FEDERAL REGISTER

Vol. 89 Wednesday,

No. 229 November 27, 2024

Pages 93461–94594

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 89 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Title 3—

The President

Proclamation 10862 of November 19, 2024

National Child's Day, 2024

By the President of the United States of America

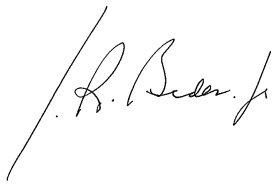
A Proclamation

This generation's young people are some of the most gifted, educated, and talented our Nation has ever known. They are the kite strings that keep our national ambitions aloft. On National Child's Day, we recommit to building a future worthy of their highest aspirations.

So many of our Nation's children begin building their futures at our public schools—that is why I am proud that my Administration secured a historic $130 billion in funding for our Nation's K–12 schools through my American Rescue Plan. That law put more teachers in classrooms and more counselors, social workers, and other support staff in our schools. It also invested in high-quality tutoring and made historic expansions in summer and after-school programs. My Bipartisan Infrastructure Law is expanding access to high-speed internet so students can access it regardless of their zip code. And my Administration has worked to advance a pathway to provide free, healthy school meals for all children as a part of our national strategy to end hunger and reduce diet-related diseases in America by 2030.

My Administration has also worked hard to give families some well-deserved breathing room so that they can care for their children without worrying about how they are going to pay the bills. My American Rescue Plan expanded the Child Tax Credit, which helped reduce child poverty by nearly half across the Nation. That law also made our Nation's biggest investment in child care ever, helping hundreds of thousands of child care providers keep their doors open and continue providing care. I signed the Inflation Reduction Act, saving millions of families $800 per year on their health insurance premiums. My Administration also raised pay for early childhood educators across the country participating in the Head Start program. And my Administration modernized the Thrifty Food Plan for the first time in nearly five decades so that millions more families receiving Supplemental Nutrition Assistance Program benefits can afford nutritious foods.

Securing the health and safety of children has always been a priority for my Administration. I signed the most significant gun safety law in nearly 30 years, working towards a future where no student or child has to live in fear of gun violence. That law also made the largest investment in youth mental health ever to help schools across the country train and hire new mental health counselors. At the same time, we made it easier for schools to leverage Medicaid to deliver health care. And we are working to support LGBTQI+ children and families by protecting their access to health care and preventing harmful practices, including the use of so-called conversion therapy.



My Administration has also been dedicated to addressing the existential threat of climate change—a critical task to secure our children's futures. My Inflation Reduction Act made the most significant investment in climate ever, which includes funding to get communities cleaner air and drinking water, and protect them from the harmful effects of pollution. My Bipartisan Infrastructure Law is working to replace every lead pipe in America, so that every family can turn on the faucet and drink clean, safe water. And my Administration has conserved more than 45 million acres of our Nation's

lands and waters in an effort to ensure they can be enjoyed for generations to come.

On National Child's Day, we recommit to ensuring that every child in America has the opportunity to pursue the limits of their talents and ambitions, and we uplift them as the leaders and doers of the future.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim November 20, 2024, as National Child's Day. I call upon all government officials, educators, volunteers, and all the people of the United States of America to observe this day with appropriate programs, ceremonies, and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this nineteenth day of November, in the year of our Lord two thousand twenty-four, and of the Independence of the United States of America the two hundred and forty-ninth.

Rules and Regulations

Federal Register
Vol. 89, No. 229
Wednesday, November 27, 2024

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Parts 407 and 457

RIN 0563–AC86

[Docket ID FCIC–24–0005]

Flax Revenue and Expanded Unit Options for Crop Insurance

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule with request for comments.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) is amending its regulations to allow revenue coverage for flax under the Small Grain Crop Insurance Provisions, to combine written agreement deadlines in the Dry Bean Crop Insurance Provisions to match other insurance policies, to expand the availability of enterprise and optional units for some specialty and perennial crops, and to make clarifications and corrections to the Area Risk Protection Insurance, Basic Provisions; Common Crop Insurance Policy, Basic Provisions; and several Crop Provisions. The changes will be effective for the 2025 and succeeding crop years for crops with a contract change date on or after November 30, 2024. For all other crops, the changes to the policies made in this rule are applicable for the 2026 and succeeding crop years.

DATES: *Effective date:* This final rule is effective November 30, 2024.

Comment Date: We will consider comments that we receive by the close of business January 27, 2025. FCIC may consider the comments received and may conduct additional rulemaking based on the comments.

ADDRESSES: We invite you to submit comments on this rule. You may submit comments by going through the Federal eRulemaking Portal as follows:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov* and search for Docket ID FCIC–24–0005. Follow the instructions for submitting comments.

All comments will be posted without change and will be publicly available on *www.regulations.gov*.

SUPPLEMENTARY INFORMATION:

Background

FCIC serves America's agricultural producers through effective, market-based risk management tools to strengthen the economic stability of agricultural producers and rural communities. FCIC is committed to increasing the availability and effectiveness of Federal crop insurance as a risk management tool. Approved Insurance Providers (AIPs) sell and service Federal crop insurance policies in every state through a public-private partnership. FCIC reinsures the AIPs who share the risks associated with catastrophic losses due to major weather events. FCIC's vision is to secure the future of agriculture by providing world class risk management tools to rural America.

Federal crop insurance policies typically consist of the Basic Provisions, the Crop Provisions, the Special Provisions, the Commodity Exchange Price Provisions, if applicable, other applicable endorsements or options, the actuarial documents for the insured agricultural commodity, the Catastrophic Risk Protection Endorsement, if applicable, and the applicable regulations published in 7 CFR chapter IV. Throughout this rule, the terms ''Crop Provisions,'' ''Special Provisions,'' and ''policy'' are used as defined in the Common Crop Insurance Policy (CCIP) Basic Provisions in 7 CFR 457.8. Additional information and definitions related to Federal crop insurance policies are in 7 CFR 457.8.

FCIC is amending the following regulations:

- Area Risk Protection Insurance Basic Provisions (7 CFR part 407);
- Common Crop Insurance Policy Basic Provisions (7 CFR 457.8);
- Small grain crop insurance provisions (7 CFR 457.101);
- Prune crop insurance provisions (7 CFR 457.133);
- Green pea crop insurance provisions (7 CFR 457.137);
- Northern potato crop insurance provisions (7 CFR 457.142);
- Central and Southern potato crop insurance provisions (7 CFR 457.147);
- Dry bean crop insurance provisions (7 CFR 457.150);
- Processing sweet corn crop insurance provisions (7 CFR 457.154); and
- Blueberry crop insurance provisions (7 CFR 457.166).

The changes to the crop insurance policies resulting from the amendments in this rule are applicable for the 2025 and succeeding crop years for crops with a contract change date on or after November 30, 2024. For all other crops, the changes to the crop insurance policies resulting from the amendments in this rule are applicable for the 2026 and succeeding crop years.

Flax Revenue Coverage

The Small Grain Crop Provisions previously offered actual production history (APH) coverage to buckwheat and flax; and offered yield protection (YP), revenue protection (RP), and revenue protection with harvest price exclusion (RP–HPE) to barley, oats, rye, and wheat. In this Final Rule, FCIC is expanding revenue protection (RP and RP–HPE) to flax, matching available coverage for barley, oats, rye, and wheat.

The current APH coverage for flax is now converted to YP. For producers who wish to maintain yield coverage, the only difference in coverage is the price guarantee matches the projected price offered for revenue protection (established approximately two weeks prior to the sales closing date), instead of a price election established by the Risk Management Agency (RMA) (established prior to the contract change date).

With the availability of revenue protection for flax, the terms ''price election'' and ''production guarantee'' are no longer applicable. Instead, the terms ''projected price,'' ''yield protection guarantee,'' and ''revenue protection guarantee'' are applicable. These changes appear in the following sections of the Small Grain Crop Provisions: 3(a) and (b), 9(c), and 11(b) and (c).

FCIC is revising section 3(a) to remove the references to flax. This provision previously stated that revenue protection is not available for flax or buckwheat. FCIC is removing flax from the list of crops because revenue coverage is now available for flax. FCIC is also revising section 3(b) to add references to flax. These provisions previously stated that revenue protection is available for barley, oats, rye, and wheat. FCIC is adding flax to the list of crops in the two places where the list occurs.

FCIC is revising section 9(c)(2)(i) to remove the reference to flax and revise section 9(c)(2)(ii) to add a reference to flax. When a crop does not have yield or revenue protection available, the price used for determining coverage and any indemnity payments, including replanting payments, is called the price election. For crops for which yield and revenue protection are available, this price is called the projected price. In section 9(c)(2)(i), the provision previously stated that the replanting payment for flax will be determined by using the price election. Under this rule, revenue and yield protection plans of insurance are now available for flax; therefore, the price used is the projected price. FCIC is revising section 9(c)(2)(i) to remove the reference to flax. Section 9(c)(2)(ii) contains provisions applicable to the projected price. FCIC is revising section 9(c)(2)(ii) to include flax, as the projected price will now be used.

For crops for which yield and revenue protection are available, the applicable terms for insurance coverage are yield protection guarantee and revenue protection guarantee. For crops for which yield and revenue protection are not available, the applicable term is production guarantee. FCIC is revising sections 11(b)(1)(i), (ii), and (iii). These sections refer to ''yield protection guarantee,'' ''production guarantee,'' and ''revenue protection guarantee,'' respectively. The references to flax in section 11(b)(1)(ii), which addresses production guarantee, were removed and added to sections 11(b)(1)(i) and (iii), which address yield protection guarantee and revenue protection guarantee.

FCIC is also revising section 11(b)(3)(i) to add a reference to flax and revising section 11(b)(3)(ii) to remove the reference to flax. This change is consistent with the change in section 9(c)(2). Section 11(b)(3)(i) refers to computations using the projected price; section 11(b)(3)(ii) refers to computations using the price election. Flax was removed from section 11(b)(3)(ii) and added to section 11(b)(3)(i) to align with the proper terms for crops for which revenue protection is available.

Section 11(c)(1)(i) explains what is included in appraised production. Previously, flax was contained in a list of crops with buckwheat. Those two crops had similar coverage and used the same crop insurance terminology under the Small Grain Crop Provisions when revenue coverage was not yet available for flax. Now, flax has been removed from the list of crops containing buckwheat and added to the list of crops containing barley, oats, rye, and wheat in two places because allowing revenue coverage for flax makes coverage and crop insurance terminology for that crop consistent with coverage and terminology for barley, oats, rye, and wheat.

Dry Bean Written Agreement Deadlines

FCIC is combining written agreement deadlines to reduce confusion and administrative complexity when a producer requests a written agreement based on multiple criteria. Previously, the written agreement deadline to add an insurable practice or type was the acreage reporting date for new requests and the sales closing date for renewal requests; however, the deadline to add an insurable dry bean type that is not on the actuarial documents was the sales closing date. This created extra paperwork and confusion in instances where a producer wanted to insure a new dry bean type and under a practice that is not currently available in the county. FCIC is combining the deadline for all written agreements to match all other insurance policies with this type of request, so that for the first year of coverage, the deadline is the acreage reporting date and for subsequent years of coverage, the deadline is the sales closing date.

Enterprise and Optional Units

The CCIP Basic Provisions allow enterprise units (EU) by organic farming practice, beginning with the June 30, 2024, contract change date. Unlike major row crops, optional units (OUs) by organic farming practice were not available for most specialty and perennial crops due to language in the Crop Provisions (CP) that superseded the standard OU definition in the CCIP Basic Provisions. In this rule, FCIC is removing limitations on OUs by organic farming practice and making clarifications and edits for consistency with the EU and OU choices provisions in the CCIP Basic Provisions in the following Crop Provisions:

- Green pea crop insurance provisions (7 CFR 457.137); and
- Processing sweet corn crop insurance provisions (7 CFR 457.154).

These changes are responsive to organic growers and the Climate Smart Initiative.

Clarifications and Corrections

FCIC is making the following corrections and clarifications in the Small Grain Crop Provisions (7 CFR 457.101):

- Updating the effective crop year of the Crop Provisions;
- Removing the hyphen in the phrase ''initially-planted'' in section 2(b) for consistency with the defined phrase in the Crop Provisions;
- Making plain language clarifications in sections 5, 6, and 7;
- Combining the two introductory paragraphs in section 8 into one introductory paragraph;
- Replacing the word ''and'' with ''or'' in sections 11(d)(2)(i)(A) and 11(d)(2)(ii). Section 11(d) contains six subparagraphs for deficiencies in quality for the small grain crop. The list of deficiencies in quality varies by crop. In four of the six subparagraphs, the last item in the list is preceded by ''or,'' while in the other two paragraphs, the last item is preceded by ''and.'' FCIC is changing the word ''and'' to ''or'' for consistency among subparagraphs; and
- Replacing the word ''flaxseed'' with ''flax'' in section 11(d)(2)(E). This is the only instance of ''flaxseed,'' whereas ''flax'' is used elsewhere.

FCIC is making the following clarifications and corrections in the Green pea crop insurance provision (7 CFR 457.137):

- Updating the effective crop year of the Crop Provisions;
- Removing the paragraph immediately preceding section 1, which refers to the order of priority if a conflict exists among the policy provisions. This same provision is contained in the Basic Provisions. Therefore, the appearance here is duplicative and should be removed. FCIC is clarifying which Basic Provisions apply by replacing the aforementioned paragraph with an introductory sentence preceding the Crop Provisions;
- Removing all instances of the phrase ''the provisions of,'' ''the provisions contained in,'' and ''contained'' where a policy reference follows;
- Revising the definition of ''good farming practices'' to clarify that the definition in the Crop Provisions expands upon the definition contained in the Basic Provisions because good farming practices include the cultural practices required by the processor contract;

• Revising the definition of ''practical to replant'' to clarify that the definition in the Crop Provisions does not replace, but rather expands upon the definition in the Basic Provisions, and remove duplicative criteria that are already included in the definition in the Basic Provisions;

• Revising the definition of ''processor contract'' to replace the phrase ''a written agreement'' with the phrase ''a written contract.'' The phrase ''written agreement'' is a specifically defined term in the Basic Provisions and is not applicable to a processor contract for green peas. This change is necessary to minimize confusion between a written contract and a written agreement, which is a document that alters designated terms of a policy as authorized under these Basic Provisions, the Crop Provisions, or the Special Provisions for the insured crop;

• Removing the phrase ''for determining indemnities'' from the section heading for section 3. The section heading will now read ''Insurance Guarantees, Coverage, Levels, and Prices.'' The new section heading is more accurate because insurance guarantees, coverage levels, and prices are not exclusively used for determining indemnities. This change is also for consistency with section headings of the same name in other Crop Provisions;

• Replacing the reference to Special Provisions with actuarial documents in section 3(a), since the price election information referred to in this section is displayed in the actuarial documents;

• Replacing abbreviated months (''Feb'' and ''Mar'') with the full spelling for the months (''February'' and ''March'') in the cancellation and termination date table, in section 5;

• Adding a hyphen to the adjective compound ''15-day'' as it describes a ''15-day period'' in section 11(c); and

• Updating prices in the settlement of claim examples to be more reflective of current crop prices and potential indemnities, in section 12.

FCIC is making the following clarifications and corrections in the Processing sweet corn crop insurance provisions (7 CFR 457.154):

• Updating the effective crop year of the Crop Provisions;

• Clarifying which Basic Provisions apply by adding an introductory sentence preceding the Crop Provisions; and

• Adding a hyphen to the adjective compound ''15-day'' as it describes a ''15-day period'' in section 11(c).

In addition, the Common Crop Insurance Regulations in 7 CFR part 457 were revised by a final rule with request for comments published in the **Federal Register** on June 27, 2024 (89 FR 53822–53847). Changes were made in that rule to the Area Risk Protection Insurance Basic Provisions (7 CFR part 407), Common Crop Insurance Policy (Common Crop Insurance Policy (CCIP) Basic Provisions (7 CFR 457.8), the General Administrative Regulations in subpart J of part 400 (7 CFR 400.98), and 18 Crop Provisions. In reviewing the changes made, FCIC found some incorrect references, missing words, missing parentheses, incorrect paragraph designations, and an extra word. This rule will also make these corrections in the following provisions:

• Area Risk Protection Insurance Basic Provisions (7 CFR part 407);

• Common Crop Insurance Policy Basic Provisions (7 CFR 457.8);

• Prune crop insurance provisions (7 CFR 457.133);

• Northern potato crop insurance provisions (7 CFR 457.142);

• Central and Southern potato crop insurance provisions (7 CFR 457.147); and

• Blueberry crop insurance provisions (7 CFR 457.166).

Effective Date, Notice and Comment, and Exemptions

The Administrative Procedure Act (APA, 5 U.S.C. 553) provides that the notice and comment and 30-day delay in the effective date provisions do not apply when the rule involves specified actions, including matters relating to contracts. This rule governs contracts for crop insurance policies and therefore falls within that exemption.

This rule is exempt from the regulatory analysis requirements of the Regulatory Flexibility Act (5 U.S.C. 601–612), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996.

Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996, (also known as the Congressional Review Act) requires a delay of the effective date of 60 days after publication to allow for Congressional review. The Office of Information and Regulatory Affairs has determined that this rule does not meet the criteria in 5 U.S.C. 804(2). Therefore, this final rule is effective on November 30, 2024. Although not required by APA or any other law, FCIC has chosen to request comments on this rule.

Executive Orders 12866, 13563, and 14094

Executive Order 12866, ''Regulatory Planning and Review,'' was amended by and Executive Order 13563, ''Improving Regulation and Regulatory Review,'' and Executive Order 14094, ''Modernizing Regulatory Review.'' Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasized the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. The requirements in Executive Orders 12866 and 13563 for the analysis of costs and benefits apply to rules that are determined to be significant.

The Office of Management and Budget (OMB) has designated this rule as not significant under Executive Order 12866, ''Regulatory Planning and Review,'' and therefore, OMB has not reviewed this rule and analysis of the costs and benefits is not required under either Executive Order 12866 or 13563.

Clarity of the Regulation

Executive Order 12866, as supplemented by Executive Order 13563, requires each agency to write all rules in plain language. Executive Order 14094 requires Federal agencies to increase and improve public participation in the regulatory process. The Executive order's objective is to improve public trust in the regulatory process by reducing the risk or appearance of unequal or unfair influence in regulatory development. Under Executive Order 14904, agencies must, to the extent they can under law, seek out, assist with, and include your input in the regulatory process. We welcome comments from public (State, local, Tribal, and territorial) and private sector regulated entities; members of underserved communities; consumers; workers and labor organizations; businesses; and program beneficiaries, among others. In addition to your substantive comments on this rule, we invite your comments on how to make the rule easier to understand. For example:

• Are the requirements in the rule clearly stated? Are the scope and intent of the rule clear?

• Does the rule contain technical language or jargon that is not clear?

• Is the material logically organized?

• Would changing the grouping or order of sections or adding headings make the rule easier to understand?

• Could we improve clarity by adding tables, lists, or diagrams?

• Would more, but shorter, sections be better? Are there specific sections that are too long or confusing?

• What else could we do to make the rule easier to understand?

Environmental Review

The environmental impacts of this final rule have been considered in a manner consistent with the provisions of the National Environmental Policy Act (NEPA, 42 U.S.C. 4321–4347), the regulations of the Council on Environmental Quality (40 CFR parts 1500–1508), and because USDA will be making the payments to producers, the USDA regulation for compliance with NEPA (7 CFR part 1b). As specified in 7 CFR 1b.4(b)(4), FCIC is categorically excluded from the preparation of an Environmental Analysis or Environmental Impact Statement unless the FCIC Manager (agency head) determines that an action may have a significant environmental effect. The FCIC Manager has determined this rule will not have a significant environmental effect. Therefore, FCIC will not prepare an environmental assessment or environmental impact statement for this action and this rule serves as documentation of the programmatic environmental compliance decision.

Executive Order 12988

This rule has been reviewed under Executive Order 12988, ''Civil Justice Reform.'' This rule will not preempt State or local laws, regulations, or policies unless they represent an irreconcilable conflict with this rule. Before any judicial actions may be brought regarding the provisions of this rule, the administrative appeal provisions of 7 CFR part 11 are to be exhausted. For good farming practice determinations, the administrative appeal provisions under 7 CFR part 11 do not apply.

Executive Order 13175

This rule has been reviewed in accordance with the requirements of Executive Order 13175, ''Consultation and Coordination with Indian Tribal Governments.'' Executive Order 13175 requires Federal agencies to consult and coordinate with Tribes on a government-to-government basis on policies that have Tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

RMA has assessed the impact of this rule on Indian Tribes and determined that this rule does not, to our knowledge, have Tribal implications that require Tribal consultation under E.O. 13175. The regulation changes do not have Tribal implications that preempt Tribal law and are not expected have a substantial direct effect on one or more Indian Tribes. If a Tribe requests consultation, RMA will work with the USDA Office of Tribal Relations to ensure meaningful consultation is provided where changes, additions and modifications identified in this rule are not expressly mandated by Congress.

The Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA, Pub. L. 104–4) requires Federal agencies to assess the effects of their regulatory actions of State, local, and Tribal governments or the private sector. Agencies generally must prepare a written statement, including cost benefits analysis, for proposed and final rules with Federal mandates that may result in expenditures of $100 million or more in any 1 year for State, local or Tribal governments, in the aggregate, or to the private sector. UMRA generally requires agencies to consider alternatives and adopt the more cost effective or least burdensome alternative that achieves the objectives of the rule. This rule contains no Federal mandates, as defined in Title II of UMRA, for State, local, and Tribal governments or the private sector. Therefore, this rule is not subject to the requirements of sections 202 and 205 of UMRA.

Federal Assistance Program

The title and number of the Assistance Listing, to which this rule applies is No. 10.450—Crop Insurance.

Paperwork Reduction Act of 1995

In accordance with the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35, subchapter I), the rule does not change the information collection approved by OMB under control numbers 0563–0053 and 0563–0083.

USDA Non-Discrimination Policy

In accordance with Federal civil rights law and USDA civil rights regulations and policies, USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family or parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Individuals who require alternative means of communication for program information (for example, braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA TARGET Center at (202) 720–2600 (voice and text telephone (TTY)) or dial 711 for Telecommunications Relay Service (both voice and text telephone users can initiate this call from any telephone). Additionally, program information may be made available in languages other than English. To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD–3027, found online at *https://www.usda.gov/oascr/how-to-file-a-program-discrimination-complaint* and at any USDA office or write a letter addressed to USDA and provide in the letter all the information requested in the form. To request a copy of the complaint form, call (866) 632–9992. Submit your completed form or letter to USDA by: (1) mail to: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410; (2) fax: (202) 690–7442; or (3) email: *program.intake@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

List of Subjects

7 CFR Part 407

Acreage allotments, Administrative practice and procedure, Barley, Corn, Cotton, Crop insurance, Peanuts, Reporting and recordkeeping requirements, Sorghum, Soybeans, Wheat.

7 CFR Part 457

Acreage allotments, Crop insurance, Reporting and recordkeeping requirements.

Final Rule

For the reasons discussed above, FCIC amends 7 CFR parts 407 and 457, effective for the 2025 and succeeding crop years for crops with a contract change date on or after November 30, 2024, and for the 2026 and succeeding crop years for all other crops, as follows:

PART 407—AREA RISK PROTECTION INSURANCE REGULATIONS

■ 1. The authority citation for part 407 continues to read as follows:

Authority: 7 U.S.C. 1506(l) and 1506(o).

■ 2. Amend § 407.9 as follows:
■ a. In section 5, in paragraph (c)(3), remove the words ''stated in section 5(c)'' and add ''stated in section 5(c)(2)'' in their place; and
■ b. In section 7, in paragraph (d)(2), remove '';'' at the end of the paragraph and add in its place ''; and''.

PART 457—COMMON CROP INSURANCE REGULATIONS

■ 3. The authority citation for 7 CFR part 457 continues to read as follows:

Authority: 7 U.S.C. 1506(l), 1506(o).

■ 4. In § 457.8, in the ''Common Crop Insurance Policy'', section 3, in paragraph (i) introductory text, remove the words ''not applicable'' and add ''(not applicable'' in their place.

■ 5. Amend § 457.101 as follows:
■ a. Revise the introductory text and the undesignated text at the beginning of the ''Small Grain Crop Provisions'';
■ b. In section 2, in paragraph (b) remove the phrase ''initially-planted'' and add the phrase ''initially planted'' in its place;
■ c. In section 3, revise paragraphs (a), (b) introductory text, and (b)(1);
■ d. In section 5, in the table, remove the word ''thereof'' wherever it appears and add the words ''of the named counties'' in its place;
■ e. In section 6 in paragraph (c)(2), remove the phrase ''set forth herein'' and add the phrase ''described in these Crop Provisions'' in its place;
■ f. In section 7 in paragraph (a) introductory text, remove the word ''thereof'' and add the words ''of a unit'' in its place;
■ g. In section 9:
■ i. In paragraph (c)(2)(i), remove the phrase ''flax or''; and
■ ii. In paragraph (c)(2)(ii), add the phrase '', flax'' after the word ''barley'';
■ h. In section 11:
■ i. In paragraph (b)(1)(i), add the phrase '', flax'' after the word ''barley'';
■ ii. In paragraph (b)(1)(ii), remove the phrase ''flax or'';
■ iii. In paragraph (b)(1)(iii), add the phrase '', flax'' after the word ''barley'';
■ iv. In paragraph (b)(3)(i), add the phrase '', flax'' after the word ''barley'';
■ v. In paragraph (b)(3)(ii), remove the phrase ''flax or'';
■ vi. Revise paragraph (c)(1)(i);
■ vii. In paragraph (d)(2)(i)(A), remove the phrase ''smutty, and ergoty'' and add the phrase ''smutty, or ergoty'' in its place;
■ viii. In paragraph (d)(2)(i)(E), remove the word ''Flaxseed'' and add the word ''Flax'' in its place; and
■ ix. In paragraph (d)(2)(ii), remove the phrase ''smutty, and ergoty'' and add the phrase ''smutty, or ergoty'' in its place.

The revisions and additions read as follows:

§ 457.101 Small grain crop insurance provisions.

The Small Grain Crop Insurance Provisions for the 2025 and succeeding crop years for crops with a contract change date on or after November 30, 2024, and for the 2026 and succeeding crop years with a contract change date prior to November 30, 2024, are as follows:

United States Department of Agriculture
Federal Crop Insurance Corporation
Small Grain Crop Provisions

In return for your payment of premium and administrative fee for coverage, these Small Grains Crop Provisions and corresponding Commodity Exchange Price Provisions will be attached to and made part of the Common Crop Insurance Policy, Basic Provisions (Basic Provisions) subject to the terms and conditions in your policy.

* * * * *

3. Insurance Guarantees, Coverage Levels, and Prices

(a) Revenue protection is not available for your buckwheat. Therefore, if you elect to insure such crop by the sales closing date, it will only be protected against a loss in yield.

(b) Revenue protection is available for barley, flax, oats, rye, and wheat. Therefore, if you elect to insure your barley, flax, oats, rye, or wheat:

(1) You must elect to insure your barley, flax, oats, rye, or wheat with either revenue protection or yield protection by the sales closing date; and

* * * * *

11. Settlement of Claim

* * * * *

(c) * * *

(1) * * *

(i) For buckwheat, and for barley, flax, oats, rye, or wheat under yield protection, not less than the production guarantee (per acre), and for barley, flax, oats, rye, or wheat under revenue protection, not less than the amount of production that when multiplied by the harvest price equals the revenue protection guarantee (per acre) for acreage:

* * * * *

■ 6. Amend § 457.133 as follows:
■ a. In the introductory text, remove the year ''2025'' and add the year ''2026'' in its place;
■ b. In section 1, revise the definition of ''Standard prunes''.

The revisions read as follows:

§ 457.133 Prune crop insurance provisions.

* * * * *

Definitions

* * * * *

Standard prunes. Any natural condition prunes:

(1) That grade ''C,'' ''U.S. Standard,'' or better in accordance with the United States Standards for Grades of Dried Prunes; or

(2) That meet or exceed the grade standards in effect for the crop year if a Marketing Order for California Prunes has been established for the area in which the insured crop is grown.

* * * * *

■ 7. Amend § 457.137 as follows:
■ a. Revise the introductory text and the undesignated text at the beginning of the ''Green Pea Crop Provisions'';
■ b. In section 1:
■ i. Revise the definition of ''Good farming practices'';
■ ii. In the definition of ''Planted acreage,'' remove the word ''contained'';
■ iii. Revise the definitions of ''Practical to replant'' and ''Price election''; and
■ iv. In the definition of ''Processor contract,'' remove the phrase ''A written agreement'' and add the phrase ''A written contract'' in its place;
■ c. In section 2:
■ i. In paragraph (a)(1), remove the word ''contained''; and
■ ii. Revise paragraphs (a)(2) and (b);
■ d. In section 3:
■ i. Revise the section heading;
■ ii. In paragraph (a), remove the phrase ''Special Provisions'' and add the phrase ''actuarial documents'' in its place;
■ e. In section 5, in the table, replace the words ''Feb.'' and ''Mar.'' and add the words ''February'' and ''March'', respectively, in their place;
■ f. In section 6, remove the phrase ''the provisions of'';
■ g. In section 8, introductory paragraph, remove the phrase ''the provisions of'';
■ h. In section 9, introductory paragraph, remove the phrase ''the provisions contained in'';
■ i. In section 10:
■ i. In the introductory paragraph, remove the phrase ''the provisions of'';
■ ii. In paragraph (a)(4), remove the word ''contained''; and
■ iii. In paragraph (a)(8), remove the word ''contained'';
■ j. In section 11, in paragraph (c), remove the phrase ''15 day period'' and

add the phrase ''15-day period'' in its place; and

■ k. In section 12, revise paragraph (b)(7).

The revisions and additions read as follows:

§ 7 CFR 457.137 Green pea crop insurance provisions.

The Green Pea Crop Insurance Provisions for the 2025 and succeeding crop years are as follows:

United States Department of Agriculture
Federal Crop Insurance Corporation.
Green Pea Crop Provisions

In return for your payment of premium and administrative fee for the coverage, these Green Pea Crop Provisions will be attached to and made part of the Common Crop Insurance Policy, Basic Provisions (Basic Provisions) subject to the terms and conditions in your policy.

* * * * *

1. Definitions

* * * * *

Good farming practices. In addition to the definition of ''good farming practices'' in the Basic Provisions, the cultural practices required by the processor contract.

* * * * *

Practical to replant. In addition to the definition of ''practical to replant'' in the Basic Provisions, practical to replant is defined as our determination, after loss or damage to the insured crop, based on factors including, but not limited to, moisture availability, and marketing window, that replanting the insured crop will allow the crop to attain maturity prior to the calendar date for the end of the insurance period. It will not be considered practical to replant unless the replanted acreage can produce at least 75 percent of the approved yield, and the processor agrees in writing that it will accept the production from the replanted acreage.

Price election. In lieu of the definition of ''price election'' in the Basic Provisions, price election is defined as the price per pound stated in the processor contract (contracted price) for the tenderometer reading, grade factor, or sieve size contained in the Special Provisions.

* * * * *

Unit Division

(a) * * *

(2) Optional units may be established by:

(i) Organic and non-organic farming practices as provided in Section 34(c)(3) of the Basic Provisions; or

(ii) Shell type and pod type for green peas if the shell type acreage does not continue into the pod type acreage in the same rows or planting pattern.

(b) For any processor contract that stipulates the number of acres to be planted, in addition to or instead of, establishing optional units as provided in Section 34(c) of the Basic Provisions, optional units may be established by the shell type and pod type for green peas if the shell type acreage does not continue into the pod type acreage in the same rows or planting pattern.

Insurance Guarantees, Coverage Levels, and Prices

* * * * *

12. Settlement of Claim

* * * * *

(b) * * *

(7) Multiplying the result of section 12(b)(6) by your share.

For example:

You have a 100 percent share in 100 acres of shell type green peas in the unit, with a guarantee of 4,000 pounds per acre and a price election of $0.15 per pound. You are only able to harvest 200,000 pounds. Your indemnity would be calculated as follows:

(1) 100 acres × 4,000 pounds = 400,000 pounds guarantee;

(2) 400,000 pounds × $0.15 price election = $60,000.00 value of guarantee;

(3) Not applicable;

(4) 200,000 pounds × $0.15 price election = $30,000.00 value of production to count;

(5) Not applicable;

(6) $60,000.00 − $30,000.00 = $30,000.00 loss; and

(7) $30,000.00 × 100 percent = $30,000.00 indemnity payment.

You also have a 100 percent share in 100 acres of pod type green peas in the same unit, with a guarantee of 5,000 pounds per acre and a price election of $0.15 per pound. You are only able to harvest 450,000 pounds. Your total indemnity for both shell type and pod type green peas would be calculated as follows:

(1) 100 acres × 4,000 pounds = 400,000 pounds guarantee for the shell type, and 100 acres × 5,000 pounds = 500,000 pounds guarantee for the pod type;

(2) 400,000 pounds guarantee × $0.15 price election = $60,000.00 value of guarantee for the shell type, and 500,000 pounds guarantee × $0.15 price election = $75,000.00 value of guarantee for the pod type;

(3) $60,000.00 + $75,000.00 = $135,000.00 total value of guarantee;

(4) 200,000 pounds × $0.15 price election = $30,000.00 value of production to count for the shell type; and 450,000 pounds × $0.15 = $67,500.00 value of production to count for the pod type;

(5) $30,000.00 + $67,500.00 = $97,500.00 total value of production to count;

(6) $135,000.00—$97,500.00 = $37,500.00 loss; and

(7) $37,500.00 loss × 100 percent = $37,500.00 indemnity payment.

* * * * *

■ 8. Amend § 457.142 as follows:

■ a. Revise the introductory text and the undesignated text at the beginning of the ''Northern Potato Crop Provisions'';

■ b. In section 11, revise paragraph (e)(2).

The revisions read as follows:

§ 457.142 Northern potato crop insurance provisions.

The Northern Potato Crop Insurance Provisions for the 2025 and succeeding crop years in counties with a contract change date of November 30, and for the 2026 and succeeding crop years in counties with a contract change date of April 30, June 30, and September 30, are as follows:

United States Department of Agriculture
Federal Crop Insurance Corporation
Northern Potato Crop Provisions

In return for your payment of premium and administrative fee for the coverage, these Northern Potato Crop Provisions will be attached to and made part of the Common Crop Insurance Policy, Basic Provisions (Basic Provisions) subject to the terms and conditions in your policy.

These provisions will be applicable in: Alaska; Humboldt, Modoc, and Siskiyou Counties, California; Colorado; Connecticut; Idaho; Indiana; Iowa; Kansas; Maine; Massachusetts; Michigan; Minnesota; Montana; Nebraska; Nevada; San Juan County, New Mexico; New York; North Dakota; Ohio; Oregon; Pennsylvania; Rhode Island; South Dakota; Utah; Washington; Wisconsin; and Wyoming; and any other states or counties if allowed by the Special Provisions.

* * * * *

11. Settlement of Claim

* * * * *

(e) * * *

(2) A grade inspection is completed no later than 21 days after the end of insurance period (if the Northern Potato Storage Coverage Endorsement is applicable, samples must be obtained within 60 days after the end of insurance period and quality (grade) determinations must be completed within 21 days of sampling; and

* * * * *

■ 9. Amend § 457.147 as follows:
■ a. Revise the introductory text and the undesignated text at the beginning of the ''Central and Southern Potato Crop Provisions'';
■ b. In section 12, revise the example after paragraph (b)(7) and before paragraph (c).

The revision reads as follows:

§ 457.147 Central and Southern potato crop insurance provisions.

The Central and Southern Potato Crop Insurance Provisions for the 2025 and succeeding crop years in counties with a contract change date of November 30, and for the 2026 and succeeding crop years in counties with a contract change date of April 30, June 30, and September 30, are as follows:

United States Department of Agriculture
Federal Crop Insurance Corporation
Central and Southern Potato Crop Provisions

In return for your payment of premium and administrative fee for the coverage, these Central and Southern Potato Crop Provisions will be attached to and made part of the Common Crop Insurance Policy, Basic Provisions (Basic Provisions) subject to the terms and conditions in your policy.

These provisions will be applicable in Alabama; Arizona; all California counties except Humboldt, Modoc, and Siskiyou; Delaware; Florida; Georgia; Maryland; Missouri; New Jersey; all New Mexico counties except San Juan; North Carolina; Oklahoma; Texas; and Virginia; and other states or counties if allowed by the Special Provisions.

* * * * *

12. Settlement of Claim

* * * * *

(b) * * *

(7) * * *

For example: You have a 100 percent share in 100 harvested acres of potatoes in the unit, with a guarantee of 150 hundredweight per acre and a price election of $4.00 per hundredweight. You are only able to harvest 10,000 hundredweight. Your indemnity would be calculated as follows:

(1) 100 acres × 150 hundredweight = 15,000 hundredweight guarantee;

(2) 15,000 hundredweight × $4.00 price election = $60,000.00 value of guarantee;

(4) 10,000 hundredweight × $4.00 price election = $40,000.00 value of production to count;

(6) $60,000.00 − $40,000.00 = $20,000.00 loss; and

(7) $20,000.00 × 100 percent = $20,000.00 indemnity payment.

You also have a 100 percent share in 100 unharvested acres of potatoes in the same unit, with a guarantee of 150 hundredweight per acre and a price election of $3.60 per hundredweight. (The price election for unharvested acreage is 90.0 percent of your elected price election ($4.00 × 0.90 = $3.60.)) This unharvested acreage was appraised at 35 hundredweight per acre for a total of 3,500 hundredweight as production to count. Your total indemnity for the harvested and unharvested acreage would be calculated as follows:

(1) 100 acres × 150 hundredweight = 15,000 hundredweight guarantee for the harvested acreage, and 100 acres × 150 hundredweight = 15,000 hundredweight guarantee for the unharvested acreage;

(2) 15,000 hundredweight guarantee × $4.00 price election = $60,000.00 value of guarantee for the harvested acreage, and 15,000 hundredweight guarantee × $3.60 price election = $54,000.00 value of guarantee for the unharvested acreage;

(3) $60,000.00 + $54,000.00 = $114,000.00 total value of guarantee;

(4) 10,000 hundredweight × $4.00 price election = $40,000.00 value of production to count for the harvested acreage, and 3,500 hundredweight × $3.60 = $12,600.00 value of production to count for the unharvested acreage;

(5) $40,000.00 + $12,600.00 = $52,600.00 total value of production to count;

(6) $114,000.00 − $52,600.00 = $61,400.00 loss; and

(7) $61,400.00 loss × 100 percent = $61,400.00 indemnity payment.

* * * * *

■ 10. In § 457.150, in the ''Dry bean crop insurance provisions'', in section 7, revise paragraph (c) to read as follows:

§ 457.150 Dry bean crop insurance provisions.

* * * * *

7. Insured Crop

* * * * *

(c) In addition to the types of dry beans designated in the Special Provisions, we will insure other types by written agreement if:

(1) The type you intend to plant has been demonstrated to be adapted to the area. Evidence of adaptability must include:

(i) Results of test plots for two years and recommendations by a university or seed company; or

(ii) Two years of production reports that indicate your experience producing the type in your production area;

(2) You submit your production reports and prices received, or the test plot results, and evidence of market potential, including the price buyers are willing to pay for the type; and

(3) Both parties (you and us) enter into a written agreement allowing insurance on the type in accordance with section 18 of the Basic Provisions.

* * * * *

■ 11. Amend § 457.154 as follows:
■ a. Revise the introductory text and the undesignated text at the beginning of the ''Processing Sweet Corn Crop Provisions'';
■ b. In section 2, revise paragraphs (a)(2) and (b); and
■ c. In section 11, in paragraph (c), remove the phrase ''15 day period'' and add the phrase ''15-day period'' in its place.

The revisions read as follows:

§ 457.154 Processing sweet corn crop insurance provisions.

The Processing Sweet Corn Crop Insurance Provisions for the 2025 and succeeding crop years are as follows:

United States Department of Agriculture
Federal Crop Insurance Corporation.
Processing Sweet Corn Crop Provisions

In return for your payment of premium and administrative fee for the coverage, these Processing Sweet Corn Crop Provisions will be attached to and made part of the Common Crop Insurance Policy, Basic Provisions (Basic Provisions) subject to the terms and conditions in your policy.

* * * * *

2. Unit Division

(a) * * *

(2) Section 34(c) of the Basic Provisions that allows optional units is not applicable.

(b) For processor contracts that stipulate the number of acres to be planted, optional units as provided in section 34(c) of the Basic Provisions will apply.

* * * * *

■ 12. Amend § 457.166 as follows:
■ a. In the introductory text, remove the year ''2025'' and add the year ''2026'' in its place;
■ b. In section 1, revise the definition of ''prune''.

The revision reads as follows:

§ 457.166 Blueberry crop insurance provisions.

* * * * *

1. Definitions

* * * * *

Prune. A cultural practice performed to increase blueberry production as follows:

(1) For lowbush blueberries, a process by which the acreage is either burned or mowed; and

(2) For all other blueberries, a process by which parts of the bush are cut off or the bush is cut back.

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

9 CFR Parts 317 and 381

[Docket No. FSIS–2022–0016]

RIN 0583–AD77

Uniform Compliance Date for Food Labeling Regulations

AGENCY: Food Safety and Inspection Service (FSIS), U.S. Department of Agriculture (USDA).

ACTION: Final action.

SUMMARY: FSIS is establishing January 1, 2028, as the uniform compliance date for new meat and poultry product labeling regulations that will be issued between January 1, 2025, and December 31, 2026. FSIS periodically announces uniform compliance dates for new meat and poultry product labeling regulations to minimize the economic impact of label changes.

DATES: *Effective date:* This action is effective November 27, 2024.

Compliance date: The uniform compliance date for new meat and poultry product labeling regulations that will be issued between January 1, 2025, and December 31, 2026, is January 1, 2028.

Comments due date: Comments on this final action must be received on or before December 27, 2024.

ADDRESSES: FSIS invites interested persons to submit comments on this rule. Comments may be submitted by one of the following methods:

- *Federal eRulemaking Portal:* This website provides the ability to type short comments directly into the comment field on this web page or attach a file for lengthier comments. Go to *https://www.regulations.gov*. Follow the on-line instructions at that site for submitting comments.
- *Mail:* Send to Docket Clerk, U.S. Department of Agriculture, Food Safety and Inspection Service, 1400 Independence Avenue SW, Mailstop 3758, Washington, DC 20250–3700.
- *Hand- or Courier-Delivered Submittals:* Deliver to 1400 Independence Avenue SW, Jamie L. Whitten Building, Room 350–E, Washington, DC 20250–3700.

Instructions: All items submitted by mail or electronic mail must include the Agency name and docket number FSIS–2022–0016. Comments received in response to this docket will be made available for public inspection and posted without change, including any personal information, to *https://www.regulations.gov*.

Docket: For access to background documents or comments received, call 202–720–5046 to schedule a time to visit the FSIS Docket Room at 1400 Independence Avenue SW, Washington, DC 20250–3700.

FOR FURTHER INFORMATION CONTACT: Contact Rosalyn Murphy-Jenkins, Director, Labeling and Program Delivery Staff, Office of Policy and Program Development, Food Safety and Inspection Service, U.S. Department of Agriculture, Telephone: (301) 504–0878.

SUPPLEMENTARY INFORMATION:

Background

On December 14, 2004, FSIS issued a final rule establishing January 1, 2008, as the uniform compliance date for new meat and poultry labeling regulations issued between January 1, 2005, and December 31, 2006 (69 FR 74405). The 2004 final rule also provided that the Agency would set uniform compliance dates for new labeling regulations in 2-year increments and periodically issue final rules announcing and requesting comments on those dates. Consistent with the 2004 final rule, the Agency has since published nine rules establishing the uniform compliance dates of January 1, 2010, January 1, 2012, January 1, 2014, January 1, 2016, January 1, 2018, January 1, 2020, January 1, 2022, January 1, 2024, and January 1, 2026 (72 FR 9651, 73 FR 75564, 75 FR 71344, 77 FR 76824, 79 FR 71007, 81 FR 91670, 83 FR 63052, 85 FR 81339, and 87 FR 77707).

The Final Rule

The new uniform compliance date will apply only to final FSIS regulations that require changes in the labeling of meat and poultry products and that are published after January 1, 2025, and before December 31, 2026. For each final rule that requires changes in labeling, FSIS will specifically identify January 1, 2028, as the compliance date. All meat and poultry food products that are subject to labeling regulations issued between January 1, 2025, and December 31, 2026, will be required to comply with these regulations on products introduced into commerce on or after January 1, 2028. If any food labeling regulation involves special circumstances that justify a compliance date other than January 1, 2028, the Agency will determine an appropriate compliance date and will publish that compliance date in the rulemaking.

Two-year increments increase industry's ability to make orderly adjustments to new labeling requirements without exposing consumers to outdated labels. This approach allows meat and poultry producers to plan for the use of label inventories and to develop new labeling materials that meet the new requirements. It also serves to reduce the economic impact of changing labels on both producers and consumers.

In the March 5, 2007, final rule, FSIS received only four comments on the announced uniform compliance dates, all in support. In the March 5, 2007, final rule, FSIS determined that further rulemaking for uniform compliance dates for labeling requirements is unnecessary (72 FR 9651). The Agency received no comments on the 2007 final rule, the comments FSIS received on the 2012 final rule were outside the scope (77 FR 76824), and FSIS received no comments on the 2014 final rule (79 FR 71007) or the 2016 final rule (81 FR 91670). The Agency received four comments on the 2018 final rule (83 FR 63052), all in support. The Agency received four comments on the 2020 final rule (85 FR 81339); one was outside the scope of the rulemaking and three were in support of the rule. The Agency received two comments on the 2022 final rule (87 FR 77707); one was in support of the rule, and one requested a 90-day extension because of potential supply chain issues for self-adhesive label materials. Because the commenter did not provide any additional information to support their claim about supply shortages and no other members of industry expressed concerns about a shortage, FSIS did not change the uniform compliance date.

Consistent with its statement in 2007, FSIS finds that further rulemaking on this matter is unnecessary. However, FSIS is providing an opportunity for comment on the uniform compliance date established in this final rule.

Executive Orders 12866 and 13563, and the Regulatory Flexibility Act

Executive Orders (E.O.) 12866 (as amended by E.O. 14094) and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic,

environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This final rule has been designated as a ''non-significant'' regulatory action under section 3(f) of E.O. 12866. Accordingly, the final rule has not been reviewed by the Office of Management and Budget (OMB) under E.O. 12866.

This rule does not have a significant economic impact on a substantial number of small entities; consequently, a regulatory flexibility analysis is not required (5 U.S.C. 601–612).

Paperwork Reduction Act

FSIS has reviewed this rule under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) and has determined that there is no new information collection related to this final rule. Under this final rule, the Agency is establishing January 1, 2028, as the uniform compliance date for new meat and poultry product labeling regulations that will be issued between January 1, 2025, and December 31, 2026. The relevant information collection or record keeping requirements are covered under OMB approval number 0583–0092, Marking, Labeling, and Packaging.

E-Government Act

FSIS and USDA are committed to achieving the purposes of the E-Government Act (44 U.S.C. 3601, *et seq.*) by, among other things, promoting the use of the internet and other information technologies and providing increased opportunities for citizen access to Government information and services, and for other purposes.

Executive Order 12988, Civil Justice Reform

This final action has been reviewed under E.O. 12988, Civil Justice Reform. Under this rule: (1) All State and local laws and regulations that are inconsistent with this action will be preempted; (2) no retroactive effect will be given to this action; and (3) no administrative proceedings will be required before parties may file suit in court challenging this rule. However, parties may be required to exhaust their administrative remedies before challenging in court any specific agency action that is the subject of an appeal pursuant to this action.

Executive Order 13175

This rule has been reviewed in accordance with the requirements of E.O. 13175, ''Consultation and Coordination with Indian Tribal Governments.'' E.O. 13175 requires Federal agencies to consult and coordinate with tribes on a government-to-government basis on policies that have tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

FSIS has assessed the impact of this action on Indian tribes and determined that this rule does not, to our knowledge, have tribal implications that require tribal consultation under E.O. 13175. If a tribe requests consultation, FSIS will work with the Office of Tribal Relations to ensure meaningful consultation is provided where changes, additions, and modifications identified herein are not expressly mandated by Congress.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, FSIS will announce this **Federal Register** publication on-line through the FSIS web page located at: *https://www.fsis.usda.gov/federal-register.*

FSIS will also announce and provide a link to it through the FSIS *Constituent Update,* which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. The *Constituent Update* is available on the FSIS web page. Through the web page, FSIS is able to provide information to a much broader, more diverse audience. In addition, FSIS offers an email subscription service which provides automatic and customized access to selected food safety news and information. This service is available at: *http://www.fsis.usda.gov/subscribe.* Options range from recalls to export information, regulations, directives, and notices. Customers can add or delete subscriptions themselves and have the option to password protect their accounts.

USDA's Non-Discrimination Statement

In accordance with Federal civil rights law and USDA civil rights regulations and policies, USDA, its Mission Areas, agencies, staff offices, employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (*e.g.,* Braille, large print, audiotape, American Sign Language) should contact the responsible Mission Area, agency, or staff office; the USDA TARGET Center at (202) 720–2600 (voice and TTY); or the Federal Relay Service at (800) 877–8339.

To file a program discrimination complaint, a complainant should complete a Form AD–3027, USDA Program Discrimination Complaint Form, which can be obtained online at *https://www.usda.gov/forms/electronic-forms,* from any USDA office, by calling (866) 632–9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights about the nature and date of an alleged civil rights violation. The completed AD–3027 form or letter must be submitted to USDA by:

(1) *Mail:* U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410;

(2) *Fax:* (833) 256–1665 or (202) 690–7442; or

(3) *Email: program.intake@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

Done in Washington, DC.

Paul Kiecker,

Administrator.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2024–2020; Project Identifier MCAI–2024–00303–A; Amendment 39–22877; AD 2024–22–06]

RIN 2120–AA64

Airworthiness Directives; Embraer S.A. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2023–21–06 for certain Embraer S.A. (Embraer) Model EMB–505 airplanes. AD 2023–21–06 required installing structural reinforcements on certain monuments and replacing certain floor support rivets. Since the FAA issued AD 2023–21–06, the FAA determined that certain airplanes need to be re-assigned to a different group and certain re-identified floor support part numbers need to be corrected. This AD requires installing structural reinforcements on monuments and replacing fasteners on the floor support, as specified in an Agência Nacional de Aviação Civil (ANAC) AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective January 2, 2025.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of January 2, 2025.

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2024–2020; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

• For ANAC material identified in this AD, contact ANAC, Continuing Airworthiness Technical Branch (GTAC), Rua Doutor Orlando Feirabend Filho, 230—Centro Empresarial Aquarius—Torre B—Andares 14 a 18, Parque Residencial Aquarius, CEP 12.246–190—São José dos Campos—SP, Brazil; phone: 55 (12) 3203–6600; email: *pac@anac.gov.br;* website: *anac.gov.br/en/.* You may find this material on the ANAC website at *sistemas.anac.gov.br/certificacao/DA/DAE.asp.*

FOR FURTHER INFORMATION CONTACT: Jim Rutherford, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (816) 329–4165; email: *jim.rutherford@faa.gov*.

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2023–21–06, Amendment 39–22578 (88 FR 76114, November 6, 2023; corrected December 7, 2023 (88 FR 85093)) (AD 2023–21–06). AD 2023–21–06 applied to certain serial-numbered Embraer Model EMB–505 airplanes. AD 2023–21–06 was prompted by an MCAI originated by ANAC, which is the aviation authority for Brazil. ANAC issued ANAC AD 2023–05–03, effective June 2, 2023 (ANAC AD 2023–05–03) to correct an unsafe condition.

AD 2023–21–06 required installing structural reinforcements on certain monuments and replacing certain floor support rivets. The FAA issued AD 2023–21–06 to address certain monuments (the right-hand refreshment center and left-hand forward cabinet) that might not withstand the loads expected for specific emergency landing conditions, which may cause the detachment of mass items and result in injuries to the airplane occupants.

Since the FAA issued AD 2023–21–06, ANAC superseded ANAC AD 2023–05–03 and issued ANAC AD 2023–05–03R01, effective March 8, 2024 (ANAC AD 2023–05–03R01) for certain serial-numbered Embraer Model EMB–505 airplanes. ANAC AD 2023–05–03R01 stated it was issued to incorporate Embraer Service Bulletin SB505–25–0046, Revision 02, dated February 19, 2024, which updates effectivity information, compliance information, and part number information.

ANAC superseded ANAC AD 2023–05–03R01 and issued ANAC AD 2023–05–03R02, effective May 17, 2024 (ANAC AD 2023–05–03R02) (also referred to as the MCAI) for certain serial-numbered Embraer Model EMB–505 airplanes. The MCAI states it was issued to incorporate Embraer Service Bulletin SB505–25–0046, Revision 03, dated May 6, 2024 (actual date May 7, 2024), which includes additional actions for certain airplane groups that had complied with the requirements of ANAC AD 2023–05–03R01 but had not yet installed part number 506–66837–001 and updates the effectivity information, compliance information, and part number information.

The NPRM published in the **Federal Register** on August 16, 2024 (89 FR 66642). The NPRM was prompted by ANAC AD 2023–05–03R02. In the NPRM, the FAA proposed to require installing structural reinforcements on monuments and replacing fasteners on the floor support, as specified in ANAC AD 2023–05–03R02.

The FAA is issuing this AD to address certain monuments that might not withstand the loads expected for specific emergency landing conditions, which may cause the detachment of mass items and result in injuries to the airplane occupants.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2024–2020.

Discussion of Final Airworthiness Directive

Comments

The FAA received no comments on the NPRM or on the determination of the costs.

Conclusion

These products have been approved by the aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. This AD is adopted as proposed in the NPRM.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed ANAC AD 2023–05–03R02, which specifies procedures for installing structural reinforcements on certain monuments and replacing certain fasteners on the floor support.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

Differences Between This AD and the MCAI

The material specified in ANAC AD 2023–05–03R02 allows the use of alternative or similar parts in place of the ones specified in the kits, provided these alternative or similar parts are approved by Embraer, but this AD requires approval from either the Manager, International Validation Branch, FAA; ANAC; or ANAC's authorized Designee. If approved by the ANAC Designee, the approval must include the Designee's authorized signature.

Costs of Compliance

The FAA estimates that this AD affects 208 airplanes of U.S. registry.

The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Airplane groups 1 and 2—install structural reinforcements.	22 work-hours × $85 per hour = $1,870.	$1,600	$3,470	$242,900 (70 airplanes).
Airplane groups 3, 4, and 5—install structural reinforcements and replace floor fasteners.	14 work-hours × $85 per hour = $1,190.	600	1,790	$200,480 (112 airplanes).
Airplane groups 6 and 8—install structural reinforcements and replace floor fasteners.	26 work-hours × $85 per hour = $2,210.	2,000	4,210	$84,200 (20 airplanes).
Airplane group 7—install structural reinforcements	20 work-hours × $85 per hour = $1,700.	1,600	3,300	$16,500 (5 airplanes).
Airplane group 9—install structural reinforcements	14 work-hours × $85 per hour = $1,190.	1,600	2,790	$2,790 (1 airplane).

The FAA estimates the following costs for the additional work that operators would be required to do for compliance with this AD if they completed the actions in the original version of Embraer Service Bulletin SB505–25–0046, dated March 31, 2021; Service Bulletin SB505–25–0046, Revision 01, dated May 8, 2023; or Service Bulletin SB505–25–0046, Revision 02, dated February 19, 2024. The agency has no way of determining the number of airplanes that might need these actions:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Inspect floor fasteners	9 work-hours × $85 per hour = $765	$50	$815
Replace floor fasteners	1 work-hour × $85 per hour = $85	50	135
Airplane groups 1 and 2 install reinforcement support on left-hand forward cabinet.	2 work-hours × $85 per hour = $170	200	370

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, all of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA has determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive 2023–21–06, Amendment 39–22578 (88 FR 76114, November 6, 2023; corrected December 7, 2023 (88 FR 85093)); and

■ b. Adding the following new airworthiness directive:

2024–22–06 Embraer S.A.: Amendment 39–22877; Docket No. FAA–2024–2020; Project Identifier MCAI–2024–00303–A.

(a) Effective Date

This airworthiness directive (AD) is effective January 2, 2025.

(b) Affected ADs

This AD replaces AD 2023–21–06, Amendment 39–22578 (88 FR 76114, November 6, 2023; corrected December 7, 2023 (88 FR 85093)).

(c) Applicability

This AD applies to Embraer S.A. Model EMB–505 airplanes, certificated in any category, as identified in Agência Nacional de Aviação Civil (ANAC) AD 2023–05–03R02, effective May 17, 2024 (ANAC AD 2023–05–03R02).

(d) Subject

Joint Aircraft System Component (JASC) Code 2500, Cabin Equipment/Furnishings.

(e) Unsafe Condition

This AD was prompted by the analysis of certain monuments (the right-hand refreshment center and left-hand forward cabinet) that identified the need for installing structural reinforcements and replacing applicable floor support rivets. The FAA is issuing this AD to address the unsafe condition. The unsafe condition, if not addressed, could result in a monument not withstanding the loads expected for specific emergency landing conditions, which may cause the detachment of mass items and result in injuries to the airplane occupants.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified in paragraphs (h) and (i) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, ANAC AD 2023–05–03R02.

(h) Exceptions to ANAC AD 2023–05–03R02

(1) Where ANAC AD 2023–05–03R02 refers to its effective date, this AD requires using the effective date of this AD.

(2) Where ANAC AD 2023–05–03R02 refers to Embraer Service Bulletin SB505–25–0046, Revision 03, as dated ''May 6, 2024,'' replace that text with ''May 7, 2024.''

(3) Where paragraph (b) of ANAC AD 2023–05–03R02 refers to ''June 2, 2023, the effective date of AD 2023–05–03, original revision,'' replace that text with ''December 11, 2023, the effective date of AD 2023–21–06.''

(4) Although the material referenced in ANAC AD 2023–05–03R02 allows the use of alternative or similar parts in place of the ones specified in the kits provided, this AD requires that alternative or similar parts be approved by the Manager, International Validation Branch, FAA; ANAC; or ANAC's authorized Designee. If approved by the ANAC Designee, the approval must include the Designee's authorized signature.

(5) Where the material referenced in ANAC AD 2023–05–03R02 specifies to ''discard'' certain parts, replace that text with ''remove from service.''

(6) This AD does not adopt paragraph (d)(1) of ANAC AD 2023–05–03R02.

(i) No Reporting Requirement

Although the material referenced in ANAC AD 2023–05–03R02 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(j) Alternative Methods of Compliance (AMOCs)

The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (k) of this AD or email to: *AMOC@faa.gov.* If mailing information, also submit information by email. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(k) Additional Information

For more information about this AD, contact Jim Rutherford, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (816) 329–4165; email: *jim.rutherford@faa.gov.*

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Agência Nacional de Aviação Civil (ANAC) AD 2023–05–03R02, effective May 17, 2024.

(ii) [Reserved]

(3) For ANAC material identified in this AD, contact ANAC, Continuing Airworthiness Technical Branch (GTAC), Rua Doutor Orlando Feirabend Filho, 230—Centro Empresarial Aquarius—Torre B—Andares 14 a 18, Parque Residencial Aquarius, CEP 12.246–190—São José dos Campos—SP, Brazil; phone: 55 (12) 3203–6600; email: *pac@anac.gov.br;* website: *anac.gov.br/en/.* You may find this material on the ANAC website at *sistemas.anac.gov.br/certificacao/DA/DAE.asp.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 901 Locust, Kansas City, MO 64106. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on October 24, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2024–1009]

RIN 1625–AA00

Safety Zone; Corpus Christi Bay, Corpus Christi, TX

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone for certain navigable waters in the Laguna Madre, South Padre Island, Texas. The safety zone is needed to protect personnel, vessels, and the marine environment from potential hazards created by fireworks display launched from a barge in Laguna Madre, South Padre Island, Texas. Entry of vessels or persons into this zone is prohibited unless specifically authorized by the Captain of the Port, Sector Corpus Christi or a designated representative.

DATES: This rule is effective from 9:30 p.m. through 11:59 p.m. on December 7, 2024.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *https://www.regulations.gov,* type USCG–2024–1009 in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: If you have questions about this rule, call or email Lieutenant Timothy Cardenas, Sector Corpus Christi Waterways Management Division, U.S. Coast Guard; telephone 361–939–5130, email *Timothy.J.Cardenas@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

The Coast Guard is issuing this temporary rule under authority in 5

U.S.C. 553(b)(B). This statutory provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency, for good cause, finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because it is impracticable. The Coast Guard was notified of this event on October 30, 2024, and must establish this safety zone by December 7, 2024, to protect personnel, vessels, and the marine environment from potential hazards created by the fireworks display, and therefore lack sufficient time to provide a reasonable comment period and then a period to consider those comments before issuing the rule.

Under 5 U.S.C. 553(d)(3), the Coast Guard also finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would be contrary to the public interest because prompt action is needed to respond to the potential safety hazards associated with fireworks launched from a barge in the waters of the Laguna Madre.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 46 U.S.C. 70034. The Captain of the Port, Sector Corpus Christi (COTP) has determined that potential hazards associated with the fireworks display, occurring from 9:30 p.m. through 11:59 p.m. on December 7, 2024, will be a safety concern for anyone within the waters of the Laguna Madre area within a 700-yard radius of the barge from which the display will be launched. This rule is needed to protect personnel, vessels, and the marine environment in the navigable waters within the safety zone while the fireworks display occurs in the Laguna Madre.

IV. Discussion of the Rule

This rule establishes a temporary safety zone from 9:30 p.m. to 11:59 p.m. on the night of December 7, 2024. The safety zone will encompass all navigable waters of the Laguna Madre and is defined by a 700-yard radius from the launch platform. The regulated area encompasses a 700-yard radius of the following point: 26°06′02.1″ N, 97°10′17.7″ W. The fireworks display will take place in waters of the Laguna Madre. No vessel or person is permitted to enter the temporary safety zone during the effective period without obtaining permission from the COTP or a designated representative, who may be contacted on Channel 16 VHF–FM (156.8 MHz) or by telephone at 361–939–0450. The Coast Guard will issue Broadcast Notices to Mariners and Safety Marine Information Broadcasts.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866, as amended by Executive Order 14094 (Modernizing Regulatory Review). Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the size, location, and duration of the safety zone. The temporary safety zone will be enforced for the short period of two and a half hours, on the night of December 7, 2024, when vessel traffic is normally low. The zone is limited to a 700-yard radius from the launching position in the navigable waters of the Laguna Madre. The rule does not completely restrict the traffic within a waterway and allows mariners to request permission to enter the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, and Environmental Planning, COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f) and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves establishment of a temporary safety zone for navigable waters of the Laguna Madre in a zone defined by a 700-yard radius around the fireworks barge, located at the following point: 26°06′02.1″ N, 97°10′17.7″ W. It is categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165–REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051, 70124; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.3.

■ 2. Add § 165.T08–1009 to read as follows:

§ 165.T08–1009 Safety Zone; Corpus Christi Bay, Corpus Christi, TX.

(a) *Location.* The following area is a safety zone: all navigable waters of the Laguna Madre encompassed by a 700-yard radius around the fireworks barge, located at the following point: 26°06′02.1″ N, 97°10′17.7″ W.

(b) *Enforcement period.* This section is subject to enforcement from 9:30 p.m. through 11:59 p.m. on December 7, 2024.

(c) *Regulations.* (1) In accordance with the general regulations in subpart C of this part, entry into this temporary safety zone is prohibited unless authorized by the Captain of the Port Sector Corpus Christi (COTP) or a designated representative. They may be contacted on Channel 16 VHF–FM (156.8 MHz) or by telephone at 361–939–0450.

(2) If permission is granted, all persons and vessels shall comply with the instructions of the COTP or designated representative.

(d) *Information broadcasts.* The COTP or a designated representative will inform the public of the enforcement times and date for this safety zone through Broadcast Notices to Mariners and Safety Marine Information Broadcasts as appropriate.

Dated: November 21, 2024.

T.H. Bertheau,

Captain, U.S. Coast Guard, Captain of the Port, Sector Corpus Christi.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2024–1020]

Safety Zone; City of Rockport, Rockport Tropical Christmas Festival Fireworks Display Show

AGENCY: Coast Guard, DHS.

ACTION: Notification of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone for the Rockport Tropical Christmas Festival Fireworks Display Show on December 6, 2024, or December 7, 2024, to provide for the safety of persons, vessels, and the marine environment on navigable waterways during this event. Our regulation for marine events within the Eighth Coast Guard District identifies the safety zone for this event in Rockport, TX. During the enforcement periods, entry into this zone is prohibited unless authorized by the Captain of the Port Sector Corpus Christi (COTP) or a designated representative.

DATES: The regulations in 33 CFR 165.801, Table 4, Line 11, will be enforced from 8 p.m. through 8:45 p.m. on December 6, 2024, unless the event is postponed because of adverse weather, in which case this rule will be enforced from 8 p.m. through 8:45 p.m. on December 7, 2024.

FOR FURTHER INFORMATION CONTACT: If you have questions about this notice of enforcement, call or email Lieutenant Timothy Cardenas, Sector Corpus Christi Waterways Management Division, U.S. Coast Guard; telephone 361–939–5130, email *timothy.j.cardenas@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the safety zone in 33 CFR 165.801, Table 4, Line 11, for the Rockport Tropical Christmas Festival Fireworks Display Show from 8 p.m. through 8:45 p.m. on December 6, 2024, with a rain date set for December 7, 2024, from 8 p.m. through 8:45 p.m. This action is being taken to provide for the safety of persons, vessels, and the marine environment on navigable waterways during this event. Our regulation for marine events within the Eighth Coast Guard District, § 165.801, specifies the location of the safety zone for the Rockport Tropical Christmas Festival Fireworks Display Show, which encompasses portions of Little Bay in Rockport, TX. As reflected in § 165.23 and § 165.801(a), if you are the operator of a vessel in the regulated area you must comply with directions from the Captain of the Port Sector Corpus Christi (COTP) or any designated representative. Persons or vessels desiring to enter the zone must request permission from the COTP or a designated representative. They can be reached on VHF FM channel 16 or by telephone at (361) 939–0450.

If permission is granted, all persons and vessels shall comply with the instructions of the COTP or designated representative.

In addition to this notice of enforcement in the **Federal Register**, the COTP or a designated representative will inform the public through Broadcast Notice to Mariners (BNM) and Marine Safety Information Broadcasts (MSIBs) at least 24 hours in advance of each enforcement.

Dated: November 21, 2024.

T.H. Bertheau,

Captain, U.S. Coast Guard, Captain of the Port, Sector Corpus Christi.

LIBRARY OF CONGRESS

Copyright Royalty Board

37 CFR Part 385

[Docket No. Docket No. 24–CRB–0010–PR–COLA (2025)]

Cost of Living Adjustment to Royalty Rates and Terms for Making and Distributing Phonorecords

AGENCY: Copyright Royalty Board, Library of Congress.

ACTION: Final rule; cost of living adjustment.

SUMMARY: The Copyright Royalty Judges announce a cost of living adjustment (COLA) in the royalty rates for the statutory license for making and distributing phonorecords of nondramatic musical works regarding physical phonorecords and Permanent Downloads.

DATES:

Effective date: November 27, 2024.

Applicability date: These rates and terms are applicable during the period from January 1, 2025, through December 31, 2025.

FOR FURTHER INFORMATION CONTACT: Anita Brown, Program Specialist, (202) 707–7658, *crb@loc.gov.*

SUPPLEMENTARY INFORMATION: Section 115 of the Copyright Act, title 17 of the United States Code, creates a statutory license for making and distributing phonorecords of nondramatic musical works. On December 16, 2022, the Copyright Royalty Judges (Judges) adopted final regulations governing the rates and terms of copyright royalty payments under that license for the license period 2024–2027 for making and distributing phonorecords of nondramatic musical works. *See* 87 FR 76942.

Pursuant to those regulations, at least 25 days before January 1 of each year, the Judges shall publish in the **Federal Register** notice of a cost of living adjustment (COLA) applicable to the royalty fees for making and distributing physical phonorecords and Permanent Downloads. *See* 37 CFR 385.11.

The adjustment in the royalty fee shall be based on a calculation of the percentage increase in the Consumer Price Index for All Urban Consumers (CPI–U) published in November 2022 (298.012) [1] (''base rate'') according to the following formulas: for the per-work rate, $(1 + (Cy - 298.012\ [2])/298.012) \times 12¢$, rounded to the nearest tenth of a cent; for the per-minute rate, $(1 + (Cy - 298.012)/298.012) \times 2.31¢$, rounded to the nearest hundredth of a cent; where Cy is the CPI–U published by the Secretary of Labor before December 1 of the preceding year. 37 CFR 385.11(a)(2). The CPI–U published by the Secretary of Labor from the most recent index published before December 1, 2024, is 315.664.[3] Applying the formulas in 37 CFR 385.11(a)(2) results in an increase in the rates for 2025.

The adjusted rates for 2025 are 12.7 cents for the per-work rate and 2.45 cents for the per-minute rate.

List of Subjects in 37 CFR Part 385

Copyright, Phonorecords, Recordings.

Final Regulations

In consideration of the foregoing, the Judges amend part 385 of title 37 of the Code of Federal Regulations as follows:

PART 385—RATES AND TERMS FOR USE OF NONDRAMATIC MUSICAL WORKS IN THE MAKING AND DISTRIBUTING OF PHYSICAL AND DIGITAL PHONORECORDS

■ 1. The authority citation for part 385 continues to read as follows:

Authority: 17 U.S.C. 115, 801(b)(1), 804(b)(4).

■ 2. Section 385.11 is amended by revising paragraph (a)(1) to read as follows:

§ 385.11 Royalty fees for the public performance of sound recordings and the making of ephemeral recordings.

(a) * * *

(1) *2025 rate.* For the year 2025 for every physical phonorecord and Permanent Download the Licensee makes and distributes or authorizes to be made and distributed, the royalty rate payable for each work embodied in the phonorecord or Permanent Download shall be either 12.7 cents or 2.45 cents per minute of playing time or fraction thereof, whichever amount is larger.

* * * * *

Dated: November 22, 2024.

David P. Shaw,

Chief Copyright Royalty Judge.

[FR Doc. 2024–27819 Filed 11–26–24; 8:45 am]

POSTAL SERVICE

39 CFR Part 111

Domestic Competitive Products Pricing and Mailing Standards Changes

AGENCY: Postal Service™.

ACTION: Final rule.

SUMMARY: The Postal Service is amending *Mailing Standards of the United States Postal Service,* Domestic Mail Manual (DMM®), to reflect changes to prices and mailing standards for competitive products.

DATES: *Effective* January 19, 2025.

FOR FURTHER INFORMATION CONTACT: Steven Jarboe at (202) 268–7690, Catherine Knox (202) 268–5636, or Garry Rodriguez at (202) 268–7281.

SUPPLEMENTARY INFORMATION: This final rule describes new prices and product features for competitive products, by class of mail, established by the Governors of the United States Postal Service®. New prices are available under Docket Number CP2025–1 on the Postal Regulatory Commission PRC website at *http://www.prc.gov,* and on the Postal Explorer® website at *http://pe.usps.com.*

The Postal Service will revise *Mailing Standards of the United States Postal Service,* Domestic Mail Manual (DMM), to reflect changes to certain prices and mailing standards for the following competitive products:

- Priority Mail Express®.
- Priority Mail®.
- USPS Ground Advantage®.
- Parcel Select®.
- Extra Services.
- Return Services.
- Mailer Services.
- Recipient Services.
- Other.

Competitive product prices and changes are identified by product as follows:

Priority Mail Express

Prices

Overall, Priority Mail Express prices will increase 3.2 percent. Priority Mail

Express will continue to offer zoned and Flat Rate, Retail and Commercial pricing.

Retail prices will increase an average of 3.2 percent. The Flat Rate Envelope price will increase to $31.40, the Legal Flat Rate Envelope will increase to $31.65, and the Padded Flat Rate Envelope will increase to $32.25.

Commercial prices will increase an average of 3.2 percent.

Priority Mail

Prices

Overall, Priority Mail prices will increase 3.2 percent. Priority Mail will continue to offer zoned and Flat Rate, Retail and Commercial pricing.

Retail prices will increase an average of 3.2 percent. The Flat Rate Envelope price will increase to $10.10, the Legal Flat Rate Envelope will increase to $10.40, and the Padded Flat Rate Envelope will increase to $10.85. The Small Flat Rate Box price will increase to $10.65, and the Medium Flat Rate Boxes will increase to $19.15. The Large Flat Rate Box will increase to $26.30 and the APO/FPO/DPO Large Flat Rate Box will increase to $25.05.

Commercial prices will increase an average of 3.2 percent.

USPS Ground Advantage

Prices

Overall, USPS Ground Advantage prices will increase 3.9 percent.

USPS Ground Advantage—Retail prices will increase 4.9 percent.

USPS Ground Advantage—Commercial prices will increase 3.2 percent.

Parcel Select

Prices

The prices for Parcel Select Destination Entry will increase an average of 9.2 percent.

The prices for USPS Connect® Local will increase 5.4 percent.

Extra Services

Adult Signature Service

Adult Signature Required and Adult Signature Restricted Delivery service prices are decreasing 10.2 and 10.4 percent respectively. The price for Adult Signature Required will decrease to $8.40 and Adult Signature Restricted Delivery will decrease to $8.65.

Return Services

USPS Returns Service

There are no structural changes to USPS Returns Service.

Mailer Services

Pickup on Demand Service

The Pickup on Demand® service fee will remain the same.

USPS Tracking Plus Service

The USPS Tracking Plus® service prices will increase on average between 11.1 and 152.5 percent.

USPS Label Delivery Service

The USPS Label Delivery Service™ prices will increase 24.0 percent to $1.55.

Recipient Services

Post Office Box Service

The competitive Post Office Box™ service prices will increase an average of 5.7 percent within the updated price ranges.

Premium Forwarding Service

Premium Forwarding Service® (PFS®) prices will increase between 2.5 and 6.1 percent depending on the specific price element. The enrollment fee paid at the retail counter for PFS-Residential will increase to $26.85 and the PFS-Residential, PFS-Commercial, and PFS-Local enrollment fee paid online will increase to $24.70 per application. The price of the weekly shipment charge for PFS-Residential and per container charge for PFS-Local will increase to $27.80.

USPS Package Intercept

The USPS Package Intercept® fee will increase 4.9 percent to $18.35.

Other

Address Enhancement Service

Address Enhancement Service competitive product prices will increase between 8.4 and 9.1 percent.

IMpb Noncompliance Fee Renamed

To encompass all the compliance qualities included under the current IMpb Noncompliance Fee, the Postal Service is renaming the IMpb Noncompliance Fee the Package Quality Noncompliance Fee.

Intelligent Mail Matrix Barcode

The Postal Service is requiring mailers to add a supplemental GS1-DataMatrix (2D) Intelligent Mail matrix barcode (IMmb) to domestic shipping labels to improve package visibility. The placement of the IMmb will be in the address block to the left of the delivery address. Optionally, a mailer may place a second IMmb in the lower right corner of the shipping label. The Postal Service recommends using the second IMmb on all labels. The addition of the IMmb barcode will provide the Postal Service with a greater opportunity for the package to be scanned providing customers with better visibility of their packages.

The Postal Service will also update Publication 52, Hazardous, Restricted, and Perishable, Matter, for consistency in barcode application.

Live Animal and Perishable Handling Fee

The Postal Service is implementing a Live Animal and Perishable Handling fee. This fee will be assessed on all live animals and perishables (*e.g.* fruit, meat), entered at retail and commercial Priority Mail Express, Priority Mail, and USPS Ground Advantage prices. The Live Animal and Perishable Handling fee is nonrefundable once the piece is entered in the network.

The Live Animal and Perishable Handling fee is in addition to the current Live Animal Transportation fee provided in the Notice 123—Price List, when applicable.

The Postal Service will also update Publication 52, Hazardous, Restricted, and Perishable, Matter, to provide detailed information on the fee requirement.

Hazardous Materials Shipping Label Markings

The Postal Service is revising the current requirement to include the hazardous materials icon (''H'') in lieu of the service icon on a shipping address label when mailing eligible hazardous materials. Items containing mailable hazardous materials addressed to an APO/FPO/DPO, the USPS territories and possessions, and the Freely Associated States, are excluded from the requirement to include the hazardous materials icon in lieu of the service icon on a shipping address label.

Overweight and Oversize Item Fee

The Postal Service is increasing the overweight and oversize item fee to $200.00, to continue to deter nonmailable volumes from being entered in the network.

Resources

The Postal Service provides additional resources to assist customers with this price change for competitive products. These tools include price lists, downloadable price files, and **Federal Register** Notices, which may be found on the Postal Explorer® website at *http://pe.usps.com.*

The Postal Service adopts the described changes to *Mailing Standards of the United States Postal Service,* Domestic Mail Manual (DMM),

incorporated by reference in the *Code of Federal Regulations.* We will publish an appropriate amendment to 39 CFR part 111 to reflect these changes.

List of Subjects in 39 CFR Part 111

Administrative practice and procedure, Postal Service.

Accordingly, the Postal Service amends *Mailing Standards of the United States Postal Service,* Domestic Mail Manual (DMM), incorporated by reference in the Code of Federal Regulations as follows (see 39 CFR part 111.1):

PART 111—GENERAL INFORMATION ON POSTAL SERVICE

■ 1. The authority citation for 39 CFR part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 13 U.S.C. 301–307; 18 U.S.C. 1692–1737; 39 U.S.C. 101, 401–404, 414, 416, 3001–3018, 3201–3220, 3401–3406, 3621, 3622, 3626, 3629, 3631–3633, 3641, 3681–3685, and 5001.

■ 2. Revise *Mailing Standards of the United States Postal Service,* Domestic Mail Manual (DMM) as follows:

Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM)

* * * * *

[Add new 1.7 to read as follows:]

1.7 Live Animal and Perishable Handling Fee

Priority Mail pieces containing live animals or perishables (*e.g.* fruit, meat) are subject to the nonrefundable Live Animal and Perishable Handling fee (see Notice 123—Price List). This fee is in addition to the Live Animal Transportation fee provided in the Notice 123—Price List, when applicable. For additional information on the Live Animal and Perishable Handling fee see Publication 52, *Hazardous, Restricted, and Perishable, Mail,* (526).

* * * * *

130 Retail Mail First-Class Mail and USPS Ground Advantage—Retail

133 Prices and Eligibility

1.0 Prices and Fees

* * * * *

[Add new 1.9 to read as follows:]

1.9 Live Animal and Perishable Handling Fee

USPS Ground advantage—Retail pieces containing live animals or perishables (*e.g.,* fruit, meat) are subject to the nonrefundable Live Animal and Perishable Handling fee (see Notice 123—Price List). This fee is in addition to the Live Animal Transportation fee provided in the Notice 123—Price List, when applicable. For additional information on the Live Animal and Perishable Handling fee see Publication 52, *Hazardous, Restricted, and Perishable, Mail,* (526).

* * * * *

200 Commercial Letters, Cards, Flats, and Parcels

* * * * *

202 Elements on the Face of a Mailpiece

* * * * *

3.0 Placement and Content of Mail Markings

* * * * *

3.9 Shipping Address Label Markings

3.9.1 General

[Revise the last sentence of 3.9.1 to read as follows:]

* * * Failure to comply may subject the piece to the Package Quality Noncompliance Fee.

3.9.2 Hazardous Materials

[Revise the text of 3.9.2 to read as follows:]

When a shipping address label is used on items containing mailable hazardous materials, except for items addressed to an APO/FPO/DPO, the USPS territories and possessions, and the Freely Associated States, it must include the hazardous materials icon in lieu of the service icon as provided in the Parcel Labeling Guide.

* * * * *

6.0 Barcode Placement for Parcels

* * * * *

[Delete 6.2 and 6.3 and add new 6.2 to read as follows:]

6.2 Intelligent Mail Matrix Barcode Location

In addition to the placement of the IMpb and GS1–128 Routing Barcodes locations provided in 6.1, the Intelligent Mail matrix barcode (IMmb) must be placed in the address block to the left of the delivery address. Optionally, a mailer may place a second IMmb in the lower right corner of the shipping label.

* * * * *

204 Barcode Standards

* * * * *

2.0 Standards for Package and Extra Service Barcodes

[Revise 2.1 to read as follows:]

2.1 Barcodes

2.1.1 Definition

The definition of an Intelligent Mail package barcode (IMpb) and an Intelligent Mail matrix barcode (IMmb) are as follows:

a. IMpb—An IMpb is the USPS-developed barcode that can be read by automated parcel processing equipment and scanning devices and consists of a

data string that generally follows the GS1–128 specification. These barcodes include a variable length format that is determined by the elements selected by the mailer, and supplies tracking and routing data for packages and extra service applications. Intelligent Mail package barcodes must be used on all commercial packages, and on other mailpieces of customers requesting extra services.

b. IMmb—An IMmb is supplemental GS1-DataMatrix (2D) barcode to improve package visibility. The IMmb contains the same data as the IMpb barcode using a space-efficient barcode symbology.

2.1.2 Specification Resources

Detailed Specifications on an IMpb and IMmb can be found on PostalPro at *https://postalpro.usps.com* as follows:

a. Publication 199, *Intelligent Mail Package Barcode (IMpb) Implementation Guide for Confirmation Services and Electronic Payment Systems.*

b. Parcel Labeling Guide.

c. Intelligent Mail Package Barcode Technical Specifications.

d. Intelligent Mail Matrix Barcode Technical Specifications.

2.1.3 Barcode Location

See 202.6.1 for barcode location standards.

2.1.4 Quality Assurance

Mailers must perform routine inspections and testing of labels and barcodes to ensure quality.

2.1.5 Electronic File

All mailers generating an IMpb and IMmb must transmit piece-level information to the USPS in an approved electronic file format (except for mailers generating barcodes for use on return services products, such as uninsured USPS Returns service packages).

2.1.6 Compliance Quality Thresholds

All mailers who enter commercial parcels must meet the established thresholds for Compliance Quality outlined in Exhibit 2.1.6 to avoid payment of the Package Quality Noncompliance Fee. Failure to meet any compliance quality threshold in Exhibit 2.1.6 will result in the assessment of the Package Quality Noncompliance Fee.

Exhibit 2.1.6 Compliance Quality Thresholds

Note: See Publication 199 for a list of validations for each Compliance Category (AQ, MQ, BQ).

Compliance categories	Compliance codes	Compliance thresholds
Address Quality: Checks for a timely address that validates to a unique 11-Digit DPV or passes the critical validation criteria in Pub 199.	AQ	90
Manifest Quality (Shipping Services file): Checks for a timely manifest file that passes the critical validation criteria in Pub 199.	MQ	94
Barcode Quality: Checks the barcode in the manifest that passes the critical validation criteria in Pub 199	BQ	98

2.1.7 Alternate Approval

Labels not meeting IMpb specifications or other label element standards, but still able to demonstrate acceptable functionality within USPS processes, may be allowed using an alternative approval process authorized by the vice president, Applied Engineering, (See 608.8.1 for contact information.).

* * * * *

210 Commercial Mail Priority Mail Express

213 Prices and Eligibility

1.0 Prices and Fees

* * * * *

1.7 Unmanifested Fee

[Revise the text of 1.7 to read as follows:]

Eligible Priority Mail Express pieces omitted from the manifest are subject to the unmanifested fee (see Notice 123—Price List), unless the piece is subject to the Package Quality Noncompliance Fee as specified in 3.2.

* * * * *

[Add new 1.10 to read as follows:]

1.10 Live Animal and Perishable Handling Fee

Priority Mail Express pieces containing live animals or perishables (*e.g.* fruit, meat) are subject to the nonrefundable Live Animal and Perishable Handling fee (see Notice 123—Price List). This fee is in addition to the Live Animal Transportation fee provided in the Notice 123—Price List, when applicable. For additional information on the Live Animal and Perishable Handling fee see Publication 52, *Hazardous, Restricted, and Perishable, Mail,* (526).

* * * * *

3.0 Basic Eligibility Standards for Priority Mail Express

* * * * *

[Revise the heading of 3.2 to read as follows:]

3.2 Barcode Standards

[Move the text from 3.2 under new heading 3.2.1 to read as follows:]

3.2.1 IMpb Standards

[Revise the renumbered text of 3.2.1 by deleting the second and last sentence.]

All Priority Mail Express pieces (outbound and returns) must bear an Intelligent Mail package barcode (IMpb) prepared under 204.2.0.

[Add new 3.2.2 and 3.2.3 to read as follows:]

3.2.2 IMmb Standards

In addition to the IMpb under 3.2.1, all Priority Mail Express pieces (outbound and returns) must bear an Intelligent Mail matrix barcode (IMmb) prepared under 204.2.0.

3.2.3 Package Quality Noncompliance Fee

Unless otherwise excepted, mailers of mailpieces not meeting the requirements for use of a unique IMpb, and IMmb as outlined in section 204.2.1.8 and Publication 199, Intelligent Mail Package Barcode (IMpb) Implementation Guide for: Confirmation Services and Electronic Payment Systems, will be assessed the Package Quality Noncompliance Fee (see Notice 123-Price List). For details see PostalPro at *https://postalpro.usps.com.*

* * * * *

215 Mail Preparation

* * * * *

2.0 Priority Mail Express 1-Day and 2-Day

2.1 Mailing Label

Priority Mail Express 1-Day and 2-Day items must be labeled as follows:

* * * * *

[Revise the second sentence in item c to read as follows:]

c. * * * The Intelligent Mail package barcode (IMpb) and the Intelligent Mail matrix barcode (IMmb) on the shipping label must have the appropriate service-

type code and banner text above the IMpb barcode used for cremated remains. * * *

* * * * *

220 Commercial Mail Priority Mail

* * * * *

1.7.2 Privately Printed Forms or Labels

[Revise the first and fourth sentence of 1.7.2 to read as follows:]

Except for Certificate of Mailing service using privately printed forms (*i.e.,* facsimiles) as provided under 5.0, if authorized, a mailer may use privately printed extra service forms and labels for domestic mail only, if the forms and labels are nearly identical in design elements and color to the USPS form, with an Intelligent Mail package barcode (IMpb) and human-readable numbers that meet USPS specifications, and an Intelligent Mail matrix barcode (IMmb), in 204.2.0.* * * * * * Mailers generating shipping labels bearing an IMpb and IMmb must also affix the appropriate colored non-barcoded color-coded label for Registered Mail (under 2.1.2) or Certified Mail (under 3.2.1).* * *

[Revise the heading and text of 1.7.3 to read as follows:]

1.7.3 Barcodes

Items for which extra services are added must bear a correct Intelligent Mail package barcode (IMpb) and Intelligent Mail matrix barcode (IMmb).

* * * * *

1.7.5 Legacy Extra-Service Forms

[Revise the last sentence in the introductory text of 1.7.5 to read as follows:]

* * * Mailers using noncompliant versions of the following extra-service forms will be subject to the Package Quality Noncompliance Fee (see Notice 123—Price List):

* * * * *

2.0 Registered Mail

2.1 Basic Standards

* * * * *

2.1.2 Label 200

[Revise the first sentence of 2.1.2 to read as follows:]

Registered Mail must bear the barcoded red Label 200 (see forms at *https://pe.usps.com/*), or a non-barcoded red Label 200–N when a mailer-generated shipping label bearing an IMpb and IMmb under 204.2.0 is also affixed on the same mailpiece.* * *

* * * * *

3.0 Certified Mail Services

* * * * *

3.2 Mailing

3.2.1 PS Form 3800

[Revise the first sentence in the introductory text of 3.2.1 to read as follows:]

Certified Mail must bear the barcoded green label part of the Form 3800 (see forms at *https://pe.usps.com/*), or a non-barcoded green Label 3800–N when a mailer-generated shipping label bearing an IMpb and IMmb, under 204.2.0, is also affixed on the same mailpiece.* * *

* * * * *

4.0 Insured Mail

* * * * *

4.2 Insurance Coverage—Priority Mail, USPS Ground Advantage—Retail, and USPS Ground Advantage—Commercial

Priority Mail pieces (including Priority Mail Return service), USPS Ground Advantage—Retail, and USPS Ground Advantage—Commercial pieces (including USPS Ground Advantage Return service) are insured against loss,

damage, or missing contents, for no more than $100.00 in coverage, subject to the following:

[Revise the text of item a to read as follows:]

a. Insurance coverage is provided against loss, damage, or missing contents and is limited to a maximum liability of $100.00 when the pieces bear an Intelligent Mail package barcode (IMpb) and an Intelligent Mail matrix barcode (IMmb) or USPS retail tracking barcode (see 4.3.4) and the mailer pays retail or commercial prices.

* * * * *

4.3 Basic Standards

* * * * *

4.3.4 Markings and Forms

The treatment of pieces is determined by the insurance amount as described in 4.3.1c and under the following conditions:

[Revise the text of item a to read as follows:]

a. Retail Systems Software (RSS) sites—A label and a receipt will be provided at the retail counter. The label printed at the retail counter will include postage and an Intelligent Mail package barcode (IMpb) and an Intelligent Mail matrix barcode (IMmb) that contains the appropriate service type code for the product and extra service purchased.

* * * * *

7.0 USPS Tracking

* * * * *

7.2 Labels

7.2.1 Types of Labels

* * * Mailers not printing their own privately printed labels must use one of the label options as follows:

* * * * *

[Revise the second sentence of item b to read as follows:]

b. * * * The labels are populated with the product service type code and customer's Mailer Identification (MID) number in the Intelligent Mail package barcode (IMpb) and Intelligent Mail matrix barcode (IMmb).

* * * * *

8.0 USPS Signature Services

8.1 Basic Standards

* * * * *

8.1.2 Standards for Signature Confirmation

For Signature Confirmation with Media Mail, Library Mail, Bound Printed Matter, or Parcel Select pieces meeting the physical standards under 201.7.0, the parcel must meet these additional requirements:

* * * * *

d. Mailers must use one of the following labels:

[Revise the second sentence of item d1 to read as follows:]

1. Retail Systems Software (RSS) sites—* * * The label printed at the retail counter will include postage and an Intelligent Mail package barcode (IMpb) and an Intelligent Mail matrix barcode (IMmb) that contains the appropriate service type code for the product and extra service purchased.

* * * * *

505 Return Services

* * * * *

3.0 USPS Returns Service

3.1 Basic Standards

* * * * *

3.1.3 Postage and Prices

Postage and prices are subject to the following:

[Revise the third and last sentence of item a to read as follows:]

a. * * * USPS Returns service packages are charged postage and fees based on the STC embedded in the IMpb and IMmb and as provided under 3.1.3c. If all or part of the barcodes are unreadable, or the package is unable to be priced based on the data collected, postage will be determined by the Postal Service based on historical data, or default data determined at time of enrollment.

* * * * *

c. The account holder or mailer may obtain extra and additional services as follows:

[Revise the third sentence of item c1 to read as follows:]

1. * * * Additional insurance for Priority Mail Return service and USPS Ground Advantage Return service is available to the account holder for a fee on packages that have the applicable STC embedded into the IMpb and IMmb on the label, and for which the account holder has provided electronic data that supports the value of the merchandise (see 503.4.1a).* * *

* * * * *

3.1.4 Labels

Distribution and preparation of labels are subject to the following:

* * * * *

b. *Label Preparation.* The following provisions apply:

* * * * *

[Revise the text of item b2 to read as follows:]

2. The label must include an IMpb and IMmb (see 204.2.0), accommodate all required information, be legible, and be prepared in accordance with the standards in Publication 199, *Intelligent Mail Package Barcode (IMpb) Implementation Guide for Confirmation Services and Electronic Payment Systems,* available on the PostalPro website at *https://postalpro.usps.com.*

* * * * *

[Revise the text of item b4 to read as follows:]

4. Except for USPS Returns service labels generated by the USPS API or MRA, all returns labels must have a properly constructed IMpb (C01, C05, N02, or N05, as applicable) and IMmb approved by the NCSC.

* * * * *

3.1.5 Noncompliant Labels

[Revise the last sentence of 3.1.5 to read as follows:]

* * * When noncompliant labels, including discontinued labels, are affixed to USPS Returns service packages, the permit holder may be assessed the Package Quality Noncompliance Fee (see Notice 123—Price List), or the appropriate USPS Returns class of mail retail price (*i.e.,* permit holders of Priority Mail Express Returns service packages will be assessed the retail Priority Mail Express price) calculated from the package's initial entry point (first physical scan) in the USPS network to its delivery address.

3.1.6 Enter and Deposit

The following standards apply:

* * * * *

[Revise the last sentence of item b to read as follows:]

b * * * Any such packages deposited in collection boxes may be returned to the sender for the extra service to be purchased appropriately, or it will be processed and the sender charged postage and fees based on the STC embedded in the IMpb and IMmb on the label and as provided under 3.1.4c.

* * * * *

5.0 Bulk Parcel Return Service

* * * * *

5.4 Optional BPRS Label

[Revise the last sentence of 5.4 to read as follows:]

* * * The label is prepared at the mailer's expense and must meet all format standards in the Parcel Labeling Guide available on PostalPro at *https://postalpro.usps.com,* including an IMpb

and IMmb meeting the standards in 204.2.0.

* * * * *

507 Mailer Services

* * * * *

5.0 Package Intercept

* * * * *

5.3 Adding Extra Services

[Revise the third sentence in the introductory text of 5.3 to read as follows:]

* * * The relabeled item will be assigned a new barcode applicable to the extra service purchased.* * *

* * * * *

600 Basic Standards for All Mailing Services

601 Mailability

1.0 General Standards

* * * * *

1.2 Overweight Items or Oversize Items

* * * * *

1.2.3 Fee

[Revise the text of 1.2.3 to read as follows:]

Except for an overweight or oversize item discovered and picked up at the same facility where it was entered, the overweight/oversize item fee of $200 will be assessed and must be paid before release of the item. The $200 overweight or oversize item fee may be paid by any authorized retail payment method or through *PostalOne!.*

* * * * *

604 Postage Payment Methods and Refunds

* * * * *

9.0 Exchanges and Refunds

* * * * *

9.2 Postage and Fee Refunds

* * * * *

9.2.4 Postage and Fee Refunds Not Available

Refunds are not made for the following:

* * * * *

[Revise 9.2.4 by adding an item j to read as follows:]

j. For the Package Intercept per-piece fee once the USPS successfully intercepts the mailpiece (507.5.2) or the Live Animal and Perishable Handling fee once the piece is entered in the network.

* * * * *

609 Filing Indemnity Claims for Loss or Damage

1.0 General Filing Instructions

* * * * *

1.2.2 Eligibilty

Eligibility for mailers to submit claims using the Bulk Indemnity Claims feature is based on the following:

* * * * *

[Revise the text of item b to read as follows:]

b. IMpb and IMmb compliance history.

* * * * *

1.3 Who May File

A claim may be filed by:

* * * * *

[Revise the text of item c to read as follows:]

c. Only the account holder, for USPS Returns packages that are insured as identified by the account holder's mailer identification (MID) and the applicable STC for insurance imbedded into the IMpb and IMmb on the label, and for which the account holder has provided electronic data that supports the value of the merchandise being returned (see 503.4.3.1a).

* * * * *

700 Special Standards

* * * * *

705 Advanced Preparation and Special Postage Payment Systems

* * * * *

18.0 Priority Mail Express Open and Distribute and Priority Mail Open and Distribute

* * * * *

18.5 Preparation

* * * * *

18.5.7 Address Label Service Barcode Requirement

[Revise first and third through fifth sentences in the introductory text of 18.5.7 to read as follows:]

An electronic service barcode must include an Intelligent Mail package barcode (IMpb) and Intelligent Mail matrix barcode (IMmb) (eVS approved mailers) symbology for Priority Mail Express Open and Distribute, and the IMpb and IMmb symbology for Priority Mail Open and Distribute in the address label.* * * * * * Priority Mail Express Open and Distribute IMpb and IMmb labels must include service type code ''723.'' For Priority Mail Open and Distribute, the IMpb and IMmb must include service type code ''123.'' The human-readable text ''USPS SCAN ON ARRIVAL'' must appear above the IMpb barcode.* * *

* * * * *

[Add an IMmb in the address block to the left of the delivery address to the label graphics in Exhibits 18.5.8 through 18.5.12.]

* * * * *

Index

BILLING CODE 7710–12–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

42 CFR Part 121

RIN 0937–AA13

Organ Procurement and Transplantation: Implementation of the HIV Organ Policy Equity (HOPE) Act

AGENCY: Office of the Assistant Secretary for Health (OASH) and Health Resources and Services Administration (HRSA), Department of Health and Human Services (HHS).

ACTION: Final rule.

SUMMARY: The Department of Health and Human Services (HHS) amends the regulations implementing the National Organ Transplant Act of 1984, as amended (NOTA), to remove clinical research and institutional review board (IRB) requirements (''research and IRB requirements'') for transplantation of kidneys and livers from donors with human immunodeficiency virus (HIV) to recipients with HIV. As allowed by the HIV Organ Policy Equity (HOPE) Act, the Secretary of HHS determines that participation in such clinical research should no longer be a requirement for transplantation of kidneys and livers from donors with HIV to recipients with HIV. This final rule serves as publication of the

Secretary's determination and amends the regulations to reflect this determination. This final rule also serves as publication of the Secretary's direction to the Organ Procurement and Transplantation Network (OPTN) to adopt and use standards of quality with respect to kidneys and livers from donors with HIV to ensure that HOPE Act kidney and liver transplants are subject to OPTN policies that are consistent with NOTA, and in a way that ensures the revised requirements for transplantation of such organs will not reduce the safety of organ transplantation.

DATES: This rule is effective November 27, 2024.

FOR FURTHER INFORMATION CONTACT: Frank Holloman, Director, Division of Transplantation, Health Systems Bureau, HRSA, 5600 Fishers Lane, Room 08W63, Rockville, MD 20857; by email at *donation@hrsa.gov;* or by telephone (301) 443–7577.

SUPPLEMENTARY INFORMATION:

I. Public Participation

On September 12, 2024, HHS published a notice of proposed rulemaking (NPRM) in the **Federal Register** (89 FR 74174) proposing both that the Secretary of HHS determine that participation in clinical research should no longer be required for transplantation of kidneys and livers from donors with HIV to recipients with HIV, and that the HHS regulations at 42 CFR part 121 implementing the HOPE Act be amended consistent with this proposed determination. The NPRM provided for a 30-day comment period, and HHS received 56 comments raising a variety of issues. HHS has carefully considered all comments in developing this rule, as outlined in section III, below, and presents a summary of all significant comments and Departmental responses.

II. Background

A. HHS Oversight of Organ Allocation and Transplantation

Within HHS, HRSA is responsible for overseeing the operation of the Nation's OPTN, including assisting in the equitable allocation of donor organs for transplantation. 42 U.S.C. 274(b)(2)(D). The allocation of organs is guided by the OPTN in accordance with NOTA and with the HHS regulations governing the operation of the OPTN in 42 CFR part 121. The OPTN is also charged with developing policies on many subjects related to organ donation, procurement, and transplantation, which include establishing standards of quality pertaining to organs procured for use in transplantation. 42 U.S.C. 274(b)(2)(E).

B. HOPE Act Requirements and Implementation

The enactment of the HOPE Act in 2013, Public Law 113–51, amended NOTA to eliminate the prohibition in the United States on transplantation of organs from persons with HIV, allowing transplantation of these organs if certain requirements are satisfied. Under the HOPE Act, organs from donors with HIV may be transplanted only in recipients living with HIV prior to receiving such an organ. 42 U.S.C. 274(b)(3)(A). Further, the HOPE Act requires that transplants of HIV-positive organs occur only in recipients with HIV who are participating in IRB-approved research protocols that adhere to certain criteria, standards, and regulations. 42 U.S.C. 274(b)(3)(B)(i). However, the Secretary may lift the research and IRB requirements if the Secretary has determined that participation in such clinical research, as a requirement for such transplants, is no longer warranted. 42 U.S.C. 274(b)(3)(B)(ii).

The HOPE Act outlines the process by which the Secretary may make such a determination under 42 U.S.C. 274(b)(3)(B)(ii). Specifically, the Secretary must routinely review the results of scientific research, in conjunction with the OPTN, to determine whether the results warrant revision of the OPTN standards of quality regarding organs from donors with HIV. If the Secretary determines that those standards of quality should be revised, the Secretary must direct the OPTN to revise the standards. 42 U.S.C. 274f–5(c)(2). The Secretary is also required to revise the regulatory provision implementing the HOPE Act, 42 CFR 121.6, upon determining that revisions to the OPTN standards of quality are warranted. 42 U.S.C. 274f–5(c)(3).

HRSA published a final rule implementing the HOPE Act on May 8, 2015. 80 FR 26464.[1] The 2015 rule amended 42 CFR 121.6 to permit transplants of organs from donors with HIV in accordance with the HOPE Act requirements.

The HOPE Act also directs the Secretary to develop and publish criteria for the conduct of research relating to transplantation of organs from donors with HIV into persons who are living with HIV before receiving an HIV-positive organ. 42 U.S.C. 274f–5(a). Subsequent to publication of the 2015 rule implementing the HOPE Act, the National Institutes of Health (NIH) published the *Final Human Immunodeficiency Virus (HIV) Organ Policy Equity (HOPE) Act Safeguards and Research Criteria for Transplantation of Organs Infected With HIV,* on November 25, 2015. 80 FR 73785.[2]

In general, the NIH Research Criteria include safeguards designed to protect both donors and recipients, as well as healthcare providers at Organ Procurement Organizations (OPOs) and transplant centers. Specifically, and in addition to the requirements in established OPTN transplant policies, donors with HIV must not have evidence of opportunistic infections and recipients must have a stable CD4+ T-cell count and established HIV suppression and control on effective antiretroviral therapy (ART). The study team must describe the anticipated effective HIV treatment plan and ART regimen for patients receiving an organ with a potentially different HIV strain. Antiretroviral drugs suppress viral replication; however, HIV may develop resistance to a specific drug necessitating a different medication regimen to maintain effectiveness. Transplant hospitals conducting HOPE Act operations are required to have expertise in transplants provided to recipients with HIV. OPOs are required to have procedures in place to address working with families of deceased donors who lived with HIV and a biohazard plan to address viral exposure and potential transmission. Finally, the Research Criteria establish uniform outcome measures that must be incorporated in the research design so that data on HOPE Act transplants can be analyzed consistently and data collection is harmonized to inform future implementation of the HOPE Act.

Publication of both the final rule implementing the HOPE Act and the NIH Research Criteria necessitated that the OPTN update its standards of quality for HIV-positive organ transplants and coordinate related OPTN policies. On November 21, 2015, the OPTN published an open variance (an experimental policy that tests

Final Human Immunodeficiency Virus (HIV) Organ Policy Equity (HOPE) Act Safeguards and Research Criteria for Transplantation of Organs Infected With HIV. 80 FR 73785 (Nov. 25, 2015). *https://www.federalregister.gov/documents/2015/11/25/2015-30172/final-human-immunodeficiency-virus-hiv-organ-policy-equity-hope-act-safeguards-and-research-criteria.*

methods of improving organ allocation) providing standards for transplant hospitals conducting HOPE Act transplants.[3] The OPTN expanded the variance in 2019 to include all solid organs,[4] and extended the variance through January 2026, to provide for the gathering of data and subsequent evaluation of the outcomes of HOPE Act transplants.[5]

C. Review of Research Results

The Secretary, in conjunction with the OPTN, reviewed the results of scientific research to determine whether the results warrant revision to the OPTN standards of quality with respect to organs from donors with HIV and the safety of transplanting an organ from a donor with a particular strain of HIV into a recipient with a different strain of HIV. 42 U.S.C. 274f–5(c)(1). This review allowed the Secretary to determine if the safety and efficacy of HOPE Act transplants are comparable to non-HOPE Act transplants and, if warranted, to further determine whether such transplants should be conducted outside of a research setting.

1. OPTN Review and Recommendations

In 2018, the OPTN initiated a review of research results and data relevant to HOPE Act transplants, forming a working group for this purpose.[6] The OPTN's assessment as to whether revision is warranted for the OPTN standards of quality applicable to HOPE Act transplants was based primarily on (1) the review of studies demonstrating the safety and outcomes of organ transplantation in recipients with HIV and (2) a recognition that the removal of the general research and IRB requirements for HOPE Act transplants could expand access to organ transplantation for all patients regardless of their HIV status. In this context, safety is measured by accidental or inadvertent transmission of HIV in the performance of HOPE Act transplants. (Of note, there were no recorded accidental or inadvertent transmission events in the data reviewed by the OPTN.) Outcomes are determined primarily by transplant recipient or graft survival, compared to non-HOPE Act transplants or transplant recipients without HIV. Measures (*e.g.,* CD4+ T-cell counts, ART resistance, and detectable HIV viral loads) or variables such as opportunistic infections, HIV superinfection, malignancy, rejection, or graft failure may also factor into comparative outcomes in the short and long term.

The OPTN used three primary sources of data to assess HOPE Act transplants, each of which contributed to the recommendation the OPTN provided to the Secretary: (1) the research results of two pilot studies evaluating HOPE Act kidney transplants and liver transplants, and the progress of two ongoing NIH-funded clinical trials evaluating HOPE Act kidney transplants and liver transplants, (2) the research results of an older clinical trial analyzing safety and efficacy of kidney transplants in a small cohort of transplant recipients with HIV, and (3) OPTN data on the outcomes of all HOPE Act transplants.

Pilot Studies

A multicenter pilot study was launched in 2016 to determine safety and efficacy of HOPE Act kidney transplants. The HOPE In Action Consortium of 14 transplant centers conducting HOPE Act kidney transplants found no major differences between HOPE Act transplants of a kidney from a donor with HIV to a recipient with HIV and non-HOPE Act kidney transplants from a donor without HIV to a recipient with HIV.[7] Rates of opportunistic infections and infections requiring hospitalization post-transplant did not differ significantly across the study arms. Rejection was common for the study participants in the first year after transplant, occurring in 50 percent of recipients who received a kidney from a donor with HIV and 29 percent of recipients who received a kidney from a donor without HIV, but this result was not statistically significant. The insignificance of the result is due, in part, to the relatively small sample size. This finding is consistent with the earlier clinical trial of kidney transplantation in recipients with HIV, discussed in the next subsection of this preamble, which also found higher rejection rates in HIV allografts. The pilot study investigators noted that despite rejection rates, 1-year renal function was excellent for both study populations. Limitations of the pilot study include study size (75 transplants), which investigators attributed to the lower number of HOPE Act transplants conducted than the projected potential. In general, the study authors concluded that there is a survival benefit of transplantation for kidneys from donors with HIV to recipients with HIV, and that the availability of HOPE Act kidney transplants has the potential to mitigate disparities for a vulnerable population that faces lower access to transplant and higher waitlist mortality. The investigators further concluded that the observed trend toward higher rejection, albeit not statistically significant, for transplanted organs from donors with HIV merited further investigation.

A separate pilot study conducted by HOPE In Action Consortium participants compared HOPE Act transplants of a liver from a donor with HIV to a recipient with HIV and non-HOPE Act liver transplants from a donor without HIV to a recipient with HIV, and found that there were no differences in one-year graft survival, rejections, HIV breakthrough or severe adverse events. While the recipients of HOPE Act liver transplants presented with more opportunistic infections, infectious hospitalizations, and cancer, compared to non-HOPE Act liver transplants, the investigators determined that these findings warrant further investigation and perhaps consideration of additional donor and recipient infection and malignancy monitoring. In general, the investigators concluded that the transplant outcomes were more favorable compared to historical data on liver transplantation in recipients with HIV, who are known to experience higher rates of opportunistic infections and other complications. In addition, it was noted that co-infections are more common among both donors and recipients with HIV and confound the results. (Results of non-HOPE Act transplants have confirmed that recipients with both HIV and a co-infection have lower survival rates. Therefore, the presence of co-infections could independently impact survival and other variables measured by studies on HOPE Act transplants.)

[7] Durand CM, Zhang W, Brown DM, Yu S, Desai N, Redd AD, Bagnasco SM, Naqvi FF, Seaman S, Doby BL, Ostrander D, Bowring MG, Eby Y, Fernandez RE, Friedman-Moraco R, Turgeon N, Stock P, Chin-Hong P, Mehta S, Stosor V, Small CB, Gupta G, Mehta SA, Wolfe CR, Husson J, Gilbert A, Cooper M, Adebiyi O, Agarwal A, Muller E, Quinn TC, Odim J, Huprikar S, Florman S, Massie AB, Tobian AAR, Segev DL; HOPE in Action Investigators. A prospective multicenter pilot study of HIV-positive deceased donor to HIV-positive recipient kidney transplantation: HOPE in action. Am J Transplant. 2021 May;21(5):1754–1764.

This pilot study was the first multicenter prospective study reporting results of U.S. transplants of livers from donors with HIV to recipients with HIV and comparing outcomes according to donor HIV status in order to assess attributable risk. The investigators recognized as a limitation that the pilot study was relatively small (45 transplants), and noted that increases among HOPE Act liver transplant recipients in mortality, cytomegalovirus (CMV) viremia, infectious hospitalizations, and cancer, were observed. However, they note that these results should be considered in light of the relatively high rate of mortality for recipients awaiting liver transplant. For these patients, the benefit of undergoing a HOPE Act liver transplant may outweigh the risks of living with HIV and end stage liver disease.[8]

Ongoing Clinical Trials

The OPTN further considered the progress of an NIH-funded study on HOPE Act kidney transplants that was ongoing at the time of the OPTN's analysis. The NIH-funded U01 HOPE Act kidney transplant clinical trial was designed to analyze rejection and long-term outcomes of kidney transplantation for recipients with HIV. While the study was subsequently expanded, at the time of the OPTN's consideration the study was designed to compare outcomes of 100 HOPE Act kidney transplant recipients to 100 kidney transplant recipients with HIV who received an HIV-negative organ at 15 transplant centers, adding to the cohort accrued from the pilot studies discussed in the immediately preceding section of this preamble.[9] The results from this clinical trial were published in October 2024 and are described in section 3, ''Additional Research Results Published Subsequent to Issuance of the NPRM,'' below. Of note, these investigators were awarded an expansion grant to evaluate longer-term outcomes in HOPE Act kidney transplants.

Similarly, the OPTN considered the progress of an ongoing U01 HOPE Act liver transplant clinical trial designed to compare outcomes between HOPE Act transplants and non-HOPE Act transplants of livers from donors without HIV. The study has enrolled 40 individuals in each group over 3 years at 16 transplant centers,[10] reaching target enrollment, and now is in the phase of patient follow-up. The final results are not yet published.

Other Research Results

Prior to the initiation of the pilot studies and clinical trials discussed previously, a clinical trial examined outcomes of 150 kidney transplants in recipients with HIV conducted between November 2003 and June 2009. The investigators found both recipient and graft survival rates were high with no important increases in complications associated with HIV.[11] As noted in the description of the findings of the HOPE Act kidney transplant pilot study described in the immediately preceding subsection of this preamble, the investigators observed what they described as ''unexpectedly higher'' rejection rates in the transplant recipients with HIV participating in the study, compared with kidney transplant recipients who are not living with HIV. This higher rejection rate was blunted in transplant recipients that received anti-T-cell antibody medication at the time of transplantation. Studies of non-HOPE Act transplants have confirmed that such immunosuppressive regimens can reduce the risk of rejection for kidney transplant recipients with HIV.[12]

OPTN Data—HOPE Act Transplant Outcomes

Data from HOPE Act transplants is compiled by the OPTN on a quarterly basis, including waitlist registrations and counts of HOPE Act transplants, and is routinely reviewed. Prior to issuing its recommendation to the Secretary, the OPTN reviewed data on over 300 patients included in the HOPE Act research variance for which no case was halted, paused, or substantially amended to address safety concerns.

OPTN Recommendations

Based on the assessment of the above-described research results and data, in 2021 the OPTN recommended to the Secretary that the research and IRB requirements of the HOPE Act be removed for all organs.[13] The OPTN specifically noted that in its review of the data safety monitoring review board (DSMB) reports from five years of HOPE Act transplants, with over 300 persons with HIV receiving HOPE Act transplants, no DSMB identified patient safety concerns in HOPE Act research. Further, there have been no reports made to the OPTN of safety issues regarding HOPE Act transplants among OPO, hospital, or transplant center personnel or in patients, in donor hospitals, or transplant hospitals. The OPTN noted that it was the opinion of the OPTN Safety Review Group that the research and IRB requirements for HOPE Act transplants present a barrier to fully realizing the potential of organ transplantation from donors with HIV to recipients with HIV, as the research and IRB requirements limit access to such transplants.[14] [15]

2. Additional Research Results Published Subsequent to the OPTN Assessment

Prior to publication of the NPRM, the Secretary further considered additional research published providing more evidence for the safety of organ transplantation from donors with HIV to recipients with HIV. In general, this research demonstrates that the safety and outcomes of kidney and liver HOPE Act transplants are well established, with over 517 HOPE Act kidney and liver transplants conducted to date.

One prospective study published in 2022, examined 92 HOPE Act donors contributing 177 organs, which included 131 kidneys and 46 livers, to understand the characteristics of donors with HIV in terms of clinical,

immunologic, and virologic profiles to ensure the safety of transplantation. Of these donors, 58 were donors with HIV and 34 were donors without HIV. For those donors with known HIV infection, 90 percent received ART treatment. The study concluded that although drug resistant mutations (DRMs) were common, DRMs that could compromise the effectiveness of certain ART were rare, reassuring the safety of using organs from donors with HIV in recipients with HIV. Further, the study also found that there were no major differences in comorbidities between recipient groups that received an organ from a donor with HIV compared to those that received an organ from a donor without HIV.[16]

In a March 2024 analysis of the impact of the HOPE Act on access to kidney transplantation for recipients with HIV, the authors found 70 percent of HOPE Act recipients received a kidney transplant during the 4.5 year study period versus 43 percent of non-HOPE Act transplant candidates at the same center.[17] Furthermore, those who received transplants in HOPE Act trials had shorter estimated wait times (median 10.3 months versus 60.8 months), and after adjusting for relevant allocation factors including time on dialysis, kidney transplantation was 3.3-fold higher for those who received an organ from a donor with HIV.[18] These findings suggest that the availability of kidneys from donors with HIV increases access to transplantation among people with HIV. Given that people with HIV who are living with end stage renal disease (ESRD) have higher mortality than people with ESRD who are not also living with HIV,[19] in HHS's view, this data illustrates the benefit of HOPE Act kidney transplants for this vulnerable population.

The HOPE in Action Consortium also has published information on the positive outcomes of living HOPE Act kidney donors. In a case series of three transplants, investigators reported that two of the three donors developed adverse events, but findings suggested these were medically managed and that HIV RNA copies and CD4+ T-cell counts were stable at two to four years post-transplant.[20]

There is significantly less data on non-kidney and non-liver HOPE Act transplants. Since 2019, when the OPTN's HOPE Act policy was expanded to include all solid organs, only three heart transplant programs have received approval to perform HOPE Act transplants. To date, just three heart transplants have been conducted, including one heart-kidney transplant.[21] [22] No HOPE Act transplants have been recorded among recipients in need of other organs. The lack of data makes it difficult to assess the safety and outcomes of HOPE Act transplants other than kidney and liver HOPE Act transplants.

3. Additional Research Results Published Subsequent to Issuance of the NPRM

Since publication of the NPRM, results from a new, groundbreaking study were published in October 2024.[23] In the largest prospective, observational, multicenter study to date, researchers compared transplantation of kidneys at 26 U.S. centers from deceased donors with HIV and donors without HIV to recipients with HIV. The study enrolled 408 transplantation candidates, of whom 198 received a kidney from a deceased donor; 99 received a kidney from a donor with HIV and 99 from a donor without HIV. This study was larger than the HOPE Act pilot study, described above, and was designed to assess whether kidney transplantation from donors with HIV to recipients with HIV would be noninferior to transplantation from donors without HIV. The study further assessed safety and post-transplantation complications.

The primary outcome assessed was a safety outcome (a composite of death from any cause, graft loss, serious adverse event, HIV breakthrough infection, persistent failure of HIV treatment, or opportunistic infection) for noninferiority (margin for the upper bound of the 95% confidence interval, 3.00). Researchers found an adjusted hazard ratio of 1.00 for the primary composite outcome, demonstrating noninferiority of kidney transplantation from donors with HIV as compared to kidney transplantation from donors without HIV.

Secondary outcomes included overall survival, survival without graft loss, rejection, infection, cancer, and HIV superinfection. The following secondary outcomes were similar whether the donor had HIV or not: overall survival at 1 year (94% vs. 95%) and 3 years (85% vs. 87%), survival without graft loss at 1 year (93% vs. 90%) and 3 years (84% vs. 81%), and rejection at 1 year (13% vs. 21%) and 3 years (21% vs. 24%).

The incidence of serious adverse events, infections, and cancer was similar in all groups studied. Of note, the incidence of HIV breakthrough infection was approximately three times higher among HOPE Act transplants (incidence rate ratio, 3.14; 95% CI, 1.02 to 9.63), which the researchers attributed to non-adherence to antiretroviral therapy. In all participants with HIV breakthrough infection, viral suppression was regained. A single case of potential HIV superinfection or dual infection occurred among the 58 recipients in this group, without HIV breakthrough infection or clinical consequences.

Haidar, C.B. Small, C.A.Q. Santos, J. Schaenman, J. Baddley, D. Wojciechowski, E.A. Blumberg, K. Ranganna, O. Adebiyi, N. Elias, J.A. Castillo-Lugo, E. Giorgakis, S. Apewokin, D. Brown, D. Ostrander, Y. Eby, N. Desai, F. Naqvi, S. Bagnasco, N. Watson, E. Brittain, J. Odim, A.D. Redd, A.A.R. Tobian, and D.L. Segev, for the HOPE in Action Investigators. Safety of Kidney Transplantation from Donors with HIV. New England Journal of Medicine. 2024 Oct 17; 391(15): 1390–1401.

Among the acknowledged limitations of this study are the lack of true randomization, which the authors note was not possible due to the U.S. national organ allocation process. The authors further note that study participants were equally eligible for a kidney from a donor with or a donor without HIV, and that study group assignment was determined according to whichever organ was available first. The study group whose donors did not have HIV served as a control group and included 27 donors who were treated as having HIV during allocation but did not; in the authors' estimation, recipients of kidneys from these donors represent an ideal counterfactual control group. Immunosuppression and prophylaxis were heterogeneous; however, these factors were balanced between the two groups and reflect real-world practice, which the authors assert increases the generalizability of the study results.

This study is an important addition to the evidence base for HOPE Act kidney transplants in that the finding that kidney transplantation from donors with HIV was noninferior to kidney transplantation from donors without HIV with respect to the primary safety outcome, and that the incidence of serious adverse events, infections, surgical or vascular complications, and cancer was similar in the two groups, supporting the safety of HOPE Act kidney transplants.

4. HHS Advisory Committee on Blood and Tissue Safety and Availability Recommendations

The Secretary also considered the HHS Advisory Committee on Blood and Tissue Safety and Availability (ACBTSA) recommendation that the Secretary eliminate research and IRB requirements for all HOPE Act transplants. The ACBTSA working group developing this recommendation considered the OPTN recommendation and the results of relevant scientific research. While the ACBTSA working group proposed that the full committee recommend that the Secretary eliminate research and IRB requirements for all HOPE Act transplants, the working group expressed concern about the elimination of research and IRB requirements for non-kidney and non-liver HOPE Act transplants,[24] and whether there was sufficient data collected on other organs to justify a full adoption of the OPTN's recommendation.

The ACBTSA subsequently recommended that the Secretary act to lift the statutory research and IRB requirements for all HOPE Act transplants and at the same time recommended that the Secretary direct the OPTN to adopt, for HOPE Act transplants of organs other than kidneys and livers, organ-specific policies imposing additional requirements for the conduct of these transplants, including collecting safety and outcomes data for transplant candidates and recipients of such transplants through an IRB-approved research protocol.

These recommendations were later approved by the HHS Blood, Organ, and Tissue Senior Executive Council (BOTSEC), an advisory forum for senior leadership from HHS entities involved in blood, organ, and tissue safety and availability.

Upon review of the OPTN, ACBTSA and BOTSEC recommendations, and in consideration of the results of relevant scientific research, the Secretary proposed to determine that the research and IRB requirements for kidney and liver HOPE Act transplants are no longer warranted. The NPRM incorporated this approach, publishing the Secretary's proposed determination for comment, and proposing regulatory changes to exempt HOPE Act kidney and liver transplants from research and IRB requirements. In an effort to avoid the use of stigmatizing language, the NPRM further proposed wording changes to references to persons, donors, and recipients with HIV, and organs from individuals with HIV.

III. Discussion of Public Comment

HHS received 56 comments from individuals and organizations involved in healthcare, organ transplantation, HIV advocacy, health equity, LGTBQIA+ health, and HOPE Act clinical research. The comments received expressed overwhelming support for the finalization of this rule. A total of 55 of the 56 commenters expressed support for the proposed rule. One commenter did not support the proposed rule. Additional consideration was given to comments that were expressed by multiple individuals and entities. HHS has considered all of the comments, and, in response to comments regarding the use of non-stigmatizing language, made changes to the final rule as suggested by commenters.

Themes identified in many comments include that the proposed rule, if finalized, could reduce morbidity and mortality for people with HIV, reduce barriers to organ transplantation, increase organ utilization, reduce wait times for people on organ transplant wait lists, and reduce stigma and discrimination associated with HIV. One commenter indicated that, given that only 31 of the 250 transplant centers in the U.S. currently participate in HOPE Act clinical trials, access to these vital transplants is geographically limited: the proposed rule would encourage more transplant centers to offer HOPE Act transplants, enabling more equitable access to life-saving care for people with HIV across the country and helping to generate additional clinical data to enhance understanding and inform best practices in transplant care for people with HIV. In addition, numerous commenters noted that research has sufficiently demonstrated that HOPE Act kidney and liver transplants are both safe and effective.

The NPRM specifically invited public comment on the future Secretarial direction to the OPTN to revise the standards of quality concerning kidneys and livers from donors with HIV. Some commenters provided specific suggestions for the Secretary's direction, and other comments received appear relevant to HHS's consideration as to the content of the direction to the OPTN. These comments are noted below in both the subheading discussing the comments specifically provided on the content of the direction to the OPTN, and the subheadings relating to the subject matter of the comment. HHS has considered these comments in the development of the Secretary's direction to the OPTN, which is provided in section V, ''Implementation Considerations,'' below.

Multiple commenters also provided specific suggestions for the content of the revised NIH Research Criteria, and other comments received appear relevant to the content of the Research Criteria. These comments are noted below in both the subheading discussing the comments specifically provided on the Research Criteria, as well as in the subheadings relating to the subject matter of the comment when the commenter did not specifically reference the Research Criteria. All comments relating to the content of the revised Research Criteria were provided to NIH for consideration in the development of the revised Research Criteria.

Detailed descriptions of comments on specific aspects of the NPRM preamble and the proposed regulation, and HHS's responses to these comments, are provided below.

[24] HHS Advisory Committee on Blood and Tissue Safety and Availability. 2022. Fifty-Sixth ACBTSA Meeting November 17, 2022—Meeting Summary. *https://www.hhs.gov/oidp/advisory-committee/blood-tissue-safety-availability/meeting-summary/2022-11-17/index.html.*

Removal of Research and IRB Requirements for All Organs

Several commenters suggested that the Secretary should consider in this rule, or in a future rulemaking, the removal of research and IRB requirements for all HOPE Act organ transplants instead of removing research and IRB requirements only for kidney and liver transplants. Some of these commenters referenced the October 2021 letter from the OPTN to the Secretary providing that the OPTN had not identified any patient safety concerns involving HOPE Act transplants and that no research protocols applicable to HOPE Act transplants had been stopped, paused, or substantially altered due to patient safety concerns.[25] Many of these comments suggested that the available data was sufficient to prove the safety and efficacy of HOPE Act transplantation for all organ transplants, not only kidney and liver transplants. Others suggested that HHS should continue supporting research on HOPE Act transplants with the goal of generating sufficient evidence to make the case for a future Secretarial determination and rulemaking process that would remove the research and IRB requirements for all HOPE Act transplants.

HHS response: In the process leading up to the development of the NPRM, the Secretary considered whether to eliminate research and IRB requirements for all HOPE Act transplants. As a part of this process, the Secretary considered the October 2021 communication from the OPTN referenced by commenters, recommendations of advisory bodies, and research results and outcomes data on HOPE Act transplants. The vast majority of this data was generated from kidney and liver transplants, and, as discussed in the NPRM preamble, the Secretary notes the limited evidence demonstrating safety and efficacy of non-kidney and non-liver HOPE Act transplants. In order to lift the research and IRB requirements for HOPE Act transplants, the HOPE Act requires that the Secretary must determine that participation in clinical research is no longer warranted. 42 U.S.C. 274(b)(3)(B)(ii). In the absence of research results and robust outcomes data relevant to HOPE Act transplants of organs other than kidneys and livers, the Secretary does not have sufficient information about transplants of organs other than kidneys and livers on which to base the statutorily required determination. For this reason, the NPRM proposal to lift the research and IRB requirements only for HOPE Act kidney and liver transplants is incorporated in this final rule. As required by the HOPE Act, the Secretary will periodically review the results of additional scientific research relevant to transplants of organs other than kidneys and livers, and will reevaluate in the future whether the evidence is robust enough to demonstrate that other types of HOPE Act transplants need not be conducted in the research context. HHS makes no changes to the regulatory proposal in response to these comments.

Language Regarding HIV

Many commenters expressed support for the proposed revisions to the regulatory language used when referencing people, donors, and recipients with HIV. In general, commenters suggested that the proposed changes are more respectful, reflect a person-centered approach, and help to combat stigma associated with HIV. Others noted that these wording changes help to create a more inclusive healthcare environment.

One commenter requested that the proposed modification to 42 CFR 121.6 regarding references to donor organs be changed from ''donor organ(s) with HIV'' to ''organ(s) from donors with HIV.'' The commenter stated that, in their view, the term ''organs from donors with HIV'' is accurate and precise, stigma-reducing, and reflects a person-first approach in describing these donated organs.

HHS response: HHS appreciates this feedback, and includes the regulatory revisions in this final rule as proposed with regard to references to people, donors, and recipients with HIV. Further, HHS concurs with the suggested revision provided by the commenter with respect to the references to donor organs, and has incorporated this suggested revision and other similar revisions in the final rule at 42 CFR 121.6(b)(1)(ii)(B) introductory text, (b)(1)(ii)(B)(*1*) and (*2*), and (b)(2).

Ongoing Data Monitoring

Multiple commenters expressed support for efforts to monitor outcomes of HOPE Act transplants, both for patient safety and to develop evidence for the safety and efficacy of HOPE Act transplants.

Commenters addressing patient safety indicated that while the proposed rule may streamline the transplant process and increase the availability of organs, patient safety must be the top priority and rigorous safety standards must continue to apply. Several commenters noted that areas needing further attention, such as monitoring for rejection, malignancy, and infection, do not overshadow the overall favorable outcomes for HOPE Act kidney and liver transplants. Commenters emphasized the importance of continued monitoring of outcomes for these transplants by the OPTN, and that transparency and public communication of these outcomes are critical to maintaining trust and ensuring the ongoing success of HOPE Act transplant programs. Commenters indicated that application of the NIH Research Criteria has provided essential protections with regard to outcomes monitoring for HOPE Act kidney and liver transplants, and urged continued monitoring of HOPE Act transplants to ensure these protections are maintained.

Other commenters expressed that data monitoring could help HOPE Act transplant recipients and HOPE Act living donors who may need to be monitored for the development of chronic or end-stage conditions. For example, one commenter noted that living kidney donors ''are already at higher risk of kidney disease and will now only have one kidney.''

Commenters addressing evidence development noted that monitoring and evaluation of HOPE Act transplants may help develop evidence that will inform future policy, including a potential future implementation of the HOPE Act to remove research and IRB requirements for all HOPE Act organ transplants.

Several commenters indicated that current data monitoring requirements applicable to all organ transplants are sufficient. One commenter indicated that there is no reason to continue monitoring HOPE Act kidney and liver transplant outcomes above and beyond the baseline safety and outcomes monitoring for all organ transplants in the United States. One commenter indicated that the OPTN structure and outcome data collected are sufficient in their current state to provide oversight for all organs. Another commenter indicated comfort with appropriate oversight and data management by the organizations designated to oversee transplant services on a national level, which could include comprehensive reporting systems to track outcomes and address any issues promptly. The commenter further expressed an expectation that this information be made available to the public is a transparent manner.

HHS response: HHS notes that the final rule does not affect existing data

[25] Cooper M. ''OPTN Letter to Secretary Becerra on the HOPE Act.'' 2021 Oct 29. *https://optn.transplant.hrsa.gov/media/ueyjdfnd/hope-act-letter.pdf.*

monitoring or evaluation requirements for HOPE Act transplants, as these are determined by OPTN policy and the NIH Research Criteria. HHS agrees that patient safety remains a paramount concern and that appropriate safety standards apply to protect organ donors and transplant recipients. Further, HHS expects to utilize data on HOPE Act transplant outcomes in its ongoing evaluation of the HOPE Act. These comments were provided to the NIH working group for consideration in the development of revisions to the Research Criteria. Further, HHS considered these comments in developing the Secretary's direction to the OPTN to revise the OPTN standards of quality embodied in OPTN policy regarding organs from donors with HIV. HHS makes no changes to the regulatory proposal in response to these comments.

Standards for Transplant Centers Performing HOPE Act Transplants

Several commenters provided suggestions for transplant centers that are seeking to participate in HOPE Act transplants. One commenter requested that HHS evaluate all outstanding requests by transplant centers to participate in HOPE Act transplants, and approve qualifying transplant centers as soon as possible to both expand access to care and to generate additional data on the HOPE Act transplants they perform. The commenter further requested that HHS explore providing grants designed to build the capacity at transplant centers such that more transplant centers will be able to meet the minimum requirements necessary to become HOPE Act transplant centers.

HHS response: Thank you for these suggestions. While no changes have been made to the regulatory proposal in response to these comments, HHS will consider these suggestions in the Department's ongoing approach to implementation of the HOPE Act.

Informed Consent and Autonomy of Transplant Recipients

Some commenters expressed the desire that, if HHS finalizes the proposed rule, that HHS take steps to prioritize ethical considerations relevant to the autonomy of donors and recipients. In particular, commenters asked that transplant centers maintain meaningful processes to provide patients with the opportunity to provide informed consent, and that transplant candidates with HIV retain the option to elect a non-HOPE Act transplant instead of a HOPE Act transplant.

HHS response: This rule does not affect existing OPTN policies that require that informed consent is obtained from all transplant candidates, including HOPE Act transplant candidates,[26] or the informed consent policies or practices at hospitals providing clinical care to potential organ donors, OPOs, or individual transplant centers. HHS supports retaining the existing approach in OPTN policy that requires informed consent.

Further, existing OPTN policies do not prohibit transplant candidates eligible for a HOPE Act transplant to choose a non-HOPE Act transplant.[27] There are no revisions made in this rule that would force a transplant candidate to receive an organ from a donor with HIV. HHS supports retaining the existing approach in OPTN policy that permits transplant candidates eligible for a HOPE Act kidney or liver transplant to choose a non-HOPE Act kidney or liver transplant.

HHS considered these comments in developing the Secretary's direction to the OPTN to revise the OPTN standards of quality embodied in OPTN policy regarding organs from donors with HIV, as provided below in this preamble in the discussion of implementation considerations. HHS makes no changes to the regulatory proposal in response to these comments.

Education

Commenters expressed the desire for additional educational efforts regarding HOPE Act transplantation. Some commenters suggested that HRSA collaborate with the OPTN and work with OPOs to ensure that transplant centers are making compassionate efforts to seek authorization from potential kidney donors with HIV. Commenters further suggested that HRSA partner with the Centers for Medicare & Medicaid Services (CMS) to ensure that donor hospitals recognize every opportunity for organ donation for patients with an HIV-positive diagnosis and make referrals to the local OPO for an organ donation evaluation as mandated by the CMS Conditions of Participation. Other commenters asked for educational efforts aimed at people with HIV, healthcare professionals, students of health sciences, transplant centers, OPOs, and the public at large to increase awareness of the HOPE Act and opportunities to elect organ donation regardless of HIV status.

HHS response: HHS is supportive of any and all efforts to increase awareness and education about HOPE Act transplants, opportunities for persons with HIV to participate as organ donors, and transplant candidates with HIV to receive a HOPE Act transplant. While HHS is not making any revisions to the regulatory proposal in response to these comments, HHS will consider additional educational efforts along the lines of those suggested by the commenters.

NIH Research Criteria

Several commenters provided specific suggestions for the content and development of the revised NIH Research Criteria:

- Commenters requested the elimination of the current requirement that a transplant team perform at least five transplants within a four-year period between any donor and a recipient with HIV for all organs, as, in the commenters' estimation, this requirement is not necessary for organs from donors with HIV to be used safely.
- Commenters suggested that each transplant team should include infectious disease specialists with expertise in HIV care.
- One commenter requested the elimination of the biopsy requirement.
- One commenter noted that, in revising the Research Criteria, NIH should both maintain the strong patient safety record for HOPE Act transplants, while actively seeking to reduce burdens that may be slowing the establishment of non-kidney and non-liver HOPE Act transplant programs.
- One commenter requested that NIH include people with HIV, HIV researchers, physicians, and healthcare providers in the process of developing revised Research Criteria, and indicated that these individuals can provide invaluable insights that can only come from lived experience.

HHS response: HHS appreciates these suggestions, and agrees that these comments are relevant to the content of the NIH Research Criteria. These comments were provided to the NIH working group for consideration in the development of revisions to the Research Criteria. HHS makes no changes to the regulatory proposal in response to these comments.

Secretarial Direction to the OPTN

While multiple commenters provided suggestions that appear relevant to the Secretary's future direction to the OPTN to revise the standards of quality concerning kidneys and livers from donors with HIV, only a few commenters specifically referenced the

[26] Organ Procurement and Transplantation Network. OPTN Policies. Updated October 31, 2024. *https://optn.transplant.hrsa.gov/media/eavh5bf3/optn_policies.pdf.*

[27] Organ Procurement and Transplantation Network. OPTN Policies. Updated October 31, 2024. *https://optn.transplant.hrsa.gov/media/eavh5bf3/optn_policies.pdf.*

content of the Secretarial direction and provided recommendations. One commenter indicated that they defer to health care professionals as to the content of such direction, and further urged HHS to make sure that the final OPTN policies do not create additional barriers or lead to unintended consequences that make it more difficult for individuals to access these organs. One commenter requested that the direction to the OPTN require intensive and multi-disciplinary counseling and discussions to be conducted with the solid organ recipient, with ongoing care before, during, and after the transplant, to ensure that solid organ recipients understand the complexities of the transplant procedure while also receiving the emotional and physical care they need throughout the entirety of the process. The commenter further noted the opportunity for the OPTN to define transplant program collaboration on a more formal basis, recommending that the structure of the transplant team include nephrologists and/or hepatologists, infectious diseases experts, and transplant pharmacy members, and that requirements be instituted for providing counseling or any specific transplant training recommendations for infectious disease experts.

The commenters who provided views and suggestions that are relevant to the Secretary's direction to the OPTN, while not specifically referencing the content of the Secretary's direction, generally indicated that the current requirements applicable to all organ transplants are sufficient to appropriately ensure the safety of HOPE Act kidney and liver transplants conducted outside of the research context. One commenter indicated that there is no reason to impose special monitoring requirements for HOPE Act kidney and liver transplant outcomes, as appropriately protective standards are already included in the baseline safety and outcomes monitoring for all organ transplants in the United States. One commenter indicated that the OPTN structure and outcome data collected are sufficient in their current state to provide appropriate oversight for all organ transplants, regardless of whether the transplant involves organs from donors with HIV to recipients with HIV. Another commenter indicated comfort with appropriate oversight and data management by the organizations designated to oversee transplant services on a national level, indicating that such oversight may include stringent medical protocols, regular follow-ups, and comprehensive reporting systems to track outcomes and address any issues promptly. The commenter further expressed an expectation that safety and outcomes information be made available to the public is a transparent manner.

One commenter noted that HHS stated in the NPRM that scientific evidence demonstrates that transplants of kidneys and livers from donors with HIV to recipients with HIV are safe and effective. Given this view, the commenter opined that the current clinical standards of care for non-HOPE Act organ transplants are sufficient to apply to transplants of all kidneys and livers, of any HIV serostatus. The commenter further expressed that additional scrutiny of transplants of kidneys and livers from donors with HIV to recipients with HIV could be viewed as discrimination against recipients with HIV who are willing to accept offers of an organ from a donor with HIV, and infringes on patient autonomy. The commenter noted that the OPTN already is responsible for safety and outcomes monitoring for transplants that involve donors or recipients with viruses other than HIV, including cytomegalovirus, Epstein-Barr virus, hepatitis B and C viruses, and severe acute respiratory syndrome coronavirus 2.

HHS response: HHS appreciates all of the comments and suggestions regarding the content of the Secretary's direction to the OPTN. HHS has carefully considered these comments in developing the Secretary's direction to the OPTN to revise the OPTN standards of quality embodied in OPTN policy regarding organs from donors with HIV. As discussed below in section V, ''Implementation Considerations,'' through publication of this final rule, the Secretary directs the OPTN to adopt and use standards of quality with respect to kidneys and livers from donors with HIV to ensure that HOPE Act kidney and liver transplants are subject to OPTN policies that, from the OPTN's expertise, will not reduce the safety of HOPE Act kidney and liver transplants, provide appropriate oversight for these transplants, and require sufficient data collection and outcomes monitoring.

Health Equity and Patient Experience

Many comments positively noted the health equity component of the proposed rule and the potential impact to populations that are disproportionately impacted by HIV and end-stage chronic diseases. Several commenters requested that HHS consider the insights and experiences of HOPE Act patients in this and future rulemaking efforts.

HHS response: We agree. HHS supports efforts to better address health equity in organ transplantation and believes this rule will help to increase access to care among populations that are disadvantaged. HHS also is supportive of efforts to incorporate patient experience into policy, and we have received, and considered, comments from HOPE Act patients during this rulemaking process, including a comment from a self-identified living donor of a kidney used in a HOPE Act transplant. HHS makes no changes to the regulatory proposal in response to these comments.

Approach to Patient Care

Several commenters suggested changes to clinical care standards for HOPE Act transplant patients. One commenter requested that the Department encourage transplant centers to incorporate syndemic care approaches to address the complex needs of people with HIV. Syndemic care aims to provide more holistic service delivery to prevention and care, including by addressing the social determinants of health that allow for health conditions to cluster and interact. Several commenters requested that additional safety protocols be developed for transplant centers, such as post-operative care guidelines for HOPE Act transplant recipients.

HHS response: HHS is supportive of efforts to incorporate syndemic care approaches within the organ transplantation domain. Regarding the establishment of additional safety protocols for transplant centers, currently safety protocols beyond those included in the NIH Research Criteria are determined by individual transplant centers. These comments were provided to the NIH working group for consideration in the development of revisions to the Research Criteria. Further, HHS considered these comments in developing the Secretary's direction to the OPTN to revise the OPTN standards of quality embodied in OPTN policy regarding organs from donors with HIV, as provided below in the discussion of implementation considerations. HHS makes no changes to the regulatory proposal in response to these comments.

Addressing Diverse Needs

Several commenters requested that HHS consider the unique challenges of patients who are Black, Indigenous, and people of color and patients living in rural areas. A commenter indicated that post-transplant care is essential for

positive patient outcomes and factors such as implicit bias in medical settings, socioeconomic disparities, and geographic limitations frequently hinder equitable access to post-transplant care, especially for people experiencing both geographic isolation and medical racism. Long travel distances to transplant centers and lacking local healthcare options can impede consistent follow-up care and medication compliance.

HHS response: HHS is supportive of efforts to improve health equity in organ transplantation and believes this rule will contribute to improving access to care for patients who are Black, Indigenous, and people of color and patients living in rural areas by allowing HOPE Act kidney and liver transplants to be conducted at any transplant center in the United States. HHS makes no changes to the regulatory proposal in response to this comment.

Standards for Transplant Candidates

One commenter noted his opposition to lengthy sobriety requirements for liver transplant candidates.

HHS response: Currently, sobriety requirements for transplant candidates are determined by individual transplant centers. This comment was provided to the NIH working group for consideration in the development of revisions to the Research Criteria. Further, HHS considered this comment in developing the Secretary's direction to the OPTN to revise the OPTN standards of quality embodied in OPTN policy regarding organs from donors with HIV, as provided below in this preamble in the discussion of implementation considerations. HHS makes no changes to the regulatory proposal in response to this comment.

Future Research on HOPE Act Transplants

Multiple commenters expressed support for additional research evaluating the safety and efficacy of HOPE Act transplants. One commenter suggested that the experience of HOPE Act transplant patients should help inform the direction of future research on HOPE Act transplants.

HHS response: HHS is supportive of additional research evaluating the safety and efficacy of HOPE Act transplants, and considering patient experiences in informing the direction of future research. While no changes are made to the regulatory proposal in response to these comments, HHS will consider these comments in further efforts to implement the HOPE Act.

Beyond Scope

Some commenters provided comments or made suggestions that are beyond the scope of the proposed rule.

One commenter requested that HHS establish a program to provide technical assistance to state, local, and tribal health departments with the goal of adopting policies to prevent health information from being used in a criminal, civil, or immigration legal proceeding.

One commenter noted that none of the other comments provided on the NPRM highlight that there will be a conflict between a majority of expressly prohibitive or potentially permissive State laws and expressly permissive Federal law when this proposed rule is finalized. The commenter indicated that State laws that are silent on or prohibitive of organ transplantation between people diagnosed with HIV can and do preclude performance of HOPE Act transplants within a given jurisdiction regardless of permissive Federal laws, and despite Congress and Federal regulators having the authority to preempt state and local health laws.

Multiple commenters noted that State criminal laws that prohibit persons with HIV for donating or attempting to donate organs, blood, tissue, and other bodily fluids are a legal barrier to implementation of the HOPE Act.

HHS response: As these comments are not within the scope of the proposed rule, these comments have not altered HHS's proposed approach to lifting the research and IRB requirements for HOPE Act kidney and liver transplants.

Opposition

One commenter opposed the proposed rule, suggesting that organs from donors with HIV are not the same as organs from donors without HIV, and expressing concern regarding the transmission of HIV through organ transplantation to recipients without HIV.

HHS response: HHS notes that there have been no reported cases of inadvertent HIV transmission resulting from HOPE Act transplants. Further, under the requirements of the HOPE Act, transplantation of organs from donors with HIV to recipients without HIV is prohibited. HHS makes no changes to the regulatory proposal in response to this comment.

IV. Secretarial Determination

The Secretary has reviewed the recommendations of the OPTN, the ACBTSA, and the BOTSEC on implementation of the HOPE Act, the results of research on HOPE Act transplants conducted to date as well as results of other relevant research on organ transplants in recipients with HIV, and public comment received on the NPRM. Pursuant to his authority under the HOPE Act, 42 U.S.C. 274(b)(3)(B)(ii), and consistent with the implementing regulations at 42 CFR 121.6, the Secretary determines that participation in clinical research, and therefore adherence to research and IRB requirements, as a requirement for transplants of kidneys and livers from persons with HIV, is no longer warranted. Through publication of this final rule, the Secretary is lifting the statutory research and IRB requirements for such transplants.

HHS anticipates that the Secretary's determination and publication of this final rule will increase access to kidney and liver transplants by allowing more transplant centers to perform HOPE Act kidney and liver transplants. Currently, only a limited number of centers can perform HOPE Act transplants, because there are specific requirements stipulated by the NIH Research Criteria for such transplant centers. These requirements include expertise in HIV infection management, minimum organ-specific transplant team experience of five transplants of organs from donors without HIV to recipients with HIV over four years and an independent advocate for both recipients with HIV and prospective living donors with HIV. The requirements for centers conducting HOPE Act transplants have been subject to critique and have been viewed by some as a barrier to participation in HOPE Act transplant programs, which may impact equity and access to organ transplantation throughout the United States.[28] By eliminating the requirement that HOPE Act kidney and liver transplants are conducted in the research context, HHS expects that a larger number of transplant centers will be able to conduct such transplants. This rule will enable more transplant centers to transplant kidneys and livers donated by both living and deceased donors with HIV, in recipients with HIV, thereby expanding opportunities for people with HIV and end-stage diseases.

Further, HHS expects this rule will expand access to organ transplantation for all patients, regardless of their HIV status. When eligible for transplant, a

[28] Bowring, M.G., Ruck, J.M., Bryski, M.G., Werbel, W., Tobian, A.A.R., Massie, A.B., Segev, D.L., & Durand, C.M. (2023). Impact of expanding HOPE Act experience criteria on program eligibility for transplantation from donors with human immunodeficiency virus to recipients with human immunodeficiency virus. American Journal of Transplantation, 23(6), 860–864.

person with HIV is added to the waiting list. That patient may elect to receive an organ from a donor with HIV, as a HOPE Act transplant, should it become available, or may choose to wait for an organ from a donor who did not have HIV. If the patient with HIV chooses the HOPE Act transplant, this will allow another patient on the waiting list to receive the next available organ from a donor who does not have HIV, which would reduce the time spent waiting for a transplant. Of note, patients who do not have HIV will not be offered an organ from a donor who has HIV, as such transplants are not allowed under Federal law.

As of February 16, 2024, more than 103,000 men, women, and children were on the national organ transplant waiting list.[29] Every 10 minutes another person is added to the waiting list, and nearly 20 people die every day while waiting for a transplant.[30] HHS expects that the Secretary's determination and publication of this rule will improve access to kidney and liver transplants both by increasing the number of kidneys and livers available for transplant, and by allowing more transplant centers to perform HOPE Act kidney and liver transplants. This anticipated positive result is consistent with the Department's commitment to reducing the number of persons on the organ transplant waiting list.

V. Implementation Considerations

A. NIH Research Criteria

The HOPE Act provides the Secretary with the discretion to determine what research criteria should apply to HOPE Act transplants. 42 U.S.C. 274f–5(a). NIH, in consultation with HRSA and the OPTN, and including the input of other relevant Federal stakeholders, formed a working group to develop revised NIH Research Criteria. The NIH Research Criteria, as originally drafted, include a strong focus on HOPE Act kidney and liver transplants, as these are the most common types of HOPE Act transplants: as this rule removes HOPE Act kidney and liver transplants from the research context, it is necessary that the revised NIH Research Criteria appropriately address non-kidney and non-liver HOPE Act transplantation.

Further, HHS recognizes the revised NIH Research Criteria should reflect advances in research in the time since HOPE Act transplants began, including the current needs of various entities involved in non-kidney and non-liver HOPE Act transplants in consideration of input from transplant centers, transplant surgeons, OPOs, HIV clinicians, donors, recipients, HIV advocates, the OPTN, and individuals affected by the HOPE Act.

HHS has considered the comments submitted in response to the NPRM that are relevant to the revised NIH Research Criteria, as summarized in the discussion of public comment in section III, *supra.* These comments have been provided to NIH for consideration in developing the revised NIH Research Criteria. HHS will publish updated Research Criteria in the **Federal Register** for public comment.

B. Secretary's Direction To Revise OPTN Policies

As part of the implementation of the Secretary's determination that participation in clinical research as a requirement for transplants of kidneys and livers from persons with HIV is no longer warranted, the Secretary must direct the OPTN to update its policies to clarify that HOPE Act kidney and liver transplants may be conducted in a way consistent with the statutory requirements at 42 U.S.C. 274, and that ensures the revisions to the policies will not reduce the safety of organ transplantation. 42 U.S.C. 274f–5(c)(2); 42 CFR 121.6(b)(3).

In the NPRM preceding publication of this final rule, HHS specifically sought public comment on the nature and content of the Secretary's direction to the OPTN, including the level of specificity in the direction and the extent of the OPTN's discretion in developing the revised policies; what factors should be considered in assessing whether the revised policies are consistent with 42 U.S.C. 274; and what factors should be considered in assessing whether the revisions to the OPTN policies will not reduce the safety of organ transplantation. HHS further welcomed comment on any other aspects relating to the Secretary's direction to the OPTN to revise its standards of quality as required by the HOPE Act.

As described in the discussion of public comment in section III, *supra,* HHS received multiple comments relating to HHS's consideration as to the direction to the OPTN. The vast majority of commenters agreed that scientific evidence clearly demonstrates that HOPE Act kidney and liver transplants are safe and effective. Many of those commenters indicated that the current requirements applicable to all organ transplants are sufficient to appropriately ensure the continued safety of HOPE Act kidney and liver transplants conducted outside of the research context. HHS has carefully considered all comments received in the development of the Secretary's direction to the OPTN.

Through publication of this final rule, the Secretary directs the OPTN to adopt and use standards of quality with respect to kidneys and livers from donors with HIV to ensure that HOPE Act kidney and liver transplants are subject to OPTN policies that are consistent with 42 U.S.C. 274, and from the OPTN's expertise, will not reduce the safety of HOPE Act kidney and liver transplants, provide appropriate oversight for these transplants, and require sufficient data collection and outcomes monitoring.

In consideration of the public comments received, HHS notes that it may be appropriate for the OPTN to determine that current OPTN policies that are generally applicable to kidney and liver transplants provide appropriate safety and oversight standards for HOPE Act kidney and liver transplants. Alternatively, the OPTN may choose to revise OPTN policies to provide additional standards for HOPE Act kidney and liver transplants.

This rule provides the Secretary's determination that that participation in clinical research as a requirement for transplants of kidneys and livers from persons with HIV is no longer warranted; revises 42 CFR 121.6 to reflect the removal of the statutory research and IRB requirements for HOPE Act kidney and liver transplants; and directs the OPTN to revise its standards of quality with respect to kidneys and livers from donors with HIV consistent with 42 U.S.C. 274 and in a way that ensures the changes will not reduce the safety of organ transplantation policies as required by the HOPE Act. The final implementation step is for the OPTN to adopt and use standards of quality as directed by the Secretary to reflect that HOPE Act kidney and liver transplants no longer are subject to research and IRB requirements.

As was stated in the NPRM, HHS expects that the OPTN will solicit public comment on a proposed revision to relevant OPTN policies, and update the OPTN policies containing standards of quality with respect to kidneys and livers from donors with HIV, within 15 months from the publication of this final rule. As publication of this final rule has obviated current OPTN policies requiring HOPE Act kidney and liver transplants to be conducted in accordance with research and IRB requirements, HHS encourages the OPTN to act expeditiously to revise these policies. This will allow transplant centers that had not

previously been performing HOPE Act kidney and liver transplants in the research context to begin performing HOPE Act kidney and liver transplants in accordance with the revised OPTN policies.

VI. Final Rule Requirements

A. Removal of Research and IRB Requirements for HOPE Act Kidney and Liver Transplants

Consistent with the Secretary's determination under the HOPE Act, this rule revises 42 CFR 121.6 to reflect the removal of the statutory research and IRB requirements for kidney and liver HOPE Act transplants. Section 121.6(b)(1)(ii)(B) provides that participation in clinical research is no longer warranted for the following categories of transplants:

- Transplant of a kidney from a donor with HIV; and
- Transplant of a liver from a donor with HIV.

In implementation, this means that HOPE Act kidney and liver transplants will no longer be required to be conducted as research, and instead will be conducted in accordance with OPTN policies applicable to HOPE Act kidney and liver transplants. As noted above, the OPTN may decide that OPTN policies that generally apply to kidney and liver transplants are appropriate to apply to HOPE Act kidney and liver transplants, or may create different policies for HOPE Act kidney and liver transplants.

B. Revised Terminology: Persons With HIV

HHS is aware that previous language used in enacting and implementing the HOPE Act contained vocabulary and phrases that some people find stigmatizing—namely, references to ''infected with HIV'' when the regulatory language encompasses both living and deceased donors with HIV, or recipients with HIV. For the references to both living and deceased donors with HIV, HHS revises all current references in 42 CFR 121.6(b) from ''individuals infected with human immunodeficiency virus (HIV)'' and ''individuals infected with HIV'' to ''donors with HIV'' or, when discussing organs donated, ''organs from donors with HIV'' and specifically ''kidneys from donors with HIV'' and ''livers from donors with HIV.'' Further, HHS revises the current reference in 42 CFR 121.6(b)(1)(i) describing the allowable recipients of HOPE Act transplants from individuals who are ''infected with HIV before receiving such organ(s)'' to instead refer to individuals who are ''living with HIV before receiving such organ(s).'' This is consistent with the Centers for Disease Control and Prevention's (CDC) Stigma Language Guide.[31] These changed regulatory references are to avoid stigmatizing language, and do not change the groups of people referenced in 42 CFR 121.6.

VII. Effective Date

HHS finds that there is good cause for this rule to be effective upon publication in accordance with 5 U.S.C. 553(d)(3) of the Administrative Procedure Act and 5 U.S.C. 808(2) of the Congressional Review Act.

The waiting list for kidney transplant in the U.S. currently exceeds 88,700 candidates.[32] The 2022 OPTN/U.S. Scientific Registry of Transplant Recipients (SRTR) Annual Data Report indicated that over the course of a year more than 4,400 adults died while waiting for a kidney transplant, and an additional 4,500 persons were removed from the waiting list because they became too sick to receive a transplant.[33] Most transplant candidates wait years for a kidney transplant, often requiring dialysis or other interventions.

In addition, thousands of Americans suffer from conditions requiring liver transplant. As of November 8, 2024, 13,170 candidates were added to the waiting list in 2024.[34] In 2022, more than 1,031 liver patients died while awaiting transplant, according to the OPTN/SRTR Annual Data Report.[35]

HHS expects that this final rule will have the effect of decreasing the time all candidates for kidney and liver transplants spend on the waiting list, regardless of their HIV status. As described in section IV, above, a transplant candidate with HIV may choose to receive a HOPE Act kidney or liver transplant if an organ from a donor with HIV becomes available, or may choose to wait for an organ from a donor without HIV. Research has demonstrated that candidates with HIV who accept a HOPE Act kidney transplant spend significantly less time awaiting transplant than candidates on the waiting list for an kidney from a donor without HIV. A 2023 study found that median wait time for a HOPE Act kidney transplant was 10.8 months compared to 60.8 months—a 3.3-fold higher rate of transplant compared to non-HOPE Act transplants.[36] When candidates with HIV choose a HOPE Act transplant, this data suggests that this will decrease the time they spent on the waiting list. Additionally, this will have the effect of allowing a candidate further down the waiting list to receive the next available organ from a donor who does not have HIV, both reducing the time that candidate spends waiting for a transplant and decreasing the time all other candidates spend on the waiting list.

Moreover, HHS expects that this final rule also will increase access to organ transplantation. Thirty-one transplant centers are qualified to perform HOPE Act kidney and liver transplants as research in conformance with the requirements of the NIH Research Criteria, while 250 transplant centers operate nationwide. As, pursuant to this rule, HOPE Act kidney and liver transplants no longer need to be conducted as research, it can be reasonably expected that more transplant centers than in the past will be able to offer HOPE Act kidney and liver transplants to appropriate candidates on the transplant center's waiting list. It also is reasonable to expect that if a greater number of transplant centers will be able to offer HOPE Act transplants, this will allow more candidates with HIV on the waiting list to receive HOPE Act kidney and liver transplants.

Lastly, HHS believes that a delayed effective date is unnecessary to afford affected parties a reasonable time to adjust practices in accordance with this rule. From the economic analysis of impacts, provided below in section IX, this final rule will have a minimal direct impact on affected entities with regard to preparing for implementation. The direct effect of this final rule on transplant centers is considered to be limited to the time spent by transplant centers to read and understand the final rule, educate their staff on the content of this final rule, and review and update

internal policies. This rule does not impose obligations on transplant centers, and rather increases available flexibilities in that transplant centers are no longer required to conduct HOPE Act kidney and liver transplants in the research context. Further, as described above in section V(B), the final implementation step for HOPE Act kidney and liver transplants to begin occurring outside of the research context is for the OPTN to revise its policies to reflect that HOPE Act kidney and liver transplants no longer are subject to research and IRB requirements. HHS is encouraging the OPTN to act expeditiously to revise these policies, and it is likely that transplant centers will educate their staff and review and update internal policies relevant to the content of this final rule after the OPTN has published its revised policies for HOPE Act kidney and liver transplants. Transplant centers do not have any obligations stemming from this rule until the OPTN revises its policies. In light of this context, a delayed effective date for this rule is unnecessary for implementation purposes.

Given that, and the expected positive effects on time candidates spend on the waiting list and the increase in access to HOPE Act transplants resulting from this rule, pursuant to 5 U.S.C. 553(d)(3) and 5 U.S.C. 808(2) HHS finds that there is good cause for this rule to be effective upon publication.

VIII. Paperwork Reduction Act of 1995

This rule does not impose any additional information collection burden under the Paperwork Reduction Act and does not contain any information collection requirements beyond those already imposed by current regulations, which have been approved by the Office of Management and Budget (OMB). The current data collection requirements in the OPTN final rule approved by OMB under the Paperwork Reduction Act of 1995 are assigned control numbers OMB No. 0915–0157 (for organ donors, candidates, and recipients) and OMB No. 0915–0184 (for OPTN membership application data).

IX. Final Economic Analysis of Impacts

We have examined the impacts of the final rule under Executive Order 12866, Executive Order 13563, Executive Order 14094, the Regulatory Flexibility Act (5 U.S.C. 601–612), the Congressional Review Act (5 U.S.C. 801, Pub. L. 104–121), and the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4).

