. The authority citation for part 371 continues to read as follows:

Authority: 49 U.S.C. 13301, 13501, and 14122; subtitle B, title IV of Pub. L. 109–59; and 49 CFR 1.87.

■ 39. Section 371.2 is revised and republished to read as follows:

§ 371.2 Definitions.

Unless specifically defined elsewhere, in this part:

Broker means a person who, for compensation, arranges, or offers to arrange, the transportation of property by an authorized motor carrier. Motor carriers, or persons who are employees or bona fide agents of carriers, are not brokers within the meaning of this section when they arrange or offer to arrange the transportation of shipments which they are authorized to transport and which they have accepted and legally bound themselves to transport.

Bona fide agents are persons who are part of the normal organization of a motor carrier and perform duties under the carrier's directions pursuant to a preexisting agreement which provides for a continuing relationship, precluding the exercise of discretion on the part of the agent in allocating traffic between the carrier and others.

Brokerage or brokerage service is the arranging of transportation or the physical movement of a motor vehicle or of property. It can be performed on behalf of a motor carrier, consignor, or consignee.

Non-brokerage service is all other service performed by a broker on behalf of a motor carrier, consignor, or consignee.

PART 380—SPECIAL TRAINING REQUIREMENTS

■ 40. The authority citation for part 380 continues to read as follows:

Authority: 49 U.S.C. 31133, 31136, 31305, 31307, 31308, 31502; sec. 4007(a) and (b), Pub. L. 102–240, 105 Stat. 1914, 2151–2152; sec. 32304, Pub. L. 112–141, 126 Stat. 405, 791; and 49 CFR 1.87.

■ 41. Amend § 380.301 by revising the introductory text to read as follows:

§ 380.301 General requirements.

There are two types of LCV driver-instructors: Classroom instructors and Skills instructors. Except as provided in § 380.303, an individual must meet the conditions under paragraph (a) or

paragraph (b) of this section to qualify as an LCV driver-instructor.

* * * * *

■ 42. Amend § 380.723 by:

■ a. Revising paragraphs (c) introductory text, (c)(1)(iii), and the first sentence of paragraph (c)(2)(i); and

■ b. Removing the word ''notice'' wherever it appears and adding in its place the word ''notification''.

The revisions read as follows:

§ 380.723 Removal from training provider registry: procedure.

* * * * *

(c) *Response to notification of proposed removal and corrective action.* A training provider that has received a notification of proposed removal and wishes to remain on the TPR must submit a written response to FMCSA no later than 30 days after the date of issuance of the notification. The response must explain why the provider believes that FMCSA has relied on erroneous information in proposing removal from the TPR, in accordance with paragraph (c)(1) of this section, or the response must state that the provider intends to comply with this subpart and complete the corrective action(s) specified in FMCSA's notification of proposed removal, in accordance with paragraph (c)(2) of this section. If the provider responds to the notification of proposed removal by indicating the provider intends to comply and take corrective action, the provider must submit documentation of completion of corrective action(s) in accordance with paragraph (c)(2)(i) of this section.

(1) * * *

(iii) If the provider does not respond in writing within 30 days of the date of issuance of a notification of proposed removal, explaining why the decision is not proper or stating that the provider will complete the corrective actions in accordance with paragraph (c)(2) of this section, the removal becomes effective immediately and the provider will be removed from the TPR. Any training conducted after the removal date is invalid.

(2) * * *

(i) The provider must comply with this subpart and complete the corrective actions specified in the notification of proposed removal no later than 60 days after either the date of issuance of the notification of proposed removal or the date FMCSA subsequently affirms or modifies the notification of proposed removal. * * *

* * * * *

PART 381—WAIVERS, EXEMPTIONS, AND PILOT PROGRAMS

■ 43. The authority citation for part 381 continues to read as follows:

Authority: 49 U.S.C. 31136(e), 31315; and 49 CFR 1.87.

■ 44. Amend § 381.210 by revising paragraph (c)(4) to read as follows:

§ 381.210 How do I request a waiver?

* * * * *

(c) * * *

(4) Explains how you would ensure that you could likely achieve a level of safety that is equivalent to, or greater than, the level of safety that would be obtained in the absence of the waiver.

■ 45. Amend § 381.310 by revising paragraph (c)(5) to read as follows:

§ 381.310 How do I apply for an exemption?

* * * * *

(c) * * *

(5) Explains how you would ensure that you could likely achieve a level of safety that is equivalent to, or greater than, the level of safety that would be achieved absent such exemption; and

* * * * *

■ 46. Amend § 381.505 by revising paragraph (a) to read as follows:

§ 381.505 What are the minimum elements required for a pilot program?

(a) *Safety measures.* Before granting exemptions for a pilot program, the FMCSA will ensure that the safety measures in a pilot program are designed to achieve a level of safety that is equivalent to, or greater than, the level of safety that would otherwise be achieved through compliance with the regulations prescribed.

* * * * *

PART 382—CONTROLLED SUBSTANCES AND ALCOHOL USE AND TESTING

■ 47. The authority citation for part 382 continues to read as follows:

Authority: 49 U.S.C. 31133, 31136, 31301 *et seq.,* 31502; sec. 32934 of Pub. L. 112–141, 126 Stat. 405, 830; and 49 CFR 1.87.

§ 382.101 [Amended]

■ 48. Amend § 382.101 by adding ''(CMVs)'' to the end of sentence.

§ 382.103 [Amended]

■ 49. Amend § 382.103 by:

■ a. Removing ''§ 390.3(f)'' wherever it appears and adding in its place''§ 390.3T(f)''; and

■ b. Removing ''§ 390.5'' wherever it appears and adding in its place ''§ 390.5T''.

■ 50. Amend § 382.107 by:

■ a. Revising the introductory text; and

■ b. Revising the defined term of ''Commercial motor vehicle'' to read as ''Commercial motor vehicle (CMV)''.

The revisions read as follows:

§ 382.107 Definitions.

Words or phrases used in this part are defined in §§ 386.2 and 390.5T of this subchapter, and § 40.3 of this title, except as provided in this section—

* * * * *

Commercial motor vehicle (CMV)

* * *

* * * * *

■ 51. Revise § 382.413 to read as follows:

§ 382.413 Inquiries for alcohol and controlled substances information from previous employers.

(a) Employers must request alcohol and controlled substances information from previous employers in accordance with the requirements of § 391.23(e).

(b) As of January 6, 2023, employers must use the Drug and Alcohol Clearinghouse in accordance with § 382.701(a) to comply with the requirements of § 391.23(e) with respect to FMCSA-regulated employers. Exception: When an employee who is subject to follow-up testing has not successfully completed all follow-up tests, employers must request the employee's follow-up testing plan directly from the previous employer in accordance with § 391.23(e)(4)(i).

(c) If an applicant was subject to an alcohol and controlled substance testing program under the requirements of a DOT Agency other than FMCSA, the employer must request the alcohol and controlled substances information required under this section and § 391.23(e) directly from those employers regulated by a DOT Agency other than FMCSA.

§ 382.501 [Amended]

■ 52. Amend § 382.501 paragraph (b) by removing the semicolon and adding in its place a comma.

§ 382.601 [Amended]

■ 53. Amend § 382.601 by removing ''§ 382.303(d)'' wherever it appears and adding in its place ''§ 382.303''.

PART 383—COMMERCIAL DRIVER'S LICENSE STANDARDS; REQUIREMENTS AND PENALTIES

■ 54. The authority citation for part 383 continues to read as follows:

Authority: 49 U.S.C. 521, 31136, 31301 *et seq.,* and 31502; secs. 214 and 215 of Pub. L. 106–159, 113 Stat. 1748, 1766, 1767; sec.

1012(b) of Pub. L. 107–56, 115 Stat. 272, 297, sec. 4140 of Pub. L. 109–59, 119 Stat. 1144, 1746; sec. 32934 of Pub. L. 112–141, 126 Stat. 405, 830; sec. 23019 of Pub. L. 117–58, 135 Stat. 429, 777; and 49 CFR 1.87.

§ 383.141 [Amended]

■ 55. Amend § 383.141 by removing in the introductory text of paragraph (b) the word ''state'' and adding in its place the word ''State''.

PART 384—STATE COMPLIANCE WITH COMMERCIAL DRIVER'S LICENSE PROGRAM

■ 56. The authority citation for part 384 continues to read as follows:

Authority: 49 U.S.C. 31136, 31301, *et seq.,* and 31502; secs. 103 and 215 of Pub. L. 106–159, 113 Stat. 1748, 1753, 1767; sec. 32934 of Pub. L. 112–141, 126 Stat. 405, 830; sec. 5524 of Pub. L. 114–94, 129 Stat. 1312, 1560; and 49 CFR 1.87.

§ 384.405 [Amended]

■ 57. Amend § 384.405 in paragraph (a) introductory text by removing the word ''may'' and adding in its place the word ''shall''.

PART 385—SAFETY FITNESS PROCEDURES

■ 58. The authority citation for part 385 continues to read as follows:

Authority: 49 U.S.C. 113, 504, 521(b), 5105(d), 5109, 5113, 13901–13905, 13908, 31135, 31136, 31144, 31148, 31151, 31502; sec. 113(a), Pub. L. 103–311, 108 Stat. 1673, 1676; sec. 408, Pub. L. 104–88, 109 Stat. 803, 958; sec. 350, Pub. L. 107–87, 115 Stat. 833, 864; sec. 5205, Pub. L. 114–94, 129 Stat. 1312, 1537; and 49 CFR 1.87.

■ 59. Amend § 385.201 by revising the section heading to read as follows:

§ 385.201 Qualifications for performing a safety audit or investigation.

* * * * *

■ 60. Amend § 385.203 by revising the section heading to read as follows:

§ 385.203 Certification requirements for performing a safety audit or investigation.

* * * * *

■ 61. Revise § 385.205 to read as follows:

§ 385.205 Requirements for re-certification.

An individual who has lost certification to perform a safety audit or investigation, including review, can only be re-certified if they successfully complete the requirements of § 385.203(a) and (b).

■ 62. Amend § 385.207 by revising the section heading to read as follows:

§ 385.207 Requirements to obtain and maintain certification to conduct driver or vehicle inspections.

* * * * *

■ 63. Amend § 385.301 by:
■ a. Lifting the suspension of the section;
■ b. Revising the section heading; and
■ c. Suspending the section indefinitely.
The revision reads as follows:

§ 385.301 Requirements before beginning interstate operations.

* * * * *

■ 64. Amend § 385.301T by revising the section heading to read as follows:

§ 385.301T Requirements before beginning interstate operations.

* * * * *

■ 65. Amend § 385.303 by:
■ a. Lifting the suspension of the section;
■ b. Revising the section heading; and
■ c. Suspending the section indefinitely.
The revision reads as follows:

§ 385.303 How to Register with FMCSA.

* * * * *

■ 66. Amend § 385.303T by revising the section heading to read as follows:

§ 385.303T How to Register with FMCSA.

* * * * *

■ 67. Amend § 385.305 by:
■ a. Lifting the suspension of the section;
■ b. Revising the section heading; and
■ c. Suspending the section indefinitely.
The revision reads as follows:

§ 385.305 Completing the registration process.

* * * * *

■ 68. Amend § 385.305T by revising the section heading to read as follows:

§ 385.305T Completing the registration process.

* * * * *

■ 69. Amend § 385.306 by revising the section heading to read as follows:

§ 385.306 Consequences of furnishing misleading information or making a false statement.

* * * * *

■ 70. Amend § 385.307 by revising the section heading to read as follows:

§ 385.307 New entrant safety monitoring procedures.

* * * * *

■ 71. Amend § 385.308 by revising the section heading to read as follows:

§ 385.308 Expedited safety audits and compliance reviews of new entrants.

* * * * *

■ 72. Amend § 385.309 by revising the section heading to read as follows:

§ 385.309 Safety audit: Purpose.

* * * * *

■ 73. Amend § 385.311 by revising the section heading to read as follows:

§ 385.311 Safety audit: Scope.

* * * * *

■ 74. Amend § 385.313 by revising the section heading to read as follows:

§ 385.313 Safety audit: Auditor.

* * * * *

■ 75. Amend § 385.315 by revising the section heading to read as follows:

§ 385.315 Safety audit: Location.

* * * * *

■ 76. Amend § 385.317 by revising the section heading to read as follows:

§ 385.317 Safety audit: Safety fitness determination.

* * * * *

■ 77. Amend § 385.319 by revising the section heading to read as follows:

§ 385.319 Safety audit: Completion.

* * * * *

■ 78. Amend § 385.321 by revising the section heading to read as follows:

§ 385.321 Safety audit: Failure.

* * * * *

■ 79. Amend § 385.323 by revising the section heading to read as follows:

§ 385.323 Safety audit: Extensions for corrective action.

* * * * *

■ 80. Amend § 385.325 by revising the section heading to read as follows:

§ 385.325 Safety audit: Outcomes of a corrective action notice.

* * * * *

■ 81. Amend § 385.327 by revising the section heading to read as follows:

§ 385.327 Safety audit: Administrative review.

* * * * *

■ 82. Amend § 385.329 by:
■ a. Lifting the suspension of the section;
■ b. Revising the section heading; and
■ c. Suspending the section indefinitely.
The revision reads as follows:

§ 385.329 Re-application.

* * * * *

■ 83. Amend § 385.329T by revising the section heading to read as follows:

§ 385.329T Re-application.

* * * * *

■ 84. Amend § 385.331 by revising the section heading to read as follows:

§ 385.331 New entrant violation of out-of-service order.

* * * * *

■ 85. Amend § 385.333 by revising the section heading to read as follows:

§ 385.333 Conclusion of 18-month safety monitoring period.

* * * * *

■ 86. Amend § 385.335 by revising the section heading to read as follows:

§ 385.335 Compliance review in lieu of safety audit.

* * * * *

■ 87. Amend § 385.337 by revising the section heading to read as follows:

§ 385.337 New entrant refusal to permit safety audit.

* * * * *

■ 88. Amend § 385.401 by revising the section heading to read as follows:

§ 385.401 Hazardous materials safety permits: Purpose and scope.

* * * * *

■ 89. Amend § 385.402 by revising the section heading to read as follows:

§ 385.402 Hazardous materials safety permits: Definitions.

* * * * *

■ 90. Amend § 385.403 by revising the section heading to read as follows:

§ 385.403 Prohibited transportation without safety permit.

* * * * *

■ 91. Amend § 385.405 by:
■ a. Lifting the suspension of the section;
■ b. Revising the section heading; and
■ c. Suspending the section indefinitely.

The revision reads as follows:

§ 385.405 Application for safety permit.

* * * * *

■ 92. Amend § 385.405T by revising the section heading to read as follows:

§ 385.405T Application for safety permit.

* * * * *

■ 93. Amend § 385.407 by revising the section heading and revising and republishing paragraph (a)(2) to read as follows:

§ 385.407 Requirements for a safety permit.

(a) * * *

(2) FMCSA will not issue a safety permit to a motor carrier that:

(i) Does not certify that it has a satisfactory security program as required in § 385.407(b);

(ii) Has a crash rate in the top 30 percent of the national average as indicated in the FMCSA Motor Carrier Management Information System (MCMIS);

(iii) Has a driver, vehicle, hazardous materials, or total out-of-service rate in the top 30 percent of the national average as indicated in the MCMIS; or

(iv) Does not have the minimum financial responsibility required by § 387.9 of this chapter or an applicable State requirement.

* * * * *

■ 94. Amend § 385.409 by:
■ a. Lifting the suspension of the section;
■ b. Revising the section heading;
■ c. Revising and republishing paragraph (a); and
■ d. Suspending the section indefinitely.

The revision reads as follows:

§ 385.409 Temporary safety permit.

(a) If a motor carrier does not meet the criteria of § 385.407(a), FMCSA may issue it a temporary safety permit. To obtain a temporary safety permit, a motor carrier must certify on Form MCSA–1, the URS online application, that it is operating in full compliance with the HMRs, with the FMCSRs, and/or comparable State regulations, whichever is applicable; and with the minimum financial responsibility requirements in part 387 of this subchapter or in State regulations, whichever is applicable.

* * * * *

■ 95. Amend § 385.409T by revising the section heading and revising and republishing paragraph (a) to read as follows:

§ 385.409T Temporary safety permit.

(a) If a motor carrier does not meet the criteria in § 385.407(a), FMCSA may issue it a temporary safety permit. To obtain a temporary safety permit a motor carrier must certify on Form MCS–150B that it is operating in full compliance with the HMRs; with the FMCSRs, and/or comparable State regulations, whichever is applicable; and with the minimum financial responsibility requirements in part 387 of this chapter or in State regulations, whichever is applicable.

* * * * *

■ 96. Revise § 385.411 to read as follows:

§ 385.411 State-issued safety permit.

A motor carrier must comply with the requirements of this subpart even if it has a State-issued safety permit. However, if FMCSA is able to verify that a motor carrier has a safety permit issued by a State under a program that FMCSA has determined to be equivalent to the provisions of this subpart, FMCSA will immediately issue a safety permit to the motor carrier upon receipt of an application in accordance with § 385.405T, without further inspection or investigation.

■ 97. Revise § 385.413 to read as follows:

§ 385.413 Proposed safety rating less than Satisfactory.

(a) If a motor carrier receives a proposed safety rating that is less than Satisfactory and does not already have a safety permit, it will not be issued a safety permit (including a temporary safety permit) unless and until a Satisfactory safety rating is issued to the motor carrier.

(b) If a motor carrier receives a proposed safety rating that is less than Satisfactory and holds a safety permit (including a temporary safety permit), the safety permit will be subject to revocation or suspension (see § 385.421).

■ 98. Amend § 385.415 by revising the section heading to read as follows:

§ 385.415 Operational requirements for the transportation of a hazardous material for which a permit is required.

* * * * *

■ 99. Amend § 385.417 by revising the section heading to read as follows:

§ 385.417 Availability of motor carrier's safety permit number.

* * * * *

■ 100. Amend § 385.419 by:
■ a. Lifting the suspension of the section;
■ b. Revising the section heading; and
■ c. Suspending the section indefinitely.

The revision reads as follows:

§ 385.419 Effective period of safety permit.

* * * * *

■ 101. Amend § 385.419T by revising the section heading to read as follows:

§ 385.419T Effective period of safety permit.

* * * * *

■ 102. Amend § 385.421 by:
■ a. Lifting the suspension of the section;
■ b. Revising the section heading; and
■ c. Suspending the section indefinitely.

The revision reads as follows:

§ 385.421 Revocation or suspension of safety permit.

* * * * *

■ 103. Amend § 385.421T by revising the section heading to read as follows:

§ 385.421T Revocation or suspension of safety permit.

* * * * *

■ 104. Amend § 385.423 by revising the section heading to read as follows:

§ 385.423 Administrative review of a denial, suspension, or revocation of a safety permit.

* * * * *

Appendix B to Part 385 [Amended]

■ 105. Amend Appendix B in section III.B. by removing the words ''you receive'' wherever it appears and adding in its place the words ''receipt of''.

PART 387—MINIMUM LEVELS OF FINANCIAL RESPONSIBILITY FOR MOTOR CARRIERS

■ 106. The authority citation for part 387 continues to read as follows:

Authority: 49 U.S.C. 13101, 13301, 13906, 13908, 14701, 31138, 31139; sec. 204(a), Pub. L. 104–88, 109 Stat. 803, 941; and 49 CFR 1.87.

■ 107. Amend § 387.307 by revising and republishing paragraphs (e)(5) and (6) to read as follows:

§ 387.307 Property broker surety bond or trust fund.

* * * * *

(e) * * *

(5) Upon notification by the surety company or financial institution in accordance with paragraphs (e)(1) through (4) of this section, FMCSA will provide written notice to the broker that its operating authority registration issued pursuant to part 365 of this chapter will be suspended within 7 business days of service of the notice unless the broker provides written evidence to FMCSA that the notification was sent in error, the surety bond or trust fund has been restored to the $75,000 amount required by this section, or the pending claims have been satisfied without the use of surety bond or trust fund assets. FMCSA will consider such evidence and provide written notice to the broker of its determination.

(6) If the broker fails to respond to the notice within 7 business days of service of the notice, FMCSA will enter a suspension of the broker's authority and provide written notice to the broker that the suspension is in effect. A broker whose authority has been suspended may request that FMCSA lift the suspension by providing written evidence that the notification was sent in error; the surety bond or trust fund has been restored to the $75,000 amount required by this section; or the pending claims have been satisfied without the use of surety bond or trust fund assets. FMCSA will consider such evidence and provide written notice to the broker of its determination.

* * * * *

PART 389—RULEMAKING PROCEDURES—FEDERAL MOTOR CARRIER SAFETY REGULATIONS

■ 108. The authority citation for part 389 continues to read as follows:

Authority: 49 U.S.C. 113, 501 *et seq.,* subchapters I and III of chapter 311, chapter 313, and 31502; sec. 5204 of Pub. L. 114–94, 129 Stat. 1312, 1536; 42 U.S.C. 4917; and 49 CFR 1.87.

§ 389.13 [Amended]

■ 109. Amend § 389.13 by removing the last sentence of paragraph (c).

■ 110. Add § 389.41 to subpart B to read as follows:

§ 389.41 Severability.

If any provision of a rule issued under this part is held invalid, the remaining provisions are not affected unless specifically stated otherwise in the rule.

PART 390—FEDERAL MOTOR CARRIER SAFETY REGULATIONS; GENERAL

■ 111. The authority citation for part 390 continues to read as follows:

Authority: 49 U.S.C. 113, 504, 508, 31132, 31133, 31134, 31136, 31137, 31144, 31149, 31151, 31502; sec. 114, Pub. L. 103–311, 108 Stat. 1673, 1677; secs. 212 and 217, Pub. L. 106–159, 113 Stat. 1748, 1766, 1767; sec. 229, Pub. L. 106–159 (as added and transferred by sec. 4115 and amended by secs. 4130–4132, Pub. L. 109–59, 119 Stat. 1144, 1726, 1743, 1744), 113 Stat. 1748, 1773; sec. 4136, Pub. L. 109–59, 119 Stat. 1144, 1745; secs. 32101(d) and 32934, Pub. L. 112–141, 126 Stat. 405, 778, 830; sec. 2, Pub. L. 113–125, 128 Stat. 1388; secs. 5403, 5518, and 5524, Pub. L. 114–94, 129 Stat. 1312, 1548, 1558, 1560; sec. 2, Pub. L. 115–105, 131 Stat. 2263; and 49 CFR 1.81, 1.81a, 1.87.

■ 112. Amend § 390.27 by revising in the table the entry for ''Midwestern'' to read as follows:

§ 390.27 Locations of motor carrier safety service centers.

Service center	Territory included	Location of office
*	*	*
Midwestern	Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, Ohio, Wisconsin.	600 Holiday Plaza Drive, Suite 240, Matteson, Illinois 60443.
*	*	*

* * * * *

■ 113. Amend § 390.40 by:

■ a. Lifting the suspension of the section;

■ b. Revising the section heading; and

■ c. Suspending the section indefinitely.

The revision reads as follows:

§ 390.40 Intermodal equipment providers.

* * * * *

■ 114. Amend § 390.40T by revising the section heading to read as follows:

§ 390.40T Intermodal equipment providers.

* * * * *

■ 115. Amend § 390.42 by revising the section heading to read as follows:

§ 390.42 Drivers and motor carriers operating intermodal equipment.

* * * * *

■ 116. Amend § 390.44 by revising the section heading to read as follows:

§ 390.44 Correcting the safety record of a motor carrier or an intermodal equipment provider.

* * * * *

■ 117. Amend § 390.46 by revising the section heading to read as follows:

§ 390.46 Preemption of State and local laws and regulations on the inspection, repair, and maintenance of intermodal equipment.

* * * * *

■ 118. Revise § 390.125 to read as follows:

§ 390.125 Qualified VA examiner certification training.

A qualified VA examiner applying for certification under §§ 390.123 through 390.135 must complete training developed and provided by FMCSA through the National Registry of Certified Medical Examiners system.

■ 119. Revise § 390.127 to read as follows:

§ 390.127 Qualified VA examiner certification testing.

To receive medical examiner certification from FMCSA under §§ 390.123 through 390.135, a qualified VA examiner must pass the medical examiner certification test developed and provided by FMCSA through the National Registry of Certified Medical Examiners system.

PART 391—QUALIFICATIONS OF DRIVERS AND LONGER COMBINATION VEHICLE (LCV) DRIVER INSTRUCTORS

■ 120. The authority citation for part 391 continues to read as follows:

Authority: 49 U.S.C. 504, 508, 31133, 31136, 31149, 31502; sec. 4007(b), Pub. L. 102–240, 105 Stat. 1914, 2152; sec. 114, Pub. L. 103–311, 108 Stat. 1673, 1677; sec. 215, Pub. L. 106–159, 113 Stat. 1748, 1767; sec. 32934, Pub. L. 112–141, 126 Stat. 405, 830; secs. 5403 and 5524, Pub. L. 114–94, 129 Stat. 1312, 1548, 1560; sec. 2, Pub. L. 115–105, 131 Stat. 2263; and 49 CFR 1.87.

§ 391.45 [Amended]

■ 121. Amend § 391.45 by removing the word ''intra-city'' wherever it appears and adding in its place the word ''intracity''.

■ 122. Amend § 391.49 by revising paragraphs (d)(3)(i)(B) and (d)(3)(ii)(C) to read as follows:

§ 391.49 Alternative physical qualification standards for the loss or impairment of limbs.

* * * * *

(d) * * *

(3) * * *

(i) * * *

(B) A statement by the examiner that the applicant is capable of demonstrating precision prehension (*e.g.,* grasping and manipulating knobs and switches using the fingers/thumb) and power grasp prehension (*e.g.,* grasping, holding, and maneuvering the steering wheel using a hand) with each hand separately. Prior to applying for an SPE certificate, an applicant with loss of a hand or arm must be fitted and proficient with a proper prosthesis that enables the applicant to demonstrate precision prehension and power grasp prehension with each hand separately. This requirement does not apply to an individual who was granted a waiver, absent a prosthetic device, prior to January 6, 1986, the effective date of the requirement.

(ii) * * *

(C) A statement by the examiner that the applicant is capable of demonstrating precision prehension (*e.g.,* grasping and manipulating knobs and switches using the fingers/thumb) and power grasp prehension (*e.g.,* grasping, holding, and maneuvering the steering wheel using a hand) with each hand separately. Prior to applying for an SPE certificate, an applicant with upper limb impairment must be fitted and proficient with a proper prosthesis or orthotic device, if the applicant is not capable of demonstrating precision prehension and power grasp prehension with each hand separately without a prosthesis or orthotic device. This requirement does not apply to an individual who was granted a waiver, absent an orthotic device, prior to January 6, 1986, the effective date of the requirement.

* * * * *

■ 123. Amend § 391.62 by revising the section heading to read as follows:

§ 391.62 Limited exemptions for intracity zone drivers.

* * * * *

PART 393—PARTS AND ACCESSORIES NECESSARY FOR SAFE OPERATION

■ 124. The authority citation for part 393 continues to read as follows:

Authority: 49 U.S.C. 31136, 31151, 31502; sec. 1041(b), Pub. L. 102–240, 105 Stat. 1914, 1993; secs. 5301 and 5524, Pub. L. 114–94, 129 Stat. 1312, 1543, 1560; and 49 CFR 1.87.

■ 125. Amend § 393.5 by revising the definition of ''Longwood'' to read as follows:

§ 393.5 Definitions.

* * * * *

Longwood. All logs, including utility poles, that are not shortwood, *i.e.,* are over 4.9 m (16 feet) long. Such logs are usually described as long logs or treelength.

* * * * *

■ 126. Amend § 393.100 by revising the section heading to read as follows:

§ 393.100 Applicability and general requirements of cargo securement standards.

* * * * *

■ 127. Amend § 393.102 by revising the section heading to read as follows:

§ 393.102 Minimum performance criteria for cargo securement devices and systems.

* * * * *

■ 128. Amend § 393.104 by revising the section heading to read as follows:

§ 393.104 Standards for cargo securement devices and systems.

* * * * *

■ 129. Amend § 393.106 by revising the section heading to read as follows:

§ 393.106 General requirements for securing articles of cargo.

* * * * *

■ 130. Amend § 393.108 by revising the section heading to read as follows:

§ 393.108 Determining the working load limit of a tiedown or the load restraining value of a friction mat.

* * * * *

■ 131. Amend § 393.110 by revising the section heading to read as follows:

§ 393.110 Additional requirements for determining the minimum number of tiedowns.

* * * * *

■ 132. Amend § 393.112 by revising the section heading to read as follows:

§ 393.112 Adjustability of tiedowns.

* * * * *

■ 133. Amend § 393.114 by revising the section heading to read as follows:

§ 393.114 Requirements for front end structures used as part of a cargo securement system.

* * * * *

■ 134. Amend § 393.116 by revising the section heading to read as follows:

§ 393.116 Specific securement requirements for logs.

* * * * *

■ 135. Amend § 393.118 by revising the section heading to read as follows:

§ 393.118 Specific securement requirements for dressed lumber and similar building products.

* * * * *

■ 136. Amend § 393.120 by revising the section heading to read as follows:

§ 393.120 Specific securement requirements for metal coils.

* * * * *

■ 137. Amend § 393.122 by revising the section heading to read as follows:

§ 393.122 Specific securement requirements for paper rolls.

* * * * *

■ 138. Amend § 393.124 by revising the section heading to read as follows:

§ 393.124 Specific securement requirements for concrete pipe.

* * * * *

■ 139. Amend § 393.126 by revising the section heading to read as follows:

§ 393.126 Specific securement requirements for intermodal containers.

* * * * *

■ 140. Amend § 393.128 by revising the section heading to read as follows:

§ 393.128 Specific securement requirements for automobiles, light trucks, and vans.

* * * * *

■ 141. Amend § 393.130 by revising the section heading to read as follows:

§ 393.130 Specific securement requirements for heavy vehicles, equipment, and machinery.

* * * * *

■ 142. Amend § 393.132 by revising the section heading to read as follows:

§ 393.132 Specific securement requirements for flattened or crushed vehicles.

* * * * *

■ 143. Amend § 393.134 by revising the section heading to read as follows:

§ 393.134 Specific securement requirements for roll-on/roll-off and hook lift containers.

* * * * *

■ 144. Amend § 393.136 by revising the section heading to read as follows:

§ 393.136 Specific securement requirements for large boulders.

* * * * *

PART 395—HOURS OF SERVICE OF DRIVERS

■ 145. The authority citation for part 395 continues to read as follows:

Authority: 49 U.S.C. 504, 21104(e), 31133, 31136, 31137, 31502; sec. 113, Pub. L. 103–311, 108 Stat. 1673, 1676; sec. 229, Pub. L. 106–159 (as added and transferred by sec. 4115 and amended by secs. 4130–4132, Pub. L. 109–59, 119 Stat. 1144, 1726, 1743, 1744), 113 Stat. 1748, 1773; sec. 4133, Pub. L. 109–59, 119 Stat. 1144, 1744; sec. 32934, Pub. L. 112–141, 126 Stat. 405, 830; sec. 5206(b), Pub. L. 114–94, 129 Stat. 1312, 1537; and 49 CFR 1.87.

■ 146. Amend § 395.1 by revising and republishing paragraph (d)(2) to read as follows.

§ 395.1 Scope of rules in this part.

* * * * *

(d) * * *

(2) In the case of specially trained drivers of commercial motor vehicles that are specially constructed to service oil wells, on-duty time shall not include waiting time at a natural gas or oil well site. Such waiting time shall be recorded as ''off duty'' for purposes of § 395.8, with remarks or annotations to indicate the specific off-duty periods that are waiting time, or on a separate ''waiting time'' line on the record of duty status to show that off-duty time is also waiting time. Waiting time shall not be included in calculating the 14-hour period in § 395.3(a)(2). Specially trained drivers of such commercial motor vehicles are not eligible to use the provisions of paragraph (e)(1) of this section.

* * * * *

§ 395.2 [Amended]

■ 147. Amend § 395.2 by removing the definition of ''Automatic on-board recording device''.

■ 148. Amend § 395.8 by revising paragraphs (a)(1) and (e)(2) and (3) to read as follows:

§ 395.8 Driver's record of duty status.

(a) (1) Except for a private motor carrier of passengers (nonbusiness), as defined in § 390.5 of this subchapter, a motor carrier subject to the requirements of this part must require each driver used by the motor carrier to record the driver's duty status for each 24-hour period using the method prescribed in paragraphs (a)(1)(i) through (iii) of this section, as applicable.

(i) Subject to paragraph (a)(1)(ii) of this section, a motor carrier operating commercial motor vehicles must install and require each of its drivers to use an ELD to record the driver's duty status in accordance with subpart B of this part no later than December 18, 2017.

(ii)(A) A motor carrier may require a driver to record the driver's duty status manually in accordance with this section, rather than require the use of an ELD, if the driver is operating a commercial motor vehicle:

(*1*) In a manner requiring completion of a record of duty status on not more than 8 days within any 30-day period;

(*2*) In a driveaway-towaway operation in which the vehicle being driven is part of the shipment being delivered;

(*3*) In a driveaway-towaway operation in which the vehicle being transported is a motor home or a recreation vehicle trailer; or

(*4*) That was manufactured before model year 2000, as reflected in the vehicle identification number as shown on the vehicle's registration.

(B) The record of duty status must be recorded in duplicate for each 24-hour period for which recording is required. The duty status shall be recorded on a specified grid, as shown in paragraph (g) of this section. The grid and the requirements of paragraph (d) of this section may be combined with any company form.

(iii) Subject to paragraphs (a)(1)(i) and (ii) of this section, until December 18, 2017, a motor carrier operating commercial motor vehicles shall require each of its drivers to record the driver's record of duty status:

(A) Using an ELD that meets the requirements of subpart B of this part; or

(B) Manually, recorded on a specified grid as shown in paragraph (g) of this section. The grid and the requirements of paragraph (d) of this section may be combined with any company form. The record of duty status must be recorded in duplicate for each 24-hour period for which recording is required.

* * * * *

(e) * * *

(2) No driver or motor carrier may disable, deactivate, disengage, jam, or otherwise block or degrade a signal transmission or reception, or reengineer, reprogram, or otherwise tamper with an ELD so that the device does not accurately record and retain required data.

(3) No driver or motor carrier may permit or require another person to disable, deactivate, disengage, jam, or otherwise block or degrade a signal transmission or reception, or reengineer, reprogram, or otherwise tamper with an ELD so that the device does not accurately record and retain required data.

* * * * *

§ 395.13 [Amended]

■ 149. Amend § 395.13 in paragraph (b)(2) by removing the words ''or § 395.15 of this part''.

§ 395.15 [Removed and Reserved]

■ 150. Remove and reserve § 395.15.

PART 397—TRANSPORTATION OF HAZARDOUS MATERIALS; DRIVING AND PARKING RULES

■ 151. The authority citation for part 397 continues to read as follows:

Authority: 49 U.S.C. 322; 49 CFR 1.87. Subpart A also issued under 49 U.S.C. 5103, 31136, 31502, and 49 CFR 1.97. Subparts C, D, and E also issued under 49 U.S.C. 5112, 5125.

§ 397.65 [Amended]

■ 152. Amend § 397.65 in paragraph (s) of the definition of ''Commerce'', by removing the words ''subparagraph (a)'' and adding in their place the words ''paragraph (1) of this definition''.

Issued under authority delegated in 49 CFR 1.87.

Vincent G. White,

Deputy Administrator.

BILLING CODE 4910–EX–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 140818679–5356–02; RTID 0648–XE462]

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Fishery of the Gulf of Mexico; Reopening of the Red Snapper Recreational For-Hire Fishing Season in the Gulf of Mexico

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; reopening.

SUMMARY: NMFS is reopening the recreational fishing season for the Federal charter vessel/headboat (for-hire) component for red snapper in the exclusive economic zone (EEZ) of the Gulf of Mexico (Gulf) through this temporary rule. The most recent landings data for the red snapper for-hire component in the Gulf indicates the component annual catch target (ACT) for the 2024 fishing year has not yet been reached. Therefore, the red snapper recreational for-hire component in the Gulf EEZ will reopen to allow harvest of the remaining for-hire component ACT. NMFS intends this action to increase benefits to for-hire fishermen while protecting the Gulf red snapper resource by continuing to constrain harvest to the component quota.

DATES: This temporary rule is effective from 12:01 a.m., local time, November 18, 2024, through 12:01 a.m., local time, on January 1, 2025.

FOR FURTHER INFORMATION CONTACT: Frank Helies, NMFS Southeast Regional Office, telephone: 727–551–5719, email: *frank.helies@noaa.gov.*

SUPPLEMENTARY INFORMATION: The Gulf reef fish fishery, which includes red snapper, is managed under the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (FMP). The FMP was prepared by the Gulf of Mexico Fishery Management Council, approved by the Secretary of Commerce, and is implemented by NMFS under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) by regulations at 50 CFR part 622.

The final rule implementing Amendment 40 to the FMP established two components within the recreational sector fishing for Gulf red snapper: the private angling component and the Federal for-hire component (80 FR 22422, April 22, 2015). Amendment 40 also allocated the red snapper recreational annual catch limit (ACL; recreational quota) between the components and established separate seasonal closures for the two components. The Federal for-hire component's red snapper ACT is 9 percent below the for-hire component quota (87 FR 74014, December 2, 2022; 50 CFR 622.41(q)(2)(iii)(B)).

The red snapper for-hire component seasonal closure is projected using the component's ACT to reduce the likelihood of the harvest exceeding the component quota and the total recreational quota. The Federal for-hire component ACT for red snapper in the Gulf EEZ is 3,076,322 pounds (lb)(1,395,396 kilograms (kg)), round weight (50 CFR 622.41(q)(2)(iii)(B)).

NMFS previously determined that the 2024 Federal Gulf red snapper for-hire fishing season would be 88 days based on when landings were expected to reach the component ACT. NMFS made this determination based on catch rates from the 2023 fishing year. For details about the projection for 2024, see *https://www.fisheries.noaa.gov/southeast/sustainable-fisheries/gulf-mexico-recreational-red-snapper-management.* Based on this projection, NMFS announced in the **Federal Register** that the 2024 recreational season for the Federal for-hire component would begin at 12:01 a.m., local time, on June 1, 2024, and close at 12:01 a.m., local time, on August 28, 2024 (89 FR 42815, May 16, 2024).

However, the most recent landings data for the Gulf red snapper for-hire component indicate that approximately 882,612 lb (400,346 kg), round weight, of the for-hire component ACT has not been harvested. NMFS projects that the remaining ACT will allow for harvest through the remainder of the current 2024 fishing year.

Therefore, in accordance with 50 CFR 622.8(c), NMFS reopens the Gulf red snapper Federal for-hire component for remainder of the 2024 fishing year to allow for harvest of the component ACT. The recreational season for the Federal for-hire component will reopen at 12:01 a.m., local time, November 18, 2024, and close at 12:01 a.m., local time, on January 1, 2025. When the for-hire component closes again on January 1, 2025, the bag and possession limits for red snapper for Federal for-hire vessels are zero. When the Federal for-hire component is closed, these bag and possession limits apply in the Gulf on board a vessel for which a valid Federal for-hire permit for Gulf reef fish has been issued, without regard to where such species were harvested, *i.e.,* in state or Federal waters. In addition, a person aboard a vessel that has been issued a charter vessel/headboat permit for Gulf reef fish any time during the fishing year may not harvest or possess red snapper in or from the Gulf EEZ when the Federal charter vessel/headboat component is closed.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is taken under 50 CFR 622.8(c), which was issued pursuant to section 304(b) of the Magnuson-Stevens Act, and is exempt from review under Executive Order 12866, and other applicable laws.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment is unnecessary and contrary to the public interest. Such procedures are unnecessary because the regulation at 50 CFR 622.8(c) has already been subject to notice and comment, and all that remains is to notify the public that additional harvest is available under the established Federal for-hire component ACT, and therefore, the Federal for-hire component for Gulf red snapper will reopen. Such procedures are contrary to the public interest because of need to immediately implement this action to allow persons on board Federal for-hire vessels the opportunity to harvest the remainder of the Federal for-hire component ACT. Prior notice and opportunity for public comment would delay the re-opening and reduce the number available fishing days.

For the aforementioned reasons, there is also good cause to waive the 30-day delay in the effectiveness of this action under 5 U.S.C. 553(d)(3).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 13, 2024.

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 230316–0077]

RTID 0648–XE470

Fisheries of the Northeastern United States; Atlantic Herring Fishery; 2024 Management Area 1A Possession Limit Adjustment

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; possession limit adjustment.

SUMMARY: NMFS is implementing a 2,000-lb (907.2-kg) possession limit for Atlantic herring for Management Area 1A. This is required because NMFS projects that herring catch from Area 1A will reach 92 percent of the Area's sub-annual catch limit before the end of the fishing year. This action is intended to prevent overharvest of herring in Area 1A, which would result in additional catch limit reductions in a subsequent year.

DATES: Effective 0001 hours (hr) local time, November 14, 2024, through December 31, 2024.

FOR FURTHER INFORMATION CONTACT: Colette Tweeddale, Fishery Management Specialist, 978–281–9335.

SUPPLEMENTARY INFORMATION: The Regional Administrator of the Greater Atlantic Regional Office monitors Atlantic herring fishery catch in each Management Area based on vessel and dealer reports, state data, and other available information. Regulations at 50 CFR 648.201(a)(1)(i)(A) require implementation of a 2,000-lb (907.2-kg) possession limit for herring for Area 1A beginning on the date that catch is projected to reach 92 percent of the sub-annual catch limit (ACL) for that area. The Magnuson-Stevens Fishery Conservation and Management Act provides authority to implement the possession limit only to the Secretary of Commerce, which has been delegated to the Regional Administrator.

Based on vessel reports, dealer reports, and other available information the Regional Administrator projects that the herring fleet will have caught 92 percent of the Area 1A sub-ACL by November 13, 2024. Therefore, effective 0001 hr local time November 14, 2024, through December 31, 2024, a person may not attempt or do any of the following: Fish for; possess; transfer; purchase; receive; land; or sell more than 2,000 lb of herring per trip or more than once per calendar day in or from Area 1A.

Vessels that enter port before 0001 hr local time on November 14, 2024, may land and sell more than 2,000 lb (907.2 kg) of herring from Area 1A from that trip, provided that catch is landed in accordance with state management measures. Vessels may transit or land in Area 1A with more than 2,000 lb (907.2 kg) of herring on board, provided that: The herring were caught in an area not subject to a 2,000-lb (907.2-kg) limit; all fishing gear is stowed and not available for immediate use; and the vessel is issued a permit appropriate to the amount of herring on board and the area where the herring was harvested.

Also effective 0001 hr local time, November 14, 2024, through 2400 hr local time, December 31, federally permitted dealers may not attempt or do any of the following: Purchase; receive; possess; have custody or control of; sell; barter; trade; or transfer more than 2,000 lb (907.2 kg) of herring per trip or calendar day from Area 1A, unless it is from a vessel that enters port before 0001 hr local time on November 14, 2024, and catch is landed in accordance with state management measures.

Classification

This action is required by 50 CFR part 648 and is exempt from review under Executive Order 12866.

NMFS finds good cause pursuant to 5 U.S.C. 553(b)(3)(B) to waive prior notice and the opportunity for public comment because it is unnecessary, contrary to the public interest, and impracticable. Ample prior notice and opportunity for public comment has been provided for the required implementation of this action. The requirement to implement this possession limit was developed by the New England Fishery Management Council using public meetings that invited public comment on the measures when they were developed and considered along with alternatives. Further, the regulations requiring implementation of this possession limit also were subject to public notice and opportunity to comment, when they were first adopted in 2014. Herring fishing industry participants monitor catch closely and anticipate potential possession limit adjustments as catch totals approach Area sub-ACLs. The regulation is not discretionary and is designed for implementation as quickly as possible to prevent catch from exceeding limits designed to prevent overfishing while allowing the fishery to achieve optimum yield.

The 2024 herring fishing year began on January 1, 2024, and Management Area 1A opened to fishing on June 1, 2024. Data indicating that the herring fleet will have landed at least 92 percent of the 2024 sub-ACL allocated to Area 1A only recently became available. High-volume catch and landings in this fishery can increase total catch relative to the sub-ACL quickly, especially in this fishing year where annual catch limits are unusually low. If implementation of this possession limit adjustment is delayed to solicit prior public comment, the 2024 sub-ACL for Area 1A will likely be exceeded; thereby undermining the conservation objectives of the Herring Fishery Management Plan (FMP). If sub-ACLs are exceeded, the excess must be deducted from a future sub-ACL and would reduce future fishing opportunities. The public expects these actions to occur in a timely way consistent with the FMP's objectives. For the reasons stated above, NMFS also finds good cause to waive the 30-day delayed effectiveness in accordance with 5 U.S.C. 553(d)(3).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 13, 2024.

RIN 2120–AK77

Requirements To File Notice for Meteorological Towers and Other Wind Energy Systems

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA is proposing to amend requirements applicable to meteorological towers and permanent wind energy systems. This rule would require any person that owns (sponsor) any proposed, altered, or existing meteorological tower to file notice with the Federal Aviation Administration (FAA) if the highest point of the structure is at least 50 feet above ground level (AGL) up to and including 200 feet AGL at its site. The FAA is also proposing marking requirements for meteorological towers constructed or altered after the effective date of a final rule if the highest point of the structure is at least 50 feet AGL up to and including 200 feet AGL at its site. Additionally, the FAA proposes making certain pertinent information about any meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site available on the FAA's official database. The FAA expects these changes to lower the collision risk for aircraft during low-altitude operations. Moreover, these requirements would partially address two statutory mandates and two National Transportation Safety Board (NTSB) recommendations.

DATES: Send comments on or before January 17, 2025.

ADDRESSES: Send comments identified by docket number FAA–2024–2574 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov* and follow the online instructions for sending your comments electronically.
- *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Facsimile:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at *https://www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Brian Konie, Airspace Rules and Regulations Team, Air Traffic Organization, AJV–P21, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783; email: *brian.konie@faa.gov.*

SUPPLEMENTARY INFORMATION: The FAA further proposes amending the notice requirements for any person that owns (sponsors) a proposed or altered permanent wind energy system. The FAA is also proposing to extend the expiration date of the Determination of No Hazard to Air Navigation for permanent wind energy systems and associated meteorological towers.

The FAA is also proposing to clarify that, except for structures that have received an FAA Determination of No Hazard to Air Navigation prior to the effective date of a final rule or any meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site for which construction is complete prior to the effective date of a final rule, all conditions and limitations of any Determination of No Hazard to Air Navigation are mandatory, which includes marking requirements. Finally, the FAA proposes making several miscellaneous conforming and clarifying amendments.

I. Executive Summary

A. Overview of Proposed Rule

This proposed rule would amend title 14 Code of Federal Regulations (14 CFR) part 77, Safe, Efficient Use, and Preservation of the Navigable Airspace, as it applies to all existing meteorological towers, as well as proposals to construct or alter a meteorological tower, with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site.

The FAA proposes requiring a sponsor [1] proposing to construct or alter a meteorological tower at least 50 feet AGL up to and including 200 feet AGL at its site to file notice under § 77.9 pursuant to § 77.7(b).

This rule would also require sponsors of existing meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site to file notice with the FAA within 90 days of the final rule's effective date pursuant to § 77.9.

Additionally, the FAA proposes making certain pertinent information about any meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site available on the FAA's official database, the Digital Obstacle File (DOF), available at *https://www.faa.gov/air_traffic/flight_info/aeronav/digital_products/dof.* The FAA expects that collecting via the notice

[1] The FAA notes that the word ''Sponsor'' is capitalized in Advisory Circular 70/7460–1. However, for purposes of this rulemaking, the word is lower case.

and sharing information on proposed, altered, and existing meteorological towers in the DOF database will improve situational awareness for pilots conducting low-altitude operations.

In addition to the changes affecting meteorological towers, this proposed rule would also add additional requirements addressing permanent wind energy systems. The FAA needs these changes to properly handle the unique attributes of wind energy systems. The FAA proposes the following changes:

- Require notice of proposed construction or alteration of a permanent wind energy system at least 90 days before the start date of the proposed construction or alteration, or the date an application for a construction permit is filed, whichever is earlier; and,
- Amend the expiration date of the Determination of No Hazard to Air Navigation under § 77.33 for permanent wind energy systems and associated meteorological towers to 36 months after the effective date of the determination.

Finally, this proposed rule would make the following changes, clarifying and codifying current agency practice:

- Add a definition of airborne wind energy system (AWES) to § 77.3 for consistency with the FAA's final notice of policy; [2]
- Add a definition of meteorological towers to § 77.3 for consistency with the FAA's final notice of policy; [3]
- Add a definition of sponsor to § 77.3 to clarify the scope of applicability;
- Add a definition of wind energy system to § 77.3 to clarify the scope of applicability;
- Amend § 77.7 to update the methods available to acquire an approved copy of FAA Form 7460–1, Notice of Proposed Construction or Alteration;
- Revise the heading of § 77.9, ''Construction or alteration requiring notice,'' to ''Notice requirements'' to reflect that existing meteorological towers may need to provide notice to the FAA;
- Redesignate § 77.11 as § 77.10, and amend to identify FAA Form 7460–2, Notice of Actual Construction or Alteration, as the form sponsors use to provide supplemental notice;
- Add § 77.11 to require the sponsor to submit additional information upon request throughout the aeronautical study process, which includes all actions required pre- and post-determination;
- Add § 77.12 to clarify that, except for structures that have received an FAA Determination of No Hazard to Air Navigation prior to the effective date of a final rule or any meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site for which construction is complete prior to the effective date of a final rule, a sponsor must comply with any conditions and limitations contained in a Determination of No Hazard to Air Navigation including marking requirements that would be developed in accordance with the FAA Advisory Circular 70/7460–1, Obstruction Marking and Lighting, for proposed or altered meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site;
- Amend § 77.27 to clarify when an aeronautical study is appropriate;
- Add § 77.32 to clarify how a sponsor may request a modification or deviation from the marking and lighting requirements contained in a determination; and,
- Amend § 77.35 to clarify a sponsor's duty to request an extension of the effective period of the determination when the original Federal Communications Commission (FCC) completion date needs to be extended.

The FAA is proposing to revise references to ''Airport/Facility Directory, Alaska Supplement, or Pacific Chart Supplement'' to ''Chart Supplement U.S., Chart Supplement Alaska, or Chart Supplement Pacific.''

The FAA notes that, as discussed in section IV.D. of this preamble, the FAA is proposing to revise references to ''you'' to refer to the sponsor to make clear to whom ''you'' applies.

The FAA also notes that, as discussed in section IV.D of this preamble, the FAA is proposing to revise references to ''marking and lighting recommendations'' to ''marking and lighting requirements'' for consistency with the changes in § 77.12.

The following table summarizes the substantive changes proposed in this rule.

TABLE 1—SUMMARY OF PROPOSED CHANGES

CFR §	Proposed provision
77.1	Establishes the requirement that all conditions and limitations in the determination are mandatory, including the requirement to mark newly constructed or altered meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site.
77.3	Add definitions for ''airborne wind energy system (AWES),'' ''meteorological tower,'' ''sponsor,'' and ''wind energy system.''
77.5	A sponsor of a meteorological tower in existence before the effective date of a final rule must provide notice consistent with § 77.7(d).
	A sponsor proposing any construction or alteration of a meteorological tower with the highest point of the structure at least 50 feet up to and including 200 feet AGL at its site must provide adequate notice to the FAA of that construction or alteration pursuant to § 77.7(b).
77.7	Require a sponsor to file notice at least 45 days before the start of construction or alteration or the date of application for a construction permit for any new meteorological tower, whichever is earlier.
	A sponsor must submit FAA Form 7460–1 for any proposed construction or alteration of a permanent wind energy system and associated meteorological towers at least 90 days before the start date of the proposed construction or alteration, or the date an application for a construction permit is filed, whichever is earlier.
	A sponsor of a meteorological tower that exists prior to the effective date of a final rule with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site must submit FAA Form 7460–1 within 90 days of the effective date of a final rule.
77.9	A sponsor must file notice of any construction or alteration of a meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site.

[2] Airborne Wind Energy Systems (AWES) Policy Statement, 87 FR 78849 (Dec. 23, 2022).

[3] Id.

TABLE 1—SUMMARY OF PROPOSED CHANGES—Continued

CFR §	Proposed provision
	If a sponsor has an existing meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site prior to the effective date of a final rule, the sponsor must file notice consistent with § 77.7(d).
77.10	Makes clear that a sponsor must file supplemental notice if otherwise requested by the FAA.
77.11	If the FAA requests additional information during any part of the aeronautical study process, pre- or post-any determination, the sponsor must provide that information within 30 days.
77.12	Except for structures that have received an FAA Determination of No Hazard to Air Navigation prior to the effective date of a final rule or any meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site for which construction is complete prior to the effective date of a final rule, sponsors must comply with the conditions and limitations contained in a Determination of No Hazard to Air Navigation. This includes requiring newly constructed or altered meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site to mark the tower.
77.27	The FAA will conduct an aeronautical study when: (1) notice required under § 77.9 has been received, or (2) the FAA determines a study is necessary. All other notices filed outside of these parameters will be screened within the automated OE/AAA system and provided an electronic letter response that indicates that no notice is required for the said proposal or alteration, and thus the FAA has no objections to the proposal.
77.32	In order to request a modification or deviation from the marking and lighting requirements contained in a Determination of No Hazard to Air Navigation, the sponsor must submit FAA Form 7460–1, Notice of Proposed Construction or Alteration.
77.33	Unless extended, revised, or terminated, each Determination of No Hazard to Air Navigation issued under subpart D of part 77 regarding a proposed permanent wind energy system, including an airborne wind energy system, and associated meteorological towers, expires 36 months after the effective date of the determination or on the date the proposed construction or alteration is abandoned, whichever is earlier.

B. Summary of Costs and Benefits

Section 2110 of the FAA Extension, Safety, and Security Act of 2016 (FESSA),[4] as amended by section 576 of the FAA Reauthorization Act of 2018 (FAARA),[5] mandates the FAA to require the marking of ''covered towers'' if they are not included in the database described in section 2110, except for meteorological towers. Section 2110(a)(2) requires that all meteorological towers be marked and included within a database. This proposed rule would include meteorological tower information in a database as well as require compliance with any marking requirements that are conditions and limitations in a Determination of No Hazard to Air Navigation for a proposed or altered meteorological tower. The proposed rule would partially satisfy the mandate concerning meteorological towers without placing undue financial burdens on existing towers and partially address two National Transportation Safety Board (NTSB) recommendations.[6] This proposal also includes additional amendments that would allow the FAA more time to study and determine aeronautical effects and any potential national airspace system (NAS) impacts from permanent wind energy systems and associated meteorological towers.

Section 2110, as amended by section 576 of FAARA, requires the clear marking of towers and their inclusion in a database no later than 18 months after the date of enactment of the FAA Reauthorization Act of 2018 or the date of availability of the database, whichever is later. Section 2110(a)(1)(A) requires that towers be clearly marked consistent with applicable guidance in the advisory circular issued December 4, 2015 (AC 70/7460–1L). Consistent with the direction provided by section 2110, the FAA proposes to add new § 77.12, Conditions and limitations. This proposal would clarify that sponsors that receive a Determination of No Hazard to Air Navigation, except for structures that have received an FAA Determination of No Hazard to Air Navigation prior to the effective date of a final rule or any meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site for which construction is complete prior to the effective date of a final rule must comply with the conditions and limitations therein including, at a minimum, marking requirements for newly constructed or altered meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site. Those conditions and limitations as they relate to marking will be derived from the current version of AC 70/7460–1. Existing meteorological towers at least 50 feet AGL and up to and including 200 feet AGL are required to file notice with the FAA within 90 days of the effective date of a final rule. The FAA will study these notices, and the FAA may issue a part 77 determination.

The primary costs of the proposed rule to industry would be the costs to mark new and altered meteorological towers. The estimated costs to mark each new or altered tower is about $14,300 and includes equipment costs for marker balls and sleeves and installing them to new and altered towers, buying a new pre-painted tower, and dismantling a tower. This estimated cost also includes the cost to provide FAA notifications of both existing and dismantling of out-of-service meteorological towers. The FAA would process notifications of existing and new meteorological towers, including notifications of dismantled out-of-service meteorological towers, at a cost of about $41 per existing notification and about $162 per dismantling notification. The FAA is also proposing to extend the expiration date of the Determination of No Hazard to Air Navigation for permanent wind energy systems and associated meteorological towers. Extending the wind turbine determination period from 18 months to 36 months would result in minimal cost savings to industry and the FAA.

The primary benefit of the proposed rule would be enhanced conspicuity to prevent agricultural pilots from colliding with meteorological towers with the highest point of the structure

[4] Public Law 114–190, sec. 2110; 130 Stat. 623 (Jul. 15, 2016).

[5] Public Law 115–254, sec. 576; 132 Stat. 3391 (Oct. 5, 2018).

[6] NTSB Safety Recommendations A–13–16 and A–13–17 (May 2013).

at least 50 feet AGL up to and including 200 feet AGL at its site.

II. Authority for This Proposed Rulemaking

The FAA's authority to issue rules on aviation safety is found in title 49 of the United States Code (49 U.S.C.). Subtitle I, section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is issued under the authority described in 49 U.S.C. 40103(b), which vests the Administrator with broad authority to prescribe regulations to ensure the safety of aircraft and the efficient use of airspace, and 49 U.S.C. 44701(a)(5), which requires the Administrator to promulgate regulations and minimum standards for other practices, methods, and procedures necessary for safety in air commerce and national security. This rulemaking is also consistent with: (1) the authority in 49 U.S.C. 44718(a), which directs the Secretary of Transportation to require a person to give adequate public notice of the construction, alteration, establishment, or expansion, or the proposed construction, alteration, establishment, or expansion, of a structure or sanitary landfill in furtherance of safety in air commerce and the efficient use and preservation of the navigable airspace and of airport traffic capacity at public-use airports; (2) section 44718(b), which requires the Secretary to conduct an aeronautical study to decide the extent of any adverse impact on the safe and efficient use of the airspace, facilities, or equipment if the Secretary decides that constructing or altering a structure may result in an obstruction of the navigable airspace or an interference with air navigation facilities and equipment or the navigable airspace; and (3) section 44718(c), which requires that in carrying out laws related to a broadcast application and conducting an aeronautical study related to broadcast towers, the FAA Administrator and the FCC shall take action necessary to coordinate efficiently the receipt and consideration of, and action on, the application and the completion of any associated aeronautical study.

Furthermore, the portions of the proposed rule regarding meteorological towers are authorized by section 2110 of the 2016 FESSA, as amended by section 576 of the 2018 FAARA and section 355 of the FAA Reauthorization Act of 2024 (Pub. L. 118–63), that imposed marking and informational requirements on covered towers, including meteorological towers. The following proposed amendments to part 77 are within the scope of this authority. Publication of this NPRM also satisfies the requirement in section 355 of the FAA Reauthorization Act of 2024 [7] that the FAA publish this notice of proposed rulemaking within one year of the date of enactment of that Act.

III. Background

A. Current Regulations and Practices

Part 77 contains the regulations governing the safe, efficient use, and preservation of the navigable airspace. Sponsors proposing to construct or alter a structure that is more than 200 feet AGL must provide the FAA notice per § 77.9(a). Sponsors must provide notice at least 45 days before the start of construction or alteration or the date an application for a construction permit is filed, whichever is earlier, per § 77.7(b).

After receiving notice, the FAA's Obstruction Evaluation Group (OEG) conducts an initial review to verify the information provided and, if appropriate, enters it into the Obstruction Evaluation/Airport Airspace Analysis (OE/AAA) system as a verified proposed structure.

Currently, the FAA will conduct an aeronautical study when requested by the sponsor of any proposed construction or alteration for which a notice is submitted, or the FAA determines a study is necessary.[8] As part of this study, the FAA determines whether the structure exceeds the heights identified in part 77's obstruction standards. A structure exceeding one or more of the heights described in the obstruction standards is presumed a hazard to air navigation unless an aeronautical study determines otherwise. If the proposed structure is a presumed hazard, the FAA sends the sponsor a notice of preliminary findings (which previously was called a Notice of Presumed Hazard) with 60 days to respond.

Upon receipt of the preliminary findings, the sponsor has the option to move or lower the proposed structure, request further study (which may include a public comment period), terminate the proposal, or request a Determination of Hazard. The FAA and the sponsor may also discuss hazard mitigation strategies, such as reducing the structure's height or adjusting the proposed location, prior to the agency's formal determination. Proper mitigation, if appropriate, may result in a Determination of No Hazard to Air Navigation that contains conditions and limitations (*e.g.,* marking, lighting, or supplemental notice filing constraints). Each Determination of No Hazard to Air Navigation issued under subpart B of part 77 expires 18 months after the effective date of the determination, or on the date the proposed construction or alteration is abandoned, whichever is earlier. If the FAA determines that a structure does not pose a hazard to air navigation, the FAA will recommend marking and lighting in the determination, as appropriate, in accordance with the current AC 70/7460–1 to make the structure more conspicuous for aircraft operators to see and avoid.

A sponsor may request a modification from the marking and lighting recommendations contained in a determination by submitting FAA Form 7460–1, Notice of Proposed Construction or Alteration, to the OEG. A request received after the FAA has issued its determination containing marking and lighting conditions and limitations may require a new marking and lighting study and could result in new requirements. If the FAA issues a modification from the marking or lighting conditions and limitations prior to the implementation of the changes, the sponsor may also be required to notify the FCC. Modifications would be based on whether or not they impact aviation safety.

A sponsor may also request a deviation from the marking and lighting conditions and limitations contained in the determination derived from the standards in AC 70/7460–1. Proposed requests to deviate from current marking and lighting conditions and limitations derived from the standards in AC 70/7460–1 for research and development to introduce new technology or improve current standards are generally submitted by email. The FAA will perform a safety assessment for use in the NAS and may request additional information if needed. If at any time the FAA determines the study has created an unsafe condition, the deviation request may be disapproved. Research and development testing is independent of the aeronautical study process and generally requires a more lengthy analysis period for evaluation by the FAA for aviation safety. When testing is complete and the FAA concludes its review, the sponsor will be notified of the determination. Examples of deviations that may be considered include, but are not limited to, alternative painting schemes, colors/types of lights, basic signals and intensity of lights, night/day lighting combinations, and flash rate.

B. NTSB Investigations of Meteorological Tower Accidents

The NTSB is an independent U.S. government agency responsible for the investigation of civil transportation accidents.[9] Between 2003 and 2011, the NTSB investigated 3 accidents involving meteorological towers below 200 feet AGL. A summary of the investigated accidents follows:

- *December 15, 2003:* During a personal flight from Yakima, Washington, to Walla Walla, Washington, an Erickson SHA Glasair collided with an unmarked meteorological tower (164 feet AGL) near Vansycle, Oregon. The accident resulted in fatalities to the pilot and passenger.[10]
- *May 19, 2005:* During an aerial application flight, an Air Tractor AT–602 collided with an unmarked meteorological tower (197 feet AGL) erected 15 days before the accident near Ralls, Texas. The accident resulted in a pilot fatality.[11]
- *January 10, 2011:* During an aerial application flight, a Rockwell International S–2R collided with an unmarked meteorological tower (198 feet AGL) near Oakley, California. The accident resulted in a pilot fatality.[12]

In 2011, the NTSB issued Safety Alert (SA) 016.[13] The SA warned operators that ''unmarked towers could interfere with low-flying aircraft operations, including those involving helicopter emergency medical services, law enforcement, animal damage control, fish and wildlife, agriculture, and aerial fire suppression.'' In 2013, the NTSB published a Safety Recommendation letter [14] addressed to the FAA Administrator, containing the following 2 recommendations:

- *A–13–16:* Amend part 77 to require that all meteorological towers [15] are registered, marked, and—where feasible—lighted; and,
- A–13–17: Create and maintain a publicly accessible national database for the required registration of all meteorological towers.

In 2014, the NTSB published a Special Investigation Report (SIR) concerning the safety of agricultural aircraft operations.[16] The SIR focused, in part, on the impact of meteorological towers and guy wires, which are cables designed for the support of towers or other structures, on agricultural aircraft operations and reiterated NTSB recommendations A–13–16 and A–13–17. The NTSB concluded that in some of the accidents, the pilot was not previously aware of, and did not see, the obstacle in time to avoid the collision because the obstacle was not visually conspicuous. The report noted the multiple attention demands for pilots engaged in agricultural operations. For instance, pilots must operate the spray application per the instructions of the particular applied substance while simultaneously maneuvering the aircraft at low altitude. In other cases, the pilot knew about the obstacle, having seen it in a previous pass, a survey flight, or during a previous close call, but nevertheless misjudged the aircraft's distance from, and collided with, the obstacle.

The NTSB concluded that these accidents show that obstacle collision risk management requires a multi-faceted approach. In addition to making meteorological towers more visually conspicuous, the NTSB suggested pre-flight planning that would allow a pilot to learn of any structures in the area of their planned operations to reduce the risk of an obstacle collision. Pilots learn of obstacles from many sources, including local residents, area maps (both paper and electronic) that depict obstacles, and ground surveys. The SIR concluded that additional meteorological tower collisions resulting in loss of life would occur without requiring registration, marking, and the creation of a publicly accessible national meteorological tower database.

C. The 2011 Voluntary Meteorological Tower Marking Policy Statement

On January 5, 2011, in response to concerns from agricultural operators over the safety risk of low-flying operations in remote and rural areas and a November 16, 2010, meeting with representatives from the National Agricultural Aviation Association (NAAA) to discuss safety-specific concerns of the aerial application industry, the FAA published a proposed policy statement that recommended voluntary marking of meteorological towers under 200 feet AGL.[17]

The FAA published the final policy on June 24, 2011,[18] and included voluntary marking guidance in AC 70/7460–1L.[19] The FAA continues to modify its voluntary marking criteria in AC 70/7460–1.

D. State Requirements Related to Marking of Meteorological Towers

In the absence of a nationwide requirement for marking meteorological towers, at least sixteen states adopted meteorological tower marking and notice requirements.[20] As a result of individual state requirements, marking and lighting requirements are inconsistent across states and may conflict with FAA AC 70/7460–1 marking requirements, which Congress mandated the FAA to adopt for marking standards.

For example, Colorado [21] requires that certain towers over 50 feet in height be marked and painted or otherwise constructed to be visible in clean air during daylight hours from a distance of not less than 2,000 feet. Colorado requires towers be painted in equal alternating bands of aviation orange and white, beginning with orange at the top of the tower. Additionally, Colorado also requires the attachment of one marker ball to the top third of each outside guy wire and that guy wires have seven-foot-long safety sleeves at each anchor point that extend from the anchor point along each guy wire attached to the anchor point.

Additional states have similar requirements. Wyoming [22] stipulates that any structure that meets the criteria must be marked in a manner that makes the tower recognizable in clear air during daylight hours from a distance of at least 2,000 feet. South Dakota's law [23] mandates that any meteorological tower of 50 feet or more, including the tower, guy wires, and accessory facilities, located outside the boundaries of a municipality must be marked, painted, flagged, or otherwise constructed to be recognizable in clear air during daylight hours. While some similarities exist between these requirements, they are not consistent with FAA AC 70/7460–1 and, considering Colorado's

[19] AC 70–7460–1L, effective December 4, 2015.

[20] As of January 2022, the FAA identified 16 states with marking requirements applicable to meteorological towers: California, Colorado, Idaho, Kansas, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, North Dakota, Oklahoma, South Dakota, Texas, Washington, and Wyoming.

[21] Colorado Revised Statutes 43–10–117.

[22] Wyo. Stat. Ann. § 10–4–305.

[23] SDCL § 50–9–13.

requirements, are also inconsistent across three shared state lines.

In addition to inconsistent marking requirements, state laws for filing notice of existing, new, and dismantled meteorological towers vary across state lines. Only five states require notice of current meteorological towers, only nine require notice of planned construction for new meteorological towers, and only six require notice of dismantled meteorological towers. The notice requirements directed by states are inconsistent with what the FAA proposes to standardize.

In response to the inconsistent state marking standards, the FAA sent the National Association of State Aviation Officials (NASAO) a letter in 2011.[24] The letter reminded the association that the Federal Government occupied the entire field of airspace management and aviation safety, preempting state and local regulation related to the marking and lighting of structures for aviation safety purposes. The FAA is vested with plenary authority to regulate the use of the airspace as necessary to ensure the safety of aircraft and the efficient use of airspace.[25]

E. Statutory Mandates

Section 2110 of FESSA, revised by section 576 of FAARA, requires either the marking of covered towers as defined in section 2110, which includes meteorological towers, consistent with AC 70/7460–1L or their inclusion within a database, except for meteorological towers. Section 2110 requires all meteorological towers be marked and included in a database. Congress also mandated that the database conform to additional provisions to ensure data security and accuracy.

Section 355 of the FAA Reauthorization Act of 2024 requires that the FAA publish an NPRM within one year of the date of enactment of the 2024 Act.

F. Industry Engagement

The NAAA expressed concerns to the FAA regarding the visibility of meteorological towers less than 200 feet AGL not currently subject to notice requirements, stating that these towers are particularly hazardous to pilots of low-flying aircraft in remote and rural areas.[26] The NAAA referenced its 2019 survey [27] and reported that agricultural operators and pilots considered power lines, communication towers, and meteorological towers as the top three occupational hazards. Additionally, 52 percent of the respondents encountered a wind turbine or an unmarked meteorological tower when making aerial applications.

The NAAA continues to urge the FAA to expand tower marking guidance to include all guy wire and freestanding towers more than 50 feet in height. Further, NAAA asked the FAA to require tower marking and lighting, if feasible.

G. The 2022 Airborne Wind Energy Systems Policy Statement

As noted previously, on December 7, 2011, the FAA published the Notification for Airborne Wind Energy Systems (AWES) notice of policy and request for information in the **Federal Register**.[28] The 2011 notice established policy related to airborne wind energy systems. The 2011 notice also stated that given the altitudes in which airborne wind energy systems can operate and their operating characteristics, the FAA concluded that they should be studied and the potential impacts to the navigable airspace must be identified and addressed.

Accordingly, in the 2011 notice the FAA announced that the provision of part 77 will apply to temporary airborne wind energy systems proposals for data collection purposes. At that time, the FAA found that it could apply the provisions of 14 CFR part 77 to these ''structures'' without the need to amend the regulations. The FAA stated that permanent and operational airborne wind energy systems may be addressed in the future, once further evaluations and risk assessments are performed.

To facilitate the timely manner in which airborne wind energy systems proposals were reviewed, the FAA, in the 2011 proposal, requested airborne wind energy systems developers and operators to limit temporary operations to the following:

(1) Airborne operations of airborne wind energy systems should be temporary in nature for testing and data collection purposes only;

(2) Single airborne wind energy system devices only (*e.g.,* no ''farms'' or multiple simultaneous testing);

(3) Airborne wind energy systems should be limited to a single fixed location (*e.g.,* no mobile ground facilities);

(4) Testing is confined to heights at or below 499 feet AGL;

(5) Airborne flight testing of airborne wind energy systems will only occur during daylight hours; and,

(6) Airborne wind energy systems will be made conspicuous to the flying public.

The FAA sought comments on revising its policy regarding the application of 14 CFR part 77 to airborne wind energy systems. In addition, the notice requested information from airborne wind energy system developers and the public related to these systems so that the FAA could comprehensively analyze the airborne wind energy systems and their integration into the NAS.

On December 23, 2022, the FAA published the Airborne Wind Energy (AWES) Policy Statement in the **Federal Register** in response to the 2011 statement.[29] The 2022 policy summarized and discussed the comments received in response to the 2011 notice. In the 2022 policy statement, the FAA amended the policy set forth in the 2011 notice and stated it will consider part 77 applications for all airborne wind energy systems, including permanent and operational systems. Those entities proposing construction of an AWES that exceeds the parameters in § 77.9 (*e.g.,* an airborne wind energy system constructed at more than 200 feet AGL at its site) must file advance notice with the FAA.

III. The Proposed Rule

A. Requirements Related to Meteorological Towers

1. Definition of Meteorological Tower (§ 77.3)

The FAA proposes to define a meteorological tower in § 77.3 as ''a skeletal or pole-type structure, either freestanding or anchored with guy wires, configured with components to measure wind speed and wind direction at different heights above ground level to assess local wind energy resources.'' The proposed definition incorporates skeletal or pole-type structures, common elements of meteorological towers. There are single tower masts, self-supporting antenna towers, guyed telescopic towers, or telescopic un-guyed towers that can rapidly deploy to heights more than 100 feet AGL. There are also stand-alone towers that do not

[29] Airborne wind Energy System (AWES) Policy Statement, 87 FR 78849 (Dec. 23, 2022).

use guy wires, all of which are covered by this definition.

The definition encompasses permanent and temporary meteorological towers, freestanding meteorological towers, and meteorological towers with guy wires due to the see and avoid safety risks they each pose. Under this proposed definition, the FAA would identify where these towers are located, publish the locations in a database, and have them marked where appropriate in an effort to increase safety at lower altitudes. Temporary towers can be erected in a matter of hours, creating an unexpected safety risk for pilots, even for those familiar with the area. The FAA is including meteorological towers with guy wires, which are freestanding structures with a tensioned cable designed to add stability because, depending upon the materials used, the guy wires may be difficult to see in certain atmospheric conditions.

2. Notice Requirements for Proposed or Altered Meteorological Towers With the Highest Point of the Structure at Least 50 Feet AGL Up to and Including 200 Feet AGL at Its Site (§§ 77.7, 77.9(a)(2))

Consistent with current practice, the FAA would require a sponsor of a meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site to file notice pursuant to § 77.7 before the start of construction or alteration or the date of application for a construction permit for any new meteorological tower, whichever is earlier.[30] Specifically, the sponsor would be required to electronically complete and submit FAA Form 7460–1, Notice of Proposed Construction or Alteration, or FAA Form 7460–2, Notice of Actual Construction or Alteration, via the internet at *https://oeaaa.faa.gov.* Except under limited circumstances, a sponsor required to provide notice would be required to submit FAA Form 7460–1 at least 45 days before the start date of the proposed construction or alteration, or the date an application for a construction permit is filed, whichever is earlier.

The FAA proposes to add a new paragraph (a)(2) to § 77.9 to require notice of the construction or alteration of meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site in order to allow for the tower's inclusion within the FAA's publicly available database; additional study of the structure pursuant to part 77; and the marking of those towers.

[30] § 77.7(a) and (b).

The FAA would also add a new § 77.5(d) to make clear that a sponsor proposing any construction or alteration of a meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site must provide adequate notice to the FAA of that construction or alteration pursuant to § 77.7(b).

If the FAA does not receive a notice, it cannot study the structure or include it in the FAA's public (DOF) database.[31] If the FAA does not include in its DOF database a meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site, operators of low-flying aircraft, including agricultural operators or first responders, may not be aware of the locations of the same. This proposal would direct sponsors to file notice and provide detailed information concerning meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site. Filing notice would enable the FAA to provide this information to the public via a publicly available database. Pilots of agricultural and other low-flying aircraft operators (*e.g.,* emergency medical services aircraft, firefighting aircraft, utility patrol and maintenance aircraft, fish and wildlife service aircraft, aerial survey aircraft, and military aircraft) would have the ability to obtain this information for preflight planning purposes pursuant to § 91.103, which requires each pilot in command to become familiar with all available information concerning that flight.

While markings are critical features that assist pilots of low-flying aircraft to see obstacles in their flightpath, the FAA concludes it is crucial to provide a database of known obstacles for pilots to use during flight planning to increase pilots' situational awareness. Given the number of competing elements for pilot attention during low-altitude flight, whether during routine operations or when experiencing an in-flight anomaly or emergency with limited time to respond safely, a database providing the accurate locations of meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site may reduce the risk of collision accidents to low-flying aircraft. To include meteorological towers in the database for public and pilot awareness, sponsors must file notice with the FAA. Therefore, the FAA determined it is appropriate to propose to amend the current provisions of part 77 to require all sponsors of newly constructed and altered meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site to file advance notice with the FAA on a mandatory basis.

Expanding the existing notice requirement to include existing meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site would also enable the FAA to conduct an aeronautical study. The FAA may issue a part 77 determination. If the FAA issues a determination, pursuant to § 77.12, the FAA would only issue recommended conditions and limitations.

The FAA is proposing notice of meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site. The FAA considered proposing to require notice of a meteorological tower at any height but determined that such a proposal would be unnecessarily broad based on accident data specific to meteorological towers. The FAA excluded towers under 50 feet AGL from this rulemaking as the risk of inadvertent collision is minimal due to the low number of operations that occur at those altitudes. Outside of takeoff and landing as well as crop dusting, few operations occur below 50 feet AGL. Finally, from the data provided by the NTSB, none of the accidents they investigated occurred below 50 feet AGL.

3. Notice Requirements for Existing Meteorological Towers Constructed With the Highest Point of the Structure at Least 50 Feet AGL Up to and Including 200 Feet AGL at Its Site (§§ 77.7(d) and 77.9(b))

Existing meteorological towers with a height at or below 200 feet AGL generally do not meet notice criteria in § 77.9 unless they exceed an imaginary surface or are constructed on an airport under current § 77.9(b) and (d).[32] The

[31] The FAA may include some structures or obstacles on aeronautical charts. In cases where a structure is charted and noted in the FAA database, pilots are responsible for entering the relevant location information in their navigation system. Although Global Positioning System (GPS) equipment is not required by the FAA for visual flight rules (VFR) flight, the FAA believes that most agricultural operators equipped their aircraft with GPS, based on a 2019 NAAA industry survey. This survey also showed that 99% of respondents reported that they use a GPS device for swath guidance. A GPS display can also show the pilot the aircraft's location when the spray was turned on or off and can enable the marking of boundaries, obstacles, and other user-defined inputs.

[32] Some sponsors of meteorological towers with a height less than 200 feet AGL submitted voluntary notifications to the FAA. Because these structures do not meet or exceed the current notification requirements in part 77, the FAA issued a

Continued

FAA proposes amending § 77.7 by adding paragraph (d) and adding § 77.9(b), requiring sponsors of existing meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site to file notice with the FAA within 90 days of the effective date of a final rule. As proposed in § 77.7(d), sponsors would be required to complete and submit notice of existing towers electronically via the internet at *https://oeaaa.faa.gov* using FAA Form 7460–1.

The FAA intends to require the sponsors of any existing meteorological tower, whether in use or not but still standing, to provide the FAA notice of its existence. The FAA determined that existing meteorological towers at the same heights will continue to pose an undue risk to low-flying aircraft unless sponsors file notice with the FAA or dismantle the tower. Upon receiving a notice as proposed, the FAA would create a public record of the meteorological tower in the DOF database, detailing the tower's location, height, and marking or lighting. This database inclusion would ensure availability of the most current information available for pilots to use in preflight planning.

The FAA considers 90 days as a reasonable time for industry to file notice of existing meteorological towers because it will allow for sponsors to dismantle any temporary towers and for the sponsors to gather information. The purpose of requiring existing towers to file is to ensure inclusion of these towers in the FAA's publicly available database as soon as practicable.

The proposed amendment would also subject existing meteorological towers to the provisions in subparts C and D of part 77, such as the requirement to notify the FAA when the structure is abandoned or dismantled in accordance with current § 77.11 (proposed § 77.10). Including these subparts would ensure the FAA's ability to remove the structure from its database when supplemental notice is received by the FAA, thereby increasing the accuracy of information provided to the public.

The FAA also proposes to revise § 77.5(e) to make clear that the FAA would use the notice provided by a sponsor to evaluate the effect of a meteorological tower in existence before the effective date of a final rule on safety in air commerce and the efficient use and preservation of the navigable airspace and of airport traffic capacity at public use airports. The notice would also be used by the FAA to determine whether the effect of a meteorological tower in existence before the effective date of a final rule is a hazard to air navigation. The FAA will study these notices, and the FAA may issue a part 77 determination. If the FAA issues a determination, pursuant to § 77.12, the FAA would only issue recommended conditions and limitations.

Amending part 77 to require notice from sponsors of existing meteorological towers constructed at least 50 feet AGL up to and including 200 feet AGL at their sites, regardless of location, would reduce the potential collision risk with unmarked meteorological towers or their guy wires for pilots of low-flying VFR aircraft. If the FAA adopts the proposed amendment, a pilot or operator would be able to search the FAA's public database, access meteorological tower pertinent information for preflight planning purposes, and input the information into their GPS system (if equipped) to provide additional situational awareness of the tower while airborne.

With this data, agricultural and other low-flying aircraft operators could better manage the risk associated with potential obstacle collisions by exercising pre-flight planning procedures. For that reason, it is particularly important that pilots engaged in low-flying aircraft operations routinely check the FAA's public DOF database for use during pre-flight planning to confirm existing structures or identify new structures where they plan to operate. The FAA urges pilots to use GPS systems to track all obstructions contained in the database. Similarly, the FAA recommends that pilots incorporate obstacle analysis tasks into preflight planning to identify obstacles before conducting survey flights of the area. In fact, the NTSB noted that ''pilots involved in collision accidents in 2013 reported that they performed survey flights but did not see the obstacles that the aircraft eventually hit.'' [33]

B. Partial Implementation of the FESSA

1. Meteorological Towers

The FAA proposes to partially implement section 2110 of FESSA, as amended by section 576 of FAARA of 2018. Section 2110 requires the FAA to have all ''covered towers'' marked consistent with applicable guidance in the advisory circular of the FAA issued December 4, 2015 (AC 70/7460–IL) or entered into a database (meteorological towers must be marked and entered into a database). Congress defined a covered tower as a meteorological tower, self-standing tower, or tower supported by guy wires and ground anchors with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site that meet certain criteria. The FAA is not proposing to require all self-standing towers or all towers supported by guy wires and ground anchors with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site to be marked or be included in a database. The data from the NTSB show that very few accidents involve self-standing towers or towers supported by wires and ground anchors with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site that do not also involve a meteorological tower or a tower that supports electric utility transmission or distribution lines, the latter of which section 2110 excludes. Due to the minimal number of accidents involving towers not excluded by section 2110, the FAA is proposing to limit the tower marking and database requirements to meteorological towers.

Section 2110 sets forth criteria that narrows which towers are considered covered towers. Specifically, Congress stated that a tower should be captured if it meets the following:

- Is 10 feet or less in diameter at the above ground base, excluding concrete footing;
- Has accessory facilities on which an antenna, sensor, camera, meteorological instrument, or other equipment is mounted; and,
- Is located on land that is in a rural area and used for agricultural purposes or immediately adjacent to such land.

The FAA captures these towers but, because the NTSB data demonstrated the majority of the incidents involved meteorological towers regardless of equipment, diameter, or location, expanded its definition to include meteorological towers of all sizes, equipage, and location.

Section 2110 also sets forth those towers that are not considered covered towers. NTSB data demonstrated that the majority of the incidents involved meteorological towers regardless of equipment, diameter, or location. As such, in order to improve safety, the FAA is not proposing to adopt the following exclusions:

- Is adjacent to a house, barn, electric utility station, or other building;
- Is within the curtilage of a farmstead or adjacent to another building or visible structure; or,

Determination of No Hazard without any marking and/or lighting conditions. However, the FAA encourages sponsors to voluntarily comply with marking and lighting standards in FAA AC 70/7460–1.

[33] NTSB/SIR–14/01.

• Is located within the right-of-way of a rail carrier, including within the boundaries of a rail yard, and is used for a railroad purpose.

The FAA is also proposing to not include the following exclusion for towers:

• Has already mitigated any hazard to aviation safety in accordance with FAA guidance or as otherwise approved by the FAA Administrator.

Congress mandated that meteorological towers be entered into a database as well as marked. As supported by NTSB data, the entry into a database via notice to the FAA would ensure aircraft operators are aware in advance of the location of the towers. As such, the FAA is not proposing to exclude these towers if they are independently marked or if the FAA receives notice of a tower to enable inclusion within the FAA's database. Moreover, the FAA wants the opportunity to study each tower and to assess the proper marking and potential lighting requirements. The FAA also wants to be kept abreast of any changes. Without covering these meteorological towers, the FAA will not be able to make an independent assessment about what terms and conditions should apply to ensure safety and the sponsor would not be subject to the ongoing obligations to update the FAA.

This proposal also would not implement section 2110's requirement that sponsors mark meteorological towers that exist at the time of the final rule's effective date. The FAA would require that sponsors of existing meteorological towers file notice with the FAA within 90 days of the effective date of a final rule using FAA Form 7460–1. These notices would enable the FAA to study those towers. Existing meteorological towers at least 50 feet AGL up to and including 200 feet AGL are required to file notice with the FAA within 90 days of the effective date of a final rule. The FAA will study these notices, and the FAA may issue a part 77 determination. If the FAA issues a determination, pursuant to § 77.12, the FAA would only issue recommended conditions and limitations. If a sponsor alters an existing tower, the FAA proposes to then impose marking requirements. The FAA is not proposing to impose retroactive marking requirements as existing towers would already be in the DOF to alert aircraft operators of their presence, sponsors will have marking recommendations, and sponsors will be required to mark a tower if the tower is altered or file notice when dismantling a tower so the FAA may remove it from the DOF database. Finally, in the interest of safety, the FAA is not including section 2110's exclusion and waiver provisions in this proposal due to the need for all meteorological towers at least 50 feet AGL up to and including 200 feet AGL at their sites to be studied and added to the DOF.

The FAA proposes to implement only those provisions of section 2110 applicable to meteorological towers supported by safety data and aviation accidents involving meteorological towers with the highest point of the structure below 201 feet AGL. However, this limitation does not address the risk to the larger population of low-flying aircraft operators identified by NTSB that the FAA seeks to mitigate with this proposal, including the risk to helicopter emergency medical services, law enforcement, animal damage control, fish and wildlife surveys, and aerial fire suppression.[34] The FAA agrees with NTSB that the demonstrated risk to low-flying aviation, as a whole, posed by unmarked meteorological towers justifies requiring notice of meteorological towers regardless of location.[35] The proposal also partially addresses NTSB's 2013 safety recommendations A–13–16 and A–13–17, issued in 2013. In sum, it would provide the FAA with information that will improve the safety of low-flying aircraft.

Newly filed proposed and altered meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at their sites would be subject to the marking requirement. Meteorological towers can come from the manufacturer painted, reducing the burden of painting the structure after delivery. Dismantling an existing tower to paint it would be costly, considering the average deployment of one to three years. Regardless of marking, the existing towers would be included in the database.

2. Database

The FAA plans to partially implement section 2110's database requirement without making regulatory changes beyond those already discussed. Section 2110 requires the FAA to develop or utilize an existing database that contains the location and height of covered towers and to keep the database current to the extent practicable. The agency also must ensure that any proprietary information in the database is protected from disclosure in accordance with law. In addition, the FAA Administrator must ensure that, by virtue of accessing the database, users agree and acknowledge that information in the database may only be used for aviation safety purposes and may not be disclosed for purposes other than aviation safety, regardless of whether or not the information is marked or labeled as proprietary or with a similar designation. Further, the section directs the FAA to ensure that tower information in the database is de-identified and that the information only includes the location, height, and presence of guy wires. The FAA must ensure the information in the dataset is encrypted at rest and in transit and is protected from unauthorized access and acquisition. Additionally, the FAA must ensure registration of towers, database inclusion of proposed towers before construction, and database availability for pilots who intend to conduct low-altitude operations so they may consult the database before flight operations. Lastly, section 2110 states that the database must be available for use within 1 year of the effective date of the rule. The FAA plans to use the existing OE/AAA system to partially implement section 2110's database requirement. The FAA would include any structure filing notice under current regulations, those giving notice pursuant to proposed changes applicable to meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site, and wind turbines in the database.

The existing OE/AAA system meets section 2110's general intent to make information concerning structures that may pose a hazard to aviation available to the flying public. The available data includes structure type, location, latitude, longitude, height, elevation, marking, lighting, and proximity to the nearest town and airport. The information available on the OE/AAA website [36] depicts accurate information received from filed notices of proposed structures that require issuance of an FAA determination.[37]

Although pilots can search for known meteorological towers on the OE/AAA website without having a user account, any interested party can register for, and establish, a user account. Once registered, the interested party can subscribe to receive email notifications

[34] *https://www.ntsb.gov/safety/safety-recs/RecLetters/A-13-016-017.pdf.*

[35] NTSB accident number SEA04LA027 (December 15, 2003): Accident when an aircraft operating for personal flight collided with an unmarked meteorological tower (164 feet AGL).

[36] *https://oeaaa.faa.gov.*

[37] The FAA conducts studies on more than 100,000 structures annually. However, the database is limited to those structures located in close proximity to a public-use airport.

when the FAA receives a request for obstacle construction or modification within a geographic area defined by the user. The OE/AAA website also provides a tool that allows a user to find all obstacles of notice received within a user-defined radius from a location. Source information for this tool comes from a combination of the notices of proposed construction or alteration submitted to the FAA's Obstruction Evaluation Group and the DOF.[38]

Consistent with section 2110, the FAA would update the system to include meteorological towers and create an ability to search for known meteorological towers via the FAA's public OE/AAA website. This update would allow pilots to obtain a list of meteorological towers by location (*e.g.,* state) from the FAA's database. As proposed, filers would also be required to notify the FAA if the structure is dismantled or abandoned [39] to enable the FAA to update its database. In addition, the FAA would add disclaimers to the site consistent with section 2110 to reflect the limits on the use of the available information for aviation safety purposes, and that the information may not be disclosed for purposes other than aviation safety, regardless of whether the information is marked or labeled as proprietary or with a similar designation. The FAA intends to modify the OE/AAA system to coincide with the effective date of the final rule.

The FAA would maintain and update the existing OE/AAA system to meet the objectives of section 2110. This would fully address NTSB 2013 safety recommendation A–13–17. Section 2110's requirement to ensure pilots conducting low-altitude operations consult the relevant parts of the database is outside the scope of this rulemaking and falls under 14 CFR part 91. The FAA recommends that pilots use the DOF database to obtain the most up-to-date information prior to flight.

3. Exclusion and Waiver Authorities

Section 2110 authorizes the FAA administrator to exclude a class, category, or type of tower that is determined to not pose a hazard to aviation safety after public notice and comment. It also directs the FAA to establish a process to waive specific towers from marking requirements if the agency determines the tower does not pose a hazard to aviation safety. Section 2110 requires the Administrator to consider specific factors that may mitigate risk and to consider excluding towers located in a state that has enacted tower marking requirements. As explained earlier, the FAA is limiting this proposal to those towers for which it has accident data to support the regulation. In this case, the proposal applies to meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site. Because the agency determined the expanded definition of a covered tower would include those that do not pose a hazard to aviation safety given the FAA has no accident data involving these structures, the FAA would exclude other structures (a self-standing tower or tower supported by guy wires and ground anchors) meeting the section 2110 definition of a covered tower.

Section 2110 requires the Administrator to consider specific factors that may mitigate risk and to consider excluding towers located in a state that has enacted tower marking requirements. As explained above, the FAA issued a letter reiterating that the Federal Government occupies the entire field of airspace management and aviation safety, preempting state and local regulation related to the marking and lighting of structures for aviation safety purposes. The FAA is vested with plenary authority to regulate the use of the airspace as necessary to ensure the safety of aircraft and the efficient use of airspace.

C. Wind Energy Systems

1. Definition of Wind Energy System and Airborne Wind Energy System (§ 77.3)

The FAA proposes to define a wind energy system in § 77.3 to mean ''structures that convert kinetic energy in the wind to electrical energy. A wind energy system may consist of a single structure or a group of structures.'' This definition is inclusive of all wind energy systems (*e.g.,* airborne wind energy systems (AWES) or wind turbines generally composed of a horizontal turbine nacelle, mounted on a fixed vertical structure or tower or AWES). This definition would provide additional clarity and context for the proposed changes directed exclusively at wind energy systems.

Further, the FAA proposes to define ''airborne wind energy system (AWES)'' in § 77.3, consistent with the FAA's 2022 final notice of policy.[40] AWES would mean a structure, which consists of a self-supported airborne system tethered to a ground station, with an airborne or ground-mounted drivetrain used to convert kinetic energy in the wind to mechanical power for the purpose of generating electricity.

2. Proposal for 90-Day Advance Notice of Construction or Alteration of Wind Energy Systems (§ 77.7(c))

Currently, a sponsor must submit notice 45 days before the start date of the proposed construction or alteration, or the date an application for a construction permit is filed, whichever is earlier. The FAA proposes to add § 77.7(c) requiring sponsors to submit notice of the proposed construction or alteration of a wind energy system with a proposed height greater than 200 feet AGL at least 90 days before the start date of the proposed construction or alteration, or the date an application for construction or alteration permit is filed, whichever is earlier. The FAA would redesignate the provisions currently codified in §§ 77.7(c) and (d) as §§ 77.7(b)(1) and (2), respectively. As part of this proposal, the FAA would clarify that a meteorological tower is associated with a wind energy system when it is included in a wind energy systems project and is intended to be permanent. A meteorological tower is permanent when it is intended to remain in place for the duration of its lifecycle.

Due to the unique physical characteristics of wind energy systems, specifically wind turbine structures, their potential impact to communication, air navigation, and surveillance systems as well as the increasing number of proposals requiring an aeronautical study, the FAA requires additional time to conduct studies of wind turbines and determine potential NAS impacts. This proposal would realistically represent the time it currently takes the FAA to study these complex structures. Provided with a more realistic representation of the obstruction evaluation processes duration, sponsors can better plan their projects.

Wind energy system proposals are significantly more complex than other traditional structures, such as buildings, and more frequently require an in-depth study to analyze their potential effects on air navigation facilities and equipment. The FAA OE/AAA metrics confirm the duration of aeronautical studies for proposed wind turbines exceeds those for other structure types due to air traffic, communication, air navigation, and surveillance (*e.g.,* radar) considerations. While the FAA has made considerable progress in identifying mitigation solutions

[38] *www.faa.gov/air_traffic/flight_info/aeronav/digital_products/dof.*

[39] The FAA considers a structure dismantled when it is taken down and abandoned when a proposed structure is not built.

[40] Airborne Wind Energy Systems (AWES) Policy Statement, 87 FR 78849 (Dec. 23, 2022).

required to issue a Determination of No Hazard to Air Navigation for proposed wind turbines, the current 45-day notice requirement in § 77.7(b) does not allow the FAA adequate time to gather the data and model potential impacts of proposed wind turbine(s) on NAS air navigation facilities and equipment. Additionally, 45 days does not adequately represent the time required to work with the sponsor and identify mitigations necessary to complete the study.

The number of new wind turbine proposals processed by the FAA has increased substantially since the enactment of the Energy Policy Act of 2005 [41] that provided the Wind Energy Production Tax Credit to stimulate investment in wind energy. In 2004, the FAA received and conducted 3,030 wind turbine aeronautical studies. Since then, the FAA received an average of 21,148 wind turbine cases per year, with the highest being 33,396 cases in 2010. According to the Department of Energy's (DOE) 2015 *Wind Vision* Report,[42] which expands upon its 2008 report titled *20% Wind Energy by 2030,*[43] DOE continues to target wind energy as contributing to 20 percent of the U.S. electrical supply by 2030, compared to more than 4.5 percent at the time of publication. Per DOE data, wind electricity generation accounts for 8.4 percent of the total U.S. generation as of 2020.[44] Hence, the FAA expects the demand to evaluate proposed construction and altered wind energy systems will continue and may increase.

Furthermore, the proposed timeline would allow the FAA to request additional information from sponsors as needed for review per the proposed § 77.11 language. While sponsors of proposed wind turbines would provide earlier notification prior to construction or alteration, the FAA expects that the total time for review would remain the same as it does today. The benefits from potentially reducing any delays in construction would likely offset any costs associated with the sponsor providing earlier notification. The FAA also proposes to amend current § 77.7(c) (proposed to be redesignated as § 77.7(e)) by clarifying that the 90-day advance notice requirement applicable to wind turbines is also eligible for a waiver because of an emergency involving essential public services, public health, or public safety.

3. Proposal for Extended Effectiveness Period for Wind Turbine Determinations (§ 77.33(c))

The FAA proposes to amend § 77.33 by extending the effective period for a Determination of No Hazard involving wind turbines and any associated meteorological tower from 18 to 36 months. The FAA would redesignate the provision currently codified in § 77.33(c) as § 77.33(d).

Wind energy systems developers often file notice with the FAA years before their target date to begin construction. They file early to allow time to address environmental and other local land-use requirements, secure financing, acquire materials, and complete tests at proposed locations using meteorological towers to validate the potential benefits of a particular location. As a result, wind turbine project developers routinely ask the FAA for a one-time 18-month extension of the Determination of No Hazard to Air Navigation in accordance with the FAA regulations pursuant to § 77.35(c). However, even with an 18-month extension, the project may not be built within that 3-year period, causing the developer to refile notice with the FAA, essentially starting the process again. Extending the wind turbine determination period from 18 to 36 months would allow industry additional time to validate and begin projects.

Under the current § 77.33(b), each Determination of No Hazard to Air Navigation issued under part 77 expires 18 months after the effective date of the determination, unless extended, revised, or terminated. Due to the increasing size of individual wind turbines and the number of wind turbines needed to accomplish renewable energy goals, the duration to construct wind turbine farms can take considerably more time to construct than single structures. The 18-month effectiveness period is frequently insufficient to allow the sponsor enough time to complete construction, even with a one-time extension. In alignment with proposing to extend wind turbine determination periods, the FAA also proposes to extend determination periods for meteorological towers associated with a wind energy system project from 18 to 36 months. A meteorological tower is associated with a wind energy system when it is included in a wind energy systems project and is intended to be permanent. A meteorological tower is permanent when it is intended to remain in place for the duration of its lifecycle.

D. Other Clarifications Related to the Filing of Notice (§§ 77.10, 77.11, 77.27)

The FAA proposes to redesignate § 77.11 as § 77.10 and amend it to identify the form, FAA Form 7460–2, Notice of Actual Construction or Alteration, sponsors currently use to provide supplemental notice. The revision also makes clear that a sponsor must file supplemental notice if otherwise requested by the FAA.

The FAA proposes to add a new § 77.11 to affirmatively require that if the FAA requests additional information during any part of the aeronautical study process, pre- or post-determination, the sponsor must provide that information within 30 days. The FAA needs this information to conduct complete aeronautical studies and issue accurate determinations.

The FAA proposes to revise § 77.27 to clarify when the FAA would conduct an aeronautical study. Specifically, the FAA will conduct an aeronautical study when: (1) notice required under § 77.9 has been received, or (2) the FAA determines a study is necessary. All other notices filed by the public outside of these parameters, meaning notice is neither requested by the FAA nor required under § 77.9, will be screened within the automated OE/AAA system and, if appropriate, provided an electronic letter response that indicates that no notice is required for the said proposal or alteration, and thus the FAA has no objections to the proposal at this time. This process would reduce the workload burden on the FAA and still provide the public with documentation for local and state requirements at an accelerated rate.

E. General Changes

The FAA proposes to add § 77.12 to formalize the FAA's requirement for sponsors of structures, except for structures that have received an FAA Determination of No Hazard to Air Navigation prior to the effective date of a final rule or any meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site for which construction is complete prior to the effective date of a final rule, to comply with the conditions and limitations contained in a Determination of No Hazard to Air Navigation. The FAA provides conditions and limitations, including marking, in its determinations. Currently, the FAA recommends that sponsors conform with the standards in the AC 70/7460–1. In this rulemaking, the FAA is clarifying that the conditions and

[41] Public Law 109–58, 119 Stat. 594 (Aug. 8, 2005).

[42] *https://www.energy.gov/eere/wind/wind-vision.*

[43] *https://www.energy.gov/eere/wind/20-wind-energy-2030-increasing-wind-energys-contribution-us-electricity-supply.*

[44] *https://www.eia.gov/energyexplained/wind/electricity-generation-from-wind.php.*

limitations themselves are mandatory except for structures that have received an FAA Determination of No Hazard to Air Navigation prior to the effective date of a final rule or any meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site for which construction is complete prior to the effective date of a final rule. This clarifying amendment is necessary to eliminate safety risks that were identified as a result of previous instances of non-compliance. Consistent application of marking requirements ensures the pilot's ability to properly recognize the obstructions and mitigate risk.

Each newly constructed or altered meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site would receive conditions and limitations that include, at a minimum, marking requirements based upon AC 70/7460–1. Under the current part 77, proposed structures that meet notice criteria are subject to an FAA aeronautical study to assess potential impacts on the NAS. When the FAA completes an aeronautical study and issues a determination to the sponsor of a proposed or altered structure, the determination would contain conditions and limitations that include, at a minimum, marking requirements for meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site.

Part 77 does not currently require marking unless recommended by an aeronautical study. Current meteorological towers taller than 200 feet AGL fall under the current regulatory scheme requiring notice, an aeronautical study, and implementation of any FAA-specified risk-mitigation measures. If adopted, the FAA's new rule would require the marking of all proposed and altered meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site in accordance with AC 70/7460–1. Meteorological towers can be erected in a matter of hours. As such, an operator who is familiar with the terrain may unexpectedly encounter a temporary structure. Moreover, depending on the materials used, a meteorological tower may be difficult to see in certain atmospheric conditions. The FAA determined that marking, such as painting towers, adding marker balls or sleeves to guy wires, and, if warranted, lighting new or altered meteorological towers would enhance their conspicuity to pilots who operate at low altitudes, such as agricultural operators, thereby reducing the likelihood of incidents and accidents.

Moreover, although the states discussed in section III.D of this preamble have notice and marking requirements similar in some aspects to this FAA proposal, a NAS-wide application of standards will increase aviation safety, especially for those pilots operating at lower altitudes across state lines where meteorological tower standards may be inconsistent. Consistency may reduce confusion and increase a pilot's ability to see and avoid obstacles, either visually or with onboard electronics, regardless of what state they are flying in. The FAA proposed § 77.32 to codify the existing process contained in the AC 70/7460–1 for requesting modifications to the marking and lighting conditions and limitations. The FAA is updating the process for requesting a deviation by requiring a sponsor to submit FAA Form 7460–1 in the OE/AAA system for processing. The FAA is making this change to standardize the approval process. The proposed § 77.32 would codify this updated process. This change would be necessary if the conditions and limitations become requirements as proposed in this NPRM so that sponsors have a mechanism to seek changes to the requirements after the issuance of a determination.

The FAA proposes to define ''sponsor'' in § 77.3 as the owner of a structure for which notice is required under part 77. This would clarify the person that is required to provide the FAA with notice and is responsible for meeting the requirements of this proposed rule. A sponsor may allow a legally designated representative to fulfill the notice or other part 77 requirements on their behalf; however, the FAA must receive proper notice on the forms submitted to the FAA.

The FAA proposes to revise references to ''Airport/Facility Directory, Alaska Supplement, or Pacific Chart Supplement'' to ''Chart Supplement U.S., Chart Supplement Alaska, or Chart Supplement Pacific'' throughout part 77 for consistency with the publications' current name.

The FAA proposes to change all references throughout part 77 from ''marking and lighting recommendations'' to ''marking and lighting requirements'' for consistency with proposed § 77.12.

Throughout the sections proposed to be revised in this NPRM (including §§§ 77.29(b), and 77.35(a) and (c)(1) through (3)), the FAA proposes to change references from ''you'' to ''sponsor'' to clarify to whom ''you'' refers.

F. Proposed Effective Date

The FAA proposes to make these changes effective 30 days after the final rule is published in the **Federal Register**. This rule would also require sponsors of existing meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site to file notice within 90 days of the final rule's effective date pursuant to § 77.9.

IV. Agency Guidance

If this rule is finalized as proposed, the FAA would make changes to FAA AC 70/7460–1 to reflect that all conditions and limitations in a Determination of No Hazard to Air Navigation are mandatory pursuant to § 77.12, including marking requirements for meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site, except for structures that have received an FAA Determination of No Hazard to Air Navigation prior to the effective date of a final rule or any meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site for which construction is complete prior to the effective date of a final rule. FAA AC 70/7460–1 marking standards would continue to be recommendations when not part of a determination.

The revised AC 70/7460–1 would direct sponsors to the most effective marking standards identified by the agency unless the FAA accepts an equally effective alternative. Revisions to AC 70/7460–1 would contain the most effective painting and marking approaches identified by the FAA. For instance, meteorological towers would need to use spherical markers or cable balls, sleeves, and the identified painting scheme unless the sponsor presents an equally effective alternative accepted by the FAA. The AC would direct sponsors of newly proposed meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site to comply with existing painting standards establishing color and pattern requirements. The AC would also suggest placing a total of 8 high-visibility aviation orange spherical markers or cable balls, 4 attached to guy wires at the top of the tower no further than 15 feet from the top wire connection and 4 at or below the mid-point of the structure on the outer guy wires. The AC would also suggest the placement of two high-visibility sleeves

on each guy wire, one as close to the anchor point as possible and a second midway between the lower sleeve and the connection between wire and tower. The guidance would explain that sponsors may present alternate marking approaches should the FAA deem them equally effective. A copy of the proposed revised AC has been placed in the docket for this rulemaking. The FAA seeks comments on this draft revised AC.

Finally, the FAA is updating the process for requesting a deviation from the marking and lighting standards in the AC during this rulemaking process.

V. Regulatory Notices and Analyses

Federal agencies consider impacts of regulatory actions under a variety of executive orders and other requirements. First, Executive Order 12866, Executive Order 13563, and Executive Order 14094 (''Modernizing Regulatory Review'') direct that each Federal agency propose or adopt a regulation only upon a reasoned determination that the benefits of the intended regulation justify the costs. Second, the Regulatory Flexibility Act of 1980 (Pub. L. 96–354) requires agencies to analyze the economic impact of regulatory changes on small entities. Third, the Trade Agreements Act (Pub. L. 96–39) prohibits agencies from setting standards that create unnecessary obstacles to the foreign commerce of the United States. Fourth, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) requires agencies to prepare a written assessment of the costs, benefits, and other effects of proposed or final rules that include a Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more (adjusted annually for inflation) in any one year. The current threshold after adjustment for inflation is $183 million, using the most current (2023) Implicit Price Deflator for the Gross Domestic Product. The FAA has provided a detailed Regulatory Impact Analysis (RIA) in the docket for this rulemaking. This portion of the preamble summarizes the FAA's analysis of the economic impacts of this rule.

In conducting these analyses, the FAA has determined that this rule: is not a ''significant regulatory action'' as defined in section 3(f)(1) of Executive Order 12866 as amended by Executive Order 14094; may have a significant economic impact on a substantial number of small entities; will not create unnecessary obstacles to the foreign commerce of the United States; and will not impose an unfunded mandate on State, local, or Tribal governments, or on the private sector.

A. Summary of the Regulatory Evaluation

Congress mandated that the FAA issue regulations to require marking of covered towers and inclusion of covered towers in a public database. The proposed rule would amend part 77 notice requirements as applicable to the construction or alteration of meteorological towers and wind turbines. The proposed rule responds to recommendations from the NTSB and aerial applicator organizations concerning fatal collisions between aerial applicators, private aircraft, and meteorological towers. The proposed rule also includes amendments that would allow the FAA to better study and determine potential impacts to the NAS from wind turbines.

Consistent with the direction provided in section 2110 of FESSA, the FAA proposes to add § 77.12 to require sponsors of new meteorological towers, constructed with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site, to mark the towers in accordance with the determination except for structures that have received an FAA Determination of No Hazard to Air Navigation prior to the effective date of a final rule or any meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site for which construction is complete prior the effective date of a final rule. The FAA notes that the 2018 FAA Reauthorization Act requires the marking of meteorological towers constructed within 18 months after the enactment of the statutory mandate, or when the database is completed, whichever is first. Therefore, in the proposed § 77.12, the FAA proposes to make the terms and conditions of a determination mandatory, which would include, at a minimum, sponsors to mark new or altered towers by the time construction is complete for meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site.

The primary costs of the proposed rule to industry would be the costs to mark new and altered meteorological towers. The estimated additional costs to mark new or altered towers is about $14,300. This cost includes equipment costs for marker balls and sleeves and installing them to new and altered towers, buying a new pre-painted tower, and dismantling a tower. This also includes the cost to provide the FAA notifications of both existing and dismantling of out-of-service meteorological towers. The FAA would process notifications of existing and new meteorological towers, including notifications of dismantled out-of-service meteorological towers. Processing these notifications would cost the FAA about $41 per existing notification and about $163 per dismantling notification. The primary benefit of the proposed rule would be enhanced conspicuity to prevent agricultural pilots from colliding with meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) of 1980 (5 U.S.C. 601–612), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121) and the Small Business Jobs Act of 2010 (Pub. L. 111–240), requires Federal agencies to consider the effects of the regulatory action on small business and other small entities and to minimize any significant economic impact. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The FAA is publishing this Initial Regulatory Flexibility Analysis (IRFA) to aid the public in commenting on the potential impacts to small entities from this proposal. The FAA invites interested parties to submit data and information regarding the potential economic impact that would result from the proposal. The FAA will consider comments when making a determination or when completing a Final Regulatory Flexibility Analysis.

Under Section 603(b) and (c) of the RFA, an IRFA must contain the following:

(1) A description of the reasons why the action by the agency is being considered;

(2) A succinct statement of the objective of, and legal basis for, the proposed rule;

(3) A description of and, where feasible, an estimate of the number of small entities to which the proposed rule will apply;

(4) A description of the projected reporting, recordkeeping, and other compliance requirements of the proposed rule, including an estimate of the classes of small entities that will be subject to the requirement and the type

of professional skills necessary for preparation of the report or record;

(5) An identification, to the extent practicable, of all relevant Federal rules that may duplicate, overlap, or conflict with the proposed rule; and

(6) A description of any significant alternatives to the proposed rule that accomplish the stated objectives of applicable statutes and which minimize any significant economic impact of the proposed rule on small entities.

1. Reasons the Action Is Being Considered

This rulemaking proposes to amend part 77 as it applies to the proposed construction or alteration of meteorological towers and wind energy systems. The proposed changes applicable to meteorological towers address safety recommendations from the NTSB and industry recommendations.

This proposal also partially implements the statutory requirements in section 2110 of FESSA. Specifically, the FAA proposes these amendments applicable to meteorological towers:

- Extend notice requirements to the proposed construction or alteration of meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site. Sponsors would be required to file a notice of construction with the FAA within the current timeframe in § 77.7(b); [45] and,
- Extend notice requirements to existing meteorological towers at least 50 feet AGL up to and including 200 feet AGL at its site. Sponsors would be required to file a notice with the FAA within 90 days of the final rule's effective date.

In addition, the FAA proposes the following amendments applicable to wind energy systems to clarify and accurately reflect circumstances unique to these structures:

- Require the earlier filing of notice for the proposed construction or alteration of wind energy systems. Notice would be due 90 days before, as opposed to the current 45 days before, the start date of the proposed construction or alteration, or the date an application for a construction permit is filed, whichever is earlier; and
- Increase the duration of a Determination of No Hazard to Air Navigation with regard to wind energy systems and associated meteorological towers proposals from the current 18 months to 36 months.

[45] Notice requirements for meteorological towers are necessary to give effect to section 2110 that requires inclusion of all meteorological towers in the FAA's public DOF database.

Finally, this proposed rule would make additional non-substantive changes to clarify agency practice as a result of the proposed substantive changes. These changes would:

- Amend purpose in § 77.1 to reflect that part 77 would include requirements for marking proposed meteorological towers;
- Define ''airborne wind energy system (AWES)'' in § 77.3 consistent with the FAA's 2022 final notice of policy. AWES would mean a structure, which consists of a self-supported airborne system tethered to a ground station, with an airborne or ground-mounted drivetrain used to convert kinetic energy in the wind to mechanical power for the purpose of generating electricity;
- Define ''sponsor'' in § 77.3 as the owner of a structure for which notice is required under part 77. This would clarify the person that is required to provide the FAA with notice and is responsible for meeting the requirements of part 77. A sponsor may allow a legally designated representative to fulfill the notice or other part 77 requirements on its behalf; however, the FAA must receive proper notice on the forms submitted to the FAA.
- Redesignate § 77.11 as § 77.10 and clarify the FAA's current practice with regard to supplemental notice. The proposed amendment also identifies the form (FAA Form 7460–2, Notice of Actual Construction or Alteration) sponsors currently use to provide supplemental notice.
- Add § 77.11 to require the sponsor to provide specific data to the FAA after filing a notice of construction when the FAA determines that additional information is necessary to properly complete an aeronautical study.
- Add § 77.12 to require all sponsors to comply with the conditions and limitations contained in their determination except for structures that have received an FAA Determination of No Hazard to Air Navigation prior to the effective date of a final rule or any meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site for which construction is complete prior to the effective date of a final rule. This would require, at a minimum, proposed or altered meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site to mark towers consistent with the conditions and limitations of the determination.
- Add § 77.32 to require sponsors to request a modification from the marking and lighting requirements in a determination to submit FAA Form 7460–1, Notice of Proposed Construction or Alteration.

2. Objectives and Legal Basis of the Proposed Rule

The FAA's authority to issue rules on aviation safety is found in 49 U.S.C. Subtitle I, section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is issued under the authority described in 49 U.S.C. 40103(b), which vests the administrator with broad authority to prescribe regulations to ensure the safety of aircraft and the efficient use of airspace, and 49 U.S.C. 44701(a)(5), which requires the Administrator to promulgate regulations and minimum standards for other practices, methods, and procedures necessary for safety in air commerce and national security. This rulemaking is also consistent with: the authority in 49 U.S.C. 44718(a), which directs the Secretary of Transportation to require a person to give adequate public notice of the construction, alteration, establishment, or expansion, or the proposed construction, alteration, establishment, or expansion, of a structure or sanitary landfill in furtherance of safety in air commerce and the efficient use and preservation of the navigable airspace and of airport traffic capacity at public-use airports; section 44718(b), which requires the Secretary to conduct an aeronautical study to decide the extent of any adverse impact on the safe and efficient use of the airspace, space navigation facilities, or equipment if the secretary decides that constructing or altering a structure may result in an obstruction of the navigable airspace or an interference with air navigation facilities and equipment or the navigable airspace; and section 44718(c), which requires that in carrying out laws related to a broadcast application and conducting an aeronautical study related to broadcast towers, the FAA Administrator and the FCC shall take action necessary to coordinate efficiently the receipt and consideration of, and action on, the application; and the completion of any associated aeronautical study. These proposed amendments to part 77, applicable to the construction or alteration of meteorological towers and wind energy systems, are within the scope of this authority.

Authority for this rulemaking is further derived from the FAA Reauthorization Act of 2018, section 576, which revised section 2110 of the

FAA Extension, Safety, and Security Act of 2016. Section 2110 requires that the FAA issue regulations to require the marking of meteorological towers. Moreover, section 2110 requires that all covered towers constructed on or after the date on which such regulations take effect be marked or included in the database. Further, the section requires the marking of meteorological towers and their inclusion within an FAA database. Section 2110 also directs the FAA to ''develop a database that contains the location and height of each covered tower [including meteorological towers];'' keep the database current to the extent practicable; and ensure that any proprietary information in the database is protected from disclosure in accordance with the law. This section also requires that by virtue of accessing the database, users agree and acknowledge that information in the database may only be used for aviation safety purposes and may not be disclosed for purposes other than aviation safety, regardless of whether the information is marked or labeled as proprietary or with a similar designation. Publication of this NPRM also satisfies the requirements in 355 of the FAA Reauthorization Act of 2024, which requires the FAA to publish this notice of proposed rulemaking within one year of the date of enactment of the 2024 Act.

3. Description and Estimate of the Number of Small Entities

The FAA used the definition of small entities in the RFA for this analysis. The RFA defines small entities as small businesses, small governmental jurisdictions, or small organizations. In 5 U.S.C. 601(3), the RFA defines ''small business'' to have the same meaning as ''small business concern'' under section 3 of the Small Business Act. The Small Business Act authorizes the Small Business Administration (SBA) to define ''small business'' by issuing regulations. SBA (2023) has established size standards for various types of economic activities or industries under the North American Industry Classification System (NAICS).[46] These size standards generally define small businesses based on the number of employees or annual receipts. Note that the SBA definition of a small business applies to the parent company and all affiliates as a single entity.

To identify small entities, the FAA first identified the primary NAICS of the parent company and then used data from different sources (*e.g.,* company annual reports, Bureau of Transportation Statistics, etc.) to determine whether the parent company meets the applicable size standard. Businesses affected by this rule are classified using the 2022 NAICS[47] under NAICS code 221115 ''Wind Electric Power Generation.'' This industry comprises establishments primarily engaged in operating wind electric power generation facilities. These facilities use wind power to drive a turbine and produce electric energy. The electric energy produced in these establishments is provided to electric power transmission systems or electric power distribution systems. The U.S. SBA defines entities in this industry as ''small''—those that employ fewer than 1,150 employees.[48] With limited information and incomplete data on employment sizes for each of the affected meteorological tower operators, the FAA is uncertain as to how many entities would meet the SBA's small-entity criteria. Furthermore, the FAA is uncertain as to how the burden associated with the proposed rule would be distributed across meteorological tower companies. The FAA requests comments and data on the average annual sales revenues for the affected small businesses and to what extent the costs would impact these entities.

For purposes of this IRFA, the FAA assumes that the private sector costs of this proposed rule would fall entirely on the sponsors of meteorological towers. In the absence of data on annual receipts specific to this industry, the FAA relies on the most recent data available on average revenues for all businesses classified under NAICS 221115 ''Wind Electric Power Generation'' from the 2017 Census Bureau's Statistics of U.S. Businesses (SUSB)[49] to inform the analysis. The data indicates 98 firms with 611 entities in this NAICS.

The proposed rule would affect sponsors, or legally designated representatives, of any proposed meteorological tower, altered meteorological tower, or existing meteorological tower if the highest point of the structure is at least 50 feet AGL up to and including 200 feet AGL at its site. From 2021 to 2023, 39 states submitted 391 voluntary new filings for proposed meteorological towers at least 50 feet AGL up to and including 200 feet AGL at its site to the FAA.

In the absence of more financial data from small entities and the profile of small entities, the FAA is unable to assess the proposed rule's economic impact on them.

4. Projected Reporting, Recordkeeping, and Other Compliance Requirements

In absence of more detailed data on small entities, it is difficult to estimate the number of meteorological towers they own. The FAA assumes that small entities own about two to five meteorological towers per entity. The below estimates the paperwork burden cost to file a notice with the FAA. The FAA estimates a sponsor of a new meteorological tower would incur $14,301 in additional costs per new tower due to the proposed rule.

New meteorological towers would have to be painted and marked. It likely is more economical to purchase a pre-painted meteorological tower, about an additional $2,800, instead of painting a non-marked tower. Eight marker balls costing about $2,000 and eight sleeves costing about $101 would have to be installed as part of the marking requirements.[50] The FAA assumes the installation cost per tower for the marker ball and sleeves to take four hours and cost $390.[51] Based on the industry's experience, the FAA expects minimal additional labor cost for sponsors of new meteorological towers to comply with the proposed rule's marking requirement, because marker balls and sleeves could be attached to the guy wires before raising the new meteorological tower as opposed to incurring costs to lower, mark, and raise the meteorological tower. The FAA estimates that it would take two contractors about two hours to attach marker balls and sleeves to the new meteorological tower. The total hourly compensation per contractor is $97.62.[52]

[46] Small Business Administration (SBA). 2023. Table of Size Standards. Effective March 17, 2023. *https://www.sba.gov/document/support--table-size-standards.*

[48] *https://www.sba.gov/sites/default/files/2023-06/Table%20of%20Size%20Standards_Effective%20March%2017%2C%202023%20%282%29.pdf.*

[49] Available at: *https://www.census.gov/data/tables/2017/econ/susb/2017-susb-annual.html,* retrieved on April 15, 2023.

[50] Cost estimates based on a call with NRG Systems on 4/1/2023.

[51] Labor cost to install marker balls/sleeves = (T × W), where T is the total time it would take for contractors to install marker balls and sleeves (T=4 hours); and W is the hourly wage rate for a contractor (W=$97.62).

[52] The hourly wage rate ($63.50) was provided by National Association of Tower Erectors (NATE) on 11/1/2017 and updated with the GDP deflator from 2017 to 2022, 18.8%. U.S. Bureau of Economic Analysis, ''Table 1.1.7. Percent Change From Preceding Period in Prices for Gross Domestic Product'' (accessed on 2/7/2024). The benefit rate

Continued

The cost to dismantle a meteorological tower is between $5,000 and $22,500. The FAA estimates the most likely cost would be around $9,000.[53] Sponsors of out-of-service meteorological towers would choose to dismantle them because the recurring costs to comply with the proposed rule outweigh the costs to dismantle them.

Under § 77.9, the proposed rule would require sponsors of both existing and proposed construction and altered meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site to file notice with the FAA. In addition, § 77.11 would also require sponsors to file FAA Form 7460–2 after dismantling meteorological towers.

To comply with these requirements, an office worker would complete the submission of information required for the FAA aeronautical study, provided they have all the relevant meteorological tower data and the management has all the critical data on the meteorological tower(s). The FAA estimates the fully loaded hourly average wage rate for an office worker to be $28.34.[54]

Respondents: The FAA is unable to estimate the number of existing meteorological towers and the annual number of new meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site due to the lack of federal regulations governing these meteorological towers.

Frequency: Sponsors of all existing meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site would have to file notice to the FAA 90 days after the effective date of a final rule. In addition, sponsors would submit another notice to the FAA whenever they propose to construct or alter meteorological towers. When sponsors decide to dismantle a meteorological tower, the proposed rule would require them to file FAA Form 7460–2.

Annual Burden Estimate: The FAA estimates that it would take a sponsor of a meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site 0.25 hours (or 15 minutes) to file FAA Form 7460–1 electronically. Similarly, FAA Form 7460–2 would take about 0.1 hours (6 minutes) to file notice electronically. The FAA estimates that it would cost about $7 to file Form 7460–1 ($28.34 × 0.25 hours) and $3 to file Form 7460–2 ($28.34 × 0.10 hours).

5. All Federal Rules That May Duplicate, Overlap, or Conflict

There are no Federal rules that may duplicate, overlap, or conflict with the proposed rule.

6. Significant Alternatives Considered

To comply with the proposed rule, the impacted small entities would have to incur a small cost to file notices with the FAA. The FAA found no other alternatives that could meet the objectives of the proposed rule with less burden on these small entities.

C. International Trade Impact Assessment

The Trade Agreements Act of 1979 (Pub. L. 96–39), as amended by the Uruguay Round Agreements Act (Pub. L. 103–465), prohibits Federal agencies from establishing standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. Pursuant to these Acts, the establishment of standards is not considered an unnecessary obstacle to the foreign commerce of the United States, so long as the standard has a legitimate domestic objective, such as the protection of safety, and does not operate in a manner that excludes imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. The FAA has assessed the potential effect of this rule and determined that it will only have a domestic impact and, therefore, no effect on international trade.

D. Unfunded Mandates Assessment

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) governs the issuance of Federal regulations that require unfunded mandates. An unfunded mandate is a regulation that requires a State, local, or tribal government or the private sector to incur direct costs without the Federal government having first provided the funds to pay those costs. The FAA determined that the proposed rule will not result in the expenditure of $183 million or more by State, local, or Tribal governments, in the aggregate, or the private sector, in any one year.

E. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires that the FAA consider the impact of paperwork and other information collection burdens imposed on the public. According to the 1995 amendments to the Paperwork Reduction Act (5 CFR 1320.8(b)(2)(vi)), an agency may not collect or sponsor the collection of information, nor may it impose an information collection requirement unless it displays a currently valid Office of Management and Budget (OMB) control number. The FAA routinely renews its ongoing information collection under OMB Control Number 2120–0001 and intends to continue to collect notice information via the OMB-approved FAA Forms 7460–1 and 7460–2, which are the instruments of the information collection.

Under § 77.9, the proposed rule would require owners of both existing and proposed construction and altered meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site to file notice with the FAA using Form 7460–1. In addition, § 77.10 would also require owners to file FAA Form 7460–2 after dismantling meteorological towers.

To comply with these requirements, an office worker would complete the submission of information required for the FAA aeronautical study, provided they have all the relevant meteorological tower data and the management has all the critical data on the meteorological tower(s). The FAA estimates the fully loaded hourly average wage rate for an office worker to be $28.34.[55]

Respondents: The FAA cannot estimate the additional number of existing meteorological towers and the annual number of new meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site due to the lack of federal regulations governing these meteorological towers.

Frequency: Sponsors of existing all meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL

of 29.4% was also added to estimate the fully loaded hourly wage rate. *https://www.bls.gov/news.release/archives/ecec_12152023.pdf,* accessed on 1/29/2024.

[53] Cost estimate based on a conference call with NATE on 11/1/2017.

[54] Fully loaded Hourly Wage Rate = hourly wage rate + (benefit rate × hourly wage rate). U.S. Bureau of Labor Statistics: Office and Administrative Support Occupations, $21.90 mean hourly wage rate, *https://www.bls.gov/oes/2022/may/oes_nat.htm#43-0000,* accessed on 4/10/2023. 29.4% benefit rate: *https://www.bls.gov/news.release/archives/ecec_12152023.pdf,* accessed on 1/29/2024.

[55] Fully loaded Hourly Wage Rate = hourly wage rate + (benefit rate × hourly wage rate). U.S. Bureau of Labor Statistics: Office and Administrative Support Occupations, $21.90 mean hourly wage rate, *https://www.bls.gov/oes/2022/may/oes_nat.htm#43-0000,* accessed on 4/10/2023. 29.4% benefit rate: *https://www.bls.gov/news.release/archives/ecec_12152023.pdf,* accessed on 1/29/2024.

at its site would have to file notice to the FAA 90 days after the effective date of a final rule. In addition, sponsors would submit another notice to the FAA whenever they propose to construct or alter a meteorological tower. When sponsors decide to dismantle a meteorological tower, the proposed rule would require them to file FAA Form 7460–2.

Annual Burden Estimate: The FAA estimates that it would take a sponsor of a meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site 0.25 hours (or 15 minutes) to file a notice electronically. Similarly, FAA Form 7460–2 would take about 0.1 hours (6 minutes) to file notice electronically. The FAA estimates that it would cost about $7 to file Form 7460–1 ($28.34 × 0.25 hours) and $3 to file Form 7460–2 ($28.34 × 0.10 hours).

The FAA is soliciting comments to—

(1) Evaluate whether the proposed information requirement is necessary for the proper performance of the functions of the FAA, including whether the information will have practical utility;

(2) Evaluate the accuracy of the FAA's estimate of the burden;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of collecting information on those who are to respond, including by using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Individuals and organizations may send comments on the information collection requirement to the address listed in the **ADDRESSES** section at the beginning of this preamble by January 17, 2025. Comments also should be submitted to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Desk Officer for FAA, New Executive Office Building, Room 10202, 725 17th Street NW, Washington, DC 20053.

F. International Compatibility and Cooperation

In keeping with U.S. obligations under the Convention on International Civil Aviation, it is FAA policy to conform to International Civil Aviation Organization (ICAO) Standards and Recommended Practices to the maximum extent practicable. The FAA determined that there are no ICAO Standards and Recommended Practices that correspond to these regulations.

G. Environmental Analysis

FAA Order 1050.1F identifies FAA actions that are categorically excluded from preparation of an environmental assessment or environmental impact statement under the National Environmental Policy Act in the absence of extraordinary circumstances. The FAA determined this rulemaking action qualifies for a categorical exclusion per paragraph 5–6.6f for regulations and involves no extraordinary circumstances.

VI. Executive Order Determinations

A. Executive Order 13132, Federalism

The FAA analyzed this proposed rule under the principles and criteria of Executive Order 13132, Federalism. The agency determined that this action would not have a substantial direct effect on the States, or the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of government and, therefore, would not have Federalism implications.

B. Executive Order 13211, Regulations That Significantly Affect Energy Supply, Distribution, or Use

The FAA analyzed this proposed rule under Executive Order 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use. The agency determined that this action would not be a ''significant energy action'' under the executive order and would not be likely to have a significant adverse effect on the supply, distribution, or use of energy.

C. Executive Order 13609, International Cooperation

Executive Order 13609, Promoting International Regulatory Cooperation, promotes international regulatory cooperation to meet shared challenges involving health, safety, labor, security, environmental, and other issues and to reduce, eliminate, or prevent unnecessary differences in regulatory requirements. The FAA analyzed this proposed rule under the policies and agency responsibilities under the executive order and determined that this action would have no effect on international regulatory cooperation.

VII. Additional Information

A. Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. The FAA also invites comments relating to the economic, environmental, energy, or federalism impacts that might result from adopting the proposals in this document. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *https://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *https://www.dot.gov/privacy.*

B. Confidential Business Information

Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to the person in the **FOR FURTHER INFORMATION CONTACT** section of this document. Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

C. Electronic Access and Filing

A copy of this NPRM, all comments received, any final rule, and all background material may be viewed online at *https://www.regulations.gov* using the docket number listed above. A copy of this proposed rule will be placed in the docket. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year. An electronic copy of this document may also be downloaded from the Office of the Federal Register's website at *https://www.federalregister.gov* and the Government Publishing Office's website at *https://www.govinfo.gov.* A copy may also be found on the FAA's Regulations and Policies website at *https://www.faa.gov/regulations_policies.*

Copies may also be obtained by sending a request to the Federal Aviation Administration, Office of Rulemaking, ARM–1, 800 Independence Avenue SW, Washington, DC 20591, or by calling (202) 267–9677. Commenters must identify the docket or notice number of this rulemaking.

All documents the FAA considered in developing this proposed rule, including economic analyses and technical reports, may be accessed in the electronic docket for this rulemaking.

List of Subjects in 14 CFR Part 77

Aeronautical study, Air Navigation, Airspace, Aviation safety, Construction or Alteration, Determination, Notice, Obstruction, Reporting and recordkeeping requirements.

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend chapter I of title 14, Code of Federal Regulations as follows:

PART 77—SAFE, EFFICIENT USE, AND PRESERVATION OF THE NAVIGABLE AIRSPACE

■ 1. The authority citation for part 77 is revised to read as follows:

Authority: 49 U.S.C. 106(f), 40103, 40113–40114, 44502, 44701, 44718, 46101–46102, 46104; Sec. 2110 of Pub. L. 114–190, 130 Stat. 623 (49 U.S.C. 44718 note); Sec. 576 of Pub. L. 115–254, 132 Stat. 3391 (49 U.S.C. 44718 note); Sec. 355 of Pub. L 118–63.

■ 2. Revise § 77.1 to read as follows:

§ 77.1 Purpose.

This part establishes:

(a) The requirements to provide notice to the FAA of the proposed construction, alteration, or existence of certain structures;

(b) The standards used to determine obstructions to air navigation and navigational and communication facilities or equipment;

(c) The process for aeronautical studies of obstructions to air navigation or navigational facilities to determine the effect on the safe and efficient use of navigable airspace, air navigation facilities, or equipment;

(d) The process to petition the FAA for discretionary review of determinations, revisions, and extensions of determinations; and

(e) The requirement to comply with the conditions and limitations contained in a Determination of No Hazard to Air Navigation, including the requirement to mark newly constructed or altered meteorological towers with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site.

■ 3. Amend § 77.3 by adding definitions for ''airborne wind energy system (AWES),'' ''meteorological tower,'' ''sponsor,'' and ''wind energy system'' in alphabetical order to read as follows:

§ 77.3 Definitions.

* * * * *

Airborne wind energy system (AWES) means a structure, which consists of a self-supported airborne system tethered to a ground station, with an airborne or ground-mounted drivetrain used to convert kinetic energy in the wind to mechanical power for the purpose of generating electricity.

Meteorological tower means a skeletal or pole-type structure, either freestanding or anchored with guy wires, configured with components to measure wind speed and wind direction at different heights above ground level to assess local wind energy resources.

* * * * *

Sponsor means the owner of a structure for which notice is required under this part.

* * * * *

Wind energy system means a structure that converts kinetic energy in the wind to electrical energy. A wind energy system may consist of a single structure or a group of structures.

■ 4. Revise the heading of subpart B to read as follows:

Subpart B—Notice and Determination Requirements

■ 5. Revise § 77.5 to read as follows:

§ 77.5 Applicability.

(a) A sponsor of a meteorological tower in existence before the effective date of a final rule must provide notice consistent with § 77.7(d).

(b) A sponsor proposing any construction or alteration described in § 77.9 must provide adequate notice to the FAA of that construction or alteration.

(c) If requested by the FAA, a sponsor must file supplemental notice before the start date and upon completion of certain construction or alterations described in § 77.9.

(d) A sponsor proposing any construction or alteration of a meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site must provide adequate notice to the FAA of that construction or alteration pursuant to § 77.7(b).

(e) Notice received by the FAA under this subpart is used to:

(1) Evaluate the effect of the proposed construction or alteration on safety in air commerce and the efficient use and preservation of the navigable airspace and of airport traffic capacity at public use airports;

(2) Determine whether the effect of proposed construction or alteration is a hazard to air navigation;

(3) Determine appropriate marking and lighting requirements using FAA Advisory Circular 70/7460–1, Obstruction Marking and Lighting.

(4) Determine other appropriate measures required for continued safety of air navigation;

(5) Notify the aviation community of the construction or alteration of objects that affect the navigable airspace, including the revision of charts, when necessary;

(6) Evaluate the effect of a meteorological tower in existence before the effective date of a final rule on safety in air commerce and the efficient use and preservation of the navigable airspace and of airport traffic capacity at public use airports; and

(7) Determine whether the effect of a meteorological tower in existence before the effective date of a final rule is a hazard to air navigation.

■ 6. Revise § 77.7 to read as follows:

§ 77.7 Form and time of notice.

(a) *Forms.* The sponsor must electronically complete and submit FAA Form 7460–1, Notice of Proposed Construction or Alteration, or FAA Form 7460–2, Notice of Actual Construction or Alteration, via the internet at *https://oeaaa.faa.gov.*

(b) *45-day notice.* Except as provided in paragraphs (c), (d), or (e) of this section, a sponsor required to provide notice under § 77.9 must submit FAA Form 7460–1 at least 45 days before the start date of the proposed construction or alteration, or the date an application

for a construction permit is filed, whichever is earlier.

(1) If a sponsor proposes construction or alteration that is also subject to the licensing requirements of the Federal Communications Commission (FCC), the sponsor must submit notice to the FAA on or before the date that the application is filed with the FCC.

(2) If a sponsor proposes construction or alteration to an existing structure that exceeds 2,000 feet in height AGL, the FAA presumes it to be a hazard to air navigation that results in an inefficient use of airspace. The sponsor must include details explaining both why the proposal would not constitute a hazard to air navigation and why it would not cause an inefficient use of airspace.

(c) *Wind energy system notice.* A sponsor must submit FAA Form 7460–1 for any proposed construction or alteration of a permanent wind energy system and associated meteorological tower at least 90 days before the start date of the proposed construction or alteration, or the date an application for a construction permit is filed, whichever is earlier. A meteorological tower is associated with a wind energy system when it is included in a wind energy systems project and is intended to be permanent. A meteorological tower is permanent when it is intended to remain in place for the duration of its lifecycle.

(d) *Existing meteorological tower notice.* A sponsor of a meteorological tower that exists prior to the effective date of a final rule with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site must submit FAA Form 7460–1 within 90 days of the effective date of a final rule.

(e) *Waiver.* The applicable notice requirement is waived if immediate construction or alteration is required because of an emergency involving essential public services, public health, or public safety. The sponsor may provide notice to the FAA by any available, expeditious means. The sponsor must file a completed FAA Form 7460–1 within 5 days of the initial notice to the FAA.

■ 7. Revise § 77.9 to read as follows:

§ 77.9 Notice requirement.

(a) If requested by the FAA, or if the sponsor proposes any of the following types of construction or alteration, a sponsor must file notice with the FAA of:

(1) Any construction or alteration of a structure that is more than 200 feet AGL at its site.

(2) Any construction or alteration of a meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site.

(3) Any construction or alteration that exceeds an imaginary surface extending outward and upward at any of the following slopes:

(i) 100 to 1 for a horizontal distance of 20,000 feet from the nearest point of the nearest runway of each airport described in paragraph (d) of this section with its longest runway more than 3,200 feet in actual length, excluding heliports.

(ii) 50 to 1 for a horizontal distance of 10,000 feet from the nearest point of the nearest runway of each airport described in paragraph (d) of this section with its longest runway no more than 3,200 feet in actual length, excluding heliports.

(iii) 25 to 1 for a horizontal distance of 5,000 feet from the nearest point of the nearest landing and takeoff area of each heliport described in paragraph (d) of this section.

(4) Any highway, railroad, or other traverse way for mobile objects of a height which, if adjusted upward 17 feet for an Interstate Highway that is part of the National System of Military and Interstate Highways where overcrossings are designed for a minimum of 17 feet vertical distance, 15 feet for any other public roadway, 10 feet or the height of the highest mobile object that would normally traverse the road, whichever is greater, for a private road, 23 feet for a railroad, and for a waterway or any other traverse way not previously mentioned, an amount equal to the height of the highest mobile object that would normally traverse it, would exceed a standard of paragraphs (a)(1) through (3) of this section.

(5) Any construction or alteration on any of the following airports and heliports:

(i) A public use airport listed in the Chart Supplement U.S., Chart Supplement Alaska, or Chart Supplement Pacific of the U.S. Government Flight Information Publications;

(ii) A military airport under construction, or an airport under construction that will be available for public use;

(iii) An airport operated by a Federal agency or the DOD; or

(iv) An airport or heliport with at least one FAA-approved instrument approach procedure.

(b) If a sponsor has an existing meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site prior to the effective date of a final rule, the sponsor must file notice consistent with § 77.7(d).

(c) No notice is required of the construction or alteration of:

(1) Any object that will be shielded by existing structures of a permanent and substantial nature or by natural terrain or topographic features of equal or greater height, and will be located in the congested area of a city, town, or settlement where the shielded structure will not adversely affect safety in air navigation;

(2) Any air navigation facility, airport visual approach or landing aid, aircraft arresting device, or meteorological device meeting FAA-approved siting criteria or an appropriate military service siting criteria on military airports, the location and height of which are fixed by its functional purpose;

(3) Any construction or alteration for which notice is required by any other FAA regulation.

(4) Any antenna structure of 20 feet or less in height, except one that would increase the height of another antenna structure.

§ 77.11 [Redesignated as § 77.10]

■ 8. Redesignate § 77.11 as § 77.10.

■ 9. Revise newly redesignated § 77.10 to read as follows:

§ 77.10 Supplemental notice requirements.

(a) A sponsor must file supplemental notice when requested by the FAA:

(1) Before the start of construction or alteration;

(2) After completing actual construction or alteration;

(3) If the proposed construction or alteration is abandoned within five days after the project is abandoned;

(4) If the construction or alteration is dismantled or destroyed, the sponsor must submit notice to the FAA within five days after the construction or alteration is dismantled or destroyed; or

(5) If otherwise requested by the FAA.

(b) The sponsor must submit the supplemental information using FAA Form 7460–2, Notice of Actual Construction or Alteration, to be received within the time limits specified in the FAA determination. If no time limit has been specified, the sponsor must submit the supplemental notice of construction to the FAA within five days after the structure reaches its greatest height.

■ 10. Add new § 77.11 to read as follows:

§ 77.11 Additional information.

If the FAA requests additional information during any part of the aeronautical study process, pre- or post-

any determination, the sponsor must provide that information within 30 days.

■ 11. Add § 77.12 to read as follows:

§ 77.12 Conditions and limitations requirements.

Except for structures that have received an FAA Determination of No Hazard to Air Navigation prior to the effective date of a final rule or any meteorological tower with the highest point of the structure at least 50 feet AGL up to and including 200 feet AGL at its site for which construction is complete prior to the effective date of a final rule, a sponsor must comply with the conditions and limitations contained in its Determination of No Hazard to Air Navigation.

■ 12. Amend § 77.15 by revising paragraph (e)(1) to read as follows:

§ 77.15 Scope.

* * * * *

(e) * * *

(1) Available for public use and is listed in the Chart Supplement U.S., Chart Supplement Alaska, or Chart Supplement Pacific of the U.S. Government Flight Information Publications; or

* * * * *

■ 13. Revise § 77.27 to read as follows:

§ 77.27 Initiation of studies.

The FAA will conduct an aeronautical study when:

(a) Notice is required under § 77.9 and has been received; or

(b) The FAA determines a study is necessary. All other Notices filed by the public outside of these parameters will be screened within the automated OE/AAA system and, if appropriate, provided an electronic letter response that indicates that no notice is required for the said proposal or alteration, and thus the FAA has no objections to the proposal at this time.

■ 14. Amend § 77.29 by revising paragraph (b) to read as follows:

§ 77.29 Evaluating aeronautical effect.

* * * * *

(b) If a sponsor withdraws the proposed construction or alteration or revises it so that it is no longer identified as an obstruction, or if no further aeronautical study is necessary, the FAA may terminate the study.

■ 15. Amend § 77.31 by revising paragraph (d)(4) to read as follows:

§ 77.31 Determinations.

* * * * *

(d) * * *

(4) Marking and lighting requirements, as appropriate.

* * * * *

■ 16. Add § 77.32 to read as follows:

§ 77.32 Marking and lighting requirements.

A sponsor may request a modification or deviation from the marking and lighting requirements in a determination by submitting FAA Form 7460–1, Notice of Proposed Construction or Alteration.

■ 17. Revise § 77.33 to read as follows:

§ 77.33 Effective period of determinations.

(a) The effective date of a determination not subject to discretionary review under § 77.37(b) is the date of issuance. The effective date of all other determinations for a proposed or existing structure is 40 days from the date of issuance, provided a valid petition for review has not been received by the FAA. If a valid petition for review is filed, the determination will not become final pending disposition of the petition.

(b) Except as provided in paragraphs (c) and (d) of this section, unless extended, revised, or terminated, each Determination of No Hazard to Air Navigation issued under this subpart expires 18 months after the effective date of the determination, or on the date the proposed construction or alteration is abandoned, whichever is earlier.

(c) Unless extended, revised, or terminated, each Determination of No Hazard to Air Navigation issued under this subpart regarding a proposed permanent wind energy system, including an airborne wind energy system and associated meteorological towers, expires 36 months after the effective date of the determination or on the date the proposed construction or alteration is abandoned, whichever is earlier. A meteorological tower is associated with a wind energy system when it is included in a wind energy systems project and is intended to be permanent. A meteorological tower is permanent when it is intended to remain in place for the duration of its lifecycle.

(d) A Determination of Hazard to Air Navigation has no expiration date.

■ 18. Amend § 77.35 by revising the introductory text of paragraph (a), and paragraphs (c)(1) through (3) to read as follows:

§ 77.35 Extensions, terminations, revisions, and corrections.

(a) A sponsor may petition the FAA to revise or reconsider the determination based on new facts or to extend the effective period of the determination, provided that:

* * * * *

(c) * * *

(1) The sponsor submits evidence that an application for a construction permit/license was filed with the FCC for the associated site within six months of issuance of the determination; and

(2) The sponsor submits evidence that additional time is warranted because of FCC requirements; and

(3) Where the FCC issues a construction permit, a final Determination of No Hazard to Air Navigation is effective until the date prescribed by the FCC for completion of the construction. If a sponsor needs to extend the original FCC completion date, they must also request an extension of the FAA determination.

* * * * *

■ 19. Revise § 77.37 to read as follows:

§ 77.37 General.

(a) A petition for a discretionary review of a determination, revision, or extension of a determination issued by the FAA may be made by:

(1) The sponsor;

(2) Any person that provided a substantive aeronautical comment on a proposal in an aeronautical study;

(3) Any person that provided a substantive aeronautical comment on the proposal but was not given an opportunity to state it.

(b) A petition for discretionary review for a Determination of No Hazard that is issued for a temporary structure, marking and lighting requirements, or when a proposed structure or alteration does not exceed obstruction standards contained in subpart C of this part may not be filed by any person.

Issued under authority provided by 49 U.S.C. 106(f), 44701(a)(5) and 44718 in Washington, DC.

Alyce Hood-Fleming,

Vice President, Mission Support Services, Air Traffic Organization.

BILLING CODE 4910–13–P

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR Part 655

[DOL Docket No. ETA–2024–0001]

RIN 1205–AC15

Employer-Provided Survey Wage Methodology for the Temporary Non-Agricultural Employment H–2B Program

AGENCY: Employment and Training Administration, Department of Labor.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of Labor (Department or DOL) proposes to amend

its regulations for employer-provided wage surveys for the H–2B temporary labor certification program. The regulations were published in the *Wage Methodology for the Temporary Non-Agricultural Employment H–2B Program* final rule (2015 Wage Rule). This notice of proposed rulemaking (NPRM or proposed rule) proposes to amend those regulations consistent with recent Federal litigation by clarifying existing requirements for employer-provided surveys for the H–2B program, proposing new requirements, and proposing to eliminate Form ETA–9165, *Employer-Provided Survey Attestations to Accompany H–2B Prevailing Wage Determination Request Based on a Non-OEWS Survey* (Form ETA–9165).

DATES: Interested persons are invited to submit written comments on the proposed rule on or before January 17, 2025.

ADDRESSES: You may submit comments electronically by the following method:

Federal eRulemaking Portal: https://www.regulations.gov/. Follow the instructions on the website for submitting comments.

Instructions: Include the agency's name and docket number ETA–2024–0001 in your comments. All comments received will become a matter of public record and may be posted without change to *https://www.regulations.gov/.* Comments submitted after the deadline for submission will not be considered. Please do not submit comments containing trade secrets, confidential or proprietary commercial or financial information, personal health information, sensitive personally identifiable information (for example, social security numbers, driver's license or state identification numbers, passport numbers, or financial account numbers), or other information that you do not want to be made available to the public. The agency reserves the right to redact or refrain from posting such information and libelous or otherwise inappropriate comments, including those that contain obscene, indecent, or profane language; that contain threats or defamatory statements; or that contain hate speech directed at race, color, sex, sexual orientation, national origin, ethnicity, age, religion, or disability. Please note that depending on how information is submitted through *regulations.gov*, the agency may not be able to redact the information and instead reserves the right to refrain from posting the information or comment in such situations.

FOR FURTHER INFORMATION CONTACT: Michelle L. Paczynski, Administrator, Office of Policy Development and Research, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue NW, Room N–5641, Washington, DC 20210, telephone: (202) 693–3700 (this is not a toll-free number). For persons with a hearing or speech disability who need assistance to use the telephone system, please dial 711 to access telecommunications relay services.

II. Background

A. The Statutory and Regulatory Framework

The Immigration and Nationality Act (INA), as amended, establishes the H–2B nonimmigrant classification for a non-agricultural temporary worker ''having a residence in a foreign country which he has no intention of abandoning who is coming temporarily to the United States to perform . . . temporary [non-agricultural] service or labor if unemployed persons capable of performing such service or labor cannot be found in this country.'' 8 U.S.C. 1101(a)(15)(H)(ii)(b).[1] Employers must petition the Department of Homeland Security (DHS) for classification of a prospective temporary worker as an H–2B nonimmigrant. 8 U.S.C. 1184(c)(1). DHS must approve this petition before the beneficiary can be considered eligible for an H–2B visa or H–2B status. *Id.* In addition, the INA requires that ''[t]he question of importing any [foreign worker] as [an H–2B] nonimmigrant . . . in any specific case or specific cases shall be determined by [DHS] [2] after consultation with appropriate agencies of the Government.'' *Id.*

Pursuant to this statutory mandate to consult with ''appropriate agencies of the Government'' to determine eligibility for H–2B status, DHS (and the former Immigration and Naturalization Service) has long recognized that the most effective administration of the H–2B program requires consultation with

[1] For ease of reference, sections of the INA are referred to by their corresponding section in the U.S. Code.

[2] In accordance with sec. 1517 of title XV of the Homeland Security Act of 2002 (HSA), Public Law 107–296, 116 Stat. 2135, any reference to the Attorney General in a provision of the INA describing functions that were transferred from the Attorney General or other Department of Justice official to DHS by the HSA ''shall be deemed to refer to the Secretary'' of Homeland Security. *See* 6 U.S.C. 557 (2002) (codifying HSA, title XV, sec. 1517); 6 U.S.C. 542; 8 U.S.C. 1551).

DOL to advise whether U.S. workers capable of performing the temporary services or labor are available.[3]

Accordingly, DHS regulations require that an H–2B petition for temporary employment in the United States must be accompanied by an approved temporary labor certification from DOL. 8 CFR 214.2(h)(6)(iii)(A) and (iv)(A). The temporary labor certification serves as DOL's advice to DHS with respect to whether a qualified U.S. worker is available to fill the petitioning H–2B employer's job opportunity and whether a foreign worker's employment in the job opportunity will adversely affect the wages or working conditions of similarly employed U.S. workers. *See* 8 CFR 214.2(h)(6)(iii)(A). In addition, as part of DOL's certification, DHS regulations require DOL to ''determine the prevailing wage applicable to an application for temporary labor certification in accordance with the Secretary of Labor's regulation at 20 CFR 655.10.'' 8 CFR 214.2(h)(6)(iii)(D). Section 655.10, in turn, requires that any prospective H–2B employer first obtain from DOL a prevailing wage determination (PWD) before filing its application with DOL for temporary labor certification. 20 CFR 655.10(a).

B. The 2008 Rule, the Related Litigation, and the Attempted 2011 Wage Rule

In 2008, DOL issued regulations related to its role in the H–2B temporary worker program, including a methodology for determining the minimum wage that a prospective H–2B employer must offer, advertise in recruitment, and pay. *Labor Certification Process and Enforcement for Temporary Employment in Occupations Other Than Agriculture or Registered Nursing in the United States (H–2B Workers), and Other Technical Changes* (2008 Rule), 73 FR 78020 (Dec. 19, 2008). The 2008 Rule provided, *inter alia,* that the prevailing wage would be the collective bargaining agreement (CBA) wage rate if the job opportunity was covered by an agreement negotiated at arms' length between a union and the employer; the Occupational Employment and Wage Statistics (OEWS)[4] survey wage rate if there was no CBA; a survey if an employer elected to provide an acceptable survey; or a wage rate under the Davis-Bacon Act (DBA) or the McNamara-O'Hara Service Contract Act (SCA), if one was available for the occupation in the area of intended employment. *Id.* at 78056. The 2008 Rule and the agency guidance implementing it required that when PWDs were based on the OEWS survey, the wage had to be structured to contain four tiers to reflect skill and experience.[5] *Id.* at 78056, 78068. While DOL subjected most provisions of the 2008 Rule to the Administrative Procedure Act's (APA) notice-and-comment requirements, because the agency had already been implementing the four-tier wage structure in the H–2B program pursuant to sub-regulatory guidance, DOL did not seek public comments on the use of the four-tier structure when promulgating the 2008 Rule. *See id.* at 78031.

In 2009, a lawsuit was filed under the APA challenging several aspects of the 2008 Rule. *See Comité de Apoyo a los Trabajadores Agrícolas (CATA)* v. *Solis,* No. 09–cv–240, 2010 WL 3431761 (E.D. Pa. Aug. 30, 2010) (*CATA I*). Among the issues raised in that litigation was the use of the four-tier wage structure in the H–2B program. In its decision, the district court ruled that, substantively, DOL had violated the APA by failing to adequately explain its reasoning for adopting skill and experience levels as part of the H–2B PWD process. *Id.* at *19. The court also found that the four-tier wage structure was a legislative rule subject to the APA's notice-and-comment provision, and that DOL had failed to subject it to notice and comment. *Id.* The court ordered promulgation of ''new rules concerning the calculation of the prevailing wage rate in the H–2B program that are in compliance with the [APA]'' within 120 days. *Id.* at *27.

Consequently, after issuing an NPRM on October 5, 2010, DOL published a final rule on January 19, 2011. *See Wage Methodology for the Temporary Non-Agricultural Employment H–2B Program,* 75 FR 61578 (Oct. 5, 2010); *Wage Methodology for the Temporary Non-Agricultural Employment H–2B Program* (2011 Wage Rule), 76 FR 3452, 3465–3467 (Jan. 19, 2011). The 2011 Wage Rule eliminated the four-tier structure. *Id.* at 3458–3461. The 2011 Wage Rule set the prevailing wage as the highest of the OEWS arithmetic mean for each occupational category in the area of intended employment; the applicable SCA or DBA wage rate; or the CBA wage. The use of employer-provided surveys was eliminated except when the job opportunity: (1) was in a geographic location not included in the Bureau of Labor Statistics' (BLS) data collection for the OEWS (*e.g.,* the Commonwealth of the Northern Mariana Islands); or (2) was not ''accurately represented'' within the OEWS job classification used in those surveys. *Id.* at 3466–3467. In deciding to so limit the submission and use of employer-provided surveys, the Department stated that the OEWS wage survey was ''the most consistent, efficient, and accurate means of determining the prevailing wage rate for the H–2B program.'' *Id.* at 3465.

The effective date of the 2011 Wage Rule was originally set for January 1, 2012—a date the *CATA* plaintiffs challenged, seeking an earlier one—but Congress ultimately short-circuited the dispute by an enacting an appropriations rider prohibiting the Department from implementing the 2011 Wage Rule. Public Law 112–55, 125 Stat. 552, Div. B, title V, sec. 546 (Nov. 18, 2011). DOL therefore extended the effective date to October 1, 2012. 76 FR 82115 (Dec. 30, 2011). Subsequent appropriations contained the same restriction prohibiting DOL's use of appropriated funds to implement, administer, or enforce the 2011 Wage Rule, necessitating additional rulemaking to further delay the effective date of the 2011 Wage Rule.[6] 77 FR 60040 (Oct. 2, 2012) (extending the effective date to March 27, 2013); 78 FR

[3] *See, e.g., Temporary Alien Workers Seeking Classification Under the Immigration and Nationality Act,* 55 FR 2606, 2617 (Jan. 26, 1990) (''The Service must seek advice from the Department of Labor under the H–2B classification because the statute requires a showing that unemployed U.S. workers are not available to perform the services before a petition can be approved. The Department of Labor is the appropriate agency of the Government to make such a labor market finding. The Service supports the process that the Department of Labor uses for testing the labor market and assuring that wages and working conditions of U.S. workers will not be adversely affected by employment of alien workers.'').

[4] Prior to March 31, 2021, this survey—conducted by the Department's Bureau of Labor Statistics (BLS)—was known as the Occupational Employment Statistics (OES) survey. For the sake of consistency, however, the Department uses the term OEWS throughout.

[5] Because the OEWS survey does not capture information on the skills or responsibilities of the workers whose wages are being reported, the four-tiered wage structure, adapted from the statutorily required four tiers applicable to the H–1B visa program under 8 U.S.C. 1182(p), was derived by mathematical formula to reflect ''entry level,'' ''qualified,'' ''experienced,'' and ''fully competent'' workers. *See id.* at 78068; Prevailing Wage Determination Policy Guidance, Nonagricultural Immigration Programs, Revised (revised Nov. 2009) (2009 Prevailing Wage Guidance), *available at https://www.dol.gov/sites/dolgov/files/ETA/oflc/pdfs/NPWHC_Guidance_Revised_11_2009.pdf.*

[6] These include the Consolidated Appropriations Act of 2012, Public Law 112–74, 125 Stat. 786 (Dec. 23, 2011); Continuing Appropriations Resolution, 2013, Public Law 112–175, 126 Stat. 1313 (Sept. 28, 2012); Consolidated and Further Continuing Appropriations Act, 2013, Public Law 113–6, 127 Stat. 198 (Mar. 26, 2013); Continuing Appropriations Act, 2014, Public Law 113–46, 127 Stat. 558 (Oct. 17, 2013); and Joint Resolution Making Further Continuing Appropriations for Fiscal Year 2014, Public Law 113–73, 128 Stat. 3 (Jan. 15, 2014).

19098 (Mar. 29, 2013) (extending the effective date to October 1, 2013).

Given Congress's prohibition against implementation of the 2011 Wage Rule, the Department continued to operate the H–2B program under the 2008 Rule, which *CATA I* had invalidated but not vacated. The *CATA* plaintiffs, however, sued again and on March 31, 2013, obtained a permanent injunction against application and vacatur of the four-tier OEWS structure in the 2008 Rule. *CATA* v. *Solis,* 933 F. Supp. 2d 700, 716 (E.D. Pa. 2013) (*CATA II*). In particular, the court vacated and remanded 20 CFR 655.10(b)(2), giving DOL 30 days to come into compliance with its ruling finding invalid the four-tier OEWS skill level and wage structure. *Id.* In the interim, DOL was unable to issue the vast majority of H–2B PWDs, which were based on the OEWS survey.

C. The 2013 Interim Final Rule

In compliance with the *CATA II* court's ruling, DOL published an interim final rule (IFR). *Wage Methodology for the Temporary Non-Agricultural Employment H–2B Program, Part 2,* 78 FR 24047 (Apr. 24, 2013) (2013 IFR).[7] The 2013 IFR became effective on the date of publication, with the agencies asserting that they had ''good cause'' for an immediate effective date pursuant to 5 U.S.C. 553(d)(3). Given the vacatur of the 2008 Rule, the agencies would have been forced to cease processing employers' requests for PWDs and temporary labor certifications without an immediate effective date and thus unable to continue to provide the advice that DHS had determined to be necessary under 8 U.S.C. 1184(c)(1)—as implemented in the DHS regulation at 8 CFR 214.2(h)(6)—for DHS to fulfill its statutory responsibility to adjudicate H–2B petitions. *Id.* at 24050.

The 2013 IFR did not revise or amend 20 CFR 655.10(f) of the 2008 Rule, leaving intact the permitted use of employer-provided surveys. *Id.* at 24054–24055. Noting that ''DOL still has the concerns expressed in the 2011 rule about the consistency, reliability and validity'' of employer-provided surveys, the 2013 IFR stated that DOL and DHS invited comment on ''whether to permit the continued use of employer-submitted surveys.'' *Id.* at 24055. The 2013 IFR invited comment on the following: all aspects of the prevailing wage methodology of 20 CFR 655.10, including, among other things, whether the OEWS mean was the appropriate basis for determining the prevailing wage; whether wages based on the DBA or the SCA should be used to determine the prevailing wage and if so, to what extent; comments on the accuracy and reliability of private surveys, including ''state-developed'' surveys; and whether the continued use of employer-provided surveys should be permitted and if so, how to better ensure their methodological soundness. *Id.*[8]

The comment period closed on June 10, 2013, and the agencies received over 300 comments on all aspects of the H–2B wage methodology from interested parties.[9] Meanwhile, because Congress continued to prohibit the use of funds to implement the 2011 Wage Rule, DOL indefinitely delayed its effective date. *See Wage Methodology for the Temporary Non-Agricultural Employment H–2B Program; Delay of Effective Date* (Indefinite Delay Rule), 78 FR 53643, 53645 (Aug. 30, 2013). Although the appropriations prohibition was removed as part of the Department's fiscal year (FY) 2014 appropriation, Consolidated Appropriations Act, 2014, Public Law 113–76, 128 Stat. 5, DOL has not since revisited the Indefinite Delay Rule.

D. Vacatur of the 2013 Interim Final Rule

In 2014, the *CATA* plaintiffs sued for the third time, challenging the 2013 IFR's continued allowance of employer-provided surveys to set the prevailing wage under 20 CFR 655.10(f). *See CATA* v. *Perez,* No. 2:14–02657, 2014 WL 4100708 (E.D. Pa. Jul. 23, 2014). In addition, the *CATA* plaintiffs challenged DOL's ongoing use under the 2013 IFR of the 2009 Prevailing Wage Guidance,[10] which continued to permit surveys to incorporate skill levels at least with respect to employer-provided surveys. *Id.* The district court dismissed the case on procedural grounds. On December 5, 2014, however, the Court of Appeals for the Third Circuit reversed, vacating both 20 CFR 655.10(f) and the 2009 Prevailing Wage Guidance. *CATA* v. *Perez,* 774 F.3d 173, 191 (3d Cir. 2014) (*CATA III*).

The *CATA III* court invalidated the use of employer-provided surveys in the H–2B program on both substantive and procedural grounds. First, the court held that DOL's failure to explain the broad acceptance of employer-provided surveys where an OEWS wage is available was procedurally invalid, particularly because this decision was a policy change from the 2011 Wage Rule's prohibition of most employer-provided surveys as an alternative to the OEWS. *Id.* at 187–88. Next, the court held that the employer-provided survey provision of the 2013 IFR, § 655.10(f), was arbitrary, and therefore substantively invalid under the APA, given DOL's findings in the 2011 Wage Rule, 76 FR 3465 (Jan. 19, 2011), that the OEWS is the ''most consistent, efficient, and accurate means of determining the prevailing wage rate for the H–2B program.'' *CATA III,* 774 F.3d 173 at 189. Further, the court held that § 655.10(f) was substantively invalid under the APA because it permitted wealthy employers to commission surveys that resulted in a lower prevailing wage than those paid by less affluent employers without means to produce such surveys and resulted in significant variations in the prevailing wage within a single occupation in the same geographic location. *Id.* at 189–90. Finally, the court held that the 2009 Prevailing Wage Guidance violated the APA because it allowed employer-provided surveys containing tiered wages based on skill levels. This, the court held, conflicted with the *CATA II* order, which invalidated the four-tier OEWS structure. *Id.* at 190–91.

The *CATA III* court ultimately ''direct[ed] that private surveys no longer be used in determining the mean rate of wage for occupations except where an otherwise applicable OE[W]S survey does not provide any data for an

[7] DOL and DHS published the 2013 IFR jointly in light of a then-recent court decision indicating DOL lacked authority to promulgate H–2B rules. *See Bayou Lawn & Landscape Servs.* v. *DOL,* 713 F.3d 1080, 1085 (11th Cir. 2013) (affirming preliminary injunction based in part on plaintiffs' likelihood of succeeding on their claim that DOL lacked authority to promulgate H–2B rules). Subsequent courts, reviewing the matter on the merits, reached the opposite conclusion. *See Outdoor Amusement Bus. Ass'n* v. *DHS,* 983 F.3d 671, 685 (4th Cir. 2020) (DOL has authority to promulgate H–2B rules); *La. Forestry Ass'n* v. *DOL,* 745 F.3d 653, 675 (3d Cir. 2014) (same).

[8] Specifically, the 2013 IFR invited comment on the following questions with respect to employer-provided surveys: ''Are there methodological standards that can or should be included in the regulation that would ensure consistency, validity and reliability of employer-provided surveys? Are there industries in which employers historically and routinely rely on employer-submitted surveys that should be permitted to do so because of the well-developed, historical, industry-wide practice, or for other reasons? Are there state-developed wage surveys, such as state agricultural surveys, or surveys from other agencies, such as maritime agencies, that could provide data that would be useful in setting prevailing wages? Should employer surveys that include data based on wages paid to H–2B or other nonimmigrant workers be permitted in establishing a prevailing wage that does not adversely affect U.S. workers? If so, under what circumstances?'' 78 FR 24055 (Apr. 24, 2013).

[9] A substantial number of comments on the 2013 IFR repeated, to a great extent, the same arguments that had been raised in connection with the 2011 rulemaking. *See* 76 FR 3458–3463 (Jan. 19, 2011).

[10] The 2009 Prevailing Wage Guidance governed the methodology for employer-provided surveys across DOL-administered wage programs. *See* 2009 Prevailing Wage Guidance, *available at https://www.dol.gov/sites/dolgov/files/ETA/oflc/pdfs/NPWHC_Guidance_Revised_11_2009.pdf.*

occupation in a specific geographical location, or where the OE[W]S survey does not accurately represent the relevant job classification.'' *Id.* DOL immediately ceased accepting employer-provided wage surveys. 80 FR at 24151 (Apr. 29, 2015).

E. The 2015 Wage Rule, the 2016 Appropriations Rider, and DOL's Guidance Regarding the Rider's Effect on the Rule

Soon after the *CATA III* decision, the court in *Perez* v. *Perez,* No. 14–cv–682 (N.D. Fla. Mar. 4, 2015), vacated the 2008 Rule and permanently enjoined DOL from applying or enforcing it, thus creating a regulatory void. DOL had to cease operating the H–2B program briefly until it obtained a temporary stay of the *Perez* court's order until May 15, 2015. 80 FR at 24151 (Apr. 29, 2015). On April 29, 2015, DOL and DHS jointly published two rules: the *Temporary Non-Agricultural Employment of H–2B Aliens in the United States* IFR, 80 FR 24042 (Apr. 29, 2015), and the 2015 Wage Rule, *Wage Methodology for the Temporary Non-Agricultural Employment H–2B Program,* 80 FR 24146 (Apr. 29, 2015). The 2015 Wage Rule acknowledged the *CATA III* court's substantive concerns regarding the validity of employer-provided surveys in the H–2B program and stated that ''DOL's options for accepting such surveys under this final rule are now necessarily more limited than under the 2013 IFR.'' *Id.* at 24151. Referring to the questions presented to the public in the 2013 IFR for any ''additional data on the accuracy and reliability of private surveys covering traditional H–2B occupations to allow for further factual findings on the sufficiency of private surveys for setting prevailing wage rates,'' the 2015 Wage Rule discussed the comments submitted by worker advocacy groups, employers and employer associations, and associations of seafood processing employers, among others. *Id.* at 24166–24169.

After reviewing the comments provided, and recognizing the concerns underscored by the *CATA III* decision, the 2015 Wage Rule reiterated DOL's position in the 2011 Wage Rule, stating ''DOL experience reviewing employer-provided surveys since 2011 has not provided any demonstrable evidence that the wage information produced from nongovernment surveys is any more consistent or reliable than DOL determined was the case four years ago.'' *Id.* at 24168. The 2015 Wage Rule went on to state that, given DOL's administrative experience regarding employer-provided surveys, the comments received following the 2013 IFR, and the court's decision in *CATA III,* ''the Departments have decided to allow the submission of employer-provided surveys to set the prevailing wage in H–2B in limited circumstances.'' *Id.* The first two such circumstances tracked those endorsed by the court in *CATA III,* permitting ''the use of a nongovernmental employer-provided survey to set the prevailing wage only where the OE[W]S survey does not provide any data for an occupation in a specific geographical location, or where the OE[W]S survey does not accurately represent the relevant job classification.'' *Id.*

When submitting such a wage survey, an employer was required to include ''specific information about the survey methodology, including such items as sample size and source, sample selection procedures, and survey job descriptions, to allow a determination of the adequacy of the data provided and validity of the statistical methodology used in conducting the survey.'' 20 CFR 655.10(f)(4). Further, the employer was required to attest, via Form ETA–9165, that the survey was not conducted by the employer or its agents, that the surveyor either contacted a randomized sample of relevant employers or attempted to contact them all, and, among other things, that the ''survey includes wage data from at least 30 workers and three employers.'' *Id.* at § 655.10(f)(4)(i) through (iii).

Additionally, the 2015 Wage Rule included a ''third, limited category of acceptable employer-provided surveys, even where the occupation is sufficiently represented in the OE[W]S.'' 80 FR 24169–24170 (Apr. 29, 2015). In reaching this conclusion, the Departments quoted the preamble to the 2011 Wage Rule, which stated ''the prevailing wage rate is best determined through reliable Government surveys of wage rates, rather than employer-provided surveys that employ varying methods, statistics, and surveys.'' *Id.* at 24170 (citing 76 FR 3465, Jan. 19, 2011). The Departments stated that, consistent with their assessment that government surveys are reliable, ''surveys conducted and issued by a state represent an additional category of reliable government surveys.'' *Id.* at 24170. The preamble to the 2015 Wage Rule further reasoned that as the State-conducted surveys were capable of meeting the methodological standards included in the rule, and if issued without regard to the interest of any employer in the outcome of the wage reported from the survey, such surveys would be ''generally reliable and an adequate substitute for the OE[W]S.'' *Id.*

Shortly after promulgation of the 2015 Wage Rule, however, Congress included in the Department's FY 2016 appropriation a provision that mandated broader use of employer-provided surveys:

> The determination of prevailing wage for the purposes of the H–2B program shall be the greater of—(1) the actual wage level paid by the employer to other employees with similar experience and qualifications for such position in the same location; or (2) the prevailing wage level for the occupational classification of the position in the geographic area in which the H–2B nonimmigrant will be employed, based on the best information available at the time of filing the petition. In the determination of prevailing wage for the purposes of the H–2B program, the Secretary shall accept private wage surveys even in instances where Occupational Employment Statistics survey data are available unless the Secretary determines that the methodology and data in the provided survey are not statistically supported.

Consol. Appropriations Act, 2016, Public Law 114–113, sec. 112, 129 Stat. 2242, 2599 (Dec. 18, 2015). Every subsequent Appropriations Act has included the same provision.[11] Shortly after the first of the appropriations riders, DOL published a Frequently Asked Questions (FAQ) on its website stating that it would use the criteria in the 2015 Wage Rule to determine whether an employer-provided survey was ''statistically supported'' within the meaning of the appropriations rider.[12]

F. Invalidation of the 2015 Wage Rule

The United States District Court for the District of Columbia issued a decision on December 23, 2022, holding the 2015 Wage Rule—specifically 20 CFR 655.10(f)(2) and (f)(4)—to be procedurally invalid for failure to comply with the notice-and-comment requirement of the APA, and further

[11] This language has been included in each subsequent appropriation. *See* Further Consol. Appropriations Act, 2024, Public Law 118–47, Div. D, title I, sec. 110, 138 Stat. 460, 646 (2024); Consol. Appropriations Act, 2023, Public Law 117–328, Div. H, title I, sec. 110, 136 Stat. 4459, 4852 (2023); Consol. Appropriations Act, 2022, Public Law 117–103, sec. 110, 136 Stat. 49, 439 (2022); Consol. Appropriations Act, 2021, Public Law 116–260, sec. 110, 134 Stat. 1182, 1564–65 (2020); Further Consol. Appropriations Act, 2020, Public Law 116–94, sec. 110, 133 Stat. 2534, 2554 (2019); Dep't of Defense, Labor, Health and Hum. Serv., and Educ. Appropriations Act, 2019, and Continuing Appropriations Act, 2019, Public Law 115–245, sec. 111, 132 Stat. 2981, 3065 (2018); Consol. Appropriations Act, 2018, Public Law 115–141, sec. 112, 132 Stat. 348, 712 (2018); Consol. Appropriations Act, 2017, Public Law 115–31, sec. 112, 131 Stat. 135, 518–19 (2017).

[12] *See* DOL, Emp't & Training Admin., Effects of the 2016 Dep't of Labor Appropriations Act at 4 (Dec. 29, 2015), *available at https://www.dol.gov/sites/dolgov/files/ETA/oflc/pdfs/H2B_Prevailing_Wage_FAQs_DOL_Appropriations_Act.pdf.*

holding that DOL's application of the 2015 Wage Rule—specifically paragraph (f)(3)—to PWDs accepting a 2021 employer-provided wage survey was unlawful. *Williams, et al.* v. *Walsh, et al.,* 648 F.Supp.3d 70, 75 (D.D.C. 2022). Regarding the first holding, the court reasoned that although the 2015 Wage Rule purported to finalize the 2013 IFR, the *CATA III* decision had vacated the 2013 IFR. *Id.* at 91. As a result of the *CATA III* vacatur, the *Williams* court concluded that the agencies were required to either engage in a new notice-and-comment procedure or invoke the APA's good-cause exception to promulgate the 2015 Wage Rule as an IFR. *Id.* Because the agencies did neither, the court ruled that the 2015 Wage Rule was procedurally deficient, specifically invalidating paragraphs (f)(2) and (f)(4). *Id.* Having reached this conclusion with respect to the 2015 Wage Rule's procedural defects, the Court did not reach Plaintiffs' substantive facial challenges to the 2015 Wage Rule.

Regarding the Plaintiffs' as-applied challenge to the rule, the Court held that DOL erred in accepting the 2021 wage survey that had been submitted by some twenty employers because the survey had been expanded beyond the area of intended employment for stated reasons that did not meet the requirements of paragraph (f)(3). *Id.* at 95–96.

The Court remanded the case to the agencies for further consideration consistent with its opinion. *Id.* at 97–99. This rulemaking is being undertaken consistent with the court's order.

G. The Department's Authority To Promulgate This Rule

As discussed above, the INA obligates DHS to consult with ''appropriate agencies of the Government'' in considering an employer's petition for visas for nonimmigrant workers. 8 U.S.C. 1184(c)(1). DHS regulations designate the Secretary of Labor as an appropriate consultant regarding the H–2B program, specify that the Secretary shall establish procedures for administering the labor certification program, and require an employer's petition to employ H–2B workers to be accompanied by an approved temporary labor certification from the Secretary. 8 CFR 214.2(h)(6)(iii)(D), (iv); *see also* 20 CFR 655.1. The Department's authority to promulgate regulations to structure and administer the H–2B temporary labor certification process, including the determination of the prevailing wage, has been judicially upheld. *Outdoor Amusement Bus. Ass'n* v. *DHS,* 983 F.3d 671, 684–89 (4th Cir. 2020) (DOL possesses independent H–2B rulemaking authority); *La. Forestry Ass'n* v. *DOL,* 745 F.3d 653, 669 (3d Cir. 2014) (same).[13]

In addition, the language in the appropriations riders discussed in Section II.E, above, specifically authorizes the Secretary of Labor to determine whether the ''methodology and data'' used in an employer-provided wage survey is ''statistically supported.'' *See, e.g.,* Further Consol. Appropriations Act, 2024, Public Law 118–47, Div. D, title I, sec. 110, 138 Stat. 460, 646 (2024); Consol. Appropriations Act, 2023, Public Law 117–328, Div. H, title I, sec. 110, 136 Stat. 4459, 4852 (2023). The methodological and data criteria proposed here implement that statutory requirement. Accordingly, as part of its consultative role and based on the language in recent appropriations riders, the Department possesses clear authority to promulgate the proposed rule.

III. Summary of Proposed Revisions to 20 CFR Part 655; Subpart A; 20 CFR 655.10

In compliance with the *Williams* ruling, the Department hereby provides notice and an opportunity to comment on the proposed employer-provided wage survey provisions of 20 CFR 655.10(f). The Department proposes to allow employers to submit wage surveys in the same limited circumstances as the 2015 Wage Rule, the current rule, does. Specifically, if the job opportunity is not covered by a CBA or a professional sports league's rules or regulations, an employer would be permitted to submit a survey only if: (1) the survey was independently conducted and issued by a State, including any State agency, State college, or State university; (2) the survey is submitted for a geographic area where the BLS does not collect OEWS survey data, or in a geographic area where the OEWS survey provides an arithmetic mean only at a national level for workers employed in the Standard Occupational Classification (SOC); or (3) the job opportunity is within an occupational classification of the SOC system designated as an ''All Other'' classification.[14] The proposed rule, however, would eliminate the option that such a survey could report the median wages of workers performing the same or substantially similar job duties in the area of intended employment. Rather, the proposed rule would only allow the submission of a survey that includes the arithmetic mean of the wages of those workers.

The proposed rule, like the current rule, would require an employer-provided survey to contain specific information about the survey methodology, such as sample size and source, sample selection procedures, and survey job descriptions, to allow the National Prevailing Wage Center (NPWC) to determine the adequacy of the survey data and validity of the methodology used to conduct the survey. The proposed rule, however, would eliminate the standard survey attestation form, Form ETA–9165, *Employer-Provided Survey Attestations to Accompany H–2B Prevailing Wage Determination Request Based on a Non-OES Survey* (Form ETA–9165), which H–2B employers must complete and submit under the current rule when they request a survey-based prevailing wage. Instead, the proposed rule would require the employer to submit the survey to the NPWC for evaluation at the same time the employer submits its Form ETA–9141 requesting a PWD from the NPWC.

Additionally, the proposed rule would include new requirements to follow-up at least three times with non-respondents and to keep the survey open for accepting responses for at least 14 calendar days after the issuance of the third follow-up. The follow-up requirement would reduce sampling bias, and the additional 14-calendar day period would maximize the amount of wage data collected. Together, these two new requirements would result in more accurate surveys. The proposed rule would, like the current rule, provide that if the minimum sample size of 3 employers and 30 workers is not met,

[13] Although other courts have reached a different conclusion at the preliminary injunction stage of litigation challenging the Department's authority to issue regulations, *Bayou Lawn & Landscape Servs.,* 713 F.3d 1080, 1085 (11th Cir. 2013) (affirming preliminary injunction, holding the plaintiffs were likely to succeed on claim that DOL lacked authority to promulgate H–2B rules), or under a separate theory of rulemaking authority, *G.H. Daniels* v. *Perez,* 626 F. Appx. 205 (10th Cir. 2015) (DHS's 2008 H–2B rule improperly sub-delegated certification authority to DOL), the Department disagrees with the conclusions reached in those cases—which were either not merits decisions or non-precedential—regarding its rulemaking authority for the reasons explained in this NPRM.

[14] As discussed further in Section III.B, below, the Department recognizes that the language contained in every appropriations act since 2016 supersedes these limitations and requires acceptance of any employer-provided wage survey unless it determines that the methodology and data in the survey are not ''statistically supported.'' *See* n.11, above. The Department proposes to retain the same limitations as in the current rule in the event that the language is eliminated from or modified in future appropriations acts. When Congress annually reenacts a provision in appropriations acts, ''common sense suggests—and courts are free to presume—that Congress did not consider the language as creating permanent law.'' *Atlantic Fish Spotters Ass'n* v. *Evans,* 321 F.3d 220, 227 (1st Cir. 2003) (citing *U.S.* v. *Vulte,* 233 U.S. 509, 514 (1914)).

the geographic area of the survey may be expanded beyond the area of intended employment to other contiguous geographic areas in order to meet the minimum sample size requirement.

The Department seeks public comment on all aspects of this proposed rule discussed in Sections III.A through III.F below, especially the proposed revisions to the current § 655.10(f).

A. Discussion of Proposed Technical Changes to 20 CFR 655.10

Consistent with the 2015 Wage Rule, the Department proposes the following technical changes. First, the proposed rule would retain § 655.10(a) with a technical change to spell out the phrase ''prevailing wage determination'' and placing ''PWD'' in parentheses.

Second, this proposed rule would retain § 655.10(a) and (b), with three technical changes in § 655.10(b) by inserting the word ''Wage'' between the words ''and Statistics'' and inserting a ''W'' into ''OES'' in the parenthetical ''(OES).'' Also, the proposed rule would replace the term ''OFLC'' with ''the NPWC'' in § 655.10(b)(2). These technical changes are for consistency with other sections of this proposed rule.

Third, this proposed rule would retain § 655.10(e) with technical changes to: (1) replace the word ''provide'' with the word ''determine''; (2) change the placement of ''Form'' in the parenthetical ''(ETA Form-9141)'' to precede ''ETA''; and (3) replace ''its'' with the phrase ''the determination and the NPWC's'' for clarity and to be consistent with other sections of this proposed rule.

B. Discussion of Proposed Revisions to 20 CFR 655.10(f)(1)

The Department proposes to allow employers to submit wage surveys in the same three circumstances as the current rule does. The first two circumstances would remain unchanged, and the third would be revised as discussed in Sections III.B.1 through III.B.3, below. The Department, however, does not intend to apply or enforce these limitations on wage surveys as long as the language contained in the appropriations acts discussed above remains in effect. That language requires the Secretary to ''accept private wage surveys even in instances where Occupational Employment Statistics survey data are available unless the Secretary determines that the methodology and data in the provided survey are not statistically supported.'' [15] This language supersedes the current § 655.10(f)(1) and would supersede the proposed § 655.10(f)(1) as long as that language remains in effect. The Department would apply and enforce the proposed § 655.10(f)(1) only if and when Congress eliminates that language.

1. State Conducted Survey

Consistent with current § 655.10(f)(1)(i), this proposal would permit employers to submit prevailing wage surveys that are independently conducted and issued by a State, including any State agency, State college, or State university. As stated in the preamble to the 2015 Wage Rule, the Department continues to believe that surveys that are independently conducted and issued by a State are as reliable as ''Government'' surveys.[16] Since a ''state must independently conduct and issue the survey, [this requirement] means that the state must design and implement the survey without regard to the interest of any employer in the outcome of the wage reported from the survey.'' [17] In addition, a State would have to satisfy the proposed rule's methodological and data requirements to be used to establish a PWD.[18] The Department considers State agencies to generally be neutral third parties that are free from bias and have no self-interest or motivation with respect to the result of the survey. Based on its ''substantial experience with wage surveys conducted by the states,'' the Department continues to think that surveys conducted by a State agency are appropriate as a wage source for the H–2B program provided they meet the methodological standards described below.[19]

Where a State conducts a survey that meets the methodological and data requirements in this proposed rule, an employer may attach the State-conducted wage survey to a prevailing wage request for consideration as a wage source for its job opportunity. While there may be concerns about undue influence over the development and administration of a survey, the Department proposes to allow the use of surveys conducted by State agencies, such as State agriculture or maritime agencies, or State colleges and universities. These entities must design and implement the survey without regard to the interest of any employer in the outcome of the wage reported from the survey. In addition, to satisfy this requirement, a State official must approve the survey.[20]

2. OEWS Data Limitation in Certain Geographic Areas

Consistent with current § 655.10(f)(1)(ii), the Department proposes that employers may submit surveys where the OEWS survey does not collect data in a geographic area, or where the OEWS reports a wage for the SOC based only on national data. For geographic areas where the OEWS does not collect data or does not collect enough data to report a wage (*e.g.,* because the sample size is too small), wage surveys could provide the Department with access to data it simply would not otherwise have. For geographic areas where only an OEWS national wage is available, a wage survey could provide data for the geographic area in which the job opportunity exists. Thus, this proposed rule reflects the Department's view that employers should be permitted to submit wage surveys where the Department does not have readily available or appropriate OEWS data to issue a prevailing wage for the occupation in the area of intended employment where the job opportunity will be performed. Acceptance of private wage surveys in these circumstances was expressly endorsed by the court in *CATA III*.[21]

3. OEWS Data Limitation in Certain SOC Codes

According to the BLS, the SOC system is used ''to classify workers and jobs into occupational categories for the purpose of collecting, calculating, analyzing, or disseminating data.'' [22] Occupations that have similar job duties, and in some cases, similar skills, education, and/or training, are classified in a distinct detailed SOC code.[23] Under the SOC system, occupations are assigned an SOC code based on the worker's job duties, not the worker's job title(s).[24] When workers do not perform job duties described in any distinct detailed occupation, the SOC system classifies the occupation as one contained within an ''All Other'' SOC code.[25] For example, according to the BLS, an ''All Other'' SOC code is 49–9099, Installation, Maintenance, and

[15] *See* n.11, above.

[24] *Id.* at 23.

[25] *Id.*

Repair Workers, All Other. The BLS provides these examples of occupational titles that would fall under this SOC code: Bowling Alley Mechanic, Fabric Awning Repairer, Fire Extinguisher Installer, Gasoline Pump Installer, Gunsmith, Parachute Repairer, Sail Repairer.[26]

Consistent with the 2015 Wage Rule, this proposed rule would continue to permit employers to submit surveys where the job opportunity is within an ''All Other'' SOC code. This situation, similar to the one described in the preceding section, is one in which a wage survey could provide the Department access to information that it either simply does not have or is more sufficiently tailored to the specific occupation in the employer's job opportunity. To meet this requirement, which is currently in § 655.10(f)(1)(iii)(B), an employer's job opportunity, as entered on the employer's prevailing wage application, must entail job duties requiring ''knowledge, skills, abilities, and work tasks that are significantly different than those in any SOC classification other than [an] 'all other' category.'' [27]

The Department proposes to delete the current § 655.10(f)(1)(iii)(A) and redesignate current § 655.10(f)(1)(iii)(B) as § 655.10(f)(1)(iii). Under the current § 655.10(f)(1)(iii)(A), the Department accepts an employer-provided survey when the employer's job opportunity is not included in an occupational classification of the SOC system; and under the current § 655.10(f)(1)(iii)(B), the Department accepts an employer-provided survey when the job opportunity is within an ''All Other'' SOC code. The Department proposes to delete subordinate paragraph (A) because, in the Department's experience, a more specific SOC code is invariably applicable. In assigning an SOC code, the Department may consider the employer's prior filing history.[28] Acceptance of private wage surveys when the job opportunity falls within an ''All Other'' SOC code is consistent with the court's decision in *CATA III.*[29]

C. Discussion of Proposed Revisions to 20 CFR 655.10(f)(2)

The proposed rule would require that employer-provided wage surveys provide the arithmetic mean of the wages of all workers performing the same or substantially similar job duties. This proposed rule uses the phrase ''substantially similar,'' which is derived from the Department's permanent labor certification regulation at 20 CFR 656.40(d).[30] For purposes of this proposed rule, ''workers performing the same or substantially similar job duties'' refers to workers that are similarly employed in the area of intended employment. The proposed rule would eliminate the exception in the current rule that ''if the survey provides a median but does not provide an arithmetic mean, the prevailing wage applicable to the employer's job opportunity shall be the median of the wages of workers similarly employed in the area of intended employment.'' [31] Under this proposed rule, if an employer submits a survey that provides only the median wage, the NPWC would issue an OEWS wage for such a PWD request.

The Department proposes this change to be consistent with the methodology applied when the OEWS survey is the wage source used to determine the prevailing wage rate. As stated in the preamble to the 2015 Wage Rule, ''[t]he mean is the average of all wages surveyed in an occupation in the geographic area, and in the . . . [occupations in the H–2B program], the mean represents the average wage paid to [workers] to perform that job. If the prevailing wage is set below the mean, the average wage of workers in the occupation would be drawn down, resulting in a depressive effect on U.S. workers' wages overall.'' [32] The preamble went on to note that ''the Department has set the wage rate at the mean rather than at the median because the mean provides equal weight to the wage rate received by each worker in the occupation across the wage spectrum and maintaining the OE[W]S mean provides regulatory continuity. As a result, when the prevailing wage is based on the OE[W]S survey, the Department will set it at the mean because it is the most appropriate wage to use in order to avoid immigration induced labor market distortions inconsistent with the requirements of INA.'' [33]

The Department's experience since the introduction of the 2015 Wage Rule is that H–2B employers have generally submitted surveys with the arithmetic mean of the wages of all workers performing the same or substantially similarly job duties in the area of intended employment for establishing an H–2B survey-based prevailing wage. As a result, the Department does not believe that elimination of the option to provide a survey using a median wage will have a significant practical effect because the NPWC rarely receives surveys that only include a median wage. Moreover, the Department continues to think that setting the wage below the mean would have a depressive effect on wages, and therefore this proposed change is consistent with the Department's obligation to ensure that U.S. workers' wages are not adversely affected when setting a prevailing wage for workers employed in the H–2B program.[34]

Under this proposed paragraph, the Department would continue to require that surveys provide the arithmetic mean of the wages of all workers similarly employed without regard to the immigration status of the workers surveyed. Doing so remains consistent with the Department's historical practice in the H–2B program [35] and would continue to promote consistency with the OEWS survey, which includes wage data from all workers without regard to their immigration status.[36] Further, commercial wage surveys generally do not exclude workers from the survey based on their immigration status, and, where the OEWS does not provide adequate information for the occupation or geographic location, the Department is concerned that requiring the exclusion of nonimmigrant workers would effectively bar employers from using such surveys—thus potentially leaving the Department without a reliable basis on which to set a prevailing wage. Therefore, as stated in the 2015 Wage Rule and continued in this proposed rule, the Department ''will not accept wage surveys that exclude the wages of U.S. workers or exclude the wages of nonimmigrant workers.'' [37]

D. Discussion of 20 CFR 655.10(f)(3)

Consistent with the 2015 Wage Rule, the Department would continue to allow, under proposed § 655.10(f)(3), employer-provided surveys to cover a geographic area beyond the area of intended employment only if: (1) the expansion is limited to geographic areas that are contiguous to the area of

[37] *Id.*

intended employment; (2) the expansion is required to meet either the 30-worker or 3-employer minimum; and (3) the geographic area is expanded no more than necessary to meet these minimum requirements.

Consistent with the 2015 Wage Rule, a geographic area may be expanded in two ways. First, if an employer contracts with a surveyor familiar with the area of employment, the surveyor may determine before beginning the survey that the survey will not elicit a sufficient response to meet the regulatory requirements—for example, if there are not enough employers or workers in the local area of employment. In those cases, the surveyor may elect, at the outset, to survey a geographic area larger than the area of employment. In its submission to the NPWC, the survey must explain the decision to expand the survey area at the outset, and describe the extent of the expansion and the reason why the expansion was needed to meet the regulatory requirements.[38]

Second, a survey may be expanded incrementally. Expansion would be permitted only if the survey of the area of intended employment did not yield sufficient wage data to meet the minimum sample size requirements. In such circumstances, consistent with current guidance, ''the geographic area of consideration should not be expanded more than is necessary'' to meet either the 30-worker or 3-employer, or both, requirements of § 655.10(f)(4)(ii).[39] For example, as noted in the guidance, it would be ''appropriate to survey cities and counties that are in close proximity to the area of intended employment rather than using a State-wide average wage rate.'' [40] In all cases where an area larger than the area of intended employment is surveyed, the survey would have to establish that the expansion was necessary to meet either the 30-worker or 3-employer requirements of § 655.10(f)(4)(ii).[41]

Further, consistent with current practice, incremental geographic area expansion beyond the area of intended employment must be consistent with OEWS survey methodology,[42] meaning that a ''survey's expansion may take place across state lines, as long as the new area(s) added to the survey [is] contiguous to the area of intended employment in which the job opportunity is located and the expansion extends only as much as is necessary to satisfy the minimum sample size requirement.'' [43] Any such expansion is limited to geographic areas that are contiguous to the area of intended employment because the NPWC's ''experience demonstrates that some employers have submitted surveys that expanded the survey area using remote geographic areas located far from the job opportunity. [The Department] see[s] no reason for a survey to ignore areas immediately surrounding the job opportunity in favor of geographic areas located large distances from the job.'' [44] For example, in *Williams,* the surveyor expanded the geographic area of the survey without explaining why a statewide survey was needed instead of a ''more incremental approach.'' [45] Thus, the Department continues to believe that areas contiguous to the area of intended employment, which are closest to the area of intended employment, better reflect the wages in the area of intended employment. As such, this proposal seeks to guard against the potential for wage depression that may result when a survey is expanded to geographic areas that are remote from the location of the job opportunity and where wages may be lower.

The Department is proposing clarifying guidance on the steps for conducting geographic area expansion if the area of intended employment surveyed area does not meet the 30-worker and 3-employer requirements under proposed § 655.10(f)(4)(ii). In particular, if a survey is incrementally expanded beyond the area of intended employment to meet the minimum sample size requirements, the surveyor would have to survey the newly added area using the same method used to survey the original area of intended employment for consistency.[46]

Under this proposed rule, if the NPWC determines that the geographic area of an employer-provided survey appears to be broader than permitted by § 655.10(f)(3), the NPWC will review the survey for the reason(s) why and how the geographic area was expanded, as it does under current practice. Then, the NPWC may issue a request for information for an explanation for the reason(s) why and how the geographic area was expanded, if needed. An example of such an explanation, or a part of such an explanation, could be that the expansion was needed to meet the regulatory requirements because there were not enough workers or employers in the area of intended employment and the area of intended employment was fully surveyed (*i.e.,* all geographic components such as counties and townships, etc.). Consistent with current practice, if the NPWC determines the geographic area was improperly expanded, the NPWC would reject the survey and issue an OEWS wage for the employer's job opportunity.

E. Discussion of Proposed Revisions to 20 CFR 655.10(f)(4)

Under the current rule, when an employer requests a PWD based on a survey, the Department requires the employer to submit the Form ETA–9165, *Employer-Provided Survey Attestations to Accompany H–2B Prevailing Wage Determination Request Based on a Non-OES Survey* (''Form ETA–9165''), with the Form ETA–9141, *Application for Prevailing Wage Determination* (''Form ETA–9141''). This proposed rule would eliminate the Form ETA–9165, which was intended to streamline the Department's analysis of employer-provided surveys and yield

[43] *See* OFLC Frequently Asked Questions and Answers, #32 (Sep. 1, 2016), *available at https://foreignlaborcert.doleta.gov/faqsanswers.cfm* (Question: ''The surveyor has not been able to elicit a response to the survey in the occupation and area of intended employment that meets the minimum sample size requirements (*i.e.,* at least 3 employers and 30 workers) of the 2015 H–2B Wage Final Rule. May the surveyor expand the geographic area surveyed?'') and (Answer: ''Yes, under certain limited conditions, the geographic area surveyed may be expanded incrementally until employer-provided survey sample size requirement is met (*i.e.,* at least 3 employers and 30 workers). A survey may be expanded to cover a geographic area larger than the area of intended employment in which the job opportunity is located only where that area of intended employment does not generate a sufficient sample to meet minimum size requirements. Under that condition, the survey may only be expanded to geographic areas that are contiguous to the area of intended employment only to the extent necessary to generate a sample size sufficient to satisfy the minimum sample size requirement. The survey's expansion may take place across state lines, as long as the new area(s) added to the survey are contiguous to the area of intended employment in which the job opportunity is located and the expansion extends only as much as is necessary to satisfy the minimum sample size requirement. If the surveyor determines after surveying the area of intended employment that the survey does not meet minimum sample size requirements, it must either conduct a new random sample of the expanded area (including the area of intended employment) or make a reasonable, good faith effort to survey all employers employing workers in the occupation and expanded area surveyed.'').

consistent results. In the Department's experience, however, using the current Form ETA–9165 has proven inadequate to determine whether the survey meets the data and methodological requirements of the current rule. The Form ETA–9165 is based on an employer's attestations regarding an independently conducted survey but in practice, the NPWC has requested the survey itself for nearly all survey-based H–2B prevailing wage requests to evaluate whether the survey satisfied the data and methodological requirements of the regulation. The current regulation does not explicitly require that the survey be submitted concurrently with the Form ETA–9141. This has necessitated that the NPWC contact the employer to submit the actual survey instrument. Thus, to align the regulation with the NPWC's practice of reviewing the actual survey instrument alongside the submitted Form ETA–9141, the Department proposes to require the employer to submit the survey simultaneously with the Form ETA–9141 when an employer requests a survey-based H–2B prevailing wage from the NPWC.

The Department therefore proposes to discontinue the Form ETA–9165. Doing so would benefit PWD applicants by eliminating the burden of completing a form, and would benefit the Department by simplifying the survey-based H–2B prevailing wage process. This simplified process, in turn, would assist the Department in maintaining the integrity of the wage determination process for the H–2B program because the Department would have a copy of the survey itself during its review of the employer's Form ETA–9141, without needing to rely on the Form ETA–9165 and without needing to separately request the survey, potentially speeding up the determination process. Consequently, the proposal would better protect U.S. worker wages against the potential adverse effects that the employment of H–2B workers could have as the Department would have all necessary information available to make a determination about the use of the survey.

The elimination of the Form ETA–9165 would not affect how employers complete the Form ETA–9141. The Department does not propose any changes to the Form ETA–9141. Employers would continue to complete the Form ETA–9141 as they have been doing. However, the Department proposes to revise the General Instructions for the Form ETA–9141 by including in the Wage Source Information section instructions to submit the survey concurrently with the Form ETA–9141 when an employer seeks a survey-based PWD.

Also, the proposed rule would replace the phrase ''the adequacy of the data provided and validity of the statistical methodology used in conducting the survey'' in paragraph (f)(4) with ''whether the survey meets all of the requirements of this section, including the following.'' This change is intended to clarify that the survey would have to meet the requirements of proposed § 655.10(f)(4)(i) through (v), in addition to containing specific information about the survey methodology, such as the sample size, sample selection procedures, and survey job descriptions.

1. Discussion of Proposed Revisions to 20 CFR 655.10(f)(4)(i)

Initially, the Department proposes a technical change to the regulatory text at § 655.10(f)(4)(i) to clarify that the ''good faith'' requirement applies to both methods of conducting surveys permitted. That is, the surveyor would have to make a reasonable, good faith attempt to either: (1) contact all employers of workers performing the same or substantially similar job duties in the geographic area surveyed; or (2) conduct a randomized sampling of such employers. The Department continues to believe, as it noted in the preamble of the 2015 Wage Rule, that ''[p]roper randomization requires the surveyor to determine the appropriate 'universe' of employers to be surveyed before beginning the survey and to select randomly a sufficient number of employers to survey to meet the minimum criteria pertaining to the number of employers and workers who must be sampled.'' [47] This proposed provision additionally explains what a good faith attempt consists of, as discussed below.

The proposed rule would make two substantive changes to the current § 655.10(f)(4)(i). First, it would replace the phrase ''in the occupation'' with ''performing the same or substantially similar job duties.'' This change would reflect the reality that the survey is conducted before the employer submits its PWD application and the NPWC assigns an SOC code (identifying the occupation) based on the description of job duties contained in the PWD application. Consequently, a survey conducted based on an occupational classification would necessarily require speculation about which SOC code the NPWC will subsequently assign. As explained in the 2015 Wage Rule preamble, to assess whether workers are performing the ''same or substantially similar'' job duties, ''the surveyor would take into account the nature and duties of the job opportunity, and contact a large enough sample of employers to yield usable data for at least three employers and 30 workers similarly employed'' [48] in the geographic area surveyed.

Second, the proposed rule would add a new requirement to § 655.10(f)(4)(i) that at least three follow-up attempts be made to contact non-respondents. The contact must be made using the same method of contact initially used, and at least two other active methods of contact—such as email, telephone, or site visit—across different business days and times that are most likely to receive the most response. This proposed requirement would reduce sampling bias and therefore yield more accurate and representative survey results.

2. Discussion of Proposed Revisions to 20 CFR 655.10(f)(4)(ii)

Consistent with the 2015 Wage Rule, this proposed rule in § 655.10(f)(4)(ii) would require surveys submitted under this paragraph to include wage data from at least 30 workers and 3 employers. These minimums are based, as they were in the 2015 Wage Rule, on criteria that BLS OEWS itself uses to provide Office of Foreign Labor Certification (OFLC) with wage data not only for the H–2B program, but also for other foreign labor certification programs, such as the H–1B program and the permanent labor certification program. The OEWS survey data has been used by OFLC to produce prevailing wage data for those programs since 1998. In October 2020, this arrangement was formalized in a memorandum of understanding (MOU) between BLS and OFLC, which was amended in January 2021 and runs for 5 years. The MOU describes the standards and procedures BLS uses to provide wage data to OFLC, stating that BLS will ''report wages'' to OFLC for each occupational classification and geographic area ''that pass BLS confidentiality criteria and include a minimum of three (3) establishments . . . representing no fewer than 30 employees reported across the entire wage distribution.'' [49]

These minimum criteria and the other proposed requirements in § 655.10(f) also satisfy the Appropriations Acts' requirement that employer-provided

[47] *Id.*

[48] 80 FR 24146, 24173 (Apr. 29, 2015).

[49] Amended MOU Between the DOL's Employment and Training Administration Office of Foreign Labor Certification and Bureau of Labor Statistics for the Sharing of Occupational Wage Information; *see* 80 FR 24146, 24173 (Apr. 29, 2015).

wage surveys be ''statistically supported.'' *See* Further Consol. Appropriations Act, 2024, Public Law 118–47, Div. D, title I, sec. 110, 138 Stat. 460, 646 (2024). Elsewhere, Congress has used more precise terms of art, the meanings of which are widely accepted by statisticians, such as ''statistically significant'' and ''statistically valid'' (which appears in the INA itself [50]).[51] Here, however, Congress chose to use the term ''statistically supported,'' which does not appear in the U.S. Code. Immediately after Congress first enacted the ''statistically supported'' requirement, the Department published guidance on its website stating that ''[w]e interpret the requirement of the 2016 DOL Appropriations Act that the 'methodology and data' in a private survey be 'statistically supported' to be those methodological criteria for surveys set out in the 2015 Wage Rule.'' [52] Congress subsequently re-enacted the same language in every DOL Appropriations Act since 2016. *See* n.11, *supra.* Congress is ''presumed to be aware of an administrative or judicial interpretation of a statute and to adopt that interpretation when it re-enacts a statute without substantive change.'' [53] DOL continues to believe that surveys that meet the proposed 3-and-30 minimums BLS has used for 25 years to provide OEWS survey data to OFLC, along with the other criteria BLS uses to provide OEWS survey data to OFLC, and the additional survey requirements proposed in § 655.10(f) and explained in this preamble, are ''statistically supported'' as required by the provision in the Department's appropriation.

Under the proposed rule, as a new requirement in paragraph (f)(4)(ii), surveyors would have to continue accepting employer responses for at least 14 calendar days from the date the third notification in proposed paragraph (f)(4)(i) is sent even if responses have been received from 3 employers including the wages of 30 workers. This additional 14-calendar day period would maximize the opportunity to include as much data as possible in the survey so that it is as accurate and representative as possible. Also, the additional 14-day calendar period seeks to prevent the skewing of results by an employer that could occur should the survey conclude as soon as the minimum number of responses are received. If the minimum sample size requirements are not met, the geographic area of the survey may be extended beyond the area of intended employment under proposed § 655.10(f)(3).

Consistent with the 2015 Wage Rule, a survey may not report wages selectively, include responses that are based on only a portion of the workers performing the same or substantially similar job duties or limit the wage survey data to include only enough data to meet the minimum 30-worker threshold. The survey would have to include wage data for all workers performing the same or substantially similar job duties regardless of their level of skill, education, seniority, experience, or immigration status.[54] If, after following-up with non-respondents as described above, a surveyor could not collect wage data from at least 3 employers for at least 30 workers, the surveyor would be permitted to expand the survey beyond the area of intended employment as discussed above in the section on § 655.10(f)(3) of this proposed regulation.

3. Discussion of Proposed Revisions to 20 CFR 655.10(f)(4)(iii)

Consistent with the 2015 Wage Rule, in § 655.10(f)(4)(iii), bona fide third parties would have to conduct any employer-provided surveys submitted under proposed § 655.10(f)(1)(ii) or (iii). This proposed rule clarifies that not only would the H–2B employer, its agent, and its representative be prohibited from conducting the employer's survey, but so would any of the employer's employees and their attorney. The proposed rule would exclude these non-bona fide third parties to prevent their personal self-interests from affecting the reliability of employer-provided surveys, and in the case of employees, prevent an employer from placing any undue pressure on the employee conducting the survey. As the Department stated in the preamble of the 2015 Wage Rule and affirms here, ''[e]ven H–2B employers, representatives, agents, and attorneys who are not directly involved in the application for which the survey is submitted are barred from conducting a wage survey . . . because we conclude that H–2B employers and the entities that represent them are likely to share common interests and biases that may affect the reliability of such surveys.'' [55] The preamble also explained that requiring a bona fide third party to conduct an employer-provided survey would ''not bar an employer from paying an otherwise bona fide third party to conduct the survey. In addition, employers who are eligible to submit a survey under proposed § 655.10(f)(1)(ii) or (iii) would be permitted to submit a survey conducted and issued by a state.'' [56]

4. Discussion of Proposed Revisions to 20 CFR 655.10(f)(4)(iv)

Consistent with the 2015 Wage Rule, the proposed rule would require employer-provided surveys under proposed § 655.10(f)(1) be conducted across industries, which means surveying employers in all industries employing workers performing the same or substantially similar job duties as those contained in the job opportunity in the area of intended employment.[57] This requirement, the purpose of which is to cast as wide a net as possible to obtain the most representative data available, would be consistent with the Department's criteria for review of employer-provided surveys in the H–1B temporary program and permanent labor certification program. Surveying across industries provides a broader representation of wage data for jobs requiring the same or substantially similar duties, irrespective of the sector or segment of the economy where the job duties are being performed. Thus, the proposed rule would clarify that ''across industries'' means all industries that employ workers performing similar or substantially similar job duties. For example, a wage survey for a Landscaping and Groundskeeping Workers job opportunity that surveyed only hotels would not satisfy the ''across industries'' requirements because industries other than hotels employ such workers. Surveying workers performing these job duties not only at hotels, but also workers performing similar or substantially similar job duties at hospitals, schools, country clubs, golf courses, and other outdoor sports venues, among others, would provide a better representation of wages within that occupation.

5. Discussion of Proposed Revisions to 20 CFR 655.10(f)(4)(v)

This proposed rule would continue the requirement under the current rule that all types of pay be included in employer-provided wage surveys. As stated in the preamble of the 2015 Wage Rule, all types of pay include ''the base rate of pay, commissions, cost-of-living allowances, deadheading pay, guaranteed pay, hazard pay, incentive pay, longevity pay, piece rate, portal-to-portal rate, production bonuses, and tips.'' [58] For example, if an employer guarantees a minimum hourly wage, but pays other types of monetary compensation, including tips, commissions, or piece rates, in excess of this minimum hourly wage, the total of the minimum hourly wage and these additional types of compensation would have to be included in the hourly wage paid reported in the survey. This proposal remains consistent with the methodology of the OEWS survey.[59] The Department continues to think that, as explained in the preamble to the 2015 Wage Rule, ''[i]f we did not require inclusion in the survey wage reported of all of the types of pay reported to the OE[W]S, those limited surveys permitted by [the rule] would necessarily undercut the OE[W]S by not reporting the complete wage paid. We understand that employers ordinarily calculate the wage paid for OE[W]S purposes by consulting payroll records.'' [60] While the Department recognizes that this requirement will impose some burden on employers, given that the requirement is consistent with how the OEWS is administered, and given the importance of the Department having a complete picture of the compensation paid, the Department does not think that the burden outweighs the benefit of this requirement.

F. Discussion of Proposed Regulatory Revisions to 20 CFR 655.10(f)(5)

The current rule requires an employer-provided survey to be: (1) the most current edition of the survey; and (2) based on wages paid to workers no more than 24 months before the survey was submitted to the NPWC. The proposed rule would maintain these same two requirements, but the language regarding the second requirement would be changed to reflect the proposed new requirement in paragraph (f)(4) that the survey must be submitted to the NPWC together with the employer's Form ETA–9141.[61] In addition, the proposed rule would eliminate the first sentence currently in § 655.10(f)(5), which states that ''[t]he survey must be based upon recently collected data,'' [62] because the remaining sentence specifies the two components of ''recently collected data,'' as mentioned above. Therefore, the introductory sentence is unnecessary.

The requirement that the survey be based on wages paid to workers in the prior 24 months was originally codified in the 2008 Rule, *Labor Certification Process and Enforcement for Temporary Employment in Occupations Other Than Agriculture or Registered Nursing in the United States (H–2B Workers), and Other Technical Changes,* 73 FR 78020 (Dec. 19, 2008), and retained in the 2015 Wage Rule. The 24-month and most-current-edition standards would, together, continue to protect both U.S. and H–2B workers' wages by ensuring that employer-provided surveys are based on the most recent wage information available.

IV. Administrative Information

A. Executive Order 12866: Regulatory Planning and Review; Executive Order 14094: Modernizing Regulatory Review; and Executive Order 13563: Improving Regulation and Regulatory Review

Under E.O. 12866, the Office of Management and Budget's (OMB) Office of Information and Regulatory Affairs (OIRA) determines whether a regulatory action is significant and, therefore, subject to the requirements of the E.O. and review by OMB. 58 FR 51735 (Oct. 4, 1993). Section 3(f) of E.O. 12866, as amended by E.O. 14094, defines a ''significant regulatory action'' as an action that is likely to result in a rule that: (1) has an annual effect on the economy of $200 million or more, or adversely affects in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, Territorial, or Tribal Governments or communities; (2) creates serious inconsistency or otherwise interferes with an action taken or planned by another agency; (3) materially alters the budgetary impacts of entitlement, grants, user fees, or loan programs, or the rights and obligations of recipients thereof; or (4) raises legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the E.O. 88 FR 21879 (Apr. 11, 2023). OIRA has designated this NPRM as ''not significant'' per E.O. 12866 and waived review.

E.O. 13563 directs agencies to, among other things, propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs; the regulation is tailored to impose the least burden on society, consistent with achieving the regulatory objectives; and in choosing among alternative regulatory approaches, the agency has selected those approaches that maximize net benefits. E.O. 13563 recognizes that some costs and benefits are difficult to quantify and provides that, where appropriate and permitted by law, agencies may consider and discuss qualitatively values that are difficult or impossible to quantify, including equity, human dignity, fairness, and distributive impacts.

Outline of the Analysis

Section IV.A.1 describes the need for the proposed rule, and Section IV.A.2 describes the process used to estimate the costs of the rule and the general inputs used, such as wages and number of affected entities. Section IV.A.3 explains how the provisions of the proposed rule would result in costs and cost savings and presents the calculations the Department used to estimate them. In addition, Section IV.A.4 provides a description of qualitative benefits. Section IV.A.5 summarizes the estimated 1st-year and 10-year total and annualized costs and cost savings of the proposed rule.

Summary of the Analysis

The Department estimates that the proposed rule would result in costs and cost savings. As shown in Exhibit 1, the proposed rule is expected to have an annualized cost of $1,285, an annualized cost savings of $5,466, and a net cost savings of $4,535 at a discount rate of 2 percent.[63]

[58] *Id.* at 24175.

[59] *See* ''How are 'wages' defined by the OEWS survey?'' OEWS, Frequently Asked Questions, *available at https://www.bls.gov/oes/oes_ques.htm.*

[60] 80 FR 24146, 24175 (Apr. 29, 2015).

[61] For purposes of comparison, OEWS estimates are based on data collected over a 3-year period, with the survey updated every 6 months based on more recent data. The May 2022 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2022, November 2021, May 2021, November 2020, May 2020, and November 2019. *See* Technical Notes for May 2022 OEWS Estimates (bls.gov), *available at https://www.bls.gov/oes/current/oes_tec.htm.* In addition, in the 1990s, the DOL recommended that State employment service agencies (SESAs) use their in-house wage surveys for only 2 years. *See* GAL 4–95 at pp. 9–10 (''SESA Conducted Prevailing Wage Surveys . . . Length of Time Survey Results are Valid . . . SESAs may use survey results for up to 2 years after the data are collected. After 2 years, the results of a new survey should be implemented.'').

[62] 20 CFR 655.10(f)(5).

[63] The proposed rule is expected to have an undiscounted annual cost of $1,369, an

Continued

EXHIBIT 1—ESTIMATED MONETIZED COSTS AND COST SAVINGS OF THE PROPOSED RULE

[2023 $]

	Costs	Cost savings	Net cost savings
1st Year	$12,850	$5,359	−$7,492
Undiscounted Annual	1,285	5,359	4,074
Annualized with at a Discount Rate of 2%	1,431	5,359	4,535

The total cost of the proposed rule is associated with rule familiarization and the new requirements that the surveyor must continue to accept responses for at least 14 calendar days after receiving the third employer response to the survey request. In addition, the surveyor must include no fewer than three contacts with non-respondents, using the same method of contact initially used, and at least two other active methods of contact across different business days and times that are most likely to receive the most response. Cost savings are the results of the elimination of the Form ETA–9165, *Employer-Provided Survey Attestations to Accompany H–2B Prevailing Wage Determination Request Based on a Non-OES Survey.* See the costs and cost savings subsections of Section IV.A.3 (Subject-by-Subject Analysis).

1. Need for Regulation

As discussed further in Section II.F, *supra,* this NPRM is required by a court ruling that, in promulgating the 2015 Wage Rule, the agencies failed to comply with the APA's notice-and-comment requirements. *Williams* v. *Walsh,* 648 F. Supp. 3d 70 (D.D.C. 2022). Consequently, the court remanded the rule ''for further consideration consistent with'' its opinion. *Id.* at 99. Additionally, in light of issues raised (although not decided) in that litigation, OFLC is proposing to revise the data and methodological criteria for employer-provided wage surveys.

2. Analysis Considerations

The Department estimated the costs and the cost savings of the proposed rule relative to the existing baseline (*i.e.,* the current practices for complying, at a minimum, with the H–2B program as currently codified at 20 CFR part 655).

In accordance with the regulatory analysis guidance articulated in OMB's Circular A–4 and consistent with the Department's practices in previous rulemakings, this regulatory analysis focuses on the likely consequences of the proposed rule (*i.e.,* costs, cost savings, and qualitative benefits). The analysis covers 10 years (from 2025 through 2034) to ensure it captures major costs, cost savings, and qualitative benefits that accrue over time. The Department expresses all quantified impacts in 2023 dollars and uses undiscounted annuals and a discount rate of 2 percent, pursuant to Circular A–4.

Exhibit 2 shows the total number of H–2B PWD requests and the number of submissions requesting a survey wage for FYs 2020—2023. The Department used this information to estimate the costs and cost savings of the proposed rule.

EXHIBIT 2—NUMBER OF UNIQUE SUBMISSIONS FOR H–2B SURVEY REQUESTS *

FY	Number of H–2B PWD requests	Number of H–2B wage survey requests	% of total submissions requesting survey wage
2020	11,629	77	0.7
2021	14,748	161	1.1
2022	24,914	378	1.5
2023	24,715	267	1.1
Average	19,002	221	1.1

* Data source: OFLC performance data for FY2020–2023.

a. Compensation Rates

In Section IV.A.3 (Subject-by-Subject Analysis), the Department presents the costs, including labor, associated with the implementation of the provisions of the proposed rule. Exhibit 3 presents the hourly compensation rates for the occupational categories expected to experience a change in the number of hours necessary to comply with the proposed rule. The Department used the mean hourly wage rate for private sector human resources (HR) specialists (SOC code 13–1071).[64] Wage rates are adjusted to reflect total compensation, which includes nonwage factors such as overhead and fringe benefits (*e.g.,* health and retirement benefits). We use an overhead rate of 17 percent [65] and a fringe benefits rate based on the ratio of average total compensation to average wages and salaries in 2023. For private sector employees, we use a fringe benefits rate of 42 percent.[66] We then multiply the loaded wage factor and the overhead rate by the wage rate to calculate an hourly compensation rate. The Department used the hourly compensation rates presented in Exhibit 3 throughout this analysis to estimate the labor costs for each provision.

undiscounted annual cost savings of $4,861, and an undiscounted annual net cost savings of $3,492 in 2023 dollars.

[64] BLS. (2024). May 2023 National Occupational Employment and Wage Estimates: 13–1071—Human Resources Specialists. Retrieved from: *https://www.bls.gov/oes/current/oes131071.htm.*

EXHIBIT 3—COMPENSATION RATES

[2023 Dollars]

Position	Grade level	Base hourly wage rate (a)	Loaded wage factor (b)	Overhead costs (c)	Hourly compensation rate (d) = a + b + c
HR Specialist	N/A	$36.573	$15.36 ($36.57 × 0.42)	$6.22 ($36.57 × 0.17)	$58.15

3. Subject-by-Subject Analysis

The Department's analysis below covers the costs, cost savings, and qualitative benefits of the proposed rule. This proposed rule includes the quantified cost of rule familiarization, the unquantified cost of additional survey requirements, and the quantified cost savings of elimination of the Form ETA–9165, and qualitative discussion of benefits.

a. Costs

The following section describes the quantified and unquantified costs of the proposed rule.

i. Rule Familiarization

If the proposed rule takes effect, H–2B employers who are submitting an employer-provided survey would need to familiarize themselves with the new regulations. Consequently, this would impose a one-time cost in the 1st year.

To estimate the 1st-year cost of rule familiarization, the number of unique H–2B employers who are submitting an employer-provided survey (221) was multiplied by the estimated amount of time required to review the rule (1 hour). The Department requests public comments and inputs regarding this estimate. This number was then multiplied by the hourly compensation rate of HR specialists ($58.15 per hour). This calculation results in a one-time undiscounted cost of $12,850 in the 1st year after the proposed rule takes effect. The annualized cost over the 10-year period is $1,431 at a discount rate of 2 percent. An undiscounted annual cost over the 10-year period is $1,285.

ii. Additional Survey Requirements

The Department proposes in the NPRM to revise the data and methodological criteria for employer-provided wage surveys to require that a survey must continue to accept responses for at least 14 calendar days after receiving the minimum number of required responses from at least 3 employers that together include wages for at least 30 workers. In addition, the surveyor must include no fewer than three contacts with non-respondents, using the same method of contact initially used, and at least two other active methods of contact across different business days and times that are most likely to generate responses. The Department expects these new requirements may add a small compliance cost to surveyors, but we cannot quantify it due to the data limitations. The Department seeks public comments and inputs that will help us to quantify this cost impact to surveyors.

b. Cost Savings

The following section describes the cost savings of the proposed rule.

i. Elimination of the Form ETA–9165

The Department proposes to eliminate the Form ETA–9165, *Employer-Provided Survey Attestations to Accompany H–2B Prevailing Wage Determination Request Based on a Non-OES Survey*. Each employer would have spent 25 minutes to fill out the attestation form if it had not been eliminated. To estimate the cost savings per year, the number of unique H–2B employers who are expected to submit an employer-provided survey (221) was multiplied by the estimated amount of time required to fill out the attestation form (25 minutes or 0.417 hours). This number was then multiplied by the hourly compensation rate of HR specialists ($58.15 per hour). This calculation results in an annual cost savings of $5,359 after the proposed rule takes effect. The annualized cost savings over the 10-year period is $5,359 at a discount rate of 2 percent and undiscounted annual cost savings at $5,359.

c. Qualitative Benefits Discussion

The following section describes the benefits of the proposed rule.

i. Improved Accuracy in Prevailing Wage Data

The Department's proposal would benefit H–2B workers and workers in corresponding employment by adding a new condition to § 655.10(f)(4)(i) that at least three follow-up attempts be made to contact non-respondents. This proposed requirement that the surveyor make no fewer than three contacts with non-respondents, first using the same method of contact initially used, and subsequently two other active methods of contact across different business days and times that are most likely to generate responses, is intended to reduce sampling bias and, therefore, yield more accurate survey results.

Additionally, under the proposed rule, as a new requirement, surveyors would have to continue accepting employer responses for at least 14 calendar days from the date the third notification in proposed paragraph (f)(4)(i) is sent, even after receiving responses from 3 employers including the wages of 30 workers. This additional 14-calendar day period would maximize the opportunity to include as much data as possible in the survey so that it is as accurate and representative as possible. Also, the additional 14-day calendar period would prevent: (1) the skewing of results that could occur should the survey conclude as soon as the minimum number of responses are received; and (2) the exclusion of available data from the survey.

ii. Greater Efficiency in Employer-Provided Survey Process

An additional benefit of this proposal would be an increase in efficiency in the employer-provided survey process. Employers would be required to submit the survey with the Form ETA–9141 when an employer requests a survey-based H–2B prevailing wage from the NPWC and such survey should contain the necessary information about the survey methodology (*e.g.,* sample size and source, sample selection procedures, and survey job descriptions). This would reduce the need for the NPWC to routinely issue Requests for Information in most cases involving employer-provided surveys. Efficiency is inherently valuable as a principle of good government and provides benefits to the public at large, including reducing the need to routinely issue Requests for Information necessary for the Department's analyses.

4. Summary of the Analysis

Exhibit 4 summarizes the estimated total costs and cost savings of the proposed rule over the 10-year analysis period. The Department estimates the

annualized costs of the proposed rule at $1,431 for rule familiarization, the annualized cost savings at $5,359 for eliminating the Form ETA–9165 and the annualized net cost savings at $4,535, each at a discount rate of 2 percent. Unquantified costs include the new requirements that the surveyor must continue to accept responses for at least 14 calendar days from the date the third notification is sent even if responses have been received from 3 employers including the wages of 30 workers. The surveyor must also include no fewer than three contacts with non-respondents, using the same method of contact initially used, and at least two other active methods of contact across different business days and times that are most likely to receive the most response. Unquantified benefits include improved accuracy in prevailing wage surveys due to permitting employer-provided surveys in instances where OEWS data is unavailable or insufficient, and increased transparency in the employer survey process.

EXHIBIT 4—ESTIMATED MONETIZED COSTS AND COST SAVINGS OF THE PROPOSED RULE

[2023 $]

Year	Costs	Cost savings	Net cost savings
2025	$12,850	$5,359	$7,492
2026	.....	5,359	5,359
2027	.....	5,359	5,359
2028	.....	5,359	5,359
2029	.....	5,359	5,359
2030	.....	5,359	5,359
2031	.....	5,359	5,359

2034	.....	5,359	5,359
Undiscounted annual	1,285	5,359	4,074
Annualized with a Discount Rate of 2%	1,431	5,359	4,535

B. Regulatory Flexibility Analysis and Small Business Regulatory Enforcement Fairness Act and Executive Order 13272: Proper Consideration of Small Entities in Agency Rulemaking

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601 *et seq.,* as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, requires agencies to determine whether regulations will have a significant economic impact on a substantial number of small entities. Pursuant to 5 U.S.C. 605(b), the head of the agency (*i.e.,* the undersigned Assistant Secretary for Employment and Training), certifies that the proposed rule does not have a significant economic impact on a substantial number of small entities. On average, small employers who are submitting an employer-provided survey will incur a net cost saving of $20.52 per year at a discount rate of 2 percent.[67] This will be far less than 1 percent of the revenue for the smallest of small H–2B employers. For example, the average annual revenue for firms in the landscaping industry (North American Industry Classification System code 561730) with fewer than five employees is $238,877.[68] $20.52 is about 0.009 percent of the average revenue of $238,877. The Department therefore certifies that the proposed rule does not have a significant economic impact on a substantial number of small entities.

C. Paperwork Reduction Act

The INA, as amended, assigns responsibilities to the Secretary of Labor relating to the entry and employment of certain categories of immigrant and nonimmigrant foreign workers under the permanent labor certification (PERM), H–2B, H–1B, H–1B1, and E–3 programs. The INA requires the Secretary of Labor to certify that the employment of foreign workers under certain visa classifications will not adversely affect the wages and working conditions of similarly employed workers in the United States. To render this certification, the Secretary of Labor determines the prevailing wage for the occupational classification and area of intended employment and ensures the employer offers a wage to the foreign worker that equals at least the prevailing wage. The Department uses Form ETA–9141 to collect information necessary to determine the prevailing wage for the applicable occupation and area of intended employment. This information collection is subject to the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.* A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless OMB approves it under the PRA and it displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person will generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a), 1320.6. The Department obtained OMB approval for this information collection under Control Number 1205–0508. The Department seeks PRA authorization for this information collection for 3 years.

This information collection request, concerning OMB Control No. 1205–0508, includes the collection of information related to the Department's PWDs. Prior to submitting applications for most labor certifications or a labor condition application to the Secretary of Labor, employers must obtain a prevailing wage for the job opportunity based on the place and type of employment in order to ensure that the employment of foreign workers does not adversely affect the wages and working conditions of U.S. workers similarly employed. Form ETA–9141, *Application for Prevailing Wage Determination,* is used to collect the necessary information from employers to enable the Department to issue a prevailing wage for the occupation and location of the job opportunity. The Form ETA–9141 is used in the PERM, H–2B, H–1B, H–1B1, and E–3 programs administered by the Department. In order to meet its statutory responsibilities under the INA, the Department must request information from employers seeking to hire and import foreign labor. The Department uses the information collected to

[67] $4,535÷221 = $20.52.

[68] 2017 Statistics of U.S. Businesses Annual Data Tables by Establishment Industry, *https://www.census.gov/data/tables/2017/econ/susb/2017-susb-annual.html.*

determine the minimum wage that must be offered, advertised in recruitment, and paid by an employer to foreign workers in most programs.

The collection of information under the current OMB Control No. 1205–0508 was approved by OMB on September 8, 2022, and was implemented into OFLC systems on February 6, 2024.

The Department now proposes revisions to this information collection, covered under OMB Control No. 1205–0508, to further revise the information collection tools based on regulatory changes in this proposed rule. As noted above, the current regulations do not explicitly require that the survey be submitted concurrently with the Form ETA–9141, but the proposed rule, as well as the Form ETA–9141, *General Instruction,* would require that the survey be filed at the same time as submission of the Form ETA–9141. Further, the Department proposes to eliminate the use of the Form ETA–9165, *Employer-Provided Survey Attestations to Accompany H–2B Prevailing Wage Determination Request Based on a Non-OEWS Survey.* The Department proposes to revise the Form ETA–9141 to conform with the proposed rule's requirement that employers, when seeking a survey-based prevailing wage, submit the survey to the Department with the Form ETA–9141 for consideration, rather than complete the Form ETA–9165.

The proposed revisions to the Form ETA–9141, *General Instructions,* and the proposed elimination of Form ETA–9165 and its instructions will align information collection requirements with the Department's proposed regulatory framework and continue the ongoing efforts to provide greater clarity to employers on regulatory requirements greater accuracy in PWDs, and greater standardizing and streamlining this information collection to reduce employer time and burden in preparing applications. The proposed changes will also promote greater efficiency and transparency in the review and issuance of PWDs for the Department's employment-based foreign labor certification and labor condition programs. The information collection includes the Form ETA–9141, *Application for Prevailing Wage Determination* (''Form ETA–9141''); Form ETA–9141, *General Instructions* (''General Instructions''); and Form ETA–9141, Appendix A, *Request for Additional Worksite(s)* (''Appendix A'').

Overview of Information Collection Proposed by This NPRM

Title: Application for Prevailing Wage Determination.

Type of Review: Revision of a Currently Approved Information Collection.

OMB Control Number: 1205–0508.

Affected Public: Private Sector—Businesses or other for-profits, not-for profit institutions, and farms.

Total Estimated Number of Respondents: 120,042.

Total Estimated Number of Responses: 462,470.

Total Estimated Annual Time Burden: 211,425 hours.

Total Estimated Annual Other Costs Burden: $191,769.

D. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 (UMRA) (Pub. L. 104–4, codified at 2 U.S.C. 1501 *et seq.*) is intended, among other things, to curb the practice of imposing unfunded Federal mandates on State, local, and Tribal Governments. UMRA requires Federal agencies to assess a regulation's effects on State, local, and Tribal Governments, as well as on the private sector, except to the extent the regulation incorporates requirements specifically set forth in law. Title II of the UMRA requires each Federal agency to prepare a written statement assessing the effects of any regulation that includes any Federal mandate in a proposed or final agency rule that may result in $100 million or more expenditure (adjusted annually for inflation) in any 1 year by State, local, and Tribal Governments, in the aggregate, or by the private sector. A Federal mandate is any provision in a regulation that imposes an enforceable duty upon State, local, or Tribal Governments, or upon the private sector, except as a condition of Federal assistance or a duty arising from participation in a voluntary Federal program.

This proposed rule does not result in unfunded mandates for the public or private sector because private employers' participation in the program is voluntary, and State governments are reimbursed for performing activities required under the program. The requirements of title II of the UMRA, therefore, do not apply, and the Department has not prepared a statement under the UMRA.

E. Executive Order 13132 (Federalism)

This proposed rule would not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with sec. 6 of E.O. 13132,[69] it is determined that this proposed rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

F. Executive Order 13175 (Consultation and Coordination With Indian Tribal Governments)

The Department has reviewed this proposed rule in accordance with E.O. 13175 [70] and has determined that it does not have Tribal implications. This proposed rule does not have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Tribal Governments.

List of Subjects in 20 CFR Part 655

Administrative practice and procedure, Employment, Employment and training, Enforcement, Foreign workers, Forest and forest products, Fraud, Health professions, Immigration, Labor, Longshore and harbor work, Migrant workers, Nonimmigrant workers, Passports and visas, Penalties, Reporting and recordkeeping requirements, Unemployment, Wages, Working conditions.

For the reasons discussed in the preamble, the Department of Labor proposes to amend 20 CFR part 655 as follows:

PART 655—TEMPORARY EMPLOYMENT OF FOREIGN WORKERS IN THE UNITED STATES

■ 1. The authority citation for § 655.0 of part 655 is revised and the authority citation for subpart A continues to read as follows:

Authority: Section 655.0 issued under 8 U.S.C. 1101(a)(15)(E)(iii), 1101(a)(15)(H)(i) and (ii), 8 U.S.C. 1103(a)(6), 1182(m), (n), and (t), 1184(c), (g), and (j), 1188, and 1288(c) and (d); sec. 3(c)(1), Pub. L. 101–238, 103 Stat. 2099, 2102 (8 U.S.C. 1182 note); sec. 221(a), Pub. L. 101–649, 104 Stat. 4978, 5027 (8 U.S.C. 1184 note); sec. 303(a)(8), Pub. Subpart A issued under 8 CFR 214.2(h).

* * * * *

■ 2. Amend § 655.10 by revising paragraphs (a), (b)(2), (e), and (f) to read as follows:

§ 655.10 Determination of prevailing wage for temporary labor certification purposes.

(a) *Offered wage.* The employer must advertise the position to all potential workers at a wage at least equal to the prevailing wage obtained from the NPWC, or the Federal, State, or local minimum wage, whichever is highest. The employer must offer and pay this wage (or higher) to both its H–2B workers and its workers in corresponding employment. The issuance of a prevailing wage determination (PWD) under this section does not permit an employer to pay a wage lower than the highest wage required by any applicable Federal, State, or local law.

(b) * * *

(1) * * *

(2) If the job opportunity is not covered by a CBA, the prevailing wage for labor certification purposes shall be the arithmetic mean of the wages of workers similarly employed in the area of intended employment using the wage component of the BLS Occupational Employment and Wage Statistics (OEWS) survey, unless the employer provides a survey acceptable to the NPWC under paragraph (f) of this section.

* * * * *

(e) *NPWC action.* The NPWC will determine the PWD, indicate the source, and return the Application for Prevailing Wage Determination (Form ETA–9141) with the determination and the NPWC's endorsement to the employer.

(f) *Employer-provided survey.* (1) If the job opportunity is not covered by a CBA, or by a professional sports league's rules or regulations, the NPWC will consider a survey provided by the employer in making a PWD only if the employer's submission demonstrates that the survey falls into one of the following categories:

(i) The survey was independently conducted and issued by a State, including any State agency, State college, or State university;

(ii) The survey is submitted for a geographic area where the OEWS does not collect data, or in a geographic area where the OEWS provides an arithmetic mean only at a national level for workers employed in the SOC; or

(iii) The job opportunity is within an occupational classification of the SOC system designated as an ''All Other'' classification.

(2) Any such survey must provide the arithmetic mean of the wages of all workers performing the same or substantially similar job duties in the area of intended employment.

(3) Notwithstanding paragraph (f)(2) of this section, the geographic area surveyed may be expanded beyond the area of intended employment, but only as necessary to meet the requirements of paragraph (f)(4)(ii) of this section. Any geographic expansion beyond the area of intended employment must include only those geographic areas that are contiguous to the area of intended employment.

(4) In each case where the employer submits a survey under paragraph (f)(1) of this section, the employer must submit, concurrently with the Form ETA–9141, a copy of the survey containing specific information about the survey methodology, including sample size and source, sample selection procedures, and survey job descriptions, to allow a determination of whether the survey meets all the requirements of this section, in addition to the following:

(i) The surveyor made a reasonable, good faith attempt to either contact all employers of workers performing the same or substantially similar job duties in the geographic area surveyed or conduct a randomized sampling of such employers. No fewer than three contacts with non-respondents must be made, first using the same method of contact initially used, and subsequently two other active methods of contact across different business days and times that are most likely to generate survey responses;

(ii) The survey must include wage data from at least 30 workers performing the same or substantially similar job duties and at least 3 employers of such workers. The survey must continue to remain open to accept responses for at least 14 calendar days from the date the third notification in paragraph (f)(4)(i) of this section was sent to non-respondents;

(iii) If the survey is submitted under paragraph (f)(1)(ii) or (iii) of this section, the survey must be administered by a bona fide third party. Any H–2B employer or H–2B employer's agent, representative, employee, or attorney are not bona fide third parties;

(iv) The survey must be conducted across industries that employ workers performing the same or substantially similar job duties; and

(v) The wage reported in the survey must include all types of pay.

(5) The survey must be the most current edition of the survey and must be based on wages paid not more than 24 months before the date the PWD request is submitted to the NPWC.

BILLING CODE 4510–FP–P

Notices

Federal Register
Vol. 89, No. 222
Monday, November 18, 2024

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by December 18, 2024 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Agricultural Research Service

Title: U.S. National Arboretum Use of the Grounds and Facilities as well as Commercial Photography and Cinematography.

OMB Control Number: 0518–0024.

Summary of Collection: Section 890(b) of the Federal Agriculture Improvement and Reform Act of 1996, Public Law 104–127 (''FAIR ACT'') provided statutory authorities regarding the United States National Arboretum (''USNA''). These authorities include the ability to charge fees for temporary use by individuals or groups of USNA facilities and grounds for any purpose consistent with the mission of the USNA. Also, the authority was provided to charge fees for the use of the USNA for commercial photography and cinematography. The mission of the U.S. National Arboretum (USNA) is to conduct research, provide education, and conserve and display trees, shrubs, flowers, and other plans to enhance the environment. The USNA is a 446-acre public facility. The grounds of the USNA are available to the public for purposes of education and passive recreation. The USNA has many spectacular feature and garden displays which are very popular to visitors and photographers.

Need and Use of the Information: USNA officials will collect the information using applications in the form of questionnaires. The information gathered on the photography form is the applicant's name, name of the organization providing the service, phone/fax numbers, dates and times requested for photography, how many people will be working the project, how many vehicles involved, and an itemization of equipment to be used by the crew. Also, the application requests a detailed description of the project, which specific sites are requested for photography and how the images or pictures will be used.

The collected information is used by USNA management to determine if a requestor's needs can be met, and the request is consistent with the mission and goals of the USNA uses of the information. If the basic information is not collected, USNA officials will not be able to determine if a requestor's needs are met.

Description of Respondents: Business or other for profit; Not-for-profit institutions; Individuals or households; State, Local or Tribal Government.

Number of Respondents: 350.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 88.

Rachelle Ragland-Greene,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–03–P

DEPARTMENT OF COMMERCE

Census Bureau

[Docket Number: 241112–0289; RTID 0607–XC079]

The Census Bureau's Proposed Race/Ethnicity Code List for the American Community Survey and the 2030 Census

AGENCY: Census Bureau, Department of Commerce.

ACTION: Notice; request for public comment.

SUMMARY: As part of the Race/Ethnicity Coding Improvement Project, the U.S. Census Bureau (Census Bureau) is seeking feedback on the proposed race/ethnicity code list that will be used when the combined race/ethnicity question is implemented in the American Community Survey (ACS) and the 2030 Census. The Census Bureau aims to enhance and improve the code list that was used in the 2020 Census and is currently used in the ACS to ensure that detailed race and/or ethnicity responses are accurately coded and tabulated in future data collections.

DATES: To ensure consideration, comments must be received on or before February 18, 2025.

ADDRESSES: Comments are being requested through the following method:

Electronic submission: Submit public comments using the Federal eRulemaking Portal.

1. Go to *www.regulations.gov* and enter Docket Number USBC–2024–0022 in the search field.

2. Click the ''Comment Now!'' icon, complete the required fields.

3. Enter or attach your comments.

All comments responding to this document will be a matter of public record. Relevant comments will generally be available on the Federal eRulemaking Portal at: *https://www.regulations.gov.*

All comments received are part of the public record. All Personally Identifiable Information (*e.g.,* name and address) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information. You may submit attachments to electronic comments in Microsoft Word, Excel, or Adobe PDF file formats.

FOR FURTHER INFORMATION CONTACT: For questions about this notice, please contact: Roberto Ramirez at *Roberto.R.Ramirez@census.gov* or (301) 763–6044. Please direct media inquiries to the Census Bureau's Public Information Office at (301) 763–3030.

SUPPLEMENTARY INFORMATION: The Census Bureau is conducting its Race/Ethnicity Coding Improvement Project, which provides an opportunity for the public to provide feedback on how detailed race and/or ethnicity and American Indian or Alaska Native populations will be coded when the combined race/ethnicity question is implemented in the ACS and the 2030 Census. As in previous updates to the code list, all updates will be based on three criteria: (1) Federal scientific research and evidence; (2) stakeholder feedback, and (3) alignment with the U.S. Office of Management and Budget's updated 2024 Statistical Policy Directive No. 15 (see *https://spd15revision.gov*). The Census Bureau anticipates publishing a summary of the feedback received and the final code list in a future notice. An upcoming live question-and-answer webinar will provide an opportunity for the public to ask any procedural questions about how to respond to this Notice.

The Census Bureau is seeking feedback on how race and/or ethnicity and American Indian or Alaska Native populations are coded, and it is not seeking feedback on how the U.S. Office of Management and Budget defined race/ethnicity categories through Statistical Policy Directive No. 15, which are a minimum set of categories that all Federal agencies must use when collecting information on race and ethnicity, regardless of the collection mechanism, as well as additional guidance on the collection, compilation, and dissemination of these data.

Coding is the process that assigns a numeric code to the responses that are provided in the write-in areas on the race and/or ethnicity question. The numeric codes are used to process and tabulate the data. For example, if a respondent provides a write-in response of ''Ghanaian,'' the code list is used to assign this response code '3180.'

Race and/or ethnicity groups may have several terms on the code list that receive the same code. This may include spelling variations, abbreviations, or in-language names. For example, responses of ''Coeur D'Alene Tribe'' receive the code '5708,' as do responses of ''Coeur D'Alene Tribe of Indians'' and ''Schitsu'umsh.'' In our data products, all responses of ''Coeur D'Alene Tribe,'' ''Coeur D'Alene Tribe of Indians'' and ''Schitsu'umsh'' are tabulated together because they are given the same code, and they are therefore all included in the population count for ''Coeur D'Alene Tribe.''

On the proposed code list, some race and/or ethnicity groups have a range of codes associated with them. An example of this is ''Italian'' (codes 1205–1209), which includes terms that receive the codes '1206' (Italian), '1207' (Sardinian) and '1208' (Sicilian). Providing various groups with their own codes allows the Census Bureau to continue conducting research and see how often the group is reported. Unique codes are often provided for groups when Census Bureau research indicates that there are increasing numbers of people reporting a particular term in the decennial census.

Once the coding operation is completed, the codes are used in the editing process and to tabulate estimates and counts that are published in our ACS and decennial data products. Note that because a group has a unique code, that does not guarantee that data will be published for that group, as population thresholds, editing processes, or other processes may prevent us from publishing data for certain groups regardless of if they have a unique code.

Request for Public Comment

The Census Bureau is soliciting public comment to improve the race/ethnicity code list. This feedback will enable the Census Bureau to more accurately collect, process, and tabulate detailed racial, ethnic, and tribal responses reported in the race/ethnicity question. The Census Bureau is seeking feedback on the following questions, but will consider all comments received on topics germane to this notice:

1. Are there any groups missing from the proposed code list? If so, please identify them and suggest how the groups should be classified and why.

2. Are any groups on the proposed code list misclassified? If so, please identify them and suggest an alternative classification or indicate if the term should be removed.

3. Are there alternative terms, abbreviations, or in-language terms people may use to identify with a specific group that should be added to the proposed code list? If so, please identify them and suggest a classification.

4. The 2020 Census race/ethnicity code list at: *https://www2.census.gov/programs-surveys/decennial/2020/technical-documentation/complete-tech-docs/detailed-demographic-and-housing-characteristics-file-a/2020-hispanic-origin-and-race-code-list.xlsx* was organized into regional categories (*e.g.,* Chinese and Japanese aggregated into East Asian) and counts for these regional categories were published in 2020 Census data products. Based on stakeholder feedback and the challenging nature of categorizing groups into regional categories when the boundaries are not clearly defined, may change over time, or may overlap, the Census Bureau is proposing to remove its definitions and concepts of regional categories so that data users would have more flexibility to create their own regional categories using the disaggregated data. How do you use the data produced for regional categories from the 2020 Census? How would removing regional categories from the code list and tabulated products impact your ability to use the detailed race/ethnicity data? Would the ability to create your own regional categories using disaggregated data be useful to your work?

The proposed race/ethnicity code list can be accessed at: *https://www2.census.gov/programs-surveys/demo/2030-race-and-or-ethnicity-code-list/.*

Robert L. Santos, Director, Census Bureau, approved the publication of this notice in the **Federal Register**.

Dated: November 12, 2024.

Shannon Wink,

Program Analyst, Policy Coordination Office, U.S. Census Bureau.

BILLING CODE 3510–07–P

DEPARTMENT OF COMMERCE

Census Bureau

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Construction Progress Reporting Surveys

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on July 16, 2024 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: U.S. Census Bureau, Department of Commerce.

Title: Construction Progress Reporting Surveys.

OMB Control Number: 0607–0153.

Form Number(s): C–700, C–700R, C–700SL, C–700F.

Type of Request: Regular submission, Request for an Extension, without Change, of a Currently Approved Collection.

Number of Respondents: 22,000 respondents report monthly over the duration of the construction project (an average of 12 months).

Average Hours per Response: 30 minutes for month 1; 10 minutes for months 2 through 12.

Burden Hours: 51,333.

Needs and Uses: The U.S. Census Bureau is requesting an extension of a currently approved collection for forms: C–700, for Private Construction Projects; C–700(R), for Multifamily Residential Projects; C–700(SL), for State and Local Governments Projects; and C–700(F), for Federal Government Projects.