Executive Orders 12866, 13563, and 14094 direct us to assess all benefits, costs, and transfers of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). Rules are ''significant'' under Executive Order 12866, section 3(f)(1) (as amended by Executive Order 14094), if they have an annual effect on the economy of $200 million or more (adjusted every 3 years by the Administrator of the Office of Information and Regulatory Affairs (OIRA) for changes in gross domestic product); or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, territorial, or tribal governments or communities. The regulatory impact analysis indicates, and OIRA has determined, that the final rule is a significant regulatory action under Executive Order 12866, section 3(f)(1), and that it meets the criteria set forth in 5 U.S.C. 804(2) under the Congressional Review Act.

The Regulatory Flexibility Act (RFA) requires agencies to consider the impact of their regulatory proposals on small entities. Because the impacts on kidney and liver transplants are small relative to the number of transplants performed annually, and because the economic impacts on affected small entities are small relative to the average payroll of firms in the smallest enterprise size category, HHS certifies that the final rule will not have a significant economic impact on a substantial number of small entities.

The Unfunded Mandates Reform Act of 1995 (UMRA) generally requires that each agency conduct a cost-benefit analysis; identify and consider a reasonable number of regulatory alternatives; and select the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the final rule before promulgating any proposed or final rule that includes a Federal mandate that may result in expenditures of more than $100 million (adjusted for inflation) in at least one year by State, local, and tribal governments, in the aggregate, or by the private sector. Each agency issuing a final rule with relevant effects over that threshold must also seek input from State, local, and tribal governments. The current threshold after adjustment for inflation using the Implicit Price Deflator for the Gross Domestic Product is $183 million, reported in 2023 dollars. The final rule will not result in an unfunded mandate in any year that meets or exceeds this amount.

The final rule removes the current research and IRB requirements for the transplantation of kidneys and livers from donors with HIV. We have assessed the likely impacts of the final rule, and report in the regulatory impact analysis (RIA) several sources of monetized, quantified, and unquantified benefits, costs, or transfers. Most of the monetized or quantified impacts relate to the incremental increases in the number of kidney and liver transplants that will be performed annually as a result of the final rule.

We report monetized benefits from increases in life expectancy for both kidney and liver transplant recipients; and for kidney transplant recipients, we also report monetized benefits from quality-of-life improvements and time savings from fewer kidney dialysis visits. We also anticipate quality-of-life improvements for liver transplant recipients, and quantify the number of people affected who might experience those benefits. We also identify several sources of unquantified benefits, which could potentially be quantified through additional research or data, including time savings for caregivers, and cost savings for transplant centers from removing the research and institutional review board requirements. We also identify difficult-to-quantify benefits associated with revising vocabulary and phrases that some people find stigmatizing through adoption of language that is intended be respectful of people living with HIV, and living and deceased donors with HIV. These changes may result in people living with HIV experiencing more inclusive interactions when accessing healthcare, generating additional benefits beyond the increases in life expectancy and improvements in quality of life from improved access to liver and kidney transplantation.

We report monetized costs from increases in medical expenditures associated with organ transplantation; for kidney transplants, we report net costs that account for reductions in medical expenditures associated with kidney dialysis. We report this shift in expenditures from kidney dialysis to kidney transplantation as a monetized transfer. We also monetize the opportunity costs of the time spent by transplant centers reading and understanding the final rule, reviewing policies and procedures, and training staff.

Table 1 summarizes our estimates of the benefits, costs, and transfers of the final rule, annualizing impacts over a 10-year analytic time horizon covering 2025 through 2034 using a 2 percent real discount rate, and reporting all

monetary estimates in constant 2023 dollars. Annualized benefits range from $381 million to $858 million, with a primary estimate of $612 million; costs range from $73 million to $92 million, with a primary estimate of $83 million; and transfers range from $24 million to $37 million, with a primary estimate of $30 million. Table 1 also reports our estimates of the annualized net benefits of the final rule, which range from $301 million to $772 million, with a primary estimate of $530 million. The RIA concludes that the monetized net benefits, combined with the quantified, but non-monetized, and unquantified impacts, indicate that the final rule is highly likely to generate net benefits to society. This finding is further supported through additional quantitative assessments of uncertainty and sensitivity analyses contained in the RIA. The full RIA is available in the docket for this final rule at *https://www.regulations.gov/docket/HRSA-2024-0001/document.*

TABLE 1—SUMMARY OF IMPACTS OF THE FINAL RULE

[Millions of constant 2023 dollars]

Category	Primary estimate	Low estimate	High estimate	Dollar year or unit	Discount rate (%)	Time horizon	Notes
BENEFITS							
Annualized monetized benefits.	$612	$381	$858	2023	2	2025–2034	Increased life expectancy for organ transplant recipients; improved quality of life for kidney transplant recipients; time savings from fewer kidney dialysis visits.
Annualized quantified, but non-monetized, benefits.	72	64	81	People affected	2	2025–2034	Improved quality of life for liver transplant recipients.
Unquantified benefits						2025–2034	Time savings for caregivers; cost savings for transplant centers from removing the research and institutional review board requirements; difficult-to-quantify benefits associated with stigma-reducing terminology.
COSTS							
Annualized monetized costs.	83	73	92	2023	2	2025–2034	Medical expenditures associated with transplantation; time spent by transplant centers to read and understand the final rule, review policies and procedures, and train staff.
TRANSFERS							
Annualized monetized transfers.	30	24	37	2023	2	2025–2034	Shift in expenditures from kidney dialysis to kidney transplantation.
NET BENEFITS							
Annualized monetized net benefits.	530	301	772	2023	2	2025–2034	

Note: primary, low, and high estimates correspond to the mean, 5th percentile, and 95th percentile of the outcomes of a Monte Carlo simulation.

List of Subjects in 42 CFR Part 121

Health care, Hospitals, Organ transplantation, Reporting and recordkeeping requirements, Transplant centers.

Accordingly, by the authority vested in me as the Secretary of Health and Human Services, and for the reasons set forth in the preamble, 42 CFR part 121 is amended as follows:

PART 121—ORGAN PROCUREMENT AND TRANSPLANTATION NETWORK

■ 1. The authority citation for part 121 continues to read as follows:

Authority: Sections 215, 371–377, and 377E of the PHS Act (42 U.S.C. 216, 273–274d, 274f–5); sections 1102, 1106, 1138 and 1871 of the Social Security Act (42 U.S.C. 1302, 1306, 1320b–8, and 1395hh); section 301 of the National Organ Transplant Act, as amended (42 U.S.C. 274e); and E.O. 13879, 84 FR 33817.

■ 2. In § 121.6, revise paragraph (b) to read as follows:

§ 121.6 Organ procurement.

* * * * *

(b) *HIV.* (1) Organs from donors with human immunodeficiency virus (HIV) may be transplanted only into individuals who—

(i) Are living with HIV before receiving such organ(s); and

(ii)(A) Are participating in clinical research approved by an institutional review board, as defined in 45 CFR part 46, under the research criteria published by the Secretary under subsection (a) of section 377E of the Public Health Service Act, as amended; or

(B) The Secretary has published, through appropriate procedures, a determination under section 377E(c) of the Public Health Service Act, as amended, that participation in such clinical research, as a requirement for transplantation of organs from donors with HIV, is no longer warranted. The Secretary has determined that participation in such clinical research is no longer warranted for the following categories of transplants:

(*1*) Transplant of a kidney from a donor with HIV; and

(*2*) Transplant of a liver from a donor with HIV.

(2) Except as provided in paragraph (b)(3) of this section, the OPTN shall adopt and use standards of quality with respect to organs from donors with HIV to the extent the Secretary determines necessary to allow the conduct of research in accordance with the criteria described in paragraph (b)(1)(ii)(A) of this section.

(3) If the Secretary has determined under paragraph (b)(1)(ii)(B) of this section that participation in clinical research is no longer warranted as a requirement for transplantation of organs from donors with HIV, the OPTN shall adopt and use standards of quality with respect to organs from donors with HIV as directed by the Secretary, consistent with 42 U.S.C. 274, and in a way that ensures the changes will not reduce the safety of organ transplantation.

* * * * *

Dated: November 19, 2024.

Xavier Becerra,

Secretary.

BILLING CODE 4150–41–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

45 CFR Part 412

RIN 0970–AD10

Investigations of Child Abuse and Neglect Rule

AGENCY: Office of Refugee Resettlement (ORR), Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS).

ACTION: Interim final rule with comment period (IFR).

SUMMARY: This IFR describes how ORR shall investigate and substantiate allegations of child abuse and neglect occurring in certain ORR care provider facilities, and maintain a registry of perpetrators relating to certain sustained allegations.

DATES: This IFR is effective December 27, 2024. Comments on this IFR must be received on or before January 27, 2025.

ADDRESSES: You may send comments, identified by [docket number and/or Regulatory Information Number (RIN)], by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Email: UCPolicy-RegulatoryAffairs@acf.hhs.gov.* Include [docket number and/or RIN] in the subject line of the message.

Instructions: All submissions received must include the agency name and docket number or RIN for this rulemaking. For detailed instructions on submitting comments and additional information on the rulemaking process, see the ''Public Participation'' heading of the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Toby Biswas, Director of Policy, Division of Unaccompanied Children Policy, Unaccompanied Children Bureau, Office of Refugee Resettlement, Administration for Children and Families, Department of Health and Human Services, Washington, DC, (202) 205–4440 or *UCPolicy-RegulatoryAffairs@acf.hhs.gov.*

I. Public Participation

ORR encourages all interested parties to participate in this rulemaking by submitting written comments, views, and data on any or all aspects of this interim final rule. ORR also invites comments that relate to the economic, environmental, or federalism effects that might result from this interim final rule. ORR will review all comments received, but ORR will only post comments that address the topic of the interim final rule. All comments ORR posts to *https://www.regulations.gov* will include any personal or commercial information you provide.

A. Submitting Comments

Comments that will provide the most assistance to ORR will reference a specific portion of the interim final rule, explain the reason for any recommended change, and include data, information, or authority that support such recommended change. If you submit comments, please indicate the specific section of this document to which each comment applies and provide a reason for each suggestion or recommendation. You may submit your comments and materials online or by email, but please use only one of these means. If you submit a comment online via *https://www.regulations.gov,* it will be considered received when it is received at the Docket Management Facility.

Instructions: To submit your comments online, go to *https://www.regulations.gov* and insert ''XXXX–XXXX–XXXX'' in the ''Search'' box. Click on the ''Comment Now!'' box and input your comment in the text box provided. Click the ''Continue'' box, and if you are satisfied with your comment, follow the prompts to submit it.

For additional information, please read the ''Privacy and Security Notice'' that is available via the link in the footer of *https://www.regulations.gov.*

ORR will consider all comments and materials received during the comment period and may change this rule based on your comments.

B. Viewing Comments and Documents

Docket: To view posted comments, as well as documents mentioned in this preamble as being available in the docket, go to *https://www.regulations.gov* and insert ''XXXX–XXXX–XXXX'' in the ''Search'' box. Click on the ''Open Docket Folder,'' and you can click on ''View Comment'' or ''View All'' under the ''Comments'' section of the page. Individuals without internet access can make alternate arrangements for viewing comments and documents related to this rulemaking by contacting ORR through the **FOR FURTHER INFORMATION CONTACT** section above. You may sign up for email alerts on the online docket to be notified when comments are posted, or a final rule is published.

C. Privacy Act

As stated in the Submitting Comments section above, please be aware that anyone can search the electronic form of comments received into any dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.).

TVPRA—William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008
UC Bureau—Unaccompanied Children Bureau
VCAA—Victims of Child Abuse Act

III. Executive Summary

This interim final rule provides standards and processes for the Department of Health and Human Services (HHS), Administration for Children and Families (ACF), Office of Refugee Resettlement (ORR), to apply when it conducts investigations into allegations of child abuse and neglect that occur in certain care provider facilities funded by ORR to provide residential and other services for unaccompanied children; [1] describes a process for appeal and review of substantiated allegations; and establishes an ORR Central Registry to list individuals with certain findings of child abuse and neglect that have been substantiated and sustained after exhausting the appeal and review process. This rule describes how and in what circumstances ORR may conduct investigations, and impose certain consequences with respect to sustained allegations of child abuse and neglect by care provider facility staff, contractors or sub-grantees of the care provider facility, care provider facility volunteers, and other individuals with access to unaccompanied children in ORR care through contracts or grants with ORR. Specifically, the investigations and required consequences described in this rule shall apply in two circumstances: (1) where the State or local authority that would otherwise be responsible for such investigations will not investigate allegations arising at ORR care provider facilities that care for or propose to care for unaccompanied children; and (2) at ORR emergency or influx facilities (EIFs).

Child abuse and neglect can have devastating lifelong mental and physical effects on an individual. ORR is committed to preventing and mitigating child abuse and neglect in its care provider facilities and seeks to ensure the safety, well-being, and security of all unaccompanied children in its care.

IV. Background and Purpose

A. Background and History

On March 1, 2003, section 462 of the Homeland Security Act of 2002 (HSA) transferred responsibilities for the care and placement of unaccompanied children from the Commissioner of the former Immigration and Naturalization Service to the Director of ORR. Since that time, ORR has provided for the day-to-day care of over 700,000 unaccompanied children in ORR care provider facilities that are currently administered through a nationwide network of providers (funded via cooperative agreements or contracts, or sub-awards thereof).[2]

As further detailed below in section IV.B., ORR oversees its care provider facilities through its Unaccompanied Children Bureau [3] pursuant to its responsibilities under the HSA,[4] the Trafficking Victims Protection Reauthorization Act of 2008 (TVPRA),[5] the Unaccompanied Children (UC) Program Foundational Rule,[6] the *Flores* Settlement Agreement (FSA) as relevant,[7] [8] and ORR's regulatory Standards To Prevent, Detect, and Respond to Sexual Abuse and Sexual Harassment Involving Unaccompanied Children interim final rule (PSA IFR).[9]

Consistent with the HSA and TVPRA, ORR is responsible for the care, custody, and placement of unaccompanied children who are in Federal custody by reason of their immigration status.[10] Any department or agency of the Federal government that has an unaccompanied child from a non-contiguous country in its custody is required to transfer custody of such child to HHS.[11] Typically, ORR places unaccompanied children in care provider facilities it funds to provide these children with residential and other services, until the children can be safely released to qualified and vetted sponsors (individuals or entities to whom ORR releases unaccompanied children out of ORR custody, in accordance with ORR's sponsor suitability assessment process and release procedures),[12] are repatriated to their home country, obtain legal status, or otherwise no longer meet the statutory definition of an unaccompanied child (*e.g.,* turn 18 years old). In accordance with the UC Program Foundational Rule (and consistent with the FSA), ORR makes reasonable efforts to place unaccompanied children in State-licensed facilities in those geographical areas where the majority of children are apprehended [13]—except in cases of emergency or influx, when ORR may utilize EIFs.[14] EIFs are Federally contracted facilities that ORR may need to stand up quickly to accommodate placements for children that exceed its standard capacity. Consistent with ORR's UC Program Foundational Rule (and the FSA), EIFs are not required to be State-licensed.[15]

As of the publication date of this rulemaking, ORR has built a network of nearly 300 care provider facilities in 27 States, funded through cooperative agreements and grants between ORR and the care provider facilities. As discussed below, a significant number of ORR care provider facilities are in Texas, which has decided to no longer conduct investigations of reported abuse and neglect arising at ORR-funded care provider facilities housing unaccompanied children.

In addition, as of the publication date of this rulemaking, ORR oversees three influx care facilities, funded through contracts, that currently have no children in care but are ready to commence or resume operations within certain timeframes if needed.[16] ORR does not currently have formal written agreements with the relevant State or local authorities to investigate reports of

[1] An unaccompanied child is defined as a child who has no lawful immigration status in the United States; has not attained 18 years of age; and with respect to whom there is no parent or legal guardian in the United States, or no parent or legal guardian in the United States available to provide care and physical custody. *See* 6 U.S.C. 279(g)(2).

child abuse and neglect at these facilities. If such agreements are executed, ORR may in its discretion elect not to exercise its investigative authority and instead rely on the relevant State or local authorities (consistent with its approach to sexual abuse as described at 45 CFR part 411).[17] Nevertheless, even in these circumstances, ORR retains statutory authority to conduct investigations at EIFs, and in these situations could do so consistent with this rule. If ORR were to conduct its own investigation concurrently with a State or local authority's investigation, ORR would cooperate with such authority and ORR's investigation would not conflict with such investigation. Further, ORR would conduct its investigation in such a manner as to minimize potential trauma to the alleged victim (*e.g.,* by not interviewing a child where the State or local authority has already interviewed the child for the same information).

To ensure that reports of child abuse and neglect at Texas care provider facilities and EIFs (as relevant) do not go uninvestigated, and pursuant to ORR's statutory responsibilities, on June 12, 2024, ORR established a Division of Unaccompanied Child Protection Investigations (DCPI) to, among other things, receive reports of alleged abuse or neglect involving unaccompanied children in ORR custody and investigate those claims where it has jurisdiction.[18] DCPI began conducting investigations of alleged child abuse and neglect in ORR-funded care provider facilities in Texas as of July 2024. This interim final rule describes the procedures DCPI uses when it performs child welfare investigations of alleged child abuse and neglect at ORR care provider facilities; and establishes employment consequences for care provider facility staff and volunteers based on ORR investigation dispositions, including relevant due process protections for alleged perpetrators of abuse and neglect.

B. Authority

ORR's statutory authority enables it to perform investigations of alleged child abuse and neglect occurring at its care provider facilities, and to establish disciplinary consequences, including employment consequences, for individuals it determines to have perpetrated abuse or neglect. The HSA transferred to the Director of ORR functions under the immigration laws of the United States with respect to the care of unaccompanied children that were vested by statute in, or performed by, the Commissioner of the Immigration and Naturalization Service. Pursuant to such transfer, the ORR Director is ''responsible for,'' among other things, ''ensuring that the interests of the child are considered in decisions and actions relating to the care and custody of an [unaccompanied child],'' [19] ''implementing policies with respect to the care and placement of [unaccompanied children],'' [20] and ''identifying a sufficient number of qualified individuals, entities, and facilities to house [unaccompanied children].'' [21] In addition, the HSA makes the ORR Director responsible for ''overseeing the infrastructure and personnel of facilities in which [unaccompanied children] reside,'' [22] and ''conducting investigations and inspections of facilities and other entities in which [unaccompanied children] reside, including regular follow-up visits to such facilities, placements, and other entities, to assess the continued suitability of such placements.'' [23]

Necessarily, a fundamental aspect of ensuring that there are qualified individuals, entities, and care provider facilities to care for and house unaccompanied children is ensuring that care provider facility staff, contractors, or sub-grantees of the care provider facility, along with care provider facility volunteers and other individuals who have access to children in ORR care through contracts or grants with ORR, do not engage in abuse or neglect of children in ORR care; that such individuals who are alleged to have engaged in such abuse or neglect are reported and identified; that allegations of child abuse or neglect against such individuals are properly and thoroughly investigated; and that if the allegations are found to be substantiated and are sustained pursuant to an appeal and review process, actions are taken to ensure that such individuals are prohibited from working or volunteering in any way on ORR-funded grants or contracts and do not have contact with children in ORR custody. Thus, the rule described here is a crucial aspect of implementing ORR's statutory mandates under the HSA, which expressly delegates authority to the ORR Director to administer the UC Bureau.

Pursuant to these authorities, this rule describes the circumstances in which ORR will investigate allegations of child abuse and neglect; the procedures for such investigations; and steps ORR may take in response to findings that individuals who work or volunteer at ORR-funded care provider facilities have perpetrated abuse or neglect against children in its custody, including due process requirements that would apply to such steps.

In addition to the HSA, ORR's Interim Final Rule regarding the Prevention of Sexual Abuse [24] (PSA IFR), which ORR promulgated in 2014 pursuant to the Violence Against Women Reauthorization Act of 2013 (VAWA),[25] describes requirements concerning sexual abuse of unaccompanied children in ORR custody. Though the PSA IFR specifically applies to the prevention of *sexual* abuse of unaccompanied children, it describes requirements that inform this IFR regarding the prevention of abuse and neglect, including requirements for staff background checks; suspension of staff, contractors, and volunteers suspected of perpetrating sexual abuse or sexual harassment from all duties that would involve or allow access to unaccompanied children pending the outcome of an investigation; and requirements for restricting the employment of care provider facility staff against whom allegations of child abuse or neglect have been substantiated.[26]

The standards in the PSA IFR also require care provider facilities to refer allegations of sexual abuse and sexual harassment to proper investigating authorities (*i.e.,* State and local law enforcement, child protective services, and licensing authorities), and to remain informed of ongoing investigations and fully cooperate with outside investigators as necessary.[27] ORR notes that nothing in this rule is intended to replace or prohibit investigations of sexual abuse and sexual harassment under other civil rights laws. The PSA IFR also states that ORR will refer allegations to the Department of Justice

or other investigating authority for further investigation where such reporting is in accordance with its policies and procedures and any memoranda of understanding.[28]

At the time the PSA IFR was published, ORR assumed that all States or localities would maintain their historic practices of investigating alleged child abuse and neglect in ORR State-licensed care provider facilities. Accordingly, the PSA IFR only contemplates scenarios where a State or local authority is the investigating authority for allegations of sexual abuse and harassment occurring at ORR care provider facilities. This rule describes a new system of ORR investigations and actions to be taken based on investigation findings, which ORR would apply, as needed, at care provider facilities as described at § 412.100(c).

Finally, the Victims of Child Abuse Act (VCAA) and its implementing regulations [29] impose reporting requirements on ORR-contracted facilities (*e.g.,* EIFs). Under the VCAA, child abuse (as defined in the Act) occurring at Federally-operated or contracted facilities must be reported to local law enforcement or child protective services agencies with jurisdiction to investigate reports of child abuse or to protect child abuse victims in the land area or facility in question, ''provided that such agencies, if non-federal, enter into formal written agreements to do so. . . .'' [30] If there is no such formal written agreement, the Federal Bureau of Investigation (FBI) is the agency designated to receive such reports.[31] However, ORR is advised that the FBI's jurisdiction is limited to Federal crimes (*i.e.,* the FBI cannot investigate conduct that does not rise to the level of a Federal crime)—and many child abuse and neglect allegations that nonetheless warrant investigation do not constitute Federal crimes. Upon receipt of such reports of child abuse, agencies designated under the VCAA—which can include other federal agencies or non-federal agencies that are designated pursuant to a formal written agreement—may conduct investigations of the alleged abuse and neglect. This IFR does not conflict with any agency duties under the VCAA. If ORR executes formal written agreements with relevant local authorities to investigate child abuse and neglect at EIFs, it reserves discretion under its statutory authorities to conduct its own investigations as well. In such cases, ORR intends under this rule that any ORR investigation will not conflict with investigations performed by other authorities in connection with the VCAA.

C. Basis and Scope of Regulatory Action

1. Discontinuation of Investigations of Child Abuse and Neglect at Care Provider Facilities That Care for Unaccompanied Children.

For years, ORR has relied on States or localities both to license its care provider facilities and to investigate any allegations of child abuse and neglect.[32] Since 2021, however, three States—Texas, Florida, and South Carolina—have ceased licensing childcare facilities that serve or propose to serve unaccompanied children under grant or contract with ORR. As of publication of this rule, Florida and South Carolina continue to provide for State-based investigations of alleged child abuse and neglect in ORR-funded care provider facilities.[33] In contrast, in connection with the State's decision to end licensing of care provider facilities housing unaccompanied children, the Texas State agency that would otherwise be responsible for such investigations no longer conducts them at ORR care provider facilities (except foster care providers).

Pursuant to a proclamation by Texas's Governor Abbott,[34] on July 13, 2021, the Texas Health and Human Services Commission (HHSC) issued an emergency rule temporarily exempting Texas's childcare facilities that shelter unaccompanied children in Federal custody from Texas's licensing requirement.[35] The exemption went through a series of renewals until, on July 22, 2022, Texas amended the emergency rule to make the licensure exemption ongoing.[36]

ORR understands that, pursuant to this change in Texas law, neither Texas HHSC nor the Texas Department of Family and Protective Services (DFPS) currently conducts child abuse and neglect investigations in facilities that house unaccompanied children due to their lack of jurisdiction over license-exempt childcare facilities. Because DFPS is not investigating, substantiating, or sustaining these allegations pursuant to administrative reviews as appropriate, DFPS does not list potential sustained perpetrators in the Texas child abuse and neglect registry,[37] and thus such perpetrators will not be identified as having committed abuse or neglect in a background check by an ORR-funded or other provider. State and local law enforcement continue to investigate reported child abuse and neglect that rises to the level of a crime, but in many instances, actions involving abuse or neglect constitute civil violations, but not criminal violations. Depending on circumstances, this may include physical abuse, verbal/emotional abuse, and sexual harassment.

As discussed above, ORR has historically relied on State and local authorities to investigate allegations of child abuse and neglect arising at its care provider facilities. However, a significant gap in investigative capacity has resulted from Texas's decision to cease DFPS investigations at ORR care provider facilities. ORR was unable to immediately fill this gap by conducting its own investigations because such investigations necessitate the use of skilled and trained investigators, and historically ORR had not played this role.

However, ORR took immediate and ongoing steps after determining that Texas planned to cease its investigations into alleged child abuse and neglect at ORR-funded care provider facilities housing unaccompanied children. Soon after it became clear that Texas DFPS was not going to resume its long-standing child welfare and investigative functions when it extended its emergency declaration in 2022, ORR began examining the operational feasibility, capacity, and expertise that would be required to permanently absorb the investigative responsibilities once performed by Texas DFPS. Such an endeavor represented an unexpected

[32] *See, e.g.,* 79 FR 77768, 77776 (''. . . ORR does not conduct investigations regarding the substance of an allegation. Instead, as stated in the previous paragraphs, ORR requires that all care provider facilities refer all allegations, regardless of how an allegation is made or who it comes from, to the proper investigating authorities.'').

[33] ORR notes that Florida continues to investigate child abuse and neglect in care provider facilities housing unaccompanied children, and ORR only operates foster family home care settings in South Carolina. Foster care licensing has not been impacted by South Carolina's action to not license residential care.

[37] Tex. Fam. Code § 261.002.

and significant expansion of ORR's operations, as ORR had successfully relied on relevant state child welfare entities to fulfill that role for years up to this point. ORR's work over the past two years has included, but not been strictly limited to: communicating with Texas state officials to confirm their position regarding investigations into alleged child abuse and neglect at ORR care providers and attempt to reach a resolution with the state directly; consulting with other federal agencies to evaluate available options to address the lack of investigations and seek feedback on ORR's proposed approach; researching and planning how ORR would develop the necessary expertise and capacity to conduct investigations; developing policies and procedures to inform how investigations are conducted; obtaining administrative approval for new agency positions; creating of new comprehensive technical systems for recording and tracking investigations; and, eventually, the hiring, onboarding, and training of qualified investigative staff.

In addition, while engaged in these efforts, ORR directed its care provider facilities in Texas to continue reporting abuse and neglect allegations to State child welfare agencies, State licensing agencies, State and local law enforcement, and where appropriate, the HHS Office of the Inspector General and the FBI. ORR also established a framework, utilizing its child welfare team or CWT (later becoming known as the ORR Prevention of Child Abuse and Neglect or PCAN Team) for conducting in-depth reviews of care provider facility responses to each individual allegation of abuse and neglect. In these reviews, ORR staff receive and review documentation concerning the allegation, assess whether proper interventions and reporting requirements under ORR policies and procedures were followed, and make recommendations for appropriate follow-up actions regarding the alleged victim's medical and mental health needs.

While ORR's in-depth reviews have played an important role in filling some of the investigations-related gaps like ensuring compliance with reporting requirements and following up on appropriate interventions for staff and children, there remained a need for a separate entity other than the care provider facilities themselves—that would ensure independent oversight and response—to investigate allegations of abuse and neglect that do not constitute criminal violations. Accordingly, pursuant to its statutory responsibilities to oversee the personnel and infrastructure of care provider facilities and to conduct investigations (see discussion under section IV.B. Authority), ORR established the Division of Unaccompanied Child Protection Investigations (DCPI) in June 2024.[38] DCPI began conducting investigations of alleged child abuse and neglect at care provider facilities in Texas in July 2024.

However, investigations without more do not fully fill the gap left by Texas DFPS's decision not to investigate allegations of child abuse and neglect, including by substantiating and sustaining such allegations so that perpetrators may be identified and precluded from working with unaccompanied children in ORR's care. The statutory provisions authorizing ORR to establish its investigative division do not specify the particular procedures ORR should follow in conducting investigations and taking action to protect children from individuals with pending or sustained allegations of sexual abuse or neglect. Thus, ORR has determined that in order to fully address the protection of children in its custody, consistent with its statutory responsibility, it is important to establish a mechanism to ensure that individuals with sustained Tier I allegations (as defined in this rule) investigated by DCPI are terminated from employment in ORR-funded programs, prevented from having contact with children in ORR programs, and barred from employment in any ORR-funded program in the future. To accomplish this goal with appropriate due process protections, ORR has adopted this rule.

2. Need for ORR To Investigate Child Abuse and Neglect at Emergency or Influx Facilities

In addition, this rulemaking provides needed clarity with respect to investigations of child abuse and neglect at EIFs. Responsibility for investigating allegations of child abuse and neglect at EIFs is unique to each EIF based on a number of factors, including the willingness of States or local authorities to investigate child abuse and neglect at care provider facilities housing unaccompanied children or enter into a formal written agreement with ORR to do so; the unique size, capacity, and scope of EIFs; and the urgent timelines under which EIFs may be activated. Because EIFs are activated in times of influx, which arise based on unpredictable migration patterns, there may not be sufficient time to establish formal written agreements with local authorities to conduct child abuse and neglect investigations when ORR activates such facilities. For example, referrals of unaccompanied children to ORR increased dramatically from Federal fiscal year (FFY) 2020 (15,381 children) to FFY 2021 (122,731 children), continued to increase in FFY 2022 (128,904 children), but then decreased in FFY 2023 (118,938 children).[39] ORR believes, as a result, that it is appropriate to include EIFs within the scope of this rule—to ensure that reports of child abuse and neglect arising at EIFs are consistently investigated and that ORR may take actions to protect unaccompanied children from those with pending or sustained allegations.[40]

ORR prefers that State and local authorities exercise their long-standing authority under State and local laws and regulations to investigate allegations of child abuse and neglect and will continue to seek to establish agreements with States and local authorities to investigate child abuse and neglect at EIFs. However, as noted above, as of the date of publication, ORR does not currently have written agreements with State or local authorities to conduct child welfare investigations at EIFs, and as noted above, FBI investigations are limited to allegations that potentially rise to the level of Federal crimes. Further, with DCPI investigations of alleged child abuse and neglect underway, there is also a need to maintain an ORR central registry to document substantiated abuse and neglect findings based on its own investigations. As in States that do not to provide an investigative infrastructure for ORR-funded facilities housing unaccompanied children, both investigations and the maintenance of a central registry are required at EIFs—particularly where no State or local investigative infrastructure is available (*e.g.,* pursuant to a formal written agreement with ORR).

ORR notes that any ORR investigations into allegations of child abuse and neglect at EIFs under this rule would be separate from any other investigations that may occur by other authorities, whether pursuant to the VCAA or otherwise, and will not conflict with investigations by those other authorities.

3. Scope of Rulemaking

This IFR describes the circumstances in which ORR will investigate and substantiate child abuse and neglect allegations. It also delineates further steps ORR may take upon conducting such investigations to protect unaccompanied children, such as ensuring that certain individuals against whom allegations of child abuse and neglect have been substantiated and upheld after an appeal and review process are prevented from working or volunteering in any way on ORR-funded grants or contracts, and that alleged perpetrators with pending allegations do not have continued access to children. As discussed below at section VI, considering ORR's recent establishment of the DCPI, there is good cause to issue an IFR both to describe the nature and scope of ORR investigations, and critically, to establish required consequences for certain investigative findings, with appropriate due process protections.

This IFR:

- Describes the responsibilities of ORR to conduct investigations into allegations of child abuse and neglect of unaccompanied children at (1) care provider facilities located in States where the State agency responsible for investigating child abuse and neglect allegations will not investigate such allegations in ORR-funded care provider facilities, and at (2) EIFs;
- Defines the applicable burden of proof as a preponderance of the evidence and describes the investigation disposition types as substantiated-Tier I; substantiated-Tier II; not substantiated; unfounded; or administratively closed;
- Describes notification requirements of the findings of investigations;
- Describes an appeal and review process for individuals with substantiated allegations of child abuse and neglect at ORR care provider facilities in States that will not investigate allegations of abuse or neglect in facilities housing unaccompanied children and at emergency or influx facilities;
- Creates an ORR Central Registry, and associated processes and sanctions, for individuals with sustained Tier I allegations of child abuse and neglect at EIFs and at ORR care provider facilities in States that will not investigate allegations of abuse or neglect in facilities housing unaccompanied children; and
- Describes requirements for care provider facilities to cooperate with investigations.

D. Severability

The different parts of this interim final rule address distinct aspects of investigations of child abuse and neglect. These include: the investigation of allegations of child abuse and neglect occurring at care provider facilities that do not conduct their own investigations, and investigations at EIFs (§ 412.100); interventions and discipline, including an ORR Central Registry of perpetrators relating to certain sustained allegations (§ 412.101); the appeal and review process (§ 412.102); and obligations of care provider facilities (§ 412.103) in cooperating with investigations. To the extent any section or subsection of the rule is declared invalid by a court, ORR intends for all remaining sections and subsections to remain in effect, as they would continue to function sensibly. As an illustration, ORR expects that if a court were to invalidate § 412.100(c)(2), which makes the requirements of § 412.100 relating to investigations into allegations of child abuse and neglect applicable to EIFs, the standards, requirements, and procedures under § 412.100 would continue to be applicable to care provider facilities housing unaccompanied children in States where the State agency responsible for investigating child abuse and neglect allegations will not investigate such allegations in ORR-funded care provider facilities, as provided in § 412.100(c)(1). Likewise, ORR expects that if a court were to declare that the ORR Central Registry as defined at § 412.001 and described at § 412.101(a) is invalid, the requirements of § 412.100 relating to investigations into allegations of child abuse and neglect at certain facilities, and the obligations of care facilities delineated at § 412.103 will remain in effect.

V. Discussion of Elements of the Interim Final Rule

Section 412.001 Definitions

ORR, in § 412.001, is codifying the definitions of terms that apply to this part. Many terms used in this rule are defined in other authorities, including statutes and ORR regulations, and this rule uses these terms consistently with those definitions. For example, this rule uses the term ''unaccompanied child'' consistently with the definition provided in the UC Program Foundational Rule, at 45 CFR 410.1001 (which is further consistent with the definition of ''unaccompanied alien child'' found in the Homeland Security Act (HSA), at 6 U.S.C. 279(g)(2)). Below, ORR further explains its rationale for certain definitions applied in this rule.

The definition of ''administrative closure'' describes when ORR determines it will not make a finding regarding an allegation of child abuse or neglect. Administrative closure does not imply that ORR would have found an allegation of abuse or neglect to be substantiated or not substantiated. ORR may assign an intake report for administrative closure if ORR determines it is not appropriate for investigation. Reasons for administrative closure before an investigation may include, but are not limited to, lack of jurisdiction to conduct an investigation of the allegation (*e.g.,* if the alleged abuse or neglect occurred in a State where the State agency responsible for investigating child abuse and neglect continues to investigate such reports of unaccompanied children in ORR care); transfer of the report to another jurisdiction or agency; an allegation not rising to the level of child abuse or neglect; duplication of an existing report; or an allegation is otherwise outside the scope of this rule, as described at § 412.100(c). ORR may also make a disposition of administrative closure after investigation. Reasons for administrative closure after an investigation may include, but are not limited to, inability to contact the child; insufficient information to proceed with the investigation; or transfer to another jurisdiction or agency. If ORR administratively closes an intake report or investigation, it may consider further investigation related to the initial allegation if new information becomes available.

The definition of ''alleged perpetrator'' means a person who is alleged to have abused or neglected a child within the scope of this part as described at § 412.100(a) and (c). The term encompasses individuals who are identified in an intake report, and subject to an investigation under this part, but does not include individuals who have been subject to an investigation which resulted in a not substantiated allegation, unfounded allegation, or administrative closure. Per the definition of child abuse and neglect set out at § 412.001, alleged perpetrators can include individuals who observed, permitted, or otherwise allowed a child to be mistreated and knowingly failed to act to protect the child. Alleged perpetrators do not become sustained perpetrators until all appropriate investigative steps have been completed and they have exhausted all administrative remedies, including waiving their right to appeal, as

applicable and as specified in § 412.102(c).

The definition of ''child abuse and neglect'' in this IFR is based on ORR's review of Federal laws, consultation with the Administration on Children, Youth, and Families, including the Children's Bureau, and on its experience operating the UC Bureau. For example, ORR intends that this definition capture the types of behaviors identified at 22 U.S.C. 7102, 34 U.S.C. 20341, and 42 U.S.C. 5106g, Note § 3, to the extent they describe behaviors and situations that are relevant to unaccompanied children for purposes of this rule. At the same time, the definition of ''child abuse and neglect'' and related definitions (*e.g.,* medical neglect, verbal or emotional abuse) in this rule provide additional granularity relevant to the UC Bureau. The definitions of sexual abuse and sexual harassment used in this rule are the same as the PSA IFR at 45 CFR 411.6. ORR developed other related definitions to appropriately capture incidents and circumstances that raise child welfare concerns, and also reflect how abuse or neglect has historically been identified within the UC Bureau (*e.g.,* based on historical significant incident reporting to ORR, input from subject matter experts in child welfare including ORR's CWT, Prevention of Sexual Abuse Team, Division of Health for Unaccompanied Children, Federal field specialists, and Data Analytics and Information Management team). For example, this IFR provides separate definitions distinguishing neglect and medical neglect, and child abuse from child neglect, in contrast to 34 U.S.C. 20341, which groups these concepts together. Having separate definitions in this rule also enables ORR to have accurate data on specific kinds of abuse or neglect that may occur with respect to children in its care.

The definition of ''inappropriate sexual behavior'' refers to inappropriate sexual, derogatory, or offensive conduct that does not rise to the level of sexual abuse or sexual harassment. ORR intends that this term, which is also used in current ORR policies, capture conduct that falls outside of other relevant definitions, but still merits reporting and response.

The definition of ''medical neglect'' draws in part from ORR's review of other Federal authorities. For example, it is meant to include concerns described in the definition of ''negligent treatment'' from 34 U.S.C. 20341(c)(7), and the definition of ''neglect'' from 42 CFR 483.5. ORR found that these authorities described the types of issues from which it seeks to protect unaccompanied children in its custody, and, to that extent, these authorities informed the definition of ''medical neglect'' in this rule. ORR is providing a separate definition for medical neglect, distinct from other forms of neglect, based on its experience operating the UC Bureau, including knowledge of the forms of neglect historically reported within the context of the UC Bureau, and the importance of having sufficient granularity in data reporting and monitoring to appropriately capture and address the types of incidents and circumstances that raise child welfare concerns.

''Multidisciplinary team'' is defined as a group of individuals comprised of ORR staff, including subject matter experts. Multidisciplinary teams provide input to ORR's Child Welfare Investigators by assessing reported allegations of child abuse and neglect at care provider facilities and making recommendations regarding physical and behavioral healthcare needs of unaccompanied children potentially impacted by child abuse and neglect at these facilities. Notably, the multidisciplinary team may include, but is not limited to, child welfare experts, forensic interviewers, mental health practitioners, child development and disability practitioners, pediatricians and other medical experts as needed, policy advisors, Federal program analysts, Federal program management staff, or other subject matter experts. The multidisciplinary team will also focus on the physical and behavioral healthcare needs of unaccompanied children potentially impacted by, and during the course of, the investigation of child abuse or neglect. Importantly, this team is different from, and in addition to, the ORR Child Welfare Investigator. The ORR Child Welfare Investigator sits within the DCPI, which will have the option to consult with the separate multidisciplinary team as necessary and appropriate. ORR believes that this collaborative approach to the investigation will lead to a coordinated response, representing a variety of fields and disciplines to support unaccompanied children while also ensuring a more efficient and thorough investigation.

The definition of ''not substantiated allegation'' means a disposition that there is not a preponderance of the evidence establishing that the alleged perpetrator committed child abuse or neglect (as defined in this section), but there is at least some evidence that the unaccompanied child was harmed or placed at risk of harm, whether or not by the alleged perpetrator. This term does not include administratively closed allegations. ORR notes that this definition differs from its definition of ''unsubstantiated allegation'' under the PSA IFR at 45 CFR 411.5 (''an allegation that was investigated and the investigation produced insufficient evidence to make a final determination as to whether or not the event occurred''). This investigation disposition, as well as the other defined dispositions, are further described in § 412.100.

The definition of ''physical abuse'' in this IFR aligns with the types of behaviors identified at 34 U.S.C. 20341 and described at 42 U.S.C. 5106g, Note § 3, to the extent that those provisions describe behaviors and situations that are relevant to unaccompanied children for the purposes of this rule. Further, the definition of ''physical abuse'' provided in this rule includes specific non-exhaustive examples, based on ORR's experience operating the UC Bureau and the forms of physical abuse historically reported, as well as feedback from care provider facilities that definitions with greater specificity better support effective reporting and monitoring.

The definition of ''preponderance of the evidence'' describes the burden of proof used to substantiate allegations of child abuse and neglect. ORR notes that this definition is based on 42 CFR 93.219, and that this definition means something is more likely than not to be true.

The definition of ''sexual abuse,'' has the same meaning as that term is defined in 45 CFR 411.6.

The definition of ''sexual harassment,'' has the same meaning as that term is defined in 45 CFR 411.6. ORR notes that this definition indicates that prohibited conduct ''includes'' repeated actions; however, the definition is not intended to be exhaustive, and a single instance may constitute sexual harassment.

The definition of ''sub-grantee'' is based on the definition of the term ''subrecipient'' from 45 CFR 75.2. ORR is using the term sub-grantee instead of subrecipient for consistency with existing ORR policies and guidance.

The definition of ''substantiated allegation-Tier I'' means a disposition that there is a preponderance of the evidence establishing that the alleged perpetrator committed child abuse or neglect, and the investigation indicates one or more automatic Tier I substantiating circumstances have been found pursuant to § 412.100(e)(7) or substantiation at Tier I is warranted based on consideration of aggravating and mitigating factors pursuant to § 412.100(e)(8). ORR notes that this

definition differs from its definition of ''substantiated allegation'' under the PSA IFR at 45 CFR 411.5 (''an allegation that was investigated and determined to have occurred'') to incorporate that ORR, as the investigating entity, is using the preponderance of evidence standard to establish a disposition of ''substantiated'' and to incorporate the consideration of automatic Tier I substantiating circumstances, aggravating factors, and mitigating factors.

The definition of ''substantiated allegation-Tier II'' means a disposition that there is a preponderance of the evidence establishing that the alleged perpetrator committed child abuse or neglect, and that based on consideration of aggravating and mitigating factors pursuant to § 412.100(e)(8), the evidence does not warrant a finding of ''Substantiated Allegation-Tier I.'' ORR notes that this definition differs from its definition of ''substantiated allegation'' under the PSA IFR at 45 CFR 411.5 (''an allegation that was investigated and determined to have occurred'') to incorporate that ORR, as the investigating entity, is using the preponderance of the evidence standard to establish a disposition of ''substantiated'' and to incorporate the consideration of whether a disposition of substantiated allegation-Tier I is warranted, including in consideration of the aggravating and mitigating factors.

The definition of ''substantiated perpetrator'' means a person against whom an allegation of child abuse or neglect has been substantiated by ORR at Tier I or Tier II, but who has not exhausted the applicable appeal and review process for such allegations. Substantiated perpetrators at both Tier I and Tier II may appeal the disposition made by ORR to an Administrative Law Judge (ALJ) of the HHS Departmental Appeals Board (DAB) pursuant to § 412.102(c) and subsequently to the HHS Assistant Secretary for Children and Families pursuant to § 412.102(e).

The definition of ''sustained allegation'' means an allegation that was substantiated by ORR at Tier I or Tier II and that was upheld pursuant to the appeal and review process described in this rule or for which an appeal and review process was dismissed, including when the substantiated perpetrator waives their right to appeal by failing to make a timely request or by waiving those rights as specified in § 412.102(c).

The definition of ''sustained perpetrator'' means a substantiated perpetrator at Tier I or Tier II whose child abuse or neglect finding was upheld in the appeal and review process or whose appeal and review process was dismissed, including due to the sustained perpetrator's waiver of their right to appeal by failing to timely request appeal, or by otherwise waiving those rights as specified at § 412.102(c). Tier I Sustained perpetrators shall be prohibited from working in any way in connection with ORR-funded grants or contracts, including working or volunteering at any ORR care provider facility; may not have access to or contact with any unaccompanied child in ORR custody; will be added to the ORR Central Registry; and will be referred to appropriate law enforcement agencies. Information concerning Tier II sustained perpetrators will be recorded and maintained in agency records.

The definition of ''unfounded allegation'' means a disposition that there is not a preponderance of the evidence establishing that the alleged perpetrator committed child abuse or neglect, and the evidence indicates that the unaccompanied child was not harmed or placed at risk of harm. ORR notes that this definition differs from its definition of ''unfounded allegation'' under 45 CFR 411.5 (''an allegation that was investigated and determined not to have occurred'') to incorporate that ORR, as the investigating entity, is using the preponderance of evidence standard to establish a disposition of ''unfounded allegation.'' ORR also notes that records regarding unfounded allegations are maintained and disposed of in accordance with the applicable federal records management requirements.

The definition of ''verbal or emotional abuse'' aligns with the definition of ''mental injury'' at 34 U.S.C. 20341 and described at 42 U.S.C. 5106g, Note § 3, to the extent that those authorities describe behaviors and situations that are relevant to unaccompanied children for the purposes of this rule. The definition also includes specific non-exhaustive examples, based on ORR's experience operating the UC Bureau and the forms of verbal and emotional abuse historically reported, as well as feedback from care provider facilities that definitions with greater specificity will better support effective reporting and monitoring.

Section 412.100 Investigations Into Allegations of Child Abuse and Neglect

ORR describes the purpose of this IFR at § 412.100(a). This rule establishes the standards, requirements, and procedures for investigations by ORR of allegations of child abuse and neglect of unaccompanied children in ORR custody alleged to have been committed by care provider facility staff, contractors or sub-grantees of the care provider facility, care provider facility volunteers, or other individuals who have access to children in ORR care through contracts or grants with ORR, subject to § 412.100(c). ORR may also investigate individuals including those who are affiliated with legal service providers, child advocates, or other contractors engaged by ORR or the relevant care provider facility, to the extent allegations of abuse or neglect concern unaccompanied children who were in ORR custody at the time of the alleged incident. ORR believes these regulations will reduce the risk of child abuse and neglect of unaccompanied children in ORR care.

Section 412.100(b) provides that the provisions of this part are separate and severable from one another and that if any provision is stayed or determined to be invalid in a final judgment by a court of law, the remaining provisions shall continue in effect. This provision is meant to be consistent with the discussion of severability provided in the preamble at section IV.D.

Section 412.100(c) states that this rule applies in two circumstances. First, it applies to care provider facilities located in States where the State agency otherwise responsible for investigating child abuse and neglect allegations will not, as a matter of policy, investigate allegations of abuse or neglect concerning unaccompanied children at ORR-funded care provider facilities.[41] Second, this rule applies to EIFs. ORR notes this regulation implements ORR's statutory authority to conduct investigations and inspections of care provider facilities and other entities in which unaccompanied children reside while in ORR custody, regardless of the alleged perpetrator's particular role or job at the care provider facility—*i.e.,* regardless of whether they are employed directly by the care provider facility, are employed by a contractor or sub-grantee of the care provider facility, are caring for unaccompanied children through a cooperative agreement with ORR, or are volunteers at a care provider facility. Finally, this regulation provides ORR the authority to investigate any allegations of child abuse and neglect that occurred during a child's stay at an ORR care provider facility, even if the allegation is reported after the unaccompanied child has been released from ORR care and custody. In the event that a child is transferred to another care provider facility, ORR will continue to investigate any allegations of child abuse and neglect that occurred at the

[41] As of the publication of this rule, the only such state is Texas.

care provider facility for which the allegation was submitted.

ORR believes that it is critical to ensure that allegations of child abuse and neglect are reported to ORR. For example, ORR's existing policies and procedures require care provider facilities to report all allegations of child abuse and neglect of an unaccompanied child in ORR custody to ORR and to Federal, State, and local authorities in accordance with any applicable Federal, State, and local reporting and licensing laws.[42] Further, 45 CFR 411.61 requires care provider facilities to report to ORR any allegation, suspicion, knowledge, or information regarding an incident of sexual abuse or sexual harassment occurring in ORR care, along with any retaliatory actions resulting from reporting such incidents. The UC Program Foundational Rule requires at 45 CFR 410.1303(g) that all care provider facilities report to ORR any emergency incident, significant incident, or program-level event, in accordance with any applicable Federal, State, and local reporting laws. These existing requirements apply to all ORR care provider facilities. The requirements outlined in this rule at § 412.100(d) further provide that any person may report an allegation of child abuse and neglect to ORR directly, to the care provider facility, or to a designated entity or office that is not part of the care provider facility. To ensure clarity and consistency, ORR believes it is important to outline these additional reporting requirements for care provider facilities subject to this rule.

ORR believes that ensuring individuals can report allegations of child abuse and neglect without fear of retaliation is key to ensuring that such reports are made. Therefore, under § 412.100(d), care provider facilities to which this part applies must have written policies and procedures that allow children, care provider facility staff, contractors or sub-grantees of the care provider facility, care provider facility volunteers, families of unaccompanied children, legal service providers, child advocates, attorneys of record, and any other persons to report allegations of child abuse and neglect to ORR directly, to the care provider facility, or to a designated entity or office that is not part of the care provider facility. Under § 412.100(d), the written policies and procedures must minimally address three topics. First, under § 412.100(d)(1), the care provider facilities' policies and procedures must at minimum provide unaccompanied children and other individuals with methods for reporting and inform them of how they can report an allegation of child abuse and neglect to a designated entity or office that is not part of the care provider facility. Such entity or office must be able to receive allegations of child abuse and neglect and to immediately forward them to ORR, allowing unaccompanied children to remain anonymous upon request. Second, under § 412.100(d)(2), all the methods of reporting must be accessible to all unaccompanied children including those with disabilities and those with limited English proficiency. This can include, for example, ensuring unaccompanied children are aware of, and are able to call, ORR's National Call Center.[43] In order to be accessible to unaccompanied children with disabilities, the method of reporting must provide effective communication consistent with section 504 of the Rehabilitation Act of 1973. In addition, ORR notes that the requirements for language access for unaccompanied children with disabilities under the UC Program Foundational Rule must also be met, at 45 CFR 410.1306 and 45 CFR 410.1311 respectively. Third, under § 412.100(d)(3), the care provider facility policies and procedures must include protections to prevent retaliation against unaccompanied children and others who report allegations of child abuse and neglect.

At § 412.100(e), ORR is establishing requirements for the screening and intake of reports of allegations of child abuse and neglect, conducting investigations, assigning dispositions to the allegations, and documenting investigations. When receiving reports of allegations of child abuse and neglect and conducting investigations, ORR must ensure the health and safety of unaccompanied children while making every effort to reduce further trauma to the alleged victim(s).

ORR is requiring at § 412.100(e)(1), that when it receives a report of alleged child abuse or neglect, ORR must generate an intake report and determine whether the report includes an allegation that, if found to be true, would meet the definition of child abuse and neglect in this part and is consistent with § 412.100(a) and (c). If so, ORR will assign the intake report for investigation. If not, ORR will assign the intake report for administrative closure. ORR will assign an intake report for investigation where the allegation meets the requirements of § 412.100(a) and (c); but ORR may in its discretion elect not to investigate an allegation at an EIF if it has a formal written agreement with the relevant State or local authority to perform such investigations. ORR may administratively close an intake report when it determines it is not appropriate for an investigation, which may include circumstances such as those described in the definition of administrative closure in § 412.001. ORR notes that it will assign an intake report for investigation in accordance with the requirements at § 412.100(e) even if the child is no longer in ORR care, as long as the alleged abuse or neglect occurred while the child was in ORR care. This could include, for example, instances in which an unaccompanied child reports an allegation of abuse or neglect to ORR after they have been released, or if the child has been transferred to another care provider facility. In the event that a child has been transferred to a new care provider facility in a State that conducts investigations, ORR will continue its investigation in the State in which the alleged child abuse or neglect occurred, as the alleged perpetrator may still pose a risk to other children in the care provider facility from which the child was transferred. ORR will document and assess the report to determine the timeline for assigning the report for investigation based on the level of risk of harm to the alleged victim and assign different response times based on the level of risk of harm. ORR will document and maintain a record of every allegation received at care provider facilities that fall under this IFR, whether it is ultimately assigned for investigation and a disposition rendered or assigned for administrative closure. ORR's decision and rationale about whether to classify the allegation as an intake report and assign it for investigation (or for administrative closure) will also be documented.

After an intake report is assigned for investigation, under § 412.100(e)(2), ORR shall assign an ORR Child Welfare Investigator to make a prompt and thorough investigation of the report to obtain sufficient information to determine whether the allegation is substantiated based on a preponderance of the evidence. The preponderance of the evidence standard for ORR investigations shall be applied in determining whether the alleged perpetrator committed child abuse or neglect. As such, the investigation prescribed in this section relates to the

[42] *See,* ORR Policy Guide Section 5.8.2 Significant Incidents.

[43] *See* ORR, Office of Refugee Resettlement National Call Center, *https://www.acf.hhs.gov/orr/outreach-material/office-refugee-resettlement-national-call-center* (date accessed Sept. 6, 2024).

underlying allegation of abuse or neglect to a child, in addition to focusing on the individual perpetrator(s) involved. ORR will communicate its disposition to the alleged perpetrator, consistent with the requirements set forth at § 412.100(g), specifying whether the investigation determined that the alleged perpetrator committed abuse or neglect as defined in this rule. ORR emphasizes that this child-centered approach comports with common child welfare best practices seen across State systems.

ORR is requiring, at § 412.100(e)(3), that ORR shall provide notification that an allegation of child abuse and neglect will be investigated by ORR. This notification shall be provided to the alleged perpetrator; care provider facility; alleged victim; alleged victim's attorney of record (if the child has an attorney of record); and the alleged victim's parent(s), legal guardian(s), or sponsor(s) (as appropriate), unless ORR has evidence showing the parents, legal guardians, or sponsors should not be notified. If the alleged victim is 14 years old or older and ORR has determined that the alleged victim is able to make an independent decision, the alleged victim can affirmatively consent to disclosure. ORR notes that this notification requirement to the alleged victim, their attorney of record, and their parents, legal guardians, or sponsors is consistent with ORR's existing subregulatory notification policies and the PSA IFR requirements at 45 CFR 411.61(e) that are specific to sexual abuse and sexual harassment. To be clear, ORR also notes that the requirements of 45 CFR 411.61(f) continue to apply with respect to allegations of sexual abuse and harassment.

ORR is requiring, at § 412.100(e)(4), that the care provider facility must take immediate responsive measures to protect child welfare when notified that an investigation has been initiated, confirm the actions to ORR, and notify the alleged perpetrator, as appropriate. Such responsive measures may extend throughout the pendency of an investigation, and during the pendency of appeal and review processes, as necessary and applicable. ORR believes that this requirement is necessary to protect the safety and well-being of the unaccompanied children in ORR's care and custody until the allegation is either found to be not substantiated, unfounded, or is administratively closed. Additionally, ORR notes that care provider facility actions must be consistent with 45 CFR 411.66, which requires that any ORR and care provider facility staff, contractors, and volunteers suspected of perpetrating sexual abuse or sexual harassment must be suspended from all duties that would involve or allow access to unaccompanied children pending the outcome of an investigation.

At § 412.100(e)(5), ORR is establishing minimum standards that ORR shall follow when investigating allegations of child abuse and neglect. ORR investigations under this rule are not intended to replace investigations that may be performed by other relevant authorities, including State law enforcement or other Federal agencies, or entities designated under the VCAA to receive reports of child abuse. Accordingly, to the extent possible and appropriate, ORR is requiring at § 412.100(e)(5)(i) that it coordinate with any local or State law enforcement or other Federal agencies during its investigation. ORR may pause or resume an investigation at its discretion, with input from law enforcement partners or other relevant investigatory bodies, as necessary. Such coordination and cooperation with outside investigations is consistent with similar principles described in the PSA IFR.[44]

Additionally, under § 412.100(e)(5)(ii), ORR shall establish, as necessary, a multidisciplinary team comprised of ORR staff, which may include, but is not limited to, child welfare experts, forensic interviewers, mental health practitioners, child development and disability practitioners, pediatricians and other medical experts as needed, policy advisors, Federal program analysts, Federal program management staff, and subject matter experts to collaborate with the ORR Child Welfare Investigator. Although the ORR Child Welfare Investigator is responsible for rendering a final disposition based on their investigation, the multidisciplinary team will engage a range of ORR staff who are subject matter experts to provide input and an assessment of the reported allegation of child abuse or neglect to assist the ORR Child Welfare Investigator's investigation. The multidisciplinary team will also focus on the physical and behavioral healthcare needs of unaccompanied children potentially impacted by, and during the course of, the investigation of child abuse or neglect. This team is different from, and in addition to, the ORR Child Welfare Investigator and the DCPI will have the option to consult with the separate multidisciplinary team as necessary and appropriate. ORR believes that this collaborative approach to the investigation will lead to a coordinated response, representing a variety of fields and disciplines to support unaccompanied children while also ensuring a more efficient and thorough investigation.

Under § 412.100(e)(5)(iii), the Child Welfare Investigator is required to complete certain minimum actions during an investigation. The Investigator should demonstrate that they have thoroughly investigated the allegation to obtain sufficient information for ORR to make a disposition. Under § 412.100(e)(5)(iii)(A), ORR is requiring that upon receipt of the intake report, the ORR Child Welfare Investigator must review the intake report and the care provider facility's records on the alleged victim and alleged perpetrator, conduct a background check on the alleged perpetrator, interview the person who reported the allegation if this person was not interviewed during intake, immediately request preservation of any potential video and documentary evidence, and as needed, establish a plan for thoroughly investigating the allegation. ORR already requires background checks of care provider facility staff, contractors, and volunteers prior to hiring or before such individuals may have contact with unaccompanied children;[45] but the intent of this requirement is to ensure that ORR has an updated background check regarding the alleged perpetrator. This may include an FBI fingerprint check of national and State criminal history repositories, a National Sex Offender Public website check, state child abuse and neglect registry checks, or other public records checks. Further, ORR recognizes the importance of avoiding the loss of any video and documentary evidence and therefore requires the ORR Child Welfare Investigator to immediately seek preservation of that evidence. At § 412.100(e)(5)(iii)(B), ORR is requiring the ORR Child Welfare Investigator to visit the care provider facility, as appropriate, to conduct a walkthrough of the facility and review video and documentary evidence. The intent of this requirement is to ensure the Investigator is able to review any video and documentary evidence in a timely way and record any observations that may be relevant to the investigation. Visits to the care provider facility may be unannounced, and the ORR Child Welfare Investigator may visit a care provider facility as often as necessary to complete an investigation.

Under § 412.100(e)(5)(iii)(C), ORR is requiring the ORR Child Welfare Investigator to make reasonable efforts

[44] *See, e.g.,* 79 FR 77768, 77793; 77797.

[45] *See* 45 CFR 411.16(c), (d).

to interview all individuals who have information relevant to the report of child abuse or neglect, including, but not limited to, the alleged perpetrator, care provider facility staff, the alleged victim, sponsor(s), and the parent(s) or legal guardian(s) (as appropriate) of the alleged victim, and any other potential witnesses. ORR recognizes the importance of conducting investigations in a way that minimizes the number of times individual children, including the alleged victim and those who may have relevant information, are interviewed, so as to mitigate potential trauma during the investigation process and to promote reliability of the information collected. This includes taking into consideration when law enforcement or other Federal entities are conducting an investigation of the same allegation in alignment with § 412.100(e)(5)(i). ORR recognizes that some children, however, may require multiple interviews in order to feel more comfortable discussing allegations of child abuse and neglect, remember details, or overcome feelings of shame or guilt.[46]

Care provider facility staff will not be compelled to address questions about allegations regarding either themselves or other staff, under threat of disciplinary actions. ORR will not use threat of discharge to force an employee to be interviewed.

ORR notes that there may be circumstances where the ORR Child Welfare Investigator may not be able to interview all individuals who have information relevant to the report of child abuse or neglect. For example, the ORR Child Welfare Investigator may be unable to locate the individual after making reasonable efforts or the individual is unable to be interviewed due to the individual's parent, legal guardian, sponsor, or attorney representing the individual, refusing to permit the interview. ORR also notes that there may be situations in which it would not be appropriate for the parent, legal guardian, or sponsor to be interviewed (*e.g.,* when a child 14 years old or older has not consented to disclosure). Additionally, the ORR Child Welfare Investigator may not be able to interview an alleged perpetrator if the perpetrator was arrested or is under investigation by a law enforcement agency and the interview would interfere with the investigation; or the alleged perpetrator is detained and the jail, prison, or other detention facility where the alleged perpetrator is detained will not permit the interview.

At § 412.100(e)(5)(iii)(D), ORR is requiring the ORR Child Welfare Investigator ensure that interviews conducted as part of the investigation are accessible for all unaccompanied children, including those with disabilities and those with limited English proficiency and are properly documented either in writing or by audio or video recording. In order to be accessible for unaccompanied children with disabilities, the interviews must provide effective communication consistent with section 504 of the Rehabilitation Act of 1973. In addition, ORR notes that the requirements for language access and the requirements for unaccompanied children with disabilities under the UC Program Foundational Rule must also be met, at 45 CFR 410.1306 and 45 CFR 410.1311 respectively.

At § 412.100(e)(5)(iii)(F), ORR is requiring that the ORR Child Welfare Investigator review any available evidence in DCPI's records relating to past conduct of an alleged perpetrator, except allegations that resulted in a finding of unfounded or administrative closure. ORR's intent in taking these steps is to ensure that it captures situations that reveal patterns of behavior warranting further scrutiny but protects the rights of the individual as relates to prior unfounded or administratively closed allegations.

At § 412.100(e)(5)(iii)(F), ORR is requiring the ORR Child Welfare Investigator to gather relevant information as part of the investigation, including documents and audio or video evidence.

Lastly, at § 412.100(e)(5)(iii)(G), ORR is requiring the ORR Child Welfare Investigator to assess any imminent or ongoing risk of child abuse or neglect to the unaccompanied children at the care provider facility and, as appropriate, request that the care provider facility implement a plan to mitigate the risk and ensure the safety of the children. ORR's intent, in addition to investigating the underlying allegation, is also to assess any imminent or ongoing risks to children at the care provider facility following an allegation and to ensure the care provider facility implements safeguards to mitigate any such risks and ensure the safety of the children. The ORR Child Welfare Investigator is responsible for identifying any immediate risks to child welfare during the initial care provider facility visit following an allegation. This is not the same as determining whether the allegation occurred, which is done through the described investigation process, but rather to gain additional insight on how the allegation may have occurred. As appropriate, the ORR Child Welfare Investigator may request that the care provider facility implement a plan to mitigate the risk of child abuse or neglect to ensure safety of the unaccompanied children in ORR care at the care provider facility.

ORR is establishing at § 412.100(e)(6), that once the ORR Child Welfare Investigator's investigation is complete, ORR has the authority to render a disposition based on a preponderance of the evidence for each allegation. Possible dispositions include substantiated allegation-Tier I; substantiated allegation-Tier II; not substantiated allegation; unfounded; or administrative closure. If ORR determines the allegation is not substantiated, unfounded, or administratively closed, it may nevertheless consider further future investigation of the allegation if new information becomes available. ORR based its disposition types and definitions, including the relevant factors in § 412.100(e)(7) and (8), on a variety of existing State domestic child welfare systems and established best practices that balance children's needs and safety, the nuances that can exist in each allegation, and the due process rights of alleged perpetrators.

ORR notes that the first step in determining the disposition of an investigation is establishing whether child abuse or neglect, as defined under § 412.001, occurred based on the available information. If ORR finds, based on a preponderance of the evidence, that child abuse or neglect occurred, the allegation is considered substantiated as defined in § 412.001. ORR will determine whether each substantiated allegation is considered a substantiated allegation-Tier I or substantiated allegation-Tier II as to the substantiated perpetrator, based on the circumstances described at § 412.100(e)(7) and § 412.100(e)(8). ORR will make every reasonable effort to determine the perpetrator(s) responsible for each substantiated allegation of child abuse or neglect, and what role any other individuals involved in the abuse or neglect had, even if they did not perpetrate the act. An individual against whom an allegation of child abuse or neglect has been substantiated by ORR at Tier I or Tier II is considered a substantiated perpetrator, as defined in § 412.001. Under § 412.001, a substantiated perpetrator at Tier I or Tier II may appeal ORR's disposition pursuant to the established appeals process in § 412.102(d).

(2023). *Forensic interviewing: A primer for child welfare professionals.* U.S. Department of Health and Human Services, Administration for Children and Families, Children's Bureau. Available at: *https://www.childwelfare.gov/pubs/factsheets/forensicinterviewing/.*

ORR distinguishes an ''unfounded'' disposition from a ''not substantiated'' disposition based on whether there was evidence indicating that a child was harmed or placed at risk of harm. ORR believes that distinguishing these two categories in this way allows for a more child-centric approach to conducting investigations and rendering dispositions by ensuring that any situation in which a child is harmed or placed at risk of harm is specifically documented as such. While there are other existing mechanisms, including ORR's Significant Incident Reporting and monitoring systems, that may capture this information, these mechanisms do not specifically document ORR investigation dispositions.

By distinguishing ''unfounded'' and ''not substantiated'' dispositions, ORR will be able to better monitor and track individuals, grantees, and contractors who may have repeated instances of allegations against them. Even where alleged child abuse and neglect is ultimately not substantiated, ORR believes documenting ''not substantiated'' is important for child welfare because over time such findings may reveal patterns of conduct requiring further scrutiny or action by ORR. Notably, ORR is also requiring at § 412.100(e)(5)(iii)(F) that any available evidence of past conduct in DCPI's records relating to the same alleged perpetrator be reviewed as part of the Child Welfare Investigator's investigative process, except for allegations that resulted in a finding of unfounded or administrative closure.

Under § 412.100(e)(7), a disposition of substantiated allegation-Tier I is automatically required where the allegation is (1) substantiated by a preponderance of the evidence, and (2) where certain enumerated factors are present. The factors warranting an automatic Tier I substantiated allegation are: (i) death or near death of a child as a result of child abuse or neglect; (ii) subjecting or exposing a child to sexual abuse or sexual harassment; (iii) inflicting an injury or creating a condition requiring a child to be hospitalized or to receive significant medical attention; (iv) repeated instances of physical abuse committed by the individual against any unaccompanied child in ORR care; (v) failure to take reasonable action to protect a child from sexual abuse or repeated instances of physical abuse under circumstances where the individual knew or should have known that such abuse was occurring; and (vi) depriving a child of necessary care (*e.g.,* food, shelter, healthcare, supervision) which either caused serious harm or created a substantial risk of serious harm. ORR notes that ''individual'' in this case means the care provider facility staff, contractors or sub-grantees of the care provider facility, care provider facility volunteers, or other individuals who have access to children in ORR care through contracts or grants with ORR. Under § 410.100(e)(7)(iv), when repeated instances of physical abuse are committed by the individual, the finding of substantiated allegation-Tier I could apply to the first incident reported if evidence is found which indicates a pattern of abusive behavior, injuries to a child, or harm. Additionally, under § 410.100(e)(7)(v), the condition of an individual failing to take reasonable action to protect a child from sexual abuse or repeated instances of physical abuse would be met, for example, when another individual is aware of the abuse, and fails to take any action to stop it, and thus allows the perpetrator's abusive behavior to continue. Under § 410.100(e)(7)(vi), the condition of depriving a child of necessary care which either caused serious harm or a substantial risk of harm includes cases of willful abandonment, deprivation of food, withholding of vital healthcare, forced isolation, and other acts or omissions of similar severity.

If no automatic Tier I substantiating circumstances, as described at § 412.100(e)(7), are present, § 412.100(e)(8) enumerates aggravating and mitigating factors which will be considered in determining if child abuse or neglect should be substantiated at Tier I or II. In the absence of automatic Tier I substantiating circumstances, where ORR finds under a preponderance of the evidence that child abuse or neglect occurred, ORR will make a determination as to whether the allegation should be substantiated as Tier I or Tier II by weighing aggravating and mitigating factors together. Consideration of aggravating and mitigating factors will be based on the totality of the circumstances and in the interest of protecting child welfare. ORR again notes that the ''individual'' means the care provider facility staff, contractors or sub-grantees of the care provider facility, care provider facility volunteers, or other individuals who have access to children in ORR care through contracts or grants with ORR. Aggravating factors include any of the following under § 412.100(e)(8)(i): (A) violations of ORR behavior management requirements pursuant to the UC Program Foundational Rule at 45 CFR 410.1304; (B) failure to comply with clearly established care provider facility policies, corrective action plans, or agreed-upon conditions; (C) the tender age, delayed developmental status or other vulnerability of the child; (D) any significant or lasting physical, psychological, or emotional harm to the child; (E) an attempt to inflict any significant or lasting physical, psychological, or emotional harm to the child; and (F) evidence suggesting a repetition or pattern of abuse or neglect, including multiple instances in which child abuse or neglect was substantiated at Tier I or Tier II, or not substantiated allegations if they demonstrate a pattern of abuse or neglect.

Under § 412.100(e)(8)(i)(A), violations of ORR behavior management requirements [47] include, for example, the use of prone physical restraints, chemical restraints, or peer restraints for any reason in any care provider facility setting, especially considering the age and particular vulnerability of the child. ORR notes the factor under § 412.100(e)(8)(i)(C) includes tender age as defined in ORR's Policy Guide which means children 12 years of age or younger. It also includes the alleged victim's vulnerable status (including history of trauma), particularly if the child is under the age of five; the child's developmental stage; the child's individualized needs, the child's disabilities, if any; and other vulnerabilities of the child. ORR's consideration of an attempt to inflict any significant or lasting physical, psychological, or emotional harm on the child under § 412.100(e)(8)(i)(E) will include whether there was an attempt to harm the child, even if the child does not appear to have suffered actual harm. Finally, to understand whether there is a repetition or pattern of child abuse or neglect under § 412.100(e)(8)(i)(F), ORR will consider whether there have been multiple Tier I or Tier II allegations that have been sustained pursuant to this IFR, or determined to have occurred by other relevant authorities that indicate such a pattern. ORR will also consider whether there is evidence to indicate prior occurrences or ongoing incidents of child abuse or neglect even if it is the first incident investigated by ORR.

Under § 412.100(e)(8)(ii), mitigating factors shall be weighed together with any existing aggravating factors. ORR again notes that the ''individual'' means the care provider facility staff, contractors or sub-grantees of the care provider facility, volunteers, or other individuals who have access to children in ORR care through contracts or grants with ORR. Mitigating factors include

[47] *See* 45 CFR 410.1304.

any of the following: (A) remedial actions taken by the individual before the investigation was concluded; (B) extraordinary, situational, or temporary stressors that caused the individual to act in an uncharacteristically abusive or neglectful manner; (C) the isolated or aberrational nature of the child abuse or neglect; and (D) the limited, minor, or negligible physical, psychological, or emotional impact of the abuse or neglect on the child. Under § 412.100(e)(8)(ii)(C), ORR will consider the isolated nature of the child abuse or neglect and that there is no evidence of a pattern. If a subsequent report yields additional evidence of a historical pattern or behavior, however, this mitigating factor would be eliminated.

Under § 412.100(f), records created, and information gathered or obtained during the course of an investigation are for internal purposes only, will not be shared or made public unless otherwise required or authorized by law, and may not be disclosed without prior ORR approval. All records will be maintained in an appropriate recordkeeping system with protections for the privacy and security of the individuals identified in the records. This provision refers to the entire record gathered during the course of an investigation under this part, in contrast to § 412.101(d), which states ORR will refer names and other identifying information of sustained perpetrators to relevant State and local authorities and to relevant law enforcement agencies in the State in which the child abuse and neglect occurred. This provides ORR with discretion to disclose records, for example, to Federal, State, or local government authorities, or any agents of such authorities, that have a need for such information in order to carry out their responsibilities under law to protect children from child abuse and neglect. The provision also provides ORR with discretion to share relevant information with the HHS Office of the Inspector General (OIG) for purposes of conducting investigations in accordance with the Inspector General Act (IG Act) of 1978.[48] ORR notes that § 412.100(f) applies to all records and information gathered, whether they pertain to an alleged perpetrator, an unaccompanied child who is an alleged victim or any other unaccompanied child, an individual making an allegation to ORR, or any other individual associated with an allegation, intake report, or investigation under this part. Safeguarding and maintaining the confidentiality of an unaccompanied child's case file records is critical to carrying out ORR's responsibilities under the HSA and the TVPRA.[49] Additionally, requiring confidentiality is critical for promoting compliance with the requirement to report allegations of child abuse and neglect at § 412.100(d).[50]

ORR is establishing requirements pertaining to notification of dispositions at § 412.100(g). At § 412.100(g)(1), ORR must notify the alleged perpetrator of the disposition of an investigation in writing within five days of making the disposition. ORR must also notify in writing the alleged victim and their parent(s), legal guardian(s) (as appropriate), or sponsor(s), of the disposition within five days of making a disposition.

Under § 412.100(g)(2), if the disposition is substantiated at Tier I, the notification must state: (i) the substantiated perpetrator will be considered a sustained perpetrator at Tier I and their name and other relevant information will be placed on the ORR Central Registry (unless they seek an appeal of the disposition pursuant to § 412.102) and that once identified in the Central Registry, they will be prohibited from working or volunteering in any way on ORR-funded grants or contracts, and may not have access to or contact with any unaccompanied child in ORR custody; (ii) the reasons for the Tier I substantiated perpetrator's placement on the ORR Central Registry in terms sufficient to put the perpetrator on notice of the conduct or incident(s) upon which it is based; (iii) the substantiated perpetrator may appeal ORR's disposition pursuant to § 412.102, but that if the Tier I substantiated perpetrator either fails to request such appeal in a timely manner, or upon conclusion of the appeal and subsequent review, if any, the disposition is upheld, the perpetrator will be added to the ORR Central Registry and the disposition will be reported to Federal, State, and local authorities as appropriate (such as notifying the State in which the allegation occurred when an allegation is sustained); and (iv) ORR's procedures for making the disposition. ORR believes these requirements are a key part in ensuring a Tier I substantiated perpetrator has adequate notification that they will be placed on the ORR Central Registry, the consequences of being placed on the Registry, and of the ability to request an appeal and subsequent review.

Under § 412.100(g)(3), if the disposition is a Tier II substantiated allegation, the notification must inform the Tier II substantiated perpetrator that they may appeal ORR's disposition pursuant to § 412.102, but that if the Tier II substantiated perpetrator either fails to request such appeal in a timely manner, or upon the conclusion of the appeal and subsequent review, if any, the disposition is upheld, the Tier II substantiated perpetrator will be designated as a Tier II sustained perpetrator and ORR's disposition will be retained in ORR records. ORR may use these records for determining patterns of abuse and neglect and for informing future safety planning at care provider facilities. A Tier II sustained perpetrator will not be placed on the ORR Central Registry.

Section 412.101 Interventions and Discipline

Under § 412.101, ORR is establishing mechanisms for interventions and discipline related to substantiated and sustained allegations of child abuse and neglect as determined by ORR under § 412.100. These intervention and discipline mechanisms include maintenance by ORR of a ORR Central Registry of individuals with Tier I sustained allegations of child abuse and neglect; prohibitions on hiring, employing, or permitting as volunteers individuals who are listed in the ORR Central Registry; required disciplinary sanctions by ORR care provider facilities; and provisions for ORR referrals of substantiated allegations of child abuse and neglect to other government and law enforcement agencies. ORR believes that these enforcement mechanisms and requirements are crucial to carrying out the purpose of this part, as specified and described under § 412.100(a) and (c) above.

Section 412.101(a) describes an ORR Central Registry to list Tier I sustained perpetrators under this rule. Under § 412.101(a)(1), for purposes consistent with § 412.100(a) and (c), ORR will create and maintain an ORR Central Registry of Tier I sustained perpetrators, including names and other identifying information, and details regarding the sustained allegations. Under § 412.101(a)(2), subject to legal requirements regarding disclosure of information (*e.g.,* under Freedom of Information Act (FOIA), the Privacy Act, or the IG Act), the ORR Central Registry

[48] *See* 5 U.S.C. 6(a).

[49] *See* 89 FR 34384, 34494. *See also* 81 FR 46682 (stating that ORR treats systems of records containing unaccompanied child information as subject to the provisions of the Privacy Act, 5 U.S.C. 552a).

[50] ORR further notes that it has finalized regulations relating to the confidentiality of case files of unaccompanied children in ORR care in the Unaccompanied Children Program Foundational Rule. *See id.* at 34599 (codified at 45 CFR 410.1303(h)).

will not be public-facing, nor available to persons outside of ORR, since its purpose is to inform employment decisions by ORR care provider facilities, home study providers, and post-release service providers by providing the names and other identifying information of Tier I sustained perpetrators, and for ORR to use as part of the screening process by care provider facilities as described in § 412.101(b).

Section 412.101(b) sets out certain working and volunteering prohibitions for individuals listed in the ORR Central Registry, as well as requirements for checking the ORR Central Registry. ORR is requiring at § 412.101(b)(1) that the individuals listed in the ORR Central Registry shall be prohibited from working or volunteering in any way on ORR-funded grants or contracts, and may not have access to or contact with any unaccompanied child in ORR custody, unless ORR removes such individual from the Central Registry (*e.g.,* circumstances contemplated under § 412.102(c)(2)(ii), addressing temporary removal of an individual from the Central Registry while an appeal is pending; § 412.102(e), addressing possible reversal of a DAB finding by second-level review, carried out by the Assistant Secretary for ACF). ORR-funded grants or contracts where individuals listed in the ORR Central Registry will be prohibited from working or volunteering may cover, for example, other care provider facilities, ORR home study and post-release service providers, or other ORR-funded services that may include access to unaccompanied children. At § 412.101(b)(2), ORR is requiring that, as part of the screening process for hiring decisions for staff, contractors or sub-grantees, or for screening volunteers, all care provider facilities, home study providers, and post-release service providers, whether or not located in States that investigate child abuse and neglect allegations at ORR care provider facilities, must check with ORR to confirm that an applicant is not listed in the ORR Central Registry.

At § 412.101(b)(3), ORR sets out the requirement that all care provider facilities, home study providers, and post-release service providers, whether or not located in States that investigate child abuse and neglect allegations at ORR care provider facilities, must also check all of their personnel against the ORR Central Registry at least once annually. Checking applicants and current personnel against the ORR Central Registry is an especially important child safety measure for care provider facilities located in States that do not investigate allegations of child abuse and neglect, and thus whose registries will not include individuals alleged, or found through investigation, to have perpetrated abuse or neglect at ORR care provider facilities. ORR notes that the requirements at § 412.101(b) are supplementary to those in the PSA IFR at 45 CFR 411.16 and 45 CFR 411.81.

Under § 412.101(c), care provider facilities must implement appropriate disciplinary or remedial measures where they or ORR find care provider facility staff, contractors or sub-grantees of the care provider facility, or care provider facility volunteers engaged in conduct that does not rise to the level of a Tier I substantiated allegation, as defined at § 412.001, but nevertheless raises child welfare concerns.

ORR believes that it is important to share information regarding sustained perpetrators with relevant State and local authorities such that they can take additional action as necessary to protect children in their jurisdictions in accordance with their legal obligations. This information sharing does not mean that information on the registry is public facing, such as other public criminal records databases. Rather, ORR will only share information directly with relevant entities and in accordance with applicable State and Federal information sharing, privacy, and due process protections. Accordingly, under § 412.101(d)(1), ORR will refer names and other identifying information of Tier I sustained perpetrators to relevant State and local authorities (*e.g.,* child protective services) and to relevant law enforcement agencies in the State in which the sustained allegation of child abuse and neglect occurred. This requirement comports with existing requirements in the PSA IFR that all terminations for violations of ORR or care provider facility policies and procedures regarding sexual abuse and sexual harassment, or resignations by staff who would have been terminated if not for their resignation, must be reported to law enforcement agencies and to any relevant State or local licensing bodies.[51] Additionally, if requested by a relevant State or local authority or relevant law enforcement agency, including an authority or agency outside of the State in which the Tier I sustained allegation occurred, ORR will confirm whether a particular individual is on the ORR Central Registry. Furthermore, under § 412.101(d)(2), ORR will provide the names and other identifying information of Tier I sustained perpetrators to the Federal Bureau of Investigation, and HHS Office of the Inspector General (OIG), consistent with any applicable agreements. Finally, § 412.101(d)(3) requires that neither ORR nor care provider facilities shall interfere with another State, local, or Federal authority or agency's investigation into allegations of child abuse and neglect.

[51] *See* 45 CFR 411.81(c).

Section 412.102 Appeal and Review Process

ORR is establishing guidelines and requirements regarding the availability of an appeal and review process of dispositions made by ORR at § 412.102.

Under § 412.102(a), a substantiated perpetrator, whether at Tier I or Tier II, may appeal the disposition made by ORR to an Administrative Law Judge (ALJ) in the HHS Departmental Appeals Board (DAB) pursuant to § 412.102(c).

ORR is requiring, at § 412.102(b), that ORR shall notify substantiated perpetrators at Tier I or Tier II of their opportunity for an appeal. As stated above, all alleged perpetrators receive notice of the allegations against them pursuant to § 412.100(e)(3). Under § 412.102(b)(1), after completing an investigation and upon substantiation of any relevant allegations, ORR will send a written notice to the substantiated perpetrator at Tier I or Tier II, in accordance with § 412.100(g). The notice will state that the relevant allegations have been substantiated and that the Tier I substantiated perpetrator will be placed on the ORR Central Registry unless they appeal the disposition by ORR and that the Tier II substantiated perpetrator's information will be retained as a Tier II sustained perpetrator in agency records. Under § 412.102(b)(2), the written notice shall: (i) clearly describe the basis for ORR's disposition that substantiates the relevant allegations at Tier I or Tier II and shall explain the Tier I or Tier II substantiated perpetrator's right to appeal the disposition and the steps required to initiate the appeal; (ii) inform the substantiated perpetrator that they may appeal the disposition before an ALJ; (iii) provide the substantiated perpetrator at Tier I or Tier II and their attorney, if any, with written information and instructions describing the appeal process; and (iv) inform the substantiated perpetrator at Tier I or Tier II that if they do not appeal within 30 days of receiving the notice, the DAB will consider the substantiated perpetrator to have waived their opportunity for an appeal and any subsequent review. A Tier I substantiated perpetrator will be identified on the ORR Central Registry as a Tier I sustained perpetrator. A Tier II substantiated perpetrator's

information will be retained as a Tier II sustained perpetrator in agency records.

At § 412.102(c), ORR is establishing a process for substantiated perpetrators at Tier I or Tier II to appeal of ORR's disposition. Under § 412.102(c)(1)(i), and as further elaborated at § 412.102(c)(2), if the substantiated perpetrator elects to appeal ORR's disposition that a child abuse or neglect allegation is substantiated at Tier I or Tier II, they must file a written notice of appeal with the DAB within 30 days of receipt of the written notice of ORR's disposition. Under § 412.102(c)(1)(ii), within 30 days of receiving this written notice of appeal, ORR will provide all evidence it used in making its disposition to the DAB. Under § 412.102(c)(1)(iii), within 30 days of receiving this written notice of appeal, ORR will provide to the substantiated perpetrator at Tier I or Tier II, and their attorney, if any, all information used in making its disposition, except any information that ORR determines: (A) would compromise the safety and well-being of a child, the reporter, or any other person; (B) would reveal the identity of a child who furnished information with the understanding that their identity would be held in confidence; (C) would reveal the identity of any other alleged perpetrator(s) involved in the same case who has an unfounded disposition (to protect the privacy of the alleged perpetrator with an unfounded disposition); or (D) is otherwise prohibited by State or Federal law or regulation. In the case of information being withheld, the substantiated perpetrator at Tier I or Tier II will be advised of the general nature of the information and the reasons that it is being withheld. Neither the substantiated perpetrator at Tier I or Tier II nor the care provider facility are required to provide information unless they would like the ALJ to consider such information as part of the hearing or record review, and they will not be compelled to provide it.

Dismissal of appeals is covered in § 412.102(c)(2). Under § 412.102(c)(2)(i), the ALJ may dismiss an appeal when the ALJ determines that the substantiated perpetrator waived appeal by not submitting the notice of appeal in a timely manner (*i.e.,* an appeal within 30 days of receiving written notice of ORR's disposition) and failed to demonstrate good cause for the untimely request, withdraws the appeal, abandons the appeal, or does not have a right to ALJ review (including, but not limited to, situations where the case does not involve a Tier I or Tier II substantiated allegation). If the appeal is dismissed, the Tier I substantiated perpetrator will be placed on the ORR Central Registry as a Tier I sustained perpetrator or ORR will retain the information regarding the Tier II substantiated perpetrator as a Tier II sustained perpetrator in agency records, as applicable. Notwithstanding such a dismissal, under § 412.102(c)(2)(ii) the DAB may in its discretion temporarily remove the designation of sustained perpetrator at Tier I or Tier II, which would result in ORR removing the individual who was designated as a Tier I sustained perpetrator from the ORR Central Registry, in situations where, for example, the ALJ determines that the sustained perpetrator at Tier I or Tier II has established good cause for exceeding the appeal timeframe. This rule contemplates that good cause may be established, for example, where a serious medical condition prevented timely filing of the notice of appeal.

The appeal and review processes are described in § 412.102(d) and (e). Under § 412.102(d)(1), when a substantiated perpetrator at Tier I or Tier II appeals, ORR must transmit all of the evidence upon which ORR's disposition was based to the ALJ. Under § 412.102(d)(2), the evidentiary record must contain all documents and other materials, such as video or audio recordings, that were used by ORR in making its disposition. The ALJ may remand the case to ORR if the ALJ determines that the evidentiary record is insufficiently complete to determine whether ORR's disposition is supported by a preponderance of the evidence. Under § 412.102(d)(3), the substantiated perpetrator at Tier I or Tier II may be represented by an attorney. As described in § 412.102(d)(4), the substantiated perpetrator shall have the burden to show that, considering the totality of the evidence, there is not a preponderance of the evidence to support the substantiated allegation at Tier I or Tier II, and to dispute whether any automatic Tier I substantiating circumstances described at § 412.100(e)(7) existed (if applicable) or whether aggravating factors or mitigating factors described at § 412.100(e)(8) existed (if applicable). Both ORR and the substantiated perpetrator may present the testimony of witnesses, documents, factual data, arguments, or other submissions of proof. The testimony of care provider facility staff shall be voluntary and failure to provide such testimony will not subject the care provider staff member to disciplinary action. Under § 412.102(d)(5), if the substantiated perpetrator appeals and the appeal is not dismissed by the ALJ pursuant to § 412.102(d)(7), ORR must notify the alleged victim and the alleged victim's parent(s), legal guardian(s) (as appropriate), or sponsor(s) that an appeal of ORR's disposition will be conducted by an ALJ. The alleged victim, other child witness(es), and family members of the alleged victim shall not be required to testify. Refusal to testify shall have no bearing on a determination as to whether the alleged abuse or neglect did or did not take place.

Under § 412.102(d)(6), both parties (ORR and the substantiated perpetrator) may cross examine witnesses and ask questions during a live hearing, as well as request additional information, either during a live hearing or pursuant to a record review. In order to mitigate the potential for re-traumatization of an alleged victim while still providing a substantiated perpetrator with the opportunity to respond to the allegations, a substantiated perpetrator may not personally cross examine the alleged victim. The parties will be given an opportunity to file briefs or other written statements of fact or law. Under § 412.102(d)(7), the ALJ must conduct a fair and impartial hearing under a de novo standard of review to determine whether the substantiated perpetrator met their burden of proving that, considering the totality of the evidence, there is not a preponderance of the evidence to support the substantiated allegation. The ALJ will issue a written decision upholding, modifying, or reversing the ORR's disposition. Under § 412.102(d)(8), the ALJ shall serve a copy of the decision upon the parties and the Assistant Secretary for ACF. The ALJ's decision shall provide the substantiated perpetrator at Tier I or Tier II and their attorney, if any, with instructions for filing a request for review with the Assistant Secretary for ACF. The ALJ also shall provide a copy of the decision to the alleged victim, and, as appropriate, the alleged victim's parent(s), legal guardian(s), or sponsor(s). The complete record upon which the decision is based shall be made available to the Assistant Secretary.

This rule provides another level of review under § 412.102(e). This subsection provides that the Assistant Secretary for ACF may review the ALJ's determination, either sua sponte or upon a request by the substantiated perpetrator. Under § 412.102(e)(1), a substantiated perpetrator at Tier I or Tier II may request review of the ALJ's decision within 30 days of receipt of the ALJ's decision, by filing a request for review with Office of the Assistant

Secretary for ACF. Under § 412.102(e)(2), the Assistant Secretary has discretion, within 30 days after receiving a timely request for review of an ALJ's decision under § 412.102(e)(1), to review the ALJ's decision and to dismiss a request for review based on untimeliness or other procedural defects, or to affirm, modify, or reverse the ALJ's decision with regard to dismissal or ORR's disposition of the allegation. A review by the Assistant Secretary will determine whether the ALJ's decision was based on a material error of law or fact.

Section 412.102(e)(3) provides that if the Assistant Secretary affirms the ALJ's decision, or does not modify or reverse the ALJ's decision, within 30 days after receiving a timely review request under § 412.102(e)(1), then the ALJ's decision becomes the final decision of the Assistant Secretary and is binding on both parties (ORR and the substantiated perpetrator). Likewise, under § 412.102(e)(4), if the Assistant Secretary modifies or reverses the ALJ's decision pursuant to § 412.102(e)(2), then the Assistant Secretary's decision is final and binding.

Under § 412.102(e)(5), if at the end of the 30-day period in § 412.102(e)(1), no timely request for review has been made, the Assistant Secretary has 30 days from that point to exercise discretion to review the ALJ's decision. If the Assistant Secretary does not modify or reverse the ALJ's decision, then the ALJ's decision becomes the final decision of the Assistant Secretary and is binding on both parties. The intent of § 412.102(e)(5) is to make clear that the Assistant Secretary has discretion to review the ALJ's decision regardless of whether a timely request for review is made.

Under § 412.102(e)(6), the Office of the Assistant Secretary for ACF shall notify the parties of the Assistant Secretary's final decision. The Office of the Assistant Secretary also shall provide a copy of the final decision to the alleged victim and the alleged victim's parent(s), legal guardian(s) (as appropriate), or sponsor(s), based on review of the ALJ's previous decision, under § 412.102(e).

Section 412.103 Obligations of Care Provider Facilities

To ensure that ORR can obtain sufficient information to make fair, accurate, and impartial decisions regarding allegations of child abuse and neglect, at § 412.103, ORR is establishing obligations with which care provider facilities must comply during investigations.

Under § 412.103(a)(1) through (3), during any investigation of child abuse and neglect by ORR, a care provider facility must permit ORR: (1) to have unrestricted access to the premises, any physical property on the premises, buildings, staff, and children in the physical custody of the care provider facility; (2) to conduct interviews with children residing at the care provider facility, and without care provider facility staff, contractors or sub-grantees of the care provider facility, or care provider facility volunteers, present; and (3) to observe the activities of care provider facility staff, contractors or sub-grantees of the care provider facility, care provider facility volunteers, or other individuals who have access to children in ORR care through contracts or grants with ORR. Under § 412.103(a)(4), care provider facilities must promptly preserve any potential video or documentary evidence. ORR notes that this requirement is aligned with the requirement at § 412.100(e)(5)(iii)(A), which states that upon receiving an intake report, the ORR Child Welfare Investigator must immediately request preservation of any potential video and documentary evidence. Additionally, under § 412.103(a)(5), care provider facilities must promptly provide and facilitate access to, upon request, all files, records, reports, data, video recordings, and other information, including copies of any such documents, requested by ORR either prior to or during the investigation. Care provider facilities subject to this rule must also promptly provide access to and contact information for staff, contractors, or sub-grantees of the care provider facility, its volunteers, or other individuals who have access to children in ORR care (§ 412.103(a)(6)); submit complete and accurate responses to any written questions in a timely manner (§ 412.103(a)(7)); and fully cooperate with ORR (§ 412.103(a)(8)). Finally, under § 412.103(a)(9) care provider facilities are required to fully cooperate with any investigation of the same allegation by other State, local, and Federal authorities, and relevant law enforcement agencies.

Further, in alignment with existing ORR policy and 45 CFR 411.67, ORR is requiring at § 412.103(b) that care provider facility staff, contractors or sub-grantees of the care provider facility, and care provider facility volunteers must not retaliate against any person who in good faith reports or participates in an investigation of child abuse or neglect.

Under § 412.103(c), a care provider facility's obstruction, interference, delay of, or failure to permit or cooperate with any investigation under this part, including failure to protect unaccompanied children from retaliation pursuant to § 412.103(b), may result in ORR taking monitoring and enforcement measures. Such measures may include remote monitoring of the care provider facility (*i.e.,* monitoring that does not occur on-site); on-site monitoring of the care provider facility; monitoring of the corporate offices to review internal policies and reporting structures, as well as supervisory responses to events (*e.g.,* mitigation or future preventative measures); limiting or stopping new placements of unaccompanied children at the care provider facility; removing all children in ORR care and custody from the care provider facility and placing them into other care provider facilities; issuing corrective actions; terminating the contract or cooperative agreement with the care provider facility; or imposing other such remedies for noncompliance applicable to HHS grant recipients and contractors. ORR notes that the cooperation of care provider facilities is critical in investigations of child abuse and neglect, and that enforcement measures such as those described are appropriate to help ensure that ORR can obtain the information necessary to determine whether allegations are substantiated.

Under § 412.103(d), ORR requires care provider facilities, during the course of an investigation, to provide unaccompanied children confidential access to attorneys of record and other legal service providers, as well as their families and legal guardians, in a manner consistent with requirements established at 45 CFR 411.55 (as applicable) as well as 45 CFR 410.1309. Care provider facilities must provide unaccompanied children with access to their child advocates, in a manner consistent with the requirements of the TVPRA at 8 U.S.C. 1232(c)(6) and 45 CFR 410.1308. Finally, care provider facilities must also provide unaccompanied children access to health services (including specialists and mental health practitioners), individual counseling sessions, and crisis intervention (including access to outside victim services and rape crisis centers where appropriate) to most appropriately address unaccompanied children's needs, in a manner consistent with requirements established at 45 CFR 410.1302(c)(5), 45 CFR 410.1307, 45 CFR 410.1311, and 45 CFR 411.21 (as applicable).

VI. Good Cause for Issuing This IFR

When engaging in rulemaking, ORR ordinarily publishes a notice of proposed rulemaking (NPRM) in the **Federal Register** and invites public comment on the proposed rule. However, under the Administrative Procedure Act, 5 U.S.C. 553(b), an NPRM is not required when an agency, for good cause, finds that notice and public comment is impracticable, unnecessary, or contrary to the public interest, and incorporates a statement of the finding and the agency's reasons in the rule issued. With respect to this rulemaking, delaying implementation of the provisions of this regulation until a public notice and comment process is complete would risk serious and imminent harm to unaccompanied children in Texas care provider facilities (and in the future at EIFs, which ORR may need to open on short notice, before it can execute formal written agreements describing child welfare investigations of child abuse and neglect with relevant local authorities), and thus would be impracticable. As such, ORR believes that it has good cause to issue this rulemaking as an Interim Final Rule (IFR) rather than issuing an NPRM.

ORR has determined that this rulemaking is imminently necessary because ORR must have the ability to establish employment consequences at relevant care provider facilities for sustained perpetrators of abuse and neglect in order to fulfill its statutory responsibilities.[52] Critically, as mentioned earlier, ORR began taking immediate action soon after it became clear that Texas DFPS was not going to resume its historical child welfare and investigative functions when it extended its emergency declaration in 2022. Subsequently, ORR began consulting with other federal agencies, developing the necessary expertise and capacity to conduct investigations, drafting policies and procedures to inform how investigations are conducted, obtaining administrative approval for new agency positions, creating new comprehensive technical systems for recording and tracking investigations, and hiring, onboarding, and training qualified investigative staff. Most pertinently, as discussed at section IV.A, ORR's recently established Division of Unaccompanied Child Protective Investigations (DCPI) began its investigations of allegations of child abuse and neglect in ORR-funded care provider facilities in Texas as of July 2024.

In addition to investigating allegations of abuse and neglect at care provider facilities located in States that do not conduct investigations, and at EIFs, ORR needs to be able to direct its care provider facilities to prohibit individuals from working or volunteering on ORR-funded grants or contracts when there has been a sustained allegation of abuse or neglect at Tier I (as defined in this rule), and to ensure that perpetrators with such sustained allegations do not have access to or contact with children in ORR custody. To that end, this rulemaking establishes an ORR Central Registry listing Tier I sustained perpetrators, as described in this rule. Further, this rule establishes that Tier I sustained perpetrators listed on the ORR Central Registry are prohibited from working or volunteering in any way on ORR-funded grants or contracts, so as to prohibit them from having access to or contact with any unaccompanied child in ORR custody. Because such requirements potentially implicate alleged perpetrators' ability to work in their chosen profession (if the allegation is sustained at Tier I), ORR believes that substantive rulemaking is required to codify appeal and review procedures with appropriate due process protections for alleged perpetrators (*e.g.,* notice and an opportunity to be heard).

There is good cause to issue this rulemaking as an IFR because requiring notice and comment before implementing these provisions would risk serious and imminent harm to unaccompanied children. For example, even if DCPI concludes through an investigation that an individual perpetrated child abuse or neglect, without an ORR Central Registry, such a perpetrator could potentially pass a background check and be re-hired at any time at another ORR care provider facility, which would undermine the very purpose of the rule—to protect children from such perpetrators. As noted above, ORR understands that creation of the Central Registry requires rulemaking because adequate due process procedures need to be established in consideration of the employment interests at stake. In other words, ORR's DCPI can now investigate, substantiate, and sustain allegations of abuse and neglect of unaccompanied children in its custody against alleged perpetrators in accordance with existing statutory authority, but requiring notice and comment before this rule goes into effect would prevent ORR from using that critical information in the ORR Central Registry to keep children safe in the near and long term. Until ORR is able to begin operating the ORR Central Registry, unaccompanied children are at elevated risk of abuse or neglect—a risk that ORR seeks to prevent by using this IFR to prohibit the hiring of Tier I sustained perpetrators of child abuse and neglect.

As discussed above, as of July 2024, ORR began investigative activities in relation to reported child abuse and neglect at care provider facilities in Texas. As a result, there is an urgent need to have the provisions of this rule in place to protect child welfare while also providing appropriate due process protections for alleged perpetrators of child abuse and neglect. Notice and comment rulemaking would prevent ORR from taking swift and appropriate action when it identifies an imminent threat to child safety and would allow perpetrators of child abuse and neglect to evade ORR's efforts, pursuant to statutory responsibilities, to protect unaccompanied children in its custody. Notice and comment rulemaking would increase the risk of serious potential harm to unaccompanied children—which ORR seeks to address through this IFR by prohibiting employment of individuals on the ORR Central Registry.

ORR has therefore found good cause in the specific circumstances presented here—where ORR has recently established a new Division to conduct child welfare investigations at EIFs and in States that do not do so given that there is an immediate and ongoing risk to unaccompanied children in such States without the protections described in this rule. This rulemaking is urgently required now to establish required employment consequences for individuals found by ORR investigations to have perpetrated child abuse or neglect, and ORR has not delayed responding to the urgent need to establish such consequences because DCPI began initiating investigations as of July 2024.

Therefore, HHS finds good cause to waive the notice of proposed rulemaking and to issue this final rule on an interim basis. Finally, HHS is providing a 60-day public comment period and will carefully consider public comments received and may update the final rule, as appropriate. ORR plans to finalize the rule within one year of implementation.

[52] *See supra,* Sec. IV.B (referencing various provisions of the HSA, including 6 U.S.C. 279(b)(1)(G) (making the ORR Director responsible for ''overseeing the infrastructure and personnel of facilities in which unaccompanied alien children reside'') and 6 U.S.C. 279(b)(1)(L) (making the ORR Director responsible for ''conducting investigations and inspections of facilities and other entities in which [unaccompanied children] reside. . .'')).

VII. Collection of Information Requirements

Under the Paperwork Reduction Act of 1995 (PRA), HHS is required to provide 60-day notice in the **Federal Register** and solicit public comment before a collection of information requirement is submitted to the Office of Management and Budget (OMB) for review and approval. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a control number assigned by OMB.

This interim final rule with comment requires information collections for which HHS plans to seek OMB approval at a later date. The information collection requirements associated with this interim final rule will not take effect until approved by OMB. HHS will issue future **Federal Register** notices to seek comments on its information collections within one month following finalization, as required by the PRA,[53] and will include a system of records notice related to the requirements in this rule.

To estimate the costs associated with the information collection activities described in this interim final rule, ORR utilizes median hourly wage rates in accordance with the Bureau of Labor Statistics' (BLS) most recent update in April 2024 for Education and Childcare Administrators.[54] The median hourly wage rate is calculated to be $26.10 with fringe benefits at 100 percent, for a total hourly wage rate of $52.20 ($26.10 + $26.10).

Section 412.100(d) requires that care provider facility staff, contractors, sub-grantees, volunteers, and all ORR staff must report allegations of child abuse and neglect by care provider facility staff, contractors or sub-grantees of the care provider facility, care provider facility volunteers, or other individuals who have access to children in ORR care through contracts or grants with ORR in accordance with ORR policies and procedures to ORR, and to Federal, State, and local authorities in accordance with any applicable Federal, State, and local reporting and licensing laws. Because this reporting requirement would not require additional reporting above and beyond existing ORR policy, this requirement will not result in additional burden for care provider facilities.

[53] See 44 U.S.C. 3506(c)(2)(A).

VIII. Regulatory Impact Analysis

A. Economic Analysis

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Section 3(f) of Executive Order 12866, as amended by Executive Order 14094, defines a ''significant regulatory action'' as an action that is likely to result in a rule: (1) having an annual effect on the economy of $200 million or more (adjusted every 3 years for changes in gross domestic product), or adversely affecting in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, territorial, or tribal governments or communities; (2) creating a serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impact of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising legal or policy issues for which centralized review would meaningfully further the President's priorities or the principles set forth in the Executive Order. Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. While there are some costs associated with these regulations, they do not exceed the monetary threshold for significance as defined under section 3(f)(1) of E.O. 12866, as amended. However, the regulation is significant and has been reviewed by OMB.

As previously discussed, ORR has developed the child abuse and neglect investigation requirements for ORR care provider facilities with the intention of keeping the best interests of unaccompanied children at the forefront. Because the requirements in this IFR are in line with existing ORR policy, ORR anticipates that care provider facilities will need to make only minimal updates to their staffing, training, and/or policy in order to meet the requirements. Specifically, ORR anticipates that care provider facilities will need to make updates to meet requirements under § 412.101(c) and § 412.103. Typically, ORR care provider facilities spend up to approximately 5 hours to cooperate with a State-led investigation of alleged child abuse or neglect, which can vary widely depending on the circumstances of the specific allegation. ORR expects that its Texas care provider facilities will spend the same amount of time cooperating with investigations conducted by ORR. Because ACF lacks the ability to account for the specific details of every care provider facility and their ability to meet the requirements, ORR is only able to estimate costs associated with other remedies in general, rather than specific to each care provider facility.

To estimate the economic impacts associated with the policies promulgated in this interim final rule, ACF uses wage rate and annual salary data provided by BLS for Childcare Workers and First-Line Supervisors working in the Child Care Services industry.[55] [56] The median hourly wage rate for childcare workers is calculated to be $14.60. Assuming benefits and indirect costs of labor equal 100 percent of the hourly wage, the corresponding fully loaded cost of labor for childcare workers is $29.20 per hour. Additionally, the mean hourly wage rate for First-Line Supervisors working in the Child Care Services industry is calculated to be $22.45. Note that we do not use the median wage rate because BLS only provides mean wage rates for specific industries. Assuming benefits and indirect costs of labor equal 100 percent of the hourly wage, the corresponding fully loaded cost of labor for childcare supervisors is $44.90 per hour. ORR assumes that it will take between 0.25 and 0.5 hours at a cost between $7.30 ($29.20 × 0.25 hours) and $14.60 ($29.20 × 0.5 hours) for each childcare worker to receive the relevant policy update training and between $11.23 ($44.90 × 0.25 hours) and $22.45 ($44.90 × 0.5 hours) for each childcare supervisor to administer the training. This training would include administrative guidance related to how investigations will be conducted and due process under the interim final rule. ORR also assumes that it will take approximately 1 hour at a cost of $44.90 ($44.90 × 1 hour) for each childcare supervisor to update relevant policies.

In § 412.100(a) through (g) ORR discusses the establishment and operation of its investigations into alleged child abuse and neglect. Currently, based on FY 2024 levels of wages, benefits, and indirect labor costs, ORR estimates 24 full-time staff will be required at a cost of approximately $209,000 per staff member for a total of approximately $5 million ($209,000 ×

[55] *https://www.bls.gov/oes/current/oes399011.htm.* Accessed July 31, 2024.

[56] *https://www.bls.gov/oes/current/oes391022.htm.* Accessed July 31, 2024.

24 staff) per year. The ORR Child Welfare Investigators will receive allegations of child abuse and neglect as intake reports, assess the allegation to determine whether it meets applicable requirements and definitions, conduct all necessary interviews, review and preserve all relevant evidence, implement any necessary safety plans, coordinate with the multidisciplinary team as needed, and render a disposition. ORR expects no new costs or burdens on care provider facilities to cooperate with ORR's investigations.

ORR also notes that all care provider facilities discussed in this interim final rule are ACF grantees and the costs of maintaining compliance with the requirements are allowable costs to grant awards under the Basic Considerations for cost provisions at 45 CFR 403 through 405, in that the costs are reasonable, necessary, ordinary, treated consistently, and are allocable to the award. Additional costs associated with the policies discussed in this interim final rule that were not budgeted, and cannot be absorbed within existing budgets, would be allowable for the grant recipient to submit a request for supplemental funds to cover the costs.

B. Regulatory Flexibility Analysis

The Secretary certifies under 5 U.S.C. 605(b), as enacted by the Regulatory Flexibility Act (Pub. L. 96–354), that this rule will not result in a significant impact on a substantial number of small entities. This rule primarily affects the operations of the Federal Government and requires that ORR care provider facilities within the scope of this rule cooperate with Federal investigations of child abuse and neglect. As of publication of this rule, 66 of 284 (23 percent) ORR care provider facilities are located in Texas and would be impacted by the requirements in this interim final rule. While the affected percentage of small entities exceeds the threshold of 5 percent for this subcategory of care provider facilities within the U.S., ORR believes the burden associated with the requirements in this interim final rule are equal to or negligibly greater than the burden imposed by any State-based requirements to which the affected care provider facilities would otherwise be subjected. While this rule primarily affects the Federal Government, ORR assumes all of these care provider facilities qualify as small businesses as defined by the Small Business Administration (SBA), and ORR has therefore attempted to ensure the economic impact on individual care provider facilities is kept to a minimum.

C. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (section 202(a)) requires ORR to prepare a written statement, which includes estimates of anticipated impacts, before proposing ''any rule that includes any Federal mandate that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more (adjusted annually for inflation) in any one year.'' The current threshold after adjustment for inflation is $177 million, using the most current (2022) Implicit Price Deflator for the Gross Domestic Product. This interim final rule would not likely result in unfunded expenditures that meet or exceed this amount.

D. Executive Order 13132: Federalism

This interim final rule would not have substantial direct effects on the States, on the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of government. This interim final rule would implement ORR's explicit statutory authority to investigate child abuse and neglect allegations in ORR care provider facilities, and would enable it to make findings relevant to its responsibility for the care of unaccompanied children. In codifying these practices, ORR was mindful of its obligations to meet the requirements of Federal statutes while also minimizing conflicts between State law and Federal interests. At the same time, ORR is also mindful that its fundamental obligations are to ensure that it implements its statutory responsibilities pursuant to both the HSA and TVPRA, to protect the safety of unaccompanied children while in ORR care.

Typically, ORR enters into cooperative agreements or contracts with non-profit and private organizations to provide shelter and care for unaccompanied children in a care provider facility licensed by the appropriate State or local licensing authority if the State licensing agency provides for licensing of care provider facilities that provide services to unaccompanied children. This regulation allows ORR to investigate allegations of child abuse and neglect only in instances where a State will not investigate allegations of child abuse and neglect in ORR care provider facilities, and at EIFs. ORR has designed its policies and regulations, as well as the terms of its cooperative agreements and contracts with the unaccompanied children care provider facilities, to complement applicable State and local licensing rules, not to supplant or replace the requirements. Because the applicability of this regulation is limited precisely to circumstances where a State does not investigate child abuse and neglect at ORR care provider facilities, and EIFs, it does not implicate federalism concerns or impose substantial direct compliance costs on State or local governments. Further, this regulation does not preempt State laws and regulations because it applies specifically where States have explicitly abdicated their investigatory responsibility in ORR care provider facilities housing unaccompanied children, and at EIFs where States may not have authority to conduct investigations. Where State or local authorities enter into formal written agreements with ORR to conduct investigations, ORR may still, pursuant to its statutory authority, carry out its own investigations, but any potential ORR investigation under this rule would not interfere with the State or local authority's investigation.

Therefore, in accordance with section 6 of Executive Order 13132, it is determined that this interim final rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

Notwithstanding the determination that the formal consultation process described in Executive Order 13132 is not required for this rule, ORR welcomes any comments from representatives of State and local juvenile or family residential facilities—among other individuals and groups—during this rulemaking.

E. Executive Order 12988: Civil Justice Reform

This interim final rule meets the applicable standards set forth in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

IX. Assessment of Federal Regulation and Policies on Families

Section 654 of the Treasury and General Government Appropriations Act of 1999 requires Federal agencies to determine whether a policy or regulation may affect family well-being. If the agency's determination is affirmative, then the agency must prepare an impact assessment addressing criteria specified in the law. This regulation will not have an impact on family well-being as defined in this legislation, which asks agencies to assess policies with respect to whether the policy: strengthens or erodes family

stability and the authority and rights of parents in the education, nurture, and supervision of their children; helps the family perform its functions; and increases or decreases disposable income.

Dated: November 20, 2024.

Xavier Becerra,

Secretary, Department of Health and Human Services.

List of Subjects in 45 CFR Part 412

For the reasons set forth in the preamble, the ORR adds 45 CFR part 412 to read as follows:

PART 412—INVESTIGATIONS OF ALLEGATIONS OF CHILD ABUSE AND NEGLECT

Sec.

412.001 Definitions
412.100 Investigations of allegations of child abuse and neglect
412.101 Interventions and discipline
412.102 Appeal and review process
412.103 Obligations of care provider facilities

PART 412—INVESTIGATIONS OF ALLEGATIONS OF CHILD ABUSE AND NEGLECT

§ 412.001 Definitions.

ACF means the Administration for Children and Families, Department of Health and Human Services.

Administrative closure means that ORR has determined that it will not make a finding regarding an allegation of child abuse or neglect. ORR may make a determination of administrative closure both before and after an investigation begins. Reasons for administrative closure of an intake report before investigation may include, but are not limited to, lack of jurisdiction to conduct an investigation of the allegation, transfer of the report to another jurisdiction or agency, duplication of an already existing report, an allegation not rising to the level of child abuse or neglect, or an allegation is otherwise outside the scope of this rule, as described at § 412.100(c). Reasons for a disposition of administrative closure after investigation may include, but are not limited to, inability to contact the child, insufficient information to proceed with the investigation, or transfer of the report to another jurisdiction or agency.

Allegation means a written or oral report to ORR of suspected child abuse or neglect.

Alleged perpetrator means a person who is alleged to have abused or neglected a child within the scope of this part as described at § 412.100(a) and (c).

Appeal and review process means the appeal to an Administrative Law Judge (ALJ) of the HHS Departmental Appeal Board (DAB), and review by the Assistant Secretary for ACF of the disposition that an allegation of child abuse or neglect was substantiated at Tier I or Tier II.

Attorney of record has the same definition as provided under 45 CFR 410.1001.

Care provider facility has the same definition as provided under 45 CFR 410.1001.

Child abuse and neglect means any act or failure to act which results in death, serious physical or emotional harm, sexual abuse, or exploitation of a child; or an act or failure to act which presents an imminent risk of serious harm to a child including but not limited to physical abuse, verbal or emotional abuse, sexual harassment, sexual abuse, inappropriate sexual behavior, neglect, and medical neglect.

Child advocates has the same definition as provided under 45 CFR 410.1001.

Contractor means an entity that receives a contract as provided under 45 CFR 75.2.

Days means calendar days, unless otherwise stated.

Disposition means a finding by ORR at the conclusion of an investigation that an allegation of abuse or neglect is substantiated at Tier I, substantiated at Tier II, not substantiated, unfounded, or administratively closed.

Emergency or influx facility (EIF) has the same definition as provided under 45 CFR 410.1001.

HHS means the U.S. Department of Health and Human Services.

Inappropriate sexual behavior refers to inappropriate sexual, derogatory, or offensive conduct that does not rise to the level of sexual abuse or sexual harassment.

Intake report means an allegation of child abuse or neglect identified by ORR as describing child abuse or neglect of an unaccompanied child by an alleged perpetrator.

Legal service provider (LSP) has the same definition as provided under 45 CFR 410.1001.

Medical neglect means any failure to provide medical care or access to medical services that endangers the health of the child.

Multidisciplinary team is a group of individuals comprised of ORR staff that includes subject matter experts that provides input to ORR's Child Welfare Investigators by assessing reported allegations of child abuse and neglect at care provider facilities and making recommendations regarding the physical and behavioral healthcare needs of unaccompanied children potentially impacted by child abuse and neglect at these facilities.

Neglect refers to any failure to provide adequate food, water, clothing, shelter, or other necessities; punitive, careless, or unnecessary denial of access to other basic services such as education, legal aid, exercise, recreation, bathroom usage, and communication or correspondence with families, sponsors, or attorneys.

Not substantiated allegation means a disposition that there is not a preponderance of the evidence establishing that the alleged perpetrator committed child abuse or neglect, but there is at least some evidence that the unaccompanied child was harmed or placed at risk of harm, whether or not by the alleged perpetrator.

ORR means the Office of Refugee Resettlement, Administration for Children and Families, U.S. Department of Health and Human Services.

ORR Central Registry means a database maintained by ORR consisting of ORR findings of sustained perpetrators of child abuse and neglect at Tier I.

ORR Child Welfare Investigator means an ORR staff member who investigates reports of alleged abuse or neglect of children, renders the investigative disposition, and issues corrective action on behalf of ORR and performs other related work for ORR.

Physical abuse means physical harm to a child that includes, but is not limited to, bruises, cuts, sprains, welts, fractures, burns, lacerations, missing or broken teeth, muscle strains, or internal injuries; in addition to physical mistreatment such as whipping, punching, shoving, kicking, hitting, biting, shaking, dragging, throwing, stabbing, or choking a child, as well as the inappropriate use of restraints.

Preponderance of the evidence means proof, after assessing the totality of available information, that leads to the conclusion that the fact at issue is more probably true than not.

Sexual abuse has the same definition as provided under 45 CFR part 411.6.

Sexual harassment has the same definition as provided under 45 CFR part 411.6.

Sub-grantee means a person or entity that receives a subaward from a care provider facility to carry out activities and programs of ORR or the care provider facility pursuant to a grant or agreement with ORR or with a care provider facility (but does not include an individual that is a beneficiary of such program).

Substantiated allegation—Tier I means a disposition that there is a preponderance of the evidence establishing that the alleged perpetrator committed child abuse or neglect, and the investigation indicates one or more Automatic Tier I substantiating circumstances are found pursuant to § 412.100(e)(7), or substantiation is warranted based on consideration of aggravating and mitigating factors pursuant to § 412.100(e)(8).

Substantiated allegation—Tier II means a disposition that there is a preponderance of the evidence establishing that the alleged perpetrator committed child abuse or neglect, and that based on consideration of aggravating and mitigating factors pursuant to § 412.100(e)(8), the evidence does not warrant a finding of Substantiated Allegation—Tier I.

Substantiated perpetrator means a person against whom an allegation of child abuse or neglect has been substantiated by ORR at Tier I or Tier II, but who has not exhausted all applicable appeal and review processes for such allegations.

Sustained allegation means an allegation that was substantiated by ORR at Tier I or Tier II and:

(1) That was upheld pursuant to appeal and review processes, as described at § 412.102; or

(2) For which the appeal was dismissed, including when the substantiated perpetrator waives their right to appeal by not making a timely request to the DAB ALJ or by waiving those rights as specified in § 412.102(c).

Sustained perpetrator means a substantiated perpetrator at Tier I or Tier II:

(1) Whose child abuse or neglect finding was upheld in the appeal and review process; or

(2) Whose appeal and review process was dismissed, including due to waiving their right to appeal by not timely requesting an appeal to the DAB ALJ or by waiving those rights as specified in § 412.102(c).

Unaccompanied child/children has the same definition as provided under 45 CFR 410.1001.

Unfounded allegation means a disposition that there is not a preponderance of the evidence establishing that the alleged perpetrator committed child abuse or neglect, and the evidence indicates that the unaccompanied child was not harmed or placed at risk of harm.

Verbal or emotional abuse means any criticisms, comments, behaviors, or threats that cause harm to a child's psychological, intellectual, or emotional functioning or self-esteem, which may be exhibited by a child's anxiety, loneliness, fear, sadness, withdrawal, aggression, or loss of trust with staff.

Volunteer has the same definition as provided under 45 CFR 411.

§ 412.100 Investigations into allegations of child abuse and neglect.

(a) *Purpose.* This part establishes standards, requirements and procedures for investigations by ORR of allegations of child abuse and neglect of an unaccompanied child in ORR custody alleged to have been committed by care provider facility staff, contractors or sub-grantees of the care provider facility, care provider facility volunteers, or other individuals who have access to children in ORR care through contracts or grants with ORR, subject to § 412.100(c).

(b) *Severability.* The provisions of this part are separate and severable from one another. If any provision is stayed or determined to be invalid by a court of law, the remaining provisions shall continue in effect.

(c) *Applicability.* This part applies to:

(1) Care provider facilities housing unaccompanied children in States where the State agency responsible for investigating child abuse and neglect allegations will not investigate such allegations in ORR-funded care provider facilities; and

(2) Emergency or influx facilities (EIFs).

(d) *Reporting.* Care provider facilities to whom this part applies must have written policies and procedures that allow unaccompanied children, care provider facility staff, contractors or sub-grantees of the care provider facility, care provider facility volunteers, families of unaccompanied children, legal service providers, child advocates, attorneys of record, and any other persons, to report allegations of child abuse and neglect to ORR directly, to the care provider facility, or to a designated entity or office that is not part of the care provider facility. The care provider facility written policies and procedures must:

(1) Provide unaccompanied children and other individuals with methods for reporting and inform them of how they can report an allegation of child abuse and neglect to a designated entity or office that is not part of the care provider facility. Such entity or office must be able to receive allegations of child abuse and neglect and must immediately forward such allegations to ORR. The method for reporting must allow unaccompanied children to remain anonymous upon request.

(2) Ensure all the methods of reporting described at § 412.100(d)(1) are accessible for unaccompanied children with disabilities and with limited English proficiency.

(3) Ensure that unaccompanied children, staff, or others who report allegations of child abuse and neglect are protected against retaliation.

(e) *Investigations.* When receiving reports of allegations of child abuse and neglect and conducting investigations, ORR must ensure the health and safety of unaccompanied children while making every effort to reduce further trauma to the alleged victim(s).

(1) If ORR receives a report of an allegation of child abuse or neglect, it must generate an intake report and determine whether the report includes an allegation that, if found to be true, would meet the definition of child abuse and neglect in this part and is consistent with § 412.100(a) and (c). If so, ORR will assign the intake report for investigation. If not, ORR will administratively close the report.

(2) If ORR determines that an intake report is appropriate for investigation, ORR shall assign an ORR Child Welfare Investigator to make a prompt and thorough investigation of the report to obtain sufficient information to determine whether the allegation of child abuse or neglect is substantiated, either at Tier I or II, based on a preponderance of the evidence.

(3) ORR shall provide notification that an allegation of child abuse and neglect will be investigated by ORR to the alleged perpetrator; care provider facility; alleged victim; alleged victim's attorney of record (if the child has an attorney of record); and the alleged victim's parent(s), legal guardian(s), or sponsor(s) (as appropriate), unless ORR has evidence showing the parents, legal guardians, or sponsors should not be notified or the victim is 14 years old or older. If the alleged victim is 14 years old or older and ORR has determined that the alleged victim is able to make an independent decision, the alleged victim can affirmatively consent to disclosure.

(4) Upon notification that an investigation has been initiated, the care provider facility must take immediate responsive measures, for the protection of child welfare, and notify the alleged perpetrator, as appropriate, and ORR of such measures. These measures may extend throughout the pendency of an investigation, and during the pendency of the appeal and review process, as necessary and applicable.

(5) *Investigations process.* (i) ORR shall coordinate with any local or State law enforcement agencies, or other Federal agencies, as appropriate, during its investigation. ORR may pause or

resume an investigation at its discretion, with input from law enforcement partners or other relevant investigatory bodies, as necessary.

(ii) A multidisciplinary team of ORR staff that includes subject matter experts, shall be established, as necessary, to provide input and an assessment of the reported allegation of child abuse or neglect to assist the ORR Child Welfare Investigator.

(iii) During the investigation, the ORR Child Welfare Investigator must complete, at a minimum, the following actions:

(A) Upon receiving an intake report, review the intake report and the care provider facility's records on the alleged victim and alleged perpetrator, conduct background checks on the alleged perpetrator, interview the person who reported the allegation if this person was not interviewed during intake, immediately request preservation of any potential video and documentary evidence, and as needed, establish a plan for thoroughly investigating the allegation;

(B) Visit the care provider facility, as appropriate, to conduct a walkthrough of the facility and review video and documentary evidence;

(C) Make reasonable efforts to interview all individuals who have information relevant to the allegation of child abuse or neglect, including, but not limited to, the alleged perpetrator (as appropriate), care provider facility staff, the alleged victim, sponsor(s), and the parent(s) or legal guardian(s) (as appropriate) of the alleged victim, and any other potential witnesses;

(D) Ensure that interviews conducted as part of the investigation are accessible for individuals with disabilities and with limited English proficiency and are properly documented either in writing or by audio or video recording;

(E) Gather all relevant information, including documents and audio or video evidence;

(F) Review any available evidence of past conduct contained in DCPI's records relating to the same alleged perpetrator, except for allegations that resulted in a finding of unfounded or administrative closure; and

(G) Assess the ongoing risk of child abuse or neglect to the unaccompanied children at the care provider facility and, as appropriate, request that the care provider facility implement a plan to mitigate the risk and ensure the safety of the children.

(6) After the investigation is complete, ORR may make any of the following dispositions based on the preponderance of the evidence for each reported allegation:

(i) Substantiated allegation—Tier I;

(ii) Substantiated allegation—Tier II;

(iii) Not substantiated allegation;

(iv) Unfounded allegation; or

(v) Administrative closure.

(7) *Automatic Tier I substantiating circumstances.* The existence of any one of the following circumstances in connection to a substantiated finding, by a preponderance of the evidence, of child abuse or neglect shall result in an automatic finding of Substantiated allegation—Tier I:

(i) The death or near death of a child as a result of child abuse or neglect;

(ii) Subjecting or exposing a child to sexual abuse or sexual harassment;

(iii) The infliction of injury or creation of a condition requiring a child to be hospitalized or to receive significant medical attention;

(iv) Repeated instances of physical abuse committed by the individual against any unaccompanied child in ORR care;

(v) Failure to take reasonable action to protect a child from sexual abuse or repeated instances of physical abuse under circumstances where the individual knew or should have known that such abuse was occurring; and

(vi) Depriving a child of necessary care (food, shelter, healthcare, supervision) which either caused serious harm or created a substantial risk of serious harm.

(8) *Aggravating factors and mitigating factors.* If ORR determines that there are no automatic Tier I substantiating circumstances under § 412.100(e)(7), ORR shall consider the following aggravating and mitigating factors together in determining if child abuse or neglect should be substantiated at Tier I or II. Consideration of aggravating and mitigating factors will be based on the totality of the circumstances and the interest of protecting child welfare:

(i) *Aggravating factors.* Aggravating factors shall be weighed together with any existing mitigating factors. Aggravating factors include any of the following:

(A) Violations of ORR behavior management requirements pursuant to § 410.1304;

(B) The individual's failure to comply with clearly established care provider facility policies, corrective action plans, or agreed-upon conditions;

(C) The tender age, delayed developmental status or other vulnerability of the child;

(D) Any significant or lasting physical, psychological, or emotional harm to the child;

(E) An attempt to inflict any significant or lasting physical, psychological, or emotional harm to the child;

(F) Evidence suggesting a repetition or pattern of abuse or neglect, including multiple instances in which child abuse or neglect was substantiated at Tier I or Tier II and not substantiated allegations if they demonstrate a pattern of abuse or neglect or harm.

(ii) *Mitigating factors.* Mitigating factors shall be weighed together with any existing aggravating factors. Mitigating factors include any of the following:

(A) Remedial actions taken by the individual before the investigation was concluded;

(B) Extraordinary, situational, or temporary stressors that caused the individual to act in an uncharacteristically abusive or neglectful manner;

(C) The isolated or aberrational nature of the child abuse or neglect; and

(D) The limited, minor, or negligible physical, psychological, or emotional impact of the abuse or neglect on the child.

(f) *Confidentiality.* Records created and information gathered or obtained during an investigation are for internal purposes only, will not be shared or made public unless otherwise required or authorized by law, and may not be disclosed without prior ORR approval. All records must be maintained in an appropriate recordkeeping system with protections for the privacy and security of the individuals identified in the records.

(g) *Notifications of a Disposition.* (1) ORR must notify the alleged perpetrator of the disposition in writing within five days of making a disposition. ORR must also notify in writing the alleged victim, their parent(s) or legal guardian(s) (as appropriate), or sponsor(s), of the disposition within five days of making a disposition.

(2) If the disposition is substantiated at Tier I, the notification must state:

(i) The substantiated perpetrator will be considered a Tier 1 sustained perpetrator and their name and other details related to the relevant abuse or neglect findings will be placed on the ORR Central Registry, unless they seek an appeal of the disposition pursuant to § 412.102, and that once identified in the ORR Central Registry they will be prohibited from working or volunteering in any way on ORR-funded grants or contracts, and may not have access to or contact with any unaccompanied child in ORR custody;

(ii) The reasons for the Tier I substantiated perpetrator's placement on the ORR Central Registry in terms sufficient to put the perpetrator on

notice of the conduct or incident(s) upon which it is based;

(iii) The Tier I substantiated perpetrator may appeal ORR's disposition pursuant to § 412.102, but that if the Tier I substantiated perpetrator either fails to timely submit a notice of appeal, or upon conclusion of the appeal and subsequent review, if any, the disposition is upheld, the Tier I substantiated perpetrator will be added to the ORR Central Registry as a Tier I sustained perpetrator and the disposition will be reported to Federal, State, and local authorities, as appropriate; and

(iv) ORR's procedures for making the disposition.

(3) If the disposition is substantiated at Tier II, the notification must inform the Tier II substantiated perpetrator that they may appeal ORR's disposition pursuant to § 412.102, but that if they either fail to timely submit a notice of appeal, or upon the conclusion of the appeal and subsequent review, if any, the disposition is upheld, the Tier II substantiated perpetrator will be designated as a Tier II sustained perpetrator and ORR's disposition will be retained in ORR records. ORR may use these records to determine patterns of child abuse and neglect and to inform future safety planning at care provider facilities. A Tier II sustained perpetrator will not be placed on the ORR Central Registry.

§ 412.101 Interventions and discipline.

(a) *ORR Central Registry.* (1) ORR will maintain an ORR Central Registry consisting of the names of Tier I sustained perpetrators for purposes consistent with § 412.100(a) and (c). The ORR Central Registry will contain names and other identifying information for such persons, and details regarding any sustained allegations of child abuse and neglect against those persons.

(2) Subject to legal requirements regarding disclosure of information, as well as information sharing obligations with relevant State, local, or Federal authorities, the ORR Central Registry will not be public-facing, nor available to persons outside of ORR. The ORR Central Registry will only be used by ORR to identify Tier I sustained perpetrators, as defined in this part, and for ORR to use as part of the screening process by care provider facilities as described in § 412.101(b).

(b) *Working and Volunteering Prohibitions and Mandatory ORR Central Registry Checks.* (1) The individuals listed in the ORR Central Registry shall be prohibited from working or volunteering in any way on ORR-funded grants or contracts and may not have access to or contact with any unaccompanied child in ORR custody unless ORR removes such individual from the ORR Central Registry.

(2) As part of the screening process for hiring decisions for staff, contractors or sub-grantees, or for screening volunteers, all care provider facilities, home study providers, and post-release service providers, whether or not located in States that investigate child abuse and neglect allegations at ORR care provider facilities, must check with ORR to confirm that an applicant is not listed in the ORR Central Registry.

(3) All care provider facilities, home study providers, and post-release service providers, whether or not located in States that investigate child abuse and neglect allegations at ORR care provider facilities, must also check all of their personnel against the ORR Central Registry at least once annually.

(c) *Disciplinary Sanctions.* Care provider facilities must implement appropriate disciplinary or remedial measures where they or ORR find that care provider facility staff, contractors or sub-grantees of the care provider facility, or care provider facility volunteers whose conduct does not rise to the level of a Tier I substantiated allegation, as defined at § 412.001, but nevertheless raises child welfare concerns.

(d) *Referrals to State, Local, and Other Federal Agencies.* (1) ORR shall refer the names and other identifying information of Tier I sustained perpetrators to relevant State and local authorities and to relevant law enforcement agencies in the State in which the sustained allegation of child abuse or neglect occurred. Additionally, if a State or local authority or relevant local law enforcement agency outside of the State in which the Tier I sustained allegation occurred requests information about the sustained perpetrator, ORR will confirm whether a particular individual is on the ORR Central Registry.

(2) ORR will provide the names and other identifying information of Tier I sustained perpetrators to the Federal Bureau of Investigation and HHS Office of the Inspector General (OIG), consistent with any applicable agreements.

(3) ORR and care provider facilities shall not interfere with another State, local, or Federal authority or agency's investigation into allegations of child abuse and neglect.

§ 412.102 Appeal and review process.

(a) A substantiated perpetrator at Tier I or Tier II may appeal the disposition made by ORR to an Administrative Law Judge (ALJ) of the HHS Departmental Appeals Board (DAB) pursuant to § 412.102(c).

(b) *Notice of Opportunity for an Appeal.* (1) After ORR substantiates an allegation of child abuse and neglect at Tier I or Tier II, it will send a written notice to the substantiated perpetrator at Tier I or Tier II, in accordance with § 412.100(g), with notification that the allegation has been substantiated and that, unless they appeal the disposition by ORR, a Tier I substantiated perpetrator will be placed on the ORR Central Registry as a Tier I sustained perpetrator and a Tier II substantiated perpetrator's information will be retained as a Tier II sustained perpetrator in agency records.

(2) The written notice shall:

(i) Clearly describe the basis for ORR's disposition that substantiates the relevant allegations at Tier I or Tier II and shall explain the Tier I or Tier II substantiated perpetrator's right to appeal the disposition and the steps required to initiate the appeal.

(ii) Inform the substantiated perpetrator that they may appeal the ORR disposition before an ALJ.

(iii) Provide the substantiated perpetrator at Tier I or Tier II and their attorney, if any, with written information and instructions describing the appeal process.

(iv) Inform the substantiated perpetrator at Tier I or Tier II that if they do not submit a notice of appeal within 30 days of receiving the notice of disposition, the DAB will consider the substantiated perpetrator to have waived their opportunity to appeal and any subsequent review. If the appeal is determined to be waived, a Tier I substantiated perpetrator will be identified as a Tier I sustained perpetrator on the ORR Central Registry and a Tier II substantiated perpetrator's information will be retained as a Tier II sustained perpetrator in agency records.

(c) *Notice of Appeal and Dismissal of an Appeal*—(1) *Notice of Appeal.* (i) If the substantiated perpetrator at Tier I or Tier II elects to appeal ORR's disposition that an allegation is substantiated at Tier I or Tier II, they must file a written notice of appeal with the DAB within 30 days of receipt of the written notice of ORR's disposition.

(ii) Within 30 days of receipt of the notice of appeal, ORR shall provide all evidence it used in making its disposition to the DAB.

(iii) ORR shall provide the substantiated perpetrator at Tier I or Tier II and their attorney, if any, all information used in making its disposition except any portion that ORR determines:

(A) Would compromise the safety and well-being of a child, the reporter, or any other person;

(B) Would reveal the identity of a child who furnished information with the understanding that their identity would be held in confidence;

(C) Would reveal the identity of any alleged perpetrator(s) involved in the same case who has an unfounded disposition; or,

(D) Is otherwise prohibited by State or Federal law or regulation. In the case of information being withheld, the substantiated perpetrator at Tier I or Tier II shall be advised of the general nature of the information and the reasons that it is being withheld.

(2) *Dismissal of appeal.* (i) The ALJ shall dismiss an appeal when the substantiated perpetrator waives appeal by not submitting a notice of appeal within 30 days of receiving written notice of ORR's disposition, pursuant to § 410.102(b)(2)(iv), and does not demonstrate good cause for the untimely submission; or when the substantiated perpetrator withdraws the appeal, abandons the appeal, or does not have a right to ALJ review. If the appeal of a Tier I substantiated perpetrator is dismissed, they will be placed on the ORR Central Registry as a Tier I sustained perpetrator. If the appeal of a Tier II substantiated perpetrator is dismissed, ORR will retain the information regarding the Tier II substantiated perpetrator as a Tier II sustained perpetrator in agency records.

(ii) Notwithstanding such dismissal, the DAB may in its discretion temporarily remove the designation of sustained perpetrator at Tier I or Tier II, which would result in ORR removing the individual who was designated as a sustained perpetrator at Tier I from the ORR Central Registry, for situations including, for example, where the ALJ determines that the sustained perpetrator at Tier I or Tier II has established good cause for exceeding the appeal timeframe.

(d) *Appeal of ORR's disposition.* (1) When a substantiated perpetrator at Tier I or Tier II appeals the ORR's disposition to an ALJ pursuant to § 412.102(c)(1)(i), ORR must transmit to the ALJ all of the evidence upon which the disposition was based.

(2) The evidentiary record must contain all documents and other materials, such as video or audio recordings, that were used by ORR in making its disposition. The ALJ may remand the case to ORR if the ALJ determines that the evidentiary record is insufficiently complete to decide whether ORR's disposition is supported by a preponderance of the evidence.

(3) The substantiated perpetrator at Tier I or Tier II may be represented by an attorney and may present the testimony of witnesses, documents, factual data, arguments, or other submissions of proof.

(4) The substantiated perpetrator shall have the burden to show that, considering the totality of the evidence, there is not a preponderance of the evidence to support the substantiated allegation at Tier I or Tier II, and to dispute whether any automatic Tier I substantiating circumstances existed (if applicable) or whether any aggravating factors or mitigating factors existed (if applicable). Both ORR and the substantiated perpetrator may present the testimony of witnesses, documents, factual data, arguments, or other submissions of proof. The testimony of care provider facility staff shall be voluntary and failure to offer such testimony will not be subject to disciplinary action.

(5) If the substantiated perpetrator submits a notice of appeal and the appeal is not dismissed by the ALJ pursuant to § 412.102(d)(7), ORR must notify the alleged victim and the alleged victim's parent(s), legal guardian(s) (as appropriate), or sponsor(s) that that an appeal of ORR's disposition will be conducted by an ALJ. The alleged victim, other child witness(es), and family members of the alleged victim shall not be required to testify. Refusal to testify shall have no bearing on the determination as to whether abuse did or did not take place.

(6) The parties may direct and cross examine witnesses either during a live hearing or pursuant to a record review. The parties will be given an opportunity to file briefs or other written statements as to fact or law.

(7) The ALJ shall conduct a fair and impartial hearing and de novo review to determine whether the substantiated perpetrator proved their burden of showing that, considering the totality of the evidence, there is not a preponderance of the evidence to support the substantiated allegation. The ALJ may either dismiss the case for untimeliness, withdrawal of the appeal, abandonment of the appeal, or because the individual does not have the right to appeal or because of other procedural defects, or will issue a written decision to uphold, modify, or reverse ORR's disposition.

(8) The ALJ shall serve a copy of the decision upon the parties and the Assistant Secretary for ACF. The ALJ's decision shall provide the sustained perpetrator at Tier I or Tier II and their attorney, if any, with instructions for requesting review by the Assistant Secretary for ACF. The ALJ also shall provide a copy of the decision to alleged victim and the alleged victim's parent(s), legal guardian(s) (as appropriate), or sponsor(s). The complete record upon which the decision is based shall be made available to the Assistant Secretary.

(e) *Review of the ALJ's Decision.* (1) A substantiated perpetrator at Tier I or Tier II may request a review of the ALJ's decision within 30 days of receipt of the ALJ's decision, by filing a request for review with Office of the Assistant Secretary for ACF.

(2) The Assistant Secretary for ACF has discretion, within 30 days after receiving a timely submission by a substantiated perpetrator of a request for review of an ALJ's decision under § 412.102(e)(1) to review the ALJ's decision to dismiss a case for untimeliness or other procedural defects, and to affirm, modify, or reverse the ALJ's decision with regard to dismissal or ORR's disposition of the allegation. A review by the Assistant Secretary will determine whether the ALJ's decision was based on a material error of law or fact.

(3) If the Assistant Secretary affirms the ALJ's decision or does not modify or reverse the ALJ's decision within 30 days after receiving a timely review request pursuant to § 412.102(e)(1), the ALJ's decision becomes the final decision of the Assistant Secretary and is binding on the parties.

(4) If the Assistant Secretary modifies or reverses the ALJ's decision pursuant to § 412.102(e)(2), the Assistant Secretary's decision is final and binding.

(5) If at the end of the 30-day period in § 412.102(e)(1), no timely request for review has been made, the Assistant Secretary has 30 days from that point to exercise discretion to review the ALJ's decision. If the Assistant Secretary does not modify or reverse the ALJ's decision, then the ALJ's decision becomes the final decision of the Assistant Secretary and is binding on both parties.

(6) The Office of the Assistant Secretary for ACF shall serve a copy of the final decision upon the parties involved. The Office of the Assistant Secretary for ACF also shall provide a copy of the final decision issued by the Assistant Secretary, based on review on the ALJ's decision under § 412.102(e), to the alleged victim and the alleged victim's parent(s), legal guardian(s) (as appropriate), or sponsor(s).

§ 412.103 Obligations of care provider facilities.

(a) *General requirements.* During any investigation by ORR, a care provider facility must:

(1) Permit ORR unrestricted access to the premises, any physical property on the premises, buildings, staff, and children in the physical custody of the care provider facility;

(2) Permit ORR to conduct interviews with children residing at the care provider facility, and without care provider facility staff, contractors, or sub-grantees of the care provider facility, or care provider facility volunteers present;

(3) Permit ORR to observe the activities of care provider facility staff, contractors, or sub-grantees of the care provider facility, care provider facility volunteers, or other individuals who have access to children in ORR care through contracts or grants with ORR;

(4) Promptly preserve any potential video or documentary evidence;

(5) Promptly provide access to and, upon request, copies of all files, records, reports, data, video recordings, and other information to ORR, either prior to or during the investigation;

(6) Promptly provide access to and contact information for care provider facility staff, contractors, or sub-grantees of the care provider facility, care provider facility volunteers, or other individuals who have access to children in ORR care through other contracts or grants with ORR;

(7) Submit complete and accurate responses to any written questions in a timely manner;

(8) Fully cooperate with ORR;

(9) Fully cooperate with any investigation of the same allegation by State, local, and Federal authorities and relevant law enforcement agencies.

(b) *Protection against retaliation.* Care provider facility staff, contractors, or sub-grantees of the care provider facility, and care provider facility volunteers must not retaliate against any person who in good faith reports or participates in an investigation of child abuse or neglect.

(c) *Obstruction, interference, delay of, or failure to permit an investigation.* Obstruction, interference, delay of, or failure of a care provider facility to permit or cooperate with any investigation under this part, including failure to protect unaccompanied children from retaliation pursuant to § 412.103(b), may result in ORR taking monitoring and enforcement measures including, but not limited to: remote monitoring of the care provider facility; on-site monitoring of the care provider facility; monitoring of the corporate offices to review internal policies and reporting structures, as well as supervisory response to events; limiting or stopping new placements of unaccompanied children at the care provider facility; removing all unaccompanied children from the care provider facility and placing them into other care provider facilities; issuing corrective actions; terminating the cooperative agreement or contract with the care provider facility; or imposing other such remedies for noncompliance applicable to HHS grant recipients and contractors.

(d) *Rights to legal representation, familial supports, and other supports.* During the course of an investigation, care provider facilities must provide unaccompanied children confidential access to attorneys of record and other legal service providers, in a manner consistent with requirements established at 45 CFR 411.55 (as applicable) and 45 CFR 410.1309. Care provider facilities must provide unaccompanied children access to their families, including legal guardians, in a manner consistent with requirements established at 45 CFR 411.55 (as applicable) and 45 CFR 410.1309. Care provider facilities must provide unaccompanied children with access to their child advocates, in a manner consistent with the requirements at 8 U.S.C. 1232(c)(6) and 45 CFR 410.1308. Care provider facilities must also provide unaccompanied children access to health services (including specialists and mental health practitioners), individual counseling sessions, and crisis intervention (including access to outside victim services and rape crisis centers where appropriate) to most appropriately address unaccompanied children's needs, in a manner consistent with requirements established at 45 CFR 410.1307, 45 CFR 410.1311, 45 CFR 410.1302(c)(5), and 45 CFR 411.21 (as applicable).

BILLING CODE 4184–45–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 660

[Docket No. 241120–0297]

RTID 0648–XD848

Fisheries Off West Coast States; Coastal Pelagic Species Fisheries; Annual Specifications; 2024–2025 Annual Specifications and Management Measures for Pacific Sardine

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS is implementing annual harvest specifications and management measures for the northern subpopulation of Pacific sardine (hereafter, Pacific sardine), for the fishing year from July 1, 2024, through June 30, 2025. This rule prohibits most directed commercial fishing for Pacific sardine off the coasts of Washington, Oregon, and California. Pacific sardine harvest is allowed only for use as live bait, in minor directed fisheries, as incidental catch in other fisheries, or as authorized under exempted fishing permits. The incidental harvest of Pacific sardine will be limited to 30 percent by weight of all fish per trip when caught with other stocks managed under the Coastal Pelagic Species (CPS) Fishery Management Plan (FMP), or up to 2 metric tons (mt) per trip when caught with non-coastal pelagic species stocks. The harvest specifications for 2024–2025 include an overfishing limit (OFL) of 8,312 mt, an acceptable biological catch (ABC) and annual catch limit (ACL) of 6,005 mt, and an annual catch target (ACT) of 5,500 mt. This final rule is intended to conserve, manage, and rebuild the Pacific sardine stock off the coasts of Washington, Oregon, and California.

DATES: Effective December 27, 2024.

FOR FURTHER INFORMATION CONTACT: Katie Davis, West Coast Region, NMFS, (323) 372–2126, *Katie.Davis@noaa.gov.*

SUPPLEMENTARY INFORMATION: NMFS manages the Pacific sardine fishery in the U.S. exclusive economic zone (EEZ) off the Pacific coast (*i.e.,* off the U.S. West Coast states of California, Oregon, and Washington) in accordance with the CPS FMP. The CPS FMP and its implementing regulations require NMFS to set annual reference points and management measures for the Pacific

sardine fishery based on the annual specification framework and control rules in the FMP. These control rules include the harvest guideline (HG) control rule, which, in conjunction with the OFL and ABC control rules in the FMP, are used to set required reference points, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act (MSA) (16 U.S.C. 1801 *et seq.*). Additionally, the CPS FMP requires additional management measures, intended to restrict harvest, for the Pacific sardine fishery, such as catch restrictions.

NMFS publishes annual specifications in the **Federal Register** to establish these annual reference points (*e.g.,* the OFL, ABC, and ACL) and management measures for each Pacific sardine fishing year. NMFS published proposed specifications and management measures on June 21, 2024 (89 FR 52005). Additionally, in response to a court order, and to avoid a lapse in regulations, NMFS published an interim final rule (89 FR 62668; August 1, 2024) that was effective July 29, 2024, and is in place until replaced by these 2024–2025 final specifications.

Final Reference Points and Management Measures

Based on the 2024 benchmark stock assessment for Pacific sardine, the associated estimated age 1+ biomass of 58,614 mt, the control rule formulas in the FMP, and recent related Court orders, NMFS is implementing, as proposed, an OFL of 8,312 mt, an ABC of 6,005 mt, an ACL of 6,005 mt, and an ACT of 5,500 mt.

The CPS FMP includes a prohibition of the primary directed fishery when the biomass is at or below 150,000 mt. The Pacific sardine primary directed fishery is therefore closed, and Pacific sardine catch during the 2024–2025 fishing season is prohibited unless it is harvested as part of the live bait, tribal, or minor directed fisheries, as incidental catch in other fisheries, or as part of exempted fishing permit (EFP) activities.

The 2024–2025 fishing year specifications can be found in table 1, and management measures are listed after table 1.

TABLE 1—HARVEST SPECIFICATIONS FOR THE 2024–2025 SARDINE FISHING YEAR, IN METRIC TONS

[mt]

Biomass estimate	OFL	ABC	HG	ACL	ACT
58,614	8,312	6,005	0	6,005	5,500

The following are the additional management measures and in-season accountability measures for the 2024–2025 Pacific sardine fishing year:

(1) If landings in the live bait fishery reach 3,000 mt of Pacific sardine, then a per-trip limit of 1 mt of Pacific sardine applies to the live bait fishery;

(2) An incidental per-landing limit of 30 percent (by weight) of Pacific sardine applies to other CPS primary directed fisheries (*e.g.,* Pacific mackerel);

(3) If the ACT of 5,500 mt is attained, then a per-trip limit of 1 mt of Pacific sardine applies to all CPS fisheries (*i.e.,* (1) and (2) will no longer apply); and

(4) An incidental per-landing allowance of 2 mt of Pacific sardine applies to non-CPS fisheries until the ACL is reached.

In addition to the management measures and in-season accountability measures listed in the previous paragraphs, Pacific sardine catch in the minor directed fishery for finfish remains limited to 1 mt per trip per day, and 1 trip per day by any vessel, per regulations at 50 CFR 660.511(d)(2).

Background

At the April 2024 Pacific Fisheries Management Council (Council) meeting, the Council's Scientific and Statistical Committee (SSC) reviewed a Stock Assessment Review (STAR) panel report on the Southwest Fisheries Science Center's 2024 benchmark stock assessment, and also reviewed the benchmark stock assessment itself, titled ''Assessment of the Pacific sardine resource (*Sardinops sagax*) in 2024 for U.S. management in 2024–2025.'' The SSC concluded that the 2024 benchmark assessment for Pacific sardine is the best scientific information available for the management of Pacific sardine. During their review, the SSC noted major improvements in methodology from the 2020 benchmark assessment, including an updated habitat model for assigning fishery catch and survey biomass to the northern and southern subpopulations of Pacific sardine. However, the SSC applied a category 2d sigma uncertainty buffer which, compared to a category 1, equates to a larger allowance for scientific uncertainty, and therefore a lower ABC and a decreased risk of overfishing. During the discussion of the appropriate category, the SSC discussed potential uncertainty in the relationship between sardine productivity and ocean temperatures recently used to calculate the E_{MSY} parameter of the OFL and ABC control rules, as well as uncertainty in the strength of the 2023 year-class represented in the stock assessment, along with other uncertainties in the data used in the assessment.

The CPS FMP control rules, as they apply to annual reference points, use the following formulas:

OFL = Biomass * E_{MSY} * DISTRIBUTION

ABC = Biomass * BUFFER * E_{MSY} * DISTRIBUTION

Biomass. The estimated stock biomass of Pacific sardine ages 1 and older, in metric tons.

E_{MSY}. The exploitation rate for deterministic equilibrium maximum sustainable yield. Since 2014, based on annual recommendations by the Pacific Fishery Management Council's SSC, the E_{MSY} for Pacific sardine has most recently been based on a temperature-recruitment relationship based on a running 3-year average of the California Cooperative Oceanic Fisheries Investigations (CalCOFI) temperature index.

DISTRIBUTION. The average portion of the Pacific sardine biomass estimated to be in the U.S. EEZ off the Pacific coast. DISTRIBUTION is currently defined in the CPS FMP as 87 percent and is based on the average historical larval distribution obtained from scientific cruises and the distribution of the resource according to the logbooks of aerial fish-spotters.

BUFFER. The percentage reduction of the OFL as determined by the SSC's evaluation of scientific uncertainty (sigma) and the Council's risk policy (P*).

Rebuilding Plan and Oceana, Inc., v. Raimondo, et al.

During the 2019–2020 fishing year, the estimated biomass of sardine dropped below its minimum stock size threshold of 50,000 mt, which triggered an overfished determination process. NMFS accordingly declared the stock overfished on June 26, 2019 and notified the Council on July 9, 2019. NMFS worked with the Council to develop a rebuilding plan for Pacific sardine to

implement within two years and finalized it on June 24, 2021 (86 FR 33142). The rebuilding plan maintained the status quo management for Pacific sardine, which includes a complete closure of the primary sardine fishery. Oceana, an environmental non-governmental organization, challenged this rebuilding plan and later included a challenge to the 2023–2024 annual specifications (''2023 Final Rule''; 88 FR 41040), in an action filed in the United States District Court for the Northern District of California: *Oceana, Inc.,* v. *Raimondo, et al.,* No. 5:21–cv–05407–VKD (N.D. Cal., filed July 14, 2021). In its rulings on the challenges, the Court partially vacated the rebuilding plan and held that NMFS failed to demonstrate that it relied on best available science to set the overfishing limits in using the CalCOFI temperature index to determine E_{MSY} for the 2023 Final Rule.

Partially-Vacated Rebuilding Plan

The Court partially vacated the rebuilding plan on June 28, 2024. Accordingly, NMFS cannot rely on the vacated components of the rebuilding plan to guide these annual specifications. The harvest control rules in place before Amendment 18 to the CPS FMP implemented the now partially-vacated rebuilding plan are still applicable. None of the provisions of Amendment 18, whether vacated or not, changed the previously applicable harvest control rules.

E_{MSY}

NMFS considered the recent order from the Court in making a determination that the harvest specifications and management measures in this action would prevent overfishing, rebuild the stock, and are supported by the best scientific information available. As they have in previous years, the SSC recommended an OFL and ABC for the 2024–2025 fishing year that were calculated, in part, by using an E_{MSY} based on a relationship with CalCOFI temperatures as best scientific information available for preventing overfishing. The CPS FMP does not mandate that E_{MSY} be based on this relationship. Under the MSA, the SSC provides scientific advice for NMFS' consideration in fishery management decisions, including ABC and preventing overfishing. Per National Standard 2 at 50 CFR 600.315(a)(2), scientific information that is used to inform decision making should include an evaluation of its uncertainty and management decisions should recognize the risks, such as those to overfishing, associated with the sources of uncertainty. The SSC discussed the potential uncertainty surrounding the use of the CalCOFI-based E_{MSY} when considering their choice of the appropriate sigma for the ABC. NMFS has determined that the use of a Category 2 sigma, as recommended by the SSC, appropriately accounts for any scientific uncertainty and gaps in scientific information that may exist, including any surrounding E_{MSY}, in the information used to calculate the recommended reference points.

In making the determination to approve the OFL and ABC recommended by the Council, NMFS took into account the fact that the SSC recommended that the analysis and assumptions surrounding a CalCOFI based E_{MSY} be revisited. This was one of several scientific recommendations made by the SSC in April 2024. Other recommendations included a potential reconsideration of the need for the precaution provided by the DISTRIBUTION term, noting that a substantial proportion of the U.S. catch in recent years is inferred to be from the southern subpopulation of Pacific sardine and that there has been a decline in the assumed catch of northern subpopulation by Mexico, as well as endorsement of the eight high-priority research recommendations for future sardine stock assessments in the 2024 sardine STAR panel report. All of these recommendations are typical of the scientific process to inform fishery management decisions such as determining an appropriate OFL and ABC to prevent overfishing and achieve optimum yield in the fishery.

NMFS also examined recent and past years' CalCOFI temperatures in relation to this year's calculated CalCOFI-based E_{MSY}. The calculated value for this year is 0.163 and represents the lowest E_{MSY} in 10 years, and falls in the lower range of expected values. The decline in E_{MSY} this year compared to the last 3 years is the result of a high temperature record year in 2020 falling out of the running 3-year average temperature used to calculate E_{MSY}. This effect was also observed between 2014 and 2017 when a very large marine heatwave off the Pacific coast caused unprecedented disruptions in the ocean environment, resulting in high CalCOFI temperatures. The highest CalCOFI temperature in 40 years was recorded in 2015. Such events increase the running 3-year average temperature used to calculate E_{MSY}. To reduce the risk of potentially excessive E_{MSY} values, the SSC recommended in 2014 that a CalCOFI-based E_{MSY} be restricted to a maximum of 0.25 (for reference, this equated to a temperature of 16.16 °C when the median temperature was 15.90 °C). This cap on E_{MSY} was applied to calculations of the reference points for the 2016–2017 and 2018–2019 fishing years.

Although the Court found that NMFS' rationale for exclusively using CalCOFI data to determine E_{MSY} in order to set the 2023–2024 specifications was inadequate, it explicitly declined to prohibit NMFS from employing the CalCOFI-based E_{MSY} in setting catch limits, and stated that the agency must reassess the rebuilding plan and determine how to meet the requirements of the MSA in view of the Court's order. In light of the Court's finding prior to the issuance of the 2024–2025 harvest specifications, and as part of a robust decision-making process, NMFS considered whether there was alternative scientific information, per 50 CFR 600.315(a)(2), that would warrant disapproving the Council's recommendation.

Although E_{MSY} is lower this year than any E_{MSY} used in the last 10 years, NMFS acknowledges there is still scientific uncertainty surrounding the predictive efficacy of the CalCOFI temperature index. However, as explained in both the proposed rule and this final rule, this uncertainty was considered by the SSC and the Council when recommending a 2,307 mt reduction from the OFL to the ABC (*i.e.,* OFL is 8,312 mt but ABC and ACL are both 6,005 mt). Importantly, as discussed in the proposed rule and in the paragraphs that follow, in addition to accounting for any scientific uncertainty surrounding CalCOFI, NMFS also considered the only available alternative to its use, which resulted in a higher value than the CalCOFI-based E_{MSY}, and determined the lower value was appropriate to use in setting this year's specifications.

Currently, there are no other formulaic relationships between Pacific sardine recruitment and an environmental variable on which to base E_{MSY}. However, past analyses have calculated a stochastic (referenced as ''static'' in proposed rule) E_{MSY} of 0.18 when the effects of temperature on productivity are ignored.[1] This value for E_{MSY} was recommended by the SSC and utilized by NMFS as best scientific information available for management in 2012–2014 as an alternative to the default option of applying the temperature-stock relationship due to uncertainty surrounding the

[1] Hurtado-Ferro, F., and Punt, A.E. 2013. Revised analyses related to Pacific sardine harvest parameters. PFMC June 2013 Briefing Book. Agenda Item I.4.b Attachment 1.

relationship at that time.[2] During the Council's April 2023 Pacific sardine harvest specification process, the SSC specifically compared this stochastic value to the CalCOFI-based 2023–2024 E_{MSY} of 0.22 in its discussion of an appropriate OFL buffer: ''There was no support among SSC members for a category 1 designation, but there was some discussion of the merits of a category 2 versus a category 3 assessment. Although uncertainty in E_{MSY} would argue for increased uncertainty in the OFL, it was noted that the 'nondynamic' harvest rate (estimated to maximize long-term yield in stochastic simulations), of 0.18, is not very different from 0.22 based on current SSTs, and that other CPS stocks have rates that are higher still (Pacific mackerel E_{MSY} is ~0.3).'' [3]

NMFS considers this modeled stochastic E_{MSY} of 0.18 as the only available alternative that could have been considered in making OFL determinations for Pacific sardine without the use of the CalCOFI temperature index. However, the Council's SSC recommended to the Council an OFL that utilized the CalCOFI-based E_{MSY} as the best scientific information available. In making the decision to approve the OFL and ABC in this action, NMFS considered the stochastic E_{MSY} of 0.18. NMFS concluded that, at this time, it cannot make a determination that the stochastic E_{MSY} of 0.18 represents a better alternative to the CalCOFI-based E_{MSY} value the SSC recommended as the best scientific information available for determining this year's OFL. Since 2000, when the CPS FMP was adopted and harvest control rules were established for Pacific sardine, it has been determined that making efforts to include environmental information into the management of Pacific sardine is the preferred approach. And although the relatively recent running 3-year average CalCOFI temperatures have resulted in higher values than in previous years, likely as a result of anomalous, although becoming more frequent, oceanographic events, that may appear to contradict the original concept of the environmental E_{MSY}, this year's temperature and resulting E_{MSY} align with the concept as they are both in the lower range of values during a time of relatively low sardine recruitment. NMFS will continue, as it has each year, to evaluate whether the use of the CalCOFI-based E_{MSY} is the best scientific information available for future annual specifications.