These forms are used to conduct the Construction Progress Reporting Surveys (CPRS) which collect information on the dollar value of construction put in place on non-residential building projects under construction by private companies or individuals, private multifamily residential buildings, and building projects under construction by federal and state and local governments.

The Census Bureau uses the information collected on these forms to publish estimates of the monthly dollar value of construction put in place. Statistics from the CPRS become part of the monthly ''Value of Construction Put in Place'' or ''Construction Spending'' series, a Principal Economic Indicator that is used extensively by the federal government in making policy decisions and is used by the Bureau of Economic Analysis (BEA) to estimate the gross domestic product (GDP). The private sector uses the statistics for market analysis and other research. Construction now accounts for 7.4 percent of GDP.

Published estimates are used by a variety of private business and trade associations to estimate the demand for building materials and to schedule production, distribution, and sales efforts. They also provide various government agencies with a tool to evaluate economic policy. For example, Bureau of Economic Analysis staff use data to develop the construction components of gross private domestic investment in the gross domestic product. The Federal Reserve Board and the Department of the Treasury use the value put in place data to predict the gross domestic product, which is presented to the Board of Governors and has an impact on monetary policy.

Frequency: Monthly.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 U.S.C., Sections 131 and 182.

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the collection or the OMB Control Number 0607–0153.

Sheleen Dumas,

Departmental PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

International Trade Administration

[A–570–082, C–570–083]

Certain Steel Wheels From the People's Republic of China: Continuation of Antidumping Duty and Countervailing Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of the determinations by the U.S. Department of Commerce (Commerce) and the U.S. International Trade Commission (ITC) that revocation of the antidumping duty (AD) and countervailing duty (CVD) orders on certain steel wheels (steel wheels) from the People's Republic of China (China) would likely lead to a continuation or recurrence of dumping, countervailable subsidies, and material injury to an industry in the United States, Commerce is publishing a notice of continuation of these AD and CVD orders.

DATES: Applicable November 6, 2024.

FOR FURTHER INFORMATION CONTACT: Jacqueline Arrowsmith, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–5255.

SUPPLEMENTARY INFORMATION:

Background

On May 24, 2019, Commerce published the AD and CVD orders on steel wheels from China.[1] On April 1, 2024, the ITC instituted,[2] and Commerce initiated,[3] the second sunset review of the *Orders,* pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act). As a result of its reviews, Commerce determined that revocation of the *Orders* would likely lead to continuation or recurrence of dumping and/or countervailable subsidies, and therefore, notified the ITC of the magnitude of the margins of dumping and net countervailable subsidy rates likely to prevail should the *Orders* be revoked.[4]

[1] *See Certain Steel Wheels from the People's Republic of China: Antidumping and Countervailing Duty Orders,* 84 FR 24098 (May 24, 2019)) (collectively, the *Orders*).

[2] *See Steel Wheels from China; Institution of Five-Year Reviews,* 89 FR 22451 (April 1, 2024).

[3] *See Initiation of Five-Year* (*Sunset*) *Reviews,* 89 FR 22373 (April 1, 2024).

[4] *See Certain Steel Wheels from the People's Republic of China: Final Results of Expedited Sunset Review of the Antidumping Duty Order,* 89

Continued

On November 6, 2024, the ITC published its determination pursuant to sections 751(c) and 752(a) of the Act that revocation of the *Orders* would likely lead to the continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.[5]

Scope of the Orders

The scope of the *Orders* covers certain on the road steel wheels, discs, and rims for tubeless tires, with a nominal rim diameter of 22.5 inches and 24.5 inches, regardless of width. Certain on-the-road steel wheels with a nominal wheel diameter of 22.5 inches and 24.5 inches are generally for Class 6, 7, and 8 commercial vehicles (as classified by the Federal Highway Administration Gross Vehicle Weight Rating system), including tractors, semi-trailers, dump trucks, garbage trucks, concrete mixers, and buses, and are the current standard wheel diameters for such applications. The standard widths of certain on-the-road steel wheels are 7.5 inches, 8.25 inches, and 9.0 inches, but all certain on-the-road steel wheels, regardless of width, are covered by the scope. While 22.5 inches and 24.5 inches are standard wheel sizes used by Class 6, 7, and 8 commercial vehicles, the scope covers sizes that may be adopted in the future for Class 6, 7, and 8 commercial vehicles.

The scope includes certain on-the-road steel wheels with either a ''hub-piloted'' or ''stud- piloted'' mounting configuration, and includes rims and discs for such wheels, whether imported as an assembly or separately. The scope includes certain on the road steel wheels, discs, and rims, of carbon and/or alloy steel composition, whether cladded or not cladded, whether finished or not finished, and whether coated or uncoated. All on-the-road wheels sold in the United States are subject to the requirements of the National Highway Traffic Safety Administration and bear markings, such as the ''DOT'' symbol, indicating compliance with applicable motor vehicle standards. *See* 49 CFR 571.120. The scope includes certain on-the-road steel wheels imported with or without the required markings. Certain on-the-road steel wheels imported as an assembly with a tire mounted on the wheel and/or with a valve stem attached are included. However, if the certain on-the-road steel wheel is imported as an assembly with a tire mounted on the wheel and/or with a valve stem attached, the certain on-the-road steel wheel is covered by the scope, but the tire and/or valve stem is not covered by the scope.

The scope includes rims and discs that have been further processed in a third country, including, but not limited to, the welding and painting of rims and discs from China to form a steel wheel, or any other processing that would not otherwise remove the merchandise from the scope of the proceeding if performed in China. Excluded from the scope are:

(1) Steel wheels for tube-type tires that require a removable side ring;

(2) Aluminum wheels;

(3) Wheels where steel represents less than fifty percent of the product by weight; and

(4) Steel wheels that do not meet National Highway Traffic Safety Administration requirements, other than the rim marking requirements found in 49 CFR 571.120S5.2.

Imports of the subject merchandise are currently classified under the following Harmonized Tariff Schedule of the United States (HTSUS) subheadings: 8708.70.4530, 8708.70.4560, 8708.70.6030, 8708.70.6060, and 8716.90.5059. Merchandise meeting the scope description may also enter under the following HTSUS subheadings: 4011.20.1015, 4011.20.5020, and 8708.99.4850. While HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of the *Orders* is dispositive.

Continuation of the Orders

As a result of the determinations by Commerce and the ITC that revocation of the *Orders* would likely lead to a continuation or recurrence of dumping, countervailable subsidies, and material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act and 19 CFR 351.218(a), Commerce hereby orders the continuation of the *Orders.* U.S. Customs and Border Protection will continue to collect AD and CVD cash deposits at the rates in effect at the time of entry for all imports of subject merchandise.

The effective date of the continuation of these *Orders* is November 6, 2024. Pursuant to section 751(c)(2) of the Act and 19 CFR 351.218(c)(2), Commerce intends to initiate the next sunset review of these *Orders* no later than 30 days prior to the fifth anniversary of the date of the last determination by the ITC.

Administrative Protective Order (APO)

This notice also serves as a final reminder to parties subject to an APO of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

These five-year sunset reviews and this notice are in accordance with section 751(c) and 751(d)(2) of the Act, and published pursuant to section 777(i)(1) of the Act and 19 CFR 351.218(f)(4).

Dated: November 12, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

International Trade Administration

Renewable Energy and Energy Efficiency Advisory Committee

AGENCY: International Trade Administration, U.S. Department of Commerce.

ACTION: Notice of an open meeting.

SUMMARY: The Renewable Energy and Energy Efficiency Advisory Committee (REEEAC or the Committee) will hold a virtual meeting, accessible to the public online, on Tuesday, December 3, 2024 at the U.S. Department of Commerce in Washington, DC. Registration instructions for the public to attend virtually are provided below.

DATES: Tuesday, December 3, 2024, from approximately 9:30 a.m. to 12 p.m. Eastern Standard Time (EST). Members of the public wishing to participate must register in advance with the Designated Federal Officer (DFO), Cora Dickson, at the contact information below by 5 p.m. EST on Monday December 2, 2024, including any requests to make comments during the meeting or for accommodations or auxiliary aids.

ADDRESSES: To register, please contact Cora Dickson, DFO, Office of Energy and Environmental Industries, Industry

and Analysis, International Trade Administration, U.S. Department of Commerce at (202) 482–6083; email: *Cora.Dickson@trade.gov.*

FOR FURTHER INFORMATION CONTACT: Cora Dickson, DFO, Office of Energy and Environmental Industries, Industry and Analysis, International Trade Administration, U.S. Department of Commerce at (202) 482–6083; email: *Cora.Dickson@trade.gov.* Registered participants joining virtually will be emailed the login information for the meeting, which will be accessible as a livestream via Teams Webinar.

SUPPLEMENTARY INFORMATION:

Background: The Secretary of Commerce established the REEEAC pursuant to discretionary authority and in accordance with the Federal Advisory Committee Act, as amended (5 U.S.C. 1001 *et seq*), on July 14, 2010. The REEEAC was re-chartered most recently for a two-year term on May 24, 2024. The REEEAC provides the Secretary of Commerce with advice from the private sector on the development and administration of programs and policies to expand the export competitiveness of U.S. renewable energy and energy efficiency products and services. More information about the REEEAC, including the list of appointed members for this charter, is published online at *http://trade.gov/reeeac.*

On December 3, 2024, the REEEAC will hold the first meeting of its current charter term. The Committee will conduct organizational activities and hold initial discussions on topics of interest. The agenda will be made available by November 27, 2024 upon request to Cora Dickson, and the most current version of the agenda will also be made available on the REEEAC website.

The meeting will be open to the public and will be accessible to people with disabilities. All guests are required to register in advance by the deadline identified under the **DATES** caption. Requests for auxiliary aids must be submitted by the registration deadline. Last minute requests will be accepted but may not be possible to fill.

A limited amount of time before the close of the meeting will be available for oral comments from members of the public attending the meeting. Members of the public attending virtually who wish to speak during the public comment period must give the DFO advance notice in order to facilitate their access. To accommodate as many speakers as possible, the time for public comments will be limited to two to five minutes per person (depending on number of public participants). Individuals wishing to reserve speaking time during the meeting must contact Cora Dickson using the contact information above and submit a brief statement of the general nature of the comments, as well as the name and address of the proposed participant, by 5 p.m. EST on Monday, December 2, 2024. If the number of registrants requesting to make statements is greater than can be reasonably accommodated during the meeting, the International Trade Administration may conduct a lottery to determine the speakers. Speakers are requested to submit a copy of their oral comments by email to Cora Dickson for distribution to the participants in advance of the meeting.

Any member of the public may submit written comments concerning the REEEAC's affairs at any time before or after the meeting. Comments may be submitted via email to the Renewable Energy and Energy Efficiency Advisory Committee, c/o: Cora Dickson, Designated Federal Officer, Office of Energy and Environmental Industries, U.S. Department of Commerce; *Cora.Dickson@trade.gov.* To be considered during the meeting, public comments must be transmitted to the REEEAC prior to the meeting. As such, written comments must be received no later than 5 p.m. EST on Monday, December 2, 2024. Comments received after that date will be distributed to the members but may not be considered at the meeting.

Copies of REEEAC meeting minutes will be available within 30 days following the meeting.

Man K. Cho,

Deputy Director, Office of Energy and Environmental Industries.

[A–570–079, C–570–080]

Cast Iron Soil Pipe From the People's Republic of China: Continuation of Antidumping and Countervailing Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of the determinations by the U.S. Department of Commerce (Commerce) and the U.S. International Trade Commission (ITC) that revocation of the antidumping duty (AD) and countervailing duty (CVD) orders on cast iron soil pipe from the People's Republic of China (China) would likely lead to the continuation or recurrence of dumping, countervailable subsidies, and material injury to an industry in the United States, Commerce is publishing a notice of continuation of these AD and CVD orders.

DATES: Applicable October 24, 2024.

FOR FURTHER INFORMATION CONTACT: Javier Barrientos, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2243.

SUPPLEMENTARY INFORMATION:

Background

On May 3, 2019, Commerce published in the **Federal Register** the AD and CVD orders on cast iron soil pipe from China.[1] On April 1, 2024, the ITC instituted,[2] and Commerce initiated,[3] the first sunset reviews of the *AD Order* and the *CVD Order,* pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act). As a result of its reviews, Commerce determined that revocation of the *AD Order* and *CVD Order* would likely lead to continuation or recurrence of dumping and countervailable subsidies and, therefore, notified the ITC of the magnitude of the margins of dumping and net countervailable subsidy rates likely to prevail should the *AD Order*[4] and *CVD Order*[5] be revoked.

On October 24, 2024, the ITC published its determinations, pursuant to sections 751(c) and 752(a) of the Act, that revocation of the *AD Order* and *CVD Order* would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.[6]

[1] *See Cast Iron Soil Pipe from the People's Republic of China: Antidumping Duty Order,* 84 FR 19035 (May 3, 2019) (*AD Order*); *see also Cast Iron Soil Pipe from the People's Republic of China: Countervailing Duty Order,* 84 FR 19039 (May 3, 2019) (*CVD Order*) (collectively, *Orders*).

[2] *See Cast Iron Soil Pipe from China; Institution of Five-Year Reviews,* 89 FR 22448 (April 1, 2024).

[3] *See Initiation of Five-Year (Sunset) Reviews,* 89 FR 22373 (April 1, 2024).

[4] *See Cast Iron Soil Pipe from the People's Republic of China: Final Results of the Expedited First Sunset Review of the Antidumping Duty Order,* 89 FR 64871 (August 8, 2024).

[5] *See Cast Iron Soil Pipe from the People's Republic of China: Final Results of the Expedited First Sunset Review of the Countervailing Duty Order,* 89 FR 64874 (August 8, 2024).

[6] *See Cast Iron Soil Pipe from China Determinations,* 89 FR 84933 (October 24, 2024).

Scope of the Orders

The merchandise covered by the *Orders* is cast iron soil pipe, whether finished or unfinished, regardless of industry or proprietary specifications, and regardless of wall thickness, length, diameter, surface finish, end finish, or stenciling. The scope of these *Orders* includes, but is not limited to, both hubless and hub and spigot cast iron soil pipe. Cast iron soil pipe is nonmalleable iron pipe of various designs and sizes. Cast iron soil pipe is generally distinguished from other types of nonmalleable cast iron pipe by the manner in which it is connected to cast iron soil pipe fittings.

Cast iron soil pipe is classified into two major types—hubless and hub and spigot. Hubless cast iron soil pipe is manufactured without a hub, generally in compliance with Cast Iron Soil Pipe Institute (CISPI) specification 301 and/or American Society for Testing and Materials (ASTM) specification A888, including any revisions to those specifications. Hub and spigot pipe has one or more hubs into which the spigot (plain end) of a fitting is inserted. All pipe meeting the physical description set forth above is covered by the scope of these *Orders,* whether or not produced according to a particular standard.

The subject imports are currently classified in subheading 7303.00.0030 of the Harmonized Tariff Schedule of the United States (HTSUS): Cast iron soil pipe. The HTSUS subheading and specifications are provided for convenience and customs purposes only; the written description of the scope of these *Orders* is dispositive.

Continuation of the Orders

As a result of the determinations by Commerce and the ITC that revocation of the *AD Order* and *CVD Order* would likely lead to a continuation or recurrence of dumping, countervailable subsidies, and material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act and 19 CFR 351.218(a), Commerce hereby orders the continuation of the *Orders.* U.S. Customs and Border Protection will continue to collect AD and CVD cash deposits at the rates in effect at the time of entry for all imports of subject merchandise.

The effective date of the continuation of the *Orders* will be October 24, 2024.[7] Pursuant to section 751(c)(2) of the Act and 19 CFR 351.218(c)(2), Commerce intends to initiate the next five-year review of the *Orders* not later than 30 days prior to the fifth anniversary of the date of the last determination by the ITC.

Administrative Protective Order (APO)

This notice also serves as the only reminder to parties subject to an APO of their responsibility concerning the return, destruction, or conversion to judicial protective order of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply is a violation of the APO which may be subject to sanctions.

Notification to Interested Parties

These five-year sunset reviews and this notice are in accordance with sections 751(c) and 751(d)(2) of the Act, and published in accordance with section 777(i)(1) of the Act and 19 CFR 351.218(f)(4).

Dated: November 12, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

Large Top Mount Combination Refrigerator-Freezers From Thailand: Postponement of Preliminary Determination in the Less-Than-Fair-Value Investigation

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Applicable November 18, 2024.

FOR FURTHER INFORMATION CONTACT: Benito Ballesteros at (202) 482–7425 AD/CVD Operations, Office IX Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

On July 9, 2024, the U.S. Department of Commerce (Commerce) initiated a less-than-fair-value (LTFV) investigation of imports of large top mount combination refrigerator-freezers (refrigerators) from Thailand.[1] On July 22, 2024, Commerce tolled certain deadlines in this administrative proceeding by seven days.[2] Currently, the preliminary determination is due no later than December 3, 2024.

Postponement of Preliminary Determination

Section 733(b)(1)(A) of the Tariff Act of 1930, as amended (the Act), requires Commerce to issue the preliminary determination in a LTFV investigation within 140 days after the date on which Commerce initiated the investigation. However, section 733(c)(1)(A) of the Act permits Commerce to postpone the preliminary determination until no later than 190 days after the date on which Commerce initiated the investigation if: (A) the petitioner makes a timely request for a postponement; or (B) Commerce concludes that the parties concerned are cooperating, that the investigation is extraordinarily complicated, and that additional time is necessary to make a preliminary determination. Under 19 CFR 351.205(e), the petitioner must submit a request for postponement 25 days or more before the scheduled date of the preliminary determination and must state the reasons for the request. Commerce will grant the request unless it finds compelling reasons to deny the request.

On November 1, 2024, Electrolux Consumer Products, Inc. (the petitioner) submitted a timely request that Commerce postpone the preliminary determination in the LTFV investigation.[3] The petitioner stated that it requests postponement, ''so that {Commerce} will have sufficient time to collect and analyze information necessary for calculating accurate dumping margins. An extension of the deadline for {Commerce's} preliminary {determination} is necessary and appropriate here given the numerous extensions of time that have been requested by the respondent. An extension of the deadline for the preliminary determination will allow {the p}etitioner sufficient time to comment on these responses and will allow {Commerce} adequate time to issue supplemental questionnaires and to conduct a thorough analysis in this investigation.'' [4]

[1] *See Large Top Mount Combination Refrigerator-Freezers from Thailand: Initiation of Less-Than-Fair-Value Investigation*, 89 FR 57860 (July 16, 2024) (*Initiation Notice*).

[2] *See* Memorandum, ''Tolling of Deadlines for Antidumping and Countervailing Duty Proceedings,'' dated July 22, 2024.

[3] *See* Petitioner's Letter, ''Request to Extend Preliminary Determination,'' dated November 1, 2024.

[4] *Id.*

For the reasons stated above and because there are no compelling reasons to deny the request, Commerce, in accordance with section 733(c)(1)(A) of the Act, is postponing the deadline for the preliminary determination by 50 days.[5] As a result, Commerce will issue its preliminary determination no later than January 22, 2025. In accordance with section 735(a)(1) of the Act and 19 CFR 351.210(b)(1), the deadline for the final determination of this investigation will continue to be 75 days after the date of the preliminary determination, unless postponed at a later date.

This notice is issued and published pursuant to section 733(c)(2) of the Act and 19 CFR 351.205(f)(1).

Dated: November 8, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

[A–533–869]

Certain New Pneumatic Off-the-Road Tires from India: Amended Final Results of Antidumping Duty Administrative Review; 2022–2023

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) is amending the final results of the administrative review of the antidumping duty order on certain new pneumatic off-the-road tires from India (OTR tires) from India to correct a ministerial error. The period of review (POR) is March 1, 2022, through February 28, 2023.

DATES: Applicable November 18, 2024.

FOR FURTHER INFORMATION CONTACT: Lilit Astvatsatrian, AD/CVD Operations, Office IX, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–6412.

SUPPLEMENTARY INFORMATION:

Background

On October 17, 2024, Commerce published the *Final Results,* in the **Federal Register**.[1] On October 15, 2024, we received a timely submitted ministerial error allegation from Titan Tire Corporation (the petitioner).[2] We received no other ministerial error comments from interested parties. Because we agree that we made a ministerial error in the *Final Results,* we are amending the *Final Results* to correct the ministerial error the petitioner alleged.

Legal Framework

Section 751(h) of the Tariff Act of 1930, as amended (the Act), defines a ''ministerial error'' as including ''errors in addition, subtraction, or other arithmetic function, clerical errors resulting from inaccurate copying, duplication, or the like, and any other unintentional error which the administering authority considers ministerial.'' [3] With respect to final results of administrative reviews, 19 CFR 351.224(e) provides that Commerce ''will analyze any comments received and, if appropriate, correct any . . . ministerial error by amending the final results of review. . .''

Ministerial Error

In the *Final Results,* we determined that a startup adjustment was not warranted for ATC Tires Private Limited/ATC AP Tires Private Limited (collectively, ATC) and we stated our intention to disallow ATC's claimed startup adjustment in our calculations for the *Final Results*.[4] In its Ministerial Error Comments, the petitioner alleged that, in revising ATC's total cost of manufacturing (TOTCOM) to remove the startup adjustment, Commerce inadvertently granted the startup adjustment in the *Final Results*.[5]

We agree with the petitioner that we made a ministerial error in the *Final Results,* pursuant to section 751(h) of the Act and 19 CFR 51.224(f) and have amended our calculations to remove ATC's startup adjustment from TOTCOM. Pursuant to 19 CFR 351.224(e) and section 751(h) of the Act, we are amending the *Final Results* to correct this ministerial error in the calculation of the weighted-average dumping margin for ATC, which changes from 2.62 percent to 2.66 percent. Furthermore, in the *Final Results,* we calculated the weighted-average dumping margin for the companies that were not selected for individual examination as the weighted average of the dumping margins determined for the two mandatory respondents, weighted by their publicly ranged U.S. sales values.[6] Thus, based on the revised weighted-average dumping margins calculated for ATC,[7] we are also amending the rate for the companies not selected for individual examination in this review, which changes from 2.63 percent to 2.67 percent.[8]

For a complete discussion of the ministerial error allegation, as well as Commerce's analysis, see the accompanying Ministerial Error Memorandum.[9] The Ministerial Error Memorandum is on file electronically via ACCESS. ACCESS is available to registered users at *https://access.trade.gov.*

Amended Final Results of Review

As a result of correcting the ministerial error described above, we determine the following estimated weighted-average dumping margins for the period March 1, 2022, through February 28, 2023:

Exporter or producer	Weighted-average dumping margin (percent)
ATC Tires Private Limited; ATC Tires AP Private Limited	2.66
Companies Not Selected for Individual Review [10]	2.67

Disclosure

Commerce intends to disclose the calculations performed for ATC in connection with these amended final results of review to interested parties within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in the

[1] *See Certain New Pneumatic Off-the-Road Tires from India: Final Results of Antidumping Duty Administrative Review; 2022–2023,* 89 FR 83641 (October 17, 2024) (*Final Results*), and accompanying Issues and Decision Memorandum (IDM).

[2] *See* Petitioner's Letter, ''Ministerial Error Comments,'' dated October 15, 2024 (Ministerial Error Comments).

[3] *See* 19 CFR 351.224(f).

[4] *See Final Results* IDM at Comment 3.

[5] *See* Ministerial Error Comments at 3.

[5] Commerce is extending the time period for the preliminary determination to 190 days after the date of initiation (*i.e.,* January 15, 2025). However, because Commerce tolled certain deadlines in this investigation by seven days, the deadline is now January 22, 2025.

[6] *See Final Results,* 89 FR at 83641.

[7] The margin for the other mandatory respondent, Asian Tire Factory Ltd./Lyallpur Rubber Mills (collectively, ATF), remains unchanged from the *Final Results* and continues to be 2.76 percent.

[10] *See* Appendix for a full list of these companies.

Federal Register, in accordance with 19 CFR 351.224(b).

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Act, and 19 CFR 351.212(b)(1), Commerce has determined, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the amended final results of this review.

Pursuant to 19 CFR 351.212(b)(1), because ATC reported the entered value of its U.S. sales, we calculated importer-specific ad valorem duty assessment rates based on the ratio of the total amount of dumping calculated for the examined sales to the total entered value of the sales for which entered value was reported. Where an importer- (or customer-) specific rate is zero or *de minimis* within the meaning of 19 CFR 351.106(c)(1), we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties.

Commerce's ''automatic assessment'' practice will apply to entries of subject merchandise during the POR produced by ATC for which it did not know that the merchandise it sold to the intermediary (*e.g.,* a reseller, trading company, or exporter) was destined for the United States. In such instances, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.

For the companies listed in the appendix which were not selected for individual examination in this review, we will assign an assessment rate based on the review specific rate, which is equal to the weighted average of the dumping margins calculated for ATC in these amended final results and ATF in the *Final Results.*[11]

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the amended final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the *Final Results* of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) the amended cash deposit rate for ATC and the other companies not individually examined in this review will be equal to the weighted-average dumping margin that is established in the amended final results of this review, except if the rate is less than 0.50 percent and, therefore, de minimis within the meaning of 19 CFR 351.106(c)(1), in which case the cash deposit rate will be zero; (2) for previously investigated or reviewed companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding in which the company participated; (3) if the exporter is not a firm covered in this review, or the less than-fair-value (LTFV) investigation, but the manufacturer is, the cash deposit rate will be the cash deposit rate established for the most recently completed segment for the producer of the subject merchandise; and (4) the cash deposit rate for all other producers or exporters will continue to be zero percent, the all-others rate established in the LTFV investigation.[12] These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping and/or countervailing duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping and/or countervailing duties occurred and the subsequent assessment of double antidumping duties, and/or an increase in the amount of antidumping duties by the amount of the countervailing duties.

Administrative Protective Order

This notice serves as the final reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

Notification to Interested Parties

We are issuing and publishing these amended final results of review in accordance with sections 751(h) and 777(i) of the Act and 19 CFR 351.224(e).

Dated: November 8, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

SUPPLEMENTARY INFORMATION:

PROPOSED TIMETABLE

Day 0—Sunday, Mar 23, 2025	• Trade Mission Participants Arrive in Hong Kong.
Day 1—Monday, Mar 24, 2025	• Morning: Trade Mission/Market Briefing. • Afternoon: B2B Meetings and meetings with industry associations such as Urban Land Institute and Construction Industry Council. • Evening: Networking reception.
Day 2—Tuesday, Mar 25, 2025	• Morning: B2B Meetings, continued. • Midday: Industry Roundtable or Site Visit. • Afternoon/Evening: Departure to Taiwan.
Day 3—Wednesday, Mar 26, 2025	Taipei, Taiwan. • Morning: Country briefing at the American Institute in Taiwan. • Afternoon: Meetings with the National Association of Architects, Architecture Association of the R.O.C., and The American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ASHRAE) Taiwan chapter. • Evening: Reception.
Day 4—Thursday, Mar 27, 2025	• Morning: B2B meetings in Taiwan. • Midday/Evening: Departure to Ho Chi Minh City.
Day 5—Thursday, Mar 28, 2025	Ho Chi Minh City. • Morning: Market Briefing by the U.S. Consulate and AmCham: Vietnam Market Overview—Opportunities and Challenges for American companies. • B2G Meetings with the Department of Construction or Department of Planning and Architects and related Associations or Site visit. • Afternoon: B2B Meetings. • Evening: Reception.

* **Note:** The final schedule and potential site visits will depend on the availability of host government and business officials, specific goals of mission participants, and ground transportation.

Amendment to Revise the Trade Mission Dates and Deadline for Submitting Applications

Background

Design & Construction Trade Mission to Hong Kong, Taipei, and Ho Chi Minh City

The International Trade Administration has determined that to allow for enhanced participation the mission has been rescheduled to March 24–28, 2025. Additionally, to allow for optimal execution of recruitment the application deadline has been extended from July 31, 2024, to December 31, 2024. Applications may be accepted after that date if space remains and scheduling constraints permit. Interested U.S. companies and trade associations/organizations that have not already submitted an application are encouraged to do so. The U.S. Department of Commerce will review applications and make selection decisions on a rolling basis in accordance with the 89 FR 51307 (June 17, 2024). The applicants selected will be notified as soon as possible.

International Trade Administration

[C–570–173]

Vanillin from the People's Republic of China: Preliminary Affirmative Countervailing Duty Determination and Alignment of Final Determination with Final Antidumping Duty Determination

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that countervailable subsidies are being provided to producers and exporters of vanillin from the People's Republic of China (China). The period of investigation is January 1, 2023, through December 31, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable November 18, 2024.

FOR FURTHER INFORMATION CONTACT: Jeff Pedersen, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2769.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 703(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this countervailing duty (CVD) investigation on July 1, 2024.[1] On July 22, 2024, Commerce tolled certain deadlines in this administrative proceeding by seven days.[2] On August 13, 2024, Commerce postponed the preliminary determination of this investigation until

[1] *See Vanillin from the People's Republic of China: Initiation of Countervailing Duty Investigation,* 89 FR 54421 (July 1, 2024) (*Initiation Notice*).

[2] *See* Memorandum, ''Tolling of Deadlines for Antidumping and Countervailing Duty Proceedings,'' dated July 22, 2024.

November 12, 2024.[3] For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[4]

A list of topics discussed in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov*. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The product covered by this investigation is vanillin from China. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the *Preamble* to Commerce's regulations,[5] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage, (*i.e.,* scope).[6] No interested party commented on the scope of the investigation as it appeared in the *Initiation Notice.*

Methodology

Commerce is conducting this investigation in accordance with section 701 of the Act. For each of the subsidy programs found countervailable, Commerce preliminarily determines that there is a subsidy, *i.e.,* a financial contribution by an ''authority'' that gives rise to a benefit to the recipient, and that the subsidy is specific.[7]

Commerce notes that, in making these findings, it relied, in part, on facts available and, because it finds that one or more respondents did not act to the best of their ability to respond to Commerce's requests for information, it drew an adverse inference where appropriate in selecting from among the facts otherwise available.[8] For further information, *see* the ''Use of Facts Otherwise Available and Adverse Inferences'' section in the Preliminary Decision Memorandum.

Alignment

In accordance with section 705(a)(1) of the Act and 19 CFR 351.210(b)(4), Commerce is aligning the final CVD determination in this investigation with the final determination in the companion antidumping duty (AD) investigation of vanillin from China based on a request made by Solvay USA LLC (the petitioner).[9] Consequently, the final CVD determination will be issued on the same date as the final AD determination, which is currently scheduled to be issued no later than March 24, 2025, unless postponed.

All-Others Rate

Sections 703(d) and 705(c)(5)(A) of the Act provide that, in the preliminary determination, Commerce shall determine an estimated all-others rate for companies not individually examined. This rate shall be an amount equal to the weighted average of the estimated subsidy rates established for those companies individually examined, excluding any rates that are zero, *de minimis,* or based entirely under section 776 of the Act.

In this investigation, Commerce preliminarily calculated an individual estimated countervailable subsidy rate for Jiaxing Guihua Chemical Import and Export Co., Ltd. (Guihua), the only individually examined exporter/producer in this investigation. Because the only individually calculated rate is not zero, *de minimis,* or based entirely on facts otherwise available, the estimated weighted-average rate calculated for Guihua is the rate preliminarily assigned to all other producers and exporters, pursuant to section 705(c)(5)(A)(i) of the Act.

Preliminary Determination

Commerce preliminarily determines that the following estimated countervailable subsidy rates exist:

Company	Subsidy rate (percent *ad valorem*)
Jiaxing Guihua Chemical Import and Export Co., Ltd.[10]	27.33
All Others	27.33

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of its public announcement or, if there is no public announcement, within five days of the date of publication of this notice in the **Federal Register**, accordance with 19 CFR 351.224(b).

Consistent with 19 CFR 351.224(e), Commerce will analyze and, if appropriate, correct any timely allegations of significant ministerial errors by amending the preliminary determination. However, consistent with 19 CFR 351.224(d), Commerce will not consider incomplete allegations that do not address the significance standard under 19 CFR 351.224(g) following the preliminary determination. Instead, Commerce will address such allegations in the final determination together with issues raised in the case briefs or other written comments.

Suspension of Liquidation

In accordance with section 703(d)(1)(B) and (d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise as described in the scope of the investigation section entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register.** Further, pursuant to 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the rates indicated above.

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation. Rebuttal briefs, limited to issues raised in the case briefs, may be

[3] *See Vanillin from the People's Republic of China: Postponement of Preliminary Determination in the Countervailing Duty Investigation,* 89 FR 65845 (August 13, 2024).

[4] *See* Memorandum, ''Decision Memorandum for the Preliminary Affirmative Determination in the Countervailing Duty Investigation of Vanillin from the People's Republic of China,'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

[5] *See Antidumping Duties; Countervailing Duties, Final Rule,* 62 FR 27296, 27323 (May 19, 1997) (*Preamble*).

[6] *See Initiation Notice,* 89 FR at 54421–22.

[7] *See* sections 771(5)(B) and (D) of the Act regarding financial contribution; section 771(5)(E) of the Act regarding benefit; and section 771(5A) of the Act regarding specificity.

[8] *See* sections 776(a) and (b) of the Act.

[9] *See* Petitioner's Letter, ''Request to Align Final Countervailing Duty Determination with the Companion Antidumping Duty Final Determination,'' dated October 17, 2024.

[10] As discussed in the Preliminary Decision Memorandum, Commerce preliminarily finds Guihua to be cross owned with the following companies: Jiaxing Zhongua Chemical Co. Ltd., Zhejiang Zonghua Flavor Co., Ltd., and Jiaxing Zhonghua Thermal Power Development Co., Ltd.

filed not later than five days after the date for filing case briefs.[11] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[12]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their briefs that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[13] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[14]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, which is limited to covering issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce within 30 days after the date of publication of this notice in the **Federal Register.** Hearing requests should contain 1) the requestor's name, address, and telephone number; 2) the number of participants and whether any participant is a foreign national; and 3) a list of the issues to be discussed. Oral presentations at the hearing will be limited to issues raised in the briefs. If a request for a hearing is made, parties will be notified of the time and date for the hearing.[15] Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

All submissions, including case and rebuttal briefs, as well as hearing requests, should be filed using ACCESS. An electronically-filed document must be received successfully in its entirety by ACCESS by 5:00 p.m. Eastern Time on the established deadline.

U.S. International Trade Commission (ITC) Notification

In accordance with section 703(f) of the Act, Commerce will notify the ITC of its determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether imports of vanillin from China are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 703(f) and 777(i) of the Act, and 19 CFR 351.205(c).

Dated: November 12, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by the investigation is vanillin, with the molecular formula $C_8H_8O_3$ or $C_9H_{10}O_3$. For purposes of this investigation, vanillin consists of natural vanillin, synthetic vanillin, bio-sourced synthetic vanillin (biovanillin) (each also known as 4-Hydroxy-3-methoxybenzaldehyde), and ethylvanillin (also known as 3-Ethoxy-4-hydroxybenzaldehyde). Vanillin covered by this investigation is a chemical compound with the Chemical Abstracts Service (CAS) number 121–33–5 or 121–32–4. Vanillin is covered by the investigation regardless of whether it is in a crystalline powder or crystal form. Vanillin is covered by the scope of the investigation, irrespective of purity, particle size, or physical form.

Merchandise subject to the investigation is specified within the Harmonized Tariff Schedule of the United States (HTSUS) under subheading 2912.41.0000 and 2912.42.0000. The HTSUS subheadings and CAS registry numbers are provided for convenience and customs purposes only. The written description of the merchandise covered by the investigation is dispositive.

Appendix II

List of Topics Discussed in the Preliminary Decision Memorandum

I. Summary
II. Background
III. Scope of the Investigation
IV. Scope Comments
V. Alignment
VI. Injury Test
VII. Analysis of China's Financial System
VIII. Diversification of China's Economy
IX. Use of Facts Otherwise Available and Adverse Inferences
X. Subsidies Valuation
XI. Benchmarks
XII. Analysis of Programs
XIII. Recommendation

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XE458]

Nominations for the 2025–2028 General Advisory Committee and the Scientific Advisory Subcommittee to the United States Delegation to the Inter-American Tropical Tuna Commission

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for nominations.

SUMMARY: National Marine Fisheries Service, on behalf of the Secretary of Commerce, is seeking nominations for the General Advisory Committee (GAC) to the U.S. delegation to the Inter-American Tropical Tuna Commission (IATTC or Commission), as well as to a Scientific Advisory Subcommittee (SAS) of the GAC. The purpose of the GAC and its SAS is to provide public input and advice to the U.S. delegation to aid in the formulation of policy and positions for meetings of the IATTC and its subsidiary bodies. The SAS shall also function as the National Scientific Advisory Committee provided for in the Agreement on the International Dolphin Conservation Program.

DATES: Nominations must be received no later than December 17th, 2024.

ADDRESSES: Nominations should be directed to Jennifer Quan, Regional Administrator, NMFS West Coast Region, and may be submitted by the following means:

- Email *wcr.hms@noaa.gov* with the subject line: ''General Advisory Committee and Scientific Advisory Subcommittee nominations''

FOR FURTHER INFORMATION CONTACT: Lucille Bulkeley, West Coast Region, NMFS, at *lucille.bulkeley@noaa.gov,* or at (858)–546–5620.

SUPPLEMENTARY INFORMATION:

General Advisory Committee

The Tuna Conventions Act (TCA) provides that the Secretary of

Commerce, in consultation with the Secretary of State, shall appoint a ''General Advisory Committee'' to advise the U.S. delegation to the IATTC. The GAC shall be composed of no more than 25 individuals who shall be representative of the various groups concerned with the fisheries covered by the IATTC, including non-governmental conservation organizations, providing an equitable balance among such groups to the maximum extent practicable. Members of the GAC shall be invited to attend all non-executive meetings of the U.S. delegation to the IATTC and at such meetings shall be given the opportunity to examine and be heard on all proposed programs of investigation, reports, recommendations, and regulations of the Commission.

The Chair of the Pacific Fishery Management Council's (Pacific Council) Advisory Subpanel for Highly Migratory Fisheries and the Chair of the Western Pacific Fishery Management Council's (Western Pacific Council) Advisory Committee shall be ex-officio members of the GAC by virtue of their positions advising those Councils. GAC members will be eligible to participate as members of the U.S. delegation to the Commission and its working groups to the extent that the Commission rules and space for delegations allow.

Meetings of the GAC, except when in executive session, shall be open to the public, and prior notice of meetings shall be made public in timely fashion. In accordance with Public Law 114–81, the GAC shall not be subject to the Federal Advisory Committee Act (5 U.S.C. app.).

Individuals appointed to serve as a member of the GAC shall serve without pay. While away from their homes or regular places of business to attend meetings of the GAC, they shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently by the Federal Government are allowed expenses under 5 U.S.C. 5703. In addition, individuals appointed to serve as a member of the GAC shall not be considered Federal employees except for the purposes of injury compensation or tort.

Scientific Advisory Subcommittee

The TCA also provides that the Secretary of Commerce, in consultation with the Secretary of State, shall appoint persons to serve on the subcommittee of the GAC, referred to here as the ''Scientific Advisory Subcommittee.'' The SAS shall be composed of no fewer than 5 and no more than 15 qualified scientists with balanced representation from the public and private sectors, including non-governmental conservation organizations. In determining whether a person is a qualified scientist the Secretary may consider, among other things, advanced degrees and/or publications in fields such as fisheries or marine science.

National Scientific Advisory Committee

The SAS shall also function as the National Scientific Advisory Committee which is required to be established pursuant to Article XI of the Agreement on the International Dolphin Conservation Program (AIDCP). In this regard, the SAS shall perform the functions of the National Scientific Advisory Committee as specified in Annex VI of the AIDCP. These functions include, but are not limited to: (1) Receiving and reviewing relevant data, including data provided to NMFS by IATTC staff; (2) Advising and recommending measures and actions to the U.S. Government that should be undertaken to conserve and manage stocks of living marine resources in the eastern Pacific Ocean; (3) Making recommendations to the U.S. Government regarding research needs related to the eastern Pacific Ocean tuna purse seine fishery; (4) Promoting the regular and timely full exchange of data among the AIDCP Parties on a variety of matters related to the implementation of the AIDCP; and (5) Consulting with other experts, as necessary, in order to achieve the objectives of the AIDCP.

Members of the SAS/National Scientific Advisory Committee shall receive no compensation for their service.

General Provisions

Each member of the GAC shall be appointed for a term of 3 years, starting from the date of the appointment, and may be reappointed. The Secretary of Commerce and the Secretary of State shall provide the GAC with relevant information concerning fisheries and international fishery agreements. The Secretary of Commerce shall provide to the GAC such administrative and technical support services that are necessary for its effective functioning in a timely manner.

Procedures for Submitting Applications

Applications for the GAC and the SAS/National Scientific Advisory Committee should be submitted to NMFS West Coast Region (see **ADDRESSES**). This request for applications is for first time nominees, current members whose appointments will end in May 2025, and previous members. Self-nomination applications are acceptable. Applications should include all of the following information: (1) Full name, address (home and business, if different), telephone, and email address of nominee;

(2) Specification about whether the application is for the GAC or the SAS/National Scientific Advisory Committee or both; (3) Nominee's organization(s) or professional affiliation(s) serving as the basis for the nomination; (4) Background statement describing the nominee's qualifications and experience, especially as related to fisheries for tuna and tuna-like species in the eastern Pacific Ocean or other factors relevant to the implementation of the Convention Establishing the IATTC or the AIDCP. Applications to the SAS should highlight advanced degrees and academic publications; and (5) A written statement from the nominee of intent to participate actively and in good faith in the meetings and activities of either the GAC or the SAS/National Scientific Advisory Committee, or both.

Applicants who submitted material in response to the **Federal Register** notice published by NMFS on October 30, 2018 (83 FR 54573), or prior, should resubmit their applications pursuant to this notice.

Authority: 16 U.S.C. 951 *et seq.*

Dated: November 13, 2024.

Karen H. Abrams,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–23–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XE476]

Western Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The Western Pacific Fishery Management Council (Council) will hold its American Samoa Archipelago Fishery Ecosystem Plan (FEP) Advisory Panel (AP), Non-Commercial Fisheries Advisory Committee (NCFAC), Mariana Archipelago FEP Commonwealth of the Northern Mariana Islands (CNMI) AP, Fishing Industry Advisory Committee (FIAC), Hawaii Archipelago FEP AP, and the Mariana Archipelago FEP Guam

AP to discuss and make recommendations on fishery management issues in the Western Pacific Region.

DATES: The meetings will be held between December 3 and December 7, 2024. For specific times and agendas, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The meetings will be held at different locations. See **SUPPLEMENTARY INFORMATION** for specific locations. Instructions for connecting to the web conference and providing oral public comments will be posted on the Council website at *www.wpcouncil.org.* For assistance with the web conference connection, contact the Council office at (808) 522–8220.

FOR FURTHER INFORMATION CONTACT: Contact Kitty M. Simonds, Executive Director, Western Pacific Fishery Management Council; phone: (808) 522–8220.

SUPPLEMENTARY INFORMATION:

Meeting Locations

The Council will hold its American Samoa Archipelago FEP AP, NCFAC, Mariana Archipelago FEP CNMI AP, FIAC, Hawaii Archipelago FEP AP, and the Mariana Archipelago FEP Guam AP meetings in a hybrid format with in-person and remote participation (Webex) options available for the members and the public. In-person attendance for the American Samoa Archipelago FEP AP members and public will be hosted at the Tedi of Samoa Suite 208B, P8C6+V2F, Fagotogo Village, AS 96799. In-person attendance for the NCFAC and public will be hosted at the Council office, 1164 Bishop Street, Suite 1400, Honolulu, HI 96813. In-person attendance for Mariana Archipelago FEP CNMI AP members and public will be hosted at BRI Building Suite 205, Kopa Di Oru St., Garapan, Saipan 96950. In person attendance for FIAC and Hawaii Archipelago FEP AP members and public will be hosted at the Council office, 1164 Bishop Street, Suite 1400, Honolulu, HI 96813. In-person attendance for Mariana Archipelago FEP Guam AP members and public will be hosted at Cliff Pointe, 304 W O'Brien Drive, Hagatña, GU 96910.

The American Samoa FEP AP will meet on Tuesday, December 3, from 5 p.m. to 7 p.m. (Samoa Standard Time); the NCFAC will meet on Wednesday, December 4, 2024 from 1:30 p.m. to 4:30 p.m. (Hawaii Standard Time[HST]); the Mariana Archipelago FEP CNMI AP will meet on Thursday, December 5, from 6 p.m. to 8 p.m. (Chamorro Standard Time [ChST]); the FIAC will meet on Thursday, December 5, from 2 p.m. to 5 p.m. (HST); the Hawaii Archipelago FEP AP will meet on Friday, December 6, from 9 a.m. to 3 p.m. (HST); and the Mariana Archipelago Guam AP will meet on Saturday, December 7, from 11 a.m. to 1 p.m. (ChST).

Public Comment periods will be provided in the agendas. The order in which agenda items are addressed may change. The meetings will run as late as necessary to complete scheduled business.

Schedule and Agenda for the American Samoa Archipelago FEP AP Meeting

Tuesday, December 3, 2024, 5 p.m.–7 p.m. (Samoa Standard Time)

1. Welcome and Introductions
2. Review of the Last Advisory Panel (AP) Recommendation and Meetings
3. Feedback from the Fleet

A. Fourth Quarter Fisher Observations

B. Fisheries Issues

4. Council Fisheries Issues

A. Options for Hawaii and American Samoa Longline Fisheries Crew Training Requirement

B. Longline Electronic Monitoring Implementation Feasibility

5. Updates from NOAA Fisheries' Social-Ecological and Economic Systems (SEES) Program
6. Review of 2023–2026 AP Action Plan
7. Updates on the Council Inflation Reduction Act (IRA) Projects
8. Other Business
9. Public Comment
10. Discussion and Recommendations

Schedule and Agenda for the Non-Commercial Fisheries Advisory Committee

Wednesday, December 4, 2024, 1:30 p.m.–4:30 p.m.

1. Welcome and Introductions
2. Review of the Last NCFAC Meeting
3. Feedback from the Fleet
4. National Initiatives

A. NOAA Re-envisioning Recreational Fishing Data Collection

B. Marine Recreational Information Program Pacific Islands Regional Implementation Plan

5. Updates on Regional Initiatives

A. Territorial Creel Survey and Annual Report Modules

B. Hawaii

i. Hawaii Marine Recreational Fishing Survey

ii. Main Hawaiian Islands (MHI) Uku Project

6. Updates on Council IRA Projects
7. Other Business
8. Public Comment
9. Discussion and Recommendations

Schedule and Agenda for the Mariana Archipelago FEP CNMI AP Meeting

Thursday, December 5, 2024, 6 p.m.–8 p.m. (Chamorro Standard Time)

1. Welcome and Introductions
2. Review of the Last AP Recommendation and Meetings
3. Feedback from the Fleet

A. Fourth Quarter Fisher Observations

B. Fisheries Issues

4. Council Fisheries Issues

A. Status of Fisheries Development

5. Updates from NOAA Fisheries' SEES Program
6. Review of 2023–2026 AP Action Plan
7. Updates on the Council IRA Projects
8. Other Business
9. Public Comment
10. Discussion and Recommendations

Schedule and Agenda for the FIAC Meeting

Thursday, December 5, 2024, 2 p.m.–5 p.m. (Hawaii Standard Time)

1. Welcome and Introductions
2. Status Review on Previous FIAC recommendations
3. Roundtable update on Fishing/Market Issues/Impacts
4. U.S. Catch Limits for North Pacific Striped Marlin
5. Options for Hawaii and American Samoa Longline Fisheries Crew Training Requirement
6. Development of an Electronic Monitoring Program for Western Pacific Fisheries
7. MHI Bottomfish Market Snapshot
8. Updates on US and Pacific Island Trade Issues
9. Western and Central Pacific Fisheries Commission Updates
10. Other Business
11. Public Comment
12. Discussion and Recommendations

Schedule and Agenda for the Hawaii Archipelago FEP AP Meeting

Friday, December 6, 2024, 9 a.m.–3 p.m. (Hawaii Standard Time)

1. Welcome and Introductions
2. Review of the Last AP Recommendation and Meetings
3. Feedback from the Fleet

A. Fourth Quarter Fisher Observations

B. Fisheries Issues

4. Council Fisheries Issues

A. Options for Hawaii and American Samoa Longline Fisheries Crew Training Requirement

B. Development of an Electronic Monitoring Program for Western Pacific Fisheries

5. Updates from NOAA Fisheries' SEES Program
6. MHI Bottomfish Independent Survey in Hawaii Strategic Shift

7. Review of 2023–2026 AP Action Plan
8. Updates on the Council IRA Projects
9. Other Business
10. Public Comment
11. Discussion and Recommendations

Schedule and Agenda for the Mariana Archipelago FEP Guam AP Meeting

Saturday, December 7, 2024, 11 a.m.–1 p.m. (Chamorro Standard Time)

1. Welcome and Introductions
2. Review of the Last AP Recommendation and Meetings
3. Feedback from the Fleet
A. Fourth Quarter Fisher Observations
B. Fisheries Issues
4. Council Fisheries Issues
A. Modifying the Guam Bottomfish Rebuilding Plan
5. Guam Military Working Group Update
6. Updates from NOAA Fisheries' SEES Program
7. Review of 2023–2026 AP Action Plan
8. Updates on the Council IRA Projects
9. Other Business
10. Public Comment
11. Discussion and Recommendations

Special Accommodations

These meetings are accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kitty M. Simonds, (808) 522–8220 (voice) or (808) 522–8226 (fax), at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 13, 2024.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XE408]

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Shrimp Fishery of the Gulf of Mexico; Request for an Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of an application for an exempted fishing permit; request for comments.

SUMMARY: NMFS announces the receipt of an application for an exempted fishing permit (EFP) from Texas Sea Grant. If granted by NMFS, the EFP would authorize the continued testing of new designs for bycatch reduction devices (BRDs) for finfish, in the commercial shrimp fishery in Federal waters of the Gulf of Mexico (Gulf). The Better BRDs for the Gulf Shrimp Fleet Project is a collaborative effort to restore finfish populations and reduce finfish bycatch mortality through the development and certification of new BRDs for use by the commercial shrimp industry throughout the Gulf. This notice gives the public an opportunity to provide comments to NMFS regarding the request for an EFP.

DATES: Written comments must be received no later than December 3, 2024.

ADDRESSES: You may submit comments on the application, identified by NOAA–NMFS–2024–0128 by either of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *https://www.regulations.gov* and type NOAA–NMFS–2024–0128 in the Search box. Click the ''Comment'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit all written public comments to Frank Helies, Southeast Regional Office, NMFS, 263 13th Avenue South, St. Petersburg, FL 33701.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *https://www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments—enter ''N/A'' in the required fields if you wish to remain anonymous.

An electronic copy of the application may be obtained from the Southeast Regional Office website at *https://www.fisheries.noaa.gov/southeast/commercial-fishing/better-bycatch-reduction-device-gulf-shrimp-fleet-project/.*

FOR FURTHER INFORMATION CONTACT: Frank Helies, phone: 727–824–5305, email: *frank.helies@noaa.gov.*

SUPPLEMENTARY INFORMATION: The EFP is requested under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C 1801 *et seq.*), and regulations at 50 CFR 600.745(b) concerning exempted fishing.

The EFP application submitted to NMFS involves the use of experimental fishing gear (BRDs) on shrimp trawls in Federal waters. Federal regulations require fishermen on shrimp vessels to use NMFS certified BRDs while trawling for shrimp in Gulf Federal waters [50 CFR 622.53(a)]. The applicant is seeking an EFP that would exempt these research activities from the regulations requiring the use of certified BRDs in Federal waters of the Gulf at 50 CFR 622.53(a), and would allow the applicant to replace an existing approved BRD with one of four experimental BRD configurations as determined by the applicant. The specific EFP request is further described below.

The Better BRDs for the Gulf Shrimp Fleet Project is a collaborative effort between Louisiana Sea Grant, Texas Sea Grant, NOAA Restoration Center, and NMFS to restore finfish populations injured by the Deepwater Horizon oil spill through the development and certification of new BRDs for the commercial shrimp industry throughout the Gulf. The project involves the phased testing of new BRD designs in the commercial shrimp fishery in Federal waters of the Gulf. The new BRD designs could demonstrate a greater reduction in bycatch of finfish, over the federally certified Fisheye BRD, which may also lead to an overall increase in shrimp catch.

The project would further identify and develop new bycatch-reducing technology to reduce finfish discard mortality in commercial shrimp trawls. Additionally, the project seeks to advance cost-effective solutions for the Gulf shrimp fleet that would maximize the adoption and use by fishermen of any improved designs for BRDs that could be certified for use in the fishery.

The project is separated into several phases. The first phase that began in 2022 included proof-of-concept testing of new BRD designs by NMFS Gear Research Branch partners. This proof-of-concept testing included both dive and vessel testing aboard the research vessel Caretta. The dive testing was conducted off Panama City, Florida, and the vessel testing was conducted off Pascagoula, Mississippi. New BRD designs that showed the potential to be effective during proof-of-concept testing were accepted for further evaluation during the project's next phase, which involved stakeholder testing. A final phase planned for the future would be pre-certification and certification testing of the selected BRDs, consistent with the requirements in 50 CFR 622.53(a)(2) and

the NMFS Bycatch Reduction Device Testing Manual (*https://www.fisheries.noaa.gov/resource/document/bycatch-reduction-device-testing-manual-2016/*).

On August 26, 2022, NMFS published a notice announcing receipt of an EFP application to allow stakeholder testing of six BRD designs: Toms Fisheye, Large Mesh Sections, Nested Cylinder, Virgil Potter, Flapless Turtle Excluder Devices, and Composite Panel Variations (87 FR 52512). NMFS issued that EFP on October 6, 2024, and it is valid until December 31, 2024. The purpose of the commercial stakeholder testing authorized under the current EFP is to allow for stakeholder input on the strengths and weaknesses of new BRD designs across a variety of species and environmental conditions within the Gulf shrimp fishery. This testing will also aid in the acceptance of new BRDs by the commercial shrimping industry when the most promising designs are later submitted for NMFS certification.

The current EFP allows selection of up to 30 federally-permitted commercial Gulf shrimp vessels to test gear that passed the proof-of-concept testing. The proposed EFP would increase the number of vessels to 50. As with the current EFP, the location of proof-of-concept testing trial vessels under the proposed EFP would be distributed across the Federal Gulf shrimp fishermen and fishing grounds throughout the Gulf in water depths of 10–50 fathoms or 18–91 meters (m). During testing, fishermen on vessels included in the EFP would be surveyed for qualitative information about the new BRDs, and any other use recommendations that are needed. Additional BRD information including time and difficulty to install, longevity, ease of use (*e.g.,* tangling during deployment or retrieval, and shark damage), bycatch and shrimp retention characteristics, and overall cost would be collected by the applicant to assist with promotion of new BRD designs for industry wide usage.

Vessels in the proposed project would be using experimental BRD designs on trips of up to 30 days at sea. Trip duration and the total number of tows with experimental BRD gear may vary based on sea conditions and vessel business factors at the discretion of the vessel operator. During a 30-day trip, approximately 90 tows with BRD-equipped shrimp trawls are expected to occur. Tow times, which is the length of time the gear is pulled through the water, would be variable between different vessels but would be consistent on the same vessel during each trip. Typical tow times average 3 hours but vary from 1 to 5 hours. If all 50 vessels participate and complete each test tow, there is the potential for a maximum of 3,000 tows for this phase of the project.

The proposed EFP would be valid through December 31, 2028. As with the current EFP, all BRD testing on federally permitted shrimp vessels would occur during the course of normal Gulf shrimp fishing operations and all of these operations would comply with all other current Federal shrimp regulations such as closed areas and size limits.

Experimental BRD Configurations

Under the proposed EFP, four experimental BRD configurations could be tested by the applicant and project vessels. Three of these designs are included in the current EFP—Large Mesh Sections, Flapless Turtle Excluder Devices, and Composite Panel Variations. Each type of experimental BRD to be tested under the proposed EFP is listed and summarized below.

Large Mesh Sections

In the Large Mesh Sections BRD, areas of the trawl net are composed of 2-inch (in) or 5-centimeter (cm) or larger stretched mesh that is much larger in size than the minimum dimensions of the mesh in the cod end of the net where the catch collects, and installed anywhere from 4 to 8 feet (ft) or 1.2 to 2.4 m from the trawl tie off rings. The larger mesh provides openings that make it easier for fish to escape the trawl net.

Flapless Turtle Excluder Devices

The project would test two different designs of flapless turtle excluder devices (TEDs) known as the Chauvin TED and the Drury TED. These are both top-shooting TEDs, which have an escape opening on the net closer to the surface, with PVC pieces placed ahead of the TED extension at the leading edge of the escape opening cut in the net. These TEDs are designed to work as both a TED and a BRD. However, neither TED configuration has been tested as a BRD.

The Chauvin TED is a top-shooting TED that contains a ''Chauvin shrimp deflector,'' which is an allowable TED modification [50 CFR 223.207(d)(8)]. A modification to the Drury TED is not an allowable TED modification. Therefore, if the Drury TED modification is tested under this EFP, the applicant would need to obtain an additional TED testing permit from NMFS prior to commencement of testing.

Composite Panel Variations

The Composite Panel BRD is a NMFS-certified design that includes two soft panels with two sets of windows that allow fish to escape on the bottom side of the net and a secondary component of either a cone fish deflector, which is designed to guide fish to the escape windows, or a large mesh section installed further down into the net. There is a potential for differences in BRD characteristics when used with a top versus bottom-shooting TED. There is also potential for differences when installed with the escape openings in a top orientation of the composite panel as opposed to the current certified design that orients the escape openings to the bottom. The EFP would allow for testing of configurations that are not already certified for use by NMFS.

Large TED Openings

Large TED escape openings are certified for industry use to comply with the TED requirements but have not been tested as a BRD. The triangular cut design shows potential for bycatch reduction. This design has an opening with a base no less than 40 in (102 cm) wide across the TED frame. The sides of the triangle taper along the bar and must each measure no less than 53 in (135 cm). Similar to the flapless TEDs, the opening allows fish to escape the net.

NMFS finds the application warrants further consideration based on a preliminary review. Possible conditions the agency may impose on the permit, if granted, include but are not limited to, a prohibition on conducting fishing gear testing within marine protected areas, marine sanctuaries, special management zones, or areas where testing might interfere with managed fisheries without additional authorization. Additionally, NMFS may require special protections for Endangered Species Act-listed species and designated critical habitat, and may require particular gear markings. A final decision on issuance of the EFP will depend on NMFS' review of public comments received on the application, consultations with the appropriate fishery management agencies of the affected states, the Gulf of Mexico Fishery Management Council, and the U.S. Coast Guard, and a determination that the activities to be taken under the EFP are consistent with all applicable laws.

Authority: 16 U.S.C 1801 *et seq.*

Dated: November 8, 2024.

Karen H. Abrams,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF DEFENSE

Department of the Air Force

[25–0005206–AFRL/RX]

Notice of Intent To Grant an Exclusive Patent License

AGENCY: Department of the Air Force, Department of Defense.

ACTION: Notice of Intent.

SUMMARY: Pursuant to the Bayh-Dole Act and implementing regulations, the Department of the Air Force hereby gives notice of its intent to grant an exclusive patent license to Trustees of Tufts College, 136 Harrison Avenue, Suite 75K–950, Boston, Massachusetts 02111, USA. Such license is exclusive.

DATES: Written objections must be filed no later than fifteen (15) calendar days after the date of publication of this Notice.

ADDRESSES: Submit written objections to James F. McBride, Air Force Materiel Command Law Office, AFMCLO/JAZ, 2240 B Street, Area B, Building 11, Wright-Patterson AFB, OH 45433–7109; Facsimile: (937) 255–9318; or Email: *afmclo.jaz.tech@us.af.mil.* Include Docket ARX–210727A–PL in the subject line of the message.

FOR FURTHER INFORMATION CONTACT: James F. McBride, Air Force Materiel Command Law Office, AFMCLO/JAZ, 2240 B Street, Area B, Building 11, Wright-Patterson AFB, OH 45433–7109; Telephone: (937) 713–0229; Facsimile: (937) 255–9318; or Email: *afmclo.jaz.tech@us.af.mil.*

SUPPLEMENTARY INFORMATION:

Abstract of Patents and Patent Application(s)

I. Oxygen-sensing materials and methods are disclosed. The materials include oxygen-sensing chromophores embedded in a solid matrix including silk fibroin in an amount by weight of at least 50% of the total weight of the solid matrix. The solid matrix possesses at least partial transparency at relevant wavelengths. The solid matrix is biocompatible and biodegradable. The solid matrix is not a hydrogel. The chromophores are distributed throughout the solid matrix. Tissue oxygenation can be estimated from phosphorescence measurements made from oxygen-sensing materials implanted in subject.

Intellectual Property

Silk-chromophore Composite Materials for in situ Oxygen Sensing. The invention is protected under U.S. Provisional Patent Application Serial No.63/317,929, filed on March 8, 2022, PCT Patent Application Serial No. PCT/US2023/014796, filed on March 8, 2023, U.S. Patent Application Serial No. 18/823,853, filed on September 4, 2024.

The Department of the Air Force may grant the prospective license unless a timely objection is received that sufficiently shows the grant of the license would be inconsistent with the Bayh-Dole Act or implementing regulations. A competing application for a patent license agreement, completed in compliance with 37 CFR 404.8 and received by the Air Force within the period for timely objections, will be treated as an objection and may be considered as an alternative to the proposed license.

Authority: 35 U.S.C. 209; 37 CFR 404.

Tommy W. Lee,

Acting Air Force Federal Register Liaison Officer.

[FR Doc. 2024–26826 Filed 11–15–24; 8:45 am]

BILLING CODE 3911–44–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Business Board; Notice of Federal Advisory Committee Meeting

AGENCY: Department of Defense (DoD).

ACTION: Notice of Federal advisory committee meeting.

SUMMARY: The DoD is publishing this notice to announce that the following Federal advisory committee meeting of the Defense Business Board (''the Board'') will take place.

DATES: Closed to the public Tuesday, November 12, 2024 from 7:45 a.m. to 9:45 a.m., 10:55 a.m. to 11:30 a.m., and 4 p.m. to 5 p.m., and Wednesday, November 13, 2024 from 8 a.m. to 9:05 a.m. Open to the public Tuesday, November 12, 2024 from 10 a.m. to 10:55 a.m. and 1:30 p.m. to 4 p.m., and Wednesday, November 13, 2024 from 9:45 a.m. to 11 a.m. All eastern time.

ADDRESSES: The open and closed portions of the meeting will be held in room B4 of the Pentagon Library Conference Center (PLCC), virtually (for public attendance of open portions), room 1E840 in the Pentagon, and Arlington National Cemetery, Arlington, VA.

FOR FURTHER INFORMATION CONTACT: Ms. Cara Allison Marshall, Designated Federal Officer (DFO) of the Board in writing at Defense Business Board, 1155 Defense Pentagon, Room 5B1088A, Washington, DC 20301–1155; or by email at *cara.l.allisonmarshall.civ@mail.mil;* or by phone at 703–614–1834.

SUPPLEMENTARY INFORMATION: Due to circumstances beyond the control of the Designated Federal Officer, the Defense Business Board was unable to provide public notification required by 41 CFR 102–3.150(a) concerning its November 12–13, 2024 meeting. Accordingly, the Advisory Committee Management Officer for the Department of Defense, pursuant to 41 CFR 102–3.150(b), waives the 15-calendar day notification requirement.

This meeting is being held under the provisions of chapter 10 of title 5, United States Code (U.S.C.) (commonly known as the ''Federal Advisory Committee Act'' or ''FACA''); 5 U.S.C. 552b(c); and 41 Code of Federal Regulations (CFR) 102–3.140 and 102–3.150.

Purpose of the Meeting: The mission of the Board is to examine and advise the Secretary and Deputy Secretary of Defense on overall DoD management and governance. The Board provides independent, strategic-level, private sector and academic advice and counsel

on enterprise-wide business management approaches and best practices for business operations and achieving National Defense goals.

Agenda: The Board will begin in closed session in the PLCC, room B4, on November 12 from 7:45 a.m. to 9:45 a.m. The DFO will begin the closed session followed by a welcome by Board Chair, Hon. Deborah James. The Board will receive a classified discussion on the Department's accomplishments across a range of initiatives since 2021, in the areas of capabilities, acquisitions, personnel, and business processes from Hon. Kathleen Hicks, Deputy Secretary of Defense. Next, the Board will receive a classified discussion on ''National Defense Industrial Strategy Implementation Plan'' from Hon. Laura Taylor-Kale, Assistant Secretary for Industrial Base Policy, Office of the Under Secretary of Defense for Acquisition and Sustainment. This discussion will discuss the progress on implementing the National Defense Industrial Strategy, including key investments and initiatives to secure and make more resilient the supply chains upon which the Department depends. The DFO will adjourn the closed session. The Board will convene in open session from 10 a.m. to 10:55 a.m. The DFO will begin the open session followed by a discussion on ''Using Strategic Capital for National Security'' from Dr. Jason Rathje, Director, Office of Strategic Capital (OSC). This discussion will focus on the strategies and partnerships that OSC is using to accelerate and scale private investment for national security to support critical technology areas and improve supply chains. The DFO will adjourn the open session. The DFO will reconvene a closed session from 10:55 a.m. to 11:30 a.m., and the Board will receive a classified discussion on ''DoD Current Affairs'' from Hon. Lloyd Austin, Secretary of Defense. The discussion with Secretary Austin will focus on the state of the current global security environment and its implications for current and future business operations. The DFO will adjourn the closed session and the Board will break for lunch. The Board will convene in open session from 1:30 p.m. to 4 p.m. The DFO will begin the open session followed by a briefing, deliberation, and vote on the study, ''Industry Partnerships for Crises'', which will be presented by the Business Operations Advisory subcommittee. This session will provide the proposed findings and recommendations related to building better relationships with industry to expand capability rapidly in crises for the Board to consider. The open session will continue with a discussion on ''Customer Experience Implementation Plan'' from Mr. Robert G. Salesses, Deputy Director, Washington Headquarters Services (WHS). This discussion from Mr. Salesses will explore WHS' new ''Customer Experience Implementation Plan'', which aims to focus the defense field activity on delivering superior customer service to their clients. The DFO will adjourn the open session. The DFO will begin the closed session from 4 p.m. to 5 p.m. The Board will receive a discussion on ''Air Force and Space Force Management and Budget'' from Ms. Melissa Dalton, Under Secretary of the Air Force. This discussion will brief the Board on her role in organizing, training, and equipping the Air Force and Space Force, including managing the annual budget of over $200 billion. The DFO will adjourn the closed session of the day. The Board will reconvene in a closed session on November 13 in Pentagon room 1E840 from 8 a.m. to 9:05 a.m. The DFO will begin the closed session followed by a welcome by Board Chair, Hon. Deborah James. The Board will receive a classified discussion on U.S. Special Operations Command (SOCOM) from Ms. Melissa Johnson, Acquisition Executive for U.S. Special Operations Command. This discussion will explain how SOCOM engages in acquisition, development, and supply chain management, by placing authority to act at the lowest possible level and eliminating bureaucratic barriers to entry for both established and emerging businesses. The Board will next hear a classified update from Mrs. Fern Sumpter Winbush, Principal Deputy Director for the Defense POW/MIA Accounting Agency (DPAA). This discussion will focus on the efforts in recovering unaccounted DoD personnel listed as prisoners of war and missing in action from designated past conflicts, from countries around the world, including how DPAA manages sensitive relationships with governments that have had conflicts with the U.S. to accomplish its mission. The DFO will adjourn the closed session. After a break, the Board will travel to the Arlington National Cemetery, Arlington, VA. The DFO will begin the open session. The Board will receive their final discussion from 9:45 a.m. to 11 a.m. This briefing will describe the role of the Old Guard at Arlington National Cemetery, provide a tour of the Tomb area, and observe a changing of the Guard ceremony. The tour will provide insight into how rigorous and uncompromising business processes produce one of the military's most precise, disciplined units. This is a publicly available tour and subject to any capacity limitations and security procedures required by the Cemetery of all visitors. The DFO will adjourn the meeting. The latest version of the agenda is available on the Board's website at: *https://dbb.dod.afpims.mil/Meetings/Meeting-November-2024/.*

Meeting Accessibility: In accordance with 5 U.S.C. 1009(d) and 41 CFR 102–3.155, it is hereby determined that portions of the November 12—13 meeting of the Board will include classified information and other matters covered by 5 U.S.C. 552b(c)(1) and that, accordingly, those portions of the meeting will be closed to the public on Tuesday, November 12, 2024 from 7:45 a.m. to 9:45 a.m., 10:55 a.m. to 11:30 a.m. and 4 p.m. to 5 p.m. and closed to the public Wednesday, November 13, 2024 from 8 a.m. to 9:05 a.m. This determination is based on the consideration that it is expected that discussions throughout those portions of the meeting will involve classified matters of national security. Such classified material is so intertwined with the unclassified material that it cannot reasonably be segregated into separate discussions without defeating the effectiveness and meaning of those portions of the meeting. To permit those portions to be open to the public would preclude discussion of such matters and would greatly diminish the ultimate utility of the Board's findings and recommendations to the Secretary of Defense and the Deputy Secretary of Defense. Pursuant to 5 U.S.C. 1009(a)(1) and 41 CFR 102–3.140, the portions of the meeting on November 12 from 10 a.m. to 10:55 a.m. and 1:30 p.m. to 4 p.m. are open to the public virtually. The portion of the meeting on November 13 from 9:45 a.m. to 11 a.m. is open to the public at Arlington National Cemetery. The Board will gather at the Tomb of the Unknown Soldier. Persons desiring to attend the public portions are required to register. To attend the public portions of the meeting, submit your name, affiliation/organization, telephone number, and email contact information to the Board at *osd.pentagon.odam.mbx.defense-business-board@mail.mil.* Requests to attend the public portions must be received no later than 4 p.m. on Thursday, November 7, 2024. Upon receipt of this information, the Board will provide further instructions for virtually attending the meeting.

Written Comments and Statements: Pursuant to 41 CFR 102–3.105(j) and 102–3.140 and 5 U.S.C. 1009(a)(3), the public or interested organizations may

submit written comments or statements to the Board in response to the stated agenda of the meeting or regarding the Board's mission in general. Written comments or statements should be submitted to Ms. Cara Allison Marshall, the DFO, via electronic mail (the preferred mode of submission) at the address listed in the **FOR FURTHER INFORMATION CONTACT** section. Each page of the comment or statement must include the author's name, title or affiliation, address, and daytime phone number. The DFO must receive written comments or statements submitted in response to the agenda set forth in this notice by 4 p.m. on Friday, November 8, 2024, to be considered by the Board. The DFO will review all timely submitted written comments or statements with the Board Chair and ensure the comments are provided to all members of the Board before the meeting. Written comments or statements received after this date may not be provided to the Board until its next scheduled meeting. Please note that all submitted comments and statements will be treated as public documents and will be made available for public inspection, including, but not limited to, being posted on the Board's website.

Dated: November 13, 2024.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 2024–26843 Filed 11–15–24; 8:45 am]

BILLING CODE 6001–FR–P

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Inland Waterways Users Board Meeting Notice

AGENCY: U.S. Army Corps of Engineers, Department of the Army, Department of Defense.

ACTION: Notice of open Federal advisory committee meeting.

SUMMARY: The Department of the Army is publishing this notice to announce the Federal advisory committee meeting of the U.S. Army Corps of Engineers, Inland Waterways Users Board (Board). This meeting is open to the public. For additional information about the Board, please visit the committee's website at *https://www.iwr.usace.army.mil/Missions/Navigation/Inland-Waterways-Users-Board/.*

DATES: The Army Corps of Engineers, Inland Waterways Users Board will conduct a meeting from 9 a.m. to 1 p.m. EST on December 13, 2024.

ADDRESSES: The Inland Waterways Users Board meeting will be conducted at the Hilton Garden Inn Reagan National Airport, Salons 1, 2, & 3, 2020 Richmond Highway, Arlington VA, 22202. The online virtual portion of the Inland Waterways Users Board meeting can be accessed at *https://usace1.webex.com/meet/ndc.nav,* Public Call-in: USA Toll-Free 844–800–2712, USA Caller Paid/International Toll: 1–669–234–1177 Access Code: 199 117 3596, Security Code 1234.

FOR FURTHER INFORMATION CONTACT: Mr. Paul D. Clouse, the Designated Federal Officer (DFO) for the committee, in writing at the Institute for Water Resources, U.S. Army Corps of Engineers, ATTN: CEIWR–NDC, 7701 Telegraph Road, Casey Building (Room H221), Alexandria, VA 22315–3868; by telephone at 202–768–3157; or by email at *Paul.D.Clouse@usace.army.mil.* Alternatively, contact Mr. Steven D. Riley, an Alternate Designated Federal Officer (ADFO), in writing at the Institute for Water Resources, U.S. Army Corps of Engineers, ATTN: CEIWR–NDC, 7701 Telegraph Road, Casey Building, Alexandria, VA 22315–3868; by telephone at 703–659–3097; or by email at *Steven.D.Riley@usace.army.mil.*

SUPPLEMENTARY INFORMATION: This committee meeting is being held under the provisions of chapter 10 of title 5, United States Code (U.S.C.) (commonly known as the ''Federal Advisory Committee Act'' or ''FACA''), section 552b of title 5, U.S.C. (commonly known as the ''Government in the Sunshine Act''), and §§ 102–3.140 and 102–3.150 of title 41, Code of Federal Regulations (CFR).

Purpose of the Meeting: The Board is chartered to provide independent advice and recommendations to the Secretary of the Army on construction and rehabilitation project investments on the commercial navigation features of the inland waterways system of the United States. At this meeting, the Board will receive briefings and presentations regarding the investments, projects, and status of the inland waterways system of the United States and conduct discussions and deliberations on those matters. The Board is interested in written and verbal comments from the public relevant to these purposes.

Agenda: At this meeting the agenda will include an update on the status of the Inland Waterways Trust Fund (IWTF); 2025 Capital Investment Strategy Update; Cost escalations; Inland waterways modernization project updates for Chickamauga Lock and the Kentucky Lock Addition on the Tennessee River, the Upper Ohio River Montgomery Lock, Lower Monongahela Locks 2,3,& 4, Mississippi River-Illinois Waterway Navigation and Ecosystem Sustainability Program (NESP) Lock 25, and McClellan-Kerr Arkansas River Navigation System (MKARNS) Three Rivers; Asset Management Update; Major Rehabilitation Reports Update; Inland Waterways Users Board Project Advisors.

Availability of Materials for the Meeting: A copy of the agenda or any updates to the agenda for the December 13, 2024, meeting will be available. The final version will be available at the meeting. All materials will be posted to the website for the meeting.

Public Accessibility to the Meeting: Pursuant to 5 U.S.C. 552b, as amended, and 41 CFR 102–3.140 through 102–3.1 65, and subject to the availability of space, this meeting is open to the public. Registration of members of the public who wish to participate in the meeting will begin at 8:30 a.m. on the day of the meeting. Participation is on a first-to-arrive basis. Any interested person may participate in the meeting, file written comments or statements with the committee, or make verbal comments during the public meeting, at the times, and in the manner, permitted by the committee, as set forth below.

Special Accommodations: Individuals requiring any special accommodations related to the public meeting or seeking additional information about the procedures, should contact Mr. Paul Clouse, the committee DFO, or Mr. Steven Riley, an ADFO, at the email addresses or telephone numbers listed in the **FOR FURTHER INFORMATION CONTACT** section, at least five (5) business days prior to the meeting so that appropriate arrangements can be made.

Written Comments or Statements: Pursuant to 41 CFR 102–3.105(j) and 102–3.140 and section 10(a)(3) of the Federal Advisory Committee Act, the public or interested organizations may submit written comments or statements to the Board about its mission and/or the topics to be addressed in this public meeting. Written comments or statements should be submitted to Mr. Clouse, the committee DFO, or Mr. Riley, a committee ADFO, via electronic mail, the preferred mode of submission, at the addresses listed in the **FOR FURTHER INFORMATION CONTACT** section in the following formats: Adobe Acrobat or Microsoft Word. The comment or statement must include the author's name, title, affiliation, address, and daytime telephone number. Written

comments or statements being submitted in response to the agenda set forth in this notice must be received by the committee DFO or ADFO at least five (5) business days prior to the meeting so that they may be made available to the Board for its consideration prior to the meeting. Written comments or statements received after this date may not be provided to the Board until its next meeting. Please note that because the Board operates under the provisions of the Federal Advisory Committee Act, as amended, all written comments will be treated as public documents and will be made available for public inspection.

Verbal Comments: Members of the public will be permitted to make verbal comments during the public meeting only at the time and in the manner allowed herein. If a member of the public is interested in making a verbal comment at the open meeting, that individual must submit a request, with a brief statement of the subject matter to be addressed by the comment, at least three business (3) days in advance to the committee DFO or ADFO, via electronic mail, the preferred mode of submission, at the addresses listed in the **FOR FURTHER INFORMATION CONTACT** section. The committee DFO and ADFO will log each request to make a comment, in the order received, and determine whether the subject matter of each comment is relevant to the Board's mission and/or the topics to be addressed in this public meeting. A 30-minute period near the end of the meeting will be available for verbal public comments. Members of the public who have requested to make a verbal comment and whose comments have been deemed relevant under the process described above, will be allotted no more than three (3) minutes during this period, and will be invited to speak in the order in which their requests were received by the DFO and ADFO.

Stephen L. Hill,

Director, Operations and Regulatory Programs.

BILLING CODE 3720–58–P

DEPARTMENT OF ENERGY

Carbon Dioxide Capture, Utilization, and Sequestration Federal Lands Permitting Task Force; Carbon Dioxide Capture, Utilization, and Sequestration Non-Federal Lands Permitting Task Force

AGENCY: Office of Fossil Energy and Carbon Management, Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: The Department of Energy hereby publishes a notice of a joint open meeting of the Carbon Dioxide Capture, Utilization, and Sequestration Federal Lands Permitting Task Force and the Carbon Dioxide Capture, Utilization, and Sequestration Non-Federal Lands Permitting Task Force (CCUS Permitting Task Forces). The Federal Advisory Committee Act (FACA) requires that public notice of these meetings be announced in the **Federal Register**.

DATES: Wednesday, December 11, 2024; 9 a.m. to 5 p.m. eastern time. Start and end times may change slightly. Please visit *https://www.energy.gov/fecm/use-it-act-carbon-dioxide-capture-utilization-and-sequestration-ccus-permitting-task-forces* for the most up to date agenda.

ADDRESSES: This joint meeting of the CCUS Permitting Task Forces will be held in person at the U.S. Geologic Survey National Center, 12201 Sunrise Valley Drive, Reston, Virginia 20192, with the option of virtual attendance. Members of the public are encouraged to participate virtually, as physical space to attend onsite is limited to members. The website for the CCUS Permitting Task Forces will be updated with announcements about the meeting, including instructions for registering to attend virtually: *https://www.energy.gov/fecm/use-it-act-carbon-dioxide-capture-utilization-and-sequestration-ccus-permitting-task-forces.*

FOR FURTHER INFORMATION CONTACT: Christina Waldron, Designated Federal Officer, Fossil Energy and Carbon Management, U.S. Department of Energy, Washington, DC 20585; Telephone: (771) 217–0877 or Email: *doe.ccus.permitting.task.force@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: In April 2024, Department of Energy (DOE) and the Council on Environmental Quality (CEQ) chartered and appointed members for two new CCUS Permitting Task Forces as required by the Utilizing Significant Emissions with Innovative Technologies (USE IT) Act and in accordance with FACA. The purpose of each Task Force is the same, but the scope differs by geographical area—one Task Force focuses on Federal lands and the Outer Continental Shelf, and the other focuses on non-Federal lands.

Purpose of the Committee: The purpose of the Task Forces is to identify permitting and other challenges and successes that permitting authorities and project developers and operators face in permitting projects in an efficient, orderly, and responsible manner; and improve the performance of the permitting process and regional coordination for the purpose of promoting the efficient, orderly, and responsible development of carbon capture, utilization, and sequestration projects and carbon dioxide pipelines.

To accomplish these objectives, the USE IT Act requires each Task Force to undertake the following activities with respect to its geographic scope: (1) inventory existing or potential Federal and State approaches to facilitate reviews associated with the deployment of carbon capture, utilization, and sequestration projects and carbon dioxide pipelines, including best practices that avoid duplicative reviews to the extent permitted by law, engage stakeholders early in the permitting process, and make the permitting process efficient, orderly, and responsible; (2) develop common models for State-level carbon dioxide pipeline regulation and oversight guidelines that can be shared with States in the geographical area covered by the Task Force; (3) provide technical assistance to States in the geographical area covered by the Task Force in implementing regulatory requirements and any models developed under (2) above; (4) inventory current or emerging activities that transform captured carbon dioxide into a product of commercial value, or as an input to products of commercial value; (5) identify any priority carbon dioxide pipelines needed to enable efficient, orderly, and responsible development of carbon capture, utilization, and sequestration projects at increased scale; (6) identify gaps in the current Federal and State regulatory framework and in existing data for the deployment of carbon capture, utilization, and sequestration projects and carbon dioxide pipelines; (7) identify Federal and State financing mechanisms available to project developers; and (8) develop recommendations for relevant Federal agencies on how to develop and research technologies that can capture carbon dioxide and would be able to be deployed within the region covered by the Task Force, including any projects that have received technical or financial assistance for research under paragraph (6) of section 103(g) of the Clean Air Act (42 U.S.C. 7403(g)).

In carrying out these activities to support the efficient, effective, and responsible permitting of CCUS projects, the Task Forces shall also consider and develop recommendations to address community concerns regarding the climate benefits and environmental justice implications,

including public health and safety, of CCUS. In the development of these recommendations, the Task Forces shall consider and identify recommended mechanisms to ensure just treatment and meaningful involvement of impacted communities.

Tentative Agenda

- Opening remarks
- Presentations on Task Forces' progress on USE IT Act duties
- Public comment period
- Closing remarks

To view the final agenda when available, or for additional information about the Task Forces, the meeting, and the prior meeting of the Task Forces, see the CCUS Permitting Task Forces website at: *https://www.energy.gov/fecm/use-it-act-carbon-dioxide-capture-utilization-and-sequestration-ccus-permitting-task-forces.*

Public Participation: The meeting is open to the public via webcast. The website will be updated with instructions and links to register for the meeting. All attendees are required to register in advance. If you would like to file a written statement with either Task Force, you may do so either before or after the meeting. If you would like to make oral statements regarding any of the items on the agenda, please send an email request to Christina Waldron at *doe.ccus.permitting.task.force@hq.doe.gov.* You must make your request for an oral statement by Wednesday, December 4, 2024, at 11:59 a.m. ET. Reasonable provision will be made to include the scheduled oral statements on the agenda. Time allotted per speaker will depend on the number who wish to speak but is not expected to exceed three minutes. The Chairpersons of the Task Forces will conduct the meeting to facilitate the orderly conduct of business.

Minutes: The minutes of this meeting will be available for public review within 45 days at the website of the CCUS Permitting Task Forces at: *https://www.energy.gov/fecm/use-it-act-carbon-dioxide-capture-utilization-and-sequestration-ccus-permitting-task-forces.* They can also be obtained by contacting Ms. Christina Waldron using the contact information above.

Signing Authority: This document of the Department of Energy was signed on November 12, 2024, by David Borak, Committee Management Officer, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE **Federal Register** Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC on November 13, 2024.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2601–077]

Northbrook Carolina II, LLC; Notice of Availability of Final Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission or FERC) regulations, 18 CFR part 380, Commission staff reviewed Northbrook Carolina II, LLC (licensee) application for surrender of the license for the Bryson Hydroelectric Project No. 2601 and have prepared an Environmental Assessment (EA) for the proposed surrender.[1] The licensee proposes to surrender the license via severing its interconnection with the grid and leaving the dam in place and operational under the regulation of the North Carolina Division of Environmental Quality State Dam Safety Engineer with the reservoir elevation and discharge remaining the same as previous operations. The Bryson Project consists of a multiple arch dam with multiple spillway and overflow sections, a 38-acre reservoir, and two vertical Francis-type generating units located on the Oconaluftee River in Swain County, North Carolina. The project does not occupy any Federal lands.

The final EA contains Commission staff's analysis of the potential environmental effects of the proposed surrender, alternatives to the proposed action, and concludes that the proposed surrender, with appropriate environmental protective measures, would not constitute a major Federal action that would significantly affect the quality of the human environment.

The final EA may be viewed on the Commission's website at *http://www.ferc.gov* using the ''elibrary'' link. Enter the docket number (P–2601) in the docket number field to access the document. For assistance, contact FERC Online Support at *FERCOnlineSupport@ferc.gov* or toll-free at 1–866–208–3676, or for TTY, (202) 502–8659.

You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202)502–6595 or *OPP@ferc.gov.*

For further information, contact Michael Calloway at 202–502–8041 or *Michael.calloway@ferc.gov.*

Dated: November 12, 2024.

Debbie-Anne A. Reese,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2660–038]

Woodland Pulp, Llc; Notice of Intent to Prepare an Environmental Assessment

On October 31, 2023, and supplemented December 15, 2023, Woodland Pulp, LLC (licensee) filed an application to surrender the license for the Forest City Storage Project No. 2660. The project is located on the East Branch of the St. Croix River in Washington and Aroostook counties, Maine. The project does not occupy federal land.

The Commission previously issued a notice of application for surrender of license accepted for filing, soliciting comments, motions to intervene, and

protests on January 25, 2024. The Commission extended the closing date of the comment period by notice on February 20, 2024, and April 18, 2024. The comment period closed on June 28, 2024. On August 22, 2024, the Commission issued a notice granting late intervention to the Peskotomuhkati Nation at Skutik. The Commission received numerous comments and motions to intervene from members of the public, resource agencies, and non-governmental organizations. The January 25, 2024, notice also invited federal, state, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues affected by the proposal, to cooperate in the preparation of any environmental document. The Commission did not receive any requests to be a cooperating agency.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) for the project.[1] Commission staff plans to issue an EA by June 30, 2025. Revisions to the schedule may be made as appropriate. The EA will be issued for a 30-day public comment period. All comments filed on the EA will be reviewed by staff and considered in the Commission's final decision on the proceeding.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members, and others to access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Any questions regarding this notice may be directed to Michael Calloway at 202–502–8041 or *Michael.calloway@ferc.gov*.

Dated: November 12, 2024

Debbie-Anne A. Reese,

Secretary.

[1] In accordance with the Council on Environmental Quality's regulations, the unique identification number for documents relating to this environmental review is EAXX–019–20–000–1731404846. 40 CFR 1501.5(c)(4) (2024).

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP25–10–000]

Transcontinental Gas Pipe Line Company, LLC; Notice of Application and Establishing Intervention Deadline

Take notice that on October 29, 2024, Transcontinental Gas Pipe Line Company, LLC (Transco), 2800 Post Oak Boulevard, Houston, Texas 77056–6106, filed an application under sections 7(c) and 7(b) of the Natural Gas Act, and Part 157 of the Commission's regulations requesting authorization for its Southeast Supply Enhancement Project (Project) located in various counties in Virginia, North Carolina, South Carolina, Georgia, and Alabama. The Project consists of Transco replacing certain facilities and expanding its existing system to provide 1,596,900 dekatherms per day of incremental firm transportation capacity in the southeastern United States. Transco estimates the total cost of the Project to be $1,527,002,036 and proposes a negotiated incremental recourse rate under Transco's Rate Schedule FT and Part 284(g) of the Commission's regulations, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Specifically, Transco proposes to construct and operate: (1) approximately 30.8-mile-long, 42-inch-diameter pipeline loop in Pittsylvania County, Virginia and Rockingham County, North Carolina; (2) 24.1-mile-long, 30-inch-diameter pipeline loop in Guilford, Forsyth, and Davidson Counties, North Carolina; (3) additional 45,000 hp at its existing Compressor Station (CS) 165 in Pittsylvania County, Virginia; (4) additional 87,207 hp at its existing CS 155 in Davidson County, North Carolina; (5) additional 15,900 hp at its existing CS 150 in Iredell County, North Carolina; (6) additional 61,500 hp at its existing CS 145 in Cleveland Counties, North Carolina and (7) other related piping and valving modifications located in various counties in North Carolina, South Carolina, Georgia, and Alabama. Transco states that it has executed binding precedent agreements with twelve Project Shippers for 100% of the incremental firm transportation service under the Project.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at (202) 502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

Any questions regarding the proposed project should be directed to Antauis Byrd, Regulatory Analyst, Transcontinental Gas Pipe Line Company, LLC, Post Office Box 1396, Houston, Texas 77251, by phone at (713) 215–3741, or by email at *Outreach@williams.com.*

Pursuant to section 157.9 of the Commission's Rules of Practice and Procedure,[1] within 90 days of this Notice the Commission staff will either: complete its environmental review and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or environmental assessment (EA) for this proposal. The filing of an EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify Federal and State agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all Federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

Water Quality Certification

Transco stated that a water quality certificate under section 401 of the Clean Water Act is required for the project from the Virginia Department of Environmental Quality, the North Carolina Department of Environmental Quality, the South Carolina Department of Health and Environmental Control,

[1] 18 CFR 157.9.

the Georgia Department of Natural Resources-Environmental Division, and the Alabama Department of Environmental Management. When available, Transco should submit to the Commission a copy of the request for certification for the Commission authorization, including the date the request was submitted to the certifying agency, and either (1) a copy of the certifying agency's decision or (2) evidence of waiver of water quality certification.

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file comments on the project, you can protest the filing, and you can file a motion to intervene in the proceeding. There is no fee or cost for filing comments or intervening. The deadline for filing a motion to intervene is 5:00 p.m. Eastern Time December 3, 2024. How to file protests, motions to intervene, and comments is explained below.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202)502–6595 or *OPP@ferc.gov.*

Comments

Any person wishing to comment on the project may do so. Comments may include statements of support or objections, to the project as a whole or specific aspects of the project. The more specific your comments, the more useful they will be.

Protests

Pursuant to sections 157.10(a)(4)[2] and 385.211[3] of the Commission's regulations under the NGA, any person[4] may file a protest to the application. Protests must comply with the requirements specified in section 385.2001[5] of the Commission's regulations. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

To ensure that your comments or protests are timely and properly recorded, please submit your comments on or before December 3, 2024.

There are three methods you can use to submit your comments or protests to the Commission. In all instances, please reference the Project docket number CP25–10–000 in your submission.

(1) You may file your comments electronically by using the eComment feature, which is located on the Commission's website at *www.ferc.gov* under the link to Documents and Filings. Using eComment is an easy method for interested persons to submit brief, text-only comments on a project;

(2) You may file your comments or protests electronically by using the eFiling feature, which is located on the Commission's website (*www.ferc.gov*) under the link to Documents and Filings. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; first select ''General'' and then select ''Comment on a Filing''; or

(3) You can file a paper copy of your comments or protests by mailing them to the following address below. Your written comments must reference the Project docket number (CP25–10–000).

To file via USPS: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426

To file via any other courier: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852

The Commission encourages electronic filing of comments (options 1 and 2 above) and has eFiling staff available to assist you at (202) 502–8258 or *FercOnlineSupport@ferc.gov.*

Persons who comment on the environmental review of this project will be placed on the Commission's environmental mailing list, and will receive notification when the environmental documents (EA or EIS) are issued for this project and will be notified of meetings associated with the Commission's environmental review process.

The Commission considers all comments received about the project in determining the appropriate action to be taken. However, the filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding. For instructions on how to intervene, see below.

Interventions

Any person, which includes individuals, organizations, businesses, municipalities, and other entities,[6] has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure[7] and the regulations under the NGA[8] by the intervention deadline for the project, which is December 3, 2024. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at *https://www.ferc.gov/resources/guides/how-to/intervene.asp.*

There are two ways to submit your motion to intervene. In both instances, please reference the Project docket number CP25–10–000 in your submission.

(1) You may file your motion to intervene by using the Commission's eFiling feature, which is located on the Commission's website (*www.ferc.gov*) under the link to Documents and Filings. New eFiling users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; first select ''General'' and then select ''Intervention.'' The eFiling feature includes a document-less intervention option; for more information, visit *https://www.ferc.gov/docs-filing/efiling/document-less-intervention.pdf;* or

(2) You can file a paper copy of your motion to intervene, along with three copies, by mailing the documents to the address below. Your motion to intervene must reference the Project docket number CP25–10–000.

To file via USPS: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory

[2] 18 CFR 157.10(a)(4).

[3] 18 CFR 385.211.

[4] Persons include individuals, organizations, businesses, municipalities, and other entities. 18 CFR 385.102(d).

[5] 18 CFR 385.2001.

[6] 18 CFR 385.102(d).

[7] 18 CFR 385.214.

[8] 18 CFR 157.10.

Commission, 888 First Street NE, Washington, DC 20426

To file via any other courier: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852

The Commission encourages electronic filing of motions to intervene (option 1 above) and has eFiling staff available to assist you at (202) 502–8258 or *FercOnlineSupport@ferc.gov.*

Protests and motions to intervene must be served on the applicant either by mail at: Antauis Byrd, Regulatory Analyst, Transcontinental Gas Pipe Line Company, LLC, Post Office Box 1396, Houston, Texas 77251, or by email at *Outreach@williams.com.* Any subsequent submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online. Service can be via email with a link to the document.

All timely, unopposed [9] motions to intervene are automatically granted by operation of Rule 214(c)(1).[10] Motions to intervene that are filed after the intervention deadline are untimely, and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations.[11] A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC website at *www.ferc.gov* using the ''eLibrary'' link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to *www.ferc.gov/docs-filing/esubscription.asp.*

Intervention Deadline: 5:00 p.m. Eastern Time on December 3, 2024.

Dated: November 12, 2024.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 1922–052]

Ketchikan Public Utilities; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for a new major license to continue to operate and maintain the Beaver Falls Hydroelectric Project No. 1922. The project is located on Beaver Falls Creek in Ketchikan Gateway Borough, Alaska. Commission staff has prepared an Environmental Assessment (EA) for the project.

The EA contains the staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major Federal action that would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the EA via the internet through the Commission's Home Page (*http://www.ferc.gov/*), using the ''eLibrary'' link. Enter the docket number, excluding the last three digits in the docket number field, to access the document. For assistance, contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* or at (866) 208–3676 (toll-free), or (202) 502–8659 (TTY).

You may also register online at *https://ferconline.ferc.gov/FERCOnline.aspx* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

Any comments should be filed within 30 days from the date of this notice.

The Commission strongly encourages electronic filing. Please file comments using the Commission's eFiling system at *https://ferconline.ferc.gov/FERCOnline.aspx.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *https://ferconline.ferc.gov/QuickComment.aspx.* For assistance, please contact FERC Online Support. In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include docket number P–4639–033.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595, or *OPP@ferc.gov.*

For further information, contact Golbahar Mirhosseini at *golbahar.mirhosseini@ferc.gov.*

Dated: November 12, 2024.

Debbie-Anne A. Reese,

Secretary.

BILLING CODE 6717–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0261 and OMB 3060–0270; FR ID 261511]

Information Collections Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as

required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before December 18, 2024.

ADDRESSES: Comments should be sent to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Your comment must be submitted into *www.reginfo.gov* per the above instructions for it to be considered. In addition to submitting in *www.reginfo.gov* also send a copy of your comment on the proposed information collection to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418–2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control Number: 3060–0261.

Title: Section 90.215, Transmitter Measurements.

Form No.: Not applicable.

Frequency of Response: Extension of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions and state, local or tribal Government.

Number of Respondents: 150,081 respondents; 234,439 responses.

Estimated Time per Response: .033 hours.

Frequency of Response: Recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 303(f) of the Communications Act of 1934, as amended.

Total Annual Burden: 7,727 hours.

Total Annual Cost: No cost.

Needs and Uses: The information collection requirements contained in Section 90.215 require station licensees to measure the carrier frequency, output power, and modulation of each transmitter authorized to operate with power in excel of two watts when the transmitter is initially installed and when any changes are made which would likely affect the modulation characteristics. Such measurements, which help ensure proper operation of transmitters, are to be made by a qualified engineering measurement service, and are required to be retained in the station records, along with the name and address of the engineering measurement service, and the name of the person making the measurements. The information is normally used by the licensee to ensure that equipment is operating within prescribed tolerances. Prior technical operation of transmitters helps limit interference to other users and provides the licensee with the maximum possible utilization of equipment.

OMB Control No.: 3060–0270.

Title: Section 90.443, Content of Station Records.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions, and state, local or tribal government.

Number of Respondent and Responses: 166,658 respondents; 166,658 responses.

Estimated Time per Response: .25 hours.

Frequency of Response: Recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection of information is contained in 47 U.S.C. 303(j), as amended.

Total Annual Burden: 61,665 hours.

Annual Cost Burden: No cost.

Needs and Uses: The information collection requirements contained under Section 90.443(b) require that each licensee of a station shall maintain records for all stations by providing the dates and pertinent details of any maintenance performed on station equipment, along with the name and address of the service technician who did the work. If all maintenance is performed by the same technician or service company, the name and address need be entered only once in the station records.

The information collection requirements under Section 90.443(c) require that at least one licensee participating in the cost arrangement must maintain cost sharing records.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6700–01–P

FEDERAL MARITIME COMMISSION

National Shipper Advisory Committee December 2024 Meeting

AGENCY: Federal Maritime Commission.

ACTION: Notice of Federal advisory committee meeting.

SUMMARY: Notice is hereby given of a meeting of the National Shipper Advisory Committee (NSAC), pursuant to the Federal Advisory Committee Act. The Committee advises the Federal Maritime Commission. The meeting will be held for the purpose of soliciting and discussing information, insight, and expertise pertaining to conditions in the ocean freight delivery system relevant to the Commission.

DATES: The Committee will meet in person in Washington, DC, on December 3, 2024, from 1 p.m. until 3 p.m. eastern time. Please note that this meeting may adjourn early if the Committee has completed its business.

ADDRESSES: The meeting will be held at the Surface Transportation Board (STB) located at 395 E St. SW, Washington, DC 20423. This meeting will be open to the public. Requests to register should be submitted to *nsac@fmc.gov* and contain ''REGISTER FOR NSAC MEETING'' in the subject line. The deadline for members of the public to register to attend the meeting in person is Tuesday, November 26, 2024, at 5 p.m. eastern time. In-person attendees should be prepared to present a government ID at the STB. The meeting will also stream virtually, and a link will be distributed in advance of the meeting to those who register. Please note in the registration request if you would like to attend in person or virtually.

FOR FURTHER INFORMATION CONTACT: Mr. Dylan Richmond, Designated Federal Officer of the National Shipper Advisory Committee, phone: (202) 523–5810; email: *drichmond@fmc.gov.*

SUPPLEMENTARY INFORMATION:

Background: The National Shipper Advisory Committee is a Federal advisory committee. It operates under the provisions of the Federal Advisory Committee Act, 5 U.S.C. app., and 46 U.S.C. chapter 425. The Committee was established on January 1, 2021, when the National Defense Authorization Act for Fiscal Year 2021 became law. Public Law 116–283, section 8604, 134 Stat. 3388 (2021). The Committee provides information, insight, and expertise pertaining to conditions in the ocean freight delivery system to the Commission. Specifically, the Committee advises the Federal Maritime Commission on policies relating to the competitiveness, reliability, integrity, and fairness of the international ocean freight delivery system. 46 U.S.C. 42502(b).

The Committee will receive an update from each of its subcommittees and a briefing from the Digital Container Shipping Association. The Committee will receive a proposal for a recommendation to the Federal Maritime Commission and plans to vote on these recommendations. Any proposed recommendations and the agenda will be available for the public to view in advance of the meeting on the NSAC's website, *https://www.fmc.gov/about/national-shipper-advisory-committee-nsac/.* The Committee will also take public comment in the meeting.

Public Comments: The Committee will take public comment at its meeting and are particularly interested in receiving feedback regarding their objectives and ongoing discussions.

Members of the public may also submit written comments to NSAC at any time. Comments should be addressed to NSAC, c/o Dylan Richmond, Federal Maritime Commission, 800 North Capitol St. NW, Washington, DC 20573 or *nsac@fmc.gov.*

A copy of all meeting documentation, including meeting minutes, will be available at *www.fmc.gov* following the meeting.

By the Commission.

Dated: November 13, 2024.

David Eng,

Secretary.

BILLING CODE 6760–01–P

FEDERAL TRADE COMMISSION

[File No. 232 3060]

Sitejabber; Analysis of Proposed Consent Order To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement; request for comment.

SUMMARY: The consent agreement in this matter settles alleged violations of Federal law prohibiting unfair or deceptive acts or practices. The attached Analysis of Proposed Consent Order to Aid Public Comment describes both the allegations in the complaint and the terms of the consent order—embodied in the consent agreement—that would settle these allegations.

DATES: Comments must be received on or before December 18, 2024.

ADDRESSES: Interested parties may file comments online or on paper by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below. Please write ''Sitejabber; File No. 232 3060'' on your comment and file your comment online at *https://www.regulations.gov* by following the instructions on the web-based form. If you prefer to file your comment on paper, please mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Mail Stop H–144 (Annex J), Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Joyce Dela Peña (202–326–2722), Attorney, Division of Advertising Practices, Bureau of Consumer Protection, Federal Trade Commission, 600 Pennsylvania Avenue NW, Washington, DC 20580.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 15 U.S.C. 46(f), and FTC Rule § 2.34, 16 CFR 2.34, notice is hereby given that the above-captioned consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of 30 days. The following Analysis to Aid Public Comment describes the terms of the consent agreement and the allegations in the complaint. An electronic copy of the full text of the consent agreement package can be obtained at *https://www.ftc.gov/news-events/commission-actions.*

You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before December 18, 2024. Write ''Sitejabber; File No. 232 3060'' on your comment. Your comment—including your name and your State—will be placed on the public record of this proceeding, including, to the extent practicable, on the *https://www.regulations.gov* website.

Because of heightened security screening, postal mail addressed to the Commission will be subject to delay. We strongly encourage you to submit your comments online through the *https://www.regulations.gov* website. If you prefer to file your comment on paper, write ''Sitejabber; File No. 232 3060'' on your comment and on the envelope, and mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Mail Stop H–144 (Annex J), Washington, DC 20580.

Because your comment will be placed on the publicly accessible website at *https://www.regulations.gov,* you are solely responsible for making sure your comment does not include any sensitive or confidential information. In particular, your comment should not include sensitive personal information, such as your or anyone else's Social Security number; date of birth; driver's license number or other State identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure your comment does not include sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any ''trade secret or any commercial or financial information which . . . is privileged or confidential''—as provided by section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule § 4.10(a)(2), 16 CFR 4.10(a)(2)—including competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

Comments containing material for which confidential treatment is requested must be filed in paper form, must be clearly labeled ''Confidential,'' and must comply with FTC Rule § 4.9(c). In particular, the written request for confidential treatment that accompanies the comment must include the factual and legal basis for the request and must identify the specific portions of the comment to be withheld from the public record. *See* FTC Rule § 4.9(c). Your comment will be kept confidential only if the General Counsel grants your request in accordance with the law and the public interest. Once your comment has been posted on the *https://www.regulations.gov* website—as legally required by FTC Rule § 4.9(b)—we cannot redact or remove your comment from that website, unless you submit a confidentiality request that meets the requirements for such treatment under FTC Rule § 4.9(c), and the General Counsel grants that request.

Visit the FTC website at *https://www.ftc.gov* to read this document and the news release describing the proposed settlement. The FTC Act and other laws the Commission administers permit the collection of public comments to consider and use in this proceeding, as appropriate. The Commission will consider all timely and responsive public comments it receives on or before December 18, 2024. For information on the Commission's privacy policy, including routine uses permitted by the Privacy Act, see *https://www.ftc.gov/site-information/privacy-policy.*

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission (''Commission'') has accepted, subject to final approval, an agreement containing a consent order from GGL Projects, Inc., which does business as Sitejabber (''Sitejabber''). The proposed consent order (''proposed order'') has been placed on the public record for thirty days for receipt of comments by interested persons. Comments received

during this period will become part of the public record. After thirty days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement and take appropriate action or make final the agreement's proposed order.

This matter involves consumer reviews and ratings of businesses and products that Sitejabber collected on behalf of its clients' businesses. It collected these ratings and reviews from consumers at the time of purchase, before consumers had an opportunity to actually experience the product or service purchased. According to the FTC, Sitejabber used these point-of-purchase results to inflate the ratings and review counts of its clients on the Sitejabber.com review platform and in Google and other search results. The complaint explains that Sitejabber also provided its clients with product review widgets that allowed them to publish, on their own websites, product-specific ratings and reviews that Sitejabber collected.

The complaint alleges that Sitejabber violated section 5(a) of the FTC Act by misrepresenting that point-of-sale ratings and reviews reflected the experiences of consumers who had actually received and had the opportunity to experience the product or services purchased. The complaint further alleges that Sitejabber provided its business clients with the means and instrumentalities to deceive consumers that product reviews and ratings collected at the time of purchase and displayed on the clients' websites were from consumers who had received and had the opportunity to experience the product being reviewed.

The proposed order contains provisions designed to prevent Sitejabber from engaging in these and similar acts and practices in the future. Provision I prohibits Sitejabber from misrepresenting or assisting others in misrepresenting that the average customer rating or total number of ratings or reviews of a product, service, or business reflects the views of customers who had received the product or service purchased and had the opportunity to experience it, or that any rating or review collected at the time or point of purchase was collected from a customer who received the product or service purchased or had the opportunity to experience the product or service purchased. The provision also prohibits misrepresentations about any ratings, average ratings, or reviews that Sitejabber collects, moderates, or displays. Provision II prohibits Sitejabber from providing others with the means or instrumentalities to misrepresent that product or service ratings or reviews collected at the point of purchase were collected from customers who had the opportunity to experience the product or service purchased.

Provisions III through VII of the proposed order contain reporting and compliance provisions. Provision III mandates that Sitejabber acknowledge receipt of the order, distribute the order to principals, officers, and certain employees and agents, and obtain signed acknowledgments from them. Provision IV requires Sitejabber to submit compliance reports to the Commission one year after the order's issuance and submit notifications when certain events occur. Under Provision V, Sitejabber must create certain records for ten years and retain them for five years. Provision VI provides for the FTC's continued compliance monitoring of Sitejabber's activity during the order's effective dates. Finally, Provision VII provides the effective dates of the order, including that, with exceptions, the order will terminate in 20 years.

The purpose of this analysis is to facilitate public comment on the proposed order. It is not intended to constitute an official interpretation of the complaint or proposed order, or to modify in any way the proposed order's terms.

By direction of the Commission.

April J. Tabor,

Secretary.

Concurring Statement of Commissioner Melissa Holyoak

I support today's settlement with Sitejabber, an online review platform that collected customer ratings and reviews about shopping experiences and products through surveys displayed on the checkout screen. The crux of the Complaint is that Sitejabber allegedly (1) misrepresented that customer ratings and reviews displayed on its website and in internet search results were from consumers who had the opportunity to experience the products or services purchased, and (2) provided its clients using the embeddable web widget with the ''means and instrumentalities'' to misrepresent that the displayed customer reviews and ratings were from customers who had actually purchased or experienced the product or service. I write in brief to note our proper use of the ''means and instrumentalities'' doctrine here, a form of primary liability appropriate where the defendant itself engages in deception.[1]

The Complaint alleges that Sitejabber's embeddable web widget, which displayed Instant Feedback Product Reviews (''IFPRs''), was, as designed, an inherently deceptive tool. While Sitejabber collected real feedback about customers' shopping choices at the point-of-sale,[2] Sitejabber's widget displayed it on customer-facing websites as ''star'' ratings of products themselves. According to the Complaint, Sitejabber built a mismatch into IFPRs, limiting real customer reviews to one aspect (shopping choices), while displaying those reviews about an entirely different aspect (the product itself).[3] Importantly, there is no suggestion that Sitejabber's clients had the ability to control or customize the output from the embeddable web widget. Thus, Sitejabber allegedly designed, distributed, and deployed IFPRs for its clients, in short, to mislead consumers about what product ratings signified.

Unlike the Commission's Complaint against review writing platform Rytr,[4] this Complaint properly alleges that Sitejabber provided the ''means and instrumentalities'' to deceive consumers. Whereas Rytr provided a neutral review-writing tool that may have been used deceptively in some instances,[5] we allege here that the only function of Sitejabber's embeddable web widget, as designed, was to enable its clients to display a deceptive description of its instant ratings and reviews on their own websites.

Of course, there is nothing inherently deceptive about the collection, use, and display of consumer reviews, where the output accurately reflects the input. Indeed, such products could be highly valuable to both consumers and the market, enabling businesses to tout real customer reviews about their products

[1] *See, e.g., In re Shell Oil Co.,* 128 F.T.C. 749, 764 (1999) (majority statement) (''It is well settled law that the originator is liable if it passes on a false or misleading representation with knowledge or reason to expect that consumers may possibly be deceived as a result.'') (citing *Regina Corp.* v. *FTC,* 322 F.2d 765 768 (3d Cir. 1963) (affirming liability under means and instrumentalities theory where defendant distributed its own misrepresentative price lists that were used, in turn, to deceive consumers)); *id.* at 766 (Commissioner Swindle, dissenting) (''Means and instrumentalities is a form of primary liability, and a respondent is primarily liable only for its own misrepresentations to consumers.'').

or services and facilitating more informed consumer decisions about their shopping experience or the product itself. But design choices matter when developing these types of products. And Sitejabber's design choice here conflated real customer feedback about shopping choices with an actual rating for a product, harming its clients and consumers.

Concurring Statement of Commissioner Andrew N. Ferguson

Today, the Commission issues an administrative complaint and accepts a proposed consent agreement with Sitejabber.[1] Sitejabber provided its clients, e-commerce stores, with the ability to collect instant shopping-experience and product reviews from customers on order confirmation screens—immediately after placing an order but before the customer could have received or used the products. For posting these reviews and average ratings on its clients' profile pages on *Sitejabber.com*, and misrepresenting that the reviews were from customers who had actually received and used the products, the complaint accuses Sitejabber of deceiving consumers in violation of section 5 of the FTC Act.[2] For giving its clients the ability to embed those same product ratings on their own websites, the complaint accuses Sitejabber of a further section 5 violation for furnishing its clients with the means and instrumentalities to deceive consumers. I concur in both counts.

This case presents some of the same issues presented in the Commission's recent action against the artificial-intelligence platform Rytr, from which I dissented.[3] The Commission raises the same means-and-instrumentalities theory of section 5 liability that it deployed against Rytr for offering an AI-powered consumer review generator. Sitejabber's alleged business practices, however, are very different from Rytr's. Although someone could have used Rytr's tool to deceive consumers, the tool also had substantial lawful uses. Sitejabber's instant product reviews and the widgets by which its clients displayed them on their own websites, however, served no purpose other than to deceive consumers. Indeed, it appears that Sitejabber's very purpose in offering the widgets was to assist its clients in deceiving consumers.

Sitejabber collected two types of reviews from consumers. Instant Feedback Surveys (IFSs) asked customers to comment on their shopping experience immediately after concluding a purchase, and to rate that experience on a scale of one-to-five stars. Instant Feedback Product Reviews (IFPRs) also took the form of a written response and a one-to-five-star rating, but asked customers why they chose the product they had just purchased. Sitejabber would collect these reviews from the consumer on the retailer's web page. Prompts to collect the reviews would pop up on the retailer web page almost immediately after the consumer had finalized a purchase.

Instant Feedback Survey (IFS)

Instant Feedback Product Reviews (IFPRs)

Sitejabber maintained a public profile page on *Sitejabber.com* for each of its retail clients showing their average rating and individual reviews, including IFS-derived ratings and reviews. Additionally, on a ''Products'' tab on that same page, Sitejabber listed the products sold by that client alongside the average IFPR ratings for each.[4] Consumers browsing these profile pages would reasonably believe that all these reviews and ratings were from customers who had received and had a chance to use the products sold by the retailers. The Commission alleges that Sitejabber did not adequately disclose that these reviews and ratings were obtained at the point of sale, before the customers could have received, let alone used, the purchased products. For misrepresenting IFSs and IFPRs as

[1] *In re GGL Projects, Inc., a corporation, also d/b/a Sitejabber,* Complaint & Decision and Order.

[2] 15 U.S.C. 45(a).

[3] Dissenting Statement of Commissioner Andrew N. Ferguson, Joined by Commissioner Melissa Holyoak, *In the Matter of Rytr LLC,* Matter No. 2323052 (Sept. 25, 2024) (''Ferguson Rytr Dissent'').

[4] For some of Sitejabber's clients, the ratings would also incorporate reviews from consumers who had a chance to receive and use the products. Such reviews are not inherently deceptive, and nothing in the Commission's proposed consent order would prohibit Sitejabber from displaying those reviews, and the average ratings derived from them, on its own site or through widgets. See Decision & Order at 5–6 (prohibiting Sitejabber from misrepresenting that reviews collected at the point of sale were from customers who had an opportunity to receive and use the product, from misrepresenting that ratings were derived only from reviews left by customers who had such an opportunity, and from providing the means and instrumentalities to make such misrepresentations). But comingling such reviews with reviews collected at the point-of-sale, before the consumer could have received and used the product, renders the entire star rating deceptive. See *United States* v. *Phillip Morris USA Inc.,* 566 F.3d 1095, 1128 (D.C. Cir. 2009) (''[E]ven partially true statements can be actionable fraud if intentionally misleading as to facts.'').

authentic reviews from customers who had received and had a chance to use the products, the complaint charges Sitejabber with deceptive conduct in violation of section 5.

Sitejabber is also accused of having provided its retail clients with widgets by which the retailers could embed the IFPR-derived product ratings on their own websites. These widgets had no purpose other than to represent that those product ratings were derived from the reviews of consumers who had received and had a chance to use the product in question. This representation was false given that the ratings were obtained from consumers who had not received the product when they provided the rating. For offering this widget, the complaint charges Sitejabber with a further section 5 violation for providing the means and instrumentalities for the commission of deceptive acts and practices.

Sitejabber's condemned business practices are very different from Rytr's. Rytr provided an AI-powered writing tool which could be used to generate draft consumer reviews.[5] Although a consumer or business could have used Rytr's tool to generate a false product review, and that false product review could in some circumstances violate section 5's prohibition on deceptive acts or practices, that was not necessarily the case.[6] Indeed, the Commission did not supply a single example of someone having used Rytr's tool to violate section 5.[7] A consumer also could have used Rytr's tool to generate an initial draft of a perfectly honest consumer review.[8] The mere fact that someone could use a product to commit fraud does not make that product the means and instrumentalities to commit fraud.[9] In my view, the provision of a product or service with potential unlawful uses is not the provision of the means and instrumentalities to violate section 5 unless (1) the instrumentality in question ''has no or de minimis legal use''; [10] (2) the provider of the instrumentality had the purpose of facilitating the section 5 violation; [11] or (3) the provider ''knows, or has reason to know, that the person to whom the product or service was supplied will use it to violate section 5.'' [12]

Whereas Rytr's review generator tool satisfied none of those requirements, the allegations in the complaint here show that Sitejabber's product satisfies all three. First, there is no legitimate purpose for a widget displaying an instant product review rating. No reasonable consumer would be interested in a one-to-five-star product rating derived from reviews left by other consumers who had not yet received or used the product.[13] When a consumer views a product rating, he reasonably assumes that the rating is based on reviewers' experiences with the product, not with the purchasing process. Second, because the widgets had no use other than to deceive consumers, we can reasonably infer that Sitejabber knew that every single one of its clients was using them for that purpose. Finally, there is ample evidence that Sitejabber's very purpose in offering the widgets was to assist in the deception of consumers. The widgets were nothing but an extension of the same deception that Sitejabber was carrying out on its own website using the same deceptive ratings and on behalf of the same clients.

I therefore concur in the Commission's complaint and proposed consent order against Sitejabber.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Supplemental Evidence and Data Request on Dietary Total Fat Intake and Dietary Polyunsaturated Fatty Acid Intake and Child Growth and Development Outcomes: A Systematic Review

AGENCY: Agency for Healthcare Research and Quality (AHRQ), HHS.

ACTION: Request for supplemental evidence and data submission.

SUMMARY: The Agency for Healthcare Research and Quality (AHRQ) is seeking scientific information submissions from the public. Scientific information is being solicited to inform our review on *Dietary Total Fat Intake and Dietary Polyunsaturated Fatty Acid Intake and Child Growth and Development Outcomes: A Systematic Review,* which is currently being conducted by the AHRQ's Evidence-based Practice Centers (EPC) Program. Access to published and unpublished pertinent scientific information will improve the quality of this review.

DATES: *Submission Deadline* on or before December 18, 2024.

ADDRESSES:

Email submissions: epc@ahrq.hhs.gov.

Print submissions:

Mailing Address: Center for Evidence and Practice Improvement, Agency for Healthcare Research and Quality, ATTN: EPC SEADs Coordinator, 5600 Fishers Lane, Mail Stop 06E53A, Rockville, MD 20857.

Shipping Address (FedEx, UPS, etc.): Center for Evidence and Practice Improvement, Agency for Healthcare Research and Quality, ATTN: EPC SEADs Coordinator, 5600 Fishers Lane, Mail Stop 06E77D, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Kelly Carper, Telephone: 301–427–1656 or Email: *epc@ahrq.hhs.gov.*

SUPPLEMENTARY INFORMATION: The Agency for Healthcare Research and Quality has commissioned the Evidence-based Practice Centers (EPC) Program to complete a review of the evidence for *Dietary Total Fat Intake and Dietary Polyunsaturated Fatty Acid Intake and Child Growth and Development Outcomes: A Systematic Review.* AHRQ is conducting this review pursuant to Section 902 of the Public Health Service Act, 42 U.S.C. 299a.

The EPC Program is dedicated to identifying as many studies as possible that are relevant to the questions for each of its reviews. In order to do so, we are supplementing the usual manual and electronic database searches of the literature by requesting information from the public (*e.g.,* details of studies conducted). We are looking for studies that report on *Dietary Total Fat Intake and Dietary Polyunsaturated Fatty Acid Intake and Child Growth and Development Outcomes: A Systematic Review.* The entire research protocol is available online at: *https://effectivehealthcare.ahrq.gov/products/child-growth-development-outcomes/protocol.*

This is to notify the public that the EPC Program would find the following information on *Dietary Total Fat Intake and Dietary Polyunsaturated Fatty Acid Intake and Child Growth and Development Outcomes: A Systematic Review* helpful:

- A list of completed studies that your organization has sponsored for this topic. In the list, please *indicate whether results are available on ClinicalTrials.gov along with the ClinicalTrials.gov trial number.*
- *For completed studies that do not have results on ClinicalTrials.gov,* a summary, including the following elements, if relevant: study number, study period, design, methodology, indication and diagnosis, proper use instructions, inclusion and exclusion criteria, primary and secondary outcomes, baseline characteristics, number of patients screened/eligible/enrolled/lost to follow-up/withdrawn/analyzed, effectiveness/efficacy, and safety results.
- *A list of ongoing studies that your organization has sponsored for this topic.* In the list, please provide the *ClinicalTrials.gov* trial number or, if the trial is not registered, the protocol for the study including, if relevant, a study number, the study period, design, methodology, indication and diagnosis, proper use instructions, inclusion and exclusion criteria, and primary and secondary outcomes.
- Description of whether the above studies constitute *ALL Phase II and above clinical trials* sponsored by your organization for this topic and an index outlining the relevant information in each submitted file.

Your contribution is very beneficial to the Program. Materials submitted must be publicly available or able to be made public. Materials that are considered confidential; marketing materials; study types not included in the review; or information on topics not included in the review cannot be used by the EPC Program. This is a voluntary request for information, and all costs for complying with this request must be borne by the submitter.

The draft of this review will be posted on AHRQ's EPC Program website and available for public comment for a period of 4 weeks. If you would like to be notified when the draft is posted, please sign up for the email list at: *https://effectivehealthcare.ahrq.gov/email-updates.*

The review will answer the following questions. This information is provided as background. AHRQ is not requesting that the public provide answers to these questions.