As noted in the proposed rule, the Council's recommended OFL, calculated using an E_{MSY} of 0.163, is a lower OFL and therefore more precautionary than an OFL would have been based on the stochastic E_{MSY} of 0.18. Additionally, it has been previously suggested that one approach to set a precautionary proxy fishing mortality rate for small pelagic fish such as Pacific sardine is to use a value that equates to one half of the species natural mortality rate.[4] Based on the estimates of natural mortality from the 2024 Pacific sardine stock assessment, this formula would produce an E_{MSY} in the range of 0.25–0.30. By contrast, the E_{MSY} utilized to calculate the OFL implemented through this action is only 0.163. For these reasons, NMFS has determined that the reference points recommended by the Council are based on the best scientific information available and, therefore, NMFS has determined to implement them through this action.

Annual Catch Limit

Although this action implements an ACL equal to the ABC at 6,005 mt, as envisioned by the FMP, NMFS has determined that as a result of the closure of the directed fishery and additional management measures, landings of the northern subpopulation of Pacific sardine will remain very low and total U.S. sardine landings are highly unlikely to exceed 2,200 mt, similar to what has occurred since the 2015–2016 fishing year, when the directed fishery was closed (see table 2).

TABLE 2—LANDINGS ATTRIBUTED IN THE 2024 PACIFIC SARDINE STOCK ASSESSMENT TO NORTHERN AND SOUTHERN SUBPOPULATIONS OF PACIFIC SARDINE (2014–2023), IN METRIC TONS

Fishing year	ACL	Total landings of Pacific sardine (combined catch of northern and southern subpopulations)	Assumed landings of northern subpopulation of Pacific sardine
2014–2015	23,293	23,113	19,969
2015–2016	7,000	1,919	75
2016–2017	8,000	1,885	602
2017–2018	8,000	1,775	351
2018–2019	7,000	2,278	525
2019–2020	4,000	2,062	627
2020–2021	4,000	2,276	657
2021–2022	3,000	1,772	298
2022–2023	3,800	1,619	517

All sources of catch, including any EFP set-asides, the live bait fishery, and other minimal sources of harvest, such as incidental catch in CPS and non-CPS fisheries and minor directed fishing, will be accounted for against the ACT and ACL. Any Pacific sardine harvested between July 1, 2024, and the effective date of this final rule will count toward the 2024–2025 ACT and ACL.

At the April 2024 Council meeting, the Council recommended apportioning 670 mt of the ACL for two EFP proposals to support stock assessments for Pacific sardine. NMFS published a notice of receipt of EFP applications on June 26, 2024 (89 FR 53396). The comment period closed on July 26,

[2] Prior to 2012, E_{MSY} was based on a relationship with sea surface temperature measured at the Scripps Institution of Oceanography (SIO) pier, in La Jolla, CA. A scientific paper was published calling into question this relationship, so while that was reviewed, 18 percent was used for E_{MSY}. The subsequent review of the SIO pier temperature and E_{MSY} relationship determined it was actually still correlated.

2024, and NMFS received no comments. NMFS is deciding whether to issue the EFPs during the promulgation of this final rule. The NMFS West Coast Regional Administrator will publish a notice in the **Federal Register** to announce when catch reaches the incidental limits, as well as any changes to allowable incidental catch percentages or trip limits. Additionally, to ensure that the regulated community is informed of any closure, NMFS will make announcements through other means available, including emails to fishermen, processors, and state fishery management agencies.

Comments and Responses

On June 21, 2024, NMFS published a proposed rule for this action and solicited public comments through July 8, 2024 (89 FR 52005). NMFS received two public comment letters relevant to this action, one from the California Wetfish Producer's Association (CWPA) and one from the non-governmental conservation organization Oceana. After considering the public comments, NMFS made no changes from the proposed rule. The comment from CWPA supported this action. The comment letter from Oceana included multiple comments, some of which are beyond the scope of this action. Additionally, some of the comments and requests provided by Oceana were the subject of recent litigation. The U.S. District Court (N.D. Cal.) has ruled in this case, and NMFS notes that it must complete the remand of the Pacific sardine rebuilding plan by June 1, 2025 (*Oceana, Inc.,* v. *Raimondo, et al.*). NMFS summarizes and responds to those comments from Oceana below.

Comment 1: Oceana states that the E_{MSY} used to set the OFL, ABC, and ACL fails to prevent overfishing and is inconsistent with the best available science on sardine productivity. Oceana states that in NMFS' rationale for continuing to use the CalCOFI index for E_{MSY}, NMFS incorrectly asserts that the identified flaws in the CalCOFI index are due to uncertainty.

Response: NMFS has determined that the OFL and ABC implemented through this action will prevent overfishing and are supported by the best scientific information available. NMFS notes that this issue was the subject of recent court orders: on April 22, 2024, the Court issued an order stating that NMFS failed to demonstrate that it had relied on the best available science in setting the 2023–2024 OFL for Pacific sardine using an exclusively CalCOFI-derived E_{MSY}. As stated in this rule, NMFS took into account the Court's finding on this matter and has determined that reference points established by this action, specifically the OFL and ABC, will prevent overfishing, support the rebuilding of the stock, and are supported by the best scientific information available. In an attempt to address the Court's concern for these 2024–2025 harvest specifications, NMFS expressly considered what available information exists that would necessitate that NMFS disapprove the Council's recommended OFL. As stated above, NMFS considered the only alternative E_{MSY} value previously analyzed and used by the Council's SSC and NMFS, which was 18 percent. The use of the 18 percent E_{MSY} was previously supported by analyses conducted by Hurtado-Ferro and Punt (2013) developed to evaluate the performance of alternative candidate OFL and HG control rule variants. That analysis used a Pacific sardine specific model to calculate an E_{MSY} to examine constant exploitation rate harvest control rules (*i.e.,* an E_{MSY} that does not account for an environmental effect), and is also the E_{MSY} value that was used to project the population in the rebuilding analysis for Pacific sardine.

For this year, the alternative of an 18 percent E_{MSY} would be higher than the CalCOFI-based E_{MSY} value, and would therefore result in a higher OFL than the OFL recommended by the SSC. As described in this rule, the CalCOFI-based E_{MSY} is among the lowest values produced by the CalCOFI (sea surface) temperature index in the past 10 years. The literature cited by the commenter (Zwolinski and Demer, 2019) re-evaluated the correlation between the sea surface temperature E_{MSY} values and recruitment success of the northern subpopulation of Pacific sardine over a specific period of years and suggested that the relationship was no longer statistically valid. However, the same journal article that called into question the validity of the CalCOFI temperature index in predicting the productivity of Pacific sardine stated that ''. . . even a marginally statistically significant environment-dependent recruitment model may be useful. For example, if required by the HCR, it could be used to predict recruitment in the management year and forecast the stock biomass into the following year more precisely than a model without environmental influence.'' [5] While NMFS will continue to evaluate E_{MSY}, it has determined that use of the CalCOFI temperature index is the best scientific information available in setting the 2024–2025 Pacific sardine harvest specifications.

Comment 2: Oceana argues that the stochastic E_{MSY} value of 18 percent is outdated and incorrect and that NMFS fails to analyze other available alternatives for setting the E_{MSY} value for the 2024–2025 specifications. Oceana suggests using an E_{MSY} value of 5 percent from Alternative 3 in Amendment 18 to the CPS FMP to set the OFL. Oceana states that NMFS could alternatively also readily produce an E_{MSY} from the 2024 stock assessment, as it did in the 2022 northern anchovy stock assessment, and use it to calculate the 2024–2025 annual catch specifications.

Response: As stated previously in this rule, in light of the Court's finding that NMFS' rationale for using the CalCOFI based E_{MSY} in the 2023–2024 specifications was inadequate, NMFS re-examined and reviewed the relevant information available to make a determination on approving the OFL and ABC implemented through this action. While Oceana states that the CalCOFI-based E_{MSY} and the stochastic 18 percent E_{MSY} are not consistent with the best scientific information available on sardine productivity, the comment did not offer alternative best scientific information available and NMFS has determined that none exists. Oceana suggests that NMFS consider a 5 percent E_{MSY}; however, NMFS could not, through this action, implement an OFL utilizing a 5 percent E_{MSY} and additionally has no evidence that this would represent best scientific information available. NMFS recognizes that a harvest rate of 5 percent was considered as part of alternative 3 for Amendment 18, and this could remain a potential alternative under any future rebuilding plan; however, NMFS has determined it does not represent the best scientific information available for use as an E_{MSY} to calculate this year's OFL. NMFS has no basis to consider a 5 percent E_{MSY} as alternative best scientific information available. Unlike the stochastic 18 percent described above, 5 percent is not a result of modeling work explicitly designed to calculate E_{MSY}. The 5 percent value under alternative 3 represented a harvest level between status quo management and zero U.S. harvest, which was analyzed as a policy option to explore the differences in potential rebuilding timelines as a result of reduced harvest levels. Absent any support for an E_{MSY} of 5 percent as a basis for calculating the OFL, NMFS could not determine that it was the best scientific information available.

[5] Zwolinski, JP & Demer, DA. 2019. Re-evaluation of the environmental dependence of Pacific sardine recruitment. Fisheries Research, 216, 120–125. *https://doi.org/10.1016/j.fishres.2019.03.022.*

In addition, Oceana's suggestion that NMFS could ''readily'' produce an updated E_{MSY} from the 2024 stock assessment as was done for the central subpopulation of northern anchovy (CSNA) is misleading, because the 2024 sardine stock assessment did not produce an E_{MSY} that could be considered in this rulemaking. The management of Pacific sardine has never utilized an E_{MSY} derived from a stock assessment model. No such E_{MSY} is available because it has not been produced by scientists and peer reviewed, and thus an E_{MSY} derived from a stock assessment model would not be the best scientific information available as required under the MSA. Calculating E_{MSY} for CPS stocks from a stock assessment requires scientists to run multiple data analyses, including reassessments to address potential issues, and these results would then need to be packaged and written up. This is not a straightforward process that could be accomplished and appropriately reviewed in the time available to complete this rulemaking.

The complications of this process are highlighted by the CSNA E_{MSY} development. The most appropriate way to calculate the CSNA E_{MSY} was discussed at multiple meetings, including the STAR panel meeting for the 2022 CSNA assessment as well as a full SSC meeting. These discussions included scientifically technical deliberations on the parameters of the stock assessment that influence the E_{MSY} calculation. Ultimately the SSC recommended an E_{MSY} value resulting from the stock assessment model; however, at the time the SSC noted that uncertainty in that value remained: ''The SSC endorses the E_{MSY} value (labeled F_{MSY} in the assessment) of 0.493 estimated within the assessment, where E is expressed as annual total catch divided by summary age-1+ biomass, while noting that the value of E_{MSY} remains a major uncertainty.'' During the 2024 Pacific sardine stock assessment process an E_{MSY} was not developed. Furthermore, any sort of E_{MSY} from the assessment model for Pacific sardine would likely carry similar uncertainties as those associated with the CSNA value that would require a thorough review and would not be reliable for the 2024–25 specifications.

Comment 3: Oceana states that the proposed ACL would not allow rebuilding within the legally required timeline because it represents a harvest rate and overall catch level that NMFS's rebuilding analysis showed will not rebuild the Pacific sardine population. Oceana states that in contrast, NMFS's rebuilding analysis showed that a constant catch of 2,200 metric tons or a 5 percent harvest rate would rebuild the population.

Response: NMFS acknowledges that the Court's order vacated parts of the rebuilding plan that must be addressed by June 1, 2025, including that the plan failed to rebuild the stock within the statutory timeframe under the MSA. The Court has provided NMFS until June 1, 2025 to develop a new rebuilding plan that will specify a time period for rebuilding Pacific sardine that will be as short as possible, taking into account the status and biology of any overfished stocks of fish, the needs of fishing communities, recommendations by international organizations in which the United States participates, and the interaction of the overfished stock of fish within the marine ecosystem. The rebuilding plan will also include conservation and management measures consistent with achieving rebuilding within the specified time period. It is not required by the Court's order to implement this rebuilding plan in this rule.

Comment 4: Oceana states that given the uncertainties, evidence of previous overfishing, and the need to rebuild, Oceana recommended NMFS use a lower P-star parameter than the 0.4 recommended by the Council. Noting that P-star represents the risk of overfishing.

Response: The choice of P-star is only one factor in creating a buffer between the OFL and ABC to help ensure overfishing is prevented. The other factor used for Pacific sardine is the sigma value recommended by the SSC. This sigma value is intended to capture scientific uncertainty in the OFL estimate. The Council's P-star choice is then intended to capture other factors, such as management uncertainty, in preventing overfishing. There is extremely limited management uncertainty associated with tracking catch levels against the applicable catch reference points for Pacific sardine. NMFS is readily able to track fishing mortality across the various sectors in season to ensure landings do not exceed the ACL or ABC. NMFS therefore has determined that the ABC has been appropriately reduced from the OFL to prevent overfishing.

Comment 5: Oceana states that given the stock remains near the 50,000 mt minimum stock size threshold, the proposed incidental harvest rate of 30 percent is excessive.

Response: The CPS FMP dictates that if the estimated biomass is below 50,000 mt, then the incidental harvest rate is restricted to 20 percent landing by weight. The 2024 estimated biomass is 58,614 mt. Under the CPS FMP, at this value, the incidental rate could be up to 45 percent; therefore, 30 percent is in line with the allowances of the CPS FMP. Additionally, during the 2018–2019 fishing year, the last year that the stock's biomass was more than 50,000 mt, the incidental harvest allowance was 40 percent, and the incidental fishery harvested 272 mt. The following year, the incidental harvest allowance was restricted to 20 percent, and the incidental fishery harvested 249 mt. Increasing the incidental harvest allowance doesn't necessarily change the amount of Pacific sardine catch, but allows more flexibility for vessels to reduce unwanted discards when the catch ratio of sardine to other CPS is greater than 20 percent.

Classification

Pursuant to section 304(b)(1)(A) of the MSA, the NMFS Assistant Administrator has determined that this final rule is consistent with the CPS FMP, other provisions of the MSA, and other applicable law.

This final rule is exempt from review under Executive Order 12866 because it is a routine rule that would implement regulations for less than 1 year.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this action would not have a significant economic impact on a substantial number of small entities for the purposes of the Regulatory Flexibility Act. The factual basis for the certification was published in the proposed rule (89 FR 52005, June 21, 2024) and is not repeated here. As a result, a final regulatory flexibility analysis was not required and none was prepared.

Pursuant to Executive Order 13175, this proposed rule was developed after meaningful consultation and collaboration with the Council's tribal representative, who has agreed with the provisions that apply to tribal vessels.

This action does not contain a collection-of-information requirement for purposes of the Paperwork Reduction Act. There are no relevant Federal rules that may duplicate, overlap, or conflict with the proposed action.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 20, 2024.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

[FR Doc. 2024–27685 Filed 11–26–24; 8:45 am]

BILLING CODE 3510–22–P

Proposed Rules

Federal Register
Vol. 89, No. 229
Wednesday, November 27, 2024

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2024–2543; Project Identifier MCAI–2024–00342–T]

RIN 2120–AA64

Airworthiness Directives; Bombardier, Inc., Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for all Bombardier, Inc., Model BD–700–2A12 airplanes. This proposed AD was prompted by the discovery that a partial loss of thrust after an engine failure during a required navigation performance authorization required (RNP–AR) approach under certain weight, altitude and temperature (WAT) conditions, may lead to a descent below the specified path guidance. This proposed AD would require a revision to the existing airplane flight manual (AFM), to incorporate updated WAT tables for RNP–AR approach operations. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by January 13, 2025.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2024–2543; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For Bombardier material identified in this proposed AD, contact Bombardier Business Aircraft Customer Response Center, 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone 514–855–2999; email *ac.yul@aero.bombardier.com;* website *bombardier.com*.
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

FOR FURTHER INFORMATION CONTACT: Joseph Catanzaro, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7300; email: *9-avs-nyaco-cos@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2024–2543; Project Identifier MCAI–2024–00342–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Joseph Catanzaro, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7300; email: *9-avs-nyaco-cos@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

Transport Canada, which is the aviation authority for Canada, has issued Transport Canada AD CF–2024–22, dated June 13, 2024 (Transport Canada AD CF–2024–22) (also referred to after this as the MCAI), to correct an unsafe condition on all Bombardier, Inc., Model BD–700–2A12 airplanes. The MCAI states that it was discovered that a partial loss of thrust after an engine failure during an RNP–AR approach under certain WAT conditions, may lead to a descent below 75 foot of the path guidance, requiring a go-around. The resultant vertical deviation may exceed allowable approach containment for obstacle clearance and may largely reduce the safety margins in the missed approach.

The FAA is proposing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA____.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed (Bombardier) Global 7500 Airplane Flight Manual Temporary Revision TR–58, dated March 21, 2024. This material specifies procedures to update WAT tables for RNP–AR approach operations to contain possible vertical deviations within the 75 foot requirement.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI and material referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would require a revision to the existing AFM to incorporate updated WAT tables for RNP–AR approach operations that contain possible vertical deviations within the 75 foot requirement.

Compliance With AFM Revisions

Transport Canada AD CF–2024–22 requires operators to ''advise all flight crews'' of revisions to the AFM, and thereafter to ''operate the aeroplane accordingly.'' However, this proposed AD would not specifically require those actions as those actions are already required by FAA regulations.

FAA regulations require operators furnish to pilots any changes to the AFM (for example, 14 CFR 121.137), and to ensure the pilots are familiar with the AFM (for example, 14 CFR 91.505). As with any other flightcrew training requirement, training on the updated AFM content is tracked by the operators and recorded in each pilot's training record, which is available for the FAA to review. FAA regulations also require pilots to follow the procedures in the existing AFM including all updates. 14 CFR 91.9 requires that any person operating a civil aircraft must comply with the operating limitations specified in the AFM. Therefore, including a requirement in this proposed AD to operate the airplane according to the revised AFM would be redundant and unnecessary.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 70 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
1 work-hour × $85 per hour = $85	$0	$85	$5,950

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Bombardier, Inc.: Docket No. FAA–2024–2543; Project Identifier MCAI–2024–00342–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 13, 2025.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all Bombardier, Inc., Model BD–700–2A12 airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Unsafe Condition

This AD was prompted by the discovery that a partial loss of thrust after an engine failure during a required navigation performance authorization required (RNP–AR) approach under certain weight, altitude, and temperature (WAT) conditions, may lead to a descent below 75 feet of the path guidance, requiring a go-around. The resultant vertical deviation may exceed allowable approach containment for obstacle clearance and may reduce the safety margins in the missed approach.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Revision of Existing Airplane Flight Manual (AFM)

Within 30 days after the effective date of this AD, revise the existing AFM to include the information specified in (Bombardier) Global 7500 Airplane Flight Manual Temporary Revision TR–58, dated March 21, 2024.

(h) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (i) of this AD and email to: *AMOC@faa.gov*. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or Transport Canada; or Bombardier, Inc.'s, Transport Canada Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(i) Additional Information

For more information about this AD, contact Joseph Catanzaro, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7300; email: *9-avs-nyaco-cos@faa.gov.*

(j) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) (Bombardier) Global 7500 Airplane Flight Manual Temporary Revision TR–58, dated March 21, 2024.

(ii) Reserved

(3) For material identified in this AD, contact Bombardier Business Aircraft Customer Response Center, 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone 514–855–2999; email *ac.yul@aero.bombardier.com;* website *bombardier.com.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on November 21, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2024–2530; Airspace Docket No. 24–ASO–33]

RIN 2120–AA66

Amendment of Class E Airspace; Ahoskie, NC

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend Class E airspace extending upward from 700 feet above the surface for Ahoskie, NC, by adding airspace for ECU Health Roanoke Chowan Heliport, Ahoskie, NC. This action also proposes to amend the airport information for Tri-County at Henry Joyner Field Airport by updating the airport name and coordinates. Additionally, this action would bring the Ahoskie Class E airspace into compliance with FAA orders. Controlled airspace is necessary for the safety and management of instrument flight rules (IFR) operations at this airport.

DATES: Comments must be received on or before January 13, 2025.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2024–2530 and Airspace Docket No. 24–ASO–33 using any of the following methods:

* *Federal eRulemaking Portal:* Go to *www.regulations.gov* and follow the online instructions for sending your comments electronically.

* *Mail:* Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except for Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at *www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except for Federal holidays.

FAA Order JO 7400.11J Airspace Designations and Reporting Points and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications/.* You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Marc Ellerbee, Operations Support Group, Eastern Service Center, Federal Aviation Administration, 1701 Columbia Avenue, College Park, GA 30337; Telephone: (404) 305–5589.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority, as it would amend Class E airspace in Ahoskie, NC.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should

send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edits, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Operations office (see **ADDRESSES** section for address, phone number, and hours of operations). An informal docket may also be examined during regular business hours at the office of the Eastern Service Center, Federal Aviation Administration, Room 210, 1701 Columbia Ave., College Park, GA 30337.

Incorporation by Reference

Class E airspace designations are published in Paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11J, Airspace Designations and Reporting Points, dated July 31, 2024, and effective September 15, 2024. These updates will be published in the next update to FAA Order JO 7400.11. FAA Order JO 7400.11J is publicly available as listed in the **ADDRESSES** section of this document. FAA Order JO 7400.11J lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA proposes an amendment to 14 CFR part 71 to amend Class E airspace by adding airspace extending upward from 700 feet above the surface within a 6-mile radius of ECU Health Roanoke Chowan Heliport, Ahoskie, NC. This action also proposes to correct the coordinates and airport name for Tri-County at Henry Joyner Field Airport. Additionally, this action would remove the city associated with the airport in the airspace legal description to comply with changes to FAA Order JO 7400.2P, Procedures for Handling Airspace Matters. Controlled airspace is necessary for the safety and management of instrument flight rules (IFR) operations in the area.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures,'' prior to any final regulatory action by the FAA.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11J, Airspace Designations and Reporting Points, dated July 31, 2024, and effective September 15, 2024, is amended as follows: Paragraph 6005. Class E Airspace Areas Extending Upward from 700 feet or More Above the Surface of the Earth.

* * * * *

ASO NC E5 Ahoskie, NC

Tri-County at Henry Joyner Field Airport, NC
(Lat. 36°17′51″ N, long. 77°10′15″ W)
ECU Health Roanoke Chowan Heliport, NC
(Lat. 36°17′5″ N, long. 76°59′44″ W)

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Tri-County at Henry Joyner Field Airport and within a 6-mile radius of ECU Health Roanoke Chowan Heliport.

* * * * *

Issued in College Park, Georgia, on November 21, 2024.

Patrick Young,

Manager, Airspace & Procedures Team North, Eastern Service Center, Air Traffic Organization.

Hot Springs National Park; Use of Thermal Water and Commercial Passenger-Carrying Vehicles

AGENCY: National Park Service, Interior.

ACTION: Proposed rule.

SUMMARY: The National Park Service (NPS) proposes to amend the special regulations for Hot Springs National Park to update regulations about the use of thermal water. The NPS also proposes to remove outdated regulations concerning commercial passenger-carrying motor vehicles.

DATES: Comments on the proposed rule must be received by 11:59 p.m. ET on January 27, 2025.

ADDRESSES: You may submit comments, identified by Regulation Identifier Number (RIN) 1024–AE86, by either of the following methods:

(1) *Electronically:* Go to the Federal eRulemaking Portal: *https://www.regulations.gov/.* Follow the instructions for submitting comments.

(2) *By hard copy:* Mail to: Superintendent, Hot Springs National Park, 101 Reserve Street, Hot Springs, Arkansas 71901.

Instructions: Comments will not be accepted by fax, email, or in any way other than those specified above. All submissions received must include the words ''National Park Service'' or ''NPS'' and must include the docket number or RIN (1024–AE86) for this rulemaking. Comments received may be posted without change to *https://www.regulations.gov/,* including any personal information provided.

Docket: For access to the docket to read comments received, go to *https://www.regulations.gov/* and search for ''1024–AE86''

FOR FURTHER INFORMATION CONTACT: Laura Miller, Superintendent, Hot Springs National Park; (501)–620–6735; *laura_a_miller@nps.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. In compliance with the Providing Accountability Through Transparency Act of 2023, the plain language summary of the proposal is available on *Regulations.gov* in the docket for this rulemaking.

SUPPLEMENTARY INFORMATION:

Background

Purpose and Significance of Hot Springs National Park

Hot Springs National Park is a 5,500-acre park in Hot Springs, Arkansas, located approximately 55 miles southwest of Little Rock, Arkansas. The U.S. Congress created the park in 1832 when it designated the land as Hot Springs Reservation. In 1921, the reservation name was changed to Hot Springs National Park. Today, the NPS administers the park as one of more than 400 units of the National Park System.

The purpose of the park is to protect its unique geothermal spring water and associated lands for public health, wellness, and enjoyment. The park encompasses mostly forested mountains but includes a developed urban edge formed by Bathhouse Row, which was designated a national historic landmark in 1987. The NPS preserves and manages natural and cultural resources in the park for over 1.5 million annual visitors. Geothermal spring water originating within the park provides ample opportunities for public recreation, health, and wellness activities, including therapeutic bathing. The NPS collects and distributes thermal water to public fountains and to various entities (referred to collectively as bathhouses), including spas, a hotel, and a brewery, within and outside the park. The public uses and enjoys thermal water in bathhouses, by viewing display springs, and by collecting and drinking water free of charge from public fountains.

Legal Framework for the Use of Thermal Water

Under the NPS Organic Act of 1916, the NPS has broad authority to regulate the use of the lands and waters within National Park System units. See 54 U.S.C. 100101; 100751(a). The enabling act that established Hot Springs National Park, now codified at 16 U.S.C. Subchapter XL, specifically authorizes the NPS to make all needful rules and regulations regarding the use of thermal water, including the use of thermal water by bathhouses. 16 U.S.C. 363. The park's enabling act authorizes specific uses and establishes conditions for the use of thermal water. 16 U.S.C. 361–363. In 1959, the NPS promulgated regulations, now codified at 36 CFR 7.18(b), prohibiting the removal of water from any source of supply within the park for the purpose of sale, or for any use other than personal drinking. In 1979, the NPS promulgated regulations, now codified at 36 CFR part 21, governing bathhouses that receive thermal water originating in the park and use it for purposes authorized by the superintendent. These regulations primarily address bathing in thermal water for medical treatment. They contain specific provisions about registration of prescribing physicians, health examinations for infectious or communicable diseases, and the control of persons with acute or infectious diseases and other maladies.

Since 1979, the use of thermal water in bathhouses has evolved. Historical use of thermal water for medicinal purposes has been largely replaced by bathing for recreation or general health and wellness. The NPS receives requests for new uses of thermal water within and outside the park and the existing regulations do not clearly define procedures and standards for evaluating such requests. In particular, the existing regulations do not provide adequate notice about specific provisions in the park's enabling act about written instruments, priority users, surplus water, and rates and costs, none of which are addressed in the existing regulations.

Proposed Rule

Summary of the Proposed Rule

The NPS proposes to update park regulations about the use of thermal water to reflect contemporary uses of water and provisions in the park's enabling act about the use of thermal water. For easier reference and improved transparency, all regulations addressing the use of thermal water would be located in paragraph (b) of § 7.18, rather than split between paragraph (b) of § 7.18 and part 21. This rule would remove part 21 in its entirety. This rule also would remove existing regulations in part 21 about registration of physicians (§ 21.4), requirements to have medical prescriptions before bathing (§ 21.5), control of persons with diseases and other maladies (§ 21.6), health examinations and infectious diseases (§ 21.7), solicitation by bathhouse employees for tips (§ 21.9), loss of personal valuables (§ 21.10), and the redemption and loss of bath tickets (§§ 21.11–21.12) as outdated and unnecessary because of changes in how the public uses thermal water and changes in how bathhouses operate.

In addition to updating regulations about the use of thermal water, this rule would revise existing paragraph (a) in § 7.18. This paragraph contains outdated permit and fee requirements for commercial passenger-carrying motor vehicles operating in the park. The NPS has a statutory authority to manage these services through commercial use authorizations (CUAs) that it did not have when paragraph (a) was promulgated. 54 U.S.C. 101925. Consistent with this authority, the NPS manages commercial passenger-carrying motor vehicles in the park through CUAs and applicable policy. In order to provide notice to the public, including affected service providers, this rule would replace the existing language in paragraph (a) with a statement that CUAs and fees for the operation of commercial passenger-carrying vehicles will be required in accordance with 54 U.S.C. 101925.

Below is a paragraph-by-paragraph analysis of the proposed rule that explains changes to existing similar regulations, if any.

Section-by-Section Analysis

Paragraph (b)(1)—Definitions

Proposed regulation	Existing regulations
§ 7.18(b)(1) Definitions.	• § 7.18(b) Use of water. • § 21.1 Definitions.

Existing regulations in § 21.1 define the terms ''physician,'' ''registered physician,'' ''employee,'' and ''bathhouse''. The proposed rule would remove definitions for ''physician'' and ''registered physician'' because those terms would no longer be used in the regulations due to changes in how thermal water is used by the public. The existing definition of ''employee'' is any person licensed or certified by a State or territory in his or her specialty, or certified by the superintendent to perform special services in a bathhouse. The rule would remove the definition of ''employee'' as redundant with a provision in new paragraph (b)(3)(v) that would require bathhouses to ensure and maintain employee licenses and certifications where required by Federal or State law. The remainder of the existing definition of ''employee'' is outdated and unnecessary because the superintendent no longer issues such certifications.

The proposed rule would simplify the definition of ''bathhouse'' by removing unnecessary references to individuals, trustees, partnerships, corporations, and business entities as potential operators, which is not relevant to the issue of authorized use of thermal water. Instead, the definition would simply state that bathhouse is a facility authorized to use thermal water for any purpose pursuant to a written instrument signed by the superintendent.

The proposed rule would add a new definition of ''bathing'' to mean soaking in thermal water for health benefits. This definition is necessary to implement a distinction in the park's enabling act about rates charged to bathhouses for use of thermal water, explained below. The proposed rule would add a new definition of ''thermal water'' to mean water that emerges from springs, fountains, or other natural sources within the park. This language is similar to language in existing paragraph (b) of § 7.18 and serves to distinguish water that is subject to NPS administration, and water that is not. The rule would add a new definition of ''use of thermal water'' to mean heating, cooling, storing, removing from the park, combining with other substances, or otherwise altering thermal water in any manner. This definition is intentionally broad to include any possible use so that the NPS can effectively protect this resource through restrictions and conditions on the use of thermal water that appear elsewhere in the regulations. Finally, the rule would add a definition of ''water treatment'' to mean the introduction of any substance into thermal water, including chemicals, solutions, or other water. This type of use would be further defined because it requires specific approval by the NPS Office of Public Health (OPH), as explained below.

Paragraph (b)(2)—Use of Thermal Water

Proposed regulation	Existing regulations
§ 7.18(b)(2) Use of thermal water.	• § 7.18(b) Use of water. • § 21.3 Use of thermal water.

Existing regulations in § 7.18(b) prohibit the carrying away of water, hot or cold, from any of the springs, fountains, or other sources of supply in the park for the purpose of sale, or for any use other than personal drinking. Existing regulations in § 21.3 prohibit the use of thermal waters for purposes other than those authorized by the superintendent. They further prohibit the heating, reheating, or otherwise increasing the temperature of thermal water, and the introduction of any substance, chemical, or other material or solution into thermal waters, except as may be prescribed by a physician for a bather or as may be directed by the superintendent.

This rule would replace these existing regulations with new paragraph (b)(2) of § 7.18. In order to continue to protect the integrity of thermal water, new paragraph (b)(2)(i) would prohibit the use of thermal water except by individuals for personal consumption or as authorized in writing by the superintendent. As explained above, the new definition of ''use of thermal water'' would be broad enough to include any of the specific uses of water prohibited by the existing regulations.

Under the rule, the superintendent's authority to allow use of thermal water would be limited to use that is consistent with the purposes of the park, including the protection of natural resource values. The park's Foundation Document (2022) states that the purpose of the park is to protect its geothermal spring water and associated lands for public health, wellness, and enjoyment. This regulatory provision, then, would allow the superintendent to authorize the use of thermal water for the general public welfare, to include, for example, use of thermal water for bathing, drinking, and relaxation, but not in a manner that is inconsistent with the mandate to protect the resource. The rule would more specifically prevent the superintendent from authorizing the removal of thermal water from the park for direct sale or use in products for sale. This would not prevent the superintendent from authorizing the use of thermal water by bathhouses that are commercial operations. Historic and contemporary bathhouses have and continue to operate as commercial businesses, such as spas, hotels, and (most recently) a brewery. This provision, similar to existing § 7.18(b), would prohibit the commercial exploitation of thermal water as a product that is created, packaged, and sold outside of the park or any bathhouse. These types of uses are too far removed from the establishment of the park as an in-situ reserve where the public can visit and benefit from thermal water originating in the park.

The last sentence of new paragraph (b)(2)(i) would state that the superintendent, in addition to any other appropriate written instrument, may use lease agreements to authorize the use of thermal water, but only those lease agreements specifically authorized by the park's enabling legislation. The NPS intends this specific reference to the park's enabling legislation to clarify that lease agreements entered into by the NPS under its general leasing authority in 54 U.S.C. 102102, as implemented by NPS regulations in 36 CFR part 18, should not be used to authorize the use of thermal water.

New paragraph (b)(2)(ii) would require all water treatment to be approved by the OPH, and be limited to the minimum amount and type necessary for the maintenance of public health and safety, as determined by the OPH.[1] This provision would codify an additional level of protection for thermal water in NPS regulations. This is consistent with existing practice, as NPS staff at the park work closely with OPH officers to maintain the health and safety of thermal water. The rule would not include the allowance in existing § 7.18(b) that physicians can prescribe the introduction of substances into thermal water for a bather. Bathing for medicinal purposes is not a

[1] Water treatment also may be subject to approvals from local, county or State officials that have been delegated authority to enforce Federal statutes such as the Safe Drinking Water Act.

contemporary use of thermal water and the employees of the OPH are more appropriate subject matter experts than personal physicians to determine the potential impacts of water treatment on public health.

New paragraphs (b)(2)(iii)–(v) would codify in NPS regulations, for the first time, provisions in the park's enabling act that establish priority uses of thermal water by bathhouses located within and outside of the park. Restating these provisions in a more accessible format would benefit the NPS and existing and prospective bathhouses. Bathhouses would better understand how the park's enabling act prioritizes the use of thermal water among authorized users. Bathhouses also would better understand the requirement that there be a surplus of thermal water before the superintendent can authorize bathhouses located outside of the park, except for the Arlington Hotel, to use thermal water. New paragraph (b)(2)(iii) would restate the order of priority for using thermal water, consistent with 16 U.S.C. 362:

1. Bathhouses located within the park, in the order in which they were authorized to use thermal water.
2. Arlington Hotel.
3. Bathhouses located outside of the park, in the order in which they were authorized to use thermal water, and only when the Superintendent has determined that there is a surplus of thermal water.

The park's enabling act refers to the ''Army and Navy hospital bathhouse'' and the ''public bathhouse'' as having priority use before any of the bathhouses identified in the rule. These entities are not listed in the rule, however, because the Army and Navy hospital bathhouse ceased operation in 1959 and the public bathhouse, which referred to the Libbey Physical Medicine Center, ceased operation in 2005. In the future, if new bathhouses are established in either location, they would be categorized as bathhouses located within the park, and have priority use relative to other bathhouses within the park in the order in which they were authorized to use thermal water, but always before the Arlington Hotel and other bathhouses located outside of the park. The Arlington Hotel is located outside of the park and is specifically named in the park's enabling act as having priority use of thermal water in the order identified in the rule. Although it is located outside of the park, the superintendent is not required to determine there is a surplus of thermal water before authorizing the Arlington Hotel to use thermal water pursuant to a written instrument due to its specific mention in the enabling act. Currently, Levi Hospital is the only other bathhouse located outside of the park that is authorized to use thermal water. Levi Hospital is not named in the enabling act and its use of thermal water is conditioned upon the superintendent determining there is a surplus of thermal water. As long as it remains in continuous operation, its use of thermal water will have priority over other bathhouses located outside of the park that may be authorized to use thermal water in the future.

New paragraph (b)(2)(iv) would explain that a surplus of thermal water exists when, after accounting for all of the thermal water that bathhouses located within the park and the Arlington Hotel are authorized to use, the superintendent determines that additional thermal water may be used by other bathhouses located outside of the park in a manner that would not conflict with the requirements of applicable Federal laws and policies, including those that require the NPS to preserve the resources of the park. When the superintendent evaluates whether there is a surplus, the relevant value is the full amount of thermal water that may be used by bathhouses within the park and the Arlington Hotel, not the amount of thermal water actually used by those bathhouses at any time. The superintendent then must evaluate whether there is any remaining thermal water that could be used by other bathhouses, and whether such use would violate any applicable Federal laws (*e.g.,* the park's enabling act and the NPS Organic Act) or any applicable Federal policies (*e.g.,* NPS Management Policies 2006). This includes an evaluation of whether additional use of thermal water will cause impairment of park resources, including wildlife and other natural features in the park that use or depend on the water. The superintendent must determine there is a surplus of water before signing a written instrument authorizing the use of thermal water by a bathhouse located outside of the park.

New paragraph (b)(2)(v) would require the NPS to provide adequate notice to bathhouses that have lower priority use authorizations before it authorizes a bathhouse higher in the order of priority to use thermal water. This paragraph would further require the NPS to provide adequate notice to bathhouses located outside of the park, other than the Arlington Hotel, if the superintendent's determination that there is a surplus of thermal water changes in a manner that will impact their authorizations to use thermal water. These provisions would help ensure that bathhouses have reasonable notice about potential decreases in the amount of thermal water they are authorized to use. This would allow them to adjust operations and notify customers about impacts to offered products and services. The superintendent may change the amount of thermal water bathhouses are authorized to use based upon determinations of surplus or determinations that use would be inconsistent with the purposes of the park, notwithstanding the terms and conditions of any written instrument authorizing use of thermal water.

New paragraph (b)(2)(vi) would require bathhouses to have a thermal water management plan approved by the superintendent and the OPH, with an additional requirement that thermal water management plans for bathhouses located outside of the park also must be approved by the Arkansas Department of Health, as required by State law. Thermal water management plans are already required as a term and condition of all written instruments authorizing bathhouses to use thermal water. Including this requirement in the regulations would provide additional notice and transparency for bathhouses.

The park's enabling act vests full power to the Secretary, acting through the NPS, to promulgate regulations that authorize the superintendent to examine and inspect at any time the manner of using thermal water in any bathtub. 16 U.S.C. 363. Consistent with this authority, new paragraph (b)(2)(vii) would give the superintendent (or someone with delegated authority) the right to examine and inspect the use of thermal water by a bathhouse at reasonable times to determine whether the bathhouse is being operated in accordance with the terms and conditions of the written instrument authorizing the use of thermal water, the approved thermal water management plan, and with the provisions of the regulations.

Paragraph (b)(3)—Prohibited Acts

Proposed regulation	Existing regulations
§ 7.18(b)(3) Prohibited acts.	• § 21.1 Definitions. • § 21.2 Penalties • § 21.8 Employee certification.

The park's enabling act authorizes the Secretary, acting through the NPS, to provide penalties for the violation of any regulation as to the use of thermal water, including the cancellation of any lease for the use of such water. 16 U.S.C. 363. Consistent with this authorization,

new paragraphs (b)(3)(i)–(v) would identify prohibited acts and state that they may result in the revocation or suspension of a written authorization to use thermal water. Prohibited acts would be failures to:

- comply with a written instrument authorizing the use of thermal water;
- comply with a provision of an approved water management plan;
- make a required payment;
- operate a pool or spa without appropriate certification, as determined by the OPH;
- ensure and maintain employee licenses and certifications where required by Federal or State law; and
- comply with any regulations addressing the use of thermal water.

This list of prohibited acts would provide notice and transparency to bathhouses about the repercussions of certain actions. Existing regulations in § 21.1 and § 21.8 require persons performing special services in bathhouses, such as physical therapy, massage, and attending to baths, to be licensed or certified by a State or U.S. territory, or by the superintendent upon completion of examinations and (for bath attendants) an apprenticeship. Individuals who provide special services in bathhouses are already subject to licensing and certification requirements under applicable law. Rather than imposing those requirements again in NPS regulations, new paragraph (b)(3)(v) would instead hold bathhouses accountable for the services they offer their customers by requiring bathhouses to ensure and maintain employee licenses and certifications where required by Federal or State law. The superintendent no longer examines or certifies bathhouse employees. As a result, those provisions also would be removed.

Existing regulations in § 21.2 state that any person convicted of violating any regulation in part 21 shall be punished by a fine not exceeding $100 and be adjudged to pay all costs of the proceedings. Existing regulations in 36 CFR 1.3 state that a person convicted of violating any regulation in parts 1 through 7, part 9 subpart B, and parts 12 and 13, shall be subject to the criminal penalties provided under 18 U.S.C. 1865. As a result of moving all regulations about the use of thermal water to § 7.18, a violation of any provision of the rule would result in criminal penalties under § 1.3. New paragraph (b)(3)(vi) would state this explicitly for additional notice and transparency.

Paragraph (b)(4)—Rates and Cost Recovery

Proposed regulation	Existing regulation
§ 7.18(b)(4) Rates and cost recovery.	N/A.

The park's enabling act requires the NPS to charge bathhouses the same rates for thermal water that will be used for bathing, but allows the superintendent to charge bathhouses individual rates for thermal water that will not be used for bathing. 16 U.S.C. 362. The park's enabling act requires bathhouses located outside of the park that are authorized to use thermal water if there is a surplus, to pay all costs associated with connections for obtaining such thermal water. 16 U.S.C. 362. The park's enabling act requires the superintendent to readjust the terms and amounts of payment required under a written instrument authorizing the use of thermal water every five years during the term of the instrument. 16 U.S.C. 362. As stated above, the park's enabling act authorizes the NPS to make all needful rules and regulations regarding the use of thermal water, including the use of thermal water by bathhouses, and specifically states that such regulations can be made to prevent waste and be what the NPS deems best for the public interest. 16 U.S.C. 363.

In order to provide additional notice and transparency to bathhouses, this rule would include regulations that address rates and cost recovery for the use of thermal water that are consistent with the statutory authorities discussed above. All of these proposed provisions reflect current practice by the NPS. New paragraph (b)(4)(i) would state that rates charged for thermal water will be specified in the written instrument authorizing the use of thermal water. New paragraph (b)(4)(ii) would state that rates for thermal water that will be used for bathing will be the same for all bathhouses, and that rates for thermal water that will not be used for bathing will be determined by the superintendent for each bathhouse. New paragraph (b)(4)(iii) would state that bathhouses located outside of the park that may be authorized to use thermal water if there is a surplus must pay all costs incurred by the NPS associated with connections for obtaining such thermal water. Connection costs include all costs incurred from activities that cause the connections to be made. These may include, but are not limited to, design and construction costs, and costs incurred to comply with applicable laws and policies, such as the National Environmental Policy Act and the National Historic Preservation Act. New paragraph (b)(4)(iv) would state that written instruments authorizing the use of thermal water may require bathhouses to reimburse the NPS for costs incurred from the distribution of thermal water and maintenance of the distribution system. The ability of the NPS to recover these costs, when appropriate, will help ensure that thermal water is distributed safely, efficiently, and without waste. Finally, new paragraph (b)(5)(v) would state that the NPS will readjust the terms and amounts of payments required under a written instrument authorizing the use of thermal water at least every five years during its term and upon the renewal of a written instrument at the end of its term.

Compliance With Other Laws, Executive Orders and Department Policy

Regulatory Planning and Review (Executive Orders 12866 and 13563 and 14094)

Executive Order 12866, as amended by Executive Order 14094, provides that the Office of Information and Regulatory Affairs (OIRA) in the Office of Management and Budget will review all significant rules. OIRA has determined that the proposed rule is not significant.

Executive Order 14094 amends Executive Order 12866 and reaffirms the principles of Executive Order 12866 and Executive Order 13563 and states that regulatory analysis should facilitate agency efforts to develop regulations that serve the public interest, advance statutory objectives, and be consistent with Executive Order 12866, Executive Order 13563, and the Presidential Memorandum of January 20, 2021 (Modernizing Regulatory Review). Regulatory analysis, as practicable and appropriate, shall recognize distributive impacts and equity, to the extent permitted by law.

Executive Order 13563 reaffirms the principles of Executive Order 12866 while calling for improvements in the nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. Executive Order 13563 directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. Executive Order 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process

must allow for public participation and an open exchange of ideas. The NPS has developed this proposed rule in a manner consistent with these requirements.

Regulatory Flexibility Act

This proposed rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This certification is based on information contained in the economic analyses found in the report entitled '' Regulatory Analysis of the Use of Thermal Water and Commercial Passenger-Carrying Vehicles at Hot Springs National Park Proposed Rule.'' The report may be viewed in the docket for this rulemaking action by visiting *https://www.regulations.gov/* and searching for ''RIN 1024–AE86''.

Congressional Review Act

This proposed rule is not a major rule under 5 U.S.C. 804(2). This proposed rule:

(a) Does not have an annual effect on the economy of $100 million or more.

(b) Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.

(c) Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

Unfunded Mandates Reform Act

This proposed rule does not impose an unfunded mandate on State, local, or Tribal governments or the private sector of more than $100 million per year. The proposed rule does not have a significant or unique effect on State, local or Tribal governments or the private sector. It addresses public use of national park lands and imposes no requirements on other agencies or governments. A statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*) is not required.

Takings (Executive Order 12630)

This proposed rule does not effect a taking of private property or otherwise have takings implications under Executive Order 12630. A takings implication assessment is not required.

Federalism (Executive Order 13132)

Under the criteria in section 1 of Executive Order 13132, the proposed rule does not have sufficient federalism implications to warrant the preparation of a Federalism summary impact statement. This proposed rule only affects use of federally administered lands and waters. It has no direct effects on other areas. A Federalism summary impact statement is not required.

Civil Justice Reform (Executive Order 12988)

This proposed rule complies with the requirements of Executive Order 12988. This proposed rule:

(a) Meets the criteria of section 3(a) requiring that all regulations be reviewed to eliminate errors and ambiguity and be written to minimize litigation; and

(b) Meets the criteria of section 3(b)(2) requiring that all regulations be written in clear language and contain clear legal standards.

Consultation With Indian Tribes (Executive Order 13175 and Department Policy)

The Department of the Interior strives to strengthen its government-to-government relationship with Indian Tribes through a commitment to consultation with Indian Tribes and recognition of their right to self-governance and Tribal sovereignty. The NPS has evaluated this proposed rule under the criteria in Executive Order 13175 and under the Department's Tribal consultation policy and has determined that Tribal consultation is not required because the proposed rule will have no substantial direct effect on federally recognized Indian Tribes. Nevertheless, in support of the Department of the Interior's and the NPS's commitment to government-to-government consultation, the NPS intends to coordinate with Indian Tribes that are traditionally associated with the land that is now part of the park, including the Caddo Nation, Quapaw Nation, Osage Nation, Shawnee Tribe, and Absentee Shawnee.

Paperwork Reduction Act

This proposed rule contains existing information collections. All information collections require approval under the Paperwork Reduction Act of 1995 (PRA; 44 U.S.C. 3501 *et seq.*). The NPS may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB has reviewed and approved the information collection requirements associated with NPS Form 10–550 ''Commercial Use Authorization Application'' and assigned OMB control number 1024–0268 (currently under review for renewal; the Information Collection Request was submitted to OMB on 3/29/2023).

National Environmental Policy Act

This proposed rule does not constitute a major Federal action significantly affecting the quality of the human environment. A detailed statement under the National Environmental Policy Act of 1969 (NEPA) is not required because the rule is covered by a categorical exclusion. NPS NEPA Handbook (2015) Section 3.3.A.8 allows for the following to be categorically excluded: Modifications or revisions to existing regulations or the promulgation of new regulations for NPS-administered areas, provided the modifications, revisions, or new regulations do not:

a. Increase public use to the extent of compromising the nature and character of the area or causing physical damage to it,

b. Introduce noncompatible uses that might compromise the nature and characteristics of the area or cause physical damage to it,

c. Conflict with adjacent ownerships or land uses, or

d. Cause a nuisance to adjacent owners or occupants.

The NPS has also determined that the proposed rule does not involve any of the extraordinary circumstances listed in 43 CFR 46.215 that would require further analysis under NEPA.

Effects on the Energy Supply (Executive Order 13211)

This proposed rule is not a significant energy action under the definition in Executive Order 13211; the proposed rule is not likely to have a significant adverse effect on the supply, distribution, or use of energy, and the rule has not otherwise been designated by the Administrator of OIRA as a significant energy action. A Statement of Energy Effects in not required.

Clarity of This Rule

The NPS is required by Executive Orders 12866 (section 1(b)(12)) and 12988 (section 3(b)(1)(B)), and 13563 (section 1(a)), and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule the NPS publishes must:

(a) Be logically organized;

(b) Use the active voice to address readers directly;

(c) Use common, everyday words and clear language rather than jargon;

(d) Be divided into short sections and sentences; and

(e) Use lists and tables wherever possible.

If you feel that the NPS has not met these requirements, send us comments by one of the methods listed in the

ADDRESSES section. To better help the NPS revise the rule, your comments should be as specific as possible. For example, you should identify the numbers of the sections or paragraphs that you find unclear, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

Public Participation

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments regarding this proposed rule by one of the methods listed in the **ADDRESSES** section of this document.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time.

List of Subjects

36 CFR Part 7

National parks, Reporting and Recordkeeping requirements.

36 CFR Part 21

National parks.

For the reasons stated in the preamble, and under the authority of 16 U.S.C. 363 and 54 U.S.C. 100751, the National Park Service proposes to amend 36 CFR chapter I, as set forth below:

PART 7—SPECIAL REGULATIONS, AREAS OF THE NATIONAL PARK SYSTEM

■ 1. The authority citation for part 7 continues to read as follows:

Authority: 54 U.S.C. 100101, 100751, 320102; Sec. 7.96 also issued under DC Code 10–137 and DC Code 50–2201.07.

■ 2. Amend § 7.18 by revising paragraphs (a) and (b) to read as follows:

§ 7.18 Hot Springs National Park.

(a) *Commercial passenger-carrying vehicles.* Commercial use authorizations and fees for the operation of commercial passenger-carrying vehicles carrying passengers for hire over park roads will be required in accordance with 54 U.S.C. 101925.

(b) *Thermal water.* The regulations contained in this paragraph (b) apply to the use of thermal water.

(1) *Definitions.* The following definitions apply to this paragraph (b):

Bathhouse means a facility authorized to use thermal water for any purpose pursuant to a written instrument signed by the Superintendent of Hot Springs National Park.

Bathing means soaking in thermal water for health benefits.

Thermal water means water that emerges from springs, fountains or other natural sources within Hot Springs National Park.

Use of thermal water means heating, cooling, storing, removing from Hot Springs National Park, combining with other substances, or otherwise altering thermal water in any manner.

Water treatment means the introduction of any substance into thermal water, including chemicals, solutions, or other water.

(2) *Use of thermal water.* (i) The use of thermal water is prohibited except by individuals for personal consumption or as authorized in writing by the Superintendent provided that such use is consistent with the purposes of Hot Springs National Park, and provided further that under no circumstances may thermal water be removed from Hot Springs National Park for direct sale or use in products for sale. A written instrument authorizing the use of thermal water may be in the form of a lease agreement entered into under the specific authority of 16 U.S.C. 361 *et seq.,* in addition to any other types of written instruments authorized by applicable law and policy.

(ii) Water treatment must be approved by the NPS Office of Public Health and is limited to the minimum amount and type necessary for the maintenance of public health and safety, as determined by the NPS Office of Public Health.

(iii) Bathhouses may use thermal water in the order of priority identified below, consistent with 16 U.S.C. 362:

(A) Bathhouses located within Hot Springs National Park, in the order in which they were authorized to use thermal water.

(B) Arlington Hotel.

(C) Bathhouses located outside of Hot Springs National Park, in the order in which they were authorized to use thermal water, and only when the Superintendent has determined that there is a surplus of thermal water.

(iv) For purposes of paragraph (b)(2)(iii)(C), a surplus may exist when, after accounting for all of the thermal water that bathhouses referred to in paragraphs (b)(2)(iii)(A) and (b)(2)(iii)(B) are authorized to use, the Superintendent determines that additional thermal water may be used by other bathhouses located outside of Hot Springs National Park in a manner that would not conflict with the requirements of applicable Federal laws and policies, including those that require the NPS to preserve the resources of Hot Springs National Park.

(v) The NPS will provide adequate notice to bathhouses that have lower priority use authorizations before it authorizes a bathhouse higher in the order of priority to use thermal water. The NPS will provide adequate notice to bathhouses referred to in paragraph (b)(2)(iii)(C) if the Superintendent's determination that there is a surplus of thermal water changes in a manner that will impact their authorizations to use thermal water.

(vi) Bathhouses must have a thermal water management plan approved by the Superintendent and the NPS Office of Public Health. Thermal water management plans for bathhouses located outside of Hot Springs National Park also must be approved by the Arkansas Department of Health.

(vii) The Superintendent has the right to examine and inspect the use of thermal water by a bathhouse at reasonable times to determine whether the bathhouse is being operated in accordance with the terms and conditions of the written instrument authorizing the use of thermal water, an approved thermal water management plan, and with the provisions of this section.

(3) *Prohibited acts.* The following acts are prohibited and may result in the revocation or suspension of a written authorization to use thermal water:

(i) Failure to comply with terms and conditions of a written instrument authorizing the use of thermal water.

(ii) Failure to comply with any provision of an approved thermal water management plan.

(iii) Failure to make any payment required under this section.

(iv) Failure to operate a pool or spa without appropriate certification, as determined by the NPS Office of Public Health.

(v) Failure by bathhouses to ensure and maintain employee licenses and certifications where required by Federal or State law.

(vi) Failure to comply with any provision of this paragraph (b) of § 7.18, which also may result in applicable penalties under § 1.3 of this chapter.

(4) *Rates and cost recovery.* (i) Rates charged for thermal water will be specified in the written instrument authorizing the use of thermal water.

(ii) Rates charged for thermal water that will be used for bathing will be the same for all bathhouses. Rates charged for thermal water that will not be used for bathing will be determined by the Superintendent for each bathhouse.

(iii) Bathhouses referred to in paragraph (b)(2)(iii)(C) must pay all costs associated with connections for obtaining such thermal water.

(iv) Written instruments authorizing the use of the thermal water may require bathhouses to reimburse the NPS for costs incurred from the distribution of thermal water and maintenance of the distribution system.

(v) The NPS will readjust the terms and amounts of payments required under a written instrument authorizing the use of thermal water at least every five years during its term and upon the renewal of a written instrument at end of its term.

Part 21 [Removed]

■ 3. Remove part 21, consisting of §§ 21.1 through 21.12.

Shannon Estenoz,

Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 2024–27571 Filed 11–26–24; 8:45 am]

BILLING CODE 4312–52–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 147

[EPA–HQ–OW–2024–0357; FRL 12000–01–OW]

West Virginia Underground Injection Control (UIC) Program; Class VI Primacy

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The U.S. Environmental Protection Agency (EPA or the Agency) has received a complete Underground Injection Control (UIC) program revision package from the State of West Virginia (State), requesting approval of a revision to the State's Safe Drinking Water Act (SDWA) section 1422 UIC program to include Class VI injection well primary enforcement responsibility (primacy). The proposed revision would allow the West Virginia Department of Environmental Protection (WVDEP) to issue UIC permits for geologic carbon sequestration facilities as Class VI wells and ensure compliance of Class VI wells under the UIC program. The EPA proposes to issue a final rule approving West Virginia's application to implement the UIC program for Class VI injection wells located within the State, except those on Indian lands. The EPA proposes amendments to reflect this proposed approval of West Virginia's Class VI primacy application.

DATES: Comments must be received on or before December 30, 2024. *Public hearing:* The EPA will hold a public hearing on December 30, 2024. Please refer to the **SUPPLEMENTARY INFORMATION** section for additional information on the public hearing.

ADDRESSES: You may send comments, identified by Docket ID No. EPA–HQ–OW–2024–0357 by any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov/* (our preferred method). Follow the online instructions for submitting comments.
- *Mail:* U.S. Environmental Protection Agency, EPA Docket Center, Water Docket, Mail Code 28221T, 1200 Pennsylvania Avenue NW, Washington, DC 20460.
- *Hand Delivery or Courier:* EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Avenue NW, Washington, DC 20004. The Docket Center's hours of operations are 8:30 a.m. to 4:30 p.m., Monday–Friday (except Federal Holidays).

Instructions: All submissions received must include the Docket ID No. for this rulemaking. Comments received may be posted without change to *https://www.regulations.gov/,* including personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the ''Public Participation'' heading of the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Colin Dyroff, Drinking Water Infrastructure Development Division, Office of Ground Water and Drinking Water (4606M), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564–3149; or Himanshu Vyas, Water Division, Source Water & UIC Section (3WD22), Environmental Protection Agency, Region 3, Four Penn Center, 1600 JFK Boulevard, Philadelphia, PA 19103; telephone number: (215) 814–2112. Both can be reached by emailing *WVClassVI@epa.gov.*

A. Written Comments

Submit your comments, identified by Docket ID No. EPA–HQ–OW–2024–0357, at *https://www.regulations.gov* (our preferred method), or the other methods identified in the **ADDRESSES** section. Once submitted, comments cannot be edited or removed from the docket. The EPA may publish any comment received to its public docket. Do not submit to the EPA's docket at *https://www.regulations.gov* any information you consider to be Confidential Business Information (CBI), Proprietary Business Information (PBI), or other information whose disclosure is restricted by statute. If you need to submit CBI, contact Himanshu Vyas with the contact information available in the **FOR FURTHER INFORMATION CONTACT** section. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary

submission (*i.e.,* on the web, cloud, or other file sharing system). Please visit *https://www.epa.gov/dockets/commenting-epa-dockets* for additional submission methods; the full EPA public comment policy; information about CBI, PBI, or multimedia submissions; and general guidance on making effective comments.

B. Participation in Public Hearing

A public hearing is anticipated to be held on December 30, 2024. The EPA expects to announce the location, time of the hearing, as well as any updates made to any aspect of the hearing online at *https://www.epa.gov/aboutepa/epa-region-3-mid-atlantic#pn.* The hearing can also be attended virtually at *https://www.zoomgov.com/j/1600637199.* While the EPA expects the hearing to go forward as set forth above, please monitor our website or contact Himanshu Vyas at (215) 814–2112 or *WVClassVI@epa.gov* to determine if there are any updates or for additional information regarding the public hearing. The EPA does not intend to publish a document in the **Federal Register** announcing updates.

The EPA will begin pre-registering speakers for the hearing upon publication of this document in the **Federal Register**. To register to speak at the hearing, please contact Himanshu Vyas at (215) 814–2112 or *WVClassVI@epa.gov* and indicate whether you will be attending in-person or virtually. The last day to pre-register to speak at the hearing will be December 23, 2024. Prior to the hearing, the EPA will post a general agenda for the hearing that will list pre-registered speakers in approximate order at: *https://www.epa.gov/aboutepa/epa-region-3-mid-atlantic#pn.*

The EPA will make every effort to follow the schedule as closely as possible on the day of the hearing; however, please plan for the hearings to run either ahead of schedule or behind schedule. Additionally, requests to speak will be taken the day of the hearing at the hearing registration desk. The EPA will make every effort to accommodate all speakers who arrive and register, although preferences on speaking times may not be able to be fulfilled.

The EPA encourages commenters to provide the EPA with a copy of their oral testimony electronically by emailing it to *WVClassVI@epa.gov.* The EPA also recommends submitting the text of your oral comments as written comments to the rulemaking docket.

The EPA may ask clarifying questions during the oral presentations but will not respond to the presentations at that time. Written statements and supporting information submitted during the comment period will be considered with the same weight as oral comments and supporting information presented at the public hearing.

The EPA will not provide audiovisual equipment for presentations unless we receive special requests in advance. Commenters should notify Himanshu Vyas when they pre-register to speak that they will need specific equipment. If you require the services of an interpreter or special accommodations such as audio description, please pre-register for the hearing with Himanshu Vyas and describe your needs by December 23, 2024. The EPA may not be able to arrange accommodations without advance notice.

C. Public Participation Activities Conducted by West Virginia

On June 23, 2021, the WVDEP posted a notice of public comment period on their website for an action to revise West Virginia Code of State Rules 47CSR13 to add new regulations for Class VI wells and to update the State's existing Class I–V regulations. The WVDEP held a public comment period from June 23, 2021 to July 23, 2021 and held a virtual public hearing on July 23, 2021. The WVDEP received 55 comments, 19 of which commented on Class VI wells. These comments did not result in changes to the proposed regulatory revisions. The effective date for this rule revision was March 9, 2022.

Then, on June 12, 2023, the WVDEP posted a notice of public comment period on their website for another action to make additional updates to the State's Class I–VI regulations in 47CSR13 of the West Virginia Code of State Rules. The WVDEP held a public comment period from June 12, 2023 to July 18, 2023 and held a public hearing on July 18, 2023 in Charleston, WV. The WVDEP received five comments, all of which related to Class VI wells. These comments did not result in changes to the proposed updates to the regulations. The effective date for this rule revision was April 5, 2024.

Commenters on the WVDEP's proposed rulemakings shared concerns on various topics including applicant financial burden, fees, the area of review radius, post-injection site care, and seismic activity reviews. Commenters also expressed concern about whether the WVDEP has adequate staffing and technical expertise to properly manage a UIC Class VI program. Environmental justice (EJ) also appeared to be a major concern, with commenters asking about how EJ protections will be integrated into the program. The WVDEP responded to all public comments, provided various clarifications, and confirmed to commenters that EJ will be an important part of the agency's Class VI program. The WVDEP also added that the agency's Class VI team would be composed of technical specialists with expertise in geology, well construction, and UIC inspections. Additionally, the WVDEP stated that the rule revisions were adopted to be consistent with Federal requirements and that the agency's primary objective is to protect underground sources of drinking water, groundwater, and surface water. Documentation of West Virginia's public participation activities, including comments received and responses by the WVDEP, can be found in the EPA's Docket ID No. EPA–HQ–OW–2024–0357.

II. Introduction

A. UIC Program and Primary Enforcement Authority (Primacy)

The SDWA protects public health by regulating the nation's public drinking water supply, including both surface and groundwater sources. The SDWA requires the EPA to develop minimum requirements for effective State and Tribal UIC programs to prevent underground injection of fluids (such as water, wastewater, brines from oil and gas production, and carbon dioxide) from endangering underground sources of drinking water (USDWs). In general, USDWs are aquifers or parts of aquifers that supply a public water system or contain enough groundwater to supply a public water system. See 40 CFR 144.3.

The UIC program regulates various aspects of an injection well project. These include technical aspects throughout the lifetime of the project from site characterization, construction, operation, and testing and monitoring through site closure, as well as permitting, site inspections, and reporting to ensure well owners and operators comply with UIC regulations.

SDWA section 1421 directs the EPA to establish requirements that States, territories, and federally recognized Tribes (hereafter referred to as applicants) must meet to be granted primary enforcement responsibility or ''primacy'' for implementing a UIC program, including a Class VI program. An applicant seeking primacy under SDWA section 1422 for a Class VI program must demonstrate to the EPA that the applicant's Class VI program meets the Federal requirements and is protective of USDWs. An applicant agency must also demonstrate jurisdiction over underground injection

and the administrative, civil, and criminal enforcement authorities required by EPA regulation. After the EPA approves a State for UIC primacy, the State's UIC program may be revised with EPA approval. See 40 CFR 145.32. When a State that already has primacy under SDWA section 1422 seeks to add Class VI primacy to its existing program, a subsequent primacy application and review process takes the form of a program revision.

The EPA conducts a comprehensive technical and legal evaluation of each primacy application to assess and confirm that the proposed program meets Federal regulations and to evaluate the effectiveness of the State's proposed program. The EPA likewise conducts a comprehensive evaluation of a proposed revision to an existing UIC program, particularly a revision as substantial as adding Class VI primacy.

B. Class VI Wells Under the UIC Program

Class VI wells are used to inject carbon dioxide into deep rock formations for the purpose of long-term underground storage, also known as geologic sequestration. The geologic sequestration of carbon dioxide in UIC Class VI wells is used in carbon capture and storage to prevent carbon dioxide emissions from industrial sources from reaching the atmosphere. Class VI injection wells are regulated under an existing, rigorous SDWA permitting framework that protects USDWs.

The UIC Class VI program provides multiple safeguards that work together to protect USDWs and human health. Owners or operators that wish to inject carbon dioxide underground for the purpose of geologic sequestration must demonstrate that their injection well and injection activities will meet all regulatory requirements and receive a Class VI permit for each well. The UIC Class VI program requires applicants to meet strict technical, financial, and managerial requirements to obtain a Class VI permit, including:

- Site characterization to ensure the geology in the project area will contain the carbon dioxide within the zone where it will be injected.
- Modeling to delineate the predicted area influenced by injection activities through the lifetime of operation.
- Evaluation of the delineated area to ensure all potential pathways for fluid movement have been identified and addressed through corrective action.
- Well construction requirements that ensure the Class VI injection well will not leak carbon dioxide.
- Testing and monitoring throughout the life of the project, including after carbon dioxide injection has ended. Requirements include, for example, testing to ensure physical integrity of the well, monitoring for seismic activity near the injection site, monitoring of injection pressure and flow, chemical analysis of the carbon dioxide stream that is being injected, and monitoring the extent of the injected carbon dioxide plume and the surrounding area (*e.g.,* ground water) to ensure the carbon dioxide is contained as predicted.
- Operating requirements (for example, injection pressure limitations) to ensure the injection activity will not endanger USDWs or human health.
- Financial assurance mechanisms sufficient to cover the costs for all phases of the geologic sequestration project including the post-injection site care period and until site closure has been approved by the permitting authority.
- Emergency and remedial response plans.
- Reporting of all testing and monitoring results to the permitting authority to ensure the well is operating in compliance with all permit and regulatory requirements.

The permitting authority ensures that these protective requirements are included in each Class VI permit. A draft of each Class VI permit is made available to the public for comment before the decision is made whether to issue a final permit.

C. West Virginia UIC Program

The State of West Virginia received primacy for Class I, III, IV, and V injection wells under SDWA section 1422 and Class II injection wells under SDWA section 1425 on December 9, 1983 (48 FR 55127). On May 1, 2024, West Virginia applied to the EPA under section 1422 of SDWA, 42 U.S.C. 300h–1, for primacy for Class VI injection wells located within the State, except those located on Indian lands.

III. Legal Authorities

This regulation is proposed under authority of SDWA sections 1422 and 1450, 42 U.S.C. 300h–1 and 300j–9.

Section 1421 of SDWA requires the Administrator of the EPA to promulgate Federal requirements for effective State UIC programs to prevent underground injection activities that endanger USDWs. Section 1422 of SDWA establishes requirements for States and Tribes seeking EPA approval of their UIC programs. It also requires that States and Tribes seeking approval demonstrate how the applicant (after public notice) will implement a UIC program which meets the requirements that the EPA promulgated under section 1421.

For States and Tribes that seek approval for UIC programs under section 1422 of SDWA and those seeking EPA approval of revisions to existing State and Tribal UIC programs, the EPA has promulgated regulations setting forth the applicable procedures and substantive requirements codified in 40 CFR parts 144, 145 and 146. 40 CFR part 144 outlines general program requirements that each State must meet to obtain primary enforcement authority. 40 CFR part 145 specifies the procedures the EPA will follow in approving, revising, and withdrawing State programs and outlines the elements and provisions that a State must include in its application for primacy. 40 CFR part 145 also includes requirements for State permitting programs (by reference to certain provisions of 40 CFR parts 124 and 144), compliance evaluation programs, enforcement authority, and sharing of information between the EPA and the State. 40 CFR part 146 contains the technical criteria and standards applicable to each well class, including Class VI wells.

IV. The EPA's Evaluation of West Virginia's Program Revision Application

A. Background

On May 1, 2024, West Virginia submitted to the EPA a program revision application to add Class VI wells to the State's SDWA section 1422 UIC program. The UIC program revision package from West Virginia includes a description of the State's UIC Class VI program, copies of all applicable rules and forms, a statement of legal authority, a summary and results of West Virginia's public participation activities, an amended addendum to the existing Memorandum of Agreement (MOA) between West Virginia and the EPA's Region 3 office, an interagency MOA between the WVDEP and the West Virginia Geologic and Economic Survey (WVGES), and an interagency MOA between the WVDEP and the West Virginia Department of Health. The EPA reviewed the application for completeness and performed a technical evaluation of the application materials.

B. Environmental Justice in Class VI Permitting

People across the country have shared with the EPA concerns that already environmentally overburdened communities may bear a disproportionate environmental burden associated with geologic sequestration.

Executive Order 12898 (59 FR 7629, February 16, 1994) and Executive Order 14096 (88 FR 25251, April 21, 2023) direct Federal agencies, to the greatest extent practicable and permitted by law, to identify and address, as appropriate, disproportionate and adverse human health or environmental impacts on communities with EJ concerns. On August 17, 2023, the EPA released a guidance document titled *Environmental Justice Guidance for UIC Class VI Permitting and Primacy.* This guidance outlines expectations for the EPA to incorporate EJ considerations into Class VI activities. It is organized into five themes that address various aspects of EJ in UIC Class VI permitting, and strongly encourages States, Tribes, and Territories to implement their Class VI programs in a similar fashion.

As part of developing this proposal, the EPA worked with the State of West Virginia to adopt the EJ approaches encouraged in the August 17, 2023 guidance document, which West Virginia has incorporated in its primacy application. The EPA reviewed West Virginia's EJ approach as described in the State's Class VI program description and amended MOA addendum and compared it to the EJ themes and actions in the guidance document. The EJ approach in the amended MOA addendum corresponds to the five themes in the EPA's August 17, 2023 guidance document, which include identifying communities with potential EJ concerns, implementing an augmented public participation process, conducting additional assessments for projects identified as having EJ concerns, ensuring the permitting process is transparent, and minimizing adverse effects to underground sources of drinking water and the communities they may serve. Furthermore, West Virginia's Class VI program description specifies that the WVDEP will require well owners or operators to conduct an EJ review as part of the Class VI permit application process. The EPA supports the WVDEP's agreement in its Class VI program description to evaluate project sites using the EPA's EJ Screen and to take additional steps if this initial screening identifies the presence of an EJ community or other risk factors in the area of review (AOR). West Virginia's Class VI program, as described in the WVDEP's primacy application, includes approaches to ensure equity and EJ will be appropriately considered in permit reviews, and in the WVDEP's UIC Class VI program as a whole.

C. Summary of the EPA's Comprehensive Evaluation

The EPA conducted a comprehensive technical and legal evaluation of West Virginia's Class VI primacy application to assess and confirm that the State's UIC Class VI program is as stringent as the Federal regulations and evaluated the effectiveness of the State's Class VI program. To be approved for Class VI primacy under SDWA section 1422, a State or Tribe must have a UIC program that meets Federal requirements (40 CFR parts 124, 144, 145, and 146). The EPA evaluated West Virginia's Class VI UIC statutes and regulations against these Federal requirements. The EPA worked with West Virginia to address any stringency issues with their Class VI statutes and regulations prior to submittal of the Class VI primacy application. The Agency also evaluated for stringency and effectiveness West Virginia's Class VI program description, the Class VI Attorney General's statement, the amended Class VI addendum to the MOA between the EPA and West Virginia, the interagency MOA between the WVDEP and the West Virginia Geologic and Economic Survey, and the interagency MOA between the WVDEP and the West Virginia Department of Health.

The EPA evaluated West Virginia's Class VI program description against 40 CFR 145.23, which lists all the information to be submitted as part of the program description. The EPA's evaluation of the Class VI program description included reviewing the scope, structure, coverage, processes, and organizational structure of the permitting authority. The EPA evaluated the WVDEP's permitting, administrative, and judicial review procedures, as well as the State's permit application, reporting, and manifest forms. The EPA also reviewed the State's compliance evaluation and enforcement mechanisms. The EPA evaluated the WVDEP's proposed schedule for issuing Class VI permits within the first two years after program approval. The EPA required West Virginia to demonstrate that the State's Class VI program will have adequate in-house staff or access to contractor support for technical areas including site characterization, modeling, well construction and testing, financial responsibility, and regulatory and risk analysis.

The EPA evaluated West Virginia's Class VI Attorney General's statement against 40 CFR 145.24 to ensure it met Federal requirements. The Attorney General's statement is required to ensure that a State's top legal officer affirms that State statutes, regulations, and judicial decisions demonstrate adequate authority to administer the UIC program as described in the Class VI program description and consistent with the EPA's regulatory requirements for UIC programs. The EPA independently evaluates and confirms that the Attorney General's statement certifies that the State either does not have environmental audit privilege and/or immunity laws, or, if there are environmental audit privilege and/or immunity laws, that they will not affect the ability of the State to meet the enforcement and information gathering requirements under the SDWA.

The EPA evaluated West Virginia's amended Class VI MOA addendum against 40 CFR 145.25 to ensure it met Federal requirements. The MOA is the central agreement setting the provisions and arrangements between the State and the EPA concerning the administration, implementation, and enforcement of the State UIC program. The EPA's evaluation includes ensuring that the MOA contains the necessary provisions pertaining to agreements on coordination, permitting, compliance monitoring, enforcement, and EPA oversight. For example, the amended MOA addendum specifies that the WVDEP and the EPA agree to maintain a high level of cooperation and coordination to assure successful and efficient administration of the UIC Class VI program.

The EPA reviewed the WVDEP's interagency MOA with the West Virginia Geological and Economic Survey. The WVGES is a West Virginia agency with expertise to provide information to the WVDEP on local geologic characteristics in relation to proposed underground injection operations. The interagency MOA between the WVDEP and the WVGES establishes a coordinated relationship between the two state agencies to properly assess geological characteristics in a proposed work area to support permit determinations. The EPA also reviewed the WVDEP's interagency MOA with the West Virginia Department of Health (WVDOH). Under this interagency MOA, the WVDOH will conduct a review of the proposed area of work and permit application details and provide input to assist in permit determinations, among other provisions.

The EPA is aware that stakeholders have raised concern about geologic sequestration long term liability transfer provisions enacted in West Virginia and other States. The EPA reviewed the West Virginia statutory provision relating to long-term liability transfer

(W. Va. Code § 22–11B–12) and determined that it does not undermine any protections under the Safe Drinking Water Act. Under the West Virginia long-term liability transfer provision, all Class VI regulatory and permit requirements must be met before liability transfer may occur.[1] Consistent with EPA regulations, West Virginia imposes extensive post-injection monitoring—a default of 50 years—and site closure requirements at the end of a Class VI well's life cycle to ensure that there will be no danger to USDWs. Only after all those requirements are met does West Virginia's long-term liability transfer provision allow a limited transfer of any future liability to a state-administered and industry-funded trust fund. Among other additional limitations, the provision is explicit that it does not: relieve any owner or operator from any liability that arises from noncompliance with UIC laws, regulations or permits; apply if the WVDEP determines that there is fluid migration for which the operator is responsible that threatens imminent and substantial endangerment to a USDW; or interfere with the EPA's emergency authority under SDWA section 1431.

West Virginia has demonstrated that it has the legal authority to implement all permit requirements found in 40 CFR 145.11 for Class VI permits. West Virginia's UIC Class VI permitting provisions are as stringent as the EPA's regulations in 40 CFR parts 124 and 144. The State has incorporated necessary procedures, pursuant to 40 CFR 145.12 to support a robust Class VI compliance evaluation program. Additionally, West Virginia has the necessary administrative, civil, and criminal enforcement authorities pursuant to 40 CFR 145.13. West Virginia's Class VI regulations regarding permitting, inspection, operation, and monitoring meet Federal requirements found in 40 CFR parts 145 and 146. West Virginia's reporting and recordkeeping requirements meet Federal requirements found in 40 CFR 144.54 and 146.91 for Class VI wells.

As a result of this comprehensive review, the EPA is proposing to approve West Virginia's application because the EPA has determined that the application meets all applicable requirements for approval under SDWA section 1422 and the State is capable of administering a UIC Class VI program in a manner consistent with the terms and purposes of SDWA and all applicable UIC regulations.

V. The EPA's Proposed Action

A. Incorporation by Reference

The EPA is proposing to approve a revision to the State of West Virginia's UIC program for primacy for regulating Class VI injection wells in the State, except for those located on Indian lands. West Virginia's statutes and regulations that are proposed to be incorporated by reference are publicly available in the EPA's Docket No. EPA–HQ–OW–2024–0357. If finalized, this action would amend 40 CFR 147.2450 and incorporate by reference EPA-approved State statutes and regulations that contain standards, requirements, and procedures applicable to Class VI owners or operators. Any provisions incorporated by reference, as well as all permit conditions or permit denials issued pursuant to such provisions, are enforceable by the EPA pursuant to section 1423 of SDWA and 40 CFR 147.1(e). The EPA will continue to administer the UIC program for Class I, II, III, IV, V, and VI injection wells on Indian lands.

The EPA proposes to incorporate by reference the West Virginia statutes and regulations applicable to owners or operators of Class VI wells as a compilation titled ''EPA-approved West Virginia SDWA section 1422 Underground Injection Control Program Statutes and Regulations for Well Class VI,'' dated [date when the EPA compiles the notebook]. This compilation would be incorporated by reference into 40 CFR 147.2450 and is available at *www.regulations.gov* in the docket for this proposed rulemaking. The EPA also proposes to codify a table in 40 CFR 147.2450 listing the EPA-approved West Virginia Statutes and Regulations for Well Class VI included in the compilation that EPA would incorporate by reference. While the regulations in 47CSR13 contain requirements for all UIC well classes (*i.e.,* Class I–VI), only the requirements applicable to owners or operators of Class VI wells would be incorporated by reference as part of this action.

Upon approval, the EPA would oversee West Virginia's administration of its Class VI program and will continue to oversee West Virginia's administration of its programs for Class I, II, III, IV, and V wells. The EPA will require quarterly reports on non-compliance and annual UIC performance reports pursuant to 40 CFR 144.8. The amended MOA addendum between the EPA and West Virginia, signed by the Regional Administrator on October 9, 2024, articulates that the EPA will oversee the State's administration of the UIC Class VI program on a continuing basis to assure that such administration is consistent with the program MOAs, UIC grant agreements, and all applicable requirements embodied in current regulations and Federal law. In addition, the amended MOA addendum provides that the EPA may request specific information including permits and the accompanying EJ reviews.

B. Class I–V Codification—No Action

As referenced in section II.C of this preamble, the EPA approved West Virginia for Class I–V primacy in 1983. After notice and public comment, the EPA determined that West Virginia's UIC program met Federal requirements and published its decision to approve West Virginia's UIC program in the **Federal Register** (48 FR 55127, December 9, 1983). The Code of Federal Regulations (CFR) sets forth the applicable UIC program for each State (40 CFR 147.1) and, upon approving a State for UIC primacy, the EPA typically updates the CFR to reflect its approval. However, for reasons that current EPA staff were unable to ascertain, when the EPA approved West Virginia's UIC program in 1983, the CFR was not revised to reflect the EPA's approval, and the CFR currently does not reflect West Virginia's Class I–V primacy. While the EPA is not addressing this CFR discrepancy as part of this proposed action, the EPA expects to address it later as part of a separate action. The current proposal is confined to approving a revision to West Virginia's existing UIC primacy program to grant the State primacy over Class VI wells; it is not addressing other well classes.[2] Separately, the EPA is working with West Virginia to assess the State's current Class I–V program elements and expects to codify in the CFR the State's Class I–V program in 2025 as part of a separate action. An email from the WVDEP affirming the State's intention to submit a Class I–V program revision package in 2025 following the Class VI process can be found in the docket for this proposed rulemaking.

VI. Statutory and Executive Orders Reviews

Additional information about these statutes and Executive orders can be found at: *https://www.epa.gov/laws-regulations/laws-and-executive-orders.*

[1] Such requirements include the post closure deed notation and record retention requirements at 40 CFR 146.93 and 47CSR13.13.9, as specifically mentioned in the Class VI MOA amended addendum.

[2] Even if this proposed action were not a revision to an existing UIC program, the UIC regulations at 40 CFR 145.1(i) allow States to apply for primary enforcement responsibility for Class VI wells independently of other injection well classes.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 14094: Modernizing Regulatory Review

This proposed action is exempt from review under Executive Order 12866, as amended by Executive Order 14094, because the Office of Management and Budget (OMB) has exempted, as a category, the approval of State UIC programs.

B. Paperwork Reduction Act (PRA)

This proposed action will not impose any new information collection burden under the PRA. OMB has previously approved the information collection activities contained in the existing regulations and has assigned OMB control number 2040–0042. Reporting or recordkeeping requirements will be based on West Virginia's Class VI UIC Regulations, and the State of West Virginia is not subject to the PRA.

C. Regulatory Flexibility Act (RFA)

I certify that this proposed action will not have a significant economic impact on a substantial number of small entities under the RFA. This proposed action would not impose any new requirements on small entities. It simply approves and codifies West Virginia's UIC Class VI program, which meets the same standard under SDWA section 1422 as is required for the EPA's regulations governing its direct implementation of a UIC Class VI program.

D. Unfunded Mandates Reform Act (UMRA)

This proposed action does not contain an unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The proposed action imposes no enforceable duty on any state, local, or Tribal governments or the private sector. The EPA's proposed approval of West Virginia's Class VI program will not constitute a Federal mandate because there is no requirement that a state establish UIC regulatory programs and because the program is a state, rather than a Federal program.

E. Executive Order 13132: Federalism

This proposed action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This proposed action does not have Tribal implications as specified in Executive Order 13175. This proposed action contains no Federal mandates for Tribal governments and does not impose any enforceable duties on Tribal governments. Thus, Executive Order 13175 does not apply to this proposed action.

G. Executive Order 13045: Protection of Children From Environmental Health and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of ''covered regulatory action'' in section 2–202 of the Executive Order. This proposed action is not subject to Executive Order 13045 because it approves a state program.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This proposed action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

This proposed rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations and Executive Order 14096: Revitalizing Our Nation's Commitment to Environmental Justice for All

The EPA believes that it is not practicable to assess whether the human health or environmental conditions that exist prior to this proposed action result in disproportionate and adverse effects on communities with environmental justice concerns. There currently are no Class VI wells permitted in West Virginia and this proposed action would be a procedural action. The EPA has reviewed West Virginia's proposed approach to environmental justice, as outlined in the Class VI Program Description and Class VI MOA amended addendum, and described in section IV.B of this preamble. The EPA considers West Virginia's Class VI primacy application to integrate environmental justice and equity considerations into the State's UIC Class VI program, while ensuring protection of USDWs. This proposed action would provide West Virginia with primacy under SDWA section 1422 for a UIC Class VI program, pursuant to which West Virginia would implement a program that meets the EPA's requirements for UIC Class VI programs.

Environmental protection, Incorporation by reference, Indian lands, Intergovernmental relations, Reporting and recordkeeping requirements, Water supply.

Michael S. Regan,
Administrator.

For the reasons set forth in the preamble, the EPA proposes to amend 40 CFR part 147 as follows:

PART 147—STATE, TRIBAL, AND EPA–ADMINISTERED UNDERGROUND INJECTION CONTROL PROGRAMS

■ 1. The authority citation for part 147 continues to read as follows:

Authority: 42 U.S.C. 300f *et seq.;* and 42 U.S.C. 6901 *et seq.*

■ 2. Add § 147.2450 to read as follows:

§ 147.2450 State-administered program—Class VI Wells

The UIC program for Class VI wells in the State of West Virginia, except those on Indian lands, is the program administered by the West Virginia Department of Environmental Protection, approved by the EPA pursuant to SDWA section 1422. The effective date of this program is [DATE 30 DAYS AFTER FINAL RULE PUBLICATION IN THE **FEDERAL REGISTER**]. The UIC program for Class VI wells in the State of West Virginia, except those located on Indian lands, consists of the following elements, as submitted to the EPA in the State's program revision application.

(a) *Incorporation by reference.* The requirements applicable to owners or operators of Class VI wells set forth in the State statutes and regulations approved by the EPA for including in ''EPA-approved West Virginia SDWA § 1422 Underground Injection Control Program Statutes and Regulations for Well Class VI,'' dated [date when the EPA compiles the notebook], and listed in table 1 to this paragraph (a), are hereby incorporated by reference and made a part of the applicable UIC program under the SDWA for the State of West Virginia. The Director of the Federal Register approves this incorporation by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of the State of West Virginia's statutes and regulations that are incorporated by reference may be inspected at the U.S. Environmental Protection Agency, Region 3, Four Penn Center, 1600 JFK Blvd., Philadelphia, PA 19103 and the U.S. Environmental Protection Agency, Water Docket, EPA Docket Center (EPA/DC), EPA WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC 20004. If you wish to obtain materials from the EPA Regional Office, please call (215) 814–2816, or from the EPA Headquarters Library, please call the Water Docket at (202) 566–2426. You may also view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations.html* or email *fr.inspections@nara.gov.* You may also obtain the State of West Virginia's statutes and regulations that are incorporated by reference from: Room MB–27, Building 1, State Capitol Complex, Charleston, West Virginia 25305; phone: (304) 347–4836; website: *www.wvlegislature.gov.*

BILLING CODE 6560–50–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Inspector General

42 CFR Part 1001

Solicitation of Proposals for New and Modified Safe Harbors and Special Fraud Alerts

AGENCY: Office of Inspector General (OIG), Department of Health and Human Services (HHS or the Department).

ACTION: Notification of intent to develop regulations.

SUMMARY: In accordance with section 205 of the Health Insurance Portability and Accountability Act of 1996 (HIPAA), this annual notification solicits proposals and recommendations for developing new, or modifying existing, safe harbor provisions under section 1128B(b) of the Social Security Act (the Act), the Federal anti-kickback statute, as well as developing new OIG Special Fraud Alerts.

DATES: To ensure consideration, public comments must be received no later than 5 p.m. on January 27, 2025.

ADDRESSES: You may submit comments electronically at *https://www.regulations.gov.* Follow the ''Submit a comment'' instructions and refer to file code OIG–1124–N.

For information on viewing public comments, please see the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Benjamin Wallfisch, (202) 339–7980.

SUPPLEMENTARY INFORMATION: Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following website as soon as possible after they have been received: *https://www.regulations.gov.*

I. Background

A. OIG Safe Harbor Provisions

Section 1128B(b) of the Act (42 U.S.C. 1320a–7b(b)), the Federal anti-kickback statute, provides for criminal penalties for whoever knowingly and willfully offers, pays, solicits, or receives remuneration to induce or reward, among other things, referrals for or purchases of items or services reimbursable under any of the Federal health care programs, as defined in section 1128B(f) of the Act (42 U.S.C. 1320a–7b(f)). The offense is classified as a felony and is punishable by a fine of up to $100,000 and imprisonment for up to 10 years. Violations of the Federal anti-kickback statute also may result in the imposition of civil monetary penalties under section 1128A(a)(7) of the Act (42 U.S.C. 1320a–7a(a)(7)), program exclusion under section 1128(b)(7) of the Act (42 U.S.C. 1320a–7(b)(7)), and liability under the False Claims Act (31 U.S.C. 3729–33).

Because of the broad reach of the statute, stakeholders expressed concern that some relatively innocuous business arrangements were covered by the statute and, therefore, potentially subject to criminal prosecution. In response, Congress enacted section 14 of the Medicare and Medicaid Patient and Program Protection Act of 1987, Public Law 100–93 (note to section 1128B of the Act; 42 U.S.C. 1320a–7b), which requires the development and promulgation of regulations, the so-called safe harbor provisions, that would specify various payment and business practices that would not be subject to sanctions under the Federal anti-kickback statute, even though they potentially may be capable of inducing referrals of business for which payment may be made under a Federal health care program. Since July 29, 1991, there has been a series of final regulations published in the **Federal Register** establishing safe harbors to protect various payment and business practices.[1] These safe harbor provisions have been developed ''to limit the reach of the statute somewhat by permitting certain non-abusive arrangements, while encouraging beneficial and innocuous arrangements.'' [2] Health care providers and others may voluntarily seek to comply with the conditions of an applicable safe harbor so that they have the assurance that their payment or business practice will not be subject to sanctions under the Federal anti-kickback statute. The safe harbor regulations promulgated by OIG are found at 42 CFR part 1001.

B. OIG Special Fraud Alerts

OIG periodically issues Special Fraud Alerts to give continuing guidance to health care industry stakeholders about practices that OIG considers to be suspect or of particular concern.[3] Special Fraud Alerts encourage industry compliance by giving stakeholders guidance that can be applied to their own practices. OIG Special Fraud Alerts are published in the **Federal Register**, on OIG's website, or both, and are intended for extensive distribution.

In developing Special Fraud Alerts, OIG relies on several sources and consults directly with experts in the subject field, including those within OIG, other agencies of HHS, other Federal and State agencies, and those in the health care industry.

C. Section 205 of the Health Insurance Portability and Accountability Act of 1996

Section 205 of HIPAA, Public Law 104–191, and section 1128D of the Act (42 U.S.C. 1320a–7d), requires the Department to develop and publish an annual notification in the **Federal Register** formally soliciting proposals for developing additional or modifying existing safe harbors to the Federal anti-kickback statute and for issuing Special Fraud Alerts.

In developing or modifying safe harbors under the Federal anti-kickback statute, and in consultation with the Department of Justice, OIG thoroughly reviews the range of factual circumstances that may receive protection by the proposed or modified safe harbor. In doing so, OIG seeks to identify and develop safe harbors that protect beneficial and innocuous arrangements and safeguard Federal health care programs and their beneficiaries from the harms caused by fraud and abuse.

II. Solicitation of New and Modified Safe Harbor Recommendations and Special Fraud Alert Proposals

OIG seeks recommendations regarding the development of additional or modified safe harbor regulations and the issuance of new Special Fraud Alerts. A detailed explanation of justifications for, or empirical data supporting, a suggestion for a new or modified safe harbor or for the issuance of a new Special Fraud Alert would be helpful

[1] *See, e.g.,* Medicare and State Health Care Programs: Fraud and Abuse; Revisions to Safe Harbors Under the Anti-Kickback Statute, and Civil Monetary Penalty Rules Regarding Beneficiary Inducements, 85 FR 77684 (Dec. 2, 2020).

[2] Medicare and State Health Care Programs: Fraud and Abuse; OIG Anti-Kickback Provisions, 56 FR 35952, 35958 (July 29, 1991).

[3] *See, e.g.,* Special Fraud Alert: OIG Alerts Practitioners To Exercise Caution When Entering Into Arrangements With Purported Telemedicine Companies (July 20, 2022), *https://oig.hhs.gov/documents/root/1045/sfa-telefraud.pdf.*

and should, if possible, be included in any response to this solicitation.

A. Criteria for Modifying and Establishing Safe Harbor Provisions

In accordance with section 205 of HIPAA, we will consider various factors in reviewing proposals for additional or modified safe harbor provisions, such as the extent to which the proposals may result in an increase or decrease in:

- access to health care services,
- the quality of health care services,
- patient freedom of choice among health care providers,
- competition among health care providers,
- the cost to Federal health care programs,
- the potential overutilization of health care services, and
- the ability of health care facilities to provide services in medically underserved areas or to medically underserved populations.

In addition, we will consider other factors including, for example, the existence (or nonexistence) of any potential financial benefit to health care professionals or providers that may influence their decision whether to: (1) order a health care item or service or (2) arrange for a referral of health care items or services to a particular practitioner or provider.

B. Criteria for Developing Special Fraud Alerts

In determining whether to issue additional Special Fraud Alerts, we will consider whether and to what extent the practices that would be identified in a new Special Fraud Alert may result in any of the consequences set forth above, as well as the volume and frequency of the conduct that would be identified in the Special Fraud Alert.

Christi A. Grimm,

Inspector General.

Notices

Federal Register
Vol. 89, No. 229
Wednesday, November 27, 2024

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Notice of Public Meeting of the Assembly of the Administrative Conference of the United States

AGENCY: Administrative Conference of the United States

ACTION: Notice.

SUMMARY: The Assembly of the Administrative Conference of the United States (ACUS) will meet during a one-day hybrid plenary session to consider three proposed recommendations and to conduct other business. Written comments may be submitted in advance, and the meeting will be accessible to the public.

DATES: The meeting will take place on Thursday, December 12, 2024, from 9:30 a.m.–4 p.m. ET. The meeting may adjourn early if all business is concluded prior to the stated end time.

ADDRESSES: For those attending in person, the meeting will be held at The U.S. Small Business Administration Eisenhower Conference Room, 409 Third Street SW, Washington, DC 20416. There will be a virtual attendance option. Information on how the public can access the meeting will be available on the agency's website prior to the meeting at *https://www.acus.gov/event/82nd-plenary-session.*

FOR FURTHER INFORMATION CONTACT: Shawne McGibbon, General Counsel (Designated Federal Officer), Administrative Conference of the United States, Suite 706 South, 1120 20th Street NW, Washington, DC 20036; Telephone 202–480–2080; email *smcgibbon@acus.gov.*

SUPPLEMENTARY INFORMATION: The Administrative Conference of the United States makes recommendations to federal agencies, the President, Congress, and the Judicial Conference of the United States regarding the improvement of administrative procedures (5 U.S.C. 594). ACUS's membership, when meeting in plenary session, constitutes the Assembly of the Conference (5 U.S.C. 595).

Agenda: Three proposed recommendations will be considered by the Assembly. In addition, there will be updates on past, current, and pending ACUS initiatives, as well as other business. Summaries of the recommendations appear below:

Using Algorithmic Tools in Regulatory Enforcement. This proposed recommendation provides best practices for using artificial intelligence, predictive analytics, and other algorithmic tools to support agencies' regulatory enforcement efforts. It addresses the potential benefits and risks of using algorithmic tools to detect, investigate, and prosecute noncompliance with the law and identifies policies, practices, and organizational structures that agencies can put in place to ensure they enforce the law fairly, accurately, and efficiently.

Public Engagement in Agency Rulemaking Under the Good Cause Exemption: This proposed recommendation provides best practices for public engagement when agencies find good cause to forgo notice-and-comment rulemaking procedures under the Administrative Procedure Act. It encourages agencies to use direct final rulemaking, interim final rulemaking, and alternative methods of public engagement to ensure robust public participation even when they rely properly on the good cause exemption.

Nonlawyer Assistance and Representation. This proposed recommendation provides best practices for agencies to increase the availability of nonlawyer representation and assistance to participants in their adjudicative systems. It provides guidance on the establishment of rules authorizing qualification or, as appropriate, accreditation of nonlawyer representatives; ways to make such processes accessible and transparent; and strategies for coordinating with other government agencies and nongovernmental organizations to increase the availability of representation and assistance.

Additional information about the proposals and the agenda, as well as any changes or updates to the same, can be found at the 82nd Plenary Session page on ACUS's website prior to the start of the meeting at: *https://www.acus.gov/event/82nd-plenary-session.*

Public Participation: ACUS welcomes the virtual attendance of the public at the meeting. Members of the public wishing to view the meeting are asked to RSVP online at the 82nd Plenary Session web page shown above no later than two days before the meeting to ensure adequate bandwidth and accessibility. A link to a livestream of the meeting will be posted the morning of the meeting on the 82nd Plenary Session web page. A video recording of the meeting will be available on ACUS's website shortly after the conclusion of the event at *https://youtube.com/channel/UC1Gu44Jq1U7XsGdC9Tfl_zA.*

Written Comments: Persons who wish to comment on any of the proposed recommendations may do so by submitting a written statement either by email to *info@acus.gov* with ''December 2024 Plenary Session Comments'' in the subject line of the email, or by U.S. Mail addressed to: December 2024 Plenary Session Comments, Administrative Conference of the United States, Suite 706 South, 1120 20th Street NW, Washington, DC 20036. Written submissions must be received no later than 10:00 a.m. (EDT), Friday, December 6, 2024, to ensure consideration by the Assembly.

(Authority: 5 U.S.C. 595)

Dated: November 22, 2024.

Shawne McGibbon,

General Counsel.

[FR Doc. 2024–27867 Filed 11–26–24; 8:45 am]

BILLING CODE 6110–01–P

AGENCY FOR INTERNATIONAL DEVELOPMENT

Notice of Advisory Committee Public Meeting

AGENCY: Agency for International Development (USAID).

ACTION: Notice of advisory committee public meeting and request for public comment.

SUMMARY: Pursuant to the Federal Advisory Committee Act (FACA), notice is hereby given of Advisory Committee on Voluntary Foreign Aid (ACVFA) public meeting on Thursday, December 12, 2024.

ADDRESSES: To view additional information related to ACVFA please visit *https://www.usaid.gov/organization/advisory-committee.*

The meeting will feature remarks by the USAID Administrator and the ACVFA Chair, and two discussion panels featuring ACVFA members on (1) development and national security, and (2) ongoing challenges and opportunities for USAID policy and programming.

You may submit comments regarding the work of ACVFA to *acvfa@usaid.gov.* Include ''Public Comment, ACVFA Meeting, December 12, 2024'' in the subject line. All public comments and questions will be included in the official record of the meeting and posted publicly on the USAID website.

American Sign Language interpretation will be provided during the public meeting. If you require a reasonable accommodation, please email *reasonableaccommodations@usaid.gov.* Include ''Request for Reasonable Accommodation, ACVFA Meeting, December 12, 2024'' in the subject line.

The entirety of this meeting is open to the public. You may register to watch the live public meeting at this link: *https://usaid.zoomgov.com/webinar/register/WN_JQF23hAxRFmqPNJZLt1ZfQ.*

FOR FURTHER INFORMATION CONTACT: Karen Vargas, Designated Federal Officer for ACVFA, at *kvargas@usaid.gov* or 202–705–5769.

SUPPLEMENTARY INFORMATION: ACVFA is USAID's external advisory committee, bringing together representatives from private voluntary organizations, nongovernmental organizations, academia, civil society, and the private sector to foster understanding, communication, and cooperation in the area of foreign aid.

Pursuant to its charter, ACVFA is holding an annual public meeting on December 12, 2024, from 10:30 a.m.–12 p.m. ET. This meeting is free and open to the public. The Committee welcomes public participation and comment via the web and/or email addresses provided above.

Karen Vargas,

ACVFA Designated Federal Officer.

BILLING CODE 6116–01–P

DEPARTMENT OF AGRICULTURE

Forest Service

Intent To Renew the Northwest Forest Plan Area Advisory Committee

AGENCY: Forest Service, United States Department of Agriculture (USDA).

ACTION: Notice of intent to renew the Charter for the Northwest Forest Plan Area Advisory Committee.

SUMMARY: In accordance with the Federal Advisory Committee Act (FACA), as amended, the United States Department of Agriculture announces its intent to renew the Charter for the Northwest Forest Plan Area Advisory Committee (Committee). The Charter for the Northwest Forest Plan Area Advisory Committee is being renewed so that the Committee may provide continued advice and recommendations on landscape management approaches and implementation of such approaches that promote sustainability, climate change adaptations, and wildfire resilience while providing for increasing use of and demands from National Forest System lands in the Northwest Forest Plan area. The Committee will be governed by the provisions of FACA. Duration of the Committee is for two years unless renewed by the Secretary of Agriculture.

ADDRESSES: USDA Forest Service, 1220 Southwest 3rd Avenue, Ste. G015, Portland, OR 97204. Committee information can also be found on the Northwest Forest Plan Federal Advisory Committee website at *https://www.fs.usda.gov/detail/r6/landmanagement/planning/?cid=fseprd1076013* or by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**.

FOR FURTHER INFORMATION CONTACT: Inquiries may be sent to Ann Eberhart Goode, U.S. Department of Agriculture, Forest Service, by phone at (707) 562–8738 or email at *ann.goode@usda.gov* or Delaney Caslow, U.S. Department of Agriculture, Forest Service, by phone at (503) 804–3545 or email at *delaney.caslow@usda.gov.* Individuals who use telecommunications devices for the hearing impaired may call 711 to reach the Telecommunications Relay Service, 24 hours a day, every day of the year, including holidays.

SUPPLEMENTARY INFORMATION: In accordance with the provisions of the Federal Advisory Committee Act (FACA), as amended (5 U.S.C. app. 2), with the concurrence of the General Services Administration (GSA), and subject to the approval of the Secretary of Agriculture, the USDA Forest Service intends to renew the Federal Advisory Committee for sustainable, climate-adapted, wildfire-resilient landscapes across the Northwest Forest Plan (NWFP) area. The Committee will be a discretionary advisory committee. The Committee will operate under the provisions of the FACA and will report to the Secretary of Agriculture through the Chief of the Forest Service. The purpose of the Committee is to provide advice and recommendations on landscape management approaches and implementation of such approaches that promote sustainability, climate change adaptations, and wildfire resilience while providing for increasing use of and demands from National Forest System lands in the NWFP area. Accordingly, the Committee will be asked to perform the following duties or fulfill other requests made by the Secretary of Agriculture or the Chief of the Forest Service by offering recommendations on:

1. Planning and implementation options that complement the national Wildfire Crisis Strategy to assist the USDA Forest Service to transition to greater proactive wildfire risk reduction and address key obstacles related to existing vegetation management.

2. Approaches to address the dynamic nature of ecosystems, utilize adaptive management, monitoring, and integration of future uncertainty into land management planning.

3. Application of the best available science regarding the following primary issues: (a) the ecological importance of old forests; (b) climate change, fire, and associated disturbance processes; (c) terrestrial and aquatic reserved land use allocations and the relationship between the two; (d) the climatic diversity of forests encompassed by the NWFP area; and (e) habitat connectivity at multiple scales in light of changed conditions.

4. Incorporation of traditional ecological knowledge and indigenous perspectives and values into Federal forest planning and management.

5. Communication tools and strategies to: (a) help provide greater understanding of landscape or programmatic level planning and implementation options and requirements and (b) enhance outreach efforts, public engagement, meaningful Tribal consultation and participation, targeted outreach to underserved communities, and stakeholder collaboration within the scope of the Committee.

6. Issue preliminary discrete recommendations in sequence with Forest Service NWFP planning and implementation timelines.

All deliverables will be submitted to the Designated Federal Official (DFO) at USDA Forest Service, 1220 Southwest 3rd Avenue, Ste. G015, Portland, OR 97204.

The Committee will meet approximately four to six times annually or as often as necessary and at such times as designated by the DFO. Subcommittees may meet more frequently. Attendance may be in-person, by telephone, or by other electronic means. Meetings of the Committee whether in person, by telephone or electronic means shall be announced 15 calendar days in advance in the **Federal Register**. As required by the FACA, the Committee will hold open meetings unless the Secretary determines that a meeting or a portion of a meeting may be closed to the public in accordance with subsection C of section 522(b) of title 5, United States Code. All proceedings and relevant documents will be posted and made accessible to the public. No individual who is currently registered as a Federal lobbyist is eligible to serve as a member of the Committee.

Overview and Membership

The Committee will be comprised of up to 23 members approved by the Secretary of Agriculture, and each will serve a two-year term. The Committee membership will be fairly balanced in terms of the points of view represented and functions to be performed. Members of the Committee will serve without compensation but may be reimbursed for travel expenses while performing duties on behalf of the Committee, subject to approval by the DFO and the Department. The Committee should represent to the extent possible, a balance across the three states covered by the NWFP (Oregon, Washington, and California) and reflect the demographic diversity of the NWFP area. The Committee shall include representation from experts in the following interest areas:

(1) *Science:* Up to 9 members who represent the scientific community, and have an understanding in the following disciplines and how they relate to the NWFP area:

(a) Forest ecology
(b) Vegetation management
(c) Fire ecology
(d) Terrestrial wildlife ecology
(e) Aquatic and riparian ecosystems and species
(f) Climate change
(g) Social science
(h) Adaptive management and planning
(i) Indigenous Traditional Ecological Knowledge (ITEK) practitioners

(2) *Organizations:* Up to 8 members who represent a broad array of organizations with an interest in NWFP forests:

(a) National, regional, or local conservation organizations with staff and active programs in the Pacific Northwest
(b) Forest products industry
(c) Recreation organization
(d) Organization involved in outreach with underserved communities
(e) Forest collaborative groups
(f) Wildlife organization
(g) Watershed organization

(3) *Government and public:* Up to 6 members who represent governmental entities or the public at large:

(a) Member of the affected public at large
(b) Represent state governments
(c) Represent counties
(d) Represent American Indian Tribes

Meeting locations will be compliant with the Americans with Disabilities Act, and the USDA provides reasonable accommodation to individuals with disabilities where appropriate. If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpretation, assistive listening devices, or other reasonable accommodation to the person listed under the **FOR FURTHER INFORMATION CONTACT** section or contact USDA's TARGET Center at (202) 720–2600 (voice and TTY) or USDA through the Federal Relay Service at (800) 877–8339. Additionally, program information may be made available in languages other than English.

USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Equal opportunity practices in accordance with USDA policies shall be followed in all membership appointments to the Committee. To ensure that the recommendations of the Committee have taken into account the needs of the diverse groups served by USDA, membership shall include, to the extent practicable, individuals with demonstrated ability to represent the many communities, identities, races, ethnicities, backgrounds, abilities, cultures, and beliefs of the American people, including underserved communities. Persons with disabilities who require alternative means of communication for program information (Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible agency or USDA's TARGET Center at (202) 720–2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877–8339. Additionally, program information may be made available in languages other than English. USDA is an equal opportunity provider, employer, and lender.

Dated: November 21, 2024.

Cikena Reid,

USDA Committee Management Officer.

BILLING CODE 3411–15–P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Colorado Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: Commission on Civil Rights.

ACTION: Notice of public meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act that the Colorado Advisory Committee (Committee) to the U.S. Commission on Civil Rights will convene a monthly virtual business meeting on Wednesday, December 18, 2024, at 3:00 p.m. Mountain Time. The purpose of the meeting is to review the final version of its report on public school attendance zones in Colorado. The committee will vote on the report and discuss next steps.

DATES: Wednesday, December 18, 2024, at 3:00 p.m. Mountain Time.

ADDRESSES: The meeting will be held via Zoom.

Meeting Link (Audio/Visual): https://tinyurl.com/279ffjudv; password: USCCR–CO

Join by Phone (Audio Only): 1–833–435–1820; Meeting ID: 160 614 2807#

FOR FURTHER INFORMATION CONTACT: Barbara Delaviez, Designated Federal Official, at *bdelaviez@usccr.gov.* or by phone at 202–539–8246.

SUPPLEMENTARY INFORMATION: Any interested member of the public may attend the meeting via the link above. Before adjourning the meeting, the committee chair will announce that any member of the public may make a brief

oral statement, as time allows. Per the Federal Advisory Committee Act, public minutes of the meeting will include a list of persons who are present at the meeting. If joining via phone, callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Closed captioning is available by selecting ''CC'' in the meeting platform. To request additional accommodations, please email *ebohor@usccr.gov* at least 10 business days prior to each meeting.

Members of the public are entitled to submit written comments; the comments must be received in the regional office within 30 days following the scheduled meeting. Written comments may be emailed to Barbara Delaviez at *bdelaviez@usccr.gov;* please include Colorado Committee in the subject line of the transmitting email. Persons who desire additional information may contact the Regional Programs Coordination Unit at 1–312–353–8311.

Records generated from these meetings may be inspected and reproduced at the Regional Programs Coordination Unit Office, as they become available, both before and after the meetings. Records of the meeting will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Colorado Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Coordination Unit at *ebohor@usccr.gov.*

Agenda

I. Welcome and Roll Call
II. Report Stage: Discuss and Vote on Report—Public School Attendance Zones
III. Discuss Next Steps
IV. Public Comment
V. Adjournment

Dated: November 21, 2024.

David Mussatt,

Supervisory Chief, Regional Programs Unit.

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Puerto Rico Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission), and the Federal Advisory Committee Act (FACA), that a meeting of the Puerto Rico Advisory Committee to the Commission will convene by virtual web conference on Wednesday, December 11, 2024, at 3:30 p.m. Atlantic Time/Eastern Time. The purpose is to continue discussion on their project on the civil rights impacts of the Insular Cases in Puerto Rico.

DATES: December 11, 2024, Wednesday, at 3:30 p.m. Atlantic Time (3:30 p.m. ET).

ADDRESSES: Meeting will be held via Zoom.

Registration Link (Audio/Visual): https://tinyurl.com/rbhrynke; Passcode, if needed: USCCR–PR.

Join by Phone (Audio Only): 1–833–435–1820 USA Toll Free; Meeting ID: 161 027 9371 #.

FOR FURTHER INFORMATION CONTACT: Email Victoria Moreno, Designated Federal Officer at *vmoreno@usccr.gov,* or by phone at 434–515–0204.

SUPPLEMENTARY INFORMATION: This meeting will take place in Spanish with English interpretation. This committee meeting is available to the public through the registration link above. Any interested member of the public may listen to the meeting. An open comment period will be provided to allow members of the public to make a statement as time allows. Per the Federal Advisory Committee Act, public minutes of the meeting will include a list of persons who are present at the meeting. If joining via phone, callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Closed captioning will be available for individuals who are deaf, hard of hearing, or who have certain cognitive or learning impairments. To request additional accommodations, please email *ebohor@usccr.gov* at least 10 business days prior to the meeting.

Members of the public are entitled to submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be emailed to Victoria Moreno at *vmoreno@usccr.gov.* Persons who desire additional information may contact the Regional Programs Coordination Unit at 1–312–353–8311.

Records generated from this meeting may be inspected and reproduced at the Regional Programs Coordination Unit Office, as they become available, both before and after the meeting. Records of the meetings will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Puerto Rico Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Coordination Unit at *ebohor@usccr.gov.*

Agenda

1. Welcome & Roll Call
2. Committee Discussion on Project Regarding the Civil Rights Impacts of the Insular Cases in Puerto Rico
3. Next Steps
4. Public Comment
5. Other Business
6. Adjourn

Dated: November 22, 2024.

BILLING CODE P

DEPARTMENT OF COMMERCE

International Trade Administration

[Application No. 19–5A001]

Export Trade Certificate of Review

ACTION: Notice of application for an amended Export Trade Certificate of Review for National Pecan Shellers Association (NPSA), Application No. 19–5A001.

SUMMARY: The Secretary of Commerce, through the Office of Trade and Economic Analysis (OTEA) of the International Trade Administration, has received an application for an amended Export Trade Certificate of Review (Certificate). This notice summarizes the proposed application and seeks public comments on whether the Certificate should be issued.

FOR FURTHER INFORMATION CONTACT: Amanda Reynolds, Acting Director, OTEA, International Trade Administration, (202) 482–5131 (this is not a toll-free number) or email at *etca@trade.gov.*

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. 4011–21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. An Export Trade Certificate of Review protects the holder and the members identified in the Certificate from State and Federal government antitrust actions and from private treble damage antitrust actions for the export conduct specified in the Certificate and carried out in compliance with its terms and conditions. The regulations implementing Title III are found at 15 CFR part 325. OTEA is issuing this notice pursuant to 15 CFR 325.6(a), which requires the Secretary of Commerce to publish a summary of the application in the **Federal Register**, identifying the applicant and each member and summarizing the proposed export conduct.

Request for Public Comments

Interested parties may submit written comments relevant to the determination whether a Certificate should be issued. If the comments include any privileged or confidential business information, it must be clearly marked and a nonconfidential version of the comments (identified as such) should be included. Any comments not marked as privileged or confidential business information will be deemed to be nonconfidential.

Written comments should be sent to *ETCA@trade.gov.* An original and two (2) copies should also be submitted no later than 20 days after the date of this notice to: Office of Trade and Economic Analysis, International Trade Administration, U.S. Department of Commerce, Room 21028, Washington, DC 20230.

Information submitted by any person is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552). However, nonconfidential versions of the comments will be made available to the applicant if necessary for determining whether or not to issue the Certificate. Comments should refer to this application as ''Export Trade Certificate of Review, application number 19–5A001.''

Summary of the Application

Applicant: National Pecan Shellers Association, 4348 Carter Creek Pkwy Ste 101, Bryan, TX 77802.

Contact: Catherine Clark and Kelsey Wallis, Managing Staff at Texas Pecan Growers Association.

Application No.: 19–5A001.

Date Deemed Submitted: November 13, 2024.

Proposed Amendment: National Pecan Shellers Association seeks to amend its Certificate as follows:

1. Add the following entities as Exporting Members of the Certificate within the meaning of section 325.2(l) of the Regulations (15 CFR 325.2(l)):

- Pecaninis Inc., San Antonio, TX
- Rancho Pecana, El Paso, TX

2. Remove the following companies as Members of the Certificate:

- Exporting Members
  - Chase Pecan, LP, San Saba, TX
  - John B. Sanfilippo & Son, Inc., Elgin, IL
  - Lamar Pecan Company, Hawkinsville, GA
- Non-exporting Members
  - The Kellen Company, Atlanta, GA (Independent Third Party)

3. Change the location of the following Non-exporting Member of the Certificate:

- Pecan Export Trade Council's location changes from Atlanta, GA to Bryan, TX

NPSA's proposed amendment of its Certificate would result in the following Membership list:

Exporting Members

- Arnco, Inc. dba Carter Pecan, Panama City Beach, FL
- Diamond Foods LLC, Stockton, CA
- Easterlin Pecan Co, Montezuma, GA
- HNH Nut Company, Visalia, CA
- Hudson Pecan Co., Inc., Ocilla, GA
- Humphrey Pecan LLC, San Antonio, TX
- La Nogalera USA Inc., El Paso, TX
- Navarro Pecan Company, Corsicana, TX
- Pecan Grove Farms, Dallas, TX
- Pecan Star & Nut Corp, San Antonio, TX
- Pecaninis Inc., San Antonio, TX
- Rancho Pecana, El Paso, TX
- South Georgia Pecan Company, Valdosta, GA
- Southern Roots Nut Company, LLC, Las Cruces, NM

Non-exporting Members

- Pecan Export Trade Council, Bryan, TX

Dated: November 22, 2024.

Amanda Reynolds,

Acting Director, Office of Trade and Economic Analysis, International Trade Administration, U.S. Department of Commerce.

BILLING CODE 3510–DR–P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

National Council on Weights and Measures 2025 Interim Meeting

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice.

SUMMARY: The 2025 Interim Meeting of the National Council on Weights and Measures (NCWM) will be held in-person at the Francis Marion Hotel, Charleston, South Carolina from Sunday, January 12, 2025, through Wednesday, January 15, 2025. This notice contains information about the most significant agenda items of the NCWM committees. As a result, the items are not consecutively numbered.

DATES: The 2025 NCWM Interim Meeting will be held from Sunday, January 12, 2025, through Wednesday, January 15, 2025. The meeting schedule will be available on the NCWM website at *www.ncwm.com.*

ADDRESSES: This meeting will be held at the Francis Marion Hotel, with an address at 387 King Street, Charleston, South Carolina 29403.

FOR FURTHER INFORMATION CONTACT: Dr. Katrice Lippa, NIST, Office of Weights and Measures, 100 Bureau Drive, Stop 2600, Gaithersburg, MD 20899–2600. You may also contact Dr. Lippa at (301) 975–3116 or by email at *katrice.lippa@nist.gov.* The meeting is open to the public, but the payment of a registration fee is required. Please see the NCWM website (*www.ncwm.com*) to view the

meeting agendas, registration forms, and hotel reservation information.

SUPPLEMENTARY INFORMATION: Publication of this notice on the NCWM's behalf is undertaken as a public service and does not itself constitute an endorsement by the National Institute of Standards and Technology (NIST) of the content of the notice. NIST participates in the NCWM as an NCWM member and pursuant to 15 U.S.C. 272(b)(10) and (c)(4) and in accordance with Federal policy (*e.g.,* OMB Circular A–119 ''Federal Participation in the Development and Use of Voluntary Consensus Standards'').

The NCWM is an organization of weights and measures officials of the states, counties, and cities of the United States, and representatives from the private sector and federal agencies. These meetings bring together government officials and representatives of business, industry, trade associations, and consumer organizations on subjects related to the field of weights and measures technology, administration, and enforcement. NIST hosted the first meeting of the NCWM in 1905. Since then, the council has provided a model of cooperation between Federal, State, and local governments and the private sector. NIST participates in the NCWM to provide technical insights and expertise and encourage cooperation between the private sector, federal agencies, and the states in the development of legal metrology requirements. NIST also promotes uniformity in state laws, regulations, and testing procedures used in the regulatory control of commercial weighing and measuring devices, packaged goods, and for other trade and commerce issues.

The NCWM has established multiple committees, task groups, and other working bodies to address legal metrology issues of interest to, *inter alia,* regulatory officials, industry representatives, and consumers. Comments will be taken by the various NCWM committees on agenda items during the open hearing portions of the meeting identified in the meeting schedule. At this stage, the items are proposals. The open hearing sessions are accessible to all registered attendees of the meeting, including both NCWM members and non-members. The meeting also includes committee work sessions in which the committees may, *inter alia,* accept comments, withdraw or carryover agenda items that need additional maturation, and develop recommendations for the agenda items for consideration and possible adoption in July 2025 at the NCWM 110th Annual Meeting.

These notices are intended to make interested parties aware of significant agenda items and alert them to the committees' intentions to share reports on the status of each at the 2025 NCWM Interim Meeting. The notices are also presented to invite the participation of manufacturers, experts, consumers, users, and others who may be interested in these efforts.

The following are brief descriptions of significant agenda items that will receive further consideration by the standing committees at the upcoming 2025 NCWM Interim Meeting. The full agenda of each standing committee is provided in NCWM Publication 15 (*ncwm.com/publication-15*). Comments will be taken on recommendations intended to amend NIST Handbook 44, ''Specifications, Tolerances, and Other Technical Requirements for Weighing and Measuring Devices'' (NIST HB 44), NIST Handbook 130, ''Uniform Laws and Regulations in the Areas of Legal Metrology and Fuel Quality'' (NIST HB 130), and NIST Handbook 133, ''Checking the Net Contents of Packaged Goods'' (NIST HB 133). The NIST Handbooks are regularly adopted by the states, either by reference or through administrative procedures.

NCWM S&T Committee

The NCWM Specifications and Tolerances Committee (S&T Committee) will consider proposed amendments to NIST HB 44, including those identified below. A detailed technical review by the NIST Office of Weights and Measures of the S&T Committee agenda items will be made available prior to the 2025 NCWM Interim Meeting in the 2025 NIST OWM Interim Technical Analysis at *https://www.nist.gov/pml/owm/publications/owm-technical-analysis.*

SCL—Scales

SCL–25.1 S.5.2. Parameters for Accuracy Class, S.6. Marking Requirements, and UR.3. Use Requirements

The S&T Committee will consider a new proposal submitted by NIST Office of Weights and Measures. The proposal is to amend the requirements to establish a minimum capacity for scales and require that information to be marked on new scales.

SCL–25.3 UR.3.14. Zero-Balance Recorded Weight for Forklift Scales

The S&T Committee will consider a new proposal submitted by the Pennsylvania Bureau of Ride and Measurement Standards. The proposal is to add a requirement for forklift scales that would require these devices to indicate and record a zero-balance condition prior to determining the weight of the load on the device.

FMT—Farm Milk Tanks

FMT–25.1 UR.1. Installation

The S&T Committee will consider a new proposal submitted by the USDA–AMS-Dairy Programs. The proposal amends the current section 4.42. Farm Milk Tanks Code paragraph UR.1. Installation to require the leveling legs on stationary farm milk tanks to be permanently attached to the floor by cement as a means to prevent any adjustment to the leveling legs after calibration. The proposal removes the option for defining the correct position of each leg on the floor for tanks that are not permanently mounted in the facility.

Item Block 1 (B1)

TXI—Taximeters and TNS—Transportation Network Measurement Systems

B1–TXI–25.1 5.54 Transportation-For-Hire Systems

The S&T Committee will consider a new proposal submitted by the NCWM Transportation-for-Hire Systems Task Group. The proposal would revise section 5.54., currently titled ''Taximeters,'' and rename it ''Transportation-For-Hire Systems.'' The new revised section would combine the existing requirements for taximeters in section 5.54. with those that are currently in section 5.60. Transportation Network Measurement Systems to create a single section addressing both types of vehicle for hire applications.

B1–TNS–25.1 Section 5.60. Transportation Network Measurement Systems—Tentative Code

The S&T Committee will consider a new proposal submitted by the Transportation-for-Hire Systems Task Group. The proposal would consolidate section 5.60. Transportation Network Measurement Systems with section 5.54. Taximeters. Both sets of requirements would be incorporated into an updated and renamed section 5.54., and section 5.60. would be removed from NIST HB 44.

OTH—Other Items

OTH–25.1 2.26. Weigh-in-Motion Systems Used for Vehicle Direct Enforcement

The S&T Committee will consider a proposal submitted by New York City

Department of Transportation, NY State Department of Agriculture and Markets, NJ Office of Weights and Measures, Oregon Department of Agriculture, Washington DC Department of Transportation, C2SMART, and Kistler. The proposal is to include a new Section 2.26. Weigh-in-Motion Systems Used for Vehicle Direct Enforcement to NIST HB 44 that provides standards that can be used by local and State agencies to certify Weigh-In-Motion (WIM) systems used for automated enforcement of gross vehicle weight limits.

NCWM L&R Committee

The NCWM Laws and Regulations Committee (L&R Committee) will consider proposed amendments to NIST HB 130, including those identified below. A detailed technical review by the NIST Office of Weights and Measures of the L&R Committee agenda items will be made available prior to the 2025 NCWM Interim Meeting in the 2025 NIST OWM Interim Analysis at *https://www.nist.gov/pml/owm/publications/owm-technical-analysis.*

MOS—NIST Handbook 130

NET–24.2. 2.16.3.1. Tare Weights; Part (c) Allowable difference

The L&R Committee will further consider a proposal to clarify the existing language for the method of sale for stamped or stenciled tare weights of Liquefied Petroleum Gas cylinders. This will include changes to existing language within NIST HB 130 that references tolerances for cylinders. It is intended to resolve the discrepancy that exists between NIST Handbook 130 and Title 49 of the Code of Federal Regulations with respect to the allowable differences between the stamped tare weight and the actual tare weight of cylinders used for compressed or liquefied gases in refillable cylinders.

OTH—NIST Handbook 130

OTH–24.1 X. Uniform Shipping Law

The L&R Committee will further consider a proposal that has been designated as an ''Assigned'' item, meaning that further development will be done by the NCWM Uniform Shipping Law Task Group. This proposal provides model language for inclusion in NIST HB 130 that would establish Uniform Shipping Laws meant to ensure accurate shipment of goods. This regulation includes language authorizing the enforcement of these regulations, empowers the state to promulgate regulations as needed to carry out the provisions of the Act, and provides for civil and criminal penalties. The development of this item will include outreach to stakeholders, including federal agencies.

FALS—Fuels and Lubricants Subcommittee

B2–FLR–24.1 3.12.1.X Identification of Grade & 3.12.2.X. Identification of Grade

The L&R Committee will further consider a proposal that has been designated as an ''Assigned'' item, meaning that the NCWM Fuels and Lubricants Subcommittee is being tasked to fully develop the proposal to ensure the applicable ASTM fuel grade designations are clearly identified for the marketplace. This proposal provides language for a new NIST HB 130 regulation that specifies labeling requirements that will properly identify the grade of natural gas (compressed and liquified to include blends of these products with hydrogen) when this product is dispensed and sold as a vehicle fuel. These standards will be applicable at the point fuel is dispensed into the vehicle.

Alicia Chambers,

NIST Executive Secretariat.

BILLING CODE 3510–13–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XE497]

Gulf of Mexico Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting.

SUMMARY: The Gulf of Mexico Fishery Management Council will hold a one-day in-person meeting of its Shrimp Advisory Panel (AP).

DATES: The meeting will convene Monday, December 16, 2024, from 8 a.m. to 1:30 p.m., EST. For agenda details, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The meeting will take place at the Gulf Council office. Registration information will be available on the Council's website by visiting *www.gulfcouncil.org* and clicking on the Shrimp AP meeting on the calendar.

Council address: Gulf of Mexico Fishery Management Council, 4107 W Spruce Street, Suite 200, Tampa, FL 33607; telephone: (813) 348–1630.

FOR FURTHER INFORMATION CONTACT: Dr. Matt Freeman, Economist, Gulf of Mexico Fishery Management Council; *matt.freeman@gulfcouncil.org,* telephone: (813) 348–1630.

SUPPLEMENTARY INFORMATION: The following items are on the agenda, though agenda items may be addressed out of order (changes will be noted on the Council's website when possible.)

Monday, December 16, 2024; 8 a.m.–1:30 p.m., EST (7 a.m.–12:30 p.m. CST)

Meeting will begin with Introduction of Members, Election of Chair and Vice Chair, Adoption of Agenda and Approval of Summary from March 19–20, 2024 Meeting, and Scope of Work.

The AP will review and discuss Council Actions in Response to Motions from the March 2024 *Shrimp* AP Meeting, discuss the Draft Shrimp Framework Action: Modification of the Vessel Position Data Collection Program for the Gulf of Mexico *Shrimp* Fishery, receive a presentation on Survey Design and Estimated Costs for Position-recording Devices in the Gulf of Mexico Shrimp Fleet, and receive an update on *Shrimp* Futures Program.

Lastly, the AP will receive any public testimony and discuss other business items.

Meeting Adjourns—

The in-person meeting will be broadcast via webinar. You may register by visiting *www.gulfcouncil.org* and clicking on the *Shrimp* Advisory Panel meeting on the calendar.

The Agenda is subject to change, and the latest version along with other meeting materials will be posted on *www.gulfcouncil.org* as they become available.

Although other non-emergency issues not on the agenda may come before the Advisory Panel for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), those issues may not be the subject of formal action during this meeting. Actions will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take-action to address the emergency at least 5 working days prior to the meeting.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid or accommodations should be directed to Kathy Pereira,

kathy.pereira@gulfcouncil.org, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 21, 2024.

FOR FURTHER INFORMATION CONTACT: Julie Neer, SEDAR Coordinator, 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405; phone: (843) 571–4366; email: *Julie.Neer@safmc.net.*

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions, have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a three-step process including: (1) Data Workshop; (2) Assessment Process utilizing webinars; and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, Highly Migratory Species Management Division, and Southeast Fisheries Science Center. Participants include: data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations (NGOs); international experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion at the SEDAR 92 Atlantic Blueline Tilefish LH–TWG webinar III: The Group will discuss available life history data sources and make recommendation for their use in the assessment.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

This meeting is accessible to people with disabilities. Requests for auxiliary aids should be directed to the South Atlantic Fishery Management Council office (see **ADDRESSES**) at least 10 business days prior to the meeting.

Note: The times and sequence specified in this agenda are subject to change.

Endangered and Threatened Species; Initiation of 5-Year Review of the Brazilian Guitarfish (Rhinobatos horkelii)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for information.

SUMMARY: We, NMFS, announce the initiation of a 5-year review of the endangered Brazilian guitarfish (*Rhinobatos horkelii*). The Endangered Species Act (ESA) requires us to conduct a review of listed species at least once every 5 years to determine whether a species should be removed from the list (*i.e.,* delisted), reclassified from an endangered species to a threatened species (*i.e.,* downlisted), or reclassified from a threatened species to an endangered species (*i.e.,* uplisted). The determination must be based on the best scientific and commercial data available at the time of the review. Therefore, we request relevant information (*e.g.,* biology, threats, and conservation efforts) that has become available since our previous review of the species.

DATES: To allow us adequate time to conduct the 5-year review, we must receive your information no later than January 27, 2025. While we accept new information about any listed species at any time, information received after the date stated above may not be considered for the purposes of this review.

ADDRESSES: Submit your information electronically via the Federal eRulemaking Portal. Go to *https://www.regulations.gov* and enter NOAA–NMFS–2024–0137 in the Search box. Click on the ''Comment'' icon, complete the required fields, and enter or attach your comments.

Instructions: We may not consider comments or other information if sent by any other method, to any other address or individual, or received after the date stated above. All comments and information received are a part of the public record, and we will post the comments for public viewing on *https://www.regulations.gov.* All personal identifying information (*e.g.,* name, address, *etc.*) submitted voluntarily by the sender will be publicly accessible. Do not submit confidential business information, or otherwise sensitive or protected information. We will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: Malcolm Mohead, NMFS Office of Protected Resources, (301) 427–8427, *Malcolm.Mohead@noaa.gov.*

SUPPLEMENTARY INFORMATION: This notice announces our initiation of the Brazilian guitarfish (*Rhinobatos horkelii*) 5-year review. Section 4(c)(2) of the ESA requires us to conduct a review of listed species at least once every 5 years to determine whether species should be removed from the list, changed in status from an endangered species to a threatened species, or changed in status from a threatened species to an endangered species (16 U.S.C. 1533(c)(2)). Section 4(a)(1) of the ESA requires us to determine whether any species is an endangered or threatened species because of any of the following factors: (A) the present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or manmade factors affecting its continued existence (16 U.S.C. 1533(a)(1)). Section 4(b)(1)(A) of the ESA requires us to make the determination based solely on the best scientific and commercial data available at the time of the review and after taking into account efforts to protect the species (16 U.S.C. 1533(b)(1)(A)). Regulations in 50 CFR 424.21 require that we publish a notice in the **Federal Register** announcing species currently under active review. Based on such reviews, we determine whether a species should be delisted or reclassified (50 CFR 424.21). Any such change (*i.e.,* delisting or reclassification) would require a separate rulemaking process.

We last performed a review of the Brazilian guitarfish in 2015. Background information on the species is available on the NMFS website at: *https://www.fisheries.noaa.gov/species/brazilian-guitarfish/overview.*

Public Solicitation of Relevant Information

To ensure that the 5-year review is based on the best scientific and commercial data available, we are soliciting information from the public, governmental agencies, Tribes, the scientific community, industry, environmental organizations, and any other interested parties. We request information that has become available since the previous review was published in 2015. Categories of requested information include: (1) species biology including, but not limited to, abundance, population trends, demographics, distribution, and diversity; (2) habitat conditions including, but not limited to, amount, distribution, suitability, and important features for conservation; (3) degree, nature, and trends of threats to the species and its habitats, especially those factors described in section 4(a)(1) of the ESA and listed above; (4) conservation efforts that have been implemented to benefit the species, including monitoring data demonstrating the effectiveness of such efforts; and (5) other information, data, or corrections including, but not limited to, taxonomic or nomenclatural changes and improved analytical methods for evaluating extinction risk.

If you wish to provide information for the review, please submit your information and materials electronically (see **ADDRESSES** section). We request that all information be accompanied by supporting documentation such as maps, bibliographic references, or reprints of pertinent publications.

Authority: 16 U.S.C. 1531 *et seq.*

Dated: November 22, 2024.

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Mid-Atlantic and New England Fishery Management Councils (Councils) will hold a public meeting of their joint Northeast Trawl Advisory Panel (NTAP).

DATES: The meeting will be held on Friday, December 13, 2024, from 12 p.m. to 1:30 p.m. For agenda details, see **SUPPLEMENTARY INFORMATION.**

ADDRESSES: The meeting will be held via webinar. Connection information will be posted to the calendar at *www.mafmc.org* prior to the meeting.

Council address: Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331; *www.mafmc.org.*

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526–5255.

SUPPLEMENTARY INFORMATION: The Councils' NTAP will meet to discuss the Operational Manual and Orientation Document. The intent of this meeting is to discuss NTAP in detail, including background, organization, purpose, and member expectation. This meeting will be an opportunity for new and existing NTAP members to discuss and learn about the goals and purposes of NTAP.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Shelley Spedden, (302) 526–5251 at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Mid-Atlantic Fishery Management Council (MAFMC); New England Fishery Management Council (NEFMC) Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council's Ecosystem and Ocean Planning Committee and New England Fishery Management Council's Habitat Committee will hold a joint public meeting.

DATES: The meeting will be held on Wednesday, December 18, 2024, from 1 p.m. to 4 p.m. For agenda details, see **SUPPLEMENTARY INFORMATION.**

ADDRESSES: The meeting will be held via webinar. Webinar connection, agenda items, and any additional information will be available at both *www.mafmc.org/council-events* and *https://www.nefmc.org/calendar.*

Council addresses: Mid-Atlantic Fishery Management Council, 800 N. State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331; *www.mafmc.org.;* New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950; telephone: (978) 465–0492; *www.nefmc.org.*

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526–5255 or Cate O'Keefe, Ph.D., Executive Director, New England Fishery Management Council; telephone: (978) 465–0492 (ext. 113).

SUPPLEMENTARY INFORMATION: The purpose of this joint meeting is for the Ecosystem and Ocean Planning Committee and Habitat Committee to provide recommendations regarding the Councils' Essential Fish Habitat (EFH) reviews and the draft EFH Review Reports being prepared for the Council. Because many of the EFH Review work products apply to the entire Northeastern US, the Committees are being convened jointly for their review. The Committees will receive an overview of the NMFS EFH Review requirements (10 components of an EFH review), and will review components related to (a) Non-Magnuson-Stevens Act fishing activities that may adversely affect EFH, (b) Non-fishing related activities that may adversely affect EFH, (c) Prey species for federally-managed fish species, (d) EFH research needs, and (e) Methods related to the description and identification of EFH.

Special Accommodations

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Government of the United Arab Emirates

(ii) *Total Estimated Value:*

Major Defense Equipment *	$45 million
Other	$40 million
Total	$85 million

Funding Source: National Funds.

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:*

Major Defense Equipment (MDE):
Eighteen (18) AN/TPQ–50 Radar Systems—Man Portable Version

Non-MDE:
Also included are 107mm High Explosive (HE) rockets (for CONUS testing only); Computer Digital Military Laptop Radar Control Display units; 5kW Advanced Medium Mobile Power Source (AMMPS) Trailer-Mounted, Diesel Engine Driven Power Unit PU–2001; spares; mission equipment; communication and navigation

equipment; support equipment; repair parts; special tools and test equipment; technical data and publications; site survey; United States (U.S.) Government and contractor technical and logistics personnel services; and other related elements of logistics and program support.

(iv) *Military Department:* Army (AE–B–ZVL).

(v) *Prior Related Cases, if any:* None.

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None.

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex.

(viii) *Date Report Delivered to Congress:* December 4, 2023.

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

United Arab Emirates—AN/TPQ–50 Radar

The Government of the United Arab Emirates (UAE) has requested to buy eighteen (18) AN/TPQ–50 Radar Systems—man portable version. Also included are 107mm High Explosive (HE) rockets (for CONUS testing only); Computer Digital Military Laptop Radar Control Display units; 5kW Advanced Medium Mobile Power Source (AMMPS) Trailer-Mounted, Diesel Engine Driven Power Unit PU–2001; spares; mission equipment; communication and navigation equipment; support equipment; repair parts; special tools and test equipment; technical data and publications; site survey; U.S. Government and contractor technical and logistics personnel services; and other related elements of logistics and program support. The estimated total cost is $85 million.

This proposed sale will support the foreign policy and national security of the United States by helping to improve the security of an important regional partner. The UAE is a vital U.S. partner for political stability and economic progress in the Middle East.

The proposed sale will support efforts to protect critical infrastructure and high value civilian assets, as well as military installations and forces from rocket, artillery, and mortar (RAM) and unmanned aerial system threats. It will also further enhance the United States—UAE relationship, both politically and militarily, while also increasing the UAE's effectiveness in executing military and civil defense operations that promote U.S. national interests. The UAE will use the TPQ–50 radars to recognize incoming threats from hostile nations or agents of adversary nations. The United Arab Emirates will have no difficulty absorbing this equipment and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be SRC Inc, Syracuse, NY. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the permanent assignment of any additional U.S. Government or contractor representatives to the UAE. Temporary periods of travel for two-week durations for both U.S. Government and contractor personnel will be necessary to conduct Operator/Maintainer training, as well as System Integration & Check Out (SICO)/Quality Assurance and Testing (QUAT) activities.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 23–52

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AN/TPQ–50 Radar System—man portable version—provides continuous 360-degree surveillance and 3–D rocket, artillery, and mortar (RAM) locations using a L band non-rotating antenna with fixed elevation beams and which is electronically steered in azimuth only. Its full azimuth coverage allows it to simultaneously detect and track multiple rounds fired from separate locations within a 700 square kilometer surveillance area. The AN/TPQ 50 radar provides Point of Origin (POO) and Point of Impact (POI) locations for hostile RAM fire and tracking of air breathing targets (ABTs) in air surveillance (AS) and multi-mission radar (MMR) modes.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the United Arab Emirates can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the United Arab Emirates.

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Germany—MK 54 Lightweight Torpedoes

The Government of Germany has requested to buy up to eighty (80) MK 54 All Up Round Lightweight Torpedoes (LWT). Also included are MK 54 Mod 0 LWT spare parts; Recoverable Exercise Torpedoes (REXTORPs) with containers; handling shapes and containers; torpedo spare parts; tools for mounting and dismounting of Air Launch Accessories (ALAs); equipment for analysis of REXTORP exercise shots; REXTORP maintenance equipment; training; publications; support and test equipment; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total program cost is $300 million.

This proposed sale will support the foreign policy and national security of the United States by improving the security of a NATO Ally that is an important force for political and economic stability in Europe.

The proposed sale will improve Germany's capability to meet current and future threats by upgrading Anti-Submarine Warfare capabilities on its P–8A aircraft. Germany will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Raytheon Integrated Defense Systems, Portsmouth, RI. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Germany; however, U.S. Government Engineering and Technical Services may be required on an interim basis for training and technical assistance.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 23–88

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The MK 54 Torpedo is a conventional torpedo that can be launched from surface ships, rotary and fixed wing aircraft. The MK 54 is an upgrade to the MK 46 Torpedo. The upgrade to the MK 54 entails replacement of the torpedo's sonar and guidance and control systems with modem technology. The new guidance and control system uses a mixture of commercial-off-the-shelf and custom-built electronics. The warhead, fuel tank, and propulsion system from the MK 46 torpedo are re-used in the MK 54 configuration with minor modifications.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the hardware and software elements, the information could be used to develop countermeasures or equivalent systems which might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Germany can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Germany.

Transmittal No. 23–0U

REPORT OF ENHANCEMENT OR UPGRADE OF SENSITIVITY OF TECHNOLOGY OR CAPABILITY (SEC. 36(B)(5)(C), AECA)

(i) *Purchaser:* Government of Australia

(ii) *Sec. 36(b)(1), AECA Transmittal No.:* 14–12

Date: May 13, 2014

Military Department: Navy

(iii) *Description:* On May 13, 2014, Congress was notified by Congressional certification transmittal number 14–12, of the possible sale, under Section 36(b)(l) of the Arms Export Control Act of up to 350 AIM–9X–2 Sidewinder Tactical Missiles; 35 AIM–9X Special Air Training Missiles (NATM); 95 AIM–9X–2 Captive Air Training Missiles (CATM); 22 AIM–9X–2 Tactical Guidance Units; 19 CATM–9X–2 Guidance Units; and 3 DATM–9X. Also included were containers, test sets and support equipment, spare and repair parts, publications and technical documents, personnel training and training equipment, United States (U.S.) Government and contractor technical assistance, and other related elements of logistics and program support. The estimated total cost was $534 million. Major Defense Equipment (MDE) constituted $476 million of this total.

On January 9, 2018, Congress was notified by Congressional certification transmittal number 0W–17 of the change from 350 AIM–9X–2 Sidewinder Tactical Missiles to reflect 300 AIM–9X Sidewinder Block II+ Tactical Missiles and 50 AIM–9X–2 Sidewinder Tactical Missiles. Additionally, this transmittal reported the inclusion of 11 CATM–9X–2 Missile Guidance Units. The total notified cost of MDE remained $476 million. The total notified case value remained $534 million.

On December 4, 2020, Congress was notified by Congressional certification transmittal number 0A–21 of the addition of four (4) AIM–9X Block II+ Tactical Missile Guidance Units. The total MDE value increase by $1 million to $477 million. The estimated total case value remained $534 million.

This transmittal notifies inclusion of the following MDE: an additional ten (10) AIM–9X Block II Sidewinder Tactical Guidance Units; thirty-two (32) AIM–9X Block II+ Sidewinder Tactical Guidance Units; and ninety (90) AIM–

9X Block II Sidewinder CATM Guidance Units. The estimated total value of the new items is $28 million. The net cost of MDE will increase by $28 million, resulting in a revised MDE value of $505 million. The estimated total case value will remain $534 million.

(iv) *Significance:* The proposed sale will improve Australia's capability to effectively maintain its current force projection and enhance interoperability with U.S. forces.

(v) *Justification:* This proposed sale will support the foreign policy and national security objectives of the U.S. Australia is one of our most important allies in the Western Pacific. The strategic location of this political and economic power contributes significantly to ensuring peace and economic stability in the region. It is vital to the U.S. national interest to assist our ally in developing and maintaining a strong and ready self-defense capability.

(vi) *Sensitivity of Technology:*

The AIM–9X Block II and Block II+ (Plus) SIDEWINDER Missile represents a substantial increase in missile acquisition and kinematics performance over the AIM–9M and replaces the AIM–9X Block I Missile configuration. The missile includes a high off-boresight seeker, enhanced countermeasure rejection capability, low drag/high angle of attack airframe, and the ability to integrate the Helmet Mounted Cueing System. The most current AIM–9X Block II/II+ Operational Flight Software developed for all international partner countries, which is authorized by U.S. Government export policy, provides fifth-generation infrared missile capabilities such as lock-on-after-launch, weapons data link, surface attack, and surface launch. No software source code or algorithms will be released.

The Sensitivity of Technology Statement contained in the original notification applies to additional items reported here.

The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

(vii) *Date Report Delivered to Congress:* December 5, 2023

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 6001–FR–P

DEFENSE SECURITY COOPERATION AGENCY
2800 Defense Pentagon
Washington, DC 20301-2800

DEC 6 2023

The Honorable Mike Johnson
Speaker of the House
U.S. House of Representatives
H-209, The Capitol
Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 23-15, concerning the Air Force's proposed Letter(s) of Offer and Acceptance to the Kingdom of Saudi Arabia for defense articles and services estimated to cost $582 million. We will issue a news release to notify the public of this proposed sale upon delivery of this letter to your office.

Sincerely,

James A. Hursch
Director

1. Transmittal
2. Policy Justification
3. Sensitivity of Technology
4. Regional Balance (Classified document provided under separate cover)

BILLING CODE 6001–FR–C

Transmittal No. 23–15

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Kingdom of Saudi Arabia

(ii) *Total Estimated Value:*

Major Defense Equipment *	$ 60 million
Other	$522 million
Total	$582 million

Funding Source: National Funds.

(iii) *Description and Quantity or Quantities of Articles or Services Under Consideration for Purchase:* The Government of Saudi Arabia has requested to buy aircraft hardware and software modifications and support to replenish and modernize its RE–3A Tactical Airborne Surveillance System (TASS) aircraft, including:

Major Defense Equipment (MDE):
Seven (7) Embedded Global Positioning System/Inertial Navigation System (GPS/INS) (EGI) Security Devices, Airborne, with Selective Availability Anti-Spoofing Module (SAASM) or M-Code Capability
Five (5) L3Harris BlackRock

Communications Intelligence Sensor Suites

Non-MDE:

Also included are KY–100M narrowband/wideband secure communications terminals; KIV–77 MODE 4/5 Identification Friend or Foe (IFF) cryptographic appliques; AN/PYQ–10 Simple Key Loaders; integrated electronic intelligence (ELINT)/signals intelligence (SIGINT) systems; L–3 Communication Systems-West (CSW) multiband receivers/transmitters; ARC–210 radios; high frequency (HF) radios; secure communications equipment; precision navigation and cryptographic devices; aircraft support and support equipment; test and integration support; equipment; spare and repair parts; consumables and accessories; repair and return support; United States (U.S.) Government and contractor engineering, technical, and logistics support services; studies and surveys; and other related elements of logistics and program support.

(iv) *Military Department:* Air Force (SR–D–QDO)

(v) *Prior Related Cases, if any:* None

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None known at this time

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex

(viii) *Date Report Delivered to Congress:* December 4, 2023

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Saudi Arabia—RE–3A Tactical Airborne Surveillance System Aircraft Modernization

The Kingdom of Saudi Arabia has requested to buy aircraft hardware and software modifications and support to replenish and modernize its RE–3A Tactical Airborne Surveillance System (TASS) aircraft, including: seven (7) Embedded Global Positioning System/Inertial Navigation System (GPS/INS) (EGI) security devices, Airborne, with Selective Availability Anti-Spoofing Module (SAASM) or M-Code capability, and five (5) L3Harris BlackRock Communications Intelligence Sensor Suites. Also included are KY–100M narrowband/wideband secure communications terminals; KIV–77 MODE 4/5 Identification Friend or Foe (IFF) cryptographic appliques; AN/PYQ–10 Simple Key Loaders; integrated electronic intelligence (ELINT)/signals intelligence (SIGINT) systems; L–3 Communication Systems-West (CSW) multiband receivers/transmitters; ARC–210 radios; high frequency (HF) radios; secure communications equipment; precision navigation and cryptographic devices; aircraft support and support equipment; test and integration support; equipment; spare and repair parts; consumables and accessories; repair and return support; U.S. Government and contractor engineering, technical, and logistics support services; studies and surveys; and other related elements of logistics and program support. The estimated total cost is $582 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a partner country that is a force for political stability and economic progress in the Gulf Region.

The proposed sale will improve Saudi Arabia's surveillance capability to counter current and future regional threats, strengthen its homeland defense, and improve interoperability with systems operated by U.S. forces and other Gulf Region partners. Saudi Arabia will have no difficulty absorbing these systems into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be L3 Technologies, Greenville, TX. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Saudi Arabia.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 23–15

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The Embedded Global Positioning System/Inertial Navigation System (GPS/INS) (EGI) with Selective Availability Anti-Spoofing Module (SAASM)—or M-Code receiver when available—and Precise Positioning Service (PPS) is a self-contained navigation system that provides the following: acceleration, velocity, position, attitude, platform azimuth, magnetic and true heading, altitude, body angular rates, time tags, and coordinated universal time (UTC) synchronized time. SAASM or M-Code enables the GPS receiver access to the encrypted P(Y or M) signal, providing protection against active spoofing attacks.

2. The L3Harris BlackRock is a communications intelligence (COMINT) system comprised of multiple Direction Finding (DF) antenna arrays, a Radio Frequency (RF) distribution system, software defined tuners, and a reconfigurable processing solution hosting the applications. The BlackRock provides COMINT processing of over 100 simultaneous signals for complete situational awareness of modern communications environments.

3. The KY–100M is a lightweight terminal for secure voice and data communications. The KY–100M provides wideband/narrowband half-duplex communication. Operating in tactical ground, marine, and airborne applications, the KY–100M enables secure communication with a broad range of radio and satellite equipment.

4 The Electronic Intelligence (ELINT) system is composed of Automatic (L3H Corvus) and Manual (SNC Small SwaP Digital SIGINT system) ELINT systems utilizing Left-Hand Side LHS) and Right-Hand Side (RHS) Interferometer arrays, signal tuners, processing/high speed data storage components, Radio Frequency (RF) distribution system, LHS and RHS steerable beam antennas and a 360-degree spin Direction Finding (DF) antennas.

5. The AN/APQ–10C Simple Key Loader is a handheld fill device for securely receiving, storing, and transferring data between cryptographic and communications equipment.

6. The L–3 Communication Systems-West (CSW) Multiband Receiver/Transmitter is a lightweight, handheld military radio that provides an integrated capability to receive and view battlefield video with advanced tactical voice and data communications.

7. The ARC–210 UHF/VHF secure radio with HAVE QUICK II/SATURN is a voice communications radio system that can operate in either normal, secure, and/or jam-resistant modes.

8. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

9. If a technologically advanced adversary were to obtain knowledge of the hardware and software elements, the information could be used to develop countermeasures or equivalent systems which might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

10. A determination has been made that the Government of Saudi Arabia can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

11. All defense articles and services listed in this transmittal are authorized for release and export to Saudi Arabia.

December 5, 2023

The Honorable Mike Johnson
Speaker of the House
U.S. House of Representatives
H-209, The Capitol
Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(5)(C) of the Arms Export Control Act (AECA), as amended, we are forwarding Transmittal No. 23-0X. This notification relates to enhancements or upgrades from the level of sensitivity of technology or capability described in the Section 36(b)(1) AECA certification 20-57 of September 2, 2020.

Sincerely,

James A. Hursch
Director

Enclosure:
1. Transmittal

BILLING CODE 6001–FR–P

Transmittal No. 23–0X

REPORT OF ENHANCEMENT OR UPGRADE OF SENSITIVITY OF TECHNOLOGY OR CAPABILITY (SEC. 36(B)(5)(C), AECA)

(i) *Purchaser:* Government of Spain

(ii) *Sec. 36(b)(1), AECA Transmittal No.:* 20–57

Date: September 2, 2020

Implementing Agency: Air Force

(iii) *Description:* On September 2, 2020, Congress was notified by Congressional certification transmittal number 20–57, of the possible sale under Section 36(b)(1) of the Arms Export Control Act, of one hundred (100) AIM–120C–7/8 Advanced Medium Range Air-to-Air Missiles (AMRAAM) and one (1) AMRAAM Guidance Section (spare). Also included were KGV–135A encryption devices; containers; weapon support and support equipment; spare and repair parts; publications and technical documentation; United States (U.S.) Government and contractor engineering, technical, and logistics support services; and other related elements of logistical and program support. The estimated total cost was $248.5 million. Major Defense Equipment (MDE) constituted $237.0 million of this total.

This transmittal notifies the addition of the following MDE items: six hundred fifty-five (655) AIM–120 C–8 Advanced Medium Range Air-to-Air Missiles (AMRAAM) or AIM–120 C–8 AMRAAM Extended Range Missiles (AMRAAM–ER); four (4) AIM–120C–8 AMRAAM Instrumented Test Vehicles (ITV); and thirteen (13) AIM–120 C–8 AMRAAM Guidance Sections (AMRAAM GS). Also included are AIM–120 Captive Air Training Missiles (CATM) and spare control sections; Common Munitions Built-in-Test (BIT)/ Reprogramming Equipment (CMBRE); classified software delivery and support; transportation support; and studies and surveys. The estimated total value of the new items is $1.6835 billion. The estimated MDE value will increase by $1.5485 billion to a revised $1.7855 billion. The estimated non-MDE value will increase by $0.135 billion to a revised $0.1465 billion. The estimated total case value will increase to $1.932 billion.

(iv) *Significance:* This notification is being provided as the additional MDE items were not enumerated in the original notification. The inclusion of this MDE represents an increase in capability over what was previously notified. The proposed sale will improve Spain's capability to meet current and future threats by increasing its stocks of AMRAAMs for its fighter aircraft fleets and air defense in support of its national defense and will further strengthen interoperability with the U.S..

(v) *Justification:* This proposed sale will support the foreign policy and national security objectives of the United States by supporting the security and defense needs of a NATO Ally which is an important force for political stability and economic progress in Europe.

(vi) *Sensitivity of Technology:* The Advanced Medium Range Air-to-Air Missile-Extended Range (AMRAAM–ER) variant utilizes an AIM–120C–7 or C–8 seeker and warhead joined with a new control section and rocket rotor (for surface launch mode applications). This provides extended range and altitude as well as higher speed and maneuverability. Common Munitions Built-in-Test (BIT)/Reprogramming Equipment (CMBRE) is supporting equipment.

The Instrumented Test Vehicle (ITV) is a captive carry test vehicle used primarily for flight test integration. The ITV verifies and assesses the aircraft's ability to safely support an AMRAAM launch through the aircraft interface mechanism and the aircraft datalink antenna.

The Sensitivity of Technology Statement contained in the original notification applies to additional items reported here.

The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

(vii) *Date Report Delivered to Congress:* December 5, 2023

BILLING CODE 6001–FR–P

DEPARTMENT OF DEFENSE

Department of the Navy

Department of the Navy Science and Technology Board; Notice of Federal Advisory Committee Meeting

AGENCY: Department of the Navy (DoN), Department of Defense (DoD).

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: The DoD is publishing this notice to announce that the following Federal Advisory Committee meeting of the Department of the Navy Science and Technology Board (DoN S&T Board) will take place.

DATES: An open meeting will be held on Tuesday, December 3, 2024, from 10 a.m. to 10:30 a.m. Eastern Time Zone (ET).

ADDRESSES: The Open session will be held virtually via video conference. Information for accessing the video conference will be provided after registering. (Pre-meeting registration is required. See guidance in **SUPPLEMENTARY INFORMATION** ''Meeting Accessibility''.)

FOR FURTHER INFORMATION CONTACT: Ms. Maria Proestou, Designated Federal Officer (DFO), Office of the Assistant Secretary of the Navy (Research, Development & Acquisition), Pentagon, Washington, DC 20350–1000, 703–692–8278, *don-stb@us.navy.mil.*

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of chapter 10 of title 5 U.S.C. (commonly known as the Federal Advisory Committee Act (FACA), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), title 41 Code of Federal Regulations (CFR) 102–3.140 and 102–3.150. Due to circumstances beyond the control of the Designated Federal Officer, the DoN S&T Board was unable to provide public notification required by 41 CFR 102–3.150(a) concerning its December 3, 2024 meeting. Accordingly, the Advisory Committee Management Officer for the Department of Defense, pursuant to 41 CFR 102–3.150(b), waives the 15-calendar day notification requirement.

Purpose of the Meeting: The purpose of the meeting will be for the Board to vote on two completed study topics, Electronic Warfare for Terminal Defense and Ship Maintenance.

Agenda: On December 3, 2024, the Chair of the Board will convene the open session in order to discuss and vote on forwarding two completed studies to the Board's sponsor, the Secretary of the Navy.

Availability of Materials for the Meeting: A copy of the agenda or any updates to the agenda for the meeting on December 3, 2024, as well as supporting documents, can be found on the website: *https://www.secnav.navy.mil/rda/S&TBoard/Pages/default.aspx.*

Meeting Accessibility: The open session will be held by videoconference. All members of the public who wish to attend must register by contacting DON S&T Board at *don-stb@us.navy.mil.* Once registered, the web address and/or audio number will be provided. If there are any questions or concerns, please send them to *don-stb@us.navy.mil* no later than November 26, 2024.

Written Statements: Pursuant to 41 CFR 102–3.105 and 102–3.140, and section 1009(a)(3) of title 5 U.S.C.,

written statements to the committee may be submitted at any time or in response to a stated planned meeting agenda by email to *don-stb@us.navy.mil* with the subject line, ''Comments for DON S&T Board Meeting.''

Dated: November 22, 2024

A.J. Gioiello,

Lieutenant Commander, Judge Advocate General's Corps, U.S. Navy, Federal Register Liaison Officer.

[FR Doc. 2024–27812 Filed 11–26–24; 8:45 am]

BILLING CODE 3810–FF–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2024–SCC–0142]

Agency Information Collection Activities; Comment Request; EDFacts Data Collection School Years 2025–26, 2026–27, and 2027–28 (With 2024–25 Continuation)

AGENCY: National Center for Education Statistics (IES), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a revision of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before January 27, 2025.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2024–SCC–0142. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the regulations.gov site is not available to the public for any reason, the Department will temporarily accept comments at *ICDocketMgr@ed.gov.* Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. Please note that comments submitted after the comment period will not be accepted. Written requests for information or comments submitted by postal mail or delivery should be addressed to the Manager of the Strategic Collections and Clearance Governance and Strategy Division, U.S. Department of Education, 400 Maryland Ave. SW, LBJ, Room 4C210, Washington, DC 20202–1200.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Carrie Clarady, 202–245–6347.

SUPPLEMENTARY INFORMATION: The Department, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. The Department is soliciting comments on the proposed information collection request (ICR) that is described below. The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: EDFacts Data Collection School Years 2025–26, 2026–27, and 2027–28 (with 2024–25 Continuation).

OMB Control Number: 1850–0925.

Type of Review: A revision of a currently approved ICR.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 61.

Total Estimated Number of Annual Burden Hours: 126,880.

Abstract: EDFacts is a U.S. Department of Education (ED) initiative, conducted by the National Center for Education Statistics (NCES), to collect, analyze, report on, and promote the use of high-quality, pre-kindergarten through grade 12 (pre-K–12) performance data. By centralizing data provided by state education agencies about state level data, local education agencies, and schools, NCES uses the EDFacts data to report on students, schools, staff, services, and education outcomes at the state, district, and school levels. The centralized approach provides ED users with the ability to efficiently analyze and report on submitted data and has reduced the reporting burden for state and local data producers through the use of streamlined data collection, analysis, and reporting tools. EDFacts collects information on behalf of ED grant and program offices for approximately 170 data groups for all 50 states, Washington DC, Puerto Rico, and seven outlying areas and freely associated states (American Samoa, Federated States of Micronesia, Guam, Marshall Islands, Commonwealth of the Northern Mariana Islands, Republic of Palau, and the U.S. Virgin Islands), the Department of Defense Education Activity (DoDEA), and the Bureau of Indian Education (BIE).

This request is to collect EDFacts data for the 2025–26, 2026–27, and 2027–28 school years. This collection package will be available for public comment during two open periods, a 60-day and a 30-day, after which revisions will be made accordingly. As part of the public comment period review, ED requests that SEAs and other stakeholders respond to the directed questions found in Attachment D. Due to overlap in the timing of data collection activities between consecutive years of the EDFacts collection, we are carrying over in this submission the approved SY 2024–25 data collection, which is scheduled to end in February 2026.

Dated: November 22, 2024.

Stephanie Valentine,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

Information collection forms and instructions may be found by clicking on the ''View Information Collection (IC) List'' link. Supporting statements and other supporting documentation may be found by clicking on the ''View Supporting Statement and Other Documents'' link.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Carrie Clarady, 202–245–6347.

SUPPLEMENTARY INFORMATION: The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: School Pulse Panel 2025–26 and 2026–27 (SPP 2025–26, SPP 2026–27) Preliminary Field Activities.

OMB Control Number: 1850–0975.

Type of Review: A revision of a currently approved ICR.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 6,339.

Total Estimated Number of Annual Burden Hours: 2,503.

Abstract: The School Pulse Panel (SPP) is a data collection that was originally designed to collect voluntary responses from a nationally representative sample of public schools to better understand how schools, students, and educators were responding to the ongoing stressors of the coronavirus pandemic. The School Pulse Panel is conducted by the National Center for Education Statistics (NCES), part of the Institute of Education Sciences (IES), within the United States Department of Education. Initially, the purpose of the study was to collect extensive data on issues brought to light by the COVID–19 pandemic, as well as other important education-related issues that could inform data-driven policy decisions, in U.S. public schools. Due to the immediate need to collect pandemic-era information from schools as described in Executive Order 14000, an emergency clearance was issued to develop and field the first several monthly collections of the SPP in 2021 and a full review of the SPP data collection was performed in 2022 (OMB# 1850–0969). SPPs innovative design and timely dissemination of findings have been used and cited frequently among Department of Education senior leadership, the White House Domestic Policy Council, the USDAs Food and Nutrition Service, the Centers for Disease Control and Prevention, Congressional deliberations, and the media. The growing interest from stakeholders resulted in a request for funding to create an established NCES quick-turnaround data collection vehicle to become a mainstay for NCES. Funding for a mainstay collection was approved in late 2022, and NCES conducted a new collection during the 2023–24 school year (OMB# 1850–0975).

The School Pulse Panel study is one of the few reliable, nationally representative, quick-turnaround studies that produces data on U.S. public schools. The sample design for the 2025–26 collection will roughly be the same as the 2024–25 collection with 4,000 public schools randomly selected to an initial sample and 4,000 in a reserve sample. It is expected these schools will come from roughly 3,000 districts. The goal is national representation from about 1,200 responding schools each month in order to report out national estimates. School staff will be asked to provide requested data monthly during the 2025–26 school year. This approach provides the ability to collect detailed information on various topics while also assessing changes over time for items that are repeated from year to year. Given the demand for data collection, the content of the survey is expected to change monthly. For the 2025–26 school year, the survey may ask school staff about a wide range of topics, including but not limited to staffing; learning recovery; absenteeism; usage of federal funds; and overall principal experiences.

This package includes preliminary activities, including contacting and obtaining research approvals from public school districts with an established research approval process (special contact districts) where applicable; notifying sampled schools and districts of their selection for the survey; and inviting them to complete a short Screener Survey to establish points of contact. In spring of 2025, a clearance for main study data collection activities that will include instruments for the first quarter of collections will be submitted for 60-day and 30-day public comment. Subsequent quarterly content submissions will be submitted for 30-day public comment.

This request is to conduct the SPP 2025–26 preliminary activities. Substantial edits and additional materials may be added to this package after the 60-day public comment period is complete, in time for the subsequent 30-day public comment period that will begin Fall 2024. Materials for SPP are cleared under two OMB Number sequences. Materials for SPP 2022 and SPP 2024–25 were cleared under OMB# 1850–0969, while SPP 2023–24 and now SPP 2025–26 are cleared under OMB# 1850–0975.

Dated: November 22, 2024.

Stephanie Valentine,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Proposed Agency Information Collection: Supplemental Labor Management Office (SLMO) Driver Attestation

AGENCY: U.S. Department of Energy.

ACTION: Notice of request for comments.

SUMMARY: The Department of Energy (DOE) invites public comment on a proposed collection of information that DOE is developing for submission to the Office of Management and Budget (OMB) pursuant to the Paperwork Reduction Act of 1995. The information collection requests a three-year approval of its collection, titled BPA Supplemental Labor Management Office (SLMO) Driver Authorization, OMB Control Number 1910–NEW. The proposed collection will ask contract personnel to certify they have

completed the requirements to drive a government vehicle on behalf of BPA and presented credentials to their contract company that they are licensed for the type of license their role requires.

DATES: Comments regarding this collection must be received on or before December 27, 2024. If you anticipate that you will be submitting comments but find it difficult to do so within the period allowed by this notice, please advise the OMB Desk Officer of your intention to make a submission as soon as possible. The Desk Officer may be telephoned at 202–881–8585.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments may be sent to Bonneville Power Administration, Attn: Stephanie Noell, Privacy Program, CGI–7, PO Box 3621, Portland, OR 97208–3621, or by email at *privacy@bpa.gov.*

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Attn: Stephanie Noell, Privacy Program, by email at *privacy@bpa.gov,* or by phone at (503) 230–3881.

SUPPLEMENTARY INFORMATION: This information collection request contains:

(1) *OMB No.:* 1910–NEW;

(2) *Information Collection Request Title:* BPA Supplemental Labor Management Office (SLMO) Driver Authorization;

(3) *Type of Request:* New;

(4) *Purpose:* The purpose of the Information Collection Request is to collect information from BPA contractors at Bonneville Power Administration (BPA) sites pertaining to authorization to operate BPA owned/leased/provided motor vehicles by contracted labor personnel;

(5) *Annual Estimated Number of Respondents:* 250;

(6) *Annual Estimated Number of Total Responses:* 250;

(7) *Annual Estimated Number of Burden Hours:* 250;

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* $17,150.

Statutory Authority: The Bonneville Project Act codified in 16 U.S.C. 832a, the Federal Columbia River Transmission System Act of 1974 codified in 16 U.S.C. 838 *et seq.,* the Pacific Northwest Electric Power Planning and Conservation Act in 16 U.S.C. 839 *et seq.,* Department of Energy Establishment Act 42 U.S.C. 7101 *et seq.,* and 41 CFR 101–39.300 General Services Administration (GSA) Interagency Fleet Management System (IFMS).

Signing Authority: This document of the Department of Energy was signed on November 12, 2024, by Candice D. Palen, Information Collection Clearance Manager, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC on November 22, 2024.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

[Project No. 15300–001]

BOST1 Hydroelectric LLC; Notice of Surrender of Preliminary Permit

Take notice that BOST1 Hydroelectric LLC., permittee for the proposed Heard County Pumped Storage Project, has requested that its preliminary permit be terminated. The permit was issued on October 19, 2023,[1] and would have expired on September 30, 2027. The project would have been located approximately 1.8 miles west of the City of Enon Grove, Heard County, Georgia.

The preliminary permit for Project No. 15300 will remain in effect until the close of business, December 20, 2024. But, if the Commission is closed on this day, then the permit remains in effect until the close of business on the next day in which the Commission is open.[2] New applications for this site may not be submitted until after the permit surrender is effective.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP21–465–004]

Driftwood Pipeline, LLC; Notice of Request for Extension of Time

Take notice that on November 13, 2024, Driftwood Pipeline, LLC (Driftwood Pipeline) requested that the Commission grant an extension of time, until October 21, 2027, to construct and place into service its Line 200 and Line 300 Project (Project), located in Beauregard and Calcasieu Parishes, Louisiana, as authorized in the April 21, 2023 Order Issuing Certificate (Order).[1] The Order required Driftwood Pipeline to complete construction of the Project and make it available for service within two years of the date of the Order, or by April 21, 2025.

Driftwood Pipeline states that it has experienced delays resulting from unforeseen circumstances, including litigation delays from an appeal of the Certificate Order in the United States Court of Appeals for the District of Columbia Circuit and uncertainty associated with impending changes in company leadership and other personnel related to a change in ownership of Driftwood Pipeline's parent company. Driftwood Pipeline states that these issues further complicated efforts to reach a final investment decision, and thus additional time is required for completing construction of the Project and placing it into service.

This notice establishes a 15-calendar day intervention and comment period deadline. Any person wishing to comment on Driftwood Pipeline's request for an extension of time may do so. No reply comments or answers will be considered. If you wish to obtain legal status by becoming a party to the proceedings for this request, you should, on or before the comment date stated below, file a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (NGA) (18 CFR 157.10).

[1] *Driftwood Pipeline LLC,* 183 FERC ¶ 61,049 (2023), *as amended, Driftwood Pipeline LLC,* Errata Notice, Docket Nos. CP21–465–000, *et al.* (May 2, 2023).

As a matter of practice, the Commission itself generally acts on requests for extensions of time to complete construction for NGA facilities when such requests are contested before order issuance. For those extension requests that are contested,[2] the Commission will aim to issue an order acting on the request within 45 days.[3] The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension.[4] The Commission will not consider arguments that re-litigate the issuance of the certificate order, including whether the Commission properly found the project to be in the public convenience and necessity and whether the Commission's environmental analysis for the certificate complied with the National Environmental Policy Act.[5] At the time a pipeline requests an extension of time, orders on certificates of public convenience and necessity are final and the Commission will not re-litigate their issuance.[6] The Director of the Office of Energy Projects, or his or her designee, will act on all of those extension requests that are uncontested.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at (202) 502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

The Commission strongly encourages electronic filings of comments in lieu of paper using the ''eFile'' link at *http://www.ferc.gov.* In lieu of electronic filing, you may submit a paper copy which must reference the Project docket number.

To file via USPS: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

Western Area Power Administration; Notice of Filing

Take notice that on November 15, 2024, Western Area Power Administration submitted a tariff filing per 300.10: UGP_PSMBP–ED_WAPA213–20240930 to be effective 1/1/2025.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFiling'' link at *https://www.ferc.gov.* Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. Brookfield White Pine Hydro, LLC; Notice of Reasonable Period of Time for Water Quality Certification Application

On November 8, 2024, Maine Department of Environmental Protection (Maine DEP) submitted to the Federal Energy Regulatory Commission (Commission) notice that it received a request for a Clean Water Act section 401(a)(1) water quality certification as defined in 40 CFR 121.5, from Brookfield White Pine Hydro, LLC, in conjunction with the above captioned project on October 21, 2024. Pursuant to section 5.23(b) of the Commission's regulations,[1] we hereby notify Maine DEP of the following:

Date of Receipt of the Certification Request: October 21, 2024.

Reasonable Period of Time to Act on the Certification Request: October 21, 2025.

If Maine DEP fails or refuses to act on the water quality certification request on or before the above date, then the certifying authority is deemed waived pursuant to section 401(a)(1) of the Clean Water Act, 33 U.S.C. 1341(a)(1).

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OMS–2024–0127; FRL–12438–01–OMS]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Background Checks for Contractor Employees (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), Background Checks for Contractor Employees (EPA ICR Number 2159.09, OMB Control Number 2030–0043) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through November 30, 2024. Public comments were previously requested via the **Federal Register** on May 29, 2024, during a 60-day comment period. This notice allows for 30 days for public comments.

DATES: Comments must be submitted on or before December 27, 2024.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OMS–2024–0127, to EPA online using *www.regulations.gov* (our preferred method), by email *oei.docket@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Brandon R. Hawkins, Policy and Oversite Branch, Office of Acquisition Solutions (3802R), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: 202–250–8897; email address: *Hawkins.Brandon.R@epa.gov.*

SUPPLEMENTARY INFORMATION: This is a request for approval of a proposed extension of the ICR, which is currently approved through November 30, 2024. An agency may not conduct, or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on May 29, 2024 during a 60-day comment period. This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *https://www.epa.gov/dockets.*

Abstract: The EPA uses contractors to perform services throughout the nation with regard to environmental emergencies involving the release, or threatened release, of oil, radioactive materials, or hazardous chemicals that may potentially affect communities and the surrounding environment. The Agency may request contractors responding to any of these types of incidents to conduct background checks and apply Government-established suitability criteria in 5 CFR 731.104, *Appointments Subject to Investigation;* 5 CFR 732.201, *Sensitivity Level Designations and Investigative Requirements;* and 5 CFR 736.102, *Notice to Investigative Sources* when determining whether employees are acceptable to perform on given sites or on specific projects. In addition to emergency response contractors, EPA may require background checks for contractor personnel working in sensitive sites or sensitive projects. The background checks and application of the Government's suitability criteria must be completed prior to contract employee performance. The contractor shall maintain records associated with all background checks. Background checks cover citizenship or valid visa status, criminal convictions, weapons offenses, felony convictions, and parties prohibited from receiving Federal contracts.

Form Numbers: None.

Respondents/affected entities: Private Contractors.

Respondent's obligation to respond: Required to obtain a benefit per 5 CFR 731.104, 732.201, and 736.102.

Estimated number of respondents: 1,000 (total).

Frequency of response: Triennial.

Total estimated burden: 1,000 hours (per year). Burden is defined at 5 CFR 1320.03(b). *Total estimated cost:* $208,720 (per year), which includes $0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in the hours in the total estimated respondent burden compared with the ICR currently approved by OMB.

Courtney Kerwin,

Director, Information Engagement Division.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Annual Public Water Systems Compliance Report (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), Annual Public Water Systems Compliance Report (EPA ICR Number 1812.08, OMB Control Number 2020–0020) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through November 30, 2024. Public comments were previously requested via the **Federal Register** on March 13, 2024 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before December 27, 2024.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OECA–2020–0020, to EPA online using *www.regulations.gov* (our preferred method), by email to *docket.oeca@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the

proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Michael Chen, Monitoring, Assistance, and Media Programs Division, Office of Compliance, MC–2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564–3371; email address: *chen.michael@epa.gov.*

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through November 30, 2024. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on March 13, 2024 during a 60-day comment period (89 FR 18407). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets.*

Abstract: Section 1414(c)(3)(A) of the Safe Drinking Water Act requires that each state that has primary enforcement authority under the Act shall prepare, make readily available to the public, and submit to the Administrator of EPA, an annual report of violations of national primary drinking water regulations in the state. The states' reports are to include violations of maximum contaminant levels, treatment requirements, variances and exemptions, and monitoring requirements determined to be significant by the Administrator after consultation with the states. To minimize a state's burden in preparing its annual statutorily required report, EPA issued guidance that explains what Section 1414(c)(3)(A) requires and provides model language and reporting templates. EPA also annually makes available to the states a computer query that generates for each state (from information states are already separately required to submit to EPA's national database on a quarterly basis) the required violations information in a table consistent with the reporting template in EPAs guidance.

Form Numbers: None.

Respondents/affected entities: Entities that are potentially affected by this action are states that have primacy enforcement authority and meet the definition of ''state'' under the SDWA.

Respondent's obligation to respond: Mandatory under Section 1414(c)(3)(A) of SDWA.

Estimated number of respondents: 55 (total).

Frequency of response: Annually.

Total estimated burden: 4,400 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: $730,000 (per year), which includes $0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in burden hours from the most recently approved. This is due to two considerations. First, the requirements under SDWA have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the number of states, territories or tribes with primacy has not changed, and is not anticipated to change over the next three years, so there is no significant change in the overall burden. The costs have increased solely due to increases in labor rates, see Tables 1 and 2 for further information.

Courtney Kerwin,

Director, Information Engagement Division.

Agency Information Collection Activities; Proposed Renewal of an Existing ICR Collection and Request for Comment; Assessment of Environmental Performance Standards and Ecolabels for Federal Procurement

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA), this document announces the availability of and solicits public comment on the following Information Collection Request (ICR) that EPA is planning to submit to the Office of Management and Budget (OMB): ''Assessment of Environmental Performance Standards and Ecolabels for Federal Procurement,'' identified by EPA ICR No. 2516.05 and OMB Control No. 2070–0199. This ICR represents a renewal of an existing ICR that is currently approved through September 30, 2025. Before submitting the ICR to OMB for review and approval under the PRA, EPA is soliciting comments on specific aspects of the information collection that is summarized in this document. The ICR and accompanying material are available in the docket for public review and comment.

DATES: Comments must be received on or before January 27, 2025.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2014–0838, through the Federal eRulemaking Portal at *https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Carolyn Siu, Mission Support Division (7602M), Office of Program Support, Office of Chemical Safety and Pollution Prevention, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (703) 719–1649; email address: *siu.carolyn@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. What information is EPA particularly interested in?

Pursuant to PRA section 3506(c)(2)(A) (44 U.S.C. 3506(c)(2)(A)), EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.

2. Evaluate the accuracy of the Agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

3. Enhance the quality, utility, and clarity of the information to be collected.

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic,

mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

II. What information collection activity or ICR does this action apply to?

Title: Assessment of Environmental Performance Standards and Ecolabels for Federal Procurement.

EPA ICR No.: 2516.05.

OMB Control No.: 2070–0199.

ICR status: This ICR is currently approved through September 30, 2025. Under the PRA, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This ICR covers the information collection activities associated with the Agency's evaluation of private sector standards and ecolabels per EPA's Framework for the Assessment of Environmental Performance Standards and Ecolabels for Federal Purchasing (Framework), formerly referred to as the Guidelines. EPA's goal in developing this Framework is to create a transparent, fair, and consistent approach to selecting product environmental performance standards and ecolabels to support the Agency's mission and federal sustainable acquisition goals and mandates. The fundamental aim of this Framework is to establish a cross-sector approach to be used in recognizing private sector environmental performance standards (and consequently, environmentally preferable products and services meeting these standards) for use in federal purchasing.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 8.5 hours per response. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Respondents/affected entities: Entities potentially affected are standard development organizations, ecolabel programs, and certification entities that manage product or service environmental performance standards and/or ecolabels that could be considered for use in United States federal sustainable procurement efforts.

Respondent's obligation to respond: Voluntary. See 15 U.S.C. 3701 and 42 U.S.C. 13103(b)(11).

Forms: EPA Form No. 9600–038.

Frequency of response: On Occasion.

Total estimated number of potential respondents: 100.

Total estimated average number of responses for each respondent: 2.

Total estimated annual burden hours: 613 hours.

Total estimated annual respondent costs: $49,284 which includes $0 for capital investment or maintenance and operational costs.

III. Are there changes in the estimates from the last approval?

There is a decrease in burden of 94 hours. The burden decrease is a result of the decrease of respondents that were not previously assessed per EPA Framework. This change is an adjustment.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Authority: 44 U.S.C. 3501 *et seq.*

Dated: November 21, 2024.

Michal Freedhoff,

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through November 30, 2024. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on September 19, 2024 (89 FR 76826) during a 60-day comment period. This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets.*

Abstract: The Environmental Protection Agency's (EPA) Office of Mission Support provides funding via grants to EPA's Exchange Network partners (states, territories, and federally recognized Indian tribes) to support the development of the Exchange Network (EN). The EN facilitates the sharing of environmental data, especially through shared and reusable services; streamlines data collection and exchanges to improve timeliness for decision making; increases the quality and access to environmental data; reduces burden and costs for co-regulators and the regulated community; supports better decisions on environmental and health issues; and increases capacity for environmental data management for tribes and U.S. territories. As part of the terms and conditions of the EN grant program, recipients are required to submit the following forms: (i) Semi-Annual Progress Reports (EPA Form 5300–26) twice annually throughout the lifetime of the project, Final Progress Report (EPA Form 5300–26) within 120 calendar days after the period of performance end date, and the IT Component and Project Registration Form, at the time of grant close-out. The information gathered on items (i) and (ii) help EPA to ensure that projects are on schedule to meet identified project goals and produce high quality environmental outputs. The registration form (item iii) provides a detailed summary of the completed project and any developed/reused IT components; this information is made available to future applicants to inform the development of their proposed projects, promote the reuse of technologies, and connect to potential project partners and mentors.

Form Numbers: 5300–26.

Respondents/affected entities: Employees of state, tribal, or territorial environmental government offices.

Respondent's obligation to respond: Required to obtain or retain a benefit (2 CFR part 200, ''Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards).

Estimated number of respondents: 223 (149 semi-annually for the semi-annual progress report form; 38 annually for the IT Component and Project Registration Form, and 38 annually for the Final Progress Report Form).

Frequency of response: EPA assumes that each grant recipient will submit two Semi-Annual Progress Report Forms each year the grant is active. In addition, the grantees will submit the Final Progress Report to RENC no later than 120 days after the grant performance period end date. At this time, the IT Component and Project Registration Form will likewise be submitted.

Total estimated burden: 493 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: $29,530 (per year), includes $0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a slight decrease of 15 (493 hours in 2024 vs 508 hours in 2021) hours in the total estimated respondent burden as compared with the ICR currently approved by OMB. The number of open active grants each year was estimated at 149, which matches the 2021 estimate, as the number of new assistance agreements has remained consistent since 2021. Estimates for the Final Progress Reporting Form is also very similar to the 2021 estimate, with only a slight increase in the number of expected closed-out grants (from 36 in 2021 to 38 in 2024). This slight increase reflects an expectation for more EN assistance agreements to close out in the upcoming years, as projects which were initially delayed due to workplace changes associated with COVID–19 are now being completed. The slight decrease in burden hours for respondents can be attributed primarily to the retiring of the Quality Assurance Reporting Form, which was previously required within 90 days of each new assistance agreement. There was a new form added for this ICR, which was not present in the 2021 version. The IT Component and Project Registration Form is a fillable PDF form, that is submitted by the grantee to their Regional Exchange Network Coordinator (RENC) at the time of grant close-out. As this form is due at the time of grant close-out, the estimated number matches the estimated number of Final Progress Reports (38). This new form is estimated to take 2 hours to complete, which is a decrease of 0.6 compared to the retired Quality Assurance Reporting Form.

Courtney Kerwin,

Director, Regulatory Support Division.

Certain New Chemicals; Receipt and Status Information for October 2024

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is required under the Toxic Substances Control Act (TSCA), as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act, to make information publicly available and to publish information in the **Federal Register** pertaining to submissions under TSCA section 5, including notice of receipt of a Premanufacture notice (PMN), Significant New Use Notice (SNUN) or Microbial Commercial Activity Notice (MCAN), including an amended notice or test information; an exemption application (Biotech exemption); an application for a test marketing exemption (TME), both pending and/or concluded; a notice of commencement (NOC) of manufacture (including import) for new chemical substances; and a periodic status report on new chemical substances that are currently under EPA review or have recently concluded review. This document covers the period from October 1, 2024 to October 31, 2024.

DATES: Comments identified by the specific case number provided in this document must be received on or before December 27, 2024.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2024–0057, through the *Federal eRulemaking Portal* at *https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI)

or other information whose disclosure is restricted by statute. Additional instructions on commenting and visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: *For technical information contact:* Jim Rahai, Project Management and Operations Division (MC 7407M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 564–8593; email address: *rahai.jim@epa.gov. For general information contact:* The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; email address: *TSCA-Hotline@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. What action is the Agency taking?

This document provides the receipt and status reports for the period from October 1, 2024 to October 31, 2024. The Agency is providing notice of receipt of PMNs, SNUNs, and MCANs (including amended notices and test information); an exemption application under 40 CFR part 725 (Biotech exemption); TMEs, both pending and/or concluded; NOCs to manufacture a new chemical substance; and a periodic status report on new chemical substances that are currently under EPA review or have recently concluded review.

EPA is also providing information on its website about cases reviewed under the amended TSCA, including the section 5 PMN/SNUN/MCAN and exemption notices received, the date of receipt, the final EPA determination on the notice, and the effective date of EPA's determination for PMN/SNUN/MCAN notices on its website at: *https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca/status-pre-manufacture-notices.* This information is updated on a weekly basis.

B. What is the Agency's authority for taking this action?

Under the Toxic Substances Control Act (TSCA), 15 U.S.C. 2601 *et seq.,* a chemical substance may be either an ''existing'' chemical substance or a ''new'' chemical substance. Any chemical substance that is not on EPA's TSCA Inventory of Chemical Substances (TSCA Inventory) is classified as a ''new chemical substance,'' while a chemical substance that is listed on the TSCA Inventory is classified as an ''existing chemical substance.'' (See TSCA section 3(11).) For more information about the TSCA Inventory please go to: *https://www.epa.gov/tsca-inventory.*

Any person who intends to manufacture (including import) a new chemical substance for a non-exempt commercial purpose, or to manufacture or process a chemical substance in a non-exempt manner for a use that EPA has determined is a significant new use, is required by TSCA section 5 to provide EPA with a PMN, MCAN, or SNUN, as appropriate, before initiating the activity. EPA will review the notice, make a risk determination on the chemical substance or significant new use, and take appropriate action as described in TSCA section 5(a)(3).

TSCA section 5(h)(1) authorizes EPA to allow persons, upon application and under appropriate restrictions, to manufacture or process a new chemical substance, or a chemical substance subject to a significant new use rule (SNUR) issued under TSCA section 5(a)(2), for ''test marketing'' purposes, upon a showing that the manufacture, processing, distribution in commerce, use, and disposal of the chemical will not present an unreasonable risk of injury to health or the environment. This is referred to as a test marketing exemption, or TME. For more information about the requirements applicable to a new chemical go to: *https://www.epa.gov/chemicals-under-tsca.*

Under TSCA sections 5 and 8 and EPA regulations, EPA is required to publish in the **Federal Register** certain information, including notice of receipt of a PMN/SNUN/MCAN (including amended notices and test information); an exemption application under 40 CFR part 725 (biotech exemption); an application for a TME, both pending and concluded; NOCs to manufacture a new chemical substance; and a periodic status report on the new chemical substances that are currently under EPA review or have recently concluded review.

C. Does this action apply to me?

This action provides information that is directed to the public in general.

D. Does this action have any incremental economic impacts or paperwork burdens?

No.

E. What should I consider as I prepare my comments for EPA?

1. *Submitting confidential business information (CBI).* Do not submit this information to EPA through *regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at *https://www.epa.gov/dockets/commenting-epa-dockets.*

II. Status Reports

In the past, EPA has published individual notices reflecting the status of TSCA section 5 filings received, pending, or concluded. In 1995, the Agency modified its approach and streamlined the information published in the **Federal Register** after providing notice of such changes to the public and an opportunity to comment (see the **Federal Register** of May 12, 1995 (60 FR 25798) (FRL–4942–7)). Since the passage of the Lautenberg amendments to TSCA in 2016, public interest in information on the status of section 5 cases under EPA review and, in particular, the final determination of such cases, has increased. In an effort to be responsive to the regulated community, the users of this information, and the general public, to comply with the requirements of TSCA, to conserve EPA resources and to streamline the process and make it more timely, EPA is providing information on its website about cases reviewed under the amended TSCA, including the section 5 PMN/SNUN/MCAN and exemption notices received, the date of receipt, the final EPA determination on the notice, and the effective date of EPA's determination for PMN/SNUN/MCAN notices on its website at: *https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca/status-pre-manufacture-notices.* This information is updated on a weekly basis.

III. Receipt Reports

For the PMN/SNUN/MCANs that have passed an initial screening by EPA during this period, Table I provides the following information (to the extent that such information is not subject to a CBI claim) on the notices screened by EPA

during this period: The EPA case number assigned to the notice that indicates whether the submission is an initial submission, or an amendment, a notation of which version was received, the date the notice was received by EPA, the submitting manufacturer (*i.e.,* domestic producer or importer), the potential uses identified by the manufacturer in the notice, and the chemical substance identity.

As used in each of the tables in this unit, (S) indicates that the information in the table is the specific information provided by the submitter, and (G) indicates that this information in the table is generic information because the specific information provided by the submitter was claimed as CBI. Submissions which are initial submissions will not have a letter following the case number. Submissions which are amendments to previous submissions will have a case number followed by the letter ''A'' (*e.g.* P–18–1234A). The version column designates submissions in sequence as ''1'', ''2'', ''3'', etc. Note that in some cases, an initial submission is not numbered as version 1; this is because earlier version(s) were rejected as incomplete or invalid submissions. Note also that future versions of the following tables may adjust slightly as the Agency works to automate population of the data in the tables.

TABLE I—PMN/SNUN/MCANS APPROVED * FROM 10/01/2024 TO 10/31/2024

Case No.	Version	Received date	Manufacturer	Use	Chemical substance
P–18–0127A	2	10/01/2024	Takasago	(S) Fragrance in fine fragrance, consumer products, household products (laundry detergent), shower gels and shampoos.	(S) Heptane, 2-methoxy-2-methyl-.
P–21–0007A	2	10/25/2024	CBI	(G) Catalyst	(G) Reaction products of Aluminoxanes, Me, Me group-terminated and (alkylcycloalkenyl) dialkylzirconium.
P–21–0008A	2	10/25/2024	CBI	(G) Catalyst	(G) Reaction products of Aluminoxanes, Me, Me group-terminated and cycloalkylene dialkyl tetrahydro indenyl zirconium.
P–22–0068A	4	10/04/2024	Aditya Birla Chemicals (USA), LLC.	(S) An epoxy component used in a reaction with other components to produce an epoxy article.	(S) 2-Propanamine, 1,1'-[(1-methylethylidene)bis(oxy)]bis-.
P–23–0014A	2	10/25/2024	CBI	(G) Intermediate in production of fragrance.	(G) [Polyalkyl-methylenepolyhydro-polycyclic] alkyl acetate.
P–23–0086A	7	10/15/2024	CBI	(G) Additive for surfactant performance enhancement; intermediate used in the manufacturing of detergents.	(S) 1,2-Benzisothiazole, 3-methyl-,1,1-dioxide.
P–24–0006A	7	10/14/2024	CBI	(S) Oilfield Production Scale Inhibitor.	(G) Propenoic acid, methyl- [phosphinicobis(oxyethanediyl)] ester, telomer with methyl -methylpropenoate, (phosphonooxy) ethyl methylpropenoate, propenoic acid, sodium methyl-[(oxopropen-yl) amino]-propanesulfonate and sodium sulfite, sodium salt, peroxydisulfuric acid sodium salt -initiated.
P–24–0160A	3	09/30/2024	CBI	(G) Photoacid generator use at customer sites.	(G) Iodonium, bis (dialkyl carbomonocycle) salt with alkyl carbomonocycle hetero acid.
P–24–0186A	4	10/21/2024	SGP Ventures, Inc.	(S) Epoxy used to fill holes in printed circuit boards.	(S) 2-Oxiranemethanamine, N-[2-methyl-4-(2-oxiranylmethoxy) phenyl]-N-(2-oxiranylmethyl)-.
P–24–0193A	2	10/10/2024	CBI	(G) Dispersive use	(G) Perfluorosulfonic acid polymer, with perfluoro dioxolane.
P–24–0196	1	09/30/2024	Toray Resin Co.	(S) Additives for architectural paints (elongation improvers).	(S) 2-Pyrrolidinone, polymer with 2-oxepanone.
P–24–0196A	2	10/15/2024	Toray Resin Co.	(S) Additives for architectural paints (elongation improvers).	(S) 2-Pyrrolidinone, polymer with 2-oxepanone.
P–25–0001A	2	10/21/2024	Polyfil, Inc.	(G) UV initiated crosslinker	(G) Alkoxy benzophenone.
P–25–0001A	3	10/28/2024	CBI	(G) UV crosslinker initiator	(G) Alkoxy benzophenone.
P–25–0003	1	10/24/2024	CBI	(G) Contained use for microlithography for electronic device manufacturing.	(G) Phenoxathiin ium, 10-phenyl-, tricycloalkylcarbomonocyclesulfonate (1:1).
P–25–0004	1	10/25/2024	CBI	(G) Contained use for microlithography for electronic device manufacturing.	(G) Sulfonium, triphenyl-, heteropolyclyclecarboxylate (1:1).
P–25–0005	1	10/28/2024	CBI	(G) For use in coatings for metal parts.	(G) Cashew, nutshell liq., polymer with [(aminoalkyl)imino] bis[alkanol], bisphenol and epichlorohydrin, reaction products with dialkanolamine, alkyl carboxylates (salts) alkanesulfonates (salts).
P–25–0006	1	10/28/2024	CBI	(G) For use in coatings for metal parts.	(G) Phenol, 4,4-(1-alkylidene) bis-, polymer with [(aminoalkyl)imino] bis[alkanol] and 2-(chloromethyl) oxirane, 3-alkyloxy-2-hydroxypropyl ethers, reaction products with dialkanolamine, alkyl carboxylates (salts). alkanesulfonates (salts).
P–25–0007	1	10/28/2024	CBI	(G) For use in coatings for metal parts.	(G) Phenol, 4,4-(1-alkylidene) bis-, polymer with [(aminoalkyl)imino] bis[alkanol] and 2-(chloromethyl) oxirane, 4-alkylphenyl ethers, reaction products with dialkanolamine, alkyl carboxylates (salts) alkanesulfonates (salts).

TABLE I—PMN/SNUN/MCANS APPROVED * FROM 10/01/2024 TO 10/31/2024—Continued

Case No.	Version	Received date	Manufacturer	Use	Chemical substance
P–25–0008	1	10/28/2024	CBI	(G) For use in coatings for metal parts.	(G) Benzenediol, polymer with [(aminoalkyl)imino] bis[alkanol], 2- (chloromethyl)oxirane and 4,4-(1-alkylidene) bis[phenol], 4-alkylphenyl ethers, reaction products with dialkanolamine, alkyl carboxylates (salts) alkanesulfonates (salts).
P–25–0009	1	10/28/2024	CBI	(G) For use in coatings for metal parts.	(G) Cashew, nutshell liq., polymer with [(aminoalkyl)imino] bis[alkanol], bisphenol, epichlorohydrin and benzenediol, reaction products with dialkanolamine, alkyl carboxylates (salts) alkanesulfonates (salts).
P–25–0010	1	10/28/2024	CBI	(G) For use in coatings for metal parts.	(G) Benzenediol, polymer with [(aminoalkyl)imino] bis[alkanol], 2- (chloromethyl)oxirane and 4,4-(1-alkylidene) bis[phenol], 3-alkyloxy-2-hydroxypropyl ethers, reaction products with dialkanolamine, alkyl carboxylates (salts) alkanesulfonates (salts).
P–25–0012	1	10/30/2024	Bedoukian Research, Inc.	(G) Site limited chemical intermediate.	(G) Alkanoic acid, 4-bromo-, ethyl ester.
SN–22–0010A	4	10/24/2024	CBI	(S) Monomer chemical, reactive diluent in UV coating formulations (existing use, approved by PMN P–18–0392, additive in UV adhesive formulations (new use).	(S) 2-Oxazolidinone, 3-ethenyl-5-methyl-.
SN–25–0001	1	10/16/2024	Ishihara Corporation (USA).	(S) Black pigment for architectural paint; Pigment used for non-spray applications (e.g., to make articles such as plastics, resins, fabrics, and textiles, use in adhesives).	(S) Calcium manganese titanium oxide.

In Table II of this unit, EPA provides the following information (to the extent that such information is not claimed as CBI) on the NOCs that have passed an initial screening by EPA during this period: The EPA case number assigned to the NOC including whether the submission was an initial or amended submission, the date the NOC was received by EPA, the date of commencement provided by the submitter in the NOC, a notation of the type of amendment (*e.g.,* amendment to generic name, specific name, technical contact information, etc.) and chemical substance identity.

TABLE II—NOCS APPROVED * FROM 10/01/2024 TO 10/31/2024

Case No.	Received date	Commencement date	If amendment, type of amendment	Chemical substance
J–24–0016	10/16/2024	09/24/2024	N	(G) Chromosomally modified Saccharomyces cerevisiae.
J–24–0017	10/16/2024	09/24/2024	N	(G) Chromosomally modified Saccharomyces cerevisiae.
J–24–0018	10/16/2024	09/24/2024	N	(G) Chromosomally modified Saccharomyces cerevisiae.
J–24–0019	10/16/2024	09/24/2024	N	(G) Chromosomally modified Saccharomyces cerevisiae.
P–20–0183	10/29/2024	10/05/2024	N	(G) Aryl ether epoxide, homopolymer, ether with alkanolamine.
P–21–0181	10/15/2024	09/17/2024	N	(S) 1,3-Benzenedicarboxamide, N1, N3-bis(3-methylphenyl)-5-[[(3-methylphenyl) amino] sulfonyl]-.
P–22–0095	10/14/2024	10/13/2024	N	(G) Glycolipids.
P–22–0155	10/23/2024	10/14/2024	N	(G) 2-alkyl-1,2-heteropolycycle-3-one.
P–23–0094	10/08/2024	09/10/2024	N	(G) Polymer of benzenedicarboxylic acid, substituted-benzenedicarboxylic acid, branched-alkyldiol, alkyldiol and triisocyanato.
P–23–0164	10/07/2024	10/06/2024	N	(S) Bismuth, 1,1′,1″,1‴-(1,2-ethanediyldinitrilo) tetrakis[2-propanol] 2-(2-ethoxyethoxy) ethanol neodecanoate polypropylene glycol complexes.
P–23–0167	10/21/2024	09/22/2024	N	(G) Bisalkyldiacid fluorophosphate salt.
P–24–0131	10/30/2024	10/28/2024	N	(S) Heptanoic acid, 2-octyldodecyl ester.

In Table III of this unit, EPA provides the following information (to the extent such information is not subject to a CBI claim) on the test information that has been received during this time period: The EPA case number assigned to the test information; the date the test information was received by EPA, the type of test information submitted, and chemical substance identity.

TABLE III—TEST INFORMATION RECEIVED FROM 10/01/2024 TO 10/31/2024

Case No.	Received date	Type of test information	Chemical substance
L–24–0191	10/16/2024	Final Report	(S) 1-Propene, 1-chloro-3,3,3-trifluoro-, (1Z).
P–08–0200	10/29/2024	Required Annual Reporting per Consent Order	(G) Partially fluorinated amphiphilic condensation polymer.

TABLE III—TEST INFORMATION RECEIVED FROM 10/01/2024 TO 10/31/2024—Continued

Case No.	Received date	Type of test information	Chemical substance
P–08–0643	10/29/2024	Required Annual Reporting per Consent Order	(G) Fluorinated acrylic copolymer.
P–08–0748	10/29/2024	Required Annual Reporting per Consent Order	(G) Fluorinated acrylic copolymer.
P–09–0245	10/29/2024	Required Annual Reporting per Consent Order	(G) Partially fluorinated alcohol, reaction products with phosphorous oxide (P2O5), ammonium salts.
P–10–0058	10/29/2024	Required Annual Reporting per Consent Order	(G) Partially fluorinated alcohol substituted glycol.
P–11–0091	10/29/2024	Required Annual Reporting per Consent Order	(G) Fluorinated Acrylic Alkylamino Copolymer.
P–11–0526	10/29/2024	Required Annual Reporting per Consent Order	(G) Amphoteric fluorinated surfactant.
P–12–0450	10/29/2024	Required Annual Reporting per Consent Order	(G) Partially fluorinated alcohol, reaction products with phosphorus oxide (P2O5), amine salts.
P–14–0712	10/08/2024	Quarterly Testing of Substance Using EPA Method 8290A.	(S) Waste plastics, pyrolyzed, C5–55 fraction.
P–14–0712	10/30/2024	Testing of Substance Described Using EPA Method 8290A.	(S) Waste plastics, pyrolyzed, C5–55 fraction.
P–16–0543	10/01/2024	Exposure Monitoring Data	(G) Halogenophosphoric acid metal salt.
P–16–0543	10/22/2024	Exposure Monitoring Data	(G) Halogenophosphoric acid metal salt.
P–22–0042	10/02/2024	Bacterial Reverse Mutation Test (OECD Test Guideline 471).	(G) Alkanedione, [[[(substituted)aryl] thio] aryl]-, 2-(O-acetyloxime).
P–22–0042	10/16/2024	The summary of range finding study for OECD422 and protocol.	(G) Alkanedione, [[[(substituted)aryl] thio] aryl]-, 2-(O-acetyloxime).
P–22–0042	10/18/2024	Notice of test scheduling	(G) Alkanedione, [[[(substituted)aryl] thio] aryl]-, 2-(O-acetyloxime).

If you are interested in information that is not included in these tables, you may contact EPA's technical information contact or general information contact as described under **FOR FURTHER INFORMATION CONTACT** to access additional non-CBI information that may be available.

Authority: 15 U.S.C. 2601 *et seq.*

Dated: November 21, 2024.

Pamela Myrick,

Director, Project Management and Operations Division, Office of Pollution Prevention and Toxics.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2023–0124; FRL–12445–OMS–01]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; NESHAP for Aerospace Manufacturing and Rework Facilities (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Aerospace Manufacturing and Rework Facilities (EPA ICR Number 1687.13, OMB Control Number 2060–0314) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through November 30, 2024. Public comments were previously requested via the **Federal Register** on May 18, 2023 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before December 27, 2024.

ADDRESSES: Submit your comments, referencing Docket ID Number Docket ID Number EPA–HQ–OAR–2023–0124, to EPA online using *www.regulations.gov* (our preferred method), by email to *a-and-r-docket@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Muntasir Ali, Sector Policies and Program Division (D243–05), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–0833; email address: *ali.muntasir@epa.gov.*

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through November 30, 2024. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on May 18, 2023 during a 60-day comment period (88 FR 31748). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *https://www.epa.gov/dockets.*

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for the regulations published at 40 CFR part 63, subpart GG were proposed on June 6, 1994; promulgated on September 1, 1995; and amended on

both December 7, 2015 and August 3, 2016. These regulations apply to existing and new aerospace manufacturing and rework facilities where the total hazardous air pollutants (HAP) emitted are greater than or equal to 10 tons per year of any combination of HAP, or where the total HAP emitted are greater than or equal to 25 tons per year of any combination of HAP. New facilities include those that commenced construction or reconstruction after the date of proposal. Operations covered include: cleaning, primer and top coat application, depainting, chemical milling maskant application, handling and storage of waste, and specialty coating operations. This information is being collected to assure compliance with 40 CFR part 63, subpart GG.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities: Aerospace manufacturing and rework facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart GG).

Estimated number of respondents: 144 (total).

Frequency of response: Initially, semiannually, annually.

Total estimated burden: 154,000 total hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $16,800,000 (per year), includes $224,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no significant change in burden from the most recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Second, the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. There is an increase in capital and operation & maintenance costs due to an adjustment to increase from 2007 to 2022 $ using the CEPCI Equipment Cost Index.

Courtney Kerwin,

Director, Information Engagement Division.

Agency Information Collection Activities Submission to the Office of Management and Budget for Review and Approval; Comment Request; Toxic Chemical Release Reporting (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), Toxic Chemical Release Reporting, (EPA ICR Number 2613.07, OMB Control Number 2070–0212) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR which is currently approved through June 30, 2025. Public comments were previously requested via the **Federal Register** on September 18, 2024, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before December 27, 2024.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OPPT–2020–0078, to EPA online using *www.regulations.gov* (our preferred method) or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 2821T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Katherine Sleasman, Office of Program Support (7602M), Office of Chemical Safety and Pollution Prevention, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 566–1206; email address: *sleasman.katherine@epa.gov*.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR which is currently approved through June 30, 2025. An agency may not conduct, or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on September 18, 2024 during a 60-day comment period (89 FR 76470). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets.*

Abstract: Pursuant to section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA), certain facilities that manufacture, process, or otherwise use specified toxic chemicals in amounts above reporting threshold levels as provided in 40 CFR 372.25 must submit annually to EPA and to their designated state or Indian country officials toxic chemical release forms containing information specified by EPA; (see 42 U.S.C. 11023). In addition, pursuant to section 6607 of the Pollution Prevention Act (PPA), facilities reporting under section 313 of EPCRA must also report pollution prevention and waste management data, including recycling information, for such chemicals; (see 42 U.S.C. 13106). EPA compiles and stores these reports in a publicly accessible database known as the Toxics Release Inventory (TRI). Regulations at 40 CFR part 372, subpart B, require facilities that meet the above criteria to report annually.

This ICR consolidates the following final rule ICRs titled: ''Rule-Related ICR Amendment; Changes to Reporting Requirements for Per- and

Polyfluoroalkyl Substances; Community Right-to-Know Toxic Chemical Release Reporting, Final Rule (RIN 2070–AK97)'' (OMB Control Number 2070–0225; EPA ICR Number 2724.02), ''Addition of Natural Gas Processing Facilities to the Toxics Release Inventory (TRI) (Final Rule)'' (OMB Control Number 2070–0206; EPA ICR Number 2560.02); and ''Parent Company Definition for TRI Reporting (Final Rule)'' (OMB Control Number 2070–0216; EPA ICR Numer 2597.02) into this renewal ICR. Upon OMB approval of this ICR, EPA intends to discontinue OMB Control Numbers 2070–0225, 2070–0206, and 2070–0216.

Form numbers: 9350–1, 9350–2, and 9350–3.

Respondents/affected entities: Entities potentially affected are those that apply to owners and operators of facilities covered under EPCRA section 313(a). EPCRA section 313(a) includes facilities that meet the following three criteria: have 10 or more full-time employee equivalents (*i.e.,* a total of 20,000 hours worked per year or greater; see 40 CFR 372.3). The full list of potentially affected entities by North American Industry Classification System (NAICS) codes for facilities that must report to TRI (including exemptions and/or limitations), if all other reporting thresholds are met, can be found at 40 CFR 372.23.

Respondent's obligation to respond: Mandatory (40 CFR 372.23).

Estimated number of respondents: 24,742 (total).

Frequency of response: Annual.

Total estimated burden: 3,600,970 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $285,304,888 (per year), which includes $0 annualized capital or operation & maintenance costs.

Changes in the estimates: There is an overall average decrease of 698 Form Rs and an increase of 1600 Form As estimated to be submitted to EPA as a result of EPA's exercise of its discretionary authority to apply TRI reporting requirements to 2,990 particular facilities, for specified chemicals. There is a decrease of 15,858 burden hours. This is an adjustment to the estimates.

Courtney Kerwin,

Director, Information Engagement Division.

Proposed Settlement With Bona Fide Prospective Purchaser, Miners Point Ventures, LLC, Central City, Clear Creek Superfund Site, Colorado

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed settlement; request for public comment.

SUMMARY: Notice is hereby given by the U.S. Environmental Protection Agency (EPA), Region 8, of an administrative settlement agreement for response action by bona fide prospective purchaser entered into voluntarily by the United States of America (''United States'') on behalf of the United States Environmental Protection Agency (''EPA''), the State of Colorado (''State'') and Miners Point Ventures, LLC (''Purchaser'') in connection with the Central City, Clear Creek Superfund Site in Idaho Springs, Clear Creek County, Colorado (''Site''). It is now subject to public comment, after which EPA may modify or withdraw its consent if comments received disclose facts or considerations that indicate that the proposed agreement is inappropriate, improper, or inadequate.

DATES: Comments must be submitted on or before December 27, 2024.

ADDRESSES: The proposed agreement and additional background information relating to the agreement will be available upon request. Any comments or requests or for a copy of the proposed agreement should be addressed to Crystal Kotowski-Edmunds, Enforcement Specialist, Superfund and Emergency Management Division, Environmental Protection Agency, Region 8, Mail Code 8SEM–PAC, 1595 Wynkoop Street, Denver, Colorado 80202, telephone number: (303) 312–6124, email address: *edmunds.crystal@epa.gov,* and should reference the Central City, Clear Creek Site. You may also send comments, identified by Docket ID No. EPA–R08–SFUND–2024–0475, to *https://www.regulations.gov.* Follow the online instructions for submitting comments.

FOR FURTHER INFORMATION CONTACT: Amelia Piggott, Attorney, Office of Regional Counsel, Environmental Protection Agency, Region 8, Mail Code 8ORC–LEC, 1595 Wynkoop, Denver, Colorado 80202, telephone number:(303) 312–6410, email address: *piggott.amelia@epa.gov.*

SUPPLEMENTARY INFORMATION: This settlement provides for the performance of a response action by Purchaser and the payment for certain response costs incurred by the United States and the State of Colorado at or in connection with property within the Site (''Property''). Uncovered mine waste containing lead and arsenic is located on the Property. EPA and the State previously installed engineering controls to a mine waste pile on the Property to ensure lead and aresenic-laden mine waste do not erode into Clear Creek. Uncovered mine waste remains on the Property. Purchaser anticipates developing the Property into a mining-related tourist attraction that will include operation of a gondola that will transport tourists to recreational hiking trails. In order to ensure the development will be protective of human health and the environment, the Purchaser will conduct risk assessment work.

For thirty (30) days following the date of publication of this document, EPA will receive electronic comments relating to the proposed agreement. EPA's response to any comments received will be available for public inspection by request. Please see the **ADDRESSES** section of this document for instructions.

Aaron Urdiales,

Division Director, Superfund and Emergency Management Division, Region 8.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–12428–01–R6]

Clean Air Act Operating Permit Program: Order on Petitions for Objection to State Operating Permit for Flint Hills Resources Ingleside LLC, San Patricio County, Texas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final order on petition.

SUMMARY: The Environmental Protection Agency (EPA) Administrator signed an Order dated November 14, 2024, granting in part and denying in part two petitions dated July 10, 2024 (collectively the Petitions), from the Environmental Integrity Project, Ingleside on the Bay Coastal Watch Association, and TCHD Consulting LLC (the Petitioners). The Petitions requested that the EPA object to a Clean Air Act (CAA) title V operating permit issued by the Texas Commission on

Environmental Quality (TCEQ) to Flint Hills Resources LLC, for its Ingleside Terminal located in San Patricio County, Texas.

FOR FURTHER INFORMATION CONTACT: Jonathan Ehrhart, EPA Region 6 Office, Air Permits Section, (214) 665–2295, *ehrhart.jonathan@epa.gov.* The final order and petitions are available electronically at: *https://www.epa.gov/title-v-operating-permits/title-v-petition-database.*

SUPPLEMENTARY INFORMATION: The EPA received two petitions from Environmental Integrity Project, Ingleside on the Bay Coastal Watch Association, and TCHD Consulting LLC dated July 10, 2024, requesting that the EPA object to the issuance of operating permit No. O3454, issued by TCEQ to Flint Hills Resources LLC, for its Ingleside Terminal located in San Patricio County, Texas. On November 14, 2024, the EPA Administrator issued an Order granting in part and denying in part the petitions. The order itself explains the basis for the EPA's decision.

Sections 307(b) and 505(b)(2) of the CAA provide that a petitioner may request judicial review of those portions of an order that deny issues in a petition. Any petition for review shall be filed in the United States Court of Appeals for the appropriate circuit no later than January 27, 2025.

Dated: November 21, 2024.

David Garcia,

Director, Air and Radiation Division, Region 6.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1298; FR ID 264211]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

DATES: Written PRA comments should be submitted on or before January 27, 2025. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *nicole.ongele@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION: The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

OMB Control Number: 3060–1298.

Title: Volunteer Service Agreement Form, FCC Form A–384.

Form No.: FCC Form A–384.

Type of Review: Revision of a currently approved collection.

Respondents: Individuals or households.

Number of Respondents and Responses: 140 respondents and 140 responses.

Estimated Time per Response: 0.25 hours.

Frequency of Response: One-time reporting requirement.

Obligation to Respond: Mandatory. The statutory authority to collect this information derives from 5 U.S.C. 3111, Acceptance of volunteer service.

Total Annual Burden: 35 hours.

Total Annual Cost: No Cost.

Needs and Uses: The Civil Service Reform Act of 1978 authorized Federal agencies to establish programs designed to provide educationally related work assignments for students in a non-pay status. The Act provides that heads of agencies may accept, subject to regulations issued by the Office of Personnel Management, volunteer service for the United States if the service (l) is performed by a student, with permission of the institution at which the student is enrolled; (2) is to be uncompensated; and (3) will not displace any employee. Form A–384 establishes the responsibility of students, their institutions, and the FCC as a precondition to accepting individuals as unpaid volunteers.

Federal Communications Commission.

Marlene Dortch,

Secretary. Office of the Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0706; FR ID 263015]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s). Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with

a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before January 27, 2025. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contacts below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0706.

Title: Sections 76.952 and 76.990, Cable Act Reform.

Type of Review: Extension a currently approved collection.

Respondents: Business or other for-profit entities; State, Local or Tribal Government.

Number of Respondents and Responses: 70 respondents; 70 responses.

Estimated Time per Response: 1–8 hours.

Frequency of Response: On occasion reporting requirement; Third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in the Telecommunications Act of 1996, Public Law 104–104, Sections 301 and 302, 110 Stat. 56, 114–124.

Total Annual Burden: 210 hours.

Total Annual Cost: None.

Needs and Uses: The information collection requirements contained in 47 CFR 76.952 state that all cable operators must provide to the subscribers on monthly bills the name, mailing address and phone number of the franchising authority, unless the franchising authority in writing requests that the cable operator omits such information. The cable operator must also provide subscribers with the FCC community unit identifier for the cable system in their communities. 47 CFR 76.990(b)(1) requires that a small cable operator may certify in writing to its franchise authority at any time that it meets all criteria necessary to qualify as a small operator. Upon request of the local franchising authority, the operator shall identify in writing all of its affiliates that provide cable service, the total subscriber base of itself and each affiliate, and the aggregate gross revenues of its cable and non-cable affiliates. Within 90 days of receiving the original certification, the local franchising authority shall determine whether the operator qualifies for deregulation and shall notify the operator in writing of its decision, although this 90-day period shall be tolled for so long as it takes the operator to respond to a proper request for information by the local franchising authority. An operator may appeal to the Commission a local franchise authority's information request if the operator seeks to challenge the information request as unduly or unreasonably burdensome. If the local franchising authority finds that the operator does not qualify for deregulation, its notice shall state the grounds for that decision. The operator may appeal the local franchising authority's decision to the Commission within 30 days.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (Act) (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the applications are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the standards enumerated in paragraph 7 of the Act.

Comments received are subject to public disclosure. In general, comments received will be made available without change and will not be modified to remove personal or business information including confidential, contact, or other identifying information. Comments should not include any information such as confidential information that would not be appropriate for public disclosure.

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than December 12, 2024.

A. Federal Reserve Bank of Atlanta (Erien O. Terry, Assistant Vice President) 1000 Peachtree Street NE, Atlanta, Georgia 30309. Comments can also be sent electronically to *Applications.Comments@atl.frb.org:*

1. *Nitin Shah and Mili N. Shah, both of Lawrenceville, Georgia;* as a group acting in concert, to retain voting shares of Embassy Bancshares, Inc., and thereby indirectly retain voting shares of Embassy National Bank, both of Lawrenceville, Georgia.

B. Federal Reserve Bank of Kansas City (Jeffrey Imgarten, Assistant Vice President) 1 Memorial Drive, Kansas City, Missouri, 64198–0001. Comments can also be sent electronically to *KCApplicationComments@kc.frb.org:*

1. *Michael Scott Crowe, Sr., as co-trustee of the Robert E. Oliphant Trust, both of Kansas City, Missouri;* to retain control of voting shares of Country Agencies & Investments, Inc., and thereby indirectly retain control of voting shares of Bank of Odessa, both of Odessa, Missouri.

The Robert E. Oliphant Trust has previously been permitted to control voting shares of Country Agencies & Investments, Inc.

Board of Governors of the Federal Reserve System.

Michele Taylor Fennell,

Associate Secretary of the Board.

FEDERAL RESERVE SYSTEM

[Docket No. OP–1862]

Federal Reserve Bank Services

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) has approved the private-sector adjustment factor (PSAF) for 2025 of $31.9 million and the 2025 fee schedules for Federal Reserve priced services and electronic access. These actions were taken in

accordance with the Monetary Control Act of 1980, which requires that, over the long run, fees for Federal Reserve priced services be established based on all direct and indirect costs, including the PSAF.

DATES: The new fee schedules become effective January 1, 2025.

FOR FURTHER INFORMATION CONTACT: For questions regarding the fee schedules: Ian Spear, Deputy Associate Director, (202) 452–3959; Anjana Ravi, Manager, (202) 530–6286; Division of Reserve Bank Operations and Payment Systems. For questions regarding the PSAF: Casey Clark, Associate Director, (202) 912–7978; Jamie Noonan, Assistant Director, (202) 530–6296; Grace Milbank, Lead Financial Institution Policy Analyst, (202) 263–4828; Division of Reserve Bank Operations and Payment Systems. For users of TTY–TRS, please call 711 from any telephone, anywhere in the United States. Copies of the 2025 fee schedules for Check Services are available from the Board, the Federal Reserve Banks, or the Federal Reserve Financial Services (FRFS) website at *www.FRBservices.org.*

SUPPLEMENTARY INFORMATION:

I. Private-Sector Adjustment Factor, Priced Services Cost Recovery, and Overview of 2025 Price Changes

A. *Overview*—Each year, as required by the Monetary Control Act of 1980 (MCA), the Reserve Banks set fees for priced services provided to financial institutions. These fees are set to recover, over the long run, all direct and indirect costs and imputed costs, including financing costs, taxes, and certain other expenses, as well as the return on equity (profit) that would have been earned if a private-sector business provided the services.[1] The imputed costs and imputed profit are collectively referred to as the private-sector adjustment factor (PSAF).

From 2014 through 2023, the Reserve Banks recovered 102.6 percent of their total expenses (including imputed costs) and targeted after-tax profits or return on equity (ROE) for the mature services. During that period, Check Services, the Fedwire® Funds Service, the National Settlement Service (NSS), and the Fedwire® Securities Service achieved full cost recovery. The FedACH® Service achieved 99.0 percent cost recovery as a result of the Reserve Banks' development and implementation of a multiyear technology initiative to modernize the capabilities of the FedACH Service processing platform. Although the modernized platform was implemented in 2021, the Reserve Banks are continuing to invest in platform capabilities, as well as resiliency, as part of a broader enhancement strategy.[2]

In its 2019 notice entitled *Federal Reserve Actions to Support Interbank Settlement of Instant Payments* (''2019 Notice''), the Board communicated that it expects the FedNow® Service to achieve its first instance of long-run cost recovery outside the 10-year time frame typically applied to mature services. New services like the FedNow Service are not expected to initially have stable volumes, costs, and revenues.[3] Thus, FedNow Service revenue and expenses are excluded from the overall performance projections. The FedNow Service is discussed in section G.

Table 1 summarizes 2023 actual, 2024 forecasted, and 2025 budgeted annual cost recovery rates for all mature priced services. Cost recovery is forecasted to be 108.8 percent in 2024 and budgeted to be 104.1 percent in 2025.

TABLE 1—AGGREGATE MATURE PRICED SERVICES PRO FORMA COST AND REVENUE PERFORMANCE [a]

[Dollars in millions]

Year	Revenue	Total expense	Net income (ROE)	Targeted ROE	Recovery rate after targeted ROE (%)
	1 [b]	2 [c]	3 [1 − 2]	4 [d]	5 [e] [1/(2 + 4)]
2023 (actual)	507.3	467.1	40.1	8.4	106.7
2024 (forecast)	520.9	468.9	52.0	9.7	108.8
2025 (budget)	531.7	499.8	31.9	10.8	104.1

[a] Calculations in this table and subsequent pro forma cost and revenue tables may be affected by rounding. Excludes amounts related to the FedNow Service.

[b] Revenue includes imputed income on investments when equity is imputed at a level that meets minimum capital requirements and, when combined with liabilities, exceeds total assets. For 2025, the budgeted revenue assumes implementation of the fee changes.

[c] The calculation of total expense includes operating, imputed, and other expenses. Imputed and other expenses include taxes, Board of Governors priced services expenses, the cost of float, and interest on imputed debt, if any. Credits or debits related to the accounting for pension plans under ASC 715 are also included.

[d] Targeted ROE is the after-tax ROE included in the PSAF.

[e] The recovery rates in this and subsequent tables do not reflect the unamortized gains or losses that must be recognized in accordance with ASC 715. Future gains or losses, and their effect on cost recovery, cannot be projected.

[1] *See* 12 U.S.C. 248a. *See also Principles for the Pricing of Federal Reserve Bank Services,* 46 FR 1338, 1339 (Jan. 6, 1981), *available at https://www.federalreserve.gov/paymentsystems/pfs_principles.htm.* Although the Monetary Control Act does not define ''over the long run,'' the Board has generally measured long-run cost recovery for mature services to be over a 10-year rolling time frame. The Board currently views a 10-year cost recovery expectation as appropriate for assessing mature services, which are those that have achieved a critical mass of customer participation and generally have stable and predictable volumes, costs, and revenues. The 10-year recovery rate is based on the pro forma income statements for Federal Reserve priced services published in the Board's *Annual Report.* In accordance with Accounting Standards Codification (ASC) 715 *Compensation—Retirement Benefits,* the Reserve Banks recognized a $548.6 million cumulative reduction in equity related to the priced services' benefit plans through 2023. Including this cumulative reduction in equity from 2014 to 2023 results in cost recovery of 102.6 percent for the 10-year period. This measure of long-run cost recovery is also published in the Board's *Annual Report.*

[2] In alignment with the Board's *Principles for the Pricing of Federal Reserve Bank Services,* the Reserve Banks will continue to assess the tradeoffs between price stability for customers, investment in technology infrastructure to reflect desirable longer-run improvements in the ACH system, and the expectation of achieving full cost recovery for the FedACH Service over the long run.

[3] Application of the 10-year rolling time frame used to evaluate mature services to the FedNow Service would result in prohibitively high or unnecessarily volatile pricing, negatively affecting the Federal Reserve's public policy objectives in providing the service. See *Federal Reserve Actions to Support Interbank Settlement of Instant Payments, 84 FR 39297,* (Aug. 9, 2019).

Table 2 provides an overview of cost recovery budgets, forecasts, and performance for the 10-year period from 2014 to 2023, 2023 actual, 2024 budget, 2024 forecast, and 2025 budget by mature priced service.

TABLE 2—MATURE PRICED SERVICES COST RECOVERY

[Percent]

Priced service	2014–2023	2023 Actual	2024 Budget [a]	2024 Forecast	2025 Budget [b]
All mature services	102.6	106.7	103.1	108.8	104.1
Check	106.9	102.9	95.5	102.9	97.5
FedACH	99.0	108.8	106.0	109.4	106.0
Fedwire Funds and NSS	101.9	103.1	103.2	108.3	103.2
Fedwire Securities	105.7	122.3	110.9	123.2	115.7

[a] The 2024 budget figures reflect the final budgets as approved by the Board in December 2023. *See* Board of Governors of the Federal Reserve System, *2024 Federal Reserve Banks Budgets, https://www.federalreserve.gov/foia/files/2024ReserveBankBudgets.pdf.*

[b] The 2025 budget figures reflect preliminary budget information from the Reserve Banks. The Reserve Banks will submit final budget data to the Board for consideration by December 2024.

1. *2024 Forecasted Performance*—The Reserve Banks forecast that they will recover 108.8 percent of the costs of providing mature priced services in 2024, including total expense and targeted ROE, compared with a 2024 budgeted recovery rate of 103.1 percent, as shown in Table 2. Overall, the Reserve Banks forecast that they will fully recover actual and imputed costs and earn net income of $52.0 million, compared with the targeted ROE of $9.7 million. The Reserve Banks forecast that all mature services will achieve full cost recovery in 2024.

2. *2025 Private-Sector Adjustment Factor*—The 2025 PSAF for Reserve Bank mature priced services is $31.9 million.[4] This amount represents an increase of $2.7 million from the 2024 PSAF of $29.2 million. This increase is attributable to a $2.1 million increase in the cost of capital primarily driven by higher short-term debt and higher return on equity and a $0.6 million increase in sales tax.

3. *2025 Projected Performance*—The Reserve Banks project a mature priced services cost recovery rate of 104.1 percent in 2025, with a net gain of $31.9 million and targeted ROE of $10.8 million. The Reserve Banks project that each of the individual mature service lines will achieve full cost recovery in 2025 except for Check Services. Check Services are expected to under recover primarily because of anticipated volume declines. The Reserve Banks' primary risks to current projections are unanticipated volume and revenue reductions and the potential for cost overruns from new and ongoing improvement initiatives.

4. *2025 Pricing*—The following summarizes the Reserve Banks' changes to fee schedules for priced services in 2025. For the mature services, these changes collectively are an average price increase of 2.8 percent. The price changes outlined below are in line with the Reserve Banks' strategy to offset rising costs, diversify revenue sources, and continue to reduce pricing volatility.

Check Services

The Reserve Banks will increase participation fees, FedImage® fees, and certain forward paper and return paper fees. These changes will increase fixed fee revenue stability in light of declining check volumes.

FedACH Service

The Reserve Banks will increase participation fees, origination and receipt minimum fees, and FedPayments Reporter® Service fees. These changes will help address ongoing operational costs, provide greater revenue stability, and account for the additional business value provided by the service enhancements over the last several years.

Fedwire Funds Service

The Reserve Banks will increase the Fedwire Funds participation fee, the transfer fee for all three tiers, and the FedPayments® Manager Import/Export fee. These increases will account for projected declining volume growth, coupled with ongoing technology enhancements and higher operating costs.[5] In addition, the Fedwire Funds Service will introduce a new fixed fee that will serve to better align fees with customer usage as well as address challenges associated with revenue volatility.

National Settlement Service

The Reserve Banks will increase the National Settlement Service per-file and per-entry fees. These changes will help address rising operational costs.

Fedwire Securities Service

The Reserve Banks will maintain prices at existing levels for all Fedwire Securities priced services.

FedNow Service

The Reserve Banks will modify the Customer Credit Transfer, Customer Credit Transfer Return, and Request for Payment fee components of the FedNow Service to exclude ''on-us'' transactions sent from and received at the same financial institution.[6] This adjustment will both align with prevailing market practices and reduce inefficient off-network transaction activity. All other price points and discounts in the FedNow Service's fee schedule from the previous year will be maintained in 2025.

FedLine® Solutions

The Reserve Banks will increase the monthly fees for the FedLine Direct® Solution, FedLine Command® Solution, and FedComplete® Packages. These price modifications account for enhancements to services and rising operational costs. The Reserve Banks are also discontinuing FedComplete Premier and FedLine Exchange® to streamline the FedLine product suite in response to a declining customer base and to simplify internal operating, servicing, and billing processes. Lastly, the Reserve Banks are preparing to

[4] The FedNow Service launched in July 2023. Inclusive of the FedNow Service, the PSAF increases to $42.3 million for 2025. Per its 2019 Notice, the Board has determined that it is most appropriate to report FedNow Service cost recovery independently of mature priced services until the service has relatively stable revenues and costs. Thus, FedNow Service revenue is excluded from overall performance projections for 2025.

[5] Historically, Fedwire Funds volume has evolved in line with GDP forecasts.

[6] These fee modifications will take place at the parent financial institution level, as defined in the Reserve Banks' Global Customer Directory. ''On-us'' transactions include those made by the same financial institution, even if the financial institution uses multiple Routing Transit Numbers (RTNs).

implement a fee structure for services offered via Application Programming Interfaces (APIs) in 2025.

B. *Private-Sector Adjustment Factor*—The imputed debt financing costs, targeted ROE, and effective tax rate are based on a U.S. publicly traded market model.[7] The method for calculating the financing costs in the PSAF requires determining the appropriate imputed levels of debt and equity and then applying the applicable financing rates. In this process, a pro forma balance sheet using estimated assets and liabilities associated with the Reserve Banks' priced services is developed, and the remaining elements that would exist are imputed as if these priced services were provided by a private business firm. The same generally accepted accounting principles that apply to commercial-entity financial statements apply to the relevant elements in the priced services pro forma financial statements.

The portion of Federal Reserve assets that will be used to provide priced services during the coming year is determined using information about actual assets and projected disposals and acquisitions. The priced portion of these assets is determined based on the allocation of depreciation and amortization expenses of each asset class. The priced portion of actual Federal Reserve liabilities consists of post-employment and post-retirement benefits, accounts payable, and other liabilities. The priced portion of the actual net pension asset or liability is also included on the balance sheet.[8]

The equity financing rate is the targeted ROE produced by the capital asset pricing model (CAPM). In the CAPM, the required rate of return on a firm's equity is equal to the return on a risk-free asset plus a market risk premium. The risk-free rate is based on the three-month Treasury bill; the beta is assumed to be equal to 1.0, which approximates the risk of the market as a whole; and the market risk premium is based on the monthly returns in excess of the risk-free rate over the most recent 40 years. The resulting ROE reflects the return a shareholder would expect when investing in a private business firm.

For simplicity, given that state income tax rates vary, and various credits and deductions can apply at the federal or state level, an actual income tax expense is not explicitly calculated for Reserve Bank priced services. Instead, the Board targets a pretax ROE that would provide sufficient income to fulfill the priced services' imputed income tax obligations. To the extent that performance results are greater or less than the targeted ROE, income taxes are adjusted using the effective tax rate.

Capital structure. The capital structure is imputed based on the imputed funding need (assets less liabilities), subject to minimum equity constraints. Short-term debt is imputed to fund the imputed short-term funding need. Long-term debt and equity are imputed to meet the priced services long-term funding need at a ratio based on the capital structure of the U.S. publicly traded market.[9] Any equity imputed that exceeds the amount needed to fund the priced services' assets and meet the minimum equity constraints is offset by a reduction in imputed long-term debt. When imputed equity is larger than what can be offset by imputed debt, the excess is imputed as investments in Treasury securities; income imputed on these investments reduces the PSAF.

Application of the Federal Reserve Policy on Payment System Risk (PSR policy) to the Fedwire Funds Service. The Board's PSR policy incorporates the international standards for financial market infrastructures (FMIs) developed by the Committee on Payments and Market Infrastructures (CPMI) and the Technical Committee of the International Organization of Securities Commissions (IOSCO) known as the *Principles for Financial Market Infrastructures*.[10] The Board recognizes the critical role the Fedwire Services, including the Fedwire Funds Service, play in the financial system and requires them to meet or exceed the risk-management standards in the PSR policy, consistent with relevant guidance and the requirements in the MCA.[11] Principle 15 states that an FMI should identify, monitor, and manage general business risk and hold sufficient liquid net assets funded by equity to cover potential general business losses so that it can continue operations and services as a going concern if those losses materialize. Further, liquid net assets should at all times be sufficient to ensure a recovery or orderly wind-down of critical operations and services. The Fedwire Funds Service does not face the risk that a business shock would cause the service to wind down in a disorderly manner and disrupt the stability of the financial system. To foster competition with private-sector FMIs, however, the Reserve Banks' priced services will hold an amount equivalent to six months of the Fedwire Funds Service's current operating expenses as liquid financial assets and equity on the pro forma balance sheet.[12] Current operating expenses are defined as normal business operating expenses on the income statement, less depreciation, amortization, taxes, and interest on debt. Using the Fedwire Funds Service's preliminary 2025 budget, six months of current operating expenses would be $71.7 million. In 2025, equity was sufficient to meet the FDIC capital requirements and $6.7 million of equity was imputed to meet the PSR policy requirement.

Effective tax rate. Like the imputed capital structure, the effective tax rate is calculated based on data from U.S. publicly traded firms. The tax rate is the mean of the weighted average rates of the U.S. publicly traded market over the past five years.

Debt and equity financing. The imputed short- and long-term debt financing rates are derived from the nonfinancial commercial paper rates from the Federal Reserve Board's H.15 Selected Interest Rates release (AA and A2/P2) and the annual Merrill Lynch Corporate & High Yield Index rate, respectively. The equity financing rate is described above. The rates for debt

[7] Data for U.S. publicly traded firms is from the Standard and Poor's Compustat® database. This database contains information on more than 6,000 U.S. publicly traded firms, which approximates information for the entirety of the U.S. market.

[8] The pension assets are netted with the pension liabilities and reported as a net asset or net liability as required by ASC 715.

[9] The FDIC rule requires that well-capitalized institutions meet or exceed the following standards: (1) total capital to risk-weighted assets ratio of at least 10 percent, (2) tier 1 capital to risk-weighted assets ratio of at least 8 percent, (3) common equity tier 1 capital to risk-weighted assets ratio of at least 6.5 percent, and (4) a leverage ratio (tier 1 capital to total assets) of at least 5 percent. Because all of the Federal Reserve priced services' equity on the pro forma balance sheet qualifies as tier 1 capital, only requirements 1 and 4 are binding. The FDIC rule can be located at 12 CFR 324.403(b).

[10] *See* Board of Governors of the Federal Reserve System, *Federal Reserve Policy on Payment System Risk, https://www.federalreserve.gov/paymentsystems/files/psr_policy.pdf. See also* CPMI–IOSCO, *Principles for Financial Market Infrastructures* (April 2012), *https://www.bis.org/cpmi/publ/d101a.pdf.*

[11] Certain standards may require flexibility in the way they are applied to central bank–operated systems because of central banks' unique role in the financial markets and their public responsibilities. These principles include principle 2 on governance, principle 3 on the framework for the comprehensive management of risks, principle 4 on credit risk, principle 5 on collateral, principle 7 on liquidity risk, principle 13 on participant-default rules and procedures, principle 15 on general business risk, and principle 18 on access and participation requirements. *See* section I.B.1.a of the PSR policy.

[12] This requirement does not apply to the Fedwire Securities Service. There are no private-sector competitors to the Fedwire Securities Service that would be expected to meet such a requirement. Imposing such a requirement when pricing the securities services could artificially increase the cost of these services.

and equity financing are applied to the priced services' estimated imputed short-term debt, long-term debt, and equity needed to finance short- and long-term assets and meet equity requirements.

The 2025 PSAF is $31.9 million, compared with $29.2 million in 2024. The increase of $2.7 million is attributable to a net $2.1 million increase in the cost of capital and a $0.6 million increase in sales tax. The net $2.1 million increase in cost of capital is primarily driven by a $1.3 million increase in ROE imputed to meet the PSR policy requirements and higher short-term debt resulting in a $0.5 million increase in cost of debt.

The PSAF expense of $31.9 million, detailed in Table 5, includes $19.8 million for capital funding, $7.6 million for Board of Governors' expense, and $4.5 million in sales tax expense.

As shown in Table 3, 2025 total assets of $890.3 million increased by $74.2 million from 2024. The net increase in total assets includes an additional $90.7 million in imputed investments and short-term assets partially offset by a $16.5 million decrease in long-term assets.

The net increase of $90.7 million primarily consists of a $80.8 million increase in the imputed investments and a $9.9 million increase driven by short-term assets, The imputed investment increase reflects a $74 million increase from float [13] and a $6.7 million increase to comply with the PSR policy. The $9.9 million increase in short-term assets is driven by an increase in prepaid expenses.

The $16.5 million decrease in the long-term assets is primarily driven by a $38.0 million decrease in the net pension asset, partially offset by a $20.3 million increase in premises, furniture and equipment, and software and leasehold improvements.

The capital structure of the 2025 pro forma balance sheet, provided in Table 4, is composed of equity of $71.7 million, or 12.6 percent of the 2025 risk-weighted assets detailed in Table 6, and long-term debt of $96.1 million. The 2025 capital structure aligns with that of 2024, which was composed of $68.5 million of equity and $100.3 million of long-term debt. As shown in Table 5, the 2025 initially imputed equity required to fund assets and meet the publicly traded firm model capital requirements is $65.0 million. As long-term assets are marginally greater than long-term liabilities, long-term debt of $96.1 million was imputed at the observed market ratio of 59.7 percent. The equity of $65.0 million was adequate to meet the FDIC capital requirements for a well-capitalized institution. Additional equity of $6.7 million was imputed to satisfy PSR policy requirements.

The net accumulated other comprehensive loss is $563.3 million, compared with $551.0 million in 2024. The $12.3 million increase is primarily attributable to a lower discount rate. The net accumulated other comprehensive loss position does not reduce the total imputed equity required to fund priced services assets or fulfill the FDIC equity requirements for a well-capitalized institution.

TABLE 3—COMPARISON OF PRO FORMA BALANCE SHEETS FOR BUDGETED FEDERAL RESERVE MATURE PRICED SERVICES [a]

[Millions of dollars—projected average for year]

	2025	2024	Change
Short-term assets:			
Receivables	$ 44.3	$ 41.8	$ 2.5
Inventory	0.4	0.2	0.2

C. *Check Services*—Table 7 shows the 2023 actual, 2024 forecasted, and 2025 budgeted cost-recovery performance for commercial check services.

TABLE 7—CHECK SERVICES PRO FORMA COST AND REVENUE PERFORMANCE

[Dollars in millions]

Year	Revenue	Total expense	Net income (ROE)	Targeted ROE	Recovery rate after targeted ROE
	1	2	3 [1 − 2]	4	5 [1/(2 + 4)]
2023 (actual)	111.8	107.4	4.4	1.3	102.9
2024 (forecast)	110.2	105.0	5.2	2.1	102.9
2025 (budget)	107.1	107.8	(0.7)	2.1	97.5

1. *2024 Forecast*—The Reserve Banks forecast that Check Services will recover 102.9 percent of total expenses and targeted ROE, compared with a 2024 budgeted recovery rate of 95.5 percent.

Through August 2024, total commercial forward and total commercial return check volumes were 6.8 percent lower and 2.9 percent greater, respectively, than they were during the same period last year. For full-year 2024, the Reserve Banks estimate that their total forward check volume will decline 6.3 percent (compared with a budgeted decline of 8.0 percent), and their total return check volume will increase 1.6 percent (compared with a budgeted decline of 7.0 percent) from 2023 levels. The Reserve Banks expect that check volumes will continue to decline because of ongoing substitution away from checks to other payment instruments.

2. *2025 Pricing*—The Reserve Banks expect Check Services to recover 97.5 percent of total expenses and targeted ROE in 2025. The Reserve Banks project revenue to be $107.1 million, a decline of $3.1 million, or 2.8 percent from the 2024 forecast. Total expenses for Check Services are projected to be $107.8 million, an increase of $2.8 million, or 2.7 percent, from 2024 forecasted expenses.

As check volumes continue to decline, the pricing increases are intended to help stabilize check revenues, to shift the revenue mix

toward fixed fees, and to continue a value-based pricing strategy for financial institutions that use the service. To that end, the Reserve Banks will increase the pricing tiers for the fixed monthly participation fees. For the participation fees, Tier 1 will increase by $125, Tier 2 will increase by $80, Tier 3 will increase by $50, and Tier 4 will increase by $10. These fee changes support the cost of maintaining FRFS Check Services infrastructure as fewer checks are written each year and follow the Check Services business line's pricing strategy to increase the share of revenue collected through fixed fees. Table 8 displayed below shows the 2025-tiered participation fees.

TABLE 8—CHECK 21 PARTICIPATION FEE STRUCTURE

Tier[26]	Monthly fee
1	$550
2	340
3	215
4	90

The Reserve Banks will also increase the fees for each of the services in the FedImage suite by approximately 10% and merge the Back File Conversion and Electronic On-Us services with the FedImage Enhanced Truncation service into a single service at the new FedImage Enhanced Truncation price point. These changes will better reflect the value of services provided to customers and help simplify the services in the face of declining volumes. Table 9 below shows the 2025 FedImage services fees.

TABLE 9—2025 FEDIMAGE SERVICES FEES[27]

FedImage Services	2024 Fees		2025 Fees

Custom Sort Fee	192.50		212.00	

Additionally, the Reserve Banks will increase certain forward paper fees. Specifically, the Reserve Banks will increase the Canadian cash letter fees for U.S. and Canadian funds by $2.00, the Canadian Amount Encoding per-

[14] Consistent with the PSR policy, the Reserve Banks' priced services will hold an amount equivalent to six months of the Fedwire Funds Service's current operating expenses as liquid net financial assets and equity on the pro forma balance sheet. Six months of the Fedwire Funds Service's projected current operating expenses is $71.7 million. In 2025, $6.7 million of additional equity was imputed to meet PSR policy requirements.

[15] Includes the allocation of Board of Governors assets to priced services of $5.2 million for 2025 and $3.5 million for 2024.

[16] Includes the allocation of Board of Governors liabilities to priced services of $1.4 million for 2025 and $1.2 million for 2024.

[17] Includes an accumulated other comprehensive loss of $563.3 million for 2025 and $551.0 million for 2024, which reflects the ongoing amortization of the accumulated loss in accordance with ASC 715. Future gains or losses, and their effects on the pro forma balance sheet, cannot be projected. See Table 5 for calculation of required imputed equity amount.

[18] Imputed short-term debt financing is computed as the difference between short-term assets and short-term liabilities. As presented in Table 5, the financing costs of imputed short-term debt, imputed long-term debt and imputed equity are the elements of cost of capital, which contribute to the calculation of the PSAF.

[19] If minimum equity constraints are not met after imputing equity based on the capital structure observed in the market, additional equity is imputed to meet these constraints. The long-term funding need was met by imputing long-term debt and equity based on the capital structure observed in the market (see Tables 4 and 6). In 2025, the amount of imputed equity met the minimum equity requirements for risk-weighted assets.

[20] Equity adjustment offsets are due to a shift of long-term debt funding to equity in order to meet FDIC capital requirements for well-capitalized institutions.

[21] Additional equity in excess of that needed to fund priced services assets is offset by an asset balance of imputed investments in Treasury securities.

[22] Imputed short-term debt and long-term debt are computed in Table 4.

[23] The 2025 ROE is equal to a risk-free rate plus a risk premium (beta * market risk premium). The 2025 after-tax CAPM ROE is calculated as 5.52% + (1.0 * 9.54%) = 15.06%. Using a tax rate of 18.9%, the after-tax ROE is converted into a pretax ROE, which results in a pretax ROE of (15.06%/(1–18.9%)) = 18.57%. Calculations may be affected by rounding.

[24] If minimum equity constraints are not met after imputing equity based on all other financial statement components, additional equity is imputed to meet these constraints. Additional equity imputed to meet minimum equity requirements is invested solely in Treasury securities. The imputed investments are similar to those for which rates are available on the Federal Reserve's H.15 statistical release, available at *https://www.federalreserve.gov/releases/h15/*.

[25] The investments are imputed based on the amounts arising from the collection of items before providing credit according to established availability schedules.

[26] This fee is charged to financial institutions that have received any Check 21 electronic or substitute check volume (forward or return) from the Reserve Banks during the month. The fee is applied at the parent financial institution level, as defined in the Reserve Banks' Global Customer Directory. Each financial institution's tier assignment is determined by the criteria described in the FedForward Standard Endpoint Tier Listing.

[27] The 2025 fees are not listed for Back File Conversion and Electronic On-Us given their consolidation into a single service at the new FedImage Enhanced Truncation price point.

item fee by $0.50, and the Mixed Forward Products (domestic paper checks) cash letter fee by $2.00 and per-item fee by $0.50. Table 10 below shows the 2025 forward paper fees.

TABLE 10—2025 FORWARD PAPER CHECK CLEARING FEES

Forward paper check	Fixed/CL	Item
Canadian—US Funds	$ 19.00	$ 6.50000
Canadian—Canadian Funds	19.00	6.50000
Canadian Amount Encoding	.....	2.50000
Mixed Paper Deposits	19.00	5.00000

The Reserve Banks will increase certain return fees and will implement a new tiered fee structure for the Large Dollar Return Item Notification (LDRIN) via the FedLine Web® Solution. The fees for the new LDRIN via FedLine Web tiers will be $3.50 for Tier 1, for customers with greater than 5,000 monthly items, and $5.00 for Tier 2, for customers with less than 5,000 monthly items. Additionally, the Return Item Reclear cash letter fee will increase by $1.00 and the per-item fee will increase by $0.10. The Qualified and Unqualified Return Item cash letter fee will increase by $2.00 and the per-item fee will increase by $0.50. Lastly, the return Item Qualification per-item fee will increase by $1.00. Table 11 below shows the 2025 return fees and new LDRIN via FedLine Web tiers.

TABLE 11—2025 RETURN LEGACY/PAPER FEES

Return paper check	Fixed/CL	Item
LDRIN via FedLine for the Web:		
Tier 1 *(Greater than 5,000 monthly)*	.....	$ 3.50
Tier 2 *(Less than 5,000 monthly)*	.....	5.00
Return Item Reclear:	.....	.....
Level 1 *(Items valued up to $100)*	$12.00	0.85
Level 2 *(Items valued up to $250)*	12.00	0.95
Level 3 *(Items valued up to $500)*	12.00	1.05
Level 4 *(Items valued up to $1,000)*	12.00	1.15
Qualified Return Items	19.00	8.50
Unqualified Return Items	19.00	8.50
Unencoded Qualification	.....	11.00

The Reserve Banks' primary risk to current projections for Check Services is a greater than expected decline in check volume due to the general reduction in check writing, substitution away from checks to other payment instruments, and competition from correspondent banks, aggregators, and direct exchanges, which could result in lower than anticipated revenue. The Reserve Banks estimate these cumulative price changes will result in a 2.8 percent average increase for Check Services customers.

D. *FedACH Services*—Table 12 shows the 2023 actual, 2024 forecasted, and 2025 budgeted cost-recovery performance for commercial FedACH Services.

TABLE 12—FEDACH SERVICES PRO FORMA COST AND REVENUE PERFORMANCE

[Dollars in millions]

Year	Revenue	Total expense	Net income (ROE)	Targeted ROE	Recovery rate after targeted ROE
	1	2	3 [1 − 2]	4	5 [1/(2 + 4)]
2023 (actual)	183.8	166.5	17.1	2.3	108.8
2024 (forecast)	189.0	169.0	20.0	3.7	109.4
2025 (budget)	194.4	179.7	14.7	3.7	106.0

1. *2024 Forecast*—The Reserve Banks forecast that FedACH Services will recover 109.4 percent of total expenses and targeted ROE, compared with a 2024 budgeted recovery rate of 106.0 percent.

Through August 2024, FedACH commercial origination and receipt volume were 7.7 percent higher and 5.3 percent higher, respectively, than they were during the same period last year. For full-year 2024, the Reserve Banks estimate that FedACH commercial origination and receipt volume will increase 6.7 percent and 4.7 percent, respectively, from 2023 levels, compared with a budgeted increase of 3.5 percent for both commercial origination and receipt.

2. 2025 *Pricing*—The Reserve Banks expect FedACH Services to recover 106.0 percent of total expenses and targeted ROE in 2025. The Reserve Banks project revenue to be $194.4 million, an increase of $5.4 million, or 2.9 percent, from the 2024 forecast. Total expenses are projected to be $179.8 million, an increase of $10.8

million, or 6.4 percent, from the 2024 forecast.

The Reserve Banks will increase the monthly ACH Participation fee from $75 to $80 per RTN. The Reserve Banks will also increase the monthly ACH Origination Minimum fee from $50 to $55 and Receipt Minimum fee from $40 to $45 per RTN.[28] The ACH Participation and Minimum Fee price changes are driven by ongoing operational costs and a continued focus on growing fixed fee revenue generation.

In addition, the Reserve Banks will increase the FedACH FedPayments Reporter Service fees from 6 to 11 percent as shown in Table 13.[29] The FedPayments Reporter Service has continued to evolve and improve with enhanced features such as new intraday generation capabilities for select reports and the integration of an upgraded Electronic Data Interchange (EDI) parser. These efforts have increased both the costs of providing the FedPayments Reporter Service and the value it offers to customers.

TABLE 13—FEDACH FEDPAYMENTS REPORTER SERVICE FEES

Tiers	2025 Monthly fee
Tier 1—Up to 50 reports	$50
Tier 2—From 51 to 150 reports	72
Tier 3—From 151 to 500 reports	133
Tier 4—From 501 to 1,000 reports	245
Tier 5—From 1,001 to 1,500 reports	355
Tier 6—From 1,501 to 2,500 reports	555
Tier 7—From 2,501 to 3,500 reports	775
Tier 8—From 3,501 to 4,500 reports	990
Tier 9—From 4,501 to 5,500 reports	1,200
Tier 10—From 5,501 to 7,000 reports	1,460
Tier 11—From 7,001 to 8,500 reports	1,700
Tier 12—From 8,501 to 10,000 reports	1,930
Tier 13—Over 10,000 reports	2,100

The Reserve Banks estimate these cumulative price changes will result in a 1.4 percent average increase for FedACH customers.

The Reserve Banks' primary risk to current projections for the FedACH Service are lower-than-projected volumes and growth due to potential customer attrition.

E. *Fedwire Funds Service and National Settlement Service*—Table 14 shows the 2023 actual, 2024 forecasted, and 2025 budgeted cost-recovery performance for the Fedwire Funds Service and the National Settlement Service.

TABLE 14—FEDWIRE FUNDS SERVICE AND NATIONAL SETTLEMENT SERVICE PRO FORMA COST AND REVENUE PERFORMANCE

[Dollars in millions]

Year	Revenue	Total expense	Net income (ROE)	Targeted ROE	Recovery rate after targeted ROE
	1	2	3 [1 − 2]	4	5 [1/(2 + 4)]
2023 (actual)	162.5	153.4	9.1	4.3	103.1
2024 (forecast)	169.2	153.1	16.1	3.0	108.3
2025 (budget)	174.4	164.9	9.5	4.1	103.2

1. *2024 Forecast*—The Reserve Banks forecast that the Fedwire Funds Service and the National Settlement Service will recover 108.3 percent of total expenses and targeted ROE, compared with a 2024 budgeted recovery rate of 103.2 percent.

Through August 2024, Fedwire Funds Service online volume has been 5.9 percent higher than it was during the same period last year. The Reserve Banks expect volume to remain near this level through the remainder of 2024. Through August 2024, the National Settlement Service settlement file volume was 0.3 percent higher than it was during the same period last year, and settlement entry volume was 0.5 percent higher. For full-year 2024, the Reserve Banks estimate that settlement file volume will decrease 0.3 percent (compared with a budgeted decrease of 0.1 percent) and settlement entry volume will increase 0.4 percent (compared with a budgeted 0.4 percent increase) from 2023 levels.

2. *2025 Pricing*—The Reserve Banks expect the Fedwire Funds Service and the National Settlement Service to recover 103.2 percent of total expenses in 2025. The Reserve Banks project revenue to be $174.4 million, an increase of $5.2 million, or 3.1 percent from the 2024 forecast. The Reserve Banks project total expenses to be $164.9 million, an increase of 11.8

[28] The FedACH Minimum Fee applies to any RTN that has originated or received a FedACH transaction during a calendar month. The customer is charged their normal item fees plus a variable amount that closes the gap to the minimum. For example, an RTN originating 10K items in a month pays $35 in item fees (10K items times $0.0035 per item) and $15 in minimum fees so that their total origination fees are $50. Another RTN paying $51 in item fees would be charged an effective minimum fee of $0. Only one minimum threshold applies in any given period, with RTNs subject to the Receipt Minimum fee only if they did not originate any items.

[29] The FedPayments Reporter Service for the FedACH Services provides financial institutions and their customers with reports of their ACH transactions processed by FedACH including valuable business information.

million, or 7.7 percent, from the 2024 forecast. Rising costs are primarily driven by the Fedwire Funds Service's ongoing transition to the ISO® 20022 messaging format.[30] In addition, the National Settlement Service continues to incur higher costs because of the expansion of its operating hours in 2022.[31]

The Reserve Banks will increase the Fedwire Funds Service participation fee from $115 to $120. In addition, all three of the gross origination and receipt tiered fees will be increased. The tier 1 fee will increase from $0.94 to $0.97, the tier 2 fee will increase from $0.29 to $0.30, and the tier 3 fee will increase from $0.19 to $0.195. Correspondingly, the volume-based incentive discount fee will increase for all three tiers. The tier 1 discount fee will increase from $0.188 to $0.194, the tier 2 discount fee will increase from $0.058 to $0.060, and the tier 3 discount fee will increase from $0.038 to $0.039. Finally, the FedPayments Manager Import/Export fee will increase from $60 to $65. The Reserve Banks will also change National Settlement Service fees for 2025. The per-file fee will increase from $35 to $40, and the per-entry fee will increase from $1.70 to $1.95.

In addition to these changes, the Reserve Banks will introduce a new volume-based fixed fee for the Fedwire Funds Service.[32] The introduction of this fee will serve to reconcile challenges associated with volatility stemming from variable revenues sources while ensuring a fee structure that is better aligned with customer usage. This fee is based on the volume tier thresholds.[33] The new volume-based fixed fee is one price point assessed at the parent level and is based on the highest volume tier of its associated affiliates.[34] This differs from the existing participation fee in that the participation fee is assessed at the sub-account level for any ABA with at least one origination or receipt transaction during the month.[35] The proposed price points for the volume-based fixed fees are as follows:

TABLE 15—FEDWIRE FUNDS SERVICE VOLUME-BASED FIXED FEE TIERS

Fixed fee level	Volume tier	Monthly fee
Tier 2	Tier 2	$250
Tier 3	Tier 3	500

As noted above, this fee will serve to reconcile challenges associated with volatility stemming from variable revenues sources while ensuring a fee structure that is better aligned with customer usage. Fedwire Funds Service fee revenue has become increasingly dependent on variable sources and this growing exposure to uncertain fee fluctuations undermines annual revenue stability. This fee will address this uncertainty by increasing the percentage of fixed fee revenue. Further, the fee is intended to be commensurate with customer usage and structured so that smaller customers are not disproportionally impacted. In addition, this fee, alongside the other fee increases noted above, serves to help balance increases in ongoing operational costs incurred by the National Settlement Service for the period between 2014 and 2023, when fees did not increase.

The Reserve Banks' primary risk to current projections for these services is lower than-projected-volumes and growth due to the market and economic environment given that historically, Fedwire Funds Service volume has reflected market conditions.[36] The Reserve Banks estimate these cumulative price changes will result in a 5.7 percent average price increase for Fedwire Funds and National Settlement Service customers.

F. *Fedwire Securities Service*—Table 16 shows the 2023 actual, 2024 forecast, and 2025 budgeted cost-recovery performance for the Fedwire Securities Service.[37]

TABLE 16—FEDWIRE SECURITIES SERVICE PRO FORMA COST AND REVENUE PERFORMANCE

[Dollars in millions]

Year	Revenue	Total expense	Net income (ROE)	Targeted ROE	Recovery rate after targeted ROE
	1	2	3 [1 − 2]	4	5 [1/(2 + 4)]
2023 (actual)	49.1	39.7	9.4	0.5	122.3
2024 (forecast)	52.5	41.8	10.7	0.8	123.2
2025 (budget)	55.7	47.3	8.4	0.9	115.7

[30] In October 2021, the Board announced that the Federal Reserve Banks will adopt the ISO 20022 message format for the Fedwire Funds Service. *See New Message Format for the Fedwire Funds Service,* 86 FR 55600 (Oct. 6, 2021).

[31] The National Settlement Service expanded its hours to 21.5 hours per day in 2022, with a new 9:00 p.m. ET open for the next business day.

[32] Volume-based pricing for Fedwire Funds was introduced in 1999. The analysis that led to volume-based pricing showed that Fedwire Funds can benefit from charging different prices to different areas of the market based on customer volume. When considering ways to increase fixed revenue, the Board re-examined this analysis and has concluded that establishing fixed revenue sources based on customer volume will benefit the Fedwire Funds service in a similar fashion to volume-based pricing for gross origination and receipt fees.

[33] Tiers are based on monthly total volume (send and receive) at the master account level: 0–14,000 messages (Tier 1); 14,001–90,000 (Tier 2), and all volume above 90,000 messages (Tier 3).

[34] For example, if a parent customer has affiliates in the Tier 2 and Tier 3 volume thresholds, the parent will be assessed the corresponding $500 Tier 3 monthly fee.

[35] The new Monthly Fixed Fee will not be applicable to customers in the Tier 1 volume level.

[36] Fedwire Funds Service volume growth reflects economic growth. For example, its volume has grown every year except for 2008 and 2009, when it contracted 2.5 percent and 5.0 percent, respectively, during the Great Recession. For historical Fedwire Funds Service volume data, *see FRBservices.org, Fedwire Funds Service—Annual Statistics, https://www.frbservices.org/resources/financial-services/wires/volume-value-stats/annual-stats.html.*

[37] The Reserve Banks provide transfer services for securities issued by the U.S. Treasury, federal government agencies, government-sponsored enterprises, and certain international institutions. Prior to 2023, the priced component of this service consisted of revenues, expenses, and volumes associated with the transfer of all non-Treasury securities. Starting in 2023, the revenues, expenses, and volumes associated with the transfer of Treasury securities are also included in the priced component of this service.

1. *2024 Forecast*—The Reserve Banks forecast that the Fedwire Securities Service will recover 123.2 percent of total expenses and targeted ROE, compared with a 2024 budgeted recovery rate of 110.9 percent.

Through August 2024, Treasury security transfer volume was 15.9 percent higher than it was during the same period last year. For full-year 2024, the Reserve Banks estimate that Treasury security transfer volume will increase 4.0 percent from 2023 levels, compared with a budgeted decrease of 7.3 percent. Through August 2024, Agency security transfer volume was 3.8 percent lower than it was during the same period last year. For full-year 2024, the Reserve Banks estimate that Agency security transfer volume will decrease 2.6 percent from 2023 levels, compared with a budgeted increase of 1.3 percent.

Through August 2024, account maintenance volume was 0.7 percent lower than it was during the same period last year. For full-year 2024, the Reserve Banks estimate that account maintenance volume will decline 1.0 percent from 2023 levels, compared with a budgeted decline of 2.6 percent. Through August 2024, the volume of Agency issues maintained was 0.5 percent lower than it was during the same period last year. For full-year 2024, the Reserve Banks estimate that the volume of Agency issues maintained will decrease 0.4 percent from 2023 levels, compared with a budgeted change of 0.0 percent.

2. *2025 Pricing*—The Reserve Banks expect the Fedwire Securities Service to recover 115.7 percent of total expenses and targeted ROE in 2025. Revenue is projected to be $55.7 million, an increase of $3.2 million, or 6.0 percent, from the 2024 revenue forecast. The Reserve Banks also project that 2025 expenses will be $47.3 million, an increase of $5.5 million, or 13.1 percent from the 2024 forecast.

The Reserve Banks will leave fee schedules for Fedwire Securities priced services unchanged in 2025. This decision considers the benefits of maintaining consistent customer pricing in the face of rising costs and higher than expected volatility in transfer volumes.

Regarding volumes, the Reserve Banks project that monthly maintenance products will maintain relatively stable volumes throughout 2025 with Issue Maintenance volume to increase slightly at 0.2 percent and Account Maintenance volume to decrease 0.6 percent in 2025. Treasury transfer volume is slated to continue its record growth trend with an anticipated 9.4 percent increase. Agency transfers are projected to increase by 0.5 percent in 2025.

The Reserve Banks project that Agency transfer volume will increase moderately compared with previous years, as interest rates fall, encouraging home-buying and mortgage refinancing. As detailed in the figures above, the volume of Treasury security transfers is projected to continue its record growth trend due primarily to debt issuance by the Treasury. The volume of accounts maintained are expected to decrease 2.5 percent, consistent with recent trends and primarily driven by a reduction in joint custody accounts. The volume of Agency issues maintained is expected to remain relatively flat and claim adjustment volume is expected to remain relatively stable consistent with recent trends.

The Reserve Banks' primary risks to current projections for the Fedwire Securities Service include variations in technology costs and product volume forecasts stemming from an uncertain macroeconomic outlook and market conditions.

G. *FedNow Service*—

1. *2024 Forecast*—The Reserve Banks forecast that the FedNow Service will generate a total of $244.9 million in expenses in 2024.

The number of transactions processed by the FedNow Service in 2024 is modest and consistent with the Federal Reserve's expectations for a new service line. From January through August 2024, the transaction volume of the FedNow Service totaled 414,827 transactions, with the number of participants growing from 400 to just under 1,000 financial institutions during this time period. Broad adoption of the FedNow Service across an industry with more than 9,000 financial institutions will be a gradual journey, similar to other new payment services like FedACH in the 1970s and 1980s. As a result, the Board has adopted a long-term outlook in evaluating the development of the FedNow Service. The Board anticipates acceleration in volume over time as more financial institutions join the network and as the Reserve Banks release new service features on an ongoing basis.[38]

2. *2025 Pricing*—In 2025, the Reserve Banks project total operating expenses to be $245.5 million, which will be an increase of $0.6 million or 0.2 percent from the 2024 forecast.[39]

The Reserve Banks will modify the Customer Credit Transfer, Customer Credit Transfer Return, and Request for Payment fee components of the FedNow Service to exclude ''on-us'' transactions sent from and received at the same financial institution.[40] This adjustment will both align with prevailing market practices and reduce inefficient off-network transaction activity. All other components of the previous year's fee schedule, inclusive of discounts, will be maintained by the Reserve Banks in 2025.[41]

H. FedLine Solutions—There are currently six FedLine Solutions channels through which customers can access the Reserve Banks' priced services: FedMail®, FedLine Exchange, FedLine Web, FedLine Advantage®, FedLine Command and FedLine Direct.[42] The Reserve Banks bundle these channels into 12 FedLine Solutions packages that are supplemented by a number of premium (or à la carte) access and accounting information options.

The Reserve Banks also offer FedComplete® Packages, which are bundled offerings of FedLine connections and a fixed number of FedACH Services, Fedwire Funds Services, and Check 21–enabled transactions. In 2025, the Reserve Banks will increase the monthly fees for FedComplete 100A Plus from $900 to $1,150 and FedComplete 200A Plus from $1,425 to $1,725. The price increases reflect the rising fees and enhancements of the package's underlying services. To simplify the FedComplete Packages and create internal efficiencies, FedComplete 100A

[38] For quarterly FedNow Service transaction data, see Board of Governors of the Federal Reserve System, *FedNow Service, https://www.federalreserve.gov/paymentsystems/fednow_about.htm.*

[39] During the time in 2023 when the FedNow Service was in production, expenses (including imputed costs) totaled $99.7 million.

[40] The modifications will take place at the parent financial institution level, as defined in the Reserve Banks' Global Customer Directory. ''On-us'' transactions include those made by the same financial institution, even if the financial institution uses multiple RTNs.

[41] These maintained fees and discounts include the FedLine connectivity discount. The FedLine connectivity discount program consists of providing credits for upgrade fees from a FedMail or FedLine Web connection to FedLine Advantage and new FedLine Advantage connection fees for the FedNow Service to qualifying institutions. Credits will be for 12 months from FedLine Advantage billing eligibility. Customers that have received discounts throughout the 2024 program will see FedLine connectivity discounts roll off in 2025 following the completion of the 12-month term.

[42] The Reserve Banks charge fees for the electronic connections that financial institutions use to access priced services and allocate the costs and revenues associated with this electronic access to the priced services. As a result, FedLine costs and revenue are allocated to the Reserve Banks' priced services on an expense ratio basis.

Premier and 200A Premier will be discontinued. Additionally, the Reserve Banks plan to discontinue the FedLine Exchange service to streamline FedLine Solution products and create internal efficiencies that simplify operating, servicing, and billing processes.[43]

The Reserve Banks will increase the monthly fees for FedLine Command Plus from $1,035 to $1,185, FedLine Direct Plus from $5,500 to $5,750, and FedLine Direct Premier from $10,500 to $11,000 per month. Price changes for the FedLine Command and FedLine Direct packages are in response to enhancements for the FedNow Service and account for the price increases from the End-of-Day Financial Institution Reconcilement Date (FIRD) File and Statement of Account Spreadsheet File (SASF) offerings.[44] FedLine Direct had additional operational costs associated with a new network vendor and hardware upgrades that have contributed to these price increases.

In 2025, the Reserve Banks are prepared to add API functionality for certain services and products.[45] The Reserve Banks are developing an initial pricing menu for priced APIs. Upon launch, each API would be assigned a core pricing scenario. Communication will be forthcoming on the timing, availability, and pricing scenarios for initial APIs.

The Reserve Banks estimate these cumulative price changes will result in a 4.8 percent average price increase for FedLine customers.

II. Analysis of Competitive Effect

All operational and legal changes considered by the Board that have a substantial effect on payment system participants are subject to the competitive impact analysis described in the Board's policy, *The Federal Reserve in the Payments System.*[46] Under this policy, the Board assesses whether changes would have a direct and material adverse effect on the ability of other service providers to compete effectively with the Federal Reserve in providing similar services due to differing legal powers or constraints or due to a dominant market position deriving from such legal differences. If any proposed changes create such an effect, the Board must further evaluate the changes to assess whether the benefits associated with the changes—such as contributions to payment system efficiency, payment system integrity, or other Board objectives—can be achieved while minimizing the adverse effect on competition.

The Board has conducted this analysis and concluded that the 2025 fees, fee structures, and changes in service will not have a direct and material adverse effect on the ability of other service providers to compete effectively with the Reserve Banks in providing similar services. When conducting the competitive effect analysis for the FedNow Service, the Board assessed whether its pricing strategy as a new service, including discounts, would have a material, adverse effect on the ability of other service providers to compete effectively with the Reserve Banks due to differing legal powers or a dominate market position as a result of such differing legal powers. The Board concluded that the pricing strategy, including discounts, followed general market practice for new services and could similarly be implemented by private sector providers unrelated to any differing legal powers. Therefore, the Reserve Banks' pricing does not have a material adverse effect on the ability of other service providers to compete effectively with the Reserve Banks in providing similar services.

The Reserve Banks expect to continue to achieve aggregate long-run cost recovery across all mature priced services.

III. 2025 Fee Schedules

FEDACH SERVICES 2025 FEE SCHEDULE

[Effective January 1, 2025. **Bold indicates changes from 2024 prices**]

	Fee
FedACH minimum monthly fee:	
Originating depository financial institution (ODFI)[47]	**$55.00.**
Receiving depository financial institution (RDFI)[48]	**$45.00.**
Origination (per item or record):	
Forward or return items	$0.0035.
SameDay Service—forward item[49]	$0.0010 surcharge.
Addenda record	$0.0015.
FedLine Web-originated returns and notification of change (NOC)[50]	$0.50.
Facsimile Exception Return/NOC[51]	$45.00.
SameDay Exception Return	$45.00.
Automated NOC	$0.20.
Volume discounts (based on monthly billed origination volume)[52] per item when origination volume is	
750,001 to 1,500,000 items per month discount	$0.0008.
more than 1,500,000 items per month discount	$0.0010.
Volume discounts (based on monthly billed receipt volume)[53] per item when receipt volume is	
10,000,001 to 15,000,000 items per month discount	$0.0002.
more than 15,000,000 items per month discount	$0.0003.
Receipt (per item or record):	
Forward Item	$0.0035.
Return Item	$0.0075.
Addenda record	$0.0015.
Volume discounts:	
Non-Premium Receivers[54] per item when volume is	
750,001 to 12,500,000 items per month[55]	$0.0017 discount.

[43] The FedLine Exchange service provides access to the E-Payments Routing Directory, which is also available to plus level customers across the FedLine channels. FedLine Solutions packages offer attended or unattended access to critical payment and information services. FedMail, FedLine Exchange, FedLine Web, and FedLine Advantage packages offer attended or manual access via a web-based interface.

[44] FedLine Direct packages allow for unattended connections at multiple connection speeds to Check, FedACH, Fedwire Funds, and Fedwire Securities transactional and information services and to most accounting information services. The FedLine Command package offers a computer-to-computer, internet protocol–based interfaces that supports an unattended connection to FedACH, most accounting information services, and the FedNow Service.

[45] APIs are a set of protocols for connecting software systems programmatically, enabling system-to-system interoperability.

[46] *See* Board of Governors of the Federal Reserve System, *Policies: The Federal Reserve in the Payments System, https://www.federalreserve.gov/paymentsystems/pfs_frpaysys.htm.*

FEDACH SERVICES 2025 FEE SCHEDULE—Continued

[Effective January 1, 2025. **Bold indicates changes from 2024 prices**]

	Fee
more than 12,500,000 items per month [56]	$0.0019 discount.
Premium Receivers, Level One [57] per item when volume is	
750,001 to 1,500,000 items per month [58]	$0.0017 discount.
1,500,001 to 2,500,000 items per month [59]	$0.0017 discount.
2,500,001 to 12,500,000 items per month [53]	$0.0018 discount.
12,500,001 to 30,000,000 items per month [53]	$0.0020 discount.
more than 30,000,000 items per month [53]	$0.0023 discount.
Premium Receivers, Level Two [60] per item when volume is	
750,001 to 1,500,000 items per month [61]	$0.0017 discount.
1,500,001 to 2,500,000 items per month [62]	$0.0017 discount.
2,500,001 to 12,500,000 items per month [56]	$0.0019 discount.
12,500,001 to 30,000,000 items per month [56]	$0.0021 discount.
more than 30,000,000 items per month [56]	$0.0024 discount.
FedACH Risk Management Services: [63]	
Monthly Package Fee (a single fee based on total number of criteria sets):	
For up to 5 criteria sets	$45.00.
For 6 through 11 criteria sets	$85.00.
For 12 through 23 criteria sets	$150.00.
For 24 through 47 criteria sets	$180.00.
For 48 through 95 criteria sets	$300.00.
For 96 through 191 criteria sets	$510.00.
For 192 through 383 criteria sets	$810.00.
For 384 through 584 criteria sets	$1,025.00.
For more than 584 criteria sets	$1,325.00.
Batch/Item Monitoring (based on total monthly volume):	
For 1 through 100,000 batches (per batch)	$0.007.
For more than 100,000 batches (per batch)	$0.0035.
FedPayments Insights Service: [64]	
Monthly Fee (a single fee based on commercial receipt volume):	
0–50,000 items per month	$75.00.
50,001–100,000 items per month	$120.00.
100,001–500,000 items per month	$180.00.
500,001–1,000,000 items per month	$260.00.
1,000,001–5,000,000 items per month	$340.00.
5,000,001–10,000,000 items per month	$450.00.
10,000,001–25,000,000 items per month	$550.00.
25,000,001–60,000,000 items per month	$625.00.
Over 60,000,000 items per month	$700.00.
Monthly FedPayments Reporter Service:	
FedPayments Reporter Service monthly package includes the following reports:	
ACH Received Entries Detail—Customer and Depository Financial Institution	
ACH Return Reason Report—Customer and Depository Financial Institution	
ACH Originated Entries Detail—Customer and Depository Financial Institution	
ACH Volume Summary by SEC Code—Customer	
ACH Customer Transaction Activity	
ACH Death Notification	
ACH International (IAT)	
ACH Notification of Change	
ACH Payment Data Information File	
ACH Remittance Advice Detail	
ACH Remittance Advice Summary	
ACH Return Item Report and File	
ACH Return Ratio	
ACH Social Security Beneficiary	
ACH Originator Setup	
ACH Report Delivery via FedLine Solution	
On Demand Report Surcharge [65]	$1.00.
Monthly Package Fee (counts reflect reports generated as well as delivered via a FedLine Solution):	
For up to 50 reports	**$50.00.**
For 51 through 150 reports	**$72.00.**
For 151 through 500 reports	**$133.00.**
For 501 through 1,000 reports	**$245.00.**
For 1,001 through 1,500 reports	**$355.00.**
For 1,501 through 2,500 reports	**$555.00.**
For 2,501 through 3,500 reports	**$775.00.**
For 3,501 through 4,500 reports	**$990.00.**
For 4,501 through 5,500 reports	**$1,200.00.**
For 5,501 through 7,000 reports	**$1,460.00.**
For 7,001 through 8,500 reports	**$1,700.00.**
For 8,501 through 10,000 reports	**$1,930.00.**
For more than 10,000 reports	**$2,100.00.**
Premier reports (per report generated): [66]	
ACH Volume Summary by SEC Code Report—Depository Financial Institution:	
For 1 through 5 reports	$10.00.
For 6 through 10 reports	$6.00.
For 11 or more reports	$1.00.
On Demand Surcharge	$1.00.
ACH Routing Number Activity Report:	
For 1 through 5 reports	$10.00.
For 6 through 10 reports	$6.00.

FEDACH SERVICES 2025 FEE SCHEDULE—Continued

[Effective January 1, 2025. **Bold indicates changes from 2024 prices**]

	Fee
For 11 or more reports	$1.00.
On Demand Surcharge	$1.00.
ACH Originated Batch Report (monthly):	
For 1 through 5 reports	$10.00.
For 6 through 10 reports	$6.00.
For 11 or more reports	$1.00.

Vendor Pass-Through Fee	various.
Electronic Access Credit Adjustment	various.
Electronic Access Debit Adjustment	various.

[47] Any ODFI incurring less than $55 for the following fees will be charged a variable amount to reach the minimum: Forward value and non-value item origination fees, and FedGlobal ACH origination surcharges.

[48] Any RDFI not originating forward value and non-value items and incurring less than $45 in receipt fees will be charged a variable amount to reach the minimum. Any RDFI that originates forward value and non-value items incurring less than $55 in forward value and nonvalue item origination fees will only be charged a variable amount to reach the minimum monthly origination fee.

[49] This surcharge is assessed on all forward items that qualify for same-day processing and settlement and is incremental to the standard origination item fee.

[50] The fee includes the item and addenda fees in addition to the conversion fee.

[51] The fee includes the item and addenda fees in addition to the conversion fee. Reserve Banks also assess a $45 fee for every government paper return/NOC they process.

[52] Origination volumes at these levels qualify for a waterfall discount that includes all FedACH origination items.

[53] Origination discounts based on monthly billed receipt volume apply only to those items received by FedACH receiving points and are available only to Premium Receivers.

[54] RDFIs receiving through FedACH less than 90 percent of their FedACH-originated items.

[55] This per-item discount is a reduction to the standard receipt fees listed in this fee schedule.

[56] Receipt volumes at these levels qualify for a waterfall discount that includes all FedACH receipt items.

[57] RDFIs receiving through FedACH at least 90 percent of their FedACH-originated items, but less than 90 percent of all of their ACH items originated through any operator.

[58] This per-item discount is a reduction to the standard receipt fees listed in this fee schedule.

[59] Receipt volumes at these levels qualify for a waterfall discount which includes all FedACH receipt items.

[60] RDFIs receiving through FedACH at least 90 percent of all of their ACH items originated through any operator.

[61] This per-item discount is a reduction to the standard receipt fees listed in this fee schedule.

[62] Receipt volumes at these levels qualify for a waterfall discount which includes all FedACH receipt items.

[63] Criteria may be set for both the Origination Monitoring Service and the RDFI Alert Service. Subscribers with no criteria set up will be assessed the $45 monthly package fee.

[64] Monthly commercial receipt volume is calculated based on combined volume of subscribed RTNs in an account family.

[65] Premier reports generated on demand are subject to the package/tiered fees plus a surcharge.

[66] Premier reports generated on demand are subject to the package/tiered fees plus a surcharge.

[67] The fee applies to RTNs that have received or originated FedACH transactions during a month. Institutions that receive only U.S. government transactions or that elect to use a private-sector operator exclusively are not assessed the fee.

[68] This surcharge is assessed to any RTN that originates at least one item meeting the criteria for same-day processing and settlement in a given month.

[69] The fee is applied to any RTN with activity during a month, including RTNs of institutions that elect to use a private-sector operator exclusively but also have items routed to or from customers that access the ACH network through FedACH. This fee does not apply to RTNs that use the Reserve Banks for only U.S. government transactions.

[70] Fee will be assessed only when automated NOCs are generated.

[71] Limited services are offered in contingency situations.

[72] The fees and credits listed are collected from the ODFI and credited to Nacha (admin network) or to the RDFI (same-day entry and unauthorized entry) in accordance with the ACH Rules.

[73] The international fees and surcharges vary from country to country as these are negotiated with each international gateway operator.

[74] A single monthly fee based on total FedGlobal ACH Payments origination volume.

[75] This per-item surcharge is in addition to the standard domestic origination fees listed in this fee schedule.

[76] This per-item surcharge is in addition to the standard domestic receipt fees listed in this fee schedule.

[77] U.S. ODFIs are responsible for any investigation fees should they be assessed by foreign RDFIs or downstream payment participants.

[78] The monthly fee is rolled up to the parent DI level, such that a DI that opts into the FedACH Exception Resolution Service under two separate RTNs would pay a single monthly fee based on the total number of cases opened for their two RTNs combined.

[79] A financial institution may enroll in the Service as an Offline Service Participant by designating the Reserve Bank to access and use the functionality of the application on behalf of the Offline Participant.

[80] Federal Reserve Financial Services offers a five-year discount program to financial institutions that receive at least 5 million items per month through FedACH and meet the qualifications for Premium Receiver Level One or Level Two status. View code details and text on the FedACH Receipt Discount Program page.

[81] This fee applies at the parent level to any bank which has at least 1 unit of volume in the Tier 2 Pre-Incentive Discount range and no volume in the Tier 3 Pre-Incentive Discount range.

[82] This fee applies at the parent level to any bank which has at least 1 unit of volume in the Tier 3 Pre-Inventive Discount range.

[83] The incentive discounts apply to the volume that exceeds 60 percent of a customer's historic benchmark volume. Historic benchmark volume is based on a customer's average daily activity over the previous five calendar years. If a customer has fewer than five full calendar years of previous activity, its historic benchmark volume is based on its daily activity for as many full calendar years of data as are available. If a customer has less than one year of past activity, then the customer qualifies automatically for incentive discounts for the year. The applicable incentive discounts are as follows: $0.752 for transfers up to 14,000; $0.232 for transfers 14,001 to 90,000; and $0.152 for transfers over 90,000.

Continued

[84] The offline service, which was originally scheduled to be discontinued as of December 31, 2024, will be extended to no later than February 2025 to accommodate financial institutions' readiness.

[85] This surcharge applies to originators of transfers that are processed by the Reserve Banks after 5:00 p.m. ET.

[86] This fee is charged to any Fedwire Funds participant that originates a transfer message via the FedPayments Manager Funds tool and has the import/export processing option setting active at any point during the month.

[87] Payment Notification and End-of-Day Origination surcharges apply to each Fedwire funds transfer message.

[88] Provided on billing statement for informational purposes only.

[89] This charge is assessed to settlement arrangements that use the Fedwire Funds Service to affect the settlement of interbank obligations (as opposed to those that use the National Settlement Service). With respect to such special settlement arrangements, other charges may be assessed for each funds transfer into or out of the accounts used in connection with such arrangements.

[90] An organization that is a settlement agent may be able to use the National Settlement Service offline service if it is experiencing an operational event that prevents the transmission of settlement files via its electronic connection to the Federal Reserve Banks. The Federal Reserve Banks have limited capacity to process offline settlement files. As a result, while the Federal Reserve Banks use best efforts to process offline settlement file submissions, there is no guarantee that an offline settlement file, in particular one that is submitted late in the operating day or that contains a large number of entries, will be accepted for processing. Only those persons identified as authorized individuals on the National Settlement Service 04 Agent Contact Form may submit offline settlement files. For questions related to the National Settlement Service offline service, please contact National Settlement Service Central Support Service Staff (CSSS) at 800–758–9403, or via email at *csss.staff@ny.frb.org.*

[91] Any settlement arrangement that accrues less than $60 during a calendar month will be assessed a variable amount to reach the minimum monthly fee.

[92] Restricted Securities Accounts maintained by the Reserve Banks under the Loans and Discounts program and the 31 CFR part 202 program are not assessed for monthly account maintenance fees or fees for Transfers of Book-Entry Securities to or from such Restricted Securities Accounts. Restricted Securities Accounts maintained by the Reserve Banks under the 31 CFR part 225 program are subject to monthly account maintenance fees but not fees for Transfers of Book-Entry Securities to or from such Restricted Securities Accounts.

[93] These fees are set by the Federal Reserve Banks.

[94] This surcharge is set by the Federal Reserve Banks. It is in addition to any basic transfer or reversal fee.

[95] Restricted Securities Accounts maintained by the Reserve Banks under the Loans and Discounts program and the 31 CFR. part 202 program are not assessed for monthly account maintenance fees or fees for Transfers of Book-Entry Securities to or from such Restricted Securities Accounts. Restricted Securities Accounts maintained by the Reserve Banks under the 31 CFR part 225 program are subject to monthly account maintenance fees but not fees for Transfers of Book-Entry Securities to or from such Restricted Securities Accounts.

[96] These fees are set by the Federal Reserve Banks.

[97] These fees are set by the Federal Reserve Banks.

[98] The U.S. Department of the Treasury absorbs the cost of monthly account maintenance for securities accounts that contain only Treasury securities and reimburses the Federal Reserve Banks.

[99] The U.S. Department of the Treasury absorbs the cost of monthly issue maintenance for custody holdings of Treasury securities and reimburses the Federal Reserve Banks.

[100] These fees are set by the Federal Reserve Banks.

[101] Automated Claim Adjustment Process (ACAP) fees apply to all ACAP-eligible security types. Phase 2 of the ACAP enhancement project will include expanding ACAP tracking to all coupon-paying securities issued over the Fedwire Securities Service and adding securities lending as a transaction type. For information about the ACAP enhancement project, please visit: *https://www.frbservices.org/resources/financial-services/securities/acap.*

[102] Participants are charged the Repo Position Maintenance Fee for both a Repo-Out balance and a Repo-In balance. These fees will be assessed every business day.

[103] Participants are charged the Securities Lending Position Maintenance Fee for both a Securities Borrowed balance and a Securities Lent balance. These fees will be assessed every business day. Securities lending positions will be available when Phase 2 of the ACAP enhancement project is implemented. For information about the ACAP enhancement project, please visit: *https://www.frbservices.org/resources/financial-services/securities/acap/.*

[104] This fee is set by and remitted to the Government National Mortgage Association (GNMA).

[105] The Federal Reserve Banks charge participants a Joint Custody Origination Surcharge for both Agency and Treasury securities.

[106] These fees are set by the Federal Reserve Banks.

[107] These fees are set by the Federal Reserve Banks.

[108] FedComplete Packages are all-electronic service options that bundle payment services with an access solution for one monthly fee.

[109] FedComplete customers that use the email service would be charged the FedMail Email a la carte fee and for all FedMail Subscriber 5-packs.

[110] Packages with an ''A'' include the FedLine Advantage channel.

[111] Per-item surcharges are in addition to the standard fees listed in the applicable priced services fee schedules.

[112] FedComplete customers will be charged $4 for each FedForward cash letter over the monthly package threshold. This activity will appear under billing code 51998 in Service Area 1521 on a month-lagged basis.

[113] FedMail package does not include user credentials, which are required to access priced services and certain informational services. Credentials are sold separately in packs of five via the FedMail Subscriber 5-pack.

[114] FedLine Web and Advantage packages do not include user credentials, which are required to access priced services and certain informational services. Credentials are sold separately in packs of five via the FedLine Subscriber 5-pack.

[115] Qualifying institutions who upgrade from FedMail or FedLine Web to FedLine Advantage or establish a new FedLine Advantage connection for the FedNow Service will receive 12 months of credits from FedLine Advantage billing eligibility.

[116] Early termination fees and/or expedited order fees may apply to all FedLine Direct packages and FedLine Direct à la carte options.

[117] These add-on services can be purchased only with a FedLine Solution.

[118] Additional VPNs are available for FedLine Advantage, FedLine Command, and FedLine Direct packages only.

[119] Fee is in addition to the FedLine Direct package fees or Additional 2Mbps WAN Connection fee.

[120] The FedLine Custom Implementation Fee is $2,500 or $5,000 based on the complexity of the setup.

[121] Available only to customers with a priced FedLine package and does not include user credentials, which are required to access priced services and certain informational services. Credentials are sold separately in packs of five via the FedMail Subscriber 5-pack.

[122] Five download codes are included at no cost in all Plus and Premier packages.

[123] Available for FedLine Web Plus, FedLine Web Premier, FedLine Advantage Plus, and FedLine Advantage Premier packages. It is also available for no extra fee in FedLine Command Plus and Direct packages.

[124] The End of Day Financial Institution Reconcilement Data (FIRD) and Statement of Account Spreadsheet File (SASF) are available for Master accounts only.

[125] Available with FedLine Plus and Premier packages.

[126] Available for FedLine Web Plus and Premier packages. Available for no extra fee in FedLine Advantage and higher packages.

[127] Charging the $10 Replacement Copy Fee is at the discretion of Reserve Banks.

By order of the Board of Governors of the Federal Reserve System.

Ann E. Misback,

Secretary of the Board.

BILLING CODE 6210–01–P

FEDERAL TRADE COMMISSION

[File No. P085405]

Agency Information Collection Activities; Proposed Collection; Comment Request; Extension; Correction

AGENCY: Federal Trade Commission.

ACTION: Notice; correction.

SUMMARY: The Federal Trade Commission (''Commission'') published a document in the **Federal Register** of November 4, 2024, concerning its proposal to extend for an additional three years the Office of Management and Budget (''OMB'') clearance for information collection requirements contained in the rules and regulations under the Pay-Per-Call Rule. Shortly after publication, Commission staff learned the document contained an incorrect date. The Commission issues this correction to reflect the corrected date. The current information collection clearance expires on January 31, 2025, not January 30, 2024.

FOR FURTHER INFORMATION CONTACT: P. Connell McNulty, Attorney, Division of Marketing Practices, Bureau of Consumer Protection, Federal Trade Commission, (202) 326–2061, *pmcnulty@ftc.gov.*

SUPPLEMENTARY INFORMATION: The notice document submitted by Commission staff for publication contained a typographical error; specifically, the expiration date for the current OMB clearance was off by one year in the SUMMARY.

Correction

In notice FR Doc. 2024–25559 appearing at 89 FR 87575 in the **Federal Register** of Monday, November 4, 2024, make the following correction. On page 87576, in the last sentence of the **SUMMARY** section, the date of ''January 30, 2024'' is corrected to read ''January 31, 2025''.

Dated: November 20, 2024.

April J. Tabor,

Secretary.

BILLING CODE 6750–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Supplemental Evidence and Data Request on Dietary Intake of Polyunsaturated Fatty Acids and Plasma Lipid and Cardiovascular Events

AGENCY: Agency for Healthcare Research and Quality (AHRQ), HHS.

ACTION: Request for supplemental evidence and data submission.

SUMMARY: The Agency for Healthcare Research and Quality (AHRQ) is seeking scientific information submissions from the public. Scientific information is being solicited to inform our review on *Dietary Intake of Polyunsaturated Fatty Acids and Plasma Lipid and Cardiovascular Events,* which is currently being conducted by the AHRQ's Evidence-based Practice Centers (EPC) Program. Access to published and unpublished pertinent scientific information will improve the quality of this review.

DATES: *Submission Deadline* on or before December 27, 2024.

ADDRESSES:

Email submissions: epc@ahrq.hhs.gov.

Print submissions:

Mailing Address:

Center for Evidence and Practice Improvement, Agency for Healthcare Research and Quality, Attn: EPC SEADs Coordinator, 5600 Fishers Lane, Mail Stop 06E53A, Rockville, MD 20857

Shipping Address (FedEx, UPS, etc.):

Center for Evidence and Practice Improvement, Agency for Healthcare Research and Quality, Attn: EPC SEADs Coordinator, 5600 Fishers Lane, Mail Stop 06E77D, Rockville, MD 20857

FOR FURTHER INFORMATION CONTACT: Kelly Carper, Telephone: 301–427–1656 or Email: *epc@ahrq.hhs.gov.*

SUPPLEMENTARY INFORMATION: The Agency for Healthcare Research and Quality has commissioned the Evidence-based Practice Centers (EPC) Program to complete a review of the evidence for *Dietary Intake of Polyunsaturated Fatty Acids and Plasma Lipid and Cardiovascular Events.* AHRQ is conducting this review pursuant to section 902 of the Public Health Service Act, 42 U.S.C. 299a.

The EPC Program is dedicated to identifying as many studies as possible that are relevant to the questions for each of its reviews. In order to do so, we are supplementing the usual manual and electronic database searches of the literature by requesting information from the public (*e.g.,* details of studies conducted). We are looking for studies that report on *Dietary Intake of Polyunsaturated Fatty Acids and Plasma Lipid and Cardiovascular Events.* The entire research protocol is available online at: *https://effectivehealthcare.ahrq.gov/products/polyunsaturated-fatty/protocol.*

This is to notify the public that the EPC Program would find the following information on *Dietary Intake of Polyunsaturated Fatty Acids and Plasma Lipid and Cardiovascular Events* helpful:

- A list of completed studies that your organization has sponsored for this topic. In the list, please *indicate whether results are available on ClinicalTrials.gov along with the ClinicalTrials.gov trial number.*
- *For completed studies that do not have results on ClinicalTrials.gov*, a summary, including the following elements, if relevant: study number, study period, design, methodology, indication and diagnosis, proper use instructions, inclusion and exclusion criteria, primary and secondary outcomes, baseline characteristics, number of patients screened/eligible/enrolled/lost to follow-up/withdrawn/analyzed, effectiveness/efficacy, and safety results.
- *A list of ongoing studies that your organization has sponsored for this topic.* In the list, please provide the *ClinicalTrials.gov* trial number or, if the trial is not registered, the protocol for the study including, if relevant, a study number, the study period, design, methodology, indication and diagnosis, proper use instructions, inclusion and exclusion criteria, and primary and secondary outcomes.
- Description of whether the above studies constitute *ALL Phase II and above clinical trials* sponsored by your organization for this topic and an index outlining the relevant information in each submitted file.

Your contribution is very beneficial to the Program. Materials submitted must be publicly available or able to be made public. Materials that are considered confidential; marketing materials; study types not included in the review; or information on topics not included in the review cannot be used by the EPC Program. This is a voluntary request for information, and all costs for complying with this request must be borne by the submitter.

The draft of this review will be posted on AHRQ's EPC Program website and available for public comment for a period of 4 weeks. If you would like to be notified when the draft is posted, please sign up for the email list at: *https://effectivehealthcare.ahrq.gov/email-updates.*

The review will answer the following questions. This information is provided as background. AHRQ is not requesting that the public provide answers to these questions.

Key Questions (KQ)

KQ 1: What are the effects of different dietary polyunsaturated fatty acid intake on plasma lipid concentrations in the general population?

KQ 2: What are the effects of different dietary polyunsaturated fatty acid intake on cardiovascular events in the general population?

PICOTS (POPULATIONS, INTERVENTIONS, COMPARATORS, OUTCOMES, TIMING, AND SETTING)

[Study eligibility criteria based on Population, Intervention, Comparator, Outcome (PICO), and other elements]

Element	Inclusion criteria	Exclusion criteria
Population	*Both Key Questions:*	*Both Key Questions:*

PICOTS (POPULATIONS, INTERVENTIONS, COMPARATORS, OUTCOMES, TIMING, AND SETTING)—Continued

[Study eligibility criteria based on Population, Intervention, Comparator, Outcome (PICO), and other elements]

Element	Inclusion criteria	Exclusion criteria
	General population, without CVD, with or without modifiable CV risk factors, including ○ Dyslipidemia (including if taking lipid-lowering medications) ○ Overweight/obese ○ Hyperglycemia and related conditions, including type 2 diabetes ○ Hypertension/high blood pressure *Key Question 1:* Children and adults *Key Question 2:* Adults (≥18 years old)	• Participants with a health-related condition or taking medications that impact fat absorption, fat metabolism. • Participants taking weight loss medications, including glucagon-like peptide-1 agonists. • Undernourished, underweight, stunted, or wasted participants. • Participants who are pre- or post-bariatric surgery. • Participants with other chronic diseases (*e.g.,* cancer, gastrointestinal disease, rheumatic disease, chronic kidney disease, neurologic diseases), including type 1 diabetes. • Participants with clinical CVD (*e.g.,* history of myocardial infarction, angina, stroke, arrhythmia), including congenital heart diseases, or familial hypercholesterolemia.
Interventions	*Both Key Questions:* Dietary intake of Total n-3 or total n-6 PUFA Individual PUFA (*e.g.,* linoleic, ALA, EPA, DHA) Combination of long-chain PUFA (*e.g.,* EPA+DHA+DPA; DHA+ALA) PUFA intake must be defined or described prospectively Studies must specify daily quantity of PUFA intake *Key Question 1:* For studies in children, ○ Include multicomponent interventions (*e.g.,* diet + exercise vs. exercise) ○ Infant formula	*Both Key Questions:* • Studies that do not quantify PUFA intake as either g/day or % of total energy intake from PUFA. • Analyses with PUFA intake as a continuous variable. • Fatty acid intake via infusion (not orally). • Food products or dietary supplements not widely available to U.S. consumers. • Multi-component interventions (*e.g.,* exercise + diet vs. exercise or plant sterols + diet vs. plant sterols) that do not isolate the effect or association of PUFA. • Multi-component interventions of statins + diet where statins are being initiated. Dietary interventions among existing statin users will be included. • Interventions designed to induce weight loss or treat overweight and obesity through energy restriction or hypocaloric diets. • Interventions designed for the purposes of treating medical conditions other than modifiable CV risk factors. • DHA and/or EPA n-3 FA dose >4 g/d. • Enteral feeding.
Comparators	*Both Key Questions:*	*Both Key Questions:*
	Dietary intake of a different level of fatty acids relevant to the exposure No added/supplement PUFA Placebo supplements	Diets with a caloric intake that are significantly higher or lower than the intervention/exposure diet. Diets or interventions that vary substantially in intake of macronutrients (or other factors) other than the intervention and comparator of interest. Different PUFA dietary exposure (*e.g.,* comparison of undefined quantiles).
Outcomes	*Key Question 1:* • Plasma lipoprotein concentrations ○ LDL cholesterol (LDL-c) ○ HDL cholesterol (HDL-c) ○ Non-HDL-cholesterol ○ Triglycerides (triacylglycerol) (Tg) ○ Lipoprotein(a) ○ Apolipoprotein B (ApoB)	*Key Question 1:* • Total cholesterol (TC). • TC:HDL ratio. • LDL:HDL ratio. • Chylomicrons. • VLDL-c. • IDL-c. • Other apolipoproteins. • Lipoprotein profiles. • Evaluations of fatty acid biomarker levels.

PICOTS (POPULATIONS, INTERVENTIONS, COMPARATORS, OUTCOMES, TIMING, AND SETTING)—Continued

[Study eligibility criteria based on Population, Intervention, Comparator, Outcome (PICO), and other elements]

Element	Inclusion criteria	Exclusion criteria
	Key Question 2: • Cardiovascular events ○ Atherosclerotic cardiovascular disease (total) ○ Major adverse cardiac (or cerebral) events (MAC[C]E) ○ Specific cardiovascular events ▪ Myocardial infarction ▪ Coronary heart/artery disease ▪ Peripheral vascular/artery disease ○ Revascularization (for studies published after 1995) ○ Cardiovascular disease-related mortality ○ Stroke ○ Incident atrial fibrillation	*Key Question 2:* • Other cardiac or vascular related outcomes. • Participant reported events.
Subgroups/effect modifiers of interest.	*Both Key Questions:* • Specific life stages ○ Infants (for Key Question 1 only) ○ Children and adolescents (for Key Question 1 only) ○ Adults (19–64) ○ Older adults (≥65) ○ Pregnant or postpartum ○ Menopausal status • Other characteristics ○ Sex (male, female) ○ Socioeconomic status ○ Social determinants of health ○ Race/ethnicity ○ Physical activity level ○ Anthropometry ○ Health status, including type 2 diabetes ○ Percent of total energy intake replaced ○ Dietary trans fatty acid intake ○ Baseline lipid concentrations ○ Dietary cholesterol intake	None.
Design	*Key Question 1:* • Studies of adults ○ Parallel or cross-over randomized controlled trials (RCTs) ▪ n ≥25/group * • Studies of children ○ Parallel or cross-over RCTs ▪ n ≥25/group * ○ Nonrandomized comparative studies ▪ Must account for potential confounders ▪ n ≥50/group * *Key Question 2:* • Studies of adults ○ Parallel or cross-over RCTs ▪ n ≥25/group * ○ Nonrandomized comparative studies ▪ Must account for potential confounders ▪ Dietary intake must be defined or described prospectively ▪ We will aim for a minimum of about 10 observational studies for each specific PUFA—CV event pair (*e.g.,* EPA and stroke). We will thus select the largest observational studies within each category.† ▪ n ≥100/group	*Both Key Questions:* • Observational studies that do not account for confounders. • Analyses of dietary fat as a continuous variable (*e.g.,* RR per g/day intake) without an analysis at a threshold (*e.g.,* RR for > vs < threshold). • All other study designs.
Timing	*Key Question 1:* • Minimum intervention length: 4 weeks • In cross-over studies, any change in outcome measure must exclude data from the first week after end of any prior treatments	None.

PICOTS (POPULATIONS, INTERVENTIONS, COMPARATORS, OUTCOMES, TIMING, AND SETTING)—Continued

[Study eligibility criteria based on Population, Intervention, Comparator, Outcome (PICO), and other elements]

Element	Inclusion criteria	Exclusion criteria
	Key Question 2: • Minimum follow-up ○ If population has no CV risk factors (or unselected general population): 10 years ○ If population has one or more CV risk factors: 5 years	
Setting	• General community settings, including nursing homes, assisted living facilities, etc.	• Hospital or other acute care settings. • Institutionalized, confined settings (*e.g.,* prisons).
Publication	• English language • Published in peer-reviewed journals	

* Minimum sample size may be altered depending on the number of eligible studies found.

† Applying this approach for the 2016 AHRQ report n-3 fatty acids and cardiovascular disease (*https://doi.org/10.23970/AHRQEPCERTA223*), we included: for cardiac event outcomes, observational studies with at least 10,000 participants; for stroke outcomes, at least 3000 participants; for arrhythmia outcomes, at least 2000 participants; congestive heart failure outcomes, at least 700 participants; and for peripheral vascular disease events and MACE outcomes, at least 500 participants. In all instances, if a study meets eligibility criteria for any outcome, we will extract all outcomes of interest from that study; therefore, there will be multiple instances of studies being included for an outcome even though the study might not have met study size criteria for that specific outcome.

CV = cardiovascular; CVD = cardiovascular disease; PUFA = polyunsaturated fatty acids; ALA = alpha-linolenic acid; EPA = eicosapentaenoic aci; DHA= docosahexaenoic acid; DPA = docosapentaenoic acid; n-3 = Omega 3; n-6 = Omega 6; FA = fatty acid; c = cholesterol; LDL = low-density lipoprotein; IDL = intermediate-density lipoprotein; HDL high-density lipoprotein; TC—total cholesterol; Tg = Triglycerides/Triacylglycerols; apoA = apolipoprotein; MAC[C]E = Major adverse cardiac (or cerebro) events; BMI = body mass index; KQ = key question; N = number of participants.

Dated: November 21, 2024.

Marquita Cullom,

Associate Director.

Centers for Disease Control and Prevention

Notice of Closed Meeting

Pursuant to 5 U.S.C. 1009(d), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended, and the Determination of the Director, Office of Strategic Business Initiatives, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, pursuant to Public Law 92–463. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Disease, Disability, and Injury Prevention and Control Special Emphasis Panel (SEP)—CE25–021, Research Grants for Preventing Violence and Violence Related Injury.

Dates: February 19–20, 2025.

Times: 10 a.m.–5 p.m., EST.

Place: Web Conference.

Agenda: To review and evaluate grant applications.

For Further Information Contact: Carlisha Gentles, Pharm.D., B.C.P.S., C.D.C.E.S., Scientific Review Officer, National Center for Injury Prevention and Control, Centers for Disease Control and Prevention, 4770 Buford Highway NE, Mailstop S106–9, Atlanta, Georgia 30341. Telephone: (770) 488–1504; Email: *CGentles@cdc.gov.*

The Director, Office of Strategic Business Initiatives, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Office of Strategic Business Initiatives, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–10891]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by December 27, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.*

FOR FURTHER INFORMATION CONTACT: William Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* New collection (Request for a new OMB control number); *Title of Information Collection:* Medicaid Program; Medicare Savings Program Application and Eligibility Determinations; *Use:* The provisions in this collection of information request are necessary for helping to enroll individuals into the Medicare Savings Programs (MSPs) as directed by the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) and for implementing the September 21, 2023 (88 FR 65230) final rule entitled, ''Streamlining Medicaid: Medicare Savings Program Eligibility Determination and Enrollment'' (hereinafter ''MSP final rule'') (CMS–2421–F; RIN 0938–AU00).

CMS did not previously estimate several costs for implementing the provisions of MIPPA related to MSPs as well as costs related to MSPs that were longstanding costs inherent to the Medicaid program that predated MIPPA. To address that oversight, we estimate such burden in this collection of information request. We also estimate burden and savings associated with the provisions in the MSP final rule. Such burden was set out in the Regulatory Impact Analysis section of the final rule.

The MSPs are essential to the health and well-being of those enrolled, promoting access to care and helping free up individuals' limited income for food, housing, and other life necessities. Through the MSPs, Medicaid pays Medicare Part B premiums each month for over 10 million individuals and Part A premiums for over 700,000 individuals. State Medicaid agencies receive applications and adjudicate eligibility for MSP coverage.

MIPPA created new requirements for states to leverage the Medicare Part D Low-Income Subsidy (LIS) program to help enroll likely-eligible individuals in MSPs, and the MSP final rule expanded those requirements. States use information collected by the Social Security Administration on the LIS application (transmitted to states with the consent of an individual completing an application) to determine eligibility for the MSPs. Under the MSP final rule, the state Medicaid agency accepts and verifies the information provided on the LIS application (to the extent allowable under the MSP final rule); communicates with the applicant or the authorized representative about any additional information needed to make an MSP determination; makes the MSP eligibility determination; enrolls the individual in an MSP, if eligible; and informs the individual about the rights and responsibilities for applying for full Medicaid eligibility. Applicants include anyone who chooses to apply for LIS and provides consent for their application to be considered for MSPs.

In addition to building on MIPPA and strengthening the LIS pathway for enrolling in MSPs, the MSP final rule streamlined MSP eligibility and enrollment processes, reduced administrative burden on states and applicants, and increased enrollment and retention of eligible individuals.

Form Number: CMS–10891 (OMB control number: 0938–TBD); *Frequency:* Occasionally; *Affected Public:* State, Local and Tribal Governments and Individuals or households; *Number of Respondents:* 3,460,750; *Total Annual Responses:* 3,460,750; *Total Annual Hours:* 5,517,157. (For policy questions regarding this collection contact: Melissa Heitt at 410–786–2484.)

William N. Parham, III

Director, Division of Information Collections and Regulatory Impacts, Office of Strategic Operations and Regulatory Affairs.

Medicare Program; Public Meeting for Air Ambulance Quality & Patient Safety Advisory Committee—December 12, 2024, February 18, 2025, and May 8, 2025

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice of meeting.

SUMMARY: This notice announces virtual public meetings of the Air Ambulance Quality and Patient Safety (AAQPS) Advisory Committee. The AAQPS Advisory Committee will review options to establish quality, patient safety, and clinical capability standards for each clinical capability level of air ambulances.

DATES: *Virtual Meeting Dates:* The AAQPS Advisory Committee will hold virtual meetings on December 12, 2024, February 18, 2025, and May 8, 2025, from 10:00 a.m. to 5:00 p.m., Eastern Time (E.T.).

Deadline for Submitting Requests for Special Accommodations: Requests for special accommodations must be received at least 2 weeks before each meeting.

Registration Link: The virtual meetings will be open to the public and held via the Zoom webinar platform. Virtual attendance information will be provided upon registration. To register for the virtual meeting, please visit: *https://www.cms.gov/medicare/regulations-guidance/advisory-committees/advisory-committee-air-ambulance-quality-and-patient-safety.* Attendance is open to the public subject to any technical or capacity limitations.

Deadline for Registration: All individuals who plan to attend the virtual public meeting must register to attend. Request to provide oral comments are due at least fourteen (14) calendar days prior to the meeting date. Interested parties are encouraged to register as far in advance of the meeting as possible.

A detailed agenda and materials will be available prior to the meeting on the AAQPS Advisory Committee website at: *https://www.cms.gov/medicare/regulations-guidance/advisory-committees/advisory-committee-air-ambulance-quality-and-patient-safety.*

A recording and a summary of the meeting will be made available on the AAQPS Advisory Committee website approximately 45 calendar days after the meeting.

ADDRESSES: *Virtual Meeting Location:* All meetings are open to the public and instructions to view will be posted on the AAQPS Advisory Committee website, and upon registration. If you wish to provide oral comments during the meetings you must complete a registration form on the AAQPS Advisory Committee website at: *https://www.cms.gov/medicare/regulations-guidance/advisory-committees/advisory-committee-air-ambulance-quality-and-patient-safety,* and submit a written copy of your remarks to *AAQPS@cms.hhs.gov.*

FOR FURTHER INFORMATION CONTACT: Ashley Spence, CMS, at (410) 786–2000 or via email at *AAQPS@cms.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

The Secretary of the Department of Health and Human Services (HHS) and the Secretary of Transportation established the Air Ambulance Quality and Patient Safety (AAQPS) Advisory Committee on August 22, 2023, in response to section 106 of the No Surprises Act, enacted as part of the Consolidated Appropriations Act, 2021, div. BB, tit. I, Public Law 116–260 (December 27, 2020). The AAQPS Advisory Committee will be tasked with reviewing options to establish quality, patient safety, and clinical capability standards for each clinical capability level of air ambulances.

The AAQPS Advisory Committee is governed by the provisions of the Federal Advisory Committee Act (FACA), Public Law 92–463 (Oct. 6, 1972), as amended by 5 U.S.C. app. 2.

II. Advisory Committee Membership Roster

On June 2, 2023, HHS published an Invitation for Member Nominations in the **Federal Register** for the AAQPS Advisory Committee (88 FR 37253). This notice also announces the members of the AAQPS Advisory Committee.

- Jeff Richey—HHS Secretary's Designee/Representative.
- Robert Reckert—DoT Secretary's Designee/Representative.
- Ben Clayton—DoT Representative.
- Colonel Steven L. Coffee—Patient Advocate.
- Dr. Jordan Pritzker—Group Health Plans and Health Insurance Issuers.
- Dr. Mark Gamber—HHS Representative.
- Dr. William Hinckley—Healthcare Provider.
- Eileen Frazer—Accrediting bodies.
- Grace Arnold—State Insurance Regulator.
- Jason Clark—HHS Representative.
- Jason Quisling—DoT Representative.
- Jeff Houser—DoT Representative.
- Paul Julander—DoT Representative.
- Thomas Judge—DoT Representative.

III. Summary of the Agenda

During the December 12, 2024, February 18, 2025, and May 8, 2025 meetings, the AAQPS Advisory Committee will review options to establish quality, patient safety, and clinical capability standards for each clinical capability level of air ambulances. A more detailed agenda and meeting materials will be made available 3 days before the meetings on the AAQPS Advisory Committee website at *https://www.cms.gov/medicare/regulations-guidance/advisory-committees/advisory-committee-air-ambulance-quality-and-patient-safety.*

IV. Public Participation

The meetings will be open to the public for virtual attendance on a first-come, first-served basis, as there may be capacity or technical limitations. Please see the **ADDRESSES** section to view the meeting link.

The Department is committed to providing equal access to this meeting for all participants. If you need alternative formats or services because of a disability, such as sign language interpreter, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section no later than 2 weeks before each meeting.

The Department will accept oral comments, which must be limited to the objectives of the committee and limited to three (3) minutes per person. Individual members of the public who wish to present oral comments must register and provide a written copy of prepared remarks for inclusion in the meeting records and for circulation to

AAQPS Advisory Committee members. All prepared remarks submitted on time will be considered as part of the meeting's record.

V. Submitting Written Comments

Members of the public may submit written comments for consideration by the Committee at any time via email to *AAQPS@cms.hhs.gov.* Additionally, members of the public will have the opportunity to submit comments during the December 12, 2024, February 18, 2025, and May 8, 2025, virtual meetings through the chat feature of the Zoom webinar platform. Members of the public are encouraged to submit lengthy written comments (more than three sentences) to the email address above. Advance submissions that become part of the committee deliberations will become part of the official record of the meeting.

The Administrator of CMS, Chiquita Brooks-LaSure, having reviewed and approved this document, authorizes Vanessa Garcia, who is the Federal Register Liaison, to electronically sign this document for purposes of publication in the **Federal Register**.

Vanessa Garcia,

Federal Register Liaison, Centers for Medicare & Medicaid Services.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2018–N–3236]

Advisory Committee; Oncologic Drugs Advisory Committee; Renewal

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; renewal of Federal advisory committee.

SUMMARY: The Food and Drug Administration (FDA or the Agency) is announcing the renewal of the Oncologic Drugs Advisory Committee by the Commissioner of Food and Drugs (the Commissioner). The Commissioner has determined that it is in the public interest to renew the Oncologic Drugs Advisory Committee for an additional 2 years beyond the charter expiration date. The new charter will be in effect until the September 1, 2026, expiration date.

DATES: Authority for the Oncologic Drugs Advisory Committee will expire on September 1, 2026, unless the Commissioner formally determines that renewal is in the public interest.

FOR FURTHER INFORMATION CONTACT: Yvette Waples, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 31, Rm. 2417, Silver Spring, MD 20993–0002, 301–796–9001, *ODAC@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to 41 CFR 102–3.65 and approval by the Department of Health and Human Services and by the General Services Administration, FDA is announcing the renewal of the Oncologic Drugs Advisory Committee (the Committee). The Committee is a discretionary Federal advisory committee established to provide advice to the Commissioner. The Committee advises the Commissioner or designee in discharging responsibilities as they relate to helping to ensure safe and effective drugs for human use and, as required, any other product for which FDA has regulatory responsibility.

The Committee reviews and evaluates data concerning the safety and effectiveness of marketed and investigational human drug products for use in the treatment of cancer and makes appropriate recommendations to the Commissioner.

Pursuant to its charter, the Committee shall consist of a core of 13 voting members, including the Chair. Members and the Chair are selected by the Commissioner or designee from among authorities knowledgeable in the fields of general oncology, pediatric oncology, hematologic oncology, immunology oncology, biostatistics, and other related professions. Members will be invited to serve for overlapping terms of up to 4 years. Non-Federal members of this committee will serve as Special Government Employees or representatives. Federal members will serve as Regular Government Employees or Ex-Officios. The core of voting members may include one technically qualified member, selected by the Commissioner or designee, who is identified with consumer interests and is recommended by either a consortium of consumer-oriented organizations or other interested persons. In addition to the voting members, the Committee may include one non-voting representative member who is identified with industry interests. There may also be an alternate industry representative.

The Commissioner or designee shall have the authority to select members of other scientific and technical FDA advisory committees (normally not to exceed 10 members) to serve temporarily as voting members and to designate consultants to serve temporarily as voting members when: (1) expertise is required that is not available among current voting standing members of the Committee (when additional voting members are added to the Committee to provide needed expertise, a quorum will be based on the combined total of regular and added members) or (2) to comprise a quorum when, because of unforeseen circumstances, a quorum is or will be lacking. Because of the size of the Committee and the variety in the types of issues that it will consider, FDA may, in connection with a particular committee meeting, specify a quorum that is less than a majority of the current voting members. The Agency's regulations (21 CFR 14.22(d)) authorize a committee charter to specify quorum requirements.

If functioning as a medical device panel, an additional non-voting representative member of consumer interests and an additional non-voting representative member of industry interests will be included in addition to the voting members.

Further information regarding the most recent charter and other information can be found at *https://www.fda.gov/advisory-committees/oncologic-drugs-advisory-committee/oncologic-drugs-advisory-committee-roster* or by contacting the Designated Federal Officer (see **FOR FURTHER INFORMATION CONTACT**). In light of the fact that no change has been made to the committee name or description of duties, no amendment will be made to 21 CFR 14.100.

This notice is issued under the Federal Advisory Committee Act as amended (5 U.S.C. 1001 *et seq.*). For general information related to FDA advisory committees, please visit us at *http://www.fda.gov/AdvisoryCommittees/default.htm.*

Dated: November 19, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–D–4540]

Recommended Followup Testing for an Ames-Positive Drug (Active Ingredient) or Metabolite To Support First-in-Human Clinical Trials With Healthy Subjects; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled ''Recommended Followup Testing for an Ames-Positive Drug (Active Ingredient) or Metabolite To Support First-in-Human Clinical Trials With Healthy Subjects.'' This draft guidance makes recommendations on followup testing for Ames-positive active ingredients in circumstances when a sponsor decides to continue development. The guidance recommends a consistent process of followup testing and evaluation that first should be conducted for an Ames-positive active ingredient before proceeding with first-in-human (FIH) trials in healthy human subjects. These recommendations are intended to potentially help address and lower safety concerns before proceeding with FIH trials in healthy human subjects.

DATES: Submit either electronic or written comments on the draft guidance by February 25, 2025 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2024–D–4540 for ''Recommended Followup Testing for an Ames-Positive Drug (Active Ingredient) or Metabolite To Support First-in-Human Clinical Trials With Healthy Subjects.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of this draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Timothy W. Robison, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 3328, Silver Spring, MD 20993, 301–796–1283.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled ''Recommended Followup Testing for an Ames-Positive Drug (Active Ingredient) or Metabolite To Support First-in-Human Clinical Trials With Healthy Subjects.'' Positive results in the Ames test suggest potential DNA reactivity, indicating that followup testing and evaluation of an Ames-positive active ingredient are necessary to assess its in vivo mutagenic and carcinogenic potential.[1] Positive results in the Ames test are correlated with carcinogenic potential in rodents; however, this correlation is not perfect because mutations are only one of many

[1] See the International Council for Harmonisation guidance for industry ''S2(R1) Genotoxicity Testing and Data Interpretation for Pharmaceuticals Intended for Human Use,'' available at *https://www.fda.gov/media/170461/download.*

stages in tumor development. In addition, the mutagenic response may be due to exceeding a detoxification threshold or the induction of oxidative damage to which bacterial cells may be more sensitive than mammalian cells in vitro or tissues in vivo.

This guidance makes recommendations on followup testing for Ames-positive active ingredients in those rare circumstances when a sponsor decides to continue development for potential approval by FDA. These recommendations are intended to potentially address and lower certain safety concerns before proceeding with FIH trials in healthy human subjects. Followup testing cannot entirely mitigate the concerns raised by an Ames-positive finding, and some residual risk remains in the absence of an adequate carcinogenicity assessment. Thus, Ames-positive active ingredients that are further developed should be those targeting serious or life-threatening diseases with unmet medical needs.

Consideration might be given to the administration of an investigational new drug containing an Ames-positive active ingredient to healthy human subjects only if the results of extensive followup testing conducted before clinical administration lowered the concern for cancer based on a weight-of-evidence (WoE) approach evaluating the potential for mutagenicity. A WoE evaluation, for instance, might find that followup testing in an in vitro mammalian cell mutation assay and in vivo mutation assay are both negative and that other considerations do not raise any other safety concerns. Positive findings in either the in vitro mammalian cell mutation assay or in vivo mutation assay would preclude testing in healthy human subjects. The sponsor also should provide a thoroughly considered rationale for why FIH trials should enroll healthy subjects in lieu of patients with the disease or condition the investigational drug product with the Ames-positive active ingredient is intended to treat. Alternatively, consideration should be given to enrolling patients with the disease or condition of interest and designing the trial in a manner that may offer a treatment benefit in addition to the usual aims of a phase 1 trial (*e.g.,* pharmacokinetics, tolerability, etc.).

The guidance recommends that a consistent process of followup testing and evaluation should first be conducted for an Ames-positive active ingredient before FIH trials are commenced in healthy subjects. An Ames-positive metabolite observed at low levels (*e.g.,* at the threshold of toxicological concern) would generally pose minimal safety concerns and may be managed differently. The recommendations explained in the guidance for followup testing are intended to inform both review staff and industry.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on ''Recommended Followup Testing for an Ames-Positive Drug (Active Ingredient) or Metabolite To Support First-in-Human Clinical Trials With Healthy Subjects.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. The previously approved collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521). The collections of information in 21 CFR part 312 for investigational new drug applications have been approved under OMB control number 0910–0014. The collections of information found in 21 CFR parts 50 and 56 pertaining to protection of human subjects have been approved under OMB control number 0910–0130.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at *https://www.fda.gov/drugs/guidance-compliance-regulatory-information/guidances-drugs, https://www.fda.gov/regulatory-information/search-fda-guidance-documents*, or *https://www.regulations.gov*.

Dated: November 21, 2024.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–D–4643]

Assessment of Ovarian Toxicity in Premenopausal Adults During Drug Development for Oncologic Products; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled ''Assessment of Ovarian Toxicity in Premenopausal Adults During Drug Development for Oncologic Products.'' This draft guidance provides recommendations to sponsors regarding the measurement of ovarian toxicity using clinical measures and biomarkers of ovarian function in relevant cancer clinical trials that enroll premenopausal adults with ovaries. Assessment of ovarian toxicity in cancer trials helps ensure that patients and clinicians have information about the possible long-term impacts of treatment on ovarian function and thus facilitate informed decision-making regarding anti-cancer agents.

DATES: Submit either electronic or written comments on the draft guidance by January 27, 2025, to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your

comments, that information will be posted on *https://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2024–D–4643 for ''Assessment of Ovarian Toxicity in Premenopausal Adults During Drug Development for Oncologic Products.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Suparna Wedam, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 2112, Silver Spring, MD 20993, 301–796–1776, or James Myers, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled ''Assessment of Ovarian Toxicity in Premenopausal Adults During Drug Development for Oncologic Products.'' This draft guidance provides recommendations to sponsors regarding the measurement of ovarian toxicity using clinical measures and biomarkers of ovarian function in relevant cancer clinical trials that enroll premenopausal adults with ovaries. Loss of ovarian function is a potentially irreversible toxicity associated with systemic anti-cancer agents that may result in infertility and long-term morbidities related to early-onset menopause and estrogen deficiency, including vasomotor symptoms, sexual dysfunction, osteoporosis, cardiovascular disease, and cognitive dysfunction. Routine collection of ovarian toxicity data in cancer clinical trials of investigational agents is currently lacking. Assessment of ovarian toxicity in cancer trials is essential to ensure that patients and clinicians have information about the possible long-term impacts of treatment on ovarian function and thus facilitate informed decision-making regarding anti-cancer agents.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on ''Assessment of Ovarian Toxicity in Premenopausal Adults During Drug Development for Oncologic Products.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. The previously approved collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521). The collections of information in 21 CFR part 312 for investigational new drug applications have been approved under OMB control number 0910–0014. The collections of information in 21 CFR part 314 relating to new drug applications have been approved under OMB control number 0910–0001. The collections of information in 21 CFR part 601 relating to biologics license applications have been approved under OMB control number 0910–0338.

Agency Information Collection Request; 60-Day Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, is publishing the following summary of a proposed collection for public comment.

DATES: Comments on the ICR must be received on or before January 27, 2025.

ADDRESSES: Submit your comments *sagal.musa@hhs.gov* or by calling (202) 205–2634.