Key Questions (KQ)

KQ 1: What is the association between dietary intake of omega-6 and/or omega-3 polyunsaturated fatty acids during pregnancy and risk of preterm birth?

KQ 1a: How are these associations affected by intervention/exposure characteristics (for example, the ratio of different fatty acids)?

KQ 2: What is the association between dietary intake of omega-6 and/or omega-3 polyunsaturated fatty acids during pregnancy and/or lactation and infant/child growth and developmental outcomes?

KQ 2a: How are these associations affected by intervention/exposure characteristics (for example, the ratio of different fatty acids)?

KQ 3: What is the association between dietary intake of total fat in individuals birth through 18 years of age and measures of growth and development?

KQ4: What is the association between dietary intake of omega-6 and/or omega-3 polyunsaturated fatty acids in individuals birth through 18 years of age and measures of growth and development?

PICOTS (POPULATION, INTERVENTION, COMPARATOR, OUTCOME, TIMING, SETTING/STUDY DESIGN)

Element	Inclusion criteria	Exclusion criteria
Population	*Exposure population:* • Individuals who are pregnant (KQ1) and/or lactating (KQ2) of any age or individuals from birth through 18 years of age (KQ3 and 4) from the general population (including those with overweight/obesity) not affected by a disease or health-related condition that impacts fat absorption and/or metabolism; or taking medications that alter the absorption or metabolism of dietary fatty acid *Outcome population:* • Offspring of the pregnant individual (birth through 18 years) not taking medications or affected by a disease or health-related condition that impacts fat absorption and/or metabolism *Note:* given the distinction between chronological age versus pubertal stage, as well as heterogeneity in enrollment across age ranges, for studies meeting all other eligibility criteria, we will consider exceptions to the age criterion.[a]	• Non-human participants (*e.g.,* animal studies, in-vitro models). • Studies that enroll participants taking medications or with diseases/health-related conditions that impact fatty acid absorption or metabolism (*e.g.,* Crohn's disease, ulcerative colitis, short-gut syndrome, cystic fibrosis, celiac). This includes cancer and malabsorption syndromes. • Studies that exclusively enroll participants hospitalized with an illness or injury. • Studies designed to induce weight loss or treat overweight and obesity through energy restriction or hypocaloric diets for the purposes of treating additional or other medical conditions. • Studies that exclusively enroll participants with severe undernourishment, underweight, stunting, or wasting. • Studies that enroll participants who are pre- or post-bariatric surgery. • Studies with enrollment *exclusively* of: pre-term babies (gestational age <37 weeks), babies admitted to the NICU, babies that have low birth weight (<2,500g) and/or babies that are small for gestational age (for assessment of infant and child growth parameters and developmental outcomes). • Studies that enroll infants with conditions treated/prevent by dietary supplementation (*e.g.,* G- or GJ-tubes, fatty acid oxidation disorders, necrotizing enterocolitis, attention deficit (and/or hyperactivity) disorder, ADHD, autism, etc.).
Intervention (Exposure)	*KQ1, 2, and 4:* • Dietary intake of total omega-3 PUFA, total omega-6 PUFA, or total PUFA (omega-3 and omega-6) • Dietary intake of individual PUFA (examples: linoleic, alpha-linolenic, EPA, DHA) • Dietary intake of a combination of long-chain PUFA (example: EPA+DHA+DPA; DHA+ARA) • Dietary intake of polyunsaturated fatty acids in terms of a ratio (example, n-6:n-3 PUFA, DHA:ARA) *KQ3:* • Total dietary fat intake (as either grams/day or % of total energy intake from fat) • A dietary pattern that describes and quantifies intake of total dietary carbohydrate, total fat, and total protein content (examples: low/high-fat diet; low/high-carbohydrate diet; high-protein; ketogenic diet) *Note:* Dietary intake can be from foods, supplements, and/or supplemented foods.[b]	*KQ1, 2, and 4:* • Studies that do not quantify PUFA intake as either grams/day or % of total energy intake from PUFA (*e.g.,* studies where exposure is number of fish servings per week). • Studies that do not provide absolute intake of fatty acids included in ratios. • Studies that only assess fatty acid biomarker wt% of total or concentrations. • Studies that only assess fatty acid intake via infusions (parenteral [intralipid] or stable isotope). • Studies that only assess exposure to fatty acids from a single meal, or eating occasion such that usual intake cannot be inferred. • Studies that examine food products or dietary supplements not widely available to U.S. consumers. • Multi-component interventions that do not isolate the effect or association of the PUFA exposure. • Observational studies that do not account for any confounders. • Studies designed to induce weight loss or treat participants who are determined to be overweight and obese through energy restriction or hypocaloric diets for the purposes of treating additional or other medical conditions. *KQ3:* • Studies that do not describe the energy and entire macronutrient distribution of the diet (*i.e.,* studies that do not report total carbohydrate, total fat, and total protein contents of experimental or baseline diets).

PICOTS (POPULATION, INTERVENTION, COMPARATOR, OUTCOME, TIMING, SETTING/STUDY DESIGN)—Continued

Element	Inclusion criteria	Exclusion criteria
Comparator	*KQ1, 2, and 4:* • Placebo • Dietary intake of a different amount of fatty acids relevant to the exposure: ○ Total omega-3 ○ Total omega-6 ○ Individual PUFA ○ Combination of long-chain PUFA ○ Intake of PUFA in terms of a ratio *KQ3:* • Dietary intake of a different amount of total fat	• Diet(s) with an energy intake that is statistically significantly higher or lower than the intervention/exposure diet (*e.g.,* not isocaloric comparison). • Studies that do not have a statistically significant difference between groups in PUFA or total fat intake. • Studies comparing undefined exposures (*e.g.,* comparisons of undefined quartiles).
Outcome	*KQ2, 3, and 4:* Infant and child (birth through 18 years) growth parameters • Birth weight • Weight and Weight-for-age percentile or Z-score adjusted for gestational age • Length or Height and Length-for-age or Height-for-age percentile and Z-score adjusted for gestational age • Head circumference and Head circumference percentile and Z-score adjusted for gestational age Infant and child (birth through 18 years) developmental outcomes [c] • Cognitive/neurological • Language/communication • Movement/physical • Visual function/acuity • Social/emotional learning *KQ1:* • Risk of preterm birth	• BMI, BMI z-score. • Body composition and distribution (*e.g.,* % fat mass, fat-free mass, skin fold thicknesses). • Incidence and prevalence of overweight, obesity.
Timing	• All exposure or intervention durations will be included	
Setting	• Outpatient; all settings except hospital and acute care will be included	• Inpatient; hospital and acute care.
Study Design	• Randomized controlled trials • Prospective cohort studies • Nested case-control studies	• Narrative reviews. • Systematic reviews. • Meta-analyses. • Scoping reviews. • Umbrella reviews. • Retrospective cohort studies. • Non-randomized controlled trials, including quasi-experimental and controlled before-and-after studies. • Cross-sectional studies. • Case-control studies. • All other study designs.
Geographic Location	• Locations with food products or dietary supplements widely available to U.S. and/or Canadian consumers • Countries rated very high on the Human Development Index (HDI) [d] at the time of data collection	• Locations not rated very high on the HDI.
Study Size	• Studies including power calculations or effect sizes • Studies with N ≥30 participants (for randomized clinical trials [RCTs]): ≥10 participants analyzed per study arm)	• Studies with N <30 participants (for RCTs: <10 participants analyzed per study arm), without power calculations or effect sizes. • Case studies and n = 1 samples. • Non-randomized studies that do not account for any potential confounders.
Language	• Articles published in English	• Articles published in languages other than English.
Publication Dates	• Articles published during or after 2000	• Articles published prior to 2000.

[a] For studies meeting all other eligibility criteria, studies enrolling populations aged 0 to older than 19 years will be included if: (a) results are stratified by age group, allowing extraction of data for participants aged through 18 years; or (b) 85% of the population is aged through 18 years, if results are not stratified by age group. The one exception is studies of adolescents; for those meeting all other eligibility criteria, studies enrolling adolescents through age 26, regardless of result stratification or percentage of population aged through 18 years, will be included. See the Study Selection section.

[b] Dietary supplement is defined as a product intended to supplement the diet that contains one or more dietary ingredients (including vitamins, minerals, herbs or other botanicals, amino acids, and other substances) intended to be taken by mouth as a pill, capsule, table, or liquid, and that is labeled on the front panel as being a dietary supplement.

[c] See Section IV for an example table of measures with periodicity.

BILLING CODE 4160–90–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–25–25AW; Docket No. CDC–2024–0094]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other federal agencies the opportunity to comment on a proposed information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled National Concussion Surveillance System. This data collection is designed to allow CDC to calculate the prevalence and incidence of traumatic brain injuries (TBI) for both adults and children, and the circumstances related to TBIs occurring in the preceding year.

DATES: CDC must receive written comments on or before January 17, 2025.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2024–0094 by either of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *www.regulations.gov.*

Please note: Submit all comments through the Federal eRulemaking portal (*www.regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road, NE, H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION:

Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected;
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and
5. Assess information collection costs.

Proposed Project

National Concussion Surveillance System—New—National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

In 2014, an Institute of Medicine (IOM) report titled ''Sports-Related Concussions in Youth: Improving the Science, Changing the Culture,'' recommended that the U.S. Centers for Disease Control and Prevention (CDC) establish and oversee a national surveillance system to accurately determine the incidence of sports-related concussions [*i.e.,* mild traumatic brain injuries, or TBIs], including those in youth ages five to 21. The report further recommended that the cause, nature, and extent of the concussive injury also should be collected, including the sport or activity, level of competition, and signs and symptoms consistent with a concussion. The IOM recommendation was made because there were significant gaps in understanding of TBI, including concussion, incidence and prevalence estimates. Current non-fatal TBI surveillance estimates typically utilize emergency department (ED) or hospitalization-focused data sources. But these sources cannot account for injuries that go untreated or injuries diagnosed in primary care, urgent care, or specialty care settings, potentially missing information on millions of TBIs sustained each year. Without an accurate understanding of the burden, trends, and characteristics of these injuries, it is challenging to design or focus effective prevention programs, policies, or practices. The consequences from TBI are staggering, with many resulting in intensive and long-term care needs. This data collection could help fill significant knowledge gaps and inform prevention efforts across the country.

The purpose of this data collection is to calculate the 12-month prevalence and incidence of TBI for both adults and children, and the circumstances related to TBIs occurring in the preceding 12 months. The data collection instrument is largely based on the instrument used during the pilot that utilized cognitive testing prior to deployment. Data collected will include reports of head injuries experienced in the preceding 12 months, and the most recent head injury reported will be assessed for symptoms of TBI. We will also query respondents who sustained a head injury regarding the mechanism of injury (cause) and circumstances related to the TBI, medical care received, impact on social and school functioning, and information related to returning to work/school/play.

Data will be analyzed to produce nationally representative 12-month incidence and prevalence estimates of non-fatal TBI in children (ages 5–17) and adults. Data collected are likely to be used by state and local governments, researchers, voluntary health organizations, physicians, health educators, workplace wellness

programs, healthcare systems, and professional and advocacy organizations to guide program investments, provide up-to-date information on symptom presentation, healthcare utilization patterns, and patient recovery among others, and to provide information on prevention of TBI.

Data obtained from this data collection are not available from currently existing databases, and the data needed for analysis cannot be added to existing data collection processes. This data collection will occur over three years. After each data collection year, findings will be reviewed to identify potential modifications to the methodology and survey for following year collection. Depending on the nature and scope of the improvements, a change request or a Revision package will be submitted to OMB for review and approval. CDC requests OMB approval for an estimated 5,656 annual burden hours. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Individuals and Households	Initial Invitation Letter	57,405	1	1/60	957
	Reminder Postcard	53,312	1	1/60	889
	Final Reminder Letter	50,583	1	1/60	843

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Solicitation of Nominations for Appointment to the Advisory Committee on Breast Cancer in Young Women

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: In accordance with the Federal Advisory Committee Act, the Centers for Disease Control and Prevention (CDC), within the Department of Health and Human Services (HHS), is seeking nominations for membership on the Advisory Committee on Breast Cancer in Young Women (ACBCYW). The ACBCYW consists of up to 15 experts in fields associated with breast cancer, disease prevention, early detection, diagnosis, public health, social marketing, genetic screening and counseling, treatment, rehabilitation, palliative care, and survivorship in young women, or in related disciplines with a specific focus on young women.

DATES: Nominations for membership on the ACBCYW must be received no later than December 16, 2024. Packages received after this time will not be considered for the current membership cycle.

ADDRESSES: All nominations should be mailed to Kimberly E. Smith, M.B.A., M.H.A., c/o ACBCYW Secretariat, Centers for Disease Control and Prevention, 3719 North Peachtree Road, Building 100, Chamblee, Georgia 30341 or emailed to *acbcyw@cdc.gov.*

FOR FURTHER INFORMATION CONTACT: Kimberly E. Smith, M.B.A., M.H.A., Designated Federal Officer, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, 4770 Buford Highway NE, Mailstop S107–4, Atlanta, Georgia 30341. Telephone: (404) 498–0073; Email: *acbcyw@cdc.gov.*

SUPPLEMENTARY INFORMATION: Nominations are sought for individuals who have the expertise and qualifications necessary to contribute to the accomplishment of the objectives of the Advisory Committee on Breast Cancer in Young Women (ACBCYW). Nominees will be selected based on expertise in the fields of breast health, breast cancer, disease prevention and risk reduction, survivorship (including metastatic breast cancer), hereditary breast and ovarian cancer, or in related disciplines with a specific focus on young women. Persons with personal experience with early onset breast cancer are also eligible to apply. This includes but may not be limited to breast cancer survivors 45 years of age or younger, and caregivers of said persons. Federal employees will not be considered for membership. Members may be invited to serve up to four-year terms. Selection of members is based on candidates' qualifications to contribute to the accomplishment of ACBCYW objectives (*https://www.cdc.gov/breast-cancer/php/advisory-committee/*).

Department of Health and Human Services (HHS) policy stipulates that committee membership be balanced in terms of points of view represented and the committee's function. Appointments shall be made without discrimination on the basis of age, race, ethnicity, gender, sexual orientation, gender identity, HIV status, disability, and cultural, religious, or socioeconomic status. Nominees must be U.S. citizens and cannot be full-time employees of the U.S. Government. Current participation on Federal workgroups or prior experience serving on a Federal advisory committee does not disqualify a candidate; however, HHS policy is to avoid excessive individual service on advisory committees and multiple committee memberships. Committee members are Special Government Employees, requiring the filing of financial disclosure reports at the beginning of and annually during their terms. The Centers for Disease Control and Prevention (CDC) reviews potential candidates for ACBCYW membership each year and provides a slate of

nominees for consideration to the Secretary of HHS for final selection. HHS notifies selected candidates of their appointment near the start of the term in December 2025, or as soon as the HHS selection process is completed. Note that the need for different expertise varies from year to year and a candidate who is not selected in one year may be reconsidered in a subsequent year.

Candidates should submit the following items:

- Current curriculum vitae, including complete contact information (telephone numbers, mailing address, email address).
- At least one letter of recommendation from person(s) not employed by HHS. Candidates may submit letter(s) from current HHS employees if they wish, but at least one letter must be submitted by a person not employed by an HHS agency (*e.g.,* CDC, National Institutes of Health, Food and Drug Administration).
- A short biography (150 words or less).

Nominations may be submitted by the candidate or by the person/organization recommending the candidate.

The Director, Office of Strategic Business Initiatives, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Office of Strategic Business Initiatives, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30Day–25–24FZ]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled ''Annual Progress Reports for Injury Control Research Centers (ICRC)'' to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on June 4, 2024 to obtain comments from the public and affected agencies. CDC received one non-substantive comment related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Annual Progress Reports for Injury Control Research Centers (ICRC)—New—National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

In 1987, the Centers for Disease Control and Prevention (CDC) and the National Center for Injury Prevention and Control (NCIPC) began funding Injury Control Research Centers (ICRCs) at academic research institutions throughout the United States. ICRCs focus on three core functions—research, training, and outreach—for issues of local and national importance, including the prevention of adverse childhood experiences; child abuse and neglect; drowning; drug overdose; intimate partner violence; older adult falls; sexual violence; suicide; traumatic brain injuries, and the promotion of transportation safety. ICRCs foster multidisciplinary strategies for addressing these complex problems and disseminating research findings. In addition to conducting cutting-edge, multidisciplinary research, ICRCs train and develop the current and next generation of researchers and public health professionals to help ensure that there is an adequate supply of qualified practitioners and researchers for advancing prevention research, addressing new problems, and reaching new populations across the nation. Finally, ICRCs work with states and communities to translate research findings into action. ICRCs provide partner organizations with technical assistance on programs, public health infrastructure, and the integration of resources at the local, state, and national levels. Areas of emphasis within each ICRC are determined by the expertise of the faculty and the public health needs and opportunities identified through the ICRC's outreach activities. This collaborative approach is a vital component in the success of efforts to make an impact on population-level reduction in injury-related harm.

ICRCs form a national network of expertise and innovation in injury prevention and control. ICRC grants are typically funded in five-year funding cycles. The Centers for Disease Control and Prevention (CDC) requests OMB approval to electronically collect annual progress report (APR) information and Success Stories from the 11 currently funded ICRCs. Grantees will report progress and activity information to CDC on an annual schedule.

The information that will be collected will provide crucial data for program performance monitoring and will improve CDC's ability to respond in a timely manner to requests for information about the program from the Department of Health and Human Services (HHS), the White House, Congress, and other sources. The

information that will be collected will also strengthen CDC's ability to monitor grantee progress towards stated grant research, training, and outreach objectives, provide data-driven technical assistance, and disseminate Success Stories about what is working to reduce unintentional and intentional injuries.

To improve and innovate through evaluation, research, and quality improvement; investigate, diagnose, and address health hazards and root causes; communicate effectively to inform and educate; strengthen, support, and mobilize communities and partnerships; and create, champion, and implement policies, plans, and laws are five of the noted public health activities that all public health systems should undertake. CDC ICRC grantees do all of these activities, and the systematic collection of data, annually, is the best way for CDC to understand this work. This APR information collection will enable grantees to submit accurate, reliable, and timely activity and performance data to the CDC.

CDC requests OMB approval for an estimated 231 annual burden hours. There is no cost to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day-25–0728; Docket No. CDC–2024–0095]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other federal agencies the opportunity to comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled National Notifiable Diseases Surveillance System. This data collection provides the official source of statistics in the United States for nationally notifiable conditions.

DATES: CDC must receive written comments on or before January 17, 2025.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2024–0095 by either of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road, NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *www.regulations.gov.*

Please note: Submit all comments through the Federal eRulemaking portal (*www.regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected;

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and

5. Assess information collection costs.

Proposed Project

National Notifiable Diseases Surveillance System (NNDSS) (OMB Control No. 0920–0728, Exp. 3/31/2027)—Revision—Office of Public Health Data, Surveillance, and Technology (OPHDST), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Public Health Services Act (42 U.S.C. 241) authorizes CDC to disseminate nationally notifiable condition information. The National Notifiable Diseases Surveillance System (NNDSS) is based on data collected at the state, territorial and local levels because of legislation and regulations in those jurisdictions that require health care providers, medical laboratories, and other entities to submit health-related data on reportable conditions to public health departments. These reportable conditions, which include infectious and non-infectious diseases, vary by jurisdiction depending upon each jurisdiction's health priorities and needs. Each year, the Council of State and Territorial Epidemiologists (CSTE), supported by CDC, determines which reportable conditions should be designated nationally notifiable or under standardized surveillance.

CDC requests a three-year approval for a Revision for the NNDSS (OMB Control No. 0920–0728, Exp. 03/31/2027). This Revision includes requests for approval to: 1) receive case notification data for Cronobacter and Ehrlichiosis, new notifiable conditions; 2) receive case notification data for Congenital cytomegalovirus infection and Toxoplasmosis, new conditions under standardized surveillance; and 3) receive new disease-specific data elements for Cronobacter, Hansen's Disease (Leprosy,) and Leptospirosis.

The NNDSS currently facilitates the submission and aggregation of case notification data voluntarily submitted to CDC from 60 jurisdictions: public health departments in every U.S. state, New York City, Washington DC, five U.S. territories (American Samoa, the Commonwealth of Northern Mariana Islands, Guam, Puerto Rico, and the U.S. Virgin Islands), and three freely associated states (Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau). This information is shared across jurisdictional boundaries and both surveillance and prevention and control activities are coordinated at regional and national levels.

Approximately 90% of case notifications are encrypted and submitted to NNDSS electronically from already existing databases by automated electronic messages. When automated transmission is not possible, case notifications are faxed, emailed, uploaded to a secure network or entered into a secure website. All case notifications that are faxed or emailed are done so in the form of an aggregate weekly or annual report, not individual cases. These different mechanisms used to send case notifications to CDC vary by the jurisdiction and the disease or condition. Jurisdictions remove most personally identifiable information (PII) before data are submitted to CDC, but some data elements (*e.g.,* date of birth, date of diagnosis, county of residence) could potentially be combined with other information to identify individuals. Private information is not disclosed unless otherwise compelled by law. All data are treated in a secure manner consistent with the technical, administrative, and operational controls required by the Federal Information Security Management Act of 2002 (FISMA) and the 2010 National Institute of Standards and Technology (NIST) Recommended Security Controls for Federal Information Systems and Organizations. Weekly tables of nationally notifiable diseases are available through CDC WONDER and *data.cdc.gov.* Annual summaries of finalized nationally notifiable disease data are published on CDC WONDER and *data.cdc.gov* and disease-specific data are published by individual CDC programs.

The burden estimates include the number of hours that the public health department uses to process and send case notification data from their jurisdiction to CDC. Specifically, the burden estimates include separate burden hours incurred for automated and non-automated transmissions, separate weekly burden hours incurred for modernizing surveillance systems as part of CDC's Data Modernization Initiative (DMI) implementation, separate burden hours incurred for annual data reconciliation and submission, and separate one-time burden hours incurred for the addition of new diseases and data elements. The burden estimates for the one-time burden for reporting jurisdictions are for the addition of case notification data for Cronobacter and Ehrlichiosis, new notifiable conditions; the addition of case notification data for Congenital cytomegalovirus infection and Toxoplasmosis, new conditions under standardized surveillance; and the addition of new disease-specific data elements for Cronobacter, Hansen's Disease (Leprosy) and Leptospirosis. CDC requests OMB approval for an estimated 18,414 annual burden hours.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
States	Weekly (Automated)	50	52	20/60	867
States	Weekly (Non- automated)	10	52	2	1,040
States	Weekly (DMI Implementation)	50	52	4	10,400
States	Annual	50	1	75	3,750
States	One-time Addition of Diseases and Data Elements.	50	1	3	150
Territories	Weekly (Automated)	5	52	20/60	87
Territories	Weekly, Quarterly (Non-automated)	5	56	20/60	93
Territories	Weekly (DMI Implementation)	5	52	4	1,040
Territories	Annual	5	1	5	25
Territories	One-time Addition of Diseases and Data Elements.	5	1	3	15
Freely Associated States	Weekly (Automated)	3	52	20/60	52
Freely Associated States	Weekly, Quarterly (Non-automated)	3	56	20/60	56
Freely Associated States	Annual	3	1	5	15
Freely Associated States	One-time Addition of Diseases and Data Elements.	3	1	3	9
Cities	Weekly (Automated)	2	52	20/60	35
Cities	Weekly (Non-automated)	2	52	2	208
Cities	Weekly (DMI Implementation)	2	52	4	416

ESTIMATED ANNUALIZED BURDEN HOURS—Continued

[30Day–25–24HQ]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled ''Division of Diabetes Translation Programmatic & Participant User Experience Data Collection (DDTDC)'' to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on July 26, 2024 to obtain comments from the public and affected agencies. CDC received zero comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Division of Diabetes Translation Programmatic & Participant User Experience Data Collection (DDTDC)—New—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Division of Diabetes Translation (DDT) plays a crucial role in helping prevent Type 2 diabetes, reducing diabetes complications and disability, and reducing diabetes-related disparities across the United States. DDT accomplishes this by providing education, training, technical assistance (TA), and engaging in communication/marketing activities for various key audiences. These customers include national, state, and local partners, grantees, providers (*e.g.,* lifestyle coaches, diabetes educators, healthcare providers, health/medical and community-based organizations), people with prediabetes, diabetes and their family, friends, and caregivers, and other consumers of DDT products and programs.

For DDT to be able to efficiently and effectively do this work and fulfill its mission, it needs to be able to collect information and feedback from intended audiences in a timely manner and with enough frequency to ensure DDT can deliver clear, effective, efficient, and appropriate customer service. This includes, for instance, collecting data on key audiences' needs and on the reach, uptake, use, customer experience and satisfaction with DDT's services, products, and related programs, including its education, training, TA and communications services and products.

However, in the interest of timely provision of services, DDT often forgoes the important step of getting input from its key audiences on the clarity, efficiency, effectiveness, and appropriateness of the services and resources it develops and provides for them. Skipping this information collection step, or doing so with less frequency, avoids the delay involved in the standard OMB review process, but increases the risk of DDT wasting both time and money developing and providing education, training, TA, and communication/marketing that will not achieve the intended objectives and will be unclear, irrelevant, or not fully meet the needs of DDT's audiences. It can also have other unintended consequences, such as jeopardizing the credibility of Federal health officials.

The Division of Diabetes Translation Programmatic & Participant User Experience Data Collection (DDTDC) will enable DDT to collect the information they require in a timely manner to:

- Provide clear, effective, efficient, appropriate, and timely education, communication, training, and technical

assistance to key audiences and other interested groups, including consumer audiences (*e.g.,* people with prediabetes, diabetes, and their family, friends, and caregivers), providers (*e.g.,* lifestyle coaches, diabetes care and education specialists, healthcare and other providers, health/medical and community-based organizations); and partners (national, state, and local partners).

- Ensure quality and prevent duplication in the development and dissemination of prevention and health information and program activities by DDT to consumers, providers, and state and local partners.
- Conduct exploratory/formative assessments to inform DDT's development of education, communication/marketing, training, and programmatic materials, tools, and resources to support and improve the prevention and management of diabetes. For example, identifying key audiences' knowledge, attitudes, behaviors, motivators, and information needs.
- Assess the impact of programs, messages, educational and training materials among recipients and determine to what extent they meet relevant service-related DDT objectives and goals.

The following are examples of the areas of focus that the data collection activities under this generic information collection mechanism may include:

- Reach, uptake, use, customer experience, and satisfaction with the CDC-recognized lifestyle change programs for type 2 diabetes prevention, as well as related outcomes (*e.g.,* participant retention and recruitment rates).
- Satisfaction with CDC-recognized lifestyle change programs toolkits, such as the Personal Success Tool and Champion toolkits.
- Reach, uptake, use, customer experience, and satisfaction with diabetes education, type 2 prevention, and diabetes management innovations (such as the Diabetes Self-Management Education and Support services promotion initiative) and related short-term effects on knowledge, awareness, practices (such as information seeking), and outcomes (such as enrollment of people with diabetes or prediabetes).
- Reach, uptake, satisfaction, customer experience, and short-term outcomes of CDC's training and technical assistance resources (such as a webinar or online toolkit).
- Needs assessments for customer experience with, utilization of, and short-term outcomes of technical assistance and trainings for diabetes prevention and management.
- Understandability, ease of use, and appropriateness of diabetes education messages, toolkits, programs, and marketing materials.
- Exploratory assessments of knowledge, attitudes, behaviors, beliefs, barriers, and facilitators to uptake and use of lifestyle change programs for diabetes type 2 prevention and diabetes management services and related innovations, resources, tools, and materials.

Data collection methods proposed include, but are not limited to in-depth individual interviews, cognitive interviews, intercept interviews, group-based discussions (including focus groups and dyads/triads), surveys or questionnaires, knowledge assessments, observational assessments, and implementation and utilization data reporting. Respondents would include key audiences and stakeholders of CDC's work, including representatives of state and local DDT-funded organizations; national, state, and local DDT partners (not CDC-funded); providers of type 2 diabetes prevention and diabetes management programs and services, including lifestyle coaches, diabetes care and educations specialists, healthcare and other providers; heath/medical and community-based organizations implementing programs and services related to type 2 diabetes prevention and diabetes management; people with—and at risk for—diabetes or with prediabetes; family, friends, and caregivers of people with—and at risk for—diabetes or with prediabetes.

As the methods for data collection and audiences may vary with each request submitted under this proposed generic clearance, for each data collection request unique instruments (*e.g.,* surveys, interview guides) will be developed to address the specific topics that information will be collected on. Questions to be asked may focus, for example, on collecting data on the audiences' needs and on the reach, uptake, use, customer experience and satisfaction with DDT's services, products, and programs. Such information will enable DDT to identify ways to improve its services, products, and programs to better meet its audiences' needs and achieve its mission of supporting the prevention of diabetes and reducing diabetes-related complications and disparities across the United States.

CDC requests a three-year approval for 6,000 burden hours for this proposed Generic package. Based on projections, the estimated annualized hourly burden anticipated for all data collection methods would total 2,000 hours and include eight to ten data collection activities over the course of a year. There is no cost to the respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Data collection methods	Number of respondents across methods	Number responses per respondent	Average burden per response
Representatives of state and local DDT-funded organizations; national, state, and local DDT partners (not CDC-funded); providers of type 2 diabetes prevention and diabetes management programs and services; heath/medical and community-based organizations implementing programs and services related to type 2 diabetes prevention and diabetes management; people with—and at risk for—diabetes or with prediabetes; family, friends, and caregivers of people with—and at risk for—diabetes or with prediabetes.	Interviews; surveys or questionnaires; knowledge assessments; motivation assessments, observational assessments; implementation and utilization data reporting.	4,000	1	30/60

Jeffrey M. Zirger,

Lead, Information Collection Review Office, Office of Public Health Ethics and Regulations, Office of Science, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–10398 #85]

Medicaid and Children's Health Insurance Program (CHIP) Generic Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services (CMS), Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: On May 28, 2010, the Office of Management and Budget (OMB) issued Paperwork Reduction Act (PRA) guidance related to the ''generic'' clearance process. Generally, this is an expedited process by which agencies may obtain OMB's approval of collection of information requests that are ''usually voluntary, low-burden, and uncontroversial collections,'' do not raise any substantive or policy issues, and do not require policy or methodological review. The process requires the submission of an overarching plan that defines the scope of the individual collections that would fall under its umbrella. This **Federal Register** notice seeks public comment on one or more of our collection of information requests that we believe are generic and fall within the scope of the umbrella. Interested persons are invited to submit comments regarding our burden estimates or any other aspect of this collection of information, including: the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by December 2, 2024.

ADDRESSES: When commenting, please reference the applicable form number (CMS–10398 #85) and the OMB control number (0938–1148). To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: CMS–10398 #85/OMB control number: 0938–1148, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: *https://www.cms.gov/medicare/regulations-guidance/legislation/paperwork-reduction-act-1995/pra-listing.*

FOR FURTHER INFORMATION CONTACT: William N. Parham at 410–786–4669.

SUPPLEMENTARY INFORMATION: Following is a summary of the use and burden associated with the subject information collection(s). More detailed information can be found in the collection's supporting statement and associated materials (see **ADDRESSES**).

Generic Information Collection

1. *Title of Information Collection:* 3.1–M State Plan Amendment (SPA) Templates for Eligible Juveniles Who are Inmates of a Public Institution; *Type of Information Collection Request:* New information collection request information request; *Use:* Section 5121 of the Consolidated Appropriation Act of 2023 (CAA, 2023) creates a new mandate for states by amending section 1902(a)(84) of the Social Security Act (the Act) (42 U.S.C. 1396a) to require states to provide specific screening and diagnostic services and targeted case management (including referrals) in the 30 days prior to release from incarceration, and targeted case management (TCM) (including referrals) for at least 30 days post release for eligible juveniles who are inmates of a public institution, post adjudication. The requirements are effective January 1, 2025.

To comply with the amendments states must submit a Medicaid SPA attesting that the state has developed an internal operation plan, and in accordance with such plan, will provide coverage during the statutory pre- and post-release period of screening, diagnostic, and TCM services for eligible juveniles who are within 30 days of release post adjudication.

States have the option to lift the Medicaid inmate payment and CHIP eligibility exclusions and provide coverage of pre-release Medicaid and CHIP services (for electing states) and makes available federal matching funds for the full breadth of Medicaid and CHIP benefits to eligible juveniles who are incarcerated and pending disposition of charges. States selecting this state plan option must provide to eligible juveniles all mandatory and optional services to which they are otherwise entitled under the state plan. During the period when an eligible juvenile is incarcerated and pending disposition of charges, this is essentially a full lifting of the Medicaid inmate payment exclusion and CHIP eligibility exclusion. States cannot choose to provide a limited array of state plan services under this option. An operational plan is not required for this state option.

For states that wish to elect the option in section 5122 of the CAA, 2023, states should submit a SPA attesting to CMS that they are also electing coverage for any Medicaid or CHIP state plan services for eligible juveniles pending disposition of charges to which the beneficiary would otherwise be entitled, if not for their incarceration status.

Form Number: CMS–10398 #85 (OMB control number: 0938–1148); *Frequency:* Once and on occasion; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 56; *Total Annual Responses:* 168; *Total Annual Hours:* 4,872. (For policy questions regarding this collection contact: Marlana Thieler at 410–786–6274.)

William N. Parham, III,

Director, Division of Information Collections and Regulatory Impacts, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–4467]

Agency Information Collection Activities; Proposed Collection; Comment Request; Prescription Drug User Fee Program

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on information collection associated with FDA's Prescription Drug User Fee program.

DATES: Either electronic or written comments on the collection of information must be submitted by January 17, 2025.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 17, 2025. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2024–N–4467 for ''Prescription Drug User Fee Program.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: JonnaLynn Capezzuto, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–3794, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3521), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Prescription Drug User Fee Program

OMB Control Number 0910–0297—Revision

This information collection supports implementation of the FDA Prescription Drug User Fee program (called ''PDUFA'' in reference to the Prescription Drug User Fee Act). Under the prescription drug user fee provisions of the Federal Food, Drug, and Cosmetic

Act (FD&C Act) (sections 735 and 736 (21 U.S.C. 379g and 379h)), we have the authority to assess and collect annual program fees for prescription drug products approved under certain new drug applications (NDAs) and biologics license applications (BLAs). Also under this authority, pharmaceutical companies pay an application fee for certain NDAs and BLAs submitted to FDA for review. Because the submission of user fees concurrently with applications is required, review of an application by FDA cannot begin until the fee is submitted.

PDUFA must be reauthorized every 5 years. On September 30, 2022, the President signed into law the FDA User Fee Reauthorization Act of 2022, which includes the reauthorization of PDUFA through September 30, 2027 (*https://www.fda.gov/industry/prescription-drug-user-fee-amendments/pdufa-vii-fiscal-years-2023-2027*). PDUFA VII provides for the continued timely review of NDAs and BLAs. Since the initial passage of PDUFA, user fees have played an important role in expediting the drug review and approval process. PDUFA VII reauthorization also includes commitments to meet certain performance goals and procedures. The commitment goals represent the product of FDA's discussions with the regulated industry and public stakeholders, as mandated by Congress.

We are revising the collection to include our current commitment goals, as set forth in the document ''PDUFA Reauthorization Performance Goals and Procedures Fiscal Years 2023 Through 2027,'' found on our website at *https://www.fda.gov/media/151712/download?attachment.* The commitment goals represent the product of FDA's discussions with the regulated industry and public stakeholders, as mandated by Congress. FDA is committed to meeting these goals and to continuous operational improvements associated with PDUFA implementation. The commitment goals provide for the development and issuance of topic-specific guidance. We maintain a searchable guidance database on our website at *https://www.fda.gov/regulatory-information/search-fda-guidance-documents.* In publishing the respective notices of availability for each guidance document, we include an analysis under the PRA and invite public comment on the associated information collection recommendations. In addition, all Agency guidance documents are issued in accordance with our Good Guidance Practices regulations in 21 CFR 10.115, which provide for public comment at any time.

To assist respondents with the information collection, we developed Form FDA 3397 entitled ''Prescription Drug User Fee Cover Sheet.'' Additional information and associated instructions may be found on our website at *https://www.fda.gov/industry/fda-user-fee-programs.* The cover sheet (Form FDA 3397) is submitted for original NDAs, BLAs and resubmissions of these original applications after withdrawal before filing or refusal to file actions. The form is not submitted for certain FDA-regulated products. The list of exempted products is included under the instructions to Form FDA 3397.

Relatedly, sections 735 and 736 of the FD&C Act also provide for waiver, reduction, exemption and refund requests. We developed the guidance document entitled ''Guidance for Industry—Prescription Drug User Fee Act Waivers, Reductions, and Refunds for Drug and Biological Products,'' and Form FDA 3971 (Small Business Waiver and Refund Request), which can be found on our website at *https://www.fda.gov/media/131797/download,* as mandated by Congress.

We also developed Form FDA 4068, ''Prescription Drug User Fee Act; Waivers, Refunds, and Exemptions,'' along with accompanying instructions, to enable sponsors of designated orphan products to request an exemption from applicable fees under PDUFA and included the form in the information collection when the prior renewal was submitted for approval. Use of the form will provide the information required for analysis and application of the orphan exemption from user fees, organizing the requested information for easier data collection and streamlining the review request. We find, however, with this renewal, that use of the form has not been implemented yet, pending development of the OneNexus system for management of the user fee systems. Use of the form is anticipated once the OneNexus system is developed and implemented for the PDUFA program.

The PDUFA information collection and all user fee cover sheets, including the ''Prescription Drug User Fee Cover Sheet'' (Form FDA 3397), are accessed and submitted electronically, as required by statute, through FDA's electronic systems such as the Document Archiving Reporting and Regulatory Tracking System (DARRTS), Electronic Submission Gateway (ESG), and Panorama.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

Prescription drug user fee activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Sections 735 and 736 of the FD&C Act (PDUFA waivers and exemptions, not including small business waiver requests).	99	1.828	181	17	3,077
Section 736(d)(1)(C) of the FD&C Act and Form FDA 3971 (small business waivers).	35	1	35	2	70
Reconsideration Requests	13	1.69	22	24	528
Appeal Requests	4	1.5	6	12	72
User Fee Cover Sheet Form FDA 3397 submission with original NDAs and BLAs.	132	1.24	164	0.5 (30 minutes)	82
Total			408		3,829

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Based on a review of Agency records, we estimate that the number of initial waiver requests submitted annually (excluding small business waiver requests under section 736(d)(1)(C)) of the FD&C Act) is 181, submitted by 99 different applicants.

We estimate that 35 respondents will each submit a small business waiver request annually. We have included in the burden estimate the time for preparation and submission of application fee waivers for small businesses, including completion of Form FDA 3971. Small businesses

requesting a waiver must submit documentation to FDA, including the number of their employees, as well as information that their application is their first human drug application, within the meaning of the FD&C Act, to be submitted to the Agency for approval.

We estimate receiving 22 requests for reconsideration annually (including small business waiver reconsiderations) and assume the average burden for preparing and submitting each request is 24 hours. In addition, we estimate receiving six requests annually for appeal of user fee waiver determinations, and assume the time needed to prepare an appeal is 12 hours. We have included in this estimate both the time needed to prepare the request for appeal to the Chief Scientist and User Fee Appeals Officer within the Office of the Commissioner, and the time needed to create and send a copy of the request for an appeal to the Director Division of User Fee Management within the Office of Management at FDA's Center for Drug Evaluation and Research.

We assume a total of 82 hours of burden for completing and submitting the 164 forms FDA 3397 (Prescription Drug User Fee Coversheet) along with submission of NDAs or BLAs. The burdens associated with submission of NDAs and BLAs are included in OMB control numbers 0910–0001 and 0910–0338, respectively.

The information collection reflects changes and adjustments. We have clarified that the scope of the collection includes provisions found in our current commitment goals letter, negotiated with industry, pertaining to the assessment of fees, waivers, refunds, and exemptions under PDUFA VII. Cumulatively these changes and adjustments have resulted in an increase of three responses and 203 burden hours annually since the prior renewal of the information collection. We attribute this to the steady state of incoming requests for waivers and reconsiderations and normal fluctuations in types of submissions or waivers received.

Dated: October 30, 2024.

Kimberlee Trzeciak,

Deputy Commissioner for Policy, Legislation, and International Affairs.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Proposed Collection: Public Comment Request; Information Collection Request Title: Generic Information Collection Request for Health Resources and Services Administration Hotlines, Chatlines, and Online Portals

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the requirement for opportunity for public comment on proposed data collection projects of the Paperwork Reduction Act of 1995, HRSA announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). Prior to submitting the ICR to OMB, HRSA seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

DATES: Comments on this ICR should be received no later than January 17, 2025.

ADDRESSES: Submit your comments to *paperwork@hrsa.gov* or mail the HRSA Information Collection Clearance Officer, Room 14N39, 5600 Fishers Lane, Rockville, Maryland 20857.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email *paperwork@hrsa.gov* or call Joella Roland, the HRSA Information Collection Clearance Officer, at (301) 443–3983.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the ICR title for reference.

Information Collection Request Title: Generic Information Collection Request for Collections Related to HRSA Hotlines, Chatlines, and Online Portals, OMB No. 0906–New.

Abstract: HRSA currently administers approximately 15 hotlines, chatlines, and online portals for use by customers, members of the public, and HRSA funding recipients. These hotlines, chatlines, and online portals are administered by HRSA or a contractor on behalf of HRSA. The purpose of information collections under this generic umbrella ICR package is to allow HRSA to collect information on the operation of such HRSA hotlines, chatlines, and online portals to assist HRSA in improving their operation and determining if these services are helpful. In addition to collecting basic demographic information, the information collections would include questions such as reasons for inquiry, topics covered by inquiry, feedback on provided guidance or the hotline/chatline/online portal user experience. No protected information, such as personal health information or trade secrets, will be disclosed unless specifically required by law.

An illustrative, but not exhaustive, list of examples of information collection activities that would fall under this collection include standardized questions that are asked during the interaction with the public; surveys about their interaction; and information collected about their experience in use of hotlines, chatlines, and online portals. This generic umbrella ICR covers responses to standardized and survey questions relating to public use of HRSA's hotlines, chatlines, and online portals, pursuant to the ''Social Media, Web-Based Interactive Technologies, and the Paperwork Reduction Act'' 2010 White House guidance memo. The memo can be found at: *https://www.whitehouse.gov/wp-content/uploads/legacy_drupal_files/omb/assets/inforeg/SocialMediaGuidance_04072010.pdf.*

Need and Proposed Use of the Information: The purpose of collections under this generic umbrella ICR is for accountability, program management, and oversight purposes. Collecting feedback from members of the public about their interaction with these services will help ensure that HRSA hotlines, chatlines, and online portals are operating to the best of their abilities. While HRSA can evaluate the general need for and the overall practical utility of such information collection in advance, HRSA is unable to determine the details of the specific individual collection methodologies until a later time. Using a generic umbrella ICR will allow HRSA to quickly and nimbly respond to public needs and efficiently provide vital services to grantees and the general public, as the standard 6 to 9 month timeline to comply with a full request under the Paperwork Reduction Act could inhibit HRSA's ability to collect information to inform these activities that involve rapid updates to be responsive to their users. The information collected is expected to be voluntary and low-burden. Therefore, a generic umbrella ICR clearance is requested to allow for quick turnaround

requests for similar information collections related to these activities.

As this generic umbrella ICR will focus on the awareness, understanding, attitudes, preferences, or experiences of customers or other stakeholders relating to HRSA-funded hotlines, chatlines, or portals, the Fast Track Process should apply to this information collection. Therefore, HRSA also requests OMB provide a response on individual information collection requests within the scope of this generic ICR within 5 business days.

Likely Respondents: The most likely respondents include users of a HRSA-funded hotline, chatline, or portal. These users may include members of the public and public or private entities who receive HRSA funding. Responses to any information collections under this generic umbrella ICR are not required to obtain or retain any benefit.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information.

The total annual burden hours estimated for this ICR are summarized in the table below. HRSA conducted this estimate based on reviewing hotline and chatline scripts along with online portals, in addition to reviewing the burden estimates of forms from previous HRSA customer service surveys, which were approved under other umbrella or regular packages.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Instrument name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Standardized Hotline Interaction	100,000	1	100,000	0.17	17,000.00
Standardized Chatline Interaction	100,000	1	100,000	0.17	17,000.00
Online Portal Submission	10,000	1	10,000	0.067	670.00
Follow-Up Surveys	51,750	1	51,750	0.083	4,295.25
Total	261,750		261,750		38,965.25

HRSA specifically requests comments on: (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Maria G. Button,

Director, Executive Secretariat.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; PAR–23–137: Science Education Partnership Award (SEPA) R25.

Date: December 11–12, 2024.

Time: 9:00 a.m. to 8:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: James J Li, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5148, MSC 7849, Bethesda, MD 20892, 301–806–8065, *lijames@csr.nih.gov.*

Name of Committee: Center for Scientific Review Special Emphasis Panel; Small Business: Drug Discovery for Aging, Neurodegenerative and Neurological Disorders—Panel B.

Date: December 11, 2024.

Time: 9:00 a.m. to 7:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health Rockledge II, 6701 Rockledge Drive Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Kathryn Partlow, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 1016D, Bethesda, MD 20892 (301) 594–2138 *partlowkc@csr.nih.gov.*

Name of Committee: Center for Scientific Review Special Emphasis Panel; Specialized Centers of Research Excellence (SCORE) on Sex Differences.

Date: December 11–12, 2024.

Time: 10:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892, (Virtual Meeting).

Contact Person: Elaine Sierra-Rivera, Ph.D. IRG Chief Center for Scientific Review National Institutes of Health 6701 Rockledge Drive, Room 6182 Bethesda, MD 20892 (301) 435–2514 *riverase@csr.nih.gov.*

Name of Committee: Center for Scientific Review Special Emphasis Panel; Small Business-Anti-Infective Therapeutics.

Date: December 11–12, 2024.

Time: 10:00 a.m. to 8:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892, (Virtual Meeting).

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–0166.

Project: Government Performance and Results Act (GPRA) Client/Participant Outcomes Measure—(OMB No. 0930–0208)—Revision

SAMHSA is requesting approval for a revision of the CSAT Client-level GPRA instrument to continue the collection of performance and program monitoring data of its substance use services grant programs. Currently, the information collected from this instrument is entered and stored in SAMHSA's Performance Accountability and Reporting System (SPARS). SPARS is a real-time, performance management system that captures information on the substance use services and mental health services delivered through SAMHSA's grant programs across the United States. Continued approval of this information collection will allow SAMHSA to continue to meet Government Performance and Results Modernization Act of 2010 reporting requirements that quantify the effects and accomplishments of its discretionary grant programs, which are consistent with OMB guidance.

SAMHSA will use the data for annual performance reporting required by GPRA and comparing baseline with discharge and follow-up data. The additional information collected through this process will allow SAMHSA to: (1) report results of these performance outcomes; (2) maintain consistency with SAMHSA-specific performance domains, and (3) assess the performance of its discretionary and formula grant programs.

Currently, there are 379,037 total burden hours in the OMB-approved CSAT Client-level GPRA instrument. SAMHSA is now requesting an increase to 631,682 burden hours. The increase of 252,645 burden hours is due to the following:

- Additional time allocated for interviews, but also improved estimates

of the number of clients who would likely consent to complete the interview; and

• Additional time allocated for administrative collection of data by grantees, including the information that is collected for all clients regardless of whether they completed the client-portion of the interview or not.

The estimated time to complete the baseline, follow-up, and discharge interviews is 45 (0.75) minutes each. This includes the completion of the administrative sections of the tool for all clients including those who decline an interview. The estimated time to complete the SBIRT program-specific measures was increased from 12 (0.2) minutes to 15 minutes (0.25).

TABLE 1—ESTIMATES OF ANNUALIZED HOUR BURDEN

SAMHSA tool	Number of respondents	Responses per respondent	Total number of responses	Burden hours per response	Total burden hours	Hourly wage [1]	Total hour cost
Baseline Interview Includes SBIRT Brief TX, Referral to TX, and Program-specific questions	337,857	1	337,857	0.75	253,393	$28.89	$7,320,523
Follow-Up Interview with Program-specific questions [2]	270,286	1	270,286	0.75	202,715	28.89	5,856,436
Discharge Interview with Program-specific questions [3]	175,686	1	175,686	0.75	131,765	28.89	3,806,431
SBIRT Program—Screening Only	150,296	1	150,296	0.17	25,550	28.89	738,140
SBIRT Program—Brief Intervention Only Baseline	31,481	1	31,481	0.25	7,870	28.89	227,364
SBIRT Program—Brief Intervention Only Follow-Up [2]	25,184	1	25,184	0.25	6,296	28.89	181,891
SBIRT Program—Brief Intervention Only Discharge [3]	16,370	1	16,370	0.25	4,093	28.89	118,247
CSAT Total	1,007,160		1,007,160		631,682		18,249,032

[1] The hourly wage estimate is $28.89 based on the Occupational Employment and Wages, Mean Hourly Wage Rate for 21–1011 Substance Abuse and Behavioral Disorder Counselors = $28.89/hr. as of May 11, 2023. (*http://www.bls.gov/oes/current/oes211011.htm.* Accessed on June 20, 2024.)

[2] It is estimated that 80% of baseline clients will complete this interview.

[3] It is estimated that 52% of baseline clients will complete this interview. This estimate is based on Substance Abuse and Mental Health Services Administration (SAMHSA): Treating Concurrent Substance Use Among Adults. SAMHSA Publication No. PEP21–06–02–002. Rockville, MD: National Mental Health and Substance Use Policy Laboratory. Substance Abuse and Mental Health Services Administration, 2021.

Note: Numbers may not add to the totals due to rounding and some individual participants completing more than one form.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

Alicia Broadus,

Public Health Advisor.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Notice of Meeting for the Interdepartmental Substance Use Disorders Coordinating Committee (ISUDCC)

AGENCY: Substance Abuse and Mental Health Services Administration (SAMHSA), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Secretary of Health and Human Services (Secretary) announces a meeting of the Interdepartmental Substance Use Disorders Coordinating Committee (ISUDCC). The ISUDCC is open to the public and members of the public can attend the meeting via telephone or webcast only, and not in person. Agenda with call-in information will be posted on the SAMHSA website prior to the meeting at: *https://www.samhsa.gov/about-us/advisory-councils/meetings.*

DATES: December 11, 2024, 1 p.m.–4 p.m. EST.

ADDRESSES: The meeting will be open and held virtually. The meeting can be accessed via Zoom.

FOR FURTHER INFORMATION CONTACT: Tracy Goss, ISUDCC Designated Federal Officer, Substance Abuse and Mental Health Services Administration, 5600 Fishers Lane, Rockville, MD 20857; telephone: 240–276–0759; email: *Tracy.Goss@samhsa.hhs.gov.*

SUPPLEMENTARY INFORMATION: The upcoming meeting will focus on implementation of the ISUDCC's recommendations regarding how the Federal Government can more effectively integrate and coordinate harm reduction approaches across the continuum of prevention, treatment, and recovery policies, programs, and practices. The goal is to build consensus around those that can enhance national efforts to address substance use and substance use disorders and support further reductions in overdose mortality. In addition to discussing these recommendations, the meeting will feature several key presentations:

• Harm Reduction Summit Updates: Presentations will share insights, outcomes, and next steps from the recent Harm Reduction Summit, which focused on advancing harm reduction strategies at a national level.

• Recovery and Harm Reduction Workgroup: A presentation will cover the progress made by the Recovery and Harm Reduction Workgroup, highlighting how recovery-focused harm reduction strategies are being integrated into the broader framework of substance use disorder policy and practice.

• Naloxone Saturation Policy Academy work: An update on the Naloxone Saturation Policy Academy work, an important initiative focused on ensuring access to naloxone, a critical tool in preventing opioid overdose deaths, among groups at highest risk for and most likely to witness an overdose. Three academy cohorts have supported states, communities, and policymakers in developing and implementing effective naloxone distribution strategies. The initiative also includes training and technical assistance to states and local organizations, helping them create robust distribution networks and policies to ensure naloxone is optimally available when needed. This is enhanced by a bi-monthly virtual learning collaborative, open to all states, on different topics related to saturation of naloxone and other opioid overdose reversal medications.

This meeting will offer an important opportunity to continue advancing recommendations and key initiatives through the ISUDCC, fostering deeper collaboration to continue addressing substance use and substance use disorders across the nation.

Committee Name: Interdepartmental Substance Use Disorders Coordinating Committee (ISUDCC).

I. Background and Authority

The Interdepartmental Substance Use Disorders Coordinating Committee is required under Section 7022 of the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities Act (SUPPORT Act, Public Law 115–271) to accomplish the following duties: (1) identify areas for improved coordination of activities, if any, related to substance use disorders, including research, services, supports, and prevention activities across all relevant federal agencies; (2) identify and provide to the Secretary recommendations for improving federal programs for the prevention and treatment of, and recovery from, substance use disorders, including by expanding access to prevention, treatment, and recovery services; (3) analyze substance use disorder prevention and treatment strategies in different regions of and populations in the United States and evaluate the extent to which federal substance use disorder prevention and treatment strategies are aligned with State and local substance use disorder prevention and treatment strategies; (4) make recommendations to the Secretary regarding any appropriate changes with respect to the activities and strategies described in items (1) through (3) above; (5) make recommendations to the Secretary regarding public participation in decisions relating to substance use disorders and the process by which public feedback can be better integrated into such decisions; and (6) make recommendations to ensure that substance use disorder research, services, supports, and prevention activities of the Department of Health and Human Services and other federal agencies are not unnecessarily duplicative.

Not later than one year after the date of the enactment of this Act, and annually thereafter for the life of the Committee, the Committee shall publish on the internet website of the Department of Health and Human Services, which may include the public information dashboard established under section 1711 of the Public Health Service Act, as added by section 7021, a report summarizing the activities carried out by the Committee pursuant to subsection (e), including any findings resulting from such activities.

II. Membership

This ISUDCC consists of federal members listed below or their designees, and non-federal public members.

Federal Membership: Members include, The Secretary of Health and Human Services; The Attorney General of the United States; The Secretary of Labor; The Secretary of Housing and Urban Development; The Secretary of Education; The Secretary of Veterans Affairs; The Commissioner of Social Security; The Assistant Secretary for Mental Health and Substance Use; The Director of National Drug Control Policy; representatives of other Federal agencies that support or conduct activities or programs related to substance use disorders, as determined appropriate by the Secretary.

Non-federal Membership: Members include, 17 non-federal public members appointed by the Secretary, representing individuals who have received treatment for a diagnosis of a substance use disorder; directors of State substance use agencies; representatives of leading research, advocacy, or service organizations for adults with substance use disorder; physicians, licensed mental health professionals, advance practice registered nurses, and physician assistants, who have experience in treating individuals with substance use disorders; substance use disorder treatment professionals who provide treatment services at a certified opioid treatment program; substance use disorder treatment professionals who have research or clinical experience in working with racial and ethnic minority populations; substance use disorder treatment professionals who have research or clinical mental health experience in working with medically underserved populations; state-certified substance use disorder peer support specialists; drug court judge or a judge with experience in adjudicating cases related to substance use disorder; public safety officers with extensive experience in interacting with adults with a substance use disorder; and individuals with experiences providing services for homeless individuals with a substance use disorder.

The ISUDCC is required to meet at least twice per calendar year.

To attend virtually, submit written or brief oral comments, or request special accommodation for persons with disabilities, contact Tracy Goss. Individuals can also register on-line at: *https://snacregister.samhsa.gov/*

The public comment section will be scheduled at the conclusion of the meeting. Individuals interested in submitting a comment, must notify Tracy Goss on or before December 2, 2024, via email to: *Tracy.Goss@samhsa.hhs.gov.*

Up to two minutes will be allotted for each approved public comment as time permits. Written comments received in advance of the meeting will be considered for inclusion in the official record of the meeting.

Substantive meeting information and a roster of Committee members is available at the SAMHSA's Advisory Councils website: *https://www.samhsa.gov/about-us/advisory-councils.*

Dated: November 12, 2024.

Carlos Castillo,

Committee Management Officer.

BILLING CODE 4162–20–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2024–0288]

Collection of Information Under Review by Office of Management and Budget; OMB Control Number 1625–0030

AGENCY: Coast Guard, DHS.

ACTION: Thirty-day notice requesting comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 the U.S. Coast Guard is forwarding an Information Collection Request (ICR), abstracted below, to the Office of Management and Budget (OMB), Office of Information and Regulatory Affairs (OIRA), requesting an extension of its approval for the following collection of information: 1625–0030, Oil and Hazardous Materials Transfer Materials; without change. Our ICR describes the information we seek to collect from the public. Review and comments by OIRA ensure we only impose paperwork burdens commensurate with our performance of duties.

DATES: You may submit comments to the Coast Guard and OIRA on or before December 18, 2024.

ADDRESSES: Comments to the Coast Guard should be submitted using the Federal eRulemaking Portal at *https://www.regulations.gov.* Search for docket number [USCG–2024–0288]. Written comments and recommendations to OIRA for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.*

Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

A copy of the ICR is available through the docket on the internet at *https://www.regulations.gov.* Additionally, copies are available from: Commandant (CG–6P), ATTN: Paperwork Reduction Act Manager, U.S. Coast Guard, 2703 Martin Luther King Jr. Ave. SE, Stop 7710, Washington, DC 20593–7710.

FOR FURTHER INFORMATION CONTACT: A.L. Craig, Office of Privacy Management, telephone 202–475–3528, fax 202–372–8405, or email *hqs-dg-m-cg-61-pii@uscg.mil* for questions on these documents.

SUPPLEMENTARY INFORMATION:

Public Participation and Request for Comments

This notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. 3501 *et seq.,* chapter 35, as amended. An ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collection. There is one ICR for each Collection.

The Coast Guard invites comments on whether this ICR should be granted based on the Collection being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) the practical utility of the Collection; (2) the accuracy of the estimated burden of the Collection; (3) ways to enhance the quality, utility, and clarity of information subject to the Collection; and (4) ways to minimize the burden of the Collection on respondents, including the use of automated collection techniques or other forms of information technology. These comments will help OIRA determine whether to approve the ICR referred to in this Notice.

We encourage you to respond to this request by submitting comments and related materials. Comments to Coast Guard or OIRA must contain the OMB Control Number of the ICR. They must also contain the docket number of this request, USCG–2024–0288, and must be received by December 18, 2024.

Submitting Comments

We encourage you to submit comments through the Federal eRulemaking Portal at *https://www.regulations.gov.* If your material cannot be submitted using *https://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions. Documents mentioned in this notice, and all public comments, are in our online docket at *https://www.regulations.gov* and can be viewed by following that website's instructions. We review all comments received, but we may choose not to post off-topic, inappropriate, or duplicate comments that we receive. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted.

We accept anonymous comments. Comments we post to *https://www.regulations.gov* will include any personal information you have provided. For more about privacy and submissions to the Coast Guard in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020). For more about privacy and submissions to OIRA in response to this document, see the *https://www.reginfo.gov,* comment-submission web page. OIRA posts its decisions on ICRs online at *https://www.reginfo.gov/public/do/PRAMain* after the comment period for each ICR. An OMB Notice of Action on each ICR will become available via a hyperlink in the OMB Control Number: 1625–0030.

Previous Request for Comments

This request provides a 30-day comment period required by OIRA. The Coast Guard published the 60-day notice (89 FR 70197, August 29, 2024) required by 44 U.S.C. 3506(c)(2). That notice elicited no comments. Accordingly, no changes have been made to the Collection.

Information Collection Request

Title: Oil and Hazardous Materials Transfer Procedures.

OMB Control Number: 1625–0030.

Summary: Vessels with a capacity of 250 barrels or more of oil or hazardous materials must develop and maintain transfer procedures. Transfer procedures provide basic safety information for operating transfer systems with the goal of pollution prevention.

Need: 33 U.S.C. 1231 authorizes the Coast Guard to prescribe regulations related to the prevention of pollution. 33 CFR part 155 prescribes pollution prevention regulations including those related to transfer procedures.

Forms: Not applicable.

Respondents: Operators of certain vessels.

Frequency: On occasion.

Hour Burden Estimate: The estimated burden has decreased from 151 hours to 149 hours a year, due to a decrease in the estimated annual number of responses.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. *et seq.,* chapter 35, as amended.

Dated: November 8, 2024.

Kathleen Claffie,

Chief, Office of Privacy Management, U.S. Coast Guard.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2024–0289]

Collection of Information Under Review by Office of Management and Budget; OMB Control Number 1625–0064

AGENCY: Coast Guard, DHS.

ACTION: Thirty-day notice requesting comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 the U.S. Coast Guard is forwarding an Information Collection Request (ICR), abstracted below, to the Office of Management and Budget (OMB), Office of Information and Regulatory Affairs (OIRA), requesting an extension of its approval for the following collection of information: 1625–0064, Plan Approval and Records for Subdivision and Stability Regulations; without change. Our ICR describes the information we seek to collect from the public. Review and comments by OIRA ensure we only impose paperwork burdens commensurate with our performance of duties.

DATES: You may submit comments to the Coast Guard and OIRA on or before December 18, 2024.

ADDRESSES: Comments to the Coast Guard should be submitted using the Federal eRulemaking Portal at *https://www.regulations.gov.* Search for docket number [USCG–2024–0289]. Written comments and recommendations to OIRA for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.*

Find this particular information collection by selecting ''Currently under

30-day Review—Open for Public Comments'' or by using the search function.

A copy of the ICR is available through the docket on the internet at *https://www.regulations.gov.* Additionally, copies are available from: Commandant (CG–6P), ATTN: Paperwork Reduction Act Manager, U.S. Coast Guard, 2703 Martin Luther King Jr. Ave. SE, Stop 7710, Washington, DC 20593–7710.

FOR FURTHER INFORMATION CONTACT: A.L. Craig, Office of Privacy Management, telephone 202–475–3528, fax 202–372–8405, or email *hqs-dg-m-cg-61-pii@uscg.mil* for questions on these documents.

SUPPLEMENTARY INFORMATION:

Public Participation and Request for Comments

This notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. 3501 *et seq.,* chapter 35, as amended. An ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collection. There is one ICR for each Collection.

The Coast Guard invites comments on whether this ICR should be granted based on the Collection being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) the practical utility of the Collection; (2) the accuracy of the estimated burden of the Collection; (3) ways to enhance the quality, utility, and clarity of information subject to the Collection; and (4) ways to minimize the burden of the Collection on respondents, including the use of automated collection techniques or other forms of information technology. These comments will help OIRA determine whether to approve the ICR referred to in this Notice.

We encourage you to respond to this request by submitting comments and related materials. Comments to Coast Guard or OIRA must contain the OMB Control Number of the ICR. They must also contain the docket number of this request, USCG–2024–0289, and must be received by December 18, 2024.

Submitting comments

We encourage you to submit comments through the Federal eRulemaking Portal at *https://www.regulations.gov.* If your material cannot be submitted using *https://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions. Documents mentioned in this notice, and all public comments, are in our online docket at *https://www.regulations.gov* and can be viewed by following that website's instructions. We review all comments received, but we may choose not to post off-topic, inappropriate, or duplicate comments that we receive. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted.

We accept anonymous comments. Comments we post to *https://www.regulations.gov* will include any personal information you have provided. For more about privacy and submissions to the Coast Guard in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020). For more about privacy and submissions to OIRA in response to this document, see the *https://www.reginfo.gov,* comment-submission web page. OIRA posts its decisions on ICRs online at *https://www.reginfo.gov/public/do/PRAMain* after the comment period for each ICR. An OMB Notice of Action on each ICR will become available via a hyperlink in the OMB Control Number: 1625–0064.

Previous Request for Comments

This request provides a 30-day comment period required by OIRA. The Coast Guard published the 60-day notice (89 FR 68914, August 28, 2024) required by 44 U.S.C. 3506(c)(2). That notice elicited no comments. Accordingly, no changes have been made to the Collection.

Information Collection Request

Title: Plan Approval and Records for Subdivision and Stability Regulations—Title 46 CFR Subchapter S.

OMB Control Number: 1625–0064.

Summary: The regulations require owners, operators, or masters of certain inspected vessels to obtain and/or post various documents as part of the Coast Guard commercial vessel safety program.

Need: 46 U.S.C. 3306 authorizes the Coast Guard to prescribe regulations for the safety of certain vessels. 46 CFR Subchapter S contains the Coast Guard regulations regarding subdivision and stability.

Forms: None.

Respondents: Owners, operators, and masters of vessels.

Frequency: On occasion.

Hour Burden Estimate: The estimated burden has increased from 7,193 hours to 8,288 hours a year, due to an increase in the estimated annual number of responses.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. *et seq.,* chapter 35, as amended.

Dated: November 8, 2024.

Kathleen Claffie,

Chief, Office of Privacy Management, U.S. Coast Guard.

SUPPLEMENTARY INFORMATION:

Public Participation and Request for Comments

This notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. 3501 *et seq.,* chapter 35, as amended. An ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collection. There is one ICR for each Collection.

The Coast Guard invites comments on whether this ICR should be granted based on the Collection being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) the practical utility of the Collection; (2) the accuracy of the estimated burden of the Collection; (3) ways to enhance the quality, utility, and clarity of information subject to the Collection; and (4) ways to minimize the burden of the Collection on respondents, including the use of automated collection techniques or other forms of information technology. These comments will help OIRA determine whether to approve the ICR referred to in this Notice.

We encourage you to respond to this request by submitting comments and related materials. Comments to Coast Guard or OIRA must contain the OMB Control Number of the ICR. They must also contain the docket number of this request, USCG–2024–0286, and must be received by December 18, 2024.

Submitting Comments

We encourage you to submit comments through the Federal eRulemaking Portal at *https://www.regulations.gov.* If your material cannot be submitted using *https://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions. Documents mentioned in this notice, and all public comments, are in our online docket at *https://www.regulations.gov* and can be viewed by following that website's instructions. We review all comments received, but we may choose not to post off-topic, inappropriate, or duplicate comments that we receive. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted.

We accept anonymous comments. Comments we post to *https://www.regulations.gov* will include any personal information you have provided. For more about privacy and submissions to the Coast Guard in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020). For more about privacy and submissions to OIRA in response to this document, see the *https://www.reginfo.gov,* comment-submission web page. OIRA posts its decisions on ICRs online at *https://www.reginfo.gov/public/do/PRAMain* after the comment period for each ICR. An OMB Notice of Action on each ICR will become available via a hyperlink in the OMB Control Number: 1625–0020.

Previous Request for Comments

This request provides a 30-day comment period required by OIRA. The Coast Guard published the 60-day notice (89 FR 68913, August 28, 2024) required by 44 U.S.C. 3506(c)(2). That notice elicited no comments. Accordingly, no changes have been made to the Collection.

Information Collection Request

Title: Security Zones, Regulated Navigation Areas, and Safety Zones.

OMB Control Number: 1625–0020.

Summary: The Coast Guard collects this information only when someone seeks a security zone, regulated navigation area, or safety zone. It uses the information to assess the need to establish one of these areas.

Need: Sections 70034 and 70051 of 46 U.S. Code, and parts 6 and 165 of 33 CFR give the Coast Guard Captain of the Port (COTP) the authority to designate security zones in the U.S. for as long as the COTP deems necessary to prevent damage or injury. Section 70001 of 46 U.S. Code authorizes the Coast Guard to prescribe rules to control vessel traffic in areas he or she deems hazardous because of reduced visibility, adverse weather, or vessel congestion. Section 70011 of 46 U.S. Code authorizes the Coast Guard to establish rules to allow the designation of safety zones where access is limited to authorized persons, vehicles, or vessels to protect the public from hazardous situations.

Forms: None.

Respondents: Federal, State, and local government agencies, owners and operators of vessels and facilities.

Frequency: On occasion.

Hour Burden Estimate: The estimated burden has decreased from 928 hours to 485 hours a year, due to a decrease in the estimated annual number of responses.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. *et seq.,* chapter 35, as amended.

Dated: November 8, 2024.

Kathleen Claffie,

Chief, Office of Privacy Management, U.S. Coast Guard.

We accept anonymous comments. Comments we post to *https://www.regulations.gov* will include any personal information you have provided. For more about privacy and submissions to the Coast Guard in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020). For more about privacy and submissions to OIRA in response to this document, see the *https://www.reginfo.gov,* comment-submission web page. OIRA posts its decisions on ICRs online at *https://www.reginfo.gov/public/do/PRAMain* after the comment period for each ICR. An OMB Notice of Action on each ICR will become available via a hyperlink in the OMB Control Number: 1625–0022.

Previous Request for Comments

This request provides a 30-day comment period required by OIRA. The Coast Guard published the 60-day notice (89 FR 68914, August 28, 2024) required by 44 U.S.C. 3506(c)(2). That notice elicited no comments. Accordingly, no changes have been made to the Collection.

Information Collection Request

Title: Application for Tonnage Measurement of Vessels.

OMB Control Number: 1625–0022.

Summary: The information is used by the Coast Guard to determine a vessel's tonnage. Tonnage in turn helps to determine licensing, inspection, safety requirements, and operating fees.

Need: Under 46 U.S.C. 14104 certain vessels must be measured for tonnage.

Coast Guard regulations for this measurement are contained in 46 CFR part 69.

Forms: CG–5397, Application for Simplified Measurement.

Respondents: Owners of vessels.

Frequency: On occasion.

Hour Burden Estimate: The estimated burden has increased from 15,094 hours to 38,157 hours a year, due to an increase in the estimated annual number of respondents.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. *et seq.,* chapter 35, as amended.

Dated: November 8, 2024.

Kathleen Claffie,

Chief, Office of Privacy Management, U.S. Coast Guard.

BILLING CODE 9110–04–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–6498–N–01]

The Performance Review Board

AGENCY: Office of the Secretary, Housing and Urban Development (HUD).

ACTION: Notice of appointments.

SUMMARY: The Department of Housing and Urban Development announces the establishment of the Departmental Performance Review Board (PRB) to make recommendations to the appointing authority on the performance and compensation of its Senior Executive Service (SES), Senior Level (SL) and Senior Technical (ST) professionals. The following persons may be named to serve on the PRB from 2024 through 2026. They are listed by type of appointment, name, and official title.

FOR FURTHER INFORMATION CONTACT: Persons desiring any further information about the PRB and its members may contact Selina M. Swales, Director, Office of Executive Resources, Department of Housing and Urban Development, Washington, DC 20410. Telephone (202) 402–3450. (This is not a toll-free number.) HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.*

SUPPLEMENTARY INFORMATION: The following persons may be named to serve on the PRB from 2024 through 2026. They are listed by type of appointment, name, and official title:

Name	Official title
CAREER SES	
AMMON, MATTHEW E	DIRECTOR, OFFICE OF HEALTHY HOMES AND LEAD HAZARD CONTROL.
BERENBAUM, DAVID L	DEPUTY ASSISTANT SECRETARY, OFFICE OF HOUSING COUNSELING.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–HQ–ES–2024–N027; FF09E41000 245 FXES11130900000]

Endangered Species Act; Issuance of Enhancement of Survival and Incidental Take Permits for Safe Harbor Agreements, Candidate Conservation Agreements, Conservation Plans, and Scientific Activities; January 1, 2023, Through December 31, 2023

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: We, the U.S. Fish and Wildlife Service, in accordance with the Endangered Species Act (ESA), provide a list to the public of permits we issued under the ESA during calendar year 2023 for candidate conservation agreements with assurances, safe harbor agreements, habitat conservation plans, and scientific activities. With some exceptions, the ESA prohibits take of listed species unless a Federal permit is issued that authorizes or exempts the taking under the ESA.

FOR FURTHER INFORMATION CONTACT: For general information about the ESA permit process, contact Amanda Murnane, via phone at 703–358–2469 or *viaemailatamanda_murnane@fws.gov.* For information on specific permits, see the contact information for the applicable region under Permits Issued. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), are publishing this notice in order to provide lists to the public of the permits we issued during calendar year 2023 under sections 10(a)(1)(A) and 10(a)(1)(B) of the Endangered Species Act of 1973 (ESA; 16 U.S.C. 1531 *et seq.*), as amended. We are publishing the lists of section 10(a)(1)(A) permits in accordance with section 10(d) of the ESA. We are publishing the lists of section 10(a)(1)(B) permits in accordance with chapter 16 of the *Habitat Conservation Planning and Incidental Take Permit Processing Handbook,* developed by the Service in cooperation with the National Marine Fisheries Service, and available at *https://www.fws.gov/media/habitat-conservation-planning-and-incidental-take-permit-processing-handbook* (December 21, 2016; 81 FR 93702).

With some exceptions, the ESA prohibits take of listed species unless a Federal permit is issued that authorizes the taking, or the take is exempted through section 7 of the ESA. Under section 10(a)(1)(A) of the ESA, we issue scientific permits and enhancement of survival permits in conjunction with conservation agreements (*e.g.,* Candidate Conservation Agreements with Assurances or CCAAs, and Safe Harbor Agreements or SHAs). Section 10(a)(1)(B) permits authorize take of listed species incidental to otherwise lawful activities associated with conservation plans (also known as habitat conservation plans or HCPs). We provide these lists to the public as a summary of our permit issuances for CCAAs, SHAs, HCPs, and scientific permits for calendar year 2023.

We recently revised the implementing regulations for ESA section 10(a) related to enhancement of survival permits supported by SHAs and CCAAs (50 CFR 17.22(c) and (d) and 50 CFR 17.32(c) and (d)) to combine the SHA and CCAA into one type of conservation agreement, called a conservation benefit agreement (89 FR 26070; April 12, 2024). The permits listed in this notice are not affected by this change, as they were all issued prior to May 13, 2024, the effective date of the regulation revisions.

Background

Under the authority of section 10(a)(1)(A) of the ESA, we have issued enhancement of survival permits to conduct activities that provide a conservation benefit for endangered or threatened species, or for unlisted species should they become listed in the future, in response to permit applications that we received in conjunction with a SHA or a CCAA.

Scientific permits have been issued under ESA section 10(a)(1)(A) to allow for take as part of activities conducted for scientific purposes of listed species (*e.g.,* scientific research in order to understand better the species' long-term survival needs).

Under ESA section 10(a)(1)(B), we may issue permits for any taking otherwise prohibited by ESA section 9 if such taking is incidental to, and not the purpose of, carrying out an otherwise lawful activity (known as an incidental take permit (ITP)) and the permit applicant submits a conservation plan or HCP that meets the permit issuance criteria under section 10(a)(2)(B). Typically, applicants seek an ITP to conduct activities such as residential and commercial development, infrastructure development or maintenance, and energy development projects that range in scale from small to landscape-level planning efforts.

The permits associated with SHAs, CCAAs, HCPs, and scientific activities that we issued between January 1 and December 31, 2023, are listed in the tables in this notice.

Under section 10(a)(1)(A), we issued each permit only after we determined that it was applied for in good faith; that granting the permit would not be to the disadvantage of the listed species, or to any unlisted species on the permit should they be listed; and that the terms and conditions of the permits were consistent with the purposes and policy set forth in the ESA.

Under section 10(a)(1)(B), we issued permits only after we determined that the applicant was eligible and had submitted a complete application and HCP that fully met the permit issuance criteria consistent with section 10(a)(2)(B).

Permits Issued

Region 1 (Hawaii, Idaho, Oregon (Except for the Klamath Basin), Washington, American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the Pacific Trust Territories)

Table 1 shows permits issued by Region 1 of the Service. The table is sorted by type of permit or agreement and date issued. For more information about any of the HCP or CCAA permits, contact the HCP or CCAA permit coordinator by email at *ITEOSpermitsR1ES@fws.gov* or by telephone at 503–231–6131. For more information about any of the scientific permits, contact the Recovery Permit Coordinator by email at *PermitsR1ES@fws.gov* or by telephone at 503–231–6131.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[256A2100DD/AAKC001030/A0A501010.999900]

Prairie Island Indian Community; Amendments to Liquor Control Ordinance

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This notice publishes amendments to the Prairie Island Indian Community's Liquor Control Ordinance. This Ordinance amends and supersedes the existing Prairie Island Mdewakanton Dakota Community Liquor Control Ordinance, adopted on July 10, 1992, by Resolution Number 92–84; and amended on October 14, 1992, by Resolution Number 92–118.

DATES: This ordinance shall become effective December 18, 2024.

FOR FURTHER INFORMATION CONTACT: Sherrel LaPointe, Tribal Operations Officer, Midwest Regional Office, Bureau of Indian Affairs, 5600 American Boulevard West, Suite 500, Bloomington, Minnesota 55437, Telephone: (612) 725–4500, Fax: (612) 713–4401.

SUPPLEMENTARY INFORMATION: Pursuant to the Act of August 15, 1953, Public Law 83–277, 67 Stat. 586, 18 U.S.C. 1161, as interpreted by the Supreme Court in *Rice* v. *Rehner,* 463 U.S. 713 (1983), the Secretary of the Interior shall certify and publish in the **Federal Register** notice of adopted liquor control ordinances for the purpose of regulating liquor transactions in Indian country. On August 9, 2023, the Prairie Island Indian Community Council adopted the amendments to the Community's Liquor Control Ordinance by Resolution Numbers 23–8–9–150. This **Federal Register** Notice comprehensively amends and supersedes the existing

Prairie Island Indian Community Liquor Control Ordinance which was published in the **Federal Register** on December 1, 1992 (57 FR 56960).

This notice is published in accordance with the authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs. I certify that the Prairie Island Indian Community Tribal Council duly adopted these amendments to the Prairie Island Indian Community Liquor Control Ordinance on August 9, 2023.

Bryan Newland,

Assistant Secretary–Indian Affairs.

The Prairie Island Indian Community's Liquor Control Ordinance, as amended, shall read as follows:

Prairie Island Indian Community

Liquor Control Ordinance

Section 1. Short Title. This Ordinance shall be known and may be cited as the Prairie Island Indian Community Liquor Control Ordinance.

Section 2. Statement of Purpose, Findings, and Authority.

a. Purpose. It is the Community's policy to ensure that any transaction, importation, sale, or consumption involving an alcoholic beverage, while within the Tribe's jurisdiction, shall occur in strict compliance with this Ordinance, the laws of the United States and the State of Minnesota.

b. Findings. [reserved].

c. Authority. This Ordinance is an exercise of the inherent sovereignty of the Community and shall be deemed an exercise of the Community Council's power to protect the welfare, health, peace, morals, and safety of the people of the Community.

Section 3. Definitions.

a. ''Community'' means the Prairie Island Indian Community in the State of Minnesota, a federally recognized Indian Tribe.

b. ''Community Council'' means the constitutionally authorized governing body of the Community.

c. ''Alcoholic beverage'' means any intoxicating liquor, low point beer, or any wine, as defined under the provisions of this Ordinance.

d. ''Application'' means a formal written request for the issuance of a license supported by a verified statement of facts.

e. ''Community'' means the Prairie Island Indian Community in the State of Minnesota, a federally recognized Indian Tribe.

f. ''Community Council'' means the constitutionally authorized governing body of the Community.

g. ''Establishment'' means any liquor store or any on- or off-sale dealer.

h. ''High point beer'' means any beer having an alcoholic content in excess of three and two-tenths per centum (3.2%) of weight.

i. ''Intoxicating liquor'' means any liquid either commonly used, or reasonably adapted to use, for beverages purposes containing in excess of three and two-tenths per centum (3.2%) of alcohol by weight. This shall include any type of wine, regardless of alcoholic content.

j. ''Legal age'' means the age requirements as defined in Section 16.

k. ''Liquor store'' means any store, established by the Community or licensed individual or entity, for the sale of alcoholic beverages.

l. ''Low point beer'' means any liquid either commonly used, or reasonably adapted to use, for beverage purposes, and which is produced wholly or in part from brewing of any grain or grains, malt substitute, and which contains any alcohol whatsoever, but no more than three and two-tenths per centum (3.2%) of alcohol by weight.

m. ''Off-sale'' means the sale of any alcoholic beverages for consumption off the premises where sold.

n. ''On-sale dealer'' means the Community or licensed individual or entity that sells, or keeps for sale any alcoholic beverage authorized under this Ordinance for consumption on the premises where sold.

o. ''On-sale'' means the sale of any alcoholic beverage for consumption only upon the premises where sold.

p. ''Reservation'' means all territory subject to the Community's jurisdiction.

q. ''Sale'' means the transfer of any bagged, bottled, boxed, canned or kegged alcoholic beverage, or the serving of any contents of any bagged, bottled, boxed, canned or kegged alcoholic beverage for a consideration of currency exchange.

r. ''Transaction'' means any transfer of any bagged, bottled, boxed, canned, or kegged alcoholic beverage, or the transfer of any contents of any bagged, bottled, boxed, canned or kegged alcoholic beverage from any liquor store, on-sale dealer or vendor to any person.

s. ''Vendor'' means any person employed or under the supervision by and of a liquor store or on-sale dealer who conducts sales or transactions involving alcoholic beverages.

t. ''Wine'' means any beverage containing alcohol obtained by the fermentation of the natural sugar contents of fruits or other agricultural products, and containing not more than seventeen percent (17%) of alcohol by weight, including sweet wines, fortified with wine spirits, such as port, sherry, muscatel, and angelica.

Section 4. Applicability. [reserved]

Section 5. General Prohibition. It shall be unlawful to manufacture for sale, sell, offer, or keep for sale, possess, transport or conduct any transaction involving any alcoholic beverage except in compliance with the terms, conditions, limitations, and restrictions specified in this Ordinance.

Section 6. Community Control of Alcoholic Beverages. The Council shall have the sole and exclusive right to authorize the importation of alcoholic beverages for sale or for the purpose of conducting transactions therewith, and no person or organization shall so import any such alcoholic beverage into the Reservation unless authorized by the Council.

Section 7. Community Liquor Store. The Council may establish and maintain anywhere on the Reservation that the Council may deem advisable, a community liquor store or stores for storage and off-sale of alcoholic beverages in accordance with the provisions of this Ordinance. The Council may set the prices of alcoholic beverages sold.

Section 8. Community On-Sale Dealer. The Council may establish and maintain anywhere on the Reservation that the Council may deem advisable, a community on-sale dealer or dealers for storage and on-sale of alcoholic beverages in accordance with the provisions of this Ordinance. The Council may set the prices of alcoholic beverages sold.

Section 9. State of Minnesota Licenses. The Council shall notify the State of Minnesota of any Community operated establishment that sells alcoholic beverages or conducts transactions involving alcoholic beverages in compliance with Minn. Stat. 340A.4055.

Section 10. Liability Insurance. For the purpose of complying with 18 U.S.C. 1161 and the Minnesota Liquor Act, the Council, or any entity licensed by the Council, shall demonstrate proof of financial responsibility to the State of Minnesota by obtaining the necessary liability insurance required by Minn. Stat. 340A.409.

Section 11. License Restrictions, General.

a. License Posting. A retail license to sell alcoholic beverages must be posted in a conspicuous place in the premises for which it is used.

b. Gambling Compliance. Gambling on premises where alcoholic beverages are to be sold must be in compliance under the Indian Gaming Regulatory Act of 1988, 25 U.S.C. 2701, et. seq. and

Chapter 349 and 349A of the Minnesota Statutes.

c. License Limited to Space Specified. A retail license to sell any alcoholic beverage is only effective for the compact and contiguous space specified in the approved license application.

Section 12. License Restrictions; Intoxicating Liquor Licenses.

a. Investigation of On-Sale Licenses. The Community Council shall appoint a person to cooperate with any city or county official in the conduct of any preliminary background and/or financial investigation for the purposes of complying with Minn. Stat. 304A.412. However, nothing in this section shall mean and be construed to be a waiver of the Community's sovereign immunity and shall allow any city or county official to conduct any investigation not specifically authorized by the Community Council as documented by a written resolution.

b. Off-sale limitation. The Community shall not apply for more than one off-sale intoxicating liquor license.

c. General compliance. The Community Council shall comply with all prohibitions as stated in Minn. Stat. 340A.412, Subd. 4.

d. Employment of Minors. No person under 18 years of age may serve or sell intoxicating liquor on the Prairie Island Indian Reservation.

Section 13. Restrictions on the Number of Intoxicating Liquor Licenses that May Be Issued.

a. Referendum for Additional On-Sale Licenses. The Community Council may issue on-sale intoxicating liquor licenses over the number permitted under Section 13 when authorized by the voters of the Community at a general or special election.

b. Referendum Questions. The Community Council may direct that either of the following questions be placed on the ballot.

1. ''Shall the Community Council be allowed to issue 'on-sale' licenses for the sale of intoxicating liquor at retail in excess of the number permitted by law?''

2. ''Shall the Community Council be allowed to issue (a number to be determined by the governing body) 'on-sale' licenses for the sale of intoxicating liquor at retail in excess of the number now permitted by law?''

Section 14. Responsibility of Licensee. Every licensee is responsible for the conduct in the licensed establishment and any sale of alcoholic beverages by any employee authorized to sell alcoholic beverages in the establishment is the act of the licensee for the purposes of all provisions of this Ordinance.

Section 15. Sales to Obviously Intoxicated Persons. No person may sell, give, furnish, or in any way procure for another alcoholic beverages for the use of an obviously intoxicated person. Nothing herein shall be construed as a waiver of the Community's sovereign immunity from suit for any violation of this section by a licensee or employee of a Community facility.

Section 16. Persons Under 21 Years of Age; Restrictions.

a. The Council shall enforce the State of Minnesota laws regarding restrictions on those persons under the age of 21 years in any Community establishment operating pursuant to the provisions of this Ordinance.

b. No Community operated or licensed establishment shall sell, barter, furnish, give or allow to be consumed therein alcoholic beverages to and by a person under 21 years of age.

c. Any Community operated or licensed establishment shall require proof of age for purchasing or consuming alcoholic beverages by requiring a valid driver's license or State of Minnesota identification card, or in the case of a foreign national a valid passport to be shown at any time deemed necessary while on the premises of a Community operated or licensed establishment.

d. Any Community operated or licensed establishment shall prohibit all persons under the age of 21 years to enter the establishment except to:

1. perform work if the person is 18, 19, or 20 years of age;

2. consume meals while accompanied by an adult who is the legal guardian or parent of the person; or

3. attend social functions that are held in a portion of the establishment where alcoholic beverages are not sold.

e. No Community operated or licensed establishment shall employ any person under the age of 18 years to serve or sell alcoholic beverages.

Section 17. Hours and Days of Sale.

a. No Community operated or licensed establishment shall sell or furnish alcoholic beverages for on-sale purposes between 1:00 a.m. and 8:00 a.m. on the days of Monday through Saturday, after 1:00 a.m. on Sundays, or otherwise not in compliance with Minn. Stat. 340A.504.

b. No Community operated or licensed establishment shall sell or furnish alcoholic beverages for off-sale purposes: (1) on Sundays; (2) before 8:00 a.m. on Monday through Saturday; (3) after 10:00 p.m. on Monday through Saturday; or (4) otherwise not in compliance with Minn. Stat. 340A.504.

Section 18. Sales of Ethyl and Neutral Spirits Prohibited. No person may sell at retail for beverage purposes ethyl alcohol or neutral spirits, or substitutes thereof, possessing the taste, aroma, and characteristics generally attributed to ethyl alcohol or neutral spirits. Nothing in this section prohibits the manufacture or sale of other products obtained by use of ethyl alcohol or neutral spirits as defined in U.S. Treasury Department, Bureau of Internal Revenue, Regulations 125, Article II, Standards of Identity for Distilled Spirits.

Section 19. Power to License and Tax. The power to establish licenses and levy taxes under the provisions of this Ordinance is vested exclusively with the Council.

Section 20. Community Liquor Licenses. The Council shall issue by resolution, upon proper application and Council approval, a Community liquor license to any establishment wishing to sell, serve, or furnish alcoholic beverages or conduct transactions involving alcoholic beverages within the boundaries of the Reservation.

Section 21. Classes of Licenses. Classes of Community licenses under this Ordinance shall be as follows:

a. Class A Off-Sale Liquor store; and

b. Class B On-Sale Dealer

Section 22. Community Operated Establishments. The Council shall issue by resolution one appropriate license to a Community operated establishment upon determining the site for the establishment, creating an operating infrastructure for the establishment and obtaining the appropriate licensing from the State of Minnesota.

Section 23. No Licenses Issued. The Council shall not issue any licenses to any person or entity other than the Community until this Ordinance is properly amended to authorize the licensing of non-Community persons or entities.

Section 24. Display of Community License. Any establishment licensed pursuant to the provisions of this Ordinance shall display the Community license in a conspicuous place.

Section 25. Distribution of Profits. All profits from the sale of alcoholic beverages on the Reservation are subject to distribution of the Council in accordance with its usual appropriation procedures for essential governmental and social services.

Section 26. Records. [reserved]

Section 27. Miscellaneous Provisions.

a. Sovereign Immunity. Nothing in this Ordinance shall be construed as a waiver of the Prairie Island Indian Community in the State of Minnesota's sovereign immunity.

b. Severability. If any provision of this Ordinance or its application to any

person or circumstance is held invalid, the remainder of this Ordinance, or the application of the provision to other persons or circumstances is not affected.

c. Amendment or Repeal of Ordinance. This Ordinance may be amended or repealed only by a majority vote of the Council in regular session.

BILLING CODE 4337–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_AK_FRN_MO4500181836; F–14837–A]

Alaska Native Claims Selection

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of decision approving lands for conveyance.

SUMMARY: The Bureau of Land Management (BLM) hereby provides constructive notice that it will issue an appealable decision approving conveyance of the surface estate in certain lands to Beaver Kwit'chin Corporation for the Native village of Beaver, pursuant to the Alaska Native Claims Settlement Act of 1971 (ANCSA). The subsurface estate in the same lands will be conveyed to Doyon, Limited, when the surface estate is conveyed to Beaver Kwit'chin Corporation.

DATES: Any party claiming a property interest in the lands affected by the decision may appeal the decision in accordance with the requirements of 43 CFR part 4 within the time limits set out in the **SUPPLEMENTARY INFORMATION** section.

ADDRESSES: You may obtain a copy of the decision from the Bureau of Land Management, Alaska State Office, 222 West Seventh Avenue, #13, Anchorage, AK 99513–7504.

FOR FURTHER INFORMATION CONTACT: Matthew Colburn, Land Law Examiner, Adjudication Section, BLM Alaska State Office, 907–271–5067 or *mcolburn@blm.gov*. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point of contact in the United States.

SUPPLEMENTARY INFORMATION: As required by 43 CFR 2650.7(d), notice is hereby given that the BLM will issue an appealable decision to Beaver Kwit'chin Corporation. The decision approves conveyance of the surface estate in certain lands pursuant to ANCSA (43 U.S.C. 1601, *et seq.*), as amended. As provided by ANCSA, the subsurface estate in the same lands will be conveyed to Doyon, Limited, when the surface estate is conveyed to Beaver Kwit'chin Corporation. The lands are located in the vicinity of Beaver, Alaska, and are described as:

Fairbanks Meridian, Alaska

T. 18 N., R. 1 E.,
Sec. 34.
Containing approximately 40 acres.
T. 17 N., R. 4 E.,
Sec. 31.
Containing 415.69 acres.
Aggregating approximately 456 acres.

The decision addresses public access easements, if any, to be reserved to the United States pursuant to sec. 17(b) of ANCSA (43 U.S.C. 1616(b)), in the lands described above.

The BLM will also publish notice of the decision once a week for four consecutive weeks in the Fairbanks Daily News-Miner newspaper.

Any party claiming a property interest in the lands affected by the decision may appeal the decision in accordance with the requirements of 43 CFR part 4 within the following time limits:

1. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who fail or refuse to sign their return receipt, and parties who receive a copy of the decision by regular mail which is not certified, return receipt requested, shall have until December 18, 2024 to file an appeal.

2. Parties receiving service of the decision by certified mail shall have 30 days from the date of receipt to file an appeal.

Parties who do not file an appeal in accordance with the requirements of 43 CFR part 4 shall be deemed to have waived their rights. Notices of appeal transmitted by facsimile will not be accepted as timely filed.

Matthew A. Colburn,

Land Law Examiner, Adjudication Section.

Bureau of Land Management

[BLM_AK_FRN_MO4500181078; AA–10010]

Alaska Native Claims Selection

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of decision approving lands for conveyance.

SUMMARY: The Bureau of Land Management (BLM) hereby provides constructive notice that it will issue an appealable decision approving conveyance of the surface estate in certain lands to Calista Corporation, an Alaska Native regional corporation, pursuant to the Alaska Native Claims Settlement Act of 1971 (ANCSA), as amended. Ownership of the subsurface estate will be retained by the United States.

DATES: Any party claiming a property interest in the lands affected by the decision may appeal the decision in accordance with the requirements of 43 CFR part 4 within the time limits set out in the **SUPPLEMENTARY INFORMATION** section.

ADDRESSES: You may obtain a copy of the decision from the Bureau of Land Management, Alaska State Office, 222 West Seventh Avenue, #13, Anchorage, AK 99513–7504.

FOR FURTHER INFORMATION CONTACT: Heid C. Wanner, Supervisory Land Law Examiner, BLM Alaska State Office, 907–271–3153 or *hwanner@blm.gov*. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point of contact in the United States.

SUPPLEMENTARY INFORMATION: As required by 43 CFR 2650.7(d), notice is hereby given that the BLM will issue an appealable decision to Calista Corporation. The decision approves conveyance of the surface estate in certain lands pursuant to ANCSA (43 U.S.C. 1601, *et seq.*), as amended. Ownership of the subsurface estate will be retained by the United States.

The lands are located in the Yukon Delta National Wildlife Refuge, within T. 16 N., R. 90 W., Seward Meridian, and containing 5.66 acres.

The decision addresses public access easements, if any, to be reserved to the United States pursuant to sec. 17(b) of ANCSA (43 U.S.C. 1616(b)), in the lands approved for conveyance.

The BLM will also publish notice of the decision once a week for four consecutive weeks in The Delta Discovery, Inc, newspaper.

Any party claiming a property interest in the lands affected by the decision may appeal the decision in accordance

with the requirements of 43 CFR part 4 within the following time limits:

1. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who fail or refuse to sign their return receipt, and parties who receive a copy of the decision by regular mail which is not certified, return receipt requested, shall have until December 18, 2024 to file an appeal.

BILLING CODE 4331–10–P

DEPARTMENT OF THE INTERIOR

Office of Natural Resources Revenue

[Docket No. ONRR–2011–0021; DS63636400 DRT000000.CH7000 256D1113RT; OMB Control Number 1012–0002]

Agency Information Collection Activities: Indian Oil and Gas Valuation

AGENCY: Office of Natural Resources Revenue (''ONRR''), Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (''PRA''), ONRR is proposing to renew an information collection. Through this Information Collection Request (''ICR''), ONRR seeks renewed authority to collect information for the collection, verification, and disbursement of oil and gas royalties owed to Indian lessors. ONRR uses forms ONRR–4109, ONRR–4110, ONRR–4295, ONRR–4393, ONRR–4410, and ONRR–4411 as part of these information collection requirements.

DATES: Interested persons are invited to submit comments on or before January 17, 2025.

ADDRESSES: All comment submissions must (1) reference ''OMB Control Number 1012–0002'' in the subject line; (2) be sent to ONRR before the close of the comment period listed under **DATES**; and (3) be sent using the following method:

Electronically via the Federal eRulemaking Portal: Please visit *https://www.regulations.gov.* In the Search Box, enter the Docket ID Number for this ICR renewal (''ONRR–2011–0021'') to locate the document and click the ''Comment Now!'' button. Follow the prompts to submit your comment prior to the close of the comment period.

Docket: To access the docket folder to view the ICR **Federal Register** publications, go to *https://www.regulations.gov* and search ''ONRR–2011–0021'' to view renewal notices recently published in the **Federal Register**, publications associated with prior renewals, and applicable public comments received for this ICR. ONRR will make the comments submitted in response to this notice available for public viewing at *https://www.regulations.gov.*

OMB ICR Data: You may also view information collection review data for this ICR, including past OMB approvals, at *https://www.reginfo.gov/public/do/PRASearch.* Under the ''OMB Control Number'' heading enter ''1012–0002'' and click the ''Search'' button located at the bottom of the page. To view the ICR renewal or OMB approval status, click on the most recent entry. On the ''View ICR—OIRA Conclusion'' page, check the box next to ''All'' to display all available ICR information provided by OMB.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, please contact Matthew Coakley, Royalty Valuation, ONRR, by telephone (918) 615–5249, or by email to *Matthew.Coakley@onrr.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: Pursuant to the PRA, 44 U.S.C. 3501, *et seq.,* and 5 CFR 1320.5, all information collections, as defined in 5 CFR 1320.3, require approval by OMB. ONRR may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a currently valid OMB control number. As part of ONRR's continuing effort to reduce paperwork and respondent burdens, ONRR is inviting the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information in accordance with the PRA and 5 CFR 1320.8(d)(1). This helps ONRR to assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand ONRR's information collection requirements and provide the requested data in the desired format.

ONRR is especially interested in public comments addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of ONRR's estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. ONRR will include or summarize each comment in its request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask ONRR in your comment to withhold your personal identifying information from public review, ONRR cannot guarantee that it will be able to do so.

Abstract: (a) General Information: The Secretary of the United States Department of the Interior (''Secretary'') is responsible for mineral resource development on Federal and Indian lands and the Outer Continental Shelf. Laws pertaining to Federal and Indian mineral leases are posted at *https://onrr.gov/references/statutes.* Pursuant to the Federal Oil and Gas Royalty Management Act of 1982 (''FOGRMA'') and other laws, the Secretary's responsibilities include maintaining a comprehensive inspection, collection, and fiscal and production accounting and auditing system that: (1) accurately determines mineral royalties, interest, and other payments owed, (2) collects and accounts for such amounts in a timely manner, and (3) disburses the funds collected. *See* 30 U.S.C. 1701 and 1711. ONRR performs these royalty and revenue management responsibilities for the Secretary. *See* Secretarial Order No.

3306. The information collections that ONRR covers in this ICR are found at 30 CFR part 1202, subparts C and J, which pertain to Indian oil and gas royalties; part 1206, subparts B and E, which govern the valuation of oil and gas produced from leases on Indian lands; and part 1207, which pertains to recordkeeping. Indian Tribes and allottees receive all royalties generated from their lands. Determining product valuation is essential to ensure that Indian Tribes and allottees receive payment on the full value of the minerals removed from their lands.

(b) Information Collections: This ICR covers the paperwork requirements under 30 CFR parts 1202, 1206, and 1207 as follows:

(1) *Indian Oil*—Regulations at 30 CFR part 1206, subpart B, govern the valuation for royalty purposes of oil produced from Indian oil and gas leases (Tribal and allotted). These regulations require a lessee to file form ONRR–4110, *Oil Transportation Allowance Report,* when its oil transportation allowance includes costs incurred under non-arm's-length or no-contract transportation situations. ONRR and Tribal audit personnel use the information collected on this form to help verify that the lessee correctly reported its transportation allowance within regulatory allowance limitations and reported and paid the correct amount of royalties.

(2) *Indian Gas*—Regulations at 30 CFR part 1206, subpart E, govern the valuation for royalty purposes of natural gas produced from Indian oil and gas leases (Tribal and allotted). These regulations require reporting on ONRR forms 4109, 4295, 4410, and 4411 as follows:

(a) A lessee must file form ONRR–4109, *Gas Processing Allowance Report,* when its processing allowance includes costs incurred under non-arm's-length or no-contract processing situations. ONRR and Tribal audit personnel use the information collected on this form to verify that the lessee correctly reported its processing allowance within regulatory allowance limitations and reported and paid the correct amount of royalties.

(b) A lessee must file form ONRR–4295, *Gas Transportation Allowance Report,* when its gas transportation allowance includes costs incurred under non-arm's-length or no-contract transportation situations. ONRR and Tribal audit personnel use the information collected on this form to verify that a lessee correctly reported its transportation allowance within regulatory allowance limitations and reported and paid the correct amount of royalties.

(c) A lessee must file form ONRR–4410, *Accounting for Comparison [Dual Accounting],* to certify for an Indian oil and gas lease when dual accounting is not required (part A) or to make an election for actual dual accounting as defined in 30 CFR 1206.176 or alternative dual accounting as defined in 30 CFR 1206.173 when dual accounting is required (part B).

(d) A lessee uses form ONRR–4411, *Safety Net Report,* when it sells gas production from an Indian oil or gas lease in an ONRR-designated index zone beyond the first index pricing point. The safety net calculation establishes the minimum value, for royalty purposes, of natural gas production from Indian oil and gas leases. This reporting requirement helps ensure that Indian lessors receive all royalties due and aids ONRR compliance efforts.

(3) *Indian Oil and Gas*—Regulations at 30 CFR 1206.56(b)(2) and 1206.177(c)(2) and (c)(3) provide that a lessee must submit form ONRR–4393, *Request to Exceed Regulatory Allowance Limitation,* as part of a valid request to exceed the regulatory allowance limit of 50 percent of royalty value for transportation allowances. OMB approved the form ONRR–4393 under OMB Control Number 1012–0005, which otherwise pertains to Federal oil and gas leases. This form provides ONRR with the necessary data to make a decision on whether to approve or deny the request.

The requirement to report is mandatory for form ONRR–4410 and, under certain circumstances, form ONRR–4411. To obtain certain benefits, a lessee must file forms ONRR–4109, ONRR–4110, ONRR–4295, and ONRR–4393.

Title of Collection: Indian Oil and Gas Valuation.

OMB Control Number: 1012–0002.

Bureau Form Number: Forms ONRR–4109, ONRR–4110, ONRR–4295, ONRR–4393, ONRR–4410, and ONRR–4411.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: Businesses.

Total Estimated Number of Annual Respondents: 146 Indian lessees.

Total Estimated Number of Annual Responses: 146.

Estimated Completion Time per Response: 8.85 hours.

Total Estimated Number of Annual Burden Hours: 1,299 hours.

Respondent's Obligation: Required to Obtain or Retain a Benefit.

Frequency of Collection: Annual and on occasion.

Total Estimated Annual Non-Hour Burden Cost: ONRR identified no ''non-hour cost'' burden associated with this collection of information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the PRA (44 U.S.C. 3501, *et seq.*).

Howard M. Cantor,

Director, Office of Natural Resources Revenue.

BILLING CODE 4335–30–P

DEPARTMENT OF THE INTERIOR

Bureau of Safety and Environmental Enforcement

[EEEE500000–256E1700D2–ET1SF0000.EAQ000]

Notice of Proposed Transfer of Pipelines

AGENCY: Bureau of Safety and Environmental Enforcement, Interior.

ACTION: Notice of intent to transfer pipeline ownership and request for submissions of competing interest.

SUMMARY: The Bureau of Safety and Environmental Enforcement (BSEE) is considering whether to authorize the transfer of ownership of certain pipelines in the Gulf of Mexico (GOM).

DATES: Submissions of competing interest are due by December 18, 2024.

ADDRESSES: GOM Regional Supervisor, Regional Field Operations, Bureau of Safety and Environmental Enforcement, 1201 Elmwood Park Blvd., New Orleans, LA 70123–2394. You may also file submissions of competing interest electronically using a subject reference ''Submission of Competing Interest—Pipelines'' at *pipelines@bsee.gov.*

FOR FURTHER INFORMATION CONTACT: Otho Barnes, Bureau of Safety and Environmental Enforcement, Regional Supervisor, at (504) 736–5776, or by email to: *otho.barnes@bsee.gov.*

SUPPLEMENTARY INFORMATION:

Background: BSEE received a written request to acquire certain pipeline segments in the GOM located on rights-of-way (ROW) that have been relinquished pursuant to 30 CFR 250.1019. The associated pipeline segments were relinquished by the ROW holder on August 18, 2019. The party requesting to acquire the pipelines is not a prior ROW holder for these segments.

BSEE has determined that, pursuant to 30 CFR 250.1010(h), these Outer Continental Shelf (OCS) pipelines and any related infrastructure are the property of the United States and may be transferred to private parties. BSEE received the request from a private party seeking to acquire these pipeline segments from the United States, as set forth in the table below:

Pipeline Segments with Pending Applications for Acquisition

Previous ROW holder	Previous PSN	Previous ROW	ROW relinquishment date
Cox Operating, L.L.C	17582	ROW OCS–G 28498	08/18/2019
Cox Operating, L.L.C	20235	ROW OCS–G 28498	08/18/2019

Purpose: The Department of the Interior has determined that these pipeline segments are subject to disposition pursuant to 40 U.S.C. 701 and the General Services Administration Federal Management Regulations at 41 CFR part 102–36. BSEE is providing notice that, until December 18, 2024, it will accept submissions of competing interest for acquisition of these pipeline segments. Depending on the level of interest, BSEE will complete a transfer of ownership of the pipelines to a private party through an appropriate transfer process.

In addition to transferring the pipeline interest, a new ROW will still be required pursuant to 30 CFR part 250, subpart J prior to any use of the pipelines. The transfer of pipeline ownership from the United States to another party will make that party responsible for the pipeline, including future operations, maintenance, and all decommissioning obligations.

Purpose of a Notice of Intent (NOI)

This NOI serves to inform interested parties of BSEE's intent to transfer ownership of pipelines that are located in the previously described relinquished ROWs on the OCS, and to describe BSEE's process for accepting submissions of competing interest.

BSEE will evaluate and respond to all submissions received pursuant to this NOI. If BSEE receives future requests to reuse other pipelines, it will issue similar NOIs to notify the public and to solicit statements of competing interest.

Instructions for the NOI

Parties interested in acquiring the aforementioned pipelines should submit the information outlined in the ''Purpose'' section above to the GOM Regional Supervisor for Regional Field Operations as provided in the **ADDRESSES** section no later than December 18, 2024.

Kathryn Kovacs,

Deputy Assistant Secretary for Land and Minerals Management Exercising the Delegated Authorities of the Director, Bureau of Safety and Environmental Enforcement.

Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. You may also view the ICR at *http://www.reginfo.gov/public/do/PRAMain.*

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995 (PRA; 44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on August 28, 2024 (89 FR 68928). No comments were received.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other Federal agencies on the proposed ICR that is described below. We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of

information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: 30 CFR 874.16 requires that every successful bidder for an AML contract must be eligible under 30 CFR 773.15(b)(1) at the time of contract award to receive a permit or conditional permit to conduct surface coal mining operations. Further, the regulation requires the eligibility to be confirmed by OSMRE's automated Applicant/Violator System (AVS) and the contractor must be eligible under the regulations implementing Section 510(c) of the Surface Mining Control and Reclamation Act to receive permits to conduct mining operations. This form provides a tool for OSMRE and the States/Indian tribes to help them prevent persons with outstanding violations from conducting further mining or AML reclamation activities in the State.

Title of Collection: Contractor Eligibility and the Abandoned Mine Land Contractor Information Form.

OMB Control Number: 1029–0119.

Form Number: None.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: Businesses and State governments.

Total Estimated Number of Annual Respondents: 243.

Total Estimated Number of Annual Responses: 243.

Estimated Completion Time per Response: Varies from 15 minutes to 1 hour, depending on activity.

Total Estimated Number of Annual Burden Hours: 125.

Respondent's Obligation: Required to obtain or retain a benefit.

Frequency of Collection: One Time.

Total Estimated Annual Nonhour Burden Cost: $0.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Mark J. Gehlhar,

Information Collection Clearance Officer, Office of Surface Mining Reclamation and Enforcement.

BILLING CODE 4310–05–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–694 and 731–TA–1641–1642 (Final)]

Aluminum Lithographic Printing Plates From China and Japan: Determinations

On the basis of the record [1] developed in the subject investigations, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that an industry in the United States is materially injured by reason of imports of aluminum lithographic printing plates (''ALPs'') from China and Japan, provided for in subheading 3701.30.00 of the Harmonized Tariff Schedule of the United States, that have been found by the U.S. Department of Commerce (''Commerce'') to be sold in the United States at less than fair value (''LTFV''), and subsidized by the government of China.[2] [3] [4]

Background

The Commission instituted these investigations effective September 28, 2023, following receipt of petitions filed with the Commission and Commerce by Eastman Kodak Company, Rochester, New York. The final phase of the investigations was scheduled by the Commission following notification of preliminary determinations by Commerce that imports of ALPs from China were subsidized within the meaning of section 703(b) of the Act (19 U.S.C. 1671b(b)) and imports of ALPs from China and Japan were sold at LTFV within the meaning of section 733(b) of the Act (19 U.S.C. 1673b(b)). Notice of the scheduling of the final phase of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** on May 14, 2024 (89 FR 41993).[5] The Commission conducted its hearing on September 17, 2024. All persons who requested the opportunity were permitted to participate.

The Commission made these determinations pursuant to sections 705(b) and 735(b) of the Act (19 U.S.C. 1671d(b) and 19 U.S.C. 1673d(b)). It completed and filed its determinations in these investigations on November 12, 2024. The views of the Commission are contained in USITC Publication 5559 (November 2024), entitled *Aluminum Lithographic Printing Plates from China and Japan: Investigation Nos. 701–TA–694 and 731–TA–1641–1642 (Final).*

By order of the Commission.

Issued: November 12, 2024.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2024–26740 Filed 11–15–24; 8:45 am]

BILLING CODE 7020–02–P

[1] The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

[2] 89 FR 79256, 89 FR 79250, and 89 FR 79248 (September 27, 2024).

[3] Commissioner David S. Johanson dissenting.

[4] The Commission also finds that imports subject to Commerce's affirmative critical circumstances determinations are not likely to undermine seriously the remedial effect of the antidumping and countervailing duty orders on ALPs from China.

[5] A revision to the final phase schedule was published in the **Federal Register** on August 13, 2024 (89 FR 65933).

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1423]

Certain Electronic Eyewear Products, Components Thereof, and Related Charging Apparatuses; Institution of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on October 10, 2024, under section 337 of the Tariff Act of 1930, as amended, on behalf of Igeniospec, LLC of San Jose, California. The complaint alleges violations of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of

certain electronic eyewear products, components thereof, and related charging apparatuses by reason of the infringement of certain claims of U.S. Patent No. 10,310,296 (''the '296 patent''); U.S. Patent No. 11,762,224 (''the '224 patent''); and U.S. Patent No. 12,078,870 (''the '870 patent''). The complaint further alleges that an industry in the United States exists or is in the process of being established as required by the applicable Federal Statute. The complainant requests that the Commission institute an investigation and, after the investigation, issue a limited exclusion order and cease and desist orders.

ADDRESSES: The complaint, except for any confidential information contained therein, may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at (202) 205–2000. General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov*.

FOR FURTHER INFORMATION CONTACT: Susan Orndoff, The Office of Docket Services, U.S. International Trade Commission, telephone (202) 205–1802.

SUPPLEMENTARY INFORMATION:

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, and in section 210.10 of the Commission's Rules of Practice and Procedure, 19 CFR 210.10 (2024).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on November 12, 2024, *ordered that*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain products identified in paragraph (2) by reason of infringement of one or more of claims 1–15, 17, 18, 20, 21, 23–25, 28–35, and 37 of the '296 patent; claims 27–48 of the '224 patent; and claims 36, 43–53, 55–67, and 69–72 of the '870 patent, and whether an industry in the United States exists or is in the process of being established as required by subsection (a)(2) of section 337;

(2) Pursuant to section 210.10(b)(1) of the Commission's Rules of Practice and Procedure, 19 CFR 210.10(b)(1), the plain language description of the accused products or category of accused products, which defines the scope of the investigation, is ''eyewear products containing electronic components in the frames and/or lenses, associated components, and related charging apparatuses'';

(3) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is:

INGENIOSPEC, LLC, 4010 Moorpark Avenue, Suite 211, San Jose, CA 95129

(b) The respondents are the following entities alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

ByteDance, Ltd., Xueyan S Rd., Shuangyushu, Haidian District, Beijing China 100080

ByteDance Inc., 251 Little Falls Drive, Wilmington, Delaware 19808

Qingdao Chuangjian Weilai Technology Co., Ltd., Room 401, 4th Floor, Building 3, Qingdao Research Institute, 393 Songling Road, Laoshan District, Qingdao City, Shangdong Province, P.R. China

Funnico Inc., 1199 Coleman Avenue, San Jose, California 95110

PICO Immersive Pte. Ltd., 1 Raffles Quay, #26–10, Singapore 048583

HTC Corporation, No. 23, Xinghua Rd., Taoyuan Dist., Taoyuan City 330, Taiwan

HTC Europe Co Ltd., Wellington St., Slough, Berkshire, SL1 1YP, UK

HTC Poland SP Z O.O., Aleje Jerozolimskie 146A, 00–001, Warszawa, Poland

Meta Platforms, Inc., 1 Meta Way, Menlo Park, CA 94025

Meta Platforms Technologies, LLC, 1 Hacker Way, Menlo Park, CA 94025

Meta Platforms Technologies Ireland Ltd., Merrion Road, Dublin 4, D04 X2K5, Ireland

Meta Platforms Technologies UK Ltd., 10 Brock Street, Regent's Place, London NQ1, 33FG, United Kingdom

Valve Corporation, 10400 NE 4th Street Suite 1400, Bellevue, WA 98004

Valve GmbH Corporation, Rodingsmarkt 9 D–20459, Hamburg Germany

(4) For the investigation so instituted, the Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding Administrative Law Judge.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with section 210.13 of the Commission's Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(e) and 210.13(a), as amended in 85 FR 15798 (March 19, 2020), such responses will be considered by the Commission if received not later than 20 days after the date of service by the complainant of the complaint and the notice of investigation. Extensions of time for submitting responses to the complaint and the notice of investigation will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter an initial determination and a final determination containing such findings, and may result in the issuance of an exclusion order or a cease and desist order or both directed against the respondent.

By order of the Commission.

Issued: November 13, 2024.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2024–26806 Filed 11–15–24; 8:45 am]

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

Notice of Receipt of Complaint; Solicitation of Comments Relating to the Public Interest

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has received a complaint entitled ''Certain Components for Injection Molding Machines, and Products Containing the Same, DN 3782''; the Commission is soliciting comments on any public interest issues raised by the complaint or complainant's filing pursuant to the Commission's Rules of Practice and Procedure.

FOR FURTHER INFORMATION CONTACT: Lisa R. Barton, Secretary to the Commission,

U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–2000. The public version of the complaint can be accessed on the Commission's Electronic Document Information System (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.*

General information concerning the Commission may also be obtained by accessing its internet server at United States International Trade Commission (USITC) at *https://www.usitc.gov* . The public record for this investigation may be viewed on the Commission's Electronic Document Information System (EDIS) at *https://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission has received a complaint and a submission pursuant to § 210.8(b) of the Commission's Rules of Practice and Procedure filed on behalf of Husky Injection Molding Systems LTD, and Husky Injection Molding Systems, Inc. on November 12, 2024. The complaint alleges violations of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain components for injection molding machines, and products containing the same. The complaint names as respondents: NINGBO AO SHENG MOLD CO., LTD., d/b/a AOSIMI of China. The complainant requests that the Commission issue a limited exclusion order, cease and desist orders, and impose a bond upon respondents' alleged infringing articles during the 60-day Presidential review period pursuant to 19 U.S.C. 1337(j).

Proposed respondents, other interested parties, members of the public, and interested government agencies are invited to file comments on any public interest issues raised by the complaint or § 210.8(b) filing. Comments should address whether issuance of the relief specifically requested by the complainant in this investigation would affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

(i) explain how the articles potentially subject to the requested remedial orders are used in the United States;

(ii) identify any public health, safety, or welfare concerns in the United States relating to the requested remedial orders;

(iii) identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;

(iv) indicate whether complainant, complainant's licensees, and/or third party suppliers have the capacity to replace the volume of articles potentially subject to the requested exclusion order and/or a cease and desist order within a commercially reasonable time; and

(v) explain how the requested remedial orders would impact United States consumers.

Written submissions on the public interest must be filed no later than by close of business, eight calendar days after the date of publication of this notice in the **Federal Register**. There will be further opportunities for comment on the public interest after the issuance of any final initial determination in this investigation. Any written submissions on other issues must also be filed by no later than the close of business, eight calendar days after publication of this notice in the **Federal Register**. Complainant may file replies to any written submissions no later than three calendar days after the date on which any initial submissions were due, notwithstanding § 201.14(a) of the Commission's Rules of Practice and Procedure. No other submissions will be accepted, unless requested by the Commission. Any submissions and replies filed in response to this Notice are limited to five (5) pages in length, inclusive of attachments.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above. Submissions should refer to the docket number (''Docket No. 3782'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, Electronic Filing Procedures [1]). Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov.*) No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice. Persons with questions regarding filing should contact the Secretary at *EDIS3Help@usitc.gov.*

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. appendix 3; or (ii) by U.S. Government employees and contract personnel,[2] solely for cybersecurity purposes. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.[3]

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and of §§ 201.10 and 210.8(c) of the Commission's Rules of Practice and Procedure (19 CFR 201.10, 210.8(c)).

By order of the Commission.

Issued: November 12, 2024.

Lisa Barton,

Secretary to the Commission.

DEPARTMENT OF JUSTICE

[OMB 1140–0022]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Federal Explosives License/Permit Renewal Application—ATF Form 5400.14/5400.15

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 30 days until December 18, 2024.

FOR FURTHER INFORMATION CONTACT: If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact: Shawn Stevens, Federal Explosives Licensing Center, 244 Needy Road, Martinsburg WV 25405, by email at *FELC@atf.gov* or *shawn.stevens@atf.gov,* or telephone at 304–616–4400.

SUPPLEMENTARY INFORMATION: The proposed information collection was previously published in the **Federal Register**, 89 FR 75580, on Monday, September 16, 2024, allowing a 60-day comment period. Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Enhance the quality, utility, and clarity of the information to be collected; and/or

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Written comments and recommendations for this information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the information collection or the OMB Control Number 1140–0022. This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view Department of Justice, information collections currently under review by OMB.

DOJ seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOJ notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of a previously approved collection.

2. *Title of the Form/Collection:* Federal Explosives License/Permit Renewal Application.

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* ATF Form 5400.14/5400.15.

Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* Affected Public: Individuals or households, Private Sector-for or not for profit institutions.

Abstract: Chapter 40 of title 18 of the United States Code (U.S.C.) provides that no person may engage in the explosives business without first obtaining a license or permit to do so. Licenses or permits are issued for a specific period and are renewable upon the same conditions as the original license or permit. In order to continue uninterrupted in these activities, licenses and permits can be renewed by filing a short renewal application.

5. *Obligation to Respond:* Mandatory. The statutory requirements are implemented in 18 U.S.C. 843(a).

6. *Total Estimated Number of Respondents:* 2,500 respondents.

7. *Estimated Time per Respondent:* 20 minutes.

8. *Frequency:* Once annually.

9. *Total Estimated Annual Time Burden*: 825 hours.

10. *Total Estimated Annual Other Costs Burden:* $1,825.

If additional information is required, contact: Darwin Arceo, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 4W–218 Washington, DC 20530.

Dated: November 13, 2024.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

Agency Information Collection Activities; Proposed eCollection eComments Requested; Demand 2 Program: Report of Firearms Transactions—ATF Form 5300.5

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 30 days until December 18, 2024.

FOR FURTHER INFORMATION CONTACT: If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact: Matthew S. Grim, National Tracing Center Division (NTCD)/Tracing Operations Records Management Branch (TORM), 244 Needy Road, Martinsburg, WV 25405, by email at *Matthew.grim@atf.gov,* or telephone at 304–260–3683.

SUPPLEMENTARY INFORMATION: The proposed information collection was previously published in the **Federal Register**, 89 FR 75581, on Monday, September 16, 2024, allowing a 60-day

comment period. Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
—Enhance the quality, utility, and clarity of the information to be collected; and/or
—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Written comments and recommendations for this information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the information collection or the OMB Control Number 1140–0024. This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view Department of Justice, information collections currently under review by OMB.

DOJ seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOJ notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Overview of This Information Collection

1. *Type of Information Collection:* Revision of a previously approved collection.

2. *Title of the Form/Collection:* Demand 2 Program: Report of Firearms Transactions.

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* ATF Form 5300.5.

Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* Affected Public: Private Sector-for or not for profit institutions.

Abstract: The Demand 2 Program requires Federal Firearm Licensee's (FFL's) with 25 or more traces with a time to crime of 3 years or less in a calendar year, to submit an annual report followed by quarterly reports of used firearms acquired by the FFL. Due to the increase in Type 07 FFLs meeting Demand 2 criteria and their low or non-existent manufacturing activity, as well as the likelihood that some may turn to a Type 08 license to deal and avoid reporting requirement if Type 08 is not subjected to Demand 2, (IC) OMB # 1140–0024 is being revised to now include Type 07 and 08 FFLs as a population that is subject to the reporting requirements of the Demand 2 program.