FOR FURTHER INFORMATION CONTACT: When submitting comments or requesting information, please include the document identifier 4040–0012–60D and project title for reference, to Sagal Musa, email: *sagal.musa@hhs.gov,* or call (202) 205–2634 the Reports Clearance Officer.

SUPPLEMENTARY INFORMATION: Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Title of the Collection: SF–270 Request for Advance or Reimbursement.

Type of Collection: Extension.

OMB No. 4040–0012.

Abstract: The SF–270 Request for Advance or Reimbursement is a federal form used by grant awardees to request funds either in advance or as reimbursement for project expenses. This IC expires on January 31, 2025. *Grants.gov* seeks a three-year clearance of these collections.

ANNUALIZED BURDEN HOUR TABLE

Forms (if necessary)	Respondents (if necessary)	Number of respondents	Number of responses per respondents	Average burden per response	Total burden hours
SF–270 Request for Advance or Reimbursement.	Grant Applicants	100,000	1	1	100,000
Total		100,000	1	1	100,000

FOR FURTHER INFORMATION CONTACT: When submitting comments or requesting information, please include the document identifier 4040–0013–60D and project title for reference, to Sagal Musa, email: *sagal.musa@hhs.gov,* or call (202) 205–2634 the Reports Clearance Officer.

SUPPLEMENTARY INFORMATION: Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Title of the Collection: Disclosure of Lobbying Activities (SF–LLL) and Certification Regarding Lobbying.

Type of Collection: Extension.

OMB No. 4040–0013.

Abstract: Disclosure of Lobbying Activities (SF–LLL) and Certification Regarding Lobbying are OMB-approved collections (4040–0013). These information collections are used by grant applicants. This IC expires on February 28, 2025. We are requesting a three-year clearance of these collections.

Type of respondent: The Disclosure of Lobbying Activities (SF–LLL) and Certification Regarding Lobbying forms are used by organizations to apply for Federal financial assistance in the form of grants. These forms are submitted to the Federal grant-making agencies for evaluation and review.

ANNUALIZED BURDEN HOUR TABLE

Forms (if necessary)	Respondents (if necessary)	Number of respondents	Number of responses per respondents	Average burden per response	Total burden hours
Disclosure of Lobbying Activities (SF–LLL).	Grant Applicants	12,675	1	1	12,675
Certification Regarding Lobbying	Grant Applicants	3,952	1	0.5	1,976
Total		12,675	1		14,651

DEPARTMENT OF HEALTH AND HUMAN SERVICES

[Document Identifier: OS–0990–0434]

Agency Information Collection Request. 60-Day Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, is publishing the following summary of a proposed collection for public comment.

DATES: Comments on the ICR must be received on or before January 27, 2025.

ADDRESSES: Submit your comments to *Sherrette.Funn@hhs.gov* or by calling (202) 264–0041 and *PRA@HHS.GOV.*

FOR FURTHER INFORMATION CONTACT: When submitting comments or requesting information, please include the document identifier 0990–0434–60D and project title for reference, to Sherrette A. Funn, email: *Sherrette.Funn@hhs.gov, PRA@HHS.GOV* or call (202) 264–0041 the Reports Clearance Officer.

SUPPLEMENTARY INFORMATION: Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Title of the Collection: Meetings, Conferences, and Seminars—Public Accommodations and Commercial Facilities—Funding and Sponsorship.

Type of Collection: Extension.

OMB No. 0990–0434—Office of the Assistant Secretary for Financial Resources, Office of Acquisitions.

Abstract: Meetings, Conferences, and Seminars—Public Accommodations and Commercial Facilities—Funding and Sponsorship: Performance of HHS mission requires the support of contractors. In some circumstances, depending on the requirements of the specific contract, the contractor is tasked to conduct meetings, conferences, and seminars. HHSAR 311.7101(a) (Responsibilities) and the clause at HHSAR 352.211–1 (Accessibility of meetings, conferences, and seminars to persons with disabilities) require contractors to provide a plan describing the contractor's ability to meet the accessibility standards in 28 CFR part 36. HHSAR 311.7202(b) (Responsibilities) and the clause at HHSAR 352.211–2 (Conference sponsorship request and conference materials disclaimer) require contractors to provide funding disclosure and a content disclaimer statement on conference materials. As a result of these clauses, HHS contractors

providing conference, meeting, or seminars services are required to provide specific information to HHS as stated in the HHS Acquisition Regulation.

The Agency is requesting a 3-year extension to collect this information from public or private businesses.

ANNUALIZED BURDEN HOUR TABLE

Forms (if necessary)	Respondents (if necessary)	Number of respondents	Number of responses per respondents	Average burden per response	Total burden hours
	Business (Contractor)	1,067	1	1	1,067
Total		1,067	1	1	1,067

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Heart, Lung, and Blood Institute, National Institutes of Health; Notice of Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the Sickle Cell Disease Advisory Committee.

The meeting will be held as a virtual meeting and open to the public, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting. The meeting can be accessed from the NIH Videocast at the following link: *https://videocast.nih.gov/watch=55419.*

Name of Committee: Sickle Cell Disease Advisory Committee.

Date: January 14, 2025.

Time: 10:00 a.m. to 3:00 p.m.

Agenda: NHLBI Sickle Cell Disease Program Updates and Long Term Follow-up of Participants undergoing gene therapy for SCD.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Contact Person: julie.panepinto@nih.gov.

Meeting Format: Virtual Meeting.

Any member of the public interested in presenting oral comments to the committee may notify the Contact Person listed on this notice at least 10 days in advance of the meeting. Interested individuals and representatives of organizations may submit a letter of intent, a brief description of the organization represented, and a short description of the oral presentation. Only one representative of an organization may be allowed to present oral comments and if accepted by the committee, presentations may be limited to five minutes. Both printed and electronic copies are requested for the record. In addition, any interested person may file written comments with the committee by forwarding their statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

Information is also available on the Institute's/Center's home page: *https://www.nhlbi.nih.gov/advisory-and-peer-review-committees/nhlbi-sickle-cell-disease-advisory-committee* where an agenda and any additional information for the meeting will be posted when available.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Draft Revised Human Immunodeficiency Virus (HIV) Organ Policy Equity Act Safeguards and Research Criteria for Transplantation of Organs Infected With HIV

AGENCY: National Institutes of Health, Department of Health and Human Services.

ACTION: Request for comments.

SUMMARY: The HOPE Act requires the Secretary of Health and Human Services (the Secretary) to develop and publish criteria for research involving the transplantation of organs from donors with HIV to recipients with HIV. In 2015, the National Institutes of Health (NIH), and the U.S. Department of Health and Human Services (HHS) published research criteria applicable to such transplants, which have been in effect for all transplants involving organs from donors with HIV as authorized by the HOPE Act. As amended in an HHS final rule published elsewhere in this issue of the **Federal Register**, the Secretary determined that participation in clinical research should no longer be a requirement for the transplantation of kidneys and livers from donors with HIV to recipients with HIV and amended the HHS regulations governing the operation of the Organ Procurement and Transplantation Network (OPTN) to reflect this determination. As a result, HOPE Act transplants involving kidneys and livers from donors with HIV no longer need to comply with the research criteria. Given this regulatory change, NIH proposes to delete aspects of the research criteria that are specific to kidney and liver transplantation. NIH proposes additional changes to the research criteria based on its review of scientific evidence and in consideration of prior public feedback concerning the criteria, including comments provided in the recent rulemaking procedure that modified the OPTN regulations. NIH invites the public to submit comments regarding the proposed changes to the research criteria.

DATES: To ensure that comments will be considered, comments must be received no later than 5 p.m. on December 12, 2024.

ADDRESSES: Comments may be submitted by any of the following methods:

- *Email: HOPEAct@mail.nih.gov.*
- *Fax:* 301–451–5671.
- *Regular Mail:* Dr. Jonah Odim, 5601 Fishers Lane, Room 6B21, MSC 9827, Bethesda, MD 20892–9827.
- *Hand Delivery, Overnight Mail, FedEx, and UPS:* Dr. Jonah Odim, 5601 Fishers Lane, Room 6B21, MSC 9827, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Dr. Jonah Odim, Chief Clinical Transplantation Section, Transplantation Branch, 5601 Fishers

Lane, Room 6B21, MSC 9827, Rockville, MD 20892–9827; by email at *odimj@niaid.nih.gov;* by telephone at (301) 828–7220.

SUPPLEMENTARY INFORMATION:

I. Background

A. HHS Oversight of Organ Allocation and Transplantation

HHS is responsible for overseeing the operation of the nation's OPTN, including assisting in the equitable allocation of donor organs for transplantation. 42 U.S.C. 274(b)(2)(D). The OPTN is a network of transplant centers, organ procurement organizations, and other providers who work collectively to develop, implement, and monitor organ allocation policy and performance of the organ transplant system. The OPTN is also charged with developing policies on many subjects related to organ donation and transplantation, which include establishing standards of quality pertaining to organs procured for use in transplantation. 42 U.S.C. 274(b)(2)(E).

B. HOPE Act Requirements and Implementation

The enactment of the HOPE Act in 2013, Public Law 113–51, eliminated the prohibition in the United States on transplantation of organs from persons with HIV, allowing transplantation of these organs if certain requirements are satisfied. Under the HOPE Act, organs from donors with HIV may be transplanted only in recipients living with HIV prior to receiving such an organ. 42 U.S.C. 274(b)(3)(A). Further, the HOPE Act requires that transplants of HIV-positive organs occur only in recipients with HIV who are participating in institutional review board (IRB)-approved research protocols that adhere to certain criteria, standards, and regulations. 42 U.S.C. 274(b)(3)(B)(i). However, the Secretary may lift the research and IRB requirements if the Secretary has determined that participation in such clinical research, as a requirement for such transplants, is no longer warranted. 42 U.S.C. 274(b)(3)(B)(ii).

The HOPE Act outlines the process by which the Secretary may make such a determination under 42 U.S.C. 274(b)(3)(B)(ii). Specifically, the Secretary must routinely review the results of scientific research, in conjunction with the OPTN, to determine whether the results warrant revision of the OPTN standards of quality regarding organs from donors with HIV. If the Secretary determines that those standards of quality should be revised, the Secretary must direct the OPTN to revise the standards. 42 U.S.C. 274f–5(c)(2). The Secretary is also required to revise the regulatory provision implementing the HOPE Act, 42 CFR 121.6, upon determining that revisions to the OPTN standards of quality are warranted. 42 U.S.C. 274f–5(c)(3).

C. Research Criteria for HOPE Act Transplants

In 2015, NIH published proposed research criteria for HOPE Act transplants in the **Federal Register** and solicited public comment. 80 FR 34912 (June 18, 2015). After consideration of public comments received, NIH published the ''Final Human Immunodeficiency Virus (HIV) Organ Policy Equity (HOPE) Act Safeguards and Research Criteria for Transplantation of Organs Infected With HIV'' (''2015 Research Criteria''). 80 FR 73785 (November 25, 2015). The goals of the 2015 Research Criteria were to ensure that research using organs from donors with HIV was conducted under conditions protecting the safety of research participants and the public and that the results of this research provide a basis for evaluating the safety of transplants of organs from donors with HIV in recipients with HIV. 80 FR 73785.

1. Proposed Changes to the 2015 Research Criteria

NIH is now proposing changes to the 2015 Research Criteria to reflect the Secretary's determination, published by regulation on November 27, 2024, that HOPE Act kidney and liver transplants are no longer required to be conducted as research subject to the 2015 Research Criteria and to continue to further the goals shared in 2015 with respect to HOPE Act transplants of other organs from donors with HIV that remain subject to the Research Criteria. NIH proposes to remove requirements from the Research Criteria applicable to HOPE Act kidney and liver transplants.

NIH also proposes other changes to the 2015 NIH Research Criteria for conducting HOPE Act transplants of organs other than kidneys and livers (primarily heart and lung transplants) in IRB-approved research. The proposed changes are intended to accelerate research, ensure research participant safety, and maintain stakeholder confidence in clinical research conducted under the HOPE Act. Notable revisions include the elimination of (i) the transplant program experience requirement of five organ-specific transplants of organs from a donor without HIV in a recipient with HIV conducted over 4 years; (ii) mandated pre-implant biopsies; and (iii) the requirement for HIV independent advocates for living donors with HIV and recipients with HIV. Other organs (including multi visceral organs such as small intestine, stomach, liver, pancreas and colon) and multi organ transplants (*e.g.,* heart-kidney) must comply with the revised Research Criteria for inclusion of any non-kidney or non-liver organs from donors with HIV and subject to IRB approval.

2. Consideration of Public Comment Received on the HOPE Act NPRM

In proposing these changes, NIH has considered the public participation in the HOPE Act rulemaking process through which the Secretary's determination was made. In response to the September 21, 2024, notice of proposed rulemaking that proposed the Secretary's determination with respect to HOPE Act kidney and liver transplants, 89 FR 74174, HHS received multiple comments that were relevant to the NIH Research Criteria, and some comments provided specific suggestions for the content of the revised NIH Research Criteria. All comments relating to the content of the revised Research Criteria were provided to NIH for consideration in the development of the proposed revised Research Criteria that appear later in this document. NIH has considered these comments and proposes changes to the Research Criteria responsive to specific comments received, as described here.

- Several commenters noted that referring to organs ''infected with HIV'' or ''HIV positive organs'' may be stigmatizing, and one commenter requested that references to ''organs with HIV'' be revised to ''organ(s) from donors with HIV.'' The commenters indicated a strong preference for the use of stigma-reducing, and person-first language. In response to these comments, NIH proposes to revise references in the Research Criteria to refer to donors with HIV, recipients with HIV, and organs from donors with HIV. This is consistent with the Centers for Disease Control and Prevention's (CDC) Stigma Language Guide [1] and with language adopted in the final rule.
- Commenters also requested the elimination of the current requirement that a transplant team perform at least five transplants within a four-year period between any donor and a recipient with HIV for all organs, as, in the commenters' estimation, this

[1] Centers for Disease Control and Prevention. Let's Stop HIV Together: Stigma Language Guide. *https://www.cdc.gov/stophivtogether/hiv-stigma/ways-to-stop.html.* Accessed 2/23/2024.

requirement is not necessary for organs from donors with HIV to be used safely. In response to these comments and based on its review of the evidence, NIH proposes to remove this requirement from the proposed revised Research Criteria.

- Commenters suggested that each transplant team should include infectious disease specialists with expertise in HIV care. In response to these comments and based on its review of the evidence, NIH proposes that this requirement of the 2015 NIH Research Criteria be retained in the revised Research Criteria.
- One commenter requested the elimination of the biopsy requirement. In response to this comment and based on its review of the evidence, NIH proposes to eliminate the requirement for a pre-implantation biopsy.
- One commenter noted that, in revising the Research Criteria, NIH should maintain the strong patient safety record for HOPE Act transplants, while actively seeking to reduce burdens that may be slowing the establishment of non-kidney and non-liver HOPE Act transplant programs. In response to this comment and based on its review of the evidence, NIH believes that the proposed revisions to the Research Criteria appropriately strike this balance.

NIH's rationale for these specific proposed revisions to the Research Criteria is provided in more detail in Section III, below.

The Secretary delegated to the Director, NIH, the responsibility to revise the 2015 Research Criteria. The proposed revised Research Criteria proposed below were developed by NIH staff in collaboration with representatives of the Centers for Disease Control and Prevention, the Food and Drug Administration, the Health Resources and Services Administration, and the Office of the Assistant Secretary for Health.

If adopted as proposed, it is anticipated that the revised Research Criteria would expand access to transplantation for recipients with HIV, provide benefits to organ donors; ensure safety of ongoing HOPE Act transplants of organs other than kidneys and livers; and provide for the systematic collection of safety and efficacy data related to transplants of hearts, lungs, and other organs from donors with HIV in recipients with HIV.

3. Other Considerations

(a) Research Results—Heart and Lung Transplants in Recipients With HIV

As the Secretary has decided that HOPE Act transplants of organs other than kidneys and livers should remain subject to the Research Criteria until additional scientific research demonstrates the safety and efficacy of such transplants, NIH wishes to highlight the current state of the science with regard to transplantation of hearts and lungs from donors without HIV in recipients with HIV. The early outcomes data for such transplants may provide a foundation for future HOPE Act thoracic organ transplants (Koval 2018, 2019; Madan 2019). For example, in a retrospective analysis utilizing the OPTN database to compare outcomes of 75 heart transplant recipients with HIV to those of 29,848 heart transplant recipients without HIV, survival rates were similar across the comparator groups, while rejection rates were approximately 2-fold higher in recipients with HIV (38.7% vs. 17.7%, respectively) (Doberne 2021). Similar findings were reported in studies based on the International Society for Heart and Lung Transplantation (ISHLT) and Scientific Registry of Transplant Recipients (SRTR) databases (Wairmu 2021; Storm 2024; Madan 2019). Fewer transplants of lungs from donors without HIV in recipients with HIV have been reported (Koval 2019; Kern 2014; Rouzaud 2022).

NIH recognizes that additional research in this area will advance the state of the relevant science, and the results of such research will increase the evidence basis needed to support any future determination by the Secretary that participation in clinical research is no longer a requirement for transplants of hearts or lungs from donors with HIV in recipients with HIV.

(b) Education Regarding the HOPE Act

While no related proposals are included in the proposed revision to the 2015 Research Criteria, NIH further notes that expanding awareness and continuing education of potential organ donors, transplant centers, organ procurement organizations (OPOs), healthcare providers, and people living with HIV will be important to fully realize the medical and societal benefits envisioned under the HOPE Act. Success in these endeavors will expand the supply of quality donor HIV organs, enhance transplant access, improve quality of life, and increase longevity for potential transplant recipients with HIV. Reducing longstanding stigma and increasing access to organ transplantation will be particularly important for communities disproportionately impacted by HIV (*https://www.hiv.gov/hiv-basics/overview/about-hiv-and-aids/who-is-at-risk-for-hiv*).

(D) Secretary's Review of Research Results

As stated above, the HOPE Act requires that the Secretary, in conjunction with the OPTN, periodically review the results of scientific research to determine whether the results warrant revision to the OPTN standards of quality with respect to organs from donors with HIV and the safety of transplanting an organ from a donor with a particular strain of HIV into a recipient with a different strain of HIV. 42 U.S.C. 274f–5(c)(1). This review allows the Secretary to determine if the safety and efficacy of HOPE Act transplants are comparable to non-HOPE Act transplants and, if warranted, to further determine whether such transplants may be conducted outside of a research setting.

Past procedures for this review are described in detail in the final rule amending the OPTN regulation. Past reviews involved deliberations by bodies that provided recommendations to the Secretary, including the OPTN (which solicited and considered public comments)[2] [3] the HHS Advisory Committee on Blood and Tissue Safety and Availability (ACBTSA)[4] and the HHS Blood, Organ, and Tissue Senior Executive Council (BOTSEC) (an advisory forum for senior leadership from HHS entities involved in blood, organ, and tissue safety and availability. The recommendations of the OPTN, ASBTSA, and BOTSEC, as well as subsequent research results, were considered in the Secretary's decision as to whether participation in clinical research, as a requirement for certain types of transplants of organs from donors with HIV, is no longer warranted.

Although not incorporated into the 2015 Research Criteria or the proposed revised criteria, HHS intends to conduct a regular review of such scientific research to enable evidence-based recommendations, including any changes to the Research Criteria, and any determinations on transitioning additional HOPE Act organ transplants to medical practice and standard-of-care

[2] Organ Procurement and Transplantation Network. Public Comment Proposal: Modify the HOPE Act Variance to Include Other Organs. 2019 Jan 22: *https://optn.transplant.hrsa.gov/media/2800/dtac_publiccomment_20190122.pdf.*

[3] Cooper M. ''OPTN Letter to Secretary Becerra on the HOPE Act.'' 2021 Oct 29. *https://optn.transplant.hrsa.gov/media/ueyjdfnd/hope-act-letter.pdf.*

[4] HHS Advisory Committee on Blood and Tissue Safety and Availability. 2022. Fifty-Sixth ACBTSA Meeting November 17, 2022—Meeting Summary. *https://www.hhs.gov/oidp/advisory-committee/blood-tissue-safety-availability/meeting-summary/2022-11-17/index.html.*

(*i.e.,* removing the clinical research and IRB requirements for such transplants) if appropriate in the future. NIH seeks public comment on this approach, and on the procedures through which this review should be conducted.

II. Instructions for Submitting Comments

Comments are invited on the proposed changes to the 2015 Research Criteria.

Please note that, during the rulemaking process resulting in the HHS final rule published elsewhere in this issue of the **Federal Register**, HHS received and considered public comments regarding whether HOPE Act kidney and liver transplants from donors with HIV should continue to be required to be conducted in accordance with the 2015 Research Criteria. After consideration of public comments received, the Secretary determined that participation in clinical research will no longer be a requirement for HOPE Act kidney and liver transplants from donors with HIV.

Further, in making the determination regarding HOPE Act kidney and liver transplants, the Secretary expressed the view in the notice of proposed rulemaking published on September 12, 2024, 89 FR 74174, that the current research and IRB requirements should be maintained for HOPE Act transplants of all other organs, considering the lack of data on outcomes for HOPE Act organ transplants other than kidney or liver transplants. This decision was affirmed in the HHS final rule published elsewhere in this issue of the **Federal Register**.

Because the Secretary's determination regarding HOPE Act kidney and liver transplants, and the Secretary's decision that other HOPE Act organ transplants should remain subject to the Research Criteria, resulted from full notice and comment rulemaking procedures, NIH views comments concerning the Secretary's determination or decision to be outside the scope of this solicitation and such comments will not be considered. Specifically, related comments will not be considered with respect to these proposed changes to the 2015 Research Criteria: (1) eliminating the requirement that transplants involving kidneys and livers from donors with HIV comply with the NIH Research Criteria; (2) retaining the requirement that transplants involving all other organs (other than kidneys and livers) from donors with HIV comply with the NIH Research Criteria; and (3) removal of criteria specific to the transplantation of kidneys and livers.

Do not include personal information in submitted comments that you do not want to be publicly disclosed.

III. Proposed Revision to the 2015 Research Criteria

The proposed revision to the 2015 Research Criteria is as follows:

Proposed Revised Human Immunodeficiency Virus (HIV) Organ Policy Equity (HOPE) Act Safeguards and Research Criteria for Transplantation of Organs From Donors With HIV

Table of Contents

Abbreviations
Definitions
Proposed Revised Hope Act Safeguards and Research Criteria
Table 1. Revised Final Human Immunodeficiency Virus (HIV) Organ Policy Equity (HOPE) Act Safeguards and Research Criteria for Transplantation of Organs With HIV
REFERENCES

Abbreviations

AIDS	Acquired Immunodeficiency Syndrome.
ART	Antiretroviral Therapy.
CD4	Cluster of Differentiation 4.
D−	Donor Human Immunodeficiency Virus negative.
D+	Donor Human Immunodeficiency Virus positive.
HBV	Hepatitis B virus.
HCT/Ps	Human Cells, Tissues, and Cellular and Tissue-Based Products (HCT/Ps).
HCV	Hepatitis C virus.
HIV	Human Immunodeficiency Virus.
HIV−	Human Immunodeficiency Virus negative (using serology and/or nucleic acid testing using FDA-licensed, approved or cleared devices).
HIV+	Human Immunodeficiency Virus positive (using serology and/or nucleic acid testing using FDA-licensed, approved or cleared devices).
HOPE Act	HIV Organ Policy Equity Act.
HRSA	Health Resources and Services Administration.
IRB	Institutional review board.
NIH	National Institutes of Health.
NPRM	Notice of proposed rule making.
OI	Opportunistic infection.
OPO	Organ procurement organization.
PML	Progressive multifocal leukoencephalopathy.
R−	Recipient HIV negative.
R+	Recipient HIV positive.
RNA	Ribonucleic acid.
SOPs	Standard operating procedures.

Definitions

Antiretroviral therapy (ART) resistance	When an HIV strain develops drug resistance and/or genetic mutations associated with drug resistance.
HIV superinfection	Systemic HIV superinfection is defined as the detection of HIV viral sequences that phylogenetically cluster with the donor's viral population at two or more time points in circulating blood cells, plasma, or recipient tissues other than the allograft.
Suppressed viral load	HIV RNA below 50 copies per mL with current technology at the time of publication of this research criteria document.

The 2015 Research Criteria are outlined in six broad categories (Donor Eligibility, Recipient Eligibility, Transplant Hospital Criteria, Organ Procurement Organization (OPO) Responsibilities, Prevention of Inadvertent Transmission of HIV, and Study Design/Required Data Elements and Outcome Measures). Table 1 summarizes the proposed new HOPE Act Research Criteria in each category

and compares them to the 2015 NIH Research Criteria.

TABLE 1—PROPOSED REVISED HUMAN IMMUNODEFICIENCY VIRUS (HIV) ORGAN POLICY EQUITY (HOPE) ACT SAFEGUARDS AND RESEARCH CRITERIA FOR TRANSPLANTATION OF ORGANS FROM DONORS WITH HIV [1]

Category	Previous criteria	Proposed revised criteria (No longer pertains to kidney and liver transplants [5])
Donor Eligibility:		
All deceased donors with HIV	No evidence of invasive opportunistic complications of HIV infection.	No evidence of invasive opportunistic complications of HIV infection.
	Pre-implant donor organ biopsy	There is no requirement for a pre-implantation biopsy.*
	Viral load: no requirement	Viral load: no requirement.
Deceased donor with known history of HIV and prior antiretroviral therapy (ART).	The study team must describe the anticipated post-transplant antiretroviral regimen(s) to be prescribed for the recipient and justify its conclusion that the regimen will be safe, tolerable, and effective.	The study team must describe the anticipated post-transplant antiretroviral regimen(s) to be prescribed for the recipient and justify its conclusion that the regimen will be safe, tolerable, and effective.
Living donor with HIV	Well-controlled HIV infection defined as: • Cluster of Differentiation 4 (CD4) + T-cell count ≥500/μL for the 6-month period before donation • HIV–1 ribonucleic acid (RNA) <50 copies/mL • No evidence of invasive opportunistic complications of HIV infection	*Thoracic Organs Exception:* The living donor standards are not relevant for thoracic organ transplant except in the rare instances of living donor lung transplant or ''domino'' heart transplant. In such circumstances, the deceased donor eligibility criteria should be followed.
	Pre-implant donor organ biopsy	*Other Organs:* If a living donor with HIV donates another type or organ (other than kidney and liver), the deceased donor eligibility criteria should be followed.*
Recipient Eligibility:	CD4+ T-cell count ≥200/μL (kidney)	CD4+ T-cell count: no minimum threshold when all other recipient eligibility criteria are met.*
	CD4+ T-cell count ≥100 μL (liver) within 16 weeks prior to transplant and no history of opportunistic infection (OI); or ≥200 μL if history of OI is present.	
	HIV–1 RNA <50 copies/mL and on a stable antiretroviral regimen.	HIV–1 RNA <50 copies/mL and on a stable antiretroviral regimen.
	No evidence of active opportunistic complications of HIV infection.	No evidence of active opportunistic complications of HIV infection.
	No history of primary central nervous system (CNS) lymphoma or progressive multifocal leukoencephalopathy (PML).	No history of primary central nervous system (CNS) lymphoma or progressive multifocal leukoencephalopathy (PML).
Transplant Hospital Criteria	Transplant hospital with established program for care of subjects with HIV.	Transplant hospital with established program for care of patients with HIV.
	HIV program expertise on the transplant team	HIV program expertise on the transplant team.
	Organ-specific experience with transplants of organs from donors without HIV to recipients with HIV (5 D-/R+ transplant cases over 4 years).	There is no longer a center specific case experience requirement with transplants of organs from donors without HIV to recipients with HIV.* Transplant patients with organs from donors with HIV must be managed with a multidisciplinary team before, during, and after transplant. The multidisciplinary team must include transplant surgeons, physicians, HIV specialists, nurses, social workers, and pharmacists capable of therapeutic drug monitoring to minimize drug-drug interactions.
	Standard operating procedures (SOPs) and training for the organ procurement, implanting/operative, and postoperative care teams for handling subjects with HIV, and organs and tissues from individuals with HIV.	Standard operating procedures (SOPs) and training for the organ procurement, implanting/operative, and postoperative care teams for handling HIV-infected subjects with HIV, and organs and tissues from individuals with HIV.
	IRB-approved research protocol for transplantation of organs from donors with HIV in recipients with HIV.	IRB-approved research protocol for transplantation of organs from donors with HIV in recipients with HIV for the applicable organs.*
	Institutional biohazard plan outlining measures to prevent and manage inadvertent exposure to and/or transmission of HIV.	Institutional biohazard plan outlining measures to prevent and manage inadvertent exposure to and/or transmission of HIV.
	Provide each living donor with HIV and recipient with HIV with an ''independent advocate''.	There is no longer a requirement to provide an HIV independent advocate beyond standard site practices.*
	Policies and SOPs governing the necessary knowledge, experience, skills, and training for independent advocates.	Policies and SOPs governing the necessary knowledge, experience, skills, and training for independent advocates.

TABLE 1—PROPOSED REVISED HUMAN IMMUNODEFICIENCY VIRUS (HIV) ORGAN POLICY EQUITY (HOPE) ACT SAFEGUARDS AND RESEARCH CRITERIA FOR TRANSPLANTATION OF ORGANS FROM DONORS WITH HIV [1]—Continued

Category	Previous criteria	Proposed revised criteria (No longer pertains to kidney and liver transplants [5])
OPO Responsibilities	SOPs and staff training procedures for working with deceased donors with HIV and their families in pertinent history taking; medical chart abstraction; the consent process; and handling blood, tissues, organs, and biospecimens. TABLE 1—PROPOSED REVISED HUMAN IMMUNODEFICIENCY VIRUS (HIV) ORGAN POLICY EQUITY (HOPE) ACT SAFEGUARDS AND RESEARCH CRITERIA FOR TRANSPLANTATION OF ORGANS FROM DONORS WITH HIV [1]—Continued

Category	Previous criteria	Proposed revised criteria (No longer pertains to kidney and liver transplants [5])
	New OI Failure to suppress viral replication (persistent HIV viremia). HIV-associated organ failure Malignancy Graft failure Mismatched ART resistance versus donor Death	New OI. Failure to suppress viral replication (persistent HIV viremia). HIV-associated organ failure. Malignancy. Graft failure. Mismatched ART resistance versus donor. Death. Type of rejection (antibody mediated versus cellular rejection).* Chronic heart allograft vasculopathy.* Chronic lung allograft dysfunction.* Hospitalized infections.* Estimated glomerular filtration rate.* HIV superinfection.* Re-transplantation.* Simultaneous multiple organ transplants.

* Denotes a revision of the 2015 Research Criteria.
** The previous category of outcome measures (from the original 2015 Research Criteria) is modified to also include data elements.

A summary of the proposed revisions in each category of the Research Criteria is provided below.

Donor Eligibility

The only change proposed by NIH to this category applies to all deceased donors with HIV. NIH proposes removing the requirement for a pre-implantation donor organ biopsy. Although pre-implantation biopsies for kidneys and livers have occurred regularly, pre-implant donor heart and lung biopsies are not routinely performed. Likewise, donor biopsies for other organs are not routine. Given that kidney and liver transplants are no longer subject to the NIH research criteria, NIH proposes removing the requirement for pre-implantation biopsies. Any pre-implant biopsies obtained, as part of future IRB-approved research protocols, should be stored in accordance with local institutional requirements and the federal regulations applicable to slides, tissues, and blocks, if applicable. 42 CFR 493.1105 (*https://www.ecfr.gov/current/title-42/chapter-IV/subchapter-G/part-493/subpart-J/section-493.1105*).

With respect to living donors with HIV, the 2015 NIH Research Criteria defined a well-controlled HIV infection and required pre-implant donor organ biopsies. The last living lobar lung transplant procedure in the U.S. was performed in 2013. NIH proposes removing this element as not relevant for heart and lung transplantation except in the rare instances of living donor lung transplant or ''domino'' heart transplants. In such circumstances, NIH proposes that the deceased donor eligibility criteria apply. If another type of organ is donated by a living donor with HIV, NIH proposes that the deceased donor eligibility criteria apply.

Recipient Eligibility

The only change proposed in this category concerns CD4+ T-cell counts. The 2015 NIH Research Criteria imposed requirements with respect to the CD4+ T-cell counts specific to livers and kidneys. Given that kidney and liver transplants are no longer required to comply with the research criteria, NIH proposes no minimum threshold CD4+ T-cell counts for other organs when all other eligibility criteria are met.

Transplant Hospital

NIH proposes several changes to this category. The requirement for prior experience with transplantation of organs from donors without HIV in recipients with HIV. The 2015 NIH Research Criteria required experience with five transplants over the four preceding years involving organs from donors without HIV transplanted into recipients with HIV. NIH proposes removing this requirement, which was perceived by many as burdensome and a barrier to entry to transplant hospitals wishing to perform HOPE Act transplants. To maximize favorable outcomes and effectively prevent and manage adverse events, NIH proposes that all patients with transplants involving donors with HIV be managed by multidisciplinary teams before, during, and after transplantation. NIH proposes specific members of this multidisciplinary team.

NIH proposes removing the requirement that each living donor with HIV and each transplant recipient with HIV be provided with an HIV-independent advocate. NIH proposes instead that standard site practices apply. Based on a decade of HOPE Act clinical experience, stakeholder surveys have indicated that a requirement for an independent advocate is widely perceived as a redundant layer of consent and a potential barrier for some HIV patients who would otherwise benefit from an HIV donor transplant. The NIH notes that per current OPTN policy and guidance, all living donors, including those with HIV, have an independent advocate. NIH's proposed change to the 2015 Research Criteria will not alter that.

[5] Consistent with the final rule amending the OPTN regulations, transplants using kidneys and livers from donors with HIV no longer need to comply with the HOPE Act research criteria. When multiple organs from donors with HIV are implanted simultaneously (*e.g.,* dual heart-kidney or dual lung-kidney), the Research Criteria apply to such multiple organ transplants if the transplant of any of the organs are subject to the revised Research Criteria. For example, while a kidney transplant from a donor with HIV no longer is required to be conducted in accordance with the Research Criteria, a dual heart-kidney or dual lung-kidney transplant with organs from donors with HIV is required to be conducted in accordance with the Research Criteria and in accordance with an IRB-approved research protocol. A dual liver-kidney transplant with from donors with HIV is not required to be conducted in accordance with the Research Criteria, as neither liver transplants nor kidney transplants from donors with HIV are required to be conducted as research.

Organ Procurement Organization (OPO) Responsibilities

NIH does not propose changes to this category.

Prevention of Inadvertent Transmission of HIV

NIH does not propose changes to this category.

Required Outcome Measures and Data Elements

The 2015 Research Criteria referenced required outcome measures. NIH proposes using the more precise ''Required Data Elements and Outcome Measures.'' NIH notes that data on these existing and proposed outcome measures is collected by the OPTN as specified by the Secretary. NIH does not intend to propose data collection requirements beyond those collected by the OPTN.

Waitlist Candidates: NIH proposes adding several data elements for waitlist candidates. NIH proposes adding cytomegalovirus (CMV immunoglobulin G [IgG]) as a required outcome measure for co-infection. NIH also proposes adding additional data elements and outcome measures: renal dysfunction, liver dysfunction, indication for transplant, use of mechanical circulatory devices, and use of extracorporeal membrane oxygenation, intra-aortic balloon pump, and ventricular assist device.

Donors (All): First, NIH proposes adding additional elements related to the type of deceased donation: after brain death (DBD) or after circulatory death (DCD) given the increasing use of the latter technique in the U.S. In addition, NIH proposes the following data elements for all donors (if applicable): *ex-vivo* perfusion and normothermic regional perfusion including durations of warm and cold ischemia.

Living Donors: The 2015 NIH Research Criteria included as required outcome measures progression to renal insufficiency in kidney living donors. Because kidney and liver transplants are no longer subject to the research criteria, NIH plans to retain these outcomes only where applicable (*e.g.,* for deceased donor heart-living donor kidney transplants, deceased donor heart-living donor liver transplants, and for other organs subject to the research criteria).

Transplant Recipients: NIH proposes adding several additional data elements and outcome measures to those included for transplant recipients in the 2015 NIH Research Criteria. NIH proposes adding the following outcome measures: type of rejection (antibody-mediated versus cellular rejection), chronic allograft vasculopathy (heart), chronic lung allograft dysfunction (lung), hospital infections, estimated glomerular filtration rate (heart and lung), HIV superinfection, graft failure (heart and lung), re-transplantation, and simultaneous multiple organ transplants.

While not proposed as a requirement of the Research Criteria, NIH proposes to provide the following recommendation regarding patient management: NIH recommends that transplant programs and healthcare providers follow current and updated practice management guidelines. For specific guidance, transplant programs and healthcare providers should consult vaccination guidance (*https://www.cdc.gov/acip-recs/hcp/vaccine-specific/index.html*) and expert guidance for the management of patients with HIV pre-, during-, and post-transplant summarized in: Transplantation in people with HIV (*https://clinicalinfo.hiv.gov/en/guidelines/hiv-clinical-guidelines-adult-and-adolescent-arv/whats-new*).

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Cancer Institute; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Cancer Institute Special Emphasis Panel; Comprehensive Partnerships to Advance Cancer Health Equity (CPACHE).

Date: January 16, 2025.

Time: 9:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Cancer Institute Shady Grove, 9609 Medical Center Drive, Room 7W108, Rockville, Maryland 20850.

Meeting Format: Virtual Meeting.

Contact Person: Clifford W. Schweinfest, Ph.D., Scientific Review Officer, Special Review Branch, Division of Extramural Activities, National Cancer Institute, NIH, 9609 Medical Center Drive, Room 7W108, Rockville, Maryland 20850, 240–276–6343, *schweinfestcw@mail.nih.gov.*

Name of Committee: National Cancer Institute Special Emphasis Panel; Informatics Technologies for Cancer Research.

Date: January 29, 2025.

Time: 10:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Cancer Institute at Shady Grove, 9609 Medical Center Drive, Room 7W106, Rockville, Maryland 20850.

Meeting Format: Virtual Meeting.

Contact Person: Eduardo Emilio Chufan, Ph.D., Scientific Review Officer, Research Technology and Contract Review Branch, Division of Extramural Activities, National Cancer Institute, NIH, 9609 Medical Center Drive, Room 7W106, Rockville, Maryland 20850, 240–276–7975, *chufanee@mail.nih.gov*.

Name of Committee: National Cancer Institute Special Emphasis Panel; NCI Review of Research Projects in Physical Sciences Oncology.

Date: January 31, 2025.

Time: 11:00 a.m. to 4:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Cancer Institute at Shady Grove, 9609 Medical Center Drive, Room 7W640, Rockville, Maryland 20850.

Meeting Format: Virtual Meeting.

Contact Person: Saejeong J. Kim, Ph.D., Scientific Review Officer, Special Review Branch, Division of Extramural Activities, National Cancer Institute, NIH, 9609 Medical Center Drive, Room 7W640, Rockville, Maryland 20850, 240–276–7684, *saejeong.kim@nih.gov*.

Name of Committee: National Cancer Institute Special Emphasis Panel; NCI Outstanding Investigator Award (R35).

Date: February 6–7, 2025.

Time: 9:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Cancer Institute Shady Grove, 9609 Medical Center Drive, Room 7W104, Rockville, Maryland 20850.

Meeting Format: Virtual Meeting.

Contact Person: David G. Ransom, Ph.D., Chief, Scientific Review Officer, Special Review Branch, Division of Extramural Activities, National Cancer Institute, NIH, 9609 Medical Center Drive, Room 7W104, Rockville, Maryland 20850, 240–276–6351, *david.ransom@nih.gov*.

Name of Committee: National Cancer Institute Special Emphasis Panel; SEP–3: NCI Clinical and Translational Cancer Research.

Date: February 6–7, 2025.

Time: 9:30 a.m. to 2:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Cancer Institute Shady Grove, 9609 Medical Center Drive, Room 7W612, Rockville, Maryland 20850.

Meeting Format: Virtual Meeting.

Contact Person: Prashant Sharma, Ph.D., Scientific Review Officer, Special Review Branch, Division of Extramural Activities, National Cancer Institute, NIH, 9609 Medical Center Drive, Room 7W612, Rockville, Maryland 20850, 240–275–6351, *prashant.sharma@nih.gov*.

Name of Committee: National Cancer Institute Special Emphasis Panel; SEP–7: NCI Clinical and Translational Cancer Research.

Date: February 12, 2025.

Time: 10:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Cancer Institute at Shady Grove, 9609 Medical Center Drive, Room 7W640, Rockville, Maryland 20850.

Meeting Format: Virtual Meeting.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Environmental Health Sciences; Notice of Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the National Advisory Environmental Health Sciences Council.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting. The meeting can be accessed from the NIEHS Videocast at the following link: *https://www.niehs.nih.gov/news/webcasts/index.cfm.*

The meeting will be closed to the public in accordance with the

provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Environmental Health Sciences Council.

Date: February 18, 2025.

Open: 10:30 a.m. to 3:45 p.m.

Agenda: Discussion of program policies and issues/Council Discussion.

Address: NIEHS/National Institutes of Health Building, 79 T.W. Alexander Drive, Research Triangle Park, NC 27709 Virtual Meeting.

Closed: 4:00 p.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Address: NIEHS/National Institutes of Health Building, 79 T.W. Alexander Drive, Research Triangle Park, NC 27709 Virtual Meeting.

Contact Person: David M. Balshaw, BA, Ph.D., Director Division of Extramural Research and Training National Institute of Environmental Health Sciences, P.O. Box 12233, MD EC–27, Research Triangle Park, NC 27709–2233, 984–287–3234, *balshaw@niehs.nih.gov.*

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person. In the interest of security, NIH has procedures at *https://www.nih.gov/about-nih/visitor-information/campus-access-security* for entrance into on-campus and off-campus facilities. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors attending a meeting on campus or at an off-campus federal facility will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

Information is also available on the Institute's/Center's home page: *www.niehs.nih.gov/dert/c-agenda.htm,* where an agenda and any additional information for the meeting will be posted when available. (Catalogue of Federal Domestic Assistance Program Nos. 93.115, Biometry and Risk Estimation—Health Risks from Environmental Exposures; 93.142, NIEHS Hazardous Waste Worker Health and Safety Training; 93.143, NIEHS Superfund Hazardous Substances—Basic Research and Education; 93.894, Resources and Manpower Development in the Environmental Health Sciences; 93.113, Biological Response to Environmental Health Hazards; 93.114, Applied Toxicological Research and Testing, National Institutes of Health, HHS)

Dated: November 21, 2024.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

[OMB Control Number 1651–0028]

Agency Information Collection Activities; Extension; Cost Submission (Form 247)

AGENCY: U.S. Customs and Border Protection (CBP), Department of Homeland Security.

ACTION: 30-Day Notice and request for comments.

SUMMARY: The Department of Homeland Security, U.S. Customs and Border Protection (CBP) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). The information collection is published in the **Federal Register** to obtain comments from the public and affected agencies.

DATES: Comments are encouraged and must be submitted no later than December 27, 2024, to be assured of consideration.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Please submit written comments and/or suggestions in English. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Requests for additional PRA information should be directed to Seth Renkema, Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection, Office of Trade, Regulations and Rulings, 90 K Street NE, 10th Floor, Washington, DC 20229–1177, Telephone number 202–325–0056 or via email *CBP_PRA@cbp.dhs.gov.* Please note that the contact information provided here is solely for questions regarding this notice. Individuals seeking information about other CBP programs should contact the CBP National Customer Service Center at 877–227–5511, (TTY) 1–800–877–8339, or CBP website at *https://www.cbp.gov/.*

SUPPLEMENTARY INFORMATION: CBP invites the general public and other Federal agencies to comment on the proposed and/or continuing information collections pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). This proposed information collection was previously published in the **Federal Register** (89 FR 76864) on September 19, 2024, allowing for a 60-day comment period. This notice allows for an additional 30 days for public comments. This process is conducted in accordance with 5 CFR 1320.8. Written comments and suggestions from the public and affected agencies should address one or more of the following four points: (1) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) suggestions to enhance the quality, utility, and clarity of the information to be collected; and (4) suggestions to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. The comments that are submitted will be summarized and included in the request for approval. All comments will become a matter of public record.

Overview of This Information Collection

Title: Cost Submission.

OMB Number: 1651–0028.

Form Number: 247.

Current Actions: CBP proposes to extend the expiration date of this information collection. There is no change to the burden hours or to the information collected.

Type of Review: Extension (without change).

Affected Public: Businesses.

Abstract: The information collected on CBP Form 247, Cost Submission, is used by CBP to assist in correctly calculating the duty on imported merchandise. This form includes details on actual costs and helps CBP determine which costs are dutiable and which are not.

This collection of information is provided for by subheadings 9801.00.10, 9802.00.40, 9802.00.50, 9802.00.60 and 9802.00.80 of the Harmonized Tariff Schedule of the United States (HTSUS), and by 19 U.S.C. 1508 through 1509, 19 CFR 10.11–10.24, 19 CFR 141.88 and 19 CFR 152.106.

CBP Form 247 can be found at: http://www.cbp.gov/xp/cgov/toolbox/forms/.

Type of Information Collection: Form 247.

Estimated Number of Respondents: 1,000.

Estimated Number of Annual Responses per Respondent: 1.

Estimated Number of Total Annual Responses: 1,000.

Estimated Time per Response: 50 hours.

Estimated Total Annual Burden Hours: 50,000.

Dated: November 22, 2024.

Seth D Renkema,

Branch Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection.

Overview of This Information Collection

Title: Declaration of Unaccompanied Articles (CBP Form 255).

OMB Number: 1651–0030.

Form Number: 255.

Current Actions: This submission will renew the expiration validity, without a change to the information requested or method of collection.

Type of Review: Extension (without change).

Affected Public: Individuals.

Abstract: CBP Form 255, Declaration of Unaccompanied Articles, is completed by travelers arriving in the United States either directly or indirectly from the U.S. Virgin Islands, American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands who are declaring merchandise purchases while visiting these locations which are to be sent from these insular possessions at a later date. It is the only means whereby the CBP officer, when the traveler arrives, can apply the exemptions or 5 percent flat rate of duty to all of the traveler's purchases.

Type of Information Collection: CBP Form 255.

Estimated Number of Respondents: 7,500.

Estimated Number of Annual Responses per Respondent: 2.

Estimated Number of Total Annual Responses: 15,000.

Estimated Time per Response: 5 minutes.

Estimated Total Annual Burden Hours: 1,250.

Dated: November 22, 2024.

electronic submission of responses. The comments that are submitted will be summarized and included in the request for approval. All comments will become a matter of public record.

Overview of This Information Collection

Title: Documents Required Aboard Private Aircraft.

OMB Number: 1651–0058.

Current Actions: CBP proposes to extend the expiration date of this information collection without a change to the burden hours or information collected.

Type of Review: Extension (without change).

Affected Public: Individuals.

Abstract: In accordance with 19 CFR 122.27(c), a commander of a private aircraft arriving in the U.S. must present several documents to CBP officers for inspection. These documents include: (1) a pilot certificate/license; (2) a medical certificate; and (3) a certificate of registration. CBP officers use the information on these documents as part of the inspection process for private aircraft arriving from a foreign country. This presentation of information is authorized by 19 U.S.C. 1433, as amended by Public Law 99–570.

Type of Information Collection: Documents aboard a private aircraft.

Estimated Number of Respondents: 120,000.

Estimated Number of Annual Responses per Respondent: 1.

Estimated Number of Total Annual Responses: 120,000.

Estimated Time per Response: .0166.

Estimated Total Annual Burden Hours: 1,992.

Dated: November 22, 2024.

The comments that are submitted will be summarized and included in the request for approval. All comments will become a matter of public record.

Overview of This Information Collection

Title: Establishment of a Bonded Warehouse (Bonded Warehouse Regulations).

OMB Number: 1651–0041.

Current Actions: This submission will extend the expiration date validity without a change to the information collected or method of collection.

Type of Review: Extension (w/o change).

Affected Public: Businesses.

Abstract: Owners or lessees desiring to establish a bonded warehouse must make written application to the U.S. Customs and Border Protection (CBP) port director of the port where the warehouse is located. The application must include the warehouse location, a description of the premises, and an indication of the class of bonded warehouse permit desired. Owners or lessees desiring to alter or to relocate a bonded warehouse may submit an application to the CBP port director of the port where the facility is located. The authority to establish and maintain a bonded warehouse is set forth in 19 U.S.C. 1555, and provided for by 19 CFR 19.2, 19 CFR 19.3, 19 CFR 19.6, 19 CFR 19.14, and 19 CFR 19.36.

Type of Information Collection: Bonded Warehouse Application.

Estimated Number of Respondents: 198.

Estimated Number of Annual Responses per Respondent: 47.

Estimated Number of Total Annual Responses: 9,306.

Estimated Time per Response: 32 minutes.

Estimated Total Annual Burden Hours: 4,963.

Dated: November 22, 2024.

Seth D. Renkema

Branch Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection.

U.S. Customs and Border Protection

[Docket No. USCBP–2024–0027]

Commercial Customs Operations Advisory Committee

AGENCY: U.S. Customs and Border Protection (CBP), Department of Homeland Security (DHS).

ACTION: Committee management; notice of open Federal Advisory Committee meeting.

SUMMARY: The Commercial Customs Operations Advisory Committee (COAC) will hold its quarterly meeting on Wednesday, December 11, 2024, in Washington, DC. The meeting will be open to the public via webinar only.

DATES: The COAC will meet on Wednesday, December 11, 2024, from 1:00 p.m. to 5:00 p.m. Eastern Standard Time (EST). Please note the meeting may close early if the committee has completed its business. Comments must be submitted in writing no later than December 6, 2024.

ADDRESSES: The meeting will be open to the public via webinar only. The webinar link will be posted by 5:00 p.m. EST on November 29, 2024, at *https://www.cbp.gov/trade/stakeholder-engagement/coac/coac-public-meetings.* For information or to request special assistance for the meeting, contact Mrs. Latoria Martin, Office of Trade Relations, U.S. Customs and Border Protection, at (202) 344–1440, as soon as possible.

Comments may be submitted by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Search for Docket Number USCBP–2024–0027. To submit a comment, click the ''Comment'' button located on the top-left hand side of the docket page.
- *Email: tradeevents@cbp.dhs.gov.* Include Docket Number USCBP–2024–0027 in the subject line of the message.

Comments must be submitted in writing no later than December 6, 2024, and must be identified by Docket No. USCBP–2024–0027. All submissions received must also include the words ''Department of Homeland Security.'' All comments received will be posted without change to *https://www.cbp.gov/trade/stakeholder-engagement/coac/coac-public-meetings* and *www.regulations.gov.* Therefore, please refrain from including any personal information you do not wish to be posted. You may wish to view the Privacy and Security Notice, which is available via a link on *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Mrs. Latoria Martin, Office of Trade Relations, U.S. Customs and Border Protection, 1300 Pennsylvania Avenue NW, Room 3.5A, Washington, DC 20229, (202) 344–1440; or Ms. Felicia M. Pullam, Designated Federal Officer, at (202) 344–1440 or via email at *tradeevents@cbp.dhs.gov.*

SUPPLEMENTARY INFORMATION: Notice of this meeting is given under the authority of the Federal Advisory Committee Act, Title 5 U.S.C., ch. 10. The COAC provides advice to the Secretary of the Department of Homeland Security, the Secretary of the Department of the Treasury, and the Commissioner of U.S. Customs and Border Protection (CBP) on matters pertaining to the commercial operations of CBP and related functions within the Department of Homeland Security and the Department of the Treasury.

The COAC is committed to ensuring all participants have equal access regardless of disability status. If you require a reasonable accommodation due to a disability to fully participate, please contact Mrs. Latoria Martin at (202) 344–1440 as soon as possible.

Please feel free to share this information with other interested members of your organization or association.

To facilitate public participation, we are inviting public comment on the issues the committee will consider prior to the formulation of recommendations as listed in the AGENDA section below.

There will be a public comment period after each subcommittee update during the meeting on December 11, 2024. During the meeting, comments may be submitted via the trade events mailbox at *tradeevents@cbp.dhs.gov* or through the Microsoft Teams chat feature. Please note the public comment period for speakers may end before the time indicated on the schedule that is posted on the CBP web page: *http://www.cbp.gov/trade/stakeholder-engagement/coac.*

Agenda

The COAC will hear from the current subcommittees on the topics listed below:

1. The Intelligent Enforcement Subcommittee will provide updates on the work completed and topics discussed in its working groups as well as present proposed recommendations for the COAC's consideration. The Antidumping/Countervailing Duty (AD/CVD) Working Group will provide updates regarding its work and discussions on importer compliance with AD/CVD and other trade remedy measures and requirements. The Intellectual Property Rights (IPR) Process Modernization Working Group anticipates providing updates concerning progress associated with its proposed recommendations specific to IPR enforcement and facilitation. The Forced Labor Working Group (FLWG) will provide updates on continued discussions regarding trade outreach, clarification of requirements, and proposed recommendations. The FLWG reports that it will continue to provide CBP with input as CBP rolls out a case management portal. The Bond Working Group remained on hiatus status since the last public meeting.

2. The Next Generation Facilitation Subcommittee will provide updates on all its existing working groups. The Automated Commercial Environment (ACE) 2.0 Working Group was focused on completing discussions on the Concept of Operations document regarding scenarios for Electronic Export Manifests (EEM) and a portal for infrequent importers, along with the status of previous recommendations proposed earlier this term. The Broker Modernization Working Group (BMWG) remains dedicated to the enhancement of the end user experience and improving the administration of the Customs Broker Licensing Exam (CBLE). This quarter, the Modernized Entry Processes Working Group (MEPWG) continues its National Customs Automation Program (NCAP) discussions and will provide updates on its efforts concerning the reconciliation test. The remaining working group, the Customs Interagency Industry Working Group (CIIWG), was not active this past quarter but will provide a report on topics that the working group will focus on in the coming quarter.

3. The Secure Trade Lanes Subcommittee will provide updates on its seven active working groups: the Centers Working Group, the Cross-Border Recognition Working Group, the De Minimis Working Group, the Export Modernization Working Group, the FTZ/Warehouse Working Group, the Pipeline Working Group, and the Trade Partnership and Engagement Working Group. The Centers Working Group consolidated its review of the Centers' communications functions into the Structure Sub-Working Group and the

Operations Sub-Working Group. The Centers Working Group as a whole, through these two sub-working groups, continues to evaluate the structure and operations of the Centers to enhance their effectiveness, increase transparency, and build stronger communities within CBP and with the Trade. The Cross-Border Recognition Working Group is evaluating whether all deliverables outlined in the Statement of Work have been achieved to determine next steps. CBP has formed a Task Force to assist the De Minimis Working Group regarding the timeframe for submitting de minimis shipments. The De Minimis Working Group, via the Task Force, intends to present proposed recommendations at the December quarterly COAC meeting. The Export Modernization Working Group has continued its work on the Electronic Export Manifest Pilot Program and the effects of progressive filing by the shipper to continuously update export information on successive dates, rather than on a specific date. The Export Modernization Working Group is also working on previous proposed recommendations to determine if new proposed recommendations need to be made and is reviewing the status of proposed recommendations that have not been finalized. The Drawback Task Force, within the Export Modernization Working Group, has continued discussions around COAC-approved recommendations that are in the process of being implemented from last quarter. They are also conducting an analysis of program statistics in the areas of streamlining drawback ruling processes, reviewing compliance issues, and examining areas to maximize resources. The FTZ/Warehouse Working Group continues to review 19 CFR part 146, explore areas in which the Customs-Trade Partnership Against Terrorism (CTPAT) program can be expanded, and consider how to modernize ACE functionality for Foreign Trade Zones (FTZs), and it anticipates presenting proposed recommendations for the COAC's consideration at the December public meeting. The Pipeline Working Group has continued discussing the most appropriate commodities for and potential users of Distributed Ledger Technology to engage in the contemplated pilot for tracking pipeline-borne goods. The Global Interoperability Standard (GIS) Information Collection **Federal Register** Notice (FRN) was published on September 3, 2024 (89 FR 71381), and comments were accepted through November 4, 2024. The Pipeline Working Group has no proposed recommendations for this quarter.

Meeting materials will be available on December 2, 2024, at: *http://www.cbp.gov/trade/stakeholder-engagement/coac/coac-public-meetings.*

Felicia M. Pullam,

Executive Director, Office of Trade Relations.

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

[OMB Control Number 1651–0006]

Agency Information Collection Activities; Extension; Application and Approval To Manipulate, Examine, Sample or Transfer Goods (CBP Form 3499)

AGENCY: U.S. Customs and Border Protection (CBP), Department of Homeland Security.

ACTION: 30-Day notice and request for comments.

SUMMARY: The Department of Homeland Security, U.S. Customs and Border Protection (CBP) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). The information collection is published in the **Federal Register** to obtain comments from the public and affected agencies.

DATES: Comments are encouraged and must be submitted no later than December 27, 2024 to be assured of consideration.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Please submit written comments and/or suggestions in English. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Requests for additional PRA information should be directed to Seth Renkema, Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection, Office of Trade, Regulations and Rulings, 90 K Street NE, 10th Floor, Washington, DC 20229–1177, Telephone number 202–325–0056 or via email *CBP_PRA@cbp.dhs.gov.* Please note that the contact information provided here is solely for questions regarding this notice. Individuals seeking information about other CBP programs should contact the CBP National Customer Service Center at 877–227–5511, (TTY) 1–800–877–8339, or CBP website at *https://www.cbp.gov/.*

SUPPLEMENTARY INFORMATION: CBP invites the general public and other Federal agencies to comment on the proposed and/or continuing information collections pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). This proposed information collection was previously published in the **Federal Register** (89 FR 76866) on September 19, 2024, allowing for a 60-day comment period. This notice allows for an additional 30 days for public comments. This process is conducted in accordance with 5 CFR 1320.8. Written comments and suggestions from the public and affected agencies should address one or more of the following four points: (1) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) suggestions to enhance the quality, utility, and clarity of the information to be collected; and (4) suggestions to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. The comments that are submitted will be summarized and included in the request for approval. All comments will become a matter of public record.

Overview of This Information Collection

Title: Application and Approval to Manipulate, Examine, Sample or Transfer Goods (CBP Form 3499).

OMB Number: 1651–0006.

Form Number: 3499.

Current Actions: This submission will renew the expiration date while updating the burden hours to reflect current usage. No change to information collected or method of collection.

Type of Review: Extension (with change).

Affected Public: Businesses.

Abstract: CBP Form 3499, ''Application and Approval to

Manipulate, Examine, Sample or Transfer Goods,'' is used as an application to perform various operations on merchandise located at a Customs and Border Protection (CBP) approved bonded facility. This form is filed by importers, bonded warehouse proprietors, consignees, transferees, or owners of merchandise, and is subject to approval by the port director. The data requested on the form identifies the merchandise for which action is being sought and specifies the operation that is to be performed. The form may also be approved as a blanket application to manipulate goods for a period of up to one year for continuous or repetitive manipulation. CBP Form 3499 is provided for by 19 U.S.C. 1562, and 19 CFR 158.43, 19.8, 19.11 and is accessible at: *https://www.cbp.gov/newsroom/publications/forms?title=3499&=Apply.*

Type of Information Collection: Form 3499.

Estimated Number of Respondents: 4,200.

Estimated Number of Annual Responses per Respondent: 60.

Estimated Number of Total Annual Responses: 252,000.

Estimated Time per Response: 6 minutes.

Estimated Total Annual Burden Hours: 25,200.

Dated: November 22, 2024.

Seth D. Renkema,

Branch Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection.

[OMB Control Number 1651–0036]

Agency Information Collection Activities; Extension; Declaration of Ultimate Consignee That Articles Were Exported for Temporary Scientific or Educational Purposes

AGENCY: U.S. Customs and Border Protection (CBP), Department of Homeland Security.

ACTION: 30-Day notice and request for comments.

SUMMARY: The Department of Homeland Security, U.S. Customs and Border Protection (CBP) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). The information collection is published in the **Federal Register** to obtain comments from the public and affected agencies.

DATES: Comments are encouraged and must be submitted (no later than December 27, 2024) to be assured of consideration.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain* . Please submit written comments and/or suggestions in English. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Requests for additional PRA information should be directed to Seth Renkema, Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection, Office of Trade, Regulations and Rulings, 90 K Street NE, 10th Floor, Washington, DC 20229–1177, Telephone number 202–325–0056 or via email *CBP_PRA@cbp.dhs.gov.* Please note that the contact information provided here is solely for questions regarding this notice. Individuals seeking information about other CBP programs should contact the CBP National Customer Service Center at 877–227–5511, (TTY) 1–800–877–8339, or CBP website at *https://www.cbp.gov/.*

SUPPLEMENTARY INFORMATION: CBP invites the general public and other Federal agencies to comment on the proposed and/or continuing information collections pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). This proposed information collection was previously published in the **Federal Register** (89 FR 78325) on September 25, 2024, allowing for a 60-day comment period. This notice allows for an additional 30 days for public comments. This process is conducted in accordance with 5 CFR 1320.8. Written comments and suggestions from the public and affected agencies should address one or more of the following four points: (1) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) suggestions to enhance the quality, utility, and clarity of the information to be collected; and (4) suggestions to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. The comments that are submitted will be summarized and included in the request for approval. All comments will become a matter of public record.

Overview of This Information Collection

Title: Declaration of Ultimate Consignee That Articles Were Exported for Temporary Scientific or Educational Purposes.

OMB Number: 1651–0036.

Form Number: N/A.

Current Actions: CBP proposes to extend the expiration date of this information collection with no change to the burden hours or to the information collected.

Type of Review: Extension (without change).

Affected Public: Businesses.

Abstract: The Declaration of the Ultimate Consignee that Articles were Exported for Temporary Scientific or Educational Purposes is used to document duty free entry under conditions when articles are temporarily exported solely for scientific or educational purposes. This declaration is provided for under 19 U.S.C. 1202, HTSUS Subheading 9801.00.40, and 19 CFR 10.67(a)(3) which requires a declaration from the ultimate consignee stating that the articles were sent from the United States solely for temporary scientific or educational use and for no other use abroad than for exhibition, examination, or experimentation; and that the articles are being returned without having been changed in condition in any manner, except by reason of their bona fide use as described in the declaration. This declaration is submitted to CBP by the importer or the agent of the importer and is used by CBP to determine whether the imported articles should be free of duty.

Type of Information Collection: Declaration that Articles were Exported for Temporary Scientific or Educational Purposes.

Estimated Number of Respondents: 55.

Estimated Number of Annual Responses per Respondent: 3.

Estimated Number of Total Annual Responses: 165.

Estimated Time per Response: 10 minutes.

Estimated Total Annual Burden Hours: 27.

Dated: November 22, 2024.

Seth D Renkema,

Branch Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection.

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2024–0002]

Final Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice.

SUMMARY: Flood hazard determinations, which may include additions or modifications of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or regulatory floodways on the Flood Insurance Rate Maps (FIRMs) and where applicable, in the supporting Flood Insurance Study (FIS) reports have been made final for the communities listed in the table below. The FIRM and FIS report are the basis of the floodplain management measures that a community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the Federal Emergency Management Agency's (FEMA's) National Flood Insurance Program (NFIP).

DATES: The date of March 25, 2025 has been established for the FIRM and, where applicable, the supporting FIS report showing the new or modified flood hazard information for each community.

ADDRESSES: The FIRM, and if applicable, the FIS report containing the final flood hazard information for each community is available for inspection at the respective Community Map Repository address listed in the tables below and will be available online through the FEMA Map Service Center at *https://msc.fema.gov* by the date indicated above.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Mapping and Insurance eXchange (FMIX) online at *https://www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the new or modified flood hazard information for each community listed. Notification of these changes has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Insurance and Mitigation has resolved any appeals resulting from this notification.

This final notice is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the new or revised FIRM and FIS report available at the address cited below for each community or online through the FEMA Map Service Center at *https://msc.fema.gov.*

The flood hazard determinations are made final in the watersheds and/or communities listed in the table below.

DEPARTMENT OF HOMELAND SECURITY

U.S. Immigration and Customs Enforcement

[Docket No. ICEB–2024–0010]

RIN 1653–ZA54

Employment Authorization for Lebanese F–1 Nonimmigrant Students Experiencing Severe Economic Hardship as a Direct Result of the Current Crisis in Lebanon

AGENCY: U.S. Immigration and Customs Enforcement; Department of Homeland Security.

ACTION: Notice.

SUMMARY: The Department of Homeland Security (DHS) is suspending certain regulatory requirements for F–1 nonimmigrant students from Lebanon who are experiencing severe economic hardship as a direct result of the current crisis in Lebanon. The Secretary is providing relief to these students who are in lawful F–1 nonimmigrant status, so the students may request employment authorization, work an increased number of hours while school is in session, and reduce their course load while continuing to maintain their F–1 nonimmigrant status.

DATES: This action covers eligible Lebanese F–1 nonimmigrant students beginning on November 27, 2024, and ending on May 27, 2026.

FOR FURTHER INFORMATION CONTACT: Sharon Snyder, Unit Chief, Policy and Response Unit, Student and Exchange Visitor Program, MS 5600, U.S. Immigration and Customs Enforcement, 500 12th Street SW, Washington, DC 20536–5600; email: *sevp@ice.dhs.gov,* telephone: (703) 603–3400. This is not a toll-free number. Program information can be found at *https://www.ice.gov/sevis/.*

SUPPLEMENTARY INFORMATION:

What action is DHS taking under this notice?

The Secretary is exercising authority under 8 CFR 214.2(f)(9) to temporarily suspend the applicability of certain requirements governing on-campus and off-campus employment for F–1 nonimmigrant students whose country of citizenship is Lebanon regardless of country of birth (or individuals having no nationality who last habitually resided in Lebanon), who are present in the United States in lawful F–1 nonimmigrant student status on the date of publication of this notice, and who are experiencing severe economic hardship as a direct result of the current crisis in Lebanon. Previously, DHS issued a notice which applied to F–1 nonimmigrant students from Lebanon who met certain criteria, including having been lawfully present in the United States in F–1 nonimmigrant status on July 26, 2024, that was effective through January 25, 2026. *See* 89 FR 83897 (Oct. 18, 2024). While DHS's prior notice remains effective for eligible F–1 nonimmigrant students, effective with this publication, suspension of the employment limitations is also available through May 27, 2026, for those who are in lawful F–1 nonimmigrant status on the date of publication of this notice. DHS will deem an F–1 nonimmigrant student granted employment authorization through this Notice to be engaged in a ''full course of study'' for the duration of the employment authorization, if the student satisfies the minimum course load set forth in this notice.[1] *See* 8 CFR 214.2(f)(6)(i)(F).

Who is covered by this notice?

This notice applies exclusively to F–1 nonimmigrant students who meet all of the following conditions:

(1) Are a citizen of Lebanon regardless of country of birth (or an individual having no nationality who last habitually resided in Lebanon);

(2) Were lawfully present in the United States on November 27, 2024, in F–1 nonimmigrant status under section 101(a)(15)(F)(i) of the Immigration and Nationality Act (INA), 8 U.S.C. 1101(a)(15)(F)(i);

(3) Are enrolled in an academic institution that is Student and Exchange Visitor Program (SEVP)-certified for

[1] Because the suspension of requirements under this notice applies throughout an academic term during which the suspension is in effect, DHS considers an F–1 nonimmigrant student who engages in a reduced course load or employment (or both) after this notice is effective to be engaging in a ''full course of study,'' *see* 8 CFR 214.2(f)(6), and eligible for employment authorization, through the end of any academic term for which such student is matriculated as of May 27, 2026, provided the student satisfies the minimum course load requirements in this notice.

enrollment for F–1 nonimmigrant students;

(4) Are currently maintaining F–1 nonimmigrant status; and

(5) Are experiencing severe economic hardship as a direct result of the current crisis in Lebanon.

This notice applies to F–1 nonimmigrant students in an approved private school in kindergarten through grade 12, public school grades 9 through 12, and undergraduate and graduate education. An F–1 nonimmigrant student covered by this notice who transfers to another SEVP-certified academic institution remains eligible for the relief provided by means of this notice.

Why is DHS taking this action?

DHS is taking action to provide relief to Lebanese F–1 nonimmigrant students experiencing severe economic hardship due to the current crisis in Lebanon. Based on its review of country conditions in Lebanon and input received from the U.S. Department of State (DOS), DHS is taking action to allow eligible F–1 nonimmigrant students from Lebanon to request employment authorization, work an increased number of hours while school is in session, and reduce their course load while continuing to maintain F–1 nonimmigrant student status.

Lebanon faces multiple and competing security threats, including political instability, civil unrest and violence, spill-over from the Syrian civil war, and increased border tension between Hezbollah [2] and Israel.[3] Additionally, the deteriorating economic situation has led to alarming levels of poverty, food insecurity, and crumbling infrastructure.[4]

Security Concerns

Since October 7, 2023, there has been an escalation of hostilities across the Lebanon-Israel border between Israeli forces and Hezbollah.[5] As of early October 2024, the conflict between Israel and Hezbollah escalated significantly.[6] Increased Israeli airstrikes in Lebanon, including urban regions in and around Beirut, have resulted in civilian casualties and displacement.[7] According to Lebanese authorities, more than 2,300 people have been killed since October 2023 and 1.2 million people have been forced to flee their homes.[8] On September 30, 2024, Israel launched a ground invasion into southern Lebanon days after an Israeli air strike killed Hassan Nasrallah, the leader of Hezbollah.[9] Rising tensions between Israel and Hezbollah have resulted in the evacuation of both Israeli and Lebanese residents in communities along both sides of the shared border.[10]

Economic Crisis

The recent intensification of military conflict and population displacement has exacerbated an existing economic crisis in Lebanon. In 2021, the International Monetary Fund (IMF) estimated that Lebanon's economic collapse may be the third worst economic crisis in the world since the mid-nineteenth century.[11] Four years after the collapse, in September 2023, the IMF warned that ''the small nation is still facing 'enormous economic challenges,' with a collapsed banking sector, eroding public services, deteriorating infrastructure, inflation, and worsening poverty.'' [12]

Poverty in Lebanon has more than tripled over the past decade reaching 44 percent of the total population in 2022.[13] Families in Lebanon are described as multidimensionally poor, with ''rising deprivation in the areas of health care, medicines, services, education employment, housing and assets.'' [14] Protective food subsidies have ended and living costs have risen dramatically, preventing families from accessing enough food and other basic needs each day.[15]

This economic crisis has caused Lebanon's Gross Domestic Product to ''decrease from $54.9 billion in 2018 to $17.94 billion in 2023.'' [16] Additionally, Lebanon is grappling with hyperinflation, which is eroding the purchasing power of much of the Lebanese population.[17] Data from June 2023 indicates ''that 59 percent of Lebanese households (and of these 86 percent of female headed households), excluding refugees, faced substantial challenges in meeting their needs, primarily driven by disrupted livelihoods.'' [18]

Political Crisis

Since 2021, reports have implicated current and former Lebanese prime ministers in corruption cases.[19] More

crucially, Lebanon has not had a President since 2022, when Michel Aoun stepped down a day before his presidential term expired.[20] The country's affairs are run by an unelected caretaker government; [21] with no elected president, passage of new legislation and much needed economic reform is not occurring.[22] Moreover, since the hostilities increased between Israel and Hezbollah, tensions have also increased between Hezbollah and Sunni and Maronite factions in the government, making political agreements unlikely in the near-term.[23]

The inability to effectively govern in Lebanon has resulted in financial insolvency, crumbling infrastructure, and the inability to provide basic services including access to electricity and fuel.[24] Human Rights Watch reported that, ''[o]n August 17, 2024, Lebanon's only operational power plant shut down after the state-run electricity company . . . ran out of fuel, resulting in a complete nationwide power outage.'' [25] This outage left residents of Lebanon and key state services like ''the airport, water pump stations, sewage systems, and prisons, without state-provided electricity for more than 24 hours, and reliant on costly and highly polluting private diesel generators.'' [26] The Lebanese state is unable to provide the vast majority of residents with more than one to three hours of electricity per day.[27] This lack of access to electricity has adversely impacted Lebanese residents' access to education, health, water, sanitation, and a healthy environment.[28]

Humanitarian Concerns

The economic crisis, government failings, and increasingly escalating conflict have worsened an already fragile humanitarian situation in Lebanon.[29] Access to sufficient food, water, sanitation, hygiene, shelter, income, essential commodities, and healthcare have decreased.[30] Humanitarian needs continue to increase amid the escalating hostilities in Lebanon, exacerbated by the damage to vital infrastructure and the scale of internal and external displacement from conflict-affected areas of the country.[31] As of October 21, 2024, over 800,000 individuals were internally displaced in Lebanon.[32] More than 191,000 individuals have sought shelter in over 1,000 collective shelters, the vast majority of which are operating at full capacity.[33] Furthermore, the United Nations High Commissioner for Refugees estimates that approximately 425,000 people, including Syrians and Lebanese, have crossed from Lebanon into Syria since September, while more than 16,000 Lebanese have arrived in Iraq from Lebanon.[34] On October 4, 2024, the U.S. committed to providing nearly $157 million in new humanitarian assistance to support populations affected by conflict in Lebanon and the region.[35]

Access to health care had been drastically reduced due to financial barriers and lack of medicine in Lebanon.[36] The current hostilities have aggravated the issues, with services struggling to respond to the needs of the displaced and conflict-affected,[37] and health care facilities have been either destroyed or closed due to the conflict.[38]

Access to food and potable water continue to be limited. As of October 2024, ''at least 25 water facilities [were] damaged affecting more than 300,000 people.'' [39] According to the World Food Programme, 2.5 million people of the 5.3 million population need food assistance and 2.5 million, 47.5 percent, of people in Lebanon (including Lebanese nationals and refugees) are food insecure.[40]

Moreover, increasing levels of internal displacement are exacerbating the challenges facing Lebanon, including those related to hosting the substantial Syrian refugee population.[41] Children have also been impacted by the conflict. The start of the new school year has been postponed until November 4, 2024, as 75 percent of the country's public schools have been converted into shelters to accommodate the influx of internally displaced persons that have departed conflict-affected areas of

Lebanon since the recent escalation.[42] According to the European Commission, ''[m]ore than 10 percent of the 1.2 million school-aged Lebanese children are out of school, mainly due to economic vulnerabilities.'' [43]

As of November 7, 2024, 1,760 F–1 nonimmigrant students from Lebanon are enrolled at SEVP-certified academic institutions in the United States. Given the extent of the current crisis exacerbated by recent escalating violence, conflict and displacement in Lebanon, affected students whose primary means of financial support comes from Lebanon may need to be exempt from the normal student employment requirements to continue their studies in the United States. The current crisis has made it unfeasible for many students to safely return to Lebanon for the foreseeable future. Without employment authorization, these students may lack the means to meet basic living expenses.

What is the minimum course load requirement to maintain valid F–1 nonimmigrant status under this notice?

Undergraduate F–1 nonimmigrant students who receive on-campus or off-campus employment authorization under this notice must remain registered for a minimum of six semester or quarter hours of instruction per academic term. Undergraduate F–1 nonimmigrant students enrolled in a term of different duration must register for at least one half of the credit hours normally required under a ''full course of study.'' *See* 8 CFR 214.2(f)(6)(i)(B) and (F). A graduate-level F–1 nonimmigrant student who receives on-campus or off-campus employment authorization under this notice must remain registered for a minimum of three semester or quarter hours of instruction per academic term. *See* 8 CFR 214.2(f)(5)(v). Nothing in this notice affects the applicability of other minimum course load requirements set by the academic institution.

In addition, an F–1 nonimmigrant student (either undergraduate or graduate) granted on-campus or off-campus employment authorization under this notice may count up to the equivalent of one class or three credits per session, term, semester, trimester, or quarter of online or distance education toward satisfying this minimum course load requirement, unless their course of study is in an English language study program. *See* 8 CFR 214.2(f)(6)(i)(G). An F–1 nonimmigrant student attending an approved private school in kindergarten through grade 12 or public school in grades 9 through 12 must maintain ''class attendance for not less than the minimum number of hours a week prescribed by the school for normal progress toward graduation,'' as required under 8 CFR 214.2(f)(6)(i)(E). Nothing in this notice affects the applicability of federal and state labor laws limiting the employment of minors.

May an eligible F–1 nonimmigrant student who already has on-campus or off-campus employment authorization benefit from the suspension of regulatory requirements under this notice?

Yes. An F–1 nonimmigrant student who is a Lebanon citizen, regardless of country of birth (or an individual having no nationality who last habitually resided in Lebanon), who already has on-campus or off-campus employment authorization and is otherwise eligible may benefit under this notice, which suspends certain regulatory requirements relating to the minimum course load requirement under 8 CFR 214.2(f)(6)(i) and certain employment eligibility requirements under 8 CFR 214.2(f)(9). Such an eligible F–1 nonimmigrant student may benefit without having to apply for a new Form I–766, Employment Authorization Document (EAD). To benefit from this notice, the F–1 nonimmigrant student must request that their designated school official (DSO) enter the following statement in the remarks field of the student's Student and Exchange Visitor Information System (SEVIS) record, which the student's Form I–20, Certificate of Eligibility for Nonimmigrant (F–1) Student Status, will reflect:

Approved for more than 20 hours per week of [DSO must insert ''on-campus'' or ''off-campus,'' depending upon the type of employment authorization the student already has] employment authorization and reduced course load under the Special Student Relief authorization from [DSO must insert the beginning date of the notice or the beginning date of the student's employment, whichever date is later] until [DSO must insert either the student's program end date, the current EAD expiration date (if the student is currently authorized for off-campus employment), or the end date of this notice, whichever date comes first].[44]

Must the F–1 nonimmigrant student apply for reinstatement after expiration of this special employment authorization if the student reduces his or her ''full course of study''?

No. DHS will deem an F–1 nonimmigrant student who receives and comports with the employment authorization permitted under this notice to be engaged in a ''full course of study'' [45] for the duration of the student's employment authorization, provided that a qualifying undergraduate level F–1 nonimmigrant student remains registered for a minimum of six semester or quarter hours of instruction per academic term, and a qualifying graduate level F–1 nonimmigrant student remains registered for a minimum of three semester or quarter hours of instruction per academic term. *See* 8 CFR 214.2(f)(5)(v) and (f)(6)(i)(F). Undergraduate F–1 nonimmigrant students enrolled in a term of different duration must register for at least one half of the credit hours normally required under a ''full course of study.'' *See* 8 CFR 214.2(f)(6)(i)(B) and (F). DHS will not require such students to apply for reinstatement under 8 CFR 214.2(f)(16) if they are otherwise maintaining F–1 nonimmigrant status.

Will an F–2 dependent (spouse or minor child) of an F–1 nonimmigrant student covered by this notice be eligible for employment authorization?

No. An F–2 spouse or minor child of an F–1 nonimmigrant student is not authorized to work in the United States and, therefore, may not accept employment while in F–2 nonimmigrant status, consistent with 8CFR 214.2(f)(15)(i).

Will the suspension of the applicability of the standard student employment requirements apply to an individual who receives an initial F–1 visa and makes an initial entry into the United States after the effective date of this notice in the Federal Register?

No. The suspension of the applicability of the standard regulatory

[42] ReliefWeb, Statement by the Humanitarian Coordinator for Lebanon, Imran Riza, on the One-Year Mark of Escalations in Lebanon, Oct. 9, 2024, available at *https://reliefweb.int/report/lebanon/statement-humanitarian-coordinator-lebanon-imran-riza-one-year-mark-escalations-lebanon-9-october-2024-enar* (last visited Nov. 5, 2024).

[43] European Commission, Lebanon, available at *https://civil-protection-humanitarian-aid.ec.europa.eu/where/middle-east-and-northern-africa/lebanon_en* (last visited Nov. 5, 2024).

[44] Because the suspension of requirements under this notice applies throughout an academic term during which the suspension is in effect, DHS considers an F–1 nonimmigrant student who engages in a reduced course load or employment (or both) after this notice is effective to be engaging in a ''full course of study,'' *see* 8 CFR 214.2(f)(6), and eligible for employment authorization, through the end of any academic term for which such student is matriculated as of May 27, 2026, provided the student satisfies the minimum course load requirements in this notice.

[45] *See* 8 CFR 214.2(f)(6).

requirements only applies to certain F–1 nonimmigrant students who meet the following conditions:

(1) Are a citizen of Lebanon regardless of country of birth (or an individual having no nationality who last habitually resided in Lebanon);

(2) Were lawfully present in the United States on November 27, 2024, in F–1 nonimmigrant status, under section 101(a)(15)(F)(i) of the INA, 8 U.S.C. 1101(a)(15)(F)(i);

(3) Are enrolled in an academic institution that is SEVP-certified for enrollment of F–1 nonimmigrant students;

(4) Are maintaining F–1 nonimmigrant status; and

(5) Are experiencing severe economic hardship as a direct result of the current crisis in Lebanon.

An F–1 nonimmigrant student who does not meet all these requirements is ineligible for the suspension of the applicability of the standard regulatory requirements (even if experiencing severe economic hardship as a direct result of the current crisis in Lebanon).

Does this notice apply to a continuing F–1 nonimmigrant student who departs the United States after the effective date of this notice in the Federal Register and who needs to obtain a new F–1 visa before returning to the United States to continue an educational program?

Yes. This notice applies to such an F–1 nonimmigrant student, but only if the DSO has properly notated the student's SEVIS record, which will then appear on the student's Form I–20. The normal rules for visa issuance remain applicable to a nonimmigrant who needs to apply for a new F–1 visa to continue an educational program in the United States.

Does this notice apply to elementary school, middle school, and high school students in F–1 status?

Yes. However, this notice does not by itself reduce the required course load for F–1 nonimmigrant students from Lebanon enrolled in kindergarten through grade 12 at a private school, or grades 9 through 12 at a public high school. Such students must maintain the minimum number of hours of class attendance per week prescribed by the academic institution for normal progress toward graduation, as required under 8CFR214.2(f)(6)(i)(E). The suspension of certain regulatory requirements related to employment through this notice is applicable to all eligible F–1 nonimmigrant students regardless of educational level. Eligible F–1 nonimmigrant students from Lebanon enrolled in an elementary school, middle school, or high school may benefit from the suspension of the requirement in 8 CFR 214.2(f)(9)(i) that limits on-campus employment to 20 hours per week while school is in session.

On-Campus Employment Authorization

Will an F–1 nonimmigrant student who receives on-campus employment authorization under this notice be authorized to work more than 20 hours per week while school is in session?

Yes. For an F–1 nonimmigrant student covered in this notice, the Secretary is suspending the applicability of the requirement in 8 CFR 214.2(f)(9)(i) that limits an F–1 nonimmigrant student's on-campus employment to 20 hours per week while school is in session. An eligible F–1 nonimmigrant student has authorization to work more than 20 hours per week while school is in session if the DSO has entered the following statement in the remarks field of the student's SEVIS record, which will be reflected on the student's Form I–20:

> Approved for more than 20 hours per week of on-campus employment and reduced course load, under the Special Student Relief authorization from [DSO must insert the beginning date of this notice or the beginning date of the student's employment, whichever date is later] until [DSO must insert the student's program end date or the end date of this notice, whichever date comes first].[46]

To obtain on-campus employment authorization, the F–1 nonimmigrant student must demonstrate to the DSO that the employment is necessary to avoid severe economic hardship directly resulting from the current crisis in Lebanon. An F–1 nonimmigrant student authorized by the DSO to engage in on-campus employment by means of this notice does not need to file any applications with U.S. Citizenship and Immigration Services (USCIS). The standard rules permitting full-time on-campus employment when school is not in session or during school vacations apply, as described in 8 CFR 214.2(f)(9)(i).

Will an F–1 nonimmigrant student who receives on-campus employment authorization under this notice have authorization to reduce the normal course load and still maintain his or her F–1 nonimmigrant student status?

Yes. DHS will deem an F–1 nonimmigrant student who receives on-campus employment authorization under this notice to be engaged in a ''full course of study'' [47] for the purpose of maintaining their F–1 nonimmigrant student status for the duration of the on-campus employment, if the student satisfies the minimum course load requirement described in this notice, consistent with 8 CFR 214.2(f)(6)(i)(F). However, the authorization to reduce the normal course load is solely for DHS purposes of determining valid F–1 nonimmigrant student status. Nothing in this notice mandates that school officials allow an F–1 nonimmigrant student to take a reduced course load if the reduction would not meet the academic institution's minimum course load requirement for continued enrollment.[48]

Off-Campus Employment Authorization

What regulatory requirements does this notice temporarily suspend relating to off-campus employment?

For an F–1 nonimmigrant student covered by this notice, as provided under 8 CFR 214.2(f)(9)(ii)(A), the Secretary is suspending the following regulatory requirements relating to off-campus employment:

(a) The requirement that a student must have been in F–1 nonimmigrant student status for one full academic year to be eligible for off-campus employment;

(b) The requirement that an F–1 nonimmigrant student must demonstrate that acceptance of employment will not interfere with the student's carrying a full course of study;

(c) The requirement that limits an F–1 nonimmigrant student's employment authorization to no more than 20 hours per week of off-campus employment while the school is in session; and

(d) The requirement that the student demonstrate that employment under 8 CFR 214.2(f)(9)(i) is unavailable or otherwise insufficient to meet the needs that have arisen as a result of the unforeseen circumstances.

[46] Because the suspension of requirements under this notice applies throughout an academic term during which the suspension is in effect, DHS considers an F–1 nonimmigrant student who engages in a reduced course load or employment (or both) after this notice is effective to be engaging in a ''full course of study,'' *see* 8 CFR 214.2(f)(6), and eligible for employment authorization, through the end of any academic term for which such student is matriculated as of May 27, 2026, provided the student satisfies the minimum course load requirements in this notice.

[47] *See* 8 CFR 214.2(f)(6).

[48] Minimum course load requirement for enrollment in a school must be established in a publicly available document (*e.g.,* catalog, website, or operating procedure), and it must be a standard applicable to all students (U.S. citizens and foreign students) enrolled at the school.

Will an F–1 nonimmigrant student who receives off-campus employment authorization under this notice have authorization to reduce the normal course load and still maintain F–1 nonimmigrant status?

Yes. DHS will deem an F–1 nonimmigrant student who receives off-campus employment authorization by means of this notice to be engaged in a ''full course of study'' [49] for the purpose of maintaining F–1 nonimmigrant student status for the duration of the student's employment authorization if the student satisfies the minimum course load requirement described in this notice, consistent with 8 CFR 214.2(f)(6)(i)(F). The authorization for a reduced course load is solely for DHS purposes of determining valid F–1 nonimmigrant student status. Nothing in this notice mandates that school officials allow an F–1 nonimmigrant student to take a reduced course load if such reduced course load would not meet the school's minimum course load requirement.[50]

How may an eligible F–1 nonimmigrant student obtain employment authorization for off-campus employment with a reduced course load under this notice?

An F–1 nonimmigrant student must file a Form I–765, Application for Employment Authorization, with USCIS to apply for off-campus employment authorization based on severe economic hardship directly resulting from the current crisis in Lebanon.[51] Filing instructions are located at *https://www.uscis.gov/i-765*.

Fee considerations. Submission of a Form I–765 currently requires payment of a $520 fee. An applicant who is unable to pay the fee may submit a completed Form I–912, Request for Fee Waiver, along with the Form I–765, Application for Employment Authorization. *See https://www.uscis.gov/i-912*. The submission must include an explanation about why USCIS should grant the fee waiver and the reason(s) for the inability to pay, and any evidence to support the reason(s). *See* 8 CFR 106.2 and 106.3.

Supporting documentation. An F–1 nonimmigrant student seeking off-campus employment authorization due to severe economic hardship must demonstrate the following to their DSO:

(1) This employment is necessary to avoid severe economic hardship; and

(2) The hardship is a direct result of the current crisis in Lebanon.

If the DSO agrees that the F–1 nonimmigrant student is entitled to receive such employment authorization, the DSO must recommend application approval to USCIS by entering the following statement in the remarks field of the student's SEVIS record, which will then appear on that student's Form I–20:

> Recommended for off-campus employment authorization in excess of 20 hours per week and reduced course load under the Special Student Relief authorization from the date of the USCIS authorization noted on Form I–766 until [DSO must insert the program end date or the end date of this notice, whichever date comes first].[52]

The F–1 nonimmigrant student must then file the properly endorsed Form I–20 and Form I–765 according to the instructions for the Form I–765. The F–1 nonimmigrant student may begin working off campus only upon receipt of the EAD from USCIS.

DSO recommendation. In making a recommendation that an F–1 nonimmigrant student be approved for Special Student Relief, the DSO certifies that:

(a) The F–1 nonimmigrant student is in good academic standing and is carrying a ''full course of study'' [53] at the time of the request for employment authorization;

(b) The F–1 nonimmigrant student is a citizen of Lebanon, regardless of country of birth (or an individual having no nationality who last habitually resided in Lebanon), and is experiencing severe economic hardship as a direct result of the current crisis in Lebanon, as documented on the Form I–20;

(c) The F–1 nonimmigrant student has confirmed that the student will comply with the reduced course load requirements of this notice and register for the duration of the authorized employment for a minimum of six semester or quarter hours of instruction per academic term if at the undergraduate level, or for a minimum of three semester or quarter hours of instruction per academic term if the student is at the graduate level; [54] and

(d) The off-campus employment is necessary to alleviate severe economic hardship to the individual as a direct result of the current crisis in Lebanon.

Processing. To facilitate prompt adjudication of the student's application for off-campus employment authorization under 8 CFR 214.2(f)(9)(ii)(C), the F–1 nonimmigrant student should do both of the following:

(a) Ensure that the application package includes the following documents:

(1) A completed Form I–765 with all applicable supporting evidence;

(2) The required fee or properly documented fee waiver request as defined in 8 CFR 106.2 and 106.3; and

(3) A signed and dated copy of the student's Form I–20 with the appropriate DSO recommendation, as previously described in this notice; and

(b) Send the application in an envelope which is clearly marked on the front of the envelope, bottom right-hand side, with the phrase ''SPECIAL STUDENT RELIEF.'' [55] Failure to include this notation may result in significant processing delays.

If USCIS approves the student's Form I–765, USCIS will send the student a Form I–766 EAD as evidence of employment authorization. The EAD will contain an expiration date that does not exceed the end of the granted temporary relief.

Temporary Protected Status (TPS) Considerations

Can an F–1 nonimmigrant student apply for TPS and for benefits under this notice at the same time?

Yes. An F–1 nonimmigrant student who has not yet applied for TPS or for other relief that reduces the student's course load per term and permits an increased number of work hours per week, such as Special Student Relief,[56] under this notice has two options.

Under the first option, the F–1 nonimmigrant student may apply for TPS according to the instructions in the USCIS notice designating Lebanon for TPS elsewhere in this issue of the **Federal Register**. All TPS applicants must file a Form I–821, Application for

[49] *See* 8 CFR 214.2(f)(6).

[50] Minimum course load requirement for enrollment in a school must be established in a publicly available document (*e.g.,* catalog, website, or operating procedure), and it must be a standard applicable to all students (U.S. citizens and foreign students) enrolled at the school.

[51] *See* 8 CFR 274a.12(c)(3)(iii).

[52] Because the suspension of requirements under this notice applies throughout an academic term during which the suspension is in effect, DHS considers an F–1 nonimmigrant student who engages in a reduced course load or employment (or both) after this notice is effective to be engaging in a ''full course of study,'' *see* 8 CFR 214.2(f)(6), and eligible for employment authorization, through the end of any academic term for which such student is matriculated as of May 27, 2026, provided the student satisfies the minimum course load requirements in this notice.

[53] *See* 8 CFR 214.2(f)(6).

[54] 8 CFR 214.2(f)(5)(v).

[55] Students who wish to apply for a Special Student Relief-related EAD under this notice should use the mailing address specifically designated for (C)(3)(iii) filings. The direct filing address is available at *https://www.uscis.gov/i-765-addresses* (last visited Sept. 12, 2024).

[56] *See* DHS Study in the States, Special Student Relief, available at *https://studyinthestates.dhs.gov/students/special-student-relief* (last visited Feb. 28, 2024).

Temporary Protected Status, with the appropriate fee (or request a fee waiver). Although not required to do so, if F–1 nonimmigrant students want to obtain a new TPS-related EAD that is valid through May 27, 2026, and to be eligible for automatic EAD extensions that may be available to certain EADs with an A–12 or C–19 category code, they must file Form I–765 and pay the Form I–765 fee (or request a fee waiver). After receiving the TPS-related EAD, an F–1 nonimmigrant student may request that their DSO make the required entry in SEVIS and issue an updated Form I–20, which notates that the nonimmigrant student has been authorized to carry a reduced course load, as described in this notice. As long as the F–1 nonimmigrant student maintains the minimum course load described in this notice, does not otherwise violate their nonimmigrant status, including as provided under 8 CFR 214.1(g), and maintains TPS, then the student maintains F–1 status and TPS concurrently.

Under the second option, the F–1 nonimmigrant student may apply for an EAD under Special Student Relief by filing Form I–765 with the location specified in the filing instructions. At the same time, the F–1 nonimmigrant student may file a separate TPS application but must submit the Form I–821 according to the instructions provided in the **Federal Register** notice designating Lebanon for TPS. If the F–1 nonimmigrant student has already applied for employment authorization under Special Student Relief, they are not required to submit the Form I–765 as part of the TPS application. However, some nonimmigrant students may wish to obtain a TPS-related EAD in light of certain extensions that may be available to EADs with an A–12 or C–19 category code that are not available to the C–3 category under which Special Student Relief falls. The F–1 nonimmigrant student should check the appropriate box when filling out Form I–821 to indicate whether a TPS-related EAD is being requested. Again, as long as the F–1 nonimmigrant student maintains the minimum course load described in this notice and does not otherwise violate the student's nonimmigrant status, included as provided under 8 CFR 214.1(g), the nonimmigrant will be able to maintain compliance requirements for F–1 nonimmigrant student status while having TPS.

When a student applies simultaneously for TPS and benefits under this notice, what is the minimum course load requirement while an application for employment authorization is pending?

The F–1 nonimmigrant student must maintain normal course load requirements for a ''full course of study'' [57] unless or until the nonimmigrant student receives employment authorization under this notice. TPS-related employment authorization, by itself, does not authorize a nonimmigrant student to drop below twelve credit hours, or otherwise applicable minimum requirements (*e.g.,* clock hours for non-traditional academic programs). Once approved for a TPS-related EAD and Special Student Relief employment authorization, as indicated by the DSO's required entry in SEVIS and issuance of an updated Form I–20, the F–1 nonimmigrant student may drop below twelve credit hours, or otherwise applicable minimum requirements (with a minimum of six semester or quarter hours of instruction per academic term if at the undergraduate level, or for a minimum of three semester or quarter hours of instruction per academic term if at the graduate level). *See* 8 CFR 214.2(f)(5)(v), (f)(6), and (f)(9)(i) and (ii).

How does a student who has received a TPS-related EAD then apply for authorization to take a reduced course load under this notice?

There is no further application process with USCIS if a student has been approved for a TPS-related EAD. The F–1 nonimmigrant student must demonstrate and provide documentation to the DSO of the direct economic hardship resulting from the current crisis in Lebanon. The DSO will then verify and update the student's record in SEVIS to enable the F–1 nonimmigrant student with TPS to reduce the course load without any further action or application. No other EAD needs to be issued for the F–1 nonimmigrant student to have employment authorization.

Can a noncitizen who has been granted TPS apply for reinstatement of F–1 nonimmigrant student status after the noncitizen's F–1 nonimmigrant student status has lapsed?

Yes. Regulations permit certain students who fall out of F–1 nonimmigrant student status to apply for reinstatement. *See* 8 CFR 214.2(f)(16). This provision may apply to students who worked on a TPS-related EAD or dropped their course load before publication of this notice, and therefore fell out of student status. These students must satisfy the criteria set forth in the F–1 nonimmigrant student status reinstatement regulations.

Deferred Enforced Departure (DED) Considerations

Can an F–1 nonimmigrant student apply for a DED-related EAD and for benefits under this notice at the same time?

Yes. Although they are not required to apply for a DED-related EAD, an F–1 nonimmigrant student who meets the eligibility requirements under the applicable DED notice and wants to obtain such an EAD must file Form I–765 and pay the related fee (or request a fee waiver). The eligible F–1 student may also apply for Special Student Relief under this notice by requesting that the DSO notate on their Form I–20 in SEVIS that the student has been authorized to carry a reduced course load and is permitted to work an increased number of hours under Special Student Relief while school is in session. The DSO should also notate on the Form I–20 that the student is working pursuant to a DED-related EAD. As long as the F–1 nonimmigrant student maintains the minimum course load described in this notice, does not otherwise violate the student's nonimmigrant status, including as provided under 8 CFR 214.1(g), and remains covered under DED, then the student maintains F–1 nonimmigrant status and DED concurrently.

When a student applies simultaneously for a DED-related EAD and benefits under this notice, what is the minimum course load requirement while an application for employment authorization is pending?

The F–1 nonimmigrant student must maintain normal course load requirements for a ''full course of study'' [58] unless or until the F–1 nonimmigrant student is granted employment authorization under this notice. DED-related employment authorization, by itself, does not authorize a nonimmigrant student to drop below twelve credit hours, or otherwise applicable minimum requirements (*e.g.,* clock hours for non-traditional academic programs). Once approved for a DED-related EAD and Special Student Relief employment authorization, as indicated by the DSO's required entry in SEVIS and issuance of an updated Form I–20, the F–1 nonimmigrant student may drop below

[57] *See* 8 CFR 214.2(f)(6).

[58] *See* 8 CFR 214.2(f)(6).

twelve credit hours, or otherwise applicable minimum requirements (with a minimum of six semester or quarter hours of instruction per academic term if the student is at the undergraduate level, or a minimum of three semester or quarter hours of instruction per academic term if the student is at the graduate level). *See* 8 CFR 214.2(f)(5)(v), 214.2(f)(6), 214.2(f)(9)(i) and (ii).

How does an F–1 student who has received a DED-related EAD then apply for authorization to take a reduced course load under this notice?

There is no further application process with USCIS if a student has been approved for a DED-related EAD. However, the F–1 nonimmigrant student must demonstrate and provide documentation to the DSO of severe economic hardship as a direct result of the current humanitarian crisis in Lebanon. The DSO will then verify and update the student's SEVIS record to enable the F–1 nonimmigrant student with DED to reduce their course load without any further action or application. No other EAD needs to be issued for the F–1 nonimmigrant student to have employment authorization.

Can a noncitizen who has been granted a DED-related EAD apply for reinstatement to F–1 nonimmigrant student status after the noncitizen's F–1 nonimmigrant student status has lapsed?

Yes. Current regulations permit certain students who fall out of F–1 nonimmigrant student status to apply for reinstatement. *See* 8 CFR 214.2(f)(16). This provision might apply to students who worked on a DED-related EAD or dropped their course load before July 26, 2024, and therefore fell out of F–1 nonimmigrant status. The student must satisfy the criteria set forth in the F–1 nonimmigrant student status reinstatement regulations.

How long will this notice remain in effect?

This notice grants temporary relief until May 27, 2026,[59] to eligible F–1 nonimmigrant students. DHS will continue to monitor the situation in Lebanon. Should the special provisions authorized by this notice need modification or extension, DHS will announce such changes in the **Federal Register**.

Paperwork Reduction Act (PRA)

An F–1 nonimmigrant student seeking off-campus employment authorization due to severe economic hardship resulting from the current crisis in Lebanon must demonstrate to the DSO that this employment is necessary to avoid severe economic hardship. A DSO who agrees that a nonimmigrant student should receive such employment authorization must recommend an application approval to USCIS by entering information in the remarks field of the student's SEVIS record. The authority to collect this information is in the SEVIS collection of information currently approved by the Office of Management and Budget (OMB) under OMB Control Number 1653–0038.

This notice also allows an eligible F–1 nonimmigrant student to request employment authorization, work an increased number of hours while the academic institution is in session, and reduce their course load while continuing to maintain F–1 nonimmigrant student status.

To apply for employment authorization, certain F–1 nonimmigrant students must complete and submit a currently approved Form I–765 according to the instructions on the form. OMB has previously approved the collection of information contained on the current Form I–765, consistent with the PRA (OMB Control Number 1615–0040). Although there will be a slight increase in the number of Form I–765 filings because of this notice, the number of filings currently contained in the OMB annual inventory for Form I–765 is sufficient to cover the additional filings. Accordingly, there is no further action required under the PRA.

Alejandro Mayorkas,

Secretary, U.S. Department of Homeland Security.

[FR Doc. 2024–27787 Filed 11–26–24; 8:45 am]

BILLING CODE 9111–CB–P

[59] Because the suspension of requirements under this notice applies throughout an academic term during which the suspension is in effect, DHS considers an F–1 nonimmigrant student who engages in a reduced course load or employment (or both) after this notice is effective to be engaging in a ''full course of study,'' *see* 8 CFR 214.2(f)(6), and eligible for employment authorization, through the end of any academic term for which such student is matriculated as of May 27, 2026, provided the student satisfies the minimum course load requirements in this notice.

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[CIS No. 2789–25; DHS Docket No. USCIS–2024–0015]

RIN 1615–ZC11

Designation of Lebanon for Temporary Protected Status

AGENCY: U.S. Citizenship and Immigration Services (USCIS), Department of Homeland Security (DHS).

ACTION: Notice of Temporary Protected Status (TPS) designation.

SUMMARY: Through this notice, the Department of Homeland Security (DHS) announces that the Secretary of Homeland Security (Secretary) is designating Lebanon for Temporary Protected Status (TPS) for 18 months, beginning on November 27, 2024, and ending on May 27, 2026. This designation allows Lebanese nationals (and individuals having no nationality who last habitually resided in Lebanon) who have continuously resided in the United States since October 16, 2024, and who have been continuously physically present in the United States since November 27, 2024, to apply for TPS.

DATES: *Designation of Lebanon for TPS* begins on November 27, 2024, and will remain in effect for 18 months. For registration instructions, see the Registration Information section below.

FOR FURTHER INFORMATION CONTACT:

- You may contact René Cutlip-Mason, Chief, Humanitarian Affairs Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security, by mail at 5900 Capital Gateway Drive, Camp Springs, MD 20746, or by phone at 240–721–3000.
- For further information on TPS, including guidance on the registration process and additional information on eligibility, please visit the USCIS TPS web page at *https://uscis.gov/tps.* You can find specific information about Lebanon's TPS designation by selecting ''Lebanon'' from the menu on the left side of the TPS web page.
- If you have additional questions about TPS, please visit *https://uscis.gov/tools.* Our online virtual assistant, Emma, can answer many of your questions and point you to additional information on our website. If you cannot find your answers there, you may also call our USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

• Applicants seeking information about the status of their individual cases may check Case Status Online, available on the USCIS website at *uscis.gov*, or visit the USCIS Contact Center at *https://uscis.gov/contactcenter.*

• You can also find more information at local USCIS offices after this notice is published.

Registration Information

Registration: The registration period for individuals to apply for TPS begins on November 27, 2024, and will remain in effect through May 27, 2026.

Purpose of This Action (TPS)

Through this notice, DHS sets forth procedures necessary for nationals of Lebanon (or individuals having no nationality who last habitually resided in Lebanon) to submit an initial registration application under the designation of Lebanon for TPS and apply for an Employment Authorization Document (EAD). Under the designation, individuals must submit an initial Application for Temporary Protected Status (Form I–821) for Lebanon, and they may also submit an Application for Employment Authorization (Form I–765), during the 18-month initial registration period that runs from November 27, 2024, through May 27, 2026. In addition to demonstrating continuous residence in the United States since October 16, 2024,[1] and meeting other eligibility criteria, initial applicants for TPS under this designation must demonstrate that they have been continuously physically present in the United States since November 27, 2024, the effective date of this designation of Lebanon, before USCIS may grant them TPS. DHS estimates that approximately 11,000 individuals are eligible to apply for TPS under the designation of Lebanon.

What is Temporary Protected Status (TPS)?

• TPS is a temporary immigration status granted to eligible nationals of a foreign state designated for TPS under the INA, or to eligible individuals without nationality who last habitually resided in the designated foreign state, regardless of their country of birth.

• During the TPS designation period, TPS beneficiaries are eligible to remain in the United States, may not be removed, are authorized to work, and may obtain EADs if they continue to meet the requirements of TPS.

• TPS beneficiaries may also apply for and be granted travel authorization as a matter of DHS discretion.

• To qualify for TPS, beneficiaries must meet the eligibility standards at INA section 244(c)(1)–(2), 8 U.S.C. 1254a(c)(1)–(2).

• When the Secretary terminates a foreign state's TPS designation, beneficiaries return to one of the following:

○ The same immigration status or category that they maintained before TPS, if any (unless that status or category has since expired or terminated); or

○ Any other lawfully obtained immigration status or category they received while registered for TPS, as long as it is still valid beyond the date TPS terminates.

What authority does the Secretary have to designate Lebanon for TPS?

Section 244(b)(1) of the INA, 8 U.S.C. 1254a(b)(1), authorizes the Secretary, after consultation with appropriate agencies of the U.S. Government, to designate a foreign state (or part thereof) for TPS if the Secretary determines that certain country conditions exist.[2] The Secretary may designate a country (or part of a country) for TPS on the basis of an ''ongoing armed conflict'' in the country if, due to such conflict, requiring the return of that country's nationals ''would pose a serious threat to their personal safety.'' [3] The Secretary also may designate a country (or part thereof) for TPS if the Secretary finds ''that there exist extraordinary and temporary conditions'' in the country that prevent that country's nationals ''from returning to the [country] in safety,'' unless the Secretary finds that permitting such nationals ''to remain temporarily in the United States is contrary to the national interest of the United States.'' [4]

The decision to designate any foreign state (or part thereof) is a discretionary decision, and there is no judicial review of any determination with respect to the designation, termination, or extension of a designation. *See* INA sec. 244(b)(5)(A), 8 U.S.C. 1254a(b)(5)(A). The Secretary, at their discretion, may then grant TPS to eligible nationals of that foreign state (or individuals having no nationality who last habitually resided in the designated foreign state). *See* INA sec. 244(a)(1)(A), 8 U.S.C. 1254a(a)(1)(A).

At least 60 days before the expiration of a foreign state's TPS designation or extension, the Secretary, after consultation with appropriate U.S. Government agencies, must review the conditions in the foreign state designated for TPS to determine whether they continue to meet the conditions for the TPS designation. *See* INA sec. 244(b)(3)(A), 8 U.S.C. 1254a(b)(3)(A). If the Secretary determines that the conditions in the foreign state continue to meet the conditions for TPS designation, the designation will be extended for an additional period of six months or, in the Secretary's discretion, 12 or 18 months. *See* INA sec. 244(b)(3)(A), (C), 8 U.S.C. 1254a(b)(3)(A), (C). If the Secretary determines that the foreign

[1] The ''continuous residence date'' (CR) is any date established by the Secretary when a country is designated (or sometimes redesignated) for TPS. The ''continuous physical presence date'' (CPP) is the effective date of the most recent TPS designation of the country, which is either the publication date of the designation announcement in the **Federal Register** or a later date established by the Secretary. *See* INA sec. 244(b)(2)(A) (effective date of designation), (c)(1)(A)(i)–(ii) (discussing CR and CPP date requirements); 8 U.S.C. 1254a(b)(2)(A), (c)(1)(A)(i)–(ii).

[2] Although INA section 244(b)(1) ascribes this power to the Attorney General, Congress transferred this authority from the Attorney General to the Secretary of Homeland Security. *See* Homeland Security Act of 2002, Pub. L. 107–296, 116 Stat. 2135 (2002); *see also* 8 U.S.C. 1103(a); 6 U.S.C. 557.

[3] INA sec. 244(b)(1)(A), 8 U.S.C. 1254a(b)(1)(A).

[4] INA sec. 244(b)(1)(C), 8 U.S.C. 1254a(b)(1)(C). In addition, the Secretary may designate a country (or part thereof) for TPS based on an environmental disaster if the country has officially requested such designation and certain other statutory requirements are met. INA sec. 244(b)(1)(B), 8 U.S.C. 1254a(b)(1)(B).

state no longer meets the conditions for TPS designation, the Secretary must terminate the designation. *See* INA sec. 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B).

Why was Lebanon designated for TPS?

DHS has reviewed conditions in Lebanon. Based on this review, including input received from the Department of State (DoS) and other U.S. Government agencies, the Secretary has determined that an 18-month TPS designation is warranted because of armed conflict and extraordinary and temporary conditions described below.[5]

Overview

Long-standing humanitarian needs in Lebanon have been exacerbated by an escalation of armed conflict in the country, resulting in civilian casualties and massive numbers of displaced individuals. Lebanon was already grappling with profound socioeconomic and political crises, and the destruction and casualties caused by the ongoing armed conflict further threaten the safety of people in Lebanon and have significantly intensified the impact of the crises on people in Lebanon.

Armed Conflict

Since October 7, 2023, there has been an escalation of hostilities across the Lebanon-Israel border between Hezbollah [6] and the Israel Defense Forces. By September 2024, the conflict between Israel and Hezbollah had significantly escalated, with Israel launching a ground invasion of southern Lebanon on September 30, 2024.[7] Israeli airstrikes targeting Hezbollah strongholds, including in urban regions in and around Beirut, caused civilian casualties and displacement.[8]

Since October 2023, more than 2,000 people in Lebanon have been killed and almost 10,000 injured, with approximately 1,100 people in Lebanon killed and 7,000 injured between September 17, 2024, and October 7, 2024 alone.[9] Approximately one million people have been impacted by the conflict, with estimates of between 541,000 and one million people being displaced in Lebanon, and over 200,000 people have fled to Syria.[10] The armed conflict has resulted in one of the deadliest periods in Lebanon's recent history.[11]

Economic Crisis

Lebanon has been experiencing an economic crisis since 2019.[12] In October 2019, the Lebanese pound collapsed due to the nation's ''unstable fixed exchange rate, large external and fiscal deficits, and mounting losses in the banking sector, which led to an abrupt reduction of capital inflows.'' [13] In March 2020, Lebanon defaulted on its government debt for the first time in its history.[14] Since the onset of the financial crisis in 2019, the Lebanese pound has lost more than 98% of its value.[15] In 2021, the International Monetary Fund (IMF) estimated that Lebanon's economic collapse may be the third worst economic crisis in the world since the mid-nineteenth century.[16] Almost four years after the collapse, in December 2023, the IMF warned that ''the small nation is still facing 'enormous economic challenges,' with a collapsed banking sector, eroding public services, deteriorating infrastructure and worsening poverty.'' [17]

Poverty in Lebanon has more than tripled over the past decade reaching 44% of the total population.[18] Families in Lebanon are described as multidimensionally poor, with ''rising deprivation in the areas of health care, medicines, services, education employment, housing and assets.'' [19]

[5] This TPS designation for Lebanon is separate and apart from the President's July 26, 2024 memorandum providing for deferred enforced departure (DED) for certain Lebanese nationals in the United States. *See Deferred Enforced Departure for Certain Lebanese Nationals,* 89 FR 61341 (July 26, 2024); *see also Implementation of Employment Authorization for Individuals Covered by Deferred Enforced Departure for Lebanon,* 89 FR 83901 (Oct. 18, 2024).

[19] United Nations Economic and Social Commission for Western Asia (ESCWA),

Continued

Protective food subsidies have ended and living costs have risen dramatically, preventing families from accessing enough food and other basic needs each day.[20]

Political Crisis

Since 2022, reports have implicated current and former Lebanese prime ministers in corruption cases.[21] More crucially, Lebanon has not had a President since 2022, when Michel Aoun stepped down a day before his presidential term expired.[22] The country's affairs are run by an unelected caretaker government; with no elected president, passage of new legislation and much needed economic reform is not occurring.[23] Moreover, since the hostilities increased between Israel and Hezbollah, tensions have also increased between Hezbollah and Sunni and Maronite factions, making political agreements unlikely in the near-term.[24]

The inability to effectively govern in Lebanon has resulted in financial insolvency, crumbling infrastructure, and the inability to provide basic services including access to electricity and fuel.[25] Problems with the electric utility are particularly severe, leading to shortages, including in August of this year when ''Lebanon's only operational power plant shut down after the state-run electricity company . . . ran out of fuel, resulting in a complete nationwide power outage.'' [26] The blackout ''left residents and key state institutions, such as the airport, water pump stations, sewage systems, and prisons, without state-provided electricity for more than 24 hours, and reliant on costly and highly polluting private diesel generators.'' [27] The Lebanese state is unable to provide the vast majority of citizens with more than one to three hours of electricity per day.[28] This lack of access to electricity has adversely impacted access to education, health, water, sanitation, and a healthy environment.[29]

Humanitarian Crisis

The economic crisis, government failings, and recent escalating conflict have worsened an already fragile humanitarian situation in Lebanon.[30] According to the United Nations Office for the Coordination of Humanitarian Affairs, ''one year on from the escalation of hostilities across the country's southern border, Lebanon's humanitarian crisis is deteriorating at an alarming rate,'' with Israeli airstrikes expanding beyond the border into civilian areas and greatly impacting vulnerable populations in Lebanon.[31] Access to sufficient food, water, and healthcare has decreased.[32] Humanitarian needs continue to increase amid the escalating hostilities in Lebanon, exacerbated by the damage to vital infrastructure.[33]

Financial barriers and lack of medicine have significantly reduced access to health care in Lebanon.[34] The ongoing hostilities have aggravated these issues, with services struggling to respond to the needs of the displaced and conflict-affected,[35] and health care facilities have been either destroyed or closed due to the conflict.[36] Access to food and potable water continue to be limited, as ''[w]ater infrastructure is also affected with to date, at least 25 water facilities damaged affecting more than 300,000 people.'' [37] According to the World Food Programme, 2.5 million people of the 5.3 million population need food assistance and 47.5 percent of people in Lebanon (including Lebanese nationals and refugees) are food insecure.[38]

Moreover, increasing levels of internal displacement are exacerbating the challenges facing Lebanon, including those related to hosting the substantial Syrian refugee population.[39] Children have also been impacted by the conflict. The start of the new school year has been postponed until November 4th as 75 percent of the country's public schools have been converted into shelters.[40] ''More than 10% of the 1.2

million school-aged Lebanese children are out of school, mainly due to economic vulnerabilities. Additionally, 54% of the 715,000 Syrian refugee children are out of formal education, with only 47,000 of them accessing some form of non-formal education.'' [41]

In summary, based on the escalation of armed conflict and its resulting impacts on critical infrastructure, pre-existing economic and political crises, and further deteriorating humanitarian conditions, Lebanese nationals are unable to return safely to their homes.

Notice of the Designation of Lebanon for TPS

By the authority vested in me as Secretary under INA section 244, 8 U.S.C. 1254a, I have determined, after consultation with the appropriate U.S. Government agencies, the statutory conditions supporting Lebanon's designation for TPS on the basis of armed conflict and extraordinary and temporary conditions are met, and it is not contrary to the national interest of the United States to permit TPS Lebanon beneficiaries to remain in the United States temporarily. *See* INA sec. 244(b)(1)(A) and (C), 8 U.S.C. 1254a(b)(1)(A) and (C). I estimate approximately 11,000 individuals may be eligible for TPS under the designation of Lebanon. On the basis of this determination, I am designating Lebanon for TPS for 18 months, beginning on November 27, 2024, and ending on May 27, 2026. *See* INA sec. 244(b)(1) and (b)(2); 8 U.S.C. 1254a(b)(1), and (b)(2).

Alejandro N. Mayorkas

Secretary, U.S. Department of Homeland Security.

Eligibility and Employment Authorization for TPS

Required Application Forms and Application Fees To Register for TPS

To register for TPS based on the designation of Lebanon, you must submit a Form I–821 and pay the filing fee (or request a fee waiver, which you may submit on Form I–912). You also need to pay a biometric services fee. If you cannot pay the biometric services fee, you may ask USCIS to waive the fee. Please see additional information under the ''Biometric Services Fee'' section of this notice.

TPS beneficiaries are eligible for an EAD, which proves they are authorized to work in the United States. You do not need to submit Form I–765 or have an EAD to be granted TPS, but if you want an EAD to use as proof that you can work in the United States, see below for more information.

For more information on the application forms and fees for TPS, please visit the USCIS TPS web page at *https://www.uscis.gov/tps*. Fees for the Form I–821, the Form I–765, and biometric services are also described in 8 CFR 106.2 and the fee waiver-related regulations in 8 CFR 106.3. In addition, USCIS Form G–1055, Fee Schedule, provides the current fees required for the Form I–821 and Form I–765 for TPS applicants.

How can TPS beneficiaries obtain an Employment Authorization Document (EAD)?

Everyone must provide their employer with documentation showing that they have the legal right to work in the United States. TPS beneficiaries are eligible to obtain an EAD, which proves their legal right to work. If you want to obtain an EAD, you must file Form I–765 and pay the Form I–765 fee (or request a fee waiver, which you may submit on Form I–912). TPS applicants may file this form along with their TPS application, or at a later date, if their TPS application is still pending or has been approved.

Refiling an Initial TPS Registration Application After Receiving a Denial of a fee Waiver Request

If USCIS denies your fee waiver request, you can resubmit your TPS application. The fee waiver denial notice will contain specific instructions about resubmitting your application.

Filing Information

USCIS offers the option to applicants for TPS under Lebanon's designation to file Form I–821 and related requests for EADs online or by mail. However, if you file Form I–912, Request for Fee Waiver or a written fee waiver request for your Form I–821 or any applications filed together with your Form I–821, you must submit your applications by mail. When filing a TPS application, you can also request an EAD by submitting a completed Form I–765 with your Form I–821. Under certain circumstances, you may also upload a completed Form I–765 with a fee or fee waiver request, in Portable Document Format (PDF) through your USCIS online account. More information about filing your Form I–765 and fee waiver request through a PDF upload is available at *https://www.uscis.gov/newsroom/stakeholder-messages/uscis-launches-online-pdf-filing-option*.

Online filing: Form I–821 and Form I–765 are available for concurrent filing online.[42] To file these forms online, you must first create a USCIS online account.[43]

PDF upload: Form I–765, if applicable, and Form I–912, if applicable, are available for PDF upload. To upload these documents, you must first create a USCIS online account.[44]

Mail filing: Mail your completed Form I–821; Form I–765, if applicable; Form I–912, if applicable; and supporting documentation to the proper address in Table 1—Mailing Addresses.

TABLE 1—MAILING ADDRESSES

If you send your paper application via:	Then, mail your application to:
U.S. Postal Service USPS:	USCIS Attn: TPS Lebanon, P.O. Box 6943, Chicago, IL 60680–6943.
FedEx, UPS, or DHL deliveries:	USCIS Attn: TPS Lebanon (Box 6943), 131 S. Dearborn St. 3rd Floor, Chicago, IL 60603–5517.

If you were granted TPS by an immigration judge (IJ) or the Board of Immigration Appeals (BIA) and you want to request an EAD, you may submit Form I–765 one of three ways: online, mail your Form I–765 to the appropriate address in table 1, or upload a completed PDF through your USCIS online account. If you file online, you must include the fee. If you file by mail, you must include the fee or fee waiver request. If you file by PDF upload, you must include the fee or a fee waiver request. When you request an EAD based on an IJ or BIA grant of TPS, include with your application a copy of the order from the IJ or BIA granting you TPS. This will help us verify your grant of TPS and process your application.

Supporting Documents

The filing instructions for Form I–821 list all the documents you need to establish eligibility for TPS. You may

lebanon-imran-riza-one-year-mark-escalations-lebanon-9-october-2024-enar (accessed Oct. 31, 2024).

[41] European Commission, Lebanon, available at: *https://civil-protection-humanitarian-aid.ec.europa.eu/where/middle-east-and-northern-africa/lebanon_en#:~:text=People%20in%20Lebanon%2C%20including%20refugees,are%20dramatically%20exacerbating%20these%20vulnerabilities* (accessed Oct. 31, 2024).

[44] *https://www.uscis.gov/newsroom/stakeholder-messages/uscis-launches-online-pdf-filing-option.* Sign up to create a new USCIS online account at *https://myaccount.uscis.gov/users/sign_up.*

also find information on the acceptable documentation and other requirements for applying (also called registering) for TPS on the USCIS website at *https://uscis.gov/tps* under ''Lebanon.''

Travel

TPS beneficiaries and TPS applicants with pending Form I–821 applications may also apply for travel authorization, which USCIS may grant as a matter of discretion. You must file for travel authorization if you wish to travel outside of the United States. If USCIS grants travel authorization, it gives you permission to leave the United States and return during a specific period. To request travel authorization, you must file Form I–131, available at *https://www.uscis.gov/i-131.* You may file Form I–131 together with your Form I–821 or separately.

When you file Form I–131, a TPS beneficiary must:

- Select Item Number 4 in Part 1 on the Form I–131; and
- Submit the fee for Form I–131, or request a fee waiver, which you may submit on Form I–912.

When you file Form I–131, a TPS applicant with a pending Form I–821 must:

- Select Item Number 5C in Part 1 on the Form I–131; and
- Submit the fee for Form I–131, or request a fee waiver, which you may submit on Form I–912.

If you are filing Form I–131 together with Form I–821, send your forms to the address listed in table 1. If you are filing Form I–131 separately based on a pending or approved Form I–821, send your form to the address listed in table 2 and include a copy of Form I–797, Notice of Action, or Form I–797C, Notice of Action, indicating either approval or receipt of Form I–821. Form I–131 may not be filed by PDF upload.

TABLE 2—MAILING ADDRESSES

If you are . . .	Mail to . . .
Filing Form I–131 together with a Form I–821	The address provided in table 1.
Filing Form I–131 based on a pending or approved Form I–821, and you are using the U.S. Postal Service (USPS): You must include a copy of the Notice of Action (Form I–797C or I–797) showing USCIS received or approved your Form I–821.	USCIS, Attn: I–131 TPS, P.O. Box 660167, Dallas, TX 75266–0867.
Filing Form I–131 based on a pending or approved Form I–821, and you are using FedEx, UPS, or DHL: You must include a copy of the Notice of Action (Form I–797C or Form I–797) showing USCIS received or approved your Form I–821.	USCIS, Attn: I–131 TPS, 2501 S. State Hwy. 121 Business, Ste. 400, Lewisville, TX 75067.

Biometric Services Fee for TPS

Biometrics (such as fingerprints) are required for all applicants, in addition to a biometric services fee. As previously stated, if you cannot pay the biometric services fee, you may request a fee waiver, which you may submit on Form I–912. For more information on the application forms and fees for TPS, please visit the USCIS TPS web page at *https://uscis.gov/tps.* USCIS may require you to visit an Application Support Center to have your biometrics collected. For additional information on the USCIS biometric screening process, please see the USCIS Customer Profile Management Service Privacy Impact Assessment, available at *https://www.dhs.gov/publication/dhsuscispia-060-customer-profile-management-service-cpms.*

General Employment-Related Information for TPS Applicants and Their Employers

How can I obtain information on the status of my TPS application and EAD request?

To get case status information about your TPS application, as well as the status of your TPS-based EAD request, you can check Case Status Online at uscis.gov or visit the USCIS Contact Center at *https://uscis.gov/contactcenter.* If you still need assistance, you may ask a question about your case online at *https://egov.uscis.gov/e-request/Intro.do* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

When hired, what documentation may I show my employer as evidence of identity and employment authorization to complete Form I–9?

You can find the Lists of Acceptable Documents on Form I–9, Employment Eligibility Verification, as well as on the Acceptable Documents web page at *https://uscis.gov/i-9-central/acceptable-documents.* Employers must complete Form I–9 to verify the identity and employment authorization of all new employees. Within three business days of hire, employees must present acceptable documents to their employers as evidence of identity and employment authorization to satisfy Form I–9 requirements.

You may present one selection from List A (which provides evidence of both identity and employment authorization) or one selection from List B (which provides evidence of your identity) together with one selection from List C (which provides evidence of employment authorization), or you may present an acceptable receipt as described in these lists. Employers may not reject a document based on a future expiration date. You can find additional information about Form I–9 on the I–9 Central web page at *https://www.uscis.gov/I-9Central.* An EAD is an acceptable document under List A.

If I have an EAD based on another immigration status, can I obtain a new TPS-based EAD?

Yes, if you are eligible for TPS, you can obtain a new TPS-based EAD, even if you already have an EAD or work authorization based on another immigration status. If you want to obtain a new TPS-based EAD valid through May 27, 2026, you must file Form I–765 and pay the associated fee (unless USCIS grants your fee waiver request).

Can my employer require that I provide any other documentation to complete Form I–9, such as evidence of my status, proof of my Lebanese citizenship, or a Form I–797 showing that I registered for TPS?

No. When completing Form I–9, employers must accept any documentation you choose to present from the Form I–9 Lists of Acceptable Documents that reasonably appears to be genuine and that relates to you, or an acceptable List A, List B, or List C receipt. Employers may not request proof of Lebanese citizenship or proof of registration for TPS when completing Form I–9 for new hires or reverifying the employment authorization of current employees. Refer to the ''Note to Employees'' section of this **Federal**

Register notice for important information about your rights if your employer rejects lawful documentation, requires additional documentation, or otherwise discriminates against you based on your citizenship or immigration status, or your national origin.

Note to All Employers

Employers are reminded that the laws requiring proper employment eligibility verification and prohibiting unfair immigration-related employment practices remain in full force. This **Federal Register** notice does not supersede or in any way limit applicable employment verification rules and policy guidance, including those rules setting forth reverification requirements. For general questions about the employment eligibility verification process, employers may call USCIS at 888–464–4218 (TTY 877–875–6028) or email USCIS at *I9Central@uscis.dhs.gov.* USCIS accepts calls and emails in English, Spanish and many other languages. For questions about avoiding discrimination during the employment eligibility verification process (Form I–9 and E-Verify), employers may call the U.S. Department of Justice, Civil Rights Division, Immigrant and Employee Rights Section (IER) Employer Hotline at 800–255–8155 (TTY 800–237–2515). IER offers language interpretation in many languages. Employers may also email IER at *IER@usdoj.gov* or get more information online at *https://www.justice.gov/ier.*

Note to Employees

For general questions about the employment eligibility verification process, employees may call USCIS at 888–897–7781 (TTY 877–875–6028) or email USCIS at *I-9Central@uscis.dhs.gov.* USCIS accepts calls and emails in English, Spanish and many other languages. Employees or job applicants may also call the U.S. Department of Justice, Civil Rights Division, Immigrant and Employee Rights Section (IER) Worker Hotline at 800–255–7688 (TTY 800–237–2515) for information regarding employment discrimination based on citizenship, immigration status, or national origin, including discrimination related to Form I–9 and E-Verify. The IER Worker Hotline provides language interpretation in many languages.

To comply with the law, employers must accept any document or combination of documents from the Lists of Acceptable Documents if the documentation reasonably appears to be genuine and to relate to the employee, or an acceptable List A, List B, or List C receipt as described in these lists. Employers may not require extra or additional documentation beyond what is required for Form I–9 completion. Further, employers participating in E-Verify who receive an E-Verify case result of ''Tentative Nonconfirmation'' (mismatch) must promptly inform employees of the mismatch and give such employees an opportunity to take action to contest the mismatch. A mismatch means that the information entered into E-Verify from Form I–9 differs from records available to DHS.

Employers may not terminate, suspend, delay training, withhold or lower pay, or take any adverse action against an employee because of a mismatch while the case is still pending with E-Verify. A Final Nonconfirmation (FNC) case result occurs if E-Verify cannot confirm an employee's employment eligibility. An employer may terminate employment based on a case result of FNC. Work-authorized employees who receive an FNC may call USCIS for assistance at 888–897–7781 (TTY 877–875–6028). For more information about E-Verify-related discrimination or to report an employer for discrimination in the E-Verify process based on citizenship, immigration status, or national origin, contact IER's Worker Hotline at 800–255–7688 (TTY 800–237–2515). Additional information about proper nondiscriminatory Form I–9 and E-Verify procedures is available on the IER website at *https://www.justice.gov/ier* and the USCIS and E-Verify websites at *https://www.uscis.gov/i-9-central* and *https://www.e-verify.gov.*

Note Regarding Federal, State, and Local Government Agencies (Such as Departments of Motor Vehicles)

For Federal purposes, individuals approved for TPS may show their Form I–797, Notice of Action, indicating approval of their Form I–821 application, or may show their EAD with category code of A12 or C19 to prove that they have TPS. However, while Federal Government agencies must follow the guidelines laid out by the Federal Government, State and local government agencies establish their own rules and guidelines when granting certain benefits. Each state may have different laws, requirements, and determinations about what documents you need to provide to prove eligibility for certain benefits. Whether you are applying for a Federal, State, or local government benefit, you may need to provide the government agency with documents that show you are a TPS beneficiary or applicant, show you are authorized to work based on TPS or other status, or that may be used by DHS to determine if you have TPS or another immigration status. Examples of such documents are:

- Your new EAD with a TPS category code of A12 or C19, even if your country of birth noted on the EAD does not reflect the TPS-designated country of Lebanon;
- Your Form I–94, Arrival/Departure Record;
- Your Form I–797, Notice of Action, reflecting approval of your Form I–765; or
- Your Form I–797 or Form I–797C, Notice of Action, reflecting approval or receipt of a current Form I–821, if you received one from USCIS.

Check with the government agency requesting documentation about which documents the agency will accept.

Some state and local government agencies use SAVE, *https://www.uscis.gov/save,* to confirm the current immigration status of applicants for public benefits. SAVE can verify when an individual has TPS or a pending TPS application based on the documents above. In most cases, SAVE provides an automated electronic response to benefit-granting agencies within seconds, but occasionally verification can be delayed.

You can check the status of your SAVE verification by using CaseCheck at *https://www.uscis.gov/save/save-casecheck.* CaseCheck is a free service that lets you follow the progress of your SAVE verification case using your date of birth and one immigration identifier number (such as your A-Number, USCIS number, or Form I–94 number) or Verification Case Number. If an agency has denied your application based solely or in part on a SAVE response, the agency must allow you to appeal the decision in accordance with the agency's procedures. If the agency has received and acted on or will act on a SAVE verification and you do not believe the SAVE response is correct, the SAVE website, *https://www.uscis.gov/save/for-benefit-applicants,* has detailed information on how to correct or update your immigration record, make an appointment, or submit a written request to correct records.

BILLING CODE 9111–97–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7090–N–09]

60-Day Notice of Proposed Information Collection: Manufactured Housing Survey; OMB Control No.: 2528–0229

AGENCY: Office of Policy Development and Research, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: Comments Due Date: January 27, 2025.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal.

Written comments and recommendations for the proposed information collection can be submitted within 60 days of publication of this notice to *www.regulations.gov.* Interested persons are also invited to submit comments regarding this proposal by name and/or OMB Control Number and can be sent to: Anna Guido, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Room 8210, Washington, DC 20410–5000 or email at *PaperworkReductionActOffice@hud.gov.*

FOR FURTHER INFORMATION CONTACT: Anna Guido, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email; *Anna.P.Guido@hud.gov;* telephone (202) 402–5535 (this is not a toll-free number). HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.*

Copies of available documents submitted to OMB may be obtained from Ms. Guido.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Manufactured Housing Survey.

OMB Approval Number: 2528–0029.

Type of Request: Revision of a currently approved collection.

Form Number: C–MH–9A.

Description of the need for the information and proposed use: The Manufactured Housing Survey collects data on the characteristics of newly manufactured homes placed for residential use. Key data collected includes sales price and the number of units placed and sold within 4 months of shipment. Other selected housing characteristics collected include size, location, and titling. HUD is authorized to collect these statistics under the ''Housing and Community Development Act of 1980,'' Title 42 U.S.C. 5424 note (see Attachment 3), which provides the Secretary discretion to take necessary actions to ensure the public is aware of the distinctions between the types of factory-built housing. This allows HUD to collect and report manufactured home sales price information for the nation, Census Regions, States, and selected metropolitan statistical areas, and to monitor whether new manufactured homes are being placed on owned rather than rented lots. HUD also used these data to monitor total housing production and its affordability.

Furthermore, the Manufactured Housing Survey serves as a basis for HUD's mandated indexing of loan limits. Section 2145 (b) of the Housing and Economic Recovery Act (HERA) of 2008 requires HUD to develop a method of indexing to annually adjust Title I manufactured home loan limits. This index is partially based on manufactured housing price data collected by this survey. Section 2145 of the HERA of 2008 also amends the maximum loan limits for manufactured home loans insured under Title I. The Final Rule, entitled Indexing Methodology for Title I Manufactured Home Loan Limits, was published in the **Federal Register** on February 28, 2024. This Rule established separate indexing methodologies to annually calculate future loan limits for Manufactured Homes Loans, Manufactured Lot Loans and Manufactured Home and Lot Combination Loans for the Title I Manufactured Home Loan Program. Single- and double-section price data from this survey are used to determine maximum loan amounts for Title I Manufactured Home Loans. HUD implemented the revised loan limits, as shown below, for all manufactured home loans for which applications are received on or after March 29, 2024.

Loan type	Purpose	Old loan limit	New loan limit
MANUFACTURED HOME IMPROVEMENT LOAN.	For financing alterations, repairs and improvements upon or in connection with existing manufactured homes.	$25,090	$25,090.
MANUFACTURED HOME UNIT(S)	To purchase or refinance a Manufactured Home unit (s).	69,678	Single-section: $105,532. Multi-section: $193,719.
LOT LOAN	To purchase and develop a lot on which to place a manufactured home unit.	23,226	$43,377.
COMBINATION LOAN FOR LOT AND HOME	To purchase or refinance a manufactured home and lot on which to place the home.	92,904	Single-section: $148,909. Multi-section: $237,096.

Method of Collection

The methodology for collecting information on new manufactured homes involves contacting dealers from a monthly sample of new manufactured homes shipped by manufacturers. The units are sampled from lists obtained from the Institute for Building Technology and Safety. Dealers that take shipment of the selected homes are mailed a survey form four months after shipment for recording the status of the manufactured home.

Respondents: Business firms or other for-profit institutions.

Respondent's Obligation: Voluntary.

Estimated Number of Respondents: 4,860.

Frequency of Response: Once.

Average Hours per Response: 20 minutes per response (.33 hour).

Estimated Total Annual Burden Hours: 1,620.

Estimated Total Annual Cost: $58,547. (We do not expect respondents to incur any costs other than that of their time to respond. The estimated hourly cost per response is $36.14, which is the hourly rate for typical

respondent: Occupational code 41–4010: Sales Representatives, Wholesale and Manufacturing. The estimate total annual cost burden to respondents is $58,547, which is not a direct financial cost of respondents' time, but rather the associated cost burden of the respondents' voluntary responses.)

TOTAL ESTIMATED BURDENS

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Annual cost
Manufactured Housing Survey	4,860	1	4,860	0.33	1,620	$36.14	$58,547

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected, and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comments in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 3507.

Todd M. Richardson,

General Deputy Assistant Secretary for Policy Development and Research

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_AK_FRN_MO4500183278; AA–8489–A]

Alaska Native Claims Selection

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of decision approving lands for conveyance.

SUMMARY: The Bureau of Land Management (BLM) hereby provides constructive notice that it will issue an appealable decision approving conveyance of the surface estate in certain lands to Chickaloon Moose Creek Native Association, Inc. for the Native village of Chickaloon, pursuant to the Alaska Native Claims Settlement Act of 1971 (ANCSA). The subsurface estate in the same lands will be conveyed to Cook Inlet Region, Inc. when the surface estate is conveyed to Chickaloon Moose Creek Native Association, Inc.

DATES: Any party claiming a property interest in the lands affected by the decision may appeal the decision in accordance with the requirements of 43 CFR part 4 within the time limits set out in the **SUPPLEMENTARY INFORMATION** section.

ADDRESSES: You may obtain a copy of the decision from the Bureau of Land Management, Alaska State Office, 222 West Seventh Avenue, #13, Anchorage, AK 99513–7504.

FOR FURTHER INFORMATION CONTACT: Matthew R. Lux, Land Transfer Resolution Specialist, BLM Alaska State Office, 907–271–3176, or *mlux@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point of contact in the United States.

SUPPLEMENTARY INFORMATION: As required by 43 CFR 2650.7(d), notice is hereby given that the BLM will issue an appealable decision to Chickaloon Moose Creek Native Association, Inc. The decision approves conveyance of the surface estate in certain lands pursuant to ANCSA (43 U.S.C. 1601, *et seq.*). As provided by ANCSA, the subsurface estate in the same lands will be conveyed to Cook Inlet Region, Inc. when the surface estate is conveyed to Chickaloon Moose Creek Native Association, Inc. The lands are located in the vicinity of Chickaloon, Alaska, and are described as:

Seward Meridian, Alaska

T. 19 N., R. 3 E.,
Secs. 25, 26, and 27;
Secs. 32 to 36, inclusive.
Containing approximately 2,691 acres.
T. 19 N., R. 4 E.,
Secs. 12 and 19.
Containing 113.28 acres.
T. 20 N., R. 5 E.,
Tract A.
Containing 4,414.29 acres.
T. 21 N., R. 5 E.,
Sec. 3;
Secs. 9 and 10;
Secs. 16 and 17;
Secs. 19 and 20;
Secs. 30, and 31.
Containing 5,735.68 acres.
T. 22 N., R. 5 E.,
Secs. 25 and 26;
Secs. 34, 35, and 36.
Containing 3,200 acres.
T. 21 N., R. 6 E.,
Secs. 2 and 3;
Secs. 10 and 11;
Secs. 14 and 15;
Secs. 21 and 22;
Secs. 28 and 29;
Secs. 31, 32, and 33.
Containing 8,323.92 acres.
T. 22 N., R. 6 E.,
Sec. 1;
Secs. 11 to 14, inclusive;
Sec. 23;
Sec. 26;
Secs. 30 and 31;
Sec. 35.
Containing 5,894.64 acres.
Aggregating approximately 30,373 acres.

The decision addresses public access easements, if any, to be reserved to the United States pursuant to sec. 17(b) of ANCSA (43 U.S.C. 1616(b)), in the lands described above.

The BLM will also publish notice of the decision once a week for four consecutive weeks in the Anchorage Daily News newspaper.

Any party claiming a property interest in the lands affected by the decision may appeal the decision in accordance with the requirements of 43 CFR part 4 within the following time limits:

1. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who fail or refuse to sign their return receipt, and parties who receive a copy of the decision by regular mail which is not certified, return receipt requested, shall have until December 27, 2024 to file an appeal.

2. Parties receiving service of the decision by certified mail shall have 30 days from the date of receipt to file an appeal.

Parties who do not file an appeal in accordance with the requirements of 43 CFR part 4 shall be deemed to have waived their rights. Notices of appeal transmitted by facsimile will not be accepted as timely filed.

Matthew R. Lux,

Land Transfer Resolution Specialist, Resolution Group.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_WY_FRN_MO4500183156]

Notice of Availability of the Record of Decision and Approved Resource Management Plan Amendment for the Buffalo Field Office, Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: The Bureau of Land Management (BLM) announces the availability of the Record of Decision (ROD) for the Approved Resource Management Plan (RMP) Amendment for the Buffalo Field Office located in Buffalo, Wyoming. The BLM Director signed the ROD on November 20, 2024, which constitutes the decision of the BLM and makes the Approved RMP Amendment effective immediately.

DATES: The BLM Director signed the ROD/Approved RMP Amendment on November 20, 2024.

ADDRESSES: The ROD/Approved RMP Amendment is available online at: *https://eplanning.blm.gov/eplanning-ui/project/2021239/510.* Printed copies of the ROD/Approved RMP Amendment are available for public inspection at the Buffalo Field Office or can be provided upon request by contacting Tom Bills, Project Manager, telephone (307) 684–1133; or at the address BLM Buffalo Field Office, 1425 Fort Street, Buffalo, WY 82834; email *tbills@blm.gov.*

A copy of the Protest Resolution Report is available at: *https://www.blm.gov/programs/planning-and-nepa/public-participation/protest-resolution-reports.*

FOR FURTHER INFORMATION CONTACT: Thomas Bills, Project Manager, telephone (307) 684–1133; or at the address BLM Buffalo Field Office, 1425 Fort Street, Buffalo, WY 82834; email *tbills@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The Approved RMP Amendment addresses a United States District Court for the District of Montana order (*Western Organization of Resource Councils, et al.* v. *BLM*; CV 00076–GF–BMM; 8/3/2022). The Approved RMP Amendment changes the existing 2015 Buffalo Approved RMP.

The RMP Amendment approved by the ROD includes land use allocations of areas acceptable for further consideration for coal leasing and those that are not. The Approved RMP Amendment is Alternative A (No Leasing) from the Final Supplemental Environmental Impact State (EIS), making no BLM administered coal acceptable and 413,250 acres unavailable for further consideration for coal leasing within the Buffalo Field Office planning area. The Approved RMP Amendment does not affect the area with coal development potential or the area determined to be suitable for surface coal mining. The Approved RMP Amendment includes the updated coal screens (43 CFR 3420.1–4(e)) using current data and evaluated the issues identified through internal and public scoping. Application of coal screen 1 (development potential) identified approximately 413,250 acres of BLM-administered coal as having development potential. The Approved RMP Amendment also addresses the NEPA deficiencies identified by the court order associated with the application of the multiple-use screen. Specifically, the application of a multiple-use climate change criterion that uses greenhouse gas emissions as a proxy for climate change. Reducing availability of BLM-administered coal for leasing consideration reduces the contribution of greenhouse gas emissions from the development and combustion of BLM-administered coal from the planning area.

The BLM determined that additional leasing of BLM-administered coal is not necessary based on the current analysis in the Final Supplemental EIS. The analysis indicates that operating mines in the planning area collectively have existing leases with sufficient coal reserves to maintain projected mine production levels into 2041.

The BLM published a notice of availability for the Draft Supplemental EIS and Potential RMP Amendment in the **Federal Register** on May 8, 2023, which initiated a 90-day comment period (88 FR 29691). On May 31, 2023, the BLM hosted a public meeting in Gillette, Wyoming, to present the Draft Supplemental EIS/RMP Amendment to the public and solicit comments. The BLM also hosted an on-line public meeting on June 5, 2023. During the public comment period, the BLM received 25 unique written submissions containing 147 substantive comments. The Draft Supplemental EIS comments helped the BLM refine the Final Supplemental EIS and guided the development of the Proposed RMP Amendment.

The BLM provided the Proposed RMP Amendment for public protest on May 17, 2024 (89 FR 43431), for a 30-day protest period, and received five valid protests. The BLM Assistant Director for Planning and Resources resolved all protests. Responses to protest issues were compiled and documented in a Protest Resolution Report (see **ADDRESSES**). No changes were made to the Approved RMP Amendment as a result of protest resolution.

The BLM provided the Proposed RMP Amendment to the Governor of Wyoming for a 60-day Governor's consistency review. The State Director made no changes to the Proposed RMP Amendment as a result of the Governor's review. On September 13, 2024, the Governor submitted an appeal to the BLM Director on the State Director's response to the Governor's consistency review. In accordance with planning regulations (1610.3–2), the Director notified the Governor on November 6, 2024, of the reasons for the determination to reject the Governor's recommendations.

(Authority: 40 CFR 1506.6; 43 CFR 1610.5–1)

Tracy Stone-Manning,

BLM Director.

BILLING CODE 4331–26–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_MT_FRN_MO4500182720]

Notice of Availability of the Record of Decision and Approved Resource Management Plan Amendment for the Miles City Field Office, Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: The Bureau of Land Management (BLM) announces the availability of the Record of Decision (ROD) for the Approved Resource Management Plan (RMP) Amendment for the Miles City Field Office located in Miles City, Montana. The BLM Director signed the ROD on November 20, 2024, which constitutes the decision of the BLM and makes the Approved RMP Amendment effective immediately.

DATES: The BLM Director signed the ROD/Approved RMP Amendment on November 20, 2024.

ADDRESSES: The ROD/Approved RMP Amendment is available online *https://eplanning.blm.gov/eplanning-ui/project/2021155/510.* Printed copies of the ROD/Approved RMP Amendment are available for public inspection at the Miles City Field Office or can be provided upon request by contacting Irma Nansel, Project Manager, telephone (406) 233–3653; or at the address BLM Miles City Field Office, 111 Garryowen Road, Miles City, MT 59301; email *inansel@blm.gov.*

A copy of the Protest Resolution Report is available at: *https://www.blm.gov/programs/planning-and-nepa/public-participation/protest-resolution-reports.*

FOR FURTHER INFORMATION CONTACT: Irma Nansel, Project Manager, telephone (406) 233–3653; or at the address BLM Miles City Field Office, 111 Garryowen Road, Miles City, MT 59301; email *inansel@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The Approved RMP Amendment addresses a United States District Court for the District of Montana order (*Western Organization of Resource Councils, et al.* v. *BLM*; CV 00076–GF–BMM; 8/3/2022). The Approved RMP Amendment changes the existing 2015 Miles City Approved RMP.

The RMP Amendment approved by the ROD includes land use allocations of areas acceptable for further consideration for coal leasing and those that are not. The Approved RMP Amendment is Alternative D from the Final Supplemental EIS, which allocates zero acres of BLM administered coal as available, and 1,745,040 acres unavailable for further consideration for coal leasing within the Miles City Field Office planning area. The Approved RMP Amendment does not affect the area with coal development potential or the area determined to be suitable for surface coal mining.

The Approved RMP Amendment includes the updated coal screens (43 CFR 3420.1–4(e)) using current data and evaluated the issues identified through internal and public scoping. Application of coal screen 1 (development potential) identified approximately 1,745,000 acres of BLM-administered coal as having development potential. The Approved RMP Amendment also addresses the NEPA deficiencies identified by the court order associated with the application of the multiple-use screen. Specifically, the application of a multiple-use climate change criterion that uses greenhouse gas emissions as a proxy for climate change. Reducing availability of BLM-administered coal for leasing consideration reduces the contribution of greenhouse gas emissions from the development and combustion of BLM-administered coal from the planning area.

The BLM determined that additional leasing of BLM-administered coal is not necessary based on the current analysis in the Final Supplemental EIS. The analysis indicates that operating mines in the planning area have existing leases with sufficient coal reserves to maintain existing mine production levels until 2035 for Spring Creek Mine and 2060 for Rosebud Mine.

The BLM published a notice of availability for the Draft Supplemental EIS and Potential RMP Amendment in the **Federal Register** on May 8, 2023, which initiated a 90-day comment period (88 FR 29689). On June 6th, the BLM hosted a public meeting at the BLM Miles City Field Office in Miles City, Montana, to present the Draft Supplemental EIS and RMP Amendment to the public and solicit comments. The BLM also hosted an on-line public meeting on June 7, 2023. Eight members of the public attended the on-line meeting. During the public comment period, the BLM received 14 unique written submissions containing 167 substantive comments. The Draft Supplemental EIS comments helped the BLM refine the Final Supplemental EIS and guided the development of the Proposed RMP Amendment.

The BLM provided the Proposed RMP Amendment for public protest on May 17, 2024 (89 FR 43432), for a 30-day protest period, and received seven valid protests. The BLM Assistant Director for Planning and Resources resolved all protests. Responses to protest issues were compiled and documented in a Protest Resolution Report (see **ADDRESSES**). No changes were made to the Approved RMP Amendment as a result of protest resolution.

The BLM provided the Proposed RMP Amendment to the Governor of Montana for a 60-day Governor's consistency review. There were no inconsistencies with State or local plans, policies, or programs identified during the Governor's consistency review of the Proposed RMP Amendment. The State Director made no changes to the Proposed RMP Amendment as a result of the Governor's review. On September 18, 2024, the Governor submitted an appeal to the BLM Director on the State Director's response to the Governor's consistency review. In accordance with planning regulations (1610.3–2), the Director notified the Governor on November 6, 2024, of the reasons for the determination to reject the Governor's recommendations.

(Authority: 40 CFR 1506.6; 43 CFR 1610.5–1)

Tracy Stone-Manning,

BLM Director.

BILLING CODE 4331–20–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–748–749 and 731–TA–1726–1727 (Preliminary)]

Float Glass Products From China and Malaysia; Institution of Antidumping and Countervailing Duty Investigations and Scheduling of Preliminary Phase Investigations

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the institution of investigations and commencement of preliminary phase antidumping and countervailing duty investigation Nos. 701–TA–748–749 and 731–TA–1726–1727 (Preliminary) pursuant to the Tariff Act of 1930 (''the Act'') to determine whether there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of float glass products from China and Malaysia, described in statistical reporting numbers 7005.10.8000, 7005.21.1010, 7005.21.1030, 7005.21.2000,

7005.29.1810, 7005.29.1850, 7005.29.2500, 7007.29.0000, 7008.00.0000, 7009.91.5010, 7009.91.5095, 7009.92.5010, 7006.00.4010, 7006.00.4050, and 7007.19.0000 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value and alleged to be subsidized by the Governments of China and Malaysia. Unless the Department of Commerce (''Commerce'') extends the time for initiation, the Commission must reach a preliminary determination in antidumping and countervailing duty investigations in 45 days, or in this case by January 6, 2025. The Commission's views must be transmitted to Commerce within five business days thereafter, or by January 13, 2025.

DATES: November 21, 2024.

FOR FURTHER INFORMATION CONTACT: Kristina Lara (202–205–3386), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov*.

SUPPLEMENTARY INFORMATION:

Background.—These investigations are being instituted, pursuant to sections 703(a) and 733(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a) and 1673b(a)), in response to petitions filed on November 21, 2024, by Vitro Flat Glass, LLC, Cheswick, Pennsylvania, and Vitro Meadville Flat Glass, LLC, Cochranton, Pennsylvania.

For further information concerning the conduct of these investigations and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and B (19 CFR part 207).

Participation in the investigations and public service list.—Persons (other than petitioners) wishing to participate in the investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in §§ 201.11 and 207.10 of the Commission's rules, not later than seven days after publication of this notice in the **Federal Register**. Industrial users and (if the merchandise under investigation is sold at the retail level) representative consumer organizations have the right to appear as parties in Commission antidumping duty and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to these investigations upon the expiration of the period for filing entries of appearance.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in these investigations available to authorized applicants representing interested parties (as defined in 19 U.S.C. 1677(9)) who are parties to the investigations under the APO issued in the investigations, provided that the application is made not later than seven days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference.—The Office of Investigations will hold a staff conference in connection with the preliminary phase of these investigations beginning at 9:30 a.m. on Thursday, December 12, 2024. Requests to appear at the conference should be emailed to *preliminaryconferences@usitc.gov* (DO NOT FILE ON EDIS) on or before Tuesday, December 10, 2024. Please provide an email address for each conference participant in the email. Information on conference procedures, format, and participation, including guidance for requests to appear as a witness via videoconference, will be available on the Commission's Public Calendar (Calendar (USITC) √ United States International Trade Commission). A nonparty who has testimony that may aid the Commission's deliberations may request permission to participate by submitting a short statement.

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov*). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Written submissions.—As provided in §§ 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before 5:15 p.m. on December 17, 2024, a written brief containing information and arguments pertinent to the subject matter of the investigations. Parties shall file written testimony and supplementary material in connection with their presentation at the conference no later than 4:00 p.m. on December 11, 2024. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with these investigations must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that any information that it submits to the Commission during these investigations may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of these or related investigations or reviews, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. appendix 3; or (ii) by U.S. Government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.12 of the Commission's rules.

By order of the Commission.

Issued: November 21, 2024.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1118 (Remand)]

Certain Movable Barrier Operator Systems and Components Thereof; Notice of a Final Determination Finding a Violation of Section 337 and Issuing a Limited Exclusion Order and Cease and Desist Orders; Termination of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission (''Commission'') has determined that respondents Nortek Security & Control, LLC of Carlsbad, California (presently doing business as Nice North America LLC); Nortek, Inc. of Providence, Rhode Island; and GTO Access Systems, LLC of Tallahassee, Florida (collectively, ''Nortek'') have violated section 337 of the Tariff Act of 1930, as amended, by importing, selling for importation, or selling in the United States after importation certain movable barrier operators (including garage door operators) and components thereof that infringe claim 11 of U.S. Patent No. 8,587,404 (''the '404 patent''). The Commission has determined that the appropriate remedies are a limited exclusion order (''LEO'') and cease and desist orders (''CDOs'') against Nortek. The Commission has also determined to set a bond in the amount of zero percent (0%) of the entered value of the excluded products imported during the period of Presidential review. This investigation is hereby terminated.

FOR FURTHER INFORMATION CONTACT: Carl P. Bretscher, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–2382. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket system (''EDIS'') at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal, telephone (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on June 11, 2018, based on a complaint, as supplemented, filed by The Chamberlain Group, Inc. (''Chamberlain'') of Oak Brook, Illinois. 83 FR 27020–21 (June 11, 2018). The complaint accuses Nortek of violating section 337 of the Tariff Act, as amended, 19 U.S.C. 1337 (''section 337'') by importing, selling for importation, or selling in the United States after importation certain movable barrier operator systems that infringe one or more of the asserted claims of the '404 patent and U.S. Patent Nos. 7,755,223 (''the '223 patent'') and 6,741,052 (''the '052 patent''). *Id.* The complaint also alleges the existence of a domestic industry. The Office of Unfair Import Investigations is not a party to the investigation.

On November 25, 2019, the presiding administrative law judge (''ALJ'') issued two initial determinations (''IDs''). First, the ALJ issued Order No. 38, granting Chamberlain's motion for summary determination that it satisfied the economic prong of the domestic industry requirement (''DI economic prong''). Order No. 38 (Nov. 25, 2019). Second, the ALJ issued a final ID on violation, as well as a recommended determination (''RD'') on remedy and bond. The final ID finds no violation of section 337 because: (i) Nortek did not infringe claim 11 of the '404 patent; (ii) Nortek did not infringe the '223 patent and Chamberlain did not satisfy the technical prong of the domestic industry requirement (''DI technical prong'') for that patent; and (iii) asserted claim 1 of the '052 patent is invalid as obvious. The RD recommends issuing an LEO and CDOs against Nortek and setting the bond of 100 percent during the period of Presidential review.

On April 22, 2020, the Commission determined to review and, on review, to adopt the final ID's no-violation finding for the '404 patent, which was based on a narrow construction of the limitation ''movable barrier operator'' that excluded the wall station. Comm'n Notice at 3 (Apr. 22, 2020). The Commission took no position on the final ID's finding that Nortek failed to prove that claim 11 of the '404 patent is patent ineligible under 35 U.S.C. 101. The Commission also adopted the final ID's finding that there was no violation with respect to the '052 patent because the asserted claim is obvious. At the same time, the Commission vacated Order No. 38 and remanded the economic prong issue to the ALJ for further proceedings with respect to the '223 patent. *Id.;* Order Vacating and Remanding Order No. 38 (Apr. 22, 2020) (''First Remand Order'').

The ALJ, after re-analyzing the domestic industry per the Commission's instructions, issued a Remand Initial Determination (''First RID'') on July 10, 2020. The First RID finds that Chamberlain made significant investments in plant and equipment as well as labor and capital, which satisfied the DI economic prong for the '223 patent under sections 337(a)(3)(A) and (B), respectively.

On September 9, 2020, the Commission determined to review the First RID and requested additional briefing by the parties on issues relating to the DI economic prong and remedy, bond, and the public interest. 85 FR 57249–50 (Sept. 14, 2020).

On December 3, 2020, the Commission determined to adopt the First RID's findings that Chamberlain had satisfied the DI economic prong under subsections 337(a)(3)(A) and (B). 85 FR 79217–18 (Dec. 9, 2020). The Commission reversed the final ID's non-infringement finding for the '223 patent, finding instead that Nortek violated section 337 by infringing the '223 patent. *Id.* Finding that the public interest did not preclude relief, the Commission issued an LEO and CDOs against Nortek and set the bond at 100 percent of entered value. Comm'n Op. at 34–39, 41.

On June 16, 2020, Chamberlain appealed the Commission's no-violation determinations for the '404 patent and '052 patent (which expired while the appeal was pending). On April 1, 2021, Nortek cross-appealed the Commission's violation determination for the '223 patent.

On April 27, 2023, the Federal Circuit issued its decision, in which it: (i) affirmed the Commission's violation determination for the '223 patent; (ii) for the '404 patent, reversed the Commission's construction of the term ''movable barrier operator,'' vacated its non-infringement, waiver, and no-violation determinations, and remanded with instructions to the Commission to re-evaluate infringement of the '404 patent using a proper claim construction; and (iii) vacated the Commission's determinations for the expired '052 patent and remanded with instructions to dismiss the infringement claim as moot. The *Chamberlain Group, Inc.* v. *ITC,* Appeal Nos. 20–1965, 21–1829, 2023 WL 3115579 at *1, *4–7 (Fed. Cir. Apr. 27, 2023).

On August 4, 2023, the Commission issued a notice asking the parties which issues needed to be resolved in view of the Federal Circuit's remand and whether additional proceedings were necessary. Comm'n Notice (Aug. 4, 2023). The parties filed responses identifying infringement of the '404 patent, patent-ineligibility of claim 11 of the '404 patent under section 101, and

the economic prong of domestic industry with respect to the '404 patent as the violation issues that needed to be resolved. The parties agreed there was no need to reopen the evidentiary record, as it has already been fully developed.

On October 4, 2023, the Commission issued a second notice directing the parties to brief: (i) which, if any, of the accused products infringe claim 11 of the '404 patent under the Court's new construction of ''movable barrier operator'' and (ii) whether the ID properly finds that claim 11 is not patent-ineligible under 35 U.S.C. 101. Comm'n Notice at 3 (Oct. 4, 2023). The Commission determined not to reopen the evidentiary record. The Commission also remanded the investigation to the ALJ for the sole purpose of determining whether Chamberlain satisfied the DI economic prong for the '404 patent. *See* Remand Order (Oct. 4, 2023) (''Second Remand Order'').

On January 11, 2024, the presiding ALJ issued Order No. 46 directing the parties to provide supplemental information regarding the covered products allegedly protected by the '404 patent, the extent to which domestic investments relating to products covered by the '223 patent were applicable to products covered by the '404 patent, the domestic inventories of products covered by the '404 patent, and other issues relating to the DI economic prong analysis. *See* Order No. 46 (Jan. 11, 2024).

On May 8, 2024, the ALJ issued the Recommended [*sic,* Remand] Initial Determination on Second Remand Order (''Second RID'') presently at issue. Order No. 50 (May 8, 2024). The Second RID finds that Chamberlain has satisfied the DI economic prong for the '404 patent under subsections 337(a)(3)(A), (B), and (C). The Second RID also makes subsidiary findings regarding infringement and the accused Nortek products. The Second RID also notes that the Commission previously found that Chamberlain's domestic industry products (the ''404 DI Products'') practice the '404 patent and Chamberlain thus satisfied the DI technical prong.

On May 20, 2024, Nortek filed a petition for review of the Second RID. On May 28, 2024, Chamberlain filed its opposition to Nortek's petition for review.

On June 28, 2024, the Commission determined to review the Second RID. 89 FR 54038 (June 28, 2024). The Commission also requested briefing on remedy, bond, and the public interest. *Id.*

Upon review of the final ID, the Second RID, the Federal Circuit's decision on appeal, the parties' submissions, and the evidence of record, the Commission finds that Nortek has violated section 337 by importing into the United States, selling for importation, or selling in the United States after importation certain movable barrier operators and components thereof that infringe claim 11 of the '404 patent. As set forth in the accompanying Opinion, the Commission finds that Nortek has infringed claim 11 of the '404 patent, and that claim 11 is not abstract or patent-ineligible under 35 U.S.C. 101. The Commission also finds that Chamberlain has satisfied the DI economic prong per 19 U.S.C. 1337(a)(3)(A), (B), but takes no position on whether it has also satisfied the DI economic prong under section 337(a)(3)(C).

The Commission has determined that the appropriate remedy is: (i) an LEO prohibiting the importation of certain movable barrier operator systems, including garage door operators, and components thereof that infringe claim 11 of the '404 patent; and (ii) a CDO against each Nortek respondents. The Commission has determined that the public interest factors do not preclude issuance of a remedy. The Commission has determined to set a bond in the amount of zero percent (0%) of the entered value of the infringing products imported during the period of Presidential review (19 U.S.C. 1337(j)).

The Commission issues its opinion herewith setting forth its determinations on certain issues. This investigation is hereby terminated.

The Commission's orders and opinion were delivered to the President and United States Trade Representative on the day of their issuance.

The Commission vote for this determination took place on November 21, 2024.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: November 21, 2024.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

[OMB 1140–0062]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Identification of Imported Explosives Materials

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 30 days until December 27, 2024.

FOR FURTHER INFORMATION CONTACT: If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact: Michael O'Lena, Explosives Industry Programs Branch, by email at *eipb-informationcollection@atf.gov* or *michael.olena@atf.gov,* or telephone at (202) 648–7120.

SUPPLEMENTARY INFORMATION: The proposed information collection was previously published in the **Federal Register**, volume 89 page 80933, on Friday, October 4, 2024, allowing a 60-day comment period. Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Enhance the quality, utility, and clarity of the information to be collected; and/or

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms

of information technology, *e.g.,* permitting electronic submission of responses.

Written comments and recommendations for this information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the information collection or the OMB Control Number 1140–0062. This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view Department of Justice, information collections currently under review by OMB.

DOJ seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOJ notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of a previously approved collection.

2. *Title of the Form/Collection:* Identification of Imported Explosives Materials.

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* None.

Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract: Affected Public:* Private Sector-for or not for profit institutions.

5. *Obligation to Respond:* The obligation to respond is mandatory per 27 CFR part 555.

6. *Total Estimated Number of Respondents:* 51.

7. *Estimated Time per Respondent:* 1 hour.

8. *Frequency:* 3 times annually.

9. *Total Estimated Annual Time Burden:* 51 hours.

10. *Total Estimated Annual Other Costs Burden:* $0.

If additional information is required, contact: Darwin Arceo, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC 20530.

Dated: November 24, 2024.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view Department of Justice, information collections currently under review by OMB.

DOJ seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOJ notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Overview of This Information Collection

1. *Type of Information Collection:* Revision of a previously approved collection.

2. *Title of the Form/Collection:* Records of Acquisition and Disposition, Registered Importers of Arms, Ammunition & Defense Articles on the U.S. Munitions Import List.

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* None.

Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:*

Affected Public: Private Sector-for or not for profit institutions.

Abstract: The records associated with this collection are defense articles other than firearms and ammunition enumerated on the U.S. Munitions Import List. Information Collection (IC) OMB 1140–0031 is being revised to

change the title from 'Records of Acquisition and Disposition, Registered Importers of Arms, Ammunition & Implements of War on the U.S. Munitions Import List' to 'Records of Acquisition and Disposition, Registered Importers of Arms, Ammunition & Defense Articles on the U.S. Munitions Import List' to reflect a change in terminology.

5. *Obligation to Respond:* Mandatory. The statutory requirements are implemented in per aw 22 U.S.C. 2778 and regulations 27 CFR 447.54.

6. *Total Estimated Number of Respondents:* 50 respondents.

7. *Estimated Time per Respondent:* 5 hours.

8. *Frequency:* Once annually.

9. *Total Estimated Annual Time Burden:* 250 hours.

10. *Total Estimated Annual Other Costs Burden:* $0.

If additional information is required, contact: Darwin Arceo, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 4W–218 Washington, DC 20530.

Dated: November 22, 2024.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–FY–P

DEPARTMENT OF JUSTICE

[CPCLO Order No. 007–2024

Privacy Act of 1974; System of Records

AGENCY: Office of Justice Programs, United States Department of Justice.

ACTION: Notice of a new system of records.

SUMMARY: Pursuant to the Privacy Act of 1974, Office of Management and Budget (OMB) Circular No. A–108, and Federal law, notice is hereby given that the DOJ's Office of Justice Programs (OJP) proposes a new system of records notice titled the Peer Review Management System (PRMS), JUSTICE/OJP–020. The DOJ uses the PRMS, a web-based tool, to manage the planning, selection, and assignment of peer reviewers as part of the merit review of DOJ's funding opportunities.

DATES: In accordance with 5 U.S.C. 552a(e)(4) and (11), this system of records is effective upon publication, subject to a 30-day period in which to comment on the routine uses described below. Please submit any comments by December 27, 2024.

ADDRESSES: The public, OMB, and Congress are invited to submit any comments by mail to the United States Department of Justice, Office of Privacy and Civil Liberties, ATTN: Privacy Analyst, 145 N St. NE, Suite 8W, Washington, DC 20002; by facsimile at 202–307–0693; or by email at *privacy.compliance@usdoj.gov.* To ensure proper handling, please reference the above CPCLO Order No. on your correspondence.

FOR FURTHER INFORMATION CONTACT: Bryce Mitchell, Division Director; Enterprise Application Development Division, Office of the Chief Information Officer, Office of Justice Programs; 999 North Capitol Street NE, Washington, DC 20002, *Bryce.Mitchell@usdoj.gov,* (202) 598–9418.

Jennifer Tyson, Deputy Director, Grants Management Division, Audit, Assessment, and Management, Office of Justice Programs; 999 North Capitol Street NE, Washington, DC 20002, *Jennifer.Tyson@usdoj.gov,* (202) 307–0750.

SUPPLEMENTARY INFORMATION:

Potential peer reviewers, who may be members of the public or Federal Government personnel, use the PRMS online tool to enter their records via enrollment applications (*i.e.,* profiles) to be considered for peer review assignments. Authorized DOJ users (*i.e.* DOJ program office and contract staff) can search these profiles to nominate and invite a peer reviewer to review and score DOJ funding opportunity applications. Authorized users (*i.e.,* those members of the public or Federal Government personnel invited by a DOJ program office staff to serve as peer reviewer) may log into PRMS to review their profiles and obtain access to assigned peer review tasks.

In accordance with 5 U.S.C. 552a(r), the DOJ has provided a report to OMB and Congress on this new system of records.

Dated: November 19, 2024

Peter A. Winn,

Acting Chief Privacy and Civil Liberties Officer, United States Department of Justice.

JUSTICE/OJP—020

**SYSTEM NAME AND NUMBER: **

Peer Review Management System (PRMS), JUSTICE/OJP—020

SECURITY CLASSIFICATION:

The system is unclassified.

SYSTEM LOCATION:

Records in this system are maintained at the following locations: Office of Justice Programs (OJP); 999 North Capitol Street NE, Washington, DC 20002; and cloud service providers at AWS GovCloud; 1200 12th Avenue; South Seattle, WA 98144. The cloud computing service providers and their location may change from time to time, and this document may not reflect the most current information available. To confirm information about the current cloud computing service provider, please contact OJP through the OJP service desk at email address *OJP.ITservicedesk@ojp.usdoj.gov.*

SYSTEM MANAGER(S):

Bryce Mitchell, Division Director, Enterprise Application Development Division, Office of the Chief Information Officer, Office of Justice Programs, 999 North Capitol Street NE, Washington, DC 20002, *Bryce.Mitchell@usdoj.gov,* (202) 514–2412.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

28 U.S.C. 530C, Authority to use available funds; 34 U.S.C. 10226(b), Personnel and Administrative Authority

PURPOSE(S) OF THE SYSTEM:

The Peer Review Management System (PRMS) supports DOJ's overall grantmaking and research efforts toward fair, equitable, and objective funding decisions by providing a centralized directory for DOJ staff to obtain peer reviewers. DOJ peer reviewers consist of Federal Government staff or members of the public, who offer their expertise in merit reviewing and scoring OJP funding opportunities. The system achieves this purpose through its two main components, the Peer Reviewer Database (PRD) and the Peer Review Support System (PRSS).

The PRD maintains and disseminates records of peer reviewers and potential peer reviewers, including their electronic enrollment information. This component collects records about potential peer reviewers who voluntarily complete a multi-step online application process to be assigned peer review as needed by DOJ. The PRD allows authorized DOJ users (DOJ program and contractor staff) to nominate and invite a potential peer reviewer for a peer review assignment. Authorized DOJ users can also review and evaluate work performed once a peer reviewer completes an assignment.

The PRSS maintains details of the peer review process necessary for authorized DOJ users to manage the peer review process, including application review criteria from funding opportunities, application data, and peer reviewer assignments. The PRSS also converts raw peer review scores into normalized scores or tiers, which are uploaded into OJP's grants

management system for programmatic review.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals applying to serve as peer reviewers and individuals selected by DOJ to serve as peer reviewers (including members of the public or Federal Government personnel); and DOJ personnel and DOJ contractors who have access to the system as permitted and authorized by the DOJ.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records in the PRMS include an individual's name, mailing address, personal email address, telephone number, work-related information (*e.g.,* current occupation, job title, work address, email address, work address, and work history), areas of expertise, and information on any relevant lived justice-involved experience. In addition, information regarding potential peer reviewers' education level, race, cultural or ethnic identity, education, sex or gender identity, Tribal affiliation, and former incarceration (as self-reported by the potential peer reviewers) may be provided.

RECORD SOURCE CATEGORIES:

The records in the system may obtained from, among other sources, individuals applying to serve as peer reviewers, individuals selected by DOJ to serve as peer reviewers, and OJP's grants management system, which provides grant application data.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b), all or a portion of the records contained in this system of records may be disclosed as a routine use pursuant to 5 U.S.C. 552a(b)(3) under the circumstances or for the purposes described below, to the extent such disclosures are compatible with the purposes for which the information was collected:

1. Where a record, either alone or in conjunction with other information, may be relevant to investigating a violation or potential violation of law—criminal, civil, or regulatory in nature—the relevant records may be referred to the appropriate Federal, State, local, territorial, Tribal, or foreign law enforcement authority or other appropriate entity charged with the responsibility for investigating or prosecuting such violation or charged with enforcing or implementing such law.

2. To appropriate officials and employees of a Federal agency or entity to the extent necessary for making decisions about peer review assignments, such as but not limited to knowledge and skills needed to evaluate DOJ funding opportunities.

3. To any person or entity that the DOJ has reason to believe possesses knowledge regarding matters pertaining to DOJ programs and activities, to the extent deemed to be necessary by the DOJ to elicit information about the potential peer reviewer for use in conferring the DOJ peer reviewer assignments.

4. To any person or entity that the DOJ has reason to believe possesses information regarding a matter within the jurisdiction of the DOJ, to the extent deemed to be necessary by the DOJ to elicit such information or cooperation from the recipient for use in the performance of an authorized activity.

5. In an appropriate proceeding before a court, grand jury, or administrative or adjudicative body, when the DOJ determines that the records are arguably relevant to the proceeding; or in an appropriate proceeding before an administrative or adjudicative body when the adjudicator determines the records to be relevant to the proceeding.

6. To the news media and the public, including but not limited to disclosures pursuant to 28 CFR 50.2, unless it is determined that release of the specific information in the context of a particular case or matter would constitute an unwarranted invasion of personal privacy. While disclosures under 28 CFR 50.2 are in connection with a civil or criminal proceeding, disclosures under this routine use may also pertain to administrative proceedings as well as investigations of Federal employee misconduct prejudicial to the interests of members of the public.

7. To contractors, recipients, experts, consultants, students, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for the Federal Government, when necessary to accomplish an agency function related to this system of records.

8. To a former employee of the DOJ for official purposes where the DOJ requires information and/or consultation assistance from the former employee regarding a matter within that person's former area of responsibility.

9. To a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of, and at the request of, the individual who is the subject of the record.

10. To the National Archives and Records Administration for purposes of records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

11. To appropriate agencies, entities, and persons when (1) the DOJ suspects or has confirmed that there has been a breach of the system of records; (2) the DOJ has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the DOJ (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the DOJ's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

12. To another Federal agency or Federal entity, when the DOJ determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach, or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

13. To any agency, organization, or individual for the purpose of performing authorized audit or oversight operations of DOJ and meeting related reporting requirements.

14. To such recipients and under such circumstances and procedures as are mandated by Federal statute or treaty.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records in the PRMS are stored in electronic format in the OJP cloud platforms. Records are stored securely in accordance with applicable Federal laws, regulations, Department directives, and guidance.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records can be retrieved within PRMS by a peer reviewer's personal identifier to obtain profiles or other data matching the search criteria necessary for the merit review of DOJ funding opportunities.

The records are retrievable by the peer reviewer's name, employee type (other Federal agency or other), education level, job category, race, cultural and ethnic identities, subject matter expertise, research expertise, business organization, organization unit, job title,

phone number (home and business), address (home and business), and gender and sexual identities. The records are searchable and retrievable using those identifiers for diversifying the pool of reviewers needed to meet the objectives conducive to a full and fair evaluation of the relevant OJP funding opportunities.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records in this system are stored in electronic format and retained as well as disposed of in accordance with the National Archives and Records Administration, General Records Schedule 1.2, which covers grant and cooperative agreement records.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

This system meets all DOJ requirements for authorization to operate per DOJ Order 0904, Cybersecurity Program. Specifically, information in this system is maintained in accordance with applicable laws, rules, and policies on protecting individual privacy.

The system leverages cloud service providers that maintain an authority to operate in accordance with applicable laws, rules, and policies, including Federal Risk and Authorization Management Program (FedRAMP) requirements.

Backup information is maintained in accordance with a government contract that requires adherence to applicable laws, rules, and policies. Internet connections are protected by multiple firewalls. Security personnel conduct periodic vulnerability scans using DOJ-approved software to ensure security compliance and security logs are enabled for all computers to assist in troubleshooting and forensics analysis during incident investigations. Users of individual computers can only gain access to the data by a valid user's identification and authentication.

RECORD ACCESS PROCEDURES:

All requests for access to records must be in writing and should be addressed to the relevant component:

OJP FOIA Officer; Office of Justice Programs; Office of the General Counsel; 999 North Capitol Street NE, Washington, DC 20002.

The envelope and letter should be clearly marked ''Privacy Act Access Request.'' The request must describe the records sought in sufficient detail to enable DOJ personnel to locate them with a reasonable amount of effort. The request must include a general description of the records sought and must include the requester's full name, current address, and date and place of birth. The request must be signed and either notarized or submitted under penalty of perjury. Although no specific form is required, you may obtain forms for this purpose from the FOIA/Privacy Act Mail Referral Unit, United States Department of Justice, 950 Pennsylvania Avenue NW, Washington, DC 20530, or on the Department of Justice website at *https://www.justice.gov/oip/oip-request.html.*

More information regarding the DOJ's procedures for accessing records in accordance with the Privacy Act can be found at 28 CFR part 16 Subpart D, ''Protection of Privacy and Access to Individual Records Under the Privacy Act of 1974.''

CONTESTING RECORD PROCEDURES:

Individuals seeking to contest or amend records pertaining to them, maintained in this system of records, must direct their requests to the address indicated in the ''RECORD ACCESS PROCEDURES'' paragraph, above. All requests to contest or amend records must be in writing and the envelope and letter should be clearly marked ''Privacy Act Amendment Request.'' All requests must state clearly and concisely what record is being contested, the reasons for contesting it, and the proposed amendment to the record.

More information regarding the DOJ's procedures for amending or contesting records in accordance with the Privacy Act can be found at 28 CFR 16.46, ''Requests for Amendment or Correction of Records.''

NOTIFICATION PROCEDURES:

Individuals may request to be notified if a record in this system of records pertains to them by utilizing the same procedures as those identified in the ''RECORD ACCESS PROCEDURES'' paragraph, above.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

None.

BILLING CODE 4410–18–P

DEPARTMENT OF JUSTICE

[OMB 1140–0060]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Firearms Disabilities for Nonimmigrant Aliens

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 30 days until December 27, 2024.

FOR FURTHER INFORMATION CONTACT: If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact: Lindsay Babbie, EPS/FEID/FIPB, either by mail at Bureau of Alcohol, Tobacco, Firearms, and Explosives; 99 New York Ave. NE, Mail Stop 6N–518, Washington, DC 20226, by email at *Lindsay.Babbie@atf.gov,* or telephone at 202–648–7252.

SUPPLEMENTARY INFORMATION: The proposed information collection was previously published in the **Federal Register**, volume 89, page 80265, on Wednesday, October 2, 2024, allowing a 60-day comment period. Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Enhance the quality, utility, and clarity of the information to be collected; and/or

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic,

mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Written comments and recommendations for this information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/*PRAMain. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the information collection or the OMB Control Number 1140–0060. This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view Department of Justice, information collections currently under review by OMB.

DOJ seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOJ notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Overview of This Information Collection

1. *Type of Information Collection:* Revision of a previously approved collection.

2. *Title of the Form/Collection:* Firearms Disabilities for Nonimmigrant Aliens.

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* None.

Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:*

Affected Public: Individuals or households, Private Sector-for or not for profit institutions.

Abstract: The nonimmigrant alien information will be used to determine if a nonimmigrant alien is eligible to obtain a federal firearms license and purchase, obtain, possess, or import a firearm. Nonimmigrant aliens also must maintain the documents while in possession of firearms or ammunition in the United States for verification purposes. Information Collection (IC) OMB # 1140–0060 is being revised to reflect an increase in costs. The number of persons who annually submit ATF Form 6NIA has increased since this information collection was last renewed.

5. *Obligation to Respond:* As this is not a form, there is no obligation to respond.

6. *Total Estimated Number of Respondents:* 2,531 respondents.

7. *Estimated Time per Respondent:* 3 minutes and 59 seconds.

8. *Frequency:* Once annually.

9. *Total Estimated Annual Time Burden:* 168 hours.

10. *Total Estimated Annual Other Costs Burden:* $3,864.

If additional information is required, contact: Darwin Arceo, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 4W–218 Washington, DC 20530.

Dated: November 22, 2024.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

The DOJ notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Overview of This Information Collection

1. *Type of Information Collection:* Revision of a previously approved collection.

2. *Title of the Form/Collection:* National Firearms Act Division and

Firearms and Explosives Services Division Customer Service Survey.

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* None.

Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:*

Affected Public: State, local and tribal governments, individuals or households, Federal Government.

Abstract: The National Firearms Act Division and Firearms and Explosives Services Division Customer Service Survey is used to gather information about customer service provided to the firearms and explosives industry and government agencies to improve service delivery. Information Collection (IC) OMB 1140–0101 is being revised to include the NFA Division's newest branch: Information Compliance Branch.

5. *Obligation to Respond:* Voluntary.

6. *Total Estimated Number of Respondents:* 100.

7. *Estimated Time per Respondent:* 10 minutes.

8. *Frequency:* Once annually.

9. *Total Estimated Annual Time Burden:* 17 hours.

10. *Total Estimated Annual Other Costs Burden:* $0.

BILLING CODE 4410–FY–P

DEPARTMENT OF JUSTICE

[OMB Number 1110–0065]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Extension of a Previously Approved Collection; Private Industry Feedback Survey

AGENCY: Department of Justice, Federal Bureau of Investigation, Cyber Division.

ACTION: 60-Day notice.

SUMMARY: The Department of Justice (DOJ), Federal Bureau of Investigation (FBI), Cyber Division (CyD) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until January 27, 2025.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Lawrence Quigley, Unit Chief, FBI, CyD, 935 Pennsylvania Ave. NW, Washington, DC 20535; telephone: 304–367–3766, email: *lwquigley@fbi.gov.* Written comments and/or suggestions can also be sent to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention Department of Justice Desk Officer, Washington, DC 20503. Additionally, comments may be submitted via email to *OIRA_submissions@omb.eop.gov.*

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Abstract: The FBI, Cyber Division, provides a voluntary ''Feedback'' Section on reports related to cyber trends and threats for private sector partners.

Overview of this information collection:

1. *Type of Information Collection:* Extensions of a currently approved collection.

2. *The Title of the Form/Collection:* Private Industry Feedback Survey.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* N/A.

4. *Affected public who will be asked or required to respond, as well as the obligation to respond:* The FBI, Cyber Division, produces reports that provide information related to cyber trends and threats for private sector partners. The reports are referred to as Private Industry Notifications (PINs) and FBI Liaison Alert Systems (FLASHs). In order to improve the PIN/FLASH reports, a ''Feedback'' Section has been added to the reports containing a URL that links to a voluntary online survey. The results of the survey are reviewed by CyD and used to improve future reports to better serve the FBI's private sector partners.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 5,000 respondents will complete the survey. It is estimated that it takes each respondent 3 minutes to complete the survey.

6. *An estimate of the total annual burden (in hours) associated with the collection:* The estimated public burden associated with his collection is 250 hours.

7. *An estimate of the total annual cost burden associated with the collection, if applicable:* $0.

TOTAL BURDEN HOURS

Activity	Number of respondents	Frequency (annually)	Total annual responses	Time per response (min)	Total annual burden (hours)
Ex: Survey	5,000		5,000	3	250
Unduplicated Totals	5,000		5,000		250

An estimate of the total annual burden (in hours) associated with the collection: The estimated public burden associated with this collection is 250 hours.

If additional information is required contact: Darwin Arceo, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC.

Dated: November 22, 2024.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–02–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Clean Air Act

On November 21, 2024, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Western District of Pennsylvania in the lawsuit entitled *United States and Commonwealth of Pennsylvania* v. *Hilcorp Energy Company,* Civil Action No. 2:24–cv–01596 (W.D. Pa).

The lawsuit seeks injunctive relief and civil penalties for violations of the Clean Air Act and its implementing regulations at oil and natural gas production facilities owned and operated by Hilcorp Energy Company (''Hilcorp'') in Lawrence and Mercer Counties, Pennsylvania. The violations relate to alleged failures to adequately design, operate, and maintain storage tank vapor control systems, resulting in emissions of volatile organic compounds (''VOC'') and other pollutants to the atmosphere.

The proposed consent decree covers nine Hilcorp facilities in Pennsylvania. The proposed decree requires Hilcorp to perform injunctive relief, including conducting engineering evaluations of the vapor control systems at each of the controlled well pads to ensure that they are adequately sized and designed, and complete an environmental mitigation project. Hilcorp must also pay a $1,275,000 civil penalty. Entering into and fully complying with the proposed consent decree would release Hilcorp from past civil liability for violations of Clean Air Act regulations applicable to new and modified storage vessels and related state law at the facilities subject to the proposed consent decree.

The publication of this notice opens a period for public comment on the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States and Commonwealth of Pennsylvania* v. *Hilcorp Energy Company,* D.J. Ref. No. 90–5–2–1–12372. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the proposed Consent Decree may be examined and downloaded at this Justice Department website: *https://www.justice.gov/enrd/consent-decrees.* If you require assistance accessing the proposed Consent Decree, you may request assistance by email or by mail to the addresses provided above for submitting comments.

Jason A. Dunn,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 2024–27780 Filed 11–26–24; 8:45 am]

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

[OMB 1140–0050]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Identification Markings Placed on Firearms

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 30-Day Notice.

SUMMARY: The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 30 days until December 27, 2024.

FOR FURTHER INFORMATION CONTACT: If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact: Jennifer Scott, FIPB, 99 New York Avenue NE, Washington, DC 20226, either by email at *fipb-informationcollection@atf.gov* or *jennifer.scott@atf.gov* or telephone at 202–648–7190.

SUPPLEMENTARY INFORMATION: The proposed information collection was previously published in the **Federal Register**, volume 89, page 81111, on Monday, October 7, 2024, allowing a 60-day comment period. Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information,

including the validity of the methodology and assumptions used;
—Enhance the quality, utility, and clarity of the information to be collected; and/or
—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Written comments and recommendations for this information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/*PRAMain. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the information collection or the OMB Control Number 1140–0052. This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view Department of Justice, information collections currently under review by OMB.

DOJ seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOJ notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Overview of This Information Collection

1. *Type of Information Collection:* Revision of a previously approved collection.

2. *Title of the Form/Collection:* Identification Markings Placed on Firearms.

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* None. *Component:* Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract: Affected Public:* Private Sector-for or not for profit institutions. *Abstract:* Each licensed firearms manufacturer and licensed firearms importer must legibly identify each firearm by engraving, casting, stamping (impressing), or otherwise conspicuously placing on the frame or receiver an individual serial number, any associated license number, and all other additional required information to a depth of at least .003 inch and in a print size no smaller than 1/16 inch. Used to facilitate the investigations of the criminal use of firearms. Information Collection (IC) OMB #1140–0050 is being revised to reflect an increase in costs resulting from an increase in the number of respondents and firearms covered by the information collection, and from adding both a burden hour monetized value and start-up costs based on a rulemaking that occurred since the last time this collection was renewed.

5. *Obligation to Respond:* The obligation to respond is mandatory per 18 U.S.C. Chapter 44 and 26 U.S.C. § 5842.

6. *Total Estimated Number of Respondents:* 22,662 total respondents.

7. *Estimated Time per Respondent:* 1 minute.

8. *Frequency:* One per firearm.

9. *Total Estimated Annual Time Burden:* 257,419,782 hours.

10. *Total Estimated Annual Other Costs Burden:* $45,598,278.00.

If additional information is required, contact: Darwin Arceo, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 4W–218 Washington, DC 20530.

Dated: November 22, 2024.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

DOJ seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years

without renewal. The DOJ notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of a previously approved collection.

2. *Title of the Form/Collection:* Law Enforcement Suicide Data Collection.

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Criminal Justice Information Services (CJIS) Division, FBI.

4. *Affected public who will be asked or required to respond, as well as a brief abstract*:

Affected Public: Law Enforcement Agencies.

Abstract: In response to the *Law Enforcement Suicide Data Collection Act* (Title 34, United States Code, Section 50701), the FBI's Uniform Crime Reporting Program established the LESDC which is designed to gather information on occurrences of suicide and attempted suicide within the law enforcement community. The data will be used to produce a report of information surrounding these incidents which will help promote the understanding of, and elicit further discussion within society about, law enforcement suicide and attempted suicide.

5. *Obligation to Respond:* Voluntary.

6. *Total Estimated Number of Respondents:* 50 respondents.

7. *Estimated Time per Respondent:* 15 minutes.

8. *Frequency:* Annually.

9. *Total Estimated Annual Time Burden:* 15 minutes.

10. *Total Estimated Annual Other Costs Burden:* $0.

If additional information is required, contact: Darwin Arceo, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC 20530.

Dated: November 22, 2024.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–02–P

DEPARTMENT OF JUSTICE

[OMB Number 1121–0269]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Reinstatement, With Change, of a Previously Approved Collection for Which Approval Has Expired: Census of Publicly Funded Forensic Crime Laboratories (CPFFCL)

AGENCY: Bureau of Justice Statistics, Department of Justice

ACTION: 60-Day notice.

SUMMARY: The Bureau of Justice Statistics, Department of Justice (DOJ) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until January 27, 2025.

FOR FURTHER INFORMATION CONTACT: If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Matt Durose, Bureau of Justice Statistics, 999 North Capital Street NE, Washington, DC 20531 (email: *Matt.Durose@usdoj.gov;* telephone: 202–598–0295).

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether and if so, how the quality, utility, and clarity of the information to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Abstract: Since 2002, the Bureau of Justice Statistics (BJS) has periodically conducted the Census of Publicly Funded Forensic Crime Laboratories (CPFFCL) through a survey that collects data on the staffing, budgets, workloads, resources, policies, and procedures among federal, state, and local crime labs. The 2024 CPFFCL will be the sixth administration. It will provide insight on emerging issues and challenges facing crime labs since the CPFFCL was last conducted in 2020. BJS uses the information gathered in CPFFCL in published reports and statistics. The reports will be made available to the U.S. Congress, Executive Office of the President, practitioners, researchers, students, the media, others interested in criminal justice statistics, and the general public via the BJS website.

Overview of This Information Collection

1. *Type of Information Collection:* Reinstatement, with changes, of a previously approved collection for which approval has expired.

2. *Title of the Form/Collection:* 2024 Census of Publicly Funded Forensic Crime Laboratories (CPFFCL).

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* The form number is CPFFCL–24. The applicable component within the Department of Justice is the Bureau of Justice Statistics (BJS), in the Office of Justice Programs.

4. *Affected public who will be asked or required to respond, as well as the obligation to respond:* Affected public are federal, state, and local government agencies. The 2024 CPFFCL is revised from the 2020 CPFFCL. BJS plans to field the 2024 CPFFCL from February through August 2025. Respondents will be the staff at the publicly funded forensic crime labs. The obligation to respond is voluntary.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* A projected 350 respondents from individual labs and multi-lab systems will take an average of 90 minutes (1.5 hours) each to complete form CPFFCL–24, including time to research or find information not readily available. In addition, an estimated 225 respondents will be contacted for data quality follow-up at 15 minutes (.25 hours) per respondent.

6. *An estimate of the total public burden (in hours) associated with the collection:* The total burden hours for this collection is 581 hours.

7. *An estimate of the total annual cost burden associated with the collection, if applicable:* $907,183.

TOTAL BURDEN HOURS

Activity	Number of respondents	Frequency	Total annual responses	Time per response	Total annual burden (hours)
Survey	350	1	350	90 min (1.5 hrs.).	525
Data Quality Follow-Up	225	1	225	15 min (.25 hrs.).	56
Unduplicated Totals	350		300		581

If additional information is required, contact: Darwin Arceo, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC.

Dated: November 22, 2024.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–18–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Davis-Bacon Certified Payroll

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Wage and Hour Division (WHD)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before December 27, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Nora Hernandez by telephone at 202–693–8633, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: The Copeland Act requires contractors and subcontractors performing work on federally financed or assisted construction contracts to furnish weekly a statement on the wages paid each covered worker during the prior week. See 40 U.S.C. 3145; 29 CFR 3.3(b). This Copeland Act provision specifically requires the regulations to ''include a provision that each contractor and subcontractor each week must furnish a statement on the wages paid each worker during the prior week.'' This requirement is implemented by 29 CFR 3.3 and 3.4 and the standard Davis-Bacon contract clauses set forth at 29 CFR 5.5. The regulation at 29 CFR 5.5 (a)(3)(ii)(A) (''Frequency and method of submission'') requires contractors to submit weekly a copy of all payrolls to the federal agency contracting for or financing the construction project. If the agency is not a party to the contract, the contractor will submit the payrolls to the applicant, sponsor, or owner, as the case may be, for transmission to the contracting agency. This provision requires that the payrolls submitted shall set out accurately and completely information required to be maintained under 29 CFR 5.5(a)(3)(ii)(B) (''Information required'').

The information that must be included in the weekly transmittals includes the name of each covered worker; each worker's correct classification(s) of work actually performed; hourly rates of wages paid (including rates of contributions or costs anticipated for bona fide fringe benefits or cash equivalents thereof of the types described in 40 U.S.C. 3141(2)(B) of the Davis-Bacon Act); daily and weekly number of hours actually worked in total and on each covered contract; deductions made; and actual wages paid. *See* 29 CFR 5.5(a)(3)(i)(B); 29 CFR 5.5(a)(3)(ii)(B). The weekly transmittals also must include an individually identifying number for each employee (*e.g.,* the last four digits of the employee's Social Security number). *See* 29 CFR 5.5(a)(3)(ii)(B).

The provision at 29 CFR 5.5(a)(3)(ii)(B) also states what must not be included in the weekly transmittal. The weekly transmittal must not include workers' full social security numbers, last known addresses, telephone numbers, and email addresses. That information must be recorded and maintained by the contractors as part of the record-keeping provisions in the regulations at 29 CFR 5.5(a)(3)(i)(B), but it must not be included in the weekly transmittals.

The regulations at 29 CFR 5.5(a)(3)(ii)(C) and 29 CFR 3.3(b) require each contractor to furnish weekly a signed ''Statement of Compliance'' accompanying the payroll indicating the payrolls are correct and complete and that each covered worker has been paid not less than the proper Davis-Bacon Act prevailing wage rate for the work performed.

The required weekly payroll information may be submitted in any form desired. The information collection request that is the subject of this notice, Optional Form WH–347, is designed to include fields for all of the necessary information so as to satisfy the regulatory and contractual requirements. The weekly submission of a properly executed certification, with the prescribed language set forth on page 2 of Optional Form WH–347, satisfies the requirement for submission of the required ''Statement of Compliance.'' 29 CFR 5.5(a)(3)(ii)(C).

In addition to the weekly transmittal requirements, the regulations contain separate record retention requirements that require the retention of the weekly

transmittals themselves as well as a broader subset of documents and information. Regulations 29 CFR 3.4(b) and 5.5(a)(3)(ii)(G) require contractors to maintain copies of these transmitted weekly certified payrolls for three years after all the work on the prime contract is completed. The record retention provision at 29 CFR 5.5(a)(3)(i) requires contractors performing work on projects subject to the Davis-Bacon and Related Acts (DBRA) to retain the address, telephone number, email address, and social security number of each covered worker, in addition to all of the worker-specific information that must be included on the weekly certified payroll. In addition, whenever a contractor seeks to provide a portion of its required fringe benefits though an unfunded plan (as described in 29 CFR 5.5(a)(1)(v)), the contractor must maintain records showing that the commitment to provide such benefits is enforceable, that the plan or program is financially responsible, that the plan or program has been communicated in writing to the laborers or mechanics affected, and the costs anticipated or the actual cost incurred in providing such benefits. See 29 CFR 5.5(a)(3)(i)(C). Contractors employing apprentices or trainees under approved programs also must maintain written evidence of the registration of apprenticeship programs and certification of trainee programs, the registration of the apprentices and trainees, and the ratios and wage rates prescribed in the applicable programs. Id. § 5.5(a)(3)(i)(D). 29 CFR 5.5(a)(3)(iii) provides that contractors and subcontractors must maintain copies of covered contracts, subcontracts, and related documents.

The Department periodically reviews its information collection requests to ensure that they are necessary and sufficient to effectively and efficiently fulfill the Department's statutory directive to oversee and enforce the Davis-Bacon Act. Substantive edits to the WH–347 form were last made in 2011. The Department reviewed the current form WH–347 and proposed several edits. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on August 30, 2024 (89 FR 70670).

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL–WHD.

Title of Collection: Davis-Bacon Certified Payroll.

OMB Control Number: 1235–0008.

Affected Public: Businesses or other for-profits, Farms.

Total Estimated Number of Respondent: 11,310,112.

Total Estimated Number of Responses: 122,936.

Total Estimated Annual Time Burden: 10,556,105 hours.

Total Estimated Annual Other Costs Burden: $0.

(Authority: 44 U.S.C. 3507(a)(1)(D))

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Unemployment Insurance (UI) Title XII Advances and Voluntary Repayment Process

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Employment and Training Administration (ETA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before December 27, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Michael Howell by telephone at 202–693–6782, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: This information collection's purpose is to maintain a process for state governors for requesting advances and repaying advances through their correspondence with the Secretary of Labor. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on May 9, 2024 (89 FR 39648).

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years

without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2010–0055]

Recordkeeping and Reporting Occupational Injuries and Illnesses; Revision of the Office of Management and Budget's (OMB) Approval of Information Collection (Paperwork) Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for public comments.

SUMMARY: OSHA solicits public comments concerning the proposed revision to combine two separate OMB approved Recordkeeping and Reporting Occupational Injuries and Illnesses Information Collections.

DATES: Comments must be submitted (postmarked, sent, or received) by January 27, 2025.

ADDRESSES:

Electronically: You may submit comments and attachments electronically at *https://www.regulations.gov,* which is the Federal eRulemaking Portal. Follow the instructions online for submitting comments.

Docket: To read or download comments or other material in the docket, go to *https://www.regulations.gov.* Documents in the docket are listed in the *https://www.regulations.gov* index; however, some information (*e.g.,* copyrighted material) is not publicly available to read or download through the websites. All submissions, including copyrighted material, are available for inspection through the OSHA Docket Office. Contact the OSHA Docket Office at (202) 693–2350 (TTY (877) 889–5627) for assistance in locating docket submissions.

Instructions: All submissions must include the agency name and OSHA docket number (OSHA–2010–0055) for the Information Collection Request (ICR). OSHA will place all comments, including any personal information, in the public docket, which may be made available online. Therefore, OSHA cautions interested parties about submitting personal information such as social security numbers and birthdates.

For further information on submitting comments, see the ''Public Participation'' heading in the section of this notice titled **SUPPLEMENTARY INFORMATION.**

FOR FURTHER INFORMATION CONTACT: Seleda Perryman, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor; telephone (202) 693–2222.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.,* employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining information (29 U.S.C. 657).

The Agency requests a revision to incorporate the *Improve Tracking of Workplace Injuries and Illnesses* paperwork package, OMB Control Number 1218–0279, into the *Recordkeeping and Reporting Occupational Injuries and Illnesses (29 CFR part 1904)* paperwork package, OMB Control Number 1218–0176. While both paperwork packages contain information collections contained in the Recording and Reporting Occupational Injuries and Illnesses (29 CFR part 1904), a separate paperwork package for the Improve Tracking of Workplace Injuries and Illnesses rulemaking was necessary to ensure continued OMB approval of the existing information collections in the Recordkeeping and Reporting Occupational Injuries and Illnesses (29 CFR part 1904) paperwork package. The Occupational Safety and Health Act (OSH Act) and 29 CFR part 1904 prescribe that certain employers maintain records of job-related injuries and illnesses. Other employers with 100 or more employees in certain designated industries are required to submit electronically to OSHA information captured on their completed OSHA 300, 301, and 300A Forms. The injury and illness records are intended to have multiple purposes. One purpose is to provide data needed by OSHA to carry out enforcement and intervention activities to provide workers a safe and healthful work environment. Access to this data allows the Agency to more efficiently focus its enforcement and outreach resources toward establishments that are experiencing specific types of occupational injury and illness Expanded public access to establishment-specific, case-specific, injury and illness data will allow employers, employees, potential employees, employee representatives, customers, potential customers, researchers, and the general public to make informed decisions about the workplace safety and health at a given establishment, and this accessibility will ultimately result in the reduction of occupational injuries and illnesses.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and

• Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

III. Proposed Actions

OSHA is requesting a revision the currently approved collection of information requirements contained in the paperwork package for Recordkeeping and Reporting Occupational Injuries and Illnesses (29 CFR part 1904) by OMB. This revision is incorporating the collections of information contained in the paperwork package for Improve Tracking of Injuries and Illnesses, OMB Control Number 1218–0279, with the paperwork package for Recordkeeping and Reporting Occupational Injuries and Illnesses paperwork package, OMB Control Number 1218–0176. As a result, the agency is requesting a program change increase of 112,551 hours and an adjustment decrease of 5,934 hours the burden going from 2,167,111 to 2,161,177 hours.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

Type of Review: Revision of a currently approved collection.

Title: Recordkeeping and Reporting Occupational Injuries and Illnesses (29 CFR part 1904).

OMB Control Number: 1218–0176.

Affected Public: Business or other for-profits.

Number of Respondents: 1,239,687.

Number of Responses: 5,571,568.

Frequency of Responses: On occasion, Annual.

Average Time per Response: Varies.

Estimated Total Burden Hours: 2,161,177.

Estimated Cost (Operation and Maintenance): $0.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows: (1) electronically at *https://www.regulations.gov,* which is the Federal eRulemaking Portal; or (2) by facsimile (fax), if your comments, including attachments, are not longer than 10 pages you may fax them to the OSHA Docket Office at (202) 693–1648. All comments, attachments, and other material must identify the agency name and the OSHA docket number for the ICR (Docket No. OSHA–2010–0055). You may supplement electronic submission by uploading document files electronically.

Comments and submissions are posted without change at *https://www.regulations.gov.* Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and dates of birth. Although all submissions are listed in the *https://www.regulations.gov* index, some information (*e.g.,* copyrighted material) is not publicly available to read or download from this website. All submission, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the *https://www.regulations.gov* website to submit comments and access the docket is available at the website's ''User Tips'' link.

Contact the OSHA Docket Office at (202) 693–2350, (TTY (877) 889–5627) for information about materials not available from the website, and for assistance in using the internet to locate docket submissions.

V. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 *et seq.*) and Secretary of Labor's Order No. 8–2020 (85 FR 58393).

Signed at Washington, DC, on November 20, 2024.

James S. Frederick,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2024–0002]

Advisory Committee on Construction Safety and Health (ACCSH)

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for Nominations.

SUMMARY: The Acting Secretary of Labor requests nominations for membership on the Advisory Committee for Construction Safety and Health (ACCSH).

DATES: Submit nominations for ACCSH membership by January 2, 2025.

ADDRESSES:

Nominations: You must submit nominations and supporting materials, identified by Docket No. OSHA–2024–0002, electronically at *https://www.regulations.gov,* which is the Federal e-Rulemaking Portal. Follow the online instructions for submissions.

Instructions: All submissions must include the agency name and the OSHA docket number for this **Federal Register** notice (Docket No. OSHA–2024–0002). OSHA will post all submissions, including personal information, in the public docket without change, which may be made available online at *https://www.regulations.gov*. Therefore, OSHA cautions interested parties about submitting information they do not want made available to the public or submitting materials that contain personal information (either about themselves or others), such as Social Security numbers and birthdates. For further information on submitting nominations, see the ''Submission requirements'' heading in the section of this notice titled **SUPPLEMENTARY INFORMATION.**

Docket: To read or download nominations or other materials in the docket, go to *https://www.regulations.gov*. Documents in the docket are listed in the *https://www.regulations.gov* index; however, some information (*e.g.,* copyrighted material) is not publicly available to read or download through the website. All submissions, including copyrighted material, are available for inspection through the OSHA Docket Office. Contact the OSHA Docket Office at (202) 693–2350 (TTY number: (877) 889–5627) for assistance in locating docket submissions.

FOR FURTHER INFORMATION CONTACT:

For press inquiries: Mr. Frank Meilinger, Director, OSHA Office of Communications; telephone: (202) 693–1999; email: *meilinger.francis2@dol.gov*.

For general information about ACCSH and ACCSH membership: Mr. Jose Hererra, OSHA, Directorate of Construction; telephone: (202) 693–2020; email: *herrera.jose.h@dol.gov*.

Copies of this ***Federal Register*** *document:* Electronic copies of this **Federal Register** document are available at *https://www.regulations.gov*. This document, as well as news releases and other relevant information are also available on the OSHA web page at *https://www.osha.gov/*.

SUPPLEMENTARY INFORMATION: The Secretary of Labor invites interested persons to submit nominations for membership on ACCSH.

A. Background

ACCSH advises the Secretary of Labor and the Assistant Secretary of Labor for

Occupational Safety and Health (Assistant Secretary) in the formulation of standards affecting the construction industry, and on policy matters arising in the administration of the safety and health provisions under the Contract Work Hours and Safety Standards Act (Construction Safety Act (CSA)) (40 U.S.C. 3701 *et seq.*) and the Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) (see also 29 CFR 1911.10 and 1912.3). In addition, the CSA and OSHA regulations require the Assistant Secretary to consult with ACCSH before the agency proposes occupational safety and health standards affecting construction activities (40 U.S.C. 3704; 29 CFR 1911.10).

ACCSH operates in accordance with the Federal Advisory Committee Act (FACA), as amended (5 U.S.C. 1001, *et seq.*), and the implementing regulations (41 CFR 102–3 *et seq.*); and Department of Labor Manual Series Chapter 1–900 (3/25/2022). ACCSH generally meets two to four times a year.

B. ACCSH Membership

ACCSH consists of 15 members whom the Secretary appoints. ACCSH members generally serve two-year terms, unless they resign, cease to be qualified, become unable to serve, or the Secretary removes them (29 CFR 1912.3(e)). The Secretary may appoint ACCSH members to successive terms. No member of ACCSH, other than members who represent employers or employees, shall have an economic interest in any proposed rule that affects the construction industry (29 CFR 1912.6).

The categories of ACCSH membership are, and number of new members to be appointed to replace members whose terms will expire are:

- Five members who are qualified by experience and affiliation to present the viewpoint of employers in the construction industry-five employer representatives will be appointed;
- Five members who are similarly qualified to present the viewpoint of employees in the construction industry-five employee representatives will be appointed;
- Two representatives of State safety and health agencies-two representatives from a State safety and health agency will be appointed;
- Two public members, qualified by knowledge and experience to make a useful contribution to the work of ACCSH, such as those who have professional or technical experience and competence with occupational safety and health in the construction industry-two public representatives will be appointed; and
- One representative designated by the Secretary of the Department of Health and Human Services and appointed by the Secretary-no new appointment will be made.

Any interested person or organization may nominate one or more individuals for membership on ACCSH. Interested persons also are invited and encouraged to submit statements in support of nominees.

C. Submission Requirements

Nominations must include the following information:

- Nominee's contact information and current employment or position;
- Nominee's résumé or curriculum vitae, including prior membership on ACCSH and other relevant organizations and associations;
- Category of membership (employer, employee, public, State safety and health agency) that the nominee is qualified to represent;
- A summary of the background, experience, and qualifications that addresses the nominee's suitability for each of the nominated membership categories;
- Articles or other documents the nominee has authored that indicate the nominee's knowledge, experience, and expertise in occupational safety and health, particularly as it pertains to the construction industry; and
- A statement that the nominee is aware of the nomination, is willing to regularly attend and participate in ACCSH meetings and has no conflicts of interest that would preclude membership on ACCSH.

D. Member Selection

The Department of Labor is committed to equal opportunity in the workplace and seeks broad-based and diverse ACCSH membership. To the extent permitted by FACA and other laws, ACCSH membership will be consistent with achieving the greatest impact, scope, and credibility among diverse stakeholders. The diversity in such membership includes, but is not limited to, race, sex, disability, sexual orientation, and gender identity. The Secretary will select the ACCSH members on the basis of their experience, knowledge, and competence in the field of occupational safety and health, particularly as it pertains to the construction industry. Information received through this nomination process, in addition to other relevant sources of information, will assist the Secretary in making these appointments to ACCSH. The Secretary will consider individuals nominated in response to this **Federal Register** document, as well as other qualified individuals, in selecting members to ACCSH. OSHA will publish a list of ACCSH members in the **Federal Register**.

Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this notice pursuant to 29 U.S.C. 655, 40 U.S.C. 3704, Secretary of Labor's Order No. 8–2020 (85 FR 58393), 5 U.S.C. 1001, *et seq.,* and 29 CFR part 1912.

Signed at Washington, DC, on November 21, 2024.

James S. Frederick,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* December 2, 2024.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Public Proceeding(s)
III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal

Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041. Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. *See* 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)-(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

[1] *See* Docket No. RM2018–3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19–22 (Order No. 4679).

II. Public Proceeding(s)

1. *Docket No(s).:* MC2025–459 and K2025–456; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 766 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 20, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Kenneth Moeller; *Comments Due:* December 2, 2024.

2. *Docket No(s).:* MC2025–460 and K2025–457; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 473 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 20, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Kenneth Moeller; *Comments Due:* December 2, 2024.

3. *Docket No(s).:* MC2025–461 and K2025–458; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 767 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 20, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Kenneth Moeller; *Comments Due:* December 2, 2024.

4. *Docket No(s).:* MC2025–462 and K2025–459; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 768 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 20, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Jana Slovinska; *Comments Due:* December 2, 2024.

5. *Docket No(s).:* MC2025–463 and K2025–460; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 769 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 20, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Jana Slovinska; *Comments Due:* December 2, 2024.

6. *Docket No(s).:* MC2025–464 and K2025–461; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 770 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 20, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Almaroof Agoro; *Comments Due:* December 2, 2024.

7. *Docket No(s).:* MC2025–465 and K2025–462; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 474 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 20, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Almaroof Agoro; *Comments Due:* December 2, 2024.

8. *Docket No(s).:* MC2025–466 and K2025–463; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 771 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 20, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Almaroof Agoro; *Comments Due:* December 2, 2024.

III. Summary Proceeding(s)

None. *See* Section II for public proceedings.

This Notice will be published in the **Federal Register**.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Public Proceeding(s)
III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041.

[1] *See* Docket No. RM2018–3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19–22 (Order No. 4679).

Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. *See* 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)–(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

II. Public Proceeding(s)

1. *Docket No(s).:* MC2025–467 and K2025–464; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 475 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 21, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Gregory Stanton; *Comments Due:* December 3, 2024.

2. *Docket No(s).:* MC2025–468 and K2025–465; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 476 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 21, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Gregory Stanton; *Comments Due:* December 3, 2024.

3. *Docket No(s).:* MC2025–469 and K2025–466; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 477 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 21, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Gregory Stanton; *Comments Due:* December 3, 2024.

4. *Docket No(s).:* MC2025–470 and K2025–467; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 772 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 21, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Christopher Mohr; *Comments Due:* December 3, 2024.

5. *Docket No(s).:* MC2025–471 and K2025–468; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 773 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 21, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Christopher Mohr; *Comments Due:* December 3, 2024.

6. *Docket No(s).:* MC2025–472 and K2025–469; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 774 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 21, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Christopher Mohr; *Comments Due:* December 3, 2024.

7. *Docket No(s).:* MC2025–473 and K2025–470; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 775 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 21, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Katalin Clendenin; *Comments Due:* December 3, 2024.

8. *Docket No(s).:* MC2025–474 and K2025–471; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 776 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 21, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Almaroof Agoro; *Comments Due:* December 3, 2024.

9. *Docket No(s).:* MC2025–475 and K2025–472; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 777 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 21, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Almaroof Agoro; *Comments Due:* December 3, 2024.

10. *Docket No(s).:* MC2025–476 and K2025–473; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage

Contract 778 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 21, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Almaroof Agoro; *Comments Due:* December 3, 2024.

11. *Docket No(s).:* MC2025–478 and K2025–475; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 479 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 21, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Jennaca Upperman; *Comments Due:* December 3, 2024.

12. *Docket No(s).:* MC2025–479 and K2025–476; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 480 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 21, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Jennaca Upperman; *Comments Due:* December 3, 2024.

13. *Docket No(s).:* MC2025–480 and K2025–477; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 779 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 21, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Maxine Bradley; *Comments Due:* December 3, 2024.

14. *Docket No(s).:* MC2025–481 and K2025–478; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 780 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 21, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Maxine Bradley; *Comments Due:* December 3, 2024.

15. *Docket No(s).:* MC2025–482 and K2025–479; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 781 to the Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 21, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Maxine Bradley; *Comments Due:* December 3, 2024.

III. Summary Proceeding(s)

None. *See* Section II for public proceedings.

This Notice will be published in the **Federal Register**.

BILLING CODE 7710–FW–P

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

Notice of Request for Information; Downscaled Climate Projection Datasets Available To Be Considered for Use in the Sixth National Climate Assessment

AGENCY: Office of Science and Technology Policy (OSTP).

ACTION: Request for Information (RFI).

SUMMARY: With this notice, the U.S. Global Change Research Program (USGCRP) is issuing a Request for Information (RFI) on downscaled climate projection datasets for possible use in the 6th National Climate Assessment (NCA6). USGCRP will use the information submitted in response to this RFI to identify downscaled datasets that may be used by NCA6 authors at their discretion and to develop an updated data atlas for NCA6.

DATES: Comments and nominations must be submitted to the web address specified below and received on or before January 17th, 2025.

ADDRESSES: Submitted information will be accepted electronically via the USGCRP Public Contribution System: *https://contribute.globalchange.gov.* Instructions for submitting comments are available on the website.

FOR FURTHER INFORMATION CONTACT: Aaron Grade (202) 419–3488, *agrade@usgcrp.gov,* U.S. Global Change Research Program.

SUPPLEMENTARY INFORMATION: The Global Change Research Act (GCRA) of 1990 mandates that USGCRP deliver a National Climate Assessment to Congress and the President not less frequently than every four years that ''(1) integrates, evaluates, and interprets the findings of the Program; (2) analyzes the effects of global change on the natural environment, agriculture, energy production and use, land and water resources, transportation, human health and welfare, human social systems, and biological diversity; and (3) analyzes current trends in global change, both human-induced and natural, and projects major trends for the subsequent 25 to 100 years.'' One of the ways that projected changes across the United States are assessed is through the use of downscaled datasets, which are used by chapter author teams to support their understanding of the future impacts of climate change in each of the 50 states and in the U.S. territories so as to inform the assessment findings, narrative texts, and figures.

To date, five NCAs have been released. The most recent (NCA5) was released in November 2023, and can be found at *https://nca2023.globalchange.gov.* NCA6 is being developed in a way that maximizes transparency and inclusivity, offering opportunities for diverse public participation throughout the process. The production and review processes are designed to result in a report that is authoritative, timely, relevant, and policy-neutral; valued by authors and users; accessible to the widest possible audience; and fully compliant with the GCRA and federal Information Quality Act requirements.

A previous **Federal Register** Notice (*https://www.federalregister.gov/documents/2024/05/02/2024-09575/national-oceanic-and-atmospheric-administration-noaa-availability-for-public-comment-on-nca6-draft*) called for public input on themes, information for assessment, and volunteers to participate in the NCA6 development process. This RFI asks for input from the public on the availability of downscaled climate projection datasets that would advance NCA's efforts to inform decisions at more localized scales.

This voluntary request for information is intended to support USGCRP's selection, processing, aggregation, and use of downscaled data in NCA6. NCA6 is currently under development, and it is projected to be publicly released between late 2027 and early 2028. USGCRP intends to use information from this RFI to plan for the appropriate volume and methods of data processing, aggregation, and data display techniques that reflect the expected increase in breadth of downscaled datasets that could be contributed to NCA6.

Information submitted through this form will be reviewed by a federal interagency group tasked with making recommendations to report leadership for appropriate downscaled datasets for use in NCA6. The USGCRP anticipates this process will require an ongoing dialogue with the groups that provide the selected downscaled datasets and has designed it to be as flexible as possible to be inclusive, while also mindful of NCA6 requirements as a Highly Influential Scientific Assessment. Responses to this request

are strongly encouraged and will serve as a starting point for this dialogue.

Information submissions will be accepted electronically via the USGCRP Public Contribution System: *https://contribute.globalchange.gov.* Instructions for submitting technical inputs are available on the website. Submitters may enter text or upload files in response to this notice. See *https://www.globalchange.gov/nca6* for more information. While submissions to this RFI are not required, they are highly encouraged for consideration for inclusion in NCA6. If you wish to submit a downscaled data set to the NCA6 for consideration outside of this RFI, please contact Aaron Grade, *agrade@usgcrp.gov* no later than March 1, 2025.

Please note that submission in response to this RFI is entirely voluntary. More information, as well as information on asking questions beforehand, is available at *https://www.globalchange.gov/nca6.* Please also note that responses to this RFI may be made public as needed at USGCRP's discretion.

Via a questionnaire, submitters can provide the requested information on appropriate datasets that are either completed or in progress. Creation of these datasets may use statistical, dynamical, or other techniques, but are expected to be based on the latest generation of global climate models (GCMs) used in the Coupled Model Intercomparison Project—Phase 6 (CMIP6). NCA6 will prioritize the inclusion of datasets that fully encompass the entire conterminous United States and/or specialize in or incorporate U.S. regions outside of the conterminous United States (*i.e.,* Alaska, Hawai'i, U.S.-Affiliated Pacific Islands, Puerto Rico, and/or the U.S. Virgin Islands) using a consistent and peer-reviewed technique. In addition to seeking details on dataset attributes, the USGCRP Public Contribution System (*https://contribute.globalchange.gov*) includes important requirements and considerations for the NCA timeline and project management.

Given limited resources, considerations of overall fit for NCA priorities, and scientific rigor, NCA6 may not include all information submitted to through this RFI. Report leadership will make the final decision regarding datasets used in NCA6, including potentially combining information from multiple products. If a submission is identified as relevant for potential use, USGCRP will engage with the submitter to develop and format datasets and metadata for use. This process is expected to become a recurring opportunity that will accommodate the evolving science and the rapid expansion of downscaling approaches and products for future NCAs and other federal products.

Dated: November 22, 2024.

Stacy Murphy,

Deputy Chief Operations Officer/Security Officer.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101701; File No. SR–PEARL–2024–52]

Self-Regulatory Organizations; MIAX PEARL, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 402, Criteria for Underlying Securities, Exchange To Allow the Exchange To List and Trade Options on the iShares Bitcoin Trust (the ''Trust'')

November 21, 2024.

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 18, 2024, MIAX PEARL, LLC (''MIAX Pearl'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend Exchange Rule 402, Criteria for Underlying Securities.

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-equities/pearl-equities/rule-filings,* at MIAX Pearl's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Exchange Rule 402, Criteria for Underlying Securities,[3] to allow the Exchange to list and trade options on the iShares Bitcoin Trust (the ''Trust''), designating the Trust as appropriate for options trading on the Exchange.[4] This is a competitive filing based on a similar proposal submitted by Nasdaq ISE, LLC (''ISE'') and approved by the Securities and Exchange Commission (''Commission'').[5]

Current Exchange Rule 402(i)(4) provides that securities deemed appropriate for options trading include shares or other securities (''Exchange Traded Fund Shares'') that are traded on a national securities exchange and are defined as ''NMS stock'' under Rule 600 of Regulation NMS, and that meet specified criteria enumerated in the rule. Sub Section 4 of Exchange Rule 402(i) provides that such shares or other securities:

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The Exchange notes that its affiliate exchanges, MIAX Options and MIAX Sapphire, submitted substantively identical proposals. The Exchange notes that all the rules of Chapter III of the MIAX Options Exchange, including Rules 307 and 309, are incorporated by reference to MIAX Pearl and MIAX Sapphire. The Exchange also notes that all of the rules of Chapter III of the MIAX Options Exchange, including Rules 307 and 309, and the rules of Chapter IV of the MIAX Options Exchange, including Rule 402, are incorporated by reference to MIAX Emerald.

[4] On January 10, 2024, the Commission approved proposals by NYSE Arca, Inc., The Nasdaq Stock Market LLC, and Cboe BZX Exchange, Inc. to list and trade the shares of 11 bitcoin-based commodity-based trust shares and trust units, including the iShares Bitcoin Trust. *See* Securities Exchange Act Release No. 99306 (Jan. 10, 2024), 89 FR 3008 (Jan. 17, 2024) (order approving File Nos. SR–NYSEARCA–2021–90; SR–NYSEARCA–2023–44; SR–NYSEARCA–2023–58; SR–NASDAQ–2023–016; SR–NASDAQ–2023–019; SR–CboeBZX–2023–028; SR–CboeBZX–2023–038; SR–CboeBZX–2023–040; SR–CboeBZX–2023–042; SR–CboeBZX–2023–044; SR–CboeBZX–2023–072) (''Bitcoin ETP Order'').

[5] *See* Securities Exchange Act Release No. 101128 (September 20, 2024), 89 FR 78942 (September 26, 2024) (SR–ISE–2024–03) (Self-Regulatory Organizations; Nasdaq ISE, LLC; Notice of Filing of Amendment Nos. 4 and 5 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 1, 4, and 5, to Permit the Listing and Trading of Options on the iShares Bitcoin Trust).

(4) are issued by the SPDR® Gold Trust or the iShares COMEX Gold Trust or the iShares Silver Trust or the ETFS Silver Trust or the ETFS Gold Trust or the ETFS Palladium Trust or the ETFS Platinum Trust or the Sprott Physical Gold Trust; or

In addition, the underlying securities and Exchange Rule 402i, including the commodity based trusts in Exchange Rule 402(i)(4), must meet the requirements of Exchange Rule 402(i), Sections i(5)(i)(A) or (B).

Proposal

The Exchange proposes to amend Exchange Rule 402(i)(4) to expand the list of securities that are appropriate for options trading on the Exchange .

Description of the Trust [6]

The shares are issued by the Trust, a Delaware statutory trust. The Trust operates pursuant to a trust agreement (the ''Trust Agreement'') between the Sponsor, BlackRock Fund Advisors (the ''Trustee'') as the trustee of the Trust and Wilmington Trust, National Association, as Delaware trustee. The Trust issues shares representing fractional undivided beneficial interests in its net assets. The assets of the Trust consist only of bitcoin, held by a custodian on behalf of the Trust except under limited circumstances when transferred through the Trust's prime broker temporarily (described below), and cash. Coinbase Custody Trust Company, LLC (the ''Bitcoin Custodian'') is the custodian for the Trust's bitcoin holdings, and maintains a custody account for the Trust (''Custody Account''); Coinbase, Inc. (the ''Prime Execution Agent''), an affiliate of the Bitcoin Custodian, is the prime broker for the Trust and maintains a trading account for the Trust (''Trading Account''); and Bank of New York Mellon is the custodian for the Trust's cash holdings (the ''Cash Custodian'' and together with the Bitcoin Custodian, the ''Custodians'') and the administrator of the Trust (the ''Trust Administrator''). Under the Trust Agreement, the Trustee may delegate all or a portion of its duties to any agent, and has delegated the bulk of the day to day responsibilities to the Trust Administrator and certain other administrative and record-keeping functions to its affiliates and other agents. The Trust is not an investment company registered under the Investment Company Act of 1940, as amended.

The investment objective of the Trust is to reflect generally the performance of the price of bitcoin. The Trust seeks to reflect such performance before payment of the Trust's expenses and liabilities. The shares are intended to constitute a simple means of making an investment similar to an investment in bitcoin through the public securities market rather than by acquiring, holding and trading bitcoin directly on a peer-to-peer or other basis or via a digital asset exchange. The shares have been designed to remove the obstacles represented by the complexities and operational burdens involved in a direct investment in bitcoin, while at the same time having an intrinsic value that reflects, at any given time, the investment exposure to the bitcoin owned by the Trust at such time, less the Trust's expenses and liabilities. Although the shares are not the exact equivalent of a direct investment in bitcoin, they provide investors with an alternative method of achieving investment exposure to bitcoin through the public securities market, which may be more familiar to them.

Custody of the Trust's Bitcoin

An investment in the shares is backed by bitcoin held by the Bitcoin Custodian on behalf of the Trust. All of the Trust's bitcoin will be held in the Custody Account, other than the Trust's bitcoin which is temporarily maintained in the Trading Account under limited circumstances, *i.e.,* in connection with creation and redemption Basket [7] activity or sales of bitcoin deducted from the Trust's holdings in payment of Trust expenses or the Sponsor's fee (or, in extraordinary circumstances, upon liquidation of the Trust). The Custody Account includes all of the Trust's bitcoin held at the Bitcoin Custodian, but does not include the Trust's bitcoin temporarily maintained at the Prime Execution Agent in the Trading Account from time to time. The Bitcoin Custodian will keep all of the private keys associated with the Trust's bitcoin held in the Custody Account in ''cold storage''.[8] The hardware, software, systems, and procedures of the Bitcoin Custodian may not be available or cost-effective for many investors to access directly.

The Exchange believes that offering options on the Trust will benefit investors by providing them with an additional, relatively lower cost investing tool to gain exposure to spot Bitcoin as well as a hedging vehicle to meet their investment needs in connection with Bitcoin products and positions. Similar to other commodity-based trusts on which options may be listed on the Exchange (*e.g.,* SPDR® Gold Trust, the iShares COMEX Gold Trust, the iShares Silver Trust, or the ETFS Gold Trust),[9] the Trust essentially offers the same objectives and benefits to investors as do other commodity-based trusts on which options may be listed on the Exchange.

Options on the Trust will trade in the same manner as options on other ETFs on the Exchange. Exchange Rules that currently apply to the listing and trading of all options on ETFs on the Exchange, including, for example, Rules that govern listing criteria, expirations, exercise prices, minimum increments, position and exercise limits (including as proposed in the filing submitted by Exchange's affiliate, MIAX Options filing), margin requirements, customer accounts and trading halt procedures, will apply to the listing and trading of options on the Trust on the Exchange. Today, these rules apply to options on the various commodities-based trusts deemed appropriate for options trading on the Exchange pursuant to Exchange Rule 402(i)(4).

The Exchange's initial listing standards for ETFs on which options may be listed and traded on the Exchange will apply to the Trust. Pursuant to Exchange Rule 402(a), a security (which includes ETFs) on which options may be listed and traded on the Exchange must be duly registered (with the Commission) and be an NMS stock (as defined in Rule 600 of Regulation NMS under the Act,) and be characterized by a substantial number of outstanding shares that are widely held and actively traded. Exchange Rule 402(i) requires that, in relevant part, ETFs must either (1) meet the criteria and standards set forth in Exchange Rule 402(a) or Exchange Rule 402(b), or (2) be available for creation or redemption each business day from or

[6] *See* Securities Exchange Act Release No. 99306 (Jan. 10, 2024), 89 FR 3008 (Jan. 17, 2024) (order approving File Nos. SR–NYSEARCA–2021–90; SR–NYSEARCA–2023–44; SR–NYSEARCA–2023–58; SR–NASDAQ–2023–016; SR–NASDAQ–2023–019; SR–CboeBZX–2023–028; SR–CboeBZX–2023–038; SR–CboeBZX–2023–040; SR–CboeBZX–2023–042; SR–CboeBZX–2023–044; SR–CboeBZX–2023–072)(Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, To List and Trade Bitcoin-Based Commodity-Based Trust Shares and Trust Units) for a complete description of the Trust.

[7] The Trust issues and redeems Shares only in blocks of 40,000 or integral multiples thereof. A block of 40,000 Shares is called a ''Basket.'' These transactions take place in exchange for Bitcoin.

[8] The term ''cold storage'' refers to a safeguarding method by which the private keys corresponding to the Trust's bitcoins are generated and stored in an offline manner, subject to layers of procedures designed to enhance security. Private keys are generated by the Bitcoin Custodian in offline computers that are not connected to the internet so that they are more resistant to being hacked.

[9] *See* Exchange Rule 402(i)(4).

through the issuer in cash or in kind at a price related to net asset value, and the issuer must be obligated to issue ETFs in a specified aggregate number even if some or all of the investment assets required to be deposited have not been received by the issuer, subject to the condition that the person obligated to deposit the investments has undertaken to deliver the investment assets as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to the issuer, as provided in the respective prospectus.

Options on the Trust will also be subject to the Exchange's continued listing standards set forth in Exchange Rule 403(g), for ETFs deemed appropriate for options trading pursuant to Exchange Rule 402(i). Specifically, Exchange Rule 403(g) provides that ETFs that were initially approved for options trading pursuant to Exchange Rule 402(i) shall be deemed not to meet the requirements for continued approval, and the Exchange shall not open for trading any additional series of option contracts of the class covering that such ETFs, if the ETFs are delisted from trading pursuant to Exchange Rule 403(b)(4), are halted or suspended from trading in their primary market. Additionally, options on ETFs may be subject to the suspension of opening transactions in any of the following circumstances: (1) in the case of options covering ETFs approved for trading under Exchange Rule 402(i)(5)(i)(A), in accordance with the terms of paragraphs (b)(1), (2), and (3) of Exchange Rule 403; (2) in the case of options covering ETFs approved for trading under Exchange Rule 402(i)(5)(i)(B), following the initial twelve-month period beginning upon the commencement of trading in the ETFs on a national securities exchange and are defined as an NMS stock, there are fewer than 50 record and/or beneficial holders of such ETFs for 30 or more consecutive trading days; (3) the value of the index or portfolio of securities, non-U.S. currency, or portfolio of commodities including commodity futures contracts, options on commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or financial instruments and money market instruments on which the ETFs are based is no longer calculated or available; or (4) such other event shall occur or condition exist that in the opinion of the Exchange makes further dealing in such options on the Exchange inadvisable.

Options on the Trust would be physically settled contracts with American-style exercise.[10] Consistent with current Exchange Rule 404, which governs the opening of options series on a specific underlying security (including ETFs), the Exchange will open at least one expiration month for options on the Trust [11] and may also list series of options on the Trust for trading on a weekly,[12] monthly,[13] or quarterly [14] basis. The Exchange may also list long-term equity option series (''LEAPS'') that expire from 12 to 39 months from the time they are listed.[15]

Pursuant to Exchange Rule 404, Interpretation and Policy .06, which governs strike prices of series of options on ETFs, the interval between strike prices of series of options on ETFs approved for options trading pursuant to Exchange Rule 402(i) shall be fixed at a price per share which is reasonably close to the price per share at which the underlying security is traded in the primary market at or about the same time such series of options is first open for trading on the Exchange, or at such intervals as may have been established on another options exchange prior to the initiation of trading on the Exchange. With respect to the Short Term Options Series or Weekly Program, during the month prior to expiration of an option class that is selected for the Short Term Option Series Program, the strike price intervals for the related non-Short Term Option (''Related non-Short Term Option'') shall be the same as the strike price intervals for the Short Term Option.[16] Specifically, the Exchange may open for trading Short Term Option Series at strike price intervals of (i) $0.50 or greater where the strike price is less than $100, and $1 or greater where the strike price is between $100 and $150 for all option classes that participate in the Short Term Options Series Program; (ii) $0.50 for option classes that trade in one dollar increments and are in the Short Term Option Series Program; or (iii) $2.50 or greater where the strike price is above $150.[17] Additionally, the Exchange may list series of options pursuant to the $1 Strike Price Interval Program,[18] the $0.50 Strike Program,[19] and the $2.50 Strike Price Program.[20] Pursuant to Exchange Rule 510, where the price of a series of options for the Trust is less than $3.00, the minimum increment will be $0.05, and where the price is $3.00 or higher, the minimum increment will be $0.10 [21] consistent with the minimum increments for options on other ETFs listed on the Exchange. Any and all new series of Trust options that the Exchange lists will be consistent and comply with the expirations, strike prices, and minimum increments set forth in Rules 404 and 510, as applicable.

Position and exercise limits for options on ETFs, including options on the Trust, are determined pursuant to the Exchange's affiliate MIAX Options Rules 307 and 309, respectively. Position and exercise limits for ETF options vary according to the number of outstanding shares and the trading volumes of the underlying ETF over the past six months, where the largest in capitalization and the most frequently traded ETFs have an option position and exercise limit of 250,000 contracts (with adjustments for splits, re-capitalizations, etc.) on the same side of the market; and smaller capitalization ETFs have position and exercise limits of 200,000, 75,000, 50,000 or 25,000 contracts (with adjustments for splits, re-capitalizations, etc.) on the same side of the market. The Exchange further notes that the Exchange's affiliate MIAX

[10] *See* Exchange Rule 401, which provides that the rights and obligations of holders and writers are set forth in the Rules of the Options Clearing Corporation (''OCC''); *see also* OCC Rules, Chapters VIII (which governs exercise and assignment) and Chapter IX (which governs the discharge of delivery and payment obligations arising out of the exercise of physically settled stock option contracts).

[11] *See* Exchange Rule 404(b). The monthly expirations are subject to certain listing criteria for underlying securities described within Exchange Rule 404 and its Interpretations and Policies. Monthly listings expire the third Friday of the month. The term ''expiration date'' (unless separately defined elsewhere in the OCC By-Laws), when used in respect of an option contract (subject to certain exceptions), means the third Friday of the expiration month of such option contract, or if such Friday is a day on which the exchange on which such option is listed is not open for business, the preceding day on which such exchange is open for business. *See* OCC By-Laws Article I, Section 1. Pursuant to Exchange Rule 404(c), additional series of options of the same class may be opened for trading on the Exchange when the Exchange deems it necessary to maintain an orderly market, to meet customer demand or when the market price of the underlying stock moves more than five strike prices from the initial exercise price or prices. Pursuant to Exchange Rule 404(e), new series of options on an individual stock may be added until the beginning of the month in which the options contract will expire. Due to unusual market conditions, the Exchange, in its discretion, may add a new series of options on an individual stock until the close of trading on the business day prior to expiration.

[20] *See* Exchange Rule 404(f).

[21] *See* Exchange Rule 510.

Options Rule 1502, which governs margin requirements applicable to trading on the Exchange, including options on ETFs, will also apply to the trading of the Trust options. Notwithstanding the position limits in the Exchange's affiliate MIAX Options Rule 307(d) and exercise limits in the Exchange's affiliate MIAX Options Rule 309, the Exchange proposes the position and exercise limits for the options on the Trust to be 25,000 contracts on the same side pursuant to proposed Supplementary Material .01 to the Exchange's affiliate MIAX Options Rule 307 and proposed Supplementary Material .01 to the Exchange's affiliate MIAX Options Rule 309.

The Exchange represents that the same surveillance procedures applicable to all other options on other ETFs currently listed and traded on the Exchange will apply to options on the Trust. Also the Exchange represents that it has the necessary systems capacity to support the new option series. The Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading options on ETFs, including the proposed Trust options.

Today, the Exchange has an adequate surveillance program in place for options. The Exchange intends to apply those same program procedures to options on the Trust that it applies to the Exchange's other options products.[22] The Exchange's staff will have access to the surveillance programs conducted by its affiliate exchanges, MIAX Options and MIAX Sapphire with respect to trading in the shares of the underlying Trust when conducting surveillances for market abuse or manipulation in the options on the Trust. Additionally, the Exchange is a member of the Intermarket Surveillance Group (''ISG'') under the Intermarket Surveillance Group Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. In addition to obtaining surveillance data from MIAX Options and MIAX Sapphire, the Exchange will be able to obtain information regarding trading in the shares of the underlying Trust from Nasdaq, LLC and other markets through ISG. In addition, the Exchange has a Regulatory Services Agreement with the Financial Industry Regulatory Authority (''FINRA''). Pursuant to a multi-party 17d–2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillance that are common to rules of all options exchanges.[23]

The underlying shares of spot bitcoin ETPs, including the Trust, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in Bitcoin ETP Order:

Each Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market.[24]

The Exchange states that, given the consistently high correlation between the CME bitcoin futures market and the spot bitcoin market, as confirmed by the Commission through robust correlation analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be ''expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Bitcoin ETPs].'' [25]

In light of surveillance measures related to both options and futures as well as the underlying Trust,[26] the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Trust. Further, the Exchange represents that it will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on the Trust.

The Exchange has also analyzed its capacity and represents that it believes the Exchange and Options Price Reporting Authority or ''OPRA'' have the necessary systems capacity to handle the additional traffic associated with the listing of new series that may result from the introduction of options on the Trust up to the number of expirations currently permissible under the Rules. Because the proposal is limited to one class, the Exchange believes any additional traffic that may be generated from the introduction of the Trust options will be manageable. Finally, the Exchange proposes a technical amendment to Exchange Rule 402(i)(4) to amend the name ''ETFS Gold Trust'' to ''Aberdeen Standard Physical Gold Trust.'' In 2018 ETFS Gold Trust was renamed.[27] At this time, the Exchange proposes to amend the name of the ETF to reflect its current name.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[28] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [29] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section (6)(b)(5) [30] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes that the proposal to list and trade options on the Trust will remove impediments to and perfect the mechanism of a free and open market

[22] The surveillance program includes real-time patterns for price and volume movements and post-trade surveillance patterns (*e.g.,* spoofing, marking the close, pinging, phishing).

[23] Section 19(g)(1) of the Act, among other things, requires every SRO registered as a national securities exchange or national securities association to comply with the Act, the rules and regulations thereunder, and the SRO's own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d–2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO (''common members''). Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

[29] 15 U.S.C. 78f(b)(5).

[30] *Id.*

and a national market system and, in general, protect investors because offering options on the Trust will provide investors with a greater opportunity to realize the benefits of utilizing options on an ETF based on spot bitcoin, including cost efficiencies and increased hedging strategies. The Exchange believes that offering options on a competitively priced ETF based on spot bitcoin will benefit investors by providing them with an additional, relatively lower-cost risk management tool, allowing them to manage, more easily, their positions and associated risks in their portfolios in connection with exposure to spot bitcoin. Today, the Exchange lists options on other commodity ETFs structured as a trust, which essentially offer the same objectives and benefits to investors, and for which the Exchange has not identified any issues with the continued listing and trading of options on those ETFs.

The Exchange also believes the proposal to permit options on the Trust will remove impediments to and perfect the mechanism of a free and open market and a national market system, because options on the Trust will comply with current Exchange Rules. Options on the Trust must satisfy the initial listing standards and continued listing standards currently in the Exchange Rules, applicable to options on all ETFs, including options on other commodity ETFs already deemed appropriate for options trading on the Exchange pursuant to Exchange Rule 402(i)(4). Further, Exchange Rules that currently govern the listing and trading of options on ETFs, including permissible expirations, strike prices, minimum increments, position and exercise limits (including as proposed in the filing submitted by Exchange's affiliate, MIAX Options), and margin requirements, will govern the listing and trading of options on the Trust. The proposed position and exercise limits for options on the Trust is 25,000 contracts. These position and exercise limits are the lowest position and exercise limits available in the options industry, are extremely conservative and more than appropriate given the Trust's market capitalization, average daily volume, and high number of outstanding shares. The proposed position limit, and exercise limit, is consistent with the Act as it addresses concerns related to manipulation and protection of investors because the position limit (and exercise limit) is extremely conservative and more than appropriate given the Trust is actively traded.

The Exchange represents that it has the necessary systems capacity to support options on the Trust. The Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading options on ETFs, including the Trust options. Today, the Exchange has an adequate surveillance program in place for options. The Exchange intends to apply those same program procedures to options on the Trust that it applies to the Exchange's other options products.[31] The Exchange's staff will have access to the surveillance programs conducted by its affiliate exchanges, MIAX Options and MIAX Sapphire with respect to the underlying Trust when conducting surveillances for market abuse or manipulation in the options on the Trust. The Exchange will review activity in the underlying Trust when conducting surveillances for market abuse or manipulation in the options on the Trust. Additionally, the Exchange is a member of the ISG under the Intermarket Surveillance Group Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. In addition to obtaining surveillance data from MIAX Options and MIAX Sapphire, the Exchange will be able to obtain information from ISE and other markets through ISG. In addition, the Exchange has a Regulatory Services Agreement with FINRA. Pursuant to a multi-party 17d–2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillance that are common to rules of all options exchanges.[32]

The underlying shares of spot bitcoin ETPs, including the Trust, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in Bitcoin ETP Order:

Each Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market.[33]

The Exchange states that, given the consistently high correlation between the CME bitcoin futures market and the spot bitcoin market, as confirmed by the Commission through robust correlation analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be ''expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Bitcoin ETPs].'' [34]

In light of surveillance measures related to both options and futures as well as the underlying Trust,[35] the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Trust. Further, the Exchange represents that it will implement any new surveillance procedures it deems necessary to effectively monitor the trading of options on the Trust.

Finally, the Commission has previously approved the listing and trading of options on other commodity ETFs structured as a trust, such as SPDR® Gold Trust,[36] the iShares COMEX Gold Trust [37] the iShares Silver

[31] The surveillance program includes real-time patterns for price and volume movements and post-trade surveillance patterns (*e.g.,* spoofing, marking the close, pinging, phishing).

[32] Section 19(g)(1) of the Act, among other things, requires every SRO registered as a national securities exchange or national securities association to comply with the Act, the rules and regulations thereunder, and the SRO's own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d–2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO (''common members''). Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

[36] *See* Securities Exchange Act Release No. 57897 (May 30, 2008), 73 FR 32061 (June 5, 2008) (SR–Amex–2008–15; SR–CBOE–2005–11; SR–ISE–2008–12; SR–NYSEArca–2008–52; and SRPhlx–2008–17) (Order Granting Approval of a Proposed Rule Change, as Modified, and Notice of Filing and Order Granting Accelerated Approval of Proposed Rule Changes, as Modified, Relating to Listing and Trading Options on the SPDR Gold Trust).

[37] *See* Securities Exchange Act Release No. 59055 (December 4, 2008), 73 FR 75148 (December 10, 2008) (SR–Amex–2008–68; SR–BSE–2008–51; SR–CBOE–2008–72; SR–ISE–2008–58; SRNYSEArca–2008–66; and SR–Phlx–2008–58) (Notice of Filing and Order Granting Accelerated Approval of Proposed Rule Changes Relating to the Listing and Trading Options on Shares of the iShares COMEX Gold Trust and the iShares Silver Trust).

Trust,[38] the ETFS Gold Trust,[39] and the ETFS Silver Trust.[40]

Further, the Exchange's proposal to amend the name ''ETFS Gold Trust'' to ''Aberdeen Standard Physical Gold Trust'' in Exchange Rule 402(i)(4) is consistent with the Act and the protection of investors as this amendment reflects the current name of this product.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. In this regard and as indicated above, the Exchange notes that the rule change is being proposed as a competitive response to filings submitted by ISE.[41]

The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act as options on the Trust will be subject to initial listing standards and continued listing standards the same as other options on ETFs listed on the Exchange. Further, options on the Trust will be subject to Exchange Rules that currently govern the listing and trading of options on ETFs, including permissible expirations, strike prices, minimum increments, position and exercise limits (including as proposed in the filing submitted by Exchange's affiliate, MIAX Options), and margin requirements. Options on the Trust will be equally available to all market participants who wish to trade such options. Also, and as stated above, the Exchange already lists options on other commodity ETFs structured as a trust.

The Exchange does not believe that the proposal to list to list and trade options on the Trust will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the extent that permitting options on the Trust to trade on the Exchange may make the Exchange a more attractive marketplace to market participants, such market participants are free to elect to become market participants on the Exchange. Additionally, other options exchanges are free to amend their listing rules, as applicable, to permit them to list and trade options on the Trust. The Exchange believes that the proposed rule change may relieve any burden on, or otherwise promote, competition as it is designed to increase competition for order flow on the Exchange in a manner that is beneficial to investors by providing them with a lower-cost option to hedge their investment portfolios. The Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues that offer similar products. Ultimately, the Exchange believes that offering options on the Trust for trading on the Exchange will promote competition by providing investors with an additional, relatively low-cost means to hedge their portfolios and meet their investment needs in connection with spot bitcoin prices and bitcoin related products and positions.

Finally, the Exchange's proposal to amend the name ''ETFS Gold Trust'' to ''Aberdeen Standard Physical Gold Trust'' in Exchange Rule 402(i)(4) does not impose an undue burden on competition as this amendment reflects the current name of this product.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[42] and Rule 19b–4(f)(6) thereunder.[43] Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[44] and subparagraph (f)(6) of Rule 19b–4 thereunder.[45]

A proposed rule change filed under Rule 19b–4(f)(6)[46] under the Act does not normally become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[47] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission previously approved the listing of options on iShares Bitcoin Trust.[48] The Exchange has provided information regarding the underlying iShares Bitcoin Trust, including, among other things, information regarding trading volume, the number of beneficial holders, and the market capitalization of the iShares Bitcoin Trust. The proposal also establishes position and exercise limits for options on the iShares Bitcoin Trust and provides information regarding the surveillance procedures that will apply to iShares Bitcoin Trust options. The Commission believes that waiver of the operative delay could benefit investors by providing an additional venue for trading iShares Bitcoin Trust options. Therefore, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.[49]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

[44] 15 U.S.C. 78s(b)(3)(A)(iii).

[45] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[46] 17 CFR 240.19b–4(f)(6).

[47] 17 CFR 240.19b–4(f)(6)(iii).

[48] *See* Securities Exchange Act Release No. 101128 (September 20, 2024), 89 FR 78942 (September 26, 2024) (SR–ISE–2024–03) (Self-Regulatory Organizations; Nasdaq ISE, LLC; Notice of Filing of Amendment Nos. 4 and 5 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 1, 4, and 5, to Permit the Listing and Trading of Options on the iShares Bitcoin Trust).

[49] For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–PEARL–2024–52 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–PEARL–2024–52. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–PEARL–2024–52 and should be submitted on or before December 18, 2024.

[50] 17 CFR 200.30–3(a)(12).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[50]

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101689; File No. SR–BX–2024–049]

Self-Regulatory Organizations; Nasdaq BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Fees for Connectivity and Co-Location Services

November 21, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 18, 2024, Nasdaq BX, Inc. (''BX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's fees for connectivity and co-location services, as described further below.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/bx/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend the Exchange's fees relating to connectivity and co-location services.[3] Specifically, the Exchange proposes a one-time adjustment to raise its fees for connectivity and co-location services in General 8, fees assessed for remote multi-cast ITCH (''MITCH'') Wave Ports in Equity 7, Section 115, and certain fees related to Nasdaq Testing Facilities in Equity 7, Section 130 by 10%, with certain exceptions.

General 8, Section 1 includes the Exchange's fees that relate to connectivity, including fees for cabinets, external telco/inter-cabinet connectivity fees, fees for connectivity to the Exchange, fees for connectivity to third party services, fees for market data connectivity, fees for cabinet power install, and fees for additional charges and services. General 8, Section 2 includes the Exchange's fees for direct connectivity services, including fees for direct circuit connection to the Exchange, fees for direct circuit connection to third party services, and fees for point of presence connectivity. With the exceptions of the Exchange's GPS Antenna fees and the Cabinet Proximity Option Fee for cabinets with power density >10kW,[4] the Exchange proposes to increase its fees throughout General 8 by 10%.

In addition to increasing fees in General 8, the Exchange also proposes

[3] The Exchange initially filed the proposed pricing change on March 1, 2024 (SR–BX–2024–008). On April 29, 2024, the Exchange withdrew that filing and submitted SR–BX–2024–014. The Exchange withdrew BX–2024–14 and replaced it with SR–BX–2024–20. The Exchange withdrew SR–BX–2024–020 and replaced it with SR–BX–2024–033 on September 10, 2024. On October 11, 2024, the Exchange replaced SR–BX–2024–033 with SR–BX–2024–042. On November 08, 2024, the Exchange replaced SR–BX–2024–042 with SR–BX–2024–046. The instant filing replaces SR–BX–2024–046.

[4] The Exchange proposes to exclude the GPS Antenna fees from the proposed fee increase because, unlike the other fees in General 8, the Exchange recently increased its GPS Antenna fees. *See* Securities Exchange Act Release No. 34–99124 (December 8, 2023), 88 FR 86715 (December 14, 2023) (SR–BX–2023–033). The Exchange also proposes to exclude the Cabinet Proximity Option Fee for cabinets with power density >10kW from the proposed fee increase because the Exchange recently established such fee. *See* Securities Exchange Act Release No. 34–100195 (May 21, 2024), 89 FR 46180 (May 28, 2024) (SR–BX–2024–017). Similarly, the Exchange proposes to exclude from the proposed fee increase those fees that the Exchange recently established for services in its new NY11–4 expansion facility. *See* Securities Exchange Act Release No. 34–101265 (October 7, 2024), 89 FR 82663 (October 11, 2024) (SR–BX–2024–037).

to increase certain fees in Equity 7. First, the Exchange proposes to increase the installation and recurring monthly fees assessed for remote MITCH Wave Ports [5] in Equity 7, Section 115(g)(1) by 10%. In addition, the Exchange proposes to increase certain fees in Section 130(d), which relate to the Nasdaq Testing Facility. Equity 7, Section 130(d)(1)(C) provides that subscribers to the Nasdaq Testing Facility (''NTF'') located in Carteret, New Jersey shall pay a fee of $1,000 per hand-off, per month for connection to the NTF. The hand-off fee includes either a 1Gb or 10Gb switch port and a cross connect to the NTF. In addition, Equity 7, Section 130(d)(1)(C) provides that subscribers shall also pay a one-time installation fee of $1,000 per hand-off. The Exchange proposes to increase these aforementioned fees by 10% to require that subscribers to the NTF shall pay a fee of $1,100 per hand-off, per month for connection to the NTF and a one-time installation fee of $1,100 per hand-off.

The proposed increases in fees would enable the Exchange to maintain and improve its market technology and services to remain competitive with its peers. Over the years, customer demand for more sophisticated, higher-throughput, lower-latency, and higher-power connectivity solutions has increased. The Exchange continues to invest in maintaining, improving, and enhancing its connectivity and co-location products, services, and facilities—for the benefit and often at the behest of its customers. Such enhancements include refreshing hardware and expanding Nasdaq's existing co-location facility to offer customers additional space and power. Nevertheless, and with the exception of fees that were established as part of a new service in 2017 (and have remained unchanged since their adoption), the Exchange has not increased any of the fees included in the proposal since prior to 2017, and many of the fees date back to between 2010 and 2014. For each of the connectivity products and services that pre-date 2017, inflation (as measured using the ''Data PPI'' metric described below) has been between roughly 15–17%, and in no instance has such inflation been less than 10%. Nevertheless, the Exchange proposes to increase its fees only with respect to the 10% inflation that has occurred since 2017.

As discussed below, the Exchange proposes to adjust its fees by an industry- and product-specific inflationary measure. It is reasonable and consistent with the Act for the Exchange to recoup its investments, at least in part, by adjusting its fees. Continuing to operate at fees frozen at 2010–2017 levels impacts the Exchange's ability to enhance its offerings and the interests of market participants and investors.

The fee increases the Exchange proposes are based on an industry-specific Producer Price Index (''PPI''), which is a tailored measure of inflation.[6] As a general matter, the Producer Price Index is a family of indexes that measures the average change over time in selling prices received by domestic producers of goods and services. PPI measures price change from the perspective of the seller. This contrasts with other metrics, such as the Consumer Price Index (''CPI''), that measure price change from the purchaser's perspective.[7] About 10,000 PPIs for individual products and groups of products are tracked and released each month.[8] PPIs are available for the output of nearly all industries in the goods-producing sectors of the U.S. economy—mining, manufacturing, agriculture, fishing, and forestry—as well as natural gas, electricity, and construction, among others. The PPI program covers approximately 69 percent of the service sector's output, as measured by revenue reported in the 2017 Economic Census.

For purposes of this proposal, the relevant industry-specific PPI is the Data Processing and Related Services PPI (''Data PPI''), which is an industry net-output PPI that measures the average change in selling prices received by companies that provide data processing services.

The Data PPI was introduced in January 2002 by the Bureau of Labor Statistics (''BLS'') as part of an ongoing effort to expand Producer Price Index coverage of the services sector of the U.S. economy and is identified as NAICS—518210 in the North American Industry Classification System.[9] According to the BLS ''[t]he primary output of NAICS 518210 is the provision of electronic data processing services. In the broadest sense, computer services companies help their customers efficiently use technology. The processing services market consists of vendors who use their own computer systems—often utilizing proprietary software—to process customers' transactions and data. Companies that offer processing services collect, organize, and store a customer's transactions and other data for record-keeping purposes. Price movements for the NAICS 518210 index are based on changes in the revenue received by companies that provide data processing services. Each month, companies provide net transaction prices for a specified service. The transaction is an actual contract selected by probability, where the price-determining characteristics are held constant while the service is repriced. The prices used in index calculation are the actual prices billed for the selected service contract.'' [10]

The Exchange believes the Data PPI is an appropriate measure to be considered in the context of the proposed rule change to modify the fee for its connectivity products because the Exchange uses its ''own computer systems'' and ''proprietary software,'' *i.e.,* its own data center and proprietary matching engine software, respectively, to collect, organize, store and report customers' transactions in U.S. equity securities on the Exchange's proprietary trading platform. In other words, the Exchange is in the business of data processing and related services.

For purposes of this proposed rule change, the Exchange examined the Data PPI value for the period from January 2017 to August 2024. The Data PPI had a starting value of 105.6 in January 2017 and an ending value of 116.022 in August 2024, a 10.422% increase. This indicates that companies who are also in the data storage and processing business have generally increased prices for a specified service covered under NAICS 518210 by an average of 10.422% during this period. Based on that percentage change, the Exchange proposes to make a one-time fee increase of only 10%, which reflects an increase covering roughly the entire period since the last price adjustments to these fees were made.

The Exchange further believes the Data PPI is an appropriate measure for purposes of the proposed rule change on the basis that it is a stable metric with limited volatility, unlike other consumer-side inflation metrics. In fact, the Data PPI has not experienced a greater than 2.16% increase for any one calendar year period since Data PPI was

[5] Remote MITCH Wave Ports are for clients co-located at other third-party data centers, through which NASDAQ TotalView ITCH market data is distributed after delivery to those data centers via wireless network.

[7] *See https://www.bls.gov/ppi/overview.htm.*

[8] *See Id.*

[9] *NAICS appears in table 5 of the PPI Detailed Report and is available at https://data.bls.gov/timeseries/PCU518210518210.*

[10] *See https://www.bls.gov/ppi/factsheets/producer-price-index-for-the-data-processing-and-related-servicesindustry-naics-518210.htm.*

introduced into the PPI in January 2002. The average calendar year change from January 2002 to December 2023 was .62%, with a cumulative increase of 15.67% over this 21-year period. The Exchange believes the Data PPI is considerably less volatile than other inflation metrics such as CPI, which has had individual calendar-year increases of more than 6.5%, and a cumulative increase of over 73% over the same period.[11]

The Exchange believes the Data PPI, and significant investments into, and enhanced performance of, the Exchange support the reasonableness of the proposed fee increases.[12]

These proposed fee increases will be immediately effective upon filing. However, going forward and until December 1, 2024, the Exchange will waive all fees set forth herein to the extent that such fees exceed the levels that would have been charged for the same products and services purchased during that time period, had such fees been calculated at the rates set forth in SR–BX–2024–033 (*i.e.,* pricing reflective of a 5.5% increase from prior fee levels). This waiver is reasonable, equitable, and not unfairly discriminatory because it will afford all customers in excess of the 30-day prior notice period for fee changes set forth in the Exchange's service terms.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[13] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[14] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

This belief is based on two factors. First, the current fees do not properly reflect the quality of the services and products, as fees for the services and products in question have been static in nominal terms, and therefore falling in real terms due to inflation. Second, the Exchange believes that investments made in enhancing the capacity and speed of Exchange systems increase the performance of the services and products.

The Proposed Rule Change Is Reasonable

As noted above, the Exchange has not increased any of the fees included in the proposal since 2017 or earlier. However, in the years following the last fee increases, the Exchange has made significant investments in upgrades to its connectivity products, services, and facilities, enhancing the quality of its services. In other words, Exchange customers have greatly benefitted, while the Exchange's ability to recoup its investments has been hampered. Between 2017 and 2024, the inflation rate is 3.64% per year, on average, producing a cumulative inflation rate of 28.43%.[15] Using the more targeted inflation number of Data PPI, the cumulative inflation rate was 10.422%. The exchange believes the Data PPI is a reasonable metric to base this fee increase on because it is targeted to producer-side increases in the data processing industry.

Notwithstanding inflation, as noted above, the Exchange has not increased its fees at all for over seven years for the subject services. The proposed fee changes represent a modest increase from the current fees. The Exchange believes the proposed fee increase is reasonable in light of the Exchange's continued expenditure in maintaining a robust technology ecosystem. Furthermore, the Exchange continues to invest in maintaining and enhancing its connectivity products—for the benefit and often at the behest of its customers and global investors. Such enhancements include refreshing all aspects of the technology ecosystem including software, hardware, and network while introducing new and innovative products and expanded and modernized facilities.[16] The goal of the enhancements discussed above, among other things, is to provide faster, higher-capacity, and more modern connectivity products and services. Accordingly, the Exchange continues to expend resources to innovate and modernize technology so that it may benefit its members in offering its connectivity products and services.

The Proposed Fees Are Equitably Allocated and Not Unfairly Discriminatory

The Exchange believes that the proposed fee increases are equitably allocated and not unfairly discriminatory because they would apply to all market participants that choose to purchase connectivity products and services from the Exchange. Any participant that chooses to purchase the Exchange's connectivity products and services would be subject to the same Fee Schedule, regardless of what type of business they operate or the use they plan to make use of the products and services. Additionally, the fee increase would be applied uniformly to market participants without regard to Exchange membership status or the extent of any other business with the Exchange or affiliated entities. The Exchange also believes that the proposal represents an equitable allocation of reasonable dues, fees and other charges because Exchange fees have fallen in real terms during the relevant period. Finally, the Exchange believes that the proposed fee changes are not unfairly discriminatory because the fees would be assessed uniformly across all market participants, in the same manner they are today, that voluntarily purchase the Exchange's connectivity products and services, which would remain available for purchase by all market participants.

These proposed fee increases will be immediately effective upon filing. However, going forward and until December 1, 2024, the Exchange will waive all fees set forth herein to the extent that such fees exceed the levels that would have been charged for the same products and services purchased during that time period, had such fees been calculated at the rates set forth in SR–BX–2024–033 (*i.e.,* pricing reflective of a 5.5% increase from prior fee levels). This waiver is reasonable, equitable, and not unfairly discriminatory because it will afford all customers in excess of the 30-day prior notice period for fee changes set forth in the Exchange's service terms.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed fees will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Intramarket Competition

The Exchange believes that the proposed fees do not put any market

[11] *See https://www.usinflationcalculator.com/inflation/consumer-price-index-and-annual-percent-changesfrom-1913-to-2008/.*

[12] *See supra* discussion of connectivity product and facility improvements. Additionally, other exchanges have filed for increases in certain fees, based in part on comparisons to inflation. See, *e.g.,* Securities Exchange Act Release Nos. 34–100004 (April 22, 2024), 89 FR 32465 (April 26, 2024) (SR–CboeBYX–2024–012); and 34–100398 (June 21, 2024), 89 FR 53676 (June 27, 2024) (SR–BOX–2024–16)l; Securities Exchange Act Release No. 34–100994 (September 10, 2024), 89 FR 75612 (September 16, 2024) (SR–NYSEARCA–2024–79).

[13] 15 U.S.C. 78f(b).

[14] 15 U.S.C. 78f(b)(4) and (5).

[15] *See https://www.officialdata.org/us/inflation/2017?amount=1.*

[16] *See, e.g.,* Securities Exchange Act Release No. 34–101073 (September 18, 2024), 89 FR 77926 (September 24, 2024) (SR–BX–2024–035 (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Expand [the Exchange's] Co-Location Services).

participants at a relative disadvantage compared to other market participants. As noted above, the fee schedule would continue to apply to all purchasers of the Exchange's connectivity products and services in the same manner as it does today albeit at inflation-adjusted rates for certain fees, and customers may choose whether to purchase these products and services at all. The Exchange also believes that the level of the proposed fees neither favor nor penalize one or more categories of market participants in a manner that would impose an undue burden on competition. Likewise, the proposed fee waiver described above will apply to all purchasers of the Exchange's connectivity products and services in the same manner and therefore will not burden competition among them.

Intermarket Competition

The Exchange believes that the proposed fees do not impose a burden on competition or on other SROs that is not necessary or appropriate. In determining the proposed fees, the Exchange utilized an objective and stable metric with limited volatility. Utilizing Data PPI over a specified period of time is a reasonable means of recouping the Exchange's investment in maintaining and enhancing its connectivity products, services, and facilities. The Exchange believes utilizing Data PPI, a tailored measure of inflation, to increase certain fees for connectivity products and services to recoup the Exchange's investment in maintaining and enhancing such products, services, and its facilities would not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[17]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–BX–2024–049 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–BX–2024–049. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–BX–2024–049 and should be submitted on or before December 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[18]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101677; File No. SR–NYSECHX–2024–32]

Self-Regulatory Organizations; NYSE Chicago, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 7.37

November 21, 2024.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act''),[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on November 7, 2024, the NYSE Chicago, Inc. (''NYSE Chicago'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.37 to specify the Exchange's source of data feeds from Investors' Exchange, LLC (''IEX'') for purposes of order handling, order execution, order routing, and regulatory compliance. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries,

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update and amend the use of data feeds table in Rule 7.37(d), which sets forth on a market-by-market basis the specific securities information processor (''SIP'') and proprietary data feeds that the Exchange utilizes for the handling, execution, and routing of orders, and for performing the regulatory compliance checks related to each of those functions. Specifically, the Exchange proposes to amend the table in Rule 7.37(d) to specify that, with respect to IEX, the Exchange will receive an IEX direct feed as its primary source of data for order handling, order execution, order routing, and regulatory compliance, and will use the SIP Data Feed as its secondary source for data from IEX.

The Exchange proposes to make this change operative in the fourth quarter of 2024, and, in any event, before the end of the first quarter of 2025. The Exchange proposes to announce the implementation date of this change by Trader Update.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,[4] in general, and furthers the objectives of Section 6(b)(5),[5] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest. Additionally, the Exchange believes that the proposed rule change is consistent with the Section 6(b)(5) requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes its proposal to update the table in Rule 7.37(d) to include the IEX direct feed will ensure that the Rule correctly identifies and publicly states on a market-by-market basis all of the specific SIP and proprietary data feeds that the Exchange utilizes for the handling, execution, and routing of orders, and for performing the regulatory compliance checks for each of those functions. The proposed rule change also removes impediments to and perfects the mechanism of a free and open market and protects investors and the public interest by providing additional specificity, clarity, and transparency in the Exchange's rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, the Exchange believes that the proposal will enhance competition because providing the public and market participants with up-to-date information about the data feeds the Exchange will use for the handling, execution, and routing of orders, as well as for regulatory compliance would enhance transparency and enable investors to better assess the quality of the Exchange's execution and routing services. The Exchange also believes the proposal would enhance competition because it would potentially enhance the performance of its order handling and execution of orders in equity securities by receiving market data directly from IEX. Finally, the proposed rule change would not impact competition between market participants because it will affect all market participants equally.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[6] and Rule 19b–4(f)(6) thereunder.[7] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[8] and Rule 19b–4(f)(6)(iii) thereunder.[9]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[10] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–NYSECHX–2024–32 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSECHX–2024–32. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101700; File No. SR–CboeBYX–2024–042]

Self-Regulatory Organizations; Cboe BYX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule Relating to Routing Codes

November 21, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 14, 2024, Cboe BYX Exchange, Inc. (''Exchange'' or ''BYX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BYX Exchange, Inc. (the ''Exchange'' or ''BYX'') proposes to amend its Fee Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/equities/regulation/rule_filings/BYX/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Effective November 1, 2024, the Exchange proposes to amend its BYX Fee Schedule applicable to its equities trading platform.[3] By implementing a remove fee (as opposed to a rebate) for fee code, AA, removing fee code, BJ, and adding EDGA to the list of venues to which orders appended with fee code, PL, are routed.

Fee Codes

The Exchange proposes to implement a remove fee for fee code, AA. The proposed changes are as follows:

• For securities priced above $1.00,[4] fee code AA is appended to orders that are routed to EDGA using the ALLB[5] routing strategy. Currently, orders appended with fee code AA receive a rebate of $0.0018.

The Exchange now proposes to amend fee code, AA, as follows:

• For securities priced above $1.00, fee code AA will continue to be appended to orders that are routed to EDGA using the ALLB routing strategy. However, orders appended with fee code AA will now pay a fee of $0.0030. The Exchange does not propose to add a fee or rebate for removing liquidity for securities priced below $1.00.

The Exchange also proposes to remove fee code, BJ. For securities priced above $1.00,[6] fee code BJ is currently appended to orders that are routed to EDGA using the TRIM[7] or SLIM[8] routing strategies and receive a rebate of $0.0018. However, effective November 1, 2024,[9] EDGA transitioned from an inverted fee model[10] to a maker-taker fee model.[11]

The Exchange also proposes to edit the description of fee code, PL. The BYX Fee Schedule currently describes PL, as a fee code appended to orders that are ''[r]outed to BZX, EDGX, NYSE, NYSE Arca or Nasdaq using RMPL routing strategy.'' The Exchange now proposes to move EDGA to the list of high-cost destinations for the RMPL routing

[11] 17 CFR 200.30–3(a)(12), (59).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The Exchange initially filed the proposed fee change on November 1, 2024 (SR–CboeBYX–2024–040). On November 14, 2024, the Exchange withdrew that filing and submitted this filing.

[4] The Exchange notes for securities priced below $1.00, there is no fee or rebate for removing liquidity from EDGA using the ALLB routing strategy.

[5] ALLB is a routing option under which an order checks the System for available shares and is then sent to Cboe BZX Exchange, Inc., Cboe EDGA Exchange, Inc., and/or Cboe EDGX Exchange, Inc. in accordance with the System routing table. If shares remain unexecuted after routing, they are posted on the BYX Book, unless otherwise instructed by the User. *See* Rule 11.13(b)(3)(M).

[6] There is no charge or rebate for securities priced below $1.00.

[7] TRIM is a routing strategy under which an order checks EDGA for available shares if so instructed by the entering User, and then is sent to destinations on the applicable System routing table. *See generally* Rule 11.13(b)(3)(G)(iv).

[8] SLIM is a routing strategy under which an order checks EDGA for available shares if so instructed by the entering User, and then is sent to destinations on the applicable System routing table. *See generally* Rule 11.13(b)(3)(G)(v).

[9] *See* SR–CboeEDGA–2024–042; *see also,* SR–CboeEDGA–2024–045.

[10] The inverted As such, orders that remove liquidity from EDGA will pay a remove fee, rather than receive a rebate. Because Members typically utilize routing options TRIM and SLIM, and fee code BJ, to seek low-cost executions, it does not make sense to maintain fee code, BJ, as Members would not expect to pay a fee for removing liquidity from EDGA. Therefore, the Exchange proposes to discontinue this fee code, as it is no longer necessary, and BYX does not desire to charge such orders a fee for removing liquidity from EDGA.fee model is a pricing structure in which a market, such as an exchange, charges its participants a fee to provide liquidity in securities, and provides a rebate to participants that remove liquidity in securities. *See* SEC Market Structure Advisory Committee, Memorandum on ''Maker-Taker Fees on Equities Exchanges,'' October 20, 2015, available at: *https://www.sec.gov/spotlight/emsac/memo-maker-taker-fees-on-equities-exchanges.pdf.*

[11] The maker-taker fee model is a pricing structure in which a market, such as an exchange, generally pays its members a per share rebate to provide (*i.e.,* ''make'') liquidity in securities and assesses on them a fee to remove (*i.e.,* ''take'') liquidity. *Id.*

strategy that are assigned the PL fee code, by amending the description in the Fee Schedule to read as follow: ''Routed to BZX, EDGX, *EDGA,* NYSE, NYSE Arca or Nasdaq using RMPL routing strategy.'' Previously, orders appended with fee code, PX, utilized routing option, RMPL, which is a midpoint liquidity seeking strategy that first targets low-cost executions at certain lower-cost venues, including EDGA. However, because EDGA is now transitioning to a maker-taker fee model, EDGA will now be assessing a full remove fee of $0.0030 for orders that remove liquidity from EDGA.[12] As such, the Exchange believes that current fee code, PL—which charges a $0.0030 for routing orders to other exchanges—is now the more appropriate fee code to be appended to midpoint liquidity seeking orders that are routed to other major exchanges. Similar to EDGA, the other exchanges targeted by RMPL—NYSE, NYSE Arca, and Nasdaq—also charge a high remove fee to liquidity removing orders.[13]

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[14] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [15] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [16] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers as well as Section 6(b)(4) [17] as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities.

Adjusting fee code AA and removing fee code, BJ, is necessary to reflect the transition of EDGA to a maker-taker fee model, effective November 1, 2024. Prior to the November 1, 2024, orders entered onto BYX, that were appended with fee code, AA, and were routed to EDGA using routing option ALLB, received a rebate of $0.0018 for removing liquidity from the EDGA Book for securities priced at or above $1.00. However, given EDGA's transition to a maker-taker fee model, orders that remove liquidity will now need to pay a liquidity removal fee, rather than receive a rebate. Accordingly, removal of the current $0.00180 rebate associated with fee code, AA, and implementation of a $0.0030 remove fee is appropriate and consistent with the economics of a maker-taker model, as well as the expectations of Members that remove liquidity from EDGA (*i.e.,* Members would expect to pay a fee to remove liquidity). Moreover, the proposed fee is not unfairly discriminatory because it applies to all Members equally, in that all Members will pay the same fee for orders routed to EDGA using the ALLB routing strategy, and appended with fee code, AA.

The Exchange also believes that its removal of fee code, BJ, is reasonable, equitable, and not unfairly discriminatory as it does not change the fees or rebates assessed by the Exchange, but rather updates the BYX Fee Schedule to remove a fee code that the Exchange no longer desires to, nor is required to, offer to its Members. Therefore, the proposed rule change is reasonably designed to update the Fee Schedule to accurately reflect the Exchange's current product offerings and is designed to reduce any potential confusion regarding the routing of orders with fee code, BJ, from BYX to EDGA. Furthermore, as noted above, orders appended with fee code, BJ, entered onto BYX and routed to EDGA using the routing option TRIM or SLIM, previously received a rebate of $0.0018 for removing liquidity from the EDGA Book. However, effective November 1, 2024, EDGA transitioned from an inverted fee model to a maker-taker fee model. As such, orders that remove liquidity from EDGA will pay a remove fee, rather than receive a rebate. Because Members typically utilize routing options TRIM and SLIM, and fee code BJ, to seek low-cost executions, it does not make sense to maintain the BJ fee code, as Members utilizing this fee code would not expect to pay a fee for removing liquidity from EDGA. Therefore, the Exchange proposes to discontinue this fee code, as it is no longer necessary, and BYX does not desire to charge such orders a fee for removing liquidity from EDGA.

Finally, the Exchange believes that moving EDGA to the list of high-cost destinations for the RMPL routing strategy that are assigned the PL fee code, and assessing such orders a fee of $0.0030, is necessary and appropriate. Members appending their orders with the PL fee code already expect to pay a remove fee for removing liquidity from exchanges accessed by RMPL, rather than receive a rebate for removing liquidity as they do with liquidity removing orders appended with the PX fee code. Additionally, the remove fee of $0.0030 per share represents an equitable allocation of reasonable dues, fees, and other charges. The proposed change would enable the Exchange to charge a rate reasonably related to the rate that Cboe Trading, Inc. (''Cboe Trading''), the Exchange's affiliated routing broker-dealer, would be charged for routing orders to destinations described in fee codes PL. As a result, when Cboe Trading is charged a fee when it routes an order which removes liquidity from a destination described in fee codes PL, Cboe Trading will pass through these rates to the Exchange and the Exchange, in turn, will charge the rate under fee codes PL. The proposed fee under fee code, PL, for orders routed pursuant to the RMPL routing strategy would enable the Exchange to equitably allocate its costs among all Members.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule changes will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Given EDGA's transition to a maker-taker fee model, orders that remove liquidity will now need to pay a liquidity removal fee, rather than receive a rebate. Accordingly, removing the current $0.0018 rebate associated with fee code, AA, and implementing a $0.0030 remove fee is appropriate and consistent

[12] *See* SR–CboeEDGA–2024–045.

[13] NYSE Arca charges a removal fee of $0.0030. *See* Section III—Standard Rates—Transactions (applicable when Tier Rates do not apply), Removing Liquidity, pg. 3, available at: *https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Marketplace_Fees.pdf;* NYSE charges a removal fee of $0.0030 for orders that remove midpoint liquidity. *See* NYSE Stock Exchange Price List, ''Equity per Share Charge—per transaction—MPL orders that remove liquidity from the NYSE (Adding Tier Credits do not apply) and with no Retail Modifier, as defined in Rule 13 (''Retail Modifier'')), pg. 5, available at *https://www.nyse.com/publicdocs/nyse/markets/nyse/NYSE_Price_List.pdf;* Nasdaq charges a removal fee of $0.0030. *See* Fees to Remove Liquidity, Shares Executed at or above $1.00, available at: *https://www.nasdaqtrader.com/Trader.aspx?id=PriceListTrading2.*

[14] 15 U.S.C. 78f(b).

[15] 15 U.S.C. 78f(b)(5).

[16] *Id.*

[17] 15 U.S.C. 78f(b)(4).

with the economics of a maker-taker model, as well as the expectations of Members that remove liquidity from EDGA (*i.e.,* Members would expect to pay a fee to remove liquidity).

Moreover, moving EDGA to the list of high-cost destinations for the RMPL routing strategy that are assigned the PL fee code simply reflects the fact that orders routed to EDGA that remove liquidity will now—just as they do on other exchanges accessed with the PL fee code—pay a remove fee instead of receiving a rebate. In addition, the BJ fee code was typically appended to orders utilizing the TRIM or SLIM strategies, which are designed to seek low-cost executions. Given EDGA's transition to a maker-taker fee model, though, removers of liquidity will now pay a remove fee. As such, it is appropriate to remove the BJ fee code as Member's utilizing this fee code would expect to receive a rebate and not expect to pay a fee. Accordingly, these proposed changes are necessary and appropriate in order to align Members' expectations with the economics of EDGA's new maker-taker fee model and will not have any impact on competition.

Additionally, moving EDGA from fee code, PX, to fee code is PL, will not have any impact on competition. Rather, it is necessary and appropriate given EDGA's transition to a maker-taker fee model. Users of the PL fee code already expect to pay fees for removing liquidity from exchanges, whereas users of the PX fee code would expect lower-cost executions for removing liquidity from exchanges, including EDGA.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [18] and paragraph (f) of Rule 19b–4 [19] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–CboeBYX–2024–042 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeBYX–2024–042. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CboeBYX–2024–042 and should be submitted on or before December 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[20]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101686; File No. SR–MRX–2024–43]

Self-Regulatory Organizations; Nasdaq MRX, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend its Fees for Connectivity and Co-location Services

November 21, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 8, 2024, Nasdaq MRX, LLC (''MRX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's fees for connectivity and co-location services, as described further below.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/mrx/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend the Exchange's fees relating to connectivity and co-location services.[3] Specifically, the Exchange proposes to raise its fees for connectivity and co-location services in General 8 as well as certain fees related to its Testing Facilities in Options 7, Section 7 by 10%, with certain exceptions.

General 8, Section 1 includes the Exchange's fees that relate to connectivity, including fees for cabinets, external telco/inter-cabinet connectivity fees, fees for connectivity to the Exchange, fees for connectivity to third party services, fees for market data connectivity, fees for cabinet power install, and fees for additional charges and services. General 8, Section 2 includes the Exchange's fees for direct connectivity services, including fees for direct circuit connection to the Exchange, fees for direct circuit connection to third party services, and fees for point of presence connectivity. With the exception of the Exchange's GPS Antenna fees and the Cabinet Proximity Option Fee for cabinets with power density >10kW,[4] the Exchange proposes to increase its fees throughout General 8 by 10%.

In addition to increasing fees in General 8, the Exchange also proposes to increase certain fees in Options 7, Section 7, which relate to the Testing Facility. Options 7, Section 7 provides that subscribers to the Testing Facility located in Carteret, New Jersey shall pay a fee of $1,000 per hand-off, per month for connection to the Testing Facility. The hand-off fee includes either a 1Gb or 10Gb switch port and a cross connect to the Testing Facility. In addition, Options 7, Section 7 provides that subscribers shall also pay a one-time installation fee of $1,000 per hand-off. The Exchange proposes to increase these aforementioned fees by 10% to require that subscribers to the Testing Facility shall pay a fee of $1,100 per hand-off, per month for connection to the Testing Facility and a one-time installation fee of $1,100 per hand-off.

The proposed increases in fees would enable the Exchange to maintain and improve its market technology and services to remain competitive with its peers. Over the years, customer demand for more sophisticated, higher-throughput, lower-latency, and higher-power connectivity solutions has increased. The Exchange continues to invest in maintaining, improving, and enhancing its connectivity and co-location products, services, and facilities—for the benefit and often at the behest of its customers. Such enhancements include refreshing hardware and expanding Nasdaq's existing co-location facility to offer customers additional space and power. Nevertheless, and with the exception of fees that were established as part of a new service in 2017 (and have remained unchanged since their adoption), the Exchange has not increased any of the fees included in the proposal since prior to 2017, and many of the fees date back to between 2010 and 2014. For each of the connectivity products and services that pre-date 2017, inflation (as measured using the ''Data PPI'' metric described below) has been between roughly 15–17%, and in no instance has such inflation been less than 10%. Nevertheless, the Exchange proposes to increase its fees only with respect to the 10% inflation that has occurred since 2017.

As discussed below, the Exchange proposes to adjust its fees by an industry- and product-specific inflationary measure. It is reasonable and consistent with the Act for the Exchange to recoup its investments, at least in part, by adjusting its fees. Continuing to operate at fees frozen at 2010–2017 levels impacts the Exchange's ability to enhance its offerings and the interests of market participants and investors.

The fee increases the Exchange proposes are based on an industry-specific Producer Price Index (''PPI''), which is a tailored measure of inflation.[5] As a general matter, the Producer Price Index is a family of indexes that measures the average change over time in selling prices received by domestic producers of goods and services. PPI measures price change from the perspective of the seller. This contrasts with other metrics, such as the Consumer Price Index (''CPI''), that measure price change from the purchaser's perspective.[6] About 10,000 PPIs for individual products and groups of products are tracked and released each month.[7] PPIs are available for the output of nearly all industries in the goods-producing sectors of the U.S. economy—mining, manufacturing, agriculture, fishing, and forestry—as well as natural gas, electricity, and construction, among others. The PPI program covers approximately 69 percent of the service sector's output, as measured by revenue reported in the 2017 Economic Census.

For purposes of this proposal, the relevant industry-specific PPI is the Data Processing and Related Services PPI (''Data PPI''), which is an industry net-output PPI that measures the average change in selling prices received by companies that provide data processing services.

The Data PPI was introduced in January 2002 by the Bureau of Labor Statistics (''BLS'') as part of an ongoing effort to expand Producer Price Index coverage of the services sector of the U.S. economy and is identified as NAICS—518210 in the North American Industry Classification System.[8] According to the BLS ''[t]he primary output of NAICS 518210 is the provision of electronic data processing services. In the broadest sense, computer services companies help their customers efficiently use technology. The processing services market consists of vendors who use their own computer systems—often utilizing proprietary software—to process customers' transactions and data. Companies that offer processing services collect, organize, and store a customer's transactions and other data for record-keeping purposes. Price movements for the NAICS 518210 index are based on changes in the revenue received by companies that provide data processing

[3] The Exchange initially filed the proposed pricing change on March 1, 2024 (SR–MRX–2024–04). On April 29, 2024, the Exchange withdrew that filing and submitted SR–MRX–2024–10. On June 27, 2024, the Exchange withdrew SR–MRX–2024–10 and submitted SR–MRX–2024–18. The Exchange withdrew SR–MRX–2024–18 and replaced it with SR–MRX–2024–34 on September 10, 2024. On October 11, 2024, The Exchange replaced SR–MRX–2024–34 with SR–MRX–2024–41. This instant filing replaces SR–MRX–2024–41.

[4] The Exchange proposes to exclude the GPS Antenna fees from the proposed fee increase because, unlike the other fees in General 8, the Exchange recently increased its GPS Antenna fees. *See* Securities Exchange Act Release No. 34–99130 (December 11, 2023), 88 FR 87009 (December 15, 2023) (SR–MRX–2023–24). The Exchange also proposes to exclude the Cabinet Proximity Option Fee for cabinets with power density >10kW from the proposed fee increase because the Exchange recently established such fee. *See* Securities Exchange Act Release No. 34–100200 (May 21, 2024), 89 FR 46183 (May 28, 2024) (SR–MRX–2024–12). Similarly, the Exchange proposes to exclude from the proposed fee increase those fees that the Exchange recently established for services in its new NY11–4 expansion facility. *See* Securities Exchange Act Release No. 34–101269 (October 7, 2024), 89 FR 82657 (October 11, 2024) (SR–MRX–2024–37).

[5] *See https://fred.stlouisfed.org/series/PCU51825182#0.*

[6] *See https://www.bls.gov/ppi/overview.htm.*

[7] *See Id.*

[8] *NAICS appears in table 5 of the PPI Detailed Report and is available at https://data.bls.gov/timeseries/PCU518210518210.*

services. Each month, companies provide net transaction prices for a specified service. The transaction is an actual contract selected by probability, where the price-determining characteristics are held constant while the service is repriced. The prices used in index calculation are the actual prices billed for the selected service contract.'' [9]

The Exchange believes the Data PPI is an appropriate measure to be considered in the context of the proposed rule change to modify the fee for its connectivity products because the Exchange uses its ''own computer systems'' and ''proprietary software,'' *i.e.,* its own data center and proprietary matching engine software, respectively, to collect, organize, store and report customers' transactions in U.S. equity securities on the Exchange's proprietary trading platform. In other words, the Exchange is in the business of data processing and related services.

For purposes of this proposed rule change, the Exchange examined the Data PPI value for the period from January 2017 to August 2024. The Data PPI had a starting value of 105.6 in January 2017 and an ending value of 116.022 in August 2024, a 10.422% increase. This indicates that companies who are also in the data storage and processing business have generally increased prices for a specified service covered under NAICS 518210 by an average of 10.422% during this period. Based on that percentage change, the Exchange proposes to make a one-time fee increase of only 10%, which reflects an increase covering roughly the entire period since the last price adjustments to these fees were made.

The Exchange further believes the Data PPI is an appropriate measure for purposes of the proposed rule change on the basis that it is a stable metric with limited volatility, unlike other consumer-side inflation metrics. In fact, the Data PPI has not experienced a greater than 2.16% increase for any one calendar year period since Data PPI was introduced into the PPI in January 2002. The average calendar year change from January 2002 to December 2023 was .62%, with a cumulative increase of 15.67% over this 21-year period. The Exchange believes the Data PPI is considerably less volatile than other inflation metrics such as CPI, which has had individual calendar-year increases of more than 6.5%, and a cumulative increase of over 73% over the same period.[10]

The Exchange believes the Data PPI, and significant investments into, and enhanced performance of, the Exchange support the reasonableness of the proposed fee increases.[11]

These proposed fee increases will be immediately effective upon filing. However, going forward and until December 1, 2024, the Exchange will waive all fees set forth herein to the extent that such fees exceed the levels that would have been charged for the same products and services purchased during that time period, had such fees been calculated at the rates set forth in SR–MRX–2024–34 (*i.e.,* pricing reflective of a 5.5% increase from prior fee levels). This waiver is reasonable, equitable, and not unfairly discriminatory because it will afford all customers in excess of the 30-day prior notice period for fee changes set forth in the Exchange's service terms.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[12] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[13] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

This belief is based on two factors. First, the current fees do not properly reflect the quality of the services and products, as fees for the services and products in question have been static in nominal terms, and therefore falling in real terms due to inflation. Second, the Exchange believes that investments made in enhancing the capacity and speed of Exchange systems increase the performance of the services and products.

The Proposed Rule Change Is Reasonable

As noted above, the Exchange has not increased any of the fees included in the proposal since 2017 or earlier. However, in the years following the last fee increases, the Exchange has made significant investments in upgrades to its connectivity products, services, and facilities, enhancing the quality of its services. In other words, Exchange customers have greatly benefitted, while the Exchange's ability to recoup its investments has been hampered. Between 2017 and 2024, the inflation rate is 3.64% per year, on average, producing a cumulative inflation rate of 28.43%.[14] Using the more targeted inflation number of Data PPI, the cumulative inflation rate was 10.422%. The exchange believes the Data PPI is a reasonable metric to base this fee increase on because it is targeted to producer-side increases in the data processing industry.

Notwithstanding inflation, as noted above, the Exchange has not increased its fees at all for over seven years for the subject services. The proposed fee changes represent a modest increase from the current fees. The Exchange believes the proposed fee increase is reasonable in light of the Exchange's continued expenditure in maintaining a robust technology ecosystem. Furthermore, the Exchange continues to invest in maintaining and enhancing its connectivity products—for the benefit and often at the behest of its customers and global investors. Such enhancements include refreshing all aspects of the technology ecosystem including software, hardware, and network while introducing new and innovative products and expanded and modernized facilities.[15] The goal of the enhancements discussed above, among other things, is to provide faster, higher-capacity, and more modern connectivity products and services. Accordingly, the Exchange continues to expend resources to innovate and modernize technology so that it may benefit its members in offering its connectivity products and services.

The Proposed Fees Are Equitably Allocated and Not Unfairly Discriminatory

The Exchange believes that the proposed fee increases are equitably

[11] *See supra* discussion of connectivity product and facility improvements. Additionally, other exchanges have filed for increases in certain fees, based in part on comparisons to inflation. See, *e.g.,* Securities Exchange Act Release Nos. 34–100004 (April 22, 2024), 89 FR 32465 (April 26, 2024) (SR–CboeBYX–2024–012); and 34–100398 (June 21, 2024), 89 FR 53676 (June 27, 2024) (SR–BOX–2024–16)l; Securities Exchange Act Release No. 34–100994 (September 10, 2024), 89 FR 75612 (September 16, 2024) (SR–NYSEARCA–2024–79).

[12] 15 U.S.C. 78f(b).

[13] 15 U.S.C. 78f(b)(4) and (5).

[14] *See https://www.officialdata.org/us/inflation/2017?amount=1.*

[15] *See, e.g.,* Securities Exchange Act Release No. 34–101077 (September 18, 2024), 89 FR 77904 (September 24, 2024) (SR–MRX–2024–36 (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Expand [the Exchange's] Co-Location Services)).

allocated and not unfairly discriminatory because they would apply to all market participants that choose to purchase connectivity products and services from the Exchange. Any participant that chooses to purchase the Exchange's connectivity products and services would be subject to the same Fee Schedule, regardless of what type of business they operate or the use they plan to make use of the products and services. Additionally, the fee increase would be applied uniformly to market participants without regard to Exchange membership status or the extent of any other business with the Exchange or affiliated entities. The Exchange also believes that the proposal represents an equitable allocation of reasonable dues, fees and other charges because Exchange fees have fallen in real terms during the relevant period. Finally, the Exchange believes that the proposed fee changes are not unfairly discriminatory because the fees would be assessed uniformly across all market participants, in the same manner they are today, that voluntarily purchase the Exchange's connectivity products and services, which would remain available for purchase by all market participants.

These proposed fee increases will be immediately effective upon filing. However, going forward and until December 1, 2024, the Exchange will waive all fees set forth herein to the extent that such fees exceed the levels that would have been charged for the same products and services purchased during that time period, had such fees been calculated at the rates set forth in SR–MRX–2024–34 (*i.e.,* pricing reflective of a 5.5% increase from prior fee levels). This waiver is reasonable, equitable, and not unfairly discriminatory because it will afford all customers in excess of the 30-day prior notice period for fee changes set forth in the Exchange's service terms.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed fees will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Intramarket Competition

The Exchange believes that the proposed fees do not put any market participants at a relative disadvantage compared to other market participants. As noted above, the fee schedule would continue to apply to all purchasers of the Exchange's connectivity products and services in the same manner as it does today albeit at inflation-adjusted rates for certain fees, and customers may choose whether to purchase these products and services at all. The Exchange also believes that the level of the proposed fees neither favor nor penalize one or more categories of market participants in a manner that would impose an undue burden on competition. Likewise, the proposed fee waiver described above will apply to all purchasers of the Exchange's connectivity products and services in the same manner and therefore will not burden competition among them.

Intermarket Competition

The Exchange believes that the proposed fees do not impose a burden on competition or on other SROs that is not necessary or appropriate. In determining the proposed fees, the Exchange utilized an objective and stable metric with limited volatility. Utilizing Data PPI over a specified period of time is a reasonable means of recouping the Exchange's investment in maintaining and enhancing its connectivity products, services, and facilities. The Exchange believes utilizing Data PPI, a tailored measure of inflation, to increase certain fees for connectivity products and services to recoup the Exchange's investment in maintaining and enhancing such products, services, and its facilities would not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[16] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–MRX–2024–43 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–MRX–2024–43. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–MRX–2024–43 and should be submitted on or before December 18, 2024.

[16] 15 U.S.C. 78s(b)(3)(A)(ii).

[17] 17 CFR 200.30–3(a)(12).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101685; File Nos. SR–DTC–2024–003; SR–FICC–2024–006; SR–NSCC–2024–003]

Self-Regulatory Organizations; The Depository Trust Company; Fixed Income Clearing Corporation; National Securities Clearing Corporation; Order Approving Proposed Rule Change To Amend the Clearing Agency Risk Management Framework

November 21, 2024.

I. Introduction

On March 11, 2024, The Depository Trust Company (''DTC''), Fixed Income Clearing Corporation (''FICC''), and National Securities Clearing Corporation (''NSCC,'' each a ''Clearing Agency,'' and collectively, the ''Clearing Agencies''), filed with the Securities and Exchange Commission (''Commission'') proposed rule changes SR–DTC–2024–003, SR–FICC–2024–006, and SR–NSCC–2024–003, respectively, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder (the ''Proposed Rule Changes'').[2] The Proposed Rule Changes were published for comment in the **Federal Register** on March 26, 2024.[3] The Commission has received comments on the changes proposed.[4] For the reasons discussed below, the Commission is approving the Proposed Rule Changes.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 99802 (Mar. 20, 2024), 89 FR 21118 (Mar. 26, 2024) (File No. SR–DTC–2024–003) (''DTC Notice of Filing''); Securities Exchange Act Release No. 99805 (Mar. 20, 2024), 89 FR 21068 (Mar. 26, 2024) (File No. SR–FICC–2024–006) (''FICC Notice of Filing''); Securities Exchange Act Release No. 99803 (Mar. 20, 2024), 89 FR 21091 (Mar. 26, 2024) (File No. SR–NSCC–2024–003) (''NSCC Notice of Filing'').

[4] Specifically, the Commission received comments on the FICC Notice of Filing, and the comments are available at *https://www.sec.gov/comments/sr-ficc-2024-006/srficc2024006.htm.* The comments generally relate to issues raised in other FICC proposed rule changes that are not relevant to the Notices of Filing. See, Securities Exchange Act Release Nos. 99817 (SR–FICC–2024–005) and 99844 (SR–FICC–2024–007). The Commission considers the relevant comments related to the FICC Notice of Filing in its analysis at Section IV *infra.*

II. Background

On December 13, 2023, the Commission adopted rules under the Act to amend the standards applicable to covered clearing agencies providing central counterparty services for transactions in U.S. Treasury securities to require policies and procedures be reasonably designed to ensure that the covered clearing agency has appropriate means to facilitate access to clearance and settlement services of all eligible secondary market transactions in U.S. Treasury securities, including those of indirect participants.[5] The adopted rules also require that these policies and procedures be reviewed annually by the board of directors of such covered clearing agencies for U.S. Treasury securities.[6] Currently, FICC is the only Clearing Agency providing clearance and settlement services to the U.S. Treasury securities market.

To address the new requirements, the Clearing Agencies propose to amend their Clearing Agency Risk Management Framework (''Framework).[7] Specifically, the Proposed Rule Changes would add a new section to the Framework regarding ''Solicitation of Participant and Stakeholder Views''. This subsection would: (i) describe generally Clearing Agency participant and industry stakeholder outreach in the development and evaluation of new programs or risk management practices, and (ii) provide for the annual review of FICC's Government Securities Division (''GSD'') access models by FICC's Board of Directors. The proposal would also make other conforming and clean up changes to the text of the Framework, as described below.

III. Description of the Proposed Rule Changes

A. Subsection 3.4.1 General Solicitation of Views

The Clearing Agencies state that they routinely solicit their participants' and other industry stakeholders' views when developing and evaluating products, services, or risk management practices so they may best meet the industry's needs.[8] To codify this practice, the proposal would add a new subsection to the Framework (entitled ''General Solicitation of Views''), which identifies several ways that the Clearing Agencies may seek the views of participants and stakeholders. Such methods would include targeted outreach to firms expected to be impacted by a proposal, widely distributed surveys, ad hoc forums, and standing advisory councils assembled to consider issues relevant to a proposal. This list of outreach methods is illustrative, not exhaustive.

The subsection would also identify the industry stakeholders that may participate in such advisory councils, including for example, representatives from transfer agents, liquidity providers, market infrastructures, institutional and retail investors, customers of the Clearing Agencies' participants, securities issuers, and securities holders. The Clearing Agencies state that the proposed changes in subsection 3.4.1 do not create any obligation for the Clearing Agencies to conduct such outreach in any particular circumstances.[9]

B. Subsection 3.4.2 Required Solicitation of Views—Annual Review of GSD Access Models

The Clearing Agencies propose adding a new subsection to the Framework (entitled ''Required Solicitation of Views—Annual Review of GSD Access Models'') in connection with the recently adopted requirement in Rule 17ad–22(e)(18)(iv)(C) that the board of directors of a covered clearing agency annually review the policies and procedures that the covered clearing agency uses to ensure that they have appropriate means to facilitate access to clearance and settlement services of all eligible secondary market transactions in U.S. Treasury securities, including those of indirect participants.[10] To assist the board in their review of GSD access models, the Proposed Rule Changes would establish an advisory council comprised of participants, their customers, and other industry stakeholders. This advisory council review of GSD's access models would be escalated to the FICC Board of Directors, or a committee thereof, with its annual review of GSD's access models, which

[5] *See* Standards for Covered Clearing Agencies for U.S. Treasury Securities and Application of the Broker-Dealer Customer Protection Rule with Respect to U.S. Treasury Securities, Exchange Act Release No. 99149 (Feb. 15, 2023), 88 FR 13872 (Jan. 16, 2024) (S7–23–22) (''Treasury Clearing Adopting Release'').

[6] 17 CFR 240.17ad–22(e)(18)(iv)(C).

[7] The Framework provides an outline for, among other things, how each of the Clearing Agencies comprehensively manages the risks, including the legal, credit, liquidity, operational, general business, investment, custody, and other risks, that arise in or are borne by it.

[8] *See* DTC Notice of Filing, *supra* note 3, 89 FR at 21119; FICC Notice of Filing, *supra* note 3, 89 FR at 21069; and NSCC Notice of Filing, *supra* note 3, 89 FR at 21091.

[9] *See* DTC Notice of Filing, *supra* note 3, 89 FR at 21119; FICC Notice of Filing, *supra* note 3, 89 FR at 21069; and NSCC Notice of Filing, *supra* note 3, 89 FR at 21092.

[10] 17 CFR 240.17ad–22(e)(18)(iv)(C).

would also be required by this new subsection.

FICC's goal in the annual review of FICC/GSD's access models is to determine whether the GSD Clearing Rules and any other written policies and procedures are reasonably designed to ensure appropriate and flexible means to facilitate access to clearance and settlement of all eligible secondary market transactions in U.S. Treasury securities, including those of indirect participants.[11] In furtherance of this goal, the new subsection would require that the annual review include the following: (1) document any instance in which FICC treats transactions differently based on either the identity of the submitting participant, the fact that an indirect participant is a party to the transaction, the method of execution, or any other way, and confirm that any variation in treatment is both necessary and appropriate to meet the minimum standards regarding, among other things, operations, governance, and risk management identified in the Standards for Covered Clearing Agencies; (2) consider whether to enable GSD's Netting Members, as defined in the GSD Rules,[12] to submit eligible transactions for clearance and settlement that have been executed by two indirect participants of FICC/GSD (''done-away''); (3) consider the volumes and proportion of the markets that are being centrally cleared through different access models in determining whether FICC/GSD's access models are meeting the needs of the market; and (4) consider whether it is appropriate to develop and propose an additional category or categories of Netting Members to the GSD Rules to reflect the types of legal entities that applied to be a Netting Member over the prior 12 months and did not fit into one of the existing Netting Member categories.[13]

C. Other Conforming and Clean Up Changes

The proposal would make other conforming and clean up changes to the Framework. The Clearing Agencies would amend Section 1 of the Framework to: (1) include the annual review of GSD's access models in the list of regulatory requirements that are addressed in the Framework, and (2) update the description of the contents of Section 3 of the Framework to include the solicitation of participant and stakeholder views and annual review of GSD's access models as part of the Clearing Agencies' management of risks.

The Clearing Agencies would also remove the defined term ''Management Committee'' wherever referenced and replace it with ''senior management committee'' while maintaining the current makeup and responsibilities of the current Management Committee, as described in the Framework. The Clearing Agencies state that the proposed change would allow the Framework to continue to be accurate notwithstanding any future name changes to the committee.[14]

Other minor grammatical and clean up changes would also be made to the Framework.

IV. Discussion and Commission Findings

Section 19(b)(2)(C) of the Act [15] directs the Commission to approve a proposed rule change of a self-regulatory organization if it finds that such proposed rule change is consistent with the requirements of the Act and rules and regulations thereunder applicable to such organization. After carefully considering the Proposed Rule Changes, the Commission finds that the Proposed Rule Changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to the Clearing Agencies. In particular, the Commission finds that the Proposed Rule Changes are consistent with Section 17A(b)(3)(F) [16] of the Act and Rule 17Ad–22(e)(18)(iv)(C),[17] each promulgated under the Act.

A. Section 17A(b)(3)(F) of the Act

Section 17A(b)(3)(F) of the Act requires, in part, that the rules of a registered clearing agency be designed to promote the prompt and accurate clearance and settlement of securities transactions and assure the safeguarding of securities and funds which are in their custody or control or for which they are responsible.[18]

As described above in Section III.A, the Clearing Agencies routinely solicit their participants' and other industry stakeholders' views. The Proposed Rule Changes would codify that the Clearing Agencies use this practice, which should help ensure that the Clearing Agencies have mechanisms in place to be informed of the views of their participants and other industry stakeholders. By allowing specifically for formal engagement and transparency on their risk management practices, the Proposed Rule Changes should continue to encourage communication and provide a formal mechanism to help the Clearing Agencies identify and evaluate any unintended consequences a proposal or practice may have on its direct and indirect participants and obtain recommendations on how to meet its goals through alternative approaches. In addition, as described in Section III.B, the Proposed Rule Changes would establish an annual advisory council for FICC's GSD to assist the FICC Board of Directors, or a committee thereof, in its required annual review of GSD access models, and the Proposed Rule Changes would also identify several things that the advisory council would have to do as part of its review. Adopting this advisory council and a plan for its work, as well as requiring annual review by the FICC Board of Directors, should help FICC work to meet its regulatory obligations to establish, implement, maintain and enforce written policies and procedures reasonably designed to ensure that it has appropriate means to facilitate access, including for indirect participants, to its clearance and settlement services by providing a method by which FICC can be informed by its participants and other industry stakeholders as to access issues. This change should help ensure that FICC solicits and considers such views when making decisions about how to structure its access models, which should, in turn, help further continued prompt and accurate clearance and settlement in the U.S. Treasury market, consistent with Section 17A(b)(3)(F) of the Act.[19]

Finally, the proposed conforming and clean-up changes should help to ensure that the Framework is clear and accurate. The risk management functions described in the Framework allow the Clearing Agencies to continue their critical operations and services, and better understanding of the Framework should help promote the prompt and accurate clearance and settlement of securities transactions,

[19] 15 U.S.C. 78q–1(b)(3)(F).

consistent with Section 17A(b)(3)(F) of the Act.[20]

Accordingly, and for the reasons stated above, the Commission finds that the Proposed Rule Changes are consistent with Section 17A(b)(3)(F) of the Act.

B. Section 17Ad–22(e)(18)(iv)(C) of the Act

Section 17Ad–22(e)(18)(iv)(C) under the Act requires, among other things, that a covered clearing agency serving the U.S. Treasury market, like FICC, establish, implement, maintain, and enforce written policies and procedures reasonably designed to ensure that the covered clearing agency has appropriate means to facilitate access to clearance and settlement services of all eligible secondary market transactions in U.S. Treasury securities, including those of indirect participants, and that the board of directors for the covered clearing agency, like FICC, annually review such policies and procedures.[21] The Proposed Rule Changes, as described in Section III.B above, would establish an advisory council and framework for that council's work and would provide for annual review by the FICC Board of Directors as to FICC's policies and procedures regarding access to its clearance and settlement services.

One commenter addressed certain aspects of this proposal. Specifically, the commenter states that FICC's rules ''should provide that indirect participants will be allotted at least 50% of the representation on the council.'' [22] The Commission agrees that indirect participant representation on the proposed council is important. Under the Proposed Rule Changes, the advisory council would include representatives not only from FICC participants, but also their customers, that is, indirect participants who rely on FICC's services to access FICC's clearance and settlement services. Though not required, the use of an advisory council is consistent with Rule 17ad–22(e)(18)(iv)(C), and that rule does not mandate the particular composition of the advisory council that FICC has chosen to establish.

The Commission recently adopted Rule 17ad–25(j) [23] which requires each registered clearing agency to establish, implement, maintain, and enforce written policies and procedures reasonably designed to solicit, consider, and document its consideration of the views of participants and other relevant stakeholders. The Commission therefore has given clearing agencies discretion in the design and structure of stakeholder outreach.[24] The Commission also stated in the Rule 17ad–25(j) final rule release that such ''other relevant stakeholders'' generally would include investors, customers of clearing agency participants, and securities issuers.[25]

Pursuant to the Proposed Rule Changes, FICC would include indirect participants on its advisory council. The Commission supports the inclusion of indirect participants and encourages FICC to solicit views from a variety of indirect participants who may have differing needs.

The commenter further stated that FICC should, ''explicitly describe how and to what extent the feedback and recommendations made by the indirect participant members on the council (or indirect participants at large) will be considered and/or incorporated into the review process and potential changes to the access models.'' [26] Within the Proposed Rule Changes, FICC has outlined specific points of consideration, and specific data to document and analyze in furtherance of the annual review by the Board of Directors, or a committee thereof, of GSD access models as noted in Section III.B above. In addition, pursuant to the Proposed Rule Changes, the advisory council's review would be escalated to the FICC Board of Directors, or a committee thereof, to assist in their annual review. Rule 17ad–22(e)(18)(iv)(C) does not require the use of an advisory council.

Accordingly, the Commission finds that the Proposed Rule Changes are consistent with the requirements of Rule 17ad–22(e)(18)(iv)(C).[27]

V. Conclusion

On the basis of the foregoing, the Commission finds that the Proposed Rule Change is consistent with the requirements of the Act and in particular with the requirements of Section 17A of the Act [28] and the rules and regulations promulgated thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act [29] that proposed rule changes SR–DTC–2024–003, SR–FICC–2024–006, and SR–NSCC–2024–003 be, and hereby are, *approved*.[30]

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[31]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101693; File No. SR–NASDAQ–2024–068]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Deadline for a Listed Company To Notify Nasdaq of a Reverse Stock Split

November 21, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 8, 2024, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to modify its listing standards related to notification and disclosure of reverse stock splits to the Exchange. The proposed rule change will become operative on January 30, 2025.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/nasdaq/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On June 21, 2023, Nasdaq filed with the Commission a proposed rule change related to notification and disclosure of reverse stock splits.[3] On November 1, 2023, the Commission approved the proposed rule changes.[4] On March 1, 2024, Nasdaq adopted an additional change to the rule and Company Event Notification Form to further clarify the requirements.[5] Nasdaq is now proposing to amend the deadline for a company to notify Nasdaq of a reverse stock split from 5 business days to 10 calendar days in order to conform to the requirements of SEC Rule 10b–17 of the Act.[6]

Specifically, Rule 10b–17(a)(2) and (b) of the Act, require issuers to provide notice to FINRA (formerly the National Association of Securities Dealers, Inc.) no later than 10 calendar days prior to the date of record to participate in a stock split or reverse stock split, unless the impacted security is traded on a national securities exchange with a substantially comparable requirement to those set forth in Rule 10b–17(b)(1).[7]

Currently, Rule 5250(e)(7) and IM–5250–3 require a company conducting a reverse stock split to notify Nasdaq about certain details of the reverse stock split by submitting a complete Company Event Notification Form and a draft of the disclosure required by Rule 5250(b)(4) at least 5 business days (no later than 12:00 p.m. ET) prior to the anticipated market effective date, which includes all the information required by Rule 10b–17 applicable to reverse stock splits.

It has come to Nasdaq's attention that Nasdaq's current rule may not be considered substantially comparable to the 10 calendar-day prior notice required in Rule 10b–17 of the Act. Accordingly, Nasdaq is proposing to amend the deadline for a company to notify Nasdaq of a reverse stock split from no later than 12:00 p.m. ET 5 business days to 10 calendar days prior to the anticipated market effective date of the reverse stock split to ensure that Rule 5250(e)(7) and IM–5250–3 are substantially comparable to Rule 10b–17 and, therefore, that companies are compliant with Rule 10b–17 when they give notice under those rules.[8] Nasdaq is not amending the requirement to provide public disclosure under Rule 5250(b)(4) at least 2 business days (no later than 12:00 p.m. ET) prior to the anticipated market effective date. Nasdaq still believes that this timeframe provides sufficient notice to the public about reverse stock splits.[9]

Nasdaq is also submitting an updated Company Event Notification Form as *Exhibit 3* to the rule filing. Nasdaq is making conforming changes to the Form to reflect that the deadline for submission is 10 calendar days, rather than 5 business days.

In order to provide companies that have already planned action for a reverse stock split under the current rule's timeframe with the ability to effect their reverse stock split under that schedule, the proposed rule change will become operative on January 30, 2025.[10] Nasdaq believes that this delayed operative date will allow sufficient time for market participants to adjust to the new time frame. For example, a company may have already scheduled a shareholder meeting or submitted a preliminary or final proxy statement to the Commission with a view towards effecting a reverse stock split based on the currently required five-day notice period. Nasdaq believes this delayed operative date will reduce potential confusion for companies and investors about the transition and allow companies to appropriately plan for the change.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[11] in general, and furthers the objectives of Section 6(b)(5) of the Act,[12] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by aligning its rules related to notification of reverse stock splits with the notification requirements of Rule 10b–17 of the Act.

The proposal amends Rule 5250(e)(7) and IM–5250–3 to require a company to submit a complete Company Event Notification Form and a draft of the disclosure required by Rule 5250(b)(4) at least 10 calendar days (no later than 12:00 p.m. ET) prior to the anticipated market effective date, rather than 5 business days, and provides conforming updates to the Company Event Notification Form. Nasdaq believes that this will align Nasdaq's rules with the requirements of Rule 10b–17 under the Act, and will thereby help promote clarity, transparency and consistency for market participants and companies. Nasdaq also believes that the delayed operative date of the proposed rule change is consistent with Section 6(b)(5) of the Act in that it will allow sufficient time for market participants to adjust to the new time frame and will thereby help to reduce potential confusion for companies and investors.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed change is designed to align an existing rule and related Company Event Notification Form with the requirements of Rule 10b–17 of the Act and, therefore, Nasdaq believes that the proposed change will not impose a burden on competition.

[3] *See* Securities Exchange Act Release No. 98014 (July 28, 2023), 88 FR 51376 (August 3, 2023) (proposing SR–Nasdaq–2023–025).

[4] *See* Securities Exchange Act Release No. 98843 (November 1, 2023), 88 FR 76867 (November 7, 2023) (approving SR–Nasdaq–2023–025).

[5] *See* Securities Exchange Act Release No. 99734 (March 14, 2024), 89 FR 19905 (March 20, 2024).

[6] 17 CFR 240.10b–17.

[7] 17 CFR 240.10b–17(a)(2), (b)(1) and (b)(3).

[8] For example, if a company desires to effect a reverse stock split with a market effective date of Monday, September 23, the company would have to provide Nasdaq with a draft of the disclosure required by proposed Rule 5250(b)(4) and a complete Company Event Notification Form by 12:00 p.m. ET on Friday, September 13, and provide the public disclosure by 12:00 p.m. ET by Thursday, September 19. Note that this example presumes that there are no holidays during these dates. If a company withdraws and re-submits a Company Event Notification Form, the 10 calendar day period would be measured from the date the company re-submitted the form (rather than the date of the first submission).

[9] *See supra* note 3.

[10] For example, a company may have already scheduled a shareholder meeting or submitted a preliminary or final proxy statement to the Commission with a view towards effecting a reverse stock split during a compliance period under the Nasdaq Listing Rules. The additional time to provide 10 calendar days advance notice of the reverse stock split, instead of the currently required five business-day notice period, could prevent the company from regaining compliance during the compliance period.

[11] 15 U.S.C. 78f(b).

[12] 15 U.S.C. 78f(b)(5).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [13] and subparagraph (f)(6) of Rule 19b–4 thereunder.[14]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NASDAQ–2024–068 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NASDAQ–2024–068. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NASDAQ–2024–068 and should be submitted on or before December 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[15]

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2024–27761 Filed 11–26–24; 8:45 am]

BILLING CODE 8011–01–P

[13] 15 U.S.C. 78s(b)(3)(A)(iii).

[14] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101684; File No. SR–OCC–2024–014]

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of Designation of Longer Period for Commission Action on Proposed Rule Change, as Modified by Partial Amendment No. 1, by the Options Clearing Corporation Concerning Its Process for Adjusting Certain Parameters in Its Proprietary System for Calculating Margin Requirements During Periods When the Products It Clears and the Markets It Serves Experience High Volatility

November 21, 2024.

On October 1, 2024, the Options Clearing Corporation (''OCC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change SR–OCC–2024–014, pursuant to Section 19(b) of the Securities Exchange Act of 1934 (''Exchange Act'') [1] and Rule 19b–4 [2] thereunder, to codify OCC's process for adjusting certain parameters in its proprietary system for calculating margin requirements during periods when the products OCC clears and the markets it serves experience high volatility.[3] The proposed rule change, as modified by Partial Amendment no. 1 (hereinafter, the ''Proposed Rule Change''), was published for public comment in the **Federal Register** on October 9, 2024.[4] The Commission has received no comments regarding the Proposed Rule Change.

Section 19(b)(2)(i) of the Exchange Act [5] provides that, within 45 days of the publication of notice of the filing of a proposed rule change, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved unless the Commission extends the period within which it must act as provided in Section 19(b)(2)(ii) of the Exchange Act.[6] Section 19(b)(2)(ii) of the Exchange Act allows the Commission to designate a longer period for review (up to 90 days from the publication of notice of the filing of a proposed rule change) if the Commission finds such longer period to be appropriate and publishes

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Notice of Filing *infra* note 4, at 89 FR 81958.

[4] Securities Exchange Act Release No. 101246 (Oct. 3, 2024), 89 FR 81958 (Oct. 9, 2024) (File No. SR–OCC–2024–014) (''Notice of Filing'').

[5] 15 U.S.C. 78s(b)(2)(i).

[6] 15 U.S.C. 78 s(b)(2)(ii).

its reasons for so finding, or as to which the self-regulatory organization consents.[7]

The 45th day after publication of the Notice of Filing is November 23, 2024. In order to provide the Commission with sufficient time to consider the Proposed Rule Change, the Commission finds that it is appropriate to designate a longer period within which to take action on the Proposed Rule Change and therefore is extending this 45-day time period.

Accordingly, the Commission, pursuant to Section 19(b)(2) of the Exchange Act,[8] designates January 7, 2025, as the date by which the Commission shall either approve, disapprove, or institute proceedings to determine whether to disapprove proposed rule change SR–OCC–2024–014.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[9]

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101683; File No. SR–NYSEARCA–2024–96]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 7.37–E

November 21, 2024.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act''),[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on November 7, 2024, NYSE Arca, Inc. (''NYSE Arca'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.37–E to specify the Exchange's source of data feeds from Long-Term Stock Exchange, Inc. (''LTSE'') for purposes of order handling, order execution, order routing, and regulatory compliance. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update and amend the use of data feeds table in Rule 7.37–E(d), which sets forth on a market-by-market basis the specific securities information processor (''SIP'') and proprietary data feeds that the Exchange utilizes for the handling, execution, and routing of orders, and for performing the regulatory compliance checks related to each of those functions. Specifically, the Exchange proposes to amend the table in Rule 7.37–E(d) to specify that, with respect to LTSE, the Exchange will receive a LTSE direct feed as its primary source of data for order handling, order execution, order routing, and regulatory compliance, and will use the SIP Data Feed as its secondary source for data from LTSE.

The Exchange proposes to make this change operative in the fourth quarter of 2024, and, in any event, before the end of the first quarter of 2025. The Exchange proposes to announce the implementation date of this change by Trader Update.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,[4] in general, and furthers the objectives of Section 6(b)(5),[5] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest. Additionally, the Exchange believes that the proposed rule change is consistent with the Section 6(b)(5) requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes its proposal to update the table in Rule 7.37(e) to include the LTSE direct feed will ensure that the Rule correctly identifies and publicly states on a market-by-market basis all of the specific SIP and proprietary data feeds that the Exchange utilizes for the handling, execution, and routing of orders, and for performing the regulatory compliance checks for each of those functions. The proposed rule change also removes impediments to and perfects the mechanism of a free and open market and protects investors and the public interest by providing additional specificity, clarity, and transparency in the Exchange's rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, the Exchange believes that the proposal will enhance competition because providing the public and market participants with up-to-date information about the data feeds the Exchange will use for the handling, execution, and routing of orders, as well as for regulatory compliance would enhance transparency and enable investors to better assess the quality of the Exchange's execution and routing services. The Exchange also believes the proposal would enhance competition because it would potentially enhance the performance of its order handling and execution of orders in equity securities by receiving market data directly from LTSE. Finally, the proposed rule change would not impact competition between market participants because it will affect all market participants equally.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[6] and Rule 19b–4(f)(6) thereunder.[7] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[8] and Rule 19b–4(f)(6)(iii) thereunder.[9]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[10] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSEARCA–2024–96 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEARCA–2024–96. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSEARCA–2024–96 and should be submitted on or before December 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101682; File No. SR–NYSENat–2024–30]

Self-Regulatory Organizations; NYSE National, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 7.37

November 21, 2024.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act''),[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on November 7, 2024, NYSE National, Inc. (''NYSE National'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.37 to specify the Exchange's source of data feeds from Long-Term Stock Exchange, Inc. (''LTSE'') for purposes of order handling, order execution, order routing, and regulatory compliance. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update and amend the use of data feeds table in Rule 7.37(d), which sets forth on a market-by-market basis the specific securities information processor (''SIP'') and proprietary data feeds that the Exchange utilizes for the handling, execution, and routing of orders, and for performing the regulatory compliance checks related to each of those functions. Specifically, the Exchange proposes to amend the table in Rule 7.37(d) to specify that, with respect to LTSE, the Exchange will receive a LTSE direct feed as its primary source of data for order handling, order execution, order routing, and regulatory compliance, and will use the SIP Data Feed as its secondary source for data from LTSE.

The Exchange proposes to make this change operative in the fourth quarter of 2024, and, in any event, before the end of the first quarter of 2025. The Exchange proposes to announce the implementation date of this change by Trader Update.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,[4] in general, and furthers the objectives of Section 6(b)(5),[5] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest. Additionally, the Exchange believes that the proposed rule change is consistent with the Section 6(b)(5) requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes its proposal to update the table in Rule 7.37(e) to include the LTSE direct feed will ensure that the Rule correctly identifies and publicly states on a market-by-market basis all of the specific SIP and proprietary data feeds that the Exchange utilizes for the handling, execution, and routing of orders, and for performing the regulatory compliance checks for each of those functions. The proposed rule change also removes impediments to and perfects the mechanism of a free and open market and protects investors and the public interest by providing additional specificity, clarity, and transparency in the Exchange's rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, the Exchange believes that the proposal will enhance competition because providing the public and market participants with up-to-date information about the data feeds the Exchange will use for the handling, execution, and routing of orders, as well as for regulatory compliance would enhance transparency and enable investors to better assess the quality of the Exchange's execution and routing services. The Exchange also believes the proposal would enhance competition because it would potentially enhance the performance of its order handling and execution of orders in equity securities by receiving market data directly from LTSE. Finally, the proposed rule change would not impact competition between market participants because it will affect all market participants equally.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[6] and Rule 19b–4(f)(6) thereunder.[7] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[8] and Rule 19b–4(f)(6)(iii) thereunder.[9]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[10] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSENat–2024–30 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSENat–2024–30. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101691; File No. SR–Phlx–2024–57]

Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Fees for Connectivity and Co-Location Services

November 21, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 8, 2024, Nasdaq PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's fees for connectivity and co-location services, as described further below.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/phlx/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend the Exchange's fees relating to connectivity and co-location services.[3] Specifically, the Exchange proposes to raise its fees for connectivity and co-location services in General 8 as well as certain fees related to its Testing Facilities in Equity 7, Section 3 by 10%, with certain exceptions.

General 8, Section 1 includes the Exchange's fees that relate to connectivity, including fees for cabinets, external telco/inter-cabinet connectivity fees, fees for connectivity to the Exchange, fees for connectivity to third party services, fees for market data connectivity, fees for cabinet power install, and fees for additional charges and services. General 8, Section 2 includes the Exchange's fees for direct connectivity services, including fees for direct circuit connection to the Exchange, fees for direct circuit connection to third party services, and fees for point of presence connectivity. With the exception of the Exchange's GPS Antenna fees and the Cabinet Proximity Option Fee for cabinets with power density >10kW,[4] the Exchange proposes to increase its fees throughout General 8 by 10%.