5. *Obligation to Respond:* Mandatory under authority 18 U.S.C. 923(g), in the form and manner specified in 27 CFR 478.126(a).

6. *Total Estimated Number of Respondents:* 1,453 respondents.

7. *Estimated Time per Respondent:* 30 minutes.

8. *Frequency:* 4 times annually.

9. *Total Estimated Annual Time Burden:* 2,906 hours.

10. *Total Estimated Annual Other Costs Burden:* $424.00.

If additional information is required, contact: Darwin Arceo, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC 20530.

Dated: November 13, 2024.

DEPARTMENT OF JUSTICE

[OMB 1140–0067]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Licensed Firearms Manufacturers Records of Production, Disposition and Supporting Data

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 30 days until December 18, 2024.

FOR FURTHER INFORMATION CONTACT: If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact: Dawn Smith, Firearms Industry Programs Branch (FIPB), 244 Needy Road, Martinsburg, WV, by email at *fipb-informationcollection@atf.gov* or *dawn.smith@atf.gov,* or telephone at 304–267–1994.

SUPPLEMENTARY INFORMATION: The proposed information collection was previously published in the **Federal Register**, 89 FR 75585, on Monday, September 16, 2024, allowing a 60-day comment period. Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
—Enhance the quality, utility, and clarity of the information to be collected; and/or
—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Written comments and recommendations for this information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information

collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the information collection or the OMB Control Number 1140–0067. This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view Department of Justice, information collections currently under review by OMB.

DOJ seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOJ notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of a previously approved collection.

2. *Title of the Form/Collection:* Licensed Firearms Manufacturers Records of Production, Disposition and Supporting Data.

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* None.

Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* Affected Public: Private Sector-for or not for profit institutions.

Abstract: Firearms manufacturers record is a permanent record of firearms manufactured and records of their disposition. These records are vital to support ATF's mission to inquire into the disposition any firearm in the course of a criminal investigation.

5. *Obligation to Respond:* The obligation to respond is mandatory under authority 18 U.S.C. 923(g)(1)(A).

6. *Total Estimated Number of Respondents:* 16,227 respondents.

7. *Estimated Time per Respondent:* 1 minute.

8. *Frequency:* As needed.

9. *Total Estimated Annual Time Burden:* 179,058.

10. *Total Estimated Annual Other Costs Burden:* $0.

If additional information is required, contact: Darwin Arceo, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 4W–218 Washington, DC 20530.

Dated: November 13, 2024.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

[FR Doc. 2024–26791 Filed 11–15–24; 8:45 am]

BILLING CODE 4410–FY–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Greenbrier Minerals, LLC.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before December 18, 2024.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2024–0074 by any of the following methods:

1. *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments for MSHA–2024–0074.

2. *Fax:* 202–693–9441.

3. *Email: petitioncomments@dol.gov.*

4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk, 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–049–C.

Petitioner: Greenbrier Minerals, LLC, 119 Rich Creek Road, Lyburn, WV 25632.

Mines: Powellton #1 Mine, MSHA ID No. 46–09217, located in Logan County, West Virginia; Lower War Eagle, MSHA ID No. 46–09319, located in Wyoming County, West Virginia; Muddy Bridge, Mine ID No. 46–09514, located in Logan County, West Virginia; Eagle No.1 Mine, Mine ID No. 46–09563, located in Logan County, West Virginia.

Regulation Affected: 30 CFR 75.1002(a), Permissible electric equipment.

Modification Request: The petitioner requests a modification of 30 CFR 75.1002(a) to allow the use of an alternative method of respirable dust protection. Specifically, the petitioner is requesting to use a battery powered respirable protection unit called the 3M Versaflo TR–800 powered air-purifying respirator (PAPR) in addition to the CleanSpace EX PAPR within 150 feet of pillar workings and longwall faces.

The petitioner states that:

(a) The petitioner is requesting to utilize the 3M Versaflo TR–800 PAPR in addition to the utilization of the CleanSpace EX PAPR, which was approved through a previous Proposed Decision and Order (PDO) granted by MSHA (MSHA Docket Number M–2022–040–C). It should be noted that North Fork Winifrede Deep Mine, Mine ID No. 46–09583 was included in the original petition but has been abandoned and will be omitted in the amended petition.

(b) The 3M Airstream helmet has been used in mines for over 40 years. 3M has recently faced component disruptions for the Airstream product. This has

caused 3M to discontinue, globally, the Airstream on June 1, 2020. The ability to order an Airstream system and components ended in February 2020, and components were available through June 2020. Currently, there are not any available replacement PAPRs that meet the MSHA standard for permissibility. PAPRs provide a constant flow of filtered air, which offers respiratory protection and comfort in hot working environments. Operators that were using the Airstream, do not have an alternative to provide to this type of protection to its miners.

(c) Greenbrier Minerals, LLC, is seeking alternatives to the 3M Airstream helmet to provide miners with respirable protection against respirable coal mine and silica dust, a protection that can provide long-term health benefits.

(d) Both the CleanSpace EX and 3M Versaflo TR–800 PAPRs provide a constant flow of filtered air inside the half-mask, full mask or helmet. The airflow provides respiratory protection and comfort in hot working conditions. Both PAPRs will be equipped with the following: Particulate protection classified as 100 series under 42 CFR part 84; or Particulate protection classified as High Efficiency ''HE'' under 42 CFR part 84.

(e) Greenbrier Minerals LLC is seeking to continue the use of the CleanSpace EX PAPR and applying to utilize the 3M Versaflo TR–800 PAPR within 150 feet of pillar workings and longwall faces at the aforementioned mines.

(f) CleanSpace EX.

(1) The CleanSpace EX is certified by TestSafe Australia (TSA) according to the IEC 60079–0:2011 (General Requirements) and IEC 60079–11:2011 (Intrinsic Safety) standards. The certificate, issued to PAFtec Australia Pty Ltd (''PAFtec''), allows PAFtec to mark the device as ''Ex ib IIB T4 Gb'' and ''Ex ia I Ma.'' Due to legal and regulatory constraints, the TSA certificate is not accepted by MSHA as evidence that the PAPR is approved for use in US mines. The IEC certification marking that applies to mining, Ex ia I Ma, is discussed below:

(2) The CleanSpace EX is certified to be used in hazardous locations (''Ex''); meets the most onerous level of intrinsic safety protection (''ia''); the level of protection is acceptable for use in mining locations (''I''), and the Equipment Protection Level appropriate for mining equipment, that has a ''very high'' level of protection, with sufficient security that it is unlikely to become an ignition source in normal operation, during expected malfunctions or during rare malfunctions, even when left energized in the presence of an outbreak of gas (''Ma'').

(3) NIOSH researchers, in a paper titled ''An Evaluation of the Relative Safety of U.S. Mining Explosion-Protected Equipment Approval Requirements versus those of International Standards'', have determined that equipment, which meets two-fault intrinsic safety as defined in the ANSI/UL 60079 standard would provide at least an equivalent level of safety as that provided by equipment approved under MSHA criteria.

(4) The UL certification, TSA certification and PAFtec listing material (drawings, certificate and text report) were found to support the conclusion that the CleanSpace EX meet the applicable ''two fault'' intrinsic safety requirements for mining equipment as found in the ANSI/UL standard.

(5) The CleanSpace EX carries an ingress protection rating of IP66. This rating exceeds the minimum rating of IP54 required by the ANSI/UL and IEC standards for intrinsically safe mining equipment.

(6) This product is not MSHA approved, and the manufacturer is not pursuing approval. The standards for the approval of this respirator are an accepted alternative to MSHA's standards and provide the same level of protection.

(g) 3M Versaflo TR–800.

(1) The 3M Versaflo TR–800 PAPR with motor/blower and battery qualifies as intrinsically safe, based on reports by the International Electrotechnical Commission Systems for Certification to Standards Relating to Equipment for Use in Explosive Atmospheres (IECEx). The blower is UL-certified with an intrinsically safe rating of Division 1: Class I, II, III; Division 1: Groups C, D, E, F, G; T4 under the current standard of UL 60079; ATEX-certified with a rating of ''ia''. The 3M Versaflo TR–800 is rated and marked Ex ia I MA, Ex ia IIB T4 Ga, Ex ia IIIC 135oC Da; 120 °C ≤ TA ≤ +55 °C.

(2) The 3M Versaflo TR–800 carries an ingress protection rating of IP64. This rating exceeds the minimum rating of IP54 required by the ANSI/UL and IEC standards for intrinsically safe mining equipment.

(3) This product is not MSHA approved, and the manufacturer is not pursuing approval. The standards for the approval of this respirator are an accepted alternative to MSHA's standards and provide the same level of protection.

(h) The alternative method will guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

The petitioner proposes the following alternative method:

(a) Affected mine employees shall be trained in the proper use and maintenance of the PAPR(s) to be used at the mine, the 3M Versaflo TR–800 and/or the CleanSpace EX, in accordance with established manufacturer guidelines. This training shall alert the affected employee that neither the 3M Versaflo TR–800 nor the CleanSpace EX PAPR is approved under 30 CFR part 18 and therefore shall be de-energized when 1.0 or more percent methane is detected. The training shall also include the proper method to de-energize these PAPRs. In addition to manufacturer guidelines, MSHA shall require that mine employees be trained to inspect the units before use to determine if there is any damage to the units that would negatively impact intrinsic safety as well as all stipulations in the PDO granted by MSHA.

(b) The PAPRs, battery packs, and all associated wiring and connections shall be inspected before use to determine if there is any damage to the units that would negatively impact intrinsic safety. If any defects are found, the PAPR shall be removed from service.

(c) The operator shall maintain a separate logbook for the 3M Versaflo TR–800 and CleanSpace EX PAPRs that shall be kept with the equipment, or in a location with other mine record books and shall be made available to MSHA upon request. The equipment shall be examined at least weekly by a qualified person as defined in 30 CFR 75.512–1 and the examination results recorded in the logbook. Since float coal dust is removed by the air filter prior to reaching the motor, the PAPR user shall conduct regular examinations of the filter and perform periodic testing for proper operation of the ''high filter load alarm'' on the 3M Versaflo TR–800 PAPR, and the ''blocked filter'' alarm on the CleanSpace EX PAPR. Examination entries may be expunged after one year.

(d) All 3M Versaflo TR–800 and CleanSpace EX PAPRs to be used within 150 feet of pillar workings or longwall faces shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment prior to taking the equipment underground to ensure the equipment is used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The

examinations for the 3M Versaflo TR–800 PAPRs shall include:

(1) Check the equipment for any physical damage and the integrity of the case;

(2) Remove the battery and inspect for corrosion;

(3) Inspect the contact points to ensure a secure connection to the battery;

(4) Reinsert the battery and power up and shut down to ensure proper connections;

(5) Check the battery compartment cover or battery attachment to ensure that it is securely fastened; and

(6) For equipment utilizing lithium type cells, ensure that lithium cells and/or packs are not damaged or swelled in size.

(e) All CleanSpace EX PAPRs to be used within 150 feet of pillar workings or longwall faces shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment prior to taking the equipment underground to ensure the equipment is used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The CleanSpace EX PAPR does not have an accessible/removable battery. The internal battery and motor/blower assembly are both contained within the ''power unit'' assembly and the battery cannot be removed, reinserted or fastened. Therefore, examination of the CleanSpace EX PAPR should include any indications of physical damage.

(f) The operator shall ensure that all 3M Versaflo TR–800 and CleanSpace EX PAPR units are serviced according to the manufacturer's recommendations. Dates of service shall be recorded in the equipment's logbook and shall include a description of the work performed.

(g) The 3M Versaflo TR–800 and CleanSpace EX PAPR units that will be used within 150 feet of pillar workings or longwall faces shall not be put into service until MSHA has initially inspected the equipment and determined that it is in compliance with all the terms and conditions of the PDO granted by MSHA.

(h) Prior to energizing the 3M Versaflo TR–800 or the CleanSpace EX PAPR within 150 feet of pillar workings or longwall faces, methane tests shall be made in accordance with 30 CFR 75.323(a).

(i) All hand-held methane detectors shall be MSHA-approved and maintained in permissible and proper operating condition as defined by 30 CFR 75.320. All methane detectors shall provide visual and audible warnings when methane is detected in concentrations at or above 1.0 percent.

(j) A qualified person as defined in 30 CFR 75.151 shall continuously monitor for methane immediately before and during the use of the 3M Versaflo TR–800 or CleanSpace EX PAPR within 150 feet of pillar workings or longwall faces.

(k) Neither the 3M Versaflo TR–800 nor the CleanSpace EX PAPR shall be used if methane is detected in concentrations at or above 1.0 percent. When 1.0 percent or more methane is detected while the 3M Versaflo TR–800 or CleanSpace EX PAPR is being used, the equipment shall be de-energized immediately and the equipment withdrawn outby the last open crosscut.

(l) The operation and location of the 3M Versaflo TR–800 and CleanSpace EX PAPRs during underground blasting operations shall be defined in accordance with 30 CFR 75.1312(e)(1), 30 CFR 75.1313(b)(1), and individualized underground blasting permits approved by the District Manager.

(m) Only the 3M TR–830 Battery Pack shall be used, which meets lithium battery safety standard UL 1642 or IEC 62133, in the 3M Versaflo TR–800 PAPR. Use only the CleanSpace EX Power Unit, which meets lithium battery safety standard UL 1642 or IEC 62133, in the CleanSpace EX PAPR.

(n) Before each shift when the 3M Versaflo TR–800 or CleanSpace EX PAPR is to be used, all batteries and power units for the equipment shall be charged sufficiently for the expected usage on that shift. If spare battery packs for the 3M Versaflo TR–800 PAPR are provided, all battery ''change outs'' shall occur in intake air outby the last open crosscut.

(o) The following maintenance and use conditions shall apply to equipment containing lithium-type batteries:

(1) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX Power Unit may be disassembled nor modified by anyone other than permitted by the manufacturer of the equipment.

(2) The 3M TR–830 Battery Pack shall be charged only in an area free of combustible material, readily monitored and located on the surface of the mine. The 3M TR–830 Battery Pack shall be charged only by a manufacturer's recommended battery charger, such as:

(i) 3M Battery Charger Kit TR–641N, which includes one 3M Charger Cradle TR–640 and one 3M Power Supply TR–941N, or

(ii) 3M 4-Station Battery Charger Kit TR–644N, which includes four 3M Charger Cradles TR–640 and one 3M 4-Station Battery Charger Base/Power Supply TR–944N.

(3) The CleanSpace EX internal battery, which is contained within the power unit assembly, shall be charged in areas located outby the last open crosscut in intake air as per 30 CFR 75.340, or in an area free of combustible material, readily monitored and located on the surface of the mine, and only the manufacturer's recommended battery chargers may be used, such as the CleanSpace EX Battery Charger, Product Code PAF–0066.

(4) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX power unit which contains the internal battery, shall be exposed to water, allowed to get wet or immersed in liquid. This does not preclude incidental exposure of the 3M TR–830 Battery Pack or the CleanSpace EX power unit assembly.

(5) Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR, including the internal battery, shall be used, charged or stored in locations where the manufacturer's recommended temperature limits are exceeded. Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR shall be placed in direct sunlight nor stored near a source of heat.

(6) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX PAPR's internal battery shall be used at the end of its life cycle (*i.e.,* when there is a performance decrease of greater than 20 percent in battery-operated equipment). The 3M TR–830 Battery Pack and the CleanSpace EX power unit containing the internal battery shall be disposed of properly.

(p) Personnel engaged in the use of the 3M Versaflo TR–800 and CleanSpace EX PAPRs shall be properly trained to recognize the hazards and limitations associated with the use of the equipment in areas where methane could be present. Additionally, personnel shall be trained regarding proper procedures for donning self-contained self rescuers (SCSRs) during a mine emergency while wearing the 3M Versaflo TR–800 or CleanSpace EX PAPR. The mine operator shall submit proposed revisions to update the Mine Emergency Evacuation and Firefighting Program of Instruction under 30 CFR 75.1502.

(q) Within 60 days after the PDO granted by MSHA becomes final, the operator shall submit proposed revisions for its approved 30 CFR part 48 training plans to the Mine Safety and Health Enforcement District Manager. These proposed revisions shall specify initial and refresher training regarding the terms and conditions stated in the PDO granted by MSHA. When training

is conducted on the terms and conditions in the PDO granted by MSHA, an MSHA Certificate of Training (Form 5000–23) shall be completed. Comments shall be included on the Certificate of Training indicating that the training received was for use of the 3M Versaflo TR–800 or the CleanSpace EX PAPR.

(r) All personnel who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs shall receive training in accordance with 30 CFR 48.7 on the requirements of the PDO granted by MSHA within 60 days of the date the PDO granted by MSHA becomes final. Such training shall be completed before any 3M Versaflo TR–800 or CleanSpace EX PAPR can be used within 150 feet of pillar workings or longwall faces. The operator shall keep a record of such training and provide such record to MSHA upon request.

(s) The operator shall provide annual retraining to all personnel who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs in accordance with 30 CFR 48.8. The operator shall train new miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.5, and shall train experienced miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.6. The operator shall keep a record of such training and provide such record to MSHA upon request.

(t) The operator shall post the PDO granted by MSHA in unobstructed locations on the bulletin boards and/or in other conspicuous places where notices to miners are ordinarily posted, for a period of not less than 60 consecutive days.

(u) There are no representatives of miners at Greenbrier Minerals LLC, Powellton #1 Mine, Lower War Eagle, Muddy Bridge, or Eagle No. 1 Mine. A copy of this petition has been posted on the bulletin board as of September 12, 2024.

The petitioner asserts that the alternative method will guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4520–43–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Panther Creek Mining, LLC.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before December 18, 2024.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2024–0069 by any of the following methods:

1. *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments for MSHA–2024–0069.
2. *Fax:* 202–693–9441.
3. *Email: petitioncomments@dol.gov.*
4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk, 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or
2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–046–C.

Petitioner: Panther Creek Mining, LLC, PO Box 99 Dawes, WV 25054.

Mine: Speed Mine, MSHA ID No. 46–05437, located in Kanawha County, West Virginia, and Winchester 2 Mine, MSHA ID No. 46–09615, located in Kanawha County, West Virginia.

Regulation Affected: 30 CFR 75.1002(a), Permissible electric equipment.

Modification Request: The petitioner requests a modification of 30 CFR 75.1002(a) to allow the use of unapproved Powered Air Purifying Respirators (PAPRs) within 150 feet of pillar workings or longwall faces. Specifically, the petitioner is requesting to utilize the CleanSpace EX PAPR and sealed motor/blower/battery power pack assembly, and the 3M Versaflo TR–800 Intrinsically Safe PAPR motor/blower and battery with battery pack.

The petitioner states that:

(a) The 3M Versaflo TR–800 PAPR with motor/blower and battery qualifies as intrinsically safe.

(b) The CleanSpace EX PAPR also qualifies as intrinsically safe.

(c) Both the CleanSpace EX and the 3M Versaflo TR–800 PAPRs provide a constant flow of air inside the mask or helmet. This airflow provides respiratory protection and comfort in hot working conditions.

(d) Neither the 3M Versaflo TR–800 nor the CleanSpace EX PAPR is MSHA-approved as permissible.

(e) Neither the 3M nor the CleanSpace is pursuing MSHA approval.

(f) Speed Mine and Winchester 2 Mine currently make available to all miners NIOSH-approved high efficiency l00 series respirators to protect the miners against potential exposure to respirable coal mine dust, including crystalline silica, during normal mining conditions. Speed Mine and Winchester 2 Mine desire to expand the miners' option in choosing a respirator that provides the greatest degree of protection as well as comfort while being worn. Powered PAPRs provide a constant flow of filtered air and serve that purpose.

(g) On June 17, 2024, a final rule entitled *Lowering Miners' Exposure to Respirable Crystalline Silica and Improving Respiratory Protection* took effect. The rule requires the mine operator to have a written respiratory protection program in place when miners are required to use respirators. Adding the CleanSpace EX and the 3M TR–800 Versaflo PAPRs to the respiratory protection program as additional options will provide the miners with alternatives to the series 100 high efficiency respirators already in use at the mine. The PAPRs will also serve as a respirator option to protect the miners with facial hair who may not be able to pass the ''fit test'' requirement of the program. In addition, the positive flow of filtered air provided by the PAPRs will provide a solution for the miners who are unable to wear a tight-fitting respirator.

(h) Since the 3M Airstream Headgear-Mounted PAPR System has been discontinued by the manufacturer, there are no other MSHA-approved units available that can be used within 150 feet of pillar workings or longwall faces.

(i) The alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

The petitioner proposes the following alternative method:

(a) All miners who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs shall receive training in accordance with 30 CFR 48.7 on the requirements of the Proposed Decision and Order (PDO) granted by MSHA and manufacturer guidelines. Such training shall be completed before any 3M Versaflo TR–800 or CleanSpace EX PAPR can be used within 150 feet of pillar workings or longwall faces. The operator shall keep a record of such training and provide such record to MSHA upon request.

(b) The PAPRs, battery packs, and all associated wiring and connections shall be inspected before use to determine if there is any damage to the units that would negatively impact intrinsic safety. If any defects are found, the PAPR shall be removed from service.

(c) A separate logbook shall be maintained for the 3M Versaflo TR–800 and CleanSpace EX PAPRs that will be kept with the equipment, or in a location with other mine record books and shall be made available to MSHA upon request. The equipment shall be examined at least weekly by a qualified person as defined in 30 CFR 75.512–1 and the examination results recorded in the logbook. Examination records shall be maintained for one year.

(d) All 3M Versaflo TR–800 and CleanSpace EX PAPRs to be used within 150 feet of pillar workings or longwall faces shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment prior to taking the equipment underground to ensure the equipment is used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The examinations for the 3M Versaflo TR–800 PAPRs shall include:

(1) Check the equipment for any physical damage and the integrity of the case;

(2) Remove the battery and inspect for corrosion;

(3) Inspect the contact points to ensure a secure connection to the battery;

(4) Reinsert the battery and power up and shut down to ensure proper connections;

(5) Check the battery compartment cover or battery attachment to ensure that it is securely fastened; and

(6) For equipment utilizing lithium type cells, ensure that lithium cells and/or packs are not damaged or swelled in size.

The CleanSpace EX PAPR does not have an accessible/removable battery. The internal battery and motor/blower assembly are both contained within the ''power unit'' assembly and the battery cannot be removed, reinserted or fastened. Therefore, examination of the CleanSpace EX PAPR shall include any indications of physical damage.

(e) All 3M Versaflo TR–800 and CleanSpace EX PAPR units shall be serviced according to the manufacturer's recommendations.

(f) Prior to energizing and during use of the 3M Versaflo TR–800 or the CleanSpace EX PAPR within 150 feet of pillar workings or longwall faces, procedures in accordance with 30 CFR 75.323 shall be followed.

(g) Only the 3M TR–830 Battery Pack, which meets lithium battery safety standard UL 1642 or IEC 62133, in the 3M Versaflo TR–800 PAPR shall be used. Only the CleanSpace EX Power Unit, which meets lithium battery safety standard UL 1642 or IEC 62133, in the CleanSpace EX shall be used.

(h) If battery packs for the 3M Versaflo TR–800 PAPR are provided, all battery ''change outs'' shall occur in intake air outby the last open crosscut.

(i) The following maintenance and use conditions shall apply to equipment containing lithium type batteries:

(1) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX Power Unit shall be disassembled nor modified by anyone other than permitted by the manufacturer of the equipment.

(2) The 3M TR–830 Battery Pack shall be charged only in an area free of combustible material and in intake air outby the last open crosscut. The 3M TR–830 Battery Pack shall be charged only by a manufacturer's recommended battery charger, such as:

(i) 3M Battery Charger Kit TR–641N, which includes one 3M Charger Cradle TR–640 and one 3M Power Supply TR–941N, or,

(ii) 3M 4-Station Battery Charger Kit TR–644N, which includes four 3M Charger Cradles TR–640 and one 3M 4-Station Battery Charger Base/Power Supply TR–944N.

(3) The CleanSpace EX internal battery, which is contained within the power unit assembly, shall be charged in areas located outby the last open crosscut in intake air and only the manufacturer's recommended battery chargers shall be used, such as the CleanSpace EX Battery Charger, Product Code PAF–0066.

(4) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX power unit which contains the internal battery, shall be exposed to water, allowed to get wet or immersed in liquid. This does not preclude incidental exposure of the 3M TR–830 Battery Pack or the CleanSpace EX power unit assembly.

(5) Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR, including the internal battery, shall be used, charged or stored in locations where the manufacturer's recommended temperature limits are exceeded. Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR shall be placed in direct sunlight nor stored near a source of heat.

(j) Annual retraining shall be given to all miners who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs in accordance with 30 CFR 48.8. Training of new miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.5, and training of experienced miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.6 shall be given. The operator shall keep a record of such training and provide such record to MSHA upon request.

(k) The miners at Speed Mine and Winchester 2 Mine are not represented by a labor organization and there are no representatives of miners at the mine. A copy of this petition has been posted on the bulletin board at Speed Mine and Winchester 2 Mine, on October 4, 2024.

The petitioner asserts that the alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4520–43–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Kingston Mining, Inc.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before December 18, 2024.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2024–0066 by any of the following methods:

1. *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments for MSHA–2024–0066.
2. *Fax:* 202–693–9441.
3. *Email: petitioncomments@dol.gov.*
4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk, 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or
2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–043–C.

Petitioner: Kingston Mining, Inc., 300 Running Right Way, Julian, WV 25529.

Mine: Kingston No. 2 Mine, MSHA ID No. 46–08932, located in Fayette County, West Virginia.

Regulation Affected: 30 CFR 75.1002(a), Permissible electric equipment.

Modification Request: The petitioner requests a modification of 30 CFR 75.1002(a) to permit alternative methods of compliance to allow the use of additional respirable dust protection. Specifically, the petitioner is requesting to permit the use of the 3M Versaflo TR–800–HIK Intrinsically Safe Powered Air Purifying Respirator motor/blower and battery.

The petitioner states that:

(a) Kingston Mining, Inc., does not currently use a battery powered respirator unit but would like to add a Powered Air Purifying Respirator (''PAPR'') to the units available to miners in certain situations.

(b) Currently there are no battery powered respirators that meet applicable U.S. Mine Safety and Health Administration (MSHA) standards for permissibility. Electronic equipment used in underground mines in potentially explosive atmospheres is required to be approved by MSHA per 30 CFR. 3M and other competitor manufacturers do offer alternative products for many other environments and applications.

(c) One of the main benefits of a PAPR is that they provide a constant flow of air inside the headtop or helmet. This constant airflow helps to provide both respiratory protection and comfort in warm working environments.

(d) A strict application of the standard (*i.e.,* objecting to the use of the requested PAPR) results in a diminution of safety at the mine.

(e) Kingston Mining, Inc., petitions to permit the use of the 3M Versaflo TR–800–HIK Intrinsically Safe Powered Air Purifying Respirator motor/blower and battery.

(f) The Versaflo TR–800–HIK motor/blower and battery qualifies as intrinsically safe in the U.S., Canada, and any other countries accepting IECEx reports. (IECEx is the International Electrotechnical Commissions System for Certification to Standards Relating to Equipment for Use in Explosive Atmospheres). The TR–800–HIK PAPR has a blower that is UL-certified with an intrinsically safe (IS) rating of Division I: IS Class I, II, III; Division I (includes Division 2) Groups C, D, E, F, G; T4, under the most current standard (UL 60079, 6th Edition, 2013), and ATEX-certified with an intrinsically safe (IS) rating of ''ia''. The TR–800 is rated and marked with Exia I Ma, Exia IIB T4 Ga, Ex ia IIIC 135°C Da, $-20\ °C \leq Ta \leq +55\ °C$, under the current standard (IEC 60079).

(g) The 3M Versaflo TR–800 Intrinsically Safe Powered Air Purifying Respirator is not MSHA approved as permissible, and 3M is not pursuing approval to our knowledge.

(h) The standards for approval of these respirators are an acceptable alternative to MSHA's standards and provide an equivalent level of protection.

(i) The alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

The petitioner proposes the following alternative method:

(a) Affected mine employees shall be trained in the proper use and maintenance of the Versaflo TR–800 PAPR in accordance with established manufacturer guidelines. This training shall alert the affected employee that the Versaflo TR–800 PAPR is approved under 30 CFR part 18 and shall be de-energized when 1.0 percent or more percent methane is detected. The training shall also include the proper method to de-energize the PAPR. In addition to manufacturer guidelines, Kingston Mining, Inc. shall require that mine employees be trained to inspect the units before use to determine if there is any damage to the units that would negatively impact intrinsic safety as well as all stipulations in this petition.

(b) The PAPR, battery pack, and all associated wiring and any connections

shall be inspected before use to determine if there is any damage to the units that would negatively impact intrinsic safety. If any defects are found, the PAPR shall be removed from service.

(c) The operator shall maintain a separate logbook for the 3M Versaflo TR–800 PAPR that shall be kept with the equipment, or in a location with other mine record books and shall be made available to MSHA upon request. The equipment shall be examined at least weekly by a qualified person as defined in 30 CFR 75.512–1 and the examination results recorded in the logbook. Since float coal dust is removed by the air filter prior to reaching the motor, the PAPR user shall conduct regular examinations of the filter and perform periodic testing for proper operation of the ''high filter load alarm'' on the 3M Versaflo TR–800 PAPR.

(d) All 3M Versaflo TR–800 PAPRs to be used on the longwall face or within 150 feet of pillar workings, shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment prior to taking the equipment underground to ensure the equipment is being used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The examinations for the 3M Versaflo TR–800 PAPRs shall include:

(1) Check the equipment for any physical damage and the integrity of the case;

(2) Remove the battery and inspect for corrosion;

(3) Inspect the contact points to ensure a secure connection to the battery;

(4) Reinsert the battery and power up and shut down to ensure proper connections;

(5) Check the battery compartment cover or battery attachment to ensure that it is securely fastened; and

(6) For equipment utilizing lithium type cells, ensure that lithium cells and/or packs are not damaged or swelled in size. The pre-use examination is limited to inspecting the equipment for indications of physical damage.

(e) The operator shall ensure that all 3M Versaflo TR–800 units are serviced according to the manufacturer's recommendations. Dates of service shall be recorded in the equipment's logbook and shall include a description of the work performed.

(f) The 3M Versaflo TR–800 units that will be used in the face or within 150 feet of pillar workings, or in areas where methane may enter the air current, shall not be put into service until MSHA has initially inspected the equipment and determined that it is in compliance with all the terms and conditions of the Proposed Decision and Order (PDO) granted by MSHA.

(g) Prior to energizing the 3M Versaflo TR–800 inby the last open crosscut, methane tests shall be made in accordance with 30 CFR 75.323(a).

(h) All hand-held methane detectors shall be MSHA-approved and maintained in permissible and proper operating condition as defined by 30 CFR 75.320. All methane detectors shall provide visual and audible warnings when methane is detected at or above 1.0 percent.

(i) A qualified person as defined in 30 CFR 75.151 shall continuously monitor for methane immediately before and during the use of the 3M Versaflo TR–800 PAPR in the face or within 150 feet of pillar workings or in areas where methane may enter the air current.

(j) The 3M Versaflo TR–800 PAPR shall not be used if methane is detected in concentrations at or above 1.0 percent methane. When 1.0 percent or more of methane is detected while the Versaflo TR–800 is being used, the equipment shall be de-energized immediately and the equipment withdrawn outby the last open crosscut.

(k) Kingston Mining, Inc. shall use only the 3M TR–830 Battery Pack, which meets lithium battery safety standard UL 1642 or IEC 62133, in the 3M Versaflo TR–800 PAPR.

(l) The battery packs shall be ''changed out'' in intake air outby the last open crosscut. Before each shift when the 3M Versaflo TR–800 is to be used, all batteries and power units for the equipment shall be charged sufficiently so that they are not expected to be replaced on that shift.

(m) The following maintenance and use conditions shall apply to equipment containing lithium-type batteries:

(1) Always correctly use and maintain the lithium-ion battery packs. The 3M TR–830 Battery Pack may not be disassembled or modified by anyone other than persons permitted by the manufacturer of the equipment.

(2) The 3M TR–830 Battery Pack shall only be charged in an area free of combustible material, readily monitored and located on the surface of the mine. The 3M TR–830 Battery Pack is to be charged by either:

(i) 3M Battery Charger Kit TR–641N, which includes one 3M Charger Cradle TR–640 and one 3M Power Supply TR–941N; or

(ii) 3M 4-Station Battery Charger Kit TR–644N, which includes four 3M Charger Cradles TR–640 and one 3M 4-Station Battery Charger Base/Power Supply TR–944N.

(iii) The batteries shall not be allowed to get wet. This does not preclude incidental exposure of sealed battery packs.

(iv) The batteries shall not be used, charged or stored m locations where the manufacturer's recommended temperature limits are exceeded. The batteries shall not be placed in direct sunlight or used or stored near a source of heat.

(n) Personnel engaged in the use of the 3M Versaflo TR–800 shall be properly trained to recognize the hazards and limitations associated with the use of the equipment in areas where methane could be present. Additionally, personnel shall be trained regarding proper procedures for donning Self-Contained Self Rescuers (SCSRs) during a mine emergency while wearing the 3M VersaFlo TR–800 PAPR. The mine operator shall submit proposed revisions to update the Mine Emergency Evacuation and Firefighting Program of Instruction under 30 CFR 75.1502 to address this issue.

(o) Within 60 days after the PDO granted by MSHA becomes final, the operator shall submit proposed revisions for its approved 30 CFR part 48 training plans to the Mine Safety and Health Enforcement District Manager. These proposed revisions shall specify initial and refresher training regarding the terms and conditions stated in the PDO granted by MSHA. When training is conducted on the terms and conditions in the PDO granted by MSHA, an MSHA Certificate of Training (Form 5000–23) shall be completed. Comments shall be included on the Certificate of Training indicating that the training received was for use of the 3M Versaflo TR–800.

(p) All personnel who will be involved with or affected by the use of the 3M Versaflo TR–800 PAPR shall receive training in accordance with 30 CFR 48.7 on the requirements of the PDO granted by MSHA within 60 days of the date the PDO granted by MSHA becomes final. Such training shall be completed before any 3M Versaflo TR–800 can be used in the face or within 150 feet of pillar workings. The operator shall keep a record of such training an provide such record to MSHA upon request.

(q) The operator shall provide annual retraining to all personnel who will be involved with or affected by the use of the 3M Versaflo TR–800 PAPR in accordance with 30 CFR 48.8. The operator shall train new miners on the requirements of the PDO granted by

MSHA in accordance with 30 CFR 48.5 and shall train experienced miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.6. The operator shall keep a record of such training and provide such record to MSHA upon request.

(r) The operator shall post the PDO granted by MSHA in unobstructed locations on the bulletin boards and/or in other conspicuous places where notices to miners are ordinarily posted, for a period of not less than 60 consecutive days.

(s) The miners at Kingston Mining, Inc., Kingston No. 2 Mine, are not represented by a labor organization and there are no representatives of miners at the mine and a copy of this petition has been posted on the bulletin board on September 4, 2024.

The petitioner asserts that the alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk, 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–042–C.

Petitioner: Kingston Mining, Inc., 300 Running Right Way, Julian, WV 25529.

Mine: Kingston No. 2 Mine, MSHA ID No. 46–08932, located in Fayette County, West Virginia.

Regulation Affected: 30 CFR 75.507–1(a), Permissible electric equipment.

Modification Request: The petitioner requests a modification of 30 CFR 75.507–1(a) to permit alternative methods of compliance to allow the use of additional respirable dust protection. Specifically, the petitioner is requesting to permit the use of the 3M Versaflo TR–800–HIK Intrinsically Safe Powered Air Purifying Respirator motor/blower and battery.

The petitioner states that:

(a) Kingston Mining, Inc., does not currently use a battery powered respirator unit but would like to add a Powered Air Purifying Respirator (''PAPR'') to the units available to miners in certain situations.

(b) Currently there are no battery powered respirators that meet applicable U.S. Mine Safety and Health Administration (MSHA) standards for permissibility. Electronic equipment used in underground mines in potentially explosive atmospheres is required to be approved by MSHA per 30 CFR. 3M and other competitor manufacturers do offer alternative products for many other environments and applications.

(c) One of the main benefits of a PAPR is that they provide a constant flow of air inside the headtop or helmet. This constant airflow helps to provide both respiratory protection and comfort in warm working environments.

(d) A strict application of the standard (*i.e.,* objecting to the use of the requested PAPR) results in a diminution of safety at the mine.

(e) Kingston Mining, Inc., petitions to permit the use of the 3M Versaflo TR–800–HIK Intrinsically Safe Powered Air Purifying Respirator motor/blower and battery.

(f) The Versaflo TR–800–HIK motor/blower and battery qualifies as intrinsically safe in the U.S., Canada, and any other countries accepting IECEx reports. (IECEx is the International Electrotechnical Commissions System for Certification to Standards Relating to Equipment for Use in Explosive Atmospheres). The TR–800–HIK PAPR has a blower that is UL-certified with an intrinsically safe (IS) rating of Division I: IS Class I, II, III; Division I (includes Division 2) Groups C, D, E, F, G; T4, under the most current standard (UL 60079, 6th Edition, 2013), and ATEX-certified with an intrinsically safe (IS) rating of ''ia''. The TR–800 is rated and marked with Exia I Ma, Exia IIB T4 Ga, Ex ia IIIC 135°C Da, $-20\,°C \leq Ta \leq +55\,°C$, under the current standard (IEC 60079).

(g) The 3M Versaflo TR–800 Intrinsically Safe Powered Air Purifying Respirator is not MSHA approved as permissible, and 3M is not pursuing approval to our knowledge.

(h) The standards for approval of these respirators are an acceptable alternative to MSHA's standards and provide an equivalent level of protection.

(i) The alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

The petitioner proposes the following alternative method:

(a) Affected mine employees shall be trained in the proper use and maintenance of the Versaflo TR–800 PAPR in accordance with established manufacturer guidelines. This training shall alert the affected employee that the Versaflo TR–800 PAPR is approved under 30 CFR part 18 and shall be de-energized when 1.0 percent or more percent methane is detected. The training shall also include the proper method to de-energize the PAPR. In addition to manufacturer guidelines, Kingston Mining, Inc. shall require that mine employees be trained to inspect the units before use to determine if there is any damage to the units that would negatively impact intrinsic safety as well as all stipulations in this petition.

(b) The PAPR, battery pack, and all associated wiring and any connections shall be inspected before use to determine if there is any damage to the units that would negatively impact intrinsic safety. If any defects are found, the PAPR shall be removed from service.

(c) The operator shall maintain a separate logbook for the 3M Versaflo TR–800 PAPR that shall be kept with the equipment, or in a location with other mine record books and shall be made available to MSHA upon request. The equipment shall be examined at least weekly by a qualified person as defined in 30 CFR 75.512–1 and the examination results recorded in the logbook. Since float coal dust is removed by the air filter prior to reaching the motor, the PAPR user shall conduct regular examinations of the filter and perform periodic testing for proper operation of the ''high filter load alarm'' on the 3M Versaflo TR–800 PAPR.

(d) All 3M Versaflo TR–800 PAPRs to be used on the longwall face or within 150 feet of pillar workings, shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment prior to taking the equipment underground to ensure the equipment is being used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The examinations for the 3M Versaflo TR–800 PAPRs shall include:

(1) Check the equipment for any physical damage and the integrity of the case;

(2) Remove the battery and inspect for corrosion;

(3) Inspect the contact points to ensure a secure connection to the battery;

(4) Reinsert the battery and power up and shut down to ensure proper connections; and

(5) Check the battery compartment cover or battery attachment to ensure that it is securely fastened.

(6) For equipment utilizing lithium type cells, ensure that lithium cells and/or packs are not damaged or swelled in size. The pre-use examination is limited to inspecting the equipment for indications of physical damage.

(e) The operator shall ensure that all 3M Versaflo TR–800 units are serviced according to the manufacturer's recommendations. Dates of service shall be recorded in the equipment's logbook and shall include a description of the work performed.

(f) The 3M Versaflo TR–800 units that will be used in the face or within 150 feet of pillar workings, or in areas where methane may enter the air current, shall not be put into service until MSHA has initially inspected the equipment and determined that it is in compliance with all the terms and conditions of the Proposed Decision and Order (PDO) granted by MSHA.

(g) Prior to energizing the 3M Versaflo TR–800 inby the last open crosscut, methane tests shall be made in accordance with 30 CFR 75.323(a).

(h) All hand-held methane detectors shall be MSHA-approved and maintained in permissible and proper operating condition as defined by 30 CFR 75.320. All methane detectors shall provide visual and audible warnings when methane is detected at or above 1.0 percent.

(i) A qualified person as defined in 30 CFR 75.151 shall continuously monitor for methane immediately before and during the use of the 3M Versaflo TR–800 PAPR in the face or within 150 feet of pillar workings or in areas where methane may enter the air current.

(j) The 3M Versaflo TR–800 PAPR shall not be used if methane is detected in concentrations at or above 1.0 percent methane. When 1.0 percent or more of methane is detected while the Versaflo TR–800 is being used, the equipment shall be de-energized immediately and the equipment withdrawn outby the last open crosscut.

(k) Kingston Mining, Inc. shall use only the 3M TR–830 Battery Pack, which meets lithium battery safety standard UL 1642 or IEC 62133, in the 3M Versaflo TR–800 PAPR.

(l) The battery packs shall be ''changed out'' in intake air outby the last open crosscut. Before each shift when the 3M Versaflo TR–800 is to be used, all batteries and power units for the equipment shall be charged sufficiently so that they are not expected to be replaced on that shift.

(m) The following maintenance and use conditions shall apply to equipment containing lithium-type batteries:

(1) Always correctly use and maintain the lithium-ion battery packs. The 3M TR–830 Battery Pack may not be disassembled or modified by anyone other than persons permitted by the manufacturer of the equipment.

(2) The 3M TR–830 Battery Pack shall only be charged in an area free of combustible material, readily monitored and located on the surface of the mine. The 3M TR–830 Battery Pack is to be charged by either:

(i) 3M Battery Charger Kit TR–641N, which includes one 3M Charger Cradle TR–640 and one 3M Power Supply TR-941N; or

(ii) 3M 4-Station Battery Charger Kit TR–644N, which includes four 3M Charger Cradles TR–640 and one 3M 4-Station Battery Charger Base/Power Supply TR–944N.

(iii) The batteries shall not be allowed to get wet. This does not preclude incidental exposure of sealed battery packs.

(iv) The batteries shall not be used, charged or stored m locations where the manufacturer's recommended temperature limits are exceeded. The batteries shall not be placed in direct sunlight or used or stored near a source of heat.

(n) Personnel engaged in the use of the 3M Versaflo TR–800 shall be properly trained to recognize the hazards and limitations associated with the use of the equipment in areas where methane could be present. Additionally, personnel shall be trained regarding proper procedures for donning Self-Contained Self Rescuers (SCSRs) during a mine emergency while wearing the 3M VersaFlo TR–800 PAPR. The mine operator shall submit proposed revisions to update the Mine Emergency Evacuation and Firefighting Program of Instruction under 30 CFR 75.1502 to address this issue.

(o) Within 60 days after the PDO granted by MSHA becomes final, the operator shall submit proposed revisions for its approved 30 CFR part 48 training plans to the Mine Safety and Health Enforcement District Manager. These proposed revisions shall specify initial and refresher training regarding the terms and conditions stated in the PDO granted by MSHA. When training is conducted on the terms and conditions in the PDO granted by MSHA, an MSHA Certificate of Training (Form 5000–23) shall be completed. Comments shall be included on the Certificate of Training indicating that

the training received was for use of the 3M Versaflo TR–800.

(p) All personnel who will be involved with or affected by the use of the 3M Versaflo TR–800 PAPR shall receive training in accordance with 30 CFR 48.7 on the requirements of the PDO granted by MSHA within 60 days of the date the PDO granted by MSHA becomes final. Such training shall be completed before any 3M Versaflo TR–800 can be used in the face or within 150 feet of pillar workings. The operator shall keep a record of such training an provide such record to MSHA upon request.

(q) The operator shall provide annual retraining to all personnel who will be involved with or affected by the use of the 3M Versaflo TR–800 PAPR in accordance with 30 CFR 48.8. The operator shall train new miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.5 and shall train experienced miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.6. The operator shall keep a record of such training and provide such record to MSHA upon request.

(r) The operator shall post the PDO granted by MSHA in unobstructed locations on the bulletin boards and/or in other conspicuous places where notices to miners are ordinarily posted, for a period of not less than 60 consecutive days.

(s) The miners at Kingston Mining, Inc., Kingston No. 2 Mine, are not represented by a labor organization and there are no representatives of miners at the mine and a copy of this petition has been posted on the bulletin board on September 4, 2024.

The petitioner asserts that the alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

[FR Doc. 2024–26727 Filed 11–15–24; 8:45 am]

BILLING CODE 4520–43–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Greenbrier Minerals, LLC.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before December 18, 2024.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2024–0072 by any of the following methods:

1. *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments for MSHA–2024–0072.

2. *Fax:* 202–693–9441.

3. *Email: petitioncomments@dol.gov.*

4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk, 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–047–C.

Petitioner: Greenbrier Minerals, LLC, 119 Rich Creek Road, Lyburn, WV 25632.

Mines: Powellton #1 Mine, MSHA ID No. 46–09217, located in Logan County, West Virginia; Lower War Eagle, MSHA ID No. 46–09319, located in Wyoming County, West Virginia; Muddy Bridge, Mine ID No. 46–09514, located in Logan County, West Virginia; Eagle No. 1 Mine, Mine ID No. 46–09563, located in Logan County, West Virginia.

Regulation Affected: 30 CFR 75.500(d), Permissible electric equipment.

Modification Request: The petitioner requests a modification of 30 CFR 75.500(d) to allow the use of an alternative method of respirable dust protection. Specifically, the petitioner is requesting to use a battery powered respirable protection unit called the 3M Versaflo TR–800 powered air-purifying respirator (PAPR) in addition to the CleanSpace EX PAPR in or inby the last open crosscut.

The petitioner states that:

(a) The petitioner is requesting to utilize the 3M Versaflo TR–800 PAPR in addition to the utilization of the CleanSpace EX PAPR, which was approved through a previous Proposed Decision and Order (PDO) granted by MSHA (MSHA Docket Number M–2022–038–C). It should be noted that North Fork Winifrede Deep Mine, Mine ID No. 46–09583 was included in the original petition but has been abandoned and will be omitted in the amended petition.

(b) The 3M Airstream helmet has been used in mines for over 40 years. 3M has recently faced component disruptions for the Airstream product. This has caused 3M to discontinue, globally, the Airstream on June 1, 2020. The ability to order an Airstream system and components ended in February 2020, and components were available through June 2020. Currently, there are not any available replacement PAPRs that meet the MSHA standard for permissibility. PAPRs provide a constant flow of filtered air, which offers respiratory protection and comfort in hot working environments. Operators that were using the Airstream, do not have an alternative to provide to this type of protection to its miners.

(c) Greenbrier Minerals, LLC, is seeking alternatives to the 3M Airstream helmet to provide miners with respirable protection against respirable

coal mine and silica dust, a protection that can provide long-term health benefits.

(d) Both the CleanSpace EX and 3M Versaflo TR–800 PAPRs provide a constant flow of filtered air inside the half-mask, full mask or helmet. The airflow provides respiratory protection and comfort in hot working conditions. Both PAPRs will be equipped with the following: Particulate protection classified as 100 series under 42 CFR part 84; or Particulate protection classified as High Efficiency ''HE'' under 42 CFR part 84.

(e) Greenbrier Minerals LLC is seeking to continue the use of the CleanSpace EX PAPR and applying to utilize the 3M Versaflo TR–800 PAPR in or inby the last open crosscut at the aforementioned mines.

(f) CleanSpace EX.

(1) The CleanSpace EX is certified by TestSafe Australia (TSA) according to the IEC 60079–0:2011 (General Requirements) and IEC 60079–11:2011 (Intrinsic Safety) standards. The certificate, issued to PAFtec Australia Pty Ltd (''PAFtec''), allows PAFtec to mark the device as ''Ex ib IIB T4 Gb'' and ''Ex ia I Ma.'' Due to legal and regulatory constraints, the TSA certificate is not accepted by MSHA as evidence that the PAPR is approved for use in US mines. The IEC certification marking that applies to mining, Ex ia I Ma, is discussed below:

(2) The CleanSpace EX is certified to be used in hazardous locations (''Ex''); meets the most onerous level of intrinsic safety protection (''ia''); the level of protection is acceptable for use in mining locations (''I''), and the Equipment Protection Level appropriate for mining equipment, that has a ''very high'' level of protection, with sufficient security that it is unlikely to become an ignition source in normal operation, during expected malfunctions or during rare malfunctions, even when left energized in the presence of an outbreak of gas (''Ma'').

(3) NIOSH researchers, in a paper titled ''An Evaluation of the Relative Safety of U.S. Mining Explosion-Protected Equipment Approval Requirements versus those of International Standards'', have determined that equipment, which meets two-fault intrinsic safety as defined in the ANSI/UL 60079 standard would provide at least an equivalent level of safety as that provided by equipment approved under MSHA criteria.

(4) The UL certification, TSA certification and PAFtec listing material (drawings, certificate and text report) were found to support the conclusion that the CleanSpace EX meet the applicable ''two fault'' intrinsic safety requirements for mining equipment as found in the ANSI/UL standard.

(5) The CleanSpace EX carries an ingress protection rating of IP66. This rating exceeds the minimum rating of IP54 required by the ANSI/UL and IEC standards for intrinsically safe mining equipment.

(6) This product is not MSHA-approved, and the manufacturer is not pursuing approval. The standards for the approval of this respirator are an accepted alternative to MSHA's standards and provide the same level of protection.

(g) 3M Versaflo TR–800.

(1) The 3M Versaflo TR–800 PAPR with motor/blower and battery qualifies as intrinsically safe, based on reports by the International Electrotechnical Commission Systems for Certification to Standards Relating to Equipment for Use in Explosive Atmospheres (IECEx). The blower is UL-certified with an intrinsically safe rating of Division 1: Class I, II, III; Division 1: Groups C, D, E, F, G; T4 under the current standard of UL 60079; ATEX-certified with a rating of ''ia''. The 3M Versaflo TR–800 is rated and marked Ex ia I MA, Ex ia IIB T4 Ga, Ex ia IIIC 135oC Da; 120°C≤ TA ≤+55°C.

(2) The 3M Versaflo TR–800 carries an ingress protection rating of IP64. This rating exceeds the minimum rating of IP54 required by the ANSI/UL and IEC standards for intrinsically safe mining equipment.

(3) This product is not MSHA-approved, and the manufacturer is not pursuing approval. The standards for the approval of this respirator are an accepted alternative to MSHA's standards and provide the same level of protection.

(h) The alternative method will guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

The petitioner proposes the following alternative method:

(a) Affected mine employees shall be trained in the proper use and maintenance of the PAPR(s) to be used at the mine, the 3M Versaflo TR–800 and/or the CleanSpace EX, in accordance with established manufacturer guidelines. This training shall alert the affected employee that neither the 3M Versaflo TR–800 nor the CleanSpace EX PAPR is approved under 30 CFR part 18 and therefore shall be de-energized when 1.0 or more percent methane is detected. The training shall also include the proper method to de-energize these PAPRs. In addition to manufacturer guidelines, MSHA shall require that mine employees be trained to inspect the units before use to determine if there is any damage to the units that would negatively impact intrinsic safety as well as all stipulations in the PDO granted by MSHA.

(b) The PAPRs, battery packs, all associated wiring and connections shall be inspected before use to determine if there is any damage to the units that would negatively impact intrinsic safety. If any defects are found, the PAPR shall be removed from service.

(c) The operator shall maintain a separate logbook for the 3M Versaflo TR–800 and CleanSpace EX PAPRs that shall be kept with the equipment, or in a location with other mine record books and shall be made available to MSHA upon request. The equipment shall be examined at least weekly by a qualified person as defined in 30 CFR 75.512–1 and the examination results recorded in the logbook. Since float coal dust is removed by the air filter prior to reaching the motor, the PAPR user shall conduct regular examinations of the filter and perform periodic testing for proper operation of the ''high filter load alarm'' on the 3M Versaflo TR–800 PAPR, and the ''blocked filter'' alarm on the CleanSpace EX PAPR. Examination entries may be expunged after one year.

(d) All 3M Versaflo TR–800 and CleanSpace EX PAPRs to be used in or inby the last open crosscut shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment prior to taking the equipment underground to ensure the equipment is used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The examinations for the 3M Versaflo TR–800 PAPRs shall include:

(1) Check the equipment for any physical damage and the integrity of the case;

(2) Remove the battery and inspect for corrosion;

(3) Inspect the contact points to ensure a secure connection to the battery;

(4) Reinsert the battery and power up and shut down to ensure proper connections;

(5) Check the battery compartment cover or battery attachment to ensure that it is securely fastened; and

(6) For equipment utilizing lithium type cells, ensure that lithium cells and/or packs are not damaged or swelled in size.

(e) All CleanSpace EX PAPRs to be used in or inby the last open crosscut

shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment prior to taking the equipment underground to ensure the equipment is used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The CleanSpace EX PAPR does not have an accessible/removable battery. The internal battery and motor/blower assembly are both contained within the ''power unit'' assembly and the battery cannot be removed, reinserted or fastened. Therefore, examination of the CleanSpace EX PAPR should include any indications of physical damage.

(f) The operator shall ensure that all 3M Versaflo TR–800 and CleanSpace EX PAPR units are serviced according to the manufacturer's recommendations. Dates of service shall be recorded in the equipment's logbook and shall include a description of the work performed.

(g) The 3M Versaflo TR–800 and CleanSpace EX PAPR units that will be used in or inby the last open crosscut shall not be put into service until MSHA has initially inspected the equipment and determined that it is in compliance with all the terms and conditions of the PDO granted by MSHA.

(h) Prior to energizing the 3M Versaflo TR–800 or the CleanSpace EX PAPR in or inby the last open crosscut, methane tests shall be made in accordance with 30 CFR 75.323(a).

(i) All hand-held methane detectors shall be MSHA-approved and maintained in permissible and proper operating condition as defined by 30 CFR 75.320. All methane detectors shall provide visual and audible warnings when methane is detected in concentrations at or above 1.0 percent.

(j) A qualified person as defined in 30 CFR 75.151 shall continuously monitor for methane immediately before and during the use of the 3M Versaflo TR–800 or CleanSpace EX PAPR in or inby the last open crosscut.

(k) Neither the 3M Versaflo TR–800 nor the CleanSpace EX PAPR shall be used if methane is detected in concentrations at or above 1.0 percent. When 1.0 percent or more methane is detected while the 3M Versaflo TR–800 or CleanSpace EX PAPR is being used, the equipment shall be de-energized immediately and the equipment withdrawn outby the last open crosscut.

(l) The operation and location of the 3M Versaflo TR–800 and CleanSpace EX PAPRs during underground blasting operations shall be defined in accordance with 30 CFR 75.1312(e)(1), 30 CFR 75.1313(b)(1), and individualized underground blasting permits approved by the District Manager.

(m) Only the 3M TR–830 Battery Pack shall be used, which meets lithium battery safety standard UL 1642 or IEC 62133, in the 3M Versaflo TR–800 PAPR. Use only the CleanSpace EX Power Unit, which meets lithium battery safety standard UL 1642 or IEC 62133, in the CleanSpace EX PAPR.

(n) Before each shift when the 3M Versaflo TR–800 or CleanSpace EX PAPR is to be used, all batteries and power units for the equipment shall be charged sufficiently for the expected usage on that shift. If spare battery packs for the 3M Versaflo TR–800 PAPR are provided, all battery ''change outs'' shall occur in intake air outby the last open crosscut.

(o) The following maintenance and use conditions shall apply to equipment containing lithium-type batteries:

(1) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX Power Unit may be disassembled nor modified by anyone other than permitted by the manufacturer of the equipment.

(2) The 3M TR–830 Battery Pack shall be charged only in an area free of combustible material, readily monitored and located on the surface of the mine. The 3M TR–830 Battery Pack shall be charged only by a manufacturer's recommended battery charger, such as:

(i) 3M Battery Charger Kit TR–641N, which includes one 3M Charger Cradle TR–640 and one 3M Power Supply TR–941N, or

(ii) 3M 4-Station Battery Charger Kit TR–644N, which includes four 3M Charger Cradles TR–640 and one 3M 4-Station Battery Charger Base/Power Supply TR–944N.

(3) The CleanSpace EX internal battery, which is contained within the power unit assembly, shall be charged in areas located outby the last open crosscut in intake air as per 30 CFR 75.340, or in an area free of combustible material, readily monitored and located on the surface of the mine, and only the manufacturer's recommended battery chargers may be used, such as the CleanSpace EX Battery Charger, Product Code PAF–0066.

(4) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX power unit which contains the internal battery, shall be exposed to water, allowed to get wet or immersed in liquid. This does not preclude incidental exposure of the 3M TR–830 Battery Pack or the CleanSpace EX power unit assembly.

(5) Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR, including the internal battery, shall be used, charged or stored in locations where the manufacturer's recommended temperature limits are exceeded. Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR shall be placed in direct sunlight nor stored near a source of heat.

(6) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX PAPR's internal battery shall be used at the end of its life cycle (*i.e.,* when there is a performance decrease of greater than 20 percent in battery-operated equipment). The 3M TR–830 Battery Pack and the CleanSpace EX power unit containing the internal battery shall be disposed of properly.

(p) Personnel engaged in the use of the 3M Versaflo TR–800 and CleanSpace EX PAPRs shall be properly trained to recognize the hazards and limitations associated with the use of the equipment in areas where methane could be present. Additionally, personnel shall be trained regarding proper procedures for donning self-contained self rescuers (SCSRs) during a mine emergency while wearing the 3M Versaflo TR–800 or CleanSpace EX PAPR. The mine operator shall submit proposed revisions to update the Mine Emergency Evacuation and Firefighting Program of Instruction under 30 CFR 75.1502.

(q) Within 60 days after the PDO granted by MSHA becomes final, the operator shall submit proposed revisions for its approved 30 CFR part 48 training plans to the Mine Safety and Health Enforcement District Manager. These proposed revisions shall specify initial and refresher training regarding the terms and conditions stated in the PDO granted by MSHA. When training is conducted on the terms and conditions in the PDO granted by MSHA, an MSHA Certificate of Training (Form 5000–23) shall be completed. Comments shall be included on the Certificate of Training indicating that the training received was for use of the 3M Versaflo TR–800 or the CleanSpace EX PAPR.

(r) All personnel who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs shall receive training in accordance with 30 CFR 48.7 on the requirements of the PDO granted by MSHA within 60 days of the date the PDO granted by MSHA becomes final. Such training shall be completed before any 3M Versaflo TR–800 or CleanSpace EX PAPR can be used in or inby the last open crosscut. The operator shall keep a record of such training and provide such record to MSHA upon request.

(s) The operator shall provide annual retraining to all personnel who will be

involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs in accordance with 30 CFR 48.8. The operator shall train new miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.5, and shall train experienced miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.6. The operator shall keep a record of such training and provide such record to MSHA upon request.

(t) The operator shall post the PDO granted by MSHA in unobstructed locations on the bulletin boards and/or in other conspicuous places where notices to miners are ordinarily posted, for a period of not less than 60 consecutive days.

(u) There are no representatives of miners at Greenbrier Minerals LLC, Powellton #1 Mine, Lower War Eagle, Muddy Bridge, or Eagle No. 1 Mine. A copy of this petition has been posted on the bulletin board as of September 12, 2024.

The petitioner asserts that the alternative method will guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4520–43–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Kingston Mining, Inc.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before December 18, 2024.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2024–0064 by any of the following methods:

1. *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments for MSHA–2024–0064.

2. *Fax:* 202–693–9441.

3. *Email: petitioncomments@dol.gov.*

4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk, 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–041–C.

Petitioner: Kingston Mining, Inc., 300 Running Right Way, Julian, WV 25529.

Mine: Kingston No. 2 Mine, MSHA ID No. 46–08932, located in Fayette County, West Virginia.

Regulation Affected: 30 CFR 75.500(d), Permissible electric equipment.

Modification Request: The petitioner requests a modification of 30 CFR 75.500(d) to permit alternative methods of compliance to allow the use of additional respirable dust protection. Specifically, the petitioner is requesting to permit the use of the 3M Versaflo TR–800–HIK Intrinsically Safe Powered Air Purifying Respirator motor/blower and battery.

The petitioner states that:

(a) Kingston Mining, Inc. does not currently use a battery powered respirator unit but would like to add a Powered Air Purifying Respirator (''PAPR'') to the units available to miners in certain situations.

(b) Currently there are no battery powered respirators that meet applicable U.S. Mine Safety and Health Administration (MSHA) standards for permissibility. Electronic equipment used in underground mines in potentially explosive atmospheres is required to be approved by MSHA per 30 CFR. 3M and other competitor manufacturers do offer alternative products for many other environments and applications.

(c) One of the main benefits of a PAPR is that they provide a constant flow of air inside the headtop or helmet. This constant airflow helps to provide both respiratory protection and comfort in warm working environments.

(d) A strict application of the standard (*i.e.,* objecting to the use of the requested PAPR) results in a diminution of safety at the mine.

(e) Kingston Mining, Inc. petitions to permit the use of the 3M Versaflo TR–800–HIK Intrinsically Safe Powered Air Purifying Respirator motor/blower and battery.

(f) The Versaflo TR–800–HIK motor/blower and battery qualifies as intrinsically safe in the U.S., Canada, and any other countries accepting IECEx reports. (IECEx is the International Electrotechnical Commissions System for Certification to Standards Relating to Equipment for Use in Explosive Atmospheres). The TR–800–HIK PAPR has a blower that is UL-certified with an intrinsically safe (IS) rating of Division I: IS Class I, II, III; Division I (includes Division 2) Groups C, D, E, F, G; T4, under the most current standard (UL 60079, 6th Edition, 2013), and ATEX-certified with an intrinsically safe (IS) rating of ''ia''. The TR–800 is rated and marked with Exia I Ma, Exia IIB T4 Ga, Ex ia IIIC 135 °C Da, $-20\,°C \leq Ta \leq +55\,°C$, under the current standard (IEC 60079).

(g) The 3M Versaflo TR–800 Intrinsically Safe Powered Air Purifying Respirator is not MSHA approved as permissible, and 3M is not pursuing approval to our knowledge.

(h) The standards for approval of these respirators are an acceptable alternative to MSHA's standards and provide an equivalent level of protection.

(i) The alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

The petitioner proposes the following alternative method:

(a) Affected mine employees shall be trained in the proper use and maintenance of the Versaflo TR–800 PAPR in accordance with established manufacturer guidelines. This training shall alert the affected employee that the Versaflo TR–800 PAPR is approved under 30 CFR part 18 and shall be de-energized when 1.0 percent or more percent methane is detected. The training shall also include the proper method to de-energize the PAPR. In addition to manufacturer guidelines, Kingston Mining, Inc. shall require that mine employees be trained to inspect the units before use to determine if there is any damage to the units that would negatively impact intrinsic safety as well as all stipulations in this petition.

(b) The PAPR, battery pack, and all associated wiring and any connections shall be inspected before use to determine if there is any damage to the units that would negatively impact intrinsic safety. If any defects are found, the PAPR shall be removed from service.

(c) The operator shall maintain a separate logbook for the 3M Versaflo TR–800 PAPR that shall be kept with the equipment, or in a location with other mine record books and shall be made available to MSHA upon request. The equipment shall be examined at least weekly by a qualified person as defined in 30 CFR 75.512–1 and the examination results shall be recorded in the logbook. Since float coal dust is removed by the air filter prior to reaching the motor, the PAPR user shall conduct regular examinations of the filter and perform periodic testing for proper operation of the ''high filter load alarm'' on the 3M Versaflo TR–800 PAPR.

(d) All 3M Versaflo TR–800 PAPRs to be used on the longwall face or within 150 feet of pillar workings, shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment prior to taking the equipment underground to ensure the equipment is being used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The examinations for the 3M Versaflo TR–800 PAPRs shall include:

(1) Check the equipment for any physical damage and the integrity of the case;

(2) Remove the battery and inspect for corrosion;

(3) Inspect the contact points to ensure a secure connection to the battery;

(4) Reinsert the battery and power up and shut down to ensure proper connections;

(5) Check the battery compartment cover or battery attachment to ensure that it is securely fastened; and

(6) For equipment utilizing lithium type cells, ensure that lithium cells and/or packs are not damaged or swelled in size. The pre-use examination is limited to inspecting the equipment for indications of physical damage.

(e) The operator shall ensure that all 3M Versaflo TR–800 units are serviced according to the manufacturer's recommendations. Dates of service shall be recorded in the equipment's logbook and shall include a description of the work performed.

(f) The 3M Versaflo TR–800 units that will be used in the face or within 150 feet of pillar workings, or in areas where methane may enter the air current, shall not be put into service until MSHA has initially inspected the equipment and determined that it is in compliance with all the terms and conditions of the Proposed Decision and Order (PDO) granted by MSHA.

(g) Prior to energizing the 3M Versaflo TR–800 inby the last open crosscut, methane tests shall be made in accordance with 30 CFR 75.323(a).

(h) All hand-held methane detectors shall be MSHA-approved and maintained in permissible and proper operating condition as defined by 30 CFR 75.320. All methane detectors shall provide visual and audible warnings when methane is detected at or above 1.0 percent.

(i) A qualified person as defined in 30 CFR 75.151 shall continuously monitor for methane immediately before and during the use of the 3M Versaflo TR–800 PAPR in the face or within 150 feet of pillar workings or in areas where methane may enter the air current.

(j) The 3M Versaflo TR–800 PAPR shall not be used if methane is detected in concentrations at or above 1.0 percent methane. When 1.0 percent or more of methane is detected while the Versaflo TR–800 is being used, the equipment shall be de-energized immediately and the equipment withdrawn outby the last open crosscut.

(k) Kingston Mining, Inc. shall use only the 3M TR–830 Battery Pack, which meets lithium battery safety standard UL 1642 or IEC 62133, in the 3M Versaflo TR–800 PAPR.

(l) The battery packs shall be ''changed out'' in intake air outby the last open crosscut. Before each shift when the 3M Versaflo TR–800 is to be used, all batteries and power units for the equipment shall be charged sufficiently so that they are not expected to be replaced on that shift.

(m) The following maintenance and use conditions shall apply to equipment containing lithium-type batteries:

(1) Always correctly use and maintain the lithium-ion battery packs. The 3M TR–830 Battery Pack may not be disassembled or modified by anyone other than persons permitted by the manufacturer of the equipment.

(2) The 3M TR–830 Battery Pack shall only be charged in an area free of combustible material, readily monitored and located on the surface of the mine. The 3M TR–830 Battery Pack is to be charged by either:

(i) 3M Battery Charger Kit TR–641N, which includes one 3M Charger Cradle TR–640 and one 3M Power Supply TR-941N; or

(ii) 3M 4-Station Battery Charger Kit TR–644N, which includes four 3M Charger Cradles TR–640 and one 3M 4-Station Battery Charger Base/Power Supply TR–944N.

(iii) The batteries shall not be allowed to get wet. This does not preclude incidental exposure of sealed battery packs.

(iv) The batteries shall not be used, charged or stored m locations where the manufacturer's recommended temperature limits are exceeded. The batteries shall not be placed in direct sunlight or used or stored near a source of heat.

(n) Personnel engaged in the use of the 3M Versaflo TR–800 shall be properly trained to recognize the hazards and limitations associated with the use of the equipment in areas where methane could be present. Additionally, personnel shall be trained regarding proper procedures for donning Self-Contained Self Rescuers (SCSRs) during a mine emergency while wearing the 3M VersaFlo TR–800 PAPR. The mine operator shall submit proposed revisions to update the Mine Emergency Evacuation and Firefighting Program of Instruction under 30 CFR 75.1502 to address this issue.

(o) Within 60 days after the PDO granted by MSHA becomes final, the operator shall submit proposed revisions for its approved 30 CFR part 48 training plans to the Mine Safety and Health Enforcement District Manager. These proposed revisions shall specify initial and refresher training regarding the terms and conditions stated in the PDO granted by MSHA. When training is conducted on the terms and conditions in the PDO granted by

MSHA, an MSHA Certificate of Training (Form 5000–23) shall be completed. Comments shall be included on the Certificate of Training indicating that the training received was for use of the 3M Versaflo TR–800.

(p) All personnel who will be involved with or affected by the use of the 3M Versaflo TR–800 PAPR shall receive training in accordance with 30 CFR 48.7 on the requirements of the PDO granted by MSHA within 60 days of the date the PDO granted by MSHA becomes final. Such training shall be completed before any 3M Versaflo TR–800 can be used in the face or within 150 feet of pillar workings. The operator shall keep a record of such training an provide such record to MSHA upon request.

(q) The operator shall provide annual retraining to all personnel who will be involved with or affected by the use of the 3M Versaflo TR–800 PAPR in accordance with 30 CFR 48.8. The operator shall train new miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.5 and shall train experienced miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.6. The operator shall keep a record of such training and provide such record to MSHA upon request.

(r) The operator shall post the PDO granted by MSHA in unobstructed locations on the bulletin boards and/or in other conspicuous places where notices to miners are ordinarily posted, for a period of not less than 60 consecutive days.

(s) The miners at Kingston Mining, Inc., Kingston No. 2 Mine, are not represented by a labor organization and there are no representatives of miners at the mine and a copy of this petition has been posted on the bulletin board on September 4, 2024.

The petitioner asserts that the alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

[FR Doc. 2024–26716 Filed 11–15–24; 8:45 am]

BILLING CODE 4520–43–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Greenbrier Minerals, LLC.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before December 18, 2024.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2024–0073 by any of the following methods:

1. *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments for MSHA–2024–0073.
2. *Fax:* 202–693–9441.
3. *Email: petitioncomments@dol.gov.*
4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk, 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or
2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–048–C.

Petitioner: Greenbrier Minerals, LLC, 119 Rich Creek Road, Lyburn, WV 25632.

Mines: Powellton #1 Mine, MSHA ID No. 46–09217, located in Logan County, West Virginia; Lower War Eagle, MSHA ID No. 46–09319, located in Wyoming County, West Virginia; Muddy Bridge, Mine ID No. 46–09514, located in Logan County, West Virginia; Eagle No.1 Mine, Mine ID No. 46–09563, located in Logan County, West Virginia.

Regulation Affected: 30 CFR 75.507–1(a), Permissible electric equipment.

Modification Request: The petitioner requests a modification of 30 CFR 75.507–1(a) to allow the use of an alternative method of respirable dust protection. Specifically, the petitioner is requesting to use a battery powered respirable protection unit called the 3M Versaflo TR–800 powered air-purifying respirator (PAPR) in addition to the CleanSpace EX PAPR in the return air outby the last open crosscut.

The petitioner states that:

(a) The petitioner is requesting to utilize the 3M Versaflo TR–800 PAPR in addition to the utilization of the CleanSpace EX PAPR, which was approved through a previous Proposed Decision and Order (PDO) granted by MSHA (MSHA Docket Number M–2022–039–C). It should be noted that North Fork Winifrede Deep Mine, Mine ID No. 46–09583 was included in the original petition but has been abandoned and will be omitted in the amended petition.

(b) The 3M Airstream helmet has been used in mines for over 40 years. 3M has recently faced component disruptions for the Airstream product. This has caused 3M to discontinue, globally, the Airstream on June 1, 2020. The ability to order an Airstream system and components ended in February 2020, and components were available through June 2020. Currently, there are not any available replacement PAPRs that meet the MSHA standard for permissibility. PAPRs provide a constant flow of filtered air, which offers respiratory protection and comfort in hot working

environments. Operators that were using the Airstream, do not have an alternative to provide to this type of protection to its miners.

(c) Greenbrier Minerals, LLC, is seeking alternatives to the 3M Airstream helmet to provide miners with respirable protection against respirable coal mine and silica dust, a protection that can provide long-term health benefits.

(d) Both the CleanSpace EX and 3M Versaflo TR–800 PAPRs provide a constant flow of filtered air inside the half-mask, full mask or helmet. The airflow provides respiratory protection and comfort in hot working conditions. Both PAPRs will be equipped with the following: Particulate protection classified as 100 series under 42 CFR part 84; or Particulate protection classified as High Efficiency ''HE'' under 42 CFR part 84.

(e) Greenbrier Minerals LLC is seeking to continue the use of the CleanSpace EX PAPR and applying to utilize the 3M Versaflo TR–800 PAPR in the return air outby the last open crosscut at the aforementioned mines.

(f) CleanSpace EX.

(1) The CleanSpace EX is certified by TestSafe Australia (TSA) according to the IEC 60079–0:2011 (General Requirements) and IEC 60079–11:2011 (Intrinsic Safety) standards. The certificate, issued to PAFtec Australia Pty Ltd (''PAFtec''), allows PAFtec to mark the device as ''Ex ib IIB T4 Gb'' and ''Ex ia I Ma.'' Due to legal and regulatory constraints, the TSA certificate is not accepted by MSHA as evidence that the PAPR is approved for use in US mines. The IEC certification marking that applies to mining, Ex ia I Ma, is discussed below:

(2) The CleanSpace EX is certified to be used in hazardous locations (''Ex''); meets the most onerous level of intrinsic safety protection (''ia''); the level of protection is acceptable for use in mining locations (''I''), and the Equipment Protection Level appropriate for mining equipment, that has a ''very high'' level of protection, with sufficient security that it is unlikely to become an ignition source in normal operation, during expected malfunctions or during rare malfunctions, even when left energized in the presence of an outbreak of gas (''Ma'').

(3) NIOSH researchers, in a paper titled ''An Evaluation of the Relative Safety of U.S. Mining Explosion-Protected Equipment Approval Requirements versus those of International Standards'', have determined that equipment, which meets two-fault intrinsic safety as defined in the ANSI/UL 60079 standard would provide at least an equivalent level of safety as that provided by equipment approved under MSHA criteria.

(4) The UL certification, TSA certification and PAFtec listing material (drawings, certificate and text report) were found to support the conclusion that the CleanSpace EX meet the applicable ''two fault'' intrinsic safety requirements for mining equipment as found in the ANSI/UL standard.

(5) The CleanSpace EX carries an ingress protection rating of IP66. This rating exceeds the minimum rating of IP54 required by the ANSI/UL and IEC standards for intrinsically safe mining equipment.

(6) This product is not MSHA-approved, and the manufacturer is not pursuing approval. The standards for the approval of this respirator are an accepted alternative to MSHA's standards and provide the same level of protection.

(g) 3M Versaflo TR–800.

(1) The 3M Versaflo TR–800 PAPR with motor/blower and battery qualifies as intrinsically safe, based on reports by the International Electrotechnical Commission Systems for Certification to Standards Relating to Equipment for Use in Explosive Atmospheres (IECEx). The blower is UL-certified with an intrinsically safe rating of Division 1: Class I, II, III; Division 1: Groups C, D, E, F, G; T4 under the current standard of UL 60079; ATEX-certified with a rating of ''ia''. The 3M Versaflo TR–800 is rated and marked Ex ia I MA, Ex ia IIB T4 Ga, Ex ia IIIC 135oC Da; 120°C≤ TA ≤+55°C.

(2) The 3M Versaflo TR–800 carries an ingress protection rating of IP64. This rating exceeds the minimum rating of IP54 required by the ANSI/UL and IEC standards for intrinsically safe mining equipment.

(3) This product is not MSHA approved, and the manufacturer is not pursuing approval. The standards for the approval of this respirator are an accepted alternative to MSHA's standards and provide the same level of protection.

(h) The alternative method will guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

The petitioner proposes the following alternative method:

(a) Affected mine employees shall be trained in the proper use and maintenance of the PAPR(s) to be used at the mine, the 3M Versaflo TR–800 and/or the CleanSpace EX, in accordance with established manufacturer guidelines. This training shall alert the affected employee that neither the 3M Versaflo TR–800 nor the CleanSpace EX PAPR is approved under 30 CFR part 18 and therefore shall be de-energized when 1.0 or more percent methane is detected. The training shall also include the proper method to de-energize these PAPRs. In addition to manufacturer guidelines, MSHA shall require that mine employees be trained to inspect the units before use to determine if there is any damage to the units that would negatively impact intrinsic safety as well as all stipulations in the PDO granted by MSHA.

(b) The PAPRs, battery packs, and all associated wiring and connections shall be inspected before use to determine if there is any damage to the units that would negatively impact intrinsic safety. If any defects are found, the PAPR shall be removed from service.

(c) The operator shall maintain a separate logbook for the 3M Versaflo TR–800 and CleanSpace EX PAPRs that shall be kept with the equipment, or in a location with other mine record books and shall be made available to MSHA upon request. The equipment shall be examined at least weekly by a qualified person as defined in 30 CFR 75.512–1 and the examination results recorded in the logbook. Since float coal dust is removed by the air filter prior to reaching the motor, the PAPR user shall conduct regular examinations of the filter and perform periodic testing for proper operation of the ''high filter load alarm'' on the 3M Versaflo TR–800 PAPR, and the ''blocked filter'' alarm on the CleanSpace EX PAPR. Examination entries may be expunged after one year.

(d) All 3M Versaflo TR–800 and CleanSpace EX PAPRs to be used in the return air outby the last open crosscut shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment prior to taking the equipment underground to ensure the equipment is used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The examinations for the 3M Versaflo TR–800 PAPRs shall include:

(1) Check the equipment for any physical damage and the integrity of the case;

(2) Remove the battery and inspect for corrosion;

(3) Inspect the contact points to ensure a secure connection to the battery;

(4) Reinsert the battery and power up and shut down to ensure proper connections;

(5) Check the battery compartment cover or battery attachment to ensure that it is securely fastened; and

(6) For equipment utilizing lithium type cells, ensure that lithium cells and/or packs are not damaged or swelled in size.

(e) All CleanSpace EX PAPRs to be used in the return air outby the last open crosscut shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment prior to taking the equipment underground to ensure the equipment is used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The CleanSpace EX PAPR does not have an accessible/removable battery. The internal battery and motor/blower assembly are both contained within the ''power unit'' assembly and the battery cannot be removed, reinserted or fastened. Therefore, examination of the CleanSpace EX PAPR should include any indications of physical damage.

(f) The operator shall ensure that all 3M Versaflo TR–800 and CleanSpace EX PAPR units are serviced according to the manufacturer's recommendations. Dates of service shall be recorded in the equipment's logbook and shall include a description of the work performed.

(g) The 3M Versaflo TR–800 and CleanSpace EX PAPR units that will be used in the return air outby the last open crosscut shall not be put into service, until MSHA has initially inspected the equipment and determined that it is in compliance with all the terms and conditions of the PDO granted by MSHA.

(h) Prior to energizing the 3M Versaflo TR–800 or the CleanSpace EX PAPR in the return air outby the last open crosscut, methane tests shall be made in accordance with 30 CFR 75.323(a).

(i) All hand-held methane detectors shall be MSHA-approved and maintained in permissible and proper operating condition as defined by 30 CFR 75.320. All methane detectors shall provide visual and audible warnings when methane is detected in concentrations at or above 1.0 percent.

(j) A qualified person as defined in 30 CFR 75.151 shall continuously monitor for methane immediately before and during the use of the 3M Versaflo TR–800 or CleanSpace EX PAPR in the return air outby the last open crosscut.

(k) Neither the 3M Versaflo TR–800 nor the CleanSpace EX PAPR shall be used if methane is detected in concentrations at or above 1.0 percent. When 1.0 percent or more methane is detected while the 3M Versaflo TR–800 or CleanSpace EX PAPR is being used, the equipment shall be de-energized immediately and the equipment withdrawn outby the last open crosscut.

(l) The operation and location of the 3M Versaflo TR–800 and CleanSpace EX PAPRs during underground blasting operations shall be defined in accordance with 30 CFR 75.1312(e)(1), 30 CFR 75.1313(b)(1), and individualized underground blasting permits approved by the District Manager.

(m) Only the 3M TR–830 Battery Pack shall be used, which meets lithium battery safety standard UL 1642 or IEC 62133, in the 3M Versaflo TR–800 PAPR. Use only the CleanSpace EX Power Unit, which meets lithium battery safety standard UL 1642 or IEC 62133, in the CleanSpace EX PAPR.

(n) Before each shift when the 3M Versaflo TR–800 or CleanSpace EX PAPR is to be used, all batteries and power units for the equipment shall be charged sufficiently for the expected usage on that shift. If spare battery packs for the 3M Versaflo TR–800 PAPR are provided, all battery ''change outs'' shall occur in intake air outby the last open crosscut.

(o) The following maintenance and use conditions shall apply to equipment containing lithium-type batteries:

(1) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX Power Unit may be disassembled nor modified by anyone other than permitted by the manufacturer of the equipment.

(2) The 3M TR–830 Battery Pack shall be charged only in an area free of combustible material, readily monitored and located on the surface of the mine. The 3M TR–830 Battery Pack shall be charged only by a manufacturer's recommended battery charger, such as:

(i) 3M Battery Charger Kit TR–641N, which includes one 3M Charger Cradle TR–640 and one 3M Power Supply TR–941N, or

(ii) 3M 4-Station Battery Charger Kit TR–644N, which includes four 3M Charger Cradles TR–640 and one 3M 4-Station Battery Charger Base/Power Supply TR–944N.

(3) The CleanSpace EX internal battery, which is contained within the power unit assembly, shall be charged in areas located outby the last open crosscut in intake air as per 30 CFR 75.340, or in an area free of combustible material, readily monitored and located on the surface of the mine, and only the manufacturer's recommended battery chargers may be used, such as the CleanSpace EX Battery Charger, Product Code PAF–0066.

(4) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX power unit which contains the internal battery, shall be exposed to water, allowed to get wet or immersed in liquid. This does not preclude incidental exposure of the 3M TR–830 Battery Pack or the CleanSpace EX power unit assembly.

(5) Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR, including the internal battery, shall be used, charged or stored in locations where the manufacturer's recommended temperature limits are exceeded. Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR shall be placed in direct sunlight nor stored near a source of heat.

(6) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX PAPR's internal battery shall be used at the end of its life cycle (*i.e.,* when there is a performance decrease of greater than 20 percent in battery-operated equipment). The 3M TR–830 Battery Pack and the CleanSpace EX power unit containing the internal battery shall be disposed of properly.

(p) Personnel engaged in the use of the 3M Versaflo TR–800 and CleanSpace EX PAPRs shall be properly trained to recognize the hazards and limitations associated with the use of the equipment in areas where methane could be present. Additionally, personnel shall be trained regarding proper procedures for donning self-contained self rescuers (SCSRs) during a mine emergency while wearing the 3M Versaflo TR–800 or CleanSpace EX PAPR. The mine operator shall submit proposed revisions to update the Mine Emergency Evacuation and Firefighting Program of Instruction under 30 CFR 75.1502.

(q) Within 60 days after the PDO granted by MSHA becomes final, the operator shall submit proposed revisions for its approved 30 CFR part 48 training plans to the Mine Safety and Health Enforcement District Manager. These proposed revisions shall specify initial and refresher training regarding the terms and conditions stated in the PDO granted by MSHA. When training is conducted on the terms and conditions in the PDO granted by MSHA, an MSHA Certificate of Training (Form 5000–23) shall be completed. Comments shall be included on the Certificate of Training indicating that the training received was for use of the 3M Versaflo TR–800 or the CleanSpace EX PAPR.

(r) All personnel who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs shall receive training in accordance with 30 CFR 48.7 on the

requirements of the PDO granted by MSHA within 60 days of the date the PDO granted by MSHA becomes final. Such training shall be completed before any 3M Versaflo TR–800 or CleanSpace EX PAPR can be used in the return air outby the last open crosscut. The operator shall keep a record of such training and provide such record to MSHA upon request.

(s) The operator shall provide annual retraining to all personnel who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs in accordance with 30 CFR 48.8. The operator shall train new miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.5, and shall train experienced miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.6. The operator shall keep a record of such training and provide such record to MSHA upon request.

(t) The operator shall post the PDO granted by MSHA in unobstructed locations on the bulletin boards and/or in other conspicuous places where notices to miners are ordinarily posted, for a period of not less than 60 consecutive days.

(u) There are no representatives of miners at Greenbrier Minerals LLC, Powellton # 1 Mine, Lower War Eagle, Muddy Bridge, or Eagle No. 1 Mine. A copy of this petition has been posted on the bulletin board as of September 12, 2024.

The petitioner asserts that the alternative method will guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4520–43–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Panther Creek Mining, LLC.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before December 18, 2024.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2024–077 by any of the following methods:

1. *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments for MSHA–2024–077.
2. *Fax:* 202–693–9441.
3. *Email: petitioncomments@dol.gov.*
4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk, 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–052–C.

Petitioner: Panther Creek Mining, LLC, 250 West Main Street, Suite 2000 Lexington KY 40507.

Mine: Maple Eagle #1 Mine, MSHA ID No. 46–04236, located in Fayette County, West Virginia.

Regulation Affected: 30 CFR 75.1002(a), Permissible electric equipment.

Modification Request: The petitioner requests a modification of 30 CFR 75.1002(a) to allow the use of unapproved Powered Air Purifying Respirators (PAPRs) within 150 feet of pillar workings or longwall faces. Specifically, the petitioner is requesting to utilize the CleanSpace EX PAPR and sealed motor/blower/battery power pack assembly, and the 3M Versaflo TR–800 Intrinsically Safe PAPR motor/blower and battery with battery pack.

The petitioner states that:

(a) The 3M Versaflo TR–800 PAPR with motor/blower and battery qualifies as intrinsically safe.

(b) The CleanSpace EX PAPR also qualifies as intrinsically safe.

(c) Both the CleanSpace EX and the 3M Versaflo TR–800 PAPRs provide a constant flow of air inside the mask or helmet. This airflow provides respiratory protection and comfort in hot working conditions.

(d) Neither the 3M Versaflo TR–800 nor the CleanSpace EX PAPR is MSHA-approved as permissible.

(e) Neither the 3M nor the CleanSpace is pursuing MSHA approval.

(f) Maple Eagle #1 Mine currently makes available to all miners NIOSH-approved high efficiency l00 series respirators to protect the miners against potential exposure to respirable coal mine dust, including crystalline silica, during normal mining conditions. Maple Eagle #1 Mine desires to expand the miners' option in choosing a respirator that provides the greatest degree of protection as well as comfort while being worn. Powered PAPRs provide a constant flow of filtered air and serve that purpose.

(g) On June 17, 2024, a final rule entitled *Lowering Miners' Exposure to Respirable Crystalline Silica and Improving Respiratory Protection* took effect. This rule requires the mine operator to have a written respiratory protection program in place when miners are required to use respirators. Adding the CleanSpace EX and the 3M TR–800 Versaflo PAPRs to the respiratory protection program as additional options will provide the miners with alternatives to the series 100 high efficiency respirators already in use at the mine. The PAPRs will also serve as a respirator option to protect the miners with facial hair who may not be able to pass the ''fit test'' requirement of the program. In addition, the positive flow of filtered air provided by the

PAPRs will provide a solution for the miners who are unable to wear a tight-fitting respirator.

(h) Since the 3M Airstream Headgear-Mounted PAPR System has been discontinued by the manufacturer, there are no other MSHA-approved units available that can be used within 150 feet of pillar workings or longwall faces.

(i) The alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

The petitioner proposes the following alternative method:

(a) All miners who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs shall receive training in accordance with 30 CFR 48.7 on the requirements of the Proposed Decision and Order (PDO) granted by MSHA and manufacturer guidelines. Such training shall be completed before any 3M Versaflo TR–800 or CleanSpace EX PAPR can be used within 150 feet of pillar workings or longwall faces. The operator shall keep a record of such training and provide such record to MSHA upon request.

(b) The PAPRs, battery packs, all associated wiring and connections shall be inspected before use to determine if there is any damage to the units that would negatively impact intrinsic safety. If any defects are found, the PAPR shall be removed from service.

(c) A separate logbook shall be maintained for the 3M Versaflo TR–800 and CleanSpace EX PAPRs that will be kept with the equipment, or in a location with other mine record books and shall be made available to MSHA upon request. The equipment shall be examined at least weekly by a qualified person as defined in 30 CFR 75.512–1 and the examination results recorded in the logbook. Examination records shall be maintained for one year.

(d) All 3M Versaflo TR–800 and CleanSpace EX PAPRs to be used within 150 feet of pillar workings or longwall faces shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment prior to taking the equipment underground to ensure the equipment is used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The examinations for the 3M Versaflo TR–800 PAPRs shall include:

(1) Check the equipment for any physical damage and the integrity of the case;

(2) Remove the battery and inspect for corrosion;

(3) Inspect the contact points to ensure a secure connection to the battery;

(4) Reinsert the battery and power up and shut down to ensure proper connections;

(5) Check the battery compartment cover or battery attachment to ensure that it is securely fastened; and

(6) For equipment utilizing lithium type cells, ensure that lithium cells and/or packs are not damaged or swelled in size.

The CleanSpace EX PAPR does not have an accessible/removable battery. The internal battery and motor/blower assembly are both contained within the ''power unit'' assembly and the battery cannot be removed, reinserted or fastened. Therefore, examination of the CleanSpace EX PAPR shall include any indications of physical damage.

(e) All 3M Versaflo TR–800 and CleanSpace EX PAPR units shall be serviced according to the manufacturer's recommendations.

(f) Prior to energizing and during use of the 3M Versaflo TR–800 or the CleanSpace EX PAPR within 150 feet of pillar workings or longwall faces, procedures in accordance with 30 CFR 75.323 shall be followed.

(g) Only the 3M TR–830 Battery Pack, which meets lithium battery safety standard UL 1642 or IEC 62133, in the 3M Versaflo TR–800 PAPR shall be used. Only the CleanSpace EX Power Unit, which meets lithium battery safety standard UL 1642 or IEC 62133, in the CleanSpace EX shall be used.

(h) If battery packs for the 3M Versaflo TR–800 PAPR are provided, all battery ''change outs'' shall occur in intake air outby the last open crosscut.

(i) The following maintenance and use conditions shall apply to equipment containing lithium type batteries:

(1) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX Power Unit shall be disassembled nor modified by anyone other than permitted by the manufacturer of the equipment.

(2) The 3M TR–830 Battery Pack shall be charged only in an area free of combustible material and in intake air outby the last open crosscut. The 3M TR–830 Battery Pack shall be charged only by a manufacturer's recommended battery charger, such as:

(i) 3M Battery Charger Kit TR–641N, which includes one 3M Charger Cradle TR–640 and one 3M Power Supply TR–941N, or

(ii) 3M 4-Station Battery Charger Kit TR–644N, which includes four 3M Charger Cradles TR–640 and one 3M 4-Station Battery Charger Base/Power Supply TR–944N.

(3) The CleanSpace EX internal battery, which is contained within the power unit assembly, shall be charged in areas located outby the last open crosscut in intake air and only the manufacturer's recommended battery chargers shall be used, such as the CleanSpace EX Battery Charger, Product Code PAF–0066.

(4) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX power unit which contains the internal battery, shall be exposed to water, allowed to get wet or immersed in liquid. This does not preclude incidental exposure of the 3M TR–830 Battery Pack or the CleanSpace EX power unit assembly.

(5) Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR, including the internal battery, shall be used, charged, or stored in locations where the manufacturer's recommended temperature limits are exceeded. Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR shall be placed in direct sunlight nor stored near a source of heat.

(j) Annual retraining shall be given to all miners who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs in accordance with 30 CFR 48.8. Training of new miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.5, and training of experienced miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.6 shall be given. The operator shall keep a record of such training and provide such record to MSHA upon request.

(k) The miners at Panther Creek Mining, LLC, Maple Eagle #1 Mine are not represented by a labor organization and there are no representatives of miners at the mine. A copy of this petition has been posted on the bulletin board at Maple Eagle #1 Mine, on October 16, 2024.

The petitioner asserts that the alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4520–43–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Panther Creek Mining, LLC.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before December 18, 2024.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2024–0069 by any of the following methods:

1. *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments for MSHA–2024–0069.
2. *Fax:* 202–693–9441.
3. *Email: petitioncomments@dol.gov.*
4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk, 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or
2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–045–C.

Petitioner: Panther Creek Mining, LLC, PO Box 99 Dawes, WV 25054.

Mine: Speed Mine, MSHA ID No. 46–05437, located in Kanawha County, West Virginia, and Winchester 2 Mine, MSHA ID No. 46–09615, located in Kanawha County, West Virginia.

Regulation Affected: 30 CFR 75.507–1(a), Permissible electric equipment.

Modification Request: The petitioner requests a modification of 30 CFR 75.507–1(a) to allow the use of unapproved Powered Air Purifying Respirators (PAPRs) taken into or used inby the last open crosscut or used in the return air outby the last open crosscut. Specifically, the petitioner is requesting to utilize the CleanSpace EX PAPR and sealed motor/blower/battery power pack assembly, and the 3M Versaflo TR–800 Intrinsically Safe PAPR motor/blower and battery with battery pack.

The petitioner states that:

(a) The 3M Versaflo TR–800 PAPR with motor/blower and battery qualifies as intrinsically safe.

(b) The CleanSpace EX PAPR also qualifies as intrinsically safe.

(c) Both the CleanSpace EX and the 3M Versaflo TR–800 PAPRs provide a constant flow of air inside the mask or helmet. This airflow provides respiratory protection and comfort in hot working conditions.

(d) Neither the 3M Versaflo TR–800 nor the CleanSpace EX PAPR is MSHA-approved as permissible.

(e) Neither the 3M nor the CleanSpace is pursuing MSHA approval.

(f) Speed Mine and Winchester 2 Mine currently make available to all miners NIOSH-approved high efficiency l00 series respirators to protect the miners against potential exposure to respirable coal mine dust, including crystalline silica, during normal mining conditions. Speed Mine and Winchester 2 Mine desire to expand the miners' option in choosing a respirator that provides the greatest degree of protection as well as comfort while being worn. Powered PAPRs provide a constant flow of filtered air and serve that purpose.

(g) On June 17, 2024, a final rule entitled *Lowering Miners' Exposure to Respirable Crystalline Silica and Improving Respiratory Protection* took effect. The rule requires the mine operator to have a written respiratory protection program in place when miners are required to use respirators. Adding the CleanSpace EX and the 3M TR–800 Versaflo PAPRs to the respiratory protection program as additional options will provide the miners with alternatives to the series 100 high efficiency respirators already in use at the mine. The PAPRs will also serve as a respirator option to protect the miners with facial hair who may not be able to pass the ''fit test'' requirement of the program. In addition, the positive flow of filtered air provided by the PAPRs will provide a solution for the miners who are unable to wear a tight-fitting respirator.

(h) Since the 3M Airstream Headgear-Mounted PAPR System has been discontinued by the manufacturer, there are no other MSHA-approved units available that can be taken into or used inby the last open crosscut or used in return air outby the last open crosscut.

(i) The alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

The petitioner proposes the following alternative method:

(a) All miners who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs shall receive training in accordance with 30 CFR 48.7 on the requirements of the Proposed Decision and Order (PDO) granted by MSHA and manufacturer guidelines. Such training shall be completed before any 3M Versaflo TR–800 or CleanSpace EX PAPR can be used inby the last open crosscut or in the return air outby the last open crosscut. The operator shall keep a record of such training and provide such record to MSHA upon request.

(b) The PAPRs, battery packs, all associated wiring and connections shall be inspected before use to determine if there is any damage to the units that would negatively impact intrinsic safety. If any defects are found, the PAPR shall be removed from service.

(c) A separate logbook shall be maintained for the 3M Versaflo TR–800 and CleanSpace EX PAPRs that will be kept with the equipment, or in a location with other mine record books and shall be made available to MSHA upon request. The equipment shall be examined at least weekly by a qualified

person as defined in 30 CFR 75.512–1 and the examination results recorded in the logbook. Examination records shall be maintained for one year.

(d) All 3M Versaflo TR–800 and CleanSpace EX PAPRs to be used inby the last open crosscut or in the return air outby the last open crosscut shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment prior to taking the equipment underground to ensure the equipment is used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The examinations for the 3M Versaflo TR–800 PAPRs shall include:

(1) Check the equipment for any physical damage and the integrity of the case;

(2) Remove the battery and inspect for corrosion;

(3) Inspect the contact points to ensure a secure connection to the battery;

(4) Reinsert the battery and power up and shut down to ensure proper connections;

(5) Check the battery compartment cover or battery attachment to ensure that it is securely fastened; and

(6) For equipment utilizing lithium type cells, ensure that lithium cells and/or packs are not damaged or swelled in size.

The CleanSpace EX PAPR does not have an accessible/removable battery. The internal battery and motor/blower assembly are both contained within the ''power unit'' assembly and the battery cannot be removed, reinserted or fastened. Therefore, examination of the CleanSpace EX PAPR shall include any indications of physical damage.

(e) All 3M Versaflo TR–800 and CleanSpace EX PAPR units shall be serviced according to the manufacturer's recommendations.

(f) Prior to energizing and during use of the 3M Versaflo TR–800 or the CleanSpace EX PAPR inby the last open crosscut or in the return air outby the last open crosscut, procedures in accordance with 30 CFR 75.323 shall be followed.

(g) Only the 3M TR–830 Battery Pack, which meets lithium battery safety standard UL 1642 or IEC 62133, in the 3M Versaflo TR–800 PAPR shall be used. Only the CleanSpace EX Power Unit, which meets lithium battery safety standard UL 1642 or IEC 62133, in the CleanSpace EX shall be used.

(h) If battery packs for the 3M Versaflo TR–800 PAPR are provided, all battery ''change outs'' shall occur in intake air outby the last open crosscut.

(i) The following maintenance and use conditions shall apply to equipment containing lithium type batteries:

(1) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX Power Unit shall be disassembled nor modified by anyone other than permitted by the manufacturer of the equipment.

(2) The 3M TR–830 Battery Pack shall be charged only in an area free of combustible material and in intake air outby the last open crosscut. The 3M TR–830 Battery Pack shall be charged only by a manufacturer's recommended battery charger, such as:

(i) 3M Battery Charger Kit TR–641N, which includes one 3M Charger Cradle TR–640 and one 3M Power Supply TR–941N, or,

(ii) 3M 4-Station Battery Charger Kit TR–644N, which includes four 3M Charger Cradles TR–640 and one 3M 4-Station Battery Charger Base/Power Supply TR–944N.

(3) The CleanSpace EX internal battery, which is contained within the power unit assembly, shall be charged in areas located outby the last open crosscut in intake air and only the manufacturer's recommended battery chargers shall be used, such as the CleanSpace EX Battery Charger, Product Code PAF–0066.

(4) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX power unit which contains the internal battery, shall be exposed to water, allowed to get wet or immersed in liquid. This does not preclude incidental exposure of the 3M TR–830 Battery Pack or the CleanSpace EX power unit assembly.

(5) Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR, including the internal battery, shall be used, charged or stored in locations where the manufacturer's recommended temperature limits are exceeded. Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR shall be placed in direct sunlight nor stored near a source of heat.

(j) Annual retraining shall be given to all miners who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs in accordance with 30 CFR 48.8. Training of new miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.5, and training of experienced miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.6 shall be given. The operator shall keep a record of such training and provide such record to MSHA upon request.

(k) The miners at Speed Mine and Winchester 2 Mine are not represented by a labor organization and there are no representatives of miners at the mine. A copy of this petition has been posted on the bulletin board at Speed Mine and Winchester 2 Mine, on October 4, 2024.

The petitioner asserts that the alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Panther Creek Mining, LLC.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before December 18, 2024.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2024–0075 by any of the following methods:

1. *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments for MSHA–2024–0075.
2. *Fax:* 202–693–9441.
3. *Email: petitioncomments@dol.gov.*
4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk, 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–050–C.

Petitioner: Panther Creek Mining, LLC, 250 West Main Street, Suite 2000 Lexington KY 40507.

Mine: Maple Eagle #1 Mine, MSHA ID No. 46–04236, located in Fayette County, West Virginia.

Regulation Affected: 30 CFR 75.500(d), Permissible electric equipment.

Modification Request: The petitioner requests a modification of 30 CFR 75.500(d) to allow the use of unapproved Powered Air Purifying Respirators (PAPRs) taken into or used inby the last open crosscut. Specifically, the petitioner is requesting to utilize the CleanSpace EX PAPR and sealed motor/blower/battery power pack assembly, and the 3M Versaflo TR–800 Intrinsically Safe PAPR motor/blower and battery with battery pack.

The petitioner states that:

(a) The 3M Versaflo TR–800 PAPR with motor/blower and battery qualifies as intrinsically safe.

(b) The CleanSpace EX PAPR also qualifies as intrinsically safe.

(c) Both the CleanSpace EX and the 3M Versaflo TR–800 PAPRs provide a constant flow of air inside the mask or helmet. This airflow provides respiratory protection and comfort in hot working conditions.

(d) Neither the 3M Versaflo TR–800 nor the CleanSpace EX PAPR is MSHA-approved as permissible.

(e) Neither the 3M nor the CleanSpace is pursuing MSHA approval.

(f) Maple Eagle #1 Mine currently makes available to all miners NIOSH-approved high efficiency l00 series respirators to protect the miners against potential exposure to respirable coal mine dust, including crystalline silica, during normal mining conditions. Maple Eagle #1 Mine desires to expand the miners' option in choosing a respirator that provides the greatest degree of protection as well as comfort while being worn. Powered PAPRs provide a constant flow of filtered air and serve that purpose.

(g) On June 17, 2024, a final rule entitled *Lowering Miners' Exposure to Respirable Crystalline Silica and Improving Respiratory Protection* took effect. The rule requires the mine operator to have a written respiratory protection program in place when miners are required to use respirators. Adding the CleanSpace EX and the 3M TR–800 Versaflo PAPRs to the respiratory protection program as additional options will provide the miners with alternatives to the series 100 high efficiency respirators already in use at the mine. The PAPRs will also serve as a respirator option to protect the miners with facial hair who may not be able to pass the ''fit test'' requirement of the program. In addition, the positive flow of filtered air provided by the PAPRs will provide a solution for the miners who are unable to wear a tight-fitting respirator.

(h) Since the 3M Airstream Headgear-Mounted PAPR System has been discontinued by the manufacturer, there are no other MSHA-approved units available that can be taken into or used inby the last open crosscut.

(i) The alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

The petitioner proposes the following alternative method:

(a) All miners who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs shall receive training in accordance with 30 CFR 48.7 on the requirements of the Proposed Decision and Order (PDO) granted by MSHA and manufacturer guidelines. Such training shall be completed before any 3M Versaflo TR–800 or CleanSpace EX PAPR can be used inby the last open crosscut. The operator shall keep a record of such training and provide such record to MSHA upon request.

(b) The PAPRs, battery packs, and all associated wiring and connections shall be inspected before use to determine if there is any damage to the units that would negatively impact intrinsic safety. If any defects are found, the PAPR shall be removed from service.

(c) A separate logbook shall be maintained for the 3M Versaflo TR–800 and CleanSpace EX PAPRs that will be kept with the equipment, or in a location with other mine record books and shall be made available to MSHA upon request. The equipment shall be examined at least weekly by a qualified person as defined in 30 CFR 75.512–1 and the examination results shall be recorded in the logbook. Examination records shall be maintained for one year.

(d) All 3M Versaflo TR–800 and CleanSpace EX PAPRs to be used inby the last open crosscut shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment prior to taking the equipment underground to ensure the equipment is used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The examinations for the 3M Versaflo TR–800 PAPRs shall include:

(1) Check the equipment for any physical damage and the integrity of the case;

(2) Remove the battery and inspect for corrosion;

(3) Inspect the contact points to ensure a secure connection to the battery;

(4) Reinsert the battery and power up and shut down to ensure proper connections;

(5) Check the battery compartment cover or battery attachment to ensure that it is securely fastened; and

(6) For equipment utilizing lithium type cells, ensure that lithium cells and/or packs are not damaged or swelled in size.

The CleanSpace EX PAPR does not have an accessible/removable battery. The internal battery and motor/blower assembly are both contained within the ''power unit'' assembly and the battery cannot be removed, reinserted or fastened. Therefore, examination of the CleanSpace EX PAPR shall include any indications of physical damage.

(e) All 3M Versaflo TR–800 and CleanSpace EX PAPR units shall be serviced according to the manufacturer's recommendations.

(f) Prior to energizing and during use of the 3M Versaflo TR–800 or the CleanSpace EX PAPR inby the last open crosscut, procedures in accordance with 30 CFR 75.323 shall be followed.

(g) Only the 3M TR–830 Battery Pack, which meets lithium battery safety standard UL 1642 or IEC 62133, in the

3M Versaflo TR–800 PAPR shall be used. Only the CleanSpace EX Power Unit, which meets lithium battery safety standard UL 1642 or IEC 62133, in the CleanSpace EX shall be used.

(h) If battery packs for the 3M Versaflo TR–800 PAPR are provided, all battery ''change outs'' shall occur in intake air outby the last open crosscut.

(i) The following maintenance and use conditions shall apply to equipment containing lithium type batteries:

(1) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX Power Unit shall be disassembled nor modified by anyone other than permitted by the manufacturer of the equipment.

(2) The 3M TR–830 Battery Pack shall be charged only in an area free of combustible material and in intake air outby the last open crosscut. The 3M TR–830 Battery Pack shall be charged only by a manufacturer's recommended battery charger, such as:

(i) 3M Battery Charger Kit TR–641N, which includes one 3M Charger Cradle TR–640 and one 3M Power Supply TR–941N, or

(ii) 3M 4-Station Battery Charger Kit TR–644N, which includes four 3M Charger Cradles TR–640 and one 3M 4-Station Battery Charger Base/Power Supply TR–944N.

(3) The CleanSpace EX internal battery, which is contained within the power unit assembly, shall be charged in areas located outby the last open crosscut in intake air and only the manufacturer's recommended battery chargers shall be used, such as the CleanSpace EX Battery Charger, Product Code PAF–0066.

(4) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX power unit which contains the internal battery, shall be exposed to water, allowed to get wet or immersed in liquid. This does not preclude incidental exposure of the 3M TR–830 Battery Pack or the CleanSpace EX power unit assembly.

(5) Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR, including the internal battery, shall be used, charged or stored in locations where the manufacturer's recommended temperature limits are exceeded. Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR shall be placed in direct sunlight nor stored near a source of heat.

(j) Annual retraining shall be given to all miners who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs in accordance with 30 CFR 48.8. Training of new miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.5, and training of experienced miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.6 shall be given. The operator shall keep a record of such training and provide such record to MSHA upon request.

(k) The miners at Panther Creek Mining, LLC, Maple Eagle #1 Mine are not represented by a labor organization and there are no representatives of miners at the mine. A copy of this petition has been posted on the bulletin board at Maple Eagle #1 Mine, on October 16, 2024.

The petitioner asserts that the alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Panther Creek Mining, LLC.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before December 18, 2024.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2024–0076 by any of the following methods:

1. *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments for MSHA–2024–0076.

2. *Fax:* 202–693–9441.

3. *Email: petitioncomments@dol.gov.*

4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk, 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–051–C.

Petitioner: Panther Creek Mining, LLC, 250 West Main Street, Suite 2000 Lexington KY 40507.

Mine: Maple Eagle #1 Mine, MSHA ID No. 46–04236, located in Fayette County, West Virginia.

Regulation Affected: 30 CFR 75.507–1(a), Permissible electric equipment.

Modification Request: The petitioner requests a modification of 30 CFR 75.507–1(a) to allow

the use of unapproved Powered Air Purifying Respirators (PAPRs) taken into or used inby the last open crosscut or used in the return air outby the last open crosscut. Specifically, the petitioner is requesting to utilize the CleanSpace EX PAPR and sealed motor/blower/battery power pack assembly, and the 3M Versaflo TR–800 Intrinsically Safe PAPR motor/blower and battery with battery pack.

The petitioner states that:

(a) The 3M Versaflo TR–800 PAPR with motor/blower and battery qualifies as intrinsically safe.

(b) The CleanSpace EX PAPR also qualifies as intrinsically safe.

(c) Both the CleanSpace EX and the 3M Versaflo TR–800 PAPRs provide a constant flow of air inside the mask or helmet. This airflow provides respiratory protection and comfort in hot working conditions.

(d) Neither the 3M Versaflo TR–800 nor the CleanSpace EX PAPR is MSHA-approved as permissible.

(e) Neither the 3M nor the CleanSpace is pursuing MSHA approval.

(f) Maple Eagle #1 Mine currently makes available to all miners NIOSH-approved high efficiency l00 series respirators to protect the miners against potential exposure to respirable coal mine dust, including crystalline silica, during normal mining conditions. Maple Eagle #1 Mine desires to expand the miners' option in choosing a respirator that provides the greatest degree of protection as well as comfort while being worn. Powered PAPRs provide a constant flow of filtered air and serve that purpose.

(g) On June 17, 2024, a final rule entitled *Lowering Miners' Exposure to Respirable Crystalline Silica and Improving Respiratory Protection* took effect. The rule requires the mine operator to have a written respiratory protection program in place when miners are required to use respirators. Adding the CleanSpace EX and the 3M TR–800 Versaflo PAPRs to the respiratory protection program as additional options will provide the miners with alternatives to the series 100 high efficiency respirators already in use at the mine. The PAPRs will also serve as a respirator option to protect the miners with facial hair who may not be able to pass the ''fit test'' requirement of the program. In addition, the positive flow of filtered air provided by the PAPRs will provide a solution for the miners who are unable to wear a tight-fitting respirator.

(h) Since the 3M Airstream Headgear-Mounted PAPR System has been discontinued by the manufacturer, there are no other MSHA-approved units available that can be taken into or used inby the last open crosscut or used in return air outby the last open crosscut.

(i) The alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

The petitioner proposes the following alternative method:

(a) All miners who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs shall receive training in accordance with 30 CFR 48.7 on the requirements of the Proposed Decision and Order (PDO) granted by MSHA and manufacturer guidelines. Such training shall be completed before any 3M Versaflo TR–800 or CleanSpace EX PAPR can be used inby the last open crosscut or in the return air outby the last open crosscut. The operator shall keep a record of such training and provide such record to MSHA upon request.

(b) The PAPRs, battery packs, and all associated wiring and connections shall be inspected before use to determine if there is any damage to the units that would negatively impact intrinsic safety. If any defects are found, the PAPR shall be removed from service.

(c) A separate logbook shall be maintained for the 3M Versaflo TR–800 and CleanSpace EX PAPRs that will be kept with the equipment, or in a location with other mine record books and shall be made available to MSHA upon request. The equipment shall be examined at least weekly by a qualified person as defined in 30 CFR 75.512–1 and the examination results recorded in the logbook. Examination records shall be maintained for one year.

(d) All 3M Versaflo TR–800 and CleanSpace EX PAPRs to be used inby the last open crosscut or in the return air outby the last open crosscut shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment prior to taking the equipment underground to ensure the equipment is used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The examinations for the 3M Versaflo TR–800 PAPRs shall include:

(1) Check the equipment for any physical damage and the integrity of the case;

(2) Remove the battery and inspect for corrosion;

(3) Inspect the contact points to ensure a secure connection to the battery;

(4) Reinsert the battery and power up and shut down to ensure proper connections;

(5) Check the battery compartment cover or battery attachment to ensure that it is securely fastened; and

(6) For equipment utilizing lithium type cells, ensure that lithium cells and/or packs are not damaged or swelled in size.

The CleanSpace EX PAPR does not have an accessible/removable battery. The internal battery and motor/blower assembly are both contained within the ''power unit'' assembly and the battery cannot be removed, reinserted or fastened. Therefore, examination of the CleanSpace EX PAPR shall include any indications of physical damage.

(e) All 3M Versaflo TR–800 and CleanSpace EX PAPR units shall be serviced according to the manufacturer's recommendations.

(f) Prior to energizing and during use of the 3M Versaflo TR–800 or the CleanSpace EX PAPR inby the last open crosscut or in the return air outby the last open crosscut, procedures in accordance with 30 CFR 75.323 shall be followed.

(g) Only the 3M TR–830 Battery Pack, which meets lithium battery safety standard UL 1642 or IEC 62133, in the 3M Versaflo TR–800 PAPR shall be used. Only the CleanSpace EX Power Unit, which meets lithium battery safety standard UL 1642 or IEC 62133, in the CleanSpace EX shall be used.

(h) If battery packs for the 3M Versaflo TR–800 PAPR are provided, all battery ''change outs'' shall occur in intake air outby the last open crosscut.

(i) The following maintenance and use conditions shall apply to equipment containing lithium type batteries:

(1) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX Power Unit shall be disassembled nor modified by anyone other than permitted by the manufacturer of the equipment.

(2) The 3M TR–830 Battery Pack shall be charged only in an area free of combustible material and in intake air outby the last open crosscut. The 3M TR–830 Battery Pack shall be charged only by a manufacturer's recommended battery charger, such as the:

(i) 3M Battery Charger Kit TR–641N, which includes one 3M Charger Cradle TR–640 and one 3M Power Supply TR–941N, or

(ii) 3M 4-Station Battery Charger Kit TR–644N, which includes four 3M Charger Cradles TR–640 and one 3M 4-Station Battery Charger Base/Power Supply TR–944N.

(3) The CleanSpace EX internal battery, which is contained within the power unit assembly, shall be charged in areas located outby the last open crosscut in intake air and only the manufacturer's recommended battery chargers shall be used, such as the CleanSpace EX Battery Charger, Product Code PAF–0066.

(4) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX power unit which contains the internal battery, shall be exposed to water, allowed to get wet or immersed in liquid. This does not preclude incidental exposure of the 3M TR–830 Battery Pack or the CleanSpace EX power unit assembly.

(5) Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR, including the internal battery, shall be

used, charged or stored in locations where the manufacturer's recommended temperature limits are exceeded. Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR shall be placed in direct sunlight nor stored near a source of heat.

(j) Annual retraining shall be given to all miners who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs in accordance with 30 CFR 48.8. Training of new miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.5, and training of experienced miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.6 shall be given. The operator shall keep a record of such training and provide such record to MSHA upon request.

(k) The miners at Panther Creek Mining, LLC, Maple Eagle #1 Mine are not represented by a labor organization and there are no representatives of miners at the mine. A copy of this petition has been posted on the bulletin board at Maple Eagle #1 Mine on October 16, 2024.

The petitioner asserts that the alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Panther Creek Mining, LLC.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before December 18, 2024.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2024–0069 by any of the following methods:

1. *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments for MSHA–2024–0069.

2. *Fax:* 202–693–9441.

3. *Email: petitioncomments@dol.gov.*

4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk, 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–044–C.

Petitioner: Panther Creek Mining, LLC, PO Box 99 Dawes, WV 25054.

Mine: Speed Mine, MSHA ID No. 46–05437, located in Kanawha County, West Virginia, and Winchester 2 Mine, MSHA ID No. 46–09615, located in Kanawha County, West Virginia.

Regulation Affected: 30 CFR 75.500(d), Permissible electric equipment.

Modification Request: The petitioner requests a modification of 30 CFR 75.500(d) to allow the use of unapproved Powered Air Purifying Respirators (PAPRs) taken into or used inby the last open crosscut. Specifically, the petitioner is requesting to utilize the CleanSpace EX PAPR and sealed motor/blower/battery power pack assembly, and the 3M Versaflo TR–800 Intrinsically Safe PAPR motor/blower and battery with battery pack.

The petitioner states that:

(a) The 3M Versaflo TR–800 PAPR with motor/blower and battery qualifies as intrinsically safe.

(b) The CleanSpace EX PAPR also qualifies as intrinsically safe.

(c) Both the CleanSpace EX and the 3M Versaflo TR–800 PAPRs provide a constant flow of air inside the mask or helmet. This airflow provides respiratory protection and comfort in hot working conditions.

(d) Neither the 3M Versaflo TR–800 nor the CleanSpace EX PAPR is MSHA-approved as permissible.

(e) Neither the 3M nor the CleanSpace is pursuing MSHA approval.

(f) Speed Mine and Winchester 2 Mine currently make available to all miners NIOSH-approved high efficiency l00 series respirators to protect the miners against potential exposure to respirable coal mine dust, including crystalline silica, during normal mining conditions. Speed Mine and Winchester 2 Mine desire to expand the miners' option in choosing a respirator that provides the greatest degree of protection as well as comfort while being worn. Powered PAPRs provide a constant flow of filtered air and serve that purpose.

(g) On June 17, 2024, a final rule entitled *Lowering Miners' Exposure to Respirable Crystalline Silica and Improving Respiratory Protection* took effect This rule requires the mine operator to have a written respiratory protection program in place when miners are required to use respirators. Adding the CleanSpace EX and the 3M TR–800 Versaflo PAPRs to the respiratory protection program as additional options will provide the miners with alternatives to the series 100 high efficiency respirators already in use at the mine. The PAPRs will also serve as a respirator option to protect the miners with facial hair who may not be able to pass the ''fit test'' requirement of the program. In addition, the positive flow of filtered air provided by the PAPRs will provide a solution for the miners who are unable to wear a tight-fitting respirator.

(h) Since the 3M Airstream Headgear-Mounted PAPR System has been discontinued by the manufacturer, there are no other MSHA-approved units

available that can be taken into or used inby the last open crosscut.

(i) The alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

The petitioner proposes the following alternative method:

(a) All miners who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs shall receive training in accordance with 30 CFR 48.7 on the requirements of the Proposed Decision and Order (PDO) granted by MSHA and manufacturer guidelines. Such training shall be completed before any 3M Versaflo TR–800 or CleanSpace EX PAPR can be used inby the last open crosscut. The operator shall keep a record of such training and provide such record to MSHA upon request.

(b) The PAPRs, battery packs, all associated wiring and connections shall be inspected before use to determine if there is any damage to the units that would negatively impact intrinsic safety. If any defects are found, the PAPR shall be removed from service.

(c) A separate logbook shall be maintained for the 3M Versaflo TR–800 and CleanSpace EX PAPRs that will be kept with the equipment, or in a location with other mine record books and shall be made available to MSHA upon request. The equipment shall be examined at least weekly by a qualified person as defined in 30 CFR 75.512–1 and the examination results recorded in the logbook. Examination records shall be maintained for one year.

(d) All 3M Versaflo TR–800 and CleanSpace EX PAPRs to be used inby the last open crosscut shall be physically examined prior to initial use and each unit shall be assigned a unique identification number. Each unit shall be examined by the person to operate the equipment prior to taking the equipment underground to ensure the equipment is used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition. The examinations for the 3M Versaflo TR–800 PAPRs shall include:

(1) Check the equipment for any physical damage and the integrity of the case.

(2) Remove the battery and inspect for corrosion.

(3) Inspect the contact points to ensure a secure connection to the battery.

(4) Reinsert the battery and power up and shut down to ensure proper connections.

(5) Check the battery compartment cover or battery attachment to ensure that it is securely fastened.

(6) For equipment utilizing lithium type cells, ensure that lithium cells and/or packs are not damaged or swelled in size.

The CleanSpace EX PAPR does not have an accessible/removable battery. The internal battery and motor/blower assembly are both contained within the ''power unit'' assembly and the battery cannot be removed, reinserted or fastened. Therefore, examination of the CleanSpace EX PAPR shall include any indications of physical damage.

(e) All 3M Versaflo TR–800 and CleanSpace EX PAPR units shall be serviced according to the manufacturer's recommendations.

(f) Prior to energizing and during use of the 3M Versaflo TR–800 or the CleanSpace EX PAPR inby the last open crosscut, procedures in accordance with 30 CFR 75.323 shall be followed.

(g) Only the 3M TR–830 Battery Pack, which meets lithium battery safety standard UL 1642 or IEC 62133, in the 3M Versaflo TR–800 PAPR shall be used. Only the CleanSpace EX Power Unit, which meets lithium battery safety standard UL 1642 or IEC 62133, in the CleanSpace EX shall be used.

(h) If battery packs for the 3M Versaflo TR–800 PAPR are provided, all battery ''change outs'' shall occur in intake air outby the last open crosscut.

(i) The following maintenance and use conditions shall apply to equipment containing lithium type batteries:

(1) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX Power Unit shall be disassembled nor modified by anyone other than permitted by the manufacturer of the equipment.