In addition to increasing fees in General 8, the Exchange also proposes to increase certain fees in Equity 7, Section 3, which relate to the Testing Facility. Equity 7, Section 3 provides that subscribers to the Testing Facility located in Carteret, New Jersey shall pay a fee of $1,000 per hand-off, per month for connection to the Testing Facility. The hand-off fee includes either a 1Gb or 10Gb switch port and a cross connect to the Testing Facility. In addition, Equity 7, Section 3 provides that subscribers shall also pay a one-time installation fee of $1,000 per hand-off. The Exchange proposes to increase these aforementioned fees by 10% to require that subscribers to the Testing Facility shall pay a fee of $1,100 per hand-off, per month for connection to the Testing Facility and a one-time installation fee of $1,100 per hand-off.

The proposed increases in fees would enable the Exchange to maintain and improve its market technology and services to remain competitive with its peers. Over the years, customer demand for more sophisticated, higher-throughput, lower-latency, and higher-power connectivity solutions has increased. The Exchange continues to invest in maintaining, improving, and enhancing its connectivity and co-location products, services, and facilities—for the benefit and often at the behest of its customers. Such enhancements include refreshing hardware and expanding Nasdaq's existing co-location facility to offer customers additional space and power. Nevertheless, and with the exception of fees that were established as part of a new service in 2017 (and have remained unchanged since their adoption), the Exchange has not increased any of the fees included in the proposal since prior to 2017, and many of the fees date back to between 2010 and 2014. For each of

[11] 17 CFR 200.30–3(a)(12), (59).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The Exchange initially filed the proposed pricing change on March 1, 2024 (SR–PHLX–2024–08). On April 29, 2024, the Exchange withdrew that filing and submitted SR–Phlx–2024–019. The Exchange withdrew SR–PHLX–2024–019 and replaced it with SR–PHLX–2024–27. The instant filing replaces SR–PHLX–2024–027, which was withdrawn on August 23, 2024. The Exchange withdrew SR–PHLX–2024–07 and replaced it with SR–PHLX–2024–45 on September 10, 2024. On October 11, 2024, the Exchange replaced SR–PHLX–2024–45 with SR–PHLX–2024–52. The instant filing replaces SR–PHLX–2024–52.

[4] The Exchange proposes to exclude the GPS Antenna fees from the proposed fee increase because, unlike the other fees in General 8, the Exchange recently increased its GPS Antenna fees. *See* Securities Exchange Act Release No. 34–99125 (December 8, 2023), 88 FR 86705 (December 14, 2023) (SR–Phlx–2023–53). The Exchange also proposes to exclude the Cabinet Proximity Option Fee for cabinets with power density >10kW from the proposed fee increase because the Exchange recently established such fee. *See* Securities Exchange Act Release No. 34–100197 (May 21, 2024), 89 FR 46185 (May 28, 2024) (SR–Phlx–2024–23). Similarly, the Exchange proposes to exclude from the proposed fee increase those fees that the Exchange recently established for services in its new NY11–4 expansion facility. *See* Securities Exchange Act Release No. 34–101268 (October 7, 2024), 89 FR 82661 (October 11, 2024) (SR–PHLX–2024–49).

the connectivity products and services that pre-date 2017, inflation (as measured using the ''Data PPI'' metric described below) has been between roughly 15–17%, and in no instance has such inflation been less than 10%. Nevertheless, the Exchange proposes to increase its fees only with respect to the 10% inflation that has occurred since 2017.

As discussed below, the Exchange proposes to adjust its fees by an industry- and product-specific inflationary measure. It is reasonable and consistent with the Act for the Exchange to recoup its investments, at least in part, by adjusting its fees. Continuing to operate at fees frozen at 2010–2017 levels impacts the Exchange's ability to enhance its offerings and the interests of market participants and investors.

The fee increases the Exchange proposes are based on an industry-specific Producer Price Index (''PPI''), which is a tailored measure of inflation.[5] As a general matter, the Producer Price Index is a family of indexes that measures the average change over time in selling prices received by domestic producers of goods and services. PPI measures price change from the perspective of the seller. This contrasts with other metrics, such as the Consumer Price Index (''CPI''), that measure price change from the purchaser's perspective.[6] About 10,000 PPIs for individual products and groups of products are tracked and released each month.[7] PPIs are available for the output of nearly all industries in the goods-producing sectors of the U.S. economy—mining, manufacturing, agriculture, fishing, and forestry—as well as natural gas, electricity, and construction, among others. The PPI program covers approximately 69 percent of the service sector's output, as measured by revenue reported in the 2017 Economic Census.

For purposes of this proposal, the relevant industry-specific PPI is the Data Processing and Related Services PPI (''Data PPI''), which is an industry net-output PPI that measures the average change in selling prices received by companies that provide data processing services.

The Data PPI was introduced in January 2002 by the Bureau of Labor Statistics (''BLS'') as part of an ongoing effort to expand Producer Price Index coverage of the services sector of the U.S. economy and is identified as NAICS–518210 in the North American Industry Classification System.[8] According to the BLS ''[t]he primary output of NAICS 518210 is the provision of electronic data processing services. In the broadest sense, computer services companies help their customers efficiently use technology. The processing services market consists of vendors who use their own computer systems—often utilizing proprietary software—to process customers' transactions and data. Companies that offer processing services collect, organize, and store a customer's transactions and other data for record-keeping purposes. Price movements for the NAICS 518210 index are based on changes in the revenue received by companies that provide data processing services. Each month, companies provide net transaction prices for a specified service. The transaction is an actual contract selected by probability, where the price-determining characteristics are held constant while the service is repriced. The prices used in index calculation are the actual prices billed for the selected service contract.'' [9]

The Exchange believes the Data PPI is an appropriate measure to be considered in the context of the proposed rule change to modify the fee for its connectivity products because the Exchange uses its ''own computer systems'' and ''proprietary software,'' *i.e.,* its own data center and proprietary matching engine software, respectively, to collect, organize, store and report customers' transactions in U.S. equity securities on the Exchange's proprietary trading platform. In other words, the Exchange is in the business of data processing and related services.

For purposes of this proposed rule change, the Exchange examined the Data PPI value for the period from January 2017 to August 2024. The Data PPI had a starting value of 105.6 in January 2017 and an ending value of 116.022 in August 2024, a 10.422% increase. This indicates that companies who are also in the data storage and processing business have generally increased prices for a specified service covered under NAICS 518210 by an average of 10.422% during this period. Based on that percentage change, the Exchange proposes to make a one-time fee increase of only 10%, which reflects an increase covering roughly the entire period since the last price adjustments to these fees were made.

The Exchange further believes the Data PPI is an appropriate measure for purposes of the proposed rule change on the basis that it is a stable metric with limited volatility, unlike other consumer-side inflation metrics. In fact, the Data PPI has not experienced a greater than 2.16% increase for any one calendar year period since Data PPI was introduced into the PPI in January 2002. The average calendar year change from January 2002 to December 2023 was .62%, with a cumulative increase of 15.67% over this 21-year period. The Exchange believes the Data PPI is considerably less volatile than other inflation metrics such as CPI, which has had individual calendar-year increases of more than 6.5%, and a cumulative increase of over 73% over the same period.[10]

The Exchange believes the Data PPI, and significant investments into, and enhanced performance of, the Exchange support the reasonableness of the proposed fee increases.[11]

These proposed fee increases will be immediately effective upon filing. However, going forward and until December 1, 2024, the Exchange will waive all fees set forth herein to the extent that such fees exceed the levels that would have been charged for the same products and services purchased during that time period, had such fees been calculated at the rates set forth in SR–PHLX–2024–45 (*i.e.,* pricing reflective of a 5.5% increase from prior fee levels). This waiver is reasonable, equitable, and not unfairly discriminatory because it will afford all customers in excess of the 30-day prior notice period for fee changes set forth in the Exchange's service terms.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[12] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[13] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges

among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

This belief is based on two factors. First, the current fees do not properly reflect the quality of the services and products, as fees for the services and products in question have been static in nominal terms, and therefore falling in real terms due to inflation. Second, the Exchange believes that investments made in enhancing the capacity and speed of Exchange systems increase the performance of the services and products.

The Proposed Rule Change Is Reasonable

As noted above, the Exchange has not increased any of the fees included in the proposal since 2017 or earlier. However, in the years following the last fee increases, the Exchange has made significant investments in upgrades to its connectivity products, services, and facilities, enhancing the quality of its services. In other words, Exchange customers have greatly benefitted, while the Exchange's ability to recoup its investments has been hampered. Between 2017 and 2024, the inflation rate is 3.64% per year, on average, producing a cumulative inflation rate of 28.43%.[14] Using the more targeted inflation number of Data PPI, the cumulative inflation rate was 10.422%. The exchange believes the Data PPI is a reasonable metric to base this fee increase on because it is targeted to producer-side increases in the data processing industry.

Notwithstanding inflation, as noted above, the Exchange has not increased its fees at all for over seven years for the subject services. The proposed fee changes represent a modest increase from the current fees. The Exchange believes the proposed fee increase is reasonable in light of the Exchange's continued expenditure in maintaining a robust technology ecosystem. Furthermore, the Exchange continues to invest in maintaining and enhancing its connectivity products—for the benefit and often at the behest of its customers and global investors. Such enhancements include refreshing all aspects of the technology ecosystem including software, hardware, and network while introducing new and innovative products and expanded and modernized facilities.[15] The goal of the enhancements discussed above, among other things, is to provide faster, higher-capacity, and more modern connectivity products and services. Accordingly, the Exchange continues to expend resources to innovate and modernize technology so that it may benefit its members in offering its connectivity products and services.

The Proposed Fees Are Equitably Allocated and Not Unfairly Discriminatory

The Exchange believes that the proposed fee increases are equitably allocated and not unfairly discriminatory because they would apply to all market participants that choose to purchase connectivity products and services from the Exchange. Any participant that chooses to purchase the Exchange's connectivity products and services would be subject to the same Fee Schedule, regardless of what type of business they operate or the use they plan to make use of the products and services. Additionally, the fee increase would be applied uniformly to market participants without regard to Exchange membership status or the extent of any other business with the Exchange or affiliated entities. The Exchange also believes that the proposal represents an equitable allocation of reasonable dues, fees and other charges because Exchange fees have fallen in real terms during the relevant period. Finally, the Exchange believes that the proposed fee changes are not unfairly discriminatory because the fees would be assessed uniformly across all market participants, in the same manner they are today, that voluntarily purchase the Exchange's connectivity products and services, which would remain available for purchase by all market participants.

These proposed fee increases will be immediately effective upon filing. However, going forward and until December 1, 2024, the Exchange will waive all fees set forth herein to the extent that such fees exceed the levels that would have been charged for the same products and services purchased during that time period, had such fees been calculated at the rates set forth in SR–PHLX–2024–45 (*i.e.,* pricing reflective of a 5.5% increase from prior fee levels). This waiver is reasonable, equitable, and not unfairly discriminatory because it will afford all customers in excess of the 30-day prior notice period for fee changes set forth in the Exchange's service terms.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed fees will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Intramarket Competition

The Exchange believes that the proposed fees do not put any market participants at a relative disadvantage compared to other market participants. As noted above, the fee schedule would continue to apply to all purchasers of the Exchange's connectivity products and services in the same manner as it does today albeit at inflation-adjusted rates for certain fees, and customers may choose whether to purchase these products and services at all. The Exchange also believes that the level of the proposed fees neither favor nor penalize one or more categories of market participants in a manner that would impose an undue burden on competition. Likewise, the proposed fee waiver described above will apply to all purchasers of the Exchange's connectivity products and services in the same manner and therefore will not burden competition among them.

Intermarket Competition

The Exchange believes that the proposed fees do not impose a burden on competition or on other SROs that is not necessary or appropriate. In determining the proposed fees, the Exchange utilized an objective and stable metric with limited volatility. Utilizing Data PPI over a specified period of time is a reasonable means of recouping the Exchange's investment in maintaining and enhancing its connectivity products, services, and facilities. The Exchange believes utilizing Data PPI, a tailored measure of inflation, to increase certain fees for connectivity products and services to recoup the Exchange's investment in maintaining and enhancing such products, services, and its facilities would not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

[14] *See https://www.officialdata.org/us/inflation/2017?amount=1.*

[15] *See, e.g.,* Securities Exchange Act Release No.34–101079 (September 18, 2024), 89 FR 77931 (September 24, 2024) (SR–PHLX–2024–47 (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Expand [the Exchange's] Co-Location Services).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[16]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–Phlx–2024–57 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–Phlx–2024–57. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–Phlx–2024–57 and should be submitted on or before December 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101679; File No. SR–NYSE–2024–74]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 7.37

November 21, 2024.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act''),[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on November 7, 2024, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.37 to specify the Exchange's source of data feeds from Investors' Exchange, LLC (''IEX'') for purposes of order handling, order execution, order routing, and regulatory compliance. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update and amend the use of data feeds table in Rule 7.37(e), which sets forth on a market-by-market basis the specific securities information processor (''SIP'') and proprietary data feeds that the Exchange utilizes for the handling, execution, and routing of orders, and for performing the regulatory compliance checks related to each of those functions. Specifically, the Exchange proposes to amend the table in Rule 7.37(e) to specify that, with respect to IEX, the Exchange will receive an IEX direct feed as its primary source of data for order handling, order execution, order routing, and regulatory compliance, and will use the SIP Data Feed as its secondary source for data from IEX.

The Exchange proposes to make this change operative in the fourth quarter of 2024, and, in any event, before the end of the first quarter of 2025. The Exchange proposes to announce the implementation date of this change by Trader Update.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,[4] in general, and furthers the objectives of Section 6(b)(5),[5] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to

[4] 15 U.S.C. 78f(b).

[5] 15 U.S.C. 78f(b)(5).

remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest. Additionally, the Exchange believes that the proposed rule change is consistent with the Section 6(b)(5) requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes its proposal to update the table in Rule 7.37(e) to include the IEX direct feed will ensure that the Rule correctly identifies and publicly states on a market-by-market basis all of the specific SIP and proprietary data feeds that the Exchange utilizes for the handling, execution, and routing of orders, and for performing the regulatory compliance checks for each of those functions. The proposed rule change also removes impediments to and perfects the mechanism of a free and open market and protects investors and the public interest by providing additional specificity, clarity, and transparency in the Exchange's rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, the Exchange believes that the proposal will enhance competition because providing the public and market participants with up-to-date information about the data feeds the Exchange will use for the handling, execution, and routing of orders, as well as for regulatory compliance would enhance transparency and enable investors to better assess the quality of the Exchange's execution and routing services. The Exchange also believes the proposal would enhance competition because it would potentially enhance the performance of its order handling and execution of orders in equity securities by receiving market data directly from IEX. Finally, the proposed rule change would not impact competition between market participants because it will affect all market participants equally.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[6] and Rule 19b–4(f)(6) thereunder.[7] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[8] and Rule 19b–4(f)(6)(iii) thereunder.[9]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[10] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSE–2024–74 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSE–2024–74. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSE–2024–74 and should be submitted on or before December 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101680; File No. SR–NYSENAT–2024–29]

Self-Regulatory Organizations; NYSE National, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 7.37

November 21, 2024.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the

[1] 15 U.S.C. 78s(b)(1).

''Act''),[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on November 7, 2024, NYSE National, Inc. (''NYSE National'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.37 to specify the Exchange's source of data feeds from Investors' Exchange, LLC (''IEX'') for purposes of order handling, order execution, order routing, and regulatory compliance. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update and amend the use of data feeds table in Rule 7.37(d), which sets forth on a market-by-market basis the specific securities information processor (''SIP'') and proprietary data feeds that the Exchange utilizes for the handling, execution, and routing of orders, and for performing the regulatory compliance checks related to each of those functions. Specifically, the Exchange proposes to amend the table in Rule 7.37(d) to specify that, with respect to IEX, the Exchange will receive an IEX direct feed as its primary source of data for order handling, order execution, order routing, and regulatory compliance, and will use the SIP Data Feed as its secondary source for data from IEX.

The Exchange proposes to make this change operative in the fourth quarter of 2024, and, in any event, before the end of the first quarter of 2025. The Exchange proposes to announce the implementation date of this change by Trader Update.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,[4] in general, and furthers the objectives of Section 6(b)(5),[5] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest. Additionally, the Exchange believes that the proposed rule change is consistent with the Section 6(b)(5) requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes its proposal to update the table in Rule 7.37(d) to include the IEX direct feed will ensure that the Rule correctly identifies and publicly states on a market-by-market basis all of the specific SIP and proprietary data feeds that the Exchange utilizes for the handling, execution, and routing of orders, and for performing the regulatory compliance checks for each of those functions. The proposed rule change also removes impediments to and perfects the mechanism of a free and open market and protects investors and the public interest by providing additional specificity, clarity, and transparency in the Exchange's rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, the Exchange believes that the proposal will enhance competition because providing the public and market participants with up-to-date information about the data feeds the Exchange will use for the handling, execution, and routing of orders, as well as for regulatory compliance would enhance transparency and enable investors to better assess the quality of the Exchange's execution and routing services. The Exchange also believes the proposal would enhance competition because it would potentially enhance the performance of its order handling and execution of orders in equity securities by receiving market data directly from IEX. Finally, the proposed rule change would not impact competition between market participants because it will affect all market participants equally.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[6] and Rule 19b–4(f)(6) thereunder.[7] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[8] and Rule 19b–4(f)(6)(iii) thereunder.[9]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings

In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

under Section 19(b)(2)(B) [10] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSENAT–2024–29 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSENAT–2024–29. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSENAT–2024–29 and should be submitted on or before December 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101676; File No. SR–NYSEAMER–2024–72]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing and Immediate Effectiveness of Proposed Change To Harmonize NYSE American Rule 4530

November 21, 2024.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on November 12, 2024, NYSE American LLC (''NYSE American'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to harmonize NYSE American Rule 4530 (Reporting Requirements) with certain changes by the Financial Industry Regulatory Authority, Inc. (''FINRA'') to FINRA Rule 4530. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to harmonize NYSE American Rule 4530 (Reporting Requirements) with certain changes by FINRA to FINRA Rule 4530.[4]

Background and Proposed Rule Change

NYSE American Rule 4530 requires member organizations to promptly report to the Exchange specified events, such as statutory disqualifications and quarterly statistical and summary information regarding written customer complaints. The Exchange adopted the text of FINRA Rule 4530 in 2011 to replace comparable provisions in its legacy reporting Rule 351.[5]

In 2013, FINRA amended Rule 4530(e) to provide an exception from the reporting requirement for information disclosed on the Form U4 (Uniform Application for Securities Industry Registration or Transfer) in order to avoid duplicative reporting.[6] In addition, in 2013, FINRA added Supplementary Material .10 to FINRA Rule 4530 to provide that, for purposes of FINRA Rules 4530(a)(1)(A), (C) and (D) only, members are not required to report findings and actions by FINRA.[7]

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] This proposed change aligns with NYSE Rule 4530, which was recently updated to conform with FINRA 4530 regarding Reporting Requirements. *See* Securities Exchange Act Release No. 100168 (May 17, 2024), 89 FR 45712 (May 23, 2024) (SR–NYSE–2024–28). *See also* NYSE Rule 4530.

[5] *See* Securities Exchange Act Release No. 64784 (June 30, 2011), 76 FR 39947 (July 7, 2011) (SR–NYSEAMEX–2011–42). FINRA Rule 4530, adopted in 2010, was modeled after NYSE American Rule 351(a)-(d) and NASD Rule 3070. *See* Securities Exchange Act Release No. 63260 (November 5, 2010), 75 FR 69508 (November 12, 2010) (SR–FINRA–2010–034). *See also* Securities Exchange Act Release No. 64560 (May 27, 2011), 76 FR 32246 (June 3, 2011) (SR–FINRA–2011–024).

[6] *See* Securities Exchange Act Release No. 68701 (January 18, 2013), 78 FR 5532 (January 25, 2013) (SR–FINRA–2013–006) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating to FINRA Rule 4530 (Reporting Requirements)).

[7] *See id.* FINRA Rule 4530(a)(1)(A) requires a member to report external findings regarding the member or an associated person. FINRA Rules 4530(a)(1)(C) and (D) require a member to report regulatory actions against the member or an associated person. FINRA Rules 4530(a)(1)(A), (C) and (D) do not expressly exclude findings and actions by FINRA. *See generally id.* NYSE American Rules 4530(a)(1)(A), (C) and (D) are virtually identical to the FINRA rules.

In 2015, FINRA again amended FINRA Rule 4530 to provide an exception from the reporting requirements of paragraph (a)(1)(H) of the rule for dealings with a member or associated person subject to statutory disqualification, if that member or associated person has been approved (or is otherwise permitted pursuant to FINRA rules and the federal securities laws) to be a member or to be associated with a member.[8]

The Exchange proposes to incorporate each of these amendments into NYSE American Rule 4530, as follows.

NYSE American Rule 4530(a)(1)(H)

NYSE American Rule 4530(a)(1)(H) requires member organizations to promptly report whenever the member organization or an associated person of the member organization is subject to a ''statutory disqualification'' as defined in the Act.[9] The rule also requires a member organization to report whenever the member organization or an associated person thereof is involved in the sale of any financial instrument, the provision of any investment advice or the financing of any such activities with any person that is subject to a ''statutory disqualification'' as defined in the Act. The report must include the name of the person subject to the statutory disqualification and details concerning the disqualification.

The Exchange proposes, consistent with current FINRA Rule 4530(a)(1)(H), to exclude activities with a disqualified member or associated person that has been approved (or is otherwise permitted pursuant to FINRA rules and the federal securities laws) to be a member organization or associated with a member organization. To effectuate this change, the Exchange proposes to add the following deletions (bracketed) and additions (italicized) to NYSE American Rule 4530(a)(1)(H):

(H) is *(i) subject to a ''statutory disqualification'' as that term is defined in the Exchange Act*[,] or [is]*(ii)* involved in the sale of any financial instrument, the provision of any investment advice or the financing of any such activities with any person [who]*that* is[,] subject to a ''statutory disqualification'' as that term is defined in the Exchange Act*, provided, however, that this requirement shall not apply to activities with a member organization or an associated person that has been approved (or is otherwise permitted pursuant to Exchange rules and the federal securities laws) to be a member organization or to be associated with a member organization.* The report shall include the name of the person subject to the statutory disqualification and details concerning the disqualification; or

With the exception of conforming changes reflecting the Exchange's membership. the proposed text is identical to FINRA's counterpart rule.

NYSE American Rule 4530(e)

NYSE American Rule 4530(e) currently provides that a member organization is not required to report a specified event under the rule if it reports that event on the Form U5 (Uniform Termination Notice for Securities Industry Registration), consistent with the requirements of that form. The exception does not extend to the reporting of quarterly statistical and summary customer complaint information under the rule. In order to eliminate duplicative reporting of information disclosed on a Form U4, and consistent with FINRA's current rule, the Exchange proposes to provide a similar exception for certain specified events reported on the Form U4. To effectuate this change, the Exchange proposes to add the following deletions (bracketed) and additions (italicized) to NYSE American Rule 4530(e):

(e) Nothing contained in this Rule shall eliminate, reduce or otherwise abrogate the responsibilities of a member organization or person associated with a member organization to promptly disclose required information on the Forms BD, U4 or U5, as applicable, to make any other required filings or to respond to the Exchange with respect to any customer complaint, examination or inquiry. In addition, member organizations are required to comply with the reporting obligations under paragraphs (a), (b) and (d) of this Rule, regardless of whether the information is reported or disclosed pursuant to any other rule or requirement, including the requirements of the Form[s] BD [or U4]. However, a member organization need not report an event otherwise required to be reported under *(1) paragraph (a)(1) of this Rule if the member organization discloses the event on the Form U4, consistent with the requirements of that form, and indicates, in such manner and format that the Exchange may require, that such disclosure satisfies the requirements of paragraph (a)(1) of this Rule, as applicable; or (2)* paragraphs (a) or (b) of this Rule if the member organization discloses the event on the Form U5, consistent with the requirements of that form.

With the exception of conforming changes reflecting the Exchange's membership, the proposed text is identical to FINRA's counterpart rule.

NYSE American Rule 4530, Supplementary Material .11

Finally, the Exchange proposes to adopt the text of FINRA Rule 4530, Supplementary Material .10, as new NYSE American Rule 4530, Supplementary Material .11.

NYSE American Rule 4530(a)(1)(A) requires a member organization to report that the member organization or an associated person has been found to have violated any securities-, insurance-, commodities-, financial- or investment-related laws, rules, regulations or standards of conduct of any domestic or foreign regulatory body, self-regulatory organization or business or professional organization.

NYSE American Rule 4530(a)(1)(C) requires a member organization to report that the member organization or an associated person thereof has been named as a defendant or respondent in any proceeding brought by a domestic or foreign regulatory body or self-regulatory organization alleging the violation of any provision of the Act, or of any other federal, state or foreign securities, insurance or commodities statute, or of any rule or regulation thereunder, or of any provision of the by-laws, rules or similar governing instruments of any securities, insurance or commodities domestic or foreign regulatory body or self-regulatory organization.

Finally, NYSE American Rule 4530(a)(1)(D) requires a member organization to report that the member organization or associated person thereof has been denied registration or is expelled, enjoined, directed to cease and desist, suspended or otherwise disciplined by any securities, insurance or commodities industry domestic or foreign regulatory body or self-regulatory organization or is denied membership or continued membership in any such self-regulatory organization; or is barred from becoming associated with any member organization of any such self-regulatory organization.

Since NYSE American Rules 4530(a)(1)(A), (C) and (D) do not expressly exclude findings and actions by the Exchange or FINRA, the Exchange proposes to add the following new Supplementary Material .11 to NYSE American Rule 4530 (additions italicized):

.11 For purposes of paragraphs (a)(1)(A), (C) and (D) of this Rule only, member organizations are not required to report findings and actions by the Exchange or by FINRA.

With the exception of adding findings and actions by the Exchange, the proposed Supplementary Material .11 to NYSE American Rule 4530 is identical to FINRA Rule 4530.10.

[8] *See* Securities Exchange Act Release No. 74953 (May 13, 2015), 80 FR 28740 (May 19, 2015) (SR–FINRA–2015–011) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating to the Reporting Requirements of FINRA Rule 4530(a)(1)(H)).

[9] *See* 15 U.S.C. 78c(a)(39).

Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,[10] in general, and furthers the objectives of Section 6(b)(5),[11] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest.

The Exchange believes that the proposed rule changes support the objectives of the Act by eliminating unnecessary reporting of information to the Exchange and allowing the Exchange to use its resources more efficiently. The Exchange believes that harmonizing Exchange rules modeled on FINRA's rules would result in less burdensome and more efficient regulatory compliance without compromising the regulatory information available to the Exchange. As previously noted, except for changes reflecting the Exchange's membership, the proposed additional text for NYSE American Rule 4530 is identical to the text in FINRA Rule 4530. As such, the proposed rule change would facilitate rule harmonization among self-regulatory organizations with respect to the reporting requirements, thereby fostering cooperation and coordination with persons engaged in facilitating transactions in securities and will remove impediments to and perfect the mechanism of a free and open market and a national market system.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address competitive issues but rather would reduce potential compliance burdens on member organizations by eliminating potentially duplicative information under NYSE American Rule 4530. Specifically, the proposed rule change would reduce potential compliance burdens on firms by eliminating the requirements under NYSE American Rule 4530(a)(1)(H) to report to the Exchange each instance where a member organization or an associated person is involved in a financial activity with a disqualified member organization or associated person that has been approved or is otherwise permitted to be a member organization or associated with a member organization. Similarly, the proposed amendment to NYSE American Rule 4530(e) to provide an exception for information disclosed on the Form U4 will eliminate the burden on member organizations of having to report the same event twice. Finally, the addition of Supplementary Material .11 to NYSE American Rule 4530 eliminates the burden on member organizations of having to report findings and actions by the Exchange or by FINRA for purposes of NYSE American Rules 4530(a)(1)(A), (C) and (D).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[12] and Rule 19b–4(f)(6) thereunder.[13] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[14]

A proposed rule change filed under Rule 19b–4(f)(6)[15] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[16] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[17] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–NYSEAMER–2024–72 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEAMER–2024–72. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10

[10] 15 U.S.C. 78f(b).

[11] 15 U.S.C. 78f(b)(5).

[12] 15 U.S.C. 78s(b)(3)(A)(iii).

[13] 17 CFR 240.19b–4(f)(6).

[14] Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[15] 17 CFR 240.19b–4(f)(6).

[16] 17 CFR 240.19b–4(f)(6)(iii).

[17] 15 U.S.C. 78s(b)(2)(B).

a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSEAMER–2024–72 and should be submitted on or before December 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[18]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101681; File No. SR–NYSEARCA–2024–95]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 7.37–E

November 21, 2024.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act''),[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on November 18, 2024, NYSE Arca, Inc. (''NYSE Arca'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.37–E to specify the Exchange's source of data feeds from Investors' Exchange, LLC (''IEX'') for purposes of order handling, order execution, order routing, and regulatory compliance. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update and amend the use of data feeds table in Rule 7.37–E(d), which sets forth on a market-by-market basis the specific securities information processor (''SIP'') and proprietary data feeds that the Exchange utilizes for the handling, execution, and routing of orders, and for performing the regulatory compliance checks related to each of those functions. Specifically, the Exchange proposes to amend the table in Rule 7.37–E(d) to specify that, with respect to IEX, the Exchange will receive an IEX direct feed as its primary source of data for order handling, order execution, order routing, and regulatory compliance, and will use the SIP Data Feed as its secondary source for data from IEX.

The Exchange proposes to make this change operative in the fourth quarter of 2024, and, in any event, before the end of the first quarter of 2025. The Exchange proposes to announce the implementation date of this change by Trader Update.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,[4] in general, and furthers the objectives of Section 6(b)(5),[5] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest. Additionally, the Exchange believes that the proposed rule change is consistent with the Section 6(b)(5) requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes its proposal to update the table in Rule 7.37–E(d) to include the IEX direct feed will ensure that the Rule correctly identifies and publicly states on a market-by-market basis all of the specific SIP and proprietary data feeds that the Exchange utilizes for the handling, execution, and routing of orders, and for performing the regulatory compliance checks for each of those functions. The proposed rule change also removes impediments to and perfects the mechanism of a free and open market and protects investors and the public interest by providing additional specificity, clarity, and transparency in the Exchange's rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, the Exchange believes that the proposal will enhance competition because providing the public and market participants with up-to-date information about the data feeds the Exchange will use for the handling, execution, and routing of orders, as well as for regulatory compliance would enhance transparency and enable investors to better assess the quality of the Exchange's execution and routing services. The Exchange also believes the proposal would enhance competition because it would potentially enhance the performance of its order handling and execution of orders in equity securities by receiving market data directly from IEX. Finally, the proposed rule change would not impact competition between market participants because it will affect all market participants equally.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section

[18] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] 15 U.S.C. 78f(b).

[5] 15 U.S.C. 78f(b)(5).

19(b)(3)(A)(iii) of the Act[6] and Rule 19b–4(f)(6) thereunder.[7] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[8] and Rule 19b–4(f)(6)(iii) thereunder.[9]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[10] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments:

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–NYSEARCA–2024–95 on the subject line.

Paper Comments:

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEARCA–2024–95. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSEARCA–2024–95 and should be submitted on or before December 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101678; File No. SR–NYSEAMER–2024–69]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing and Immediate Effectiveness of Proposed Change To Amend Rule 7.37E

November 21, 2024.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act''),[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on November 7, 2024, NYSE American LLC (''NYSE American'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.37E to specify the Exchange's source of data feeds from Investors' Exchange, LLC (''IEX'') for purposes of order handling, order execution, order routing, and regulatory compliance. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update and amend the use of data feeds table in Rule 7.37E(d), which sets forth on a market-by-market basis the specific securities information processor (''SIP'') and proprietary data feeds that the Exchange utilizes for the handling, execution, and routing of orders, and for performing the regulatory compliance checks related to each of those functions. Specifically, the Exchange proposes to amend the table in Rule 7.37E(d) to specify that, with respect to IEX, the Exchange will receive an IEX direct feed as its primary source of data for order handling, order execution, order routing, and regulatory compliance, and will use the SIP Data Feed as its secondary source for data from IEX.

The Exchange proposes to make this change operative in the fourth quarter of 2024, and, in any event, before the end of the first quarter of 2025. The Exchange proposes to announce the implementation date of this change by Trader Update.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,[4] in general, and furthers the objectives of Section 6(b)(5),[5] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest. Additionally, the Exchange believes that the proposed rule change is consistent with the Section 6(b)(5) requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes its proposal to update the table in Rule 7.37E(d) to include the IEX direct feed will ensure that the Rule correctly identifies and publicly states on a market-by-market basis all of the specific SIP and proprietary data feeds that the Exchange utilizes for the handling, execution, and routing of orders, and for performing the regulatory compliance checks for each of those functions. The proposed rule change also removes impediments to and perfects the mechanism of a free and open market and protects investors and the public interest by providing additional specificity, clarity, and transparency in the Exchange's rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, the Exchange believes that the proposal will enhance competition because providing the public and market participants with up-to-date information about the data feeds the Exchange will use for the handling, execution, and routing of orders, as well as for regulatory compliance would enhance transparency and enable investors to better assess the quality of the Exchange's execution and routing services. The Exchange also believes the proposal would enhance competition because it would potentially enhance the performance of its order handling and execution of orders in equity securities by receiving market data directly from IEX. Finally, the proposed rule change would not impact competition between market participants because it will affect all market participants equally.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[6] and Rule 19b–4(f)(6) thereunder.[7] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[8] and Rule 19b–4(f)(6)(iii) thereunder.[9]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[10] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSEAMER–2024–69 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEAMER–2024–69. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSEAMER–2024–69 and should be submitted on or before December 18, 2024.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101696; File No. SR–FINRA–2024–019]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adjust FINRA Fees To Provide Sustainable Funding for FINRA's Regulatory Mission

November 21, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 8, 2024, the Financial Industry Regulatory Authority, Inc. (''FINRA'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by FINRA. FINRA has designated the proposed rule change as ''establishing or changing a due, fee or other charge'' under Section 19(b)(3)(A)(ii) of the Act[3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposal effective upon receipt of this filing by the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

FINRA is proposing to adjust FINRA fees to provide sustainable funding for FINRA's regulatory mission.

The text of the proposed rule change is available on FINRA's website at *http://www.finra.org,* at the principal office of FINRA and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Overview

FINRA is submitting this proposed rule change to increase the revenues that FINRA, as a not-for-profit self-regulatory organization (''SRO''), relies upon to fund its regulatory mission. Over the past year, FINRA has publicly stated many times its need to file a fee change this year to increase its fees. Over the past several years, FINRA has experienced significant expense growth resulting from rising technology costs related to capital investments seeking long-term efficiency gains for both FINRA and the industry, rising cloud hosting costs, ongoing disaster recovery and cybersecurity requirements, and elevated wage inflation and essential headcount increases necessitated by the growing breadth and complexity of FINRA's responsibilities.

To sustain FINRA's regulatory capabilities, FINRA proposes to increase fees related to FINRA's core regulatory functions as well as select fees related to the use of FINRA programs and services. The proposal is designed to closely align FINRA's revenues with its costs while preserving the historical equitable allocation of fees among FINRA members. In parallel, FINRA continues to implement operational improvements to ensure FINRA's operations are effective and efficient.

Implementation of the proposed rule change would take place over several years, with a minority of fees going into effect in 2025, most fees implemented in 2026 or later, and several fees phased in over several years between 2025 and 2029.

Thus, under the proposed rule change, FINRA would aim to collect more than 90 percent of the revenue it seeks to raise in 2026 or later. FINRA is submitting the proposed rule change now to provide members with sufficient advance notice of the proposed fee changes for annual budgeting and financial planning purposes. The proposed rule change is intended to provide sustainable longer-term funding, in a manner consistent with FINRA's public Financial Guiding Principles (''Guiding Principles''),[5] to enable FINRA to continue fulfilling its regulatory mission.

FINRA's Current Fee Structure

As a not-for-profit SRO, FINRA receives no taxpayer funding and instead relies on a mix of fees that are intended to cover the overall costs of FINRA's operations. The majority of FINRA's funding is derived from three regulatory fees: the Gross Income Assessment (GIA), Trading Activity Fee (TAF), and Personnel Assessment (PA). These fees, respectively, reflect one of the three critical components driving FINRA's regulatory costs with respect to a particular member: (1) the size of the firm measured by firm revenue, (2) the firm's trading activity, and (3) the number and role of persons registered with the firm. FINRA also employs use-based fees for specific services it provides to members and the public in support of its regulatory mission. Several use-based fees, including registration fees, qualification examination fees, and continuing education fees, among others, align with a critical component of FINRA's regulatory costs (*i.e.,* the number and role of registered persons at a firm). As such, FINRA considers those use-based fees part of its ''core'' regulatory fees.

In addition, FINRA employs other use-based fees for certain services it provides to members and the public. Examples include fees associated with: reviewing public offering filings; reviewing communications with the public; and operating the FINRA Dispute Resolution Services (''DRS'') arbitration forum. As FINRA has explained previously,[6] when applying use-based fees, FINRA takes into account three associated types of costs: direct costs for the program associated with the use-based fee, such as program development and operating expenses, and reinvestments and enhancements; indirect costs for the program, including supporting services necessary for the program's associated regulatory activity; and a contribution to FINRA's overall regulatory operations, which promotes its mission of investor protection.[7] Thus, taken together, core regulatory

[7] *See supra* note 6.

fees and other use-based fees allow FINRA to fund its regulatory mission.[8]

FINRA has explained that numerous operations and services must be funded by general revenue sources, which include both core regulatory and other use-based fees.[9] There are several reasons for this. For instance, it is not feasible to associate a direct affiliated revenue stream for each of FINRA's programs (*e.g.,* examinations of members do not have an associated revenue stream). Similarly, there is no one consistent driver of costs of a particular regulatory program. Even where one cost driver may, at times, align with a particular revenue stream (*e.g.,* as trading activity increases, certain Market Regulation costs may increase), the relationship may not hold at other times. For example, novel trading patterns in single or multiple securities may not be associated with significant volume but may require comparatively larger efforts in terms of regulatory oversight. Likewise, periods of intense market volatility may influence regulatory costs independent of the change in trading volume.

Further, in light of FINRA's diverse membership of firms that vary greatly in size and business model, it is not feasible to develop a comprehensive pricing structure that precisely accounts for the particular costs associated with each member.[10] Rather, FINRA's current fee structure is designed to ensure sufficient funding to meet all of its regulatory obligations in a manner that equitably allocates fees among FINRA members, notwithstanding the fluctuations in different revenue streams and cost drivers that are naturally expected to occur over time. The Commission has historically agreed that this overall cost-based pricing structure ''is reasonable in that it achieves a generally equitable impact across FINRA's membership and correlates the fees assessed to the regulatory services provided by FINRA.'' [11] FINRA continues to believe that this approved approach to overall pricing is the most reasonable and equitable way to provide sufficient funding to meet its regulatory obligations as a not-for-profit SRO with broad, diverse membership.

As set out in the Guiding Principles, FINRA targets break-even cash flows as a means to appropriately fund its mission of protecting investors and promoting market integrity while facilitating vibrant capital markets. Careful expense management is another key element of the Guiding Principles. The Guiding Principles also explain the extent to which FINRA relies on its financial reserves—originally derived from the sale of Nasdaq—to help support its regulatory mission.[12] The Guiding Principles also describe how FINRA uses fine monies—which are not included in FINRA's operating budget—to promote compliance and improve markets.[13]

FINRA's most recent comprehensive fee increase included increases to core regulatory fees from 2022 through 2024.[14] Looking ahead, FINRA projects that its current fees will not keep pace with its projected future expenses in light of the continued growth in the breadth and complexity of FINRA's regulatory obligations, described in detail below. As FINRA noted recently in its 2024 Annual Budget Summary, based on the current fee structure (inclusive of the fee adjustments made from 2022 through 2024), FINRA projects it will recognize an operating loss in 2024, with a drawdown on its financial reserves of approximately $100 million.[15] FINRA estimates that, absent any action, its reserve balance will fall below its Board-approved target level of one-year of operating costs by 2027. As described in more detail below, FINRA has carefully managed its expenses; however, careful expense management cannot suffice as a sustainable financial strategy in the long term, particularly in the context of rising systemic costs and FINRA's increasing regulatory responsibilities.

Background

Over the past several years, FINRA's regulatory and oversight responsibilities have grown significantly, and FINRA anticipates that they will continue to grow over the rest of this decade, requiring investments in technology and increased headcount. Simultaneously, FINRA has experienced substantial systemic expense growth resulting from, among other things, elevated wage inflation and increased operating costs related to technology.[16] Several factors have contributed to these areas of growth, including: continued increases in the volume and complexity of member activity; new investment products, services, and market participants under FINRA's purview; the continuing evolution of market structure and trading patterns; and the SEC's adoption of significant new rules that require implementation by FINRA and its expanded member oversight.

For example, FINRA has made substantial investments to supervise or comply with new and amended SEC rules, such as amendments to Disclosure

[8] In addition to the services FINRA provides in furtherance of its regulatory mission, FINRA also provides certain services on a contract basis to third parties. These contract service fees represent approximately 8% of FINRA's total revenues. Importantly, these revenues pay in full for the services rendered under the contracts, and FINRA's costs to perform these services are not funded with any of the regulatory revenue discussed in this filing.

[10] *See supra* note 6.

[11] *See* Securities Exchange Act Release No. 61042 (November 20, 2009), 74 FR 62616, 62620 (November 30, 2009) (Order Approving File No. SR–FINRA–2009–057).

[12] *See supra* note 5. Information about FINRA's financial reserves is provided each year in FINRA's published annual financial reports. *See* FINRA Financial Reports and Policies, available at *https://www.finra.org/about/annual-reports.* FINRA strives to maintain an appropriate level of reserves, which the FINRA Board of Governors has determined to be at least one year of expenditures.

[13] While fine monies are not included in FINRA's annual operating budget, they are included in cash flow projections. For purposes of its projections, FINRA assumed a conservative amount of fine money for future years based on historical fine money receipt. When FINRA imposes fines, the amounts are based on the facts and circumstances of the misconduct and are guided by the principles set forth in FINRA's Sanction Guidelines that are similar in nature—fines are not based on revenue considerations, and FINRA does not establish any minimum amount of fines that must be collected for purposes of the annual operating budget. Fines collected are accounted for separately, and the use of these monies is subject to special governance procedures and restrictions on use, as set forth in our Guiding Principles. *See supra* note 5. In accordance with the Guiding Principles, FINRA issues a separate annual report detailing use of fine monies as approved by the FINRA Board of Governors. *See, e.g.,* Report of Use of 2023 Fine Monies (June 14, 2024), available at *https://www.finra.org/about/annual-reports/report-use-2023-fine-monies.*

[14] *See supra* note 6.

[15] *See* FINRA 2024 Annual Budget Summary, *https://www.finra.org/sites/default/files/2024-06/FINRA-2024-Annual-Budget-Summary.pdf,* at 2. This potential loss is in line with FINRA's previous multiyear strategic planning for financial sustainability, which contemplates a series of annual losses in order to reduce the size of FINRA's reserves. As discussed in the Guiding Principles, FINRA has relied on its financial reserves, which were originally derived from the sale of Nasdaq, to help support its regulatory mission. *See also* Funding FINRA's Mission, available at *https://www.finra.org/media-center/blog/funding-finras-mission.*

FINRA has made reasonably conservative assumptions using a variety of information points, including historical data and anticipated trends. If FINRA's structural financial deficit is materially reduced during this period, or if key assumptions change materially, FINRA would consider various modifications as appropriate. For example, FINRA has used rebates to support its commitment to reasonable, cost-based fee assessments in instances where revenues significantly exceed expenditures. These rebates are approved by the FINRA Board of Governors. A number of factors must be considered when determining whether to provide rebates, including the amount of excess revenue for the year, whether budget projections anticipate near-term revenue shortfalls, and the number of firms that would be eligible to receive rebates. FINRA makes information about these factors transparent to the public each year.

[16] FINRA's technology costs, for example, have risen by approximately 11% per year over the last five years.

of Order Execution Information, Regulation M, Shortening the Securities Transaction Settlement Cycle, Regulation Best Interest, Market Data Infrastructure, and Minimum Pricing Increments, Access Fees, and Transparency of Better Priced Orders. FINRA must also be prepared to implement and supervise significant potential new and amended rules that the SEC has proposed, including Regulation S–P, Conflicts of Interest Associated with the Use of Predictive Data Analytics, Regulation Systems Compliance and Integrity, Cybersecurity Risk Management, Regulation Best Execution, and the Order Competition Rule. Furthermore, FINRA is investing in preparation for its expanded role in the oversight of a broader range of market participants under several SEC rulemakings. For example, the SEC has narrowed the exemption for certain exchange members under Exchange Act Rule 15b9–1, further defined ''as part of a regular business'' [17] in the definitions of ''dealer'' and ''government securities dealer'' under the Exchange Act, and proposed to amend the definition of ''exchange'' under Exchange Act Rule 3b–16 and amend Regulation ATS.

FINRA is also investing to enable continued effective oversight over evolving trading patterns, such as the significant growth in retail trading, growth in smaller and fractional share trading, and increased trading outside of regular trading hours. These and other market developments, together with the evolution of new and evolving products such as securities with crypto asset components and short-dated options products, require increased oversight by FINRA staff.

FINRA is committed to a culture of continuous improvement, with a rigorous focus on carefully managing costs and identifying new efficiency opportunities, where consistent with its mission. FINRA has exercised prudent expense control and managed costs through various initiatives and technology investments that have helped to enhance efficiency and effectiveness. Beginning with the FINRA360 [18] initiative, which launched a comprehensive self-evaluation and organizational improvement exercise in 2017 to ensure that FINRA was maximizing its effectiveness, FINRA has implemented a number of enhancements including: enforcement program consolidation; new external transparency tools; the launch of the Small Firm Helpline; increased examiner training; creation of an Innovation Outreach Initiative; and the development of a program to evaluate and integrate advances in data analytics.

FINRA continues to invest in technology to better serve its mission and to improve FINRA's ability to communicate with members. For example, FINRA completed a multi-year digital platform upgrade that improved system interfaces, including essential registration and disclosure systems used by members.[19] FINRA also continues to build on its early use of cloud computing in regulation, and invested in an Advanced Analytics Program that supports risk identification and other regulatory efforts. In the interest of regulatory efficiency, FINRA also recently discontinued a program requiring the reporting of prescribed data by certain members based on availability of data from alternative sources, resulting in millions of dollars in cost savings benefits to members.[20]

Further, cost savings have been accomplished in recent years through supplementary expense reduction initiatives, including conducting a comprehensive efficiency review of FINRA's core business lines; establishing a framework for improving measurement of FINRA's key performance results; voluntary retirement/incentive programs in 2020 and 2024; and strategic reductions in FINRA's corporate real estate footprint.

Given this context, and despite the significant increase in the breadth and complexity of FINRA's regulatory responsibilities, FINRA's expense growth rate from 2013 through 2023 has been significantly lower than that of the broader financial services industry. Specifically, FINRA's costs increased by 41% cumulatively during this period compared with 129% for the industry.[21] Similarly, FINRA's total compensation costs rose by 31% on a cumulative basis during this period as compared with a 50% increase for the average U.S. financial services employee.[22] FINRA's restrained expense growth is the result of careful management of both compensation costs, the largest driver of FINRA's budget, and non-compensation costs, such as technology and real estate.

Notwithstanding these efforts, as discussed, FINRA projects that its current fees will not keep pace with its projected future expenses. FINRA therefore proposes to increase its fees as described below.

Proposal

The proposed rule change would raise FINRA's core regulatory fees [23] as well as select use-based fees [24] that fund various FINRA services and programs. Consistent with the Guiding Principles, the proposed rule change would more effectively allow FINRA to balance its cash flow sources, operating expenses and capital expenditures, and stabilize its financial reserves by 2029. As discussed above, a minority of proposed fee increases would go into effect in 2025, while most fees would be implemented in 2026 or later, and several fees would be phased in over several years between 2025 and 2029.[25] The following table summarizes the proposed timeline for implementing each fee increase: [26]

[17] The updated definition covers additional market participants engaged in liquidity-providing activities that generally would require SRO membership.

[18] Detailed information about the FINRA360 initiative is available at *https://www.finra.org/about/finra-360.*

[19] Detailed information about FINRA's ''Digital Experience Transformation'' is available at *https://www.finra.org/filing-reporting/dxt.* FINRA built the capabilities of the Digital Experience Transformation initiative in consultation with the industry, and FINRA's investment is estimated to save the industry more than $200 million annually in time and direct costs.

[20] *See Regulatory Notice* 23–17 (October 2023).

[21] Based on FOCUS reporting.

[22] FINRA total compensation represents business compensation, excluding technology. Average U.S. employee wage growth represents Finance and Business Services wage growth supplied by the Bureau of Labor Statistics and Federal Reserve Bank of Atlanta. *See* Current Population Survey, Bureau of Labor Statistics, and Federal Reserve Bank of Atlanta Calculations at *https://www.atlantafed.org/chcs/wage-growth-tracker.*

[23] For ease of reference in this filing, FINRA refers to the following core regulatory fees: GIA; TAF; PA; Branch Office Fees; Registration; Qualification Examination; Continuing Education Regulatory Element Reporting; Late Disclosure; System Processing; and Renewal Late Fee.

[24] For ease of reference in this filing, FINRA refers to the following select use-based fees: Corporate Financing Private Placement Review; Corporate Financing Public Offering Review; Advertising Regulation Review; DRS Arbitration; and Regulation T and Exchange Act Rule 15c3–3(n) Requests for Extension of Time. The proposed fee increase will apply to filings or submissions related to these use-based services on or after the effective date.

[25] FINRA considered feedback from members of FINRA's advisory committees and other industry consultations that emphasized the importance of advance notice of fee increases to permit member firms to better plan for the proposed package of fee increases over multiple budget cycles. FINRA also considered stakeholder feedback that one-time increases for certain fees help reduce the administrative burdens on members.

[26] Fees listed in chronological order of initial implementation. Unless specified otherwise in the table above, the proposed fee increase would take effect on January 1 of the year stated. This table does not include proposed conforming amendments to two fees that impact funding portal members.

FEE IMPLEMENTATION SCHEDULE

Fee	Implementation schedule
Advertising Regulation Review	2025.
DRS Arbitration	2025.
Regulation T and Exchange Act Rule 15c3–3(n) Requests for Extension of Time	2025.
Corporate Financing Private Placement Review	2025 (Q3).
Corporate Financing Public Offering Review	2025 (Q3)–2029.
Branch Office Fees	2026, 2028.
Continuing Education Regulatory Element	2026.
Late Disclosure	2026.
Qualification Examination	2026.
System Processing	2026, 2028.
GIA	2026–2028.
TAF	2026–2029.
PA	2026–2029.
Registration	2028.
Renewal Late Fee	2028.

Taken together, the proposed rule change is projected to generate additional revenue of between $40 million and $160 million each year compared to the previous year from 2025 through 2029. The amount of the increase varies each year due to the phased implementation schedule described above. Cumulatively, the proposed rule change would increase FINRA's annual fee revenues by an estimated $450 million (once fully implemented in 2029) as compared to the annual fee revenues that would have existed in the absence of the proposed rule change. As such, the proposed rule change is calibrated to cover FINRA's projected budget deficit and achieve a balanced budget by 2029.[27] This approach will retain FINRA's reserve balance at its target level based on FINRA's projected revenue and costs,[28] while providing members advance notice of fee increases, phasing some of the increases over multiple years, and maintaining an equitable allocation of fees among FINRA members. As discussed further below, under the proposed rule change, the current proportion of fees borne by FINRA members based on firm size and business model, respectively, would remain stable through 2029.[29]

In total, the proposed fee changes will result in a compounded annualized growth rate (''CAGR'') of 5.3% across total FINRA fees between 2025 and 2029.[30] Excluding specific fees typically passed on by members,[31] the CAGR between 2025 and 2029 is projected to be 4.8% for FINRA members. Further, assuming that the majority, if not all, of TAF is also passed directly through to investors, the fee increase CAGR falls to the 3% to 4% range for FINRA members.[32] During the same period, FINRA reasonably anticipates that its future expenses will grow at a CAGR of 5.9%, with a portion of such expense growth covered by anticipated cash flow sources other than the proposed fee increases. FINRA's fees will continue to represent a small dollar proportion of industry revenues as reported in FOCUS reports. FINRA estimates that FINRA's total fees when the proposed fee increases are fully implemented would represent approximately 0.31% of recent industry revenues by 2029.[33]

In sum, the proposed rule change is designed to collect the targeted revenue amount needed to address FINRA's projected budget deficit through a combination of core regulatory and select use-based fees that yield an equitable overall fee increase across member size and type. The proposed rule change is thus designed to preserve the same SEC-approved, equitable fee allocation across members that FINRA has maintained for years by minimizing the change to distribution of fees across members.

Each specific fee in the proposed rule change is described below.

Core Regulatory Fees

Gross Income Assessment

The GIA is a core regulatory fee designed to correlate to one of the three critical components of FINRA's regulatory costs—the size of a firm (based on revenue). Accordingly, the GIA is based on a firm's annual gross revenue,[34] employing a graduated seven-tier rate structure that has applied since 2008.[35]

[27] As discussed below, Chart 2, attached in Exhibit 3, available on FINRA's website at *http://www.finra.org,* demonstrates the difference between FINRA's projected cash flow sources and cash flow uses through 2029, absent the proposed rule change.

[28] Anticipated costs would not include potential costs associated with new services that may be initiated or approved in the future. FINRA may submit separate fee filings to cover program costs for new services. FINRA notes this proposed rule change does not include fees associated with the Consolidated Audit Trail (''CAT'') or the Securities Lending and Transparency Engine (''SLATE''), both of which are subject to separate proposed rule changes with the Commission. *See, e.g.,* Securities Exchange Act Release No. 100920 (September 4, 2024), 89 FR 73457 (September 10, 2024) (Notice of Filing and Immediate Effectiveness of File No. SR–FINRA–2024–011); Securities Exchange Act Release No. 100920 (September 4, 2024), 89 FR 73457 (September 10, 2024) (Notice of Filing and Immediate Effectiveness of File No. SR–FINRA–2024–012). Similarly, FINRA notes that program costs associated with the reporting of transactions in U.S. Treasury Securities (''Treasuries'') are not included in the targeted amount sought by this proposal; currently, Treasuries transactions are exempted from both TRACE transaction reporting fees and from the TAF. *See* Securities Exchange Act Release No. 79116 (October 18, 2016), 81 FR 73167, 73176 (October 24, 2016) (Order Approving File No. SR–FINRA–2016–027).

[29] *See* Exhibit 3, Charts 5 and 6.

[30] The CAGR provides a geometric average of the change in fees over the implementation period. It is particularly useful for comparing growth rates from various sets of data over the same multi-year period.

[31] Some of the fees discussed in this filing are or would be absorbed by non-members, including Corporate Financing review fees for public offerings and private placements, which are generally passed through to issuers, and a portion of DRS fees that are paid directly by customers.

[32] Many members identify that they pass through TAF to customers. Assuming 65% of TAF is passed to non-members, the fee increase CAGR to membership falls to 3.9%. If 100% of TAF is passed through, the fee increase CAGR to FINRA's membership falls to 3.1%.

[33] Industry revenue projections for 2029 are based on historical FOCUS revenue growth of 8.5% (2013–2023).

[34] Section 2 of Schedule A to the FINRA By-Laws defines gross revenue for assessment purposes as total income as reported on FOCUS form Part II or IIA, excluding commodities income.

[35] The applicable GIA rate applies on a marginal basis to annual gross revenues that exceed each applicable threshold. While the GIA rate structure has not changed since 2008, FINRA made modifications to the method of GIA calculation

Section 1(c) of Schedule A to the FINRA By-Laws sets forth the GIA. The current rates, which reflect the fee adjustments made from 2022 through 2024, are as follows:

(1) $1,200.00 on annual gross revenue up to $1 million;

(2) 0.1732% of annual gross revenue greater than $1 million up to $25 million;

(3) 0.3705% of annual gross revenue greater than $25 million up to $50 million;

(4) 0.0738% of annual gross revenue greater than $50 million up to $100 million;

(5) 0.0520% of annual gross revenue greater than $100 million up to $5 billion;

(6) 0.0566% of annual gross revenue greater than $5 billion up to $25 billion; and

(7) 0.1219% of annual gross revenue greater than $25 billion.

Thus, for example, under the current rates, for a member with annual gross revenue of $30 billion, the GIA would be calculated as follows: the first $1 million at the Tier 1 rate ($1,200), plus the next $24 million at the Tier 2 rate (0.1732%), plus the next $25 million at the Tier 3 rate (0.3705%), plus the next $50 million at the Tier 4 rate (0.0738%), plus the next $4.9 billion at the Tier 5 rate (0.0520%), plus the next $20 billion at the Tier 6 rate (0.0566%), plus the final $5 billion at the Tier 7 rate (0.1219%), for a total assessment of $20,135,293.

FINRA is proposing the following changes to its GIA tier rates from 2026 through 2028.[36]

GIA—Proposed Implementation

Tier (revenue)	2024 (current)	2025 (no change)	2026	2027	2028	2029
$0 to $1 million	$1,200	$1,200	$1,200	$1,200	$1,200	$1,200
Greater than $1 million up to $25 million	0.1732%	0.1732%	0.1827%	0.2056%	0.2280%	0.2280%
Greater than $25 million up to $50 million	0.3705%	0.3705%	0.3909%	0.4397%	0.4877%	0.4877%
Greater than $50 million up to $100 million	0.0738%	0.0738%	0.0779%	0.0876%	0.0972%	0.0972%
Greater than $100 million up to $5 billion	0.0520%	0.0520%	0.0549%	0.0618%	0.0685%	0.0685%
Greater than $5 billion up to $25 billion	0.0566%	0.0566%	0.0597%	0.0672%	0.0745%	0.0745%
Greater than $25 billion	0.1219%	0.1219%	0.1286%	0.1447%	0.1604%	0.1604%

Thus, for example, under the new rates once fully implemented in 2029, for a member with annual gross revenue of $30 billion, the GIA would be calculated as follows: the first $1 million at the Tier 1 rate ($1,200), plus the next $24 million at the Tier 2 rate (0.2280%), plus the next $25 million at the Tier 3 rate (0.4877%), plus the next $50 million at the Tier 4 rate (0.0972%), plus the next $4.9 billion at the Tier 5 rate (0.0685%), plus the next $20 billion at the Tier 6 rate (0.0745%), plus the final $5 billion at the Tier 7 rate (0.1604%), for a total assessment of $26,502,945.

When the proposed GIA rates are fully implemented, they are designed to generate an additional $80 million in annual revenue by 2029. The proposed GIA increase preserves the existing seven-tier structure and calculation method while raising each tier proportionately. With these proposed increases, the GIA structure would continue to reflect the costs associated with performing regulatory responsibilities across FINRA's diverse population of members. Notably, the proposed rule change would not increase the flat $1,200 fee for members with revenues of $1 million or less. Maintaining this fee level for the smallest members preserves FINRA's existing approach to cost distribution between members of varying sizes.

Further, FINRA seeks to preserve the historical proportionality across fees associated with the three main components of FINRA's regulatory costs—the size of the firm measured by firm revenue, the firm's trading activity, and the number and role of persons registered with the firm—with the aim of collecting a generally comparable amount of revenue from fees associated with each of these components once the proposed rule change is fully implemented. To that end, the proposed rule change would increase the GIA at a reduced rate relative to the other core regulatory fees. This is because, for 2024, GIA revenues exceeded projections due to record aggregate industry revenues. As a result, FINRA has proposed to phase in the proposed increases to the GIA more gradually, and at a reduced rate, relative to the other core regulatory fees to help preserve historical proportionality across these fees and achieve a generally comparable revenue distribution. FINRA believes this proportional approach to fee increases will provide member firms a greater degree of certainty and predictability, as it seeks to maintain consistency with FINRA's existing equitable fee distribution. FINRA further believes its proportional approach reduces the potential for unintended impacts on the services provided by member firms, and the business models they adopt, that could arise from significant changes to fee distribution.

Trading Activity Fee

The TAF is a core regulatory fee designed to correlate to a critical component of FINRA's regulatory costs—the trading activity of a firm.

under the structure in 2009 and 2014, and increased the GIA rate between 2022 and 2024. In 2009, the Commission approved a GIA calculation modification designed to mitigate year-to-year revenue volatility by assessing members the greater of a GIA calculated based on the firm's annual gross revenue from the preceding calendar year, or a GIA averaged over the prior three years. *See* Order Approving SR–FINRA–2009–057, *supra* note 11, 74 FR 62616, 62617. In 2014, FINRA refined the GIA calculation method to provide limited relief for smaller member firms from unintended effects of the 2009 calculation change; as a result of the 2014 change, firms that have annual gross revenue of $25 million or less pay the GIA based on preceding year revenue without looking to a three-year average. *See* Securities Exchange Act Release No. 73632 (November 18, 2014), 79 FR 69937 (November 24, 2014) (Notice of Filing and Immediate Effectiveness of File No. SR–FINRA–2014–046). In 2020, FINRA proposed changes to the GIA tier rates, which went into effect between 2022 and 2024. *See* Order Approving SR–FINRA–2020–032, *supra* note 6, 85 FR 66592.

[36] FINRA notes the Exhibit 5 to this proposed rule change, available on FINRA's website at *http://www.finra.org,* is marked to show the changes as they are proposed to take effect each year, as described in this filing. Specifically, Exhibit 5A and 5B shows the proposed changes that would take effect in 2025, Exhibit 5C shows the proposed changes that would take effect in 2026, Exhibit 5D shows the proposed changes that would take effect in 2027, Exhibit 5E shows the proposed changes that would take effect in 2028, and Exhibit 5F shows the proposed changes that would take effect in 2029.

FINRA initially adopted the TAF in 2002, modeled on the Commission's transaction-based Section 31 fee.[37] The TAF is generally assessed on the sale of all exchange-listed securities wherever executed (except debt securities that are not TRACE-Eligible Securities), over-the-counter equity securities, security futures, TRACE-Eligible Securities (provided that the transaction is a Reportable TRACE Transaction), and all municipal securities subject to Municipal Securities Rulemaking Board reporting requirements.[38] The current TAF rates, which reflect the fee adjustments made from 2022 through 2024, are:

(1) $0.000166 per share for each sale of a covered equity security, with a maximum charge of $8.30 per trade;

(2) $0.00279 per contract for each sale of an option;

(3) $0.00011 per contract for each round turn transaction of a security future, provided there is a minimum charge of $0.014 per round turn transaction;

(4) $0.00105 per bond for each sale of a covered TRACE-Eligible Security (other than an Asset-Backed Security) and/or municipal security, with a maximum charge of $1.05 per trade; and

(5) $0.00000105 times the value, as reported to TRACE, of a sale of an Asset-Backed Security, with a maximum charge of $1.05 per trade.[39]

FINRA is proposing the following changes to its TAF rates between 2026 and 2029:

TAF—Proposed Implementation

Security type	2024 (current)	2025 (no change)	2026	2027	2028	2029
Covered Equity Security.	$0.000166 per share (up to $8.30 max per trade).	$0.000166 per share (up to $8.30 max per trade).	$0.000195 per share (up to $9.79 max per trade).	$0.000232 per share (up to $11.61 max per trade).	$0.000240 per share (up to $12.05 max per trade).	$0.000249 per share (up to $12.50 max per trade).
Options	$0.00279 per contract.	$0.00279 per contract.	$0.00329 per contract.	$0.00390 per contract.	$0.00404 per contract.	$0.00420 per contract.
Security Future	$0.00011 per contract (with $0.014 minimum per round turn transaction).	$0.00011 per contract (with $0.014 minimum per round turn transaction).	$0.000135 per contract (with $0.016 minimum per round turn transaction).	$0.00016 per contract (with $0.019 minimum per round turn transaction).	$0.000166 per contract (with $0.020 minimum per round turn transaction).	$0.000172 per contract (with $0.021 minimum per round turn transaction).
TRACE-Eligible Security (Other than Asset-Backed Security) or municipal security.	$0.00105 per bond (up to $1.05 max per trade).	$0.00105 per bond (up to $1.05 max per trade).	$0.00124 per bond (up to $1.24 max per trade).	$0.00147 per bond (up to $1.47 max per trade).	$0.00153 per bond (up to $1.53 max per trade).	$0.00158 per bond (up to $1.58 max per trade).
TRACE-Eligible Asset-Backed Security.	$0.00000105 times reported value (up to $1.05 max per trade).	$0.00000105 times reported value (up to $1.05 max per trade).	$0.00000124 times reported value (up to $1.24 max per trade).	$0.00000147 times reported value (up to $1.47 max per trade).	$0.00000153 times reported value (up to $1.53 max per trade).	$0.00000158 times reported value (up to $1.58 max per trade).

When the new TAF rates are fully implemented, they are designed to generate an additional $186 million in annual revenue by 2029. The proposed TAF changes reflect proportional increases in the amount raised for each security type—meaning there is no anticipated change in the percentage of overall TAF revenue collected from transactions in each security type—phased in incrementally over the delayed four-year implementation period. Accordingly, while TAF revenues are largely derived from transactions in equity securities, like the SEC's Section 31 fee, this proposed rule change is intended to preserve the current distribution of TAF fees among security types.

The aggregate TAF increases would generate more revenue relative to the other core regulatory fees to preserve the historical proportionality among the core regulatory fees associated with firm trading activity and the other main components of FINRA's regulatory costs—the size of the firms measured by firm revenue and the number and role of persons registered with the firm—while seeking to collect a generally comparable amount of revenue from fees associated with each component. This is consistent with the proportional approach to fee increases discussed throughout this filing, which seeks to maintain consistency with FINRA's existing equitable fee distribution.

Personnel Assessment

The PA is a core regulatory fee designed to correlate to the third critical component of FINRA's regulatory costs—the number and role of registered persons at a firm. The PA currently is assessed on a three-tiered rate structure: members with one to five registered representatives and principals are assessed $210 for each such registered person (''Reps'' in the table below); there is a $200 charge for each of the next 20 registered persons (between 6 and 25); and a $190 charge for each additional registered person beyond 25 registered persons.

Section 1(e) of Schedule A to the FINRA By-Laws sets forth the PA. These rates last increased between 2022 and 2024.[40] FINRA is proposing the following increases to its PA tier rates between 2026 and 2029:

[37] *See* Securities Exchange Act Release No. 46416 (August 23, 2002), 67 FR 55901 (August 30, 2002) (Notice of Filing and Immediate Effectiveness of File No. SR–NASD–2002–98).

[38] Certain types of transactions are excluded from the TAF (*e.g.,* primary market transactions, proprietary transactions executed by a member on a national securities exchange in the member's capacity as an exchange specialist or market maker, transactions effected by a proprietary trading firm on an exchange of which such firm is a member, and transactions in U.S. Treasury Securities). *See* FINRA By-Laws, Schedule A, Section 1(b)(2) (providing full list of transactions exempt from the TAF). This proposed rule change would not change the scope of any current TAF exemptions.

[39] If the execution price for a covered security is less than the TAF rate ($0.000166 for covered equity securities, $0.00279 for covered options contracts, or $0.014 for a security future) on a per share, per contract, or round turn transaction basis, then no fee is assessed.

[40] *See* Order Approving SR–FINRA–2020–032, *supra* note 6, 85 FR 66592.

PA—PROPOSED IMPLEMENTATION

Tier (number of reps)	2024	2025 (no change)	2026	2027	2028	2029
Reps 0–5	$210	$210	$245	$260	$270	$295
Reps 6–25	200	200	235	250	260	285
Reps 26 and greater	190	190	225	240	250	275

When the proposed PA rates are fully implemented, they are designed to generate an additional $52 million in annual revenue by 2029. The proposed PA increases, together with the proposed increases to the use-based fees aligned with the number and role of registered persons at a firm discussed below, are calibrated to preserve the historical proportionality among the core regulatory fees associated with the three main components of FINRA's regulatory costs and collect a generally comparable amount of revenue from fees associated with each component. This is consistent with the proportional approach to fee increases discussed throughout this filing, which seeks to maintain consistency with FINRA's existing equitable fee distribution.

Branch Office Fees

FINRA members are assessed regulatory fees for registered branch offices. These fees are related to firm size and structure. Section 4(a) of Schedule A to the FINRA By-Laws includes a branch office registration fee and a branch office system processing fee upon the initial registration of each branch office as defined in the By-Laws. The initial branch office registration fee is waived for the first branch office registered by a member. In addition, each member is assessed an annual registration fee for each branch office registered by the member. This fee has a tiered regressive rate structure that assesses a per branch office annual registration fee depending on the number of branch offices the firm has. Currently, each member is assessed an annual registration fee of: (1) $175, for each of the first 250 branch offices registered by the member; (2) $150, for each of branch offices 251 to 500 registered by the member; (3) $125, for each of branch offices 501 to 1,000 registered by the member; (4) $100, for each of branch offices 1,001 to 2,000 registered by the member; and (5) $75, for every branch office greater than 2,000 registered by the member. For one branch office per member per year, the annual branch office registration fee and annual branch office system processing fee is waived.

FINRA has not increased the branch office registration fee since 2013.[41] FINRA is proposing to retain the tiered regressive rate structure, but increase the branch office registration fee in 2026 as follows:

BRANCH OFFICE REGISTRATION FEES—PROPOSED IMPLEMENTATION

Fee	2024 (current)	2025 (no change)	2026	2027	2028	2029
FINRA Branch Registration Fee	$75	$75	$105	$105	$105	$105
Annual Registration Fee 1–250 branch offices registered by the member	175	175	245	245	245	245
Annual Registration Fee 251–500 branch offices registered by the member	150	150	210	210	210	210
Annual Registration Fee 501–1000 branch offices registered by the member	125	125	175	175	175	175
Annual Registration Fee 1001–2000 branch offices registered by the member	100	100	140	140	140	140
Annual Registration Fee 2001+ branch offices registered by the member	75	75	105	105	105	105

When the proposed branch office registration fee changes are fully implemented, they are designed to generate $7 million in annual revenue by 2029.[42] The proposed rule change would retain the same tiered regressive rate structure that assesses a per branch office annual registration fee depending on the number of branch offices of the firm, but would raise the fee associated with each range of branch office numbers. FINRA would continue to waive, for one branch office per member per year, payment of the annual registration fee, but increase the amount of the waiver from $175 to $245 to match the new rates.

FINRA has not increased the branch office system processing fee since 2022.[43] FINRA is proposing to increase the branch office system processing fee in 2028 as follows:

[41] *See Regulatory Notice* 12–32 (June 2012).

[42] The projected revenue from the proposed increased Branch Office Fees assumes that the number of branch offices will remain at 2024 levels through 2029. Due to the COVID–19 pandemic, FINRA had provided regulatory relief including a temporary suspension of the requirements to maintain updated Form U4 information regarding the office of employment address for registered persons who temporarily relocated due to the pandemic, and the requirement to submit branch office applications on Form BR for any newly opened temporary office locations or space-sharing arrangements. *See Regulatory Notice* 20–08 (March 2020). In mid-2024, that relief ended and FINRA implemented new Rule 3110.19, which exempts from branch office registration a residential supervisory location (or RSL). An RSL is a private residence at which an associated person engages in specified supervisory activities, subject to certain safeguards and limitations. *See Regulatory Notice* 24–02 (January 2024). FINRA believes its assumptions are reasonable given the recency of these changes. As noted, if key assumptions change materially, FINRA would consider various modifications as appropriate, including rebates, for example. *See supra* note 15.

[43] *See supra* note 6.

BRANCH OFFICE SYSTEM PROCESSING FEE—PROPOSED IMPLEMENTATION

Fee	2024 (current)	2025 (no change)	2026 (no change)	2027 (no change)	2028	2029
Branch Office System Processing Fee (initial and annual)	$75	$75	$75	$75	$105	$105

When the proposed branch office system processing fee change is fully implemented, it is designed to generate $4 million in annual revenue by 2029.[44] FINRA would continue to waive, for one branch office per member per year, payment of the annual branch office system processing fee, but increase the amount of the waiver from $75 to $105 to match the new rates. FINRA believes these proposed increases to the branch office fees, which relate to firm size and structure, are consistent with the proportional approach to fee increases discussed throughout this filing.

Registration Fees

Registration fees are registered person-level fees that, while use-based, also correlate to the third critical component of FINRA's regulatory costs—the number and role of registered persons at a firm. Section 4 of Schedule A to the FINRA By-Laws establishes fees connected to FINRA's operation of the Central Registration Depository (''Web CRD®'' or ''CRD system''), the central licensing and registration system that FINRA operates for the benefit of FINRA, the SEC, other SROs, state securities regulators, and broker-dealer firms. The CRD system contains the registration records of broker-dealer firms and their associated individuals including their qualification, employment, and disclosure histories; it also facilitates the processing of, among other things, form filings and facilitates the making of fingerprint results available to the appropriate authorized recipients.[45] The CRD system enables individuals and firms seeking registration with multiple states and SROs to do so by submitting a single form and fee payment.[46]

FINRA last increased associated registration fees between 2022 and 2024.[47] FINRA has explained that these fees are important to fund activities that help ensure the integrity of information in the CRD system—information critical to FINRA and other regulators, as well as to investors through BrokerCheck—and to support FINRA's overall regulatory mission.[48] FINRA is proposing to increase certain registration fees [49] in 2028 as follows:

REGISTRATION FEES—PROPOSED IMPLEMENTATION

Fee	2024 (current)	2025 (no change)	2026 (no change)	2027 (no change)	2028	2029
Initial/Transfer Registration Form U4 filing[50]	$125	$125	$125	$125	$175	$175.
Termination U5 filing	$50 (plus $100 if late filed).	$50 (plus $100 if late filed).	$50 (plus $100 if late filed).	$50 (plus $100 if late filed).	$70 (plus $140 if late filed).	$70 (plus $140 if late filed).
Disclosure review[51]	$155	$155	$155	$155	$215	$215.
Electronic Fingerprinting[52]	$20[53]	$20[54]	$20	$20	$28	$28.
Non-Electronic Fingerprinting[55]	$30	$30	$30	$30	$42	$42.
Fingerprinting Processed Through Another SRO.	$30	$30	$30	$30	$42	$42.

When these proposed registration fee changes are fully implemented, they are designed to generate an additional $10 million in annual revenue by 2029.

Renewal Late Fee

Members renew their registrations with FINRA, other SROs and states/jurisdictions during the annual renewal program. Section 4(b)(8) of Schedule A to the FINRA By-Laws sets forth the renewal late fee, which applies if a member fails to timely pay the amount

[44] *See supra* note 42.

[45] Specified information reported to the CRD system is displayed in BrokerCheck®, an electronic system that provides the public with information on the professional background, business practices, and conduct of FINRA members and their associated persons. Investors use BrokerCheck to help make informed choices about the individuals and firms with which they currently conduct or are considering conducting business.

[46] FINRA outsources fingerprint processing to Sterling Identity (''Sterling''), an FBI-approved channeler that processes fingerprints for members on FINRA's behalf. This provides for a more efficient and streamlined process with fewer fingerprint rejections, secure electronic transmission of FBI results, and significantly reduced turn-around times. Sterling assesses and collects all fees for fingerprint collection and processing, including the FBI fee.

[47] *See* Order Approving SR–FINRA–2020–032, *supra* note 6, 85 FR 66592.

[48] *See* Securities Exchange Act Release No. 67247 (June 25, 2012), 77 FR 38866 (June 29, 2012) (Notice of Filing and Immediate Effectiveness of File No. SR–FINRA–2012–030).

[49] FINRA also proposes conforming changes to Section 15(g) of Schedule A to the FINRA By-Laws to align this proposed fee change with the same fees for Funding Portal members.

[50] This fee applies for each initial or transfer Uniform Application for Securities Industry Registration or Transfer (''Form U4'') filed by a member in the CRD system to register an individual. Section 4(b)(1) of Schedule A includes a discount in cases where a member is transferring the registrations of individuals in connection with the acquisition of all or part of another member's business. The discount ranges from 10 to 50 percent, based on the number of registered personnel being transferred. While FINRA is proposing to increase the registration fee, it is not proposing to make any changes to the discount schedule.

[51] This fee applies for the additional processing of each initial or amended Form U4, Form U5, or Form BD that includes the initial reporting, amendment, or certification of one or more disclosure events or proceedings.

[52] This fee applies for processing and posting to the CRD system each set of fingerprints submitted electronically by a member to FINRA, plus any other charge that may be imposed by the United States Department of Justice for processing each set of fingerprints.

[53] In 2024, the fee for funding portal members that submit fingerprints electronically is $15. *See* Section 15(g) of Schedule A to FINRA By-Laws.

[54] As discussed below, FINRA proposes a conforming change in 2025 to Section 15(g) of Schedule A to the FINRA By-Laws to align the fee for funding portal members that submit fingerprints electronically with the same fee charged to broker-dealer members.

[55] This fee applies for processing and posting to the CRD system each set of fingerprints submitted in non-electronic format by a member to FINRA, plus any other charge that may be imposed by the United States Department of Justice for processing each set of fingerprints.

indicated on its preliminary annual renewal statement.[56] Where this late fee applies, FINRA includes it as part of the final statement. Currently, this fee is the greater of 10 percent of the member's final annual renewal assessment or $100, with a maximum charge of $5,000. FINRA has not increased the renewal late fee since it was established in 2002.[57]

FINRA is proposing to increase the renewal late fee in 2028 as follows:

RENEWAL LATE FEE—PROPOSED IMPLEMENTATION

[The Renewal Late Fee is 10 percent of a member's cumulative final renewal statement with the following minimums and maximums]

Fee	2024 (current)	2025 (no change)	2026 (no change)	2027 (no change)	2028	2029
The minimum late fee FINRA will assess is	$100	$100	$100	$100	$140	$140
The maximum late fee FINRA will assess is	5,000	5,000	5,000	5,000	7,000	7,000

FINRA notes that it collects all applicable renewal fees on behalf of itself and participating regulators, which enables members to submit their total renewal payment to FINRA instead of to each regulator. Among other reasons noted, FINRA believes this proposed fee increase would further encourage members to submit such fees on time. When the proposed renewal late fee changes are fully implemented, they are designed to generate an additional $100,000 in annual revenue by 2029.

Late Disclosure Fee

Related to the registration functions described above, FINRA charges a fee for each day that a new disclosure event or a change in the status of a previously reported disclosure event is not timely filed on an initial or amended Form U5 or an amended Form U4. Section 4(h) of Schedule A to the FINRA By-Laws sets forth the late disclosure fee. This fee is assessed starting on the day following the last date on which the event or change in status was required to be reported.

Timely and complete reporting of all information required by the FINRA By-Laws and rules, as well as the federal securities laws, is critical to investor protection. The SEC, FINRA, other SROs and state securities regulators use the information to make licensing and registration decisions, among other things. FINRA also publishes information in FINRA BrokerCheck, which investors use for researching the professional backgrounds of firms and brokers.

FINRA has not increased the late disclosure fee since 2013.[58] Currently, disclosures filed more than 60 days following the last date on which the event was required to be reported under FINRA rules account for 50 percent of volume and 78 percent of revenues related to late filing fees.

FINRA is proposing to increase the late disclosure fee[59] in 2026 as follows:

LATE DISCLOSURE FEE—PROPOSED IMPLEMENTATION

Fee	2024 (current)	2025 (no change)	2026	2027	2028	2029
First Day	$100	$100	$100	$100	$100	$100
Subsequent Days	25	25	40	40	40	40
Maximum Fee	1,575	1,575	2,460	2,460	2,460	2,460

FINRA believes this proposed fee increase would further encourage firms to file timely and complete initial Forms U4 and U5 and amendments to these forms, while also generating additional revenue as part of the overall proposal to increase fees to fund FINRA's regulatory mission. When the proposed late disclosure fee changes are fully implemented, they are designed to generate an additional $3 million in annual revenue by 2029.[60]

System Processing Fee

FINRA currently assesses an annual system processing fee for each of the member's registered persons. Like the registration fees described above, this fee correlates to the third critical component of FINRA's regulatory costs—the number and role of registered persons at a firm. Section 4(b)(7) of Schedule A to the FINRA By-Laws sets forth the system processing fee. Under the current fee structure, a flat $70 fee applies to each registered person of a member. Many registered persons are registered with one or more securities regulators (*i.e.,* with jurisdictions as a broker-dealer agent and with SROs as a representative or principal).[61] The median number of other SROs and jurisdictions with which each registered person of a member is registered, in addition to their FINRA registration, is 11, with an average of 20.

FINRA's costs and resources allocated to processing this information for members' registered persons depends, in part, on the number of securities regulators with which each registered person is registered (whether as a broker-dealer agent with one or more

[56] Members receive a preliminary annual renewal statement that reflects approved registrations at the time the statement is generated. The statement also includes a date by which members must make full payment available to FINRA.

[57] *See* Securities Exchange Act Release No. 46466 (September 6, 2002), 67 FR 58092 (September 13, 2002) (Notice of Filing and Immediate Effectiveness of File No. SR–NASD–2002–100).

[58] *See Regulatory Notice* 12–32, *supra* note 41.

[59] FINRA also proposes conforming changes to Section 15(e) of Schedule A to the FINRA By-Laws to align this proposed fee change with the same fee for Funding Portal members.

[60] Projected revenue from the proposed increased Late Disclosure Fees assumes approximately 53% late filings based on the historical average (2018–2023) and is based on other reasonably conservative assumptions using a variety of information points, including historical data and anticipated trends. *See supra* note 15.

[61] The term broker-dealer agent (or AG) is the designation used in Form U4 to identify a person who has been approved to sell securities in a particular jurisdiction.

jurisdictions or as a representative or principal with one or more SROs). To account for this variability, FINRA proposes to replace the current flat fee structure with a tiered rate structure in 2026 as described below. In addition, FINRA proposes to increase the proposed tiers in 2028. These proposed changes are summarized as follows:

SYSTEM PROCESSING FEE—PROPOSED IMPLEMENTATION

Number of securities regulators with which each registered person of a member is registered, excluding registration as an investment adviser representative	2024 (current)	2025 (no change)	2026	2027 (no change)	2028	2029 (no change)
1–5	$70	$70	$70	$70	$100	$100
6–20	70	70	95	95	125	125
21–40	70	70	110	110	140	140
41+	70	70	125	125	155	155

The fee would be calculated based on the total number of securities regulators with which each registered person of a member is registered (whether as a broker-dealer agent with one or more jurisdictions or as a representative or principal with one or more SROs). A registered person's registration as an investment adviser representative would not be considered.

FINRA believes this use-based fee will support FINRA's overall regulatory mission while reflecting the resources FINRA allocates to its securities licensing and registration operations for registered persons of members. Further, as noted above, this fee relates to the number and role of registered persons at a firm, which is one of the three critical components of FINRA's regulatory costs.

FINRA proposes to implement the proposed tiered rate structure in 2026. To allow members additional time to adjust and plan, FINRA proposes to defer implementation of proposed increases to this fee until 2028. When this proposed rule change, including implementation of the tiered structure and the proposed increase are fully implemented, it is designed to generate an additional $31 million in annual revenue by 2029.

Qualification Examination Fees

Like registration fees, qualification examination fees are registered person-level fees that, while use-based, also correlate to the third critical component of FINRA's regulatory costs—the number and role of registered persons at a firm. Section 4(c) of Schedule A to the FINRA By-Laws sets forth the fees associated with the qualification examinations that FINRA administers. Persons engaged in the investment banking or securities business of a FINRA member who function as principals or representatives are required to register with FINRA in each category of registration appropriate to their functions. Such individuals must pass an appropriate qualification examination or obtain a waiver before their registration can become effective. These qualification examinations cover a broad range of subjects regarding financial markets and products, individual responsibilities, securities industry rules, and regulatory structure.

FINRA develops, maintains, and delivers all qualification examinations for individuals who are registered or seeking registration with FINRA.[62] FINRA last increased its examination fees between 2022 and 2024.[63] FINRA is proposing to increase its examination fees in 2026 as follows:

QUALIFICATION EXAMINATION FEES—PROPOSED IMPLEMENTATION

Examination number and name	2024 (current)	2025 (no change)	2026	2027	2028	2029
Securities Industry Essentials (SIE) Examination	$80	$80	$100	$100	$100	$100
Series 4: Registered Options Principal Examination	155	155	200	200	200	200
Series 6: Investment Company Products and Variable Contracts Representative Examination	75	75	100	100	100	100
Series 7: General Securities Representative Examination	300	300	395	395	395	395
Series 9: General Securities Sales Supervisor Examination—Options Module	130	130	175	175	175	175
Series 10: General Securities Sales Supervisor Examination—General Module	175	175	235	235	235	235
Series 14: Compliance Official Examination	350	350	450	450	450	450
Series 16: Supervisory Analyst Examination	245	245	325	325	325	325
Series 22: Direct Participation Programs Representative Examination	60	60	100	100	100	100
Series 23: General Securities Principal Examination—Sales Supervisor Module	105	105	135	135	135	135

[62] FINRA also administers and delivers examinations sponsored (*i.e.,* developed) by the Municipal Securities Rulemaking Board (''MSRB'') and other SROs, the North American Securities Administrators Association, and the Federal Deposit Insurance Corporation. The fees charged for these examinations are set according to contracts with the examination sponsors, and FINRA is not proposing any changes to fees associated with those examinations at this time.

[63] *See* Order Approving SR–FINRA–2020–032, *supra* note 6, 85 FR 66592.

QUALIFICATION EXAMINATION FEES—PROPOSED IMPLEMENTATION—Continued

Examination number and name	2024 (current)	2025 (no change)	2026	2027	2028	2029
Series 24: General Securities Principal Examination	175	175	235	235	235	235
Series 26: Investment Company Products and Variable Contracts Principal Examination	150	150	200	200	200	200
Series 27: Financial and Operations Principal Examination	175	175	235	235	235	235
Series 28: Introducing Broker-Dealer Financial and Operations Principal Examination	150	150	195	195	195	195
Series 39: Direct Participation Programs Principal Examination	100	100	200	200	200	200
Series 57: Securities Trader Examination	80	80	105	105	105	105
Series 79: Investment Banking Representative Examination	300	300	395	395	395	395
Series 82: Private Securities Offering Representative Examination	60	60	100	100	100	100
Series 86: Research Analyst Examination—Analysis	225	225	295	295	295	295
Series 87: Research Analyst Examination—Regulatory	150	150	195	195	195	195
Series 99: Operations Professional Examination	60	60	100	100	100	100

FINRA is proposing a one-time fee increase across examinations in 2026 designed to generate an additional $14 million in revenue across all examinations by 2029. In addition, FINRA has determined the amount of each examination fee increase based on the frequency with which the examination is administered, as well as the average fee per hour of examination length. Examinations that are administered more frequently or are longer in duration typically require more effort and cost to develop, maintain, and update. As a result, FINRA is generally proposing greater increases for those examinations, and smaller increases for others to preserve the broad and equitable distribution of proposed fee increases, as discussed throughout this filing.

Continuing Education Regulatory Element Fee

Continuing education fees are also registered person-level fees that, while use-based, correlate to the third critical component of FINRA's regulatory costs—the number and role of registered persons at a firm. In conjunction with other SROs and the Securities Industry/Regulatory Council on Continuing Education, FINRA administers the continuing education (CE) program for the securities industry.[64] The Regulatory Element of the CE program provides training on significant rule changes and other regulatory developments relevant to each registration category. Registered persons must complete the Regulatory Element annually by December 31 for each registration that they hold.[65]

Section 4(f) of Schedule A to the FINRA By-Laws sets forth the fees associated with the Regulatory Element requirement. FINRA has not increased the fee for the web-based delivery of the Regulatory Element since it was established in 2015.[66] FINRA is proposing to increase the Regulatory Element fee in 2026 as follows:

CONTINUING EDUCATION FEE—PROPOSED IMPLEMENTATION

Fee	2024 (current)	2025 (no change)	2026	2027	2028	2029
Continuing Education	$18	$18	$25	$25	$25	$25

When the proposed regulatory element fee rate is fully implemented, it is designed to generate an additional $4 million in annual revenue by 2029.

Select Use-Based Fees

Corporate Financing Private Placement Review Fee

FINRA Rule 5122 (Private Placements of Securities Issued by Members) imposes requirements regarding disclosure, filing, and use of offering proceeds for members that sell a private placement of securities issued by a member or a control entity, subject to various exemptions. Pursuant to FINRA Rule 5122, members that offer or sell their own securities or those of a control

[64] *See* FINRA Rule 1240.

[65] *See* FINRA Rule 1240; *see also* Securities Exchange Act Release No. 93097 (September 21, 2021), 86 FR 53358 (September 27, 2021) (Order Approving File No. SR–FINRA–2021–015).

[66] *See* Securities Exchange Act Release No. 75581 (July 31, 2015), 80 FR 47018 (August 6, 2015) (Order Approving File No. SR–FINRA–2015–015). After FINRA adopted amendments to require registered persons to complete the Regulatory Element of CE annually rather than every three years, FINRA revised the Regulatory Element fee from a $55 fee paid once every three years, to an $18 fee paid annually. *See* Securities Exchange Act Release No. 93928 (January 7, 2022), 87 FR 2193, 2194 (January 13, 2022) (Notice of Filing and Immediate Effectiveness of File No. SR–FINRA–2021–034). Thus, the Regulatory Element fee has not substantially changed since 2015.

entity must file with FINRA's Corporate Financing Department (''Corporate Financing'') a private placement memorandum, term sheet or other offering document and any retail communication that promotes or recommends the member private offering at or prior to the first time the documents are provided to any prospective investor.

Its companion rule, FINRA Rule 5123 (Private Placement of Securities), requires members that sell any other type of private placement to file with Corporate Financing a copy of any private placement memorandum, term sheet or other offering document, and any retail communication that promotes or recommends the private placement. Such filing must occur within 15 calendar days of the first sale, subject to various exemptions.

FINRA has historically performed the review of such filings at no cost since the program was created approximately 15 years ago.[67] This program requires substantial resources, and the volume of filings has increased significantly in recent years.[68] FINRA thus proposes to establish the following fees related to private placement review in July 2025 as follows:

CORPORATE FINANCING PRIVATE PLACEMENT REVIEW FEE—PROPOSED IMPLEMENTATION

Private placements (offerings >$25M)	2024 (current)	2025 (effective 7/1/25) (million)	2026 (million)	2027 (million)	2028 (million)	2029 (million)
Flat Fee	$0	$300	$300	$300	$300	$300
% of Offering	0%	0.008%	0.008%	0.008%	0.008%	0.008%
Offering Cap	$0	$500	$500	$500	$500	$500

The proposed fee is designed to be similar to the current fee for public offering reviews. Like the public offering review fee, this proposed fee would consist of both a flat fee and a percentage of the maximum offering proceeds. However, to reduce the impact on smaller issuers and broker-dealers, FINRA proposes to apply this fee only to private placement offerings of greater than $25 million and to cap the fee at $40,300 (0.008% of $500,000,000 offering + $300 flat fee). In general, FINRA believes that such fees would be paid for by, or passed through to, issuers.[69] This proposed new use-based fee is structured to take into account associated types of costs, including the substantial resources such reviews require.[70] When the proposed new fee for private placement review is fully implemented, it is designed to generate $6 million in annual revenue by 2029.

Corporate Financing Public Offering Review Fee

Corporate Financing reviews the underwriting terms and arrangements of proposed public offerings of securities for compliance with the requirements of FINRA Rule 5110 (Corporate Financing Rule—Underwriting Terms and Arrangements). Pursuant to Rule 5110, no member firm or person associated with a member firm may participate in a public offering subject to the rule, or to FINRA Rules 5121 (Public Offerings of Securities With Conflicts of Interest) and 2310 (Direct Participation Programs), unless the documents and information specified in the rule have been filed with and reviewed by Corporate Financing. The documents Corporate Financing reviews include registration statements, underwriting agreements, engagement letters and other relevant supporting documentation for public offerings. Corporate Financing's review is complementary to the SEC's registration process, which covers a larger set of filings than FINRA's program.[71]

Section 7 of Schedule A to the FINRA By-Laws sets forth the fees associated with filing documents pursuant to the Corporate Financing Rule. It currently provides for a flat fee of $500 plus .015% of the proposed maximum aggregate offering price or other applicable value of all securities registered on an SEC registration statement or included on any other type of offering document (where not filed with the SEC), with a cap of $225,500; or a fee of $225,500 for an offering of securities filed with the SEC and offered pursuant to Securities Act Rule 415 by a Well-Known Seasoned Issuer (''WKSI'') as defined in Securities Act Rule 405. The fee associated with any amendment or other change to the documents initially filed with Corporate Financing is also subject to the current $225,500 cap. FINRA has not raised the fee cap since 2012.[72]

FINRA is proposing to increase and modify the fee cap beginning in July 2025 as follows:

[67] FINRA Rule 5122 became effective on June 17, 2009; FINRA Rule 5123 became effective on December 3, 2012.

[68] *See Regulatory Notice* 23–08 (May 2023) (''In recent years, the unregistered offering market outpaced the public market. . . . In 2021, for example, members submitted over 3,800 unique filings for private placements pursuant to FINRA Rules 5122 and 5123, which require filings for private placements generally sold to individuals, in comparison to roughly 2,000 submissions in 2013.'').

[69] FINRA's belief is informed by its experience with the public offering fee, described below, and based on discussions with FINRA advisory committees and other industry participants.

[70] As discussed above, when applying use-based fees, FINRA takes into account direct costs for the program, indirect costs for the program, and a contribution to FINRA's overall regulatory operations. *See supra* note 7 and accompanying text.

[71] The SEC's current filing fee rate for filings made pursuant to Sections 6(b) of the Securities Act of 1933 and Sections 13(e) and 14(g) of the Exchange Act is $147.60 per $1,000,000. *See https://www.sec.gov/edgar/filer/filing-fees/filing-fee-rate.*

[72] *See* Securities Exchange Act Release No. 67241 (June 22, 2012), 77 FR 38698 (June 28, 2012) (Notice of Filing and Immediate Effectiveness of File No. SR–FINRA–2012–029); *see also Regulatory Notice* 12–32 (June 2012).

CORPORATE FINANCING PUBLIC OFFERING REVIEW FEE CAP—PROPOSED IMPLEMENTATION

IPO	2024 (current)	2025 (effective 7/1/25)	2026	2027	2028	2029
Non-WKSI	$225,000	$1,125,000	$1,125,000	$1,125,000	$1,125,000	$1,125,000
WKSI	225,000	270,000	324,000	389,000	467,000	560,000

This proposed rule change would raise the fee cap to $1,125,000, which would account for the significant growth in the size of offerings since the cap was last raised in 2012. However, for WKSIs, the cap would be raised to $560,000 over a period of five years. FINRA notes that raising the caps would also create more consistency with the SEC IPO review fee, which has no cap.[73] FINRA projects that increasing the cap as proposed would capture 81% of the incremental revenues if there were no cap while bounding the impact on WKSIs whose offerings tend to be less resource intensive for Corporate Financing to review. FINRA believes such fees are and would continue to be paid for by, or passed through to, issuers.[74] When the proposed fee increase is fully implemented, it is designed to generate an additional $31 million in annual revenue by 2029.[75]

Advertising Regulation Review Fee

One way that FINRA protects investors is by having its Advertising Regulation Department review specified broker-dealers' communications for compliance with FINRA's communications with the public rules, and similar rules of[76] the SEC, MSRB and Securities Investor Protection Corporation. FINRA rules require that member communications be based on principles of fair dealing and good faith, be fair and balanced, and provide a sound basis for evaluating the facts in regard to any particular security or type of security, industry or service. Among other things, FINRA rules prohibit member firm communications from including false, exaggerated, unwarranted or misleading statements or claims.

Section 13 of Schedule A to the FINRA By-Laws sets forth the fees associated with review of communications filed with FINRA. Despite rising costs to administer the Advertising Regulation Department review program, FINRA has not increased these fees since 2012.[77] FINRA is proposing an increase to the regular review charge in 2025 as follows:

ADVERTISING REGULATION REVIEW—PROPOSED IMPLEMENTATION

Fee	2024 (current)	2025	2026	2027	2028	2029
Regular Review Charge (non-expedited)	$125	$300	$300	$300	$300	$300

When the proposed fee increase is fully implemented, it is designed to generate an additional $11 million in annual revenue by 2029.[78] Under the proposed rule change, the $600 expedited fee would not change.

Dispute Resolution Services Arbitration Fees

DRS operates the largest securities arbitration forum in the United States, to assist in the resolution of disputes involving customers, members and associated persons. As discussed in turn below, FINRA proposes to raise the (1) hearing session fees, (2) filing fees, (3) member surcharge, and (4) member process fee, as set forth in the Code of Arbitration Procedure for Customer Disputes (''Customer Code'') and Code of Arbitration Procedure for Industry Disputes (''Industry Code'') (together, the ''Codes'').[79]

FINRA believes that the cost of arbitration should be borne by the users of the forum, without imposing a significant barrier to public customers who bring arbitration claims to the forum. Thus, the current DRS arbitration fees are designed to be borne 85 percent by members and 15 percent by customers.[80] The proposed rule change would maintain that pricing structure. It would also maintain a sliding scale fee structure in which the member surcharge and process fees increase across the board, while the hearing session fees and filing fees increase more for higher value claims. Taken together, the proposed increase in DRS' arbitration fees would aim to partially recover increasing costs to operate the forum, without placing an undue burden on users of the forum, particularly customers or claimants with small claims. When the proposed DRS arbitration fee increases are fully implemented, they are designed to generate an additional $10 million in annual revenue by 2029.

Hearing Session Fees

Under FINRA Rules 12902 and 13902, hearing session fees are charged for each hearing session based on the amount in dispute. In the award, the panel determines the amount of each hearing session fee that each party must pay. The arbitrators may apportion the fees in any manner, including assessing the entire amount against one party.[81]

FINRA proposes to raise hearing session fees in 2025 as follows:

[73] *See supra* note 71.

[74] *See supra* note 69.

[75] The proposed rule change would remove the language ''on an automatically effective Form S–3 or F–3 registration statement'' because WKSIs may use other registration forms. *See, e.g.,* Securities Offering Reform for Closed-End Investment Companies, Investment Company Act Release No. 33836 (April 8, 2020), 85 FR 33290 (June 1, 2020).

[76] *See generally* FINRA Rule 2200 Series. FINRA also will review communications filed voluntarily.

[77] *See* Securities Exchange Act Release No. 67239 (June 22, 2012), 77 FR 38692 (June 28, 2012) (Notice of Filing and Immediate Effectiveness of File No. SR–FINRA–2012–028).

[78] FINRA currently charges a $10 fee for the review of each printed page or web page in excess of 10 pages, and for each minute of tape reviewed in excess of 10 minutes of video or audio media. This would not change under the proposed rule change.

[79] The Customer Code is the FINRA Rule 12000 Series; the Industry Code is the FINRA Rule 13000 Series. The proposed fee increases described, below, would be implemented in both Codes.

[80] *See* Securities Exchange Act Release No. 90227 (October 20, 2020), 85 FR 67794 (October 26, 2020) (Notice of Filing File No. SR–FINRA–2020–035).

[81] *See* FINRA Rules 12902(a)(1) and 13902(a)(1).

HEARING SESSION FEES—PROPOSED IMPLEMENTATION

Amount of claim (exclusive of interest and expenses)	2024 (current)		2025–2029	
	Hearing session w/ one arbitrator	Hearing session w/ three arbitrators	Hearing session w/ one arbitrator	Hearing session w/ three arbitrators
Up to $2,500	$50	N/A	$50	N/A
$2,500.01 to $5,000	125	N/A	125	N/A
$5,000.01 to $10,000	250	N/A	250	N/A
$10,000.01 to $25,000	450	N/A	450	N/A
$25,000.01 to $50,000	450	$600	450	$600
$50,000.01 to $100,000	450	750	450	750
$100,000.01 to $500,000	450	1,125	675	1,690
$500,000.01 to $1,000,000	450	1,325	675	1,990
$1,000,000.01 to $5,000,000	450	1,435	675	2,160
Over $5,000,000	450	1,575	675	2,370
Non-Monetary/Not Specified	450	1,150	675	1,725

To minimize the impact of the proposed rule change on customers or claimants with small claims, the proposed fee increase would only apply to claims of more than $100,000 and claims for non-monetary or unspecified damages. The tiered structure of this fee would not change under the proposed rule change.

FINRA notes the hearing session fee may not be assessed under certain circumstances. For example, if the parties timely settle the arbitration, the parties will not be assessed hearing session fees.[82] During settlement negotiations, parties have the opportunity to determine how to share any hearing session fees, if hearings are held.[83] For cases that result in an award, the panel has discretion to assess hearing session fees as part of the award,[84] which allows them to consider numerous factors to determine each party's appropriate share and assign the costs accordingly. The proposed rule change would not change a party's ability to settle or arbitrators' discretion to assess the hearing session fees.

Filing Fees

Filing Fees Paid by Customers, Associated Persons or Other Non-Members

Filing fees are due when a claim is filed. FINRA Rule 12900(a) sets forth the filing fee schedule for customers, associated persons and other non-members who file a claim, counterclaim, cross claim or third party claim in a customer dispute. FINRA Rule 13900(a) sets forth the filing fee schedule for associated persons who file a claim, counterclaim, cross claim or third party claim in an industry dispute. The filing fee is based on the claim amount or type of damages requested.

FINRA proposes to raise filing fees in 2025 as follows:

FILING FEE (CUSTOMERS, ASSOCIATED PERSONS, AND OTHER NON-MEMBERS)—PROPOSED IMPLEMENTATION

Amount of claim (exclusive of interest and expenses)	2024 (current)	2025	2026	2027	2028	2029
$.01 to $1,000	$50	$50	$50	$50	$50	$50
$1,000.01 to $2,500	75	75	75	75	75	75
$2,500.01 to $5,000	175	175	175	175	175	175
$5,000.01 to $10,000	325	325	325	325	325	325
$10,000.01 to $25,000	425	425	425	425	425	425
$25,000.01 to $50,000	600	600	600	600	600	600
$50,000.01 to $100,000	975	975	975	975	975	975
$100,000.01 to $500,000	1,425	1,790	1,790	1,790	1,790	1,790
$500,000.01 to $1,000,000	1,740	2,175	2,175	2,175	2,175	2,175
$1,000,000.01 to $5,000,000	2,025	2,540	2,540	2,540	2,540	2,540
Over $5,000,000	2,300	2,875	2,875	2,875	2,875	2,875
Non-Monetary/Not Specified	1,600	2,000	2,000	2,000	2,000	2,000

To minimize the impact of the proposed rule change on customers or claimants with small claims, and consistent with the current claim amount tier structure, the proposed fee increase would only apply to claims of more than $100,000 and claims for non-monetary or unspecified damages. The tiered structure of this fee would not change under the proposed rule change.

Filing Fees Paid by Members

FINRA Rules 12900(b) and 13900(b) set forth the filing fee schedule for members filing a claim, counterclaim, cross claim, or third party claim in customer and industry cases, respectively. FINRA proposes to increase the member filing fee in 2025 as follows:

[82] *See* FINRA Rules 12701 and 13701.

[83] *See* FINRA Rules 12701(b) and 13701(b).

[84] *See* FINRA Rules 12902(a)(1) and 13902(a)(1).

FILING FEE (MEMBERS)—PROPOSED IMPLEMENTATION

Amount of claim (exclusive of interest and expenses)	2024 (current)	2025	2026	2027	2028	2029
$.01 to $1,000	$225	$225	$225	$225	$225	$225
$1,000.01 to $2,500	350	350	350	350	350	350
$2,500.01 to $5,000	525	525	525	525	525	525

Partial Refund of Filing Fee

If a claim is settled or withdrawn more than 10 days before the date of the hearing on the merits, a party paying a filing fee will receive a partial refund of the filing fee in the amount specified under FINRA Rule 12900(c) for customer cases and FINRA Rule 13900(c) for industry cases. FINRA proposes to increase the partial filing fee refund in 2025 as follows:

PARTIAL FILING FEE REFUND—PROPOSED IMPLEMENTATION

Amount of claim (exclusive of interest and expenses)	2024 (current)	2025	2026	2027	2028	2029
$.01 to $1,000	$25	$25	$25	$25	$25	$25
$1,000.01 to $2,500	50	50	50	50	50	50
$2,500.01 to $5,000	125	125	125	125	125	125
$5,000.01 to $10,000	250	250	250	250	250	250
$10,000.01 to $25,000	300	300	300	300	300	300
$25,000.01 to $50,000	450	450	450	450	450	450
$50,000.01 to $100,000	750	750	750	750	750	750
$100,000.01 to $500,000	1,125	1,410	1,410	1,410	1,410	1,410
$500,000.01 to $1,000,000	1,300	1,625	1,625	1,625	1,625	1,625
$1,000,000.01 to $5,000,000	1,400	1,750	1,750	1,750	1,750	1,750
Over $5,000,000	1,500	1,875	1,875	1,875	1,875	1,875
Non-Monetary/Not specified	1,200	1,500	1,500	1,500	1,500	1,500

Member Surcharge

FINRA assesses a surcharge against each member that (a) files a claim, counterclaim, cross claim or third party claim under the Codes; (b) is named as a respondent in a claim, counterclaim, cross claim, or third party claim filed and served under the Codes; or (c) employed, at the time the dispute arose, an associated person who is named as a respondent in a claim, counterclaim, cross claim, or third party claim filed and served under the Codes.

FINRA Rules 12901 and 13901 set forth the schedule of the member surcharge, which is assessed based on the amount of the claim, exclusive of interest and expenses. The member is assessed one surcharge per arbitration case.[85] Member surcharges are intended to allocate the costs of administering the arbitration case to the firms that are involved in those cases. Thus, each member is assessed a member surcharge, based on the aggregate claim amount, when it is brought into the case, whether through a claim, counterclaim, cross claim or third party claim. The member surcharge is the responsibility of the member party and cannot be allocated to any other party (''non-allocable'').

FINRA proposes to increase the member surcharge in 2025 as follows:

MEMBER SURCHARGE—PROPOSED IMPLEMENTATION

Amount of claim (exclusive of interest and expenses)	2024 (current)	2025	2026	2027	2028	2029
$.01 to $5,000	$150	$165	$165	$165	$165	$165
$5,000.01–$10,000	325	360	360	360	360	360
$10,000.01–$25,000	450	495	495	495	495	495
$25,000.01–$50,000	750	975	975	975	975	975
$50,000.01–$100,000	1,100	1,430	1,430	1,430	1,430	1,430
$100,000.01–$250,000	1,700	2,210	2,210	2,210	2,210	2,210
$250,000.01–$500,000	2,025	2,640	2,640	2,640	2,640	2,640
$500,000.01–$1,000,000	2,625	3,420	3,420	3,420	3,420	3,420
$1,000,000.01–$5,000,000	3,200	4,800	4,800	4,800	4,800	4,800
$5,000,000.01–$10,000,000	3,850	5,775	5,775	5,775	5,775	5,775

[85] *See* FINRA Rules 12901(a)(6) and 13901(f).

MEMBER SURCHARGE—PROPOSED IMPLEMENTATION—Continued

Amount of claim (exclusive of interest and expenses)	2024 (current)	2025	2026	2027	2028	2029
Over $10,000,000	4,325	6,490	6,490	6,490	6,490	6,490
Non-Monetary/Not Specified	2,000	2,600	2,600	2,600	2,600	2,600

The member surcharge would remain non-allocable under the proposed rule change and, therefore, would not result in any additional costs to other parties to the arbitration, including customers.

Member Process Fee

Under the Codes, each member that is a party to an arbitration or employed an associated person who is a party to an arbitration in which more than $25,000, exclusive of interest and expenses, is in dispute must pay a non-refundable process fee.[86]

FINRA Rules 12903 and 13903 set forth the process fee schedule. FINRA assesses the member the applicable process fee when the parties are sent the arbitrator lists or notification of the hearing. Like the member surcharge, the process fee is non-allocable to other parties to the arbitration.[87]

FINRA proposes to increase the process fee in 2025 as follows:

MEMBER PROCESS FEE—PROPOSED IMPLEMENTATION

Amount of claim (exclusive of interest and expenses)	2024 (current)	2025	2026	2027	2028	2029
$.01–$25,000	$0	$0	$0	$0	$0	$0
$25,000.01–$50,000	1,750	2,275	2,275	2,275	2,275	2,275
$50,000.01–$100,000	2,250	2,925	2,925	2,925	2,925	2,925
$100,000.01–$250,000	3,250	4,225	4,225	4,225	4,225	4,225
$250,000.01–$500,000	3,875	5,040	5,040	5,040	5,040	5,040
$500,000.01–$1,000,000	5,225	6,800	6,800	6,800	6,800	6,800
$1,000,000.01–$5,000,000	6,375	9,570	9,570	9,570	9,570	9,570
$5,000,000.01–$10,000,000	7,050	10,575	10,575	10,575	10,575	10,575
Over $10,000,000	7,300	10,950	10,950	10,950	10,950	10,950
Non-Monetary/Not Specified	3,850	5,005	5,005	5,005	5,005	5,005

The member process fee would remain non-allocable under the proposed rule change and, therefore, would not result in any additional costs to other parties to the arbitration, including customers.

Regulation T and Exchange Act Rule 15c3–3(n) Requests for Extension of Time Fee

Section 8 of Schedule A to the FINRA By-Laws governs the service charge for each extension of time request pursuant to Sections 220.4(c) and 220.8(d) of Regulation T[88] of the Board of Governors of the Federal Reserve System (''Regulation T'') and Exchange Act Rule 15c3–3(n).[89] FINRA has not increased this fee since 2006.[90] FINRA proposes to raise the fee in 2025 as follows:

REGULATION T AND EXCHANGE ACT RULE 15c3–3(n) REQUESTS FOR EXTENSION OF TIME—PROPOSED IMPLEMENTATION

2024 (current)	2025	2026	2027	2028	2029
$4 per request	$8 per request	$8 per request	$8 per request	$8 per request	$8 per request.

Based on current annual extension filing volumes, the current fee does not cover the estimated personnel and technology costs necessary to process extension requests. The proposal to increase the fee would recover some of those costs. When the proposed service charge for Regulation T and Exchange Act Rule 15c3–3(n) requests for extension of time increases are fully implemented, they are designed to generate an additional $640,000 in annual revenue by 2029.

Further, to streamline Section 8, FINRA proposes to eliminate current paragraph (a), which is not needed in light of the specific fee amount language set forth in paragraph (b) of that Section. The proposed rule change would also make minor technical corrections. As such, the proposed rule change would amend Section 8 to read: ''The service charge for processing each initial extension of time request and for all subsequent extension of time requests (1) involving the same transaction under Regulation T or (2) involving an extension of time previously granted pursuant to SEA Rule 15c3–3(n) shall be $8.00 per request.''

Proposed Conforming Changes To Select Funding Portal Member Fees

Section 15 of Schedule A to the FINRA By-Laws sets forth the fees that

[86] *See* FINRA Rules 12903 and 13903. If a claim amount is $25,000 or less, the member would not be assessed any process fees.

[87] *See* FINRA Rules 12903(d) and 13903(d). *See also* FINRA Rules 12701(b) and 13701(b).

[88] 12 CFR 220.4(c) and 220.8(d), respectively.

[89] 17 CFR 240.15c3–3.

[90] *See* Securities Exchange Act Release No. 53982 (June 14, 2006), 71 FR 35720 (June 21, 2006) (Notice of Filing and Immediate Effectiveness of File No. SR–NASD–2006–063). *See also Notice to Members* 06–30 (June 2006).

govern funding portals that are FINRA members. These fees became effective in 2016. At the time they were proposed, the funding portal fees related to eligibility proceedings and fingerprint processing, among others, were ''identical to those charged to broker-dealer members.'' [91] Though amendments to the fees charged to broker-dealer members related to eligibility proceedings and fingerprint processing have since occurred, those same fees for funding portal members have not been amended, and thus, are no longer aligned.

This proposed rule change would amend Section 15(f)(1) and Section 15(g) to conform the fees for members that are funding portals with the same fees that are charged to broker-dealer members. Specifically, in 2025, the proposed rule change would raise the funding portal member fee for filing an application to initiate eligibility proceedings from $1,500 to $5,000 to conform with the same fee that currently applies to broker-dealer members. Also in 2025, the proposed rule change would raise the funding portal member fee for fingerprints submitted electronically from $15 to $20 to conform with the same fee that currently applies to broker-dealer members.[92]

FINRA has filed the proposed rule change for immediate effectiveness. Implementation of the proposed rule change will be phased in gradually over a five-year period beginning on January 1, 2025, with full implementation of all proposed fee changes by 2029.

2. Statutory Basis

FINRA believes that the proposed rule change is consistent with the provisions of Section 15A(b)(5) of the Act,[93] which requires, among other things, that FINRA rules provide for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system that FINRA operates or controls. FINRA further believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act, which requires, among other things, that FINRA rules are not designed to permit unfair discrimination between customers, issuers, brokers or dealers.[94]

Reasonableness of the Proposed Fees

As discussed above, FINRA's longstanding approach to funding employs a variety of fees designed to meet FINRA's overall costs. As a not-for-profit SRO with a diverse membership, FINRA designs its mix of fees to seek recovery of its overall regulatory costs in a manner that is fair, reasonable, and equitably allocated among FINRA's members and users of FINRA's services. As FINRA has explained in the past, it is not feasible to associate a direct affiliated revenue stream for each of its programs (for example, FINRA collects no revenues in connection with its examinations of members), and thus numerous operations and services must be funded by other revenue sources, which include both core regulatory fees and other use-based fees. FINRA continues to believe that its overall Commission-approved cost-based pricing structure is reasonable, achieves general equity across its membership, and correlates fees with those firm components that drive FINRA's regulatory costs to the extent feasible.

The reasonableness of this proposal is reinforced by three key cost discipline mechanisms: oversight, transparency, and rebates.

First, FINRA's funding and operations are subject to several layers of oversight, including by the FINRA Board of Governors [95] and the Commission. As discussed in FINRA's 2024 annual budget summary, FINRA's efforts to manage its expenses responsibly while appropriately funding its mission includes Board oversight of its annual budget, compensation, and capital initiatives. This oversight is spearheaded by key Board committees (such as its Finance, Operations and Technology Committee), and includes requirements for Board or relevant Committee approval with respect to various financial matters, such as the annual budget, the allocation and use of fine monies, the incurring of any expenses above certain pre-established thresholds, the amount of any annual merit or incentive compensation, and the compensation of certain key employees. The Board also relies on expert external consultants where appropriate. Notably, this Board oversight complements various staff level controls over routine costs, including expense policies that are enforced with systemic checks and escalating management approval requirements for expense requests, with the effectiveness of these policies further subject to review by FINRA's Internal Audit Department.

FINRA is also extensively supervised by the Commission throughout the year. The SEC's Division of Examinations maintains dedicated staff as part of its FINRA and Securities Industry Oversight (''FSIO'') program who are devoted exclusively to overseeing FINRA and the MSRB—the two not-for-profit regulatory SROs—including with respect to FINRA's overall financial management and the adequacy of the resources devoted to its regulatory programs. In addition, rules or fees adopted by FINRA are subject to review by the Commission's Division of Trading and Markets. The Commission's oversight of FINRA, in turn, is itself subject to Congressional oversight and evaluation by the United States Government Accountability Office (''GAO'') every three years. By statute, the GAO evaluates ten specific aspects of the Commission's oversight of FINRA, including FINRA governance, executive compensation, and the use of funding to support FINRA's mission, including the methods and sufficiency of funding, how FINRA invests funds pending use, and the impact of these aspects on FINRA's regulatory enforcement. The GAO reports the results of its evaluation to Congress.[96]

Second, FINRA's commitment to reasonable funding in support of its mission is further reinforced by the transparency it has committed to provide on an ongoing basis—pursuant to its Guiding Principles—regarding its financial performance. Each year, FINRA publishes an extensive Annual Financial Report regarding its operations, prepared in accordance with GAAP. In addition, FINRA publishes annual reports on its budget and its use of fine monies. FINRA's Board also reviews and affirms its Financial Guiding Principles bi-annually and re-publishes these as well. FINRA also files with the IRS the Form 990 mandated for all not-for-profit organizations. Collectively, these reports provide extensive and comprehensive information regarding FINRA's policies and operations with respect to its budgets, revenues, costs, financial reserves, use of fine monies, capital and strategic initiatives, and compensation of senior executives, among other information. FINRA maintains a dedicated web page that consolidates its

[93] 15 U.S.C. 78*o*–3(b)(5).

[94] 15 U.S.C. 78*o*–3(b)(6).

[95] The FINRA Board of Governors is composed of a mix of public and industry representatives and uses its diverse expertise to oversee management in the administration of FINRA's affairs and the promotion of FINRA's welfare, objectives, and its public service mission to protect investors and uphold the integrity of markets.

[96] *See* GAO Report to Congressional Committees (November 2023), available at *https://www.gao.gov/assets/d24106578.pdf.*

annual reports in a readily accessible place.[97]

Third, as a not-for-profit organization, FINRA is committed to aligning its revenues with its mission-driven costs. If revenues exceed costs on a sustained basis, and FINRA's reserves are sustained appropriately, FINRA will assess the merit of providing rebates. This approach helps ensure that the revenues from these proposed fee changes will not exceed FINRA's reasonable regulatory costs and reserve needs on an ongoing basis. As discussed above, FINRA will continue to be guided by its historical approach to rebates if its revenue in future years exceeds its costs and reserves needs by a material amount.

Together, these mechanisms help ensure the ongoing reasonableness of FINRA's costs and the level of fees assessed to support those costs. The effectiveness of these mechanisms is demonstrated by FINRA's experience over the last decade, during which, FINRA was able to undertake expanding regulatory responsibilities while limiting cumulative cost growth to a rate that was lower than inflation and cost growth experienced by members.

The Proposed Fees Are Equitable and Not Unfairly Discriminatory

As discussed throughout this filing, this proposed rule change is designed to increase the fees FINRA relies on to fund its regulatory mission in a manner that preserves an equitable and not unfairly discriminatory fee allocation among FINRA members and users of FINRA services. Notably, through this proposed rule change, FINRA is seeking to preserve the carefully calibrated mix of core regulatory fees and select use-based fees to fund its regulatory mission that the Commission previously approved as equitably allocated among its large and diverse membership. In addition, based on feedback from members of FINRA's advisory committees and other industry consultations that emphasized the importance of advance notice and clarity of any fee increases for budget planning, implementation of the proposed rule change would take place over several years, with some fees going into effect in 2025, others implemented in 2026 or later, and some phased in over several years between 2025 and 2029.

The fees included in this proposed rule change were selected to address the impending funding deficit by raising fees in a way that maintains proportionality across members with minimal distributional impacts across firm sizes and business models. FINRA projects an aggregate dispersion level for the rate of increase realized across members to be 2.3% once the proposal is fully implemented.[98] In other words, in choosing among options according to the principles described above, FINRA also sought to have minimal impact on the distribution of fee rate changes across members by firm size and business model, as measured by the standard deviation of the rate of the fee increases. Given this limited distributional impact, FINRA believes the proposed rule change will preserve the same equitable and not unfairly discriminatory fee allocation that has long served as the foundation for FINRA's funding model and has been approved by the Commission.

B. Self-Regulatory Organization's Statement on Burden on Competition

FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Economic Impact Assessment

FINRA has undertaken an economic impact assessment, as set forth below, to analyze the regulatory need for the proposed rule change, its potential economic impacts, including anticipated costs, benefits, and distributional and competitive effects, relative to the current baseline, and the alternatives FINRA considered in assessing how best to meet FINRA's regulatory objectives.

Regulatory Need

Based on an analysis of its funding sources, anticipated costs, and expanding responsibilities, FINRA has determined that it will require additional revenues to continue to effectively meet its regulatory obligations. FINRA anticipates that the absence of stable funding at the levels proposed here may have material negative impacts on its regulatory program, weakening investor protections. Specifically, FINRA may be unable to maintain its current capabilities at their current standards or respond to a significant market event requiring unanticipated funding. In the absence of a fee increase, eventually FINRA may not be able to hire and retain staff with the appropriate expertise to conduct its regulatory activities (including examinations, market surveillance and investigations, enforcement, regulatory policy and rulemaking, qualification examinations and credentialing, and providing transparency for markets, members and registered persons), or make the necessary investments in the technology needed to support these activities.

Economic Baseline

The baseline for this proposed rule change includes FINRA's historical costs and revenues, the current schedule of fees assessed by FINRA, and the direct and indirect allocation of those fees across members, associated persons, third parties, and investors. The baseline also encompasses the scope of activities conducted by FINRA to meet its mission, and FINRA's current ability to address changing market activities and conditions through investment in staff, infrastructure, and technology.

As a not-for-profit organization, FINRA targets break-even cash flows that allow it to appropriately fund its regulatory mission, and maintains a reasonable financial reserve necessary to meet unanticipated circumstances. Between 2013 and 2023, FINRA's cost increase CAGR was 3.5%, or 41% over the entire period.[99] Over the same period, members' reported cost increase CAGR was 8.7%, or a total increase of 129%.[100]

At the same time, capital markets have grown in size, complexity, and retail investor participation, in part, through an increase in the number of self-directed accounts and rapid technological changes. Partly in response to these changes, FINRA's regulatory responsibilities have, and continue to, grow as described above. There have been substantial increases in equity and options trading volume (respectively, over 70% and 160% increases since 2013) and in corporate and agency bond trading volume (over 230% increase since 2013). There has also been growth in the complexity of the securities markets (the number of registered national securities exchanges significantly increased since 2013, from 14 to 24 [101]) and trading of new and evolving products, such as security-based swaps and securities with crypto asset components, has increased. These changes have led to a more complex

[97] *See* FINRA Financial Reports and Policies, available at *https://www.finra.org/about/annual-reports.*

[98] *See generally* Exhibit 3, Charts 7 through 10.

[99] Based on figures drawn from FINRA's public Annual Financial Reports, which include FINRA subsidiaries.

[100] Based on FOCUS reports.

[101] *See https://www.sec.gov/fast-answers/divisionsmarketregmrexchangesshtml.* Additional registered national securities exchanges may contribute to more complex order lifecycles and trade reporting scenarios.

trading environment. This, in turn, has required enhancements to oversight by FINRA staff. In addition, as discussed above, FINRA has made substantial investments in its surveillance and examinations programs in response to new and amended SEC rules.

Over the past several years, FINRA has observed changes in the number of registered persons and members. Between 2013 and 2023, the number of registered persons was essentially unchanged (627,468 and 628,392, respectively).[102] In contrast, over the same period, the number of members decreased from 4,146 to 3,298, a decrease of approximately 20%.[103]

FINRA believes that the number of registered persons remained fairly constant because persons from exiting members migrated to other members, requiring FINRA regulatory resources to shift accordingly. FINRA staff's quarterly reviews of departing firms find that on average about 75% of their associated persons remain registered after their firm exits the securities business, either by remaining with an affiliate firm or moving to a new firm. In the last quarter of 2023, the retention rate was closer to 90%. The difference in the decline in the number of members versus registered persons is also related to the fact that most exiting firms are small,[104] such that their departure has relatively less impact on the total number of registered persons.

Despite its increased responsibilities and changes in FINRA's own oversight by the SEC, FINRA achieved relatively low expense growth through a variety of cost-saving mechanisms.[105] Staffing generates the majority of FINRA's expenses and was relatively flat until recent years, commensurate with increases in FINRA's responsibilities. As discussed above, since 2013, FINRA's total compensation costs rose by 31% on a cumulative basis as compared with a 50% increase for the average U.S. financial services employee.[106] In aggregate, since 2013, FINRA's expenses have grown less rapidly than those of members, with the ratio of member expenses to FINRA expenses gradually increasing over time. Chart 1, attached in Exhibit 3, presents these findings.[107]

Over the period between 2013 and 2023, FINRA's total regulatory and use-based fee CAGR was 3.9%. These revenues remained effectively flat from 2013 through 2019 due to a limited number of fee increases. A previously implemented fee increase was phased in between 2022 to 2024 and has resulted in increased levels of operating revenue. However, FINRA projects that increases in revenue will either remain flat or slightly decrease after 2024.

Chart 2 provides a view of actual revenues and expenses for 2013 to 2023 and anticipated revenue and expenses for 2024 to 2029 if no changes to the fee structure are made.[108] Chart 2 also includes historical and projected ''excess reserves.'' FINRA maintains a reserve fund as part of its funding framework, and excess reserves are reserves in excess of the minimum determined by the FINRA Board of Governors as appropriate, which is one year of expenditures.[109] FINRA has strategically relied on its reserves to help fund operating deficits in the past and will continue to strategically draw on its reserves where consistent with the Guiding Principles. Chart 2 illustrates, however, that without a fee increase, FINRA is projected to exhaust excess reserves and deplete its reserve balance below minimum target levels in the coming years.

Although FINRA's revenues would remain near current levels without any changes in the fee structure, FINRA reasonably anticipates that its future expenses will continue to grow at a pace of 5.9% on average per year based on the compounding impact of annual wage inflation, technology costs, and future capital initiatives.[110] In this scenario, revenues would increasingly fall behind anticipated costs. While FINRA's reserves may continue to cover the shortfall in the near-term, the reserves will reach their minimum prudent level of one year of operating costs within three to four years based on current projections if no corrective action is taken.

As described above, FINRA funds its regulatory and other related activities through a combination of regulatory fees and use-based fees. GIA, TAF, PA and Branch Office Fees, taken together, represent approximately 69% of 2023 revenues, while use-based fees represent approximately 31% of 2023 revenues. The specific fees that would be increased under this proposal represent approximately 89% of 2023 revenues.[111]

All core regulatory and use-based fees mentioned above are assessed directly to members. FINRA understands that many members shift at least some of the fees to other parties. For instance, it is regular practice among clearing and trading firms to ''pass-through'' the TAF to the underlying firm executing the trade. Further, FINRA understands that the executing firms commonly pass the TAF directly on to their customers submitting orders. Typically, TAF fees are reflected on the confirmation statement received by customers.[112]

Similarly, FINRA understands that many firms regularly pass-through to registered persons assessments such as the PA, registration fees, and qualification examination fees. FINRA understands that there may be

[102] *See* Table 1.2.2 of the FINRA Industry Snapshot, available at *https://www.finra.org/media-center/reports-studies/2024-industry-snapshot.* As FINRA notes when it publishes industry snapshots, FINRA regularly updates historical data series due to data revisions by reporting firms.

[103] *See* Table 2.2.3 of the FINRA Industry Snapshot.

[104] FINRA By-laws define the size of a member firm by the number of associated registered representative as the following: small—150 or fewer registered representatives; mid-size—151 to 500 registered representatives; and large—more than 500 registered representatives. A subgroup of the small firms are known as micro firms, firms with 10 or fewer registered representatives.

[105] As discussed above, cost savings have been accomplished in recent years through expense reduction initiatives, including conducting a comprehensive efficiency review of FINRA's core business lines; establishing a framework for improving measurement of FINRA's key objectives and results; voluntary retirement/incentive programs in 2020 and 2024; and strategic reductions in FINRA's corporate real estate footprint.

[106] *See supra* note 22.

[107] As with Chart 1, all of the charts discussed below are attached in Exhibit 3, available on FINRA's website at *http://www.finra.org.*

[108] The revenues and expenses presented in Chart 2 in terms of Cash Flow Sources and Cash Flow Uses—both historical and projected—do not include subsidiaries other than FINRA Regulation and FINRA Dispute Resolution, which was merged into FINRA Regulation at the end of 2015. Cash Flow Sources includes Operating Revenues, Investment Returns and Fines. Cash Flow Uses includes Operating Expenses and Capital Initiatives.

[109] *See supra* note 12.

[110] As discussed above, FINRA has made reasonably conservative assumptions using a variety of information points, including historical data and anticipated trends. *See supra* note 15. This estimate is based on the following assumptions for FINRA and excludes the independent budgeting of all of FINRA's active subsidiaries other than FINRA Regulation—specifically, FINRA CAT, LLC and the FINRA Investor Education Foundation: (1) wage inflation at an annual rate between 4% and 6%, consistent with the financial industry over the last five years; (2) technology expense growth: capital investments seeking long-term efficiency gains for both FINRA and the industry, rising cloud hosting costs driven by volume increases, maintaining technology labor competitiveness, and ongoing disaster recovery and cybersecurity requirements; and (3) rise in regulatory efforts and associated costs for FINRA's regulatory programs.

[111] Following the implementation of the proposed rule change, GIA, TAF, PA and Branch Office Fees, together, would represent approximately 72% of revenues, while use-based fees would represent approximately 28%.

[112] FINRA conducted a study of a sample of members, which included approximately 25 retail investor focused broker-dealers and approximately 15 institutional investor focused broker-dealers, to better understand practices of TAF pass through. The research found that the majority of the retail focused firms did pass through the TAF to their customers. FINRA does not know the full extent of this practice across all members.

differences in this practice across firms depending on each firms' business model. Competitive markets for the provision of brokerage and related financial intermediation services, along with difficulty in allocating certain fees to specific transactions, can limit the extent to which these fees can be passed-through.

Core regulatory fees are calibrated so that larger, more active and more geographically dispersed members are assessed higher fees, reflecting regulatory resource allocation. Likewise, the use-based fees that are part of core regulatory fees are designed to capture some of the costs associated with core regulatory activities in addition to the direct and indirect costs of the associated services. For example, FINRA believes it is appropriate that registration and qualification examination fees help defray the costs of regulating registered persons because members employing more persons require more regulatory effort on FINRA's part. This approach is consistent with a structure where the fees paid increase with the size of the firm's revenues (GIA) and the amount of trading activity it conducts (TAF). In addition, core regulatory fees tend to be correlated with member size and structure. As such, core regulatory fees are designed cohesively and comprehensively such that they should be evaluated in aggregate and not on a fee-by-fee or service-by-service basis.

The fee structure is also designed, purposefully, to account for diversity in firm size. Compliance and regulatory oversight naturally represent a larger relative cost to small firms. Because FINRA wants to prevent regulatory costs from either creating a barrier to entry for small firms, or over-burdening existing small firms, the current fee structure includes a level of cross-subsidization by larger firms.

FINRA believes that this practice supports two objectives. First, it is important that retail investors have access to diverse types of financial services intermediaries, including members of varying size. For example, some investors may prefer to engage registered persons associated with smaller firms. Second, the extent to which firms benefit from well-regulated markets is relative to firm size. Under well-regulated markets, investors are more willing to trust financial intermediaries because they are confident that they are treated fairly in their access to securities markets and products. Greater participation in the financial markets by investors allows firms to grow larger and become more diversified, leading to cost savings and reduced risk through economies of scale and scope. The concentration in both retail and institutional investor activity at larger firms suggests that larger firms reap substantial benefits from strong regulation and should therefore provide a substantial portion of the fees that support this regulation. At the same time, the impact of widespread misconduct at a larger firm may impair investor confidence more broadly than similar misconduct at a smaller firm. This lends further support to the practice of assessing higher fees on larger firms.

Chart 3 presents the distribution in 2024 of FINRA's regulatory and use-based fee revenue and the proportion of FINRA's examination time, along with the proportion of firms and registered persons, by firm-size category as defined in the FINRA By-Laws.[113] Small firms, including micro firms, account for 89% of the firms in the industry, 10% of total registered persons, 57% of FINRA's total firm examination time, and 12% of FINRA's revenues. Large firms, conversely, represent less than 5% of firms, over 80% of registered persons, 32% of FINRA's firm examination effort, and approximately 67% of FINRA's revenues. The remaining portions of firm examination time and revenues are attributable to mid-size firms.

Chart 4 presents the same measures as in Chart 3 by the business model category. The categories of capital markets and retail firms account for 80% of the firms in the industry, 72% of total registered persons, 55% of FINRA's total examination time, and 33% of FINRA's regulatory and use-based fee revenues.[114] The category of diversified firms, including most of the largest firms, accounts for approximately 5% of firms in the industry, almost 25% of total registered persons, over 27% of FINRA's total examination time, and 44% of FINRA's revenues. The remaining portions are attributable to the category of trading firms and the category of clearing firms.

Economic Impact

FINRA's fee proposal is intended to ensure that FINRA can continue to meet its mission of promoting investor protection and market integrity in a manner that facilitates vibrant capital markets. This proposed rule change preserves FINRA's ability to be a robust and effective SRO, protecting investors from manipulation, exploitation, and other harms. Adequate funding allows FINRA to develop regulatory approaches that are effective and efficient, and to revise its rules through, among other ways, its robust retrospective review process. Through appropriate funding, FINRA will be better situated to adapt to changing markets, market behaviors, and expanding responsibilities. A stable and reliable funding model also permits members to better anticipate and plan for FINRA's fees. These benefits accrue to current and prospective investors, firms, issuers, and others participating in financial intermediation.

FINRA notes that academic literature has provided evidence of the linkage between strong regulation in securities markets and improved outcomes, including more trading, lower transaction costs, and greater investor participation in the markets.[115] Bruggemann, et al. [2018] study the impact of differences in state regulation on OTC stocks. They find that firms issuing in the OTC market subject to stricter regulation are more liquid and are subject to lower ''crash risk.'' Cazier, et al. [2023] examine the effect of the SEC's initiative to prevent fraud in OTC markets by suspending inactive shell companies that could be targeted by market manipulators. The authors find that these suspensions are associated with fraud deterrence among other OTC firms operating within the same regulatory jurisdiction as the suspended firm. Silvers [2016] studies the impact of SEC enforcement actions against foreign cross-listed issuers. He shows evidence that other cross-listed issuers (not cited by the SEC) experienced positive returns, suggesting that increased regulatory attention increases valuation. Silvers [2020] and Lang et al.

[113] The revenue in Charts 3–10 excludes Corporate Financing fees, which are generally passed through to issuers, and a portion of DRS fees that are paid directly by customers. *See supra* note 31. The revenue in these charts also excludes MAP fees, which are incurred irregularly. *See also supra* note 8 and accompanying text.

[114] *See supra* note 113. Here, business model represents the primary type of services provided by the member firm.

[115] *See, e.g.,* U. Bruggemann, A. Kaul, C. Leuz & I. Werner, The Twilight Zone: OTC Regulatory Regimes and Market Quality, 31(3) The Review of Financial Studies, 898–942 (2018); R. Cazier, J. Huang & F. Zhou, Regulatory Spillover Effects in OTC Markets, Review of Accounting Studies, 1–33 (2023); Roger Silvers, The Valuation Impact of SEC Enforcement Actions on Nontarget Foreign Firms, 54 (1) Journal of Accounting Research, 187–234 (2016); Roger Silvers, Cross-Border Cooperation between Securities Regulators, 69 (2–3) Journal of Accounting and Economics, 101301 (2020); M. Lang, M. Maffett, J.D. Omartian & R. Silvers, Regulatory Cooperation and Foreign Portfolio Investment, 138 (1) Journal of Financial Economics 138–158 (2020); H. Christensen, M. Maffett & L. Vollon, Securities Regulation, Household Equity Ownership, and Trust in the Stock Market, 24 (3) Review of Accounting Studies, 824–859 (2019); and D. Aghanya, V. Agarwal & S. Poshakwale. Market in Financial Instruments Directive (MiFID), Stock Price Informativeness and Liquidity, 113 Journal of Banking & Finance, 105730 (2020).

[2020] further show that cross-border cooperation between securities regulators reduces the cost of liquidity provision and increases cross-border investment in the capital markets of participating countries. Finally, Christensen et al. [2019] and Aghanya et al. [2020] study the impact of the introduction of the European Union's Market Abuse Directive and MiFID. These studies conclude that these initiatives, designed to enhance investor protections, have led to higher household ownership of equities, higher liquidity, and higher stock price informativeness.

The proposed rule change would implement fee changes that would maintain the current distribution of total fees allocated across members by size and business model. Based on FINRA's projections of fee increases from 2024 to 2029, approximately 67% of the fee increases would be borne by large firms, 22% by mid-size firms, 9% by small firms, 1% by micro firms and the remaining 1% by non-members.[116]

Chart 5 describes the proportion of regulatory and use-based fees anticipated to be collected under the proposed rule change across firm size categories during the period from 2024 through 2029.[117] In each year, 66%–68% of the fee is expected to be borne by large firms, 16%–17% by mid-size firms, 11%–12% by small firms, approximately 1% by micro firms, and 3–4% by non-members. Therefore, the overall allocation of fees by firm size is expected to remain relatively unchanged with the implementation of the increase in fees.

Chart 6 describes the proportion of regulatory and use-based fees anticipated to be collected across firm business models during the period from 2024 through 2029.[118] In each year, approximately 70% of the fees are expected to be borne by diversified and retail firms, with the remaining fees distributed relatively evenly across trading, capital markets, and clearing firms. As with FINRA's analysis of the proposed fee increases by firm size, the chart demonstrates that the overall allocation by firm business models is expected to remain unchanged with the implementation of the increase in fees.

Taken together, these charts indicate that the proposed fee increases are designed to allocate the growth in fees in an equitable manner, all else held equal, by maintaining a similar allocation of fees across firm sizes and business models, both overall and year-by-year.

As discussed, while potentially material, FINRA fees represent a small dollar amount relative to industry activity. Since 2013, as a percentage of member revenue, FINRA's total fees have ranged between 0.2% and 0.4%, with an average of 0.30%. Under the assumption that members' revenues resume growth at a level commensurate with recent history,[119] FINRA's fees would be 0.31% percent by 2029.[120] This share of member revenue is close to the historical average of 0.30%.

The amount of the fee increase borne by members depends on the extent to which they shift the burden of these fees to their associated persons and customers. As discussed above, FINRA understands that of the fees addressed by this proposal, the fee most likely to be passed through to customers is TAF, which is directly tied to customer trading activities. Despite the pass-through, FINRA believes the proposed TAF increase would not significantly affect customer trading behavior as TAF represents a small proportion of the average value of customer transactions. In 2023, TAF per share traded was 0.031 basis points (0.00031%) of the average price of the traded shares. When the new rates are fully implemented in 2029, TAF per share traded would be approximately 0.058 basis points of the average price of traded shares.[121]

To better understand the impact of the proposed fee increases across members within each firm size category, FINRA analyzed the expected distribution of fee increases for all existing firms under the proposed fee structure, based on the expected rate of dispersion. Dispersion is a way to compare the anticipated growth rate in fees across a range of firms. Lower dispersion is associated with a higher degree of consistency in terms of the impact of the proposed fee increases and can be interpreted as more firms in a given group experiencing similar rates of growth. By seeking to limit dispersion, the proposal is effectively limiting the potential for inequitable treatment across members. This approach also reduces the potential for the proposed fee increase to create unintended impacts on the provision of financial services by members and the business models adopted by them.

FINRA's analysis examines the level of dispersion based on the CAGR of the expected fee increase. CAGR is measured in this analysis relative to FINRA's projection of total fees in 2024.[122] CAGR provides a standard metric to compare the relative impact of the fee increases within and across subgroups. Because the number of registered persons, trading and other business activities, and resulting aggregate fee dollar amounts vary significantly across firms and firm sizes, benchmarking to CAGR permits FINRA to closely compare the magnitude of the distribution across firms.

As discussed, implementation of the proposed rule change would take place over several years, with a minority of fees going into effect in 2025, most fees implemented in 2026 or later, and several fees phased in over several years between 2025 and 2029. Due to the variability in when fees are implemented, and whether they are implemented at one time or phased in, FINRA believes that considering dispersion by firm size category over the five-year period is more useful than on an annual basis.

Charts 7 through 10 provide a view on the distribution of fee increases within each firm size category. These charts also report the median increase in FINRA fees that are the subject of this proposal over the full period from 2025 through 2029 by firm size. Within the charts, each of the four central bars represents one standard deviation from the median, so that the two most central dark blue bars together would theoretically represent approximately 67% of all firms evaluated (plus or minus one standard deviation) and approximately 95% of firms evaluated should be represented under the four most central dark blue and mid-blue bars (plus or minus two standard deviations) presented in the charts.

While it is not feasible to eliminate the possibility that some members will experience a rate of fee growth that is outside of the two standard deviation range, FINRA sought to limit the number of firms falling into this category when structuring this proposal. These charts demonstrate that the proposal significantly limits the number of firms that fall beyond two standard deviations from the median increase. In particular, the proposal limits those

[116] The firm size categories are defined above, *see supra* note 104.

[117] *See supra* note 113.

[118] *See supra* note 113.

[119] This 2029 industry revenue projection is based on historical FOCUS revenue growth of 8.5% (2013–2023).

[120] *See supra* note 33 and accompanying text.

[121] The average share price estimate is based on the number of shares and dollar trading volume from CBOE. *See https://www.cboe.com/data_and_access_solutions* for details.

[122] We exclude firms that are not assessed GIA in the base year from CAGR distribution analysis. Since GIA in the base year drives the denominator of the CAGR formula, firms that are not assessed GIA would have inflated CAGRs by construction. Therefore, we exclude these firms to ensure that the tails of our distribution reflect a more accurate measure of fee growth.

firms that would be expected to experience a materially higher fee increase than the median (as defined by two standard deviations). When considering all the fees in this proposal, FINRA estimates that fewer than 2.5% of members would experience a fee increase greater than two standard deviations from the median. When only core regulatory fees are considered (*i.e.,* excluding select use-based fees that only impact the users of those programs or services) fewer than 1% of firms would experience a fee increase greater than two standard deviations from the median.[123]

Based on this analysis, FINRA concludes the following:

- For micro firms, the median firm would anticipate an annual increase of 3.4%, translating to a dollar increase of $625. Approximately three-quarters of these firms would experience an annual increase between 1.4% and 5.4% between 2025 and 2029. Holding revenues constant at 2024 levels, total regulatory and use-based fees would increase from 0.26% to 0.31% of FOCUS reported revenues on average. This group includes 1,538 firms and represents 46.5% of all FINRA members.
- For other small firms, the median firm would anticipate an annual increase of 3.9%, translating to a dollar increase of approximately $4,135. Approximately 80% of these firms would experience an annual increase in fees between 1.3% and 6.4% between 2025 and 2029. Holding revenues constant at 2024 levels, total regulatory and use-based fees would increase from 0.23% to 0.29% of FOCUS reported revenues on average. This group includes 1,414 firms and represents 42.8% of all FINRA members.
- For mid-size firms, the median firm would anticipate a 5% annual increase, translating to a dollar increase of approximately $82,500. Approximately three-quarters of these firms would experience an annual increase between 2.9% and 7.1% between 2025 and 2029. Holding firm revenues constant at 2024 levels, total regulatory and use-based fees would increase from 0.26% to 0.36% of FOCUS reported revenues on average. This group includes 212 firms and represents 6.4% of all FINRA members.
- For large firms, the median firm would anticipate a 5.4% annual increase, translating to a dollar increase of approximately $415,000. Approximately three-quarters of these firms would experience an annual increase between 4.0% and 6.9% between 2025 and 2029. Holding revenues constant at 2024 levels, total regulatory and use-based fees would increase from 0.18% to 0.23% of FOCUS reported revenues on average. This group includes 141 firms and represents 4.3% of all FINRA members.

FINRA notes that 1.7% of micro firms would experience a fee increase greater than two standard deviations above the median. Because the median increase is relatively low ($625), small dollar increases in fees can result in a large change in CAGR and its distribution.

FINRA also notes that the 2.5% of small firms that would experience a fee increase greater than two standard deviations are mostly firms that would incur new or increased use-based fees for FINRA services that are not core regulatory activities. If only core regulatory fees are considered, only 1.1% of small firms would experience a fee increase greater than two standard deviations from the median increase.

The 2.4% of mid-size firms that would experience a fee increase greater than two standard deviations above the median are mostly firms that incur a significant increase in TAF. If TAF is excluded, only 1.4% of mid-size firms would experience a fee increase greater than two standard deviations from the median increase. As mentioned above, FINRA understands that the TAF is typically passed-through to customers.

As part of its analysis, FINRA also considered the broad potential impacts on competition under this proposal. The analysis considers the impact across all FINRA members, across members based on size or business model, and between members and other financial services providers.

FINRA does not anticipate that the proposal will materially impact competition among members. The proposal is designed to maintain the current funding model and the relative allocation of fees across its core regulatory fees and select use-based fees. In other words, each of the affected fees would increase commensurate with fees charged under the current framework; no individual fee would be raised such that it may create inordinate hardships for some firms and benefit others. Implementation of the proposed rule change would not require significant system or process changes by firms.

Similarly, FINRA does not anticipate that the proposed rule change will materially impact competition across members of different sizes or business models. The analysis of distributions within firm size indicates that firms may anticipate some differences in fee increases based on the services they provide and the way they provide those services. Nevertheless, as designed, the proposal maintains the relative allocation of fees across firm size and business model, meaning the proposed rule change is designed to preserve a consistent rate of growth in fee increases across firm size and business model. As noted above, this approach is designed to limit the likelihood that any specific fee change may create hardships for some firms and benefit others. Further, this proposed rule change maintains the current approach for cross-subsidization of the cost of regulatory oversight of members of different sizes.

FINRA can identify two potential impacts of this proposal on the competition between its members and other providers of financial services. Although these increases are calibrated to limit the impact on individual members, at the margin, some members may find these increases material to their business. Further, where members may have the ability to provide similar services, or a subset of services, under an alternative business model that does not require FINRA membership, increased FINRA costs may increase the likelihood that these firms withdraw from FINRA in favor of the alternative business model. Based on the information available to it today, FINRA does not have an accurate measure of the number of members that may choose to withdraw registration as a FINRA member as a result of this proposed rule change.[124]

The proposed rule change may have an additional impact on competition through funding FINRA's regulatory activities. As discussed above, strong and effective surveillance and regulation of securities markets has been shown to increase investor confidence in the fairness of the market. This has been measured by an increase in retail participation in the securities markets, greater liquidity, and higher securities valuations. Given the presence of substitutes to broker-dealers for retail clients—*e.g.,* investment advisory services, issuers selling directly to the public, or certain market-linked insurance products—it may be reasonable to expect that effective regulation by FINRA would continue to

[123] As discussed above, the select use-based fees include Corporate Financing Private Placement Review; Corporate Financing Public Offering Review; Advertising Regulation Review; DRS Arbitration; and Regulation T and Exchange Act Rule 15c3–3(n) Requests for Extension of Time. *See supra* note 24.

[124] FINRA notes that because of the time lapse between proposal, adoption and implementation of fee increases, combined with changing business environments over time, it is difficult to reliably estimate the number of firms that might have exited historically because of previous fee increases.

be a positive externality to those competitors. That is, increased confidence by retail investors due to FINRA's activities may increase business opportunities and lower transaction costs in the securities industry as a whole. This would benefit non-FINRA member competitors, especially in instances where investors do not recognize these competitors are not regulated by FINRA.

Alternatives Considered

In developing this proposal, FINRA considered several options. First, FINRA considered making all the fee changes effective in 2025. FINRA did not pursue this alternative because it believed that, where possible, members should be provided an extended time period to plan for the proposed fee increase. In light of uncertainty and volatility in the markets, FINRA believes that implementing the proposed fee increase at one time would impose a greater burden on members than phasing in the implementation of the fee increases, as proposed.

FINRA also considered making all of the fee changes effective in 2026, but decided against that approach for many of the same reasons noted above. However, FINRA believes that deferring implementation of all fees in this proposed rule change is unnecessary and would hinder FINRA's ability to support its regulatory mission. As discussed, the uncertainty in the markets, which creates challenges for members and investors, also impacts FINRA. For example, market volatility increases the risk that FINRA's reserve portfolio will fall below the appropriate minimum.[125] This limits FINRA's flexibility in relying on its reserves to cover funding gaps and indicates the need for stable funding as soon as practicable.

Further, FINRA notes that consistent investor protection is of vital importance, particularly in times of uncertainty, where FINRA has seen an increase in customer complaints and alerts from its surveillance programs.[126] Financial limitations that constrain FINRA's ability to carry out its mission would have material negative implications for investors and the financial markets. Taking these concerns into account, FINRA believes that the most prudent course of action is to start increasing some fees in 2025, but to stagger the implementation over multiple years.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[127] and paragraph (f)(2) of Rule 19b–4 thereunder.[128] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–FINRA–2024–019 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–FINRA–2024–019. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of FINRA. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection.

All submissions should refer to file number SR–FINRA–2024–019 and should be submitted on or before December 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[129]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101690; File No. SR–NASDAQ–2024–067]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Fees for Connectivity and Co-Location Services

November 21, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 8, 2024, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's fees for connectivity and co-location services, as described further below.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/nasdaq/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend the Exchange's fees relating to connectivity and co-location services.[3] Specifically, the Exchange proposes a one-time adjustment to raise its fees for connectivity and co-location services in General 8, fees assessed for remote multi-cast ITCH (''MITCH'') Wave Ports in Equity 7, Section 115, and certain fees related to Nasdaq Testing Facilities in Equity 7, Section 130 by 10%, with certain exceptions.

General 8, Section 1 includes the Exchange's fees that relate to connectivity, including fees for cabinets, external telco/inter-cabinet connectivity fees, fees for connectivity to the Exchange, fees for connectivity to third party services, fees for market data connectivity, fees for cabinet power install, and fees for additional charges and services. General 8, Section 2 includes the Exchange's fees for direct connectivity services, including fees for direct circuit connection to the Exchange, fees for direct circuit connection to third party services, and fees for point of presence connectivity. With the exceptions of the Exchange's GPS Antenna fees and the Cabinet Proximity Option Fee for cabinets with power density >10kW,[4] the Exchange proposes to increase its fees throughout General 8 by 10%.

In addition to increasing fees in General 8, the Exchange also proposes to increase certain fees in Equity 7. First, the Exchange proposes to increase the installation and recurring monthly fees assessed for remote MITCH Wave Ports[5] in Equity 7, Section 115(g)(1) by 10%. In addition, the Exchange proposes to increase certain fees in Section 130(d), which relate to the Nasdaq Testing Facility. Equity 7, Section 130(d)(1)(C) provides that subscribers to the Nasdaq Testing Facility (''NTF'') located in Carteret, New Jersey shall pay a fee of $1,000 per hand-off, per month for connection to the NTF. The hand-off fee includes either a 1Gb or 10Gb switch port and a cross connect to the NTF. In addition, Equity 7, Section 130(d)(1)(C) provides that subscribers shall also pay a one-time installation fee of $1,000 per hand-off. The Exchange proposes to increase these aforementioned fees by 10% to require that subscribers to the NTF shall pay a fee of $1,100 per hand-off, per month for connection to the NTF and a one-time installation fee of $1,100 per hand-off.

The proposed increases in fees would enable the Exchange to maintain and improve its market technology and services to remain competitive with its peers. Over the years, customer demand for more sophisticated, higher-throughput, lower-latency, and higher-power connectivity solutions has increased. The Exchange continues to invest in maintaining, improving, and enhancing its connectivity and co-location products, services, and facilities—for the benefit and often at the behest of its customers. Such enhancements include refreshing hardware and expanding Nasdaq's existing co-location facility to offer customers additional space and power. Nevertheless, and with the exception of fees that were established as part of a new service in 2017 (and have remained unchanged since their adoption), the Exchange has not increased any of the fees included in the proposal since prior to 2017, and many of the fees date back to between 2010 and 2014. For each of the connectivity products and services that pre-date 2017, inflation (as measured using the ''Data PPI'' metric described below) has been between roughly 15–17%, and in no instance has such inflation been less than 10%. Nevertheless, the Exchange proposes to increase its fees only with respect to the 10% inflation that has occurred since 2017.

As discussed below, the Exchange proposes to adjust its fees by an industry- and product-specific inflationary measure. It is reasonable and consistent with the Act for the Exchange to recoup its investments, at least in part, by adjusting its fees. Continuing to operate at fees frozen at 2010–2017 levels impacts the Exchange's ability to enhance its offerings and the interests of market participants and investors.

The fee increases the Exchange proposes are based on an industry-specific Producer Price Index (''PPI''), which is a tailored measure of inflation.[6] As a general matter, the Producer Price Index is a family of indexes that measures the average change over time in selling prices received by domestic producers of goods and services. PPI measures price change from the perspective of the seller. This contrasts with other metrics, such as the Consumer Price Index (''CPI''), that measure price change from the purchaser's perspective.[7] About 10,000 PPIs for individual products and groups of products are tracked and released each month.[8] PPIs are available for the output of nearly all industries in the goods-producing sectors of the U.S. economy—mining, manufacturing,

[3] The Exchange initially filed the proposed pricing change on March 1, 2024 (SR–NASDAQ–2024–008). On April 29, 2024, the Exchange withdrew that filing and submitted SR–NASDAQ–2024–020. The Exchange withdrew SR–NASDAQ–2024–020 on June 27, 2024 and replaced it with SR–NASDAQ–2024–032. The Exchange withdrew SR–NASDAQ–2024–032 and replaced it with SR–NASDAQ–2024–053 on September 10, 2024. On October 11, 2024, the Exchange replaced SR–NASDAQ–2024–053 with SR–NASDAQ–2024–060. The instant filing replaces SR–NASDAQ–2024–060.

[4] The Exchange proposes to exclude the GPS Antenna fees from the proposed fee increase because, unlike the other fees in General 8, the Exchange recently increased its GPS Antenna fees. *See* Securities Exchange Act Release No. 34–99126 (December 8, 2023), 88 FR 86712 (December 14, 2023) (SR–NASDAQ–2023–052). The Exchange also proposes to exclude the Cabinet Proximity Option Fee for cabinets with power density >10kW from the proposed fee increase because the Exchange recently established such fee. *See* Securities Exchange Act Release No. 34–99796 (March 20, 2024), 89 FR 21088 (March 26, 2024) (SR–NASDAQ–2024–013). Similarly, the Exchange proposes to exclude from the proposed fee increase those fees that the Exchange recently established for services in its new NY11–4 expansion facility. *See* Securities Exchange Act Release No. 34–101267 (October 7, 2024), 89 FR 82666 (October 11, 2024) (SR–NASDAQ–2024–056).

[5] Remote MITCH Wave Ports are for clients co-located at other third-party data centers, through which NASDAQ TotalView ITCH market data is distributed after delivery to those data centers via wireless network.

[8] *See Id.*

agriculture, fishing, and forestry—as well as natural gas, electricity, and construction, among others. The PPI program covers approximately 69 percent of the service sector's output, as measured by revenue reported in the 2017 Economic Census.

For purposes of this proposal, the relevant industry-specific PPI is the Data Processing and Related Services PPI (''Data PPI''), which is an industry net-output PPI that measures the average change in selling prices received by companies that provide data processing services.

The Data PPI was introduced in January 2002 by the Bureau of Labor Statistics (''BLS'') as part of an ongoing effort to expand Producer Price Index coverage of the services sector of the U.S. economy and is identified as NAICS—518210 in the North American Industry Classification System.[9] According to the BLS ''[t]he primary output of NAICS 518210 is the provision of electronic data processing services. In the broadest sense, computer services companies help their customers efficiently use technology. The processing services market consists of vendors who use their own computer systems—often utilizing proprietary software—to process customers' transactions and data. Companies that offer processing services collect, organize, and store a customer's transactions and other data for record-keeping purposes. Price movements for the NAICS 518210 index are based on changes in the revenue received by companies that provide data processing services. Each month, companies provide net transaction prices for a specified service. The transaction is an actual contract selected by probability, where the price-determining characteristics are held constant while the service is repriced. The prices used in index calculation are the actual prices billed for the selected service contract.'' [10]

The Exchange believes the Data PPI is an appropriate measure to be considered in the context of the proposed rule change to modify the fee for its connectivity products because the Exchange uses its ''own computer systems'' and ''proprietary software,'' *i.e.,* its own data center and proprietary matching engine software, respectively, to collect, organize, store and report customers' transactions in U.S. equity securities on the Exchange's proprietary trading platform. In other words, the Exchange is in the business of data processing and related services.

For purposes of this proposed rule change, the Exchange examined the Data PPI value for the period from January 2017 to August 2024. The Data PPI had a starting value of 105.6 in January 2017 and an ending value of 116.022 in August 2024, a 10.422% increase. This indicates that companies who are also in the data storage and processing business have generally increased prices for a specified service covered under NAICS 518210 by an average of 10.422% during this period. Based on that percentage change, the Exchange proposes to make a one-time fee increase of only 10%, which reflects an increase covering roughly the entire period since the last price adjustments to these fees were made.

The Exchange further believes the Data PPI is an appropriate measure for purposes of the proposed rule change on the basis that it is a stable metric with limited volatility, unlike other consumer-side inflation metrics. In fact, the Data PPI has not experienced a greater than 2.16% increase for any one calendar year period since Data PPI was introduced into the PPI in January 2002. The average calendar year change from January 2002 to December 2023 was .62%, with a cumulative increase of 15.67% over this 21-year period. The Exchange believes the Data PPI is considerably less volatile than other inflation metrics such as CPI, which has had individual calendar-year increases of more than 6.5%, and a cumulative increase of over 73% over the same period.[11]

The Exchange believes the Data PPI, and significant investments into, and enhanced performance of, the Exchange support the reasonableness of the proposed fee increases.[12]

These proposed fee increases will be immediately effective upon filing. However, going forward and until December 1, 2024, the Exchange will waive all fees set forth herein to the extent that such fees exceed the levels that would have been charged for the same products and services purchased during that time period, had such fees been calculated at the rates set forth in SR–NASDAQ–2024–053 (*i.e.,* pricing reflective of a 5.5% increase from prior fee levels). This waiver is reasonable, equitable, and not unfairly discriminatory because it will afford all customers in excess of the 30-day prior notice period for fee changes set forth in the Exchange's service terms.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[13] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[14] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

This belief is based on two factors. First, the current fees do not properly reflect the quality of the services and products, as fees for the services and products in question have been static in nominal terms, and therefore falling in real terms due to inflation. Second, the Exchange believes that investments made in enhancing the capacity and speed of Exchange systems increase the performance of the services and products.