(2) The 3M TR–830 Battery Pack shall be charged only in an area free of combustible material and in intake air outby the last open crosscut. The 3M TR–830 Battery Pack shall be charged only by a manufacturer's recommended battery charger, such as the:

(i) 3M Battery Charger Kit TR–641N, which includes one 3M Charger Cradle TR–640 and one 3M Power Supply TR–941N, or,

(ii) 3M 4-Station Battery Charger Kit TR–644N, which includes four 3M Charger Cradles TR–640 and one 3M 4-Station Battery Charger Base/Power Supply TR–944N.

(3) The CleanSpace EX internal battery, which is contained within the power unit assembly, shall be charged in areas located outby the last open crosscut in intake air and only the manufacturer's recommended battery chargers shall be used, such as the CleanSpace EX Battery Charger, Product Code PAF–0066.

(4) Neither the 3M TR–830 Battery Pack nor the CleanSpace EX power unit which contains the internal battery, shall be exposed to water, allowed to get wet or immersed in liquid. This does not preclude incidental exposure of the 3M TR–830 Battery Pack or the CleanSpace EX power unit assembly.

(5) Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR, including the internal battery, shall be used, charged or stored in locations where the manufacturer's recommended temperature limits are exceeded. Neither the 3M Versaflo TR–800 PAPR nor the CleanSpace EX PAPR shall be placed in direct sunlight nor stored near a source of heat.

(j) Annual retraining shall be given to all miners who will be involved with or affected by the use of the 3M Versaflo TR–800 or CleanSpace EX PAPRs in accordance with 30 CFR 48.8. Training of new miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.5, and training of experienced miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.6 shall be given. The operator shall keep a record of such training and provide such record to MSHA upon request.

(k) The miners at Speed Mine and Winchester 2 Mine are not represented by a labor organization and there are no representatives of miners at the mine. A copy of this petition has been posted on the bulletin board at Speed Mine and Winchester 2 Mine, on October 4, 2024.

The petitioner asserts that the alternative method in the petition will at all times guarantee no less than the same measure of protection afforded to the miners by the standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, 4th Floor West, Arlington, Virginia 22202–5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk, 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–053–C.

Petitioner: Marfork Coal Company, LLC, P.O. Box 457, Whitesville, West Virginia 25209.

Mine: Black Eagle Mine, MSHA ID No. 46–09550, located in Raleigh County, West Virginia.

Regulation Affected: 30 CFR 75.312(c) (Main mine fan examinations and records).

Modification Request: The petitioner requests a modification of 30 CFR 75.312(c) to permit testing the automatic fan stopping signal device without shutting down the mine fan and removing the miners.

The petitioner states that:

(a) The mine extracts coal by the room and pillar method of mining and operates three continuous miner sections producing coal five to six days per week.

(b) The mine has personnel underground 24 hours per day, 7 days per week.

(c) The mine is ventilated by one, Jeffrey model 8HUA117, 1,500 horsepower (hp) and 895 revolutions per minute (rpm), mine fan.

(d) The fan operates at approximately 10 inches of water gauge and moves approximately 635,000 cubic feet per minute.

(e) The mine liberates 777,272 cubic feet of methane every 24 hours as of April 16, 2024.

(f) Currently, the mine fan stops every 31 days to check the fan signal device.

(g) If fan outage lasts longer than 1, 3, or 48 hours, then the fan is required to run for 1, 2, or 3 hours, respectively, before a certified examiner can re-enter the mine to conduct the required examinations.

(h) It is unfavorable to stop the fan and disrupt the ventilation due to the mine liberating methane and personnel being underground 24 hours per day, 7 days per week, making it impossible to schedule a time when the fan stoppage signal can be checked without miners being underground.

The petitioner proposes the following alternative method:

(a) The main fine fan shall be provided with a fan alarm signal system consisting of the following:

(1) A ridged plastic tubing protected by steel conduit extending from the fan ductwork to a Photohelic gauge and chart recorder to continuously monitor the fan operating pressure. An automatic fan signal is activated when the fan pressure falls below 50 percent of the normal operating pressure (which currently equals 5 inches of water gauge) as measured by the Photohelic gauge. This alarm shall be visible and audible in the dispatcher's office.

(2) A Pyott Boone Belt (PBE) model #1610 TA analog scanner monitors the fan. When the fan loses electrical power, the PBE scanner sends a signal to the dispatch office which sounds an alarm. This additional alarm provides a backup in the event the Photohelic gauge or its contacts fail to automatically signal.

(b) The automatic fan signal device shall be tested every seven days by manually operating a valve (Ham-Let valve) near the Photohelic gauge and fan pressure recording chart reducing the pressure on the water gauge to simulate a fan stoppage, causing the activation of the fan signal. The actuation of the fan alarm shall be verified by a responsible person at the location where the responsible person is always on duty when anyone is underground. Once this seven-day test of the alternative method has been successfully repeated for four consecutive weeks, the test frequency shall change to at least every 31 days.

(c) The automatic fan signal device and signal alarm shall be tested every six months by stopping the fan to ensure that the automatic signal device causes the alarm to activate when the fan shuts down.

(d) By the end of the shift on which the test of the automatic fan signal device is completed, person(s) performing the test shall record the result of the test in a secure book. The record book shall be retained at a surface location at the mine for at least one year and shall be made available for inspection by an Authorized Representative of the Secretary.

(e) Within 60 days of the Proposed Decision and Order (PDO) granted by MSHA, Marfork shall submit proposed revisions for its approved 30 CFR 48 training plan to the MSHA District Manager. These proposed revisions shall include initial and refresher training regarding compliance with the PDO granted by MSHA. Miners who are to perform the test under the PDO granted by MSHA shall be trained at least annually on the proper method of testing upon his or her initial assignment to these responsibilities.

(f) The petitioner asserts that this Petition for Modification of Application of Mandatory Standard has been posted on the employee bulletin board at the Black Eagle Mine as of August 30, 2024, and there are no representatives of miners at this operation.

The petitioner asserts that the alternate method proposed will at all times guarantee no less than the same

measure of protection afforded the miners under the mandatory standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice of MACOSH meeting.

SUMMARY: The Maritime Advisory Committee on Occupational Safety and Health (MACOSH) will meet December 3, 2024. Committee members and the public will meet virtually via WebEx.

DATES:

MACOSH full Committee meeting: MACOSH will meet from 9 a.m. to 10:30 a.m., eastern standard time (EST), Tuesday, December 3, 2024.

MACOSH Workgroup meetings: The MACOSH Shipyard and Longshoring Workgroups will meet from 10:30 a.m. to 12 p.m., EST, Tuesday, December 3, 2024.

ADDRESSES: *Submission of comments and requests to speak:* Comments and requests to speak at the MACOSH meeting, including attachments, must be submitted electronically at *www.regulations.gov,* the eRulemaking Portal by November 22, 2024. Comments must be identified by the docket number for this **Federal Register** notice (Docket No. OSHA–2022–0011). Follow the online instructions for submitting comments.

Registration: All persons wishing to attend this virtual meeting must register via the registration link on the MACOSH web page at *https://www.osha.gov/advisorycommittee/macosh.* Upon registration, virtual attendees will receive a WebEx link for remote access to the meeting.

Requests for special accommodations: Submit requests for special accommodations, including translation services, for this MACOSH meeting by November 22, 2024, to Ms. Carla Marcellus, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor; telephone: (202) 693–1865; email: *marcellus.carla@dol.gov.*

Instructions: All submissions must include the agency name and the OSHA docket number for this **Federal Register** notice (Docket No. OSHA–2022–0011). OSHA will place comments, including personal information, in the public docket, which may be made available online. Therefore, OSHA cautions interested parties about submitting personal information such as Social Security numbers and birthdates.

Docket: To read or download documents in the public docket for this MACOSH meeting, go to *www.regulations.gov.* All documents in the public docket are listed in the index; however, some documents (*e.g.,* copyrighted material) are not publicly available to read or download through *www.regulations.gov.* All submissions, including copyrighted material, are available for inspection through the OSHA Docket Office. Contact the OSHA Docket Office at (202) 693–2350 (TTY (877) 889–5627) for assistance in locating docket submissions.

FOR FURTHER INFORMATION CONTACT:

For press inquiries: Mr. Frank Meilinger, Director, OSHA Office of Communications, U.S. Department of Labor; telephone: (202) 693–1999; email: *meilinger.francis2@dol.gov.*

For general information about MACOSH: Ms. Amy Wangdahl, Director, Office of Maritime and Agriculture, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor; telephone: (202) 693–2066; email: *wangdahl.amy@dol.gov.*

Telecommunication requirements: For additional information about the telecommunication requirements for the meeting, please contact Ms. Carla Marcellus, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor; telephone: (202) 693–1865; email: *marcellus.carla@dol.gov.*

For copies of this ***Federal Register*** *Notice:* Electronic copies of this **Federal Register** notice are available at *www.regulations.gov.* This notice, as well as news releases and other relevant information, are also available at OSHA's web page at *www.osha.gov.*

SUPPLEMENTARY INFORMATION:

I. Meeting Information

MACOSH Meeting

MACOSH will meet from 9 a.m.–10:30 a.m., EST, Tuesday, December 3, 2024. Public attendance will be virtual via WebEx. Meeting information will be posted in the docket (Docket No. OSHA–2022–0011) and on the MACOSH web page, *https://www.osha.gov/advisorycommittee/macosh,* prior to the meeting.

The tentative agenda for the full Committee meeting will include reports from the Shipyard and Longshoring workgroups, a presentation on OSHA's National Emphasis Program on Falls and the National Safety Stand-Down to prevent falls, and a presentation from NIOSH on emerging technology in the maritime industry.

MACOSH Workgroup Meetings

The MACOSH Shipyard and Longshoring Workgroups will meet from 10:30 a.m.–12 p.m., EST, Tuesday, December 3, 2024.

Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this notice under the authority granted by 29 U.S.C. 655(b)(1) and 656(d), 5 U.S.C. 10, Secretary of Labor's Order No. 8–2020 (85 FR 58393), and 29 CFR part 1912.

Signed at Washington, DC.

James S. Frederick,

Deputy Assistant Secretary for Occupational Safety and Health.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2016–0005]

Notice of Meeting in Advance of the United Nations Sub-Committee of Experts on the Globally Harmonized System of Classification and Labelling of Chemicals Session

AGENCY: Occupational Safety and Health Administration, Labor.

ACTION: Notice of public meeting.

SUMMARY: This notice is to advise interested persons that OSHA will conduct a virtual public meeting on November 13, 2024, in advance of the 47th session of the United Nations Sub-Committee of Experts on the Globally Harmonized System of Classification and Labelling of Chemicals (UNSCEGHS) to be held as an in-person meeting December 4–6, 2024, in Geneva, Switzerland. OSHA, along with the U.S. Interagency Globally Harmonized System of Classification and Labelling of Chemicals (GHS) Coordinating Group, plans to consider the comments and information gathered at the November 13, 2024, public meeting when developing the U.S. Government positions for the UNSCEGHS meeting December 4–6, 2024.

DATES: OSHA's virtual public meeting will take place on November 13, 2024. Specific information for the meeting

will be posted when available on the OSHA website at *https://www.osha.gov/hazcom/international#meeting-notice.*

ADDRESSES: This meeting will be held virtually, meaning it will be an online meeting where participants interact through digital platforms using video, audio and text communication technologies, and will be hosted by the Department of Labor on November 13, 2024, from 1–4 p.m.

Written Comments: Interested parties may submit written comments until December 4, 2024, on the Working and Informal Papers for the 47th session of the UNSCEGHS to the docket established for International/Globally Harmonized System (GHS) efforts at: *https://www.regulations.gov,* Docket No. OSHA–2016–0005.

Registration to Attend and/or to Participate in the Public Meeting: Registration information and how to participate for the OSHA session will be posted when available on the OSHA website at *https://www.osha.gov/hazcom/international#meeting-notice.*

If you need interpretation or alternative formats or services because of a disability, such as sign language or other ancillary aids, please contact the person listed in the FOR **FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Please contact Ms. Janet Carter, OSHA Directorate of Standards and Guidance, Department of Labor, telephone: (202) 693–2370, email *carter.janet@dol.gov.*

SUPPLEMENTARY INFORMATION: OSHA will conduct a virtual public meeting on November 13, 2024, to discuss proposals in preparation for the in-person 47th session of the UNSCEGHS December 4–6, 2024, in Geneva, Switzerland. Advance registration information for OSHA's virtual public meeting will be posted on the OSHA website.

OSHA will solicit public input on U.S. government positions regarding proposals submitted by member countries until December 4, 2024. Information on the work of the UNSCEGHS, including meeting agendas, working and informal papers, reports, and documents from previous sessions can be found on the United Nations Economic Commission for Europe (UNECE) Transport Division website located at: *https://unece.org/info/Transport/Dangerous-Goods/events/387211.*

Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, authorized the preparation of this notice under the authority granted by sections 4, 6, and 8 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 653, 655, 657), and Secretary's Order 8–2020 (85 FR 58393) (Sept. 18, 2020).

Signed at Washington, DC, on November 7, 2024.

James S. Frederick,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Institute of Museum and Library Services

Submission for Office of Management and Budget (OMB) Review, Comment Request, Proposed Collection: Museum Assessment Program Application and Survey Forms

AGENCY: Institute of Museum and Library Services, National Foundation on the Arts and the Humanities.

ACTION: Submission for OMB review, request for comments, collection of information.

SUMMARY: The Institute of Museum and Library Services announces that the following information collection has been submitted to the Office of Management and Budget for review and approval in accordance with the Paperwork Reduction Act. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. This Notice proposes the clearance of four forms associated with the application process and five customer feedback surveys for the Museum Assessment Program. A copy of the proposed information collection request can be obtained by contacting the individual listed below in the **FOR FURTHER INFORMATION CONTACT** section of this Notice.

DATES: Written comments must be submitted to the office listed in the **ADDRESSES** section below on or before December 18, 2024.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be sent within 30 days of publication of this Notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection request by selecting ''Institute of Museum and Library Services'' under ''Currently Under Review;'' then check ''Only Show ICR for Public Comment'' checkbox. Once you have found this information collection request, select ''Comment,'' and enter or upload your comment and information. Alternatively, please mail your written comments to Office of Information and Regulatory Affairs, Attn.: OMB Desk Officer for Education, Office of Management and Budget, Room 10235, Washington, DC 20503, or call (202) 395–7316.

OMB is particularly interested in comments that help the agency to:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (*e.g.,* permitting electronic submission of responses).

FOR FURTHER INFORMATION CONTACT: Sarah Minnaert, Associate Deputy Director, Office of Museum Services, Institute of Museum and Library Services, 955 L'Enfant Plaza North, SW, Suite 4000, Washington, DC 20024–2135. Ms. Minnaert may be reached by telephone at 202–653–4614, or by email at *sminnaert@imls.gov.* Persons who are deaf or hard of hearing (TTY users) may contact IMLS at 202–207–7858 via 711 for TTY-Based Telecommunications Relay Service.

SUPPLEMENTARY INFORMATION: The Institute of Museum and Library Services is the primary source of federal support for the nation's libraries and museums. We advance, support, and empower America's museums, libraries, and related organizations through grant making, research, and policy development. To learn more, visit *www.imls.gov.*

Current Actions: This Notice proposes the clearance of Museum Assessment Program (MAP) application forms and surveys. The 60-day Notice was published in the **Federal Register** on September 4, 2024 (89 FR 71937)

(Document Number: 2024–19821). The agency received no comments in response to this Notice.

Agency: Institute of Museum and Library Services.

Title: Museum Assessment Program Application Forms.

OMB Control Number: 3137–0101.

Agency Number: 3137.

Respondents/Affected Public: Museum staff.

Total Number of Respondents: 415.

Frequency of Response: Once per request.

Average Hours/Minutes per Response: 13 hours 30 minutes.

Total Estimated Annual Burden Hours: 811.25.

Total Annual Cost Burden: $27,469.

Total Annual Federal Costs: $4,440.

Dated: November 12, 2024.

Suzanne Mbollo,

Grants Management Specialist, Institute of Museum and Library Services.

BILLING CODE 7036–01–P

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request: NSF Research Experience and Mentoring Survey

AGENCY: National Science Foundation.

ACTION: Submission for OMB review; comment request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995. This is the second notice for public comment; the first was published in the **Federal Register**, and no comments were received. NSF is forwarding the proposed submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAmain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Send comments to address below.

FOR FURTHER INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, Room E6447, Alexandria, Virginia 22314; telephone (703) 292–7556; or send email to *splimpto@nsf.gov.* Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including Federal holidays).

Comments: Comments regarding (a) whether the proposed collection of information is necessary for the proper performance of the functions of the NSF, including whether the information shall have practical utility; (b) the accuracy of the NSF's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, use, and clarity of the information on respondents; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to the points of contact in the **FOR FURTHER INFORMATION CONTACT** section.

Copies of the submission may be obtained by calling 703–292–7556. NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number, and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

SUPPLEMENTARY INFORMATION:

Title of Collection: NSF Research Experience and Mentoring Survey.

OMB Number: 3145–0261.

Type of Request: Intent to seek approval to renew an information collection.

Abstract:

The Research Experience and Mentoring (REM) Program supports the active involvement of research participants (RPs) that include high school students, Science, Technology, Engineering and Mathematics (STEM) teachers, undergraduate STEM students, faculty, and veterans, in hands-on research in order to bring participants into contact with STEM mentors and expose them to a summer research experience. Research participants are recruited as cohorts in order to facilitate mentoring and research activities, community building, and provide mutual student support. The main goals of the REM Program are to provide research experiences and mentored opportunities to STEM students and/or educators that may ultimately enhance their career and academic trajectories while enhancing NSF research projects by the Emerging Frontiers in Research and Innovation (EFRI) program, the Engineering Research Centers (ERC), and the Industry-University Cooperative Research Centers (IUCRC). The REM Program may also enable the building of long-term collaborative partnerships among EFRI-,ERC-, and ICUCR-supported researchers, community colleges, local four-year colleges, and local school districts.

A REM supplement of maximum of $110,000 over a 1-year period. Activities that are innovative and site-specific are encouraged. Effective REM programs typically have many of the following characteristics, which are provided here as general guidelines: mentorship training for researchers and affiliated graduate students or postdoctoral researchers; well-designed, introductory training for RPs; Six to ten weeks of summer research (full time); Continued mentorship of RPs throughout the academic year; Participation of RPs in research team meetings and topic-related conferences or workshops; and guidance for RPs in co-authoring publications and/or posters.

NSF is requesting OMB approval for the REM program to collect information from past and present research participants and mentors. The REM program seeks to collect data from research participants and mentors to: (1) *inform REM programming* (*e.g.,* to identify areas of growth); and (2) *conduct retrospective analysis of the REM program* to assess the success of REM historically.

Use of the Information: The information collected is primarily for the use of the NSF REM program to assess the success of the program and for informing decisions NSF will make regarding future programming and support provided to research participants.

Estimate burden on the public: Estimated at 116 hours annually.

Respondents: All REM research participants and mentors will be invited to respond to the survey. The REM research participants include high school students, STEM teachers, undergraduate STEM students, faculty, and veterans.

Estimated number of respondents: 351.

Average Time per Reporting: The online survey is comprised primarily of closed-ended questions and is designed to be completed by respondents in under 20 minutes.

Frequency: Annually.

Dated: November 13, 2024.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

721st Meeting of the Advisory Committee on Reactor Safeguards (ACRS)

In accordance with the purposes of sections 29 and 182b of the Atomic Energy Act (42 U.S.C. 2039, 2232(b)), the Advisory Committee on Reactor Safeguards (ACRS) will hold meetings on December 4–6, 2024. The Committee will be conducting meetings that will include some Members being physically present at the NRC while other Members participate remotely. Interested members of the public are encouraged to participate remotely in any open sessions via MS Teams or via phone at 301–576–2978, passcode 881273578 #. A more detailed agenda including the MSTeams link may be found at the ACRS public website at *https://www.nrc.gov/reading-rm/doc-collections/acrs/agenda/index.html.* If you would like the MSTeams link forwarded to you, please contact the Designated Federal Officer (DFO) as follows: *Quynh.Nguyen@nrc.gov,* or *Lawrence.Burkhart@nrc.gov.*

Wednesday, December 4, 2024

8:30 a.m.–8:35 a.m.: Opening Remarks by the ACRS Chair (Open)—The ACRS Chair will make opening remarks regarding the conduct of the meeting.

8:35 a.m.–10:30 a.m.: Material Reliability Program: Pressurized Water Reactor Internals Inspection and Evaluation Guidelines (MRP–227, Revision 2) (Open)—The Committee will have presentations and discussions with applicant representatives and the NRC staff regarding the subject topic.

10:30 a.m.–12:00 p.m.: Committee Deliberation on MRP–227, Revision 2 (Open)—The Committee will deliberate with the NRC staff regarding the subject topic.

2:00 p.m.–6:00 p.m.: Planning and Procedures Session/Future ACRS Activities/Reconciliation of ACRS Comments and Recommendations/Preparation of Reports (Open/Closed)—The Committee will hear discussion of the recommendations of the Planning and Procedures Subcommittee regarding items proposed for consideration by the Full Committee during future ACRS meetings, and/or proceed to preparation of reports.

*[**Note:** Pursuant to 5 U.S.C. 552b(c)(2), a portion of this meeting may be closed to discuss organizational and personnel matters that relate solely to internal personnel rules and practices of the ACRS.]*

*[**Note:** Pursuant to 5 U.S.C. 552b(c)(4), a portion of this session may be closed in order to discuss and protect information designated as proprietary.].*

Thursday, December 5, 2024

8:30 a.m.–5:00 p.m.: Committee Deliberation and Preparation of Reports (Open)—The Committee will proceed to preparation of reports and Committee deliberation.

Friday, December 6, 2024

8:30 a.m.–5:00 p.m.: Committee Deliberation and Preparation of Reports (Open)—The Committee will proceed to preparation of reports and Committee deliberation.

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on June 13, 2019 (84 FR 27662). In accordance with those procedures, oral or written views may be presented by members of the public, including representatives of the nuclear industry. Persons desiring to make oral statements should notify Quynh Nguyen, Cognizant ACRS Staff and the DFO (Telephone: 301–415–5844, Email: *Quynh.Nguyen@nrc.gov*), 5 days before the meeting, if possible, so that appropriate arrangements can be made to allow necessary time during the meeting for such statements. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chair as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the cognizant ACRS staff if such rescheduling would result in major inconvenience.

An electronic copy of each presentation should be emailed to the cognizant ACRS staff at least one day before the meeting.

In accordance with Subsection 10(d) of Public Law 92–463 and 5 U.S.C. 552b(c), certain portions of this meeting may be closed, as specifically noted above. Use of still, motion picture, and television cameras during the meeting may be limited to selected portions of the meeting as determined by the Chair. Electronic recordings will be permitted only during the open portions of the meeting.

ACRS meeting agendas, meeting transcripts, and letter reports are available through the NRC Public Document Room (PDR) at *pdr.resource@nrc.gov,* or by calling the PDR at 1–800–397–4209, or from the Publicly Available Records System component of NRC's Agencywide Documents Access and Management System, which is accessible from the NRC website at *https://www.nrc.gov/reading-rm/adams.html* or *https://www.nrc.gov/reading-rm/doc-collections/#ACRS/.*

Dated: November 12, 2024.

Russell E. Chazell,

Federal Advisory Committee Management Officer, Office of the Secretary.

NUCLEAR REGULATORY COMMISSION

[NRC–2024–0001]

Sunshine Act Meetings

TIME AND DATE: Weeks of November 18, 25, and December 2, 9, 16, 23, 2024. The schedule for Commission meetings is subject to change on short notice. The NRC Commission Meeting Schedule can be found on the internet at: *https://www.nrc.gov/public-involve/public-meetings/schedule.html.*

PLACE: The NRC provides reasonable accommodation to individuals with disabilities where appropriate. If you need a reasonable accommodation to participate in these public meetings or need this meeting notice or the transcript or other information from the public meetings in another format (*e.g.,* braille, large print), please notify Anne Silk, NRC Disability Program Specialist, at 301–287–0745, by videophone at 240–428–3217, or by email at *Anne.Silk@nrc.gov.* Determinations on requests for reasonable accommodation will be made on a case-by-case basis.

STATUS: Public.

Members of the public may request to receive the information in these notices electronically. If you would like to be added to the distribution, please contact the Nuclear Regulatory Commission, Office of the Secretary, Washington, DC 20555, at 301–415–1969, or by email at *Betty.Thweatt@nrc.gov* or *Samantha.Miklaszewski@nrc.gov.*

MATTERS TO BE CONSIDERED:

Week of November 18, 2024

There are no meetings scheduled for the week of November 18, 2024.

Week of November 25, 2024—Tentative

There are no meetings scheduled for the week of November 25, 2024.

Week of December 2, 2024—Tentative

Thursday, December 5, 2024

10:00 a.m. Briefing on Equal Employment Opportunity, Affirmative Employment, and Small Business (Public Meeting) (Contact: Erin Deeds: 301–415–2887)

Additional Information: The meeting will be held in the Commissioners' Hearing Room, 11555 Rockville Pike, Rockville, Maryland. The public is invited to attend the Commission's meeting in person or watch live via webcast at the Web address—*https://video.nrc.gov/.*

Week of December 9, 2024—Tentative

There are no meetings scheduled for the week of December 9, 2024.

Week of December 16, 2024—Tentative

There are no meetings scheduled for the week of December 16, 2024.

Week of December 23, 2024—Tentative

There are no meetings scheduled for the week of December 23, 2024.

CONTACT PERSON FOR MORE INFORMATION: For more information or to verify the status of meetings, contact Wesley Held at 301–287–3591 or via email at *Wesley.Held@nrc.gov.*

The NRC is holding the meetings under the authority of the Government in the Sunshine Act, 5 U.S.C. 552b.

Dated: November 13, 2024.

For the Nuclear Regulatory Commission.

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* November 20, 2024.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Public Proceeding(s)
III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041. Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. *See* 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)–(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

II. Public Proceeding(s)

1. *Docket No(s).:* CP2020–196; *Filing Title:* Request of the United States Postal Service Concerning Modification Four to Global Reseller Expedited Package 2 Negotiated Service Agreement, Which Includes an Extension of That Agreement; *Filing Acceptance Date:* November 8, 2024; *Filing Authority:* 39 CFR 3035.105, 39 CFR 3041.505, and 39 CFR 3041.515; *Public Representative:* Katalin Clendenin; *Comments Due:* November 20, 2024.

2. *Docket No(s).:* CP2024–126; *Filing Title:* Request of the United States Postal Service Concerning Modification One to Priority Mail Express International, Priority Mail International & First-Class Package International Service Contract 31, Which Includes an Extension of That Agreement; *Filing Acceptance Date:* November 8, 2024; *Filing Authority:* 39 CFR 3035.105, 39 CFR 3041.505, and 39 CFR 3041.515; *Public Representative:* Katalin Clendenin; *Comments Due:* November 20, 2024.

3. *Docket No(s).:* CP2024–423; *Filing Title:* USPS Request Concerning Amendment One to Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 151, with Material Filed Under Seal; *Filing Acceptance Date:* November 8, 2024; *Filing Authority:* 39 CFR 3035.105, 39 CFR 3041.505, and 39 CFR 3041.515; *Public Representative:* Katalin Clendenin; *Comments Due:* November 19, 2024.

RAILROAD RETIREMENT BOARD

Proposed Collection; Comment Request

In accordance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 which provides opportunity for public comment on new or revised data collections, the Railroad Retirement Board (RRB) will publish periodic summaries of proposed data collections.

Comments are invited on: (a) Whether the proposed information collection is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the RRB's estimate of the burden of the collection of the information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden related to the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Title and purpose of information collection: Statement Regarding Contributions and Support of Children; OMB 3220–0195.

Section 2(d)(4) of the Railroad Retirement Act (RRA) (45 U.S.C. 231a), provides, in part, that a child is deemed dependent if the conditions set forth in section 202(d)(3), (4) and (9) of the Social Security Act are met. Section 202(d)(4) of the Social Security Act, as amended by Public Law 104–121, requires as a condition of dependency, that a child receives one-half of his or her support from the stepparent. This dependency impacts upon the entitlement of a spouse or survivor of an employee whose entitlement is based upon having a stepchild of the employee in care, or on an individual seeking a child's annuity as a stepchild of an employee. Therefore, depending on the employee for at least one-half support is a condition affecting eligibility for increasing an employee or spouse annuity under the social security overall minimum provisions on the basis of the presence of a dependent child, the employee's natural child in limited situations, adopted children, stepchildren, grandchildren, step-grandchildren and equitably adopted children. The regulations outlining child support and dependency requirements are prescribed in 20 CFR 222.50–57.

To correctly determine if an applicant is entitled to a child's annuity based on actual dependency, the RRB uses Form G–139, Statement Regarding Contributions and Support of Children, to obtain financial information needed to make a comparison between the amount of support received from the railroad employee and the amount received from other sources. Completion is required to obtain a benefit. One response is required of each respondent. The RRB proposes minor editorial changes to Form G–139 to change the example dates under section 1 ''General Instructions''.

ESTIMATE OF ANNUAL RESPONDENT BURDEN

Form number	Annual responses	Time (minutes)	Burden (hours)
G–139	400	60	400

Additional Information or Comments: To request more information or to obtain a copy of the information collection justification, forms, and/or supporting material or comments regarding the information collection should be addressed to Brian Foster, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611–1275 or emailed to *Brian.Foster@rrb.gov.* Written comments should be received within 60 days of this notice.

Brian Foster,

Clearance Officer.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101576; File No. SR–NYSEARCA–2024–91]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Service for Virtual Control Circuits in the Connectivity Fee Schedule

November 12, 2024.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on October 30, 2024, NYSE Arca, Inc. (''NYSE Arca'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the service for virtual control circuits in the Connectivity Fee Schedule. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the existing service for virtual control circuits (''VCCs'') in the Connectivity Fee Schedule.

A VCC (previously called a ''peer to peer'' connection) is a unicast connection through which two participants can establish a connection between two points over dedicated bandwidth, to be used for any purpose. At the Mahwah, New Jersey data center (''MDC'')[4] the Exchange offers VCCs between two Users.[5] The recurring monthly fees are based upon the bandwidth requirements per VCC connection between two Users.[6]

However, not all VCCs are between two Users in the MDC. Although all VCCs have at least one end that is a User inside the MDC, the other party may be a non-User outside of the MDC at a remote access center, or the VCC can be between a User in the MDC and the same User outside of the MDC at a remote access center. A VCC that goes outside of the MDC herein is called a ''MDC VCC.''

Accordingly, the Exchange proposes to amend the Connectivity Fee Schedule to delete ''between two Users'' after ''Virtual Control Circuit.'' Fees for the service would not change and, as now, connectivity to a VCC would require the permission of the non-billed party before the Exchange would establish the connection.

As background, Users require wired circuits to connect into and out of the MDC. A User's equipment in the MDC's colocation hall connects to a circuit leading out of the MDC, which connects to the User's equipment in their back office or another data center.

Before 2013, all such circuits were provided by ICE's predecessor, NYSE Euronext. In response to customer demand for more connectivity options, in 2013, the MDC opened two ''meet-me-rooms'' to telecommunications service providers (''Telecoms''),[7] to enable Telecoms to offer circuits into the MDC in competition with NYSE Euronext. Currently, 16 Telecoms operate in the meet-me-rooms and provide circuit options to Users requiring connectivity into and out of the MDC.

In addition, FIDS provides two different types of circuits, Optic Low Latency and Optic Access. Optic Access,[8] which is more similar to the MDC VCC, is a circuit between the MDC and the FIDS access centers at five third-party owned data centers: (1) 111 Eighth Avenue, New York, NY; (2) 32 Avenue of the Americas, New York, NY; (3) 165 Halsey, Newark, NJ; (4) Secaucus, NJ; and (5) Carteret, NJ.

Ultimately, the MDC VCCs are similar to the Optic Access FIDS circuits in that, like Optic Access, the MDC VCCs run between the MDC and five FIDS access centers as well as, in the case of the MDC VCCs, additional U.S. FIDS access centers. They are smaller than the Optic Access FIDS circuits, however. While the Exchange has no visibility into how a User utilizes its connections, the Exchange believes that the Optic Access FIDS circuit is used for items that require more bandwidth, like market data, while the MDC VCCs are used for items that require smaller amounts of bandwidth, such as messaging, pre- and post-trade data, or clearing information, as determined by the User. Accordingly, if a User wants a smaller connection to a U.S. access center, or wants to reach an access center that Optic Access does not reach, the MDC VCCs are a viable option.

General

The proposed rule change would not apply differently to distinct types or sizes of market participants. Rather, it would apply to all Users equally. As is currently the case, the Fee Schedule would be applied uniformly to all Users. FIDS does not expect that the proposed rule change will result in new Users.

The proposed change is not otherwise intended to address any other issues relating to co-location services and/or related fees, and the Exchange is not aware of any problems that customers would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[9] in general, and furthers the objectives of Section 6(b)(5) of the Act,[10] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(4) of the Act,[11] because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers.

The Proposed Change Is Reasonable

The Exchange believes that the proposed rule change is reasonable.

Although all VCCs have at least one end that is a User inside the MDC, the other party may be a non-User outside of the MDC at a remote access center, or the VCC can be between a User in the

[4] Through its Fixed Income and Data Services (''FIDS'') (previously ICE Data Services) business, Intercontinental Exchange, Inc. (''ICE'') operates the MDC. The Exchange and the New York Stock Exchange LLC, NYSE American LLC, NYSE Chicago, Inc. and NYSE National, Inc. (together, the ''Affiliate SROs'') are indirect subsidiaries of ICE.

[5] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 76010 (September 29, 2015), 80 FR 60197 (October 5, 2015) (SR–NYSEArca–2015–82). As specified in the Fee Schedule, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Affiliate SROs. Each Affiliate SRO has submitted substantially the same proposed rule change to propose the change described herein. *See* SR–NYSE–2024–69, SR–NYSEAMER–2024–64, SR–NYSECHX–2024–31, and SR–NYSENAT–2024–28.

[6] *See* Securities Exchange Act Release No. 80310 (March 24, 2017), 82 FR 15763 (March 30, 2017) (SR–NYSEArca–2016–89).

[7] Telecommunication service providers that choose to provide circuits at the MDC are referred to as ''Telecoms.'' Telecoms are licensed by the Federal Communications Commission (''FCC'') and are not required to be, or be affiliated with, a member of the Exchange or an Affiliate SRO.

[8] The ''Optic Low Latency'' circuits are lower latency. *See* Securities Exchange Act Release No. 99166 (December 14, 2023), 88 FR 88178 (December 20, 2023) (SR–NYSEARCA–2023–83).

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(5).

[11] 15 U.S.C. 78f(b)(4).

MDC and the same User outside of the MDC at a remote access center. Accordingly, the proposed change is reasonable because it would make the Connectivity Fee Schedule more accurately reflect the usage of VCCs. It would ensure that the description of VCCs was complete, accessible and transparent, and thereby provide market participants with greater clarity.

In considering the reasonableness of proposed services and fees, the Commission's market-based test considers ''whether the exchange was subject to significant competitive forces in setting the terms of its proposal. . . . including the level of any fees.'' [12] If the Exchange meets that burden, ''the Commission will find that its proposal is consistent with the Act unless 'there is a substantial countervailing basis to find that the terms' of the proposal violate the Act or the rules thereunder.'' [13] Here, the Exchange is subject to significant competitive forces in setting the terms on which it offers its proposal, in particular because substantially similar substitutes are available, and the third-party vendors are not at a competitive disadvantage created by the Exchange.

MDC VCCs would compete with circuits currently offered by the 16 third-party Telecoms that have installed their equipment in the MDC's two meet-me-rooms. The Telecom circuits are reasonable substitutes for the MDC VCCs. The Commission has recognized that products do not need to be identical to be considered substitutable; it is sufficient that they be substantially similar.[14] The MDC VCCs, the FIDS circuits, and the circuits provided by the Telecoms all perform the same function: connecting into and out of the MDC. The providers of the MDC VCCs, VCCs between Users, FIDS circuits and Telecom circuits design them to perform with particular combinations of latency, bandwidth, price, termination point, and other factors that they believe will attract Users, and Users choose from among these competing services on the basis of their business needs.

The MDC VCCs are sufficiently similar substitutes to the circuits offered by the 16 Telecoms even though the MDC VCCs all terminate in one of the U.S. remote access centers, while circuits from the 16 Telecoms could terminate in those locations or additional locations. While neither the Exchange nor FIDS knows the end point of any particular Telecom circuit, the Exchange understands that the Telecoms can offer circuits terminating in any location, including the remote access centers where the MDC VCCs would terminate. Moreover, the Telecoms may offer smaller circuits that are the same as or similar size to the MDC VCCs. Ultimately, Users can choose to configure their pathway leading out of colocation in the way that best suits their business needs, which may include connecting to the User's equipment at one of the U.S. remote access center locations that serve as termination points for MDC VCCs, or connecting first to one of those remote access centers with a FIDS- or Telecom-supplied circuit and then further connecting to another remote location using a telecommunication provider-supplied circuit.

Neither the MDC VCCs, Optic Access circuits, nor the Optic Low Latency circuits have a distance or latency advantage over the Telecoms' circuits within the MDC. FIDS has normalized (a) the distance between the meet-me-rooms and the colocation halls and (b) the distance between the rooms where the FIDS circuits and the MDC VCCs exit the MDC and the colocation halls. As a result, a User choosing whether to use the MDC VCCs or Telecom circuits does not face any difference in the distances or latency within the MDC.

The Exchange also believes that the MDC VCCs do not have any latency or bandwidth advantage over the Telecoms' circuits outside of the MDC. The Exchange believes that the Telecoms operating in the meet-me-rooms offer circuits with a variety of latency and bandwidth specifications, some of which may exceed the specifications of the proposed MDC VCCs.[15] The Exchange believes that Users consider these latency and bandwidth factors—as well as other factors, such as price and termination point—in determining which offerings will best serve their business needs.

In sum, the Exchange does not believe that there is anything about the MDC VCCs that would make the Telecoms' circuits inadequate substitutes.

Nor does the Exchange have a competitive advantage over any third-party competitors by virtue of the fact that it owns and operates the MDC's meet-me-rooms. In most cases, circuits coming out of the MDC are provided by the Telecoms.[16] Currently, 16 Telecoms operate in the meet-me-rooms and provide a variety of circuit choices. It is in the Exchange's best interest to set the fees that Telecoms pay to operate in the meet-me-rooms at a reasonable level [17] so that market participants, including Telecoms, will maximize their use of the MDC. By setting the meet-me-room fees at a reasonable level, the Exchange encourages Telecoms to participate in the meet-me-rooms and to sell circuits to Users for connecting into and out of the MDC. These Telecoms then compete with each other by pricing such circuits at competitive rates. These competitive rates for circuits help draw in more Users and Hosted Customers to the MDC, which directly benefits the Exchange by increasing the customer base to whom the Exchange can sell its colocation services, which include cabinets, power, ports, and connectivity to many third-party data feeds, and because having more Users and Hosted Customers leads, in many cases, to greater participation on the Exchange. In this way, by setting the meet-me-room fees at a level attractive to telecommunications firms, the Exchange spurs demand for all of the services it sells at the MDC, while setting the meet-me-room fees too high would negatively affect the Exchange's ability to sell its services at the MDC.[18] Accordingly, there are real constraints on the meet-me-room fees the Exchange charges, such that the Exchange does not have an advantage in terms of costs when compared to third parties that enter the MDC through the meet-me-rooms to

[12] Securities Exchange Act Release No. 90209 (October 15, 2020), 85 FR 67044, 67049 (October 21, 2020) (Order Granting Accelerated Approval to Establish a Wireless Fee Schedule Setting Forth Available Wireless Bandwidth Connections and Wireless Market Data Connections) (SR–NYSE–2020–05, SR–NYSEAMER–2020–05, SR–NYSEArca–2020–08, SR–NYSECHX–2020–02, SR–NYSENAT–2020–03, SR–NYSE–2020–11, SR–NYSEAMER–2020–10, SR–NYSEArca–2020–15, SR–NYSECHX–2020–05, SR–NYSENAT–2020–08) (''Wireless Approval Order''), citing Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74781 (December 9, 2008) (''2008 ArcaBook Approval Order''). *See NetCoalition* v. *SEC,* 615 F.3d 525 (D.C. Cir. 2010).

[13] Wireless Approval Order, *supra* note 12, at 67049, citing 2008 ArcaBook Approval Order, *supra* note 12, at 74781.

[14] *See* 2008 ArcaBook Approval Order, *supra* note 12, at 74789 and note 295 (recognizing that products need not be identical to be substitutable).

[15] The specifications of FIDS's competitors' circuits are not publicly known. The Exchange understands that FIDS has gleaned any information it has about its competitors through anecdotal communications, by observing customers' purchasing choices in the competitive market, and from its own experience as a purchaser of circuits from telecommunications providers to build FIDS's own networks.

[16] Note that in the case of wireless connectivity, a User in colocation still requires a fiber circuit to transport data. If a Telecom is used, the data is transmitted wirelessly to the relevant pole, and then from the pole to the meet-me-room using a fiber circuit.

[17] *See* Securities Exchange Act Release No. 98000 (July 26, 2023), 88 FR 50244 (August 1, 2023) (SR–NYSEARCA–2023–47).

[18] *See id.* at 50246. Importantly, the Exchange is prevented from making any alteration to its meet-me-room services or fees without filing a proposal for such changes with the Commission.

provide services to compete with the Exchange's services.

If the Exchange were to set the price of the MDC VCCs too high, Users would likely respond by choosing one of the many alternative options offered by the 16 Telecoms. Conversely, if the Exchange were to offer the MDC VCCs at prices aimed at undercutting comparable Telecom circuits, the Telecoms might reassess whether it makes financial sense for them to continue to participate in the MDC's meet-me-rooms. Their departure might negatively impact User participation in colocation and on the Exchange. As a result, the Exchange is not motivated to undercut the prices of Telecom circuits.

For these reasons, the proposed change is reasonable.

The Proposed Change Is Equitable

The Exchange believes that the proposed change provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers because it is not designed to permit unfair discrimination between market participants. The proposed change would apply equally to all types and sizes of market participants. It would clarify that all VCCs, irrespective of whether between two Users, a User and non-User outside of the VCC, or the same User, are subject to the same size and cost provisions. In addition, the Exchange believes that the proposal is equitable because only market participants that voluntarily select to receive MDC VCCs would be charged for them.

Moreover, the proposed change would ensure that the Connectivity Fee Schedule accurately reflects the usage of VCCs. It would ensure that the description of VCCs was complete, accessible and transparent, and provide market participants with greater clarity.

The Proposed Change Is Not Unfairly Discriminatory

The Exchange believes its proposal is not unfairly discriminatory. The proposed change does not apply differently to distinct types or sizes of market participants. Rather, it applies to all market participants equally. The purchase of any proposed service is completely voluntary and the Fee Schedule will be applied uniformly to all market participants.

In addition, the Exchange believes that the proposal is equitable because only market participants that voluntarily select to receive MDC VCCs would be charged for them. The MDC VCCs are available to all market participants on an equal basis, and all market participants that voluntarily choose to purchase a MDC VCC are charged the same amount as all other market participants purchasing that type of MDC VCC.

For the reasons above, the proposed change does not unfairly discriminate between or among market participants that are otherwise capable of satisfying any applicable co-location fees, requirements, terms, and conditions established from time to time by the Exchange.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposal will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of Section 6(b)(8) of the Act.[19] The proposed rule change is designed to ensure that the provision on VCCs clarifies that all VCCs, irrespective of whether between two Users, a User and non-User outside of the VCC, or the same User, are subject to the same size and cost provisions. It is not meant to address intramarket or intermarket competition.

The proposed change would enhance competition in the market for circuits transmitting data into and out of colocation at the MDC by adding VCCs, in addition to the 16 Telecoms that also sell circuits to Users and the FIDS circuits. The MDC VCCs do not have any latency, bandwidth, or other advantage over the Telecoms' circuits. The proposal would not burden competition in the sale of such circuits, but rather, enhance it by providing Users with an additional choice for their circuit needs.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[20] and Rule 19b–4(f)(6) thereunder.[21] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[22]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[23] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSEARCA–2024–91 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEARCA–2024–91. This file number should be included on the subject line if email is used. To help the Commission process and review your

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101575; File No. SR–NYSEAMER–2024–64]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing and Immediate Effectiveness of Proposed Change To Amend the Service for Virtual Control Circuits in the Connectivity Fee Schedule

November 12, 2024.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on October 30, 2024, NYSE American LLC (''NYSE American'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the service for virtual control circuits in the Connectivity Fee Schedule. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the existing service for virtual control circuits (''VCCs'') in the Connectivity Fee Schedule.

A VCC (previously called a ''peer to peer'' connection) is a unicast connection through which two participants can establish a connection between two points over dedicated bandwidth, to be used for any purpose. At the Mahwah, New Jersey data center (''MDC'')[4] the Exchange offers VCCs between two Users.[5] The recurring monthly fees are based upon the bandwidth requirements per VCC connection between two Users.[6]

However, not all VCCs are between two Users in the MDC. Although all VCCs have at least one end that is a User inside the MDC, the other party may be a non-User outside of the MDC at a remote access center, or the VCC can be between a User in the MDC and the same User outside of the MDC at a remote access center. A VCC that goes outside of the MDC herein is called a ''MDC VCC.''

Accordingly, the Exchange proposes to amend the Connectivity Fee Schedule to delete ''between two Users'' after ''Virtual Control Circuit.'' Fees for the service would not change and, as now, connectivity to a VCC would require the permission of the non-billed party before the Exchange would establish the connection.

As background, Users require wired circuits to connect into and out of the MDC. A User's equipment in the MDC's colocation hall connects to a circuit leading out of the MDC, which connects to the User's equipment in their back office or another data center.

Before 2013, all such circuits were provided by ICE's predecessor, NYSE Euronext. In response to customer demand for more connectivity options, in 2013, the MDC opened two ''meet-me-rooms'' to telecommunications service providers (''Telecoms''),[7] to enable Telecoms to offer circuits into the MDC in competition with NYSE Euronext. Currently, 16 Telecoms operate in the meet-me-rooms and provide circuit options to Users requiring connectivity into and out of the MDC.

In addition, FIDS provides two different types of circuits, Optic Low Latency and Optic Access. Optic Access,[8] which is more similar to the MDC VCC, is a circuit between the MDC and the FIDS access centers at five

[24] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] Through its Fixed Income and Data Services (''FIDS'') (previously ICE Data Services) business, Intercontinental Exchange, Inc. (''ICE'') operates the MDC. The Exchange and the New York Stock Exchange LLC, NYSE Arca, Inc., NYSE Chicago, Inc. and NYSE National, Inc. (together, the ''Affiliate SROs'') are indirect subsidiaries of ICE.

[5] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 76009 (September 29, 2015), 80 FR 60213 (October 5, 2015) (SR–NYSEMKT–2015–67). As specified in the Fee Schedule, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Affiliate SROs. Each Affiliate SRO has submitted substantially the same proposed rule change to propose the change described herein. *See* SR–NYSE–2024–69, SR–NYSEARCA–2024–91, SR–NYSECHX–2024–31, and SR–NYSENAT–2024–28.

[6] *See* Securities Exchange Act Release No. 80309 (March 24, 2017), 82 FR 15725 (March 30, 2017) (SR–NYSEMKT–2016–63).

[7] Telecommunication service providers that choose to provide circuits at the MDC are referred to as ''Telecoms.'' Telecoms are licensed by the Federal Communications Commission (''FCC'') and are not required to be, or be affiliated with, a member of the Exchange or an Affiliate SRO.

[8] The ''Optic Low Latency'' circuits are lower latency. *See* Securities Exchange Act Release No. 99179 (December 14, 2023), 88 FR 88155 (December 20, 2023) (SR–NYSEAmer–2023–65).

third-party owned data centers: (1) 111 Eighth Avenue, New York, NY; (2) 32 Avenue of the Americas, New York, NY; (3) 165 Halsey, Newark, NJ; (4) Secaucus, NJ; and (5) Carteret, NJ.

Ultimately, the MDC VCCs are similar to the Optic Access FIDS circuits in that, like Optic Access, the MDC VCCs run between the MDC and five FIDS access centers as well as, in the case of the MDC VCCs, additional U.S. FIDS access centers. They are smaller than the Optic Access FIDS circuits, however. While the Exchange has no visibility into how a User utilizes its connections, the Exchange believes that the Optic Access FIDS circuit is used for items that require more bandwidth, like market data, while the MDC VCCs are used for items that require smaller amounts of bandwidth, such as messaging, pre- and post-trade data, or clearing information, as determined by the User. Accordingly, if a User wants a smaller connection to a U.S. access center, or wants to reach an access center that Optic Access does not reach, the MDC VCCs are a viable option.

General

The proposed rule change would not apply differently to distinct types or sizes of market participants. Rather, it would apply to all Users equally. As is currently the case, the Fee Schedule would be applied uniformly to all Users. FIDS does not expect that the proposed rule change will result in new Users.

The proposed change is not otherwise intended to address any other issues relating to co-location services and/or related fees, and the Exchange is not aware of any problems that customers would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[9] in general, and furthers the objectives of Section 6(b)(5) of the Act,[10] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(4) of the Act,[11] because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers.

The Proposed Change Is Reasonable

The Exchange believes that the proposed rule change is reasonable.

Although all VCCs have at least one end that is a User inside the MDC, the other party may be a non-User outside of the MDC at a remote access center, or the VCC can be between a User in the MDC and the same User outside of the MDC at a remote access center. Accordingly, the proposed change is reasonable because it would make the Connectivity Fee Schedule more accurately reflect the usage of VCCs. It would ensure that the description of VCCs was complete, accessible and transparent, and thereby provide market participants with greater clarity.

In considering the reasonableness of proposed services and fees, the Commission's market-based test considers ''whether the exchange was subject to significant competitive forces in setting the terms of its proposal . . . , including the level of any fees.'' [12] If the Exchange meets that burden, ''the Commission will find that its proposal is consistent with the Act unless 'there is a substantial countervailing basis to find that the terms' of the proposal violate the Act or the rules thereunder.'' [13] Here, the Exchange is subject to significant competitive forces in setting the terms on which it offers its proposal, in particular because substantially similar substitutes are available, and the third-party vendors are not at a competitive disadvantage created by the Exchange.

MDC VCCs would compete with circuits currently offered by the 16 third-party Telecoms that have installed their equipment in the MDC's two meet-me-rooms. The Telecom circuits are reasonable substitutes for the MDC VCCs. The Commission has recognized that products do not need to be identical to be considered substitutable; it is sufficient that they be substantially similar.[14] The MDC VCCs, the FIDS circuits, and the circuits provided by the Telecoms all perform the same function: connecting into and out of the MDC. The providers of the MDC VCCs, VCCs between Users, FIDS circuits and Telecom circuits design them to perform with particular combinations of latency, bandwidth, price, termination point, and other factors that they believe will attract Users, and Users choose from among these competing services on the basis of their business needs.

The MDC VCCs are sufficiently similar substitutes to the circuits offered by the 16 Telecoms even though the MDC VCCs all terminate in one of the U.S. remote access centers, while circuits from the 16 Telecoms could terminate in those locations or additional locations. While neither the Exchange nor FIDS knows the end point of any particular Telecom circuit, the Exchange understands that the Telecoms can offer circuits terminating in any location, including the remote access centers where the MDC VCCs would terminate. Moreover, the Telecoms may offer smaller circuits that are the same as or similar size to the MDC VCCs. Ultimately, Users can choose to configure their pathway leading out of colocation in the way that best suits their business needs, which may include connecting to the User's equipment at one of the U.S. remote access center locations that serve as termination points for MDC VCCs, or connecting first to one of those remote access centers with a FIDS- or Telecom-supplied circuit and then further connecting to another remote location using a telecommunication provider-supplied circuit.

Neither the MDC VCCs, Optic Access circuits, nor the Optic Low Latency circuits have a distance or latency advantage over the Telecoms' circuits within the MDC. FIDS has normalized (a) the distance between the meet-me-rooms and the colocation halls and (b) the distance between the rooms where the FIDS circuits and the MDC VCCs exit the MDC and the colocation halls. As a result, a User choosing whether to

[11] 15 U.S.C. 78f(b)(4).

[12] Securities Exchange Act Release No. 90209 (October 15, 2020), 85 FR 67044, 67049 (October 21, 2020) (Order Granting Accelerated Approval to Establish a Wireless Fee Schedule Setting Forth Available Wireless Bandwidth Connections and Wireless Market Data Connections) (SR–NYSE–2020–05, SR–NYSEAMER–2020–05, SR–NYSEArca–2020–08, SR–NYSECHX–2020–02, SR–NYSENAT–2020–03, SR–NYSE–2020–11, SR–NYSEAMER–2020–10, SR–NYSEArca–2020–15, SR–NYSECHX–2020–05, SR–NYSENAT–2020–08) (''Wireless Approval Order''), citing Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74781 (December 9, 2008) (''2008 ArcaBook Approval Order''). *See NetCoalition* v. *SEC,* 615 F.3d 525 (D.C. Cir. 2010).

[13] Wireless Approval Order, *supra* note 12, at 67049, citing 2008 ArcaBook Approval Order, *supra* note 12, at 74781.

[14] *See* 2008 ArcaBook Approval Order, *supra* note 12, at 74789 and note 295 (recognizing that products need not be identical to be substitutable).

use the MDC VCCs or Telecom circuits does not face any difference in the distances or latency within the MDC.

The Exchange also believes that the MDC VCCs do not have any latency or bandwidth advantage over the Telecoms' circuits outside of the MDC. The Exchange believes that the Telecoms operating in the meet-me-rooms offer circuits with a variety of latency and bandwidth specifications, some of which may exceed the specifications of the proposed MDC VCCs.[15] The Exchange believes that Users consider these latency and bandwidth factors—as well as other factors, such as price and termination point—in determining which offerings will best serve their business needs.

In sum, the Exchange does not believe that there is anything about the MDC VCCs that would make the Telecoms' circuits inadequate substitutes.

Nor does the Exchange have a competitive advantage over any third-party competitors by virtue of the fact that it owns and operates the MDC's meet-me-rooms. In most cases, circuits coming out of the MDC are provided by the Telecoms.[16] Currently, 16 Telecoms operate in the meet-me-rooms and provide a variety of circuit choices. It is in the Exchange's best interest to set the fees that Telecoms pay to operate in the meet-me-rooms at a reasonable level [17] so that market participants, including Telecoms, will maximize their use of the MDC. By setting the meet-me-room fees at a reasonable level, the Exchange encourages Telecoms to participate in the meet-me-rooms and to sell circuits to Users for connecting into and out of the MDC. These Telecoms then compete with each other by pricing such circuits at competitive rates. These competitive rates for circuits help draw in more Users and Hosted Customers to the MDC, which directly benefits the Exchange by increasing the customer base to whom the Exchange can sell its colocation services, which include cabinets, power, ports, and connectivity to many third-party data feeds, and because having more Users and Hosted Customers leads, in many cases, to greater participation on the Exchange. In this way, by setting the meet-me-room fees at a level attractive to telecommunications firms, the Exchange spurs demand for all of the services it sells at the MDC, while setting the meet-me-room fees too high would negatively affect the Exchange's ability to sell its services at the MDC.[18] Accordingly, there are real constraints on the meet-me-room fees the Exchange charges, such that the Exchange does not have an advantage in terms of costs when compared to third parties that enter the MDC through the meet-me-rooms to provide services to compete with the Exchange's services.

If the Exchange were to set the price of the MDC VCCs too high, Users would likely respond by choosing one of the many alternative options offered by the 16 Telecoms. Conversely, if the Exchange were to offer the MDC VCCs at prices aimed at undercutting comparable Telecom circuits, the Telecoms might reassess whether it makes financial sense for them to continue to participate in the MDC's meet-me-rooms. Their departure might negatively impact User participation in colocation and on the Exchange. As a result, the Exchange is not motivated to undercut the prices of Telecom circuits.

For these reasons, the proposed change is reasonable.

The Proposed Change Is Equitable

The Exchange believes that the proposed change provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers because it is not designed to permit unfair discrimination between market participants. The proposed change would apply equally to all types and sizes of market participants. It would clarify that all VCCs, irrespective of whether between two Users, a User and non-User outside of the VCC, or the same User, are subject to the same size and cost provisions. In addition, the Exchange believes that the proposal is equitable because only market participants that voluntarily select to receive MDC VCCs would be charged for them.

Moreover, the proposed change would ensure that the Connectivity Fee Schedule accurately reflects the usage of VCCs. It would ensure that the description of VCCs was complete, accessible and transparent, and provide market participants with greater clarity.

The Proposed Change Is Not Unfairly Discriminatory

The Exchange believes its proposal is not unfairly discriminatory. The proposed change does not apply differently to distinct types or sizes of market participants. Rather, it applies to all market participants equally. The purchase of any proposed service is completely voluntary and the Fee Schedule will be applied uniformly to all market participants.

In addition, the Exchange believes that the proposal is equitable because only market participants that voluntarily select to receive MDC VCCs would be charged for them. The MDC VCCs are available to all market participants on an equal basis, and all market participants that voluntarily choose to purchase a MDC VCC are charged the same amount as all other market participants purchasing that type of MDC VCC.

For the reasons above, the proposed change does not unfairly discriminate between or among market participants that are otherwise capable of satisfying any applicable co-location fees, requirements, terms, and conditions established from time to time by the Exchange.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposal will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of Section 6(b)(8) of the Act.[19] The proposed rule change is designed to ensure that the provision on VCCs clarifies that all VCCs, irrespective of whether between two Users, a User and non-User outside of the VCC, or the same User, are subject to the same size and cost provisions. It is not meant to address intramarket or intermarket competition.

The proposed change would enhance competition in the market for circuits transmitting data into and out of colocation at the MDC by adding VCCs, in addition to the 16 Telecoms that also sell circuits to Users and the FIDS circuits. The MDC VCCs do not have any latency, bandwidth, or other advantage over the Telecoms' circuits.

[15] The specifications of FIDS's competitors' circuits are not publicly known. The Exchange understands that FIDS has gleaned any information it has about its competitors through anecdotal communications, by observing customers' purchasing choices in the competitive market, and from its own experience as a purchaser of circuits from telecommunications providers to build FIDS's own networks.

[16] Note that in the case of wireless connectivity, a User in colocation still requires a fiber circuit to transport data. If a Telecom is used, the data is transmitted wirelessly to the relevant pole, and then from the pole to the meet-me-room using a fiber circuit.

[17] *See* Securities Exchange Act Release No. 97999 (July 26, 2023), 88 FR 50190 (August 1, 2023) (SR–NYSEAMER–2023–36).

[18] *See id.* at 50193. Importantly, the Exchange is prevented from making any alteration to its meet-me-room services or fees without filing a proposal for such changes with the Commission.

[19] 15 U.S.C. 78f(b)(8).

The proposal would not burden competition in the sale of such circuits, but rather, enhance it by providing Users with an additional choice for their circuit needs.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [20] and Rule 19b–4(f)(6) thereunder.[21] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[22]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [23] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

[20] 15 U.S.C. 78s(b)(3)(A)(iii).

[21] 17 CFR 240.19b–4(f)(6).

[22] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires the Exchange to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[23] 15 U.S.C. 78s(b)(2)(B).

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSEAMER–2024–64 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEAMER–2024–64. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSEAMER–2024–64 and should be submitted on or before December 9, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[24]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101584; File No. SR–LTSE–2024–08]

Self-Regulatory Organizations; Long-Term Stock Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Fee Schedule To Adopt Certain Market Data Fees

November 12, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 1, 2024, Long-Term Stock Exchange, Inc. (''LTSE'' or Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing with the Securities and Exchange Commission (''Commission'') a proposed rule change to amend the LTSE Fee Schedule (the ''Fee Schedule'') to adopt certain market data fees effective November 1, 2024. The Exchange notes that it submitted a separate filing with the Commission pursuant to Section 19(b)(3)(A) of the Act to establish the Fee Schedule and adopt transaction fees upon commencement of its transition to a new trading platform on September 23, 2024.

The text of the proposed rule change is available at the Exchange's website at *https://longtermstockexchange.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement on the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange is proposing to establish a new section (D. Market Data Fees) in the Long-Term Stock Exchange Fee Schedule and adopt fees for its proprietary market data feeds, Depth of Book, Top of Book and Last Sale (collectively, the ''Exchange Data Feeds''). The Exchange is proposing to implement the proposed fees effective November 1, 2024.

Proposed Market Data Pricing

The Exchange offers three separate data feeds to subscribers—Depth of Book, Top of Book and Last Sale. The Exchange notes that there is no requirement that any Firm subscribe to a particular Exchange Data Feed or any Exchange Data Feed whatsoever, but instead, a Firm may choose to maintain subscriptions to those Exchange Data Feeds they deem appropriate based on their business model. The proposed fee will not apply differently based upon the size or type of Firm, but rather based upon the subscriptions a Firm has to Exchange Data Feeds and their use thereof, which are in turn based upon factors deemed relevant by each Firm. The proposed pricing for each of the Exchange Data Feeds is set forth below.

Depth of Book

The Depth of Book feed is a LTSE-only market data feed that contains all displayed orders for securities trading on the Exchange (*i.e.,* top and depth-of-book order data), order executions (*i.e.,* last sale data), order cancellations, order modifications, order identification numbers, and administrative messages.[3] For the receipt of access to the Depth of Book feed the Exchange proposes to charge $2,500 per month. The proposed fee would be charged to any data recipient that receives the Depth of Book feed for the purpose of either internal distribution within the Company and/or with Affiliates[4] or external distribution to External Parties.[5] The proposed fee for Depth of Book will be charged only once per month per subscribing entity (''Firm'').

Top of Book

The Top of Book feed is a LTSE-only market data feed that contains top of book quotations based on equity orders entered into the System as well as administrative messages.[6] For the receipt of access to the Top of Book feed the Exchange proposes to charge $500 per month. The proposed fee would be charged to any data recipient that receives the Top of Book feed for the purpose of either internal distribution within the Company and/or with Affiliates or external distribution to External Parties. The proposed fee for Top of Book will be charged only once per month per subscribing entity Firm.

Last Sale

The Last Sale feed is a LTSE-only market data feed that contains only execution information based on equity orders entered into the System as well as administrative messages.[7] For the receipt of access to the Last Sale feed the Exchange proposes to charge $0 per month.

In proposing to charge fees for Exchange Data Feeds, the Exchange has sought to be especially diligent in assessing those fees in a transparent way against its own aggregate costs of providing the related services, and also carefully and transparently assessing the impact on Members—both generally and in relation to other Members, *i.e.,* to assure the fee will not create a financial burden on any participant and will not have an undue impact in particular on smaller Members and competition among Members in general. The Exchange believes that this level diligence and transparency is called for by the requirements of Section 19(b)(1) under the Act,[8] and Rule 19b–4 thereunder,[9] with respect to the types of information self-regulatory organizations (''SROs'') should provide when filing fee changes, and Section 6(b) of the Act,[10] which requires, among other things, that exchange fees be reasonable and equitably allocated,[11] not designed to permit unfair discrimination,[12] and that they not impose a burden on competition not necessary or appropriate in furtherance of the purposes of the Act.[13] This rule change proposal addresses those requirements, and the analysis and data in each of the sections that follow are designed to clearly and comprehensively show how they are met.[14]

Cost Analysis

The Exchange notes it operates a unique model where the LTSE trading system and services are provided on an outsourced basis by MEMX Technologies LLC.[15] As such, most of the Exchange's technology costs, including those related to Exchange Data Feeds are incorporated into the overall fees that the Exchange pays MEMX Technologies as part of its multi-year arrangement to provide a trading system and associated services. Because of this arrangement, the Exchange does not possess the same level of specificity for cost drivers related to Exchange Data Feeds as other exchanges have detailed within their own similar filings. However, the Exchange recognizes that the costs associated with building out and maintaining a state-of-the-art network infrastructure for LTSE were extensive and in line with the costs that MEMX LLC, an exchange that also uses the trading system and associated services of MEMX Technologies, outlined in its own filing establishing market data fees for Members and Non-Members.[16] These include costs associated with maintaining and expanding a team of highly-skilled engineers, fees charged by the third-party data center operator, and costs

[3] *See* LTSE Rule 11.330(a)(1).

[4] Internal distribution includes the sharing of any Exchange data product to other legal entities affiliated with the Firm that have been disclosed to the Exchange. For instance, if a company has multiple affiliated broker-dealers under the same holding company, that company could have one of the broker-dealers or a non broker-dealer affiliate subscribe to an Exchange Data product and then share the data with other affiliates that have a need for the data. This sharing with affiliates would not be considered external distribution to a third party but instead would be considered internal distribution to data recipients within the Distributor's own organization.

[5] External distribution would be defined to mean a Firm that receives an Exchange data product and then distributes that data to a third party or one or more data recipients outside the Firm's organization.

[10] 15 U.S.C. 78f(b).

[11] 15 U.S.C. 78f(b)(4).

[12] 15 U.S.C. 78(b)(5) [sic].

[13] 15 U.S.C. 78f(b)(8).

[14] In 2019, Commission staff published guidance suggesting the types of information that SROs may use to demonstrate that their fee filings comply with the standards of the Exchange Act (''Fee Guidance''). While LTSE understands that the Fee Guidance does not create new legal obligations on SROs, the Fee Guidance is consistent with LTSE's view about the type and level of transparency that exchanges should meet to demonstrate compliance with their existing obligations when they seek to charge new fees. See Staff Guidance on SRO Rule Filings Relating to Fees (May 21, 2019).

[15] The Exchange and MEMX Technologies executed a Development, License and Services Agreement on January 23, 2024, with accompanying Schedules (collectively, the ''DLSA''). MEMX Technologies, an affiliate of the MEMX Exchange, is in the business of developing technology systems for use in the financial industry. *See* SR–LTSE–2024–03.

[16] *See* Securities Exchange Act Release No. 34–97130 (March 13, 2023), 88 FR 16491 (March 17, 2013) (SR–MEMX–2023–04).

associated with fully-supporting advances in infrastructure and expansion of network level services, including customer monitoring, alerting and reporting. There are also significant technology expenses related to establishing and maintaining Information Security services, enhanced network monitoring and customer reporting, as well as Regulation SCI mandated processes, associated with the MEMX Technologies network technology. Because of this structure, the Exchange is unable to separate out the costs for servicing and providing Exchange Market Data, as these are intricately combined in its DSLA with MEMX Technologies.

Further, while the Exchange has been operating since September 2020, it only entered the DLSA with MEMX Technologies LLC in January of this year and launched the new trading system in September 2024. Therefore, the Exchange's most recent publicly available financial statement (2023 Audited Unconsolidated Financial Statement) is not an accurate reflection of the total annual costs associated with the development and operation of Market Data on LTSE. Accordingly, the Exchange believes it is more appropriate to justify its fees using cost figures that are isolated specifically for LTSE on an annualized basis, and utilizing a recent monthly billing cycle and extrapolated annualized costs on a going-forward basis.

LTSE recently calculated its aggregate monthly costs for providing Market Data at $212,963 beginning October 1, 2024. Before the launch of the new trading system in September 2024 the Exchange did not offer any market data products. Now, in order to cover some of the aggregate costs of providing Market Data to market participants (both Members and non-Members) the Exchange is proposing to modify its Fee Schedule and charge the Market Data fees detailed above.

In order to determine the Exchange's costs for providing the services associated with the Market Data Fees, the Exchange conducted an extensive review in which the Exchange analyzed every expense item in the Exchange's general expense ledger to determine whether each such expense relates to the services associated with the Market Data Fees, and, if such expense did so relate, what portion (or percentage) of such expense actually supports those services. The sum of all such portions of expenses represents the total cost of the Exchange to provide the services associated with the Market Data Fees. For the avoidance of doubt, no expense amount was allocated twice. The Exchange is also providing detailed information regarding the Exchange's cost allocation methodology—namely, information that explains the Exchange's rationale for determining that it was reasonable to allocate certain expenses described in this filing towards the total cost to provide Exchange Data Feeds.

The Exchange believes that the Market Data Fees are fair and reasonable because they will not result in excessive pricing or supra-competitive profit, when comparing the total annual expense that the Exchange projects to incur in connection with providing the services associated with the proposed Market Data Fees versus the total annual revenue of the Exchange projects to collect in connection with providing those services.

Costs Related to Offering Market Data

The following chart details the individual line-item costs considered by LTSE to be related to offering market data as well as the percentage of the Exchange's overall costs per year such costs represent for such area (*e.g.,* as set forth below, the Exchange allocated approximately 10% of its overall Human Resources cost to offering market data).

Cost drivers	Yearly costs	% of all
Third-Party Expenses	$1,854,420	32
Human Resources	543,100	10
Data Center	158,040	30
Total	2,555,560	

Below are additional details regarding each of the line-item costs considered by LTSE to be related to offering the Exchange Data Feeds.

Third-Party Expenses

As discussed above, LTSE has undertaken a unique model where it has outsourced its technology to a third-party technology provider. As such the costs associated with Exchange Data Feeds for this provider include (1) the network infrastructure costs that includes cabling and switches required to generate and disseminate the Exchange Data Feeds. These costs also include the servers used at the Exchange's primary and back-up data centers specifically for the Exchange Data Feeds; (2) costs the third-party provider incurs to provide physical connectivity in the data centers where it maintains its equipment—such as dedicated space, security services, cooling and power, (3) hardware and software licenses used to operate and monitor physical assets necessary to offer the Exchange Data Feeds, and (4) depreciation of physical assets and software, which also includes assets used for generating and disseminating the Exchange Data Feeds.

Human Resources

For personnel costs (Human Resources), LTSE calculated an allocation of LTSE employee time for employees whose functions include providing services necessary to offer the Exchange Data Feeds, including performance thereof, as well as personnel with ancillary functions related to establishing and providing such services (such as information security and finance personnel). The Exchange notes that it has fewer than fifty (50) employees and each department leader has direct knowledge of the time spent by each employee with respect to the various tasks necessary to operate the Exchange. The estimates of Human Resources cost were therefore determined by consulting with such department leaders, determining which employees are involved in tasks related to providing the Exchange Data Feeds, and confirming that the proposed allocations were reasonable based on an understanding of the percentage of their time such employees devote to tasks related to market data. The Exchange notes that senior level executives were only allocated Human Resources costs to the extent the Exchange believed they were involved in overseeing tasks related to providing the Exchange Data Feeds. The Human Resources cost was calculated using a blended rate of compensation reflecting salary, equity and bonus compensation, benefits, payroll taxes, and 401(k) matching contributions.

Data Center

Data Center costs include an allocation of the costs the Exchange incurs to monitor its trading platform and the Exchange Data Feeds in third-party data centers where it maintains its equipment as well as related costs (the Exchange does not own the Primary Data Center or the Secondary Data Center, but instead, leases space in data centers operated by third parties).

Proposed Fees—Additional Discussion

In conducting its Cost Analysis, the Exchange did not allocate any of its expenses in full to any core service and did not double-count any expenses. Instead, as described above, the Exchange identified and allocated applicable cost drivers across its core services and used the same approach to analyzing costs to form the basis of a separate proposal to adopt fees for connectivity services (the ''Connectivity Filing'') [17] and this filing proposing fees for Exchange Data Feeds. Thus, the Exchange's allocations of cost across core services were based on real costs of operating the Exchange and were not double-counted across the core services or their associated revenue streams.

The Exchange anticipates that the proposed fees for Exchange Data Feeds will generate approximately $50,000 monthly ($600,000 annually) based on the subscriptions to Exchange Data Feeds in the last six weeks, as well as projections of new subscriptions as the Exchange ramps up trading within its new trading platform. The proposed fees for Exchange Data Feeds are designed to permit the Exchange to cover a portion of costs for providing Exchange Data Feeds, which the Exchange believes is fair and reasonable after taking into account the costs related to creating, generating, and disseminating the Exchange Data Feeds and the fact that the Exchange will need to fund future expenditures (increased costs, improvements, etc.). LTSE notes that like other exchanges, it is after all, a for-profit business. Accordingly, while the Exchange believes in transparency around costs and potential margins, as well as periodic review of revenues and applicable costs (as discussed below), the Exchange does not believe that these estimates should form the sole basis of whether or not a proposed fee is reasonable or can be adopted. Instead, the Exchange believes that the information should be used solely to confirm that an Exchange is not earning supra-competitive profits, and the Exchange believes its Cost Analysis and related projections demonstrate this fact. As a general matter, the Exchange believes that its costs will remain relatively similar in future years. It is possible however that such costs will either decrease or increase. To the extent the Exchange sees growth in use of Exchange Data Feeds it will receive additional revenue to offset future cost increases. However, if use of Exchange Data Feeds is static or decreases, the Exchange might not realize the revenue that it anticipates or needs in order to cover applicable costs. Accordingly, the Exchange is committing to conduct a one-year review after implementation of these fees. The Exchange expects that it may propose to adjust fees at that time, to increase fees in the event that revenues fail to cover costs and a reasonable mark-up of such costs.

Similarly, the Exchange expects that it would propose to decrease fees in the event that revenue materially exceeds current projections. In addition, the Exchange will periodically conduct a review to inform its decision making on whether a fee change is appropriate (*e.g.,* to monitor for costs increasing/decreasing or subscribers increasing/decreasing, etc. in ways that suggest the then-current fees are becoming dislocated from the prior cost-based analysis) and expects that it would propose to increase fees in the event that revenues fail to cover its costs and a reasonable mark-up, or decrease fees in the event that revenue or the mark-up materially exceeds current projections. In the event that the Exchange determines to propose a fee change, the results of a timely review, including an updated cost estimate, will be included in the rule filing proposing the fee change. More generally, the Exchange believes that it is appropriate for an exchange to refresh and update information about its relevant costs and revenues in seeking any future changes to fees, and the Exchange commits to do so.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6(b) [18] of the Act in general, and furthers the objectives of Section 6(b)(4) [19] of the Act, in particular, in that it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. Additionally, the Exchange believes that the proposed fees are consistent with the objectives of Section 6(b)(5) [20] of the Act in that they are designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to a free and open market and national market system, and, in general, to protect investors and the public interest, and, particularly, are not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange notes prior to addressing the specific reasons the Exchange believes the proposed fees and fee structure are reasonable, equitably allocated and not unreasonably discriminatory, that the proposed definitions and fee structure described above are consistent with the definitions and fee structure used by most U.S. securities exchanges, and the Investors Exchange LLC (''IEX'') [21] in particular. As such, the Exchange believes it is adopting a model that is easily understood by Members and non-Members, most of which also subscribe to market data products from other exchanges. For this reason, the Exchange believes that the proposed definitions and fee structure described above are consistent with the Act generally, and Section 6(b)(5) [22] of the Act in particular.

Reasonableness

With regard to reasonableness, the Exchange understands that the Commission has traditionally taken a market-based approach to examine whether the SRO making the fee proposal was subject to significant competitive forces in setting the terms of the proposal. The Exchange understands that in general the analysis considers whether the SRO has demonstrated in its filing that (i) there are reasonable substitutes for the product or service; (ii) ''platform'' competition constrains the ability to set the fee; and/or (iii) revenue and cost analysis shows the fee would not result in the SRO taking supracompetitive profits. If the SRO demonstrates that the fee is subject to significant competitive forces, the Exchange understands that in general the analysis will next consider whether there is any substantial countervailing basis to suggest the fee's terms fail to meet one or more standards under the Exchange Act. The Exchange

[18] 15 U.S.C. 78f.

[19] 15 U.S.C. 78f(b)(4).

[20] 15 U.S.C. 78f(b)(5).

[21] IEX charges $2,500 per month for its Depth of Book Feed (DEEP Feed) and $500 per month for its Top of Book Feed (TOPS Feed). All other market data products on IEX are free.

[22] 15 U.S.C. 78f(b)(5).

further understands that if the filing fails to demonstrate that the fee is constrained by competitive forces, the SRO must provide a substantial basis, other than competition, to show that it is consistent with the Exchange Act, which may include production of relevant revenue and cost data pertaining to the product or service.

The Exchange has not determined its proposed overall market data fees based on assumptions about market competition, instead relying upon a cost-plus model to determine a reasonable fee structure that is informed by the Exchange's understanding of different uses of the products by different types of participants. In this context, the Exchange believes the proposed fees overall are fair and reasonable as a form of cost recovery plus the possibility of a reasonable return for Exchange's aggregate costs of offering the Exchange Data Feeds. The Exchange believes the proposed fees are reasonable because they are designed to generate annual revenue to recoup some of Exchange's annual costs of providing market data. Accordingly, the Exchange believes that this fee methodology is reasonable because it allows the Exchange to recoup some or all of its expenses for providing market data products. The Exchange also believes that the proposed fees are reasonable because they are generally less than the fees charged by competing equities exchanges for comparable market data products, notwithstanding that the competing exchanges may have different system architectures that may result in different cost structures for the provision of market data.

The Exchange believes the proposed fees for the Exchange Data Feeds are reasonable when compared to fees for comparable products, such as the MEMX LLC (''MEMX'') [23] MEMOIR Depth Feed,[24] MEMOIR Top Feed [25] and MEMOIR Last Sale Feed [26] compared to which the Exchange's proposed fees are generally lower, as well as other comparable data feeds priced significantly higher than the Exchange's proposed fees for the Exchange Data Feeds. Specifically with respect to the Depth of Book feed, the Exchange believes that the proposed fees for such feed are reasonable because they represent not only the value of the data available from the Top of Book and Last Sale data feeds, which have lower proposed fees, but also the value of receiving the depth-of-book data on an order-by order basis. The Exchange believes it is reasonable to have pricing based, in part, upon the amount of information contained in each data feed and the value of that information to market participants. The Top of Book and Last Sale data feeds, as described above, can be utilized to trade on the Exchange but contain less information than that is available on the Depth of Book feed (*i.e.,* even for a subscriber who takes both feeds, such feeds do not contain depth-of-book information). Thus, the Exchange believes it reasonable for the products to be priced as proposed, with Last Sale having the lowest price, Top of Book the next lowest price, and Depth of Book the highest price (and more than Last Sale and Top of Book combined).

Equitable Allocation

The Exchange believes that its proposed fees are reasonable, fair, and equitable, and not unfairly discriminatory because they are designed to align fees with services provided. The Exchange believes the proposed fees for the Exchange Data Feeds are allocated fairly and equitably among the various categories of users of the feeds, and any differences among categories of users are justified and appropriate. The Exchange believes that the proposed fees are equitably allocated because they will apply uniformly to all data recipients that choose to subscribe to the Exchange Data Feeds. Any subscriber or vendor that chooses to subscribe to one or more Exchange Data Feeds is subject to the same Fee Schedule, regardless of what type of business they operate, and the decision to subscribe to one or more Exchange Data Feeds is based on objective differences in usage of Exchange Data Feeds among different Firms, which are still ultimately in the control of any particular Firm. The Exchange believes the proposed pricing between Exchange Data Feeds is equitably allocated because it is based, in part, upon the amount of information contained in each data feed and the value of that information to market participants. The Top of Book and Last Sale data feeds, as described above, can be utilized to trade on the Exchange but contain less information than that is available on the Depth of Book feed (*i.e.,* even for a subscriber who takes both feeds, such feeds do not contain depth-of-book information). Thus, the Exchange believes it is an equitable allocation of fees for the products to be priced as proposed, with Last Sale having the lowest price, Top of Book the next lowest price, and Depth of Book the highest price (and more than Last Sale and Top of Book combined).

The Proposed Fees Are Not Unfairly Discriminatory

The Exchange believes that the proposed fees are not unfairly discriminatory because they would apply to all data recipients that choose to subscribe to the same Exchange Data Feed(s). Any vendor or subscriber that chooses to subscribe to the Exchange Data Feeds is subject to the same Fee Schedule, regardless of what type of business they operate. Because the proposed fees for Depth of Book are higher, vendors and subscribers seeking lower cost options may instead choose to receive data from the SIPs or through the Top of Book and/or Last Sale feed for a lower cost. Alternatively, vendors and subscribers can choose to pay for the Depth of Book feed in order to receive data in a single feed with depth-of-book information if such information is valuable to such vendors or subscribers. The Exchange notes that vendors or subscribers can also choose to subscribe to a combination of data feeds for redundancy purposes or to use different feeds for different purposes. In sum, each vendor or subscriber has the ability to choose the best business solution for itself. The Exchange does not believe it is unfairly discriminatory to base pricing upon the amount of information contained in each data feed and the value of that information to market participants. As described above, the Top of Book and Last Sale data feeds, can be utilized to trade on the Exchange but contain less information than that is available on the Depth of Book feed (*i.e.,* even for a subscriber who takes both feeds, such feeds do not contain depth-of-book information). Thus, the Exchange believes it is not unfairly discriminatory for the products to be priced as proposed, with Last Sale having the lowest price, Top of Book the next lowest price, and Depth of Book the highest price (and more than Last Sale and Top of Book combined).

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[27] the Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

[23] See the MEMX fee schedule, available at: *https://info.memxtrading.com/equities-trading-resources/us-equities-fee-schedule/.*

[24] MEMX charges between $1,500 and $5,000 for its Depth of Book Feed.

[25] MEMX charges between $750 and $10,000 for its Top of Book Feed.

[26] MEMX charges between $500 and $10,000 for its Last Sale Feed.

[27] 15 U.S.C. 78f(b)(8).

Intramarket Competition

The Exchange does not believe that the proposed fees for Exchange Data Feeds place certain market participants at a relative disadvantage to other market participants because, as noted above, the proposed fees are associated with usage of Exchange Data Feeds by each market participant based on the type of business they operate, and the decision to subscribe to one or more Exchange Data Feeds is based on objective differences in usage of Exchange Data Feeds among different Firms, which are still ultimately in the control of any particular Firm, and such fees do not impose a barrier to entry to smaller participants. Accordingly, the proposed fees for Exchange Data Feeds do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the allocation of the proposed fees reflects the types of Exchange Data Feeds consumed by various market participants and their usage thereof.

Intermarket Competition

The Exchange does not believe the proposed fees place an undue burden on competition on other SROs that is not necessary or appropriate. In particular, market participants are not forced to subscribe to any of the Exchange Data Feeds, as described above. Additionally, other exchanges have similar market data fees in place for their participants, but with comparable and in many cases higher rates for market data feeds. The proposed fees are based on actual costs and are designed to enable the Exchange to recoup its applicable costs with the possibility of a reasonable profit on its investment as described in the Purpose and Statutory Basis sections. Competing equities exchanges are free to adopt comparable fee structures subject to the SEC rule filing process.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

This proposed rule change establishes dues, fees or other charges among its members and, as such, may take effect upon filing with the Commission pursuant to Section 19(b)(3)(A)(ii) of the Act[28] and paragraph (f)(2) of Rule 19b–4 thereunder.[29] Accordingly, the proposed rule change would take effect upon filing with the Commission.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend the rule change if it appears to the Commission that the action is necessary or appropriate in the public interest, for the protection of investors, or would otherwise further the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–LTSE–2024–08 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–LTSE–2024–08. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–LTSE–2024–08 and should be submitted on or before December 9, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[30]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101589; File No. SR–SAPPHIRE–2024–35]

Self-Regulatory Organizations; MIAX Sapphire, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change by MIAX Sapphire LLC To Extend the Sunset Provision Relating to the Options Regulatory Fee (ORF)

November 12, 2024.

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 31, 2024, MIAX Sapphire, LLC (''MIAX Sapphire'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend the MIAX Sapphire Options Exchange Fee Schedule (the ''Fee Schedule'') relating to the Options Regulatory Fee (''ORF'') to extend the current sunset date of October 31, 2024 to May 31, 2025.

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/all-options-exchanges/rule-*

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

filings, at MIAX Sapphire's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule related to the ORF to extend the current sunset date of October 31, 2024 to May 31, 2025, and thus continue charging the previously established ORF in the amount of $0.0013 per contract side through May 31, 2025. As discussed herein, the ORF sunset date of October 31, 2024 was initially proposed to provide time for the Exchange to inform its approach to ORF and discuss alternative ORF models with market participants, so that it may compete on equal footing with each of the other option exchanges that charge similar regulatory fees. However, those discussions have made clear that there is not yet consensus among market participants on a path forward that would address industry concerns in a manner that would effect change broadly across all U.S. options exchanges. Thus, the Exchange proposes to extend the automatic sunset date of October 31, 2024 until May 31, 2025 in order to provide it additional time to inform its approach to the ORF after the sunset date while continuing to fund a portion of its regulatory program via ORF so that it may operate on equal footing with each of the seventeen (17) other options exchanges that charge similar regulatory fees in amounts that far exceed the relatively modest amounts collected by the Exchange.

As background, on August 7, 2024 the Exchange initially filed this proposal to establish an ORF in the amount of $0.0013 per contract side that would automatically sunset on October 31, 2024 (SR–SAPPHIRE–2024–14). The Exchange withdrew SR–SAPPHIRE–2024–14, and on August 21, 2024 replaced it with SR–SAPPHIRE–2024–25 (the ''Initial ORF Filing'').[3] The Initial ORF Filing was published for comment in the **Federal Register** on September 3, 2024.[4] To date, the Securities and Exchange Commission (the ''Commission'') received no comments on the Initial ORF Filing.

The ORF is designed to recover a material portion of the costs to the Exchange of the supervision and regulation of Members'[5] customer options business, including performing routine surveillances and investigations, as well as policy, rulemaking, interpretive and enforcement activities. The Exchange believes that revenue generated from the ORF, when combined with all of the Exchange's other regulatory fees and fines, will cover a material portion, but not all, of the Exchange's regulatory costs. Currently, all other registered options exchanges impose ORF on their members, and those exchanges also charge ORF for executions occurring on the Exchange cleared by their customers.[6]

The Exchange recognizes that in 2019, the Commission issued suspensions of and orders instituting proceedings to determine whether to approve or disapprove a proposed rule change to modify the Options Regulatory Fee of NYSE American, NYSE Arca, MIAX Options, MIAX PEARL, MIAX Emerald, Cboe, Cboe EDGX Options, and C2.[7] Each of those exchanges had filed to increase their ORF, and the Commission indicated that each of those filings lacked detail and specificity, signaling that more information was needed to speak to whether the proposed increased ORFs were reasonable, equitably allocated and not unfairly discriminatory, particularly given that the ORF is assessed on transactions that clear in the ''customer'' range and regardless of the exchange on which the transaction occurs. The Commission

(''C2'') adopting an ORF applicable to transactions across all options exchanges); 68711 (January 23, 2013) 78 FR 6155 (January 29, 2013) (SR–MIAX–2013–01) (notice of filing and immediate effectiveness of MIAX Options adopting an ORF applicable to transactions across all options exchanges); 74214 (February 5, 2015), 80 FR 7665 (February 11, 2015) (SR–BATS–2015–08) (notice of filing and immediate effectiveness of BZX formerly known as BATS, adopting an ORF applicable to transactions across all options exchanges); 80025 (February 13, 2017) 82 FR 11081 (February 17, 2017) (SR–BatsEDGX–2017–04) (notice of filing and immediate effectiveness of EDGX formerly known as Bats EDGX Exchange, Inc., adopting an ORF applicable to transactions across all options exchanges); 80875 (June 7, 2017) 82 FR 27096 (June 13, 2017) (SR–PEARL–2017–26) (notice of filing and immediate effectiveness of MIAX PEARL adopting an ORF applicable to transactions across all options exchanges); 85127 (February 13, 2019) 84 FR 5173 (February 20, 2019) (SR–MRX–2019–03) (notice of filing and immediate effectiveness of Nasdaq MRX, LLC (''MRX'') adopting an ORF applicable to transactions across all options exchanges); 85251 (March 6, 2019) 84 FR 8931 (March 12, 2019) (SR–EMERALD–2019–01) (notice of filing and immediate effectiveness of MIAX Emerald adopting an ORF applicable to transactions across all options exchanges).

[7] *See* Securities Exchange Act Release No. 87168 (September 30, 2019), 84 FR 53210 (October 4, 2019) (SR–Emerald–2019–29); Securities Exchange Act Release No. 87167 (September 30, 2019), 84 FR 53189 (October 4, 2019) (SR–PEARL–2019–23); Securities Exchange Act Release No. 87169 (September 30, 2019), 84 FR 53195 (October 4, 2019) (SR–MIAX–2019–35); Securities Exchange Act Release No. 87170 (September 30, 2019), 84 FR 53213 (October 4, 2019) (SRCBOE–2019–040); Securities Exchange Act Release No. 87172 (September 30, 2019) 84 FR 53192 (October 4, 2019) (SR–CboeEDGX–2019–051); Securities Exchange Act Release No 87171 (September 30, 2019), 84 FR 53200 (October 4, 2019) (SR–C2–2019–018); Securities Exchange Act Release No. 86832 (August 30, 2019), 84 FR 46980 (September 6, 2019) (SR–NYSEArca–2019–49); Securities Exchange Act Release No. 86833 (August 30, 2019) 84 FR 47029 (September 6, 2019) (SR–NYSEAMER–2019–27).

also noted that the filings provided only broad general statements regarding options transaction volume and did not provide any information on those exchanges' historic or projected options regulatory costs (including the costs of regulating activity that cleared in the ''customer'' range and the costs of regulating activity that occurred off exchange), the amount of regulatory revenue they had generated and expected to generate from the ORF as well as other sources, or the ''material portion'' of options regulatory expenses that they sought to recover from the ORF. Each of those exchanges withdrew their filings, but continue charging ORF today as discussed above. The Exchange would be at an unfair competitive disadvantage if it were not allowed to charge the ORF to recover a material portion, but not all, of the Exchange's regulatory costs for the supervision and regulation of activity of its Members which as noted above, is charged by all currently operating options exchanges.

The Exchange recognizes that an alternative model is being pursued among industry participants but that a consensus has not yet been reached. As such, the Exchange proposes additional time to work towards a permanent ORF solution by gathering relevant data internally as well from other industry participants, while continuing to charge as other options exchanges currently do, until May 31, 2025, at which time its ORF will automatically sunset.

The Exchange notes that if, during the proposed sunset period of October 31, 2024 through May 31, 2025, a viable alternative methodology for the ORF presents itself, the Exchange would endeavor to implement said alternative prior to the proposed sunset date. In other words, the existence of the sunset date of May 31, 2025 to the Exchange's current ORF would not preclude it from filing to modify its ORF methodology prior to that date, if applicable.

As a new exchange, not having the opportunity to fund its regulatory program through the same regulatory fee charged by every other options exchange would place an undue competitive disadvantage upon the Exchange's regulatory program and options business as a whole. Further, the Exchange emphasizes that other exchanges will be charging ORF for transactions occurring on MIAX Sapphire, and as such, it follows that the exchange that is primarily responsible for monitoring those transactions should also be able to charge the ORF for activity occurring on its own market, as well as transactions it surveils on away markets. Again, the Exchange is committed to facilitating and joining efforts to revamp the ORF, however, it must be afforded additional time to do so while recouping a portion of its regulatory costs via the ORF as all other options exchanges do.

2. Statutory Basis

The Exchange believes that its proposal to amend its Fee Schedule is consistent with Section 6(b) of the Act [8] in general, and furthers the objectives of Section 6(b)(4) of the Act [9] in particular, in that it is an equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities. The Exchange also believes the proposal furthers the objectives of Section 6(b)(5) of the Act [10] in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest and is not designed to permit unfair discrimination between customers, issuers, brokers and dealers.

The ORF is designed to recover a material portion of the costs of supervising and regulating Members' customer options business including performing routine surveillances and investigations, as well as policy, rulemaking, interpretive, and enforcement activities. Extending the current ORF sunset date to May 31, 2025 is reasonable because continued collection of ORF will serve to balance the Exchange's regulatory revenue against the anticipated regulatory costs, thereby ensuring proper regulatory funding. Moreover, the Exchange's ORF rate is lower than the amount of ORF assessed on other exchanges.[11]

Extending the sunset date is also reasonable because doing so would allow the Exchange additional time to inform its approach to ORF moving forward while recouping a portion of its regulatory expenses via the ORF as other options exchanges do. If the Exchange were not allowed to charge an ORF during this additional time period, then after the sunset date of October 31, 2024, it would be forced to pay for its regulatory program solely out of business revenues while working towards an alternative ORF solution, unlike every other competing exchange, each of which would continue to assess an ORF, including on transactions executed on the Exchange, indefinitely. This would impact the Exchange's ability to assure adequate funding of its regulatory program.

Extending the ORF sunset date to May 31, 2025 is also equitable and not unfairly discriminatory because prior to the proposed sunset date, the ORF would continue to be objectively allocated to Members in a manner that is consistent with the ORF imposed by the other seventeen (17) options exchanges. The Exchange will continue to monitor the amount of revenue collected from the ORF to ensure that it, in combination with its other regulatory fees and fines, does not exceed the Exchange's total regulatory costs.

B. Self-Regulatory Organization's Statement on Burden on Competition

MIAX Sapphire does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. This proposal will not create an unnecessary or inappropriate intra-market burden on competition because the ORF will apply to all customer activity, and is designed to enable the Exchange to recover a material portion of the Exchange's cost related to its regulatory activities. This proposal will not create an unnecessary or inappropriate inter-market burden on competition because it will be a regulatory fee that supports regulation in furtherance of the purposes of the Act. The Exchange is obligated to ensure that the amount of regulatory revenue collected from the ORF, in combination with its other regulatory fees and fines, does not exceed regulatory costs. MIAX Sapphire's ORF, is lower than, or comparable to, fees charged by other options exchanges for the same or similar services.

The Exchange notes that while it does not believe that its proposed ORF will impose any burden on inter-market competition, the Exchange not charging an ORF or being precluded from charging an ORF after October 31, 2024 but prior to the proposed sunset date of May 31, 2025 would, in-fact, represent a significant burden on the Exchange's ability to assure adequate funding of its regulatory program. As noted above, the

[8] 15 U.S.C. 78f(b).

[9] 15 U.S.C. 78f(b)(4).

[10] 15 U.S.C. 78f(b)(5).

[11] *See, e.g.,* NYSE Arca Options Fees and Charges, ORF and NYSE American Options Fees Schedule, Section VII(A), which provide that ORF is assessed at a rate of $0.0055 per contract for each respective exchange. *See* also Nasdaq PHLX, Options 7 Pricing Schedule, Section 6(D), which provides for an ORF rate of $0.0034 per contract; Cboe Options Fee Schedule, which provides an ORF rate of $0.0017 per contract; Nasdaq Options Market, Options 7 Pricing Schedule, Section 5, which provides an ORF rate of $0.0016 per contract; BOX Options Fee Schedule Section II(C), which provides an ORF rate of $0.00295 per contract; MIAX Options Fee Schedule, Section 2(b), which provides an ORF rate of $0.0019 per contract; MIAX Pearl Fee Schedule, Section 2(b), which provides an ORF rate of $0.0018 per contract; and the MEMX Fee Schedule which provides an ORF rate of $0.0015.

Exchange is a new entrant in the highly competitive environment for equity options trading. Also, as noted above, all registered options exchanges currently impose the ORF on their members, and such ORF fees imposed by other options exchanges currently do and will continue to extend to executions occurring on the Exchange. The Exchange believes that it is likely that a viable ORF alternative may be presented during the proposed sunset period. The Exchange believes that in order to compete with these existing options exchanges, it must, in fact, impose an ORF on its Members during this additional sunset period, and that the inability to do so would result in an unfair competitive disadvantage to the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,[12] and Rule 19b 4(f)(2)[13] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–SAPPHIRE–2024–35 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–SAPPHIRE–2024–35. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–SAPPHIRE–2024–35 and should be submitted on or before December 9, 2024.

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meetings

TIME AND DATE: 2:00 p.m. on Thursday, November 21, 2024.

PLACE: The meeting will be held via remote means and/or at the Commission's headquarters, 100 F Street NE, Washington, DC 20549.

STATUS: This meeting will be closed to the public.

MATTERS TO BE CONSIDERED: Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters also may be present.

In the event that the time, date, or location of this meeting changes, an announcement of the change, along with the new time, date, and/or place of the meeting will be posted on the Commission's website at *https://www.sec.gov.*

The General Counsel of the Commission, or her designee, has certified that, in her opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(3), (5), (6), (7), (8), 9(B) and (10) and 17 CFR 200.402(a)(3), (a)(5), (a)(6), (a)(7), (a)(8), (a)(9)(ii) and (a)(10), permit consideration of the scheduled matters at the closed meeting.

The subject matter of the closed meeting will consist of the following topics:

Institution and settlement of injunctive actions;

Institution and settlement of administrative proceedings;

Resolution of litigation claims; and

Other matters relating to examinations and enforcement proceedings.

At times, changes in Commission priorities require alterations in the scheduling of meeting agenda items that may consist of adjudicatory, examination, litigation, or regulatory matters.

CONTACT PERSON FOR MORE INFORMATION: For further information, please contact Vanessa A. Countryman from the Office of the Secretary at (202) 551–5400.

Authority: 5 U.S.C. 552b.

Dated: November 14, 2024.

Vanessa A. Countryman,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101588; File No. SR–MEMX–2024–42]

Self-Regulatory Organizations; MEMX LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Exchange's Fee Schedule to Extend the Sunset Provision Related to the Options Regulatory Fee (ORF)

November 12, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 31, 2024, MEMX LLC (''MEMX'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing with the Commission a proposed rule change to amend the Exchange's fee schedule applicable to Members [3] and non-Members of the Exchange (the ''Fee Schedule'') pursuant to Exchange Rules 15.1(a) and (c) to extend the current sunset date of October 31, 2024 applicable to the Options Regulatory Fee (''ORF'') to May 31, 2025. The Exchange proposes to implement the changes to the Fee Schedule pursuant to this proposal immediately. The text of the proposed rule change is provided in Exhibit 5.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Exchange Rule 1.5(p).

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Options Fee Schedule related to the ORF to extend the current sunset date of October 31, 2024 to May 31, 2025, and thus continue charging the previously established ORF in the amount of $0.0015 per contract side through May 31, 2025. As discussed herein, the ORF sunset date was initially proposed to provide time for the Exchange to discuss alternative ORF models with its Members. However, those discussions have made clear that there is there is [sic] not yet consensus among market participants on a path forward that would address industry concerns in a manner that would effect change broadly across all U.S. options exchanges. In addition, one of the Exchange's competitors has recently proposed a new model with respect to ORF that the Exchange is still reviewing and which has yet to receive public feedback from the industry.[4] Thus, the Exchange proposes to extend the automatic sunset date of October 31, 2024 until May 31, 2025, in order to provide it additional time to inform its approach to the ORF after the sunset date while continuing to fund a portion of its regulatory program via ORF so that it may operate on equal footing with each of the seventeen (17) other options exchanges that charge similar regulatory fees in amounts that far exceed the relatively modest amounts collected by the Exchange.

As background, MEMX previously filed a proposal to establish an ORF in the amount of $0.0015 per contract side that would automatically sunset on September 30, 2024 (the ''Initial ORF Filing'').[5] The Initial ORF Filing was published for comment in the **Federal Register** on October 4, 2023.[6] The Commission received no comments on the Initial ORF Filing before November 24, 2023. On that date, the Commission issued a Suspension of and Order Instituting Proceedings to Determine whether to Approve or Disapprove a Proposed Rule Change to Amend its Fee Schedule to Establish an Options Regulatory Fee (the ''OIP'') and requested public comment and additional information on various aspects of the Initial ORF Filing.[7] To date, the Commission has received no comment letters in response to the OIP. The Exchange withdrew the Initial ORF Filing on December 1, 2023 and submitted a new proposal for immediate effectiveness (''Second ORF Filing'').[8]

The Second Filing and Subsequent Filings proposed the same fee as in the Initial ORF Filing, but with a modified sunset date of May 31, 2024, which was four months prior to the proposed sunset date in the Initial ORF Filing. On May 1, 2024, the Exchange proposed to remove the automatic sunset date of May 31, 2024 altogether,[9] however, the Exchange withdrew that filing and replaced it with a new filing that proposed a new sunset date of October 31, 2024 in order to provide more time to attempt to reach a consensus on ORF moving forward, while also operating on a level playing field with incumbent options exchanges that are allowed to recoup a portion of their regulatory costs via the ORF.[10] In order to make certain clarifying changes, on May 23, 2024, the Exchange withdrew that proposal and replaced it with SR–MEMX–2024–22. Lastly, in order to correct an inadvertent error, on May 28, 2024, the Exchange withdrew SR–MEMX–2024–22 and replaced it with

[4] Proposals have been filed for each of the six options markets operated by Nasdaq OMX and affiliates (collectively, the ''Nasdaq Proposals''); *see, e.g.,* SR–Nasdaq–2024–58, which was filed by the Nasdaq Stock Market LLC on October 23, 2024, available at: *https://listingcenter.nasdaq.com/rulebook/NASDAQ/rulefilings;* and SR–Phlx–2024–50, which was filed by Nasdaq PHLX LLC on October 23, 2024, available at: *https://listingcenter.nasdaq.com/rulebook/phlx/rulefilings.*

[5] *See* Securities Exchange Act Release No. 98585 (September 28, 2023), 88 FR 68692 (October 4, 2023) (SR–MEMX–2023–25).

[6] *See supra* note 5.

[7] *See* Securities Exchange Act Release No. 99017 (November 24, 2023), 88 FR 83590 (November 30, 2023) (SR–MEMX–2023–25). Additionally, on November 24, 2023, solely for the purposes of consistent billing for the entire month of November 2023, the Exchange filed SR–MEMX–2023–31 with the Commission, which proposed to keep the Initial ORF rate of $0.0015 per contract side that had been charged since September 27th in place for November 24 through November 30, 2023. *See* Securities Exchange Act Release No. 99112 (December 7, 2023), 88 FR 86417 (SR–MEMX–2023–31).

[8] *See* SR–MEMX–2023–33. In order to make certain clarifying changes, the Exchange withdrew the Second ORF Filing on December 13, 2023, and submitted a third proposal for immediate effectiveness (''Third ORF Filing''). *See* SR–MEMX–2023–34. Again, in order to make certain clarifying changes, the Exchange withdrew the Third ORF Filing on December 19, 2023, and submitted a fourth proposal for immediate effectiveness (''Fourth ORF Filing''). *See* SR–MEMX–2023–36. On December 20, 2023, in order to correct an inadvertent administrative error, the Exchange withdrew the Fourth ORF Filing and submitted a fifth proposal for immediate effectiveness (''Fifth ORF Filing'' and together with the Third ORF Filing and Fourth ORF Filing, the ''Subsequent Filings''). *See* Securities Exchange Act Release No. 99259 (January 2, 2024), 89 FR 965 (January 8, 2024) SR–MEMX–2023–38.

[9] *See* SR–MEMX–2024–17.

[10] *See* SR–MEMX–2024–20.

SR–MEMX–2024–23.[11] Accordingly, the Exchange's collection of ORF is currently scheduled to sunset on October 31, 2024. The Exchange proposes to extend the existing sunset to May 31, 2025, for the reasons described herein.

The ORF is designed to recover a material portion of the costs to the Exchange of the supervision and regulation of Members' customer options business, including performing routine surveillances and investigations, as well as policy, rulemaking, interpretive and enforcement activities. The Exchange believes that revenue generated from the ORF, when combined with all of the Exchange's other regulatory fees and fines, will cover a material portion, but not all, of the Exchange's regulatory costs. Currently, all other registered options exchanges impose ORF on their members, and those exchanges also charge ORF for executions occurring on MEMX Options cleared by their customers.[12]

The Exchange notes that in 2019, the Commission issued suspensions of and orders instituting proceedings to determine whether to approve or disapprove a proposed rule change to modify the Options Regulatory Fee of NYSE American, NYSE Arca, MIAX, MIAX Pearl, MIAX Emerald, Cboe, Cboe EDGX Options, and C2.[13] Each of those exchanges had filed to increase their ORF, and the Commission indicated that each of those filings lacked detail and specificity, signaling that more information was needed to speak to whether the proposed increased ORFs were reasonable, equitably allocated and not unfairly discriminatory, particularly given that the ORF is assessed on transactions that clear in the ''customer'' range and regardless of the exchange on which the transaction occurs. The Commission also noted that the filings provided only broad general statements regarding options transaction volume and did not provide any information on those exchanges' historic or projected options regulatory costs (including the costs of regulating activity that cleared in the ''customer'' range and the costs of regulating activity that occurred off exchange), the amount of regulatory revenue they had generated and expected to generate from the ORF as well as other sources, or the ''material portion'' of options regulatory expenses that they sought to recover from the ORF. Each of those exchanges withdrew their filings, but continue charging ORF today as discussed above. Since that time, MEMX Options launched and commenced operations and as noted previously, its Initial ORF Filing was also suspended.[14] Unlike its competitors noted above, however, the Exchange did not have a previously implemented ORF to continue charging notwithstanding said suspensions. As such, the Exchange proposed to establish an ORF but has maintained a sunset date, in order to allow it time to inform its approach to the ORF moving forward.

MEMX is a new exchange operator founded by a diverse group of market participants to bring competition to the U.S. securities markets. Over the past year, the Exchange has engaged with retail brokers, market makers, and other options market participants on potential paths to address industry concerns about existing ORF practices. The result of those efforts have made clear that there is not yet consensus among market participants on a path forward that would address their stated concerns in a manner that would effect change broadly across all U.S. options exchanges. As such, the Exchange proposes additional time to work towards a permanent ORF solution by gathering relevant data internally as well from other industry participants, while continuing to charge as other options exchanges currently do, until May 31, 2025, at which time its ORF will automatically sunset.

The Exchange notes that if, during the proposed sunset period of October 31, 2024 through May 31, 2025, a viable alternative methodology for the ORF presents itself, including the possibility that the Exchange proposes to implement a model based on the Nasdaq Proposals or an alternative to such proposals, the Exchange would endeavor to implement said alternative prior to the proposed sunset date. In other words, the existence of the sunset date of May 31, 2025, for the Exchange's current ORF would not preclude the

[14] *See supra* note 7.

Exchange from filing to modify its ORF methodology prior to that date, if applicable.

As a new exchange, not having the opportunity to fund a portion of its regulatory program through the same regulatory fee charged by every other options exchange would place an undue disadvantage upon the Exchange's regulatory program and options business as a whole. Further, the Exchange emphasizes that other exchanges will be charging ORF for transactions occurring on MEMX Options, and as such, it follows that the Exchange that is primarily responsible for monitoring those transactions should also be able to charge the ORF for activity occurring on its own market, as well as transactions it surveils on away markets. Again, the Exchange is committed to facilitating and joining efforts to revamp the ORF, however, it must be afforded additional time to gather data and analysis both internally and externally, while recouping a portion of its regulatory costs via the ORF as all other options exchanges currently do.

2. Statutory Basis

The Exchange believes that its proposal to amend its Fee Schedule is consistent with Section 6(b) of the Act [15] in general, and furthers the objectives of Section 6(b)(4) of the Act [16] in particular, in that it is an equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities. The Exchange also believes the proposal furthers the objectives of Section 6(b)(5) of the Act [17] in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest and is not designed to permit unfair discrimination between customers, issuers, brokers and dealers.

The ORF is designed to recover a material portion of the costs of supervising and regulating Members' customer options business including performing routine surveillances and investigations, as well as policy, rulemaking, interpretive, and enforcement activities. Extending the current ORF sunset date to May 31, 2025 is reasonable because continued collection of ORF will serve to balance the Exchange's regulatory revenue against the anticipated regulatory costs, thereby ensuring proper regulatory funding. Moreover, the Exchange's ORF rate is significantly lower than the amount of ORF assessed by other exchange groups.[18]

The Exchange notes that while certain individual options exchanges do charge a lower ORF than that currently charged by the Exchange, each of these options exchanges is part of an exchange ''group'' (*i.e.,* affiliated with other options exchanges). In turn, each of these exchange groups charges more than two (2) to five (5) times the amount of ORF as a group when compared to the Exchange's ORF rate.[19] While each additional options exchange is its own legal entity with regulatory obligations under the Act to regulate its members, there is significant scale that can be achieved for an exchange group that operates multiple exchanges, including with respect to regulation, and this scale allows such options exchanges to operate with a lower assessment of ORF. In other words, the initial fixed costs associated with implementing an exchange group's options regulatory program are scalable as additional options exchanges are launched by that exchange group.

Extending the sunset date is also reasonable because doing so would allow the Exchange additional time to inform its approach to ORF moving forward while recouping a portion of its regulatory expenses via the ORF as other options exchanges do. If the Exchange were not allowed to charge an ORF during this additional time period, then after the sunset date of October 31, 2024, it would be forced to pay for its regulatory program solely out of business revenues while working towards an alternative ORF solution, unlike every other competing exchange, each of which would continue to assess an ORF, including on transactions executed on MEMX Options, indefinitely. This would impact MEMX's ability to assure adequate funding of its regulatory program.

Extending the ORF sunset date to May 31, 2025, is also equitable and not unfairly discriminatory because prior to the proposed sunset date, the ORF would continue to be objectively allocated to Members in a manner that is consistent with the ORF currently imposed by the other seventeen (17) options exchanges. The Exchange will continue to monitor the amount of revenue collected from the ORF to ensure that it, in combination with its other regulatory fees and fines, does not exceed the Exchange's total regulatory costs. The Exchange has designed the ORF to generate revenues that, when combined with all of the Exchange's other regulatory fees, will be less than 75% of the Exchange's regulatory costs, which is consistent with the Exchange's by-laws that state in Section 17.4(b): ''[a]ny Regulatory Funds shall not be used for non-regulatory purposes or distributed, advanced or allocated to any Company Member, but rather, shall be applied to fund regulatory operations of the Company (including surveillance and enforcement activities) . . .'' [20]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. This proposal will not create an unnecessary or inappropriate intra-market burden on competition because the Exchange's ORF is designed to enable the Exchange to recover a material portion of the Exchange's cost related to its regulatory activities. This proposal will not create an unnecessary or inappropriate inter-market burden on competition because it will be a regulatory fee that supports regulation and customer protection in furtherance of the purposes of the Act. The Exchange is obligated to ensure that the amount of regulatory revenue collected from the ORF, in combination

[15] 15 U.S.C. 78f(b).

[16] 15 U.S.C. 78f(b)(4).

[17] 15 U.S.C. 78f(b)(5).

[18] *See, e.g.,* NYSE Arca Options Fees and Charges, Options Regulatory Fee (''ORF'') and NYSE American Options Fees Schedule, Section VII(A), which provide that ORF is assessed at a rate of $0.0055 per contract for each respective exchange. *See also* Nasdaq PHLX, Options 7 Pricing Schedule, Section 6(D), which provides for an ORF rate of $0.0034 per contract, Cboe Options Fee Schedule, which provides an ORF rate of $0.0017 per contract, Nasdaq Options Market, Options 7 Pricing Schedule, Section 5, which provides an ORF rate of $0.0016 per contract, BOX Options Fee Schedule Section II(C), which provides an ORF rate of $0.00295 per contract, MIAX Options Fee Schedule, Section 2(b), which provides an ORF rate of $0.0019 per contract, MIAX Pearl Fee Schedule, Section 2(b), which provides an ORF rate of $0.0018 per contract.

[19] Each of MIAX Emerald, Cboe BZX Options, Cboe C2 Options, Cboe EDGX Options, Nasdaq ISE Gemini, Nasdaq ISE and Nasdaq BX Options charges a lower rate than $0.0015 per contract, which is the rate proposed by the Exchange. However, the Cboe exchanges, comprised of four options exchanges, charges an aggregate ORF rate of $0.0021 per contract (more than the Exchange's current rate), the MIAX exchanges, comprised of four options exchanges, charges an aggregate ORF rate of $0.0056 per contract (nearly 4 times the Exchange's current rate); and the Nasdaq exchanges, comprised of six options exchanges, charges an aggregate ORF rate of $0.0084 per contract (nearly 6 times the Exchange's current rate). The Exchange notes that the NYSE exchanges, comprised of two options exchanges, charges an aggregate ORF rate of $0.011 per contract (over 7 times the Exchange's current rate).

[20] *See* MEMX LLC—LLC Agreement at *https://info.memxtrading.com/regulation/governance/*.

with its other regulatory fees and fines, does not exceed regulatory costs.

The Exchange's ORF, as described herein, is lower than or comparable to fees charged by other options exchanges (though as noted above, some exchange groups do have options exchanges operating with a lower ORF on a standalone basis).

The Exchange notes that while it does not believe that its ORF will impose any burden on inter-market competition, the Exchange being precluded from charging an ORF after October 31, 2024, while other options exchanges are permitted to continue to charge ORF would, in-fact, significantly burden the Exchange's ability to assure adequate funding of its regulatory program. As noted above, the Exchange is a new entrant in the highly competitive environment for equity options trading. As also noted above, all seventeen (17) other registered options exchanges currently impose the ORF on their members, and such ORF fees imposed by other options exchanges currently do and will continue to extend to executions occurring on the Exchange. The Exchange believes that it is possible that it and other exchanges may adopt ORF fees based on the Nasdaq Proposals or based on an alternative model during the proposed sunset period, and the Exchange is not precluded from adopting said alternative during the proposed sunset period. However, in order to be treated similarly to these exchanges, it must, in fact, impose an ORF on its Members during this additional sunset period, and the inability to do so would result in an unfair disadvantage to the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act [21] and Rule 19b–4(f)(2) [22] thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–MEMX–2024–42 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–MEMX–2024–42. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–MEMX–2024–42 and should be submitted on or before December 9, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101578; File No. SR–NYSENAT–2024–28]

Self-Regulatory Organizations; NYSE National, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Service for Virtual Control Circuits in the Connectivity Fee Schedule

November 12, 2024.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on October 30, 2024, NYSE National, Inc. (''NYSE National'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the service for virtual control circuits in the Connectivity Fee Schedule. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the existing service for virtual control circuits (''VCCs'') in the Connectivity Fee Schedule.

A VCC (previously called a ''peer to peer'' connection) is a unicast connection through which two participants can establish a connection between two points over dedicated bandwidth, to be used for any purpose. At the Mahwah, New Jersey data center (''MDC'')[4] the Exchange offers VCCs between two Users.[5] The recurring monthly fees are based upon the bandwidth requirements per VCC connection between two Users.[6]

However, not all VCCs are between two Users in the MDC. Although all VCCs have at least one end that is a User inside the MDC, the other party may be a non-User outside of the MDC at a remote access center, or the VCC can be between a User in the MDC and the same User outside of the MDC at a remote access center. A VCC that goes outside of the MDC herein is called a ''MDC VCC.''

Accordingly, the Exchange proposes to amend the Connectivity Fee Schedule to delete ''between two Users'' after ''Virtual Control Circuit.'' Fees for the service would not change and, as now, connectivity to a VCC would require the permission of the non-billed party before the Exchange would establish the connection.

As background, Users require wired circuits to connect into and out of the MDC. A User's equipment in the MDC's colocation hall connects to a circuit leading out of the MDC, which connects to the User's equipment in their back office or another data center.

Before 2013, all such circuits were provided by ICE's predecessor, NYSE Euronext. In response to customer demand for more connectivity options, in 2013, the MDC opened two ''meet-me-rooms'' to telecommunications service providers (''Telecoms''),[7] to enable Telecoms to offer circuits into the MDC in competition with NYSE Euronext. Currently, 16 Telecoms operate in the meet-me-rooms and provide circuit options to Users requiring connectivity into and out of the MDC.

In addition, FIDS provides two different types of circuits, Optic Low Latency and Optic Access. Optic Access,[8] which is more similar to the MDC VCC, is a circuit between the MDC and the FIDS access centers at five third-party owned data centers: (1) 111 Eighth Avenue, New York, NY; (2) 32 Avenue of the Americas, New York, NY; (3) 165 Halsey, Newark, NJ; (4) Secaucus, NJ; and (5) Carteret, NJ.

Ultimately, the MDC VCCs are similar to the Optic Access FIDS circuits in that, like Optic Access, the MDC VCCs run between the MDC and five FIDS access centers as well as, in the case of the MDC VCCs, additional U.S. FIDS access centers. They are smaller than the Optic Access FIDS circuits, however. While the Exchange has no visibility into how a User utilizes its connections, the Exchange believes that the Optic Access FIDS circuit is used for items that require more bandwidth, like market data, while the MDC VCCs are used for items that require smaller amounts of bandwidth, such as messaging, pre- and post-trade data, or clearing information, as determined by the User. Accordingly, if a User wants a smaller connection to a U.S. access center, or wants to reach an access center that Optic Access does not reach, the MDC VCCs are a viable option.

General

The proposed rule change would not apply differently to distinct types or sizes of market participants. Rather, it would apply to all Users equally. As is currently the case, the Fee Schedule would be applied uniformly to all Users. FIDS does not expect that the proposed rule change will result in new Users.

The proposed change is not otherwise intended to address any other issues relating to co-location services and/or related fees, and the Exchange is not aware of any problems that customers would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[9] in general, and furthers the objectives of Section 6(b)(5) of the Act,[10] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(4) of the Act,[11] because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers.

The Proposed Change Is Reasonable

The Exchange believes that the proposed rule change is reasonable.

Although all VCCs have at least one end that is a User inside the MDC, the other party may be a non-User outside of the MDC at a remote access center, or the VCC can be between a User in the MDC and the same User outside of the MDC at a remote access center. Accordingly, the proposed change is reasonable because it would make the Connectivity Fee Schedule more accurately reflect the usage of VCCs. It would ensure that the description of VCCs was complete, accessible and transparent, and thereby provide market participants with greater clarity.

In considering the reasonableness of proposed services and fees, the Commission's market-based test considers ''whether the exchange was

[4] Through its Fixed Income and Data Services (''FIDS'') (previously ICE Data Services) business, Intercontinental Exchange, Inc. (''ICE'') operates the MDC. The Exchange and the New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., and NYSE Chicago, Inc. (together, the ''Affiliate SROs'') are indirect subsidiaries of ICE.

[5] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 83351 (May 31, 2018), 83 FR 26314 at n.9 (June 6, 2018) (SR–NYSENAT–2018–07). As specified in the Fee Schedule, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Affiliate SROs. Each Affiliate SRO has submitted substantially the same proposed rule change to propose the change described herein. *See*SR–NYSE–2024–69, SR–NYSEAMER–2024–64, SR–NYSEARCA–2024–91, and SR–NYSECHX–2024–31.

[6] *See* 83 FR 26314, *supra* note 5, at 26318.

[7] Telecommunication service providers that choose to provide circuits at the MDC are referred to as ''Telecoms.'' Telecoms are licensed by the Federal Communications Commission (''FCC'') and are not required to be, or be affiliated with, a member of the Exchange or an Affiliate SRO.

[8] The ''Optic Low Latency'' circuits are lower latency. *See* Securities Exchange Act Release No. 99168 (December 14, 2023), 88 FR 88152 (December 20, 2023) (SR–NYSENAT–2023–29).

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(5).

[11] 15 U.S.C. 78f(b)(4).

subject to significant competitive forces in setting the terms of its proposal. . . . including the level of any fees.'' [12] If the Exchange meets that burden, ''the Commission will find that its proposal is consistent with the Act unless 'there is a substantial countervailing basis to find that the terms' of the proposal violate the Act or the rules thereunder.'' [13] Here, the Exchange is subject to significant competitive forces in setting the terms on which it offers its proposal, in particular because substantially similar substitutes are available, and the third-party vendors are not at a competitive disadvantage created by the Exchange.

MDC VCCs would compete with circuits currently offered by the 16 third-party Telecoms that have installed their equipment in the MDC's two meet-me-rooms. The Telecom circuits are reasonable substitutes for the MDC VCCs. The Commission has recognized that products do not need to be identical to be considered substitutable; it is sufficient that they be substantially similar.[14] The MDC VCCs, the FIDS circuits, and the circuits provided by the Telecoms all perform the same function: connecting into and out of the MDC. The providers of the MDC VCCs, VCCs between Users, FIDS circuits and Telecom circuits design them to perform with particular combinations of latency, bandwidth, price, termination point, and other factors that they believe will attract Users, and Users choose from among these competing services on the basis of their business needs.

The MDC VCCs are sufficiently similar substitutes to the circuits offered by the 16 Telecoms even though the MDC VCCs all terminate in one of the U.S. remote access centers, while circuits from the 16 Telecoms could terminate in those locations or additional locations. While neither the Exchange nor FIDS knows the end point of any particular Telecom circuit, the Exchange understands that the Telecoms can offer circuits terminating in any location, including the remote access centers where the MDC VCCs would terminate. Moreover, the Telecoms may offer smaller circuits that are the same as or similar size to the MDC VCCs. Ultimately, Users can choose to configure their pathway leading out of colocation in the way that best suits their business needs, which may include connecting to the User's equipment at one of the U.S. remote access center locations that serve as termination points for MDC VCCs, or connecting first to one of those remote access centers with a FIDS- or Telecom-supplied circuit and then further connecting to another remote location using a telecommunication provider-supplied circuit.

Neither the MDC VCCs, Optic Access circuits, nor the Optic Low Latency circuits have a distance or latency advantage over the Telecoms' circuits within the MDC. FIDS has normalized (a) the distance between the meet-me-rooms and the colocation halls and (b) the distance between the rooms where the FIDS circuits and the MDC VCCs exit the MDC and the colocation halls. As a result, a User choosing whether to use the MDC VCCs or Telecom circuits does not face any difference in the distances or latency within the MDC.

The Exchange also believes that the MDC VCCs do not have any latency or bandwidth advantage over the Telecoms' circuits outside of the MDC. The Exchange believes that the Telecoms operating in the meet-me-rooms offer circuits with a variety of latency and bandwidth specifications, some of which may exceed the specifications of the proposed MDC VCCs.[15] The Exchange believes that Users consider these latency and bandwidth factors—as well as other factors, such as price and termination point—in determining which offerings will best serve their business needs.

In sum, the Exchange does not believe that there is anything about the MDC VCCs that would make the Telecoms' circuits inadequate substitutes.

Nor does the Exchange have a competitive advantage over any third-party competitors by virtue of the fact that it owns and operates the MDC's meet-me-rooms. In most cases, circuits coming out of the MDC are provided by the Telecoms.[16] Currently, 16 Telecoms operate in the meet-me-rooms and provide a variety of circuit choices. It is in the Exchange's best interest to set the fees that Telecoms pay to operate in the meet-me-rooms at a reasonable level [17] so that market participants, including Telecoms, will maximize their use of the MDC. By setting the meet-me-room fees at a reasonable level, the Exchange encourages Telecoms to participate in the meet-me-rooms and to sell circuits to Users for connecting into and out of the MDC. These Telecoms then compete with each other by pricing such circuits at competitive rates. These competitive rates for circuits help draw in more Users and Hosted Customers to the MDC, which directly benefits the Exchange by increasing the customer base to whom the Exchange can sell its colocation services, which include cabinets, power, ports, and connectivity to many third-party data feeds, and because having more Users and Hosted Customers leads, in many cases, to greater participation on the Exchange. In this way, by setting the meet-me-room fees at a level attractive to telecommunications firms, the Exchange spurs demand for all of the services it sells at the MDC, while setting the meet-me-room fees too high would negatively affect the Exchange's ability to sell its services at the MDC.[18] Accordingly, there are real constraints on the meet-me-room fees the Exchange charges, such that the Exchange does not have an advantage in terms of costs when compared to third parties that enter the MDC through the meet-me-rooms to provide services to compete with the Exchange's services.

If the Exchange were to set the price of the MDC VCCs too high, Users would likely respond by choosing one of the many alternative options offered by the 16 Telecoms. Conversely, if the Exchange were to offer the MDC VCCs at prices aimed at undercutting comparable Telecom circuits, the Telecoms might reassess whether it makes financial sense for them to continue to participate in the MDC's meet-me-rooms. Their departure might negatively impact User participation in

[12] Securities Exchange Act Release No. 90209 (October 15, 2020), 85 FR 67044, 67049 (October 21, 2020) (Order Granting Accelerated Approval to Establish a Wireless Fee Schedule Setting Forth Available Wireless Bandwidth Connections and Wireless Market Data Connections) (SR–NYSE–2020–05, SR–NYSEAMER–2020–05, SR–NYSEArca–2020–08, SR–NYSECHX–2020–02, SR–NYSENAT–2020–03, SR–NYSE–2020–11, SR–NYSEAMER–2020–10, SR–NYSEArca–2020–15, SR–NYSECHX–2020–05, SR–NYSENAT–2020–08) (''Wireless Approval Order''), citing Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74781 (December 9, 2008) (''2008 ArcaBook Approval Order''). *See NetCoalition* v. *SEC,* 615 F.3d 525 (D.C. Cir. 2010).

[13] Wireless Approval Order, *supra* note 12, at 67049, citing 2008 ArcaBook Approval Order, *supra* note 12, at 74781.

[14] *See* 2008 ArcaBook Approval Order, *supra* note 12, at 74789 and note 295 (recognizing that products need not be identical to be substitutable).

[15] The specifications of FIDS's competitors' circuits are not publicly known. The Exchange understands that FIDS has gleaned any information it has about its competitors through anecdotal communications, by observing customers' purchasing choices in the competitive market, and from its own experience as a purchaser of circuits from telecommunications providers to build FIDS's own networks.

[16] Note that in the case of wireless connectivity, a User in colocation still requires a fiber circuit to transport data. If a Telecom is used, the data is transmitted wirelessly to the relevant pole, and then from the pole to the meet-me-room using a fiber circuit.

[17] *See* Securities Exchange Act Release No. 98002 (July 26, 2023), 88 FR 50232 (August 1, 2023) (SR–NYSENAT–2023–12).

[18] *See id.* at 50235. Importantly, the Exchange is prevented from making any alteration to its meet-me-room services or fees without filing a proposal for such changes with the Commission.

colocation and on the Exchange. As a result, the Exchange is not motivated to undercut the prices of Telecom circuits.

For these reasons, the proposed change is reasonable.

The Proposed Change Is Equitable

The Exchange believes that the proposed change provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers because it is not designed to permit unfair discrimination between market participants. The proposed change would apply equally to all types and sizes of market participants. It would clarify that all VCCs, irrespective of whether between two Users, a User and non-User outside of the VCC, or the same User, are subject to the same size and cost provisions. In addition, the Exchange believes that the proposal is equitable because only market participants that voluntarily select to receive MDC VCCs would be charged for them.

Moreover, the proposed change would ensure that the Connectivity Fee Schedule accurately reflects the usage of VCCs. It would ensure that the description of VCCs was complete, accessible and transparent, and provide market participants with greater clarity.

The Proposed Change Is Not Unfairly Discriminatory

The Exchange believes its proposal is not unfairly discriminatory. The proposed change does not apply differently to distinct types or sizes of market participants. Rather, it applies to all market participants equally. The purchase of any proposed service is completely voluntary and the Fee Schedule will be applied uniformly to all market participants.

In addition, the Exchange believes that the proposal is equitable because only market participants that voluntarily select to receive MDC VCCs would be charged for them. The MDC VCCs are available to all market participants on an equal basis, and all market participants that voluntarily choose to purchase a MDC VCC are charged the same amount as all other market participants purchasing that type of MDC VCC.

For the reasons above, the proposed change does not unfairly discriminate between or among market participants that are otherwise capable of satisfying any applicable co-location fees, requirements, terms, and conditions established from time to time by the Exchange.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposal will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of Section 6(b)(8) of the Act.[19] The proposed rule change is designed to ensure that the provision on VCCs clarifies that all VCCs, irrespective of whether between two Users, a User and non-User outside of the VCC, or the same User, are subject to the same size and cost provisions. It is not meant to address intramarket or intermarket competition.

The proposed change would enhance competition in the market for circuits transmitting data into and out of colocation at the MDC by adding VCCs, in addition to the 16 Telecoms that also sell circuits to Users and the FIDS circuits. The MDC VCCs do not have any latency, bandwidth, or other advantage over the Telecoms' circuits. The proposal would not burden competition in the sale of such circuits, but rather, enhance it by providing Users with an additional choice for their circuit needs.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[20] and Rule 19b–4(f)(6) thereunder.[21] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[22]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[23] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–NYSENAT–2024–28 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSENAT–2024–28. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101586; File No. SR–NYSEAMER–2024–66]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Modify the NYSE American Options Fee Schedule

November 12, 2024.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on November 1, 2024, NYSE American LLC (''NYSE American'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to modify the NYSE American Options Fee Schedule. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing [sic] to amend the Fee Schedule to increase the maximum combined credits and rebates available to Floor Brokers for qualifying Qualified Contingent Cross Trades (''QCCs''). The Exchange proposes to implement the rule change on November 1, 2024.

The Exchange proposes to modify Section I.F. and Section III.E.1. to increase the maximum combined Floor Broker credits and rebates paid through the Manual Billable Rebate Program, respectively, for qualifying QCCs to $2,750,000 per month per Floor Broker firm, an increase from the current monthly amount of 2,500,000 (the ''Maximum Combined Rebate/Credit'' or ''QCC Cap'').[4] The proposed increase is designed to encourage Floor Broker firms to continue to direct transactions to the Exchange, despite increasing industry volumes making it less difficult to attain the maximum rebate. By increasing the QCC Cap, Floor Brokers are eligible to achieve more QCC credits and rebates, thus making the Exchange a more attractive venue for QCC transactions.[5]

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[6] in general, and furthers the objectives of Sections 6(b)(4) and (5) of the Act,[7] in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The proposed change [sic] to the Fee Schedule are reasonable, equitable, and not unfairly discriminatory. As a threshold matter, the Exchange is subject to significant competitive forces in the market for options securities transaction services that constrain its pricing determinations in that market. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [8]

There are currently 17 [sic] registered options exchanges competing for order flow. Based on publicly-available information, and excluding index-based options, no single exchange has more than 16% of the market share of executed volume of multiply-listed equity and ETF options trades.[9] Therefore, currently no exchange possesses significant pricing power in the execution of multiply-listed equity & ETF options order flow. More specifically, in September of 2024, the Exchange had 7.64% market share of executed volume of multiply-listed equity & ETF options trades.[10] In such

[3] 17 CFR 240.19b–4.

[4] *See* proposed Fee Schedule, Sections III.E.1 and I.F. (providing, in relevant, part that Floor Broker credits paid for QCC trades and rebates paid through the Manual Billable Rebate Program shall not combine to exceed $2,500,000 per month per Floor Broker firm). The Exchange notes that the Manual Billable Rebate Program is available only to Floor Brokers that participate in the FB Prepay Program. *See* Fee Schedule, Section III.E.1. As such, the proposed increase to the QCC Cap would likewise encourage more Floor Brokers to participate in this Program.

[5] The Exchange notes that the Manual Billable Rebate Program is available only to Floor Brokers that participate in the FB Prepay Program. *See* Fee Schedule, Section III.E.1. As such, the proposed increase to the QCC Cap would likewise encourage more Floor Brokers to participate in this Program.

[10] Based on a compilation of OCC data for monthly volume of equity-based options and monthly volume of equity-based ETF options, *see id.,* the Exchanges market share in equity-based

a low-concentrated and highly competitive market, no single options exchange possesses significant pricing power in the execution of option order flow. Within this environment, market participants can freely and often do shift their order flow among the Exchange and competing venues in response to changes in their respective pricing schedules. As such, the proposal represents a reasonable attempt by the Exchange to remain competitive and to continue to attract QCC transactions to the Exchange.

The Exchange believes that the proposed increase of the QCC Cap is reasonable, equitable, and not unfairly discriminatory because it is intended to encourage Floor Brokers to direct QCC transactions to the Exchange. The Exchange believes the proposed increase to the QCC Cap is reasonable given that increasing industry volumes make it less difficult to attain the QCC Cap. Floor Brokers that exceed the monthly QCC Cap may be incentivized to direct additional QCC volume (in that same month) away from the Exchange to another venue that offers more favorable pricing.

The proposed change is intended to encourage the role performed by Floor Brokers in facilitating the execution of orders via open outcry, a function which the Exchange wishes to support for the benefit of all market participants. Floor Brokers have the option to execute QCC transactions on the Exchange to earn the various proposed credits and rebates or not. The credits and rebates for QCC transactions (and whether a Floor Broker exceeds the increased QCC Cap) are based on the amount and type of business a Floor Broker transacts on the Exchange and are available—and apply equally to all similarly situated Floor Brokers. As such, the proposed increase to the QCC Cap is an equitable allocation of its fees and credits that is not unfairly discriminatory.

To the extent that the proposed changes attract more volume to the Exchange, this increased order flow would continue to make the Exchange a more competitive venue for order execution, which, in turn, promotes just and equitable principles of trade and removes impediments to and perfects the mechanism of a free and open market and a national market system. The Exchange notes that all market participants stand to benefit from any increase in volume by Floor Brokers, which could promote market depth, facilitate tighter spreads and enhance price discovery, to the extent the proposed change encourages Floor Brokers to utilize the Exchange as a primary trading venue, and may lead to a corresponding increase in order flow from other market participants. In addition, any increased liquidity on the Exchange would result in enhanced market quality for all participants.

Finally, the Exchange believes that it is subject to significant competitive forces, as described below in the Exchange's statement regarding the burden on competition.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act, the Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Instead, as discussed above, the Exchange believes that the proposed changes would encourage the submission of additional liquidity to a public exchange, thereby promoting market depth, price discovery and transparency and enhancing order execution opportunities for all market participants. As a result, the Exchange believes that the proposed change furthers the Commission's goal in adopting Regulation NMS of fostering integrated competition among orders, which promotes ''more efficient pricing of individual stocks for all types of orders, large and small.'' [11]

Intramarket Competition. The proposed increase of the QCC Cap would apply equally to all similarly-situated Floor Brokers and is design [sic] to continue to incent Floor Brokers to execute QCC transactions on the Exchange. To the extent that the proposed change achieves its purpose in attracting more Floor Broker volume to the Exchange, this increased order flow would continue to make the Exchange a more competitive venue for, among other things, order execution. Thus, the Exchange believes the proposed rule changes would improve market quality for all market participants on the Exchange and, therefore, attract more order flow to the Exchange, thereby improving market-wide quality and price discovery. To the extent that there is an additional competitive burden on non-Floor Brokers, the Exchange believes that any such burden would be appropriate because Floor Brokers serve an important function in facilitating the execution of orders and price discovery for all market participants.

Intermarket Competition. The Exchange operates in a highly competitive market in which market participants can readily favor one of the 17 competing option exchanges if they deem fee levels at a particular venue to be excessive. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges and to attract order flow to the Exchange. Based on publicly-available information, and excluding index-based options, no single exchange has more than 16% of the market share of executed volume of multiply-listed equity and ETF options trades.[12] Therefore, no exchange possesses significant pricing power in the execution of multiply-listed equity and ETF options order flow. More specifically, in September 2024 the Exchange had less than 8% market share of executed volume of multiply-listed equity and ETF options trades.[13]

The Exchange believes that the proposed change reflects this competitive environment because it modifies the Exchange's fees and credits in a manner designed to continue to incent Floor Brokers to direct trading interest (particularly QCC transactions) to the Exchange, to provide liquidity and to attract order flow. To the extent that Floor Brokers are encouraged to try to meet the QCC Cap and/or incentivized to utilize the Exchange as a primary trading venue for all transactions, all of the Exchange's market participants should benefit from the improved market quality and increased opportunities for price improvement. The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues. In such an environment, the Exchange must continually review, and consider adjusting, its fees and credits to remain competitive with other exchanges. For the reasons described above, the Exchange believes that the proposed rule change reflects this competitive environment.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

options increased from 7.31% for the month of September 2023 to 7.64% for the month of September 2024.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A) [14] of the Act and subparagraph (f)(2) of Rule 19b–4 [15] thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [16] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–NYSEAMER–2024–66 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEAMER–2024–66. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSEAMER–2024–66 and should be submitted on or before December 9, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101583; File No. SR–CboeEDGX–2024–075]

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt Fees for Its New Offering of Market Data Reports

November 12, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 7, 2024, Cboe EDGX Exchange, Inc. (the ''Exchange'' or ''EDGX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGX Exchange, Inc. (the ''Exchange'' or ''EDGX'') proposes to adopt fees for its new offering of market data reports. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/options/regulation/rule_filings/edgx/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule to adopt fees for Cboe Timestamping Service reports, effective November 1, 2024.[3] The Exchange recently adopted a new data product known as the Cboe Timestamping Service.[4] The Cboe Timestamping Service provides timestamp information for orders and cancels for market participants. More specifically, the Cboe Timestamping Service reports provide various timestamps relating to the message lifecycle throughout the exchange system. The first report—the Missed Liquidity Report—covers order messages of the Member only and the second report—Cancels Report—covers cancel messages of the Member only. The reports are optional products that are available to all Members and Members may opt to choose both reports, one report, or neither report.

[3] The Exchange initially filed the proposed change on November 1, 2024 (SR–EDGX–2024–074). On November 7, 2024, the Exchange withdrew that filing and submitted this filing.

[4] *See* Securities Exchange Act Release No. 100802 (August 28, 2024), 89 FR 68952 (August 22, 2024) (SR–CboeEDGX–2024–053).

The Cancels Report provides response time details for orders that rest on the book where the Member attempted to cancel that resting order or any other resting order but was unable to do so as the resting order was executed before the system processed the cancel message. The Cancels Report assists the Member in determining by how much time that order missed being canceled instead of executing.

The Missed Liquidity Report provides time details for executions of orders that rest on the book where the Member attempted to execute against that resting order within an Exchange-determined amount of time (not to exceed 1 millisecond) after receipt of the first attempt to execute against the resting order and within an Exchange-determined amount of time (not to exceed 100 microseconds) before receipt of the first attempt to execute against the resting order.

Both the Missed Liquidity Report and Cancels Report include the following data elements for orders [5] and cancel messages,[6] respectively: (1) Member Firm ID; (2) Symbol; (3) Execution ID; [7] (3) Exchange System Timestamps for orders and cancels; [8] (4) Matching Unit number; [9] (5) Queued; [10] (6) Port Type; [11] and (7) Aggressor Order Type.[12] No specific information about resting orders on the Exchange book are provided.

These reports are in response to requests from Members for additional data concerning the timeliness of their incoming orders, cancel messages and executions against resting orders. The Exchange believes these reports will increase transparency by providing Members with an opportunity to learn more about better opportunities to access liquidity and receive better execution rates and improve order cancel success.

The Exchange notes that the data included in the reports are based only on the data of the market participant that opts to subscribe to the reports (''Recipient Member'') and do not include information related to any Member other than the Recipient Member. Additionally, neither report includes real-time market data. Rather, the reports contain historical data from the prior trading day and are available after the end of the trading day, generally on a T+1 basis.

The Exchange now proposes to assess the following monthly fees for Members that wish to purchase the Cancels Report and/or the Missed Liquidity Report. The Exchange proposes a monthly flat fee of $1,000 for the Cancels Report for a subscribing Member. The Exchange also proposes a progressive monthly fee structure for the Missed Liquidity Report based on the Member's subscribing logical (FIX or BOE) order entry ports (the ''Ports'') [13] with the following tiers: $1,500 for 1–10 Ports, $2,000 for 11–20 Ports and $2,500 for 21 and more Ports.[14] For a mid-month subscription, the monthly fee(s) shall be prorated based on the initial date of the subscription.[15]

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[16] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [17] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [18] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with Section 6(b)(4) of the Act,[19] which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Members and other persons using its facilities.

In adopting Regulation NMS, the Commission granted self-regulatory organizations (''SROs'') and broker dealers increased authority and flexibility to offer new and unique market data to consumers of such data. It was believed that this authority would expand the amount of data available to users and consumers of such data and also spur innovation and competition for the provision of market data. The Exchange believes that the proposed reports are the sort of market data product that the Commission envisioned when it adopted Regulation NMS.

The Commission concluded that Regulation NMS—by deregulating the market in proprietary data—would itself further the Act's goals of facilitating efficiency and competition: ''[E]fficiency is promoted when broker-dealers who do not need the data beyond the prices, sizes, market center identifications of the NBBO and consolidated last sale information are

[5] The Missed Liquidity Report only includes trade events which are triggered by an order that removed liquidity on entry and will exclude trade events resulting from: elected stop orders, orders routed and executed at away venues, and peg order movements, and auctions.

[6] Includes individual order cancellations, mass cancels, and purge orders messages that are sent via Financial Information Exchange (''FIX'') protocol or Binary Order Entry (BOE) protocol by a subscriber.

[7] The Execution ID is a unique reference number assigned by the Exchange for each trade.

[8] Includes Network Discovery Time (which is a network hardware switch timestamp taken at the network capture point); Order Handler NIC Timestamp (which is a hardware timestamp that represents when a BOE order handler server NIC observed the message); Order Handler Received Timestamp (which is software timestamp that represents when the FIX or BOE order handler has begun processing the order after the socket read); Order Handler Send Timestamp (which represents when the FIX or BOE order handler has finished processing the order and begun sending to the matching engine); Matching Engine NIC Timestamp (which is a hardware timestamp that represents when the target matching engine server NIC observed the message); and Matching Engine Transaction Timestamp (which is a software timestamp that represents when the matching engine has started processing an event).

[9] Represents the matching unit number.

[10] Flag to indicate whether a message was delayed due to message in flight limits (*i.e.,* a limit on the total number of messages in flight between an order handler and a matching engine).

[11] Refers to the port type used by the session to send the applicable message.

[12] Indicates whether the order type of the response order that executed against the resting order was a new order or modify message.

[13] Based on a Members' unique needs, Members may choose which Ports (if any) it would like to subscribe to the Missed Liquidity Report. For example, a Member that has 20 Ports, but is only interested in receiving data on 10 of their Ports would then be charged the $1,500 tier fee for its subscribing Ports.

[14] The Exchange proposes to make clear in the Fees Schedule that the proposed fees are not progressive (*i.e.,* if a Member requests the Missed Liquidity Report for 20 Ports, it will be assessed $2,000 per month).

[15] Fees will be assessed on a look-back basis based on the maximum number of subscribing Ports a Member had in the prior calendar month. For example, if a Member had 10 Ports that were subscribed to the Missed Liquidity Report from September 1st—September 26th and the Member added an additional Port to the Missed Liquidity Report on September 27th (for a total of 11 subscribing Ports), the Member would then be assessed a fee of $2,000 for the month of September for the Missed Liquidity Report. Additionally, the Exchange proposes to make clear in its fee schedule that new subscribers will be charged a prorated for a for a mid-month subscription based on the initial date of the subscription.

[16] 15 U.S.C. 78f(b).

[19] 15 U.S.C 78f(b)(4).

not required to receive (and pay for) such data. The Commission also believes that efficiency is promoted when broker-dealers may choose to receive (and pay for) additional market data based on their own internal analysis of the need for such data.'' [20]

By removing ''unnecessary regulatory restrictions'' on the ability of exchanges to sell their own data, Regulation NMS advanced the goals of the Act and the principles reflected in its legislative history. The Cboe Timestamping Service (*i.e.,* the Missed Liquidity and Cancels Reports) provides investors with new options for receiving market data, which was a primary goal of the market data amendments adopted by Regulation NMS.[21]

The reports are designed for Members that are interested in gaining insight into latency in connection with their respective (1) orders that failed to execute against an order resting on the Exchange order book and/or (2) cancel messages that failed to cancel resting orders. The Exchange believes that providing this optional data to interested Members for a fee is consistent with facilitating transactions in securities, removing impediments to and perfecting the mechanism of a free and open market and a national market system, and, in general, protecting investors and the public interest because it provides Members with an opportunity to receive additional information and insight into their trading activity on the Exchange.

The Exchange believes the fee proposals for both the Missed Liquidity Report and Cancels Report are reasonable as the Exchange is offering any Member access to subscribe to one or both report(s) in the Member's sole discretion based on their unique business needs. The reports are optional for Members to subscribe to if they believe it to be helpful and are not required for Members to purchase in order to access the Exchange. Additionally, Members may cancel their usage of this report at any time.

The Exchange believes that the fee structure for the Missing Liquidity Report reflects an equitable allocation and will not be unfairly discriminatory as it is a voluntary product designed to ensure that the amount of the charge is tailored to the specific port usage patterns of the Recipient Member. The range of fee options further ensures that Recipient Members are not charged a fee that is inequitably disproportionate to the use that they make of the product. Additionally, Recipient Members aren't required to pay the set threshold for all Ports it has in a given month, instead, Members are able to select which Ports (if any) they would like to subscribe to the Missing Liquidity Report for a given month in order to study its orders in the market to be better informed market participants. Members are under no obligation to subscribe to the Missing Liquidity Report if it does not desire to do so.

The fee structure for the Missing Liquidity Report closely aligns to the fee structure of the previously offered Missed Opportunity—Latency report as part of its NASDAQ Trader Insights offering.[22] However, the NASDAQ Missed Opportunity—Latency report included an additional tier with a higher price than the Exchange's proposed fee structure.[23] The NASDAQ structure included an additional tier level that imposes a monthly fee of $3,500 for subscribers that have over 25 ports [24] while the Exchange fee structure would provide its similar report for a fee of $2,500 for a Recipient Member that has 25 ports.

The Exchange believes its proposed fee for the Cancels Report is reasonable as it's a modest, flat fee of $1,000/month. As the Exchange offers mass cancels through Purge Ports in addition to standard cancels through the Ports, and since cancels may occur through a variety of port types as opposed to just the Ports, the Exchange found a modest, flat fee to be more appropriate for the Cancels Report.

The proposed fees are also reasonable as they are lower than the fees assessed for similar reports offered by other exchanges. For example, the MIAX Emerald Liquidity Taker Event Report is substantially similar to the Missed Liquidity Report and Cancels Report [25] and has a monthly fee of $4,000 or an annual fee of $24,000.[26] A Member is able to receive both the Cancels Report and the Missed Liquidity Report for a monthly fee no greater than $3,500 a month- making the Cboe Timestamping Reports less than the MIAX Emerald report. With the Exchange's approach of (i) bifurcating the orders and cancels to two separate and distinct offerings (Missing Liquidity Report and Cancels Report) and (ii) allowing Members to select its subscribing Ports for the Missed Liquidity Report, it allows Members to further curb costs if they choose to subscribe to one or both of these reports. As such, the Exchange believes that the proposed fees for the both the Missed Liquidity Report and Cancels Report are fair and reasonable as they are set at a level either similar to or lower than other exchanges that offer similar reports.

The proposal would also not permit unfair discrimination as both the Cancels Report and Missed Liquidity Report will be available to all Members, who may opt to subscribe to one, both, or neither, and will help to protect a free and open market by continuing to provide additional non-core data (offered on an optional basis for a fee) to the marketplace and by providing investors with greater choices.[27] As such, the Exchange believes that the proposed fees are reasonable and set at a level to compete with other exchanges that may choose to offer similar reports. Moreover, if a market participant views another exchange's potential report as more attractive, then such market participant can merely choose not to purchase the Exchange's reports and instead purchase another exchange's similar data product(s), which may offer similar data points, albeit based on that other market's trading activity.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose

[23] *See* Securities Exchange Act Release No. 79035 (October 11, 2016), 81 FR 70207 (October 4, 2016) (SR–NASDAQ–2016–124).

[24] *Id.*

[25] *See e.g.,* MIAX Emerald Rule 531. *See also* Securities Exchange Act Release No. 91356 (March 18, 2021), 86 FR 15759 (March 24, 2021) (SR–EMERALD–2021–09). Although not clearly defined, the Exchange believes that MIAX Emerald's Liquidity Taker Event Report also provides information relating to cancel messages. Particularly, MIAX Emerald Liquidity Taker Event Report provides, among other things, data relating to the ''type of each response submitted by the Recipient Member.'' *See* MIAX Emerald Rule 5.31(a)(iii)(C). MIAX Emerald's technical specifications outline the various types of available liquidity messages including, Simple Mass Quote Cancel Request and Mass Liquidity Cancel Request See MIAX Express Interface for Quoting and Trading Options, MEI Interface Specification, Section 4.1 (Liquidity Messages), available at: *MIAX_Express_Interface_MEI_v2.2a.pdf* (*miaxglobal.com*).

[26] *See* MIAX Emerald Fee Schedule, Section 7, Reports.

[27] *See* Sec. Indus. Fin. Mkts. Ass'n (SIFMA), Initial Decision Release No. 1015, 2016 SEC LEXIS 2278 (ALJ June 1, 2016) (finding the existence of vigorous competition with respect to non-core market data). *See also* the decision of the United States Court of Appeals for the District of Columbia Circuit in *NetCoalition* v. *SEC*, 615 F.3d 525 (D.C. Cir. 2010) (''NetCoalition I'') (upholding the Commission's reliance upon competitive markets to set reasonable and equitably allocated fees for market data).

any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes the reports will contribute to robust competition among national securities exchanges. The Missed Liquidity Report and Late Cancels Report further enhances competition between exchanges by allowing the Exchange to expand its product offerings to include reports similar to reports that are currently offered by other exchanges.[28]

The Exchange also does not believe the proposed fees would cause any unnecessary or inappropriate burden on intermarket competition as other exchanges are free to introduce their own comparable reports with lower prices to better compete with the Exchange's offerings. The Exchange operates in a highly competitive environment, and its ability to price the reports is constrained by competition among exchanges who choose to adopt similar products. The Exchange must consider this in its pricing discipline in order to compete for subscribers of the Exchange's market data via the reports. For example, proposing fees that are excessively higher than fees for potentially similar data products would simply serve to reduce demand for the Exchange's reports, which as discussed, Members are under no obligation to utilize. In this competitive environment, potential purchasers are free to choose which, if any, similar product to purchase to satisfy their need for market information. As a result, the Exchange believes this proposed rule change permits fair competition among national securities exchanges.

The Exchange does not believe the proposed rule change would cause any unnecessary or inappropriate burden on intramarket competition. Particularly, the proposed fees apply uniformly to any purchaser in that the Exchange does not differentiate between the different Members that may purchase the reports. While the Exchange does propose to implement tiered pricing for its Missed Liquidity Report (similar to the pricing used for NASDAQ Trader Insight offering),[29] the tiered pricing shall apply to all Members that wish to purchase the Missed Liquidity Report and this proposed pricing structure is reflective of the specific port usage patterns of the Recipient Member. The proposed fees are set at a modest level that would allow any interested Member to purchase such data based on their business needs.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[30] and paragraph (f) of Rule 19b–4[31] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–CboeEDGX–2024–075 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeEDGX–2024–075. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CboeEDGX–2024–075 and should be submitted on or before December 9, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[32]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101577; File No. SR–NYSECHX–2024–31]

Self-Regulatory Organizations; NYSE Chicago, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Service for Virtual Control Circuits in the Connectivity Fee Schedule

November 12, 2024.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on October 30, 2024, the NYSE Chicago, Inc. (''NYSE Chicago'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the service for virtual control circuits in the Connectivity Fee Schedule. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the existing service for virtual control circuits (''VCCs'') in the Connectivity Fee Schedule.

A VCC (previously called a ''peer to peer'' connection) is a unicast connection through which two participants can establish a connection between two points over dedicated bandwidth, to be used for any purpose. At the Mahwah, New Jersey data center (''MDC'')[4] the Exchange offers VCCs between two Users.[5] The recurring monthly fees are based upon the bandwidth requirements per VCC connection between two Users.[6]

However, not all VCCs are between two Users in the MDC. Although all VCCs have at least one end that is a User inside the MDC, the other party may be a non-User outside of the MDC at a remote access center, or the VCC can be between a User in the MDC and the same User outside of the MDC at a remote access center. A VCC that goes outside of the MDC herein is called a ''MDC VCC.''

Accordingly, the Exchange proposes to amend the Connectivity Fee Schedule to delete ''between two Users'' after ''Virtual Control Circuit.'' Fees for the service would not change and, as now, connectivity to a VCC would require the permission of the non-billed party before the Exchange would establish the connection.

As background, Users require wired circuits to connect into and out of the MDC. A User's equipment in the MDC's colocation hall connects to a circuit leading out of the MDC, which connects to the User's equipment in their back office or another data center.

Before 2013, all such circuits were provided by ICE's predecessor, NYSE Euronext. In response to customer demand for more connectivity options, in 2013, the MDC opened two ''meet-me-rooms'' to telecommunications service providers (''Telecoms''),[7] to enable Telecoms to offer circuits into the MDC in competition with NYSE Euronext. Currently, 16 Telecoms operate in the meet-me-rooms and provide circuit options to Users requiring connectivity into and out of the MDC.

In addition, FIDS provides two different types of circuits, Optic Low Latency and Optic Access. Optic Access,[8] which is more similar to the MDC VCC, is a circuit between the MDC and the FIDS access centers at five third-party owned data centers: (1) 111 Eighth Avenue, New York, NY; (2) 32 Avenue of the Americas, New York, NY; (3) 165 Halsey, Newark, NJ; (4) Secaucus, NJ; and (5) Carteret, NJ.

Ultimately, the MDC VCCs are similar to the Optic Access FIDS circuits in that, like Optic Access, the MDC VCCs run between the MDC and five FIDS access centers as well as, in the case of the MDC VCCs, additional U.S. FIDS access centers. They are smaller than the Optic Access FIDS circuits, however. While the Exchange has no visibility into how a User utilizes its connections, the Exchange believes that the Optic Access FIDS circuit is used for items that require more bandwidth, like market data, while the MDC VCCs are used for items that require smaller amounts of bandwidth, such as messaging, pre- and post-trade data, or clearing information, as determined by the User. Accordingly, if a User wants a smaller connection to a U.S. access center, or wants to reach an access center that Optic Access does not reach, the MDC VCCs are a viable option.

General

The proposed rule change would not apply differently to distinct types or sizes of market participants. Rather, it would apply to all Users equally. As is currently the case, the Fee Schedule would be applied uniformly to all Users. FIDS does not expect that the proposed rule change will result in new Users.

The proposed change is not otherwise intended to address any other issues relating to co-location services and/or related fees, and the Exchange is not aware of any problems that customers would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[9] in general, and furthers the objectives of Section 6(b)(5) of the Act,[10] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(4) of the Act,[11] because it provides for the equitable allocation of

[4] Through its Fixed Income and Data Services (''FIDS'') (previously ICE Data Services) business, Intercontinental Exchange, Inc. (''ICE'') operates the MDC. The Exchange and the New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., and NYSE National, Inc. (together, the ''Affiliate SROs'') are indirect subsidiaries of ICE.

[5] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 87408 (October 28, 2019), 84 FR 58778 at n.6 (November 1, 2019) (SR–NYSECHX–2019–12). As specified in the Fee Schedule, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Affiliate SROs. Each Affiliate SRO has submitted substantially the same proposed rule change to propose the change described herein. *See* SR–NYSE–2024–69, SR–NYSEAMER–2024–64, SR–NYSEARCA–2024–91, and SR–NYSENAT–28.

[6] *See* 84 FR 58778, *supra* note 5, at 58782.

[7] Telecommunication service providers that choose to provide circuits at the MDC are referred to as ''Telecoms.'' Telecoms are licensed by the Federal Communications Commission (''FCC'') and are not required to be, or be affiliated with, a member of the Exchange or an Affiliate SRO.

[8] The ''Optic Low Latency'' circuits are lower latency. *See* Securities Exchange Act Release No. 99167 (December 14, 2023), 88 FR 88141 (December 20, 2023) (SR–NYSECHX–2023–24).

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(5).

[11] 15 U.S.C. 78f(b)(4).

reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers.

The Proposed Change Is Reasonable

The Exchange believes that the proposed rule change is reasonable.

Although all VCCs have at least one end that is a User inside the MDC, the other party may be a non-User outside of the MDC at a remote access center, or the VCC can be between a User in the MDC and the same User outside of the MDC at a remote access center. Accordingly, the proposed change is reasonable because it would make the Connectivity Fee Schedule more accurately reflect the usage of VCCs. It would ensure that the description of VCCs was complete, accessible and transparent, and thereby provide market participants with greater clarity.

In considering the reasonableness of proposed services and fees, the Commission's market-based test considers ''whether the exchange was subject to significant competitive forces in setting the terms of its proposal . . . , including the level of any fees.'' [12] If the Exchange meets that burden, ''the Commission will find that its proposal is consistent with the Act unless 'there is a substantial countervailing basis to find that the terms' of the proposal violate the Act or the rules thereunder.'' [13] Here, the Exchange is subject to significant competitive forces in setting the terms on which it offers its proposal, in particular because substantially similar substitutes are available, and the third-party vendors are not at a competitive disadvantage created by the Exchange.

MDC VCCs would compete with circuits currently offered by the 16 third-party Telecoms that have installed their equipment in the MDC's two meet-me-rooms. The Telecom circuits are reasonable substitutes for the MDC VCCs. The Commission has recognized that products do not need to be identical to be considered substitutable; it is sufficient that they be substantially similar.[14] The MDC VCCs, the FIDS circuits, and the circuits provided by the Telecoms all perform the same function: connecting into and out of the MDC. The providers of the MDC VCCs, VCCs between Users, FIDS circuits and Telecom circuits design them to perform with particular combinations of latency, bandwidth, price, termination point, and other factors that they believe will attract Users, and Users choose from among these competing services on the basis of their business needs.

The MDC VCCs are sufficiently similar substitutes to the circuits offered by the 16 Telecoms even though the MDC VCCs all terminate in one of the U.S. remote access centers, while circuits from the 16 Telecoms could terminate in those locations or additional locations. While neither the Exchange nor FIDS knows the end point of any particular Telecom circuit, the Exchange understands that the Telecoms can offer circuits terminating in any location, including the remote access centers where the MDC VCCs would terminate. Moreover, the Telecoms may offer smaller circuits that are the same as or similar size to the MDC VCCs. Ultimately, Users can choose to configure their pathway leading out of colocation in the way that best suits their business needs, which may include connecting to the User's equipment at one of the U.S. remote access center locations that serve as termination points for MDC VCCs, or connecting first to one of those remote access centers with a FIDS- or Telecom-supplied circuit and then further connecting to another remote location using a telecommunication provider-supplied circuit.

Neither the MDC VCCs, Optic Access circuits, nor the Optic Low Latency circuits have a distance or latency advantage over the Telecoms' circuits within the MDC. FIDS has normalized (a) the distance between the meet-me-rooms and the colocation halls and (b) the distance between the rooms where the FIDS circuits and the MDC VCCs exit the MDC and the colocation halls. As a result, a User choosing whether to use the MDC VCCs or Telecom circuits does not face any difference in the distances or latency within the MDC.

The Exchange also believes that the MDC VCCs do not have any latency or bandwidth advantage over the Telecoms' circuits outside of the MDC. The Exchange believes that the Telecoms operating in the meet-me-rooms offer circuits with a variety of latency and bandwidth specifications, some of which may exceed the specifications of the proposed MDC VCCs.[15] The Exchange believes that Users consider these latency and bandwidth factors—as well as other factors, such as price and termination point—in determining which offerings will best serve their business needs.

In sum, the Exchange does not believe that there is anything about the MDC VCCs that would make the Telecoms' circuits inadequate substitutes.

Nor does the Exchange have a competitive advantage over any third-party competitors by virtue of the fact that it owns and operates the MDC's meet-me-rooms. In most cases, circuits coming out of the MDC are provided by the Telecoms.[16] Currently, 16 Telecoms operate in the meet-me-rooms and provide a variety of circuit choices. It is in the Exchange's best interest to set the fees that Telecoms pay to operate in the meet-me-rooms at a reasonable level [17] so that market participants, including Telecoms, will maximize their use of the MDC. By setting the meet-me-room fees at a reasonable level, the Exchange encourages Telecoms to participate in the meet-me-rooms and to sell circuits to Users for connecting into and out of the MDC. These Telecoms then compete with each other by pricing such circuits at competitive rates. These competitive rates for circuits help draw in more Users and Hosted Customers to the MDC, which directly benefits the Exchange by increasing the customer base to whom the Exchange can sell its colocation services, which include cabinets, power, ports, and connectivity to many third-party data feeds, and because having more Users and Hosted Customers leads, in many cases, to greater participation on the Exchange. In this way, by setting the meet-me-room fees at a level attractive to telecommunications firms, the Exchange spurs demand for all of the services it

[12] Securities Exchange Act Release No. 90209 (October 15, 2020), 85 FR 67044, 67049 (October 21, 2020) (Order Granting Accelerated Approval to Establish a Wireless Fee Schedule Setting Forth Available Wireless Bandwidth Connections and Wireless Market Data Connections) (SR–NYSE–2020–05, SR–NYSEAMER–2020–05, SR–NYSEArca–2020–08, SR–NYSECHX–2020–02, SR–NYSENAT–2020–03, SR–NYSE–2020–11, SR–NYSEAMER–2020–10, SR–NYSEArca–2020–15, SR–NYSECHX–2020–05, SR–NYSENAT–2020–08) (''Wireless Approval Order''), citing Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74781 (December 9, 2008) (''2008 ArcaBook Approval Order''). *See NetCoalition* v. *SEC,* 615 F.3d 525 (D.C. Cir. 2010).

[13] Wireless Approval Order, *supra* note 12, at 67049, citing 2008 ArcaBook Approval Order, *supra* note 12, at 74781.

[14] *See* 2008 ArcaBook Approval Order, *supra* note 12, at 74789 and note 295 (recognizing that products need not be identical to be substitutable).

[15] The specifications of FIDS's competitors' circuits are not publicly known. The Exchange understands that FIDS has gleaned any information it has about its competitors through anecdotal communications, by observing customers' purchasing choices in the competitive market, and from its own experience as a purchaser of circuits from telecommunications providers to build FIDS's own networks.

[16] Note that in the case of wireless connectivity, a User in colocation still requires a fiber circuit to transport data. If a Telecom is used, the data is transmitted wirelessly to the relevant pole, and then from the pole to the meet-me-room using a fiber circuit.

[17] *See* Securities Exchange Act Release No. 98001 (July 26, 2023), 88 FR 50196 (August 1, 2023) (SR–NYSECHX–2023–14).

sells at the MDC, while setting the meet-me-room fees too high would negatively affect the Exchange's ability to sell its services at the MDC.[18] Accordingly, there are real constraints on the meet-me-room fees the Exchange charges, such that the Exchange does not have an advantage in terms of costs when compared to third parties that enter the MDC through the meet-me-rooms to provide services to compete with the Exchange's services.

If the Exchange were to set the price of the MDC VCCs too high, Users would likely respond by choosing one of the many alternative options offered by the 16 Telecoms. Conversely, if the Exchange were to offer the MDC VCCs at prices aimed at undercutting comparable Telecom circuits, the Telecoms might reassess whether it makes financial sense for them to continue to participate in the MDC's meet-me-rooms. Their departure might negatively impact User participation in colocation and on the Exchange. As a result, the Exchange is not motivated to undercut the prices of Telecom circuits.

For these reasons, the proposed change is reasonable.

The Proposed Change Is Equitable

The Exchange believes that the proposed change provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers because it is not designed to permit unfair discrimination between market participants. The proposed change would apply equally to all types and sizes of market participants. It would clarify that all VCCs, irrespective of whether between two Users, a User and non-User outside of the VCC, or the same User, are subject to the same size and cost provisions. In addition, the Exchange believes that the proposal is equitable because only market participants that voluntarily select to receive MDC VCCs would be charged for them.

Moreover, the proposed change would ensure that the Connectivity Fee Schedule accurately reflects the usage of VCCs. It would ensure that the description of VCCs was complete, accessible and transparent, and provide market participants with greater clarity.

The Proposed Change Is Not Unfairly Discriminatory

The Exchange believes its proposal is not unfairly discriminatory. The proposed change does not apply differently to distinct types or sizes of market participants. Rather, it applies to all market participants equally. The purchase of any proposed service is completely voluntary and the Fee Schedule will be applied uniformly to all market participants.

In addition, the Exchange believes that the proposal is equitable because only market participants that voluntarily select to receive MDC VCCs would be charged for them. The MDC VCCs are available to all market participants on an equal basis, and all market participants that voluntarily choose to purchase a MDC VCC are charged the same amount as all other market participants purchasing that type of MDC VCC.

For the reasons above, the proposed change does not unfairly discriminate between or among market participants that are otherwise capable of satisfying any applicable co-location fees, requirements, terms, and conditions established from time to time by the Exchange.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposal will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of Section 6(b)(8) of the Act.[19] The proposed rule change is designed to ensure that the provision on VCCs clarifies that all VCCs, irrespective of whether between two Users, a User and non-User outside of the VCC, or the same User, are subject to the same size and cost provisions. It is not meant to address intramarket or intermarket competition.

The proposed change would enhance competition in the market for circuits transmitting data into and out of colocation at the MDC by adding VCCs, in addition to the 16 Telecoms that also sell circuits to Users and the FIDS circuits. The MDC VCCs do not have any latency, bandwidth, or other advantage over the Telecoms' circuits. The proposal would not burden competition in the sale of such circuits, but rather, enhance it by providing Users with an additional choice for their circuit needs.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[20] and Rule 19b–4(f)(6) thereunder.[21] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[22]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[23] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or

[18] *See id.* at 50199. Importantly, the Exchange is prevented from making any alteration to its meet-me-room services or fees without filing a proposal for such changes with the Commission.

• Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSECHX–2024–31 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSECHX–2024–31. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSECHX–2024–31 and should be submitted on or before December 9, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[24]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 35382; 812–15642]

Redwood Real Estate Income Fund and Redwood Investment Management, LLC

November 12, 2024.

AGENCY: Securities and Exchange Commission (''Commission'' or ''SEC'').

ACTION: Notice.

Notice of an application under section 6(c) of the Investment Company Act of 1940 (the ''Act'') for an exemption from sections 18(a)(2), 18(c) and 18(i) of the Act, under sections 6(c) and 23(c) of the Act for an exemption from rule 23c–3 under the Act, and for an order pursuant to section 17(d) of the Act and rule 17d–1 under the Act.

SUMMARY OF APPLICATION: Applicants request an order to permit certain registered closed-end investment companies to issue multiple classes of shares and to impose asset-based distribution and/or service fees and early withdrawal charges.

APPLICANTS: Redwood Real Estate Income Fund and Redwood Investment Management, LLC.

FILING DATES: The application was filed on October 15, 2024.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at *Secretarys-Office@sec.gov* and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. Hearing requests should be received by the Commission by 5:30 p.m. on December 9, 2024, and should be accompanied by proof of service on the Applicants, in the form of an affidavit, or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary.

ADDRESSES: The Commission: *Secretarys-Office@sec.gov.* Applicants: Joshua B. Deringer, Esq., Faegre Drinker Biddle & Reath LLP, *joshua.deringer@faegredrinker.com,* with a copy to Richard Duff, Redwood Investment Management, LLC, *rduff@redwoodim.com.*

FOR FURTHER INFORMATION CONTACT: Trace W. Rakestraw, Senior Special Counsel, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: For Applicants' representations, legal analysis, and conditions, please refer to Applicants' application, dated October 15, 2024, which may be obtained via the Commission's website by searching for the file number at the top of this document, or for an Applicant using the Company name search field on the SEC's EDGAR system. The SEC's EDGAR system may be searched at *https://www.sec.gov/edgar/searchedgar/legacy/companysearch.html.* You may also call the SEC's Public Reference Room at (202) 551–8090.

For the Commission, by the Division of Investment Management, under delegated authority.

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101581; File No. SR–CboeEDGA–2024–046]

Self-Regulatory Organizations; Cboe EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt Fees for Its New Offering of Market Data Reports

November 12, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 1, 2024, Cboe EDGA Exchange, Inc. (the ''Exchange'' or ''EDGA'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGA Exchange, Inc. (the ''Exchange'' or ''EDGA'') proposes to adopt fees for its new offering of market

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

data reports. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/equities/regulation/rule_filings/edga/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule to adopt fees for Cboe Timestamping Service reports, effective November 1, 2024. The Exchange recently adopted a new data product known as the Cboe Timestamping Service.[3] The Cboe Timestamping Service provides timestamp information for orders and cancels for market participants. More specifically, the Cboe Timestamping Service reports provide various timestamps relating to the message lifecycle throughout the exchange system. The first report—the Missed Liquidity Report—covers order messages of the Member only and the second report—Cancels Report—covers cancel messages of the Member only. The reports are optional products that are available to all Members and Members may opt to choose both reports, one report, or neither report.

The Cancels Report provides response time details for orders that rest on the book where the Member attempted to cancel that resting order or any other resting order but was unable to do so as the resting order was executed before the system processed the cancel message. The Cancels Report assists the Member in determining by how much time that order missed being canceled instead of executing.

The Missed Liquidity Report provides time details for executions of orders that rest on the book where the Member attempted to execute against that resting order within an Exchange-determined amount of time (not to exceed 1 millisecond) after receipt of the first attempt to execute against the resting order and within an Exchange-determined amount of time (not to exceed 100 microseconds) before receipt of the first attempt to execute against the resting order.

Both the Missed Liquidity Report and Cancels Report include the following data elements for orders [4] and cancel messages,[5] respectively: (1) Member Firm ID; (2) Symbol; (3) Execution ID; [6] (3) Exchange System Timestamps for orders and cancels; [7] (4) Matching Unit number; [8] (5) Queued; [9] (6) Port Type; [10] and (7) Aggressor Order Type.[11] No specific information about resting orders on the Exchange book are provided.

These reports are in response to requests from Members for additional data concerning the timeliness of their incoming orders, cancel messages and executions against resting orders. The Exchange believes these reports will increase transparency by providing Members with an opportunity to learn more about better opportunities to access liquidity and receive better execution rates and improve order cancel success.

The Exchange notes that the data included in the reports are based only on the data of the market participant that opts to subscribe to the reports (''Recipient Member'') and do not include information related to any Member other than the Recipient Member. Additionally, neither report includes real-time market data. Rather, the reports contain historical data from the prior trading day and are available after the end of the trading day, generally on a T+1 basis.

The Exchange now proposes to assess the following monthly fees for Members that wish to purchase the Cancels Report and/or the Missed Liquidity Report. The Exchange proposes a monthly flat fee of $1,000 for the Cancels Report for a subscribing Member. The Exchange also proposes a progressive monthly fee structure for the Missed Liquidity Report based on the Member's subscribing logical (FIX or BOE) order entry ports (the ''Ports'') [12] with the following tiers: $1,500 for 1–10 Ports, $2,000 for 11–20 Ports and $2,500 for 21 and more Ports.[13] For a mid-month subscription, the monthly fee(s) shall be prorated based on the initial date of the subscription.[14]

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[15] Specifically, the Exchange believes the proposed rule change is consistent with the Section

[3] *See* Securities Exchange Act Release No. 100803 (August 28, 2024), 89 FR 68948 (August 22, 2024) (SR–CboeEDGA–2024–034).

[4] The Missed Liquidity Report only includes trade events which are triggered by an order that removed liquidity on entry and will exclude trade events resulting from: elected stop orders, orders routed and executed at away venues, and peg order movements, and auctions.

[5] Includes individual order cancellations, mass cancels, and purge orders messages that are sent via Financial Information Exchange (''FIX'') protocol or Binary Order Entry (BOE) protocol by a subscriber.

[6] The Execution ID is a unique reference number assigned by the Exchange for each trade.

[7] Includes Network Discovery Time (which is a network hardware switch timestamp taken at the network capture point); Order Handler NIC Timestamp (which is a hardware timestamp that represents when a BOE order handler server NIC observed the message); Order Handler Received Timestamp (which is software timestamp that represents when the FIX or BOE order handler has begun processing the order after the socket read); Order Handler Send Timestamp (which represents when the FIX or BOE order handler has finished processing the order and begun sending to the matching engine); Matching Engine NIC Timestamp (which is a hardware timestamp that represents when the target matching engine server NIC observed the message); and Matching Engine Transaction Timestamp (which is a software timestamp that represents when the matching engine has started processing an event).

[8] Represents the matching unit number.

[9] Flag to indicate whether a message was delayed due to message in flight limits (*i.e.,* a limit on the total number of messages in flight between an order handler and a matching engine).

[10] Refers to the port type used by the session to send the applicable message.

[11] Indicates whether the order type of the response order that executed against the resting order was a new order or modify message.

[12] Based on a Members' unique needs, Members may choose which Ports (if any) it would like to subscribe to the Missed Liquidity Report. For example, a Member that has 20 Ports, but is only interested in receiving data on 10 of their Ports would then be charged the $1,500 tier fee for its subscribing Ports.

[13] The Exchange proposes to make clear in the Fees Schedule that the proposed fees are not progressive (*i.e.,* if a Member requests the Missed Liquidity Report for 20 Ports, it will be assessed $2,000 per month).

[14] Fees will be assessed on a look-back basis based on the maximum number of subscribing Ports a Member had in the prior calendar month. For example, if a Member had 10 Ports that were subscribed to the Missed Liquidity Report from September 1st–September 26th and the Member added an additional Port to the Missed Liquidity Report on September 27th (for a total of 11 subscribing Ports), the Member would then be assessed a fee of $2,000 for the month of September for the Missed Liquidity Report. Additionally, the Exchange proposes to make clear in its fee schedule that new subscribers will be charged a prorated fee for a mid-month subscription based on the initial date of the subscription.

[15] 15 U.S.C. 78f(b).

6(b)(5) [16] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [17] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with Section 6(b)(4) of the Act,[18] which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Members and other persons using its facilities.

In adopting Regulation NMS, the Commission granted self-regulatory organizations (''SROs'') and broker dealers increased authority and flexibility to offer new and unique market data to consumers of such data. It was believed that this authority would expand the amount of data available to users and consumers of such data and also spur innovation and competition for the provision of market data. The Exchange believes that the proposed reports are the sort of market data product that the Commission envisioned when it adopted Regulation NMS.

The Commission concluded that Regulation NMS—by deregulating the market in proprietary data—would itself further the Act's goals of facilitating efficiency and competition: ''[E]fficiency is promoted when broker-dealers who do not need the data beyond the prices, sizes, market center identifications of the NBBO and consolidated last sale information are not required to receive (and pay for) such data. The Commission also believes that efficiency is promoted when broker-dealers may choose to receive (and pay for) additional market data based on their own internal analysis of the need for such data.'' [19]

By removing ''unnecessary regulatory restrictions'' on the ability of exchanges to sell their own data, Regulation NMS advanced the goals of the Act and the principles reflected in its legislative history. The Cboe Timestamping Service (*i.e.,* the Missed Liquidity and Cancels Reports) provides investors with new options for receiving market data, which was a primary goal of the market data amendments adopted by Regulation NMS.[20]

The reports are designed for Members that are interested in gaining insight into latency in connection with their respective (1) orders that failed to execute against an order resting on the Exchange order book and/or (2) cancel messages that failed to cancel resting orders. The Exchange believes that providing this optional data to interested Members for a fee is consistent with facilitating transactions in securities, removing impediments to and perfecting the mechanism of a free and open market and a national market system, and, in general, protecting investors and the public interest because it provides Members with an opportunity to receive additional information and insight into their trading activity on the Exchange.

The Exchange believes the fee proposals for both the Missed Liquidity Report and Cancels Report are reasonable as the Exchange is offering any Member access to subscribe to one or both report(s) in the Member's sole discretion based on their unique business needs. The reports are optional for Members to subscribe to if they believe it to be helpful and are not required for Members to purchase in order to access the Exchange. Additionally, Members may cancel their usage of this report at any time.

The Exchange believes that the fee structure for the Missing Liquidity Report reflects an equitable allocation and will not be unfairly discriminatory as it is a voluntary product designed to ensure that the amount of the charge is tailored to the specific port usage patterns of the Recipient Member. The range of fee options further ensures that Recipient Members are not charged a fee that is inequitably disproportionate to the use that they make of the product. Additionally, Recipient Members aren't required to pay the set threshold for all Ports it has in a given month, instead, Members are able to select which Ports (if any) they would like to subscribe to the Missing Liquidity Report for a given month in order to study its orders in the market to be better informed market participants. Members are under no obligation to subscribe to the Missing Liquidity Report if it does not desire to do so.

The fee structure for the Missing Liquidity Report closely aligns to the fee structure of the previously offered Missed Opportunity—Latency report as part of its NASDAQ Trader Insights offering.[21] However, the NASDAQ Missed Opportunity—Latency report included an additional tier with a higher price than the Exchange's proposed fee structure.[22] The NASDAQ structure included an additional tier level that imposes a monthly fee of $3,500 for subscribers that have over 25 ports [23] while the Exchange fee structure would provide its similar report for a fee of $2,500 for a Recipient Member that has 25 ports.

The Exchange believes its proposed fee for the Cancels Report is reasonable as it's a modest, flat fee of $1,000/month. As the Exchange offers mass cancels through Purge Ports in addition to standard cancels through the Ports, and since cancels may occur through a variety of port types as opposed to just the Ports, the Exchange found a modest, flat fee to be more appropriate for the Cancels Report.

The proposed fees are also reasonable as they are lower than the fees assessed for similar reports offered by other exchanges. For example, the MIAX Emerald Liquidity Taker Event Report is substantially similar to the Missed Liquidity Report and Cancels Report [24] and has a monthly fee of $4,000 or an annual fee of $24,000.[25] A Member is

Although not clearly defined, the Exchange believes that MIAX Emerald's Liquidity Taker Event Report also provides information relating to cancel messages. Particularly, MIAX Emerald Liquidity Taker Event Report provides, among other things, data relating to the ''type of each response submitted by the Recipient Member.'' *See* MIAX Emerald Rule 5.31(a)(iii)(C). MIAX Emerald's technical specifications outline the various types of available liquidity messages including, Simple Mass Quote Cancel Request and Mass Liquidity Cancel Request See MIAX Express Interface for Quoting and Trading Options, MEI Interface Specification, Section 4.1 (Liquidity Messages), available at: MIAX_Express_Interface_MEI_v2.2a.pdf (miaxglobal.com).

[25] *See* MIAX Emerald Fee Schedule, Section 7, Reports.

able to receive both the Cancels Report and the Missed Liquidity Report for a monthly fee no greater than $3,500 a month—making the Cboe Timestamping Reports less than the MIAX Emerald report. With the Exchange's approach of (i) bifurcating the orders and cancels to two separate and distinct offerings (Missing Liquidity Report and Cancels Report) and (ii) allowing Members to select its subscribing Ports for the Missed Liquidity Report, it allows Members to further curb costs if they choose to subscribe to one or both of these reports. As such, the Exchange believes that the proposed fees for the both the Missed Liquidity Report and Cancels Report are fair and reasonable as they are set at a level either similar to or lower than other exchanges that offer similar reports.

The proposal would also not permit unfair discrimination as both the Cancels Report and Missed Liquidity Report will be available to all Members, who may opt to subscribe to one, both, or neither, and will help to protect a free and open market by continuing to provide additional non-core data (offered on an optional basis for a fee) to the marketplace and by providing investors with greater choices.[26] As such, the Exchange believes that the proposed fees are reasonable and set at a level to compete with other exchanges that may choose to offer similar reports. Moreover, if a market participant views another exchange's potential report as more attractive, then such market participant can merely choose not to purchase the Exchange's reports and instead purchase another exchange's similar data product(s), which may offer similar data points, albeit based on that other market's trading activity.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes the reports will contribute to robust competition among national securities exchanges. The Missed Liquidity Report and Late Cancels Report further enhances competition between exchanges by allowing the Exchange to expand its product offerings to include reports similar to reports that are currently offered by other exchanges.[27]

The Exchange also does not believe the proposed fees would cause any unnecessary or inappropriate burden on intermarket competition as other exchanges are free to introduce their own comparable reports with lower prices to better compete with the Exchange's offerings. The Exchange operates in a highly competitive environment, and its ability to price the reports is constrained by competition among exchanges who choose to adopt similar products. The Exchange must consider this in its pricing discipline in order to compete for subscribers of the Exchange's market data via the reports. For example, proposing fees that are excessively higher than fees for potentially similar data products would simply serve to reduce demand for the Exchange's reports, which as discussed, Members are under no obligation to utilize. In this competitive environment, potential purchasers are free to choose which, if any, similar product to purchase to satisfy their need for market information. As a result, the Exchange believes this proposed rule change permits fair competition among national securities exchanges.

The Exchange does not believe the proposed rule change would cause any unnecessary or inappropriate burden on intramarket competition. Particularly, the proposed fees apply uniformly to any purchaser in that the Exchange does not differentiate between the different Members that may purchase the reports. While the Exchange does propose to implement tiered pricing for its Missed Liquidity Report (similar to the pricing used for NASDAQ Trader Insight offering),[28] the tiered pricing shall apply to all Members that wish to purchase the Missed Liquidity Report and this proposed pricing structure is reflective of the specific port usage patterns of the Recipient Member. The proposed fees are set at a modest level that would allow any interested Member to purchase such data based on their business needs.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [29] and paragraph (f) of Rule 19b–4 [30] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–CboeEDGA–2024–046 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeEDGA–2024–046. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and

[29] 15 U.S.C. 78s(b)(3)(A).

[30] 17 CFR 240.19b–4(f).

printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CboeEDGA–2024–046 and should be submitted on or before December 9, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[31]

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 35381; 812–15645]

Destra Multi-Alternative Fund and Destra Capital Advisors LLC

November 12, 2024.

AGENCY: Securities and Exchange Commission (''Commission'' or ''SEC'').

ACTION: Notice.

Notice of an application under section 6(c) of the Investment Company Act of 1940 (the ''Act'') for an exemption from section 19(b) of the Act and rule 19b–1 under the Act to permit registered closed-end investment companies to make periodic distributions of long-term capital gains more frequently than permitted by section 19(b) or rule 19b–1.

SUMMARY OF APPLICATION: Applicants request an order to permit certain registered closed-end management investment companies to pay as frequently as twelve times in any one taxable year in respect of its common stock and as often as specified by, or determined in accordance with the terms of, any preferred stock issued by the investment company subject to the terms and conditions stated in the application.

APPLICANTS: Destra Multi-Alternative Fund and Destra Capital Advisors LLC.

FILING DATES: The application was filed on October 18, 2024.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at *Secretarys-Office@sec.gov* and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. Hearing requests should be received by the Commission by 5:30 p.m. on December 9, 2024, and should be accompanied by proof of service on the Applicants, in the form of an affidavit, or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary.

ADDRESSES: The Commission: *Secretarys-Office@sec.gov.* Applicants: Joshua B. Deringer, Esq., Faegre Drinker Biddle & Reath LLP, *joshua.deringer@faegredrinker.com,* with a copy to Robert A. Watson, Destra Capital Advisors LLC, *rob.watson@destracapital.com.*

FOR FURTHER INFORMATION CONTACT: Trace W. Rakestraw, Senior Special Counsel, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: For Applicants' representations, legal analysis, and conditions, please refer to Applicants' application, dated October 18, 2024, which may be obtained via the Commission's website by searching for the file number at the top of this document, or for an Applicant using the Company name search field on the SEC's EDGAR system. The SEC's EDGAR system may be searched at *https://www.sec.gov/edgar/searchedgar/legacy/companysearch.html.* You may also call the SEC's Public Reference Room at (202) 551–8090.

For the Commission, by the Division of Investment Management, under delegated authority.

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101587; File No. SR–CboeBZX–2024–026]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Withdrawal of a Proposed Rule Change To Permit the Generic Listing and Trading of Multi-Class ETF Shares

November 12, 2024.

On April 15, 2024, Cboe BZX Exchange, Inc. (''BZX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend BZX Rule 14.11(l) to permit the generic listing and trading of Multi-Class ETF Shares. The proposed rule change was published for comment in the **Federal Register** on May 1, 2024.[3]

On May 30, 2024, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] On July 12, 2024, the Commission instituted proceedings pursuant to Section 19(b)(2)(B) of the Act[6] to determine whether to disapprove the proposed rule change,[7] and on October 23, 2024, the Commission designated a longer period for Commission action on the proposed rule change.[8] On November 8, 2024, the Exchange withdrew the proposed rule change (SR–CboeBZX–2024–026).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[9]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101582; File No. SR–NYSE–2024–69]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Service for Virtual Control Circuits in the Connectivity Fee Schedule

November 12, 2024.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b 4 thereunder,[3] notice is hereby given that on October 30, 2024, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the service for virtual control circuits in the Connectivity Fee Schedule. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the existing service for virtual control circuits (''VCCs'') in the Connectivity Fee Schedule.

A VCC (previously called a ''peer to peer'' connection) is a unicast connection through which two participants can establish a connection between two points over dedicated bandwidth, to be used for any purpose. At the Mahwah, New Jersey data center (''MDC'') [4] the Exchange offers VCCs between two Users.[5] The recurring monthly fees are based upon the bandwidth requirements per VCC connection between two Users.[6]

However, not all VCCs are between two Users in the MDC. Although all VCCs have at least one end that is a User inside the MDC, the other party may be a non-User outside of the MDC at a remote access center, or the VCC can be between a User in the MDC and the same User outside of the MDC at a remote access center. A VCC that goes outside of the MDC herein is called a ''MDC VCC.''

Accordingly, the Exchange proposes to amend the Connectivity Fee Schedule to delete ''between two Users'' after ''Virtual Control Circuit.'' Fees for the service would not change and, as now, connectivity to a VCC would require the permission of the non-billed party before the Exchange would establish the connection.

As background, Users require wired circuits to connect into and out of the MDC. A User's equipment in the MDC's colocation hall connects to a circuit leading out of the MDC, which connects to the User's equipment in their back office or another data center.

Before 2013, all such circuits were provided by ICE's predecessor, NYSE Euronext. In response to customer demand for more connectivity options, in 2013, the MDC opened two ''meet-me-rooms'' to telecommunications service providers (''Telecoms''),[7] to enable Telecoms to offer circuits into the MDC in competition with NYSE Euronext. Currently, 16 Telecoms operate in the meet-me-rooms and provide circuit options to Users requiring connectivity into and out of the MDC.

In addition, FIDS provides two different types of circuits, Optic Low Latency and Optic Access. Optic Access,[8] which is more similar to the MDC VCC, is a circuit between the MDC and the FIDS access centers at five third-party owned data centers: (1) 111 Eighth Avenue, New York, NY; (2) 32 Avenue of the Americas, New York, NY; (3) 165 Halsey, Newark, NJ; (4) Secaucus, NJ; and (5) Carteret, NJ.

Ultimately, the MDC VCCs are similar to the Optic Access FIDS circuits in that, like Optic Access, the MDC VCCs run between the MDC and five FIDS access centers as well as, in the case of the MDC VCCs, additional U.S. FIDS access centers. They are smaller than the Optic Access FIDS circuits, however. While the Exchange has no visibility into how a User utilizes its connections, the Exchange believes that the Optic Access FIDS circuit is used for items that require more bandwidth, like market data, while the MDC VCCs are used for items that require smaller amounts of bandwidth, such as messaging, pre- and post-trade data, or clearing information, as determined by the User. Accordingly, if a User wants a smaller connection to a U.S. access center, or wants to reach an access center that Optic Access does not reach, the MDC VCCs are a viable option.

General

The proposed rule change would not apply differently to distinct types or sizes of market participants. Rather, it would apply to all Users equally. As is currently the case, the Fee Schedule would be applied uniformly to all Users. FIDS does not expect that the proposed rule change will result in new Users.

The proposed change is not otherwise intended to address any other issues relating to co-location services and/or related fees, and the Exchange is not aware of any problems that customers would have in complying with the proposed change.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b 4.

[4] Through its Fixed Income and Data Services (''FIDS'') (previously ICE Data Services) business, Intercontinental Exchange, Inc. (''ICE'') operates the MDC. The Exchange and NYSE American LLC, NYSE Arca, Inc., NYSE Chicago, Inc. and NYSE National, Inc. (together, the ''Affiliate SROs'') are indirect subsidiaries of ICE.

[5] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 76008 (September 29, 2015), 80 FR 60190 (October 5, 2015) (SR–NYSE–2015–40). As specified in the Fee Schedule, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Affiliate SROs. Each Affiliate SRO has submitted substantially the same proposed rule change to propose the change described herein. *See* SR–NYSEAMER–2024–64, SR–NYSEARCA–2024–91, SR–NYSECHX–2024–31, and SR–NYSENAT–2024–28.

[6] *See* Securities Exchange Act Release No. 80311 (March 24, 2017), 82 FR 15741 (March 30, 2017) (SR–NYSE–2016–45).

[7] Telecommunication service providers that choose to provide circuits at the MDC are referred to as ''Telecoms.'' Telecoms are licensed by the Federal Communications Commission (''FCC'') and are not required to be, or be affiliated with, a member of the Exchange or an Affiliate SRO.

[8] The ''Optic Low Latency'' circuits are lower latency. *See* Securities Exchange Act Release No. 99165 (December 13, 2023), 88 FR 87832 (December 19, 2023) (SR–NYSE–2023–48).

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[9] in general, and furthers the objectives of Section 6(b)(5) of the Act,[10] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(4) of the Act,[11] because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers.

The Proposed Change Is Reasonable

The Exchange believes that the proposed rule change is reasonable.

Although all VCCs have at least one end that is a User inside the MDC, the other party may be a non-User outside of the MDC at a remote access center, or the VCC can be between a User in the MDC and the same User outside of the MDC at a remote access center. Accordingly, the proposed change is reasonable because it would make the Connectivity Fee Schedule more accurately reflect the usage of VCCs. It would ensure that the description of VCCs was complete, accessible and transparent, and thereby provide market participants with greater clarity.

In considering the reasonableness of proposed services and fees, the Commission's market-based test considers ''whether the exchange was subject to significant competitive forces in setting the terms of its proposal . . . , including the level of any fees.'' [12] If the Exchange meets that burden, ''the Commission will find that its proposal is consistent with the Act unless 'there is a substantial countervailing basis to find that the terms' of the proposal violate the Act or the rules thereunder.'' [13] Here, the Exchange is subject to significant competitive forces in setting the terms on which it offers its proposal, in particular because substantially similar substitutes are available, and the third-party vendors are not at a competitive disadvantage created by the Exchange.

MDC VCCs would compete with circuits currently offered by the 16 third-party Telecoms that have installed their equipment in the MDC's two meet-me-rooms. The Telecom circuits are reasonable substitutes for the MDC VCCs. The Commission has recognized that products do not need to be identical to be considered substitutable; it is sufficient that they be substantially similar.[14] The MDC VCCs, the FIDS circuits, and the circuits provided by the Telecoms all perform the same function: connecting into and out of the MDC. The providers of the MDC VCCs, VCCs between Users, FIDS circuits and Telecom circuits design them to perform with particular combinations of latency, bandwidth, price, termination point, and other factors that they believe will attract Users, and Users choose from among these competing services on the basis of their business needs.

The MDC VCCs are sufficiently similar substitutes to the circuits offered by the 16 Telecoms even though the MDC VCCs all terminate in one of the U.S. remote access centers, while circuits from the 16 Telecoms could terminate in those locations or additional locations. While neither the Exchange nor FIDS knows the end point of any particular Telecom circuit, the Exchange understands that the Telecoms can offer circuits terminating in any location, including the remote access centers where the MDC VCCs would terminate. Moreover, the Telecoms may offer smaller circuits that are the same as or similar size to the MDC VCCs. Ultimately, Users can choose to configure their pathway leading out of colocation in the way that best suits their business needs, which may include connecting to the User's equipment at one of the U.S. remote access center locations that serve as termination points for MDC VCCs, or connecting first to one of those remote access centers with a FIDS- or Telecom-supplied circuit and then further connecting to another remote location using a telecommunication provider-supplied circuit.

Neither the MDC VCCs, Optic Access circuits, nor the Optic Low Latency circuits have a distance or latency advantage over the Telecoms' circuits within the MDC. FIDS has normalized (a) the distance between the meet-me-rooms and the colocation halls and (b) the distance between the rooms where the FIDS circuits and the MDC VCCs exit the MDC and the colocation halls. As a result, a User choosing whether to use the MDC VCCs or Telecom circuits does not face any difference in the distances or latency within the MDC.

The Exchange also believes that the MDC VCCs do not have any latency or bandwidth advantage over the Telecoms' circuits outside of the MDC. The Exchange believes that the Telecoms operating in the meet-me-rooms offer circuits with a variety of latency and bandwidth specifications, some of which may exceed the specifications of the proposed MDC VCCs.[15] The Exchange believes that Users consider these latency and bandwidth factors—as well as other factors, such as price and termination point—in determining which offerings will best serve their business needs.

In sum, the Exchange does not believe that there is anything about the MDC VCCs that would make the Telecoms' circuits inadequate substitutes.

Nor does the Exchange have a competitive advantage over any third-party competitors by virtue of the fact that it owns and operates the MDC's meet-me-rooms. In most cases, circuits coming out of the MDC are provided by the Telecoms.[16] Currently, 16 Telecoms operate in the meet-me-rooms and provide a variety of circuit choices. It is in the Exchange's best interest to set the

[10] 15 U.S.C. 78f(b)(5).

[11] 15 U.S.C. 78f(b)(4).

[12] Securities Exchange Act Release No. 90209 (October 15, 2020), 85 FR 67044, 67049 (October 21, 2020) (Order Granting Accelerated Approval to Establish a Wireless Fee Schedule Setting Forth Available Wireless Bandwidth Connections and Wireless Market Data Connections) (SR–NYSE–2020–05, SR–NYSEAMER–2020–05, SR–NYSEArca–2020–08, SR–NYSECHX–2020–02, SR–NYSENAT–2020–03, SR–NYSE–2020–11, SR–NYSEAMER–2020–10, SR–NYSEArca–2020–15, SR–NYSECHX–2020–05, SR–NYSENAT–2020–08) (''Wireless Approval Order''), citing Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74781 (December 9, 2008) (''2008 ArcaBook Approval Order''). *See NetCoalition* v. *SEC,* 615 F.3d 525 (D.C. Cir. 2010).

[13] Wireless Approval Order, *supra* note 12, at 67049, citing 2008 ArcaBook Approval Order, *supra* note 12, at 74781.

[14] *See* 2008 ArcaBook Approval Order, *supra* note 12, at 74789 and note 295 (recognizing that products need not be identical to be substitutable).

[15] The specifications of FIDS's competitors' circuits are not publicly known. The Exchange understands that FIDS has gleaned any information it has about its competitors through anecdotal communications, by observing customers' purchasing choices in the competitive market, and from its own experience as a purchaser of circuits from telecommunications providers to build FIDS's own networks.

[16] Note that in the case of wireless connectivity, a User in colocation still requires a fiber circuit to transport data. If a Telecom is used, the data is transmitted wirelessly to the relevant pole, and then from the pole to the meet-me-room using a fiber circuit.

fees that Telecoms pay to operate in the meet-me-rooms at a reasonable level [17] so that market participants, including Telecoms, will maximize their use of the MDC. By setting the meet-me-room fees at a reasonable level, the Exchange encourages Telecoms to participate in the meet-me-rooms and to sell circuits to Users for connecting into and out of the MDC. These Telecoms then compete with each other by pricing such circuits at competitive rates. These competitive rates for circuits help draw in more Users and Hosted Customers to the MDC, which directly benefits the Exchange by increasing the customer base to whom the Exchange can sell its colocation services, which include cabinets, power, ports, and connectivity to many third-party data feeds, and because having more Users and Hosted Customers leads, in many cases, to greater participation on the Exchange. In this way, by setting the meet-me-room fees at a level attractive to telecommunications firms, the Exchange spurs demand for all of the services it sells at the MDC, while setting the meet-me-room fees too high would negatively affect the Exchange's ability to sell its services at the MDC.[18] Accordingly, there are real constraints on the meet-me-room fees the Exchange charges, such that the Exchange does not have an advantage in terms of costs when compared to third parties that enter the MDC through the meet-me-rooms to provide services to compete with the Exchange's services.

If the Exchange were to set the price of the MDC VCCs too high, Users would likely respond by choosing one of the many alternative options offered by the 16 Telecoms. Conversely, if the Exchange were to offer the MDC VCCs at prices aimed at undercutting comparable Telecom circuits, the Telecoms might reassess whether it makes financial sense for them to continue to participate in the MDC's meet-me-rooms. Their departure might negatively impact User participation in colocation and on the Exchange. As a result, the Exchange is not motivated to undercut the prices of Telecom circuits.

For these reasons, the proposed change is reasonable.

The Proposed Change Is Equitable

The Exchange believes that the proposed change provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers because it is not designed to permit unfair discrimination between market participants. The proposed change would apply equally to all types and sizes of market participants. It would clarify that all VCCs, irrespective of whether between two Users, a User and non-User outside of the VCC, or the same User, are subject to the same size and cost provisions. In addition, the Exchange believes that the proposal is equitable because only market participants that voluntarily select to receive MDC VCCs would be charged for them.

Moreover, the proposed change would ensure that the Connectivity Fee Schedule accurately reflects the usage of VCCs. It would ensure that the description of VCCs was complete, accessible and transparent, and provide market participants with greater clarity.

The Proposed Change Is Not Unfairly Discriminatory

The Exchange believes its proposal is not unfairly discriminatory. The proposed change does not apply differently to distinct types or sizes of market participants. Rather, it applies to all market participants equally. The purchase of any proposed service is completely voluntary and the Fee Schedule will be applied uniformly to all market participants.

In addition, the Exchange believes that the proposal is equitable because only market participants that voluntarily select to receive MDC VCCs would be charged for them. The MDC VCCs are available to all market participants on an equal basis, and all market participants that voluntarily choose to purchase a MDC VCC are charged the same amount as all other market participants purchasing that type of MDC VCC.

For the reasons above, the proposed change does not unfairly discriminate between or among market participants that are otherwise capable of satisfying any applicable co-location fees, requirements, terms, and conditions established from time to time by the Exchange.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposal will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of Section 6(b)(8) of the Act.[19] The proposed rule change is designed to ensure that the provision on VCCs clarifies that all VCCs, irrespective of whether between two Users, a User and non-User outside of the VCC, or the same User, are subject to the same size and cost provisions. It is not meant to address intramarket or intermarket competition.

The proposed change would enhance competition in the market for circuits transmitting data into and out of colocation at the MDC by adding VCCs, in addition to the 16 Telecoms that also sell circuits to Users and the FIDS circuits. The MDC VCCs do not have any latency, bandwidth, or other advantage over the Telecoms' circuits. The proposal would not burden competition in the sale of such circuits, but rather, enhance it by providing Users with an additional choice for their circuit needs.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [20] and Rule 19b–4(f)(6) thereunder.[21] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[22]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may

[17] *See* Securities Exchange Act Release No. 97998 (July 26, 2023), 88 FR 50238 (August 1, 2023) (SR–NYSE–2023–27).

[18] *See id.* at 50241. Importantly, the Exchange is prevented from making any alteration to its meet-me-room services or fees without filing a proposal for such changes with the Commission.

[19] 15 U.S.C. 78f(b)(8).

[20] 15 U.S.C. 78s(b)(3)(A)(iii).

[21] 17 CFR 240.19b–4(f)(6).

[22] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires the Exchange to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [23] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSE–2024–69 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSE–2024–69. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSE–2024–69 and should be submitted on or before December 9, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[24]

Sherry R. Haywood,

Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #20701 and #20702; NORTH CAROLINA Disaster Number NC–20007]

Presidential Declaration Amendment of a Major Disaster for the State of North Carolina

AGENCY: U.S. Small Business Administration.

ACTION: Amendment 3.

SUMMARY: This is an amendment of the Presidential declaration of a major disaster for the State of North Carolina (FEMA–4827–DR), dated September 28, 2024.

Incident: Tropical Storm Helene.

DATES: Issued on November 13, 2024.

Incident Period: September 25, 2024, and continuing.

Physical Loan Application Deadline Date: January 7, 2025.

Economic Injury (EIDL) Loan Application Deadline Date: June 30, 2025.

ADDRESSES: *Visit the MySBA Loan Portal at https://lending.sba.gov* to apply for a disaster assistance loan.

FOR FURTHER INFORMATION CONTACT: Alan Escobar, Office of Disaster Recovery & Resilience, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: The notice of the President's major disaster declaration for the State of North Carolina, dated September 28, 2024, is hereby amended to extend the deadline for filing applications for physical damages as a result of this disaster to January 7, 2025.

All other information in the original declaration remains unchanged.

(Catalog of Federal Domestic Assistance Number 59008)

Alejandro Contreras,

Acting Deputy Associate Administrator, Office of Disaster Recovery & Resilience.

[FR Doc. 2024–26810 Filed 11–15–24; 8:45 am]

BILLING CODE 8026–09–P

SURFACE TRANSPORTATION BOARD

[Docket No. AB 55 (Sub-No. 818X)]

CSX Transportation, Inc.—Abandonment Exemption—in Marion County, Ind.

CSX Transportation, Inc. (CSXT), has filed a verified notice of exemption [1] under 49 CFR part 1152 subpart F—Exempt Abandonments to abandon an approximately 1.8-mile rail line that runs between Lat/Long (39.74752, −86.18469) and Lat/Long (39.7294, −86.20626) on its Northeast Great Lakes Division, Indianapolis Terminal Subdivision, Craven Industrial track in Marion County, Ind. (the Line). The Line traverses U.S. Postal Service Zip Codes 46221 and 46251.

CSXT has certified that: (1) no local rail traffic has moved over the Line during the past two years; (2) any overhead traffic on the Line can be and has been rerouted over other lines; (3) no formal complaint filed by a user of rail service on the Line (or by a state or local government on behalf of such user) regarding cessation of service over the Line is pending with either the Surface Transportation Board (Board) or any U.S. District Court or has been decided in favor of a complainant within the two-year period; and (4) the requirements at 49 CFR 1105.7(b) and 1105.8(c) (notice of environmental and historic reports), 49 CFR 1105.12 (newspaper publication), and 49 CFR 1152.50(d)(1) (notice to government agencies) have been met.

As a condition to this exemption, any employee adversely affected by the abandonment shall be protected under *Oregon Short Line Railroad—Abandonment Portion Goshen Branch Between Firth & Ammon, in Bingham & Bonneville Counties, Idaho,* 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10502(d) must be filed.

[1] The verified notice was initially filed on October 28, 2024. On October 29, 2024, CSXT filed a supplement to correct a typo regarding the mileage in Exhibit A. Accordingly, the verified notice of exemption will be deemed to have been filed on October 29, 2024.

Provided no formal expression of intent to file an offer of financial assistance (OFA) has been received,[2] this exemption will be effective on December 18, 2024, unless stayed pending reconsideration. Petitions to stay that do not involve environmental issues [3] must be filed by November 27, 2024. Formal expressions of intent to file an OFA under 49 CFR 1152.27(c)(2) and interim trail use/rail banking requests under 49 CFR 1152.29 must be filed by November 29, 2024.[4] Petitions to reopen and requests for public use conditions under 49 CFR 1152.28 must be filed by December 9, 2024.

All pleadings, referring to Docket No. AB 55 (Sub-No. 818X), must be filed with the Surface Transportation Board either via e-filing on the Board's website or in writing addressed to 395 E Street SW, Washington, DC 20423–0001. In addition, a copy of each pleading must be served on CSXT's representative, Louis E. Gitomer, Law Offices of Louis E. Gitomer, LLC, 600 Baltimore Avenue, Suite 301, Towson, MD 21204.

If the verified notice contains false or misleading information, the exemption is void ab initio.

CSXT has filed a combined environmental and historic report that addresses the potential effects, if any, of the abandonment on the environment and historic resources. OEA will issue a Draft Environmental Assessment (Draft EA) by November 22, 2024. The Draft EA will be available to interested persons on the Board's website, by writing to OEA, or by calling OEA at (202) 245–0294. If you require an accommodation under the Americans with Disabilities Act, please call (202) 245–0245. Comments on environmental or historic preservation matters must be filed within 15 days after the Draft EA becomes available to the public.

Environmental, historic preservation, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Pursuant to the provisions of 49 CFR 1152.29(e)(2), CSXT shall file a notice of consummation with the Board to signify that it has exercised the authority granted and fully abandoned the Line. If consummation has not been effected by CSXT's filing of a notice of consummation by November 18, 2025, and there are no legal or regulatory barriers to consummation, the authority to abandon will automatically expire.

Board decisions and notices are available at *www.stb.gov.*

Decided: November 13, 2024.

By the Board, Valerie O. Quinn, Acting Director, Office of Proceedings.

Stefan Rice,

Clearance Clerk.

[FR Doc. 2024–26797 Filed 11–15–24; 8:45 am]

BILLING CODE 4915–01–P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

Fiscal Year 2025 Competitive Funding Opportunity: Bus Safety and Accessibility Research Program

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Notice of funding opportunity (NOFO).

SUMMARY: The Federal Transit Administration (FTA) announces the opportunity to submit applications for the Bus Safety and Accessibility Research Program for up to $10,000,000 under the Public Transportation Innovation Program in multiple fiscal years. The strategic goal for this program is to make existing and new buses safer for their operators and vulnerable road users, and safer and more accessible for their passengers. The Bus Safety and Accessibility Research Program seeks proposals to research standard bus designs, safety innovations and systems, and bus compartments that support these safety and accessibility goals. Additionally, this NOFO will require the development of detailed design specifications and production of a prototype that is available through a retrofit on existing buses and for installation in new buses.

DATES: Complete proposals must be submitted electronically through the *grants.gov* ''APPLY'' function by 11:59 p.m. eastern time on January 17, 2025.

Prospective applicants should initiate the process by registering on the *grants.gov* website promptly to ensure completion of the application process before the submission deadline. Instructions for applying can be found on FTA's website at *https://www.transit.dot.gov/*howtoapply and in the ''FIND'' module of *grants.gov*. The funding opportunity ID is FTA–2025–003–TRI. Mail and fax submissions will not be accepted.

FOR FURTHER INFORMATION CONTACT: Maria Roell, FTA Office of Research, Demonstration, and Innovation, phone (202) 366–9214, or email: *maria.roell@dot.gov.*

SUPPLEMENTARY INFORMATION:

SUMMARY OVERVIEW OF KEY INFORMATION: FTA BUS SAFETY AND ACCESSIBILITY RESEARCH COMPETITIVE FUNDING OPPORTUNITY

Issuing Agency	Federal Transit Administration, U.S. Department of Transportation.
Program Overview	To establish a Bus Safety and Accessibility Research Program under 49 U.S.C. 5312 to research standard designs and prototypes to make existing and new buses safer for their operators and vulnerable road users, and safer and more accessible for their passengers.
Eligible Applicants	Departments, agencies, and instrumentalities of the Government, including Federal laboratories; State and local governmental entities; providers of public transportation; private or non-profit organizations; institutions of higher education; and technical and community colleges.
Eligible Project	Engineering, design, and protype production of a bus or bus components that improve safety of operator and VRUs and increases accessibility for passengers.
Funding Amount	$10,000,000. Additional funds made available prior to project selection may be allocated to eligible projects.
Deadline	January 17, 2025 at 11:59 p.m. Eastern Time.
Cost share	The maximum Federal share of project costs under this program is 80 percent.

[2] Persons interested in submitting an OFA must first file a formal expression of intent to file an offer, indicating the type of financial assistance they wish to provide (*i.e.,* subsidy or purchase) and demonstrating that they are preliminarily financially responsible. *See* 49 CFR 1152.27(c)(2)(i).

[3] The Board will grant a stay if an informed decision on environmental issues (whether raised by a party or by the Board's Office of Environmental Analysis (OEA) in its independent investigation) cannot be made before the exemption's effective date. *See Exemption of Out-of-Serv. Rail Lines,* 5 I.C.C.2d 377 (1989). Any request for a stay should be filed as soon as possible so that the Board may take appropriate action before the exemption's effective date.

[4] Filing fees for OFAs and trail use requests can be found at 49 CFR 1002.2(f)(25) and (27), respectively.

A. Program Description

Under FTA's Public Transportation Innovation Program (49 U.S.C. 5312), FTA may make grants or enter into contracts or cooperative agreements for research, development, demonstration, and deployment projects and evaluation of research and technology of national significance to public transportation. This notice of funding opportunity (NOFO) (Federal Assistance Listing: 20.531) is issued under this authority.

The Bus Safety and Accessibility Research Program addresses critical safety issues and technology opportunities in public transit vehicle design. For this program accessibility refers to the ability of people with disabilities to: independently ascertain if an arriving bus is the one they intend to take; board; pay any fares or scan Paratransit ID cards; identify a seat or wheelchair accessible spot; secure any mobility equipment on the bus; receive any visual or audible stop announcements; identify the correct stop at which they intend to deboard; indicate by pressing buttons or communicating verbally with the driver that they would like to deboard at the next stop; and exit the vehicle without encountering any physical, communication, or attitudinal barriers.

Critical safety issues include rising operator assaults, continued accessibility issues for people with disabilities in and around transit buses, the need to increase operator visibility and minimize blind spots to ensure safety around a bus for passengers, pedestrians, bicyclists, and all who encounter a transit vehicle. It addresses FTA's strategic goal of enhancing the safety of transit fleets. According to safety performance data reported to the National Transit Database (NTD), major event injuries per 100 million vehicle revenue miles are rising with non-rail modes having 273.94 injuries in 2022 and 302.82 injuries in 2023. It is essential that action is taken to reverse this trend.

The strategic goal for this program is to make existing and new buses safer for their operators and vulnerable road users, and safer and more accessible for their passengers. The program objectives include research on bus designs, innovations, and technologies, as well as production of a prototype that is available through a retro fit on existing buses and for installation in new buses. The program's key focus areas are:

- *Driver Safety Systems*—Changes made to the transit vehicle and technology upgrades that protect the operator and enhance the safety of those outside of the vehicle including VRUs.
- *Passenger Safety Systems*—Changes made to the transit vehicle and technology upgrades that protect and increase accessibility of the passengers.

All applicants will also be expected to produce results that follow three major principles. These principles represent the values on which FTA will judge whether objectives have been met.

- Partnerships:
  - Recipients will collaborate across multiple industry sectors including all or some of these priority groups:
    - Transit Vehicle Manufacturers (TVMs)
    - Transit Agencies
    - Transit Labor Unions
    - Disability Organizations
    - Transit riders
    - Domestic and International Research Groups
    - Component Manufacturers
- Widely Implementable:
  - Proposals are encouraged to be innovative but must consider risks to implementation and interoperability to ensure nationwide relevancy and adoption. Proposals should be able to be adopted quickly, on a wide scale.
  - Deliverables should be applicable to current and new 35- and 40-ft or articulated bus models that have passed Altoona testing, comply with all other applicable Federal requirements, and are manufactured by companies eligible to compete for FTA-funded contracts.
- *Economic Vitality*
  - Recipients will support the U.S. industrial base by complying with Buy America. Recognizing Executive Order 14005, ''Ensuring the Future Is Made in All of America by All of America's Workers'' (86 FR 7475); proposed projects must support economic vitality at the national and regional level, including advancing domestic industry and promoting domestic development of intellectual property.

Applicants must note how they will incorporate the key focus areas, meet program objectives, and follow program principles. Applications should include performance standards and measures for ensuring the success of each key focus area with a specific, measurable, attainable, relevant, and time-bound task plan. These measures should show minimum performance specifications and a quality assurance surveillance plan to ensure quality. Applicants must show a detailed understanding of the needs and opportunities of this program.

Building on Previous Research

This NOFO seeks innovations that will lead to a safer more accessible bus, as well as a design and production of a prototype that is available through a retrofit on existing buses and for installation in new buses. It builds upon previous research by FTA and the Transit Cooperative Research Program, especially regarding increasing protection for bus operators through secure bus compartments.

The Bus Operator Compartment Redesign Program (BCP) was awarded in 2020 to improve operator and public safety. Key findings included issues with current bus operator compartment designs, such as ineffective barriers, large blind spots, and poor ergonomics for operators. The installation of barriers led to an increased feeling of safety for some operators. FTA also held a listening session in 2023 to receive stakeholder input on bus design including accessibility, safety, and emerging bus technologies. Major themes of the feedback included bus operator health and safety, road safety, accessibility, and passenger compartment enhancements. Resources, including available reports and listening session documentation, are available on the Bus Safety and Accessibility Research Program website *(https://www.transit.dot.gov/research-innovation/bus-future-redesign-transit-bus-operator-compartment-improve-safety-operational).*

Additionally, the Transportation Cooperative Research Program (TCRP) finalized a bus compartment study titled ''Bus Operator Barrier Design: Guidelines and Considerations''. The report on that study, TCRP Report 249, is available for download at the following link: *https://nap.nationalacademies.org/catalog/27877/bus-operator-barrier-design-guidelines-and-considerations.*

B. Federal Award Information

This notice makes available up to $10,000,000 in Public Transportation Innovation Program (49 U.S.C. 5312) funds for a single cooperative agreement. Only proposals from eligible recipients for eligible activities will be considered for funding.

FTA seeks a project that can begin implementation within two months of award of the cooperative agreement. The maximum period of performance allowed for the work covered by the

award should not exceed two years from the date of award. FTA may, at its discretion, provide additional funding under this notice from FTA's Public Transportation Innovation (49 U.S.C. 5312), subject to the availability of funds.

Pre-award authority is subject to FTA approval and is only available for costs incurred after the announcement of project selection on FTA's website.

The project selected under this competition is for research and development and, as such, FTA Research Circular 6100.1E (available at *https://www.fta.dot.gov/regulations-and-guidance/fta-circulars/research-technical-assistance-and-training-program*) guidance will apply in administering the program.

An applicant whose proposal is selected for funding will enter into a cooperative agreement with FTA, to be administered according to Circular 6100.1E. FTA will have substantial involvement in the administration of the cooperative agreement. FTA's role in the cooperative agreement will include meeting at least quarterly with the recipient and key stakeholders engaged in the program; assistance with outreach on achievement of successful results; review and approval of proposed designs; and participation in key decisions, including if there is a need to redirect or reprioritize project activities, goals, and deliverables.

C. Eligibility Information

Eligible Applicants

Eligible applicants under this notice are:

- Departments, agencies, and instrumentalities of the Federal Government, including Federal laboratories;
- State and local governmental entities, including multi-jurisdictional partnerships, and organizations such as Metropolitan Planning Organizations;
- Providers of public transportation;
- Private for-profit or not-for-profit organizations incorporated in a jurisdiction of the United States; and
- Institutions of higher education and technical and community colleges.

On the application form, eligible applicants are strongly encouraged to identify one or more project partners with a substantial interest and involvement in the project activities or objectives to participate in the implementation of the project, including partners from Minority Serving Institutions.

An application may be submitted in partnership with other eligible entities, including eligible subrecipients, bus manufacturers, or component manufacturers that intend to participate in the implementation of the project. If an application with such a partnership is selected for funding, the competitive selection process will be deemed to satisfy the requirement for a competitive procurement under 49 U.S.C. 5325(a) for the named entities. Applicants are advised that any changes to the proposed partners after the award will require FTA written approval and must be consistent with the scope of the approved project. Post-award changes to vendors will be subject to ordinary procurement standards.

The applicant must be able to carry out the proposed agreement and procurements, if needed, with project partners in compliance with all applicable Federal, State, and local laws.

To be considered eligible, applicants must be able to demonstrate the requisite legal, financial, and technical capabilities to receive and administer Federal funds under this program.

Cost Sharing or Matching

The maximum Federal share of project costs under this program is 80 percent. Applicants may seek a lower Federal contribution. The applicant must provide the non-Federal share of the net project cost in cash or in-kind and must document in its application the source of the non-Federal match. Eligible sources of non-Federal match are detailed in FTA Circular 6100.1E.

Eligible Projects

This notice solicits applications to assess the need and develop public transportation vehicle designs as well as appropriate best practices, guidance, and tools to produce those designs to provide better public transportation services. Proposed tasks and activities must adhere to Federal regulations regarding eligible costs.

FTA has identified a list of elements for projects divided into ''required'' and ''desired.'' Required elements are the ones that will be considered for the evaluation criteria. Applicants must demonstrate knowledge or experience in addressing these elements. Additional knowledge or experience with desired elements will yield additional consideration. Applicants are encouraged to add other elements that will further the program goal—especially elements that can be adopted quickly on a wide scale, to be considered in the evaluation. The elements are noted below.

Required:

- All projects must ensure highly reliable and accurate data especially where it can impact the safety of the operator, passengers, or VRU including, but not limited to sensors, vehicle location, battery condition, vehicle maintenance, or other advanced diagnostic indicators.
- Driver Safety Systems:
  - Standardization of the operator compartment: ergonomics of chair/seat, operator barrier. The recipient under this program must produce a functional prototype of the operator compartment improvements.
  - Standardization of design and component placement to eliminate blind spots: A-pillar, mirrors, cameras, fareboxes, etc. Designs should be prescriptive about safety requirements (*e.g.,* mirror placement).
  - VRU safety sensors: Focus on reliable and simplified user interface for the bus operator.
- Passenger Safety Systems:
  - Accessible passenger compartment design: Entry and egress for riders with mobility devices and strollers, consideration of minimizing fare collection footprint.
  - Constraint systems: Ability for riders using a wheelchair to be more safely, efficiently, and, if possible, independently secured in the vehicle.
  - Standardization of emergency call buttons.

Desired:

- Advanced Driver Assistance Systems (ADAS):
  - Lane departure
  - Collision avoidance
  - Pedestrian alerts

D. Application and Submission Information

Address To Request Application

A complete proposal submission consists of four forms and their supporting attachments. The Forms are: (1) Standard Form-424 ''Application for Federal Assistance''; (2) SF–424A ''Budget Information for Non-Construction Programs''; (3) SF–424B ''Assurances for Non-Construction Programs''; and (4) the supplemental form for the Bus Safety and Accessibility Research NOFO. Forms are downloadable from grants.gov or the FTA website at *https://www.transit.dot.gov/notices-funding/fiscal-year-2025-bus-safety-and-accessibility-research-notice-funding.*

All applications must be submitted electronically through grants.gov by the deadline below. FTA will not accept applications by mail, email, or any other delivery method.

Content and Form of Application Submission

a. Proposal Submission

i. The SF–424 provides basic information about the applicant and the project, including details such as the applicant's name, unique entity identifier (UEI), key contact information, and a summary of the project. The SF–424A form is used to present a detailed budget for the project, ensuring that all financial aspects are accounted for and justified. The SF–424B form outlines the assurance that the applicant agrees to comply with the terms and conditions set forth by the Federal Government.

ii. For the budget, applicants must provide a summary and a high-level overview of estimated activity costs, organized by major cost elements. The budget should clearly differentiate between the Federal funding share and non-Federal share funds, including the value of any in-kind contributions. The budget form must not include previously incurred expenses or costs incurred before the award time. All budget information must be presented using the SF–424A form.

iii. In addition to these standard forms, the proposal must include a supplemental form, a project narrative, and a summary budget narrative. The supplemental form and project overview should be prepared in Microsoft Word, PDF, or another compatible file format and must address all required elements outlined in the notice of funding opportunity (NOFO).

The narrative proposal should be in the format outlined in the ''Proposal Preparation and Content'' section below. A narrative proposal submission may contain additional supporting documentation as attachments. Once completed, the narrative proposal and any supporting documents must be placed in the ''Attachments'' section of the SF–424. The applicant must attach the narrative proposal file to its submission in grants.gov to successfully complete the application process. The applicant must respond to all sections of the SF–424 Application for Federal Assistance and the requirements of this Notice. The information in the narrative proposal will be used to determine applicant and project eligibility for the program and to evaluate the proposal against the selection criteria described in this notice. The applicant should carefully review the criteria noted in Section E and ensure its proposal addresses the factors listed.

Failure to submit the information as requested can delay review or disqualify the application.

b. Proposal Preparation and Content

i. Consolidated Budget Form: The Consolidated Budget Form must align with the dollar amount specified in the SF–424 and meet the eligible use requirements outlined in the notice of funding opportunity (NOFO). It includes a budget narrative and a detailed budget spreadsheet, with costs consistent with project scope and allowable under relevant regulations. If indirect costs are included, documentation such as a negotiated indirect cost rate agreement is required.

ii. Allowable costs are determined in accordance with the cost principles identified in 2 CFR part 200, including Subpart E of such regulations, and in 48 CFR part 31 for commercial organizations. The detailed budget spreadsheet must reflect the cost categories that appear on the SF–424A and include itemized calculations for each cost placed under those categories. If indirect costs are included in the proposed budget, the applicant must provide a copy of its approved negotiated indirect cost rate agreement if this rate was negotiated with a cognizant Federal agency or otherwise document those indirect costs consistent with 2 CFR 200.414.

iii. Required Standard Federal Financial Assistance Forms and Documentation: The applicant must submit the SF–424, SF–424A, and SF–424B forms, along with any Negotiated Indirect Cost Rate Agreement and Data Management Plan.

iv. The SF–424 and supplemental form prompt applicants for essential information such as applicant details, project description, and budget breakdown. This includes a detailed project budget specifying Federal and local shares, funding sources, and matching funds. Additionally, it covers descriptions of project benefits, implementation strategy, scalability, and a detailed project timeline.

v. The project overview, submitted as a one-page document, should include a header with project title and lead applicant, along with brief description of innovation, benefits, team and partners, and approach. The format aligns with templates available on grants.gov and the FTA web page.

vi. Budget Narrative: The budget narrative provides detailed explanations of proposed costs, aligning with the detailed budget spreadsheet and only including allowable expenses within the project scope. It should describe each cost item and its basis, including the Federal share, non-Federal share, and any in-kind contributions. Any indirect costs must be accompanied by relevant documentation. The narrative also explains leveraged resources and ensures consistency with SF–424 and SF–424A forms.

vii. Grant Funds, Sources and Uses of Project Funds- Project budgets should show how different funding sources will share in each activity and present the data in dollars and percentages. The budget should identify other Federal funds the applicant is applying for, has been awarded, or intends to use. Funding sources should be grouped into three categories: non-Federal, current application, and other Federal with specific amounts for each funding source.

The applicant must submit one electronic file for Proposals in a Microsoft Word, PDF, or compatible file format, double-spaced using Times New Roman, 12-point font. The proposal must contain the following components and adhere to the specified maximum lengths:

(1) *Cover Sheet* (not to exceed 1 page): The cover sheet must include the entity submitting the proposal, principal's name, title, and contact information (*e.g.,* address, office and mobile phone, and email). The cover sheet must also include name and contact information for the entity's point of contact for all cooperative agreement administrative activities (if different from principal).

(2) *Abstract* (not to exceed 1 page): The Abstract must include background, purpose, methodology, intended outputs, outcomes, impacts, and plan for accomplishing the goals and objectives as outlined in this Notice.

(3) *Table of Contents* (not to exceed 1 page): The Table of Contents must list each section of the proposal (including Appendices) by title and page number.

(4) *Project Budget* (not to exceed 5 pages): Project budgets should show how different funding sources will share in each activity and present those data in dollars and percentages. The budget should identify other Federal funds the applicant is applying for or has been awarded, if any, that the applicant intends to use. The proposed project budget must account for multiple years and outline the total cost of all services and products, including salaries and fringe benefits, supplies, travel, equipment, and proposed contractual arrangements (*e.g.,* subcontracts, consultant services) and how these estimated costs are connected to the project scope.

(5) *Project Work Plan* (not to exceed 10 pages total): The proposed project work plan must include the following information:

a. *Methodology*—Provide a methodology for addressing the goals

described above and under Section A of this Notice.

b. *Statement of Work*—Provide proposed work tasks for the project and how the goals will be accomplished with a detailed set of objectives and activities. Include the tasks for proposed activities, resources, milestones, with a timeline that also notes critical path milestones. Note in the proposal how risk management related to barriers to deployment will be addressed. Please also note a sustainability strategy for how this work will be maintained in the future.

c. *Staffing Plan*—Describe the approach for managing the project team, including the distribution of responsibilities among project partners, and what activities each project team member will perform.

d. *Coordination with FTA*—Identify the plan for coordinating the project team's activities and deliverables with the FTA's Research office including suggesting a methodology for a regular review of research results and a process to select research ready for deployment.

e. *Research and Data Collection*—Identify activities and the plan for electronic collection, maintenance, storage, and dissemination of data for use by the project team, stakeholders, FTA, and other customers.

f. *Communication Plan*—Provide a plan for communication of project results. The plan should identify innovative communication strategies including, but not limited to, the following: webinars, in-person presentations at industry events, social media (*e.g.,* Facebook, Twitter, YouTube), text alerts, email, website publication, and toll-free telephone numbers.

g. *Performance Measures*—Identify multiple performance measures that FTA should use to assess the Program's overall effectiveness.

h. *Deliverables*—Provide a list of proposed deliverables (*e.g.,* guides, plans, reports, services, prototypes, etc.). Include quarterly reports, financial forms, guidance documents, and final reports to be submitted to FTA.

(6) *Staff Qualifications* (not to exceed 5 pages total):

a. *Organizational Capacity*—Provide a narrative that briefly describes the structure of the applicant, including its history and experience in R&D, prototype construction, technology transfer, and the national deployment of research findings, preferably in the transportation sector. Include a narrative of the proposer's understanding of the activities in this solicitation and its responsibility for the data collection and results deployment called for in this Notice. Include the proposer's organization chart.

b. *Project Team Structure*—Provide a narrative that briefly describes the structure and makeup of the project team. Provide resumes or biographies of key staff to highlight the relevant skills and experience of the proposed team. The applicant is encouraged to identify in its proposal one or more project partners with a substantial interest and involvement in the project activities or objectives.

Applications submitted in response to this NOFO become the records of FTA and may be subject to Freedom of Information Act requests. Please segregate and clearly mark any portions of the application containing confidential or privileged trade secrets or commercial or financial information. FTA may share application information within the Department of Transportation or with other Federal agencies if FTA determines that sharing is relevant to the respective program's objectives.

Unique Entity Identifier and System for Award Management (SAM)

Each applicant is required to: (1) be registered in *SAM.GOV* before submitting an application; (2) provide a valid unique entity identifier in its application; and (3) maintain an active *SAM.GOV* registration with current information at all times during which the applicant has an active Federal award or an application or plan under consideration by FTA. FTA may not make an award until the applicant has complied with all applicable unique entity identifier and *SAM.GOV* requirements. If an applicant has not fully complied with the requirements by the time FTA is ready to make an award, FTA may determine that the applicant is not qualified to receive an award and use that determination as a basis for making a Federal award to another applicant. These requirements do not apply if the applicant has an exception approved by FTA or the U.S. Office of Management and Budget under 2 CFR 25.110(c) or (d). SAM registration takes approximately 3–5 business days, but FTA recommends allowing ample time, up to several weeks, for completion of all steps. For additional information on obtaining a unique entity identifier, please visit *https://www.sam.gov.*

Submission Dates and Times

Project proposals must be submitted electronically through *grants.gov* by 11:59 p.m. Eastern time on January 17, 2025. *Grants.Gov* attaches a time stamp to each application at the time of submission. Mail and fax submissions will not be accepted.

FTA urges applicants to submit applications at least 72 hours prior to the due date to allow time to correct any problems that may have caused either grants.gov or FTA systems to reject the submission. *Grants.gov* attaches a time stamp to each application at the time of submission. Proposals submitted after the deadline will be considered only if lateness was due to extraordinary circumstances not under the applicant's control. *Grants.gov* scheduled maintenance and outage times are announced in advance on the grants.gov website. Deadlines will not be extended due to scheduled website maintenance.

Within 48 hours after submitting an electronic application, the applicant should receive an email message from *grants.gov* with confirmation of successful transmission to *grants.gov*. If a notice of failed validation or incomplete materials is received, the applicant must address the reason for the failed validation, as described in the email notice, and resubmit before the submission deadline. If making a resubmission for any reason, include all original attachments regardless of which attachments were updated, and check the box on the supplemental form indicating this is a resubmission.

Applicants are encouraged to begin the registration process on the grants.gov site well before the submission deadline. Registration is a multi-step process, which may take several weeks or months to complete before an application can be submitted. Registered applicants may still be required to take steps to keep their registration up to date before submissions can be made successfully: (1) registration in *sam.gov* is renewed annually, and (2) persons making submissions on behalf of the Authorized Organization Representative (AOR) must be authorized in grants.gov by the AOR to submit.

Funding Restrictions

Funds available under this NOFO cannot be used to reimburse applicants for otherwise eligible expenses incurred prior to FTA issuing pre-award authority for the selected applicant.

Refer to section C.3., Eligible Projects, for information on activities that are allowable. Allowable direct and indirect expenses must be consistent with the Governmentwide Uniform Administrative Requirements and Cost Principles (2 CFR part 200) and the current version of FTA Circular 5010.

E. Application Review Information

Criteria

Applications will be evaluated on the responses provided in the supplemental form and the attached program summary and statement of objectives. Additional information may be provided to support the responses. All additional documentation, including the file names, must be directly referenced on the supplemental form. The applicant must complete the supplemental form and the program attachments. FTA will evaluate proposals based on the criteria described in this notice.

a. Demonstration of Transit Vehicle Design Experience

The application should provide evidence of the applicant's experience developing transit vehicle designs or manufacturing transit vehicles or their component parts. The proposal should detail the applicant's knowledge of general transit vehicle components, subsystems and systems, functionalities, standards, general experience, and knowledge of transit vehicle design development and testing, including awareness of potential barriers or challenges to production.

b. Demonstration of Understanding in Emerging Transit Needs and Demands

The application should clearly demonstrate a thorough understanding of existing conditions in a wide range of topics and areas in transit. This includes the required and desired design elements listed in the Section A. Program Description. It may also include understanding of industry safety and the safe systems approach, mobility, and operation needs; accessibility and usability of systems to comply with the Americans with Disabilities Act and Title VI of the Civil Rights Act; process improvement in training, maintenance, and procurement; or work experience or familiarity with new and emerging safety technologies.

c. Key Personnel Experience and Organizational Capacity

The application should note the individuals who will be involved in the project, specifically identifying its proposed key personnel. The application should include details of relevant experience of leadership in managing multi-stakeholder projects and the technical expertise of the project team. The application should explain how the applicant will ensure the key personnel will have enough time and expertise to carry out project objectives to assess data, coordinate with stakeholders, develop designs, and oversee prototype productions in the program duration.

d. Program Implementation Strategy

The application will be evaluated on an overall program implementation strategy, including proposed workplan tasks, schedule, and interim deliverables. In assessing whether the proposed implementation plans are reasonable and complete, FTA will review the proposed program work plan, including all necessary milestones and the overall program timeline. FTA will consider the risks to program implementation and the extent to which the program implementation strategy addresses these risks. Potential risks include the capacity to implement the program within two years after receiving an award and the ability to complete the program. FTA will also consider if the program's implementation addresses how the project will support USDOT's data collection, sharing policies, and meeting the data management plan requirement (see below).

e. Technical, Legal, and Financial Capacity

The applicant must demonstrate the financial and organizational capacity and managerial experience to oversee and implement this program successfully. FTA may review relevant oversight assessments and records to determine whether any outstanding legal, technical, or financial issues with the applicant would affect the outcome of the proposed program. An applicant with outstanding legal, technical, or financial compliance issues from an FTA compliance review or Federal Transit Administration grant-related Single Audit finding must explain how corrective actions will mitigate negative impacts on the proposed program. For applications that include named project partners, FTA will also consider the proposed partners' technical, legal, and financial capacity.

f. Planning and Partnerships

The applicant must identify all program partners and their specific roles. FTA will evaluate the extent to which the program contains strong, cohesive partnerships and the collaboration necessary to implement the proposed program successfully. The application should describe how program partners will work collaboratively and should show evidence of strong commitment and cooperation among program partners through letters of support, memorandums of understanding, or agreements among the partners. For a proposed program that will require formal coordination, approvals, or permits from government agencies or program partners, the applicant must demonstrate coordination with these organizations and their support for the program.

g. Financial Commitment

The applicant must identify the source of the non-Federal cost share and describe whether such funds are currently available for the program or will need to be secured if the program is selected for funding. FTA will consider the availability of the non-Federal cost share as evidence of the applicant's financial commitment to the program. Additional consideration may be given to those programs with a higher non-Federal share of costs and for which non-Federal funds have already been made available or reserved. The applicant should submit evidence of the availability of funds for the program, for example, by including a board resolution, a letter of support from the State, a budget document highlighting the line item or section committing funds to the proposed program, or other documentation of the source of non-Federal funds.

Review and Selection Process

An FTA technical evaluation committee will evaluate proposals based on the published evaluation criteria and rating guidance specific to this NOFO. Members of the technical evaluation committee may request additional information from applicants if necessary. Based on the technical evaluation committee review, the FTA Administrator will determine the final selection for program funding.

Performance and Integrity

Prior to making an award, FTA is required to review and consider any information about the applicant that is in the Federal Awardee Performance and Integrity Information System (FAPIIS) accessible through *SAM.GOV.* An applicant may review and comment on any information about itself that a Federal awarding agency previously entered. FTA will consider any comments by the applicant, in addition to the other information in the designated integrity and performance system, in making a judgment about the applicant's integrity, business ethics, and record of performance under Federal awards when completing the review of risk posed by applicants as described in the Office of Management and Budget's Uniform Requirements for Federal Awards (2 CFR 200.206).

F. Federal Award Administration Information

Federal Award Notices

FTA will notify the successful applicant and may announce the selection on its website, *https://www.transit.dot.gov.* Following notification, the successful applicant will be required to submit an application through the FTA Transit Award Management System (TrAMS).

Administrative and National Policy Requirements

a. Pre-Award Authority

At the time the program selection is announced, FTA may extend pre-award authority for the selected program. There is no blanket pre-award authority before the announcement. FTA will issue specific guidance to the recipient regarding pre-award authority at the time of selection. FTA does not consider requests for pre-award authority for these competitive funds until after a program recipient is selected, and additional Federal requirements must be met before costs are incurred. For more information about FTA's policy on pre-award authority, please see the most recent Apportionments, Allocations, and Program Information Notice at *https://www.transit.dot.gov.*

b. Cooperative Agreement Requirements

If selected, the recipient will apply for a cooperative agreement through FTA's Transit Award Management System (TrAMS). The successful applicant must be prepared to submit a final statement of work and complete the application in TrAMS within 60 days of notification of selection. The recipient must follow the requirements of FTA Circular 6100.1E. Technical assistance regarding these requirements is available from FTA.

c. Data Management Plan

FTA seeks to improve public transportation for America's communities by sharing digital data or source code collected or developed through its research with the public. This allows research organizations, public transportation agencies, State DOTs, and other stakeholders to learn from and expand upon the insights developed from FTA-funded research.

An award made pursuant to this Notice will be subject to the latest version of FTA's Master Agreement (available at *https://www.transit.dot.gov/funding/granteeresources/sample-fta-agreements/fta-grant-agreements*), including Section 17 Patent Rights and Section 18 Rights in Data and Copyrights. All work conducted under this award must follow the Department data policies outlined in the USDOT Public Access Plan at: *https://ntl.bts.gov/public-access/*how-comply. The recipient is required to include these obligations in any sub-awards or other related funding agreements.

Public Data Access requirements include developing a Data Management Plan (DMP) and submitting the DMP for FTA review. A DMP is a document that describes how the recipient plans to handle digital datasets, software, or code generated over the course of a research project pursuant to Federal and Departmental requirements. A DMP must be provided as a condition of receiving FTA funds under the Section 5312 Research Program and should adequately identify: (1) The data to be collected; (2) how the data will further the goals of this effort; (3) how the data will be made accessible; and (4) how the data will be stored. DMPs can be updated over time if the scope of the project or the type of data that will be collected changes. FTA staff is available to assist recipients with complying with public data access requirements.

FTA expects recipients to remove confidential business information (CBI) and Personally Identifiable Information (PII) before providing public access to project data. Recipients must ensure the appropriate data are accessible to FTA or the public for a minimum of five years after the award's performance period expires.

Recipients must make available to the Department copies of all work developed in performance of a project funded under this notice, including but not limited to software and data. Data rights must be in accordance with 2 CFR 200.315, Intangible Property, and the latest version of FTA's Master Agreement, available at *https://www.transit.dot.gov/sites/fta.dot.gov/files/2024-05/FTA-Master-Agreement-v31-05-02-2024.pdf.*

d. Buy America and Domestic Preferences for Infrastructure Projects

As expressed in Executive Order 14005, Ensuring the Future Is Made in All of America by All of America's Workers (86 FR 7475), the Executive Branch should maximize, consistent with law, the use of goods, products, and materials produced in, and services offered in, the United States. Therefore, all procurements must comply with FTA's Buy America requirements (49 U.S.C. 5323(j) and 49 CFR part 661), which require that all iron, steel, and manufactured products, including rolling stock, be produced in the United States. In addition, any award must comply with the Build America, Buy America Act (BABA) (Pub. L. 117–58, sections 70901–70927). BABA provides that none of the funds provided under an award made pursuant to this notice may be used for a project unless all iron, steel, manufactured products, and construction materials are produced in the United States. FTA's Buy America requirements are consistent with BABA requirements for iron, steel, and manufactured products.

Any proposal that will require a waiver of any domestic preference standard must identify the items for which a waiver will be sought in the application. Applicants should not proceed with the expectation that waivers will be granted.

e. Americans With Disabilities Act

All FTA recipients must comply with Department of Transportation regulations implementing the transportation provisions of the Americans with Disabilities Act of 1990 (ADA), codified at 49 CFR parts 27, 37, 38, and 39. Compliance is required regardless of the receipt of Federal funding, but is also a condition of eligibility for Federal funding. All vehicles and vehicle components must comply with the standards for accessibility for buses and vans found in 49 CFR part 38. Additionally, recipients for this program should account for the updated standards issued by the U.S. Access Board at 36 CFR part 1192.

Of particular note is the requirement under 49 CFR 37.165(f), which requires personnel to assist individuals with disabilities with the use of securement systems, ramps and lifts, and requires personnel to leave their seats to provide such assistance if necessary. It will therefore be important to ensure that any bus driver compartments not only do not interfere with the boarding and disembarking of persons with disabilities, including wheelchair users, but that they not do so when in the open or closed position. Designs for autonomous vehicles should presume the presence of on-board personnel.

f. Disadvantaged Business Enterprise

FTA requires that its recipients receiving planning, capital, or operating assistance that will award prime contracts exceeding $670,000 in FTA funds in a Federal fiscal year comply with the U.S. Department of Transportation's Disadvantaged Business Enterprise (DBE) program regulations (49 CFR part 26). If an applicant also receives FTA planning, capital, or operating assistance, it should expect to include any funds awarded, excluding those to be used for vehicle procurements, in setting its

overall DBE goal. Note, however, that projects, including vehicle procurements, remain subject to the DBE program regulations.

f. Rehabilitation Act

The U.S. Department of Labor's Office of Federal Contract Compliance Programs (OFCCP) is charged with enforcing Executive Order 11246, section 503 of the Rehabilitation Act of 1973, and the Vietnam Era Veterans' Readjustment Assistance Act of 1974. OFCCP has a Mega Construction Project Program through which it engages with project sponsors as early as the design phase to help promote compliance with non-discrimination and affirmative action obligations. OFCCP will identify projects that receive an award under this notice and are required to participate in OFCCP's Mega Construction Project Program from a wide range of Federally assisted projects over which OFCCP has jurisdiction and that have a project cost above $35 million. Under that partnership, OFCCP will ask these project sponsors to make clear to prime contractors in the pre-bid phase that project sponsor's award terms will require their participation in the Mega Construction Project Program. Additional information on how OFCCP makes their selections for participation in the Mega Construction Project Program is outlined under ''Scheduling'' on the Department of Labor website: *https://www.dol.gov/agencies/ofccp/faqs/construction-compliance.*

g. Automated Vehicle Safety

If an applicant is proposing to implement automated vehicles or other innovative motor vehicle technology, the application should demonstrate that all vehicles will comply with applicable safety requirements, including those administered by the National Highway Traffic Safety Administration (NHTSA) and the Federal Motor Carrier Safety Administration (FMCSA). Specifically, the application should show that vehicles acquired for the proposed project will comply with applicable Federal Motor Vehicle Safety Standards (FMVSS) and Federal Motor Carrier Safety Regulations (FMCSR). If the vehicles may not comply, the application should either (1) show that the vehicles and their proposed operations are within the scope of an exemption or waiver that has already been granted by NHTSA, FMCSA, or both agencies or (2) directly address whether the project will require exemptions or waivers from the FMVSS, FMCSR, or any other regulation and, if the project will require exemptions or waivers, present a plan for obtaining them. If applicable, FTA will also consider the extent to which the application presents a plan to address workforce impacts of automated vehicles or other innovative motor vehicle technology.

h. Standard Assurances

If an applicant receives an award, the applicant must ensure that it will comply with all applicable Federal statutes, regulations, executive orders, directives, FTA circulars, and other Federal administrative requirements in carrying out any project supported by the FTA award. The applicant acknowledges that it will be under a continuing obligation to comply with the terms and conditions of the agreement issued for its project with FTA. The applicant understands that Federal laws, regulations, policies, and administrative practices might be modified from time to time and may affect the implementation of the project. The most recent Federal requirements will apply to the project unless FTA issues a written determination otherwise. The applicant must submit the most recent FTA Certifications and Assurances before receiving an award if it does not have current certifications on file.

i. External Communications

The recipient must communicate with the FTA Program Manager prior to engaging in any external communications regarding the program. This includes any work developing news or magazine stories with media organizations, including print, video, online, or otherwise. Additionally, the FTA program manager must be notified and approve if project information, including results and metrics, will be shared during a webinar or other presentation open to the public by the recipient or another organization. The recipient should consult with the FTA Program Manager at the beginning of the agreement to discuss and plan any external communications about the program.

j. Intellectual Property Provisions

Any intellectual property developed as a part of this solicitation will be subject to provisions of 2 CFR 200.315 Intangible Property and FTA's Master Agreement related to patent rights and rights in data and copyrights and may be disseminated to the public for its use.

k. FTA Funds Reimbursement

If selected, the recipient must disburse funds from its cooperative agreement using DOT's Delphi system. Drawdowns using ECHO are prohibited. FTA staff are available to assist recipient with gaining access and using the Delphi system.

l. Termination for Failure To Make Progress on an Award

After providing written notice to the recipient of a project selected for funding, FTA may withdraw its support for the selected project (if a cooperative agreement has not yet been awarded) or suspend or terminate all or any part of the Federal assistance for the award if the recipient has failed to make reasonable progress implementing the project. FTA may withdraw its support for a project or terminate an award agreement if, among other reasons:

1. A recipient has not completed its application for funding in TrAMS within 60 days of the date FTA announces project selection.