The Proposed Rule Change Is Reasonable

As noted above, the Exchange has not increased any of the fees included in the proposal since 2017 or earlier. However, in the years following the last fee increases, the Exchange has made significant investments in upgrades to its connectivity products, services, and facilities, enhancing the quality of its services. In other words, Exchange customers have greatly benefitted, while the Exchange's ability to recoup its investments has been hampered. Between 2017 and 2024, the inflation rate is 3.64% per year, on average, producing a cumulative inflation rate of 28.43%.[15] Using the more targeted inflation number of Data PPI, the cumulative inflation rate was 10.422%. The exchange believes the Data PPI is a reasonable metric to base this fee increase on because it is targeted to producer-side increases in the data processing industry.

Notwithstanding inflation, as noted above, the Exchange has not increased

[14] 15 U.S.C. 78f(b)(4) and (5).

[15] *See https://www.officialdata.org/us/inflation/2017?amount=1.*

its fees at all for over seven years for the subject services. The proposed fee changes represent a modest increase from the current fees. The Exchange believes the proposed fee increase is reasonable in light of the Exchange's continued expenditure in maintaining a robust technology ecosystem. Furthermore, the Exchange continues to invest in maintaining and enhancing its connectivity products—for the benefit and often at the behest of its customers and global investors. Such enhancements include refreshing all aspects of the technology ecosystem including software, hardware, and network while introducing new and innovative products and expanded and modernized facilities.[16] The goal of the enhancements discussed above, among other things, is to provide faster, higher-capacity, and more modern connectivity products and services. Accordingly, the Exchange continues to expend resources to innovate and modernize technology so that it may benefit its members in offering its connectivity products and services.

The Proposed Fees Are Equitably Allocated and Not Unfairly Discriminatory

The Exchange believes that the proposed fee increases are equitably allocated and not unfairly discriminatory because they would apply to all market participants that choose to purchase connectivity products and services from the Exchange. Any participant that chooses to purchase the Exchange's connectivity products and services would be subject to the same Fee Schedule, regardless of what type of business they operate or the use they plan to make use of the products and services. Additionally, the fee increase would be applied uniformly to market participants without regard to Exchange membership status or the extent of any other business with the Exchange or affiliated entities. The Exchange also believes that the proposal represents an equitable allocation of reasonable dues, fees and other charges because Exchange fees have fallen in real terms during the relevant period. Finally, the Exchange believes that the proposed fee changes are not unfairly discriminatory because the fees would be assessed uniformly across all market participants, in the same manner they are today, that voluntarily purchase the Exchange's connectivity products and services, which would remain available for purchase by all market participants.

These proposed fee increases will be immediately effective upon filing. However, going forward and until December 1, 2024, the Exchange will waive all fees set forth herein to the extent that such fees exceed the levels that would have been charged for the same products and services purchased during that time period, had such fees been calculated at the rates set forth in SR–NASDAQ–2024–053 (*i.e.,* pricing reflective of a 5.5% increase from prior fee levels). This waiver is reasonable, equitable, and not unfairly discriminatory because it will afford all customers in excess of the 30-day prior notice period for fee changes set forth in the Exchange's service terms.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed fees will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Intramarket Competition

The Exchange believes that the proposed fees do not put any market participants at a relative disadvantage compared to other market participants. As noted above, the fee schedule would continue to apply to all purchasers of the Exchange's connectivity products and services in the same manner as it does today albeit at inflation-adjusted rates for certain fees, and customers may choose whether to purchase these products and services at all. The Exchange also believes that the level of the proposed fees neither favor nor penalize one or more categories of market participants in a manner that would impose an undue burden on competition. Likewise, the proposed fee waiver described above will apply to all purchasers of the Exchange's connectivity products and services in the same manner and therefore will not burden competition among them.

Intermarket Competition

The Exchange believes that the proposed fees do not impose a burden on competition or on other SROs that is not necessary or appropriate. In determining the proposed fees, the Exchange utilized an objective and stable metric with limited volatility. Utilizing Data PPI over a specified period of time is a reasonable means of recouping the Exchange's investment in maintaining and enhancing its connectivity products, services, and facilities. The Exchange believes utilizing Data PPI, a tailored measure of inflation, to increase certain fees for connectivity products and services to recoup the Exchange's investment in maintaining and enhancing such products, services, and its facilities would not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[17]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NASDAQ–2024–067 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NASDAQ–2024–067. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101675; File No. SR–FICC–2024–802]

Self-Regulatory Organizations; Fixed Income Clearing Corporation; Notice of No Objection To Advance Notice, as Modified by Partial Amendment No. 1, To Modify the GSD Rules (i) Regarding the Separate Calculation, Collection and Holding of Margin for Proprietary Transactions and That for Indirect Participant Transactions, and (ii) To Address the Conditions of Note H to Rule 15c3–3a

November 21, 2024.

On March 14, 2024, Fixed Income Clearing Corporation (''FICC'') filed with the Securities and Exchange Commission (''Commission'') advance notice SR–FICC–2024–802 pursuant to Section 806(e)(1) of Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act entitled the Payment, Clearing, and Settlement Supervision Act of 2010 (''Clearing Supervision Act'') [1] and Rule 19b–4(n)(1)(i) under the Securities Exchange Act of 1934 (''Exchange Act'').[2] In the advance notice, FICC proposes to modify its Government Securities Division (''GSD'') Rulebook (''GSD Rules'') to calculate, collect, and hold margin for transactions that a direct GSD participant enters into for its own benefit (''proprietary transactions'') separately from margin a direct participant submits to FICC on behalf of indirect participants, and to address conditions of Note H to Rule 15c3–3a under the Exchange Act (''Advance Notice'').[3] The Advance Notice was published for public comment in the **Federal Register** on March 28, 2024.[4] Upon publication of notice of filing of the advance notice, the Commission extended the review period of the advance notice for an additional 60 days because the Commission determined that the advance notice raised novel and complex issues.[5]

On April 24, 2024, the Commission requested additional information from FICC pursuant to Section 806(e)(1)(D) of the Clearing Supervision Act, which tolled the Commission's period of review of the advance notice until 120 days from the date the information requested by the Commission was received by the Commission.[6] On June 25, 2024, the Commission received FICC's response to the Commission's request for additional information.[7] On September 24, 2024, the Commission requested additional information from FICC pursuant to Section 806(e)(1)(D) of the Clearing Supervision Act, which tolled the Commission's period of review of the advance notice until 120 days from the date the information requested by the Commission was received by the Commission.[8] On October 21, 2024, the Commission received FICC's response to the Commission's September 24, 2024 request for additional information.[9] On October 25, 2024, FICC filed Partial Amendment No. 1 to the Advance Notice.[10] The Advance Notice, as modified by Partial Amendment No. 1, is referred to herein as the ''Advance Notice.''

The Commission has received comments regarding the substance of the Advance Notice.[11] The Commission

also received a letter from FICC responding to the comments.[12] This publication serves as notice of no objection to the Advance Notice.

I. Description of the Advance Notice

A. Background and Terminology

FICC, through its GSD, is a central counterparty and provider of clearance and settlement services for the U.S. government securities markets. As a central counterparty in the U.S. government securities markets, FICC novates transactions between two counterparties, effectively becoming the buyer to every seller and the seller to every buyer, and guarantees the settlement of the novated transactions. This means that FICC is exposed to a number of risks arising from such transactions, including counterparty credit risk. FICC seeks to maintain sufficient resources (*i.e.,* margin) to cover its credit exposures to its participants fully with a high degree of confidence and mitigate potential losses from a default of a direct GSD participant, which is generally referred to as a Netting Member under the GSD Rules[13] (and in this Notice of No Objection).

On December 13, 2023, the Commission adopted amendments to the standards applicable to covered clearing agencies that clear transactions in U.S. Treasury securities (''Treasury CCAs''), such as FICC.[14] These amendments require Treasury CCAs to establish, implement, maintain, and enforce written policies and procedures reasonably designed to, among other things, calculate, collect, and hold margin for direct participants' proprietary positions separately and independently from margin calculated, collected, and held for indirect participants that rely on the services provided by the direct participant to access the Treasury CCA's payment, clearing, or settlement facilities.[15] The Commission also amended its broker-dealer customer protection rule (''Rule 15c3–3'')[16] and the customer and proprietary accounts of broker-dealer (''PAB'') reserve formulas thereunder (''Rule 15c3–3a'')[17] to permit margin required and on deposit with Treasury CCAs to be included under certain conditions as a debit in the reserve formulas.[18]

The GSD Rules describe how FICC provides clearance and settlement services to both direct participants and indirect participants, the latter of which rely on the services provided by direct participants to access FICC's clearance and settlement facilities. Currently, the GSD Rules allow indirect participants to access GSD's clearing services through a Netting Member (that is, a direct participant) via two models: the correspondent clearing/prime broker services[19] and the Sponsored Service.[20] The primary difference between the two models is that an indirect participant who becomes a Sponsored Member via the Sponsored Service model must establish an indirect, limited purpose FICC membership, whereas the correspondent clearing/prime broker services do not require an indirect member to establish any relationship with FICC.[21]

The correspondent clearing/prime broker services allow a Netting Member to submit eligible transactions to FICC on behalf of an indirect participant (referred to as the ''Executing Firm''), record these transactions in the same account as the proprietary transactions that the Netting Member (referred to as a ''Submitting Member'') enters into for its own benefit, and net the indirect participants' transactions against the Netting Member's proprietary transactions for purposes of calculating the Netting Member's margin requirements. Unlike the Sponsored Service, FICC has no relationship with the Executing Firm, and all obligations (*i.e.,* margin and settlement) under the GSD Rules remain with the Submitting Member.[22]

Under a proposed rule change being approved concurrently, FICC is renaming the prime broker/correspondent clearing model to be known as the Agent Clearing Service and providing further specificity around the operation of that service.[23] In that service, the Netting Member which serves as the direct participant to FICC would be referred to as the Agent Clearing Member, and the indirect participant would be referred to as an Executing Firm Customer. An Executing Firm Customer would have no direct relationship to FICC. This separate change would require that a Netting Member using the Agent Clearing Service submit transactions for Executing Firm Customers through an Agent Clearing Member Omnibus Account, to be recorded separately from its other clearing activity, including its proprietary activity. It would also add a definition for transactions eligible to be submitted by an Agent Clearing Member on behalf of its Executing Firm Customers (''Agent Clearing Transactions'').

In addition, in the Sponsored Service, both currently and in a concurrently approved proposed rule change,[24] Netting Members that are approved to be Sponsoring Members are able to sponsor certain indirect participants, referred to as Sponsored Members, into GSD membership and submit transactions on behalf of those Sponsored Members. A Sponsored Member is the legal counterparty to FICC for any submitted transactions.[25] However, the Sponsoring Member unconditionally guarantees to FICC the Sponsored Member's performance under a Sponsoring Member Guaranty, which guarantees to FICC the payment and performance of a Sponsored Member's obligations to FICC.[26] Therefore, reliance upon the Sponsoring Member Guaranty necessarily involves FICC's reliance upon the financial resources of the Sponsoring Member.

Unlike the correspondent clearing/prime broker services, transactions by the Sponsoring Member's Sponsored Members (''Sponsored Member Trades'') are not netted, for margining purposes, against transactions of the Sponsoring Member or another Sponsored Member. Instead, FICC records Sponsored Member Trades in a Sponsored Member Omnibus Account, and calculates margin requirements for each Sponsored Member individually on a gross basis (*i.e.,* without netting their transactions against transactions of the Sponsoring

comment letters to the Proposed Rule Change and Advance Notice also contained comments on the substance of another FICC proposed rule change, FICC–2024–005. The Commission will only be addressing comments relevant to this proposal and will address the comments on the other proposed rule change in a separate order.

Member or another Sponsored Member).[27]

B. Proposed Changes

In the Advance Notice, FICC seeks to address the Commission's new margin and account separation requirements and the conditions for including margin in the broker-dealer reserve formulas discussed in part I.A above.[28] As described in greater detail below, the Advance Notice would (1) provide for the separate and independent calculation, collection, and holding of margin for proprietary transactions of a Netting Member from margin submitted to FICC by a Netting Member to support the transactions of an indirect participant (*i.e.,* either an Executing Firm Customer or a Sponsored Member); (2) establish segregated accounts for direct and indirect participants, including establishing a minimum $1 million cash margin requirement for each Segregated Indirect Participant; (3) consolidate the methodology for calculating the margin requirements, including definitions of relevant terms and components for calculating margin requirements from various sections of the current GSD Rules into a single margin component schedule (''Margin Component Schedule''), specify how the various components relate to different types of margin, and make certain changes to the margin methodology, including revising the Margin Liquidity Adjustment (''MLA Charge'') [29] definition, providing a method for allocating net unsettled positions to individual indirect participants for calculating margin requirements, and revising and clarifying the calculation of the Excess Capital Premium (''ECP'') component [30] of the Clearing Fund; and (4) modify the terms relating to transactions submitted by Inter-Dealer Broker Netting Members [31] to FICC for clearance and settlement (''Brokered Transactions'').

1. Separate Calculation, Collection, and Holding of Margin

The Advance Notice would provide for the separate and independent calculation, collection, and holding of (i) margin deposited by a Netting Member to support its proprietary transactions, and (ii) margin deposited by a Netting Member to support the transactions of an indirect participant, that is, either an Executing Firm Customer or a Sponsored Member. To facilitate the separate and independent calculation, collection, and holding proprietary and indirect participant margin, FICC would establish proprietary accounts to record the proprietary transactions that the Netting Member enters into for its own benefit and separate indirect participant accounts to record transactions that the Netting Member submits on behalf of an indirect participant, which could be either a Sponsored Member or an Executing Firm Customer.

For proprietary transactions, the accounts would include Dealer Accounts, which would be available for all Netting Members, and Cash Broker Accounts and Repo Broker Accounts, which would only be available for Inter-Dealer Broker Netting Members.[32] Cash Broker Accounts would be available for recording an Inter-Dealer Broker Netting Member's Brokered Transactions (other than Brokered Repo Transactions), and Repo Broker Accounts would be for purposes of recording an Inter-Dealer Broker Netting Member's Brokered Repo Transactions.

For indirect participant transactions, FICC would establish Indirect Participants Accounts to record transactions that a Netting Member submits to FICC on behalf of Sponsored Members and Executing Firm Customers. These Indirect Participants Accounts would include Sponsoring Member Omnibus Accounts for recording Sponsored Member Trades and Agent Clearing Member Omnibus Accounts for recording Agent Clearing Transactions submitted on behalf of Executing Firm Customers. In addition, the proposal would permit a Sponsoring Member or Agent Clearing Member to designate any of its Indirect Participants Accounts as a segregated customer account (a ''Segregated Indirect Participants Account''). Such designation, as further described in part I.B.2 below, would give Netting Members a mechanism to direct FICC to calculate and segregate margin deposited in connection with the relevant Segregated Indirect Participants Account in accordance with the conditions described in Note H to Rule 15c3–3a.[33]

The proposal would require each Netting Member to deposit two forms of margin: the Required Fund Deposit and the Segregated Customer Margin Requirement. The Required Fund Deposit, which would be deposited to the Clearing Fund, would be the sum of each Netting Member's proprietary accounts (*e.g.,* Dealer Accounts and Broker Accounts) and indirect participant accounts (*e.g.,* Agent Clearing Omnibus Accounts and Sponsoring Member Omnibus Accounts) not designated as Segregated Indirect Participants Accounts. The Segregated Customer Margin Requirement, which would be excluded from the Clearing Fund, would be the sum of the Netting Member's Sponsoring Member Omnibus Accounts designated as Segregated Indirect Participants Accounts and Agent Clearing Member Omnibus Accounts designated as Segregated Indirect Participants Accounts.

FICC's proposal would also provide that a Netting Member's Margin Portfolio, which is utilized to determine a Netting Member's margin requirement, cannot include both proprietary and indirect participant accounts. As a result, the transactions a Netting

[27] *See* GSD Rule 3A, Section 10(c), *supra* note 13.

[28] *See supra* note 3.

[29] The MLA Charge is a margin component designed to address the market impact costs of liquidating a defaulted Netting Member's portfolio that may increase when that portfolio includes large net unsettled positions in a particular group of securities with a similar risk profile or in a particular asset type, thereby causing those costs to be higher than the amount collected for the Netting Member's volatility charge, which is designed to capture the market price risk associated with liquidating each Netting Member's portfolio at a 99th percentile level of confidence. *See* GSD Rule 1 (defining Margin Liquidity Adjustment Charge), *supra* note 13; *see also* Securities Exchange Act Release No. 89560 (Aug. 14, 2020), 85 FR 51503 (Aug. 20, 2020) (File No. SR–FICC–2020–09) (approving the MLA charge as a new component of the margin methodology); Securities Exchange Act Release No. 98558 (Sep. 27, 2023), 88 FR 68179 (Oct. 3, 2023) (File No. SR–FICC–2023–012) (approving revisions to ECP charge).

[30] The ECP is a margin component that allows FICC to collect additional margin if a member's exposure to FICC, based on its clearing activity, is out of proportion to its capital levels. It is designed to mitigate the heightened default risk a member could pose to FICC if it operates with lower capital levels relative to its margin requirements. *See* Margin Component Schedule (defining Excess Capital Premium), *supra* note 13; *see also* Securities Exchange Act Release No. 54457 (Sep. 15, 2006), 71 FR 55239 (Sep. 21, 2006) (File Nos. SR–FICC–2006–03 and SR–NSCC–2006–03) (approving the ECP charge as a new component of the margin methodology); Securities Exchange Act Release No. 96786 (Feb. 7, 2023), 88 FR 8013 (Feb. 7, 2023) (File No. SR–NSCC–2022–005) (approving revisions to ECP charge).

[31] An Inter-Dealer Broker is defined as a Person which is in the business of buying and selling securities as agent on behalf of dealers and is registered under Section 15 or Section 15C of the Exchange Act. GSD Rule 1 (defining Inter-Dealer Broker), *supra* note 13. An Inter-Dealer Broker Netting Member must meet that definition and certain applicable membership requirements. *See id.* and Rule 2A (setting forth membership requirements).

[32] Under the proposed changes, ''Cash Broker Account'' would be a proprietary account maintained by FICC for an Inter-Dealer Broker Netting Member to record Brokered Transactions, other than Brokered Repo Transactions, submitted to the Corporation by the Inter-Dealer Broker Netting Member. ''Repo Broker Account'' would be a proprietary account maintained by the FICC for an Inter-Dealer Broker Netting Member in its capacity as a Repo Broker to record Brokered Repo Transactions submitted to the Corporation by the Inter-Dealer Broker Netting Member.

[33] 17 CFR 240.15c3–3a.

Member submits to FICC on behalf of an indirect participant either as a Sponsoring Member or an Agent Clearing Member would no longer be netted against a Netting Member's proprietary transactions for calculating a Netting Member's margin requirements.[34] Since proprietary transactions and transactions submitted for indirect participants would not be recorded in the same type of account, these changes would result in margin for a Netting Member's proprietary transactions being calculated separately and independently from margin calculated for the transactions that the Netting Member submits on behalf of indirect participants.

To help ensure that margin for proprietary transactions is calculated, collected, and held separately and independently of margin for indirect participant transactions, FICC would require each Netting Member, at the time it submits a transaction to FICC for clearance and settlement, to designate the account in which the particular transaction should be recorded using a separate Deposit ID, which is an existing operational mechanism used by Netting Members to identify the type of account for which a margin deposit is being made. The use of these separate Deposit IDs would result in margin for each type of account being separately transferred to FICC and recorded on FICC's books as separate margin amounts for each account type. The proposal would also require FICC to report a Netting Member's Required Fund Deposit and Segregated Customer Margin Requirement twice daily and specify the amount of margin attributable to each Required Fund Deposit Portion or Segregated Indirect Participants Account so that the Netting Member can transfer the different margin amounts separately.

In addition, the proposal would eliminate the concept of a Permitted Margin Affiliate, which allows a Netting Member to include accounts of an affiliate that is also a Netting Member in the same Margin Portfolio as its accounts and net their transactions for margin calculation purposes. FICC states that no Netting Member currently has a Permitted Margin Affiliate, so keeping this option in the rules in conjunction with the proposed changes to establish separate and independent calculation, collection, and holding of margin would introduce unnecessary complexity in FICC's rules.[35]

2. Segregation of Customer Margin

FICC is proposing several changes to allow for the segregation of customer margin in a manner that satisfies the conditions for recording a debit in the customer reserve formula under Note H to Exchange Act Rule 15c3–3a.[36] First, to satisfy Section (b)(2)(i) of Note H to Rule 15c3–3a,[37] FICC would calculate the margin requirements applicable to any segregated account on a gross basis (*i.e.,* FICC would treat each indirect participant as if it were a separate Netting Member for margin calculations and would not net the transactions of one indirect participant against the transactions of another indirect participant). Second, to satisfy Section (b)(2)(iii) of Note H to Rule 15c3–3a,[38] FICC would establish Segregated Customer Margin Custody Accounts for eligible customers on its books and records. These accounts would segregate the margin deposited for transactions in that account from any margin for a Netting Member's proprietary positions, both on FICC's own books and records and at FICC's custodians. FICC would only be able to use such segregated margin to secure or satisfy the obligations of the customer for whom such margin is held, and it would not be considered part of the mutualized Clearing Fund. FICC would not be able to apply such margin to the proprietary obligations of the Netting Member that deposited it with FICC, to the obligations of any other Netting Member or indirect participant, or to any lien or claim against FICC.[39] FICC would provide written notice to any Netting Member that is a broker-dealer that any Segregated Customer Margin Custody Account is being held for the exclusive benefit of the customers and is being kept separate from any other accounts maintained by the broker-dealer or any other Netting Member at FICC, as required by Section (b)(2)(iii)(C) of Note H.[40]

Further, as amended, the proposal would clarify that any interest earned on Segregated Customer Margin consisting of cash must be paid to the Netting Member on behalf of, and as agent for, its Segregated Indirect Participant.[41]

Moreover, to comply with the custody requirements of (b)(2)(iv) of Note H,[42] FICC would require segregated margin accounts to be held at either a bank within the meaning of the Exchange Act that is insured by the Federal Deposit Insurance Corporation and is a qualified custodian under the 1940 Act, or the Federal Reserve Bank of New York.[43] FICC would require these accounts to be segregated from any other account of FICC and used exclusively to hold Segregated Customer Margin, in accordance with Section (b)(2)(iv)(A) of Note H. Moreover, each of these accounts would be subject to (i) a written notice of the bank or Federal Reserve Bank that the account is being held by the bank or Federal Reserve Bank pursuant to Rule 15c3–3 and is being kept separate from and not commingled with any other accounts maintained by FICC or any other person at the bank or Federal Reserve Bank and (ii) a written contract between FICC and the bank or Federal Reserve Bank which would provide that the Segregated Customer Margin in the account is subject to no right, charge, security interest, lien, or claim in favor of the bank or Federal Reserve Bank or any person claiming through the bank or Federal Reserve Bank, in accordance with Sections (b)(2)(iv)(B) and (C) of Note H.[44] FICC would also only allow Segregated Customer Margin consisting of cash to be invested in U.S. Treasury securities with a maturity of one year or less, in accordance with Section (b)(2)(ii) of Note H.[45]

Finally, to satisfy Section (b)(2)(v) of Note H,[46] FICC would provide specific procedures to allow Netting Members to request the return of excess segregated

[34] The Advance Notice would also specify the types of accounts in which Netting Members may record transactions to identify the purpose and use of these accounts. FICC's ''Accounts'' are not custodial accounts in which FICC holds assets, but rather a mechanism for FICC to record and group transactions. These records are utilized by FICC in its calculation of a Netting Member's margining, settlement, and other obligations. Proprietary Accounts would include ''Dealer Accounts,'' which would be available for all Netting Members, and ''Cash Broker Accounts'' and ''Repo Broker Accounts,'' which would only be available for Inter-Dealer Broker Netting Members. Non-Proprietary Accounts would include, in the case of a Sponsoring Member, Sponsoring Member Omnibus Accounts for purposes of recording Sponsored Member Trades, and, in the case of an Agent Clearing Member, Agent Clearing Member Omnibus Accounts for purposes of recording Agent Clearing Transactions of its Executing Firm Customers.

[46] *Id.* at 21595–96.

margin. FICC notes that these changes would allow broker-dealer Netting Members to collect margin from customers and deposit it with FICC and to provide all customers, including those that access FICC through non-broker-dealers, the ability to segregate margin they deposit.[47] FICC would have the ability to retain some or all of the excess segregated customer margin if the Netting Member had an outstanding payment or margin obligation to FICC for transactions of any Segregated Indirect Participant. FICC could not retain the excess segregated customer margin for a Segregated Indirect Participant when FICC has determined, in its sole discretion, that such outstanding payment or margin obligation is unrelated to the transactions of that Segregated Indirect Participant.[48] FICC states that these aspects of the Advance Notice would allow for the segregation of certain customer margin in a manner that satisfies the conditions for a broker-dealer to record a debit in the customer reserve formula under Note H to Rule 15c3–3a.[49]

a. $1 Million Minimum Cash Margin Requirement

FICC is also proposing a minimum $1 million cash margin requirement for each Segregated Indirect Participant Account, similar to the $1 million minimum cash margin requirement currently applicable to each Netting Member.[50] FICC conducts daily backtesting to evaluate whether each Netting Member's margin is sufficient to cover FICC's credit exposures to that member based on a simulated liquidation of the member's portfolio on that day. FICC's daily backtesting of the sufficiency of Clearing Fund deposits has shown a heightened risk of backtesting deficiencies (*i.e.,* the projected liquidation losses to FICC due to a Netting Member's default would be greater than the member's margin) for members with lower deposits.[51] Because FICC is required to calculate the margin requirements for Segregated Indirect Participants on a gross basis, as if each Segregated Indirect Participant were a separate Margin Portfolio, and Segregated Customer Margin would not be available to address losses from other direct or indirect participants, FICC believes it is also appropriate to apply the same minimum cash requirement to each Segregated Indirect Participant that it applies to each Margin Portfolio.[52] Moreover, FICC believes that the $1 million cash requirement is the appropriate minimum amount to optimize the balance between financial impact of the requirement to participants and FICC's ability to continue to meet its regulatory obligation to maintain a backtesting performance coverage ratio above its 99 percent coverage target.[53] FICC states that the $1 million minimum is supported by its prior analyses of the appropriate minimum margin requirement for Netting Members.[54] FICC further describes this minimum requirement as critical to ensuring that the account segregation does not expose FICC and its participants to undue loss. FICC explains that the Segregated Customer Margin posted by an individual Segregated Indirect Participant needs to be enough, on its own, to address losses arising from the Segregated Indirect Participant's positions, and that, otherwise, such losses may be mutualized.[55]

However, FICC, in its sole discretion, would have the ability to adjust the amount of the minimum $1 million margin requirement if FICC determines that a different minimum charge would be appropriate and consistent with achieving its backtesting coverage target.[56] FICC would notify Netting Members of any such adjustment to the minimum margin requirement through an Important Notice.[57] In discussing this proposed ability, FICC states that it will review the $1 million floor for Segregated Customer Margin as part of ongoing internal surveillance and risk management monitoring procedures.[58] FICC further states that it would be prudent to have the ability to adjust the $1 million floor proactively to the extent that FICC identifies as part of these reviews that activity levels, margin performance observed through backtesting, and other measures indicate that FICC would be able to continue to manage the risks presented to it and meet its regulatory risk management obligations (including, for example, its 99% backtesting coverage target) with a lower minimum Segregated Customer Margin Requirement (that is, an amount below $1 million).[59]

3. Margin Component Schedule

To improve the clarity and transparency of its margin components and Clearing Fund calculation methodology,[60] FICC would move the margin calculation methodology, including the relevant defined terms, into a new Margin Component Schedule. Currently, the terms and information concerning the margin calculation methodology, as well as the relevant definitions, appear in several different locations.[61] FICC states that its methodology and the included components would continue to be substantively the same as the methodology under the current Rules.[62]

The new Margin Component Schedule would set out the methodology for calculating margin amounts. That Margin Component Schedule would provide for FICC to perform substantially the same calculation it currently performs when determining a Netting Member's Required Fund Deposit, except that (i) the calculation would be performed on a Segregated Indirect Participant-by-Segregated Indirect Participant basis as though each Segregated Indirect Participant represented a separate Margin Portfolio and (ii) FICC would not impose an ECP on Segregated Indirect Participant Accounts. Specifically, for Required Fund Deposit calculations, the margin amount shall equal the VaR Charge, plus or minus the Blackout Period Exposure Adjustment (as applicable), plus the Portfolio Differential Charge, with the following potential additional charges, as applicable: the Backtesting Charge, the Holiday Charge, the MLA Charge, the ECP, and the Intraday Supplemental Fund Deposit.[63] For Segregated Customer Margin Requirement calculations, the margin amount shall equal the VaR Charge, plus or minus the Blackout Period Exposure Adjustment (as applicable), plus the Portfolio Differential Charge, with the following potential additional charges, as

[47] *Id.* at 21590.

[48] *See* Notice of Partial Amendment, *supra* note 10, at 87450.

[49] *See* Notice of Filing, *supra* note 4, at 21592.

[50] Like the current requirement for Netting Member Required Fund Deposits, the proposal would require that a minimum of 40 percent of the Segregated Customer Margin Requirement be satisfied with cash and/or Eligible Clearing Fund Treasury Securities.

[51] *See* Notice of Filing, *supra* note 4, at 21595.

[52] *Id.*

[53] *Id.;* FICC Letter at 28–29.

[54] *See* FICC Letter at 28–29.

[55] *Id.* at 29.

[56] *See* Notice of Partial Amendment, *supra* note 10, at 87451.

[57] *Id.*

[58] *See* FICC Letter at 30.

[59] *Id.* at 31.

[60] *See* Notice of Filing, *supra* note 4, at 21596.

[61] FICC would move the calculation methodology from Rule 4, Sections 1b, and 2a, Rule 3, Section 14, and Rule 3A, Section 10 to the new Margin Component Schedule. FICC would move the definitions from Rule 1 to Section 5 of the Margin Component Schedule.

[62] *See* Notice of Filing, *supra* note 4, at 21596.

[63] This method does not represent a change from the current method of calculating Required Fund Deposits, but merely moves the description from current Rule 4 to the new Margin Component Schedule.

applicable: the Backtesting Charge, the Holiday Charge, the MLA Charge, and the Intraday Supplemental Fund Deposit.

For both types of calculations, the Margin Component Schedule addresses the applicable minimum cash margin requirements ($1 million for each Netting Member and Segregated Indirect Participant) [64] and FICC's authority to require increased deposits as appropriate, including the use of a special charge. FICC would not add Segregated Customer Margin to Section 4 of the Margin Component Schedule, which describes FICC's ability to impose increased Required Fund Deposits under certain circumstances.[65] However, when determining whether to increase the Required Fund Deposit of a Netting Member under the circumstances described in Section 4, FICC would consider the risk presented by a Netting Member from the activity it submits to FICC, including activity of indirect participants.[66]

a. MLA Charge

FICC would amend the definition of the MLA Charge to account for the use of Segregated Indirect Participant Accounts. Specifically, the definition would provide that, if a Segregated Indirect Participant clears through multiple Accounts [67] (including Accounts of different Netting Members), then the MLA Charge for transactions in a Segregated Indirect Participants Account would be the greater of (i) an amount calculated for only the transactions maintained in that Account (*i.e.,* excluding the other Accounts where the Segregated Indirect Participant's transactions are recorded) and (ii) an amount calculated on a consolidated portfolio basis (*i.e.,* taking into account the transactions in each of the Accounts). This would be the same methodology currently used for Sponsored Members clearing through multiple Accounts.[68]

b. Allocation of Net Unsettled Positions

The Advance Notice would also provide a method for allocating net unsettled positions to individual indirect participants for calculating margin requirements. Specifically, as amended, FICC would modify the definition of Current Net Settlement Positions in Rule 1 to provide that, for calculating margin requirements and not for purposes of calculating the Net Settlement Position under GSD Rule 11, positions that are not clearly allocable to an individual Sponsored Member or Segregated Indirect Participant (other than Sponsored GC Trades), because one or more transactions recorded for indirect participants did not settle on the original Scheduled Settlement Date, would be allocated *pro rata* to Sponsored Members or Segregated Indirect Participants that had positions in the same direction and CUSIP as the un-allocable Current Net Unsettled Positions at the end of the preceding business day. FICC states that this situation could arise if a transaction recorded in a Sponsoring Member Omnibus Account or Segregated Indirect Participants Account fails to settle and that such failure to settle would not occur with Sponsored GC Trades.[69] FICC believes this methodology facilitates a reasonable and fair allocation for purposes of calculating gross margin requirements.[70]

c. Calculation of Excess Capital Premium

In addition, the Advance Notice would amend the terms related to the ECP component of the Clearing Fund, which is used to collect additional margin if a Netting Member's exposure to FICC through its clearing activity is out of proportion to its capital. Currently, the ECP applicable to a Netting Member equals the Netting Member's ''Excess Capital Ratio'' (*i.e.,* its VaR Charge divided by its Netting Member Capital) multiplied by its ''Excess Capital Differential'' (*i.e.,* the amount by which a Netting Member's VaR Charge exceeds its Netting Member Capital). However, FICC currently reserves the right to collect less than this amount or to return some or all of this amount.[71]

The changes would seek to make the calculation of the ECP component clearer and more predictable by (i) capping the amount of the ECP at two times the amount by which a Netting Member's VaR Charge exceeds its Netting Capital,[72] (ii) specifying the Netting Member Capital amounts used to calculate the ECP (that is, the Net Capital amount from each Netting Member's most recent Form X–17–A–5 (Financial and Operational Combined Uniform Single Report (''FOCUS Report'')) or the Equity Capital amount on its most recent Consolidated Report of Condition and Income (''Call Report'')), (iii) providing that FICC may calculate the premium based on updated available information, and (iv) permitting FICC, in its discretion, to waive the amount of the ECP and setting forth a specific procedure for doing so. Regarding the waiver procedure, only a Managing Director in FICC's Group Chief Risk Office would be able to grant a waiver of an ECP in certain situations. These situations would be limited to exigent circumstances or other unexpected events. When deciding whether to grant a waiver, FICC would consider the degree to which a Netting Member's capital position and trading activity compare or correlate to the exigent circumstances and whether FICC can effectively manage the risk exposure from the Netting Member without collecting the ECP.[73] Any waiver would be documented in a written report made available to the Netting Member. FICC states that these changes are substantially similar to changes recently adopted by the National Securities Clearing Corporation (''NSCC'') and they would enhance the ability of Netting Members to identify what their ECP will be and to ensure such amount is accurately calibrated.[74]

In addition, the Advance Notice would revise the definitions of Excess Capital Ratio and Excess Capital Differential to exclude the VaR Charge for Segregated Indirect Participants. FICC is proposing this change because each indirect participant would be responsible for satisfying its own

[64] *See supra* Section I.B.2.a for a description of the proposed $1 million minimum cash margin requirement for each Segregated Indirect Participant Account.

[65] *See* Notice of Filing, *supra* note 4, at 21593.

[66] *Id.*

[67] FICC proposed to amend the definition of Account to be an account maintained by FICC for a Member to record transactions submitted by the member. FICC states that this change would clarify that Accounts are recordkeeping mechanisms for FICC to determine which transactions should be netted against each other, but are not custodial accounts through which FICC holds assets for a Netting Member. *See* Notice of Filing, *supra* note 4, at 21592.

[68] *See* GSD Rule 1 (defining MLA Charge, including for Sponsored Members sponsored by multiple Sponsoring Members), *supra* note 13; Securities Exchange Act Release No. 98558 (Sep. 27, 2024), 89 FR 68179 (Oct. 3, 2023) (File No. SR–FICC–2023–012).

[69] *See* Notice of Filing, *supra* note 4, at 21596–97; Notice of Partial Amendment, *supra* note 10, at 87451.

[70] *See* Notice of Filing, *supra* note 4, at 21596–97.

[71] *See* GSD Rule 1 (defining Excess Capital Ratio and Excess Capital Differential) and Rule 3, Section 14 (describing the Excess Capital Premium), *supra* note 13.

[72] In addition, FICC would amend the definition of Netting Member Capital to refer to a Netting Member's Net Capital, Net Assets, or Equity Capital to link the calculation to the appropriate regulatory framework for each Netting Member and add the term Equity Capital to clarify that a Netting Member's most recent Call Report, or financial statements or equivalent reporting if a Netting Member is not required to file a Call Report, will be used for the calculation of the Excess Capital Premium.

[73] *See* Notice of Filing, *supra* note 4, at 21597.

[74] *Id. See* Securities Exchange Act Release No. 96786 (Feb. 1, 2023), 88 FR 8013 (Feb. 7, 2023) (SR–NSCC–2022–005).

respective VaR Charge, not the Netting Member, and the Excess Margin Charge is designed to address the risk that a Netting Member with low capital relative to value-at-risk is not able to perform its obligations.[75] FICC states that including the VaR Charge that is calculated for an indirect participant and is satisfied by the capital of that indirect participant in the calculation of the Netting Member's ECP could result in assessing an ECP for that Netting Member that is greater than the amount required to mitigate the risk this margin component is designed to address.[76] FICC also states that this change is designed to ensure that the ECP does not result in differential treatment of Netting Members that act as intermediaries for Segregated Indirect Participants.

4. Modification of Terms for Brokered Transactions

The Advance Notice would modify the terms relating to Brokered Transactions. FICC's rules currently cap the amount of loss allocation that may be applied to Inter-Dealer Broker Netting Members and Non-IDB Repo Brokers submitting Brokered Transactions. FICC would revise the definition of Brokered Transactions to include only the side of the transactions submitted to FICC for novation by an Inter-Dealer Broker Netting Member and entered into on the Inter-Dealer Broker Netting Member's own trading platform.[77] As a result, the favorable loss allocation treatment for Brokered Transactions would apply only to the transactions that present limited risk since an Inter-Dealer Broker is standing between two counterparties in those transactions and is therefore completely flat (that is, subject to offsetting exposures).[78] Since FICC believes the favorable loss allocation treatment is appropriate only for Inter-Dealer Broker Netting Members submitting Brokered Transactions, it would delete the term ''Non-IDB Repo Broker'' from its rules.[79] FICC states that these changes would improve FICC's risk management and promote access by ensuring that its differential treatment of different parties and transactions has a sound risk management justification.[80]

In addition, the proposed changes would provide that transactions entered into on inter-dealer brokers and similar platforms may be cleared using the Sponsored Service or the Agent Clearing Service.[81]

II. Discussion and Commission Findings

Although the Clearing Supervision Act does not specify a standard of review for an advance notice, the stated purpose of the Clearing Supervision Act is instructive: to mitigate systemic risk in the financial system and promote financial stability by, among other things, promoting uniform risk management standards for systemically important financial market utilities (SIFMUs) and strengthening the liquidity of SIFMUs.[82]

Section 805(a)(2) of the Clearing Supervision Act authorizes the Commission to prescribe regulations containing risk management standards for the payment, clearing, and settlement activities of designated clearing entities engaged in designated activities for which the Commission is the supervisory agency.[83] Section 805(b) of the Clearing Supervision Act provides the following objectives and principles for the Commission's risk management standards prescribed under Section 805(a):[84]

- to promote robust risk management;
- to promote safety and soundness;
- to reduce systemic risks; and
- to support the stability of the broader financial system.

Section 805(c) provides, in addition, that the Commission's risk management standards may address risk management and default policies and procedures, among other areas.[85]

The Commission has adopted risk management standards under Section 805(a)(2) of the Clearing Supervision Act and Section 17A of the Exchange Act (the ''Clearing Agency Rules'').[86] The Clearing Agency Rules require, among other things, each covered clearing agency to establish, implement, maintain, and enforce written policies and procedures that are reasonably designed to meet certain minimum requirements for its operations and risk management practices on an ongoing basis.[87] As such, it is appropriate for the Commission to review advance notices against the Clearing Agency Rules and the objectives and principles of these risk management standards as described in Section 805(b) of the Clearing Supervision Act. As discussed below, the proposals in the Advance Notice are consistent with the objectives and principles described in Section 805(b) of the Clearing Supervision Act[88] and in the Clearing Agency Rules, in particular Rules 17ad–22(e)(4)(i), (e)(6)(i), (e)(6)(iii), (e)(18)(ii), (e)(18)(iii), (e)(18)(iv)(C), (e)(19), and (e)(23)(ii) thereunder.[89]

A. Consistency With Section 805(b) of the Clearing Supervision Act

The proposals in the Advance Notice are consistent with the stated objectives and principles of Section 805(b) of the Clearing Supervision Act.[90] Specifically, the changes proposed in the Advance Notice are consistent with promoting robust risk management, promoting safety and soundness, reducing systemic risks, and supporting the broader financial system.[91]

1. Separate Calculation and Collection of Margin for Proprietary and Customer Accounts

The proposed changes to require the separate and independent calculation

[91] Several of the issues raised by the commenters are directed at issues specific to the proposed rule change and will be addressed in that context. These comments generally relate to the proposal's impact on competition and its consistency with the Exchange Act. *See* Letter from Jiří Król, Deputy CEO, Global Head of Government Affairs, Alternative Investment Management Association, at 6–7 (Apr. 23, 2024) (''AIMA Letter''); Letter from Joanna Mallers, Secretary, Futures Industry of America, Principal Traders Group (Oct. 11, 2024) (''FIA PTG Letter II'') at 2–3; Letter from Sarah A. Bessin, Deputy General Counsel and Nhan Nguyen, Associate General Counsel, Investment Company Institute, at 12 (Jun. 20, 2024) (''ICI Letter''); Letter from Katherine Darras, General Counsel, International Swaps and Derivatives Association, at 4 (Apr. 17, 2024) (''ISDA Letter I''); Letter from Jennifer W. Han, Executive Vice President, Chief Counsel and Head of Global Regulatory Affairs, Managed Funds Association, at 7 (Apr. 17, 2024) (''MFA Letter I''); Letter from Jennifer W. Han, Executive Vice President, Chief Counsel and Head of Global Regulatory Affairs, Managed Funds Association (Nov. 12, 2024) (''MFA Letter II'') at 7; Letter from William C. Thum, Managing Director and Assistant General Counsel, Securities Industry and Financial Markets Association, Asset Management Group, at 9 (May 24, 2024) (''SIFMA AMG Letter'') (commenting on the proposal's impact on competition). The Commission's evaluation of the Advance Notice is conducted under the Clearing Supervision Act and, as discussed above, generally considers whether the proposal would promote robust risk management, promote safety and soundness, reduce systemic risks, and support the broader financial system.

and collection of margin for Netting Members' proprietary transactions and indirect participants' transactions, as described in Section I.B.1., should allow FICC to better identify and measure the unique risk profiles of each Netting Member and indirect participant. This proposed change would ensure that an indirect participant's positions are no longer netted against a Netting Member's positions, that margin is collected with respect to the indirect participant's positions specific to those transactions, and that interest on an indirect participant's cash margin would be paid to the Netting Member for the benefit of, and as agent for, the indirect participant. As discussed in more detail in Section II.C.1 below, this should enhance FICC's ability to calculate and collect the appropriate margin from each direct and indirect participant, which is consistent with promoting robust risk management.

The separate and independent calculation and collection of margin for proprietary and indirect participants' transactions should allow FICC to better identify and measure the unique risk profiles of each Netting Member and indirect participant, enhancing FICC's ability to calculate and collect sufficient margin from each Netting Member and indirect participant to cover potential losses from a Netting Member or indirect participant default, thereby reducing the likelihood that any losses arising out of a default would exceed FICC's prefunded resources, as discussed in more detail in Section II.C.1 below, and threaten the safety and soundness of FICC's ongoing clearance and settlement services. Accordingly, the proposals are consistent with promoting safety and soundness at FICC.

The separation of proprietary and customer margin discussed in Section I.B.1 above is consistent with reducing systemic risks and supporting the stability of the broader financial system. The separation of proprietary and customer accounts should also help avoid the risk of mutualizing loss among non-defaulting members as part of the close-out process and/or a disorderly default in the event of a direct participant default, in that FICC would be responsible for the central liquidation of the defaulting participant's trades and would be able to have a more holistic view of the market. These effects should, in turn, reduce the potential resultant effects on non-defaulting Netting Members, their customers, and the broader market, which is consistent with reducing systemic risks and supporting the stability of the broader financial system.

2. $1 Million Minimum Cash Margin Requirement

For the reasons discussed below in more detail in Section II.B.2, the proposed $1 million minimum cash margin requirement for Segregated Indirect Participants, which could be adjusted by FICC if it determines that a different minimum amount would be appropriate and consistent with achieving its backtesting coverage target, should help ensure that each indirect participant provides sufficient margin to cover its potential obligations to FICC, thereby helping to allow FICC to meet its settlement obligations in the event of a default and to protect FICC, non-defaulting Netting Members, indirect participants, and the market from losses from an indirect participant default. Accordingly, the proposed $1 million minimum cash margin requirement is consistent with reducing systemic risks and supporting the stability of the broader financial system, as well as promoting safety and soundness.

In addition, as indicated by FICC's backtesting results, and discussed further in Section II.B.2 below, the $1 million minimum margin requirement should enhance FICC's ability to collect the appropriate margin from each indirect participant, which is consistent with robust risk management. FICC's flexibility to adjust the minimum margin amount if it determines that a different amount would be appropriate and consistent with achieving its backtesting coverage target is also consistent with robust risk management, because meeting backtesting coverage targets is essential to ensuring that the margin collected would be sufficient for FICC to cover its credit exposures to its Netting Members and indirect participants fully with a high degree of confidence, as required for a covered clearing agency such as FICC.[92] As defined in the Covered Clearing Agency Standards, backtesting is an ex-post comparison of actual outcomes with expected outcomes derived from the use of margin models,[93] and it is a key analytical mechanism for a CCP to consider the effectiveness of its margin model. FICC's ability to adjust the minimum margin amount would apply only where it would be appropriate and consistent with achieving its backtesting coverage target. This ability would, therefore, be limited to circumstances where its backtesting coverage target requirements are not being met or the amount of margin being collected exceeds the amount needed to cover the indirect participant's exposure to FICC.

Based on FICC's representations, the Commission understands that FICC generally intends to use this ability to adjust the minimum margin requirement below $1 million if a lower minimum would suffice to reduce backtesting deficiencies comparably to the $1 million.[94] As part of its ongoing supervision of FICC, the Commission will continue to monitor the performance of the $1 million minimum margin requirement, including as its performance compares to backtesting, and will engage with FICC regarding any changes to that requirement and the supporting analysis for such changes, to help ensure that FICC is appropriately exercising that discretion consistent with the requirements imposed upon it by the rule (*i.e.,* that it determines that any such adjustments would be appropriate and consistent with achieving its backtesting coverage target).[95] For example, not meeting backtesting coverage requirements would be an indication that the minimum margin amount is insufficient to cover FICC's credit exposure to its Netting Members and indirect participants, whereas, on the contrary, higher backtesting performance could indicate that the margin collected exceeds the exposure to FICC.

3. Margin Component Schedule

The proposed changes in section I.B.3 regarding the calculation of margin for segregated and non-segregated accounts should help ensure that FICC collects margin sufficient to cover its exposures with respect to both direct and indirect participants. Requiring that the margin requirement for a Segregated Indirect Participant Account be calculated in generally the same manner as a Netting Member's requirement, which the Commission generally has reviewed and approved as part of FICC's rules,[96]

[92] 17 CFR 240.17ad–22(e)(6).

[93] 17 CFR 240.17ad–22(a).

[94] *See* FICC Letter at 3, 30–31.

[95] In addition, the requirements applicable to FICC as a self-regulatory organization under Section 19(b) of the Exchange Act and as a designated financial market utility under Title VIII of the Payment, Clearing, and Supervision Act (12 U.S.C. 5465(e)) would continue to apply. Thus, for example, if FICC were to amend the $1 million minimum margin requirement to an amount that would materially alter the level or nature of risk presented, FICC would be obligated to submit an advance notice of such change with the Commission.

[96] *See, e.g.,* Self-Regulatory Organizations; Fixed Income Clearing Corporation; Notice of Filing of Amendment No. 1 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 1, To Implement Changes to the Required Fund Deposit Calculation in the Government Securities Division Rulebook, Exchange Act Release No. 83362 (June 1, 2018), 83 FR 26514 (June 7, 2018) (approving changes to how

should help ensure that FICC collects margin sufficient to cover its exposures with respect to both direct and indirect participants, as discussed further in Sections II.B.3 and II.C.2 below, which is consistent with promoting robust risk management. In addition, by doing so, these proposed changes should help ensure that, in the event of such a default, FICC's operation of its critical clearance and settlement services would not be disrupted because of insufficient financial resources, which is consistent with safety and soundness at FICC. For the same reasons, these proposed changes should also help ensure that FICC is able to continue to meet its obligation in the event of a default, without accessing non-defaulting Netting Members' or indirect participants' margin deposits, which is consistent with reducing systemic risks and supporting the stability of the broader financial system.

4. Allocation of Net Unsettled Positions

The proposed changes described in Section I.B.3.b. to adopt a method for allocating net unsettled positions to individual indirect participants for calculating margin requirements should reduce the potential exposure to FICC arising from indirect participant transactions that fail to settle by ensuring that FICC has a mechanism to collect margin for such transactions. Further, these proposed changes should make clear that such obligations are allocated only to participants that are outside the Sponsored GC service, since such fails to deliver do not occur in that service. By accounting for risks arising from net unsettled positions, the proposed changes are consistent with promoting robust risk management.

5. Calculation of Excess Capital Premium

The proposed changes to the calculation of the ECP described in Section I.B.3.c. above are consistent with promoting robust risk management, because the changes should help ensure that FICC continues to collect margin sufficient to address the heightened default risk presented by a Netting Member operating with lower capital levels relative to its margin requirements. Based on its review of the Advance Notice, including the detailed impact analysis submitted as a confidential exhibit, FICC's margin coverage would not be impacted by this change and FICC would continue to collect sufficient margin to manage its potential exposure to its Netting Members.

In addition, the proposed changes to the calculation of the ECP should result in a simplified and more straightforward method for calculating the ECP, based on understandable metrics with which FICC's Netting Members are familiar. Using a clearly defined source for determining Netting Member Capital in the calculation of the ECP would result in a more consistent calculation across different types of Netting Members. Moreover, capping the Excess Capital Ratio at 2.0 would provide transparency to Netting Members so they can understand how the ECP will be calculated, and it also would align FICC's cap with the recently approved changes to the ECP calculation at NSCC.[97] By improving the consistency and predictability of the ECP, the proposed enhancements would also improve FICC's ability to collect margin amounts that reflect the risks posed by its Netting Members such that, in the event of Netting Member default, FICC's operations would not be disrupted, and non-defaulting Netting Members and indirect participants would not be exposed to losses they cannot anticipate or control. In this way, this portion of the Advance Notice is consistent with promoting safety and soundness, as well as reducing systemic risks and supporting the stability of the broader financial system.

6. Modification of Terms for Brokered Transactions

The proposed changes described in Section I.B.4. to revise the definition of Brokered Transactions to include only the side of the transactions submitted to FICC for novation by an Inter-Dealer Broker Netting Member and entered into on the Inter-Dealer Broker Netting Member's own trading platform should enhance FICC's risk management by providing favorable loss allocation treatment only to transactions that present limited risk to FICC. As a result, these changes should help ensure that FICC has sufficient prefunded financial resources to continue meeting its obligations in the event of a default, which is consistent with promoting safety and soundness at FICC, as well as reducing systemic risk and supporting the stability of the broader financial system.

A. Consistency With Rule 17ad–22(e)(4)(i)

Rule 17ad–22(e)(4)(i) requires that FICC establish, implement, maintain and enforce written policies and procedures reasonably designed to effectively identify, measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes, including by maintaining sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence.[98]

1. Separate Calculation and Collection of Margin for Proprietary and Customer Accounts

The proposed changes to require the separate and independent calculation and collection of margin for Netting Members' proprietary transactions and indirect participants' transactions, as described in Section I.B.1., are consistent with Rule 17ad–22(e)(4)(i).[99] The separate calculation and collection of margin from Netting Members and indirect participants should allow FICC to better identify and measure the unique risk profile of each participant, enhancing FICC's ability to calculate and collect the appropriate margin from each direct and indirect participant. As a result, the proposed changes should help ensure that FICC has sufficient margin to cover potential losses from a Netting Member or indirect participant default, thereby reducing the probability that FICC, non-defaulting Netting Members, or non-defaulting indirect participants would incur losses resulting from a default.

2. $1 Million Minimum Cash Margin Requirement

The proposed minimum $1 million cash margin requirement for each Segregated Indirect Participant Account, as described in Section I.B.2.a, is consistent with Rule 17ad–22(e)(4)(i). Several commenters state that FICC lacks a sufficient basis or justification for the required $1 million minimum margin amount.[100] Specifically, one commenter stated that using the amount applicable to Netting Members is not an appropriate basis for establishing a minimum for indirect participants, and also stated that the requirement lacks any support or analysis as to the level of margin attributable to a typical fund's positions in cleared Treasury repo, which is data FICC should have readily

FICC calculates the Value at Risk component of its margin methodology, addition of the new ''Blackout Period Exposure adjustment'' component to the margin methodology, eliminating certain existing components, and revising additional components).

[97] *See* Securities Exchange Act Release No. 96786 (Feb. 1, 2023), 88 FR 8013 (Feb. 7, 2023) (SR–NSCC–2022–005); *see also id.* (discussing the view that capping the ratio at 2.0 strikes an appropriate balance between addressing the heightened default risk without imposing overly burdensome Excess Capital Premium charges).

[98] 17 CFR 240.17ad–22(e)(4)(i).

available.[101] An additional commenter stated the requirement seems arbitrary, and not practical or necessary, especially in the current done-with model, to force every segregated customer to be subject to the same minimum requirement as a Netting Member.[102]

In addition, commenters state that FICC should adopt a lower minimum requirement ($100,000 to $250,000), a dynamic minimum based on average exposure subject to a $250,000 cap, or a minimum set by the relevant Netting Member.[103] Commenters also state that FICC should determine a minimum deposit based on the individual client and the risk that such client presents to FICC and other market participants.[104]

In response, FICC states that the $1 million floor for Segregated Indirect Participants is the same floor FICC already has in place for its Netting Members.[105] FICC states that its impact study, conducted in 2022 when adopting the rule applicable to Netting Members, demonstrated that a $1 million floor would protect FICC and its participants from incurring a loss in the event of a Netting Member failure because the study indicated that a $1 million floor would provide an adequate buffer for additional repo activity due to increases in repo interest rates and would have mitigated 65 out of 396 backtesting deficiencies (16%) during the period from July 1, 2021 to June 30, 2022.[106] FICC further states that it analyzed alternative minimum margin amounts, such as $500,000, and, based on the results of its analysis, the $1 million floor provided the appropriate balance of improving backtesting performance and margin coverage while minimizing the impact on Netting Members.[107]

FICC also states that the backtesting data from the period after the $1 million minimum floor was implemented indicated a ''material reduction of backtesting deficiencies at FICC.'' [108] From December 5, 2022 to June 30, 2024, FICC states that the $1 million floor eliminated 24 backtesting deficiencies, a 12% reduction.[109] Further, during a period of 12-month period of moderate market volatility from July 1, 2023 to June 30, 2024, FICC states that the $1 million floor eliminated 15 backtesting deficiencies, a 22% reduction.[110]

FICC further states that the $1 million floor is appropriate because the Segregated Customer Margin posted by each individual Segregated Indirect Participant needs to be sufficient on its own to address losses arising from the Segregated Indirect Participant's positions.[111] This is because Segregated Customer Margin is not subject to loss mutualization under the proposal, so FICC can only use Segregated Customer Margin posted by an individual Segregated Indirect Participant to satisfy that customer's obligations. As a result, each Segregated Indirect Participant's portfolio would present a risk to FICC that is equivalent to the risk of a proprietary portfolio of an individual Netting Member.[112] If the Segregated Customer Margin is insufficient, losses would need to be mutualized, with harm to FICC, its non-defaulting Netting Members, and, potentially, the market as a whole.[113]

In addition, FICC stated that the risk cited by the Commission of inconsistent activity giving rise to dramatic changes in risk exposure, discussed by the Commission in the FICC–2022–006 Order,[114] is arguably more pronounced for indirect participants than for Netting Members.[115] First, indirect participants may clear through multiple Netting Members and shift their activity through different Netting Members, which can present risks to FICC since FICC cannot use the Segregated Customer Margin posted by the Segregated Indirect Participant through one Netting Member to address the Segregated Indirect Participant's transactions cleared by another Netting Member.[116] As a result, FICC states that, even if the Segregated Indirect Participant's overall activity remains steady, FICC could see dramatic shifts in its risk simply because the Segregated Indirect Participant shifts the Netting Members it uses as its intermediary at FICC.[117] Second, FICC states that it does not have the same general understanding of indirect participants' business that it has for its Netting Members, since it does not collect the same information on individual customers' business or finances that it does for its Netting Members.[118] As a result, FICC states that it is less likely to know when there may be significant swings in indirect participant risk exposures as it would for its Netting Members and, since indirect participants are likely to have a far more diverse array of business models and interest rate considerations than FICC's Netting Members, they could engage in inconsistent activity that could increase risk exposure to FICC.[119] According to FICC, the possibility of inconsistent activity among indirect participants is potentially greater.[120]

The Commission disagrees with commenters who stated that using the same minimum as Netting Members is not appropriate for Segregated Indirect Participants. As stated in Section I.A. above, FICC and non-defaulting Netting Members and indirect participants may be subject to losses should the Segregated Customer Margin of an indirect participant be insufficient to satisfy losses caused by the liquidation of that indirect participant's portfolio. This potential exposure both to FICC and non-defaulting Netting Members and indirect participants makes it essential that FICC determine margin amounts for Segregated Indirect Participant Accounts that are reasonably designed to ensure that FICC has sufficient margin to cover the losses of a defaulting Segregated Indirect Participant.

The analyses conducted by FICC both in connection with the 2022 change to the required minimum margin amount for Netting Members and after the implementation of that requirement, which the Commission has reviewed and analyzed, support the use of the $1 million margin requirement for Segregated Indirect Participant Accounts. The Commission agrees that these studies demonstrate that a $1 million margin floor has a material impact on reducing the number of backtesting deficiencies experienced by FICC's Netting Members, which would likely help FICC better manage its credit exposure to its Netting Members and indirect participants and credit

exposures arising from its payment, clearing, and settlement processes.

Consideration of the appropriate Netting Member minimum is directly relevant to what is appropriate for Segregated Indirect Participant Accounts because FICC would treat such accounts the same as Netting Member accounts in the event of a default of that individual customer.[121] Even though a Segregated Indirect Participant would be the customer of a Sponsoring Member or an Agent Clearing Member, each Segregated Indirect Participant Account would need to provide sufficient margin to independently cover its losses in the event of a default. FICC will determine the appropriate margin for each Segregated Indirect Participant Account as if it were a separate Netting Member. As discussed above, indirect participants may increase risk by clearing through different Netting Members, which would provide FICC with less insight into their overall portfolio. Accordingly, it is appropriate for the minimum amount to be the same for both Netting Members and indirect participants.

In response to commenters who proposed an alternative amount or approach, the Commission also has reviewed and analyzed the analysis of alternative minimum amounts that FICC conducted, which show that there would still be potential for higher amounts of backtesting deficiencies using a $500,000 alternative minimum, making the alternatives proposed by commenters ($100,000, $250,000 or a dynamic minimum with a $250,000 cap) not reasonably designed to allow FICC to collect sufficient margin to cover its exposures. As discussed above, FICC's backtesting data from December 5, 2022 to June 30, 2024 indicates that increasing the minimum margin amount from $100,000 to $1 million eliminated 24 Netting Member backtesting deficiencies, a 12% reduction.[122] Further, during a 12-month period of moderate market volatility from July 1, 2023 to June 30, 2024, the $1 million floor eliminated 15 backtesting deficiencies, a 22% reduction.[123]

Because FICC is not able to predict how many indirect participants may elect to submit activity to FICC through a Segregated Indirect Participants Account or the size or volume of that activity, margin requirements for each Segregated Indirect Participant would be calculated in the same manner as for Netting Members.[124] FICC's impact studies of Netting Members provide a reasonable approximation of the risks FICC may face if the minimum margin amount is set below $1 million. Therefore, the proposed $1 million floor is appropriate to increase the probability that the margin amount collected by FICC is sufficient to cover FICC's credit exposure to Segregated Indirect Participants and protect non-defaulting parties from experiencing losses. However, as described above in Section I.B.2.a., if FICC determines that a different minimum charge would be appropriate and consistent with achieving its backtesting coverage target, FICC would have the ability to adjust the minimum charge of $1 million margin requirement. This added flexibility should allow FICC to continue to collect the appropriate amount of margin to cover its credit exposure to each participant fully with a high degree of confidence, as demonstrated by FICC's meeting its backtesting coverage targets, while minimizing the burden on indirect participants.

Moreover, the Commission disagrees that allowing the Netting Member to determine a minimum would be appropriate. It is unclear what basis a Netting Member would use to determine such a minimum in a way that would ensure that the amount is sufficient to meet FICC's regulatory obligations and minimize backtesting deficiencies because a Netting Member would not be able to replicate FICC's backtesting or calculate FICC's regulatory obligations.

The Commission disagrees that determining a minimum deposit on a case-by-case basis would be feasible for every Segregated Indirect Participant. FICC has stated that it does not know how many Segregated Indirect Participants will participate in FICC. At this time, there are over 2500 Sponsored Members at FICC,[125] and it is likely that additional indirect participants will want to access clearing going forward in light of the Treasury Clearing rules. Determining a minimum for even half the current Sponsored Members on a case-by-case basis would be extremely burdensome for FICC and would require the submission of detailed financial information by each Sponsored Member to inform FICC of its planned business activities, and it is unclear how or on what basis such a minimum would be adjusted over time. Establishment of a minimum requirement is appropriate to ensure that FICC can meet its obligations under Rule 17ad–22(e)(4)(i), and reliance upon the minimum for Netting Members is appropriate because, as discussed above, FICC has to treat each Segregated Indirect Participant as a stand-alone account for risk management purposes to segregate its margin appropriately.

For these reasons, the $1 million minimum margin requirement should help ensure that FICC has sufficient margin to cover potential losses from a Segregated Indirect Participant default, thereby reducing the probability that FICC, non-defaulting Netting Members, and non-defaulting indirect participants would incur losses resulting from a default. Moreover, as described above in Section I.B.2.a., FICC would have the ability to adjust the amount of the minimum $1 million margin requirement if FICC determines that a different minimum charge would be appropriate and consistent with achieving its backtesting coverage target. The Commission agrees with FICC that it should continue to assess the performance of this minimum requirement with respect to FICC's backtesting coverage requirements, as it provided in the Amendment to this filing, to ensure that FICC is not collecting more margin than is necessary to meet its regulatory obligations to cover its exposure to its participants.[126] Although the Commission recognizes that FICC could use this ability to increase the $1 million minimum to some greater amount, it would only be able to do so if determines that a different minimum charge would be appropriate and consistent with achieving its backtesting coverage target.

3. Margin Component Schedule

The proposed changes in section I.B.3 regarding the calculation of margin for segregated and non-segregated accounts should ensure that FICC collects margin sufficient to cover its exposures with respect to both direct and indirect participants. Requiring that the margin

[121] This also makes the 2022 impact study relevant to this determination because FICC would calculate margin requirements for each Segregated Indirect Participant in the same manner as margin requirements for each Netting Member. The Commission reviewed and analyzed that impact study when approving the current minimum applicable to Netting Members, and the same analysis should apply here as well.

[122] *See* FICC Letter at 29.

[123] *Id.*

[124] *See* Notice of Filing, *supra* note 4, at 89 FR 21595.

[125] *See* GSD Member Directories, *available at https://www.dtcc.com/client-center/ficc-gov-directories.*

[126] One commenter states that FICC should not delay recalibration of the minimum margin requirement to a later date. MFA Letter II at 6–7. However, as the Commission discussed above, the minimum margin requirement is appropriate, based on the data available at this time. The Commission will continue to monitor implementation of this requirement going forward once more data regarding the use of segregated accounts is available.

requirement for a Segregated Indirect Participant Account be calculated in generally the same manner as a Netting Member's requirement, which the Commission has reviewed and approved as part of FICC's rules, should help ensure that FICC collects margin sufficient to cover its exposures with respect to both direct and indirect participants. By doing so, this portion of the Advance Notice should better ensure that, in the event of a Netting Member's or indirect participant's default, FICC has sufficient margin to cover potential losses from the default, thereby reducing the probability that FICC, non-defaulting Netting Members, and non-defaulting indirect participants would incur losses resulting from a default. Collecting the same margin components for a Segregated Indirect Participant Account as those used for a Netting Member Account is appropriate because FICC has to risk-manage each Segregated Indirect Participant Account individually, and application of the existing margin methodology would help ensure that FICC collects sufficient margin to cover its exposures to participants for all Accounts. FICC has, however, taken into account how the ECP should apply differently when determining a Segregated Customer Margin Requirement, which is appropriate for the reasons discussed in Section II.C.3 below, and the changes related to the ECP Charge would ensure that Segregated Indirect Participants are not required to post additional margin to account for the capital position of its Netting Member.

Accordingly, for the reasons discussed above, the Advance Notice is reasonably designed to enable FICC to effectively identify, measure, monitor, and manage its credit exposure to Netting Members and indirect participants, consistent with Rule 17ad–22(e)(4)(i).[127]

B. Consistency With Rule 17ad–22(e)(6)(i)

Rule 17ad–22(e)(6)(i) requires FICC to establish, implement, maintain and enforce written policies and procedures reasonably designed to cover its credit exposures to its participants by establishing a risk-based margin system that, at a minimum, considers, and produces margin levels commensurate with, the risks and particular attributes of each relevant product, portfolio, and market, and, if the covered clearing agency provides central counterparty services for U.S. Treasury securities, calculates, collects, and holds margin amounts from a direct participant for its proprietary positions in Treasury securities separately and independently from margin calculated and collected from that direct participant in connection with U.S. Treasury securities transactions by an indirect participant that relies on the services provided by the direct participant to access the covered clearing agency's payment, clearing, or settlement facilities.[128]

1. Separation of Proprietary and Customer Margin

The proposed changes to separate proprietary and customer margin are consistent with Rule 17ad–22(e)(6)(i). First, to help ensure that proprietary transactions and transactions submitted to FICC on behalf of indirect participants are margined separately, FICC would require that each margin portfolio contain only transactions from the same account type and that Netting Members use separate Deposit IDs for different transaction types. Second, FICC would calculate each Segregated Indirect Participant's margin requirement separately on a gross basis as though each Segregated Indirect Participant were a separate Netting Member. Finally, FICC would create a separate ''Segregated Customer Margin Custody Account'' for each Netting Member that contains deposits of Segregated Customer Margin for indirect participants, with interest earned on cash margin paid to each Segregated Indirect Participant's Netting Member for the benefit of, and as an agent for, the Segregated Indirect Participant. Collectively, these proposed changes should ensure that a Netting Member's proprietary transactions are not netted with indirect participant transactions for margin calculations and that margin for indirect participant transactions is collected and held separately and independently from margin for a Netting Member's proprietary transactions. Moreover, by calculating each Segregated Indirect Participant's margin requirement separately from Netting Members and other Segregated Indirect Participants, the proposed changes should allow FICC to better isolate the risk profiles of individual indirect participants from Netting Members, which should help FICC better understand and monitor each individual participant's risk exposures.[129]

One commenter expressed concern that the proposal would not fully eliminate fellow customer risk because it would allow for the *pro rata* allocation of Current Net Settlement positions among Segregated Indirect Participant positions held in the same Segregated Indirect Participants Account.[130] In response, FICC explained that, due to the requirement in the Treasury Clearing Rules that margin for customer positions be calculated separately from margin for a Netting Member's proprietary positions, FICC would not be able to allocate the margin obligations from Current Net Settlement Positions to a Netting Member's portfolio.[131] As a result, such margin must be allocated to customer positions and FICC states that, when it is not aware of the allocation of Current Net Settlement Positions among customers, it is most equitable to allocate such positions *pro rata* to customers who were long or short the relevant securities.[132] The Commission agrees that allocating the positions to the Netting Member's account would be inconsistent with Rule 17ad–22(e)(6)(i) because it would impermissibly net proprietary transactions against indirect participant transactions. The Commission further agrees that the positions must be allocated to ensure that FICC is able to appropriately risk-manage those positions (that is, to collect appropriate margin). The Commission further agrees with FICC's approach of limiting such *pro rata* allocations only to customers engaging in non-Sponsored GC Trades because settlement failures do not occur with respect to Sponsored GC Trades. Therefore, in the event that the positions are not allocated, a *pro rata* allocation among customers is appropriate.

Accordingly, the proposed changes in the Advance Notice would be consistent with Rule 17ad–22(e)(6)(i) because they should help ensure that FICC calculates, collects, and holds margin for a Netting Member's proprietary positions

[127] *See id.*

[128] 17 CFR 240.17ad–22(e)(6)(i).

[129] Commenters requested clarification that FICC's funds-only settlement amounts are settlement payments rather than margin. *See* ISDA Letter at 6; Letter from Katherine Darras, General Counsel, International Swaps and Derivatives Association (July 18, 2024) (''ISDA Letter II'') at 6; SIFMA Letter at 4; Letter from Walt L. Lukken, President and Chief Executive Officer, Futures Industry of America (Apr. 18, 2024) (''FIA Letter'') at 11. The Advance Notice does not make any amendments to the funds-only settlement process at FICC. *See* GSD Rule 13. This aspect of FICC's rules is, therefore, not relevant to this Advance Notice. However, FICC clarified that it views such payments as constituting settlements that discharge outstanding payment obligations, rather than as margin or collateral. FICC Letter at 43. The Commission agrees with this clarification, based upon its knowledge of FICC's margin and payment flows and the applicable GSD Rules.

[130] *See* SIFMA AMG Letter at 10.

[131] *See* FICC Letter at 36.

[132] *Id.*

separately from the margin for positions the member clears for customers.[133]

5. Margin Component Schedule

The proposed changes to establish a Margin Component Schedule, which would consolidate the terms and information relating to margin calculation throughout the Rules into a single schedule, are consistent with Rule 17ad–22(e)(6)(i). Under the proposed Margin Component Schedule, FICC would perform substantially the same calculation it currently performs when determining a Netting Member's Required Fund Deposit and include the methodology for calculating a Netting Member's Segregated Customer Margin Requirement. By including a methodology to calculate each Segregated Indirect Participant's margin requirement separately from Netting Members and other Segregated Indirect Participants, the proposed changes should help ensure that FICC calculates, collects, and holds margin for a Netting Member's proprietary positions separately from the margin for positions the member clears for customers. Moreover, calculating margin requirements for each Segregated Indirect Participant should allow FICC to better isolate the risk profiles of individual indirect participants from Netting Members, which should help FICC better understand and monitor each individual participant's risk exposures and thereby collect margin commensurate with the risks of each Netting Member and indirect participant portfolio.

A commenter states that FICC should confirm that segregation of margin for indirect participants does not magnify risk for Netting Members. Specifically, the commenter states that it is not clear whether the Required Fund Deposit to be posted by Netting Members incorporates any exposure associated with Segregated Indirect Participant Accounts and expresses concern as to whether FICC's rules allow FICC to collect additional margin to cover any enhanced risk that may arise relating to the Netting Member's obligations to FICC for its clients who are indirect participants generally or who choose segregation specifically.[134] However, FICC's proposed rules establish that the calculation of a Netting Member's Required Fund Deposit excludes the exposure of its Segregated Indirect Participants.[135] FICC's rules do permit FICC to collect increased Required Fund Deposits from Netting Members if ''necessary to protect [FICC] and its Members from Legal Risk,'' which, FICC states, would include the consideration of the Netting Members' indirect participants.[136]

This commenter also states the fact that the ability to prefund margin for a customer is only temporary puts pressure on the Netting Member's own Required Fund Deposits, which ''it seems would still cover the obligations of all its clients'' and also on the Netting Member and the broader FICC membership, in the event of a failure by any Segregated Indirect Participant.[137] However, the Netting Member's Required Fund Deposits would not be calculated based on the obligations of its clients, and, in the event of the default of an indirect participant, FICC would use the Segregated Customer Margin for only that indirect participant. Therefore, the Commission disagrees that the inability to permanently prefund the customer's margin requirement puts additional pressure on the Netting Member's own Required Fund Deposits.

Another commenter states that FICC should explain why it is appropriate to calculate a segregated customer's margin requirement as if it were a Netting Member, even though the margin calculation for FICC Netting Members covers both initial margin and guaranty fund contributions (and customers are not expected to be contributing to the guaranty fund).[138] However, FICC does not maintain a separate guaranty fund into which a Netting Member contributes for its customers. The Segregated Customer Margin Requirement must be sufficient to cover the exposures to FICC arising from that particular customer's activity because, under the segregation system proposed by the Advance Notice which would allow broker-dealers participating in FICC to comply with the conditions of Note H to Rule 15c3–3, FICC would not be able to use the margin collected from a Segregated Indirect Participant for any reason unrelated to the Segregated Indirect Participant. Therefore, calculating each Segregated Customer Margin Requirement in this manner is appropriate to ensure that FICC has appropriate resources to cover each customer's exposures. Therefore, this aspect of the Advance Notice is consistent with Rule 17ad–22(e)(6)(i) under the Exchange Act.

6. Excess Capital Premium

The proposed changes to the calculation of the ECP charge are consistent with Rule 17ad–22(e)(6)(i). FICC's margin deposits are made up of risk-based components (as margin) that are calculated and assessed daily to limit FICC's exposures to Netting Members. FICC's proposed changes to use clearly defined sources in the calculation of the ECP charge would collectively make the calculation clearer and more predictable to Netting Members, while continuing to apply an appropriate risk-based charge designed to mitigate the risks presented to FICC. Similarly, the proposal to cap the Excess Capital Ratio at 2.0 would allow FICC to appropriately address the risks it faces without imposing an overly burdensome ECP and would reduce the circumstances in which FICC may waive the charge, resulting in a more transparent margining methodology. Finally, the proposed rule change would clarify the exigent circumstances under which FICC may determine that it is appropriate to waive the ECP charge. Overall, these proposed changes would improve the effectiveness of the calculation of the ECP and, therefore, allow FICC to more effectively address the increased default risks presented by Netting Members that operate with lower capital levels relative to their margin requirements.

In addition, FICC proposes to exclude VaR Charges for Segregated Indirect Participants Accounts when determining a Netting Member's Excess Capital Differential, in order to take into account the fact that each indirect participant would be responsible for satisfying its own respective VaR Charge. Not including these Segregated Indirect Participants Accounts when determining the Excess Capital Differential, and, therefore, the ECP Charge, is consistent with the purpose of the Excess Premium Charge. This charge is designed to address the risk that a Netting Member with low capital relative to its value-at-risk to FICC is not able to perform its obligations. Because the Netting Member's capital is not used to meet the indirect participant's obligation to FICC, excluding the indirect participant VaR Charges from the determination of the ECP should result in FICC collecting margin commensurate with the risks and particular attributes of each relevant portfolio.

Taken together, the proposed changes enhance the ability of the ECP to produce margin levels commensurate

with the risks FICC faces related to its Netting Members' operating capital levels. Therefore, this aspect of the Advance Notice is consistent with Rule 17ad–22(e)(6)(i) under the Exchange Act.

C. Consistency With Rule 17ad–22(e)(6)(iii)

Rule 17ad–22(e)(6)(iii) requires that FICC establish, implement, maintain and enforce written policies and procedures reasonably designed to cover its credit exposures to its participants by establishing a risk-based margin system that, at a minimum, calculates margin sufficient to cover its potential future exposure to members in the interval between the last margin collection and the close out of positions following a member default.[139]

As summarized in Section I.B.3 above, FICC employs daily backtesting to determine the adequacy of each Netting Member's Required Fund Deposit, paying particular attention to members that have backtesting deficiencies below the 99% confidence target. Such backtesting deficiencies highlight exposure that could subject FICC to potential losses if a Netting Member defaults. As discussed in Section II.C.2, FICC's impact study during the period from July 1, 2021 to June 30, 2022 demonstrated that a $1 million floor would have protected FICC and its participants by reducing the possibility of incurring a loss in the event of a Netting Member failure by mitigating 16% of backtesting deficiencies.[140] Moreover, after the $1 million floor was implemented for Netting Members, FICC states that it eliminated 22% of backtesting deficiencies during a 12-month period of moderate market volatility from July 1, 2023 to June 30, 2024.[141]

Therefore, adding the proposed $1 million minimum requirement for Segregated Customer Margin, and the ability to adjust the minimum million margin requirement to achieve FICC's backtesting coverage target, should better ensure that FICC maintains sufficient margin to cover its potential future exposure to its indirect participants in the interval between the last margin collection and the close out of positions following an indirect participant default. This should, thereby, reduce the likelihood FICC or non-defaulting Netting Members or indirect participants would incur losses as a result. Accordingly, FICC's proposed $1 million minimum requirement for Segregated Customer Margin would be consistent with Rule 17ad–22(e)(6)(iii).[142]

D. Consistency With Rule 17ad–22(e)(18)(ii)

Rule 17ad–22(e)(18)(ii) requires that FICC establish, implement, maintain and enforce written policies and procedures reasonably designed to establish objective, risk-based, and publicly disclosed criteria for participation, which require participants to have sufficient financial resources and robust operational capacity to meet obligations arising from participation in the clearing agency.[143] The proposed changes to consolidate FICC's margin methodology in a single location, identify the particular Required Fund Deposit Portions and Segregated Customer Margin Requirements, and clarify the calculation of the Excess Capital Premium and circumstances in which FICC would waive the application of such premium should enhance FICC's public disclosure of the risk-based margin obligations that Netting Members and their indirect participants would have as a result of their participation in FICC's clearance and settlement services. This improved public disclosure should allow Netting Members and their indirect participants to better understand how their activity would impact margin calculations, which are designed to ensure that participants have sufficient financial resources and robust operational capacity to meet obligations to FICC. Accordingly, the proposed changes would be consistent with Rule 17ad–22(e)(18)(ii).[144]

E. Consistency With Rule 17ad–22(e)(18)(iii)

Rule 17ad–22(e)(18)(iii) requires that FICC establish, implement, maintain and enforce written policies and procedures reasonably designed to establish objective, risk-based, and publicly disclosed criteria for participation, which monitor compliance with its participant requirements on an ongoing basis.[145] The proposed changes would require Netting Members to designate the specific account type when submitting transactions and to identify any Sponsored Member or Executing Firm Customer for whom the transaction is submitted. These changes should enhance FICC's ability to monitor which transactions are being entered into by which entities and assess the specific risks associated with those entities. This enhanced monitoring of participant activity should allow FICC to better monitor participants' compliance with FICC's Rules. Accordingly, the proposed changes would be consistent with Rule 17ad–22(e)(18)(iii) because they should enhance FICC's ability to monitor compliance with its participant requirements on an ongoing basis.[146]

F. Consistency With Rule 17ad–22(e)(18)(iv)(C)

Rule 17ad–22(e)(18)(iv)(C) requires that FICC establish, implement, maintain and enforce written policies and procedures reasonably designed to ensure that it has appropriate means to facilitate access to clearance and settlement services of all eligible secondary market transactions in U.S. Treasury securities, including those of indirect participants.[147]

As discussed above in Section II.B.3, by improving the transparency of FICC's account offerings and margin calculation methodology, the proposed changes should enhance market participants' understanding of how margin is calculated and their options for posting margin, thereby facilitating access to FICC's clearance and settlement services. In addition, the proposed changes should offer greater optionality to Netting Members and indirect participants, which should allow Netting Members and indirect participants to adopt a margining arrangement that aligns with their business objectives and regulatory, operational, and practical constraints. By enhancing transparency of FICC's margin framework and account options and offering greater optionality to participants concerning the type of account they transact in and how their margin is posted, the proposal should facilitate access to FICC's clearance and settlement systems.

Several commenters proposed that FICC should require Netting Members to offer account segregation to customers.[148] One such commenter

[139] 17 CFR 240.17ad–22(e)(6)(iii).

[140] *See* FICC Letter at 28.

[141] *Id.*

[142] 17 CFR 240.17ad–22(e)(6)(iii).

[143] 17 CFR 240.17ad–22(e)(4)(18)(ii).

[145] 17 CFR 240.17ad–22(e)(18)(iii).

[146] 17 CFR 240.17ad–22(e)(18)(iii).

[147] 17 CFR 240.17ad–22(e)(18)(iv)(C).

[148] Specifically, one commenter stated that for indirect participants, having a ''right'' to direct their Netting Member to segregate their margin is highly desirable because it would allow an indirect participant to have certainty that margin that it posts receives the protection afforded by segregation. SIFMA AMG Letter at 6. Another such commenter stated that, despite what a customer may desire with respect to margin and segregation, there could be incentives for direct participants to finance the margin for their customers' transactions (and thereby earn extra fees for doing so) instead of the customer financing or posting that margin,

specified that this should include bank Netting Members, who would not face the same restrictions on the use of customer margin as broker-dealer customers subject to Rule 15c3–3 and therefore may not be as incentivized to provide segregated account services.[149]

FICC did not propose a requirement that its Netting Members offer segregated accounts to their customers. Therefore, the Commission is not addressing any changes related to such a requirement in this Advance Notice. Nothing in the Treasury Clearing Rules or Rule 15c3–3 requires a covered clearing agency, like FICC, to require its Netting Members to provide certain services. Moreover, certain Netting Members may have regulatory or other reasons not to offer segregation, and, if required to offer such services, may choose to cease providing customer clearing services, which could, in turn, increase concentration in the market and reduce liquidity.[150]

Additionally, a commenter urged FICC to allow indirect participants to post margin directly to FICC without intermediation from a Netting Member.[151] The Treasury Clearing Rules do not require FICC to provide this function, and FICC did not propose such a method for direct posting of margin.[152] Accordingly, the Commission is not addressing any changes related to such a requirement in this Advance Notice.

One commenter sought clarification whether Netting Members other than broker-dealers can elect segregation for their customers.[153] Based on the Advance Notice, the Commission understands, and FICC confirmed,[154] that any Sponsoring Member or Agent Clearing Member, regardless of whether registered as broker-dealers, would be able to designate an account as a Segregated Indirect Participants Account.

The same commenter also sought clarification whether a customer may segregate margin obtained through a margin financing arrangement.[155] Based on the Advance Notice, the Commission understands, and FICC confirmed,[156] that such segregation would be permissible under FICC's rules.

This commenter also asked why excess margin would only be returned on request and states that an indirect participant should not have to request a return of its excess margin.[157] The Treasury Clearing Rules do not require FICC to provide this function, and FICC did not propose such a function. Accordingly, the Commission is not addressing any changes related to such a requirement in this Advance Notice. Moreover, when it adopted the amendments to Rule 15c3–3, the Commission declined to adopt a requirement to ''push'' excess margin to direct participants.[158]

Another commenter suggested that FICC allow customer margin to be segregated, even when customers do not post the full amount of the margin needed to cover their positions.[159] FICC states that allowing customer margin to be segregated when customers do not post the full amount of margin would lead to disparities that would put broker-dealer Netting Members at competitive disadvantage to other Netting Members.[160] The Treasury Clearing Rules do not require FICC to provide this function, and FICC did not propose such a function. Any changes to FICC's rules to impose such a requirement would have to be filed with the Commission pursuant to Section 19(b)[161] of the Exchange Act, as well as, potentially, in an advance notice filed pursuant to Section 806(e) of the Clearing Supervision Act.[162] Therefore, the Commission is not addressing any changes related to such a requirement in this Advance Notice.

Finally, one commenter urged FICC to address the cross-border implications of the proposal and provide a framework for compliance by non-U.S. Netting Members and indirect participants.[163] Specifically, this commenter was concerned that the U.S. Treasury clearing mandate will adversely impact foreign customers that are limited in their ability, or prohibited entirely, to post margin in connection with transactions involving U.S. Treasury securities.[164] However, nothing in the Advance Notice would require a particular market participant to post margin in connection with transactions involving U.S. Treasury securities. Indirect participants remain able to access FICC's central clearing services through access models that do not require the direct posting of margin to FICC (*e.g.,* via the non-segregated versions of FICC's Sponsored and Agent Clearing Services), which should allow flexibility for market participants to determine the most effective way to access FICC indirectly regardless of potential regulatory or other constraints on the ability to post margin directly.

Accordingly, the proposed changes would be consistent with Rule 17ad–22(e)(18)(iv)(C).[165]

G. Consistency With Rule 17ad–22(e)(19)

Rule 17ad–22(e)(19) requires that FICC establish, implement, maintain and enforce written policies and procedures reasonably designed to identify, monitor, and manage the material risks to the covered clearing agency arising from arrangements in which firms that are indirect participants in FICC rely on the services provided by direct participants to access FICC's clearance and settlement facilities.[166] The proposed changes

and for the direct participant to accept the customer's margin without offering the option of segregation (and thereby avoid the additional operational and other costs associated with segregation), which would still be permissible if FICC were not to require its Netting Members to offer account segregation. MFA Letter I at 4.

[149] SIFMA AMG Letter at 6.

[150] FICC Letter at 33.

[151] *See* ICI Letter at 13.

[152] *See supra* note 3 at 2751.

[153] FIA–PTG Letter at 7–9.

[154] FICC Letter at 39.

[155] FIA–PTG Letter at 7–9.

[156] FICC Letter at 40.

[157] *See* FIA PTG Letter I at 7–9.

[158] *See* Treasury Clearing Adopting Release, *supra* note 3, at 2767 (removing, in response to commenters, the requirement that the covered clearing agency have procedures to return customer position margin to the broker-dealer that is no longer needed to meet a current margin requirement resulting from positions in U.S. Treasury securities of the broker-dealer's customers no later than the close of the next business day after the day the customer position margin is no longer needed for this purpose because such a requirement may add significant operational burdens to covered clearing agencies for U.S. Treasury securities and because the debit is limited to margin required and on deposit at the covered clearing agency and therefore does not include the excess margin).

[159] *See* MFA Letter I at 6.

[160] *See* FICC Letter at 32. Specifically, FICC stated that the Treasury Clearing Rules, in particular the amendments to Exchange Act Rule 15c3–3a, provide that a broker-dealer may record a debit in the customer and PAB reserve formulas for margin it collects from customers and on-posts to FICC, but only if the broker-dealer collects from the customer the full amount of margin required for the customer's positions. Accordingly, a broker-dealer is effectively precluded from collecting from customers only a portion of the margin that their positions require and on-posting that amount to FICC. Were FICC to allow segregation of customer margin even if the customer did not fully fund its margin obligations, such segregation would effectively allow non-broker-dealer Netting Members to offer what broker-dealers cannot, *i.e.,* permitting their customers to post a portion of the margin required by FICC and on-post that margin to FICC. This ability would place such Netting Members at a competitive advantage relative to broker-dealer Netting Members.

[163] *See* SIFMA AMG Letter at 12–13.

[164] *See id.* (citing Article 15(2) of the European Union's Money Market Fund Regulation, which it describes as prohibiting European Money Market Mutual Funds from pledging any assets received under reverse repos and certain restrictions on Undertakings for Collective Investments in Transferable Securities and similar investment vehicles related to their ability to post margin that will be held on deposit at FICC).

[165] 17 CFR 240.17ad–22(e)(18)(iv)(C).

[166] 17 CFR 240.17ad–22(e)(19).

described in Section I.B.1 would require that each margin portfolio contains only transactions from the same account type, Netting Members use separate Deposit IDs for different transaction types, each Segregated Indirect Participant's margin requirement be calculated separately on a gross basis as though each Segregated Indirect Participant were a separate Netting Member, and Segregated Customer Margin for each indirect participant be deposited into a separate interest-earning Segregated Customer Margin Custody Account. These changes should enhance FICC's ability to isolate the risk profiles of individual indirect participants from Netting Members, which should help FICC better understand and monitor each individual participant's risk exposures. In addition, the calculation and collection of Segregated Customer Margin on a gross basis, as described in Section I.B.1 and 1.B.2, and the establishment of a $1 million cash floor for Segregated Customer Margin, as described in Section I.B.2.a, should help ensure that FICC will have sufficient margin to manage the risk to FICC during an indirect participant default.

Accordingly, the proposed changes would be consistent with Rule 17ad–22(e)(19) because they should enhance FICC's ability to identify, monitor, and manage the material risks to FICC associated with indirect participants relying on Netting Members to access FICC's clearance and settlement services.[167]

H. Consistency With Rule 17ad–22(e)(23)(ii)

Rule 17ad–22(e)(23)(ii) requires that FICC establish, implement, maintain and enforce written policies and procedures providing sufficient information to enable participants to identify and evaluate the risks, fees, and other material costs they incur by participating in FICC.[168] The proposed changes described in Section I.B.3 to consolidate and clarify FICC's margin calculation methodology in the proposed Margin Component Schedule, adopt a method for allocating net unsettled positions to individual indirect participants for purposes of calculating margin requirements and to clarify the calculation of the ECP should make it easier for both Netting Members and indirect participants to identify and price the potential margining costs associated with how each chooses to submit transactions to FICC for clearance and settlement.

Accordingly, the proposed changes would be consistent with Rule 17ad–22(e)(23)(ii) because they should enhance the ability of Netting Members and indirect participants to identify and evaluate the costs to access FICC's clearance and settlement services.[169]

IV. Conclusion

It is therefore noticed, pursuant to Section 806(e)(1)(I) of the Clearing Supervision Act, that the Commission DOES NOT OBJECT to Advance Notice (SR–FICC–2024–802), as modified by Partial Amendment No. 1, and that FICC is AUTHORIZED to implement the proposed change as of the date of this notice or the date of an order by the Commission approving proposed rule change SR–FICC–2024–007, whichever is later.

By the Commission.

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101697; File No. SR–FINRA–2024–020]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt Fees in FINRA Rule 7720 (Securities Lending and Transparency Engine (SLATE™))

November 21, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 20, 2024, the Financial Industry Regulatory Authority, Inc. (''FINRA'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by FINRA. FINRA has designated the proposed rule change as ''establishing or changing a due, fee or other charge'' under Section 19(b)(3)(A)(ii) of the Act[3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposal effective upon receipt of this filing by the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(ii).

[4] 17 CFR 240.19b–4(f)(2).

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

FINRA is proposing to adopt new FINRA Rule 7720 (Securities Lending and Transparency Engine (SLATE™)) to establish securities loan reporting fees and securities loan data products with associated fees in connection with FINRA's separately proposed Rule 6500 Series (Securities Lending and Transparency Engine (SLATE)) establishing securities loan reporting and data dissemination requirements.[5]

The text of the proposed rule change is available on FINRA's website at *http://www.finra.org,* at the principal office of FINRA and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

(i) Background

On October 13, 2023, the Commission adopted new SEA Rule 10c–1a[6] to require any ''covered person''[7] who agrees to a ''covered securities loan''[8] to

[5] *See infra* note 6.

[6] *See* 17 CFR 240.10c–1a (''SEA Rule 10c–1a''); Securities Exchange Act Release No. 98737 (October 13, 2023), 88 FR 75644 (November 3, 2023) (Reporting of Securities Loans) (''Adopting Release'').

[7] SEA Rule 10c–1a(j)(1) defines a ''covered person'' as (i) any person that agrees to a covered securities loan on behalf of a lender (''intermediary'') other than a clearing agency when providing only the functions of a central counterparty pursuant to Rule 17Ad–22(a)(2) of the Exchange Act or a central securities depository pursuant to Rule 17Ad–22(a)(3) of the Exchange Act; or (ii) any person that agrees to a covered securities loan as a lender when an intermediary is not used unless paragraph (j)(1)(iii) of this section applies; or (iii) a broker or dealer when borrowing fully paid or excess margin securities pursuant to Rule 15c3–3(b)(3) of the Exchange Act.

[8] SEA Rule 10c–1a(j)(2) defines a ''covered securities loan'' as a transaction in which any

provide specified information to a registered national securities association (''RNSA'').[9] The RNSA is then required to make publicly available information regarding reported securities loans, as described in SEA Rule 10c–1a.[10] In its Adopting Release, the Commission stated its belief that SEA Rule 10c–1a would increase transparency in the securities lending market, resulting in a reduction in the information disadvantage faced by end borrowers and beneficial owners, improve price discovery, increase competition among providers of securities lending analytics services, reduce costs associated with tracking market conditions for broker-dealers and lending programs, and improve decision-making by investors, beneficial owners, and other market participants.[11]

SEA Rule 10c–1a(f) requires an RNSA that is collecting the information required to be reported under the rule to implement rules regarding the format and manner of its collection of information described in paragraphs 10c–1a(c) through 10c–1a(e) of SEA Rule 10c–1a and make publicly available such information in accordance with rules promulgated by the RNSA pursuant to Section 19(b) of the Exchange Act and Rule 19b–4 thereunder. In accordance with this requirement, on May 1, 2024, FINRA filed with the Commission a proposed rule change to adopt the new FINRA Rule 6500 Series (Securities Lending and Transparency Engine (SLATE)) to establish reporting requirements for Covered Securities Loans[12] and to provide for the public dissemination of loan information.[13]

In its Adopting Release, the Commission recognized that an RNSA would incur costs to develop and maintain systems to comply with the covered securities loan reporting and data dissemination requirements of SEA Rule 10c–1a[14] and expressly permitted an RNSA to establish and collect reasonable fees pursuant to rules established under Section 19(b) of the Exchange Act and Rule 19b–4 thereunder.[15] The purpose of this proposed rule change is to establish a SLATE fee structure to allow FINRA to recover reasonably estimated incremental direct ongoing costs associated with complying with SEA Rule 10c–1a.[16]

Among other things, the SLATE Proposal would establish the requirements for reporting Initial Covered Securities Loans[17] and Loan Modifications[18] to SLATE and would require that such reports be submitted to FINRA timely, accurately, and completely.[19] In the SLATE Proposal, FINRA stated its intention to file separately a proposed rule change to establish covered securities loan reporting fees and to establish securities loan data products with associated fees.[20] The SLATE Proposal also provided that FINRA would make specified securities loan information available on its website free of charge for personal, non-commercial purposes only.[21] In the instant filing, FINRA proposes to establish such reporting fees and to establish SLATE data products with associated fees, as described below.

(ii) Proposed Rule Change

FINRA is proposing to establish new Rule 7720 to provide for reporting fees for: (1) SLATE system connectivity; (2) Initial Covered Securities Loan reporting; (3) Loan Modification reporting; (4) late reporting; and (5) reporting cancellations, corrections, and deletions. Rule 7720 also establishes data products with associated fees for SLATE Loan-Level Data and Daily Loan Statistics;[22] and Historic SLATE Data.[23]

SLATE Reporting Fees

Previously proposed new Rule 6530(a) would establish the requirements relating to the reporting of Initial Covered Securities Loans to SLATE. Proposed Rule 7720(b)(1) provides that, for each such Initial Covered Securities Loan report, a SLATE Participant will be subject to a reporting fee of $0.07 per submission. Previously proposed new Rule 6530(b) would establish the requirements relating to the reporting of Covered Securities Loan Modifications to SLATE. Proposed Rule 7720(b)(2) provides that, for each such Loan Modification report, a SLATE Participant will be subject to a reporting fee of $0.03 per submission.

Proposed Rule 7720 also establishes fees for the reporting of cancellations, corrections, and deletions of previously submitted Covered Securities Loans and for the late submission of Initial Covered Securities Loan and Loan Modification reports, which is consistent with the requirement that Covered Persons report timely, accurately, and completely to SLATE,[24] and facilitates the dissemination of accurate and complete information to regulators and the public.[25] Specifically,

person on behalf of itself or one or more other persons, lends a reportable security to another person, with exclusions for a position at a clearing agency that results from central counterparty services pursuant to Rule 17Ad–22(a)(2) of the Exchange Act or central securities depository services pursuant to Rule 17Ad–22(a)(3) of the Exchange Act, and the use of margin securities, as defined in Rule 15c3–3(a)(4) of the Exchange Act, by a broker or dealer. ''Reportable security'' is defined in SEA Rule 10c–1a(j)(3) as any security or class of an issuer's securities for which information is reported or required to be reported to the consolidated audit trail as required by § 242.613 of the Exchange Act and the CAT NMS Plan (''CAT''), the Financial Industry Regulatory Authority's Trade Reporting and Compliance Engine (''TRACE''), or the Municipal Securities Rulemaking Board's Real-Time Transaction Reporting System (''RTRS''), or any reporting system that replaces one of these systems.

[9] SEA Rule 10c–1a(j)(5) defines an ''RNSA'' as an association of brokers and dealers that is registered as a national securities association pursuant to 15 U.S.C. 78*o*–3 of the Exchange Act. FINRA currently is the only RNSA.

[10] *See* SEA Rule 10c–1a(g).

[11] *See* Adopting Release, 88 FR 75644, 75692.

[12] A ''Covered Securities Loan'' means a ''covered securities loan'' as defined in SEA Rule 10c1–a(j)(2).

[13] *See* Securities Exchange Act Release No. 100046 (May 1, 2024); 89 FR 38203 (May 7, 2024) (Notice of Filing of File No. SR–FINRA–2024–007) (Proposed Rule Change to Adopt the FINRA Rule 6500 Series (Securities Lending and Transparency Engine)) (''SLATE Proposal'').

[14] *See* Adopting Release, 88 FR 75644, 75717.

[15] *See* Adopting Release, 88 FR 75644, 75648.

[16] FINRA does not have regulatory authority over Covered Persons or Reporting Agents that are non-FINRA members. As FINRA does today, FINRA would refer to the SEC potential violations of the federal securities laws and rules by non-members, including failures to comply with SEA Rule 10c–1a and FINRA rules adopted pursuant to SEA Rule 10c–1a (*e.g.,* potential SLATE reporting violations or failures to pay when due any SLATE fees).

[17] ''Initial Covered Securities Loan'' means a new Covered Securities Loan not previously reported to SLATE. *See* proposed Rule 6510(d).

[18] ''Loan Modification'' means a change to any Data Element with respect to a Covered Securities Loan (irrespective of whether such Covered Securities Loan was previously reported to SLATE). *See* proposed Rule 6510(e).

[19] *See* proposed Rule 6530(c)(1); *see also* SLATE Proposal, 89 FR 38203, 38210.

[20] *See* SLATE Proposal, 89 FR 38203, 38206.

[21] *See* SLATE Proposal, 89 FR 38203, 38212 n.80. The SLATE data that FINRA will make available (pursuant to FINRA Rule 6540.02) will be displayed (viewable) free of charge on the FINRA website for personal, non-commercial purposes and will not be available in downloadable form through this means. Persons interested in receiving from FINRA downloadable files of SLATE data must subscribe to the appropriate data product made available pursuant to proposed Rule 7720.

[22] ''SLATE Loan-Level Data and Daily Loan Statistics'' means the data described in proposed Rule 6540(a) through (c).

[23] ''Historic SLATE Data'' means SLATE Loan-Level Data and Daily Loan Statistics from the beginning of SLATE data reporting through the end of the most recent calendar year.

[24] *See* proposed Rule 6530(c)(1). Proposed Rule 6530(c)(2) further provides that a member's pattern or practice of late reporting without exceptional circumstances may be considered conduct inconsistent with high standards of commercial honor and just and equitable principles of trade, in violation of FINRA Rule 2010. *See* SLATE Proposal, 89 FR 38203, 38210.

[25] ''[SEA Rule 10c–1a] is designed to provide access to timely, comprehensive securities loan information to market participants, the public, and

Continued

pursuant to proposed Rule 7720(b)(3), a SLATE Participant will be charged a cancel,[26] correct,[27] or delete[28] fee of $0.10 per canceled, corrected, or deleted Covered Securities Loan report. In addition, proposed Rule 7720(b)(4) establishes a late fee of $0.20 per Initial Covered Securities Loan report or Loan Modification report that is not timely reported to SLATE as required pursuant to the Rule 6500 Series.[29]

Proposed Rule 7720 also sets forth the fees for connecting to SLATE. Specifically, proposed Rule 7720(a) provides that a SLATE Participant may choose to report Covered Securities Loans to FINRA pursuant to the Rule 6500 Series either via: (1) the SLATE web browser; or (2) a third-party reporting intermediary (and such third party must use the SLATE web browser). The fee for connecting to the SLATE web browser is $25 per month per user ID and will be assessed for connecting to SLATE through the browser, whether a Covered Person Reporting Agent, or other third party.[30]

SLATE Loan-Level Data and Daily Loan Statistics

FINRA is proposing Rule 7720(c) to establish the SLATE Loan-Level Data and Daily Loan Statistics data product with associated fees. As defined in Rule 7720(e)(2), ''SLATE Loan-Level Data and Daily Loan Statistics'' means the data described in proposed Rule 6540 (Dissemination of Loan Information) paragraph (a), which addresses next-day dissemination;[31] paragraph (b), which addresses delayed dissemination;[32] and paragraph (c), which addresses daily loan statistics (*i.e.,* aggregate loan transaction activity[33] and loan rate distribution data[34]). Proposed Rule 7720(c) sets forth the fees applicable to subscribers that are persons and organizations other than qualifying Tax-Exempt Organizations[35] and subscribers that are qualifying Tax-Exempt Organizations. Recipients of the SLATE Loan-Level Data and Daily Loan Statistics product described herein will be required to execute appropriate agreements with FINRA to subscribe to SLATE Loan-Level Data and Daily Loan Statistics.

Under proposed Rule 7720(c)(1)(A), a fee of $3,000 per month will apply for daily receipt of the SLATE Loan-Level Data and Daily Loan Statistics, except for qualifying Tax-Exempt Organizations. The data is enabled for unlimited internal use through any number of display applications; separate fees and uses apply to qualifying Tax-Exempt Organizations (as discussed below). As further provided in proposed Rule 7720(c)(1)(A), the fee of $3,000 per month entitles subscribers to use SLATE Loan-Level Data and Daily Loan Statistics in one or more of the following ways: internal operational and processing systems, internal monitoring and surveillance systems, internal price validation, internal portfolio valuation services, internal analytical programs leading to purchase/sale or other trading decisions, and other related activities, and the repackaging of market data for delivery and dissemination outside the organization, such as indices or other derivative products. Bulk redistribution of SLATE Loan-Level Data and Daily Loan Statistics[36] is not permitted under this subscription type, which is limited to internal use. In addition, any derivative products shall not permit end users to determine underlying SLATE Loan-Level Data and Daily Loan Statistics.

Under proposed Rule 7720(c)(1)(B), a vendor display redistribution fee of $10,000 per month will apply for the display of SLATE Loan-Level Data and Daily Loan Statistics through any number of external display applications. However, bulk redistribution of SLATE Loan-Level Data and Daily Loan Statistics is not permitted. Therefore, any party wishing to receive a distribution of SLATE Loan-Level Data and Daily Loan Statistics files must subscribe directly with FINRA.

Proposed Rule 7720(c)(2) establishes a monthly fee of $1,500 applicable to qualifying Tax-Exempt Organizations for the daily receipt of SLATE Loan-Level Data and Daily Loan Statistics. FINRA is establishing a fee level for qualifying Tax-Exempt Organizations that is half of the fee that will be assessed on parties other than qualifying Tax-Exempt Organizations. The data is enabled for unlimited internal use. A Tax-Exempt Organization qualifies to receive SLATE Loan-Level Data and Daily Loan Statistics if it does not redistribute such data in bulk, or it redistributes such data in bulk or otherwise (*e.g.,* unlimited external display) at no charge solely to other

regulators, which will help provide borrowers and lenders with better tools to assess the terms of their securities loans and enhance the ability of regulators to oversee the securities lending market.'' Adopting Release, 88 FR 75644, 75648.

[26] A ''cancellation'' is used to remove a single event from the SLATE system. *See* Draft SLATE Participant Reporting Specifications, available at *https://www.finra.org/filing-reporting/slate.*

[27] A ''correction'' is used to replace fields in a prior reported event. *See* Draft SLATE Participant Reporting Specifications, available at *https://www.finra.org/filing-reporting/slate.*

[28] A ''deletion'' is used to remove an entire loan and all corresponding loan events (*i.e.,* modifications, corrections, etc.). *See* Draft SLATE Participant Reporting Specifications, available at *https://www.finra.org/filing-reporting/slate.*

[29] While FINRA will seek to address late or inaccurate SLATE reporting through its customary means, FINRA believes it is appropriate to establish fees to promote timely and accurate reporting. *See also* SLATE Proposal, 89 FR 38203, 38206 n.17.

[30] The $25 per month fee for connecting to the SLATE web browser is assessed per user (not per entity). Therefore, a single SLATE Participant will be charged $25 per month times the number of users that it determines to authorize for connecting to SLATE through the browser for SLATE reporting. This connectivity fee is not applicable to, or assessed on, SLATE data product subscribers for the purposes of receiving SLATE data.

[31] SLATE data that is subject to next day dissemination generally consists of the data set forth in Rule 6540(a): (1) the unique identifier assigned by FINRA to the loan; (2) the security identifier(s) specified in Rule 6530(a)(2)(A) or (B) that FINRA determines is appropriate to disseminate; (3)(a) for each Initial Covered Securities Loan, all other Data Elements reported to SLATE, except the amount of securities loaned and confidential data elements; (b) for each Loan Modification, the modified Data Elements reported to SLATE, except the amount of securities loaned and confidential data elements; or (c) for each Loan Modification to a Covered Securities Loan that was not previously required to be reported to SLATE, all other Data Elements reported to SLATE, except the amount of securities loaned and confidential data elements.

[32] SLATE data that is subject to delayed dissemination (20 business days after the date on which the Initial Covered Securities Loan was effected or the loan was modified) generally consists of the data set forth in Rule 6540(b): (1) the unique identifier assigned by FINRA to the Covered Securities Loan; (2) the security identifier(s) specified in Rule 6530(a)(2)(A) or (B) that FINRA determines is appropriate to disseminate; and (3) the amount of securities loaned reported to SLATE.

[33] Aggregate loan transaction activity data generally consists of the data set forth in Rule 6540(c)(1); specifically, the security identifier specified in Rule 6530(a)(2)(A) or (B) that FINRA determines is appropriate to disseminate and the aggregate volume of securities subject to an Initial Covered Securities Loan or modification to the amount of Reportable Securities loaned, reported on the prior business day.

[34] Loan rate distribution data generally consists of: (1) the security identifier specified in Rule 6530(a)(2)(A) or (B) that FINRA determines is appropriate to identify the relevant Reportable Security; (2) the highest rebate rate, lowest rebate rate, and volume weighted average of the rebate rates by U.S. currency and non-U.S. currency, as applicable, reported for Initial Covered Securities Loans collateralized by cash and for Loan Modifications collateralized by cash (where the Loan Modification involved a change to the rebate rate); and (3) the highest lending fee or rate, lowest lending fee or rate, and volume weighted average of the lending fees or rates reported for Initial Covered Securities Loans not collateralized by cash and for Loan Modifications not collateralized by cash (where the Loan Modification involved a change to the lending fee or rate).

[35] A ''Tax-Exempt Organization'' means an organization that is described in Section 501(c) of the Internal Revenue Code (26 U.S.C. 501(c)) and has received recognition of the exemption from federal income taxes from the Internal Revenue Service. *See* Proposed Rule 7720(e)(3).

[36] Bulk redistribution of SLATE data refers to the redistribution of the SLATE data files described in proposed Rule 7720. Bulk redistribution of SLATE data generally is not permitted, except for qualifying Tax-Exempt Organizations, subject to specified restrictions, as described in proposed Rule 7720(c)(2) and (d)(2).

Tax-Exempt Organizations that agree to be subject to the same restrictions.

Historic SLATE Data

FINRA also is proposing Rule 7720(d) to establish the Historic SLATE Data product with associated fees. As defined in Rule 7720(e)(1), ''Historic SLATE Data'' means ''SLATE Loan-Level Data and Daily Loan Statistics'' from the beginning of SLATE data reporting (currently scheduled to commence on January 2, 2026) through the end of the most recent calendar year. Historic SLATE Data will be made available within one month of year-end (*e.g.,* Historic SLATE Data for calendar year 2026 will be available by January 31, 2027; Historic SLATE Data for calendar year 2027 will be available by January 31, 2028, and so on). Proposed Rule 7720(d) sets forth the fees for Historic SLATE Data applicable to subscribers that are persons and organizations other than qualifying Tax-Exempt Organizations, and subscribers that are qualifying Tax-Exempt Organizations. Recipients of the Historic SLATE Data product described herein will be required to execute appropriate agreements with FINRA.

Under proposed Rule 7720(d)(1)(A), a single fee of $2,000 will apply to persons or organizations other than qualifying Tax-Exempt Organizations for development and set-up to begin receiving Historic SLATE Data. The set-up fee is a one-time fee. Proposed Rule 7720(d)(1)(B) provides that a fee of $5,000 per calendar year will apply for receipt of Historic SLATE Data, except for qualifying Tax-Exempt Organizations. The data is enabled for unlimited internal use through any number of display applications. As further provided in proposed Rule 7720(d)(1)(B), the fee of $5,000 per calendar year entitles persons or organizations other than qualifying Tax-Exempt Organizations to use Historic SLATE Data in one or more of the following ways: internal operational and processing systems, internal monitoring and surveillance systems, internal price validation, internal portfolio valuation services, internal analytical programs leading to purchase/sale or other trading decisions, and other related activities, and the repackaging of market data for delivery and dissemination outside the organization, such as indices or other derivative products. Bulk redistribution of Historic SLATE Data is not permitted under this subscription type, which is limited to internal use. In addition, any derivative products shall not permit end users to determine underlying SLATE Loan-Level Data and Daily Loan Statistics.

Proposed Rule 7720(d)(2) establishes the fees applicable to qualifying Tax-Exempt Organizations for receipt of Historic SLATE Data. A Tax-Exempt Organization qualifies to receive Historic SLATE Data if it does not redistribute such data in bulk, or it redistributes such data in bulk or otherwise at no charge solely to other Tax-Exempt Organizations that agree to be subject to the same restrictions. Under proposed Rule 7720(d)(2)(A), a single fee of $1,000 will apply to any qualifying Tax-Exempt Organization for development and set-up to begin receiving Historic SLATE Data. The set-up fee is a one-time fee and was established to amount to half of the fee that would be assessed on parties other than qualifying Tax-Exempt Organizations for data set up. Proposed Rule 7720(d)(2)(B) provides that a fee of $2,500 per calendar year will apply to any qualifying Tax-Exempt Organization for receipt of Historic SLATE Data, which is half of the fee that would be assessed on parties other than qualifying Tax-Exempt Organizations for these data. Historic SLATE Data is enabled for unlimited internal use and may be redistributed by a qualifying Tax-Exempt Organization in bulk or otherwise (*e.g.,* unlimited external display) subject to the restrictions in paragraph (d)(2) (*i.e.,* redistributed at no charge solely to other Tax-Exempt Organizations that agree to be subject to the same restrictions prescribed in the rule).

SLATE Cost Recovery

As further discussed below in the Economic Impact Assessment, the proposed fees described herein are designed to permit FINRA to recover costs associated with the operation of the SLATE program, as expressly permitted for an RNSA under the Exchange Act and SEA Rule 10c–1a.[37] FINRA currently estimates an average of approximately $4.5 million in incremental direct ongoing costs per year from 2026 through 2028 (including the incremental direct ongoing costs incurred in 2024 and 2025 to be recovered over the 3-year period),[38] and approximately $4.4 million in annual incremental direct ongoing costs thereafter. In an effort to make SLATE financially self-sustaining on an ongoing basis, the proposed fees are designed to generate an amount of revenue that is calibrated to align with the estimated incremental direct ongoing costs associated with the SLATE program, to enable FINRA to meets its obligations pursuant to the SEA Rule 10c–1a mandate, as further described below.

Specifically, FINRA's incremental direct costs associated with operating the SLATE program include costs for cloud resources (compute and storage), data validation, business rule processing, reference data, data dissemination, billing generation, technology operations monitoring and support, and alert escalation and remediation. Additional costs include staffing related to product management, application management, ongoing business and operational support for the user interface, and administration of participant information and applicable agreements.[39]

FINRA intends to reassess the SLATE reporting fees and data products and associated fees after the commencement of SLATE reporting and dissemination and obtaining additional information regarding reporting volumes and subscription interest. To the extent that FINRA determines that a change to the SLATE fee structure would be appropriate to better align SLATE revenues with the incremental direct ongoing costs incurred in connection with the SLATE program, FINRA would file a proposed rule change with the Commission pursuant to Section 19(b) of the Exchange Act and Rule 19b–4 thereunder.

FINRA has filed the proposed rule change for immediate effectiveness. The Commission's release adopting SEA Rule 10c–1a specified the compliance dates applicable to securities loan reporting and data dissemination.[40] Accordingly, if the Commission approves FINRA's proposed rules establishing the reporting and dissemination requirements, unless an extension is provided pursuant to Commission order, the implementation date of the proposed FINRA rules establishing the securities loan reporting fees will correspond to the commencement of reporting to SLATE, and the implementation date of the proposed FINRA rules establishing the securities loan data products with associated fees will correspond to the commencement of SLATE data

[37] *See* 10c–1a(i); *see also* Adopting Release 88 FR 75644, 75687.

[38] While SEA Rule 10c–1a does not require that securities loan reporting commence until January 2026 or that loan data dissemination commence until April 2026, FINRA has necessarily already begun making financial expenditures in response to the SEC's adoption of Rule 10c–1a so that FINRA will be positioned to comply with all of the obligations applicable to an RNSA under that rule.

[39] To the extent possible, FINRA will leverage existing systems, personnel, and processes in connection with FINRA's SLATE program consistent with FINRA's structure as a not-for-profit self-regulatory organization.

[40] *See supra* note 6.

dissemination. If the SEC extends the compliance dates for SEA Rule 10c–1a's reporting or dissemination requirements, FINRA's proposed rules addressing covered securities loan reporting fees and securities loan data products with associated fees would become effective consistent with the SEC's extended timeframe for reporting and data dissemination, respectively.

2. Statutory Basis

FINRA believes that the proposed rule change is consistent with the provisions of Section 15A(b)(5) of the Act, which requires, among other things, that FINRA rules provide for the equitable allocation of reasonable dues, fees, and other charges among members and issuers and other persons using any facility or system that FINRA operates or controls.[41] FINRA also believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act, which requires, among other things, that FINRA rules are not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.[42]

Consistent with Section 984(b) of the Dodd-Frank Act, which mandates that the Commission increase the transparency of information available to brokers, dealers, and investors regarding securities loan activity, on October 13, 2023, the Commission adopted SEA Rule 10c–1a.[43] SEA Rule 10c–1a requires a Covered Person who agrees to a Covered Securities Loan to provide specified information to an RNSA.[44] The RNSA that is collecting the information required to be reported under the rule is then required to make publicly available information regarding reported securities loans, as described in SEA Rule 10c–1a.[45] Because FINRA is an RNSA, FINRA proposed to adopt the SLATE rules and is building a system (the proposed SLATE system) to which Covered Securities Loan information would be reported. SEA Rule 10c–1a sets forth other related requirements for an RNSA, as described in SEA Rule 10c–1a and the Adopting Release.[46] These mandates increase costs to FINRA, as an RNSA, that necessitate funding.

Section 15A(b)(2) of the Act requires that an RNSA be ''so organized and [have] the capacity to be able to carry out the purposes'' of the Act and ''to comply, and . . . to enforce compliance by its members and persons associated with its members,'' with the provisions of the Exchange Act.[47] FINRA therefore believes it is consistent with the Act that FINRA impose reasonable fees that are designed to support FINRA with regard to expenditures to meet its regulatory obligations in connection with the securities loan reporting and transparency initiative. In addition, FINRA notes that SEA Rule 10c–1a itself explicitly provides that the RSNA may establish and collect reasonable fees, pursuant to rules that are promulgated pursuant to Section 19(b) and Rule 19b–4 of the Exchange Act.[48]

As discussed above, and further below in the Economic Impact Assessment, FINRA is establishing a fee structure to implement reasonable fees relating to the SLATE program; specifically: (1) SLATE system connectivity fees; (2) fees in connection with reporting Covered Securities Loan information to SLATE; and (3) SLATE data products and associated fees. The fees being proposed herein are reasonable, including because they are designed to generate an amount of revenue that is calibrated to align with the estimated incremental direct ongoing costs associated with the SLATE program and to enable FINRA to meet its regulatory obligations.

FINRA believes it is equitable, reasonable, and consistent with the Exchange Act that the proposed SLATE system connectivity and reporting fees be assessed directly on the parties that have been designated by the Commission as bearing the underlying regulatory responsibility for reporting securities loan information to an RNSA—*i.e.,* Covered Persons that report to the SLATE system (and their agents).[49] In the Adopting Release, the Commission stated that ''. . . RNSAs may establish and collect reasonable fees, pursuant to rules that are effective pursuant to section 19(b) of the Exchange Act and Rule 19b–4 thereunder, from each person who provides any data set forth in paragraphs (b) through (e) of this section directly to an RNSA.'' [50] The Adopting Release also stated that ''[t]the final rule will also impose direct costs on an RNSA responsible for collecting, maintaining, and distributing the data, who may pass on these costs by imposing fees on entities that provide Rule 10c–1a information to an RNSA and/or consumers of Rule 10c–1a data.'' [51]

FINRA also believes that it is equitable, reasonable, and consistent with the Exchange Act to require that the parties reporting data to SLATE be directly responsible for paying SLATE fees because the reporting process is a primary driver of the costs that the proposed fees are intended to recover. Thus, assessing the SLATE system connectivity and reporting fees on Covered Persons (and their agents) aligns the direct responsibility for SLATE cost recovery with the parties generating the information collection costs.[52]

The proposed SLATE data products are offered on equal terms to similarly situated parties that choose to access the data products. Thus, FINRA believes that the proposed SLATE data fees are not designed to permit unfair discrimination between customers, issuers, brokers, or dealers, as provided for in Section 15A(b)(6).[53] Under the proposal, with one exception (qualifying Tax-Exempt Organizations), the content of the information in the data products and the data products' usage rights are offered on the same terms to interested parties. Thus, any party (except for a qualifying Tax-Exempt Organization) that seeks to access SLATE Loan-Level Data and Daily Loan Statistics will pay a fee depending upon whether such party seeks the right to use the data solely internally, as described in

[44] *See* SEA Rule 10c1–a(a)(1).

[45] *See* SEA Rule 10c–1a(g).

[46] As noted above, SEA Rule 10c–1a anticipates that an RNSA will propose rules consistent with the Commission's mandate. *See* SEA Rule 10c–1a(i). Section 984(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (''Dodd-Frank Act'') added section 10(c)(1) to the Exchange Act to provide the Commission with authority over securities lending. *See* 15 U.S.C. 78j(c)(1). Section 984(b) of the Dodd-Frank Act mandates that the Commission increase the transparency of information available to brokers, dealers, and investors with respect to the loan or borrowing of securities. *See* Public Law 111–203, 124 Stat. 1376 (2010).

[47] 15 U.S.C. 78*o*–3(b)(2).

[48] *See* SEA Rule 10c–1a(i).

[49] ''Under the Exchange Act, RNSAs are allowed to adopt rules that impose the equitable allocation of reasonable fees among members and issuers, and other persons that use an RNSA facility or system.'' (citation omitted). *See* Adopting Release, 88 FR 75644, 75687.

[50] *See* Adopting Release, 88 FR 75644, 75687.

[51] *See* Adopting Release, 88 FR 75644, 75693.

[52] FINRA understands that many members shift at least some of the regulatory fees incurred to other parties. For instance, it is regular practice among clearing and trading firms to ''pass through'' the Trading Activity Fee (''TAF'') to the underlying firm executing the trade. Further, FINRA understands that executing firms commonly pass the TAF directly on to their customers. *See* Securities Exchange Act Release No. 90176 (October 14, 2020), 85 FR 66592, 66603 (October 20, 2020) (Notice of Filing and Immediate Effectiveness of File No. SR–FINRA–2020–032). ''The entities that provide Rule 10c–1a information to an RNSA may absorb these costs in the form of lower profits or may pass them on to their customers in the form of increased fees for broker-dealer services or lending program services.'' *See* Adopting Release 88 FR 75644, 75693.

[53] 15 U.S.C. 78*o*–3(b)(6).

proposed Rule 7720(c)(1)(A) ($3,000 per month), or whether such party seeks the right to display the data externally, as described in proposed Rule 7720(c)(1)(B) ($10,000 per month).[54] The higher fee of $10,000 per month proposed in Rule 7720(c)(1)(B) is not unfairly discriminatory (as compared to the $3,000 per month fee for internal use only) given the significantly expanded usage rights authorized under proposed Rule 7720(c)(1)(B), which permits the display of SLATE Loan-Level Data and Daily Loan Statistics through any number of external display applications.[55] All interested parties (except qualifying Tax-Exempt Organizations) will be assessed the same fee, with the same usage rights, for Historic SLATE Data.

Proposed Rule 7720 would apply a lower fee to qualifying Tax-Exempt Organizations for both the SLATE Loan-Level Data and Daily Loan Statistics as well as the Historic SLATE Data. As is the case with other data products offered by FINRA, *e.g.,* TRACE,[56] FINRA offers data products at a reduced fee to qualifying Tax-Exempt Organizations that have received recognition of the exemption from federal income taxes from the Internal Revenue Service.[57] In the proposed rule change, FINRA has established the proposed fees applicable to qualifying Tax-Exempt Organizations as half of the amounts that will be assessed to parties other than qualifying Tax-Exempt Organizations. FINRA also notes that Tax-Exempt Organizations only qualify for the reduced fees offered under the rule if they do not redistribute the data in bulk, or redistribute the data in bulk or otherwise at no charge solely to other Tax-Exempt Organizations that agree to be subject to the same restrictions.[58] FINRA believes this aspect of the proposed rule change is appropriate given the not-for-profit nature of such organizations and therefore is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers, as provided for in Section 15A(b)(6).[59]

FINRA also believes that the amounts of the proposed SLATE fees are equitable, reasonable, and consistent with the Exchange Act. As further discussed in the Economic Impact Assessment, in developing reporting activity estimates, FINRA used data gathered through outreach to industry participants, including data vendors, agent lenders, prime brokers, retail brokers, and beneficial owners. FINRA believes that the proposed SLATE data subscription fees also are reasonable given the usage rights and the use cases for the data. Because the proposed SLATE data products are a new product offering, it is difficult to estimate subscription levels and associated revenue. In addition, based on FINRA's experience, subscribership to data products may be slower initially, with interest building over time. As a result, FINRA has initially sought to rely primarily on revenues through SLATE reporting to offset the costs that FINRA seeks to recover in connection with the SEA Rule 10c–1a mandate. As such, the proposed fees generally are consistent with FINRA's efforts to align its operating expenses with its operating revenues, target break-even cash flows, and continue to responsibly manage expenses driven by mandatory initiatives in a manner consistent with FINRA's public Financial Guiding Principles.[60] The proposed SLATE fees will be applied consistently to all similarly situated parties that are required to report Covered Securities Loans (and their agents) (*i.e.,* SLATE Participants) and to those that choose to subscribe to SLATE data products.[61]

For the reasons discussed herein, FINRA believes that the proposed rule change is consistent with Section 15A(b)(5) of the Exchange Act, including that the proposal provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system that FINRA operates or controls.[62] FINRA likewise believes that the proposed rule change is consistent with Section 15A(b)(6) of the Act, which requires, among other things, that FINRA rules are not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.[63]

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 15A(b)(9) of the Act requires that FINRA's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act.[64] FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Economic Impact Assessment

FINRA has undertaken an economic impact assessment, as set forth below, to analyze the regulatory need for the proposed rule change, its potential economic impacts, including distributional and competitive effects, and the alternatives considered in assessing how to best meet FINRA's regulatory objectives. The regulatory need is discussed above.

Economic Baseline

In its Adopting Release, the SEC estimated that 609 Covered Persons and Reporting Agents would be affected by SEA Rule 10c–1a, of which 255 were Providing Covered Persons, 248 were Non-Providing Covered Persons, and 106 were Reporting Agents.[65] FINRA has estimated that approximately 125,000 Initial Covered Securities Loan reports and 200,000 Loan Modification reports per day may be reported to SLATE.[66] FINRA estimates that approximately 0.5% of Initial Covered Securities Loan reports and Loan Modification reports could result in corrections, cancellations, or deletions, and approximately 0.5% could be reported late.[67] FINRA anticipates that the volume of erroneous and late reports

[54] *See* proposed Rule 7720(c)(1)(A)–(B).

[55] *See* proposed Rule 7720(c)(1)(B).

[56] *See* Rule 7730(d)(1)(B).

[57] *See* supra note 35.

[58] *See* proposed Rule 7720(c)(2) and (d)(2).

[59] 15 U.S.C. 78*o*–3(b)(6).

[60] *See* FINRA's Financial Guiding Principles, *https://www.finra.org/sites/default/files/finra_financial_guiding_principles_0.pdf.* As discussed above, FINRA intends to reassess the SLATE reporting fees and data products and associated fees after gaining experience with the operation of SLATE and obtaining additional information regarding reporting volumes and subscription interest. To the extent that FINRA determines that a change to the SLATE fee structure would be appropriate to better align SLATE revenues with the incremental direct ongoing costs incurred in connection with the SLATE program, FINRA would file a proposed rule change with the Commission pursuant to Section 19(b) of the Exchange Act and Rule 19b–4 thereunder.

[61] The proposed data products will be offered on the same terms to any similarly situated party that seeks to subscribe.

[62] 15 U.S.C. 78*o*–3(b)(5).

[63] 15 U.S.C. 78*o*–3(b)(6).

[64] 15 U.S.C. 78*o*–3(b)(9).

[65] ''Providing Covered Persons'' would provide information directly to an RNSA while ''Non-Providing Covered Persons'' would use a reporting agent to provide information to an RNSA. *See* Adopting Release, 88 FR 75644, 75718. ''Reporting Agent'' is defined in SEA Rule 10c–1a(j)(4).

[66] The quantity of Loan Modification reports will be impacted by Covered Persons' reporting decisions, among other factors. For example, the extent to which Covered Persons choose to report rates as a spread to benchmark will affect the quantity of Loan Modification reports due to be reported, which in turn will impact fee revenues.

[67] This estimate is based on FINRA's experience with TRACE reporting. As of August 2024, the correction rate was approximately 0.8% for corporate bond reports and 0.68% for U.S. Treasury reports. The rate of late reports was 0.61% for corporate bonds and 0.42% for U.S. Treasury Securities. The correction and late reporting rates may be lower for SLATE reporting because proposed Rule 6530 generally provides a longer timeframe for reporting Covered Securities Loans to SLATE than is provided for corporates and U.S. Treasury Securities under the TRACE reporting regime.

will decrease over time as Covered Persons gain experience with SLATE reporting.

Economic Impacts

The economic impact of the currently proposed reporting fees, data products and associated subscription fees are discussed below.

SLATE Reporting Fees

As discussed above, Covered Persons will incur fees for reporting Initial Covered Securities Loans and Loan Modifications. Specifically, FINRA proposes that, for each Initial Covered Securities Loan report, a SLATE Participant will be subject to a fee of $0.07 per submission and for each Loan Modification report, a SLATE Participant will be subject to a fee of $0.03 per submission. FINRA also proposes that a SLATE Participant will be charged a cancel, correct, or delete fee of $0.10 per canceled, corrected, or deleted Covered Securities Loan report, and a late fee of $0.20 per Initial Covered Securities Loan or Loan Modification that is not reported timely to SLATE.

Developing estimates for the anticipated number and type of SLATE reports is challenging due to the availability of only limited information upon which to base estimates. In developing estimates, FINRA used data gathered through outreach to industry participants, including data vendors, agent lenders, prime brokers, retail brokers, and beneficial owners. These estimates were used to develop the proposed fee structure, which is intended to align SLATE revenues with the incremental direct ongoing costs incurred in connection with the SLATE initiative.

Given the estimated number of reports and proposed reporting fees discussed above, FINRA approximates that annual revenues from reporting fees would be $2,205,000 for Initial Covered Securities Loan reports,[68] $1,512,000 for Loan Modification reports,[69] $40,950 for corrections, cancellations, and deletions,[70] and $81,900 for late reports.[71] SLATE Participants will incur a $25 fee per user per month for connecting to the SLATE web browser. Given the estimated number of Covered Persons and Reporting Agents from the SEC's Adopting Release,[72] FINRA estimates the total connection fees per year would be $365,400.[73] Together, FINRA estimates SLATE reporting fees would total $4,205,250 per year.[74]

FINRA considered the potential impact of the proposed SLATE reporting fee structure on securities lending activities. Covered Persons' securities lending activities will impact the amount of reporting fees that they would incur. Some types of Covered Persons, such as lending agents, may incur relatively larger reporting fees compared to other Covered Persons due to their function in the securities lending market (*e.g.,* agent lenders generally transact as Covered Persons in higher volumes relative to other securities lending market participants). Lending agents may pass along fully or partially the reporting fees to beneficial owners, for instance, in the form of a direct charge or higher fees charged for lending services. The reporting fees also may affect how Covered Persons structure or conduct their securities lending business—*e.g.,* how lending agents determine to structure pool or lending programs. However, Covered Persons' choices are also affected by other factors, including counterparty risk and business models.

SLATE Data Products and Associated Fees

As described above, FINRA is proposing to establish SLATE data products and associated fees.[75] Specifically, FINRA is proposing to make SLATE Loan-Level Data and Daily Loan Statistics available on a subscription basis to qualifying Tax-Exempt Organizations (for $1,500/month) as well as to persons and organizations other than qualifying Tax-Exempt Organizations (for $3,000/month). Also as described above, vendors may subscribe to display externally SLATE Loan-Level Data and Daily Loan Statistics (for $10,000/month). The proposed SLATE data products will enable a broader range of market participants to access comprehensive securities lending data than would otherwise be available in the absence of the proposed data products, which will further enhance market transparency and efficiency. As discussed in the Adopting Release, the broader availability of securities lending information may lead to increased competition for data analytics services as the barriers to entry for providing such services decline and new entrants compete to provide analytics services.[76]

The proposed fees associated with the SLATE Loan-Level Data and Daily Loan Statistics product apply only to market participants that choose to subscribe. Market participants likely will assess the costs and benefits of having access to these data as compared to their existing sources of securities lending data.[77] Vendors externally displaying SLATE Loan-Level Data and Daily Loan Statistics may charge for access to SLATE data. If vendors use securities lending data obtained from FINRA to replace existing, more expensive sources of securities lending data, they may pass some or all of the savings on to their clients.

As described above, in addition to SLATE Loan-Level Data and Daily Loan Statistics, FINRA also will make Historic SLATE Data available: (1) to qualifying Tax-Exempt Organizations (for a $1,000 set-up fee and $2,500 per calendar year); and (2) to persons and organizations other than qualifying Tax-Exempt Organizations (for a $2,000 set-up fee and $5,000 per calendar year). Historic SLATE loan information would facilitate the availability of securities lending data to interested parties, such as academics, in connection with research efforts.[78]

Given the substantial uncertainty in future subscribership for new data products and the likelihood that interest may grow slowly over time, FINRA's

[68] FINRA arrived at $2,205,000 by multiplying the estimated number of daily Initial Loan Reports (125,000) by the proposed fee rate of $0.07 by the number of business days per year (252 days).

[69] FINRA arrived at $1,512,000 by multiplying the estimated number of daily Loan Modification Reports (200,000) by the proposed fee rate of $0.03 by the number of business days per year (252 days).

[70] FINRA arrived at $40,950 by multiplying the sum of the estimated number of daily Initial Loan Reports (125,000) and the estimated number of daily Loan Modification Reports (200,000) by the estimated rate of reports requiring a correction, cancellation, or deletion (0.5%) by the proposed fee rate of $0.10 by the number of business days per year (252 days).

[71] FINRA arrived at $81,900 by multiplying the sum of the estimated number of daily Initial Loan Reports (125,000) and the estimated number of daily Loan Modification Reports (200,000) by the estimated rate of late reports (0.5%) by the proposed fee rate of $0.20 by the number of business days per year (252 days).

[72] *See* Adopting Release, 88 FR 75644, 75718.

[73] FINRA arrived at $365,400 by multiplying the estimated number of Covered Persons and Reporting Agents (609) by an assumed 2 user accounts per Covered Person by the proposed fee rate of $25 per month by 12 months per year.

[74] FINRA arrived at $4,205,250 by adding the estimated annual revenue from reporting fees for Initial Covered Securities Loan Reports ($2,205,000), the estimated annual revenue from reporting fees for Loan Modification Reports ($1,512,000), the estimated annual revenue from correction, cancellation, and deletion fees ($40,950), the estimated annual revenue from fees for late reports ($81,900), and the estimated annual revenue from connection fees ($365,400).

[75] Separate from the SLATE data products and associated fees proposed herein, FINRA intends to make T+1 data, T+20 data, and daily loan statistics available on FINRA's website free of charge for personal, non-commercial purposes only. *See supra* note 21.

[76] *See* Adopting Release, 88 FR 75644, 75712.

[77] For a discussion of the current state of transparency in securities lending, *see* Adopting Release, 88 FR 75644, 75696–75700.

[78] *See* Adopting Release, 88 FR 75644, 75705, 75717.

best and conservative estimation of potential initial future revenues from data product subscriptions is $250,000. Together with the estimated reporting fee revenues discussed above, FINRA estimates approximately $4.2 million in annual revenue from reporting fees and $250,000 in revenue from data product subscriptions for total annual revenue of approximately $4.5 million. This aligns with FINRA's estimated incremental direct ongoing costs of approximately $4.5 million per year from 2026 through 2028, and approximately $4.4 million in incremental direct ongoing costs thereafter.

Alternatives Considered

In developing the proposed rule change, FINRA considered various alternatives and the potential costs and benefits of those alternatives. Among other things, FINRA considered a volume-based reporting fee structure where reporting fees would vary depending on loan size. However, because loan size may not be proportional to the potential revenue from reportable securities loans, a volume-based reporting fee structure may create distortions in the market. For example, the ratio of lending revenue to loan volume for short-term financing or balance sheet management is generally lower than for securities lending transactions used for accessing hard-to-borrow securities. Volume-based reporting fees also could result in a substantial concentration of reporting fees on Covered Persons with a higher share of large-volume loans. Therefore, FINRA believes that a flat fee rate per report will distribute fees in a more equitable manner across market participants.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [79] and paragraph (f)(2) of Rule 19b–4 thereunder.[80] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–FINRA–2024–020 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–FINRA–2024–020. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of FINRA. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number SR–FINRA–2024–020 and should be submitted on or before December 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[81]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101699; File No. SR–SAPPHIRE–2024–36]

Self-Regulatory Organizations; MIAX Sapphire, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 402, Criteria for Underlying Securities To List and Trade Options on the iShares Bitcoin Trust (the "Trust")

November 21, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 18, 2024, MIAX Sapphire, LLC (''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Exchange Rule 402, Criteria for Underlying Securities. The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/miax-sapphire/rule-filings,* at the Exchange's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Exchange Rule 402, Criteria for Underlying Securities,[3] to allow the Exchange to list and trade options on the iShares Bitcoin Trust (the ''Trust''), designating the Trust as appropriate for options trading on the Exchange.[4] This is a competitive filing based on a similar proposal submitted by Nasdaq ISE, LLC (''ISE'') and approved by the Securities and Exchange Commission (''Commission'').[5]

Current Exchange Rule 402(i)(4) provides that securities deemed appropriate for options trading include shares or other securities (''Exchange Traded Fund Shares'') that are traded on a national securities exchange and are defined as ''NMS stock'' under Rule 600 of Regulation NMS, and that meet specified criteria enumerated in the rule. Sub Section 4 of Exchange Rule 402(i) provides that such shares or other securities:

(4) are issued by the SPDR® Gold Trust or the iShares COMEX Gold Trust or the iShares Silver Trust or the ETFS Silver Trust or the ETFS Gold Trust or the ETFS Palladium Trust or the ETFS Platinum Trust or the Sprott Physical Gold Trust.

In addition, the underlying securities and Exchange Rule 402i, including the commodity based trusts in Exchange Rule 402(i)(4), must meet the requirements of Exchange Rule 402(i), Sections i(5)(i)(A) or (B).

Proposal

The Exchange proposes to amend Exchange Rule 402(i)(4) to expand the list of securities that are appropriate for options trading on the Exchange.

Description of the Trust[6]

The shares are issued by the Trust, a Delaware statutory trust. The Trust operates pursuant to a trust agreement (the ''Trust Agreement'') between the Sponsor, BlackRock Fund Advisors (the ''Trustee'') as the trustee of the Trust and Wilmington Trust, National Association, as Delaware trustee. The Trust issues shares representing fractional undivided beneficial interests in its net assets. The assets of the Trust consist only of bitcoin, held by a custodian on behalf of the Trust except under limited circumstances when transferred through the Trust's prime broker temporarily (described below), and cash. Coinbase Custody Trust Company, LLC (the ''Bitcoin Custodian'') is the custodian for the Trust's bitcoin holdings, and maintains a custody account for the Trust (''Custody Account''); Coinbase, Inc. (the ''Prime Execution Agent''), an affiliate of the Bitcoin Custodian, is the prime broker for the Trust and maintains a trading account for the Trust (''Trading Account''); and Bank of New York Mellon is the custodian for the Trust's cash holdings (the ''Cash Custodian'' and together with the Bitcoin Custodian, the ''Custodians'') and the administrator of the Trust (the ''Trust Administrator''). Under the Trust Agreement, the Trustee may delegate all or a portion of its duties to any agent, and has delegated the bulk of the day to day responsibilities to the Trust Administrator and certain other administrative and record-keeping functions to its affiliates and other agents. The Trust is not an investment company registered under the Investment Company Act of 1940, as amended.

The investment objective of the Trust is to reflect generally the performance of the price of bitcoin. The Trust seeks to reflect such performance before payment of the Trust's expenses and liabilities. The shares are intended to constitute a simple means of making an investment similar to an investment in bitcoin through the public securities market rather than by acquiring, holding and trading bitcoin directly on a peer-to-peer or other basis or via a digital asset exchange. The shares have been designed to remove the obstacles represented by the complexities and operational burdens involved in a direct investment in bitcoin, while at the same time having an intrinsic value that reflects, at any given time, the investment exposure to the bitcoin owned by the Trust at such time, less the Trust's expenses and liabilities. Although the shares are not the exact equivalent of a direct investment in bitcoin, they provide investors with an alternative method of achieving investment exposure to bitcoin through the public securities market, which may be more familiar to them.

Custody of the Trust's Bitcoin

An investment in the shares is backed by bitcoin held by the Bitcoin Custodian on behalf of the Trust. All of the Trust's bitcoin will be held in the Custody Account, other than the Trust's bitcoin which is temporarily maintained in the Trading Account under limited circumstances, *i.e.,* in connection with creation and redemption Basket[7] activity or sales of bitcoin deducted from the Trust's holdings in payment of Trust expenses or the Sponsor's fee (or, in extraordinary circumstances, upon liquidation of the Trust). The Custody Account includes all of the Trust's bitcoin held at the Bitcoin Custodian, but does not include the Trust's bitcoin temporarily maintained at the Prime Execution Agent in the Trading Account from time to time. The Bitcoin Custodian will keep all of the private keys associated with the Trust's bitcoin held in the Custody Account in ''cold storage''.[8] The hardware, software,

[3] The Exchange notes that its affiliate exchanges, MIAX Options and MIAX Pearl, submitted substantively identical proposals. The Exchange notes that all the rules of Chapter III of the MIAX Options Exchange, including Rules 307 and 309, are incorporated by reference to MIAX Pearl and MIAX Sapphire. The Exchange also notes that all of the rules of Chapter III of the MIAX Options Exchange, including Rules 307 and 309, and the rules of Chapter IV of the MIAX Options Exchange, including Rule 402, are incorporated by reference to MIAX Emerald.

[4] On January 10, 2024, the Commission approved proposals by NYSE Arca, Inc., The Nasdaq Stock Market LLC, and Cboe BZX Exchange, Inc. to list and trade the shares of 11 bitcoin-based commodity-based trust shares and trust units, including the iShares Bitcoin Trust. *See* Securities Exchange Act Release No. 99306 (Jan. 10, 2024), 89 FR 3008 (Jan. 17, 2024) (order approving File Nos. SR–NYSEARCA–2021–90; SR–NYSEARCA–2023–44; SR–NYSEARCA–2023–58; SR–NASDAQ–2023–016; SR–NASDAQ–2023–019; SR–CboeBZX–2023–028; SR–CboeBZX–2023–038; SR–CboeBZX–2023–040; SR–CboeBZX–2023–042; SR–CboeBZX–2023–044; SR–CboeBZX–2023–072) (''Bitcoin ETP Order'').

[6] *See* Securities Exchange Act Release No. 99306 (Jan. 10, 2024), 89 FR 3008 (Jan. 17, 2024) (order approving File Nos. SR–NYSEARCA–2021–90; SR–NYSEARCA–2023–44; SR–NYSEARCA–2023–58; SR–NASDAQ–2023–016; SR–NASDAQ–2023–019; SR–CboeBZX–2023–028; SR–CboeBZX–2023–038; SR–CboeBZX–2023–040; SR–CboeBZX–2023–042; SR–CboeBZX–2023–044; SR–CboeBZX–2023–072)(Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, To List and Trade Bitcoin-Based Commodity-Based Trust Shares and Trust Units) for a complete description of the Trust.

[7] The Trust issues and redeems Shares only in blocks of 40,000 or integral multiples thereof. A block of 40,000 Shares is called a ''Basket.'' These transactions take place in exchange for Bitcoin.

[8] The term ''cold storage'' refers to a safeguarding method by which the private keys corresponding to the Trust's bitcoins are generated and stored in an offline manner, subject to layers of procedures

systems, and procedures of the Bitcoin Custodian may not be available or cost-effective for many investors to access directly.

The Exchange believes that offering options on the Trust will benefit investors by providing them with an additional, relatively lower cost investing tool to gain exposure to spot Bitcoin as well as a hedging vehicle to meet their investment needs in connection with Bitcoin products and positions. Similar to other commodity-based trusts on which options may be listed on the Exchange (*e.g.,* SPDR® Gold Trust, the iShares COMEX Gold Trust, the iShares Silver Trust, or the ETFS Gold Trust),[9] the Trust essentially offers the same objectives and benefits to investors as do other commodity-based trusts on which options may be listed on the Exchange.

Options on the Trust will trade in the same manner as options on other ETFs on the Exchange. Exchange Rules that currently apply to the listing and trading of all options on ETFs on the Exchange, including, for example, Rules that govern listing criteria, expirations, exercise prices, minimum increments, position and exercise limits (including as proposed in the filing submitted by Exchange's affiliate, MIAX Options), margin requirements, customer accounts and trading halt procedures, will apply to the listing and trading of options on the Trust on the Exchange. Today, these rules apply to options on the various commodities-based trusts deemed appropriate for options trading on the Exchange pursuant to Exchange Rule 402(i)(4).

The Exchange's initial listing standards for ETFs on which options may be listed and traded on the Exchange will apply to the Trust. Pursuant to Exchange Rule 402(a), a security (which includes ETFs) on which options may be listed and traded on the Exchange must be duly registered (with the Commission) and be an NMS stock (as defined in Rule 600 of Regulation NMS under the Act,) and be characterized by a substantial number of outstanding shares that are widely held and actively traded. Exchange Rule 402(i) requires that, in relevant part, ETFs must either (1) meet the criteria and standards set forth in Exchange Rule 402(a) or Exchange Rule 402(b), or (2) be available for creation or redemption each business day from or through the issuer in cash or in kind at a price related to net asset value, and the issuer must be obligated to issue ETFs in a specified aggregate number even if some or all of the investment assets required to be deposited have not been received by the issuer, subject to the condition that the person obligated to deposit the investments has undertaken to deliver the investment assets as soon as possible and such undertaking is secured by the delivery and maintenance of collateral consisting of cash or cash equivalents satisfactory to the issuer, as provided in the respective prospectus.

Options on the Trust will also be subject to the Exchange's continued listing standards set forth in Exchange Rule 403(g), for ETFs deemed appropriate for options trading pursuant to Exchange Rule 402(i). Specifically, Exchange Rule 403(g) provides that ETFs that were initially approved for options trading pursuant to Exchange Rule 402(i) shall be deemed not to meet the requirements for continued approval, and the Exchange shall not open for trading any additional series of option contracts of the class covering that such ETFs, if the ETFs are delisted from trading pursuant to Exchange Rule 403(b)(4), are halted or suspended from trading in their primary market. Additionally, options on ETFs may be subject to the suspension of opening transactions in any of the following circumstances: (1) in the case of options covering ETFs approved for trading under Exchange Rule 402(i)(5)(i)(A), in accordance with the terms of paragraphs (b)(1), (2), and (3) of Exchange Rule 403; (2) in the case of options covering ETFs approved for trading under Exchange Rule 402(i)(5)(i)(B), following the initial twelve-month period beginning upon the commencement of trading in the ETFs on a national securities exchange and are defined as an NMS stock, there are fewer than 50 record and/or beneficial holders of such ETFs for 30 or more consecutive trading days; (3) the value of the index or portfolio of securities, non-U.S. currency, or portfolio of commodities including commodity futures contracts, options on commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or financial instruments and money market instruments on which the ETFs are based is no longer calculated or available; or (4) such other event shall occur or condition exist that in the opinion of the Exchange makes further dealing in such options on the Exchange inadvisable.

Options on the Trust would be physically settled contracts with American-style exercise.[10] Consistent with current Exchange Rule 404, which governs the opening of options series on a specific underlying security (including ETFs), the Exchange will open at least one expiration month for options on the Trust[11] and may also list series of options on the Trust for trading on a weekly,[12] monthly,[13] or quarterly[14] basis. The Exchange may also list long-term equity option series (''LEAPS'') that expire from 12 to 39 months from the time they are listed.[15]

Pursuant to Exchange Rule 404, Interpretation and Policy .06, which governs strike prices of series of options on ETFs, the interval between strike prices of series of options on ETFs approved for options trading pursuant to Exchange Rule 402(i) shall be fixed at a price per share which is reasonably close to the price per share at which the underlying security is traded in the primary market at or about the same time such series of options is first open for trading on the Exchange, or at such intervals as may have been established on another options exchange prior to the initiation of trading on the Exchange. With respect to the Short Term Options Series or Weekly Program, during the month prior to expiration of an option

designed to enhance security. Private keys are generated by the Bitcoin Custodian in offline computers that are not connected to the internet so that they are more resistant to being hacked.

[9] *See* Exchange Rule 402(i)(4).

[10] *See* Exchange Rule 401, which provides that the rights and obligations of holders and writers are set forth in the Rules of the Options Clearing Corporation (''OCC''); *see also* OCC Rules, Chapters VIII (which governs exercise and assignment) and Chapter IX (which governs the discharge of delivery and payment obligations arising out of the exercise of physically settled stock option contracts).

[11] *See* Exchange Rule 404(b). The monthly expirations are subject to certain listing criteria for underlying securities described within Exchange Rule 404 and its Interpretations and Policies. Monthly listings expire the third Friday of the month. The term ''expiration date'' (unless separately defined elsewhere in the OCC By-Laws), when used in respect of an option contract (subject to certain exceptions), means the third Friday of the expiration month of such option contract, or if such Friday is a day on which the exchange on which such option is listed is not open for business, the preceding day on which such exchange is open for business. *See* OCC By-Laws Article I, Section 1. Pursuant to Exchange Rule 404(c), additional series of options of the same class may be opened for trading on the Exchange when the Exchange deems it necessary to maintain an orderly market, to meet customer demand or when the market price of the underlying stock moves more than five strike prices from the initial exercise price or prices. Pursuant to Exchange Rule 404(e), new series of options on an individual stock may be added until the beginning of the month in which the options contract will expire. Due to unusual market conditions, the Exchange, in its discretion, may add a new series of options on an individual stock until the close of trading on the business day prior to expiration.

[13] *See* Exchange Rule 404, Interpretations and Policies .13.

[14] *See* Exchange Rule 404, Interpretations and Policies .03.

[15] *See* Exchange Rule 406(a).

class that is selected for the Short Term Option Series Program, the strike price intervals for the related non-Short Term Option (''Related non-Short Term Option'') shall be the same as the strike price intervals for the Short Term Option.[16] Specifically, the Exchange may open for trading Short Term Option Series at strike price intervals of (i) $0.50 or greater where the strike price is less than $100, and $1 or greater where the strike price is between $100 and $150 for all option classes that participate in the Short Term Options Series Program; (ii) $0.50 for option classes that trade in one dollar increments and are in the Short Term Option Series Program; or (iii) $2.50 or greater where the strike price is above $150.[17] Additionally, the Exchange may list series of options pursuant to the $1 Strike Price Interval Program,[18] the $0.50 Strike Program,[19] and the $2.50 Strike Price Program.[20] Pursuant to Exchange Rule 510, where the price of a series of options for the Trust is less than $3.00, the minimum increment will be $0.05, and where the price is $3.00 or higher, the minimum increment will be $0.10 [21] consistent with the minimum increments for options on other ETFs listed on the Exchange. Any and all new series of Trust options that the Exchange lists will be consistent and comply with the expirations, strike prices, and minimum increments set forth in Rules 404 and 510, as applicable.

Position and exercise limits for options on ETFs, including options on the Trust, are determined pursuant to the Exchange's affiliate MIAX Options Rules 307 and 309, respectively. Position and exercise limits for ETF options vary according to the number of outstanding shares and the trading volumes of the underlying ETF over the past six months, where the largest in capitalization and the most frequently traded ETFs have an option position and exercise limit of 250,000 contracts (with adjustments for splits, re-capitalizations, etc.) on the same side of the market; and smaller capitalization ETFs have position and exercise limits of 200,000, 75,000, 50,000 or 25,000 contracts (with adjustments for splits, re-capitalizations, etc.) on the same side of the market. The Exchange further notes that the Exchange's affiliate MIAX Options Rule 1502, which governs margin requirements applicable to trading on the Exchange, including options on ETFs, will also apply to the trading of the Trust options. Notwithstanding the position limits in the Exchange's affiliate MIAX Options Rule 307(d) and exercise limits in the Exchange's affiliate MIAX Options Rule 309, the Exchange proposes the position and exercise limits for the options on the Trust to be 25,000 contracts on the same side pursuant to proposed Supplementary Material .01 to the Exchange's affiliate MIAX Options Rule 307 and proposed Supplementary Material .01 to the Exchange's affiliate MIAX Options Rule 309.

The Exchange represents that the same surveillance procedures applicable to all other options on other ETFs currently listed and traded on the Exchange will apply to options on the Trust. Also the Exchange represents that it has the necessary systems capacity to support the new option series. The Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading options on ETFs, including the proposed Trust options.

Today, the Exchange has an adequate surveillance program in place for options. The Exchange intends to apply those same program procedures to options on the Trust that it applies to the Exchange's other options products.[22] The Exchange's staff will have access to the surveillance programs conducted by its affiliate exchanges, MIAX Options and MIAX Pearl with respect to trading in the shares of the underlying Trust when conducting surveillances for market abuse or manipulation in the options on the Trust. Additionally, the Exchange is a member of the Intermarket Surveillance Group (''ISG'') under the Intermarket Surveillance Group Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. In addition to obtaining surveillance data from MIAX Options and MIAX Sapphire, the Exchange will be able to obtain information regarding trading in the shares of the underlying Trust from Nasdaq, LLC and other markets through ISG. In addition, the Exchange has a Regulatory Services Agreement with the Financial Industry Regulatory Authority (''FINRA''). Pursuant to a multi-party 17d–2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillance that are common to rules of all options exchanges.[23]

The underlying shares of spot bitcoin ETPs, including the Trust, are also subject to safeguards related to addressing market abuse and manipulation. As the Commission stated in Bitcoin ETP Order:

Each Exchange has a comprehensive surveillance-sharing agreement with the CME via their common membership in the Intermarket Surveillance Group. This facilitates the sharing of information that is available to the CME through its surveillance of its markets, including its surveillance of the CME bitcoin futures market.[24]

The Exchange states that, given the consistently high correlation between the CME bitcoin futures market and the spot bitcoin market, as confirmed by the Commission through robust correlation analysis, the Commission was able to conclude that such surveillance sharing agreements could reasonably be ''expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the [Bitcoin ETPs].'' [25]

In light of surveillance measures related to both options and futures as well as the underlying Trust,[26] the Exchange believes that existing surveillance procedures are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading the proposed options on the Trust. Further, the Exchange represents that it will implement any new surveillance

[22] The surveillance program includes real-time patterns for price and volume movements and post-trade surveillance patterns (*e.g.,* spoofing, marking the close, pinging, phishing).

[23] Section 19(g)(1) of the Act, among other things, requires every SRO registered as a national securities exchange or national securities association to comply with the Act, the rules and regulations thereunder, and the SRO's own rules, and, absent reasonable justification or excuse, enforce compliance by its members and persons associated with its members. See 15 U.S.C. 78q(d)(1) and 17 CFR 240.17d–2. Section 17(d)(1) of the Act allows the Commission to relieve an SRO of certain responsibilities with respect to members of the SRO who are also members of another SRO (''common members''). Specifically, Section 17(d)(1) allows the Commission to relieve an SRO of its responsibilities to: (i) receive regulatory reports from such members; (ii) examine such members for compliance with the Act and the rules and regulations thereunder, and the rules of the SRO; or (iii) carry out other specified regulatory responsibilities with respect to such members.

[26] *See* Securities Exchange Act Release No. 99295 (January 8, 2024), 89 FR 2321, 2334–35 (January 12, 2024) (SR–NASDAQ–2023–016) (Notice of Filing of Amendment No. 1 to a Proposed Rule Change To List and Trade Shares of the iShares Bitcoin Trust Under Nasdaq Rule 5711(d)).

procedures it deems necessary to effectively monitor the trading of options on the Trust.

The Exchange has also analyzed its capacity and represents that it believes the Exchange and Options Price Reporting Authority or ''OPRA'' have the necessary systems capacity to handle the additional traffic associated with the listing of new series that may result from the introduction of options on the Trust up to the number of expirations currently permissible under the Rules. Because the proposal is limited to one class, the Exchange believes any additional traffic that may be generated from the introduction of the Trust options will be manageable. Finally, the Exchange proposes a technical amendment to Exchange Rule 402(i)(4) to amend the name ''ETFS Gold Trust'' to ''Aberdeen Standard Physical Gold Trust.'' In 2018 ETFS Gold Trust was renamed.[27] At this time, the Exchange proposes to amend the name of the ETF to reflect its current name.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[28] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [29] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section (6)(b)(5) [30] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes that the proposal to list and trade options on the Trust will remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors because offering options on the Trust will provide investors with a greater opportunity to realize the benefits of utilizing options on an ETF based on spot bitcoin, including cost efficiencies and increased hedging strategies. The Exchange believes that offering options on a competitively priced ETF based on spot bitcoin will benefit investors by providing them with an additional, relatively lower-cost risk management tool, allowing them to manage, more easily, their positions and associated risks in their portfolios in connection with exposure to spot bitcoin. Today, the Exchange lists options on other commodity ETFs structured as a trust, which essentially offer the same objectives and benefits to investors, and for which the Exchange has not identified any issues with the continued listing and trading of options on those ETFs.

The Exchange also believes the proposal to permit options on the Trust will remove impediments to and perfect the mechanism of a free and open market and a national market system, because options on the Trust will comply with current Exchange Rules. Options on the Trust must satisfy the initial listing standards and continued listing standards currently in the Exchange Rules, applicable to options on all ETFs, including options on other commodity ETFs already deemed appropriate for options trading on the Exchange pursuant to Exchange Rule 402(i)(4). Further, Exchange Rules that currently govern the listing and trading of options on ETFs, including permissible expirations, strike prices, minimum increments, position and exercise limits (including as proposed in the filing submitted by Exchange's affiliate, MIAX Options), and margin requirements, will govern the listing and trading of options on the Trust. The proposed position and exercise limits for options on the Trust is 25,000 contracts. These position and exercise limits are the lowest position and exercise limits available in the options industry, are extremely conservative and more than appropriate given the Trust's market capitalization, average daily volume, and high number of outstanding shares. The proposed position limit, and exercise limit, is consistent with the Act as it addresses concerns related to manipulation and protection of investors because the position limit (and exercise limit) is extremely conservative and more than appropriate given the Trust is actively traded.

The Exchange represents that it has the necessary systems capacity to support options on the Trust. The Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might arise from listing and trading options on ETFs, including the Trust options. Today, the Exchange has an adequate surveillance program in place for options. The Exchange intends to apply those same program procedures to options on the Trust that it applies to the Exchange's other options products.[31] The Exchange's staff will have access to the surveillance programs conducted by its affiliate exchanges, MIAX Options and MIAX Sapphire with respect to the underlying Trust when conducting surveillances for market abuse or manipulation in the options on the Trust. The Exchange will review activity in the underlying Trust when conducting surveillances for market abuse or manipulation in the options on the Trust. Additionally, the Exchange is a member of the ISG under the Intermarket Surveillance Group Agreement. ISG members work together to coordinate surveillance and investigative information sharing in the stock, options, and futures markets. In addition to obtaining surveillance data from MIAX Options and MIAX Sapphire, the Exchange will be able to obtain information from ISE and other markets through ISG. In addition, the Exchange has a Regulatory Services Agreement with FINRA. Pursuant to a multi-party 17d–2 joint plan, all options exchanges allocate regulatory responsibilities to FINRA to conduct certain options-related market surveillance that are common to rules of all options exchanges.[32]

The underlying shares of spot bitcoin ETPs, including the Trust, are also