2. A recipient has not begun its demonstration project within one year after funding was awarded in TrAMS.

3. A recipient has not delivered a project evaluation to FTA within one year of completing its demonstration project.

4. The proposed activities are no longer needed, or the recipient has violated the terms of FTA's Annual Agreement.

m. Performance and Program Evaluation

As a condition of grant award, grant recipients may be required to participate in an evaluation undertaken by DOT or another agency or partner. The evaluation may take different forms such as an implementation assessment across grant recipients, an impact and/or outcomes analysis of all or selected sites within or across grant recipients, or a benefit/cost analysis or assessment of return on investment. DOT may require applicants to collect data elements to aid the evaluation and/or use information available through other reporting. As a part of the evaluation, as a condition of award, grant recipients must agree to: (1) make records available to the evaluation contractor or DOT staff; (2) provide access to program records, and any other relevant documents to calculate costs and benefits; (3) in the case of an impact analysis, facilitate the access to relevant information as requested; and (4) follow evaluation procedures as specified by the evaluation contractor or DOT staff.

Recipients and subrecipients are also encouraged to incorporate program evaluation including associated data collection activities from the outset of their program design and implementation to meaningfully document and measure their progress towards meeting an agency priority

goal(s). Title I of the Foundations for Evidence-Based Policymaking Act of 2018 (Evidence Act), (Pub. L. 115–435) urges Federal awarding agencies and Federal assistance recipients and subrecipients to use program evaluation as a critical tool to learn, to improve equitable delivery, and to elevate program service and delivery across the program lifecycle. Evaluation means ''an assessment using systematic data collection and analysis of one or more programs, policies, and organizations intended to assess their effectiveness and efficiency.'' 5 U.S.C. 311. Credible program evaluation activities are implemented with relevance and utility, rigor, independence and objectivity, transparency, and ethics (OMB Circular A–11, part 6 section 290).

Reporting and Payment

Post-award reporting requirements include the electronic submission of Federal Financial Reports and Milestone Progress Reports in TrAMS quarterly. Documentation is required for payment. Additional reporting may be required specific to the program prescribed in this Notice, and the recipient may be expected to participate in events or peer networks related to the goals and objectives of the program. The Federal Financial Accountability and Transparency Act (FFATA) requires data entry at the FFATA Sub Award Reporting System (*https://www.FSRS.gov*) for all sub-awards and sub-contracts issued for $30,000 or more, as well as addressing executive compensation for both award recipients and sub-award organizations. The recipient will be required to disburse via Delphi and E-invoicing.

The successful applicant should include any goals, targets, and indicators referenced in its application in the Executive Summary of the TrAMS application.

As part of completing the annual certifications and assurances required of FTA grant recipients, a successful applicant must report on the suspension or debarment status of itself and its principals.

If the recipient's active grants, cooperative agreements, and procurement contracts from all Federal awarding agencies exceed $10,000,000 for any period during the period of performance of an award made pursuant to this Notice, the recipient must comply with the Recipient Integrity and Performance Matters reporting requirements described in appendix XII to 2 CFR part 200.

G. Federal Awarding Agency Contacts

For further information concerning this notice, please contact the Bus Safety and Accessibility Research Program Manager, Maria Roell, in the FTA Office of Infrastructure, Safety and Asset Innovation, by email at *maria.roell@dot.gov.* A TDD is available for individuals who are deaf or hard of hearing at 800–877–8339. In addition, FTA will post answers to questions and requests for clarifications on FTA's website at *https://www.transit.dot.gov/notices-funding/fiscal-year-2025-bus-safety-and-accessibility-research-notice-funding.*

To ensure applicants receive accurate information about eligibility or the program, applicants are encouraged to contact FTA directly with questions rather than through intermediaries or third parties. FTA staff may also conduct briefings on the competitive applications selection and award process upon request.

For issues with *grants.gov*, please contact *grants.gov* by phone at 1–800–518–4726 or by email at *support@grants.gov.*

H. Other Information

This program is not subject to Executive Order 12372, ''Intergovernmental Review of Federal Programs.'' There are resources available that may help in responding to this Notice, as listed below. The FTA website has information about FTA, application forms, statutory and administrative requirements, etc. Applicants are encouraged to use the FTA link provided and other information, as listed, as much as is needed.

Veronica Vanterpool,

Deputy Administrator.

BILLING CODE 4910–57–P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

[Docket No. FTA–2024–0007]

Notice of Extension of Partial Buy America Waiver for Vans and Minivans

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Notice of extension of Buy America waiver.

SUMMARY: Following consideration of comments, and because the Federal Transit Administration (FTA) has been unable to identify any manufacturer of non-Americans with Disabilities Act (ADA)-accessible vans and minivans that fully complies with Buy America, FTA is extending its partial, time-limited, general nonavailability waiver from the requirements of Buy America for a period of five years, or upon publication of a recission notice if FTA determines that a fully Buy America-compliant vehicle has become available, whichever occurs first. The waiver terms are described in this notice.

DATES: The waiver extension is applicable on November 18, 2024.

FOR FURTHER INFORMATION CONTACT: Jason Luebbers, FTA Attorney-Advisor, at (202) 366–8864 or *jason.luebbers@dot.gov.*

SUPPLEMENTARY INFORMATION: This notice grants an extension of FTA's October 25, 2022, partial general nonavailability waiver for mass-produced, unmodified vans and minivans (87 FR 64534). The waiver extension will expire after five years, or upon publication of a recission notice if FTA determines that a fully Buy America-compliant vehicle has become available, whichever occurs first.

Background

On November 15, 2021, President Biden signed into law the Build America, Buy America Act (BABA), enacted as title IX of the Infrastructure Investment and Jobs Act (IIJA) (Pub. L. 117–58, div. G, sections 70901–70927). BABA requires Federal agencies periodically to review existing general applicability waivers of Buy America requirements by publishing in the **Federal Register** a notice that: (i) describes the justification for a general applicability waiver and (ii) requests public comments for a period of not less than 30 days on the continued need for the general applicability waiver. BABA section 70914(d).

FTA is issuing this waiver extension following its review of comments received in response to its Notice of FTA's Review of Its Partial Waiver of Buy America Requirements for Vans and Minivans and Request for Comment, published in the **Federal Register** on August 22, 2024 (89 FR 68027).

Partial General Buy America Waiver for Vans and Minivans

Under FTA's Buy America statute (49 U.S.C. 5323(j)), FTA may obligate funds for a project to procure rolling stock only if the cost of components and subcomponents produced in the United States is more than 70 percent of the cost of all components of the rolling stock, and final assembly of the rolling

stock occurs in the United States. 49 U.S.C. 5323(j)(2)(C). A manufacturer of rolling stock must submit to pre-award and post-delivery audits and independent inspections to verify its compliance with Buy America. 49 U.S.C. 5323(m).

On October 25, 2022, following multiple individual requests for a Buy America waiver for non-ADA-accessible vans or minivans that can be used in federally funded vanpool programs, FTA issued a partial, time-limited, general nonavailability waiver from the Buy America requirements for mass-produced, unmodified, non-ADA-accessible vans and minivans with seating capacity for at least six adults, not including the driver (87 FR 64534). FTA issued a partial waiver to maximize the use of materials produced in the United States, consistent with Executive Order 14005, Ensuring the Future Is Made in All of America by All of America's Workers (86 FR 7475). In lieu of applying the general Buy America standards for rolling stock, the 2022 waiver required the following:

(1) Final assembly must occur in the United States, as reported to the National Traffic Safety Administration (NHTSA) under the American Automobile Labeling Act (AALA); and

(2) The country of origin of the engine or motor must be the United States, as reported to NHTSA under the AALA. *See* 49 U.S.C. 32304 and 49 CFR part 583.

FTA also limited its 2022 waiver to expire automatically after two years.

In its August 22, 2024, notice, FTA requested comments from all interested parties regarding whether FTA should extend the waiver, modify the waiver, or allow it to lapse. FTA also asked six questions related to the waiver, and requested that commenters, in answering the questions, explain the likely impacts of the suggested course of action for FTA on administering and delivering FTA-funded projects and on supporting domestic manufacturing and jobs. The questions are reprinted below.

In accordance with subsection 70916(c) of the Build America, Buy America Act (BABA) (Title IX of the Infrastructure Investment and Jobs Act, Pub. L. 117–58), FTA consulted with the National Institute of Standards and Technology's Hollings Manufacturing Extension Partnership (MEP) concerning a possible waiver extension, which determined that no domestic entity currently manufactures the subject vans and minivans in compliance with Buy America requirements.

General Considerations

FTA's August 22, 2024, notice posed the following questions to the public concerning a possible waiver extension.

1. Are there any unmodified non-ADA-accessible vans or minivans with seating capacity for at least six adults, not including the driver, for which the cost of components and subcomponents produced in the United States is more than 70 percent of the cost of all components, and final assembly of the vehicle occurs in the United States?

a. If so, which vehicles?

b. If so, in what quantity are they available?

2. Do the market conditions that led to FTA's decision to issue the partial van and minivan waiver still exist and, if so, do they warrant continuing the waiver?

3. What actions could FTA take, if any, to promote the domestic production of Buy America-compliant vans and minivans?

4. Is there a publicly available source better suited than AALA reports (*https://www.nhtsa.gov/part-583-american-automobile-labeling-act-reports*) to determine the domestic content and country of final assembly for vans and minivans? If so, please specify the data source and explain why it is preferred.

Considerations for Modifying the Waiver

5. If FTA were to modify the van and minivan waiver, what would be the likely impact on administering and delivering Federal transit projects? In what ways could modifications to the waiver promote or hinder the effective and efficient delivery of Federal transit projects across the United States? As examples, commenters may wish to consider the following modifications to the van and minivan waiver, specifying the likely impact of each and explaining why that impact is likely to occur:

a. In addition to engines and motors, require U.S.-manufactured transmissions as reported to NHTSA under the AALA.

b. Add a requirement that a vehicle contain some minimum percentage of ''Content US/Canada,'' as defined by and reported to NHTSA under the AALA.

6. FTA is also interested in any other proposals to modify the waiver not listed here that would meet the goals of promoting the efficient delivery of Federal transit projects and supporting domestic manufacturing and jobs. For each proposal, please explain how the waiver modification proposed achieves both goals and provide supporting information or documentation, where applicable.

Response to Comments

FTA received 51 comments from 56 different commenters, including transit operators, associations, state departments of transportation, metropolitan planning organizations, and the general public. All but one comment supported extending the waiver.

The comments in favor of an extension tended to be broadly supportive of the waiver and did not for the most part respond to specific questions FTA posed to the public. The supportive comments concurred that no known manufacturer currently meets all of FTA's Buy America requirements. Comments described the important role of vanpools to combat climate change, lower traffic congestion, and support commuters and equitable service, including service to the elderly, persons with disabilities that do not require ADA accessible vehicles, and rural communities for which full-sized buses are inappropriate. Comments from vanpool operators described their efforts to update or expand their aging fleets, and said they cannot succeed without an extension of the waiver. The supportive comments affirmed the necessity of extending the waiver to allow transit operators to continue purchasing vans and minivans using FTA grant funds.

Comment Opposed To Extending the Waiver

The single comment opposed to extending the waiver stated: ''Buy America can rely on used van and minivan parts in junkyards across America that are being totally ignored''. The comment did not provide any further detail about the junkyard suggestion. While junk or salvage yards may be excellent sources for vehicle parts in some situations, FTA considers the junkyard option an impractical alternative for transit operators, who in almost all cases require new vehicles for their fleet purchases.

Requests To Lengthen the Waiver Period

When FTA approved the 2022 waiver, it set the waiver to expire automatically after two years. Twenty-eight comments requested extending the waiver for a period longer than two-years. Five comments suggested a five-year extension. One of these comments said five years is an appropriate length because the relatively small percentage of vans and minivans purchased using FTA funds means the availability of Buy America-compliant vans or minivans is unlikely to change in the foreseeable future, and because a five-year review

period is what BABA specifies for general waivers. BABA § 70914(d)(1) (''An existing general applicability waiver or a general applicability waiver . . . shall be reviewed every 5 years after the date on which the waiver is issued''). One comment suggested that the waiver should be of indefinite duration, pending the availability of a Buy America-compliant product.

FTA agrees with the comments that suggested a five-year extension. An expiration after five years accords with BABA's requirement that general waivers be reviewed quinquennially, and the Made in America Office's national policy that general waivers have expiration dates. FTA also agrees that the availability of Buy America-compliant vans or minivans is unlikely to change in the foreseeable future. Therefore, a waiver of a shorter duration would add uncertainty and administrative burdens by requiring more frequent extensions, without generating any public benefit. FTA can rescind the waiver at any time if a Buy America-compliant van or minivan becomes available before the end of the five years.

Support for Extending the Domestic Requirements of the 2022 Partial Waiver

To maximize domestic content, the 2022 waiver required U.S. manufactured engines and final assembly. FTA sought comment from the public as to whether it should revise these requirements in a waiver extension.

Twenty-seven comments recommended extending the waiver with the same domestic manufacturing requirements as the 2022 waiver. Comments generally supported the current waiver as maximizing domestic content among van and minivan options while at the same time allowing transit operators to replace or expand their fleets using FTA funds.

Three comments asserted the requirements of the 2022 waiver are too restrictive. One of these comments said there is a shortage of vehicles that comply with the 2022 waiver, and this has led to difficulty expanding and updating vanpool fleets. However, this comment did not recommend any particular change to the waiver, and did not provide any specific data regarding how the requirements of the 2022 waiver have impaired the commenter's ability to replace or add vehicles.

One comment suggested relaxing the restrictions in the 2022 waiver to allow manufacturing and assembly anywhere in North America. This comment suggested doing so would make more hybrid and electric vehicles available, but it did not identify particular models to which it was referring.

Another comment requested that FTA eliminate the requirement that the vehicle's engine be manufactured in the United States. This comment stated the engine requirement excludes numerous vehicles that otherwise have high levels of domestic content according to the AALA reports.

In response to these comments that requested that FTA relax the requirements of the 2022 waiver, FTA notes the following: Notwithstanding that relaxation of the waiver's requirements would result in a greater selection of vehicles to purchase, none of the commenters said they were unable to comply with the 2022 waiver's requirements, or that they have been unable to obtain the type of vehicles they require under the 2022 waiver. With regard to the comment that the engine requirement of the 2022 waiver excludes vehicles with high domestic content reported under the AALA, the AALA reports show a value for combined U.S. and Canadian content, not U.S. content by itself. Absent more specific information about the U.S. content in these excluded vehicles, it is difficult for FTA to weigh the relative benefits to U.S. industry of eliminating the engine requirement, and so FTA declines to revise the waiver in response to this comment.

FTA agrees with the majority of comments that request maintaining the requirements of the 2022 waiver.

Other Comments

Some comments raised issues that were not germane to the pending waiver proposal. Two comments complained in general terms about the cost of complying with Buy America. One comment claimed Buy America causes $30,000 to $40,000 of ''add-ons'' to the Ram ProMaster in order for the vehicle to achieve 70% domestic content by cost, and that this is pushing vehicles beyond affordability. These comments are beyond the scope of the present action. FTA is not proposing revisions to Buy America requirements generally; it is only considering a limited, partial waiver of Buy America requirements to allow the purchase of certain vans and minivans.

Two comments complained that there exist vehicles with high domestic content, that are produced in the United States, but which the commenters cannot buy because of ''foreign ownership'' or ''because they are Japanese or Korean owned companies''. These comments appear to indicate a misunderstanding of Buy America and the 2022 waiver. Buy America's standards for rolling stock require a minimum percentage of U.S. components and subcomponents by cost and U.S. final assembly. Neither Buy America nor the 2022 waiver excludes vehicles based on the countries where their global brands are headquartered or historically originated.[1]

Finding on Waiver

For the reasons stated in FTA's August 22, 2024, notice, and based on comments received from the public, FTA is extending the October 25, 2022, waiver for vans and minivans.

For mass-produced, unmodified non-ADA accessible vans and minivans with seating capacity for at least six adults not including the driver, in lieu of applying the Buy America standards for rolling stock, FTA will require:

(1) Final assembly must be in the United States, as reported to NHTSA under the AALA; and

(2) The country of origin of the engine (or electric vehicle motor) must be the United States, as reported to NHTSA under the AALA.

The waiver is available to all FTA grant recipients. FTA recipients do not need to submit individual applications for nonavailability waivers for these vehicles. The waiver applies to contracts recipients award during the waiver period. This waiver expires five years after the effective date of this notice as published in the **Federal Register**. FTA will review this waiver twice during the waiver period to assess whether it remains necessary. Based on the results of that review, FTA will take such action as deemed appropriate, including but not limited to rescinding, or narrowing the scope or duration of the waiver.

Veronica Vanterpool,

Deputy Administrator.

BILLING CODE 4910–57–P

[1] While this is true of Buy America requirements, there are other laws that restrict vehicle purchases based on the country where the vehicle manufacturer is headquartered or has corporate relations. See FTA's guidance regarding the National Defense Authorization Act of 2020: *https://www.transit.dot.gov/funding/procurement/frequently-asked-questions-regarding-section-7613-national-defense.*

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

[Docket No. PHMSA–2024–0176]

Pipeline Safety: Identification and Evaluation of Potential Hard Spots—In-Line Inspection Tools and Analysis

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation.

ACTION: Notice; issuance of advisory bulletin.

SUMMARY: PHMSA is issuing this advisory bulletin to notify pipeline owners and operators of the importance of evaluating their pipeline facilities for the existence and potential threat of hard spots in the pipe body. That susceptibility comes from the plate and pipe manufacturing and is broader than previously understood; recent data and incident investigations indicate that hard spots could affect multiple pipelines manufactured prior to 1970. Hard spots, if not identified and mitigated, pose a threat to the integrity of the pipeline from interacting threats such as coating degradation, soil chemistry, and/or increased hydrogen exposure, which can result in hydrogen-induced cracking. Pipeline owners and operators should consider expanding their hard spot threat evaluation to all pipe manufactured prior to 1970, regardless of manufacturer; collecting and analyzing data associated with hard spot magnetic flux leakage in-line inspection tools; and following industry best practices when conducting in-line inspection data analysis.

FOR FURTHER INFORMATION CONTACT: Max Kieba, Director, Engineering & Research Division, at 202–420–9169 or *Max.Kieba@dot.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

The purpose of this advisory bulletin is to notify owners and operators of gas, hazardous liquid, and carbon dioxide pipelines of the importance of evaluating their pipeline facilities for the existence and potential threat of hard spots in the pipe body. A major tenet of PHMSA's pipeline safety oversight program is that pipeline operators must know and understand their pipeline systems, and use appropriate technologies and procedures to address risks to prevent pipeline failures while considering the inherent limitations of such technology. PHMSA prescribes factors that must be addressed to mitigate risk and conducts inspections to ensure adequate measures are carried out effectively.

A hard spot is a defect that is created at the time the steel plates are rolled during the pipe manufacturing process. The creation of hard spots in manufacturing is not attached to the in-service product. Even where a pipe may have an intended service at the time of manufacture, the intended service may change after manufacture. A localized increase in hardness produced during the hot rolling of steel plates as a result of localized cooling can form a hard spot. Localized hardening may also occur through the unintentional quenching during the manufacturing process or by cold work. Although hard spots are more prevalent in plate-formed pipe, seamless pipe can also be susceptible to hard spots when poor controls in the manufacturing process result in material property variations, including hardness.[1]

Hardness can be measured in any condition, at any time, and is determined by measuring the depth of an indentation made by a calibrated indentation device. There are three industry standards that address hardness testing: (1) ASTM E92 Standard Test Methods for Vickers Hardness of Metallic Materials; (2) ASTM E10–18 Standard Test Methods for Brinell Hardness of Metallic Materials; and (3) ASTM E18–22 Standard Test Methods for Rockwell Harness of Metallic Materials. Hard spots found by in-line inspection (ILI) analysis can be verified through the use of calibrated devices that press a specific tool into the plate's surface and then measure the resulting width or depth of the indentation.[2] American Petroleum Institute (API) Specification 5L states that ''[a]ny hard spot larger than 50 mm (2.0 in) in any direction shall be classified as a defect if its hardness exceeds 35 HRC, 345 HV10 or 327 HBW, based upon individual indentations.''[3] [4] However, recent improvements in technology have revealed incidents on hard spots with lower hardness measures.

Hard spots generally form on the surface of pipe and, by themselves, can be considered a stable threat. Unfortunately, hard spots can become unstable when the threat is activated by a change in service conditions such as coating degradation, effects of soil chemistry, and/or influence of the cathodic protection hydrogen film. The presence of hydrogen can result in hydrogen-induced cracking due to hydrogen accumulation at inclusions, impurities, and lattice structure irregularities in the presence of stress on the steel (*e.g.,* from operating pressures). Typically, coatings insulate hard spots from exposure to hydrogen generated by the cathodic protection system, but coatings can deteriorate over time. Recent Pipeline Research Council International (PRCI) research indicates that the level of cathodic protection may also contribute to hydrogen cracking.[5]

PHMSA has previously discussed, in public meetings and workshops, the threat evaluations of pipelines constructed with pipe manufactured by A.O. Smith Corporation (A.O. Smith) from 1948 through 1952 due to the pipe's susceptibility to hard spot related hydrogen cracking.[6] In the past 20 years, the following five incidents highlight hydrogen-induced cracking of hard spots. All but one of the incidents occurred on pipe manufactured by A.O. Smith.

- On July 18, 2013, a 30-inch natural gas pipeline ruptured in Natchitoches, Louisiana. The pipe was manufactured in 1952 by A.O. Smith. Evidence suggested the failure was caused by hydrogen-induced cracking in a hard spot that was previously reinforced with a Type A sleeve. The leak, in this instance, was repaired with a Type B sleeve.
- On January 14, 2015, a 30-inch natural gas pipeline ruptured in

Brandon, Mississippi. The pipe was manufactured in 1952 by A.O. Smith. The failure was caused by hydrogen-induced cracking in a hard spot greater than two inches in length, previously reinforced with a Type A sleeve. Hardness testing could not be performed with the sleeve in place.

- On August 1, 2019, a 30-inch natural gas pipeline ruptured in Danville, Kentucky. The pipe was manufactured in 1957 by A.O. Smith. The failure was caused by hydrogen-induced cracking in a hard spot. Hardness testing by the National Transportation Safety Board (NTSB) identified the origin hard spot was 5.85 inches by 3 inches, and had hardness values between 362 and 381 Brinell. Hardness readings extended through the pipe wall.
- On February 13, 2022, an 18-inch natural gas pipeline ruptured in Perry County, Mississippi. The pipe was manufactured in 1950 by A.O. Smith. The failure was caused by hydrogen-induced cracking in a hard spot. Metallurgical testing found hardness values between 35 to 45 Rockwell, and was measured at approximately 0.6-inch by 2.5-inch.
- On March 8, 2023, a 30-inch natural gas pipeline ruptured in Fauquier County, Virginia. The pipe was manufactured in 1957 by Bethlehem Steel. The failure was caused by hydrogen-induced cracking in a hard spot. Post incident ILI identified six hard spot features, and hardness values were confirmed from four features that ranged from 192–208 Brinell, which was slightly harder than base hardness (approximately 170 to 180 Brinell). In this instance, the operator did conduct a re-analysis of its data that resulted in updated results to identify the presence of additional hard spots.

The NTSB conducted an investigation following the August 1, 2019, Danville, Kentucky, incident, and made findings and recommendations regarding identification and evaluation of hard spots.[7] Specifically, the NTSB issued recommendation P–22–003 to PHMSA to ''[a]dvise natural gas transmission pipeline operators of the possible data limitations associated with hard spot magnetic flux leakage in-line inspection tools and analyses used in hard spot management programs and reinforce the need to follow industry best practices when conducting in-line inspection data analysis.''

Following the NTSB investigation into the Danville incident, PHMSA reviewed accident data and information regarding hard spots and the appropriate methodologies and technologies for detecting hard spots. PHMSA met with industry and technology companies to gather more information regarding hard spot management programs; communicate the results of the data analysis; and discuss appropriate ILI technologies for different anomalies, including hard spot detection. Additionally, PHMSA hosted an informational three-day public meeting in December 2022, in Houston, Texas, to discuss topics relevant to the pipeline industry.[8] One topic in particular included a discussion of both the NTSB's findings and hard spot safety concerns. PHMSA presented an overview of the NTSB's PIR–22/02 report into the Danville incident. During the December 2022 meeting, PHMSA invited stakeholders to present information related to hard spot methodologies/technologies used for detecting hard spots and discussed the circumstances of this incident. PHMSA has continued to meet with technology companies to review hard spot studies and hard spot management programs. As a result of the studies and communications, PHMSA has identified more pipe manufacturers and pipe manufacture vintages that could have issues with hard spots. In addition to A.O. Smith pipe, Bethlehem Steel Corporation, Kaiser Steel Corporation, National Tube Supply, Consolidated Pipe & Supply, Youngstown Sheet and Tube, United States Steel, Claymont Steel, and Republic Steel have been identified as manufacturers with manufacture dates as recent as 1970 whose pipe may experience hard spots.[9]

In addition, new technologies and advancements in ILI have resulted in the ability to learn more using previously obtained ILI data. For example, in the August 2019 Danville, Kentucky, hard spot failure, the NTSB investigation determined that the initial 2011 ILI data analysis had identified 16 hard spots in the relevant line section yet the 2019 re-analysis of the 2011 data identified 441. The NTSB attributed this discrepancy in identifications to significant improvements in computer hardware, software, and data analysis.[10] PHMSA and researchers have found that older data can be re-analyzed, and previously unidentified hard spots can be identified. It is important when analyzing the possibility of hard spots to verify the capabilities of the tool and verify the data collected. PHMSA believes that data verification should not be limited in scope and should include a thorough review of all relevant data.

PHMSA provides this advisory bulletin to help gas, hazardous liquid, and carbon dioxide pipeline owners and operators and the public understand the threat of hard spots and how to better comply with the existing requirements under federal pipeline safety regulations. Guidance and advisory bulletins are not substantive rules; are not meant to bind the public in any way; and do not assign duties, create legally enforceable rights, or impose new obligations that are not otherwise contained in those regulations.

II. Advisory Bulletin (ADB–2024–01)

To: Owners and Operators of Gas, Hazardous Liquid, and Carbon Dioxide Pipeline Systems.

Subject: Identification and Evaluation of Potential Hard Spots—In-line Inspection Tools and Analysis.

Advisory: PHMSA is issuing this advisory bulletin to advise gas, hazardous liquid, and carbon dioxide pipeline owners and operators of new information regarding the potential for the presence of hard spots in pipelines, and their associated safety and environmental risks of leaks or ruptures. This advisory alerts operators of advancements in knowledge of hard spot susceptibility, most notably that what was once considered to be an issue confined to a single manufacturer (A.O. Smith) of specific, limited manufacturing years, is now understood to include potentially other manufacturers and manufacturing years. Additionally, the presence of hydrogen may result in hydrogen-induced cracking due to hydrogen accumulation at inclusions, impurities, and lattice structure irregularities in the presence of stress on the steel. For pipelines, the stress is typically operational pressure. Typically, coatings isolate hard spots from exposure to hydrogen generated by the cathodic protection system, but coatings can and do deteriorate over time. Recent PRCI research indicates that the level of cathodic protection and the chemistry of the surrounding soil may contribute to hydrogen cracking.

[10] NTSB, PIR–22/02 at 29.

New technologies and advancements in ILI have resulted in the ability to better identify features associated with hard spots. Additionally, PHMSA and researchers have found that significant improvements in computer hardware, software, and data analysis have enabled the use of older data to be re-analyzed, and previously unknown features identified. It is important to verify the capabilities of the tool and verify the data when analyzing for the possibility of hard spots.

For these reasons, pipeline operators should consider taking the following actions to ensure pipeline safety:

1. Review all design and construction records to ensure they are traceable, verifiable, and complete to determine whether enough information is available to identify the pipe manufacturer, the steel plate manufacturer, and the date of manufacturing.
2. Review and determine whether or not the types of pipes in the system are susceptible to hard spots;
3. Review and determine if known integrity issues have been experienced on those pipelines;
4. Develop and implement an enhanced assessment program to establish the best approach to material hardness anomaly validations;
5. Re-evaluate existing ILI data to support current feature identification; and
6. Continue sharing information used to evaluate the identification of hard spots and the other factors that may contribute to the destabilization of hard spots in industry and public pipeline technical meetings and conferences.

Issued in Washington, DC, on November 1, 2024, under authority delegated in 49 CFR 1.97.

Alan K. Mayberry,

Associate Administrator for Pipeline Safety.

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTAION

Office of the Secretary

[Docket No. DOT–OST–2024–0003]

Privacy Act of 1974; System of Records

AGENCY: Office of the Departmental Chief Information Officer, Office of the Secretary of Transportation (DOT).

ACTION: Notice of a modified system of records.

SUMMARY: In accordance with the Privacy Act of 1974, the Department of Transportation (DOT), Office of the Secretary (OST), proposes to rename, update and reissue an existing system of records notice currently titled ''DOT/All 11, Integrated Personnel and Payroll System (IPPS).'' The name of this system of records notice will be changed to ''DOT/ALL 11, Consolidated Automated System for Time and Labor Entry (CASTLE).'' The modified system of records notice (hereafter referred to as ''Notice'') uses records in this system for fiscal operations related to payroll, attendance, leave, insurance, taxes, retirement, budget, and cost accounting programs. This system is also used to control and facilitate payment of salaries to DOT employees.

DATES: Submit comments on or before December 18, 2024. The Department may publish an amended Systems of Records Notice considering any comments received. This modified system will be effective immediately upon publication. The routine uses will be effective December 18, 2024.

ADDRESSES: You may submit comments, identified by docket number DOT–OST–2024–0003 by one of the following methods:

- *Federal e-Rulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Department of Transportation Docket Management, Room W12–140, 1200 New Jersey Ave. SE, Washington, DC 20590.
- *Hand Delivery or Courier:* West Building Ground Floor, Room W12–140, 1200 New Jersey Ave. SE, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.
- *Instructions:* You must include the agency name and docket number DOT–OST–2024–0003.
- *Instructions:* You must include the agency name and docket number DOT–OST–2024–0003. All comments received will be posted without change to *https://www.regulations.gov,* including any personal information provided. You may review the Department of Transportation's complete Privacy Act statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78).

Privacy Act: Anyone is able to search the electronic form of all comments received in any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.).

Docket: For access to the docket to read background documents or comments received, go to *https://www.regulations.gov* or to the street address listed above. Follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT: For questions, please contact Karyn Gorman, Departmental Chief Privacy Officer, Privacy Office, Department of Transportation, Washington, DC 20590; email: *privacy@dot.gov;* or 202–366–3140.

SUPPLEMENTARY INFORMATION:

Notice Updates

This Notice includes both substantive changes and non-substantive changes to the previously published Notice. The substantive changes have been made to the system name, system location, system manager, authority for maintenance of the system, purpose of the system, categories of individuals covered by the system, categories of records in the system, routine uses maintained in the system, policies and practices for storage of record, policies and practices for retrieval, retention and disposal of the records in the system, and administrative, technical, and physical safeguards. Non-substantive changes have been made to record access procedures and contesting record procedures as well as revisions to align with the requirements of Office of Management and Budget Memoranda (OMB) A–108 and to ensure consistency with other Notices issued by the Department of Transportation.

Background

In accordance with the Privacy Act of 1974, the Department of Transportation proposes to modify and re-issue an existing system of records titled ''DOT/ALL 11, Integrated Personal and Payroll System, (IPPS)'' and change the name to ''Consolidated Automated System for Time and Labor Entry, (CASTLE).'' This system of records covers records collected and maintained for the purposes of fiscal operations related to payroll, attendance, leave, insurance, taxes, retirement, budget, and cost accounting programs. This system is also used to control and facilitate payment of salaries to DOT employees. The following substantive changes have been made to the Notice:

1. *System Name:* This Notice updates the system name to ''Consolidated Automated System for Time and Labor Entry, (CASTLE)'' from the previous system name of ''DOT/ALL 11, Integrated Personal and Payroll System, (IPPS)''. The update to the system name is to better align with the collection of personally identifiable information in the system and the purpose of the collection. This system is also used to facilitate payment of salaries of DOT employees.

2. *System Location:* This Notice updates the system locations to notify

the public the location maintaining the system is changed for all of DOT and its Operating Administrations. The previous SORN had an outdated address and information listed as U.S. DOT, OST, 400 7th Street SW, Washington DC 20590 and additional information that no longer applies.

3. *System Manager:* This Notice updates the system manager name and address to reflect the change in system owner and address. The previous address listed was U.S. DOT, 400 7th Street SW, Washington, DC 20590.

4. *Authority:* This Notice updates the authorities of Maintenance of the System to expand and include relevant regulations to align with the collection of personally identifiable information and data in the system.

5. *Purpose:* This Notice updates the purpose to better clarify the how records are used in the system and for what purpose.

6. *Categories of Individuals:* This Notice updates categories of individuals to clearly define and identify who is covered by this system of records.

7. *Categories of Records:* This Notice updates categories of records to better describe the type of records maintained in the system to include employee biographical and employment information, salary and benefits information, timekeeping information.

8. *Routine Uses:* This Notice updates routine uses to include system specific routine uses that allows sharing between the DOT and the Department of Interior for payroll purposes. This notice also includes the Department of Transportation's general routine uses applicable to this system as they were previously only incorporated by reference. OMB Circular A–108 recommends that agencies include all routine uses in one notice rather than incorporating general routine uses by reference.

9. *Records Storage:* This Notice updates policies and practices for the storage of records to inform the public that records are no longer stored on magnetic tape or disks, microfiche, and paper and now are digitized and input records are maintained on electronic storage media.

10. *Records Retrieval:* This Notice updates the policies and practices for the retrieval of records to inform the public records may be retrieved by a combination of Social Security Number (SSN), employee ID number, organization code or home address.

11. *Retention and Disposal:* This Notice updates the policies and practices for the retrieval of records to reflect updated NARA record schedules. The previous NARA record schedule no longer applies to the records in the system.

12. *Administrative, Technical, and Physical Safeguards:* Updated to account for the agency's transition from paper to electronic recordkeeping and the Information Technology measures that are in place to protect the records.

The following non-substantive changes have been made to the Notice:

13. *Record Access:* This Notice updates the record access procedures to reflect signatures on signed requests for records must either be notarized or accompanied by a statement made under penalty of perjury in compliance with 28 U.S.C. 1746.

Privacy Act

The Privacy Act (5 U.S.C. 552a) governs the means by which the Federal Government collects, maintains, and uses personally identifiable information (PII) in a System of Records. A ''System of Records'' is a group of any records under the control of a Federal agency from which information about individuals is retrieved by name or other personal identifier. The Privacy Act requires each agency to publish in the **Federal Register** a System of Records Notice (SORN) identifying and describing each System of Records the agency maintains, including the purposes for which the agency uses PII in the system, the routine uses for which the agency discloses such information outside the agency, and how individuals to whom a Privacy Act record pertains can exercise their rights under the Privacy Act (*e.g.,* to determine if the system contains information about them and to contest inaccurate information). In accordance with 5 U.S.C. 552a(r), DOT has provided a report of this system of records to the Office of Management and Budget and to Congress.

SYSTEM NAME AND NUMBER:

Department of Transportation, DOT/ALL 11, Consolidated Automated System for Time and Labor Entry (CASTLE).

SECURITY CLASSIFICATION:

Sensitive, Unclassified.

SYSTEM LOCATION:

Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd., Oklahoma City, OK 73169.

SYSTEM MANAGER(S):

Director of Financial Management, OST–B30, 1200 New Jersey Avenue SE, Washington, DC 20590.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

49 U.S.C. 322, 5 U.S.C. 5101, 5 U.S.C. 3512; and E.O. 9397 (SSN), as amended.

PURPOSE(S) OF THE SYSTEM:

Records in this system are used for fiscal operations related to payroll, attendance, leave, insurance, taxes, retirement, budget, telework, remote work, employee offboarding and cost accounting programs. This system is also used to facilitate payment of salaries of DOT employees.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All current and former U.S. DOT Federal employees and DOT components. This system may include limited information regarding employee family members, emergency contacts, and medical provider contact information.

CATEGORIES OF RECORDS IN THE SYSTEM:

Employee Biographical and Employment Information: Employee name, other names used, union and association affiliation, Social Security Number (SSN), records related to position, occupation, duty location, medical information, disability information, personal and/or work telephone number, personal and/or work email address, home mailing address, involuntary debt (garnishments or child support payments), employee common identifier (ECI), organization code, user identification and any other employment information. Family member information, emergency contact, and medical provider contact information. Salary and Benefits Information: Salary data, retirement fund data, retirement plan, tax data, deductions, health benefit enrollment code and deduction, union dues, flexible spending account deduction, Thrift Savings Plan deductions, pay plan, and award amount. Timekeeping Information: Time and attendance records and leave records. This system may also contain correspondence, documents and other relevant information required to administer payroll, leave, and related functions.

RECORD SOURCE CATEGORIES:

Data are collected from individual employees, time and attendance clerks, supervisors, official personnel records, personal financial statements, correspondence with the debtor, records relating to hearings on the debt, and from the Departmental Accounting and Financial Information system of records.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or portion of the records or information contained in this system may be disclosed outside of DOT as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

System Specific Routine Uses:

1. To the Department of Interior Federal Personnel and Payroll System (DOI FPPS) for the purpose of facilitating employee wage payments.

Departmental Routine Uses:

2. In the event that a system of records maintained by DOT to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto.

3. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a DOT decision concerning the hiring or retention of an employee and/or the issuance of a security clearance.

4a. Routine Use for Disclosure for Use in Litigation. It shall be a routine use of the records in this system of records to disclose them to the Department of Justice or other Federal agency conducting litigation when—

(a) DOT, or any agency thereof, or

(b) Any employee of DOT or any agency thereof, in his/her official capacity, or

(c) Any employee of DOT or any agency thereof, in his/her individual capacity where the Department of Justice has agreed to represent the employee, or

(d) The United States or any agency thereof, where DOT determines that litigation is likely to affect the United States, is a party to litigation or has an interest in such litigation, and the use of such records by the Department of Justice or other Federal agency conducting the litigation is deemed by DOT to be relevant and necessary in the litigation, provided, however, that in each case, DOT determines that disclosure of the records in the litigation is a use of the information contained in the records that is compatible with the purpose for which the records were collected.

4b. Routine Use for Agency Disclosure in Other Proceedings. It shall be a routine use of records in this system to disclose them in proceedings before any court or adjudicative or administrative body before which DOT or any agency thereof, appears, when—

(a) DOT, or any agency thereof, or

(b) Any employee of DOT or any agency thereof in his/her official capacity, or

(c) Any employee of DOT or any agency in his/her individual capacity where DOT has agreed to represent the employee, or

(d) The United States or any agency thereof, where DOT determines that the proceeding is likely to affect the United States, is a party to the proceeding or has an interest in such proceeding, and DOT determines that use of such records is relevant and necessary in the proceeding, provided, however, that in each case, DOT determines that disclosure of the records in the proceeding is a use of the information contained in the records that is compatible with the purpose for which the records were collected.

5. Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual. In such cases, however, the Congressional office does not have greater rights to records than the individual. Thus, the disclosure may be withheld from delivery to the individual where the file contains investigative or actual information or other materials which are being used, or are expected to be used, to support prosecution or fines against the individual for violations of a statute, or of regulations of the Department based on statutory authority. No such limitations apply to records requested for Congressional oversight or legislative purposes; release is authorized under 49 CFR 10.35(9).

6. One or more records from a system of records may be disclosed routinely to the National Archives and Records Administration in records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

7a. To appropriate agencies, entities, and persons when (1) DOT suspects or has confirmed that there has been a breach of the system of records; (2) DOT has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, DOT (including its information systems, programs, and operations), the Federal (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DOT's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

7b. To another Federal agency or Federal entity, when DOT determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach. resolving disputes between FOIA requesters and Federal agencies and reviewing agencies' policies, procedures, and compliance in order to recommend policy changes to Congress and the President.

8. DOT may disclose records from this system, as a routine use, to an agency, organization, or individual for the purpose of performing audit or oversight operations related to this system of records, but only such records as are necessary and relevant to the audit or oversight activity. This routine use does not apply to intra-agency sharing authorized under Section (b)(1) of the Privacy Act.

9. DOT may disclose from this system, as a routine use, records consisting of, or relating to, terrorism information (6 U.S.C. 485(a)(5)), homeland security information (6 U.S.C. 482(f)(1)), or Law enforcement information (Guideline 2 Report attached to White House Memorandum, ''Information Sharing Environment, November 22, 2006) to a Federal, State, local, tribal, territorial, foreign government and/or multinational agency, either in response to its request or upon the initiative of the Component, for purposes of sharing such information as is necessary and relevant for the agencies to detect, prevent, disrupt, preempt, and mitigate the effects of terrorist activities against the territory, people, and interests of the United States of America, as contemplated by the Intelligence Reform and Terrorism Prevention Act of 2004 (Pub. L. 108–458) and Executive Order 13388 (October 25, 2005).

10. Disclosure pursuant to 5 U.S.C. 552a (b)(12). Disclosures may be made from this system to consumer reporting agencies as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Act of 1966 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Pre-existing paper and microfiche records were digitized. Input records are maintained digitally on electronic storage media in accordance with the safeguards below.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records can be retrieved by name, SSN, employee IDs, organizational code, home address, or a combination of the information listed in the categories of records.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records in the system are maintained in accordance with the following NARA's records retention and schedules: General Records Schedule (GRS) 2.3, Employee Relations Records, Item 10, *Employee relations programs' administrative records,* DAA–GRS–2018–0002–0001, Temporary. Destroy when 3 years old, but longer retention is authorized if required for business use; Item 40, *Telework/alternate worksite program,* DAA GRS–2018–0002–0004, Temporary. Destroy when 3 years old, but longer retention is authorized if required for business use. GRS 2.4, *Employee Compensation and Benefits Records,* Item 10, Records used to calculate payroll, arrange paycheck deposit, and change previously issued paychecks, DAA–2018–0002–0001: Temporary. Destroy when 3 years old, but longer retention is authorized if required for business use. Item 30, Time and attendance records, DAAGRS–2019–0004–0002, Temporary, destroy when 3 years old, but longer retention is authorized if required for business use. Item 40, Agency payroll record for each pay period, DAA–GRS–2016–00015–0004, Destroy when 56 years old. GRS 4.2, *Information Access, and Protection Records,* Item 130, Personally identifiable information extracts, DAA–GRS–2013–0007–0012, Temporary. Destroy when 90 days old or no longer needed pursuant to supervisory authorization, whichever is appropriate.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Administrative Procedures: Access to the records is limited to person(s) responsible for servicing the records in performance of their official duties, who are properly screened, trained on policies and procedures, and cleared for need to-know. Personnel who access the system and its data must take security awareness training and sign a Rules of Behavior initially (prior to access) and, at least, annually thereafter. Technical: Regular monitoring of users and the system are implemented to ensure only authorized personnel have access to information in the system. Strict controls are in place to minimize the compromise of stored or accessed in the system. Physical: The system and the data are housed in secure data center.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this system should address inquiries to the System Manager at the address identified in ''System Manager and Address'' above. Request must be in writing, include SORN ID and name of this system of records notice, information on the Operating Administration-Department, specific date range and specific type of records seeking. Request must be signed by the requester, must be notarized as required by 28 U.S.C. 1746 in the following format: If executed without the United States: ''I declare (or certify, verify, or state) under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. Executed on (date). (Signature)''. If executed within the United States, its territories, possessions, or commonwealths: ''I declare (or certify, verify, or state) under penalty of perjury that the foregoing is true and correct. Executed on (date). (Signature)''.

CONTESTING RECORD PROCEDURES:

See ''Records Access Procedures'' above.

NOTIFICATION PROCEDURES:

See ''Records Access Procedures'' above.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

A full notice of this system of records, DOT/ALL 11, Integrated Personnel Payroll System, was published in the **Federal Register** on November 7, 2008 (73 FR 66285), April 11, 2000 (65 FR 19845).

Issued in Washington, DC.

Karyn Gorman,

Chief Privacy Officer.

BILLING CODE 4910–9X–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0890]

Agency Information Collection Activity Under OMB Review: Industry Standard Forms for Completing an Appraisal Required by VA

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration, Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden and it includes the actual data collection instrument.

DATES: Comments and recommendations for the proposed information collection should be sent by December 18, 2024.

ADDRESSES: To submit comments and recommendations for the proposed information collection, please type the following link into your browser: *www.reginfo.gov/public/do/PRAMain,* select ''Currently under Review—Open for Public Comments'', then search the list for the information collection by Title or ''OMB Control No. 2900–0890.''

SUPPLEMENTARY INFORMATION:

Title: Industry Standard Forms for Completing an Appraisal Required by VA FNMA Forms 1004, 1004C, 1004D, 1004 (Desktop), 1025, 1073, 1075 and 2055

OMB Control Number: 2900–0890.

Type of Review: Extension without change of a currently approved collection.

Abstract: This information collection package seeks approval of VA's requirement that appraisers utilize certain industry-standard forms in completing an appraisal. 38 U.S.C. 3731 authorizes the VA Secretary to establish a panel of appraisers, prescribe qualifications for such appraisers, and determine reasonable value of a property, construction, repairs or alterations based on an appraisal report provided by a panel appraiser for the purpose of guaranteeing a loan.

VA is requesting approval to authorize collection of these forms because accurate and thorough appraisal reporting is critical to the accuracy of underwriting for the mortgage process.

Additionally, VA is looking to expand the list of authorized forms for use due to ongoing needs related to the pandemic. This collection of information provides a more thorough and complete appraisal of prospective VA-guaranteed properties ensuring that mortgages are acceptable for VA guarantee and thereby protect the interest of VA, taxpayers, and the Veterans Housing Benefit Program Fund. Policies and procedures for governing the VA appraisal program are set forth in Chapter 36, Title 38 of the CFR.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 89 FR 73508, September 10, 2024.

Affected Public: Individuals or Households.

Estimated Annual Burden: 10,833.

Estimated Average Burden per Respondent: 1 minute.

Frequency of Response: One time.

Estimated Number of Respondents: 650,000.

(Authority: 44 U.S.C. 3501 *et seq.*)

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration, Data Governance Analytics, Department of Veterans Affairs.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

Findings of Research MisconductC

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Department of Veterans Affairs (VA), gives notice, pursuant to Veterans Health Administration (VHA) Directive 1058.02 ''Research Misconduct'' section 8.l, that the Department has made findings of research misconduct against Alan Lichtenstein, M.D. (''Respondent''), a former staff physician at the VA Greater Los Angeles Healthcare System, Los Angeles, CA. The Respondent did not appeal the findings or corrective actions against him.

FOR FURTHER INFORMATION CONTACT: Shara Kabak, Research Misconduct Officer, Office of Research Oversight (10RO), 810 Vermont Avenue NW, Washington, DC 20420, (202) 632–7620 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: VA has made final findings of research misconduct against Alan Lichtenstein, M.D. (''Respondent''), a former staff physician at the VA Greater Los Angeles Healthcare System in Los Angeles, CA.

Based on the recommended findings of a joint investigation conducted by VA Greater Los Angeles Healthcare System and University of California, Los Angeles School of Medicine, the Department found that the Respondent engaged in research misconduct by recklessly falsifying data included in at least ten of the following thirteen published papers:

- DEPTOR is linked to a TORC1-p21 survival proliferation pathway in multiple myeloma. *Genes & Cancer.* 2014 Nov;5(11–12):407–19. doi: 10.18632/genesandcancer.44 (hereafter, ''*Genes Cancer* 2014'').
- Cytotoxic properties of a DEPTOR-mTOR inhibitor in multiple myeloma cells. *Cancer Research.* 2016 Oct 1;76(19):5822–5831. doi: 10.1158/0008–5472. CAN–16–1019 (hereafter, ''*Cancer Res. 2016*'').
- Interleukin-6 activates phosphoinositol-3 kinase in multiple myeloma tumor cells by signaling through RAS-dependent and, separately, through p85-dependent pathways. *Oncogene.* 2004 Apr 22;23(19):3368–75. doi: 10.1038/sj.onc.1207459 (hereafter, ''*Oncogene* 2004'').
- MNK1-induced eIF–4E phosphorylation in myeloma cells: a pathway mediating IL–6-induced expansion and expression of genes involved in metabolic and proteotoxic responses. *PLoS One.* 2014 Apr 8;9(4):e94011. doi: 10.1371/journal.pone.0094011 (hereafter, ''*PLoS One 2014*''). Retraction in: *PLoS One.* 2023 Sep 8;18(9):e0291491. doi: 10.1371/journal.pone.0291491.
- Mammalian target of rapamycin inhibitors activate the AKT kinase in multiple myeloma cells by up-regulating the insulin-like growth factor receptor/insulin receptor substrate-1/phosphatidylinositol 3-kinase cascade. *Molecular Cancer Therapeutics.* 2005 Oct;4(10):1533–40. doi: 10.1158/1535–7163.MCT–05–0068 (hereafter, ''*Mol Cancer Ther.* 2005'').
- Inhibition of SAPK2/p38 enhances sensitivity to mTORC1 inhibition by blocking IRES-mediated translation initiation in glioblastoma. *Molecular Cancer Therapeutics.* 2011 10:2244–2256 Dec;10(12):2244–56. doi: 10.1158/1535–7163.MCT–11–0478 (hereafter, ''*Mol Cancer Ther. 2011*'').
- Specific blockade of Rictor-mTOR association inhibits mTORC2 activity and is cytotoxic in glioblastoma. *PLoS One.* 2017; Apr 28;12(4):e0176599. doi: 10.1371/journal.pone.0176599 (hereafter, ''*PLoS One 2017*''). Correction in: *PLoS One.* 2019 Feb 6;14(2):e0212160. doi: 10.1371/journal.pone.0212160. Retraction in: *PLoS One.* 2023 Sep 8;18(9):e0291490. doi: 10.1371/journal.pone.0291490.

Specifically, the Department found that the Respondent recklessly committed research misconduct by reusing the same Western blot or kinase assay image to falsely represent the results related to the following pairs of experiments such that at least one of the sets of images in each of the pairs listed below is inaccurate:

- p-4E–BP1–T37/46, p–4E–BP1–S65 and Tubulin expression in Figure 3B of *Genes Cancer 2014* and Figure 1F of *Cancer Res. 2016.*

• P–AKT–S473 expression in Figure 3C in *Genes Cancer 2014* and lanes 1–4 of DEPTOR expression in Figure 3C of *Cancer Res. 2016* with resizing.

• Lanes 7–9 of p70S6K1 expression in Figure 1A of *Genes Cancer 2014* and DEPTOR expression in Figure 4C of *Cancer Res. 2016.*

• STAT3 associated kinase activity in Figure 4A and lanes 1–4 of p110 mu associated kinase activity in Figure 5B of *Oncogene 2004.*

• Lanes 7–8 of ACTIN expression in Figure 1A and lanes 7–8 of ACTIN expression in Figure 1C of *PLoS One 2014.*

• Lanes 3–4 of P–MNK and T–MNK expression in Figure 1C of *PloS One 2014* and lanes 1–2 of FKHD–P and FKHD–T expression (top panels) in Figure 1B of *Mol Cancer Ther. 2005.*

• Lanes 4–8 of P–AKT (S473) and actin expression in Figure 2A of *Mol Cancer Ther. 2011* and AKT and S6K expression in Figure 1F of *PloS One 2017* with a 180 degree rotation of the P–AKT/AKT panels.

• Lanes 1–2 of T–HSP27 expression and lanes 4–5 of GAPDH expression in Figure 2B of *Oncogene 2013.*

• Lanes 1–3 of p–erk and lanes 2–4 of t-erk expression in Figure 3B and lanes 1–3 of erk(T202/Y204) and erk expression in Figure 4A of *J Biol Chem. 2012.*

• α-tubulin expression in Figure 4D and 4E of *Genes Cancer 2014.*

• C-myc expression in Figure 1B and lanes 1–4 of T-p70 expression in Figure 1E of *Oncogene 2016.*

• T–4E–BP1 (α, β and γ phosphorylated forms) expression (middle panel) and lanes 1–4 of T–4E–BP (α, β and γ phosphorylated forms) expression (right panel) of Supplemental Figure 2A of *Oncogene 2016.*

• T–S6 expression and C–myc expression in Figure 1F of *Oncogene 2016.*

• Lanes 2–5 of MNK–P and MNK–T expression (left panel) in Figure 3A and ERK–T and Hsp–27–T expression in Figure 4A of *Oncogene 2016.*

• MNK1, MNK2 and GAPDH expression in Figure 3E of *Oncogene 2016* and MNK1, MNK2 and GAPDH expression in Figure 3A of *PloS One 2014.*

• ire–1–total expression (right panel) in Figure 5B of *Mol Cancer Res. 2016* and mTor expression in Figure 8A of *Genes Cancer 2014* with resizing.

• The right panel of ACTIN expression in Figure 2A and the right panel of ACTIN expression in Figure 2g of *Mol Cancer Ther.* 2019.

• Lanes 1–6 of DEPTOR and mTOR expression in Figure 1A of *Genes Cancer 2014* and DEPTOR and mTor expression in Figure 6A of *Mol Cancer Ther.* 2019.

• IRS–1 expression in lanes 4–5 and lanes 8–9 in Figure 6B of *Mol Cancer Ther. 2005.*

• AKT expression (bottom panel) in Figure 1Aand lanes 7–9 of IRS–1 expression in Figure 6B of *Mol Cancer Ther. 2005.*

• Lanes 4–6 of IGF–R expression and lanes 4–6 of FLAG expression in Figure 5B of *Mol Cancer Ther. 2005* with a 180-degree rotation.

• Lanes 2–3 of AKT–T expression (4th panel) in and lanes 1–2 of AKT–T expression (6th panel) in Figure 1C of *Mol Cancer Ther. 2005.*

• Lanes 1–2 of AKT–P expression (top panel) and lanes 1–2 of AKT–P expression (5th panel) in Figure 1E of *Mol Cancer Ther. 2005.*

• Lanes 1–3 and lanes 5–7 of FKH–T expression in Figure 3C of *Blood 2003.*

• Lane 1 of p70 expression and Ser411 expression in Figure 4B and lane 4 of Ser411 expression and lanes 1–2 of Ser411 expression in Figure 4c of *Blood 2003.*

• Lanes 1 and 3 of ERK–P expression and lanes 2 and 4 of ERK–T expression in Figure 2C of *Blood 2003.*

Based on these findings of research misconduct, which the Respondent did not appeal, the Department has imposed the following corrective actions:

(1) Prohibition from conducting VA research for at least 2 years;

(2) Notification to the relevant journals of the research misconduct findings.

Signing Authority

Denis McDonough, Secretary of Veterans Affairs, signed and approved this document on November 12, 2024, and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs.

Jeffrey M. Martin,

Assistant Director, Office of Regulation Policy & Management, Office of General Counsel, Department of Veterans Affairs.

[FR Doc. 2024–26756 Filed 11–15–24; 8:45 am]

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0012]

Agency Information Collection Activity Under OMB Review: Application for Cash Surrender or Policy Loan and Application for Cash Surrender (Docusign)

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration, Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden, and it includes the actual data collection instrument.

DATES: Comments and recommendations for the proposed information collection should be sent by December 18, 2024.

ADDRESSES: To submit comments and recommendations for the proposed information collection, please type the following link into your browser: *www.reginfo.gov/public/do/PRAMain,* select ''Currently under Review—Open for Public Comments'', then search the list for the information collection by Title or ''OMB Control No. 2900–0012.''

FOR FURTHER INFORMATION CONTACT: VA PRA information: Maribel Aponte, (202) 461–8900, *vacopaperworkreduact@va.gov.*

SUPPLEMENTARY INFORMATION:

Title: Application for Cash Surrender or Policy Loan (VA Form 29–1546). Application for Cash Surrender (VA Form 29–1546e—DocuSign).

OMB Control Number: 2900–0012—*https://www.reginfo.gov/public/do/PRASearch.*

Type of Review: Extension without change of a currently approved collection.

Abstract: The Application for Cash Surrender or Policy Loan solicits information needed from Veterans to apply for cash surrender value or policy loan on his/her insurance. The VA Form 29–1546e has been added to this collection. This is an electronic version of the 29–1546 but is for cash surrender only. This form was created so Veterans can apply for a cash surrender of their policy online. This will not affect the number of respondents but will make it

easier and reduce the time it takes for Veterans to receive the cash value of their policy. The information on this form is required by law, 38 U.S.C. 1906 and 1944, 38 CFR 6.115, 6.116, 6.117, 8.27, 6.100, 6.101 and 8.28.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 89 FR 73507, September 10, 2024.

Affected Public: Individuals or Households.

Estimated Annual Burden: 4,939 hours.

Estimated Average Burden per Respondent: 10 minutes.

Frequency of Response: Upon Request.

Estimated Number of Respondents: 29,636.

Authority: 44 U.S.C. 3501 *et seq.*

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration, Data Governance Analytics, Department of Veterans Affairs.

Vol. 89 Monday,
No. 222 November 18, 2024

Part II

Consumer Financial Protection Bureau

12 CFR Parts 1001 and 1033
Required Rulemaking on Personal Financial Data Rights; Final Rule

CONSUMER FINANCIAL PROTECTION BUREAU

12 CFR Parts 1001 and 1033

[Docket No. CFPB–2023–0052]

RIN 3170–AA78

Required Rulemaking on Personal Financial Data Rights

AGENCY: Consumer Financial Protection Bureau.

ACTION: Final rule.

SUMMARY: The Consumer Financial Protection Bureau (CFPB) is issuing a final rule to carry out the personal financial data rights established by the Consumer Financial Protection Act of 2010 (CFPA). The final rule requires banks, credit unions, and other financial service providers to make consumers' data available upon request to consumers and authorized third parties in a secure and reliable manner; defines obligations for third parties accessing consumers' data, including important privacy protections; and promotes fair, open, and inclusive industry standards.

DATES: This final rule is effective January 17, 2025.

Compliance dates: Data providers must comply with the requirements in 12 CFR part 1033, subparts B and C beginning April 1, 2026; April 1, 2027; April 1, 2028; April 1, 2029; or April 1, 2030, pursuant to the criteria set forth in § 1033.121(c).

FOR FURTHER INFORMATION CONTACT: George Karithanom, Regulatory Implementation and Guidance Program Analyst, Office of Regulations, at 202–435–7700 or *https://reginquiries.consumerfinance.gov/*. If you require this document in an alternative electronic format, please contact *CFPB_Accessibility@cfpb.gov.*

I. Overview

A. Summary of the Final Rule

When Congress established the Consumer Financial Protection Bureau in the Consumer Financial Protection Act (CFPA), it sought to ensure that markets for consumer financial products and services are fair, transparent, and competitive.[1] CFPA section 1033 lets consumers take action by giving them a right to access their account information and authorize certain third parties acting on their behalf to access that information. This right enables consumers to evaluate their account relationships and switch providers that are not benefiting them, and allows consumers to authorize third parties to access data on their behalf to provide valuable products and services they request. Increased competition can lead to innovation, attractive rates, quality service, and other benefits.

Specifically, CFPA section 1033(a) and (b) provide that, subject to rules prescribed by the CFPB, a covered person shall make available to a consumer, upon request, information in the control or possession of the covered person concerning the consumer financial product or service that the consumer obtained from such covered person, subject to certain exceptions. The information must be made available in an electronic form usable by consumers. In addition, Congress mandated in section 1033(d) that the CFPB prescribe standards to promote the development and use of standardized formats for data made available under section 1033.

This final rule carries out these objectives by empowering consumers to access account data controlled by providers of certain consumer financial products or services in a safe, secure, reliable, and competitive manner. When implemented, consumers will be able to access their own data and authorize third parties to access their data safely and with confidence that the third party is acting on their behalf, which means not collecting, using, or retaining consumer data for the benefit of entities other than the consumer. Consumers and authorized third parties will be able access data securely, ensuring that a baseline set of security standards apply across the market. They also will be able to access data reliably, promoting the accurate and consistent transmission of usable data. Consumer-authorized data access under the final rule also will occur in a manner that promotes competition through standardization and other measures to avoid entrenching incumbent data providers, intermediaries, and third parties that

[1] 12 U.S.C. 5511(a). The CFPA is title X of the Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111–203, 124 Stat. 1376, 2008 (2010).

have commercial interests not always aligned with the interests of consumers and competition generally.

Coverage

In general, the final rule requires a ''data provider'' to make ''covered data'' about ''covered financial products and services'' available in electronic form to consumers and to certain ''authorized third parties.'' For this purpose, an authorized third party is a third party that has complied with the authorization procedures set forth in subpart D of part 1033.

A ''data provider'' includes depository institutions (including credit unions) and nondepository institutions that issue credit cards, hold transaction accounts, issue devices to access an account, or provide other types of payment facilitation products or services. The final rule does not apply to certain small depository institutions as defined in the rule. In general, ''covered data'' includes information about transactions, costs, charges, and usage. This coverage is intended to prioritize some of the most beneficial use cases for consumers and leverage data providers' existing capabilities. Clarifying the scope of the data access right will also promote consistency in the data made available to consumers, reduce costs of arranging for access to such data, and focus the development of technical standards around such data.

Access Requirements

The final rule generally requires a data provider to make covered data available to consumers and authorized third parties upon request. The rule includes a number of functional requirements intended to ensure data providers make covered data available reliably, securely, and in a way that promotes competition. A data provider must make covered data available to authorized third parties in a standardized and machine-readable format and in a commercially reasonable manner, including by meeting a minimum response rate with respect to requests for covered data. A data provider must not unreasonably restrict the frequency with which it receives or responds to requests for covered data from an authorized third party. In addition, the data provider cannot comply with the requirement to make data available to authorized third parties by allowing the third party to engage in ''screen scraping,'' an access method that uses consumer credentials to log in to consumer accounts to retrieve data.[2] The final rule also prohibits fees or charges related to consumer and third party data access. The final rule also requires a data provider to publicly disclose certain information about itself to facilitate access to covered data and to promote accountability.

The rule uses the term ''developer interface'' to refer to the functionality through which a data provider receives requests for covered data and makes the data available in electronic form usable by authorized third parties. Similarly, the rule uses the term ''consumer interface'' as a label for the functionality with respect to consumer access. In neither case does the rule require the use of any particular technology.

Authorized Third Parties

To become an authorized third party, a third party must seek access to covered data on behalf of a consumer to provide a product or service that the consumer requested and: (1) provide the consumer with an authorization disclosure containing certain key terms of the data access; (2) provide a statement to the consumer in the authorization disclosure certifying that the third party agrees to certain obligations set forth in the final rule; and (3) obtain the consumer's express informed consent to access covered data on behalf of the consumer by obtaining an authorization disclosure that is signed by the consumer electronically or in writing.

Under the final rule, a third party must certify to limit its collection, use, and retention of covered data to what is reasonably necessary to provide the consumer's requested product or service. For purposes of this certification, targeted advertising, cross-selling, and the sale of covered data are not part of, or reasonably necessary to provide, any other product or service. The final rule includes examples of uses that are considered reasonably necessary to provide consumer requested products or services.

In addition to this general limit on collection, use, and retention of covered data, the third party also must certify to limit the duration of collection of covered data pursuant to a given authorization to a maximum period of one year. To continue collection, the third party must obtain a new authorization from the consumer no later than the anniversary of the most recent authorization. If a consumer does not provide a new authorization or if a consumer revokes authorization, the third party will cease its collection of covered data and cease its use and retention of covered data that was previously collected unless use or retention of that covered data remains reasonably necessary to provide the consumer's requested product or service.

Under the final rule, a third party must also certify to:

- Have written policies and procedures that are reasonably designed to ensure that covered data are accurately received from a data provider and, if applicable, accurately provided to other third parties.
- Apply an information security program to its systems for the collection, use, and retention of covered data. Generally, the program must satisfy the applicable rules issued pursuant to the Safeguards Framework of the Gramm-Leach-Bliley Act (GLBA), 15 U.S.C. 6801 *et seq.* (GLBA Safeguards Framework).[3]
- Provide the consumer with a copy of the authorization disclosure that the consumer has signed electronically or in writing and contact information that enables a consumer to receive answers to questions about the third party's access to the consumer's covered data.
- Have reasonable written policies and procedures designed to ensure that the third party provides to the consumer, upon request, certain information about the third party's access to the consumer's covered data.
- Provide the consumer with a method to revoke the third party's authorization. Additionally, the third party will certify that it will notify the data provider, any data aggregator, and other third parties to which it has provided the consumer's covered data when the third party receives a consumer's revocation request.

[2] Unless otherwise stated, the term ''screen scraping'' in this final rule refers to credential-based screen scraping, which is prevalent in the market today.

[3] The GLBA Safeguards Framework in this final rule refers the rules issued by the FTC and the guidelines issued by the prudential regulators that generally implement the GLBA's data security safeguards framework, pursuant to sections 501 (15 U.S.C. 6801) and 505 (15 U.S.C. 6805) of the GLBA. *See* Safeguards Rule, 16 CFR part 314; *Interagency Guidelines Establishing Standards for Safety and Soundness,* 12 CFR part 30, app. A (OCC); 12 CFR part 208, app. D–1 (Bd. of Governors of the Fed. Rsrv. Sys.); 12 CFR part 364, app. A (FDIC); and 12 CFR 748, app. A (NCUA). The GLBA Safeguards Framework sets forth standards for administrative, technical, and physical safeguards with respect to financial institutions' customer information. These standards generally apply to the security and confidentiality of customer records and information, anticipated threats or hazards to the security or integrity of such records, and unauthorized access to or use of such records or information that could result in substantial harm or inconvenience to any customer.

• Require other third parties, by contract, to comply with specified third party obligations before providing covered data to them.

Data Aggregators

The final rule permits data aggregators to perform the authorization procedures described in the final rule on behalf of the third party seeking the consumer's authorization. The third party seeking the consumer's authorization remains responsible for compliance with the authorization procedures even if it uses a data aggregator to perform the authorization procedures. If the third party will use a data aggregator to assist with accessing covered data, the data aggregator must certify to the consumer that it will satisfy the third party obligations discussed above (except the obligation to ensure consumers are informed, including the obligation to provide a copy of the authorization disclosure and contact information, and the obligation to provide a revocation mechanism), and this certification must be provided to the consumer. The third party may include this certification in the authorization disclosure or the data aggregator may provide it separately. Additionally, the third party's authorization disclosure must include the data aggregator's name and a description of the services that the data aggregator will provide in connection with accessing the consumer's covered data.

Policies and Procedures, and Recordkeeping for Data Providers and Third Parties

The final rule requires a data provider to have written policies and procedures that are reasonably designed to achieve certain objectives, including those related to what covered data are generally made available, how a data provider responds to requests for developer interface access and requests for information, the accuracy of data transmitted through an interface, and record retention.

A third party that is a covered person or service provider as defined in the CFPA (12 U.S.C. 5481(6) and (26)), must establish and maintain written policies and procedures that are reasonably designed to ensure retention of records that are evidence of compliance for a reasonable period of time, not less than three years after a third party obtains the consumer's most recent authorization.

Financial Products or Services (Part 1001)

The final rule defines financial products or services under the CFPA to ensure that it includes providing financial data processing. This provides additional assurance that financial data processing by third parties or others is subject to the CFPA and its prohibition on unfair, deceptive, and abusive acts or practices.

B. Market Background

Digitization in consumer finance has the potential to facilitate more seamless consumer switching and greater competition. Consumers' ability to easily switch providers of consumer financial products and services creates strong competitive incentives that result in superior customer service and more favorable terms for consumers. Consumer-authorized sharing of personal financial data can produce positive market outcomes, but without appropriate safeguards it can also lead to misuse and abuse of consumer data.

Development of Electronic Data Access and Open Banking

Most consumers with a bank account are enrolled in digital banking through online banking or mobile applications, and more than two-thirds use it as their primary method of account access.[4] Consumer interfaces generally provide free access to information such as balances, transactions, and at least some terms of service. These consumer interfaces may provide additional functionality, such as allowing consumers to move money, manage their accounts, and download financial data.[5] Building on these developments, open banking [6] emerged in the early 2000s, along with interfaces designed for developers of products or services to request consumer information, and related industry standard setting activity.[7] Third parties, such as personal financial advisors, often outsourced establishing and maintaining connections with data providers to data aggregators. These intermediaries largely relied on ''screen scraping.'' Widespread screen scraping allowed open banking to grow quickly in the U.S. Screen scraping became a significant point of contention between third parties and data providers, in part due to its inherent risks, such as the proliferation of shared consumer credentials and overcollection of data.[8]

In recent years, the open banking system has continued to grow as consumer reliance on products and services powered by consumer-authorized data access has expanded. However, this growth has been uneven, with various disputes among system participants continuing to arise. Despite these challenges, financial institutions are dedicating more resources to developing open banking infrastructure, indicating significant consumer demand for open banking use cases, as well as interest among incumbents in maintaining some control over the system.

State of the Open Banking System

The CFPB estimates that, as of 2022, at least 100 million consumers had authorized a third party to access their account data. In 2022, the number of individual instances in which third parties accessed or attempted to access consumer financial accounts is estimated to have exceeded 50 billion and may have been as high as 100 billion, figures that vastly exceed the comparable public figures from some other jurisdictions' open banking systems, even on a per-capita basis.[9] These figures are likely to grow as consumer engagement continues and use cases expand.

The open banking system also engages a large number of entities, including thousands of depository institutions and third parties. A growing number of entities now serve as both data

[4] Fed. Deposit Ins. Corp., *National Survey of Unbanked and Underbanked Households* (2021), *https://www.fdic.gov/analysis/household-survey/2021report.pdf.*

[5] For a more detailed discussion of the history of digital banking, *see* the NPRM, 88 FR 74796, 74797–98 (Oct. 31, 2023).

[6] This final rule generally uses the term ''open banking'' to refer to the network of entities sharing personal financial data with consumer authorization. Some stakeholders use the term ''open finance'' because of the role of nondepositories as important data sources. The CFPB views the two terms as interchangeable, but generally uses ''open banking'' because that term is more commonly used in the U.S.

providers and third parties. For example, many depositories now act as third parties by offering personal financial management tools, while some entities offering so-called neobank accounts and digital wallets act as data providers. Most third party access is effectuated via a small number of aggregators, although some third parties elect to access at least some data directly.[10]

Third party data access is generally enabled via screen scraping or developer interfaces.[11] Based on feedback received through public comments and stakeholder outreach, there is nearly universal consensus that safer forms of data access should supplant screen scraping.[12] However, to this point, such a transition has required data providers to choose to develop and maintain safer forms of data access, and required agreement between such providers and third parties on the resulting terms of data access, both of which have proved to be challenging propositions.[13] In spite of these challenges, open banking use cases continue to emerge and develop. Major use cases include personal financial management tools, payment applications and digital wallets, credit underwriting (including cashflow underwriting), and identity verification. While many major use cases began as innovative offerings by third parties, incumbent financial institutions have adopted many of them in response to consumer demand.

Challenges in the Open Banking System

Though the open banking system in the U.S. has grown considerably, significant challenges remain to achieving safe, secure, reliable, and competitive open banking. Divergent interests in the market with respect to the scope, terms, and mechanics of data access, and problems with the responsible collection, use, and retention of data have impeded the transition to safer forms of data access and the development of market-wide standards. This leads to inconsistent data access for consumers and market inefficiencies. These dynamics also impel third parties to rely on intermediaries, which have interests that may not always advance open banking since they stand to benefit from existing private network effects.

Market participants' interests may diverge due to interrelated competitive, legal, and regulatory factors. For example, data providers may limit the data they share or refrain from sharing altogether to protect their market position, while third parties may collect more data than they reasonably need to provide the products or services sought by the consumer.[14] Such unnecessary collection, use, and retention of consumer data by third parties does not benefit consumers and needlessly encroaches on consumers' privacy interests.

Impacts of These Challenges on the Open Banking System

The challenges described above have impeded progress on safer forms of data access and hampered multilateral efforts by industry to establish open banking standards.[15] This stasis has forced the open banking system to depend heavily on a handful of data aggregators that accrue economic benefits from the system's inability to scale safer forms of data access and open industry standards. Dependency on a handful of data aggregators creates incentives for them to rent-seek and self-preference. In a more open system where safer forms of data access are appropriately accessible and third parties are easily verified, third parties and data providers may choose to connect without intermediaries if they wish, or continue to use them to the extent they offer compelling value.

When the challenges impeding progress described above are resolved, consumers should be able to safely, securely, and reliably exercise their data access rights in a competitive open banking system not dominated by the interests of any one segment of the market.

II. The Proposal and Other Procedural Background

A. Outreach

In addition to the industry and community outreach described in the proposal,[16] in 2016, the CFPB published in the **Federal Register** an RFI Regarding Consumer Access to Financial Information on topics including consumer-authorized data access [17] and in 2020 held a symposium with stakeholders [18] and published an ANPR in the **Federal Register**.[19] Pursuant to the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA),[20] the CFPB in 2022 issued its Outline of Proposals and Alternatives under Consideration for the Required Rulemaking on Personal Financial Data Rights (Outline or SBREFA Outline) [21] and in 2023 convened a SBREFA Panel,[22] which issued a report (Panel Report or SBREFA Panel Report).[23] In December 2023, CFPB staff met with the Consumer Advisory Board, the Community Bank Advisory Council, and the Credit Union Advisory Council to receive feedback on the proposed rule.[24]

Continued

Before and after issuing the proposal, CFPB staff met on numerous occasions to obtain feedback from staff from the Board of Governors of the Federal Reserve System, OCC, FDIC, NCUA, and FTC, including on the subjects in CFPA sections 1022(b)(2)(B) and 1033(e). CFPB staff has also met with staff from other Federal agencies, including staff from the USDA, the U.S. Department of the Treasury, the U.S. Department of Justice, the U.S. Department of Commerce, the Federal Housing Finance Agency, as well as staff from State agencies.

B. Summary of the Proposed Rule

On October 19, 2023, the CFPB released the notice of proposed rulemaking for the Required Rulemaking on Personal Financial Data Rights. The proposal was published in the **Federal Register** on October 31, 2023, and the public comment period closed on December 29, 2023. *See* 88 FR 74796 (Oct. 31, 2023).

Part 1033

The proposal would have implemented CFPA section 1033 by ensuring consumers and third parties who are authorized to access covered data on behalf of consumers can access covered data in an electronic form from data providers. In general, the proposal sought to foster a data access framework that is safe, by ensuring third parties are acting on behalf of consumers when accessing their data, including with respect to consumers' privacy interests; secure, by applying a consistent set of security standards across the market; reliable, by promoting the accurate and consistent transmission of data that are usable by consumers and authorized third parties; and competitive, by promoting standardization and not entrenching the roles of incumbent data providers, intermediaries, and third parties whose commercial interests might not align with the interests of consumers and competition generally. The proposed rule sought to foster this kind of framework by direct regulation of practices in the market and by identifying areas in which fair, open, and inclusive standards can develop to provide additional guidance to the market. Consistent with the statutory mandate in CFPA section 1033(d), various provisions in the proposed rule sought to promote the use and development of standardized formats. The proposal identified six general objectives to be achieved by its various provisions.

First, the proposal would have clarified the scope of data access rights under CFPA section 1033 by defining key terms, establishing which covered persons would be required to make data available to consumers, and defining which data would need to be made available to consumers. Second, the proposal would have established basic standards for data access by requiring data providers to maintain a consumer interface for consumers and a developer interface for third parties to access consumer-authorized data under CFPA section 1033. Data providers would have been required to make available covered data to authorized third parties in a standardized format, in a commercially reasonable manner, without unreasonable access caps, and pursuant to certain security specifications. In addition, data providers would have had to follow certain procedures to disclose information about themselves and their developer interfaces, and to establish and maintain certain written policies and procedures to ensure compliance with the provisions of the rule and promote the objectives of CFPA section 1033. Third, the proposal would have prevented data providers from allowing a third party to access the system using consumer interface credentials. This and the proposals described above were intended to transition the market from screen scraping towards an access method that complies with CFPA section 1033. Fourth, the proposal would have defined the mechanics of data access by proposing certain requirements and clarifications with respect to when a data provider must make available covered data upon request to consumers and authorized third parties. Fifth, the proposal sought to ensure third parties are acting on behalf of consumers through requirements that a third party certify to consumers that it will only collect, use, and retain the consumer's data to the extent reasonably necessary to provide the consumer's requested product or service. The proposed rule also sought to improve consumers' understanding of third parties' data practices by requiring a clear and conspicuous authorization disclosure including key facts about the third party and its practices. Other key protections in the proposed rule would have included limiting the length of data access authorizations and requiring deletion of consumer data in many cases when a consumer's authorization expires or is revoked. Sixth, the proposal sought to promote fair, open, and inclusive industry standards by proposing that conformance with ''qualified industry standards'' issued by standard-setting bodies recognized by the CFPB would provide some indicia of compliance with various rule provisions.

Part 1001

Separately, the proposed rule would have defined financial products or services under the CFPA in 12 CFR part 1001 to ensure that the definition includes providing financial data processing. The proposal explained that this would provide additional assurance that financial data processing by third parties or others is subject to the CFPA and its prohibition on unfair, deceptive, and abusive acts or practices.

Comments

The CFPB received approximately 11,120 public comments on the proposal during the comment period.[25] Approximately 290 of these comments were unique, detailed comment letters. These commenters included data providers and third parties, including banks of different sizes, credit unions, a variety of nondepository entities, and data aggregators;[26] trade associations representing a diverse array of interests; standard-setting bodies;[27] consumer advocates;[28] researchers and a variety of research institutes; members of Congress; government agencies; law firms; and individual commenters not affiliated with or representing any organization.

In addition, the CFPB considered comments received after the comment period closed via approximately 60 ex parte submissions and meetings.[29] These materials, including all ex parte submissions and summaries of ex parte meetings, will be available on the public docket for this rulemaking.[30]

Council); *https://www.regulations.gov/comment/CFPB-2023-0052-11087* (Credit Union Advisory Council); *https://www.regulations.gov/comment/CFPB-2023-0052-11088* (Consumer Advisory Board).

[25] *See https://www.regulations.gov/docket/CFPB-2023-0052/comments.*

[26] Depending on the context and its activities, a particular entity might be a data provider, a third party, a data aggregator acting on behalf of a third party, or some combination thereof. The description of commenters in this final rule attempts to characterize the commenter based on the expressed or inferred capacity in which they provided feedback.

[27] As used in this final rule, this term refers to nonprofit entities that described themselves principally as an industry standard-setting body. The CFPB recognizes, however, that a variety of other commenters might be involved in standard-setting activities.

[28] As used in this final rule, this term refers broadly to all types of consumer advocates, including privacy advocates and community groups.

[29] *See* Consumer Fin. Prot. Bureau, *Policy on Ex Parte Presentations in Rulemaking Proceedings,* 82 FR 18687 (Apr. 21, 2017).

[30] *See https://www.regulations.gov/docket/CFPB-2023-0052.*

The remaining comments included some duplicate submissions (*i.e.,* letters with the same content from the same commenter submitted through multiple channels, or letters with the same content submitted by multiple people on behalf of the same commenting organization) as well as comments that appeared to be part of several comment submission campaigns. Such comment campaigns typically advocated for or against particular provisions in the proposal and urged additional changes. These comments were considered by the CFPB along with all other comments received, including any additional remarks included in otherwise identical comment letters.

The CFPB received comments on nearly all aspects of the proposed rule, and on its analyses of the proposed rule's impacts. Relevant information received via comment letters, as well as ex parte submissions, is discussed below in subsequent parts of this document, as applicable. The CFPB considered all the comments it received regarding the proposal, made certain modifications, and is adopting the final rule as described in part IV below.

C. 2024 Industry Standard-Setting Final Rule

In June 2024, the CFPB finalized the proposal in part, establishing attributes a standard-setting body must possess to receive CFPB recognition for purposes of issuing standards that provide some indicia of compliance with certain substantive provisions of part 1033, as well as establishing the application process for CFPB recognition. *See* 89 FR 49084 (June 11, 2024) (Industry Standard-Setting Final Rule).

III. Legal Authority

A. CFPA Section 1033

CFPA section 1033(a) and (b) provide that, subject to rules prescribed by the CFPB, a covered person shall make available to a consumer, upon request, information in the control or possession of the covered person concerning the consumer financial product or service that the consumer obtained from such covered person, subject to certain exceptions. The information must be made available in an electronic form usable by consumers. Section 1002 of the CFPA defines certain terms used in CFPA section 1033, including defining ''consumer'' as ''an individual or an agent, trustee, or representative acting on behalf of an individual.'' In light of these purposes and objectives of section 1033 and the CFPA generally, the CFPB interprets CFPA section 1033 as authority to establish a framework that ensures data providers readily make available to consumers and third parties acting on behalf of consumers (including authorized third parties offering competing products and services), upon request, covered data in a usable electronic form. In addition, CFPA section 1033(d) provides that the CFPB, by rule, shall prescribe standards applicable to covered persons to promote the development and use of standardized formats for information, including through the use of machine-readable files, to be made available to consumers under this section. Moreover, the CFPB interprets CFPA section 1033 as authority to specify procedures to ensure third parties are truly acting on behalf of consumers when accessing covered data. These procedures help ensure the market for consumer-authorized data operates fairly, transparently, and competitively.

CFPA section 1033(c) provides that nothing in CFPA section 1033 shall be construed to impose any duty on a covered person to maintain or keep any information about a consumer. Further, CFPA section 1033(e) requires that the CFPB consult with the prudential regulators and the FTC to ensure, to the extent appropriate, that certain objectives are met.

B. CFPA Sections 1022(b) and 1024(b)(7)

CFPA section 1022(b)(1) authorizes the CFPB to, among other things, prescribe rules ''as may be necessary or appropriate to enable the [CFPB] to administer and carry out the purposes and objectives of the Federal consumer financial laws, and to prevent evasions thereof.'' The CFPA is a Federal consumer financial law.[31] Accordingly, in issuing the proposed rule, the CFPB is exercising its authority under CFPA section 1022(b) to prescribe rules that carry out the purposes and objectives of the CFPA and to prevent evasions thereof. This would include, at least in part, provisions to require covered persons or service providers to establish and maintain reasonable policies and procedures, such as those to create and maintain records that demonstrate compliance with the rule after the applicable compliance date. CFPA section 1024(b)(7) also grants the CFPB authority to impose record retention requirements on CFPB-supervised nondepository covered persons ''for the purposes of facilitating supervision of such persons and assessing and detecting risks to consumers.''

C. CFPA Section 1002

Certain provisions of the CFPA, such as its prohibition on unfair, deceptive, or abusive acts or practices, apply in connection with a consumer financial product or service. Under CFPA section 1002(5), this is generally defined as a financial product or service that is ''offered or provided for use by consumers primarily for personal, family, or household purposes.'' In turn, CFPA section 1002(15) defines a financial product or service by reference to a number of categories. In addition, CFPA section 1002(15)(A)(xi)(II) authorizes the CFPB to issue a regulation to define as a financial product or service, for purposes of the CFPA, ''such other financial product or service'' that the CFPB finds is ''permissible for a bank or for a financial holding company to offer or to provide under any provision of a Federal law or regulation applicable to a bank or a financial holding company, and has, or likely will have, a material impact on consumers.'' The CFPB is exercising this authority in finalizing § 1001.2(b).

IV. Discussion of the Final Rule

12 CFR Part 1033

General Comments Received on the Proposal

High-level and general comments received on the CFPB's proposed rule to implement CFPA section 1033 are discussed here, followed by a discussion of comments specifically addressing the rulemaking process, liability among commercial entities, and overlaps with other consumer financial laws and CFPB rulemaking activity. Comments received on specific aspects of the CFPB's proposed rule, as well as regarding the CFPB's legal authority to adopt specific aspects of the rule, and the anticipated effects of particular provisions, are discussed in turn in the sections that follow in this part IV. Comments regarding the CFPB's analysis of impacts are discussed in parts VI through VIII.

1. High-Level and General Comments on the Proposal

General Support

Most commenters, including data providers, third parties, data aggregators, trade associations, consumer advocates, and others, supported the overall goals of the rulemaking articulated in the proposal. Many commenters supported implementing the data access rights in CFPA section 1033 to include direct

[31] *See* 12 U.S.C. 5481(14) (defining ''Federal consumer financial law'' to include the provisions of the CFPA).

consumer and third party access that would allow consumers and authorized third parties to access data more reliably and securely compared to current market practices. A research institute commenter stated that the proposal would assure a robust regime of third party access with respect to its coverage, while building in flexibility to allow the regime to evolve along with changes in market standards and technology.

Many third party commenters, consumer advocates, and others stated consumer-authorized access would help consumers, including those underserved by their existing account providers, manage their financial lives and access new and competing products and services. A community bank commenter indicated the proposal would help ensure community banks remain vital in the areas they serve.

Many commenters, including third parties, data providers, consumer advocates, and others also stated that the rule would generally increase competition overall by reducing barriers to entry and other impediments for market participants to compete with incumbent depository and nondepository institutions. For example, a credit union commenter stated that the standardization of third party data access would allow smaller institutions to rely on the same technology as larger institutions, decreasing incumbents' market power. Other commenters believed that the proposal's approach to standard-setting would reduce the influence of incumbents and increase consumers' bargaining power and access to services offered by different providers. Some data provider commenters stated that the proposal would support competition by limiting third party secondary use of consumer-authorized data and ensuring third parties are subject to a basic standard for data security.

Some commenters specifically indicated that the rule would have competitive benefits in certain markets. For example, a trade association for certain third parties stated that open banking can spur competition in the payments sector, lowering transaction costs and mitigating the durable market power of certain incumbents. The commenter noted that the proposal's prohibition on fees for third party access would allow cost-sensitive merchants to accept lower-cost payments.

Commenters also emphasized the benefits of informed consent and consumer control when sharing data with third parties and the need for consumer protection in consumer-authorized access. Many data providers, third parties, consumer advocates, and others also supported the rule's efforts to protect consumers by enabling them to control their data effectively. For example, a consumer advocate expressed general support for the proposal, characterizing it as a strong, protective rule that would ensure that consumers can share account data free of misuse or exploitation. This commenter also stated the consumer protections in the rule should serve as a model for how to safeguard consumer control and privacy when a consumer grants permission to a business to use their data.

General Opposition

While many commenters supported the proposal overall, some data providers, third parties, and others were critical of some or all aspects of the proposal. A number of data provider commenters, particularly credit unions and community banks, expressed opposition to the proposal as a whole, and questioned whether a rule was necessary or appropriate to achieve the CFPB's stated goals, including with respect to competition, and questioned the CFPB's legal authority to issue rules for open banking.

In addition, a wide variety of commenters, including data providers and third parties, raised what they described as significant concerns about the costs of the proposal, often with respect to specific provisions. In particular, data providers were most concerned with potential compliance costs related to the Fair Credit Reporting Act (FCRA), 15 U.S.C. 1681 *et seq.,* the costs of providing access to third parties in compliance with the rule as proposed (including the prohibition on charging fees for access), the costs associated with managing third party risk, and how liability would be allocated for third party breaches or fraud. A number of entities—mainly though not exclusively third parties that use consumer-authorized data—asserted that the proposed third party limitation on collection, use, and retention of covered data would foundationally undermine the rule and restrict consumers' ability to share their data. A large number of smaller financial institutions and related trade associations expressed concern that the proposal would disadvantage small entities.

A variety of commenters suggested that the proposal would undermine competition in various ways. Some commenters, including research institutes, third parties, and data providers asserted that the proposal's coverage was too narrow to support competition. For example, a data aggregator stated that the proposal's limited coverage of products and data types would reduce third party innovation, and a research institute stated that the limited coverage of data providers would give them an incentive to block data access outside of the rule's coverage, further limiting third party access to data. A research institute and a data provider commenter stated that the proposal would undermine competition by limiting the role of industry standard-setting bodies that are not recognized by the CFPB.

Some credit union and community bank commenters stated that the rule as a whole would unfairly force data providers to maintain data access systems and bear other costs, effectively subsidizing competition from third parties, particularly as a result of the proposed fee prohibition for third party data access. Several of these commenters noted that this result would benefit nondepositories that are excluded from the data provider definition and would come at the expense of depository institutions, which would disproportionately disadvantage credit unions and community banks. Data providers expressed concern that they would unfairly bear the burden of managing liability risks presented by nondepository third parties that are not subject to the same regulatory oversight. Several data provider commenters expressed concern that third parties would use consumer data to harm data providers, such as by reverse-engineering sensitive commercial information. A data aggregator commenter stated that the proposal would consolidate the market of data aggregators by forcing data providers to grant access to third parties, ultimately stifling innovation.

Credit union and community bank commenters also expressed concern that the proposal would disadvantage them relative to larger and better resourced data providers. These commenters stated that the proposal would impose disproportionate and unsustainable costs on smaller data providers and would force some to exit the market or otherwise consolidate the banking industry, reducing consumer access to products and services. A number of commenters stated that smaller depository institutions that rely on core service providers would be less able to manage the costs of a prohibition on fees for third party access. One data provider commenter stated that the proposed rule would force less-resourced data providers to adhere to standards established by the largest data providers, which would reduce their profitability. Another data provider

commenter stated that forcing some data providers to make data available to third parties while exempting community banks would put community banks at a competitive disadvantage relative to large data providers.

As discussed in part IV.D.4, a variety of third party commenters expressed concern that the proposed limitation on collection, use, and retention of covered data would restrict innovation by third parties or limit the ability of new entrants and providers of new products and services to provide innovative products. For example, a trade association representing nondepository institutions argued that the final rule should allow broader use of covered data for advertising purposes to support competition, while numerous commenters, including research institutes and others, expressed concern about the limitation on use of de-identified data, including for research purposes. Other commenters argued the proposed limitation on collection, use, and retention of covered data would not only disadvantage third parties relative to other market participants, but also reduce the competitiveness of the U.S. overall. Some commenters also asserted that the proposed third party obligations, including the limit on collection, use, and retention of covered data, would put third parties at a significant competitive disadvantage to data providers that are unrestricted by the limitations. For example, some commenters stated that the proposed limitation on a third party's duration of authorization would disadvantage third parties engaged in payments relative to incumbents that do not rely on consumer-authorized data. Some third party commenters also stated that the proposal's allowance of tokenized account numbers would result in anticompetitive conduct by data providers.

Several commenters argued that the market for consumer-authorized data is already competitive and that a rulemaking to increase competition among data providers, intermediaries, and third parties, would be unnecessary or would yield few benefits. As evidence of the level of competition in the U.S., commenters noted that third parties access (or attempt to access) consumer-authorized data more frequently in the U.S. than in other countries; noted that the market is already moving toward the use of APIs and away from screen scraping; and asserted that the market for data provider products and services (including for credit card and deposit accounts) is robust and provides high levels of customer service. Some commenters representing community banks asserted that consumers are not demanding third party data access, but that community banks would provide it if consumers did demand it.

Some commenters, particularly community banks and credit unions stated that the proposal would not meet its objectives related to privacy and security for various reasons. Some commenters suggested this would be the case because of a lack of regular examinations of third parties. Others took issue more generally with the obligation to make data available to third parties, which they said would open the door to fraud and security breaches of personally identifiable data. Many data providers expressed concern that they would be obligated to ensure the data security of third parties.

Some data provider and third party commenters also raised concerns about the CFPB's legal authority for parts of the proposal. Some commenters also suggested that the CFPB consider consumer data sharing rules in other jurisdictions in drafting the final rule, but without clear consensus on what did or did not work in other jurisdictions.

Response to Comments

The CFPB agrees with the general comments about implementing CFPA section 1033 to ensure data providers not only provide data access to consumers directly but also provide access for consumers' authorized third party representatives. As discussed in part III and part IV.C.2, this aspect of the rule is consistent with the plain language and objectives of section 1033 and the CFPA more broadly. In addition, the CFPB agrees that this aspect of the rule will increase opportunities for both depository and nondepository institutions to provide better products or services to consumers and enable consumers to manage their financial lives using data under the control or possession of data providers.

The CFPB also agrees with commenters that supported the general approach to third party access. As discussed in part IV.D, the third party access provisions of the final rule are designed to ensure, consistent with carrying out the objectives of CFPA section 1033, that consumers provide informed consent to third parties that access covered data pursuant to the final rule's framework, that consumers retain control over third parties' access, and that third parties act on behalf of consumers when collecting, using, and retaining covered data.

With respect to comments opposing the proposal, including due to concerns about the impact on competition, the final rule carries out Congress' objectives in CFPA section 1033(a) and the mandate at CFPA section 1033(d) to prescribe standards to promote the development and use of standardized formats. As discussed further in part IV.D.1, Congress intended for consumers to be able to authorize third parties to access data under the statute on their behalf. Congress also directed the CFPB to prescribe standards to promote the development and use of standardized formats of information. The final rule carries out those objectives. For more discussion on the costs and benefits of the final rule, including impacts on competition, see parts VI and VII below.

The final rule will help ensure that markets for consumer financial products and services are competitive overall. Consumers will have even greater ability to take advantage of the many products or services already available, and data providers will have stronger incentives to enhance their products and services to retain their customers. The CFPB disagrees with arguments that consumers are not interested in third party data access, and notes that many consumers of institutions both large and small share data with third parties. But even where data providers already make data available voluntarily, the CFPB has determined the rulemaking is needed to address the challenges that have arisen in open banking, as discussed in the proposal. *See* 88 FR 74796, 74798–99 (Oct. 31, 2023).

As discussed further in part IV.A.3, the CFPB has determined it is appropriate to implement the product coverage of CFPA section 1033 in a staged manner. With respect to concerns about data provider incentives to block screen scraping, those incentives exist independent of the final rule. As safer forms of data access become functional, the CFPB expects that parties will move away from screen scraping. However, as discussed further in part IV.C.3, data providers must exercise caution when blocking screen scraping outside the rule's coverage.

With respect to the impact on the market for data aggregation, in the current market, and in the absence of implementing CFPA section 1033, open banking activity has already consolidated to data aggregators for the reasons discussed in the proposal. *See* 88 FR 74796, 74798–99 (Oct. 31, 2023). The impact of the rule on the value of intermediation arises from carrying out congressional intent to make consumer data more portable, including as a result of the interoperability objective inherent in CFPA section 1033(d)'s mandate to

promote standardized formats. Additionally, whether an authorized third party relies on an aggregator is a business decision of the authorized third party. The final rule will reduce costs for authorized third parties generally, including the cost of using an aggregator, and should make it easier to access data directly from data providers over time, due to various aspects of the final rule including the requirements related to standardized formats, the prohibition on fees, and the rule's recognition of industry standard-setting as an important aspect of an effective and efficient open banking system.

With respect to concerns about competitive disadvantages for smaller data providers, the CFPB is not finalizing the rule with respect to depository institutions under the coverage threshold at § 1033.111(d) and is providing smaller data providers that are covered additional time to comply, as discussed in part IV.A.5. The rule also presents opportunities for small data providers to better compete by offering products and services to a wider range of consumers. One commenter expressed concern that excluding smaller data providers would disadvantage small data providers relative to large data providers that continued to have the obligation, but for which they would not offer developer interfaces. The CFPB disagrees with this premise and notes that many large data providers are already offering developer interfaces and that small data providers can participate in open banking voluntarily.

Some commenters expressed concern that the rule would force small data providers to rely on standards developed by large data providers with more resources. During the SBREFA process, the CFPB received feedback that standardization can reduce costs for small entities, including data providers and third parties.[32] Consistent with the mandate in CFPA section 1033(d), the final rule includes various provisions to promote the development and use of standardized data formats. Further, consensus standards (discussed in part IV.A.6 below) that can serve as indicia of compliance with various rule provisions, must be issued by a recognized standard setter that demonstrates balance, as discussed further in the Industry Standard-Setting Final Rule.

With respect to commenters that expressed concerns about obligations for authorized third parties, including the limitation on third party collection, use, and retention of covered data, the CFPB notes that those provisions ensure that consumers provide express informed consent to third parties that access covered data, that consumers retain control over third parties' access, and that third parties act on behalf of consumers when accessing covered data. The CFPB's responses to commenter concerns related to the third party authorization procedures and obligations are discussed below in part IV.D. Further, and as discussed in part IV.D.4, the CFPB disagrees with commenters' assertions that the rule would competitively disadvantage third parties relative to data providers. Data providers and third parties may use data that result from direct consumer relationships without adhering to the third party authorization procedures and obligations, and the final rule also does not treat covered data providers differently than other third parties when they act as authorized third parties themselves. With respect to comments about the competitiveness of the U.S. generally, the purpose of this rule is to ensure that third parties are acting on behalf of consumers. With respect to comments about third party oversight and data security, see the discussion below in part IV.3, IV.5, IV.C.4–5, and IV.D.4.

2. Comments Regarding the Rulemaking Process

The CFPB issued the proposed rule on its website on October 19, 2023, and published it in the **Federal Register** on October 31, 2023, with comments due by December 29, 2023. Some commenters asserted that the CFPB's comment period should have been longer. One commenter disagreed and suggested that requests to extend the comment period were pretextual efforts to delay implementation.

The Administrative Procedure Act does not specify a particular period of time for a public comment period,[33] and the comment period in this rulemaking was sufficient. This is illustrated by, among other things, the many detailed comments the CFPB received from stakeholders of all types, sizes, and viewpoints. Additionally, as noted above in part II, the CFPB has engaged in extensive public outreach since 2016 related to consumer-authorized data sharing, including through an RFI, an ANPR, and the SBREFA process. The CFPB also has taken various steps in response to the specific concerns raised with respect to the substantive provisions of the proposal. In particular, as discussed in part IV.A.4, the CFPB has determined to not finalize the rule with respect to small depository institution data providers.

3. Comments Regarding Liability Among Commercial Entities

Comments Received

Many commenters addressed the general topic of liability. A number of data provider commenters, academic researchers, and research institute commenters predicted that the final rule would increase the volume of sensitive financial data accessed by third parties, particularly sensitive information to initiate a payment (under proposed § 1033.211(c)), which they viewed as increasing the risk of unauthorized transactions or other harms arising from the compromise of a data provider's or third party's information systems, such as the risk of inaccurate data transmission. A number of data provider commenters noted that consumers might seek to hold data providers responsible for damages, or that data providers would face increased costs related to reimbursing consumers for a third party having fraudulently induced the consumer's authorization to access covered data. These commenters expressed concern that this would subject data providers to losses arising from liability and other compliance obligations, such as costs due to Regulation E and Z error investigations, preventing monetary losses to accounts, seeking reimbursement from third parties, and safety and soundness standards. Commenters also noted other laws, including State laws, related to ''fraud,'' ''negligence,'' ''privacy,'' ''identity theft,'' and ''data security,'' but did not otherwise identify sources of liability. Several commenters also raised questions about the applicability of the FCRA, which are described separately below in part IV.4.

Many data provider commenters asserted that the proposal had not accounted for data providers' potential exposure to liability-related costs or ensured third parties had incentives to manage liability and otherwise demonstrate capacity to cover losses directly caused by third parties. Some of these commenters stated that the proposal had incorrectly assumed that liability could be allocated adequately through private agreements (including private payment network rules and bilateral contracts), the Electronic Fund Transfer Act (EFTA), 15 U.S.C. 1691 *et seq.,* the Truth in Lending Act (TILA), 15 U.S.C. 1601 *et seq.,* and their implementing regulations. Commenters generally suggested the CFPB address liability by mandating a comprehensive approach to assigning liability or safe

[32] *See, e.g.,* SBREFA Panel Report at 28, 44.

[33] *See* 5 U.S.C. 553(c).

harbors for data providers, clarifying the role of bilateral data access agreements to allocate liability, or take other steps to reduce harms that might create liability risk. By contrast, a trade association representing third parties and a data aggregator stated that the liability allocation under EFTA and TILA, combined with the third party data security and privacy obligations under the proposal, would be adequate to address liability concerns, although these commenters also expressed concern about relying on bilateral contracts to allocate liability. One commenter stated that liability should flow with the data, but that data providers and authorized third parties should be permitted to allocate liability amongst themselves by contract.

In particular, a data provider commenter expressed criticisms of private network rules, stating that they do not give data providers sufficient ability to recoup losses among multiple third parties, some of which might not be financially viable or be downstream of the authorized third party and outside of contractual privity; they do not provide for a clear liability framework or sufficient fraud or data security protections for higher-risk ''pay-by-bank'' transactions; and they do not fully address the costs of error investigations or other customer service particularly where consumers expect data providers to make them whole following a data breach.

With respect to bilateral contracts, several data provider and third party commenters stated that they are costly to negotiate and enforce (including against third parties that might not be financially viable), would result in uneven liability allocations across the market, and would generally protect the interests of the largest data providers. Several third party commenters also expressed concern that they might include unnecessary terms based on an overbroad interpretation of third party risk management obligations or be used to deny access pretextually.

Data provider commenters also asserted that third party compliance with GLBA Safeguards Framework, as contemplated under the proposal, would be insufficient to protect consumers or data providers from liability risk because third parties would lack incentives to manage their data security if they were not financially liable for their conduct, and because they are not subject to supervision. A consumer advocate commenter also stated that clear expectations for liability would provide third parties greater incentive to manage data security risks.

To address these concerns, a wide range of data provider commenters, a trade association representing third parties, an academic researcher, and a consumer advocate recommended that the regulatory text include a comprehensive liability-allocation provision for any losses arising from the third party's misuse of a consumer's payment credentials to conduct a fraudulent transaction, losses arising from the unauthorized access of payment credentials due to a data breach, or other losses arising from harms occurring from data in that party's possession. Several data provider commenters and academic researcher commenters noted that other open banking regimes around the world take a similar approach. One trade association noted that, while liability is traditionally determined based on which party has possession of the data, the rule does not indicate that this is the case. Other data provider commenters, including a number of credit union commenters, recommended that the final rule establish a ''safe harbor'' for data providers required to make data available under the final rule that protects the data provider from claims from consumers and third parties. Some commenters presented different versions of such an approach, such as by conditioning the absence of liability on whether the data provider had actual knowledge of the third party's data security risk, or the third party making representations about its data security practices, or on the third party's possession of a certification or credential.

While some data provider and third party commenters expressed concern with reliance on bilateral data access agreements to allocate liability, some of these data provider commenters stated that they could be used to address liability concerns. Several data provider commenters recommended that the final rule address liability by clarifying that data providers are not precluded from exercising discretion to comply with prudential safety and soundness obligations, including third party risk management expectations. Several of these commenters recommended that data providers be permitted to deny third parties, including data aggregators, access to a developer interface if they did not accept contractual terms related to liability, such as indemnification and insurance obligations. Several data provider commenters and related trade associations recommended that third parties be required to have or certify that they have adequate capital or insurance to cover losses. However, a data aggregator commenter stated that the rule should affirm the adequacy of the existing liability framework under EFTA and Regulation E and TILA and Regulation Z to help limit liability disputes during negotiations of bilateral data access agreements. Comments related to the role of such agreements in managing third party risk are discussed in greater detail in part IV.C.4 below.

Data provider commenters also recommended that the rule address liability by subjecting third parties to additional data security obligations, such as the FFIEC information security handbook appliable to depository institutions (discussed further below in part IV.D) or CFPB supervision. A research institute commenter also supported clarifying the CFPB's intent to supervise third parties as a way to reduce concerns related to liability.

A data provider commenter requested that the final rule clarify whether the data provider has any liability in the context of specific provisions of the proposal: (1) if a third party collects more information than is necessary to offer a specific product or service; and (2) if a data breach occurs because an authorized third party does not delete data after a consumer revokes its authorization or does not timely communicate the revocation to a data aggregator.

Response to Comments

The CFPB has determined it would not be appropriate for this rule to impose a comprehensive approach to assigning liability among commercial entities or safe harbors from the requirements of EFTA and Regulation E or TILA and Regulation Z. The ability of payees to initiate electronic payments has existed for decades and the Regulation E concerns raised by commenters are not specific to CFPA section 1033. Although this rule facilitates sharing of payment initiation information with third parties so that they can initiate electronic payments, the rule does not require account write access or otherwise require payment initiation. Applicable payment authorization requirements continue to separately apply. As noted in the proposal, consumers have a statutory right under EFTA to resolve errors through their financial institution, while private network rules, contracts, and other laws address which payment market participant is ultimately liable for unauthorized transfers and other payment errors. As discussed further below, the U.S. payment system allows non-bank payees to initiate payments through their depository institution, and those partner depository institutions

also bear responsibility for who is allowed to access the payment networks.

The CFPB is aware that it is common for non-bank payees, such as utility companies, charities, non-bank lenders, community organizations, and other billers, to initiate payments through their depository institution. The payee's depository institution, referred to as an originating depository financial institution in the context of ACH payments, is responsible for ensuring that any payments it initiates on the payee's behalf are correct and authorized, as they are subject to private network rules and safety and soundness requirements related to risk management.[34] Data providers that are Regulation E financial institutions will continue to have error resolution obligations for transfers initiated using payment information shared under this rule, just as they do today when a consumer shares information with a payee or a consumer's payment credentials are compromised, and can seek reimbursement from an originating depository financial institution according to private network rules, contracts, and commercial law. For example, although a consumer's financial institution is required to reimburse the consumer for an unauthorized transfer under Regulation E, ACH private network rules generally dictate that the receiving depository financial institution is entitled to reimbursement from the originating depository financial institution that initiated the unauthorized payment. Similarly, data providers that are Regulation Z credit card issuers will continue to have error resolution obligations under TILA. Commenters did not identify a plausible method through which the proposal would increase the risk of credit card fraud. The final rule does not require data providers to make available credit card payment information. For both Regulation E accounts and Regulation Z credit cards, because the final rule only requires data providers to share information and does not require that they allow third parties to initiate payments using that information, any costs arising from error investigations and the recoupment of losses by data providers are a function of how private network rules operate. The final rule does not impinge on such private arrangements.

Commenters suggested that consumer-authorized data sharing may create risks to consumers and financial costs to financial institutions arising from an increased risk of unauthorized transactions and other errors, especially when data access relies on screen scraping. In implementing CFPA section 1033, the CFPB is finalizing a variety of measures to mitigate unauthorized transfer and privacy risks to data providers and consumers, including allowing data providers to share TANs; not allowing data providers to rely on credential-based screen scraping to satisfy their obligations under CFPA section 1033; clarifying that data providers can engage in reasonable risk management activities; implementing authorization procedures for third parties that would require they commit to data access, use, and retention limitations; implementing policies and procedures regarding data accuracy; and requiring compliance with the GLBA Safeguards Framework. These provisions are intended to drive market adoption of safer data sharing practices. With respect to commenters' suggestions to reduce costs associated with liability through data access agreements or other conditions for third parties attempting to access consumer data, see parts IV.C.4 and IV.D.4. With respect to the suggestion that authorized third parties certify to consumers as to capital adequacy or insurance, see part IV.D.1 for discussion of comments.

Finally, the CFPB does not believe it would be appropriate to attempt to establish a comprehensive approach to addressing liability (including through safe harbors) for laws it does not administer, such as State laws dealing with data security, privacy, identity theft, negligence, and fraud. The extent of data providers' liability for failure to comply with their obligations under this final rule is provided for under the CFPA.

The CFPB also notes that commenters did not provide legal analysis or factual evidence about the likelihood that data providers would actually incur legal liability under these laws when consumers request, or Federal law requires, they make data available to a third party that subsequently misuses or mishandles the data. While some commenters stated that consumers would be likely to seek to recoup from the data provider losses arising from third party conduct, it is not clear to what extent that is likely to occur when losses arise from a third party to which the consumer requested the data provider make information available. To the contrary, a trade association commenter indicated that liability typically resides with the party that experiences a data breach. Nor did commenters provide evidence of the extent to which data providers actually defend against claims of such liability, despite data providers' long-standing practice of consumer-authorized third party data sharing. To the extent there are complex factual or legal questions about a data provider's liability for directly contributing to consumer harm, commenters did not identify particular scenarios, and the CFPB does not believe it would be appropriate to make statements about a data provider's liability in this final rule. As an additional and independent reason, commenters did not identify the legal authority the CFPB could rely on to modify laws it does not administer.

4. Comments Regarding Potential Overlaps With Other Consumer Financial Laws and CFPB Rulemaking Activity

Electronic Fund Transfer Act and Regulation E

Comments

In addition to the liability comments discussed above, some data provider commenters specifically commented on the applicability of EFTA and Regulation E. Some data provider commenters asked the CFPB to apply Regulation E error investigation requirements to all third parties. A few data provider commenters stated that the CFPB should clarify that data aggregators are Regulation E service providers, asserting that the data aggregator is in the best position to control for risks related to the transactions it permits a consumer to conduct through its system. A trade association representing data providers asked the CFPB to clarify that a data access agreement between an aggregator and data provider is an ''agreement'' for purposes of the Regulation E service

[34] *See, e.g.,* OCC Bulletin 2006–39, *Automated Clearing House Activities: Risk Management Guidance* (Sept. 1, 2006), *https://www.occ.gov/news-issuances/bulletins/2006/bulletin-2006-39.html;* NACHA Operating Rules Section 2.2: Warranties and Liabilities of Originating Depository Financial Institutions; NACHA Operating Rules Subsection 2.2.3 Liability for Breach of Warranty (''Each ODFI breaching any of the preceding warranties shall indemnify each RDFI, ACH Operator, and Association from and against any and all claim, demand, loss, liability, or expense, including attorney's fees and costs, that result directly or indirectly from the breach of warranty or the debiting or crediting of the entry to the Receiver's account. This indemnity includes, without limitation, any claim, demand, loss, liability, or expense based on the ground that the debiting of an entry to an account resulted, either directly or indirectly, in the return of one or more items or entries of the Receiver due to insufficient funds. This indemnity also includes, in the case of a Consumer Account, without limitation, any claim, demand, loss, liability, or expense based on the ground that the failure of the ODFI to comply with any provision of these rules resulted, either directly or indirectly, in the violation by an RDFI of the Federal Electronic Fund Transfer Act or Federal Reserve Board Regulation E.'').

provider provision. A data provider commenter asked the CFPB to clarify that, if a third party is a Regulation E financial institution, such as a digital wallet provider that obtains permissioned data access under CFPA section 1033, it would have error resolution responsibilities for payments initiated using data obtained from the developer interface and that such digital wallet providers should be required to provide their contact information to consumers.

Response to Comments

The CFPB has determined that it is not appropriate or practical to deny consumers their statutory right to resolve errors through their financial institution and this final rule does not change such rights under EFTA and Regulation E. The Regulation E definition of financial institution means a bank, savings association, credit union, or any other person that directly or indirectly holds an account belonging to a consumer, or that issues an access device and agrees with a consumer to provide electronic fund transfer services.[35] The CFPB declines to expand the scope of the Regulation E service provider provision to data aggregators, because doing so would limit consumers' ability to resolve errors and unauthorized transactions through their account-holding financial institution. Whether a given entity is a service provider for a given electronic fund transfer will depend on the relationship between the entities involved in making that individual transfer, not whether the payee used payment credentials shared under this final rule to initiate the payment. Negating a consumer's statutory right to go to their financial institution to resolve errors also would result in an illogical and harmful error resolution regime. From the consumer's perspective, they may not know whether an error is related to data that was shared under CFPA section 1033. The CFPB is aware that some financial institutions attempted to have consumers enter into agreements to waive EFTA rights in situations where they shared account credentials or other information with a third party, even though such agreements violated the EFTA anti-waiver provision in 15 U.S.C. 1693l.[36] It was unclear at the time how exactly the depository institutions intended to enforce this waiver language. One concern was that it would be used to deny all Regulation E error resolutions rights to consumers who had shared any information with a data aggregator, even if the financial institution did not know whether the error was related to that shared information. It also would be burdensome and likely infeasible for the consumer to sort out when they should go to their financial institution for help versus a third party versus another entity for a transaction that they do not recognize.

Data providers and third parties that are Regulation E financial institutions—including digital wallet providers, person-to-person payment providers, entities that refer to themselves as neobanks, and traditional depository institutions—have and will continue to have error resolution obligations in the event of a data breach where stolen account or ACH credentials are used to initiate an unauthorized transfer from a consumer's account and the consumer provides proper notice. These error resolution obligations include requirements on the financial institution to provide consumers with the financial institution's contact information.

Fair Credit Reporting Act and Regulation V

The proposal noted that a third party engaged in data aggregation activities could be a consumer reporting agency under the FCRA if it met the elements of the FCRA's definition of ''consumer reporting agency.''

Comments

Some commenters addressed the applicability of the FCRA. Many data providers and data provider trade association commenters stated that the final rule should provide that data providers are not furnishers when they provide data pursuant to consumer authorization. These commenters asserted that the compliance burden of being a furnisher is significant and could overwhelm smaller financial institutions. They also argued that, unlike traditional furnishing, data providers sharing data under CFPA section 1033 are simply facilitating consumers' requests to access their data.

Other commenters, primarily data aggregators, stated that data aggregators should not be considered consumer reporting agencies when they transfer data pursuant to consumer authorization. These commenters argued that consumer-authorized data sharing is different from the provision of consumer reports because consumers have control over the sharing of their data, because data aggregators act as mere conduits for transmission of the data, and because consumers have direct relationships with data aggregators. One data aggregator commenter predicted that if data aggregators could be consumer reporting agencies, then data providers that are FCRA-covered furnishers would deny access unless the aggregators agreed to data access agreements with terms related to indemnification for FCRA liability. A third party trade association commenter contended that data providers that are FCRA-covered furnishers could deny access to data aggregators in the absence of a data access agreement. Other commenters stated that treating data aggregators as consumer reporting agencies would result in unintended consequences. For example, a third party trade association commenter asserted that compliance with the FCRA could require data aggregators to access and retain more data than they do currently. And a data aggregator commenter stated that consumers might be confused if they attempt to correct the accuracy of any information transferred by a data aggregator, because data aggregators do not hold the underlying data; therefore, the data held by the data aggregator may differ from the versions held by the data provider and other third parties.

Some commenters requested that the final rule exclude FCRA-covered entities and data from the rule's coverage. Several consumer reporting agency commenters and a consumer reporting agency trade association commenter asserted that consumer reporting agencies should be excluded from coverage because they are already subject to extensive regulation under the FCRA. A data aggregator commenter suggested that the CFPB rely on existing authorities and not impose new regulations on the collection, use, and retention of covered data where such collection, use, and retention may be addressed by other laws, such as the FCRA. And a consumer reporting agency commenter stated that consumer reports should be excluded from the definition of ''covered data'' because otherwise the limited purposes that authorize consumer reporting agencies to share consumer reports might conflict with the purposes for which consumers might authorize sharing of their covered data. The consumer reporting agency trade association commenter stated that the proposed limitations on use and retention of covered data might complicate FCRA compliance by entities offering products that rely on indefinite consumer authorization, including products that allow

[35] 12 CFR 1005.2(i).

[36] *See* Consumer Fin. Prot. Bureau, *Regulation E FAQs, Error Resolution: Unauthorized EFTs #8, https://www.consumerfinance.gov/compliance/compliance-resources/deposit-accounts-resources/electronic-fund-transfers/electronic-fund-transfers-faqs/* (last updated June 4, 2021).

consumers to self-report rental and utility payment information to their credit file to enhance their credit histories. Data aggregator commenters and a third party trade association commenter claimed that the FCRA's framework is complex and confusing when applied in the context of consumer-authorized data access. And a data aggregator commenter asserted that the proposed rule's consumer protections would be more appropriate for consumer-authorized data access than FCRA requirements.

Several commenters raised questions about the intersection of the final rule and the FCRA, including the extent of overlap, duplication, or conflict between the final rule and the FCRA. These commenters asked for clarification on various specific questions, including: which activities would make a data provider an FCRA-covered furnisher; which use limitation standard applies if consumer-authorized data are subject to both the final rule and the FCRA; which activities would make a data aggregator a consumer reporting agency; whether data aggregators that are consumer reporting agencies would have to provide consumer reports to consumers at their request; how data aggregators that are consumer reporting agencies would comply with their FCRA dispute obligations if data providers are not FCRA-covered furnishers; how data aggregators that are consumer reporting agencies could maintain accurate consumer reports given the proposed limits on retention; which uses of covered data constitute permissible purposes under the FCRA; whether third parties can be both data aggregators under the final rule and consumer reporting agencies under the FCRA; whether financial institutions may combine disclosures and consent forms required by the final rule and the FCRA; whether specialty consumer reporting agencies may collect and retain consumer-authorized transaction data to comply with the FCRA; and whether information from de-identified consumer reports used for research purposes could also be covered data subject to the proposed restrictions on secondary use.

Finally, some commenters stated that the CFPB should coordinate the FCRA and Personal Financial Data Rights rulemakings.[37] A bank trade association and credit union trade association stated that until one of these rules had been finalized, they could not fully understand the impacts of one rule on the other. A data provider/third party trade association commenter suggested pausing the FCRA rulemaking until the Personal Financial Data Rights rulemaking is finalized to fully understand each rule's impact. A consumer reporting agency commenter, an industry trade association commenter, and a financial holding company commenter requested that the Personal Financial Data Rights final rule be issued before the FCRA proposed rule. The industry trade association commenter and financial holding company commenter asserted that concurrent rulemaking adversely impacts the public's ability to meaningfully comment on each proposal. A bank trade association commenter recommended postponing compliance with this final rule until after an FCRA rule is finalized, while a data aggregator commenter asked the CFPB to wait until after this rule is finalized to address the applicability of the FCRA to data aggregators. And a research institute commenter suggested that certain definitions, such as those relating to data aggregators and FCRA-covered furnishers, be harmonized between the final rule and the FCRA rulemaking.

Response to Comments

As an initial matter, the CFPB has determined that this final rule does not affect a person's obligations or duties under the FCRA. The final rule does not alter the types of data, parties, or permissible purposes covered by the FCRA. Because the final rule does not change substantive requirements under the FCRA or Regulation V, the commenters that raised questions about the intersection of the FCRA with CFPA section 1033 and how to comply with FCRA obligations and duties must look to the FCRA and Regulation V to determine how to comply with a particular FCRA requirement. For example, whether a third party, such as a data aggregator, is a consumer reporting agency under the FCRA depends on whether the third party falls within the definition of ''consumer reporting agency'' in the FCRA.[38] Similarly, whether a certain use of covered data constitutes a permissible purpose is determined by looking to the FCRA.[39] This is true with respect to any question about what a person subject to this final rule must do to comply with the FCRA and Regulation V.

The CFPB also has determined that the requirements of this final rule are not inconsistent with the FCRA or Regulation V. Some commenters noted that certain uses of data might be permitted by the FCRA but not authorized by the Personal Financial Data Rights rule as proposed. Compliance with this final rule does not, however, require a person to violate the FCRA or Regulation V. Therefore, a person that is subject to this final rule and the FCRA/Regulation V must comply with both. This is no different than for any person who is subject to several overlapping laws and regulations. For example, a third party may have to contemporaneously provide disclosures relating to Regulation E accounts, Regulation Z credit cards, and the GLBA and Regulation P. When applicable, a third party subject to all these laws must satisfy their respective requirements. Complying with CFPA section 1033 and the final rule is no different. Thus, it is unnecessary to exclude certain parties, such as consumer reporting agencies, or FCRA-covered uses from the rule's coverage.
